

MIND CONTROL IN THE UK

by Tim [Rifat](#) BSc BEd.

From an article in [The Truth Campaign Magazine](#) Spring 99

Torture is alive and well in the UK. MI5, the UK's secret police, regularly use Non-Lethal Weapons on any dissidents. Since MI5 have a well-documented history of hating the Labour Party, and were instrumental in bringing down the Labour Prime Minister Harold Wilson, they naturally took to spying on, and discrediting, any group or person who did not follow their rabid right wing dogma. When Margaret Thatcher became Prime Minister of a right-wing Conservative Government in 1979, she soon saw the power in recruiting MI5 to be her own secret police. During the Miner's strike in the early eighties, Arthur Scargill and his National Union of Miners nearly brought the Conservative Government down, with their year long strike. Margaret Thatcher used MI5 to spy on the miners and discredit Scargill. Leading police officers argued against the use of MI5 on the civilian population, they were ignored or replaced - if they proved too vociferous.

Margret Thatcher was the first Prime Minister for many a year to sit in on the Joint Intelligence Committee's meetings on a regular basis. Thatcher, as a trained scientist, would have been well aware of the usefulness of microwave weapons. They are impossible to detect unless you have a detector, dissidents have no idea these weapons exist and best of all, they are totally deniable. It may be that MI5 kept this research secret from Thatcher, but the resources the UK has put into these fearsome, so-called non-lethal weapons, is extensive. UK intelligence runs a fleet of microwave weapon carrying vans, as well as portable microwave weapons that can be deployed near the dissident's home. The vast expense can be disguised as communications equipment, for as well all know, microwave telephone communication is all the rage in our modern world. My research shows that the microwave telephone network also has the potential to be used as a major mind control weapon system to control the behaviour of the microwave phone users.

Developed under the Conservative government, which was in power from 79-97, the UK secret, or black government, has at its disposal a fearsome array of mind control weapons. These abhorrent devices are euphemistically called non-lethal weapons by the UK military. In fact they kill you slowly by causing nerve damage, cancers, mental collapse leading to suicides or tissue failure such as heart attacks due to the cooking effect of the microwaves.

Precisely modulated microwave radiation is used to influence brain function. Human behaviour and reactions can be entirely controlled by using pulse modulated microwave EM radiation. Pulse modulated microwaves are useful as the carrier for the mind control signals as they are able to pass through the skull, which is rather resistant to low level EM. The massive number of microwave antennae that dot the country, some of which are used for the microwave phone network, all use pulse modulated microwaves, which makes their use for a strategic mind control device against the civilian population in times of trouble, or rioting, crucial to modifying the behaviour of the general population. In modern democracies it is no longer viable to shoot rioters, or torture dissidents by normal means, as the bad publicity is self defeating. Thus, microwave weapons have been developed by the UK's military intelligence as they leave no marks, or gaping wounds. This pulse modulated microwave carrier beam can then be used to carry signals. These signals are extremely low frequency recordings of brain electrical potentials, which have been recorded by neuro-medical researchers such as Dr Ross [Adey's](#). Dr Ross Adey's research at the Brain Research Institute of the University of California, was funded by the CIA. In their Pandora project a catalogue of different brain signals for specific actions, emotions and pathological states of mind were recorded. It was found that when microwaves were used to fire these signals at victims' brains, they experienced the moods, behaviour, and the pathological states, carried by the signals. This meant that by mimicking natural brain frequencies, the human brain could be controlled remotely by use of extremely low frequency broadcast carried by pulse modulated microwave beams (ELF pulse modulated microwave remote mind control technology)

It is now possible to broadcast mind control commands directly into the brain by use of microwave beams. All that is needed is a catalogue of every specific brain frequency for each - mood, action and thought. These catalogues of excitation potentials are available from Russian neuro-medical research institutes, so anyone with enough cash can have the same technology at their disposal as UK military mind control groups. (the

psychological enforcement arm of MI5). The Aum sect bought microwave weaponry via their 50,000 Russian converts.

