He Loves Me... He Loves Me Not

 Veronica Swift  [October 5, 2021](#)  [2 Comments](#)

2

This post is an attempt to begin to understand a bit about the programming that is used in the Illuminati Brotherhood. All of the information is taken from a book titled *How to Create an Undetectable Mind Control Slave* by Cisco Wheeler and Fritz Springmeier (W&S), unless otherwise noted. As always, I'm inviting you to come along for the ride, if you wish to learn, too. Programming involves particularly nasty stuff, so:

Trigger warning—methods of torture, programming details which might be triggering for programmed survivors and pretty much anybody with a heart. Proceed at your own risk.

The Illuminati Brotherhood (system, cabal, deep state, elite—and a new name from this book, Moriah) doesn't rely on willing cooperation from its members. In fact, many want out, but feel trapped, and most are held inside by threats of death bodily harm to loved ones or themselves if they try. Defectors who run are hunted, brought back and tortured in front of other members as a way of discouraging them from trying to get out. Given the fact that it's such a highly undesirable group to be a part of, the Illuminati has to have ways of forcing people to stay in the group. Programming is one of the tools that the Illuminati use to keep their people enslaved to the system, hence the portion of the book title "Mind Controlled Slave".

Programming

Programming is essentially a highly sophisticated system of abuse designed to take a child or adult to the brink of not being able to handle the pain or torture any more. When that happens, the individual either physically dies, or to survive the pain their mind cracks, sometimes called splitting. The brain splits can then be managed, coded, compartmentalized and instructed by a handler, or programmer, with numerical codes, trigger words, or instructions designed to cause that split portion of the brain to behave in a manner different than other parts of the brain. Many times, those split portions are amnesic for the other pieces. In a very simplistic sense it's the equivalent of having many different people's personalities inhabiting one body. Each portion of the brain can act different, feel a different age, speak a different language, have different abilities, strengths and might perceive the body differently, such as one part being a girl with brown hair, and another part being blonde and male. The parts can also react differently to stimuli, including light, sound, smell, touch and drugs. One part could be allergic to a food item, and another part might be a diabetic, and none of these would be shared traits outside of each individual part. It's fantastical, but this is the way it works. The human brain is a wondrous thing.

A portion of the brain that has been split by trauma is sometimes also called an alter. One of these alters could be trained as a Luciferian killer and cannibal that operates during the evening, while another part of the brain could be trained as a devout Christian housewife. Neither part of the brain likely knows the other exists, and would be surprised if not shocked to discover the other in their body. Denial would be absolute, perhaps even in the face of evidence to the contrary. In modern psychology, this kind of brain compartmentalization is known as Dissociative Identity Disorder, or DID, formerly known as Multiple Personality Disorder. "Some survivors have programming, but don't have alter systems. A rare few do not have systems, but only a few dissociative states, such as a night self and a day self." (pg 24 W&S) Not all programming results in DID, but a lot of it does. When the programming goes awry, as it often does, these individuals are sometimes labelled schizophrenic, and put in mental institutions designed to keep them drugged and locked-away so that they cannot spill the beans.

Monarch

The Monarch butterfly is used as the symbol and name that encompasses all sorts of Illuminati and non-illuminati mind-control sub-programs. In nature, the Monarch butterfly remembers and passes its memory of where it is born and where it will migrate to its offspring. In the context of programming, each person born will be programmed, and the preparation for training and the use of certain techniques that make a person receptive to being programmed are passed-along from parent to child. The butterfly theme that symbolizes programming seems to be everywhere, and is used as a symbol or reminder that children and adults of the system are owned and handled.

lsthisreal
@1sthis34l

...

Monarch programming is a form of mind control which creates a mind control slave by utilizing the human brain's trauma response of dissociation to create a form of Multiple Personality Disorder (MPD)

9:43 AM · Jul 31, 2021

3 Retweets 7 Likes 1 Bookmark

“Parents in (the) eastern United States were taken to Harvard University for training to teach them how much trauma they could give their children at home before they would die. After the children got back from their initial programming they were to receive daily traumas to keep them dissociative.” (page 26 W&S) One of the daily traumas could be rape by the father, for example.

