Narrative Code

Signal nomenclature

MAY 18, 2022

♡ 12   💬 2   Share

Why do we recognize symbols?

Standard code symbols are perceptible because they are obscure. A group of dots and dashes (morse code) or a random group of letters and numbers clearly indicate intention, even if they do not make sense without being decoded.

Religious symbols are recognized because they are either known, or because they are obscure.

What if you were able to hide a code in such a way that it was not noticeable to anyone except the intended recipient? How would you achieve that?

Invisible ink is a possibility, but what if you needed a larger number of people to receive the code, instead of just a single individual? You could use a publication such as a newspaper to print it in, but how could you successfully hide it?

Might a code based off of normal words and ideas work?

A narrative code.

Water = information

Bomb = explosive

Plant/tree = spy

Submarine = submerged

Using this type of code would allow a story to be written in such a manner as to also convey another message — the actual intended message.

What if groups of people who communicate this way, already exist? What if there are more than just certain groups? An entire covert world?

What if evil people communicate this way to avoid prosecution? What if good people communicate this way for hidden ops that work against evil? What if good people cannot make this information known without public shock, so they are forced to send messages in narrative code?

Who might be part of the covert world? Individuals involved in government? Military intelligence? Celebrities?

Sounds like a ridiculous conspiracy theory.... But what if it can be proven without a shadow of a doubt?

I'm going to give some examples that should be able to convince anyone of this type of code.

Please read this post to the end, as some examples will provide stronger evidence than others.

Example No. 1:

TURKEY

The CIA was formed in the same month that the government started announcements encouraging, "poultryless Thursdays"— September, 1947. The official turkey presentation began three months later, with Truman accepting a turkey from the National Turkey Federation, and the Poultry and Egg National Board. Every presented turkey was subsequently eaten, until in 1963, when JFK said, "Let's keep this one going," and refused it. JFK refused the 55 lb Thanksgiving turkey, and was assassinated three days later.

Coincidence, right? Not really. "55lbs" was a 5:5 signal, meaning "clear communications". By refusing it, he was telling the CIA that he would not cooperate with them.

There's a story that was recorded in 1865 about Abraham Lincoln having pardoned a turkey in 1863. 1865 is the year that Lincoln was assassinated, and 1863 is when the Emancipation Proclamation went into effect.

A very powerful group does not like having their "turkeys" refused.

This seems simple and silly, but it goes completely unnoticed by anyone who isn't looking for a covert message.

https://www.history.com/news/a-brief-history-of-the-presidential-turkey-pardon

https://www.upmatters.com/news/what-happens-to-turkeys-who-get-pardoned-by-the-president/

SUBMARINES

On October 7, 2021, multiple media outlets reported that a nuclear submarine hit an unknown object.

https://news.usni.org/2021/10/07/breaking-attack-submarine-uss-connecticut-suffers-underwater-in-pacific

The captain that was in contact with the media outlets was named Captain Bill Clinton.

^Odd, but not necessarily anything specific. However, there was also this story in the news:

https://www.politico.com/news/2021/10/10/maryland-husband-wife-arrested-espionage-case-515761

Jonathan Smay Toebbe and Diana Smay Toebbe were accused of trying to sell nuclear sub secrets. Jonathan's age was 42, and Diana's was 45. They were arrested in Jefferson county.

"Jefferson" is Bill Clinton's middle name, and he was the 42nd President. "Diana" is similar to Hillary's middle name "Diane", and she ran in the 45th presidential election.

(Side note: Narrative code can be added to actual news, so the presence of narrative code does not necessarily mean the original story is false. There are many ways to alter or conform a story, in order to send an additional message.)

Bill Cosby (Bill C.) was also in hot water around that same time:

https://nypost.com/2021/10/14/bill-cosby-accuser-says-he-drugged-raped-her-in-atlantic-city-suit/

These three stories came out during the same week that Ghislaine Maxwell's co-conspirators were ordered to be named.

https://www.thegatewaypundit.com/2021/09/court-orders-feds-disclose-identities-ghislaine-maxwells-unnamed-co-conspirators/

Ghislaine Maxwell was a submarine pilot, which is likely at least part of the reason that the sub stories were used.

The co-conspirators were ordered to be named on Oct. 11th to be exact, and in the first sub story, 11 sailors were injured.

"11" itself is narrative code, simply meaning "time is running out", or "the end".