Particular excitation potential, is then broadcast by pulse modulated microwave transmitter. This pulse modulated microwave beam has the ELF excitation potential frequency imprinted upon it. It was found that each behavioural set in humans has a distinctive frequency. There was one for anger, suicide, hysteria, trauma, serial killing, paranoia, lust, etc. Intelligence operatives in the UK regularly park microwave transmitters outside targets' houses and beam specific mood inducing excitation potentials at the victims. To aid them they have sophisticated millimetre wave scanners to look through the victims walls, so they can see the targets in their homes. Pulse modulated microwaves are directed at their victims' brains, while other people in their homes are oblivious of what is going on. A leading conspiracy researcher, who looks into the GCHQ at Cheltenham, found one of these vans with two spheres on its roof, parked in his road. He took the number plate and through contacts checked who owned it. It was an MOD van.

Hopefully he has found the microwave weapon system before it has done him too much harm.

These microwave weapons were developed allegedly at Marconi.

When firing microwave beams through walls at one target, every material in the way of the beam attenuates or modifies the intensity and frequency of the beam. Since precise frequencies and intensities are needed for mind control, very sophisticated microwave arrays and computer programmes had to be developed so that the microwave beam could be changed in response to the materials which lay between the target and the weapon, as the victim moved around his house. To do this, the reflectivity and refractivity of the materials had to be analysed in real-time and fed to a computer which could change the microwave array in concert with the changing environment between victim and weapon. There also had to be an automatic interrupter if another person walked in front of the beam. The victim needed to be driven mad or disabled, without anyone else being aware that they were being targeted. The technology for this was very complex but eventually it was perfected. Twenty-five or more scientists and military personnel associated with the Marconi project then died in mysterious circumstances. Intelligence regularly kill people to keep them quiet. Maybe intelligence personnel killed the entire research team to keep such a diabolical weapon secret.

For if it were made public the scandal would bring down the government. Whatever the real story, by the mid to late eighties, all the problems had been ironed out and these new smart microwave weapons were deployed on the UK's streets. Northern Ireland would have proved the perfect place to test them out. Pulse modulated microwave weapons had now come of age. By this method, any mood or behavioural set, can be conditioned into the target's brain. Intelligence agents keep a log of the victim's behaviour to see if more intense 'treatment' is needed and as a guide for future mind control projects.

It is alleged that by this method, UFO and conspiracy researchers, are routinely driven to commit suicide. Having the excitation potential for suicide beamed into your brain day and night by microwave mind control weapons, soon resets the brain into a cycle of depression that spirals out of control ending in suicide. Many intelligence and technical officers in the UK, who have spilled the beans, or could be a potential leak, are driven to commit suicide by the special mind control teams run by MI5. If you look at the long list of UK military and intelligence experts who inexplicably commit suicide, one can see an underlying mind control logic that drives them to kill themselves. Behavioural reinforcement is used in a synergistic way with the mind control. It was found that the effect of the microwave beams could be greatly enhanced by external reinforcement. Intelligence community personnel destroy the target's property, ruin their financial affairs spread vicious rumour, make sexual peccadilloes public knowledge - such as wearing women's underwear, while checking oneself - with an orange in one's mouth. External reinforcement of pulse modulated microwave mind control technology was found to be very effective.

Intelligence chiefs are now in seventh heaven, if some one becomes a problem they get the 'suicide mind control team' parked outside their house. Within weeks, the victim kills himself. This is very phasing to the intelligence mandarins, as suicides are easy to explain away - even if the victim was a highly placed politician or military man. If the military intelligence agency does not wish you to commit suicide, they can drive you mad. This is done by beaming the excitation potential of a particular pathological mental state at your brain while you are at home. To aid in this, the intelligence operatives can place sounds and speech in the target victim's brain. This

inter-cerebral hearing is used to drive the victim mad, as no one else can hear the voices transmitted into the brain of the target. Transmission of auditory data directly into the targets' brains using microwave carrier beams is now common practise. Instead of using excitation potentials, one uses a transducer to modify the spoken word into ELF audiograms, that are then superimposed on the pulse modulated microwave beam.

Discrediting well known people who are causing problems for the shadowy elite, by driving them mad, seems to be standard operating procedure for the intelligence community. Victims are subject to pulse modulated microwaves which carry different types of madness and behavioural abbreviations, encoded as ELF excitation potentials. This makes the troublesome high profile person, display manic or insane behaviour that discredits them. Examples of this technique are allegedly: David Icke, Fergie, Princess Diana...

