Abbreviated Table of Contents

	Preface	xiv
	Acknowledgements	xv
	Contributors	xvi
	Using This Book	xix
	Herb Identification Guide (Color Photographs)	G1
PART I	**OVERVIEW**	
Chapter 1	The History of Chinese Herbal Medicine	1
Chapter 2	Nomenclature of Chinese Herbs	3
Chapter 3	Classification of Chinese Herbs	7
Chapter 4	Growing and Harvesting Chinese Herbs	9
Chapter 5	Preparation and Processing of Chinese Herbs	11
Chapter 6	Characteristics of Chinese Herbal Medicines	14
Chapter 7	Clinical Applications of Chinese Herbal Medicine	19
Chapter 8	Concurrent Use of Herbal Medicines and Pharmaceuticals	25
PART II	**HERB MONOGRAPHS**	
Chapter 1	Exterior-Releasing Herbs	31
Chapter 2	Heat-Clearing Herbs	101
Chapter 3	Downward Draining Herbs	265
Chapter 4	Wind-Damp Dispelling Herbs	299
Chapter 5	Aromatic Damp-Dissolving Herbs	359
Chapter 6	Water-Regulating and Damp-Resolving Herbs	379
Chapter 7	Interior-Warming Herbs	433
Chapter 8	Qi-Regulating Herbs	473
Chapter 9	Digestive Herbs	519
Chapter 10	Antiparasitic Herbs	537
Chapter 11	Stop-Bleeding Herbs	559
Chapter 12	Blood-Invigorating and Stasis-Removing Herbs	609
Chapter 13	Phlegm-Resolving and Coughing- and Wheezing- Relieving Herbs	677
Chapter 14	*Shen*-Calming Herbs	751
Chapter 15	Liver-Calming and Wind-Extinguishing Herbs	777
Chapter 16	Orifice-Opening Herbs	813
Chapter 17	Tonic Herbs	829
Chapter 18	Astringent Herbs	981
Chapter 19	Emetic Herbs	1023
Chapter 20	Substances for Topical Application	1033
PART III	**ADDITIONAL RESOURCES**	1075
Appendix 1.	Cross-reference Based on Traditional Chinese Medicine Diagnosis	1077
Appendix 2.	Cross-reference Based on Western Medical Diagnosis	1093
Appendix 3.	Cross-reference Based on Pharmacological Effects	1107
Appendix 4.	Cross-reference of Single Herb Names	1121
Appendix 5.	Cross-reference of Herbal Formula Names	1134
Appendix 6.	Herbs Offering Beneficial Effects to Support Pregnancy	1144
Appendix 7.	Cautions / Contraindications for the Use of Herbs During Pregnancy	1145
Appendix 8.	Dosing Guidelines	1148
Appendix 9.	Weights and Measures: Chinese, British and Metric Systems	1150
Appendix 10.	Convention on International Trade in Endangered Species (CITES)	1152
Bibliography of Historical Texts		1153
Bibliography of Contemporary References		1158
Glossary		1166

Table of Contents

PART I OVERVIEW

Chapter 1 The History of Chinese Herbal Medicine 1
Chapter 2 Nomenclature of Chinese Herbs 3
Chapter 3 Classification of Chinese Herbs 7
Chapter 4 Growing and Harvesting Chinese Herbs 9
Chapter 5 Preparation and Processing of Chinese Herbs 11
Chapter 6 Characteristics of Chinese Herbal Medicines 14
Chapter 7 Clinical Applications of Chinese Herbal Medicine 19
Chapter 8 Concurrent Use of Herbal Medicines and Pharmaceuticals 25

PART II HERB MONOGRAPHS

Chapter 1 Exterior-Releasing Herbs 31
Section 1 Wind-Cold Releasing Herbs 36
Ma Huang (Herba Ephedrae) 36
Gui Zhi (Ramulus Cinnamomi) 40
Zi Su Ye (Folium Perillae) 43
Su Geng (Caulis Perillae) 44
Sheng Jiang (Rhizoma Zingiberis Recens) 45
Sheng Jiang Pi (Pericarpium Zingiberis Recens) 46
Xiang Ru (Herba Elsholtziae seu Moslae) 47
Jing Jie (Herba Schizonepetae) 49
Jing Sui (Flos Schizonepetae) 50
Fang Feng (Radix Saposhnikoviae) 51
Qiang Huo (Rhizoma et Radix Notopterygii) 53
Gao Ben (Rhizoma Ligustici) 55
Ji Xiang Teng (Caulis Paederiae) 57
Cong Bai (Bulbus Allii Fistulosi) 58
Bai Zhi (Radix Angelicae Dahuricae) 59
Cang Er Zi (Fructus Xanthii) 62
Cang Er Gen (Radix Xanthii) 64
Cang Er Cao (Herba Xanthii) 64
Xin Yi Hua (Flos Magnoliae) 65
E Bu Shi Cao (Herba Centipedae) 67

Section 2 Wind-Heat Releasing Herbs 68
Bo He (Herba Menthae) 68
Niu Bang Zi (Fructus Arctii) 70
Niu Bang Gen (Radix Arctii) 71
Chan Tui (Periostracum Cicadae) 72
Sang Ye (Folium Mori) 74
Ju Hua (Flos Chrysanthemi) 75
Man Jing Zi (Fructus Viticis) 77
Mu Zei (Herba Equiseti Hiemalis) 79
Yi Zhi Xiang (Herba Vernoniae Cinereae) 80
Ge Gen (Radix Puerariae) 81
Ge Hua (Flos Puerariae) 83
Chai Hu (Radix Bupleuri) 84
Bei Chai Hu (Radix Bupleurum Chinensis) 86
Nan Chai Hu (Radix Bupleurum Scorzoneraefolium) 86
Sheng Ma (Rhizoma Cimicifugae) 87
Dan Dou Chi (Semen Sojae Praeparatum) 89
Da Dou Huang Juan (Semen Glycines Germinatum) 90
Wu Tian (Radix et Folium Viticis Quinatae) 91
Fu Ping (Herba Spirodelae) 92
Shuang Liu Huang (Herba Vernoniae Patulae) 93
Mao Zi Dun Tou (Herba Abutilon Indicum) 93
Summary Review: **Exterior-Releasing Herbs** 95

Chapter 2 Heat-Clearing Herbs 101
Section 1 Heat-Clearing and Fire-Purging Herbs 108
Shi Gao (Gypsum Fibrosum) 108
Duan Shi Gao (Gypsum Fibrosum Preparata) 110
Zhi Mu (Radix Anemarrhenae) 111
Qing Guo Gen (Radix Canarium Album) 113
Han Shui Shi (Mirabilite) 114
Hong Shi Gao (Gypsum Rubrae) 114
Fang Jie Shi (Calcitum) 114
Tian Hua Fen (Radix Trichosanthis) 115
Lu Gen (Rhizoma Phragmitis) 117
Zhu Ye (Herba Phyllostachys) 119
Dan Zhu Ye (Herba Lophatheri) 120
Zhi Zi (Fructus Gardeniae) 121
Zhi Zi Ren (Semen Gardeniae) 123
Zhi Zi Pi (Pericarpium Gardeniae) 123
Xia Ku Cao (Spica Prunellae) 124
Xia Ku Hua (Flos Prunellae) 125
Mi Meng Hua (Flos Buddlejae) 126
Qing Xiang Zi (Semen Celosiae) 127
Gu Jing Cao (Flos Eriocauli) 128
Rui Ren (Semen Prinsepiae) 129
Da Ding Huang (Caulis Euonymi) 130
Ren Zhong Bai (Urinae Hominis Sedimen) 130
Shi Lian Zi (Herba Sinocrassulae Indicae) 131
Lu Cha (Folium Camellia Sinensis) 132
Wu Long Cha (Folium Camellia Sinensis Fermentata) 134
Xi Gua (Fructus Citrulli) 135
Xi Gua Pi (Pericarpium Citrulli) 136
Xi Gua Cui Pi (Exocarpium Citrulli) 136

Section 2 Heat-Clearing and Dampness-Drying Herbs 137
Huang Qin (Radix Scutellariae) 137
Huang Lian (Rhizoma Coptidis) 141
Huang Bai (Cortex Phellodendri) 145
Ji Xue Cao (Herba Centellae) 147
Long Dan Cao (Radix Gentianae) 148
Ku Shen Gen (Radix Sophorae Flavescentis) 150

Section 3 Heat-Clearing and Blood-Cooling Herbs 153
Xi Jiao (Cornu Rhinoceri) 153
Shui Niu Jiao (Cornu Bubali) 154

Table of Contents

Huang Niu Jiao (Cornus Bovis) 154
Qing Niu Jiao Fen (Cornus Bovis) 154
Sheng Di Huang (Radix Rehmanniae) 155
Xian Di Huang (Radix Rehmanniae Recens) 157
Xuan Shen (Radix Scrophulariae) 158
Mu Dan Pi (Cortex Moutan) 160
Mu Dan Ye (Folium Moutan) 161
Chi Shao (Radix Paeoniae Rubrae) 162
Zi Cao Gen (Radix Lithospermi) 164
Fu Rong (Radix Hibisci) 167
Fu Rong Ye (Folium Hibisci) 167
Huang Teng (Caulis Fibraurea) 168
Ji Guan Hua (Flos Celosiae Cristatae) 168
Dong Qing Ye (Folium Ilexis) 169

Section 4 Heat-Clearing and Toxin-Eliminating Herbs 171
Jin Yin Hua (Flos Lonicerae) 171
Ren Dong Teng (Caulis Lonicerae) 173
Lian Qiao (Fructus Forsythiae) 174
Guan Ye Lian Qiao (Herba Hypericum) 176
Pu Gong Ying (Herba Taraxaci) 178
Zi Hua Di Ding (Herba Violae) 180
Ye Ju Hua (Flos Chrysanthemi Indici) 181
Lou Lu (Radix Rhapontici) 182
Niu Huang (Calculus Bovis) 184
Ren Gong Niu Huang (Calculus Bovis Syntheticum) 185
Zao Xiu (Rhizoma Paridis) 186
Xiong Dan (Fel Ursi) 186
Niu Dan (Fel Bovis) 187
Zhu Dan (Fel Porcus) 187
Bai Lian (Radix Ampelopsis) 188
Bai Xian Pi (Cortex Dictamni) 188
Qian Li Guang (Herba Senecionis Scandens) 190
Ji Gu Cao (Herba Abri) 191
Ban Bian Lian (Herba Lobeliae Chinensis) 192
Cha Chi Huang (Herba Stellariae Aquaticae) 193
Dao Di Wu Gong (Rhizoma Heliminthostachytis) 194
Jin Guo Lan (Radix Tinosporae) 195
Liu Ye (Folium Salicis Babylonicae) 196
Bai Hua She She Cao (Herba Oldenlandia) 197
Tian Kui Zi (Radix Semiaquilegiae) 199
Zi Bei Tian Kui (Herba Semiaquilegiae) 199
Long Kui (Herba Solanum Nigrum) 200
Ban Zhi Lian (Herba Scutellariae Barbatae) 201
Shan Ci Gu (Pseudobulbus Cremastrae) 202
Feng Wei Cao (Herba Pteris) 203
Dong Ling Cao (Herba Rabdosiae Rubescentis) 204
Chui Pen Cao (Herba Sedi) 206
Tu Fu Ling (Rhizoma Smilacis Glabrae) 207
Da Qing Ye (Folium Isatidis) 208
Ban Lan Gen (Radix Isatidis) 210
Qing Dai (Indigo Naturalis) 211
Zhu Zi Cao (Herba Enphorbiae Thymifoliae) 213
Chuan Xin Lian (Herba Andrographis) 214
Yu Xing Cao (Herba Houttuyniae) 216
She Gan (Rhizoma Belamcandae) 218
Shan Dou Gen (Radix Sophorae Tonkinensis) 219
Bei Dou Gen (Rhizoma Menispermi) 221
Ma Bo (Lasiosphaera seu Calvatia) 221
Pao Zai Cao (Herba Physalis Angulatae) 222
Dao Diao Jin Zhong (Melothria Maderospatana) 223
Ma Chi Xian (Herba Portulacae) 224
Qin Pi (Cortex Fraxini) 226
He Tao Qiu Pi (Cortex Juglandis) 227
Bai Tou Weng (Radix Pulsatillae) 227
Bai Tou Weng Jing (Caulis Pulsatillae) 228
Bai Tou Weng Ye (Folium Pulsatillae) 228
Ya Dan Zi (Fructus Bruceae) 229
Hong Teng (Caulis Sargentodoxae) 231
Bai Jiang Cao (Herba cum Radice Patriniae) 233
Hu Yao Huang (Herba Leucas Mollissimae) 234
Huang Shui Qie (Herba Solani) 235
Shan Ma Ti (Radix Rauvolfiae) 236
Pu Yin (Radix Wikstroemia Indica) 237
Shu Wei Huang (Herba Rostellulariae) 238
Xiang Si Cao (Herba Eupatorii Formosani) 239
Ya She Huang (Herba Lippiae) 240
Lu Dou (Semen Phaseoli Radiati) 241
Lu Dou Yi (Pericarpium Phaseoli Radiati) 241
Hei Dou (Semen Glycine Max) 241
He Ye (Folium Nelumbinis) 242

Section 5 Deficiency-Heat Clearing Herbs 244
Qing Hao (Herba Artemisiae Annuae) 244
Bai Wei (Radix Cynanchi Atrati) 247
Di Gu Pi (Cortex Lycii) 248
Yin Chai Hu (Radix Stellariae) 250
Hu Huang Lian (Rhizoma Picrorhizae) 251
Summary Review: **Heat-Clearing Herbs** 253

Chapter 3 Downward Draining Herbs 265
Section 1 Purgatives 269
Da Huang (Radix et Rhizoma Rhei) 269
Mang Xiao (Natrii Sulfas) 274
Po Xiao (Sal Glauberis) 275
Yuan Ming Fen (Matrii Sulfas Exsiccatus) 275
Fan Xie Ye (Folium Sennae) 276
Lu Hui (Aloe) 278
Ba Dou (Fructus Crotonis) 280

Section 2 Moist Laxatives 282
Huo Ma Ren (Fructus Cannabis) 282
Yu Li Ren (Semen Pruni) 284

Section 3 Harsh Expellants (Cathartics) 285
Gan Sui (Radix Euphorbiae Kansui) 285

Table of Contents

Da Ji (Radix Euphorbiae seu Knoxiae) 287
Hong Da Ji (Radix Knoxiae) 288
Jing Da Ji (Radix Euphorbiae Pekinensis) 288
Yuan Hua (Flos Genkwa) 288
Qian Niu Zi (Semen Pharbitidis) 290
Shang Lu (Radix Phytolaccae) 293
Summary Review: **Downward Draining Herbs** 295

Chapter 4 Wind-Damp Dispelling Herbs 299
Section 1 Wind-Damp Dispelling and Pain-Relieving Herbs 304
Du Huo (Radix Angelicae Pubescentis) 304
Wei Ling Xian (Radix Clematidis) 306
Fen Fang Ji (Radix Stephaniae Tetandrae) 308
Mu Fang Ji (Radix Couulus Trilobus) 309
Guang Fang Ji (Radix Aristolochiae Fangchi) 310
Xu Chang Qing (Radix Cynanchi Paniculati) 311
Can Sha (Excrementum Bombycis Mori) 312
Song Jie (Lignum Pini Nodi) 313
Song Ye (Folium Pini) 314
Song Guo (Fructus Pini) 314
Qi Ye Lian (Radix Schefflerae) 314
Lei Gong Teng (Radix Tripterygii Wilfordii) 315
Qin Jiao (Radix Gentianae Macrophyllae) 317
Hong Gu She (Radix Kadsura Japonicae) 319
Tou Gu Cao (Caulis Impatientis) 320
Yi Wu Gen (Radix Elaeagni) 321
Hai Fu Rong (Herba Limonium Wrightii) 321
Qing Feng Teng (Caulis Sinomenii) 322
Ma An Teng (Herba Ipomoea Pes-caprae) 323

Section 2 Wind-Damp Dispelling and Channel- and Collateral-Opening Herbs 324
Mu Gua (Fructus Chaenomelis) 324
Luo Shi Teng (Caulis Trachelospermi) 326
Sang Zhi (Ramulus Mori) 327
Qian Nian Jian (Rhizoma Homalomenae) 328
Hai Feng Teng (Caulis Piperis Kadsurae) 329
Hai Tong Pi (Cortex Erythrinae) 330
Xun Gu Feng (Herba Aristolochiae Mollissimae) 331
Bai Hua She (Bungarus Parvus) 332
Qi She (Agkistrodon) 333
Wu Shao She (Zaocys) 333
She Tui (Periostracum Serpentis) 334
Xia Tian Wu (Rhizoma Corydalis Decumbentis) 335
Chuan Shan Long (Rhizoma Dioscoreae Nipponicae) 337
Lao Guan Cao (Herba Erodii seu Geranii) 338
Shen Jin Cao (Herba Lycopodii) 339
Xi Xian Cao (Herba Siegesbeckiae) 340
Chou Wu Tong (Folium Clerodendri Trichotomi) 341
Huang Jin Gui (Caulis Vanieriae) 342
Liu Zhi Huang (Herba Solidaginis) 343
Yi Tiao Gen (Radix Moghaniae) 344

Section 3 Wind-Damp Dispelling and Tendon- and Bone-Strengthening Herbs 345
Sang Ji Sheng (Herba Taxilli) 345
Wu Jia Pi (Cortex Acanthopanacis) 347
Bei Wu Jia Pi (Cortex Periploca Sepium Radicis) 348
Hu Gu (Os Tigris) 349
Zhu Gu (Os Porcus) 349
Gou Gu (Os Canitis) 349
Lu Han Cao (Herba Pyrolae) 350
Shi Nan Teng (Ramulus Piper) 351
Zou Ma Tai (Rhizoma Ardisiae) 352
Summary Review: **Wind-Damp Dispelling Herbs** 353

Chapter 5 Aromatic Damp-Dissolving Herbs 359
Cang Zhu (Rhizoma Atractylodis) 363
Hou Po (Cortex Magnoliae Officinalis) 365
Hou Po Hua (Flos Magnoliae Officinalis) 367
Huo Xiang (Herba Agastache) 368
Guang Huo Xiang (Herba Pogostemon) 369
Pei Lan (Herba Eupatorii) 369
Sha Ren (Fructus Amomi) 371
Sha Ren Ke (Pericarpium Amomi) 372
Bai Dou Kou (Fructus Amomi Rotundus) 373
Bai Dou Kou Ke (Pericarpium Amomi Rotundus) 373
Cao Guo (Fructus Tsaoko) 374
Cao Dou Kou (Semen Alpiniae Katsumadai) 375
Summary Review: **Aromatic Damp-Dissolving Herbs** 377

Chapter 6 Water-Regulating and Damp-Resolving Herbs 379
Fu Ling (Poria) 383
Fu Ling Pi (Cortex Poria) 384
Bai Fu Ling (Poria Alba) 384
Chi Fu Ling (Poria Rubrae) 384
Fu Shen (Poria Paradicis) 384
Zhu Ling (Polyporus) 385
Ze Xie (Rhizoma Alismatis) 387
Yi Yi Ren (Semen Coicis) 389
Yi Yi Gen (Radix Coicis) 390
Che Qian Zi (Semen Plantaginis) 391
Che Qian Cao (Herba Plantaginis) 392
Hua Shi (Talcum) 393
Chuan Mu Tong (Caulis Clematidis Armandii) 394
Chuan Mu Tong (Caulis Clematidis Montana) 395
Wu Ye Mu Tong (Caulis Akebia Quinata) 395
San Ye Mu Tong (Caulis Akebia Trifoliata) 395
Bai Mu Tong (Caulis Akebia Trifoliata Australis) 395
Guan Mu Tong (Caulis Aristolochiae Manshuriensis) 396
Da Ye Ma Dou Ling (Caulis Aristolochia Kaempferi) 397
Huai Tong Ma Dou Ling (Caulis Aristolochia Moupinensis) 397