WWI officially ended on Nov. 11, at 11 o'clock. The meaning of "11" basically has to do with a clock, with 11 moving closer to midnight. Essentially, "the end of one thing, and the beginning of the next". The Doomsday Clock has a similar meaning: "the last possible moment to reverse course". Additional examples are provided by the following two films that play off that meaning:

https://en.m.wikipedia.org/wiki/11/11/11_(film)

https://en.m.wikipedia.org/wiki/11-11-11_(film)

^Two different films/links, although the links look the same.

11pm in military time is 23. "23" means "quick removal", which is essentially the same as "terminate, or the end".

Some examples:

-According to legend, 23 people stabbed Julius Caesar.

-Traditionally, a Grand Jury is comprised of 23 members.

-https://en.m.wikipedia.org/wiki/23_enigma

-https://en.m.wikipedia.org/wiki/23_skidoo_(phrase)

Here's confirmation for all the Clinton narrative codes: On October 14, 2021, Bill Clinton was reported to be in the hospital for a urinary infection that spread to his blood.

https://www.msn.com/en-us/news/politics/bill-clinton-heads-home-after-spending-six-days-in-a-california-hospital-fighting-an-infection/ar-AAPD9Xn

Urine = dirty water. "Water" is narrative code for "information".

("Plant" is another word for a "spy". Plants need water, and spies need information. There are also a few common sayings that relate water to information:

"That argument doesn't hold water."

"That idea muddies the water."

"The mind is like a sponge.")

"Dirty water/urine" would be incriminating evidence.

6 days = "6"/evil   Six has historically been the number representing mankind, baseness, or corruption. (Goliath was said to have been six cubits and a span. The "number of the Beast" is "666".)

Bill Clinton was pictured leaving on the 17th, by a sign with the number "17":

https://www.zerohedge.com/medical/bill-clinton-released-california-hospital-five-days-after-infection-spread-bloodstream

"17" typically means "classified", i.e. Department of Energy Q/17 clearance, Area 51 (51 is three groups of 17).

These stories would then appear in the news within the exact same week, and be silent for the same weeks/months — which would be a very odd coincidence if they hadn't been narrative code.

For example:

Bill Cosby was brought back into the news:

•https://www.msn.com/en-us/news/crime/will-bill-cosbys-case-make-it-to-the-us-supreme-court-chances-are-slim-legal-analysts-say/ar-AARBJYg

•https://www.foxnews.com/entertainment/sundance-film-festival-bill-cosby-princess-diana-kanye-west-docs

•https://www.nbcnewyork.com/entertainment/entertainment-news/watch-the-first-look-at-new-bill-cosby-docuseries-is-finally-here/3462422/

After media silence since October, the Toebbe couple was also suddenly back in the news:

https://www.dailymail.co.uk/news/article-10290275/Texts-reveal-wife-nuclear-scientist-accused-selling-secrets-wanted-flee-TRUMP.html

Updates on the damaged nuclear sub were also in the news:

https://www.dailymail.co.uk/news/article-10302639/US-Navy-Seawolf-class-attack-submarine-USS-Connecticut-arrives-San-Diego-visible-damage.html

https://www.ibtimes.com/damaged-submarine-uss-connecticut-arrives-san-diego-surface-missing-sonar-dome-3356588

ENDURANCE

We have a "Go" signal/"Green light" on the 100th anniversary of Shackleton's death:

Dan Snow
@thehistoryguy

On the centenary Sir Ernest Shackleton's death I'm aboard one of his old ships- @DiscoveryDundee- to announce that @HistoryHit is going on the expedition to find his famous shipwreck Endurance in the Antarctic.

We will be posting, podcasting & streaming the whole way

7:19 AM · Jan 5, 2022

2,135 Likes**224**Retweets

The Endurance shipwreck just so happens to be reportedly found on the 100th anniversary of Shackleton's funeral, and 107 years after it sunk:

https://www.bbc.com/news/science-environment-60662541

One of the main people on the Endurance22 mission was Dan Snow.

Dan Snow = SnowDan

Endurance SnowDan

Earnest Shackleton = E.S. = Edward Snowden

It sounds like information from Snowden was recovered.