Outside environmental reinforcement, by use of media agents in league with MI5, makes it assured that the high profile person's mind controlled madness, will be put in the worst possible light to discredit them. In this way, high profile subversives who cannot be imprisoned, (unlike the Carl Bridgewater, Birmingham Six, Guildford Four) in the normal way by Britain's police, or killed by assassination squads, such as the Pegasus group, are made to look ridiculous.

Public humiliation is the finest weapon the authorities have to make harmless a potential well known figure, who is making trouble.

If the VIP needs to be made temporarily ill, microwave beams containing the signal the brain gives off during a vicious bout of flu can be fired at the victim. This causes the target to display all the symptoms of flu, even though they have not caught the virus. Major Ed Dames the remote viewing specialist, who has close links with the US secret military, alluded to this device on a US TV programme.

The intelligence agents can also use low level microwaves to cause mental and physical confusion that leads to illness. Beaming microwaves at victims makes them fatigued, damages their immune system, causes neurological damage that effects their thinking and ability to carry out tasks, induces premature ageing, cancer and cataracts. Sussex police regularly use this low level microwave to clear drunks from city centres. While researching this matter, I was subject to high levels of microwave $>10\text{mW/cm}^2$ whenever I approached their headquarters, whilst MI5 irradiated my home continually with microwaves. It seems I touch a raw nerve while researching mind control weapons usage in the UK.

Organisations that irritate the authorities have their building turned into a hot spot by microwave transmitters, so the staff all suffer sick building syndrome caused by microwave damage. Or the staff of the target organisation have their behaviour changed to cause discord. UFO Reality a leading UFO and conspiracy magazine have complained of mysterious health problems, while another new age group complained of eye damage, nausea and headaches brought on when ever they had a meeting, which may have been caused by microwaves. Heating the victim to death by microwave cooking is caused by increasing the field intensity of the radiation, to cause local hotspots in the victims eyes and gaul bladder, which have poor circulation, so cannot carry away the heat. Irradiating the optic nerve of the victim with the same signal that is sent to the brain by this nerve, causes the nerve tissue to overload. This way, subversives can be blinded by the intelligence community without them knowing what has occurred. An American researcher complained of this problem to me and warned me that this weapon system was being used on my person by MI5.

Neurological research found the brain to have specific frequencies for each voluntary movement called preparatory sets. By firing at your chest with a microwave beam containing the ELF signals given off by the heart, this organ can be put into a chaotic state, the so-called heart attack. In this way, high profile leaders of political parties who are prone to heart attacks can be killed off before they cause any trouble.

Neil Kinnocks' Labour Government was allegedly cheated out of an election victory by postal vote rigging in twenty key marginal seats. When a new even more electable Labour leader was found, it is rumoured that John Smith, the then Labour leader, was prompted to have a fatal heart attack, while walking in the country with his family, by means of a concealed microwave device which operated on the Vagus nerve to bring about a massive heart attack. Since MI5 have a long history of naked hatred towards the Labour party, there may be some truth in the above, though no hard evidence had yet been found.

Paralysis can be induced in the target by use of this method of broadcasting preparatory sets encoded on microwave beams. A pulse modulated microwave beam, carrying an ELF signal, which is identical to the one in the motor neurone centre of the brain, is used to jam the victims motor co-ordination. This is analogous to radar jamming, using a more powerful signal at the same frequency to swamp out the enemies radar. Motor neurone preparatory set potentials are jammed by a bigger signal carried by a microwave carrier beam, that literally overloads the brain, so it cannot control the body. Pulse modulated microwave weapons which broadcast the ELF preparatory sets of the motor cortex of the victim, will paralyse the victim without killing them. Breathing and heartbeat are involuntary actions controlled by another set of frequencies in another part of the brain. This technique can be used to abduct people for secret government mind control experiments, under the guise of alien abduction. A microwave beam of this nature will paralyse the victim, so they can be bundled into a black helicopter and airlifted away for experimentation.

Once the procedure is complete, hypnosis can be used to plant false memories of alien abduction. In this way, real alien abductions can be used by the authorities to enable them to obtain a limitless supply of guinea pigs for their mind control experiments. Real memories of government involvement are erased electronically. This technique clears all short-term memories from the victims consciousness by broadcasting microwave beams at the target which carry the signals used for memory retention. When you remember something, it is first stored in your short-term memory. After approximately twelve hours, this short-term memory is converted in the brain to long term memory, after which you remember this information for the rest of your life. If this conversion from short-term memory to long term memory does not occur, the data is lost. We see details around us, but try to recall the décor in a restaurant you eat at some weeks ago and you'll see how tenuous memory is.