Table of Contents

Tong Cao (Medulla Tetrapanacis) 398
Geng Tong Cao (Ramulus Aeschynomene Indica) 398
Deng Xin Cao (Medulla Junci) 399
Di Fu Zi (Fructus Kochiae) 400
Bian Xu (Herba Polygoni Avicularis) 401
Qu Mai (Herba Dianthi) 403
Bai Long Chuan Hua Tou (Radix Clerodendron Paniculatum) 404
Ding Shu Xiu (Herba Elephantopus Scaber) 405
Shui Ding Xiang (Herba Ludwigiae Prostratae) 406
Mo Gu Xiao (Caulis Hyptis Capitatae) 407
Xian Feng Cao (Herba Bidentis) 408
Bi Zi Cao (Herba Pogonantheri Criniti) 409
Dong Gua Zi (Semen Benincasae) 410
Shan Pu Tao (Radix Vitis Amurensis) 411
Ma Ti Jin (Herba Dichondrae Repentis) 412
Jin Qian Cao (Herba Lysimachiae) 413
Si Chuan Da Jin Qian Cao (Herba Lysimachia Christinae) 414
Lian Qian Cao (Herba Glechomae) 414
Guang Jin Qian Cao (Herba Desmodii Styracifolii) 414
Hai Jin Sha (Herba Lygodii) 415
Hua Shi Cao (Herba Orthosiphon Aristatus) 416
Shi Wei (Folium Pyrrosiae) 417
Yin Chen Hao (Herba Artemisiae Scopariae) 418
Ling Yin Chen (Herba Siphonostegia Chinensis) 420
Bi Xie (Rhizoma Dioscoreae Hypoglaucae) 420
Dong Gua Pi (Exocarpium Benincasae) 422
Chi Xiao Dou (Semen Phaseoli) 422
Xiang Si Zi (Semen Abrus Precatoris) 423
Yu Mi Xu (Stigma Maydis) 424
Ze Qi (Herba Euphorbiae Helioscopiae) 425
Dong Kui Zi (Semen Malvae) 426
Qing Ma Zi (Semen Abutili) 427
Summary Review: **Water-Regulating and Damp-Resolving Herbs** 428

Chapter 7 Interior-Warming Herbs 433
Fu Zi (Radix Aconiti Lateralis Praeparata) 438
Chuan Wu (Radix Aconiti Preparata) 442
Wu Tou (Radix Aconiti) 444
Cao Wu (Radix Aconiti Kusnezoffii) 445
Rou Gui (Cortex Cinnamomi) 447
Gui Xin (Cortex Rasus Cinnamomi) 449
Tu Rou Gui (Cortex Cinnamomum Burmannii) 449
Gan Jiang (Rhizoma Zingiberis) 450
Pao Jiang (Rhizoma Zingiberis Preparatum) 451
Wu Zhu Yu (Fructus Evodiae) 452
Xi Xin (Herba Asari) 454
Tu Xi Xin (Herba Asarum Forbgesii) 457
Hua Jiao (Pericarpium Zanthoxyli) 458
Jiao Mu (Semen Zanthoxyli Bungeani) 459
Gao Liang Jiang (Rhizoma Alpiniae Officinarum) 460
Hong Dou Kou (Fructus Alphiniae Galangae) 461
Ding Xiang (Flos Caryophylli) 461
Mu Ding Xiang (Fructus Caryophylli) 462
Ding Xiang Pi (Cortex Caryophylli) 462
Hu Jiao (Fructus Piper) 463
Bi Ba (Fructus Piperis Longi) 464
Bi Cheng Qie (Fructus Litseae) 465
Xiao Hui Xiang (Fructus Foeniculi) 466
Shi Luo (Fructus Anethum Graveolens) 467
Da Hui Xiang (Fructus Anisi Stellati) 468
Mang Cao (Fructus Illicium Lanceolatum) 468
Summary Review: **Interior-Warming Herbs** 469

Chapter 8 Qi-Regulating Herbs 473
Chen Pi (Pericarpium Citri Reticulatae) 479
Ju Hong (Exocarpium Citri Rubrum) 480
Ju Luo (Fibra Citri Rubrum) 480
Ju Ye (Folium Citri Rubrum) 481
Ju He (Semen Citri Rubrum) 481
Hua Ju Hong (Exocarpium Citri Grandis) 481
Qing Pi (Pericarpium Citri Reticulatae Viride) 482
Zhi Shi (Fructus Aurantii Immaturus) 483
Zhi Ke (Fructus Aurantii) 486
Xiang Yuan (Fructus Citri) 487
Fo Shou (Fructus Citri Sarcodactylis) 488
Fo Shou Hua (Flos Citri Sarcodactylis) 489
Po Bu Zi Ye (Folium Cordia Dichotoma) 490
Da Fu Pi (Pericarpium Arecae) 491
Wan Dian Jin (Radix Ilicis Asprellae) 492
Mu Xiang (Radix Aucklandiae) 493
Xiang Fu (Rhizoma Cyperi) 495
Wu Yao (Radix Linderae) 497
Wu Teng (Ramulus Linderae) 498
Xie Bai (Bulbus Allii Macrostemonis) 499
Tan Xiang (Lignum Santali Albi) 500
Chen Xiang (Lignum Aquilariae Resinatum) 501
Chuan Lian Zi (Fructus Toosendan) 503
Ku Lian Zi (Fructus Meliae) 504
Qing Mu Xiang (Radix Aristolochiae) 505
Li Zhi He (Semen Litchi) 506
Suo Luo Zi (Semen Aesculi) 508
Ba Yue Zha (Fructus Akebiae) 508
Gan Song (Radix seu Rhizoma Nardostachys) 509
Jiu Ceng Ta (Herba Ocimi Basilici) 510
Tian Xian Teng (Herba Aristolochiae) 511
Dao Dou (Semen Canavaliae) 512
Shi Di (Calyx Kaki) 513
Summary Review: **Qi-Regulating Herbs** 514

Chapter 9 Digestive Herbs 519
Shan Zha (Fructus Crataegi) 523
Shen Qu (Massa Fermentata) 526
Jian Shen Qu (Massa Fermentata Preparata) 526
Hong Qu (Monascus) 527
Mai Ya (Fructus Hordei Germinatus) 529

Table of Contents

Gu Ya (Fructus Setariae Germinatus) 530
Lai Fu Zi (Semen Raphani) 531
Ji Nei Jin (Endothelium Corneum Gigeriae Galli) 533
Summary Review: **Digestive Herbs** 535

Chapter 10 Antiparasitic Herbs 537
Shi Jun Zi (Fructus Quisqualis) 541
Ku Lian Pi (Cortex Meliae) 543
Bing Lang (Semen Arecae) 545
Nan Gua Zi (Semen Cucurbitae Moschatae) 547
Fei Zi (Semen Torreyae) 549
He Shi (Fructus Carpesii) 550
Wu Yi (Fructus Ulmi Praeparatus) 551

Preface

As an herbalist and a pharmacist, it has always been my goal to produce an herbal medicine textbook that appropriately merges the concepts of traditional Chinese medicine with those of western medicine. Throughout my years of practice, I have often been asked about integration and interpretation of both paradigms of medicine. Practitioners of herbal medicine often ask whether certain herbs can be prescribed for particular patients because of potential herb-drug interactions. On the other hand, practitioners of western pharmaceutical-based medicine are often skeptical of herbs as authentic medicine because they have not gained understanding of "how or if herbs really work." While helpful answers have not always been promptly available, the question is crystal clear. There is a dire need for resources that integrate the two systems of medicine.

The objective for the compilation of *Chinese Medical Herbology and Pharmacology* is to create an informative and useful text on Chinese herbal medicine accessible to all healthcare practitioners. For herbal medicine practitioners, it offers comprehensive information on the traditional uses and applications of herbs. For other healthcare professionals, this text offers detailed discussion of the pharmacology and clinical applications of herbs. Those who practice in integrative settings will benefit from the understanding of contemporary frontiers of herb/drug interaction and toxicology information. This book is written for practitioners and students of medicine, and the contents are best understood by readers who have a basic understanding of both traditional Chinese and western medicines.

Chinese Medical Herbology and Pharmacology is dedicated to all who believe in the healing power of herbs, and believe that the next cure may be found in nature.

John K. Chen, Ph.D., Pharm.D., O.M.D, L.Ac.
Tina T. Chen, M.S., L.Ac.
June 2003

Writing any textbook requires commitment and self-sacrifice. Writing, translating, and compiling a highly-technical and detailed book is undertaken only by seriously-determined individuals with a lot of energy and broad knowledge, willing to invest many hours of disciplined effort and patience in organizing myriad details and establishing consistency throughout many hundreds of pages and dozens of pre-publication editions. Insuring that the whole of that material is accessible and clear for a widely-diverse audience of professionals in multiple disciplines requires a stubborn perfectionism that calls for even more patience.

I have been enormously fortunate to have been invited into the process of completing *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen. They exhibited not only the qualities mentioned above, but have shown great tolerance for my fierce editing, and generous openness to my ideas. John in particular has exercised forbearance with my persistent communication about thousands of details. I join John and Tina in hoping that the years invested in this work will be transformed through publication into genuine benefit to our profession and to ever-improving healthcare services for all individuals seeking to regain vitality and well-being.

Laraine Crampton, MPW, MATCM, L.Ac.
June 2003

Acknowledgements

We would like to thank all our teachers, who have taught us everything we know, especially Drs. Jimmy Wei-Yen Chang, Jiao Shu-De, Sam Liang, Richard Teh-Fu Tan, Liu Zhi-Tong, Tsai Wen-Qi, and Zhang Xiao-Ping.

We would like to thank Laraine for her unyielding pursuit of perfection. We truly appreciate everything you have done, and all the sacrifices you have made. You complete and compliment our strengths and weaknesses.

Our thanks to Dan Bensky, Randall Barolet, Andrew Gamble, Giovanni Maciocia, Subhuti Dharmanada, Him-che Yeung, Nigel Wiseman and Feng Ye for their contributions to Chinese herbal medicine.

The contributing editors and Peer Review committee have offered inestimable improvements for the material through their review, suggestions and contributions.

Jake Paul Fratkin, Felice Dunas, Giovanni Maciocia and Bob Felt, thank you for your wisdom on writing and publishing.

To our dear friend and colleague, who wishes to stay anonymous, our sincere thanks for his wisdom and support.

Most importantly, we would like to thank our family: our father, for his vision and inspiration; our mom, for her endless love and support; and our family for reminding us to stop and smell the herbs throughout this eight-year journey.

The publication of *Chinese Medical Herbology and Pharmacology* would not have been possible without the help of everyone who has contributed. This book belongs to all of us.

John K. Chen
Tina T. Chen

I would never have worked on this book if Dr. Maoshing Ni had not given me a life-changing introduction to Chinese medicine.

It has been a great privilege, and often fun, to work with and learn from John and Tina: you have broadened my understanding of our field and its potential. Your patience has been huge, hyphens and all.

My thanks to always-inspiring Cathy McNease and Denise Neumark-Reimer for patience and kindness as I learned herbology, and to my other teachers, not least Steve Given and Daoshing Ni, for emphasizing the critical importance of these potent medicines. Thanks to my patients, who inspire me to keep learning.

Colleen and Richard, I would have been lost without your generous hard work. Vanessa, Lily, Delicia, Nina, and recently, Minh, Larry and David: there is no way to quantify the value of your efforts. Rick and Charles, your creativity, brilliance and perseverance are the visual beauty of this book.

To Jeffrey Clark, Sollace Mitchell, and Brad Schreiber, my warmest thanks for graciously answering my calls and e-mails about arcane details of language. David G., thanks for great resources. Kathy and Mark, your meals and encouragement kept me going when the task grew long. Mom, you never complained when I had to postpone visits because of the book. Thanks always for your love and generosity of spirit.

Using this Book

Chinese Medical Herbology and Pharmacology has been designed for use in the clinic, in the classroom, in research, and to preserve and convey valuable historical information that may yet prove crucial in our future. Written to empower practitioner readers to become better clinicians, it offers detailed discussion on traditional applications, dosages and preparation of herbs, cautions and/or contraindications, overdosage and its treatment, and a contemporary expansion of clinician training: potential herb-drug interactions. All of these features simultaneously serve students and faculty in academic settings. Research professionals will find chemical structures and components, *in vitro* information on pharmacological effects and toxicology, and *in vivo* information from clinical studies. Some rare or potentially lethal medicinal substances that are *not* in contemporary use are included and discussed strictly to illustrate important concepts or historical value in traditional Chinese medicine. Among these are endangered species [such as *Hu Gu* (Os Tigris) and *Xi Jiao* (Cornu Rhinoceri)] and dangerous heavy metals [such as *Shui Yin* (Hydrargyrum) and *Qian Dan* (Minium)]. Their inclusion in no way advocates resumption of use or further destruction of species or resources.

Although pertinent to the history, practice, and research of Chinese herbal medicine, not all herbs discussed herein are commercially available. Some are prohibited as illegal substances (such as *Ying Su Ke* (Pericarpium Papaveris)), some, as mentioned above, carry excessive potential for toxicity (such as *Zhu Sha* (Cinnabaris)) or are restricted due to endangered status (such as *Xi Jiao* (Cornu Rhinoceri)). These substances are included only to offer the accurate history of their critically important usage in traditional herbal medicine, and to serve as models for appropriate usage of effective *substitute* substances. The readers are strongly encouraged to know and respect the rules and regulations for use of these substances in their own states and/or countries.

ILLUSTRATIONS

- Black-and-white photographs of substances are displayed in actual size, unless noted otherwise. Because most users of this text will not be gathering herbs direct from nature, we have chosen to provide illustrations of the harvested, processed, manicured substances as our readers would encounter them in realistic purchasing and clinical situations.
- Herb samples available at the time of publication are displayed in a full-color section, in alphabetical order by pinyin name. Matching black-and-white photographs accompany the primary herb entries throughout the text. We encourage the readers to always refer to the color pictures when seeking more complete and life-like illustration of herb samples.

NOMENCLATURE

- Traditional and simplified **Chinese Characters** lead each herb monograph to provide the most accurate Chinese name and to facilitate understanding of the herb under discussion. Simplified characters serve as the default in cases in which the traditional and simplified are identical.
- **Herbs and Formulas**: It is our goal to be as comprehensive and precise as possible. Traditional nomenclature of herbs is often vague: one herb may have several alternate names, and may be replaced by substitute plants from varied sources, species or genus. Thus, we have listed in the monographs Chinese characters, pinyin name, alternate pinyin name(s), literal name(s), common English name(s), botanical/zoological name(s) and pharmaceutical name(s). When an herb is commonly obtained from more than one natural source, identification is made of all pinyin, pharmaceutical and botanical names. Because differences in therapeutic effect are often distinguished by names, these distinctions are made clear. For example, *Sha Shen* (Radix Glehniae seu Adenophorae) is stated as *Nan Sha Shen* (Radix Adenophorae) or *Bei Sha Shen* (Radix Glehniae) whenever possible because of the unique clinical applications of each. "*Mu Tong*" has been separated appropriately into *Chuan Mu Tong* (Caulis Clematidis Armandii), *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis), *San Ye Mu Tong* (Caulis Akebia Trifoliata), *Wu Ye Mu Tong* (Caulis Akebia Quinata), and *Bai Mu Tong* (Caulis Akebia Trifoliata Australis), since these plants are not only from different genus and species, but also have different therapeutic effects and safety profiles.

The following are the primary sources the authors relied upon for nomenclature of herbs and formulas:

Zhong Hua Ren Min Gong He Guo Yao Dian (Chinese Herbal Pharmacopoeia by People's Republic of China), People's Republic of China, 2000. Our standard reference for nomenclature of pinyin and pharmaceutical names, this text offers the most precise, accurate and current information on the identification of Chinese herbs and other medicinal substances.

Xian Dai Zhong Yao Yao Li Xue (Contemporary Pharmacology of Chinese Herbs) by Wang Ben-Yang, Tianjing Science and Technology Press, 1999.

Chinese Herbal Medicine Materia Medica, by Dan Bensky and Andrew Gamble, Eastland Press, 1993.

Chinese Herbal Medicine Formulas & Strategies, by Dan Bensky and Randall Barolet, Eastland Press, 1990.

A Practical Dictionary of Chinese Medicine 2nd Edition, by Nigel Wiseman and Feng Ye, Paradigm Publications, 1998.

CHINESE THERAPEUTIC ACTIONS

- **Traditional Chinese Medicine (TCM) terminology.** Because traditional Chinese medicine and western medicine have distinct cultural and philosophical influences, it is challenging to accurately convey some TCM terms and concepts by using English or allopathic clinical language. We have made sincere efforts to provide consistent standards for terms and concepts to bridge the gap, as follows:

  Terms that have become an accepted part of English language discourse and are well understood by the general public, such as qi, yin and yang, are not italicized nor capitalized.

  Terms unique to the profession, understood primarily by TCM practitioners, are given in pinyin, italicized and translated but not capitalized; such as *bi zheng* (painful obstruction syndrome), *xiao ke* (wasting and thirsting) syndrome, and *lin zheng* (dysuria syndrome).

  Nouns distinct to herbal medicine are italicized, capitalized and translated, such as *Ren Shen* (Radix Ginseng) and *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).

  Translations are omitted after the first full use of the term in one monograph or segment of a monograph, unless repetition is necessary to insure clarity and safety in discriminating between substances or concepts.

  To avoid confusion, herbs other than the principle herb under consideration in a given monograph will be listed with their full pinyin and pharmaceutical names at each use, unless mentioned multiple times within a given paragraph.

  It is important to note that anatomical organ names in TCM imply functions distinct from their common understanding in western medicine. Therefore, organ names are capitalized when discussed within the context of traditional Chinese medicine but not when referring exclusively to anatomical function. For example, *Huang Qin* (Radix Scutellariae) is commonly used to clear **Lung** heat because the herb has shown antibiotic effectiveness to treat infection of the **lungs**.

  In some few instances, the authors felt that rendering a highly precise translation of a Chinese word misses the common professional meaning/usage of the term. In these cases, the common usage has been chosen for the body of the text, while precise translation is offered in the glossary.

  The Glossary provides additional information on individual terms and definitions. A cross-reference with the terminology chosen by **Wiseman** and **Ye** is also listed.

- **Formulas and Compositions:** Examples of Chinese herbal formulas are mentioned throughout this text, to enhance understanding of the qualities of an individual herb, and its applications. Herbal formula names are cross-referenced in Appendix 5, Cross-Reference of Herbal Formula Names. Further discussion, including the full composition of each formula in a thorough monograph, will be available in our next book.

Note: A keen reader may notice that the ingredients listed in some exemplar formulas here may differ slightly from standard classic formulas. We name the classic formula to demonstrate the

Using this Book

intent and basic strategy of the formulation in clinical application, but *not* to list the exact composition of the ingredients. Thus, in any given exemplar formula, additional herbs may be listed (as modifications) to optimize treatment in the particular contextual situation.

DOSAGE

- **Standard dosage:** Listed in this text is the standard dosage of ***dried*** herb to be used ***in decoction*** for an ***average adult***, unless otherwise specified. Adjustments are needed if the herbs are to be used in other forms: higher dosage (generally double) for the fresh herb, and lower dosage for herbs ingested in powder or pill forms. The average adult is defined as being between 18 and 60 years of age, weighing approximately 150 pounds. Thus, dosage must be adjusted more precisely depending on individual attributes. Additional information and guidelines for dosage adjustment can be found in Appendix 8, Dosing Guidelines.
- **Weights and Measurement:** Units of measurement have been converted from the traditional Chinese system to the metric system. Additional information on comparison and conversions can be found in Appendix 9, Weights and Measures: Chinese, British and Metric Systems.
- **Herb status:** Herbs in many forms are mentioned, accurately reflecting the marketplace and the clinic.

  Fresh herbs are those that are recently harvested. Fresh herbs are the most potent because the active components are completely or largely intact and available. Paradoxically, the dosage for fresh herbs is generally higher, as they still naturally contain a large amount of water.

  Dried herbs are those from which the water has been removed, usually by drying under the sun. Drying is an essential process that makes it possible to store herbs for longer periods of time without their becoming spoiled. Dried herbs are nonetheless frequently referred to as "raw herbs," not to be confused with fresh herbs. Most herbs sold in herb stores are dried.

  Unprocessed herbs have not been treated to alter their properties. Herbs are assumed to be unprocessed unless stated otherwise. "Unprocessed" is used in this text specifically to contrast differences in function and property with those of "processed" herbs.

  Processed herbs have been treated to alter or enhance certain properties and functions. There are numerous ways to "process" an herb, including dry-frying, charring to ash, calcining, roasting, boiling, steaming, quenching, and simmering, among others.