Pretty much every member of the Illuminati is programmed and traumatized from a very young age, except a handful of folks at the very top levels. High level elite would get different programming than a presidential model sex slave, who would be programmed differently than a Delta force military man. Just so you get a sense for the scope of the number and kinds of programming that they use, I’ve listed the names of a few—a few—of the programs here.

Project Marionette

Anna [Starfire](#), an actual MK Ultra survivor, (NOT the character in the DC comics) talks about Marionette/puppet programming a bit in her book [MK Ultra Dark Labs 1959 to 1975](#). ‘I was a donated child given to the MK Ultra mind control programs Project Monarch and Project Marionette.’ “I was used in stage animation for the dancing tiny robots...I was sent to work as a human robot for the amusement park for free.” They fitted her brain with implants behind her forehead, which caused her face to cave in. They inserted wired cassettes for robotic cables to synch the dance movements” and an “electrode cap provided electricity to the muscles for movement.” “During the down times, the babies with implanted brain grids were given a frequency fence which they trained on using a baby gate and light taps with a shock stick.” “When the babies were awake for feeding... the military taught them to stay on their side of the fence, by scaring them and shocking them for negative reinforcement. Sometimes we spent hours laying on the tile floor in straight-jackets.” (pgs 151-152) “When all twenty children had been set upon the stage, the technicians would turn the electrical equipment on for robotic movements all synched up to music. It was a macabre scene as the music started and the human babies jerked to life with electricity, twirling and smiling.” (pg 153)

“All twenty babies were drugged and had no motor cortex control available since the electronics dominated the brain.” “This was important for military research for later use by satellites and cell towers.” “When each stage area was finished, they would scan the bar codes and move any surviving baby dolls to the next area.” (pg 153) “At the end of each day, the baby dolls would become butterflies as they died from electrical shock.” Technicians would wrap the bodies in wide gauze, like a butterfly cocoon. “The orphans and the Indians would go to burn pits or mass graves.” If an especially large number of children died, the Sunland Hospital told the families there was a large pneumonia outbreak.

I’d like to say that Starfire’s experience was extra-unique, but it probably isn’t. Most programming is done with electric shock or other forms of torture, and not everybody survives. More and more people speak of brain implants as part of their Illuminati experience, and although hers were more extensive than most seem to be, it certainly does seem to be a theme. Much Illuminati programming is done in and for the military, as hers was. Her story is difficult to digest, but then again, so is most of the stuff we learn about the Illuminati. The only thing she didn’t do that so many others do is dissociate. Instead, she became autistic. Autism as a poor reaction to programming isn’t uncommon, either, according to Wheeler and Springmeier, “The programmers for many years didn’t know why some children developed autism from the trauma rather (than) MPD/DID. The programmers are not able to reach such children, and most were discarded into mental hospitals or used in rituals, until about 20 years ago when more and more of them were allowed to survive in public.” (pg 66) Autism can be one result, then, when mind control goes awry.

Jessie Czebotar @CzebotarJessie · Apr 22, 2020
No one chooses to be programmed

...

Some just stop fighting against the **programming** and their moral consciousness and embrace the lie that they want to do what they are doing...

Some really do enjoy the evil.

Moonchildren

A Moonchild ritual is done on an unborn child, still in the womb, and is done to demonize a fetus, i.e. attach generational demons to the children of elite Illuminati families. This is an important precursor for programming of certain bloodline families. The formal development of how to create a Moon Child was studied by Aleister Crowley, who went to the Italian Illuminati families to study their ways. That information was transferred to German Nazi's who studied it further in the 1920's then brought it to the USA and formalized it in Project Monarch in the 1940's, along with a bunch of other techniques. They were honing their programming craft in the early 1900's.

Monarch style programming that exists today is a highly refined system that was studied and improved-upon in government-funded projects that retain names like Project Monarch, Project MK Ultra, Project Artichoke, and [Project Bluebird](#). Blue butterfly tattoos were often used by American intelligence agencies to identify their slaves. (pg 486 W&S) Interestingly, blue butterflies were recently used as a symbol in the [4th Matrix Movie](#).

