The table above does not use the Ancient Egyptian attributes of the planets to Gods. It uses a Hybrid system that is made of the modern western conceptions of planets and then attributes the Egyptian Gods and Goddesses that most fit. Some such system was used by those that were of Ptolomaic Greek origin, worshipping the Gods in Alexandria. I was given the key to doing this in material from *The Dialogs*. I no longer remember where the syllables given come from, other than that they were given in a book on Tantra I no longer possess. They have proven their worth in use.