  The most common way in which herbs are stored and sold is dried and unprocessed. Therefore, most herbs in this text are assumed for purposes of discussion to be dried and unprocessed unless stated otherwise. Fresh herbs must be indicated specifically in contrast with dried herbs. If processed, the exact mechanism of processing must be indicated to differentiate the product from unprocessed substances.
- **Preparation and Processing of Herbs:** Processing enhances or alters therapeutic actions of herbs, and reduces side effects and/or toxicity. A general description of preparation and processing strategies and modalities is offered in Part I of this text, Chapter 5, Preparation and Processing of Chinese Herbs. The purposes and final effects of preparation and processing for each herb are listed in the Dosage section of the individual herb monographs.

CAUTIONS / CONTRAINDICATIONS

While it may be self-evident to experienced practitioners, new students and researchers or healthcare professionals from other fields will want to particularly note the cautions or contraindications mentioned for use of each substance under consideration. (If there are none reported, none will be mentioned.) In some cases these follow from observations made by practitioners hundreds or even thousands of years in the past, and the careful and accurate transmission of these key pieces of information from one generation of herbal practitioners to the next is one of the factors contributing to the long tradition of safe and effective practice of Chinese herbal medicine with a minimum of unwanted side effects.

OVERDOSAGE & TREATMENT

When used properly by trained practitioners, herbal medicines are generally considered safe and effective. Many examples of overdosage listed in this text are based on accidental ingestion, and ***not*** the intentional use of herbs by practitioners. Nonetheless, dosage is often the critical dividing line between a "medicine" and a "poison." The information on overdosage and its treatment is cited from numerous references. It is important to keep in mind that, while most cases of overdosage can be treated with the traditional methods listed, acute and life-threatening situations may require emergency medical intervention, as traditional methods may be inadequate in some contemporary clinics, because of the time and/or methods required for processing or preparation of remedies.

CHEMICAL COMPOSITION

- The chemical composition of herbs is extremely complex. The authors have accessed many resources for the compilation of this section in each monograph. For herbs in common use, the main active constituents have been studied extensively and are well understood. However, for herbs that have not been used as frequently, much research is still needed for complete understanding.
- The chemical structures of the main constituents are diagramed in the herb monographs, whenever relevant and available. The diagrams of chemical structures are provided with permission from *The Merck Index* 12th edition by Chapman & Hall/CRCnetBASE/Merck, and from *Traditional Chinese Medicines Molecular Structures, Natural Sources and Applications* by Yan X, Zhou J, and Xie G.

WESTERN SCIENCES

- **References:** It has been our intention to cite from original and credible sources whenever possible. Selection of references was based on relevance, strong study design, English language, use of human subjects whenever and wherever possible, with preference given to randomized, blinded, controlled studies over observational reports. However, not all references meet our selection criteria, mostly because studies on Chinese herbs were done predominately in China, in Chinese. Therefore, instead of restricting ourselves and the readers to the limited amount of information that fit these strict criteria, we decided to use our best judgment in including relevant information from credible sources. Another limitation we encountered during the compilation of this text is the inaccessibility of some original articles, texts, and references: some are out of press, others simply cannot be located. Although it is not always as complete, detailed or current as the authors would prefer, we have made our best effort in all cases to convey as much information on the original source as possible, judging even limited information to be of some value.
- **Scientific and Medical Terminology:** For the occasional allopathic term that readers might find puzzling, we recommend accessing any standard allopathic medical dictionary (see next entry for example). Since there is no need for translation or interpretation of these terms, we concluded that it was unnecessary and cumbersome to include such terms in the glossary for this text.
- **Medical Abbreviations and Symbols** are used in accordance with *Dorland's Illustrated Medical Dictionary*, 28th Edition, by Saunders.
- **Drug Names** are designated in this text by generic names only, or the combination of generic (proprietary) names. The generic (proprietary) names are referenced according to *Drug Facts and Comparisons*, updated monthly by Facts and Comparisons, a Wolters Kluwer Company.
- **Pharmacological Effects:** Most pharmacological studies focus on the anatomical and physiological influences of the herbs 1) on the body or 2) against pathogens. For example, many herbs are described as having antihypertensive effects, as the administration of the herbs leads directly to a decrease in blood pressure. Others are said to have antibacterial effects, as the introduction of the herb leads to the inhibition or death of bacteria. However, the exact mechanisms of action for many herbs are still not well understood at this time.
- **Clinical Studies and Research.** Chinese herbs are used in multiple-herb formulas to treat patients. Thus, most clinical studies and research cited include use of many herbs, not solely a single sub-

Using this Book

stance under consideration. Though this increases the number of variables influencing outcome, this nonetheless reflects the actual practice of Chinese herbal medicine and the basis on which centuries of refinement have been effectively carried forward.

HERB-DRUG INTERACTION

Herb-Drug Interaction is a critically important subject, yet there is little extensively definitive information available. Basic understandings of this topic are detailed in Part I, Chapter 8, Concurrent Use of Herbal Medicines and Pharmaceuticals. Documented and potential interactions (based on our best understanding of herbs and drugs) are discussed in each herb monograph when relevant. Herb monographs that do not contain herb-drug interaction information imply that there was no known or documented interaction at the time of publication. However, readers are strongly encouraged to stay updated, as new information on herb-drug complementarities and conflicts is regularly being published.

TOXICOLOGY

The toxicology of individual herbs or of their constituents is reported based on *in vitro* studies. Readers are urged to examine and understand these reports with the same attention to context, proportion and clinical application as would be the case in reviewing toxicology and/or *in vitro* studies for any medicine or supplement.

SUPPLEMENT

Frequently, additional herbs have names and/or functions similar to the primary substance under discussion in a particular monograph. These are brought for consideration in the Supplement section, particularly when they might serve as substitutes or be inappropriate substitutes. Many herbs included in this section are derived from the same botanical sources as the main herb in the monograph, and are mentioned for quick comparison purposes.

AUTHORS' COMMENTS

When there is relevant clinical information that does not sensibly fall under other categories, or when the authors wish to provide additional insights on a particular herb or its uses or a related topic, or to offer clinical experience volunteered by their teachers, this information is discussed in this closing segment of the monographs.

REFERENCES

Reference material is embedded in the text for ease of access via endnotes in each monograph. The key information from all of these notes has been carefully consolidated into two thorough bibliographic resources.

- The complete names of historical books (given in Chinese characters, pinyin names, and English names) are listed in the Bibliography of Historical Texts.
- The complete names for recent journals, articles and books are listed in the Bibliography of Contemporary References.

ADDITIONAL RESOURCES

In a text involving so many hundreds of pieces of information as *Chinese Medical Herbology and Pharmacology*, it is inevitable that on any given page a reader might find information that inspires curiosity about specific details that are not included in that particular monograph. The authors want both to provide as much information as possible and to avoid overwhelming students and practitioners with excessive repetition and complexity that obscures key concepts and bogs down progress through the general text.

For this reason, the reader will find in Part III that there are no less than ten specialty appendices to provide intensive bodies of information at the close of the text, followed by a thorough glossary and the two bibliographies mentioned above. Each of these is self-contained and self-explanatory.

The authors are proud and grateful to have had an excellent gathering of committed and experienced professionals contributing to and evaluating the content of this textbook. We invite the reader to appreciate the wealth of training and experience these contributors have brought to bear on behalf of *Chinese Medical Herbology and Pharmacology*, as listed in the section titled "About the Authors and Contributors."

There is, last but not least, an extensive index at the close of Part III, linking terminology and topics throughout the text for the convenience of students, practitioners and researchers.

It is our hope that these features will contribute to the greatest accessibility and convenience in your use of this volume.

DISCLAIMER

Great care has been taken by the authors, editors, and other contributors to maintain the accuracy of the information contained in *Chinese Medical Herbology and Pharmacology*. All information has been evaluated, double-checked and cross-verified. However, in view of the potential for human, electronic, or mechanical error, neither the authors nor the publisher nor any other contributors involved in the preparation or publication of this text warrant that the information contained herein is in every aspect accurate, and they are not responsible for any errors or omissions nor for the results obtained from the use of said information.

Chinese Medical Herbology and Pharmacology is intended as an educational guide for healthcare practitioners, as professional training and expertise are essential to the safe practice of herbal medicine in recommendation of and effective guidance for use of herbs. We cannot anticipate all conditions under which this information may be used. In view of ongoing research, changes in governmental regulation, and the constant flow of information relating to Chinese and western medicine, the reader is urged to check with other sources for all up-to-date information. In recognition that practitioners accessing information in this text will have varying levels of training and expertise, we accept no responsibility for the results obtained by the application of the information within this text. Neither the publisher, authors, editors, nor other contributors can be held responsible for errors of fact or omission, or for any consequences arising from the use or misuse of the information herein.

It is our intention to continually update and improve this text to maintain and enhance its usefulness. We welcome and encourage your comments and suggestions.

Herb Indentification Guide

Full-color photographs are displayed in alphabetical order by pinyin name in this section, to assist in accurate recognition of individual herbs. Because of limitations of space, many of these images are not reproduced in life-size scale.

However, the black-and-white images matched to corresponding herb monographs throughout the text are life-size unless otherwise noted.

Because most users of this text will not be gathering herbs directly from nature, we have chosen to provide illustrations of the harvested, processed, manicured substances as our readers would encounter them in realistic purchasing and clinical situations.

Ji Xiang Teng (Caulis Paederiae)

Ji Xue Cao (Herba Centellae)

Ji Xue Teng (Caulis Spatholobi)

Jian Shen Qu (Massa Fermentata Praeparata)

Jiang Can (Bombyx Batryticatus)

Jiang Huang (Rhizoma Curcumae Longae)

Jiang Xiang (Lignum Dalbergiae Odoriferae)

Jiao Gu Lan
(Rhizoma seu Herba Gynostemmatis)

Jiao Mu (Semen Zanthoxyli Bungeani)

Jie Geng (Radix Platycodonis)

Jin Fei Cao (Herba Inulae)

Jin Guo Lan (Radix Tinosporae)

Herb Indentification Guide

Jin Qian Cao (Herba Lysimachiae)

Jin Yin Hua (Flos Lonicerae)

Jin Ying Zi (Fructus Rosae Laevigatae)

Jing Jie (Herba Schizonepetae)

Jing Sui (Flos Schizonepetae)

Jiu Cai Zi (Semen Allii Tuberosi)

Jiu Ceng Ta (Herba Ocimi Basilici)

Jiu Jie Chang Pu
(Rhizoma Anemones Altaicae)

Ju He (Semen Citri Rubrum)

Ju Hong (Exocarpium Citri Rubrum)

Ju Hua (Flos Chrysanthemi)

Ju Luo (Fibra Citri Rubrum)

Ju Ye (Folium Citri Rubrum)

Jue Ming Zi (Semen Cassiae)

Ku Lian Pi (Cortex Meliae)

Ku Lian Zi (Fructus Meliae)

Ku Shen Gen (Radix Sophorae Flavescentis)

Kuan Dong Hua (Flos Farfarae)

Kun Bu (Thallus Laminariae seu Eckloniae)

Lai Fu Zi (Semen Raphani)

Lao Guan Cao (Herba Erodii seu Geranii)

Lei Gong Teng (Radix Tripterygii Wilfordii)

Lei Wan (Omphalia)

Li Lu (Radix et Rhizoma Veratri)

Li Zhi He (Semen Litchi)

Lian Fang (Receptaculum Nelumbinis)

Lian Qiao (Fructus Forsythiae)

Lian Xu (Stamen Nelumbinis)

Lian Zi (Semen Nelumbinis)

Lian Zi Xin (Plumula Nelumbinis)

Herb Indentification Guide

Ling Yang Jiao (Cornu Saigae Tataricae)

Ling Yin Chen (Herba Siphonostegia Chinensis)

Ling Zhi (Ganoderma)

Liu Huang (Sulfur)

Liu Ji Nu (Herba Artemisiae Anomalae)

Liu Zhi Huang (Herba Solidaginis)

Long Chi (Dens Draconis)

Long Dan Cao (Radix Gentianae)

Long Gu (Os Draconis)

Long Kui (Herba Solanum Nigrum)

Long Yan Hua (Flos Longan)

Long Yan Rou (Arillus Longan)

Lou Lu (Radix Rhapontici)

Lu Cha (Folium Camellia Sinensis)

Lu Dou (Semen Phaseoli Radiati)

Lu Dou Yi (Pericarpium Phaseoli Radiati)

Lu Feng Fang (Nidus Vespae)

Lu Gan Shi (Galamina)

Lu Gen (Rhizoma Phragmitis)

Lu Han Cao (Herba Pyrolae)

Lu Hui (Aloe)

Lu Jiao (Cornu Cervi)

Lu Jiao Jiao (Gelatinum Cornu Cervi)

Lu Jiao Shuang (Cornu Cervi Degelatinatium)

Lu Lu Tong (Fructus Liquidambaris)

Lu Rong (Cornu Cervi Pantotrichum)

Luo Han Guo (Fructus Momordicae)

Luo Shi Teng (Caulis Trachelospermi)

Ma An Teng (Herba Ipomoea Pes-caprae)

Ma Bian Cao (Herba Verbenae)

Herb Indentification Guide

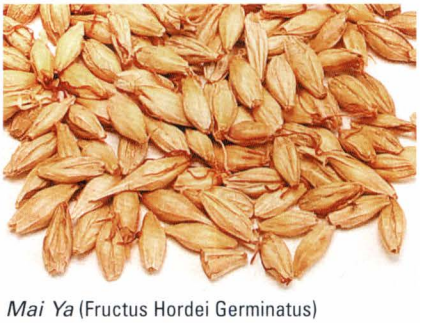
Ma Bo (Lasiosphaera seu Calvatia)

Ma Chi Xian (Herba Portulacae)

Ma Dou Ling (Fructus Aristolochiae)

Ma Huang (Herba Ephedrae)

Ma Huang Gen (Radix Ephedrae)



Ma Qian Zi (Semen Strychni)

Ma Ti Jin (Herba Dichondrae Repentis)

Mai Men Dong (Radix Ophiopogonis)

Mai Ya (Fructus Hordei Germinatus)

Man Jing Zi (Fructus Viticis)

Mang Xiao (Natrii Sulfas)

Mao Dong Qing (Radix Ilicis Pubescentis)

Mao Zi Dun Tou (Herba Abutilon Indicum)

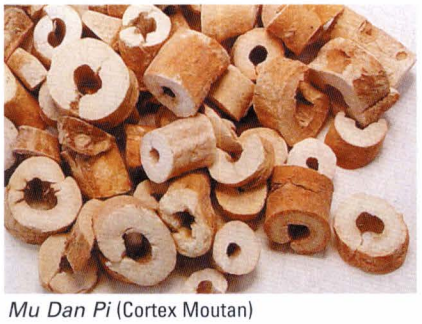
Meng Chong (Tabanus)

Meng Shi (Lapis Micae seu Chloriti)

Mi Meng Hua (Flos Buddlejae)

Mi Tuo Seng (Lithargyum)

Ming Fan (Alumen)



Mo Gu Xiao (Caulis Hyptis Capitatae)

Mo Yao (Myrrha)

Mu Bie Zi (Semen Momordicae)

Mu Dan Pi (Cortex Moutan)

Mu Fang Ji (Radix Couulus Trilobus)

Zi Wan (Radix Asteris)

Zong Lu Pi (Fibra Stipulae Trachycarpi)

Zou Ma Tai (Rhizoma Ardisiae)

Part I — Overview

总论

Chapter 1

— The History of Chinese Herbal Medicine

Chinese Herbal Medicine is a system of medicine based on a long history of empirical observation and on centuries of clinical trial and error. Whether addressing illness or enhancing health, healers and common folk alike have tested myriad herbs throughout time, and observed their effects on the human body. Through countless years of intentional and unintentional uses, the experience and knowledge of herbs gradually have been recorded and passed along, leading to Chinese Herbal Medicine as it is practiced today.

Table 1. Summary of Important Historical Texts on Chinese Herbs

Name	Author	Time	Description
Unknown	Unknown	1066-221 B.C.	Scattered listings of medicinal substances, case studies, and toxicity information
Shen Nong Ben Cao Jing (Divine Husbandman's Classic of the Materia Medica)	numerous authors	2nd century, A.D.	Detailed descriptions of 365 herbs
Ben Cao Jing Ji Zhu (Collection of Commentaries on the Classic of the Materia Medica)	Tao Hong-Jing	480-498 A.D.	Detailed descriptions of 730 herbs, with additional information such as methods of preparation and correct identification of the herbs
Tang Ben Cao (Tang Materia Medica)	Su Jing and 23 others	657-659 A.D.	Detailed descriptions and illustrations of 850 medicinal substances
Ben Cao Shi Yi (Omissions from the [Classic of the] Materia Medica)	Chen Cang-Qi	741 A.D.	Discussed single herbs and herbal formulas
Yao Xing Ben Cao (Materia Medica of Medicinal Properties)	Zhen Quan	600 A.D.	Focused on theory and functions of herbs
Shi Liao Ben Cao (Materia Medica of Diet Therapy)	Meng Shan	7th century	Emphasized the importance of diet and the use of 227 herbs as therapeutic agents
Hai Yao Ben Cao (Materia Medica of Herbs from [Across the] Seas)	Li Xun	7th century	Discussed aromatic herbs and herbs grown overseas
Kai Bao Ben Cao (Materia Medica of the Kai Bao Era)	Ma Zhi	973-974 A.D.	Contained descriptions of 983 herbs
Jia You Ben Cao (Materia Medica of the Jia You Era)	Zhang Yu-Xi and Su Song	1057-1060 A.D.	Listed profiles of 1082 herbs
Jing Shi Zheng Lei Bei Ji Ben Cao (Differentiation and Application of Materia Medica)	Tang Shen-Wei	1082 A.D.	Included compilation of 1558 herbs
Ben Cao Gang Mu (Materia Medica)	Li Shi-Zhen	1578 A.D.	Detailed descriptions and illustrations of 1,892 individual herbs (374 herbs not previously documented) and 11,000 herbal formulas
Ben Cao Gang Mu Shi Yi (Omissions from the Grand Materia Medica)	Zhao Xue-Min	1765 A.D.	Included 716 substances described for the first time.

Written records documenting Chinese herbal medicine extend over three thousand years into the past. Artifacts made between 1066-221 B.C. have been discovered, listing botanical and animal medicinal substances, giving case studies, and focusing on topics such as toxicity. Unfortunately, most of those early documents were incomplete when discovered, as they were damaged, or in

Chapter 1 — The History of Chinese Herbal Medicine

some cases, almost destroyed. The first authoritative documentation of Chinese herbal medicine extant in its complete form today is *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica), compiled by numerous authors by the second century, A.D. It contains information on 365 herbs, including details such as the thermal property, taste and toxicity of each herb, also dosages, dosage forms, and similar data. Many treatment protocols listed in that text are still in use today, such as the means of using *Ma Huang* (Herba Ephedrae) to relieve asthma, *Dang Gui* (Radicis Angelicae Sinensis) to regulate menstruation, and *Huang Lian* (Rhizoma Coptidis) to treat diarrhea.

As commerce between countries became more common, many herbs from neighboring countries were introduced to China. These herbs gradually gained acceptance in medicinal use and were documented accordingly. *Ben Cao Jing Ji Zhu* (Collection of Commentaries on the Classic of the Materia Medica), compiled by Tao Hong-Jing in 480-498 A.D., is the second oldest major text of Chinese herbal medicine known today. It describes 730 herbs and offers additional information such as methods of preparation and how to correctly identify the herbs.

The Tang dynasty (618 A.D. to 907 A.D.) was one of the more significant periods in the history of China, as the civilization experienced tremendous progress in medicine and culture. Numerous important classics were written during that time. *Tang Ben Cao* (Tang Materia Medica), also known as the *Xin Xiu Ben Cao* (Newly Revised Materia Medica) was compiled in 657-659 A.D. by Su Jing and 23 others. The book included detailed descriptions and illustrations of 850 medicinal substances, and even offered a description of the use of goat liver to improve vision and treat night blindness.

Also during the Tang dynasty, *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica), compiled by Chen Cang-Qi in 741 A.D., described folklore uses of herbal medicines and formulas. It included the use of *Zi He Che* (Placenta Hominis) to improve immunity.

In 600 A.D., another Tang dynasty text, Zhen Quan's *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) focused on the theory and functions of herbs. It provided uses for and accurate descriptions of fermented herbs, such as *Shen Qu* (Massa Fermentata).