Before the formal Moonchild ritual on a fetus, the mother would undergo torture while she was pregnant. This also traumatized the child. They used techniques like inserting long needles poked into the womb to prick the baby, blasting loud music, physical abuse, abandonment, and anything to create fear in the mother which would transfer to the baby. After that, a formal Moon Child ritual would occur, whose goal would be to attach generational demons to the unborn child. At times, this ritual would result in a premature birth. The Moonchild ritual and premature birth are the first and second steps to programming a child, according to Springmeier and Wheeler.

The third step prior to formal programming is to shower the preemie with love until they are about 18 months. After being loved, it will be a trauma to have that love removed, and replaced with torture, which is step 4. Step 4 is designed to split the mind. This is the process that Cisco Wheeler underwent at the hands of her father, the notorious Dr. Black, aka Leo Wheeler. (pg 525 W&S)

China Lake

The US Naval Ordnance Test Station at China Lake, California is an area about halfway between Bakersfield, California and Las Vegas, Nevada, and is a location where thousands of children had their initial programming and mind splits performed. "The Monarch Mind Control was carried out in large airplane hangers on the base which have been able to house thousands of tiny cages just large enough for human babies. Lots of 1,000 babies was a small batch." (page 48 W&S) More common lots were of 2-3,000 or more. The cages were called "Woodpecker Grids" and were electrified on all sides, allowing electrical shocks to the babies, who, after a few days, were then brutally raped. There was one room where a stone slab altar was used to sacrifice children in front of the caged children. All this torture, just to create a split of their mind. While their children are being programmed, some of the adults stay on base in the Quonset huts.

Natural phobias that many are born with were found to be great tools for splitting the mind. Fear of snakes, spiders, blood and internal body parts were all used with great success. Other types of torture used in programming included being immersed into containers of body fluids and excrement, killing and eating other humans, being locked in a pit or cage with spiders and snakes, and being made to eat disgusting things. (Sounds a bit like an old reality show Fear Factor where people were forced to eat spiders and stay in boxes with tarantula's, among other things.) Cutting genitalia, medieval torture devices, near death by drowning, abuse or attacks by animals like sadistic chimpanzees or german shepards, losing parts of fingers, dislocated shoulders—all these and more are likely to have been experienced in the early stages of programming by a child destined to be a slave in the system. (pgs 56-57 W&S) There's more, but it's so awful I feel uncomfortable detailing it here.

"It doesn't take long for the child to realize it has no ability to resist what is being done to it. The will of the child victim is destroyed, and in its place remains a pliable slave. If the slave doesn't learn correctly they receive more pain." (pg 59 W&S)

Programming isn't just done at China Lake, there have been many locations, some historic and defunct, and some still active, including the Portland Mormon Temple in Lake Oswego Oregon, Disneyworld and Disneyland, Area 51, Bethesda Naval Hospital, Fort Hood Texas, Fort Lewis Washington, Hollywood CA, Lamp MO (near Branson), Mormon Temple Salt Lake City Utah, Tinker Air Force Base Oklahoma, and many, many more. (pgs 540-549 W&S)

Programming has been improved-upon throughout the decades, and later in the book it is reported that “Much of the high level programming in the 1980s and 1990s is no longer done with human programmers, but is done via programmed machines using drugs, electricity and harmonics.” Now that it’s 2021, one has to wonder what improvements have been made in the past 40 years.

Handlers

Programmed slaves have handlers. “The slave handler will carry a black or grey spiral book with all their own slave’s access codes, triggers, cryptic keys and programs. All this will fit into a brief case.” (pg 249 W&S). Oftentimes, the handler will also carry a stun gun disguised as a cane or staff. “Because the slave is under the most powerful combinations of mind-control and is so divided against his or her own self, it is almost impossible to have many problems with the slave if the handler does what he is supposed to do. However, some handlers get drunk or loan the slave to inexperienced people, etc. and problems do develop.” The brief case with the programming book, and a stun gun are basically the only tools that a handler needs to control his slave for life. (pg 249 W&S)

“The Queen Mother’s staff... has an electric stun gun hidden in it.” “Children in day care centers are reporting small boxes with wires that electroshock them during programming.” (pg 249 W&S)

Replies to @prayingmedic

Aren't the elites the ones who do the **programming** for deep state and put people into strategic positions...only so many know how to program...we will see how that goes for them...but I agree...I think they shall try to shift the blame...lol