Microwave radiation of a specific frequency can interfere with the transfer of memories from short to long term memory. Microwave radiation of a specific frequency can interfere with the synapses of the brain. By interfering with the connections between brain cells, memory of people can be disrupted. In this way, Seal special force assassins can be brain-wiped after a mission, so they have no idea of the target they killed. Using hypnosis, false memories can then be planted in the brain, so the gap left by the real memory is papered over.

The latest advance in electronic mind control were discussed in my previous articles in Nexus, but for those who missed the ESP of Espionage, this equipment uses special types of microwave beams called MASERs. These are the laser equivalent of microwave beams.

These MASER beams have been used to develop something called synthetic telepathy. This is the ability to read people's minds from a distance. Electronic scanning of victims' brains by monitoring the electromagnetic (EM) emissions from peoples brains and using amongst other things, the brain waves (as measured on an EEG), to read the victim's subvocalised thoughts.

Head of US Special Forces Major-General Schaknow, talked about synthetic telepathy during a lecture in July 1992 at Fort Bragg North Carolina. The US military is hard at work perfecting synthetic telepathy. In synthetic telepathy, the weak electromagnetic signals in the brain associated with subvocalised thought, are connected to a computer by use of electrodes, or in more advanced mechanisms by MASER beams. Sophisticated computer systems have learnt to read the subvocalised thoughts in the brain, by associating a specific brain exciting potential, with a particular word. In this case, only one specific language can be decoded, as each word in a language has a specific set of frequencies that must be discovered. Once the donkey work of finding the specific frequencies for all the words in a language has been programmed into a super computer, which can carry out massive parallel processing, fuzzy logic software is used to match this with real world excitation potential associated with subvocalised thought obtained from thousands of abductees, who are used to calibrate the synthetic telepathy devices.

GCHQ Cheltenham, the intelligence gathering arm of MI5, possess the advanced computer systems needed for synthetic telepathy. Synthetic telepathy detects the 15Hz, 5 milliwatt auditory cortex brain emissions, that are linked with the excitation potentials in the brain associated with subvocalised thought. New technology, involving low frequency microwaves and RF, has enabled devices to be built which can scan through walls and look inside peoples' bodies like X-rays. This enables security personnel to see a target in his own home and to track him throughout the house. Further to this, being able to see inside the victim's head, would allow computer controlled targeting of specific brain centres in the victim's brain, even when he was walking around the house. A scan of the specific brain emissions given off when the victim subvocalises using an array of pulsed

frequency MASERS fired at the specific brain centres of the subversive, while he resides in his own home, enables the victim to be scanned. By finding an array of ELF pulse modulated MASERS, which scan up and down the window of frequency emissions given off by subvocalised thought, interference effects can be measured in the MASER beam. The victim's ELF brain emissions will interact constructively or destructively with the pulse frequency MASER carrying ELF in the ELF window associated with subvocalised thoughts.

If we fire an array of pulsed MASERS, which are out of phase with each other, extraneous noise can be filtered out in the digital domain. Since the converging ELF modulated MASERS are being effected by the low level emissions in the victim's brain, the shifts in the ELF pulsed signal going into the subversive's brain can be detected.

A simplistic version of this would be the LASER beam shone at the window of the person that is being bugged. The vibrations in the window cause modulations in the LASER that can be converted into electrical signals and hence into sound. In this way the subvocalised thoughts in the victim's brain can be read. Having already built up a library of excitation potential signatures for differing words and groupings of words, a sophisticated computer can begin to decode the emission signatures into word streams. In this way the subvocalised thoughts of the victim can be stored in the memory of a supercomputer and analysed to give a read out of what the target is thinking.

Using ELF audiograms carried by a single pulse-modulated Maser, subvocalised thoughts can be placed in the victim's brain. This enables UK synthetic telepathy operators the ability to enter into conversations with the subversive to drive him mad or to bring up key words which will get the victim thinking about the information they wish to find. Visual cortex excitation potentials can also be broadcast into the victim's brain so that illusory images can be projected into their brain to drive them mad, or to programme them to commit suicide.