Meng Shan's *Shi Liao Ben Cao* (Materia Medica of Diet Therapy), written in the seventh century, emphasized the importance of diet in health and the use of 227 herbs as therapeutic agents. In *Hai Yao Ben Cao* (Materia Medica of Herbs from [Across the] Seas), Li Xun expanded the scope of herbal medicine by focusing on 124 herbs that were either aromatic or derived from herbs grown overseas.

During the Song Dynasty, *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era), written by Ma Zhi in 973-974 A.D., was the most comprehensive source of information about herbal medicine of its time, providing descriptions of 983 herbs.

In 1057-1060 A.D., *Jia You Ben Cao* (Materia Medica of the Jia You Era), compiled by Zhang Yu-Xi and Su Song, detailed profiles of 1082 herbs.

Jing Shi Zheng Lei Bei Ji Ben Cao (Differentiation and Application of Materia Medica), by Tang Shen-Wei in 1082 A.D., combined references from many texts, and boosted the overall compilation to 1,558 herbs.

In 1578 A.D., during the Ming Dynasty, Li Shi-Zhen wrote one of the most important texts of Chinese herbal medicine, the *Ben Cao Gang Mu* (Materia Medica). Li Shi-Zhen spent his entire life studying herbal medicine, and invested over 27 years in compiling this text. Many herbalists/scholars consider this to be the most comprehensive and historically significant text in the field. It contains detailed descriptions and illustrations of 1,892 individual herbs (374 herbs not previously documented) and 11,000 herbal formulas. The *Ben Cao Gang Mu* corrected many errors found in previous texts. The text encompassed a wide variety of medicinal substances, ranging from plants, animals, and insects to minerals.

More recently, *Ben Cao Gang Mu Shi Yi* (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765 A.D., brought to attention many herbs used in folk medicine but not previously formally documented in texts. Though it only contained descriptions of 920 herbs, over three-quarters, that is 716, were described for the first time in this herbal text.

The texts mentioned above highlight only some of the landmarks of accomplishment through-

out the history of the profession. As this text is being prepared for publication, the total number of herbs that have been documented thus far is 11,146. The complete list of historical references used to obtain the above information can be found in the Bibliography of Historical Texts.

Chapter 2

— Nomenclature of Chinese Herbs

Chinese herbal medicine draws upon a wide variety of sources for medicinal substances, including plants, animals, insects, and minerals. Though not all of these are, strictly speaking, 'botanical substances,' they are generally referred to as a whole as 'Chinese Herbal Medicine.' Because of this wide variety of sources and unique individual characteristics, the functions of and indications for use of each of the herbs are significantly different. Often, the original name of the herb and the botanical or scientific category(ies) in which it is placed offer clues to these characteristics. Therefore, understanding the naming traditions or strategies (nomenclature) and the classification criterion (discussed in Chapter 3) for the substances provides an advantage for those who wish to pursue the study of Chinese herbal medicine.

For those unfamiliar with the *pinyin* transliteration of Chinese words: the pronunciation differences made possible by the Chinese tonal system are not immediately apparent in printed *pinyin* (particularly in the absence of diacritical marks). Thus, it may appear that one word has many meanings. Additionally, the context in which a Chinese word appears often defines the word. For example, the word '*jiao*' might mean 'horn' in one name while meaning 'gelatin' in another, because of the verbal context surrounding '*jiao*.' Reference to the Chinese characters provided at the heading **Chinese Name** in each herb profile will confirm the precise original name.

Context often defines Chinese words: '*jiao*' means 'horn' in one context, 'gelatin' in another. The Chinese characters provide the precise original word.

NOMENCLATURE BASED ON SHAPE

Many herbs earn their names from their unique physical appearance. Examples of such naming practices include:

- *Ru Xiang* (Gummi Olibanum), literally 'breast fragrant,' derives its name from both the breast-like shape the gel forms as it seeps from the tree, and its fragrance.
- *Bai Mu Er* (Fructificatio Tremellae Fuciformis), 'white wood ear,' is white and resembles an ear.
- *Niu Xi* (Radix Cyathulae seu Achyranthis), 'cow's knees,' has big joints that might look like cow knees.
- *Gou Teng* (Ramulus Uncariae cum Uncis), 'hook vine,' identifies vines that have hook-like tendril attachments.
- *Long Yan Rou* (Arillus Longan), 'dragon eye meat,' refers to the meaty part of the Longan fruit that looks like the eyes of a dragon.
- *Gou Ji* (Rhizoma Cibotii), 'dog spine,' resembles the spine of a dog.

Additional examples appear under the **Literal Name** heading within individual herb profiles.

Chapter 2 — Nomenclature of Chinese Herbs

NOMENCLATURE BASED ON COLOR

Color is not only a valuable means of identifying herbs for purchasing or pharmacy use, but in many cases also provides information about the therapeutic attributes of the herb. Thus, color is an essential element of nomenclature in this herbal tradition.

Red herbs are labeled *hong* (red), *chi* (bright red), or *zhu* (dull red). For example, *Hong Hua* (Flos Carthami) means 'red flower,' *Chi Shao* (Radix Paeoniae Rubrae) is 'bright red peony,' and *Zhu Sha* (Cinnabaris), 'dull red sand.'

Yellow herbs are referred to as *huang* (yellow) or *jin* (gold). *Huang Bai* (Cortex Phellodendri) means 'yellow fir,' *Da Huang* (Radix et Rhizoma Rhei) is known as 'big yellow,' and *Jin Yin Hua* (Flos Lonicerae) has the label 'golden silver flower.'

Herbs that are white may be called *bai* (white) or *yin* (silver). *Bai Shao* (Radix Paeoniae Alba) translates to 'white peony,' and *Yin Guo Ye* (Folium Ginkgo) is 'silver fruit leaf.'

Qing designates blue-green herbs. *Qing Pi* (Pericarpium Citri Reticulatae Viride) is 'blue-green peel' and *Da Qing Ye* (Folium Isatidis) means 'big blue-green leaf.'

Those herbs that are simply green are referred to as *lu*. Among green herbs: *Lu Dou* (Semen Phaseoli Radiati) 'green bean' and *Lu Cha* (Folium Camellia Sinensis) 'green tea.'

Black-colored herbs incorporate *hei* or *wu* in their names, such as *Hei Dou* (Semen Glycine Max) 'black bean,' *Hei Zao* (Fructus Jujubae) 'black jujube,' and *Wu Yao* (Radix Linderae) 'black medicine.'

Purple herbs are tagged with *zi*: *Zi Cao Gen* (Radix Lithospermi) 'purple herb root' and *Zi Hua Di Ding* (Herba Violae) 'purple flower earth herb.'

Similar instances throughout the text are specified in the **Literal Name** heading in each herb profile.

Table 2. Nomenclature Based on Color

Pinyin	Meaning	Pinyin Name	Literal Name	Pharmaceutical Name
Hong	Red	*Hong Hua*	Red flower	Flos Carthami
Chi	Bright red	*Chi Shao*	Bright red peony	Radix Paeoniae Rubrae
Zhu	Dull red	*Zhu Sha*	Dull red sand	Cinnabaris
Huang	Yellow	*Da Huang*	Big yellow	Radix et Rhizoma Rhei
Jin	Gold	*Jin Yin Hua*	Golden silver flower	Flos Lonicerae
Bai	White	*Bai Shao*	White peony	Radix Paeoniae Alba
Yin	Silver	*Yin Guo Ye*	Silver fruit leaf	Folium Ginkgo
Qing	Blue-green	*Qing Pi*	Blue-green peel	Pericarpium Citri Reticulatae Viride
Lu	Green	*Lu Dou*	Green beans	Semen Phaseoli Radiati
Hei	Black	*Hei Dou*	Black beans	Semen Glycine Max
Zi	Purple	*Zi Cao Gen*	Purple herb root	Radix Lithospermi

NOMENCLATURE BASED ON SMELL AND TASTE

A unique fragrance or odor determines part of the identifying name for some herbs. *Xiang* 'fragrant' describes herbs that are fragrant. For example, *Mu Xiang* (Radix Aucklandiae) means 'fragrant wood,' and *Jiang Xiang* (Lignum Dalbergiae Odoriferae), 'descending fragrance.' *Yu Xing Cao* (Herba Houttuyniae) 'fish smell herb' has a unique fishy odor. *Bai Jiang Cao* (Herba cum Radice Patriniae) 'rotten paste herb' smells similar to rotten paste.

Unique flavors define specific names for some substances. *Gan* means 'sweet,' so *Gan Cao* (Radix Glycyrrhizae) is 'sweet herb.' *Ku* is 'bitter,' thus *Ku Shen Gen* (Radix Sophorae Flavescentis) translates as 'bitter herb root.' *Suan* is 'sour,' thus *Suan Zao Ren* (Semen Zizyphi Spinosae) describes 'sour date seed.' *Xin* is 'acrid,' as used in *Xi Xin* (Herba Asari) 'thin acrid.' *Dan* is 'bland,' so *Dan Zhu Ye* (Herba Lophatheri) means 'bland bamboo leaves.' Lastly, *Wu Wei Zi* (Fructus Schisandrae Chinensis) means 'five-flavored seed,' referring to its five (*wu*) distinct flavors, namely sour, sweet, bitter, acrid, and salty. Related examples are offered throughout the text.

Chapter 2 — Nomenclature of Chinese Herbs

Table 3. Nomenclature Based on Smell and Taste

Pinyin	Meaning	Pinyin Name	Literal Name	Pharmaceutical Name
Xiang	Fragrant	*Mu Xiang*	Fragrant wood	Radix Aucklandiae
Gan	Sweet	*Gan Cao*	Sweet herb	Radix Glycyrrhizae
Ku	Bitter	*Ku Shen Gen*	Bitter herb root	Radix Sophorae Flavescentis
Suan	Sour	*Suan Zao Ren*	Sour date seed	Semen Zizyphi Spinosae
Xin	Acrid	*Xi Xin*	Thin acrid	Herba Asari
Dan	Bland	*Dan Zhu Ye*	Bland bamboo leaf	Herba Lophatheri

NOMENCLATURE BASED ON GEOGRAPHIC LOCATION

The geographic locations or provinces in which herbs are grown often figure into herb names.

Compass references: *bei* refers to north, *nan* to south, *dong* to east, and *xi* to west. *Bei Sha Shen* (Radix Glehniae) is grown and harvested in northern China. *Nan Sha Shen* (Radix Adenophorae) originated in southern China. *Dong Yang Shen* (Radix Ginseng Japonica) describes 'eastern' ginseng from Japan. *Xi Yang Shen* (Radix Panacis Quinquefolii) indicates 'western' ginseng from the American continent.

Province references: *Chuan* indicates Sichuan province, with examples like *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Chuan Niu Xi* (Radix Cyathulae). *Zhe* refers to Zhejiang Province, as in *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii). *Huai* refers to a place in Henan Province called Huaiqingfu, pinpointing the geographic origin of *Huai Niu Xi* (Radix Achyranthis Bidentatae).

Zhang refers to Tibet, thus *Zhang Hong Hua* (Flos Crocus Sativus) indicates the variety of *Hong Hua* (Flos Carthami) that comes from Tibet. *Fan*, 'barbarians,' identifies herbs imported to China, such as *Fan Xie Ye* (Folium Sennae).

NOMENCLATURE BASED ON PLANT LIFE CYCLES

The life and growth cycles of herbs provide useful input for names. *Xia Ku Cao* (Spica Prunellae), 'summer dry herb,' becomes withered and dry in summer. *Ren Dong Teng* (Caulis Lonicerae), 'tolerate winter vine,' continues to grow through the winter. *Dong Chong Xia Cao* (Cordyceps), 'winter bug summer herb,' is a fungal herb that grows in winter and is dormant in summer.

NOMENCLATURE BASED ON SPECIFIC PARTS

Specific plant and animal parts figure prominently in herb names. The most common examples are described below; other examples appear under the **Literal Name** headings in the main text.

Gen 'root' indicates the root as being the medicinal part of a particular herb. *Lu Gen* (Rhizoma Phragmitis) specifies phragmites root, and *Ma Huang Gen* (Radix Ephedrae), ephedra root.

Geng means 'branches,' and *zhi* means 'twigs,' referring to the branches/twigs as the medicinal component of the herb. *Su Geng* (Caulis Perillae) points to perilla branches, and *Gui Zhi* (Ramulus Cinnamomi), cinnamon twigs.

Ye 'leaves' selects leaves as the desired plant part. *Sang Ye* (Folium Mori) 'mulberry leaves,' and *Zhu Ye* (Herba Phyllostachys) 'bamboo leaves' are two common examples.

Hua 'flower' directs the herbalist to choose the flower as the medicinal portion of the herb. *Hong Hua* (Flos Carthami) specifies red flower, and *Ju Hua* (Flos Chrysanthemi) denotes the chrysanthemum flower.

Guo, literally meaning 'fruit,' designates the fruit. *Cao Guo* (Fructus Tsaoko) is 'herb fruit.'

Pi 'peel' identifies the peels or skins as the chosen medicinal component. *Qing Pi* (Pericarpium Citri Reticulatae Viride) means 'blue-green peel,' and *Chen Pi* (Pericarpium Citri Reticulatae) identifies 'aged peels.'

Zi or *ren* both indicate 'seeds' to be the medicinal element. *Dong Gua Zi* (Semen Benincasae) is 'wintermelon seed,' and *Tao Ren* (Semen Persicae), 'persica seed.'

Jiao 'horn' designates animal horn. *Lu Jiao* (Cornu Cervi) identifies deer horn, while *Shui Niu Jiao* (Cornu Bubali) is 'water buffalo horn.'

Chapter 2 — Nomenclature of Chinese Herbs

Dan 'gallbladder' specifies animal gallbladder for therapeutic use. For example, *Zhu Dan* (Fel Porcus) means 'pig gallbladder.'

Table 4. Nomenclature Based on Specific Parts

Chinese	English	Latin	Examples	Common Name
Cao	Herb	Herba	*Che Qian Cao* (Herba Plantaginis)	Plantain herb
Dan	Gallbladder	Fel	*Zhu Dan* (Fel Porcus)	Pig gallbladder
Dou	Seed	Semen	*Lu Dou* (Semen Phaseoli Radiati)	Mung bean
Gen	Root	Radix	*Ban Lan Gen* (Radix Isatidis)	Isatis root
Gen	Rhizome	Rhizoma	*Bai Mao Gen* (Rhizoma Imperatae)	Imperata root
Geng	Branch/stem	Caulis	*Su Geng* (Caulis Perillae)	Perilla branch
Gua	Fruit	Fructus	*Mu Gua* (Fructus Chaenomelis)	Papaya fruit
Hua	Flower	Flos	*Hong Hua* (Flos Carthami)	Safflower
Jiao	Horn	Cornu	*Lu Jiao* (Cornu Cervi)	Deer horn
Jiao	Gelatin	Gelatinum	*Gui Ban Jiao* (Gelatinum Plastrum Testudinis)	Tortoise shell gelatin
Ke	Shell	Concha	*Shi Jue Ming* (Concha Haliotidis)	Abalone shell
Mu	Wood	Lignum	*Su Mu* (Lignum Sappan)	Sappan wood
Pi	Bark	Cortex	*He Huan Pi* (Cortex Albiziae)	Albizia bark
Pi	Outer skin	Exocarpium	*Dong Gua Pi* (Exocarpium Benincasae)	Wintermelon peel
Pi	Peel/skin	Pericarpium	*Chen Pi* (Pericarpium Citri Reticulatae)	Orange peel
Ren	Fruit	Fructus	*Huo Ma Ren* (Fructus Cannabis)	Cannabis seed
Ren	Seed	Semen	*Xing Ren* (Semen Armeniacae Amarum)	Bitter almond seed
Shi	Stone	Calculus	*Niu Huang* (Calculus Bovis)	Cattle gallstone
Teng	Vine	Caulis	*Ren Dong Teng* (Caulis Lonicerae)	Honeysuckle vine
Ye	Leaf	Folium	*Yin Guo Ye* (Folium Ginkgo)	Ginkgo leaf
Zhi	Branch/twig	Ramulus	*Gui Zhi* (Ramulus Cinnamomi)	Cinnamon twig
Zi	Seed	Semen	*Lian Zi* (Semen Nelumbinis)	Lotus seed

NOMENCLATURE BASED ON FUNCTION

Herb names also arise from unique individual functions. For example, *Fang Feng* (Radix Saposhnikoviae), literally 'prevent wind,' prevents or treats wind-related illnesses. *Yi Mu Cao* (Herba Leonuri), literally 'benefit mother herb,' is often used in gynecology. *Xu Duan* (Radix Dipsaci), literally 'restore the broken,' effectively treats torn soft tissues and broken bones. *Yin Yang Huo* (Herba Epimedii), literally 'horny goat wort (or grass),' increases sexual desire and performance. *Yang Qi Shi* (Actinolitum), literally 'yang lifting the rock,' tonifies yang, and is said to do this so effectively that the male penis is strong enough to lift rocks.

NOMENCLATURE BASED ON HUMANS OR THE HUMAN ACTION INVOLVED

Some herbs are named after the individuals who discovered them. *Liu Ji Nu* (Herba Artemisiae Anomalae), 'live-in slave Liu,' identifies the first individual credited with finding or using the herb. *He Shou Wu* (Radix Polygoni Multiflori) credits 'dark-haired Mr. He's' continuous use of the herb to maintain black hair. *Qian Niu Zi* (Semen Pharbitidis), 'walk cow seed,' refers to how an old man found the herb while walking his cows.

NOMENCLATURE BASED ON COUNTRY OF ORIGIN

Through international commerce, many herbs indigenous to other countries have been incorporated into the Chinese materia medica. *Xi Yang Shen* (Radix Panacis Quinquefolii), imported from North American crops, translates as 'western ginseng,' while *Dong Yang Shen* (Radix Ginseng Japonica), grown in and imported from North Asian countries, is 'eastern ginseng.' Similar examples are noted in the text whenever geography matters in herb selection.

OTHER NAME DIFFERENTIATIONS

In addition to the methods above, there are more approaches to herbal nomenclature. For example, there are three types of *Di Huang* (Rehmannia): *Xian Di Huang* (Radix Rehmanniae Recens) is the fresh root, *Sheng Di Huang* (Radix Rehmanniae) is dried, and *Shu Di Huang* (Radix Rehmanniae Preparata) is prepared (steamed).

Chapter 3

— Classification of Chinese Herbs

The organization of Chinese herbal medicines into specific classes (of action, source, therapeutic function, or other criteria) has long been a challenging task. While the *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica), one of the earliest texts, listed only 365 herbs, *Zhong Yao Da Ci Dien* (The Dictionary of Chinese Herbs), one of the latest contemporary references, covers 9,000 herbs. Reasonably, herbal medicine practitioners need systematic approaches to finding their way around this huge pharmacopoeia. Based on the vast number of herbs to be assessed, several approaches to classification have been incorporated over the years.

CLASSIFICATION BY THERAPEUTIC ACTIONS AND SIDE EFFECTS

Some texts classify herbs as superior-, medium- and inferior-grade, based on their therapeutic effectiveness and possible side effects.

Herbs of **superior** status have excellent therapeutic action, few or no side effects, and may safely be taken for a long period of time. Superior herbs include *Ren Shen* (Radix Ginseng), *Gan Cao* (Radix Glycyrrhizae), *Di Huang* (Radix Rehmanniae), *Shi Hu* (Herba Dendrobii), *Ba Ji Tian* (Radix Morindae Officinalis), *Huang Qi* (Radix Astragali), *Gou Qi Zi* (Fructus Lycii), and others. These herbs are safe not only as medicine but also as food.

Herbs given **medium** status have both therapeutic benefit and possible side effects, requiring professional supervision for medicinal usage. Medium-status herbs include *Gan Jiang* (Rhizoma Zingiberis), *Ma Huang* (Herba Ephedrae), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Wu Zhu Yu* (Fructus Evodiae), and *Hou Po* (Cortex Magnoliae Officinalis), among others.

Herbs assigned **inferior** status may have more side effects and/or toxicities than therapeutic benefits (especially if not properly processed or administered). Such herbs are used only when the key benefits outweigh the risks, and only under professional supervision. Examples of inferior herbs include *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Ban Xia* (Rhizoma Pinelliae), *Da Huang* (Radix et Rhizoma Rhei), *Gan Sui* (Radix Euphorbiae Kansui), *Ba Dou* (Fructus Crotonis), and *Wu Gong* (Scolopendra), to name a few. This designation does not mean that these herbs have lesser value in clinical practice.