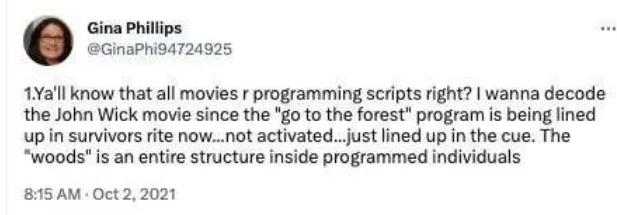

Naming Names

Some of the programmers that might be recognizable names to most Americans include:

- [**Bill Bennett**](#)
- Michael Aquino (I find it interesting that Michael Aquino has no Wikipedia entry)
- [**Senator Robert C. Byrd**](#)
- [**Kris Kristofferson**](#)
- [**Jerry Lee Lewis**](#)
- [**Josef Mengele** \(Dr. Green\)](#)
- [**Guy de Rothschild**](#)

Current programs

Because the book by Wheeler and Springmeier is older, and the information in it is excellent but not current, I thought I’d tie it in here with some more modern information. One thing Gina Phillips said recently on Twitter is “Y’all know that all movies are programming scripts, right?! Uh–no, Gina, but I guess I do now, lol.

Gina Phillips @GinaPhi94724925

1.Ya'll know that all movies r programming scripts right? I wanna decode the John Wick movie since the "go to the forest" program is being lined up in survivors rite now...not activated...just lined up in the cue. The "woods" is an entire structure inside programmed individuals

In that same thread from October 2, 2021, Gina talks about the “Into the woods” program that is being lined-up in programmed individuals right now. Not activated, but “in the queue”. She says that she wants to decode the “John Wick” movie, and it does tie in with exactly what Wheeler and Springmeier wrote about.

John Wick is an orphan taken in by the Russian mafia and raised to be an assassin. Gina notes that all initial programming of slaves involves a mock death of their parents, which is usually a trick but still serves to traumatize the child. The mafia are listed on pg 29 of W&S’s book as being one organization that uses trauma-based programming. Delta programming is what is used to

create an assassin. (pg 14 W&S) So, basically, the entire basic premise of the movie has exact parallels to Illuminati programming.

But there's more. John has a puppy named Daisy who was the gift of his late wife. Someone kills the puppy (more trauma). Puppies are used in early childhood programming. Daisy flowers are also used in flower programming: Mengele used to slowly pick petals off of daisy flowers saying "you love me, you love me not" which is a childhood game most people in the USA have experienced. In programming, the last petal picked, if "love me not" means the child will be killed (by being skinned alive in front of the survivors pg 471 W&S). The anticipation of not knowing if they will be killed or not at the end of this sadistic game is another trauma of programming, and if you survived that game you would be severely traumatized. (pg 86 W&S)

But there's... even more. John Wick's nickname is "Baba Yaga". [Baba Yaga](#) "is a child eating monster tied to Hansel & Gretel programming, which is also an "into the woods" program. Baba Yaga is a witch, with chicken legs, and represents a trinity God, maid, mother crone (just like the 3 top mothers of Darkness). She's a shapeshifter, like the Grimm's I mentioned in [this past blog](#).

Gina says that "The Those Baba Yaga handlers would be traveling around coding this John Wick movie cues for those with that movie program." References to camping, 'babes in the woods', Hansel & Gretel and Grimm's fairy tales might also be comms related to this program.

To be honest, I've never heard of John Wick the movie before I read her thread, but I have seen references to John Wick pop up recently with regard to Jessie Czebotar. Anybody else [seen them](#), too?

You can find the .pdf file to reference the page numbers in Wheeler and Springmeier's book [here](#). There are multiple copies of this book all over the internet, but the page numbers are specific to this particular version, which is also useful because it contains the full introduction and appendices.

You can find a .pdf of the John Wick Thread by Gina Phillips [here](#) or [here](#).

It's taken me about 5 attempts to successfully read all of this post. There's so much to tackle! So much darkness. So many questions! The title of your post reminds me of the fact that some Girl Scouts are

called Daisies, right? Juliette Gordon Low was the founder of Girl Scouts after meeting Lord Baden Powell who has had accusations thrown at him regarding pedophilia. Might be a nice side rabbit hole to go down, though admittedly there's probably no connection.