(Possible connection: Stallone posts about "Polestar" on the 4th, and the Endurance was found on the 5th with an "emblematic polestar" on its stern. Also, the Endurance was originally christened as "Polaris".

officialslystallone

A post shared by Sly Stallone (@officialslystallone)

ASSANGE and CHESS

officialslystallone

A post shared by Sly Stallone (@officialslystallone)

On December 2nd, 2021, Stallone posts a photo of himself in a plane wearing a hat with the letter "Q". There is also a person behind him holding up a book called, "EVERY LAST SECRET", by A. R. Torre.

In another post that same day, Stallone gives info on his Julien's Auction of memorabilia.

One of the items to be auctioned is a figurine of "Judge Dredd".

Q = classified

Every last secret = testimony

Julien's Auction = Julian Assange

Judge Dredd = judge/court

On Dec. 10, Julian Assange is in the news:

https://www.cnn.com/2021/12/10/europe/julian-assange-extradition-appeal-ruling-intl/index.html

Also, the caption of the post was:

"Heading into the Storm...."

He later changed his post to say: "Heading into the Storm....As IN THUNDERSTORM!!! We are in a jet for god sake flying through the rain!"

But as you can see, it's blue skies out the windows, and sunlight is bouncing off objects in the photo. (Stallone was trying to dismiss the obvious hidden/cryptic meaning... narrative code isn't covert when it's too blatant.)

^However, that's only part of the message:

Notice in the airplane photo, the person holding up the book is pointing to the "e" in "Secret", and has their other hand raised (five fingers). Add that to the Q hat, and we have Qe5 — a chess move.

He posts again about the Q hat on the day of his Julien's Auction, Dec. 5th, and that's also the same day as Game Eight of the World Chess Championship. On Dec. 2nd, there was no chess game, but chess games were held on the surrounding days. Stallone picked that particular day to make a chess code — and sent the second "Q" post on Dec. 5th to indicate the date of the full chess code message.

https://www.theguardian.com/sport/live/2021/dec/05/magnus-carlsen-v-ian-nepomniachtchi-world-chess-championship-game-8-live

officialslystallone

A post shared by Sly Stallone (@officialslystallone)

In the chess game on Dec. 5th, Magnus Carlsen plays Qe5 on play #36, and Ian Nepomniachtchi responds with Qb2. The very last move of the game is Magnus playing Qf3, and white wins.

Yes, this means that the chess game was rigged in order to send a message.

Qe5 = 5:5 (clear communications)

Qb2 = stealth/covert (B2 bomber)

Qf3 = Fox Three (launch of active radar-guided missile/mission success)

"Qf3" is the same cryptic message that Julian Assange sent in 2018:

Defend Assange Campaign
@DefendAssange

4:34 AM · Jan 13, 2018

This is a photo of the famous game with Capablanca vs Marshall, 1918, and the very next move in the game is Qf3 (mission success).

For additional confirmation of Stallone's chess code, the author's name on the book, "Torre," is also connected to chess.

Chess opening:

https://en.m.wikipedia.org/wiki/Torre_Attack

Famous chess player:

https://en.m.wikipedia.org/wiki/Eugene_Torre

Spanish chess notation name for "rook":
https://en.m.wikipedia.org/wiki/Descriptive_notation

LOCKHEED SONIC BOOM

In 1971, Lockheed was going bankrupt, but in an unprecedented move, the Nixon administration bailed them out with a loan of 250 million dollars. The loan was specifically designated for the commercial TriStar L-1011 plane, nicknamed "Whisper Liner".

https://www.nytimes.com/1971/05/14/archives/the-lockheed-loan.html

In 1973, the same plane was at the forefront of a deal Lockheed made with Prime Minister Tanaka of Japan.

Lockheed bribed Tanaka to help promote the TriStar L-1011 to Japanese airlines, rather than the Douglas DC-10.

In 1975, this and other "deals" came to be known as the "Lockheed Scandal".

On July 27th, 1976, Tanaka, then former prime minister of Japan, was arrested as a result of the "Lockheed Scandal".

Notice, the very next day after the arrest of Tanaka, the Lockheed SR-71 set the world record for airspeed, at 3.3 Mach (technically 3.32). Not only is it a Lockheed plane, but the official nickname for this spy plane is "Habu", which is the name of a snake only found in Okinawa, Japan. Okinawa is also the place where Nixon kept secret nuclear weapons.

A "Sonic boom" is narrative code for "breaking news/breaking the airwaves".