Chapter 3 — Classification of Chinese Herbs

CLASSIFICATION BY THE SOURCE OF THE HERBS

Other texts classify substances based on the original source of the substance. While the majority of medicinal substances are herbs, many are derived from and thus categorized by other sources:

- Plants
  Leaves, Branches, Stems, Fruits, Seeds, Roots, Barks, Twigs
- Animals
- Fish
- Shellfish
- Insects
- Minerals

CLASSIFICATION BY THERAPEUTIC FUNCTION

Most texts classify herbs based on the therapeutic function of each substance. The following terms are used to describe the effects various herbs have on qi, blood, *shen* (spirit), yin, yang, body fluids or pathogens:

- disperse
- astringe
- tonify
- sedate
- warm
- cool
- moisten
- dry
- eliminate toxins
- move

CLASSIFICATION BASED ON INTERNAL ORGANS

Some texts primarily classify herbs based on the affected *zang* (solid) and *fu* (hollow) organs. *Zang* organs include Kidney, Liver, Heart, Pericardium, Spleen, and Lung. *Fu* organs include Urinary Bladder, Gallbladder, Small Intestine, *San Jiao*, Stomach and Large Intestine. Details are also given as to how the herbs affect the organs: tonify, harmonize, attack, disperse, cool, or warm. A specific herb, for example, might 'tonify Liver yin,' boosting and nourishing the yin energy of the Liver.

OTHER STRATEGIES

Chinese medicine texts are published in several languages for varied professional audiences. In addition to the approaches mentioned above, there are specialty texts that classify the herbs based on details such as:

- the number of strokes required to create the Chinese characters of each herb name
- presenting the herb *pinyin* names in alphabetical order
- the general disease syndromes under consideration, or other such choices.

Chapter 4

— Growing and Harvesting Chinese Herbs

Herbs are products of nature: through millions of years of natural selection they have adapted to the environments most favorable for their growth and survival. Climate, geography and timing of harvest are significant factors influencing the quality of the herbs and thus, their individual usefulness in treating specific conditions. Herbalists through the centuries have recorded and passed on information about these details; contemporary scientists are bringing sophisticated laboratory analysis to study these facts.

Some herbs reach optimum quality if grown on the east coast of China in the humid ocean climate; some are best gathered on the dry West coast desert; some thrive only in the north, with long, cold winters; and others do best in the long summers and hot climate of the South.

Increasing use of Chinese herbs worldwide may result in over-harvesting in China and endanger indigenous herb supplies, unless international efforts are made to protect and cultivate these herbs elsewhere.

GEOGRAPHIC CLIMATE

Although a specific herb may be cultivated successfully in several regions of China, some herbs are named after a specific province to emphasize the impact of geographic climate on quality. This traditional emphasis on geographic location has been validated in several cases by modern science. In one laboratory study, it was found that samples of *Dan Shen* (Radix Salviae Miltiorrhizae) obtained from different provinces had significantly different contents of an element called tanshinone II A, with variations of up to several levels of concentration.[1] Similarly, essential oil content of *Bo He* (Herba Menthae) from various regions can fluctuate up to 10 times in concentration.[2]

Specific examples of herbs and their association with geographic climate include modifiers to herb names derived from such provinces as Sichuan, Zhejiang, Henan, and Guangdong.

Sichuan province is commonly abbreviated as *chuan. Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Chuan Wu* (Radix Aconiti Preparata), *Chuan Niu Xi* (Radix Cyathulae), *Chuan Lian Zi* (Fructus Toosendan), and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) are most effective if grown and harvested in Sichuan.

Zhejiang province is commonly abbreviated as *zhe* or *hang*, with such examples as *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Hang Ju Hua* (Flos Chrysanthemi).

The common derivation of Henan province is *huai*, with examples like *Huai Niu Xi* (Radix Achyranthis Bidentatae), *Huai Shan Yao* (Rhizoma Dioscoreae), and *Huai Ju Hua* (Flos Chrysanthemi).

Guangdong province is commonly abbreviated *guang*, as in *Guang Chen Pi* (Pericarpium Citri Reticulatae).

However, due to an increase in the use of Chinese herbs worldwide, harvesting herbs from the wild in the ideal provinces indicated by their names will not always meet the demand. This may result in over-harvesting local resources and even endangering the original supply of indigenous herbs. Therefore, many herbs are now cultivated rather than gathered wild; grown, if not in the ideal province, at least in a similar climate, to ensure maximum effectiveness.

TIME OF HARVEST

The timing of harvest significantly affects the potency of herbs as the plants go through seasonal changes of growth, maturation, blossoming, bearing fruit, withering, and dormancy. Different plant parts are harvested at specific seasons or stages to ensure maximum potency for desired actions.

In collecting Chinese herbs that make use of the entire plant, such as *Yi Mu Cao* (Herba Leonuri) and *Xian He Cao* (Herba Agrimoniae), it is best to harvest immediately prior to the blossoming of the flowers.

Chapter 4 — Growing and Harvesting Chinese Herbs

When leaves are the primary medicinal component, as is the case with *Da Qing Ye* (Folium Isatidis), *He Ye* (Folium Nelumbinis), and *Ai Ye* (Folium Artemisiae Argyi), the leaves are ideally harvested immediately before or during the blooming of flowers, when the leaves contain the highest levels of active ingredients and aroma.

When flowers are the key herbal component desired, such as *Ju Hua* (Flos Chrysanthemi), *Xuan Fu Hua* (Flos Inulae), and *Huai Hua* (Flos Sophorae), they are harvested while in bloom. Some herbs like *Ju Hua* (Flos Chrysanthemi) require multiple harvests, as flowers often blossom repeatedly or plants mature at different rates because of differences in exposure, water or other factors. Others, like *Jin Yin Hua* (Flos Lonicerae) and *Xin Yi Hua* (Flos Magnoliae), should be gathered while the flower is still within the bud, immediately before blossoming. Still others, like *Hong Hua* (Flos Carthami), are best harvested as the flowers begin to change color (in this case, from yellow to red), yielding maximum fragrance and potency.

Seed and fruit substances, such as *Gua Lou Shi* (Fructus Trichosanthis), *Xing Ren* (Semen Armeniacae Amarum), and *Wu Wei Zi* (Fructus Schisandrae Chinensis), ought to be collected in the early to middle stages of fruit formation. Fully-mature fruit may bruise or burst during drying and transport, creating difficulties with distribution. Some herbs specifically must be immature fruit, such as *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Zhi Shi* (Fructus Aurantii Immaturus), and *Wu Mei* (Fructus Mume), and therefore must be harvested prior to reaching maturity.

Chinese herbs that are barks, such as *Huang Bai* (Cortex Phellodendri), *Hou Po* (Cortex Magnoliae Officinalis), *Du Zhong* (Cortex Eucommiae), and *Qin Pi* (Cortex Fraxini), should be collected in spring and summer, when plant growth insures that a maximum level of nutrients is circulating in the bark. To ensure a continuous supply of these herbs both in the short- and long-range future, the plants should not be cut down to facilitate harvesting, and the bark should be removed in sections without stripping the entire circumference of the tree or shrub. Such stripping may harm or kill the plant.

When roots are the medicinal substance, as is the case with *Tian Ma* (Rhizoma Gastrodiae), *Cang Zhu* (Rhizoma Atractylodis), *Ge Gen* (Radix Puerariae), *Jie Geng* (Radix Platycodonis), *Da Huang* (Radix et Rhizoma Rhei), *Dan Shen* (Radix Salviae Miltiorrhizae), and *Tian Nan Xing* (Rhizoma Arisaematis), the roots must be harvested during the dormant phase of the plant, in late winter or early spring, while all the nutrients are stored in the roots.

Organic medicinal substances other than flora should be harvested following a similar rationale. Insects should be collected in spring and summer to ensure maximum potency. Animals are generally farmed and animal products harvested at appropriate seasons specifically for medicinal purposes. Ideally, farming ensures that the animals will not be treated cruelly, and that wild populations will not be depleted. On the other hand, minerals, not subject to seasonal variation, may be gathered year round.

Harvest timing has a significant impact on herb potency, as documented by numerous studies. For example, in one laboratory study, samples of *Qing Hao* (Herba Artemisiae Annuae) were collected at various stages of growth, to analyze the content of arteannuin—an active constituent in *Qing Hao* that plays a key role in treatment of malaria. It was concluded that the sample taken immediately prior to the blooming of the flowers contained the highest concentration of arteannuin.[3]

Another study reported that winter-harvested *Dan Shen* (Radix Salviae Miltiorrhizae) contained two to three times the amount of the component tanshinone than samples harvested during other seasons.[4]

Lastly, an investigation determined that samples of *Shi Chang Pu* (Rhizoma Acori) harvested in winter exhibited a higher content of essential oil than samples gathered in spring and summer.[5]

Chapter 5

– Preparation and Processing of Chinese Herbs

The preparation and processing of herbs are essential activities of Chinese herbal medicine. While some herbs are used in their fresh or original forms, most must be prepared or processed before use, to achieve maximum availability of their constituents. Each method of preparation or processing has a specific purpose or function that influences the final product and its therapeutic impact.

PURPOSES OF PREPARATION AND PROCESSING

There are seven main purposes for the preparation and subsequent processing of herbal substances:

- to enhance or alter therapeutic actions
- to minimize loss of active components
- to maximize extraction of constituents
- to reduce side effects and/or toxicity
- to increase surface area and facilitate extraction
- to prevent spoilage and prolong shelf life
- to clean herbs prior to ingestion

To **enhance or alter therapeutic actions**, herbs may be processed (with honey, vinegar or grain-based liquor), steamed, baked, roasted, or charred to ashes, or cooked for greater or lesser periods of time. Processing *Kuan Dong Hua* (Flos Farfarae) with honey enhances its action to moisten the Lung and relieve coughing. Processing *Huang Qin* (Radix Scutellariae) with grain-based liquor strengthens its ability to clear heat from the upper *jiao*. Vinegar-processing *Chai Hu* (Radix Bupleuri) or *Xiang Fu* (Rhizoma Cyperi) facilitates entrance to the Liver for treatment of liver-related disorders.

To **alter therapeutic action**, *Sheng Di Huang* (Radix Rehmanniae), a cold substance that cools heat in the blood, is steamed to yield *Shu Di Huang* (Radix Rehmanniae Preparata), a warm herb used to tonify blood. Roasting the exterior-relieving *Sheng Jiang* (Rhizoma Zingiberis Recens) yields interior-warming *Pao Jiang* (Rhizoma Zingiberis Preparatum). Charring *Ai Ye* (Artemisiae Argyi) to ash enhances its capacity to stop bleeding.

To **minimize loss of active components**, some herbs are cooked only for a short period of time, such as volatile mint leaves, *Bo He* (Herba Menthae), and agastache, *Huo Xiang* (Herba Agastache). This method is known as post-decoction.

To **maximize extraction of active constituents**, some herbs are cooked for a prolonged period of time. *Ren Shen* (Radix Ginseng), is often cooked by itself for a relatively long time for single use, or cooked separately prior to being added to other herbs for further cooking in a formula. Both the relatively high cost of ginseng and the relatively high potency of this herb make the longer cooking time quite appropriate. This process is called pre-decoction.

To **reduce side effects and/or toxicity**, certain raw materials are pre-processed. Both *Chuan Wu* (Radix Aconiti Preparata) and *Cao Wu* (Radix Aconiti Kusnezoffii) are examples of herbs that are toxic when raw and should be processed with *Gan Cao* (Radix Glycyrrhizae) and *Hei Dou* (Semen Glycine Max) to decrease toxicity and minimize side effects. Processing *Chang Shan* (Radix Dichroae) with grain-based liquor reduces its tendency to cause nausea and vomiting. *Ban Xia* (Rhizoma Pinelliae) and *Tian Nan Xing* (Rhizoma Arisaematis) require additional preparation and processing to reduce toxicity.

To **increase available herb surface area and facilitate extraction**, minerals, seeds, and shells must be ground or crushed to increase the surface area interacting with the surrounding solution, to ensure maximum extraction of active components. Specific examples include *Zi Ran Tong*

Chapter 5 — Preparation and Processing of Chinese Herbs

(Pyritum), *Ci Shi* (Magnetitum), *Chuan Shan Jia* (Squama Manis), *Zhen Zhu Mu* (Concha Margaritaferae), *Gui Ban* (Plastrum Testudinis), and *Bie Jia* (Carapax Trionycis).

To **prevent spoilage and prolong shelf life**, most plant-based herbs or moisture-sensitive substances must be dried completely prior to storage, to prolong shelf life and avoid spoilage. In addition, many tonic herbs are soaked in grain-based liquor to make herbal wine. The alcohol acts as an effective solvent to extract active constituents, and as a preservative to prevent degradation and spoilage of the herbs.

Cleaning herbs prior to ingestion is an important aspect of the preparation of herbal substances. This purifying involves removing dirt, contamination, odors, and inactive components. Herbs of botanic origin require thorough washing to remove dirt and debris. Other plants or weeds must be removed. Strongly odorous substances may be washed, processed with grain-based liquor or vinegar, or dry-fried until they turn a yellowish color, to release the objectionable odors. Inactive or irrelevant parts of the medicinal substance, such as the head and legs of the cicada *Chan Tui* (Periostracum Cicadae), should be removed prior to final processing and ingestion.

METHODS OF PREPARATION AND PROCESSING

The many substances of Chinese herbal medicine require various methods of preparation to make them available for human use: mechanical processing, water techniques, the use of heat, combined water and heat applications, and more.

Mechanical processing methods are sub-divided into cleaning, pulverizing and slicing:

- Cleaning removes the non-medicinal parts of the material through sorting, sifting and peeling techniques. Examples of cleaning include removal of leaves and branches from *He Huan Hua* (Flos Albiziae), or removal of hair from *Pi Pa Ye* (Folium Eriobotryae).
- Pulverizing works to increase the surface area of substances and facilitate ingestion through grinding, pounding, and crushing techniques. Examples of pulverizing include pounding *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) into small pieces prior to cooking, or grinding *Ling Yang Jiao* (Cornu Saigae Tataricae) into fine powder to allow effective ingestion.
- Slicing is another method of increasing the available surface area of herbs, as well as allowing the herbalist to create standard portion weights and sizes, facilitate drying, and prolong shelf life.

Water processing techniques are sub-divided into moistening, washing, and *shui fei* (refining with water):

- Moistening requires soaking the herbs in water to soften the substances prior to slicing, or to ensure complete extraction prior to cooking in decoctions.
- Washing requires repeated soaking of herbs and removal of the soak water to eliminate undesired odor and components. For example, *Zi He Che* (Placenta Hominis) is washed to remove odor, and *Hai Zao* (Sargassum) and *Kun Bu* (Thallus Laminariae seu Eckloniae) are washed to remove excess salt.
- *Shui fei* (refining with water) technique literally means "flying in water." This technique begins with placing the herbs in a large container with water. The herbs are then crushed and ground, leaving large and heavy particles to settle to the bottom, while small and light particles remain suspended, "flying in water." The small and light particles are poured with the water into another container, and the heavier, sedimentary, particles are ground again. The process of grinding and pouring is repeated several times until only the smallest, lightest particles remain. This is a relatively lengthy, complex method, generally reserved for minerals, shells, and other medicinal substances normally insoluble in water. The purpose of this technique is to extract only the smallest and lightest particles that remain suspended in water. Herbs used for ophthalmic preparations are often processed by *shui fei*.

Methods using heat are subdivided into *chao* (dry-frying), *tan* (charring to ash), *zhi* (frying with liquid), *duan* (calcining), and *wei* (roasting):

- *Chao* (dry-frying) requires stir-frying herbs, without adding liquid, until the herbs turn yellow or

Chapter 5 — Preparation and Processing of Chinese Herbs

black, or turn to ash. This increases the warmth of the herb, harmonizes and moderates therapeutic effects, and facilitates extraction of active constituents.

- *Tan* (charring to ash), burning the herbs to ash, harmonizes and moderates therapeutic effects, reduces side effects, and potentiates the 'stop bleeding' properties of specific substances.
- *Zhi* (frying with liquid) changes the properties of herbs by introducing a new component while heating. This is done to enhance therapeutic effectiveness and reduce side effects. Liquids used for frying include honey, grain-based liquor, vinegar, ginger juice, and salt water.
  - Honey enhances the moisturizing effect.
  - Grain-based liquor enhances the invigorating function to move qi and blood.
  - Vinegar facilitates entrance to the Liver and treatment of Liver disorders.
  - Ginger juice increases warmth and relieves nausea and vomiting.
  - Salt facilitates entrance to the Kidney and treatment of Kidney disorders.
- *Duan* (calcining) places an herb directly or indirectly into flames until the substance turns red and brittle. This method is often reserved for minerals or shell-like substances, to facilitate pulverization.
- *Wei* (roasting) is a technique that reduces toxicity or moderates the drastic actions of some herbs. Roasting involves wrapping the herbs in wet cloth, paper, or mud, and heating this bundle in hot cinders until the coating has turned black or burned away.

Methods using both water and heat are sub-divided into *zhu* (boiling), *zheng* (steaming), *cui* (quenching), and *ao* (simmering):

- *Zhu* (boiling): Cooking certain herbs in boiling water or another medium enhances the therapeutic effect or reduces toxicity. For example, boiling *Da Ji* (Radix Euphorbiae seu Knoxiae) in vinegar reduces its toxicity.
- *Zheng* (steaming): This method indirectly introduces heat and water to the herbs, again altering the therapeutic effect or reducing toxicity. Steaming *Da Huang* (Radix et Rhizoma Rhei) with grain-based liquor moderates its purgative and laxative properties. Repeated steaming and drying of *He Shou Wu* (Radix Polygoni Multiflori) enhances its tonic strength and reduces its laxative effect.
- *Cui* (quenching): This procedure involves calcining the herbs until they turn red, followed by dipping the calcined product in cold water, making the substance brittle, to facilitate pulverization of the herbs.
- *Ao* (simmering): This process slowly cooks the herbs, extracts active constituents, and removes excess water. Gels, pastes, and extracts are made using this method.

Chapter 6

— Characteristics of Chinese Herbal Medicines

One of the great strengths of Chinese herbal medicine is the high degree of effectiveness obtained by precise differentiation of *both* the symptom pattern *and* the nature and properties of individual herbs. This allows unique prescription of a formula that incorporates herbs selected for the specific characteristics and functions that address the particular symptom pattern that has been identified.

The characteristics of herbs are highly interdependent with herb functions, and vice-versa. The term 'characteristics' refers to a set of values that describe the thermal property, taste, direction, channel affiliations, and toxicity (if any) of each substance. Herb 'functions' describe therapeutic effects (and possible side effects). Throughout the history of traditional Chinese medicine, there has been continuous observation and evaluation of the therapeutic behaviors of herbs. After countless years of recorded experience, the overall effects of herbs are clearly understood, their characteristics well established. While knowing the characteristics of each herb enables the herbalist to interpret its functions, a clear understanding of the herb functions allows one to establish its characteristics.

Most authorities agree on fundamental characteristics and functions of herbs, but there are occasional differences in detail from one text to another.

Most authorities agree on the fundamental characteristics and functions of the majority of herb substances. However, because the interpretation of taste, thermal property, channels affiliations and therapeutic effects are somewhat subjective, there are occasional differences from one text to another.

TASTE

Each herb has a specific taste attribute within the following array: **acrid, sweet, sour, bitter, salty, bland**, and **astringent**. The first five distinctions comprise the five fundamental tastes used in classical herbal medicine. Detailed functions and specific examples of each taste are as follows:

Acrid (pungent): Acrid-tasting herbs often have dispersing and moving properties. For example, herbs that release the exterior, such as *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi), *Jing Jie* (Herba Schizonepetae), and *Bo He* (Herba Menthae), are acrid. These herbs function to disperse outward, induce diaphoresis, and dispel exterior pathogenic factors. Herbs that invigorate the circulation of qi and blood, such as *Chen Pi* (Pericarpium Citri Reticulatae), *Mu Xiang* (Radix Aucklandiae), *Chuang Xiong* (Rhizoma Ligustici Chuanxiong), and *Hong Hua* (Flos Carthami), are also acrid: they disperse and move qi and blood. Since acrid herbs are both dispersing and drying, they should be used with caution in patients with deficiency of qi, yin, or body fluids, and in cases of spontaneous perspiration.