My research has led me to uncover a truly nation-wide mind control weapon system. Each UK police station is equipped with a vast array of microwave antennae. The Sussex Police headquarters has a two hundred foot antenna. The building is surrounded by a fence and is off limits to the public. This microwave complex sits in the middle of a council housing estate, which means the people in this area are being bathed in low level microwaves. New research has shown that low level microwaves give mice cancer, since the emitters tested by the scientists, were the new ultra safe mobile phones which give off much smaller intensities than the police antennae, the Police microwave system is a serious health hazard. It seems that low level microwave radiation excites the hydrogen bonds in the cell and can interfere with meiosis. This causes cell division to go wrong, which leads to cancerous cells and hence tumours.

Secondly, the police have been granted the exclusive use of the 450 MHz microwave frequency range. This is exactly the frequency used by Dr Ross Adey, the CIA mind control expert, in his experiments on behavioural modification. It seems the police have the exclusive use of this mind control frequency and a vast array of antennae to broadcast this frequency all over the country.

Very useful for mass mind control in times of emergency. Adey found that by using 0.75mW/cm² intensity of pulse modulate microwave at a frequency of 450 MHz, it was discovered that an ELF modulation could be used to control all aspects of human behaviour.

The Sussex police headquarters is connected to CCTV, close circuit television cameras, throughout the town. Some of these cameras have microwave telemetry devices that could easily be used the broadcast this frequency. The large antenna, that bracket the town could also be used.

The most insidious aspect of this, is that the entire mobile phone network could easily be used to control the behaviour of the phone users. By use of my microwave detector, have found that mobile phones of the newer type, give off a pulse modulated microwave signal of around 0.75m W/cm² at the ear piece.

This may be coincidence, but it is exactly the intensity required for behavioural control as found by Dr Ross Adey, the pioneer of microwave mind control.

So in theory, an ELF signal could be added to the microwave network to feed a precise behavioural pattern into every mobile phone user in the UK. If there were widespread riots, the ability to broadcast behavioural stimuli to

mollify all the mobile phone users in the country would prove useful.

Since mobile phone users are generally middle class, it means authority has a useful method of controlling the behaviour of the key voters. Microwave carrier beams are perfect for transmitting the excitation potential of docility to the phone user to keep them servile in times of trouble. When no ELF signal is broadcast the phone acts in a completely different manner on behaviour in humans. In this case the microwave phones causes the neurones to release calcium ions which makes the user tired, irritable and when stressed likely to emotional outbursts such as road rage.

In Brighton, the local MI5 headquarters has a large microwave array on its roof. Secret bunkers in the area also have large microwave arrays above them. It is child's play to transmit an ELF modulated signal to be broadcast by the entire mobile phone network - if need be. By this means, all mobile phone users can be behaviourally modified, at the cost of developing cancer from low level microwave exposure from the phones they constantly use, stressing the neural network by constant calcium ion efflux and interference with bioelectric fields.

It seems strange that a few millicuries of ionising radiation will get the National Radiological Protection Board exceed, whilst high intensity cancer-inducing non-ionising microwave radiation, goes unchecked. So high are levels near transmitters, that litter the countryside, that light bulbs will explode near them. If the intelligence community is using microwaves on a large scale as mass mind control weapons, then the NRPB's silence is easily explainable.

To add to this, the numerous microwave detectors that were cheaply available to check leakage from microwave ovens are no longer made by any company in the country. It seems the UK authorities do not want the population to be able to detect when they are being microwaved. In conclusion, it can be seen that the UK intelligence and police, have a dizzy array of high-tech mind control devices. They regularly target their own populations and thousands of people are made ill by microwave weapons. With the advent of synthetic telepathy, 'CCTV of the mind' becomes a reality.

With the election of a New Labour government unaware of microwave weapons and untainted, as they had no part in their development and deployment. it is certain that Tony Blair's government will outlaw these abhorrent microwave weapons - as they have done land mines. The only problem will be convincing the Labour government that MI5's microwave communication equipment is in fact microwave mind control weaponry.

With the total secrecy the MI5 organisation operates under, one can be sure they will be mendacious as to how their £200 million pound budget is used to hone their leading edge microwave mind control torture weapons that are used on the public. Even more disturbing is the use of EMP and microwave weapons by the police on anyone researching into this area. With over £1 billion of tax payers money going to the intelligence community in Britain, it is a certainty that Britain will continue to be the centre of Soviet style psychotronic torture and mind control equipment well into the 21st century.