Certain people were not happy about the arrest, and were sending a warning that they were fully prepared to create a "record sonic boom" if such actions continued.

^The additional implication of Okinawa being the location of "secret nuclear weapons," would mean that the information would be "explosive".

"Sonic boom"/"breaking the sound barrier" is essentially shocking news or the release of information that has been kept behind a barrier, that is, classified.

Speed of sound = information that you hear.

Habu = Japan

Okinawa = secret nuclear weapons = explosive/damaging

Snake = many people working as one, i.e.: https://en.m.wikipedia.org/wiki/Join,_or_Die

The Habu "sonic boom" must have been enough of a threat, because Tanaka was not charged with bribery, and only in 1983 was he was charged with "violations of foreign exchange control laws".

There was another related message:

July 25: Discovery of "Face on Mars"

July 28: Viking lander collects samples on Mars.

July 31: Announcement of "Face on Mars"

https://www.cnet.com/science/the-face-of-mars-a-martian-mystery-turns-40/

Meaning, if you "find a face" (indict certain people), this could result in "Mars" (war).

(Side note: Martin Marietta, the company Lockheed later merged with, was chosen as the principal industrial contractor for Project Viking.)

PUMPKIN

On August 27, 2019, the NSA/CCS twitter account tweeted this message:

NSA/CSS
@NSAGov

Why is everyone talking about Paid Sick leave? 🥴 Of course we get that here. #PSL

1:55 PM · Aug 27, 2019

167 Likes**27**Retweets

They then responded to that tweet with this message:

NSA/CSS
@NSAGov

Ooooh they're talking about #PumpkinSpiceLatte. Well, we have that here too!

NSA/CSS @NSAGov
Why is everyone talking about Paid Sick leave? 🤤 Of course we get that here.
#PSL

7:26 PM · Aug 27, 2019

140 Likes**30**Retweets

Between those two tweets, they posted this:

NSA/CSS
@NSAGov

Find out how Anne Neuberger is using persistent engagement to make sure we're consistently adapted to the next threat. #cybersecurity #infosec
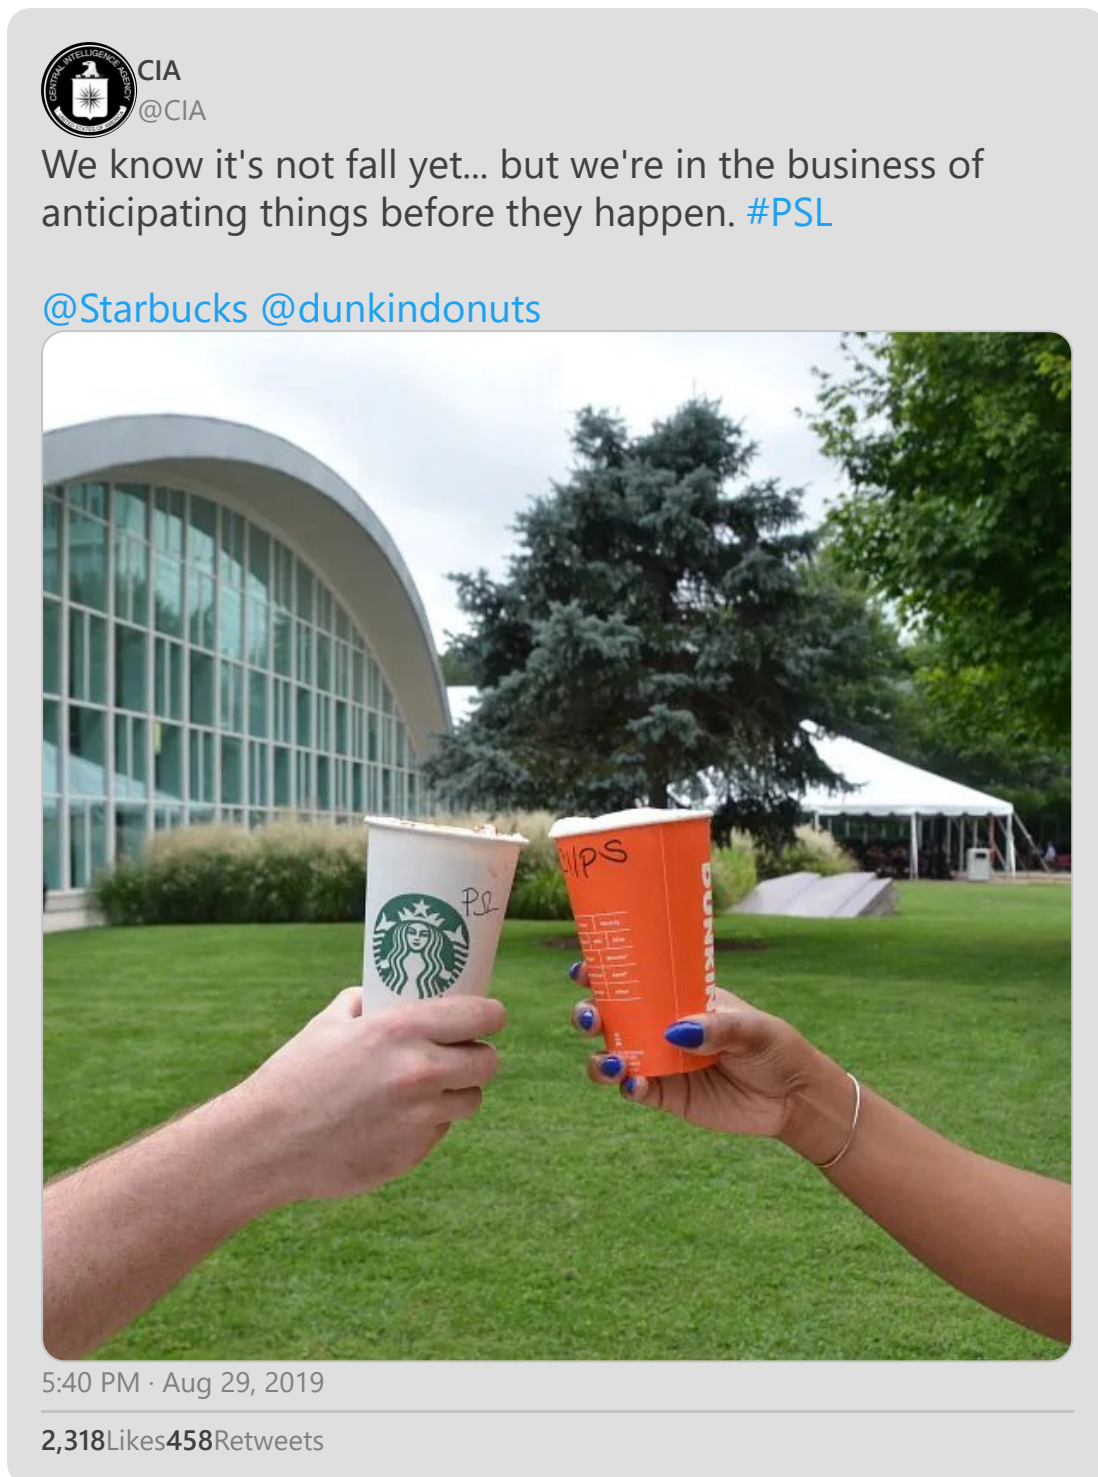

NPR @NPR
"The four main threats that we're concerned about from a cybersecurity perspective are China, Russia, Iran and North Korea," says a member of the NSA's Cybersecurity Operations Group.
https://t.co/CUbRY6Gm5T

2,318 Likes**458**Retweets

And news outlets even pointed it out:

https://www.huffpost.com/entry/cia-pumpkin-spice_n_5d68c62de4b06beb649c05ab

https://www.eurasiareview.com/30082019-cia-celebrates-pumpkin-spice-lattes-surveillance-internet-erupts/

Paid Sick Leave + Pumpkin:

A "pumpkin" is a "scare op".   (Think Halloween, Jack-o'-lantern, the Headless Horseman, or the color orange.)

What was the scare op and paid sick leave they were anticipating?:

The 2019 Military World Games were held in Wuhan, China, and they started on October 18th. Many soldiers who were there returned home sick, with the then unannounced new virus, Covid19.

Event 201, a pandemic simulation exercise in New York, also took place on October 18th. It was hosted by the Johns Hopkins Center for Health Security, the World Economic Forum, and the Bill and Melinda Gates Foundation.

Here's how narrative code can point out people behind these types of ops:

On January 28, 2020, Charles Lieber was arrested for undisclosed ties to the Wuhan University of Technology, including setting up a secret research laboratory.