Sweet: Sweet herbs often have tonifying and harmonizing properties. *Ren Shen* (Radix Ginseng) and *Huang Qi* (Radix Astragali), both sweet, are key herbs to tonify qi. In addition, many herbs that have harmonizing and moderating properties are also sweet. *Gan Cao* (Radix Glycyrrhizae) and *Da Zao* (Fructus Jujubae) are sweet herbs that provide excellent catalysts to harmonize an herbal formula, moderate the drastic effects of some herbs, and relieve pain. Since sweet herbs are often rich or cloying and hard to digest, thus, may cause stagnation, they should be used with caution in patients who have Spleen deficiency with accumulated dampness.

Sour: Herbs that are said to taste sour often function to stabilize and bind, thereby reducing or preventing the loss of body fluids through perspiration, diarrhea, bleeding, leukorrhea, urinary incontinence, enuresis, spermatorrhea, and nocturnal emissions. For example, *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Wu Bei Zi* (Galla Chinensis) function to stop perspiration; *Xian He Cao* (Herba Agrimoniae) and *Bai Ji* (Rhizoma Bletillae) stop bleeding; *Chi Shi Zhi* (Halloysitum Rubrum) and *Shi Liu Pi* (Pericarpium Granati) stop diarrhea; and *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Sang Piao Xiao* (Ootheca Mantidis) halt spermatorrhea and nocturnal emissions.

Chapter 6 — Characteristics of Chinese Herbal Medicines

In addition, sour herbs nourish Stomach yin and improve appetite, as is true of *Wu Mei* (Fructus Mume) and *Wu Wei Zi* (Fructus Schisandrae Chinensis); others, such as *Mu Gua* (Fructus Chaenomelis) and *Bai Shao* (Radix Paeoniae Alba) treat muscle spasms and cramps caused by damage to body fluids. *Wu Mei* (Fructus Mume) is one example of several sour herbs that calm intestinal parasites and relieve pain.

Bitter: Bitter-tasting herbs function to sedate, to purge, and/or to dry dampness. The sedating and purging functions refer to the elimination of heat and other excess factors via the downward movement of the herbs. For example, *Da Huang* (Radix et Rhizoma Rhei), a bitter herb, drains heat and fire downwards to relieve constipation; *Xing Ren* (Semen Armeniacae Amarum), also a bitter herb, sends inappropriately rising Lung qi back downwards to relieve wheezing and dyspnea; and *Zhi Zi* (Fructus Gardeniae) purges fire to treat various infections accompanied by elevated body temperature.

Furthermore, bitter-tasting herbs function to dry dampness. Bitter and cold herbs, such as *Huang Lian* (Rhizoma Coptidis), treat syndromes characterized by dampness and heat. Bitter and warm herbs, such as *Cang Zhu* (Rhizoma Atractylodis), address syndromes characterized by dampness and cold.

Herbs distinguished by the bitter taste have been found to stimulate the nervous system and increase production of gastric acid. Therefore, a small quantity of bitter herbs taken before meals will increase appetite and improve digestion. A large quantity, however, may have the opposite effect, inducing nausea and vomiting. Since bitter herbs are drying in nature, they should be used with caution in cases of deficiency of yin and body fluids.

Salty: The functions of the salty-tasting herbs are to purge excess, soften hardness, and facilitate entrance to the Kidney and/or Kidney channel. For example, *Mang Xiao* (Natrii Sulfas) has purgative action to treat constipation; *Mu Li* (Concha Ostreae) softens hardness to treat scrofula, enlarged thyroid, and nodules. In addition, herbs that are salty or have been processed with salt, such as *Lu Rong* (Cornu Cervi Pantotrichum) and *Ge Jie* (Gecko), enter the Kidney and treat Kidney-related disorders.

Bland: Not surprisingly, bland-tasting herbs have little or no taste. They generally exert diuretic influence, and are commonly used to treat edema and dysuria. *Fu Ling* (Poria) and *Zhu Ling* (Polyporus) are common examples.

Astringent: Herbs designated as having an astringent property are basically the same as sour-tasting herbs, functioning to retain and bind, that is, draw or bind together and preserve or prevent leakage of bodily substances. For example, *Wu Wei Zi* (Fructus Schisandrae Chinensis) contains the leakage of Lung qi to treat cough, *Chi Shi Zhi* (Halloysitum Rubrum) binds the intestines to stop diarrhea, and *Fu Xiao Mai* (Semen Tritici Aestivi Levis) stops spontaneous sweating.

It is important to note that tastes and functions do not always correspond to each other. Foods that have the flavors described above may not have any identified medicinal properties; herbs with specific therapeutic effects may not always have the usual corresponding taste. For example, *Ge Gen* (Radix Puerariae) acts to dispel heat and release the exterior, yet does not taste acrid. Another example, *Ying Su Ke* (Pericarpium Papaveris) stabilizes and binds the intestines to treat diarrhea, yet does not have either sour or astringent tastes.

Table 6. Relationship of Taste and Function

Taste	Function
Acrid	Release the exterior, disperse outwards, move qi and blood
Sweet	Tonify deficiencies, harmonize herbs within a formula
Sour	Stabilize and bind, reduce and prevent the loss of body fluids
Bitter	Sedate heat, purge fire, drain downwards, dry dampness
Salty	Purge excess, soften hardness, facilitate entrance to the Kidney
Bland	Promote urination
Astringent	Stabilize and bind, reduce and prevent the loss of body fluids

Chapter 6 — Characteristics of Chinese Herbal Medicines

THERMAL PROPERTY

Thermal property describes the 'temperature' of the herbs, expressed as a progressive range: cold, cool, neutral, warm, hot. Describing a traditional approach to treatment, many classic texts state: "Cold diseases must be warmed, and hot diseases must be cooled." Therefore, cold or cool herbs, such as *Huang Qin* (Radix Scutellariae) and *Ban Lan Gen* (Radix Isatidis), are commonly used to treat disorders characterized by heat, such as fever and sore throat. Warm and hot herbs, such as *Gan Jiang* (Rhizoma Zingiberis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata), treat disorders characterized by cold, such as abdominal cold and pain, and cold extremities. Neutral herbs, such as *Fu Ling* (Poria), may be used for conditions on either side of the temperature range. Accurate diagnosis of the temperature of the health imbalance, followed by a correct corresponding prescription, promotes successful treatment of the illness.

DIRECTION

The concept of **direction** refers to the dynamic or developmental movement of the disease and to the directional affinity of the herbs. There are disorders that move *upwards* (such as cough and vomiting), *downwards* (diarrhea, dysentery, prolapse of rectum), *inward* (transformation from a common cold to pneumonia), and *outward* (spontaneous or night perspiration). Similarly, each herb has its own directional characteristics, some more pronounced than others. Flowers or rapidly-growing plants tend to carry lighter, upward-moving qi, while substances found deeper in the earth, such as roots or minerals, often possess heavier, or downward-bearing energy.

Therefore, disorders typified by a distinct directional flow may be countered by the use of herbs that influence movement in the opposite direction. For example, a cough (Lung qi moving up) may be relieved by herbs that cause qi to descend; prolapse of the rectum may be treated with herbs that lift qi (raise or cause it to ascend); the inward invasion of a common cold may be treated by the use of herbs that disperse and dispel the exterior pathogenic factor; and spontaneous perspiration may be treated with herbs that retain fluids and/or bind substances to prevent loss.

Herbs with particular directional affinities may also be useful as 'guide herbs' to direct the therapeutic effect of the treatment to the affected area. For example, *Qiang Huo* (Rhizoma et Radix Notopterygii) moves upwards, thus it treats musculoskeletal disorders of the upper body (and guides other herbs in a formula to the upper body). Conversely, *Du Huo* (Radix Angelicae Pubescentis) moves downwards and thus treats (and/or guides other herbs to treat) musculoskeletal disorders of the lower body.

CHANNELS AFFILIATIONS

The appointment of one or more of the 14 classic energetic channels of the body to each herb is done gradually via the accumulated understanding of the functions of and indications for each herb. The criteria this assignment is based upon include **direct effect, indirect effect**, and **specific effect**.

The system of assigning channels by **direct effect** refers to the specific function and indications of the herb. For example, *Xing Ren* (Semen Armeniacae Amarum) is said to enter the Lung channel because it treats cough and wheezing; classic texts list *Ban Xia* (Rhizoma Pinelliae) as entering the Stomach channel because it relieves nausea and vomiting; and tradition holds that *Zhu Ling* (Polyporus) goes to the Urinary Bladder channel because it promotes urination.

Channels are also appointed to the herb **indirectly** via the interpretation of its function. For example, *Bu Gu Zhi* (Fructus Psoraleae) warms the Spleen and Kidney to (indirectly) relieve chronic diarrhea, so is said to enter the Spleen and Kidney channels; and *Fu Pen Zi* (Fructus Rubi) treats frequent urination by tonifying Kidney qi, thus is identified as influencing the Kidney channel. *Xu Duan* (Radix Dipsaci) nourishes bones and tendons, effectively treating bone fractures and soft tissue injuries. Since tendons are controlled by the Liver and bones by the Kidney, *Xu Duan* is said to enter the Liver and Kidney channels.

Furthermore, there are some herbs that have **specific effects** for treating certain organs and particular kinds of headache, and are appointed channels based on observation of those affinities. For example, *Yin Chen Hao* (Herba Artemisiae Scopariae) is one of the most effective herbs for

Chapter 6 — Characteristics of Chinese Herbal Medicines

treatment of jaundice, and thus is assigned to enter the Liver and Gallbladder channels.

A classic example of how this differentiation is applied in clinical practice is the use of herbs for headache: *Qiang Huo* (Rhizoma et Radix Notopterygii) is most effective in treating *taiyang* headaches; *Chai Hu* (Radix Bupleuri) most directly addresses *shaoyang* headaches; and *Bai Zhi* (Radix Angelicae Dahuricae) excels at treating *yangming* headaches. *Taiyin* headaches should be treated with *Cang Zhu* (Rhizoma Atractylodis), *shaoyin* headaches are best treated with *Xi Xin* (Herba Asari), and *jueyin* headaches can be dealt with by adding *Wu Zhu Yu* (Fructus Evodiae). Thus, each of these herbs are assigned to the corresponding channels.

SUMMARY

It is important to keep in mind that while thermal property, taste, direction and channels are four separate evaluative criteria, each of them must be taken into account when treating patients. Choosing the correct taste but the wrong temperature, or the appropriate temperature but the wrong channels will result in inappropriate treatment.

For example, just because *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), and *Long Dan Cao* (Radix Gentianae) are all cold does not mean they have the same function and indications. *Huang Lian* clears Heart fire, *Huang Qin* clears Lung fire, and *Long Dan Cao* clears Liver fire.

In addition, just because *Huang Qin* (Radix Scutellariae), *Gan Jiang* (Rhizoma Zingiberis), *Bai He* (Bulbus Lilii) and *Ting Li Zi* (Semen Descurainiae seu Lepidii) all enter the Lung channel does not mean they can be used indiscriminately for Lung disorders. *Huang Qin* clears Lung fire, *Gan Jiang* warms the Lung, *Bai He* tonifies Lung yin, and *Ting Li Zi* sedates excess Lung energy.

To obtain maximum impact for the efforts put into integrating temperature, taste, direction and channels, it is important to correctly diagnose the disorder. For example, when treating patients with wheezing and dyspnea, it is important to know whether the disorder is caused by the Lung or the Kidney. Wheezing and dyspnea caused by a Lung disorder should be treated with *Ma Huang* (Herba Ephedrae) and *Xing Ren* (Semen Armeniacae Amarum) to disperse and descend qi; while wheezing and dyspnea caused by Kidney deficiency should be treated with *Ge Jie* (Gecko) and *Bu Gu Zhi* (Fructus Psoraleae) to tonify the Lung and help Kidney energy to grasp the qi and draw it down.

Following precise diagnostic protocols will similarly allow the practitioner to select appropriate herbs for such regional issues as headaches, as discussed above, and *bi zheng* (painful obstruction syndrome), that have unique causes and locations.

TOXICITY

Toxicity refers to the potential for an herb to cause side effects and adverse reactions. While the majority of herbs are safe when used correctly and within the suggested dosage range, there are some that may cause undesired effects even within normal dosage ranges. Such herbs are designated as having toxic properties. These herbs have a narrow safety index and must be used only when the benefits of usage outweigh the risks.

From over 7,000 species of medicinal plants in China, not more than 10 species are considered toxic.

The impact of toxicity is often dose-related. Smaller doses are associated with less toxic reactions, while larger doses are associated with more toxic impact. From over 7,000 species of medicinal plants in China, not more than 10 species are considered toxic. Examples of toxic herbs from these species include various aconite roots and datura species, a tiny group of substances that account for up to 76% of all serious reactions that require urgent medical treatment.[6]

Some of these herbs are inherently toxic and their uses must be monitored carefully. *Huang Yao Zi* (Herba Dioscoreae Bulbiferae) is very effective for treatment of hyperthyroid conditions. However, its use has been associated with liver damage in rare cases. Therefore, *Huang Yao Zi* must be prescribed in small dosages, monitored carefully, and discontinued if symptoms and signs of potential liver damage occur.

Proper combining with other herbs is also an effective solution to reduce noxious impact. For example, concurrent use of *Gan Cao* (Radix Glycyrrhizae) reduces the toxicity of *Fu Zi* (Radix

Chapter 6 — Characteristics of Chinese Herbal Medicines

Aconiti Lateralis Praeparata); use of *Sheng Jiang* (Rhizoma Zingiberis Recens) decreases the toxicity of *Ban Xia* (Rhizoma Pinelliae); and use of *Bing Lang* (Semen Arecae) relieves nausea caused by *Chang Shan* (Radix Dichroae).

Reducing dosage while increasing frequency of intake is another approach to reducing the negative impact of a toxic herb. This method reduces the peak blood concentration associated with a large dosage, and stabilizes the blood concentration by more frequent dosing. This is especially effective for patients who suffer side effects or adverse reactions immediately after ingesting herbs.

Toxicity is sometimes caused by adulteration and contamination of herbs. While most herbal products are safe and effective, there are some products that may contain pharmaceutical drugs, herbicides, pesticides, sulfur, heavy metals, bacteria and fungus. Adverse reactions due to adulteration and contamination of herbs are problems associated with lack of quality control during the manufacturing procedure. Such instances are to be evaluated as manufacturing errors, not as inherent toxicity of the herbs.

It is important to note that allergic reactions are not toxic reactions. An *allergy* is a hypersensitive reaction that is specific and may differ in every individual. Allergic reactions occur with exposure to the offending agent. A mild allergy is characterized by skin rash and itching, while a severe allergic reaction may cause dyspnea and shortness of breath. Unfortunately, it is difficult, if not impossible, to predict which herb may cause allergy to what degree of severity in which individual.

Inappropriate Use

Correct diagnosis and appropriate usage of herbs contribute a great deal to prevention of unwanted results. For example, a patient suffering from a deficiency needs to have that deficiency tonified. However, if yang tonics are incorrectly prescribed to treat yin deficiency, not only will the treatment be ineffective, but the condition will also deteriorate further, since warm, yang-building herbs will further deplete stores of yin.

Gan Cao (Radix Glycyrrhizae) is an example of an herb that is generally safe and effective in a variety of uses and combinations. However, if used incorrectly in large dosages over a prolonged period of time, it will undoubtedly cause edema and an unwanted increase in blood pressure.

The toxicity of the few suspect herbs can be reduced and/or minimized when the herbs are processed correctly. For example, while unprocessed aconite roots are considered toxic, cooking them in boiling water for 30 to 60 minutes will reduce the toxicity to 1/2000 to 1/4000th of the toxicity of the unprocessed herb, making the resultant product safe for further incorporation in preparing a combination formula. While unprocessed *Ba Dou* (Fructus Crotonis) is extremely toxic, removal of all of its essential oils will eliminate most of its toxic component, leaving only laxative influence.

Chapter 7

– Clinical Applications of Chinese Herbal Medicine

Chinese herbal medicine is a combination of both the art and the science of medicine. While traditional Chinese medicine offers many approaches to the treatment of any one illness, there are also strict guidelines that every practitioner must follow. Optimal therapeutic effects can only be achieved through clear understanding of the disorder being treated, correct differential diagnosis, and precise formulation of herbs. When creating an herbal formula, it is important to consider the herbs selected (formulation), any accompanying cautions or contraindications, appropriate dosage, and the most advantageous preparation methods.

FORMULATION

Chinese herbs may be prescribed either as single herbs or, most commonly, as combined herbal formulations. Single herbs are used in treatment when the illness has a clear diagnosis with no complications. For example, *Ren Shen* (Radix Ginseng) is sometimes used alone to restore collapsed qi. However, using one herb individually is generally not sufficient for treatment: most disease conditions are complex and require the administration of multiple herbs. Furthermore, using a large dosage of a single herb exposes the patient to higher risk of side effects and adverse reactions. Therefore, multiple herbs are generally combined as an herbal formula to achieve maximum benefit with minimal side effects.

As the prescription of herbal formulas is naturally more complicated than the use of single herbs, rules and guidelines for proper formulation must be followed closely. While combinations of certain herbs will boost the overall therapeutic effect of a formula, the combination of others might lead to reduced effectiveness or even undesired effects. There are six major categories of herb-to-herb interaction that serve as reliable guidelines for the practitioner seeking maximum effectiveness. The examples below are classic examples found in standard textbooks of *Zhong Yao Xue* (Chinese Herbology).

- *Xiang xu* (mutual accentuation): Herbs with similar functions combine to amplify the overall therapeutic effect. For example, *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae) are combined to accentuate their individual abilities to clear heat and purge fire; *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) are put together to potentiate purgative and laxative actions.
- *Xiang shi* (mutual enhancement): Herbs with different functions combine such that one herb enhances the properties of another. For example, *Fu Ling* (Poria) amplifies the nature of *Huang Qi* (Radix Astragali) to tonify qi and regulate water circulation; and *Da Huang* (Radix et Rhizoma Rhei) serves as a catalyst for the ability of *Huang Qin* (Radix Scutellariae) to clear heat and purge fire.
- *Xiang wei* (mutual counteraction): One herb minimizes or neutralizes a toxic aspect of another. For example, the toxicity of *Ban Xia* (Rhizoma Pinelliae) can be reduced by adding *Sheng Jiang* (Rhizoma Zingiberis Recens). [Note: The concept of "mutual" may not seem at first to apply to *xiang wei* and *xiang sha* (below), confusing readers. It may be helpful to think of counteraction and suppression as the need for the toxic or side-effect laden herb and its partners to work together to provide safe and comfortable effectiveness.]
- *Xiang sha* (mutual suppression): Addition of an herb to suppress or reduce unwanted side effects from another. For example, the addition of *Sheng Jiang* (Rhizoma Zingiberis Recens) reduces the side effects that may accompany *Tian Nan Xing* (Rhizoma Arisaematis). *Xiang wei* (mutual counteraction) and *xiang sha* (mutual suppression) are essentially the same: both achieve the same goal. The only difference is the emphasis. *Xiang wei* (mutual counteraction) emphasizes that a toxic effect must be reduced by adding other herbs, while *xiang sha* (mutual suppression) empha-

Chapter 7 — Clinical Applications of Chinese Herbal Medicine

sizes that addition of certain herbs suppresses unwanted actions of certain other herbs.

- *Xiang wu* (mutual antagonism): A combination in which the desired therapeutic effect of an herb is reduced by the addition of another. For example, the qi-tonifying attributes of *Ren Shen* (Radix Ginseng) are reduced if *Lai Fu Zi* (Semen Raphani) is added to the formula.
- *Xiang fan* (mutual incompatibility): The combination of two specific herbs will lead to undesirable side effects and/or adverse reactions. This is an illustration of adverse herb-herb interactions (discussed further in chapter 8). Examples of *xiang fan* (mutual incompatibility) include *Shi Ba Fan* (Eighteen Incompatibles) and *Shi Jiu Wei* (Nineteen Counteractions). More details are listed in the section below.

CAUTIONS AND CONTRAINDICATIONS IN CLINICAL PRACTICE

There are two levels of further instruction that herbalists have communicated over the centuries to insure safe and effective treatment: cautions or contraindications, 1) related to the interaction of the nature of the herbs with the specific symptoms of the patient, and 2) similar guidelines related to the interaction of the herbs with other herbs.

In the first category, an herb with diuretic functions might be labeled for use with caution in patients who are experiencing deficiency of yin or body fluids, while an herb that has a strong upward-moving characteristic might be identified as contraindicated for treatment of a patient at risk for stroke.

The second category refers to examples of herb-to-herb interactions. While most herbs are believed to be safe when used individually or together with other herbs, certain combinations have proven to create undesirable side effects and adverse reactions. For centuries, there have been listings of exactly which herbs are not to be combined. The *Shi Ba Fan* (Eighteen Incompatibles) is a classic list of eighteen herb-to-herb interactions. The *Shi Jiu Wei* (Nineteen Counteractions) is a classic list of nineteen herbal combinations in which the herbs counteract each other. Combinations of such herbs will likely lead to adverse side effects and/or toxic reactions. It should be noted here: these are not exhaustive lists. The observant reader will find other examples of incompatibilities noted specifically in the individual herb monographs.

***Shi Ba Fan* (Eighteen Incompatibles)** is a list of herbs that are incompatible when combined. The original list contained only 18 herbs, but the list has since been expanded.

- *Gan Cao* (Radix Glycyrrhizae) is incompatible with:
  Gan Sui (Radix Euphorbiae Kansui)
  Jing Da Ji (Radix Euphorbiae Pekinensis)
  Hong Da Ji (Radix Knoxiae)
  Yuan Hua (Flos Genkwa)
  Hai Zao (Sargassum)

- *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Chuan Wu* (Radix Aconiti Preparata) and *Cao Wu* (Radix Aconiti Kusnezoffii) are incompatible with:
  Ban Xia (Rhizoma Pinelliae)
  Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
  Zhe Bei Mu (Bulbus Fritillariae Thunbergii)
  Gua Lou Shi (Fructus Trichosanthis)
  Gua Lou Ren (Semen Trichosanthis)
  Gua Lou Pi (Pericarpium Trichosanthis)
  Tian Hua Fen (Radix Trichosanthis)
  Bai Ji (Rhizoma Bletillae)
  Bai Lian (Radix Ampelopsis)

Chapter 7 — Clinical Applications of Chinese Herbal Medicine

Li Lu (Radix et Rhizoma Veratri) is incompatible with:
Ren Shen (Radix Ginseng)
Dang Shen (Radix Codonopsis)
Nan Sha Shen (Radix Adenophorae)
Bei Sha Shen (Radix Glehniae)
Dan Shen (Radix Salviae Miltiorrhizae)
Xuan Shen (Radix Scrophulariae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Chi Shao (Radix Paeoniae Rubrae)
Bai Shao (Radix Paeoniae Alba)
Xi Xin (Herba Asari)

***Shi Jiu Wei* (Nineteen Counteractions)** consists of nineteen herbs combined as ten pairs that antagonize each other:
Liu Huang (Sulfur) and *Po Xiao* (Sal Glauberis)
Shui Yin (Hydrargyum) and *Pi Shuang* (Arsenolite)
Lang Du (Radix Euphorbiae Fischerianae) and *Mi Tuo Seng* (Lithargyrum)
Ba Dou (Fructus Crotonis) and *Qian Niu Zi* (Semen Pharbitidis)
Ding Xiang (Flos Caryophylli) and *Yu Jin* (Radix Curcumae)
Ya Xiao (Nitrum) and *San Leng* (Rhizoma Sparganii)
Xi Jiao (Cornu Rhinoceri) and *Cao Wu* (Radix Aconiti Kusnezoffii)
Xi Jiao (Cornu Rhinoceri) and *Chuan Wu* (Radix Aconiti Preparata)
Ren Shen (Radix Ginseng) and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi)
Rou Gui (Cortex Cinnamomi) and *Chi Shi Zhi* (Halloysitum Rubrum)

DIETARY CONSIDERATIONS

There are historically documented interactions between certain foods and particular herbs. The wise practitioner informs patients about factors that diminish digestive effectiveness or compete with the digestion of herbs. In general, foods that are cold, raw, greasy, rotten or spoiled, and other foods that are difficult to digest, should be avoided when taking herbal medicines.

During herbal therapy, avoiding specific foods will prevent unwanted reactions. For example, onions should not be eaten when ingesting an herbal formula including *Chang Shan* (Radix Dichroae); onions and garlic should not be taken with *Sheng Di Huang* (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Preparata), and *He Shou Wu* (Radix Polygoni Multiflori); vinegar should not be used by a patient being treated with *Fu Ling* (Poria); and raw onion should not be taken with *Feng Mi* (Mel).

Foods that are cold, raw, greasy, rotten or spoiled, and other foods that are difficult to digest, should be avoided when taking herbal medicines.

USE OF HERBS DURING PREGNANCY

Certain herbs have a recognized potential to endanger or cause harm to a fetus during pregnancy, thus possibly causing birth defects or miscarriage. As a general rule, herbs with potent effects to regulate qi, move blood, or drain downwards should be avoided during pregnancy. These herbs are classified as **contraindicated** or for **use with caution** in treatment of pregnant women. Please note that these are not comprehensive lists—additional information is listed in each individual herb monograph. On the other hand, there are many herbs that are specifically used during pregnancy to **stabilize pregnancy** and prevent miscarriage.

Herbs that are **contraindicated** during pregnancy are generally toxic, or have potent effect to break stagnation or drain downwards.
Ba Dou (Semen Crotonis)
Ban Mao (Mylabris)
Da Huang (Radix et Rhizoma Rhei)

Chapter 7 — Clinical Applications of Chinese Herbal Medicine

Da Ji (Radix Euphorbiae seu Knoxiae)
E Zhu (Rhizoma Curcumae)
Mang Xiao (Natrii Sulfas)
Meng Chong (Tabanus Bivttatus Matsumura)
Qian Niu Zi (Semen Pharbitidis)
San Leng (Rhizoma Sparganii)
Shang Lu (Radix Phytolaccae)
She Xiang (Moschus)
Shui Zhi (Hirudo)

Herbs that must be **used with caution** during pregnancy are usually pungent and warm in nature. These substances activate qi, activate blood circulation, and remove blood stasis. They are very potent and should be avoided, or used only in later stages of pregnancy *if* the benefits of using the herbs outweigh the risks.

Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Jiang (Rhizoma Zingiberis)
Hong Hua (Flos Carthami)
Rou Gui (Cortex Cinnamomi)
Tao Ren (Semen Persicae)
Zhi Shi (Fructus Aurantii Immaturus)

Herbs that **stabilize pregnancy** can be used if needed to prevent miscarriage.

Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Du Zhong (Cortex Eucommiae)
Huang Qin (Radix Scutellariae)
Sha Ren (Fructus Amomi)
Zi Su Ye (Folium Perillae)

USE OF HERBS DURING NURSING

Little information has been noted historically regarding the safety of nursing mothers ingesting herbs. It is best not to assume that herbs ingested by the mother will not become evident in her breast milk. Therefore, it is prudent to advise nursing mothers to temporarily avoid using herbs.

However, if herbal medicine should become necessary for a nursing mother, the prescribing practitioner must follow simple safety guidelines concerning both the physical nature of the herbs and their possible influence. More lipophilic materials, such as animal and insect substances, and seeds, are more likely to be transmitted in breast milk; herbs that are more hydrophilic, certain minerals, leaves, and roots, are less apt to show up in breast milk. Gauging the desired action of the herbs for the mother, the practitioner can anticipate what effect the herbs may have on the infant, and take precautionary steps if necessary.

There are herbs used specifically to promote lactation during nursing. Such herbs dispel stagnation and promote the generation of breast milk. Examples include:

Chuan Mu Tong (Caulis Clematidis Armandii)
Chuan Shan Jia (Squama Manis)
Dong Kui Zi (Semen Malvae)
Lou Lu (Radix Rhapontici)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Si Gua Luo (Retinervus Luffae Fructus)
Tong Cao (Medulla Tetrapanacis)
Wang Bu Liu Xing (Semen Vaccariae)
Zi He Che (Placenta Hominis)

Chapter 7 — Clinical Applications of Chinese Herbal Medicine

There are herbs to inhibit lactation when necessary:

Mang Xiao (Natrii Sulfas)
Shen Qu (Massa Fermentata)
Mai Ya (Fructus Hordei Germinatus)
Hua Jiao (Pericarpium Zanthoxyli)

WEIGHTS AND MEASURES

The traditional system of measurement in China is significantly different from the British and metric systems. Listed below are conversions between the traditional Chinese system and the metric system:

1 *liang* = 30 grams
1 *qian* = 3 grams
1 *fen* = 0.3 gram
1 *li* = 0.03 gram

DOSING

The dosages listed in this text refer to the daily dose for an adult of average height and weight, when using dehydrated herbs. However, the actual prescribed dosage will vary significantly, based not only on the characteristics of the illness and overall condition of the patient, but also on his or her size and age. Generally speaking, single herbs used individually require higher dosages, while herbs used as part of an herbal formula are chosen in smaller amounts. Treatment of an acute condition necessitates higher dosages, and treatment of a mild condition, smaller dosages. One must also consider the constitution of the patient. Those who are basically healthy and strong may tolerate larger doses, while weak and/or deficient patients will need a smaller dose.

Recommended ingestion levels must be adjusted to reflect variations in age and body weight. The principle behind the *Age-to-Dose Guideline* is based on assessment of the maturity of the internal organs and their capacity to metabolize, utilize and eliminate herbs. This highly-detailed chart is especially useful for infants and younger children. The recommendations are taken from *Zhong Cao Yao* (Chinese Herbal Medicine), published by the Nanjing College of Traditional Chinese Medicine.

The principle behind the *Weight-to-Dose Guideline* is based on the effective concentration of the herbal medicine once it is distributed throughout different areas of the body. This dosing strategy is especially useful for patients whose body weight falls outside of the normal range. All calculations are based on Clark's Rule in "*Pharmaceutical Calculations*," written by Mitchell Stoklosa and Howard Ansel.

These charts provide herbal practitioners a handy reference for dosing those patients who fall outside the definition of an average adult. It is important to remember, however, that the charts serve only as guidelines—not as absolute rules. One must always remember to treat each patient as a unique individual, not as a statistic on a chart!

Table 7. Age-to-Dose Dosing Guideline

Age	Recommended Daily Dosage
0 – 1 month	1/18 – 1/14 of adult dose
1 – 6 month	1/14 – 1/7 of adult dose
6 – 12 month	1/7 – 1/5 of adult dose
1 – 2 years	1/5 – 1/4 of adult dose
2 – 4 years	1/4 – 1/3 of adult dose
4 – 6 years	1/3 – 2/5 of adult dose
6 – 9 years	2/5 – 1/2 of adult dose
9 – 14 years	1/2 – 2/3 of adult dose
14 – 18 years	2/3 – full adult dose
18 – 60 years	**adult dose**
60 years and over	3/4 or less of adult dose

Chapter 7 — Clinical Applications of Chinese Herbal Medicine

Table 8. Weight-to-Dose Dosing Guideline

Weight	Recommended Daily Dosage
30 – 40 lbs	20% – 27% of adult dose
40 – 50 lbs	27% – 33% of adult dose
50 – 60 lbs	33% – 40% of adult dose
60 – 70 lbs	40% – 47% of adult dose
70 – 80 lbs	47% – 53% of adult dose
80 – 100 lbs	53% – 67% of adult dose
100 – 120 lbs	67% – 80% of adult dose
120 – 150 lbs	80% – 100% of adult dose
150 lbs	**adult dose**
150 – 200 lbs	100% – 133% of adult dose
200 – 250 lbs	133% – 167% of adult dose
250 – 300 lbs	167% – 200% of adult dose

PREPARATION OF HERBS

The decoction is the most common dosage form for herbs in China. While the exact preparation of decoctions varies with the herbs prescribed, the general rules remain the same. The herbs must first be soaked for some period of time (determined by the nature of the herbs and the purpose for which they are being prepared), in enough water to completely cover the herbs. The herbs are then cooked until the water boils, at which point the decoction is simmered for some period of time (again, dependent upon the particular blend of herbs in the decoction) before the resultant 'tea' (or, decoction) is poured off for consumption. The cooked herb dregs may be cooked a second time, discarded, or even (in some cases) added to foods for the patient.

PREPARATION METHODS

Cooking processes vary depending on the herbs used, to maximize the therapeutic effects and minimize side effects.

Pre-decoction is a process by which herbs are cooked for an extended period of time. Tonic or rich herbs must be pre-decocted by cooking them for a longer period of time to ensure extraction of active components. Mineral substances are cooked for even longer, as many constituents have low water solubility and are hard to extract. On the other hand, some herbs, such as *Fu Zi* (Radix Aconiti Lateralis Praeparata), are cooked for an extended period of time to minimize toxicity.

Post-decoction is a specific instruction to add the herbs at the end of the decoction process and cook them for only a short period of time (about 5 to 10 minutes). Acrid or aromatic herbs, such as *Bo He* (Herba Menthae) and *Huo Xiang* (Herba Agastache), contain essential oils which easily evaporate if cooked at high temperatures for a prolonged period of time. Herbs that contain constituents that are easily deactivated by heat, such as *Da Huang* (Radix et Rhizoma Rhei) and *Fan Xie Ye* (Folium Sennae), are also added at the end of the cooking process to preserve the integrity of the active components.

Other specifics:

Some herbs, such as *Xin Yi Hua* (Flos Magnoliae), should be wrapped in cheesecloth during the cooking process, because their fibers are irritating to the throat when ingested.

Some herbs are added to the decoction after the preparation process, immediately prior to ingestion, such as *Mang Xiao* (Natrii Sulfas). Juices from fresh herbs, like *Zhu Li* (Succus Bambusae) and *Sheng Jiang* (Rhizoma Zingiberis Recens), are also added at the end of preparation, prior to ingestion.

Herbs that are more expensive, such as *Ren Shen* (Radix Ginseng) and *San Qi* (Radix Notoginseng), are commonly taken as powder without cooking, or are cooked separately to ensure maximal use of the herb and maximal therapeutic effectiveness.

INGESTION STRATEGIES

Generally speaking, decoctions should be warm when ingested. More specifically, exterior wind-cold conditions should be treated with warm decoctions and the patient's body covered with blankets to induce perspiration. Cases of vomiting should be treated with small doses of decoctions taken more frequently, in order to minimize irritation. Herbs in solid dosage forms, such as capsules, tablets, and pills, are best taken with warm water to facilitate absorption. Taking the herbs with tea or soda may decrease the absorption of the herbs or create unwanted gastrointestinal side effects.

TIMING OF DOSING

Tonic herbs are often taken *after* meals to improve the tonic effect. Antiparasitic herbs and laxative herbs are taken *on an empty stomach* one hour before or two hours after meals. Herbs that strengthen the Spleen and Stomach, or herbs that are irritating to the gastrointestinal tract, are taken *after meals*, while food is present to cushion the effect of the herbal substances. Herbs that induce sleep are taken *before bedtime.*

FREQUENCY

Herbs are generally taken three times daily. However, acute or severe conditions may require dosing up to every four hours, while chronic or mild conditions may only need two daily doses. Furthermore, aggressive treatment, such as releasing the exterior or draining the bowels, should be used only when necessary and discontinued as soon as the desired effect is achieved, to avoid unnecessary adverse effects.

Chapter 8

— Concurrent Use of Herbal Medicines and Pharmaceuticals

The practice of medicine is now at a crossroads: countless patients are being treated simultaneously with both Western and Oriental medicine. It is quite common for a patient to seek herbal treatment while taking several prescription medications. According to JAMA, an estimated 15 million adults in the United States (representing 18.4% of all prescription pharmaceutical users) took prescription drugs concurrently with herbal remedies and/or vitamins in 1997.[7]

As the general public grows increasingly open to the use of herbs and supplements, both patients and the health professionals who care for them are becoming more alert to the potential for occasional adverse herb-drug interactions. Safety has become a major topic of discussion. Even though herbal remedies are classified as dietary supplements, it must be noted that if used incorrectly, herbs, like any substance, may affect patients adversely. The safest route of access to herbal therapy is through a well-qualified herbalist.

Although Chinese herbal medicine has been prescribed safely by professionals in the West for many years now and a great deal of research has been amassed in China, there are still few formal studies published in English to document the safety and efficacy of combining herbs with prescription drugs. Some questions posed by Western healthcare professionals or patients are difficult

Chapter 8 – Concurrent Use of Herbal Medicines and Pharmaceuticals

to answer quickly with documented specifics. However, with some general insights into pharmacology, one can foresee possible interactions and take appropriate precautions to prevent incompatible combinations.

The concept of 'interaction' refers to the possibility that, when two (or more) substances are given concurrently, one substance may interact with another, or alter its bioavailability or clinical action. The net result may be an increase or a decrease in the effectiveness of one or both substances. It is important to note that interactions may yield positive effects (achieving better therapeutic effects at lower dosage) or negative results (creating unwanted side effects or adverse reactions). Most of the possible interactions may be classified in two major categories: pharmacokinetic and pharmacodynamic.[8, 9]

PHARMACOKINETIC INTERACTIONS

'Pharmacokinetic interaction' refers to the fluctuation in bioavailability of herb/drug molecules in the body as a result of changes in absorption, distribution, metabolism and elimination.[8, 9]

Absorption

Absorption is the term that describes the process of the physical passage of herbs or drugs from the outside to the inside of the body. The majority of all absorption occurs in the intestines, where herbs or drugs must pass through the intestinal wall to enter the bloodstream. Several mechanisms may interfere with the absorption of drugs through the intestines.[10, 11]

The absorption of herbs may be adversely affected if herbs are administered with drugs that may promote binding in the gastrointestinal (G.I.) tract. Drugs such as cholestyramine (Questran), colestipol (Colestid) and sucralfate (Carafate) may bind to certain herbs, forming an insoluble complex that decreases absorption of both substances. Because of the large size of the insoluble complex, few or no molecules of either substance pass through the intestinal wall.[10, 11, 12]

Herb absorption may be adversely affected in the presence of drugs that change the pH of the stomach. Antacids, cimetidine (Tagamet), famotidine (Pepcid), nizatidine (Axid), ranitidine (Zantac) and omeprazole (Prilosec) may neutralize, decrease or inhibit the secretion of stomach acids.[10,11] With this subsequent decrease in stomach acidity, herbs may not be broken down properly in the stomach, leading to poor absorption in the intestines. To minimize this interaction, herbs are best taken separately from these drugs by approximately two hours.

Drugs that affect gastrointestinal motility may also affect the absorption of herbs. G.I. motility is the rate at which the intestines contract to push food products from the stomach to the rectum. Slower G.I. motility means that the herbs stay in the intestines for a longer period of time, thereby increasing the potential absorption. Conversely, more rapid G.I. motility means that the herbs stay in the intestines for a shorter time, which may decrease absorption. Drugs such as haloperidol (Haldol) decrease G.I. motility and may increase herb absorption; while drugs such as metoclopramide (Reglan) increase G.I. motility and possibly decrease herb absorption.

Therefore, it may be necessary to decrease the dosage of herbs when the patient is taking a drug that decreases G.I. motility and increases overall absorption. Likewise, it is probably helpful to increase the dosage of herbs when the patient is taking a drug that increases G.I. motility and thus decreases overall absorption.

Distribution

After absorption, herbs or drugs must be delivered to the targeted area in order to exert their influence. 'Distribution' refers to the processes by which herbs or drugs (once absorbed) are carried and released to different parts of the body. Currently, it appears that the majority of herbs and drugs do not have any clinically-significant interactions affecting distribution and thus can safely be taken together. The exception seems to be if a drug has a narrow range-of-safety index, and is highly protein-bound, in which case interaction with other substances might occur during the distribution phase. Examples of drugs that have both a narrow range-of-safety index and a highly protein-bound ratio include warfarin (Coumadin) and phenytoin (Dilantin). Unfortunately, it is

Chapter 8 – Concurrent Use of Herbal Medicines and Pharmaceuticals

very difficult to predict whether an individual herb will interact with either one of these drugs because there are no known tests or experiments documenting such interactions.[10,11]

Metabolism

Once metabolized by the liver, most herbs and drugs become inactive derivatives. The rate at which the liver metabolizes a substance determines the length of time it stays active in the body. If the liver were induced to speed up its metabolic rate, herbs and drugs would be deactivated at a more rapid pace, and the overall effectiveness of ingested substances would be lower. On the other hand, if the liver were made to slow its metabolism, herbs and drugs would be deactivated at a slower pace and the overall impact of the substances would be greater.