Lieber received funding from the WUT, the Chinese government, as well as through Harvard from the NIH, and the DoD:

https://www.justice.gov/opa/press-release/file/1239796/download

https://www.navytimes.com/news/your-navy/2020/01/31/harvard-prof-released-on-1m-bond/

^As mentioned in the article above, Lieber is also recognized for growing large pumpkins, and in particular, a 1,870 pound pumpkin in 2014, which was reportedly the 17th largest pumpkin in the world, for that year:

https://abcnews.go.com/Lifestyle/meet-massachusetts-man-winning-1870-pound-pumpkin/story?id=26163871

"1,870" = 187

The California Penal Code Section for murder, and also a slang word for murder.

https://en.m.wikipedia.org/wiki/187_(slang), and
https://en.m.wikipedia.org/wiki/One_Eight_Seven

A Harvard professor with a secret seven figure job in Wuhan, who grows giant pumpkins, and makes them into Jack-o'-lanterns... What was his 2014 "187" pumpkin a message for?

In 2014, NIH funded a research project on bat transmitted SARS-coronaviruses:

https://reporter.nih.gov/project-details/8674931

It involved infecting "humanized mice".

The project helped fund Shi Zheng-Li, a virologist at the Wuhan Institute of Virology, as well as other researchers, to investigate bat coronaviruses.

The project ended in 2019.

The total grant funding for this project $666,442

"6", "666", or a variation thereof is used by certain corrupt people to communicate their affiliation. It's a type of cult, one might say.

"666" is known as "the Mark of the Beast". "6" has historically been the number for baseness and evil; it's the number which represents mankind, and mankind is corruptible. 666 represents a trinity of evil — man trying to take the place of God ("The Trinity").

Goliath was said to have been six cubits and a span, and another Philistine warrior was said to have had six fingers on each hand and six toes on each foot. According to the book of Genesis, humans were created on the 6th day, which is probably the symbolic basis for connecting the number 6 to mankind.

A second phase of that bat SARS-coronavirus project further studied how bat coronaviruses could mutate to attack humans:

https://reporter.nih.gov/project-details/9819304

The funding for that project was $661,980.

Both projects were run by Eco Health Alliance, and their DUNS number just happens to end with "66".

The address associated with the first grant is: 1200 LINCOLN AVENUE

^Possibly because Lincoln was assassinated?

The address associated with the second grant is: 460 W 34TH ST 17TH Floor

^"17" as in covert/classified operations.

https://taggs.hhs.gov/Detail/AwardDetail?
arg_AwardNum=R01AI110964&arg_ProgOfficeCode=104

Also, in 2014, Jeffery Epstein met with some of Charles Lieber's associates at Harvard University:

https://www.nbcnews.com/news/us-news/harvard-science-professors-kept-meeting-donor-jeffrey-epstein-despite-his-n1028536

Epstein had previously donated at least 6.5 million dollars to programs at Harvard.

Remember how the CIA said "... anticipating things before they happen." and the NSA "...consistently adapted to the next threat." The U.S. intelligence agencies couldn't stop the bioweapon release, but they could counter it. While the world was locked down, a number of covert ops were taking place. So, we started to get narrative code like this:

2021 news reports of a "pumpkin shortage":

https://www.msn.com/en-us/foodanddrink/foodnews/2021-has-been-a-perfect-storm-for-a-pumpkin-shortage/vi-AAPQsDI

https://news.stlpublicradio.org/health-science-environment/2021-07-19/early-onset-of-pumpkin-blight-could-squash-our-thanksgiving-pie-supply

https://www.today.com/food/there-pumpkin-shortage-year-t235586

Some other pumpkins that have been "cancelled":

https://www.timeout.com/tokyo/news/there-are-currently-no-plans-to-replace-the-naoshima-pumpkin-040422

^"... no plans to replace the Naoshima pumpkin."

The pumpkin was removed after a storm:

https://menafn.com/1102823899/One-of-Yayoi-Kusamas-iconic-pumpkin-sculptures-was-Damaged-During-Typhoon-in-Japan

"Heaviest pumpkin in US disqualified..":

https://abc7chicago.com/heaviest-pumpkin-wisconsin-competition-record-books/11134014/

^"pumpkins are like ice cream"

Ice cream = scream

"Mike Schmidt" = M.S. initials = MS-13/Guerrilla ops

https://www.wandtv.com/news/fungus-heavily-affecting-illinois-pumpkin-patches/article_e53b0d12-3024-11ec-9bb6-ebcce0e065ea.html

^Sometimes there are names and words that come across as narrative code, but may only be coincidences. For instance, the owner of a pumpkin patch in the above story is named, "Penny".

"Penny" has to do with murder, i.e. 19th century Penny Blood/Penny Dreadful books and theatre. There's a reason Lincoln's image was put on the penny in 1909 out of all the U.S. coinage — it was a warning message to others who would follow in his footsteps. It was known as a "wheat penny", which also has the meaning of "removing someone" since wheat gets harvested. Even during the Civil War, there were already penny tokens circulating with Lincoln's image.

Louise Penny, the author Hillary Clinton has worked with, writes murder stories.

There are also Henry Penny stories (another name for Chicken Little) about someone freaking out about a possible imminent disaster.

In this instance, having a pumpkin patch and the first name, "Penny", might just be a coincidence, although it's possible that the news correspondent chose that particular person to interview, because of their name.

Here's a "pumpkin" example that ties back to the JFK and Truman turkey decode.

Truman avoided a "pumpkin" by accepting the CIA, that is, "the turkey meat".

https://dinersjournal.blogs.nytimes.com/2009/11/23/the-way-we-ate-the-year-harry-truman-

passed-on-pumpkin-pie/

So, besides the leaked military documents, this is one way to show that covid did indeed originate from the Wuhan lab.

COVFEFE

https://www.theguardian.com/us-news/2017/may/31/what-is-covfefe-donald-trump-baffles-twitter-post

"Despite the constant negative press covfefe"

Narrative code isn't usually difficult as long as you know the right context.

"Covfefe" is actually really simple to understand if one already knows basic narrative code; all one has to do is to apply it to the sequence of events at the time.

"Covfefe" is the word "coffee" spelt incorrectly, which would mean "spilled coffee".

•Coffee = filtered and heated water

•Water = information

•Filtered = bias/skewed (designed to make you think a certain way)

•Heated = designed to cause damage/make someone look bad

Coffee = negative or biased news coverage

There was a lot of positive news about Trump around that time, i.e., Kushner said there was no communication with Russia, Carter Page wanted to testify, Trump made his Memorial Day speech, etc.

The media attempted to distract the public by having Cathy Griffin display a fake bloodied Trump mask as though he had been beheaded, and by having Ken Jennings mock Barron Trump that very same day.

https://web.archive.org/web/20170531131646/http://www.foxnews.com/entertainment/2017/05/30/kathy-griffin-holds-bloodied-trump-mask-in-photo-shoot-with-tyler-shields.html

The whole charade was disgusting, so rather than making Trump look bad, it invoked

sympathy for Trump, from viewers.

Like the old analogy of trying to boil a frog, if you slowly bring it to a boil, it will stay in the pot, but if you try to place it in hot water immediately, it will jump out. Brainwashing doesn't happen overnight.

Daily news coverage = Daily coffee

What happens if the coffee gets spilt? Instead of just sipping on the daily news (filtered and heated water), the public will get burnt and react to the unpleasant heat... the situation backfires on the media.

They poured their coverage/coffee too fast, and it spilt.

Trump then trolled the media by misspelling "coffee", and also lightened the overall mood by creating a small riddle.

That's why you have people like Devin Nunes posting a picture of a coffee cup with the caption "...mornings always begin with a strong cup of #Covfefe..." He's trolling the people who create "coffee"/propaganda.

Once you start looking for it, finding narrative code shouldn't be too difficult. Interpreting it correctly is key, however. Narrative code requires knowing the correct context, and sometimes that requires knowing a fair bit of history, or even covert events. Try building timelines and connecting one piece of narrative code to another. Narrative codes aren't usually isolated remarks; as with everyday messages, there is usually an ongoing conversation or topic that's being added to.

A few additional links/info:

Narrative type steganography:

One of the few government disclosed examples of narrative type code:

https://www.fbi.gov/history/famous-cases/velvalee-dickinson-the-doll-woman

A perfect analogy for narrative code:

https://hakaimagazine.com/news/the-military-wants-to-hide-covert-messages-in-marine-mammal-sounds/

https://narrativecode.substack.com/p/narrative-code

^Messages hidden in plain sight, or in this case, plain sound.