Drugs that induce greater liver metabolism do not exert an immediate effect; while drugs that inhibit liver metabolism have immediate onset of action.

In general, drugs that induce greater liver metabolism do not exert an immediate effect. The metabolism rate of the liver changes slowly, over several weeks. Therefore, the effect of accelerated liver metabolism is not seen until weeks after the initiation of drug therapy. Some examples of pharmaceuticals that speed hepatic metabolism are: phenytoin (Dilantin), carbamazepine (Tegretol), phenobarbitals and rifampin (Rifadin).[10,11] Therefore, herbs given in the presence of one of these products may be deactivated more rapidly, and their overall effectiveness lowered. Under these circumstances, a higher dose of herbs may be required to achieve the desired effect.

In great contrast, drugs that inhibit liver metabolism have an immediate onset of action. The rate of liver metabolism may be greatly impaired within a few days. Pharmaceuticals that slow or inhibit liver metabolism include: cimetidine (Tagamet), erythromycin, ethanol, fluconazole (Diflucan), itraconazole (Sporanox) and ketoconazole (Nizoral), among others.[10,11] When a patient takes these drugs concurrently with herbs, there is a higher risk of herbal components accumulating in the body, as the ability of the liver to neutralize them is compromised. If the herbs are metabolized more slowly, their overall effectiveness may be prolonged. In this case, one may need to lower the dosage of herbs to avoid unwanted side effects.

Depending on the half-life in the body of drugs that influence liver metabolism, it may be necessary to increase or decrease the dosages of herbs for weeks or even months after discontinuation of the pharmaceutical substance, along with consistent monitoring.

Elimination

While the liver neutralizes incoming drugs and herbs, the kidneys are responsible for eliminating the substances and their metabolites from the body. If the kidneys are damaged, then the rate of elimination is slowed, leading to an accumulation of active substances in the body. Important examples of drugs that damage the kidneys include amphotericin B, methotrexate, tobramycin and gentamicin.[10,11] As a safety precaution, when prescribing herbs for a patient who is currently taking or has recently taken one of these drugs, it may be wise to lower the dose of herbs to avoid unnecessary and unwanted side effects.

Summary of Pharmacokinetic Interactions

The pharmacokinetic interactions listed above include both theoretical and actual interactions. Though such interactions are possible, the extent and severity of each interaction will vary depending on the specific circumstances, such as the dosages of all substances, the inherent sensitivity of each patient, individual body weight, and metabolic rate.

PHARMACODYNAMIC INTERACTIONS

The study of pharmacodynamics provides insight into the dynamic behavior of drugs inside the human body. The phrase 'pharmacodynamic interactions' in our context refers to fluctuations in the bioavailability of ingested substances as a result of synergistic or antagonistic interactions between herb and drug molecules. Pharmacodynamic interactions are generally more difficult to predict and prevent than pharmacokinetic interactions. Most of the currently-known pharmaco-

Chapter 8 – Concurrent Use of Herbal Medicines and Pharmaceuticals

dynamic interactions have been documented through actual cases, not by laboratory experiments. The best way to prevent pharmacodynamic interactions is to follow the patient closely and monitor all clinical signs and symptoms, and particularly any abnormal reactions.

A ***synergistic*** interaction occurs when two drugs with similar properties show an additive or even exponential increase in clinical impact when given together. An ***antagonistic*** interaction occurs when two drugs with similar properties are administered simultaneously and show lessened or no clinical effectiveness.[13]

Synergistic or antagonistic interactions may occur with any concurrent use of medicinal substances, regardless of whether they are herbs, drugs, or both.

Herb-to-Herb Interactions

Oriental Medicine has tracked cases of herb-to-herb pharmacodynamic interactions for centuries. As discussed more thoroughly in part 1, chapter 7, "Clinical Applications of Chinese Herbal Medicine," the additive effect is generally referred to as *xiang xu* (mutual accentuation) or *xiang shi* (mutual enhancement), such as takes place in the combination of *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae) to clear heat and purge fire. The antagonistic effect is generally referred to as *xiang wei* (mutual counteraction), *xiang sha* (mutual suppression) or *xiang wu* (mutual antagonism), such as happens in the combination of *Lai Fu Zi* (Semen Raphani) and *Ren Shen* (Radix Ginseng), in which the therapeutic action of the latter herb is decreased by the addition of *Lai Fu Zi*.

Classic Chinese texts describe numerous other herb-to-herb interactions, such as the *Shi Ba Fan* (Eighteen Incompatibles) and *Shi Jiu Wei* (Nineteen Counteractions), discussed in greater detail earlier in this text. Ill-advised combinations of these herbs will likely lead to adverse side effects and/or toxic reactions.

Herb-to-Drug Interactions

Pharmacodynamic herb-to-drug interactions are best identified by analyzing the therapeutic profile of the herbs as well as that of the drugs. Concurrent use of herbs and drugs with similar therapeutic actions poses potential for herb-drug interactions. In these cases, the increased potency of treatment may interfere with optimal outcome, as the desired effect becomes less predictable and harder to obtain with precision. The highest risk of clinically-significant interactions occurs between herbs and drugs that have **sympathomimetic, anticoagulant, antiplatelet, diuretic** and **antidiabetic** effects.[14]

Herbs that exert **sympathomimetic** effects may interfere with antihypertensive and antiseizure drugs. The classic example of this type of herb is *Ma Huang* (Herba Ephedrae), containing ephedrine, pseudoephedrine, norephedrine and other ephedrine alkaloids. *Ma Huang* may interact with other drugs and disease conditions and should always be used with caution in patients vulnerable to hypertension, seizures, diabetes, thyroid conditions, and similar regulatory imbalances.[14]

Herbs with **anticoagulant** and **antiplatelet** effects include herbs that have blood-activating and blood-stasis-removing functions, such as *Dan Shen* (Radix Salviae Miltiorrhizae), *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami) and *Shui Zhi* (Hirudo). These herbs may interfere with anticoagulant and antiplatelet drugs, including warfarin (Coumadin), enoxaparin (Lovenox), aspirin, dipyridamole (Persantine), and clopidogrel (Plavix). Without proper supervision, concurrent use of these herbs and drugs may lead to prolonged and excessive bleeding. Thus, individuals taking anticoagulant or antiplatelet drugs must be very cautious about concurrently using herbs, and would be wise to so only under the supervision of well-trained healthcare professionals.[14]

Concomitant use of **diuretic** herbs and diuretic drugs may create additive or synergistic effects, making hypertension more difficult to control, or hypotensive episodes more likely.[14] The dosage of herbs and/or drugs must be adjusted to achieve optimal treatment outcome. Commonly-used diuretic herbs include *Fu Ling* (Poria), *Zhu Ling* (Polyporus), *Che Qian Zi* (Semen Plantaginis), and *Ze Xie* (Rhizoma Alismatis).

Chapter 8 – Concurrent Use of Herbal Medicines and Pharmaceuticals

Antidiabetic herbs may interfere with antidiabetic drugs by accentuating the decrease of plasma glucose levels. The dosage of these herbs and drugs must be balanced carefully to effectively control blood glucose levels without causing hyper- or hypo-glycemia.[14] Herbs with definite antidiabetic effects include the following pairs of herbs: *Zhi Mu* (Radix Anemarrhenae) and *Shi Gao* (Gypsum Fibrosum); *Xuan Shen* (Radix Scrophulariae) and *Cang Zhu* (Rhizoma Atractylodis); and *Shan Yao* (Rhizoma Dioscoreae) and *Huang Qi* (Radix Astragali).

Summary of Pharmacodynamic Interactions

Understanding synergistic and antagonistic interactions from both an Oriental medicine perspective and the realm of pharmaceutical medicines helps practitioners to anticipate, prevent, and/or monitor for unwanted interactions in patients who need or elect to rely on multiple therapeutic substances.

SUMMARY: CONCURRENT USE OF HERBAL MEDICINES AND PHARMACEUTICALS

Historically, herbs and drugs have been presumed to be very different treatment modalities, that have rarely, if ever, been used together. The line that separates use of herbs and drugs, however, has blurred in recent decades as the lay public gains increased accessibility to multiple treatment modalities. It is not uncommon for one patient to seek care from several health professionals for an ailment. As a result, a patient may easily be taking multiple drugs, herbs, supplements, and vitamins concurrently. It becomes difficult to predict whether the combination of all these substances will lead to unwanted side effects and/or interactions. It is imprudent to assume that there will be no interactions. On the other hand, it is just as unwise to abandon treatment simply for fear of possible interactions. The solution to this situation is in the understanding of pharmacokinetic and pharmacodynamic herb-drug interactions. By understanding these mechanisms, one can recognize potential interactions and take proper actions to prevent their occurrence.

Chapter 1

— Exterior-Releasing Herbs

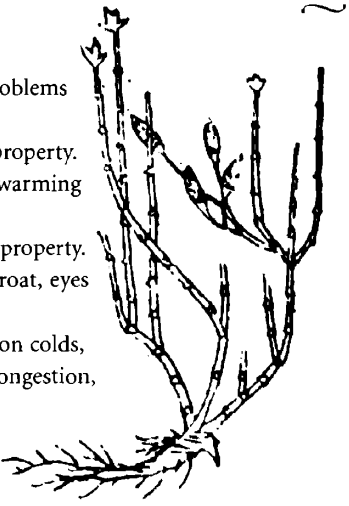
Definition: Substances that 'release the exterior' act to dispel pathogenic factors from the external and superficial parts of the body.

The term 'pathogenic factors' describes normally benign environmental factors, such as wind, cold or heat, that have combined to disrupt normal physiological functioning and express themselves in the form of wind-cold and wind-heat. With drastic or sudden changes in the weather, or with a decline in health or immunity, these factors commonly attack the exterior or superficial parts of the body, that is, the skin and muscle layers. Therefore, an 'exterior syndrome' refers to a condition characterized by wind-cold or wind-heat attacking (or 'invading') the skin and muscle layers of the body, causing symptoms and signs such as aversion to cold, chills, fever, headache, muscle aches and pain, the inappropriate presence or absence of perspiration, and a superficial pulse.

The herbs in this category stimulate immune response, alleviate pain, regulate body temperature, and induce perspiration. They are most often used to treat common colds, influenza, and complications of complex internal disorders.



Exterior-releasing herbs stimulate immune response, alleviate pain, regulate body temperature, and induce perspiration, treating common colds, influenza and complications of complex internal disorders.

SUBCATEGORIES OF ACTION

Clinically, exterior-releasing herbs fall into two categories to address the problems of exterior wind-cold or exterior wind-heat syndromes.

1. ***Dispel wind-cold***: These herbs are generally acrid and warm in thermal property. They induce perspiration, dispel wind-cold from the exterior, and promote warming and relaxation of the skin and muscle layers.
2. ***Dispel wind-heat***: These herbs are commonly acrid and cold in thermal property. They dispel wind-heat to relieve fever and pain or inflammation in the throat, eyes and skin.

Herbs from both categories are generally used in the treatment of common colds, influenza, bacterial infections, asthma, coughing, wheezing, measles, chest congestion, nausea, vomiting, edema, arthritis, and eye disorders. Herbs that release the exterior may also serve multiple purposes: to regulate qi circulation to relieve pain, relieve wheezing and dyspnea, dissolve phlegm, promote the eruption of measles, relieve nausea and vomiting, regulate water circulation and eliminate dampness, and brighten the eyes.

Ma Huang (Herba Ephedrae)
Ben Cao Gang Mu (Materia Medica),
by Li Shi-Zhen, 1578 A.D.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Accurate differential diagnosis of the external pathogen and the degree to which it has penetrated is of vital importance: treatment of wind-cold and wind-heat can be significantly different. Furthermore, it is important to determine the basic underlying condition of the patient prior to prescribing any herbal formula.

Pre-existing constitutional deficiency or chronic illness may require the addition of tonics to enhance the overall therapeutic effect. However, tonics must not be used alone or casually in the presence of an exterior condition, as this will only send the pathogenic factors deeper into the interior of the body, thus complicating the illness.

Chapter 1 — Exterior-Releasing Herbs

Differential Diagnosis of Wind-Cold and Wind-Heat

Diagnosis	Symptoms	Tongue	Pulse
Wind-cold	aversion to cold, fever, lack of perspiration, headache, body aches and pain	thin and white tongue coat	superficial, tight pulse
Wind-heat	fever, mild aversion to wind and cold, dry or sore throat, thirst	thin and yellow tongue coat	superficial, rapid pulse

As soon as desired therapeutic results are achieved, intake of exterior-releasing herbs should immediately be discontinued.

CAUTIONS/CONTRAINDICATIONS

- Many herbs that release the exterior do so via inducing perspiration. Overdose, prolonged use, or inappropriate use of these herbs will consume qi and body fluids, resulting in qi deficiency, dryness and/or yin deficiency. Therefore, they should be used only when necessary. Furthermore, intake of these herbs should be discontinued immediately, when the desired therapeutic results are achieved.
- Herbs that release the exterior should be prescribed with caution for individuals who have a deficiency of qi, yin, blood or body fluids.
- Exterior-releasing herbs should be used with caution in patients with an exterior condition accompanied by sores and abscess, *lin zheng* (dysuria syndrome), or bleeding.

PROCESSING

Many herbs that release the exterior are aromatic and contain volatile essential oils. Cooking these herbs for a prolonged period of time causes evaporation and destruction of many active constituents. Therefore, these more volatile herbs (often leaves and flowers) should be added at the end of the cooking time for the main formula, so that they are only decocted briefly, simmering for no more than 5 minutes, long enough to release their potent influence without diminishing their actions. The practice of adding the herb at the end of the cooking process is referred to in this text as "post-decoction."

PHARMACOLOGICAL EFFECTS

- **Diaphoretic:** Many herbs in this category induce perspiration. Of these herbs, *Ma Huang* (Herba Ephedrae) exerts the strongest diaphoretic function by directly stimulating the sweat glands, as verified by *in vivo* and *in vitro* studies. The effect of *Ma Huang* may be potentiated by the addition of *Gui Zhi* (Ramulus Cinnamomi), which dilates peripheral blood vessels and increases blood circulation to the superficial parts of the body. Among other herbs that have both diaphoretic and antipyretic influences are *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Bo He* (Herba Menthae).
- **Antipyretic:** Many exterior-releasing herbs reduce body temperature in subjects experiencing either elevated or normal body temperature (in the case of normal temperature, these substances may bring body temperature below normal levels). The mechanisms of antipyretic action vary depending on the herb. *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi) and *Bo He* (Herba Menthae) act on the central nervous system and disperse heat via diaphoresis. *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Bo He* (Herba Menthae) reduce body temperature by promoting blood circulation to superficial parts of the body, dilating blood vessels, and opening skin pores to release heat. In addition, these three herbs have anti-inflammatory, antibacterial and antiviral actions that contribute to reducing body temperature. Other herbs with antipyretic effects include *Zi Su Ye* (Folium Perillae), *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), and *Bai Zhi* (Radix Angelicae Dahuricae).
- **Sedative:** Some herbs that relieve the exterior also exert a sedative influence, such as *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens), *Chai Hu* (Radix Bupleuri), *Jing Jie* (Herba Schizonepetae), and *Fang Feng* (Radix Saposhnikoviae). Administering these herbs reduces spontaneous physical activities (such as restlessness, spasms and twitches), and potentiates the effect of barbiturates.

Chapter 1 — Exterior-Releasing Herbs

- **Antibiotic**: Both antibacterial and antiviral properties are integral to certain exterior-releasing herbs, such as *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi), *Zi Su Ye* (Folium Perillae), *Chai Hu* (Radix Bupleuri), *Fang Feng* (Radix Saposhnikoviae), *Bo He* (Herba Menthae), *Gao Ben* (Rhizoma Ligustici), *Xiang Ru* (Herba Elsholtziae seu Moslae), *Xin Yi Hua* (Flos Magnoliae) and *Man Jing Zi* (Fructus Viticis). Others may have only antibacterial or antiviral effects.
- **Metabolic**: Many exterior-releasing herbs act to lower blood glucose levels, as is the case with *Sang Ye* (Folium Mori) and *Ge Gen* (Radix Puerariae). Others, like *Ma Huang* (Herba Ephedrae), stimulate the basal metabolic rate.
- **Diuretic**: Some herbs in this category promote diuresis to eliminate excess water accumulation, including: *Ma Huang* (Herba Ephedrae), *Fu Ping* (Herba Spirodelae), *Niu Bang Zi* (Fructus Arctii), *Mu Zei* (Herba Equiseti Hiemalis) and *Xiang Ru* (Herba Elsholtziae seu Moslae).
- **Cardiovascular**: Herbs such as *Ge Gen* (Radix Puerariae) and *Ju Hua* (Flos Chrysanthemi) increase perfusion of blood to the coronary arteries.
- **Antispasmodic**: *Jing Jie* (Herba Schizonepetae), *Ma Huang* (Herba Ephedrae), *Ge Gen* (Radix Puerariae), and others relax the smooth muscles to prevent spasms and cramps.
- **Analgesic**: *In vitro* and *in vivo* studies confirm that many herbs simultaneously relieve pain and release pathogens at the exterior levels. *Fang Feng* (Radix Saposhnikoviae) relieves pain via its effect on the central nervous system. *Sheng Jiang* (Rhizoma Zingiberis Recens) reduces inflammation and pain via its effect on the peripheral nervous system. Other analgesic herbs include *Jing Jie* (Herba Schizonepetae), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Man Jing Zi* (Fructus Viticis), *Gao Ben* (Rhizoma Ligustici), and *Xin Yi Hua* (Flos Magnoliae), but the mechanisms of their actions are not well understood at this time.
- **Anti-inflammatory**: *Chai Hu* (Radix Bupleuri) reduces inflammation by stimulating the release of hormones from the adrenal cortex. *Qiang Huo* (Rhizoma et Radix Notopterygii) reduces inflammation by stimulating the endocrine system, particularly the pituitary gland and adrenal cortex. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Ma Huang* (Herba Ephedrae) exert their anti-inflammatory effect by inhibiting prostaglandin synthesis in the periphery.
- **Antivenin**: Some exterior-relieving herbs are useful as antidotes for snake bites, such as *Bai Zhi* (Radix Angelicae Dahuricae).

POTENTIAL HERB-DRUG INTERACTIONS

Exterior-releasing herbs are characterized by diaphoretic action, inducing perspiration. Some achieve this by stimulating sweat glands, others by dilating peripheral blood vessels. Herbal diaphoretic activity is generally not associated with reported or potential herb-drug interactions.

- **Sedatives**: Herbs that release the exterior have many other pharmacological effects, as described above, and therefore may interact with other medicinal agents. For example, the sedative influence may be potentiated when one takes both herbs and drugs with sedative properties. The sedative effect of the herbs may also be potentiated by intake of alcohol. Excessive sedation interferes with alertness, increasing the risk of injury if one drives an automobile or operates heavy machinery.
- **Antibiotics**: Antibiotic activity may be potentiated by concurrent use of herbs and drugs.
- **Diuretics**: Some exterior-releasing herbs promote diuresis. Therefore, it is prudent to avoid combining those herbs with drugs that exert diuretic effects, as there may be additive or synergistic results. Inappropriate combination therapy may lead to excessive loss of fluids and electrolytes.

Section 1

— Wind-Cold Releasing Herbs

Ma Huang (Herba Ephedrae)

麻黄

Pinyin Name: *Ma Huang*
Literal Name: "hemp yellow," "numb yellow herb"
Alternate Chinese Names: *Jing Ma Huang, Ma Huang Rong*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ephedra
Botanical Name: *Ephedra sinica* Stapf. (*Mu Cao Ma Huang*); *Ephedra equisetina* Bunge. (*Mu Zei Ma Huang*)
Pharmaceutical Name: Herba Ephedrae
Properties: acrid, bitter, warm
Channels Entered: Lung, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior through Diaphoresis

Exterior-excess, wind-cold condition: Acrid and warm, *Ma Huang* (Herba Ephedrae) ventilates the Lung and is commonly used to treat exterior-excess, wind-cold syndrome characterized by symptoms such as chills, aversion to cold, fever, absence of perspiration, headache, body aches and pain, nasal obstruction, and a superficial, tight pulse. Its dispersing function also opens peripheral channels and collaterals.

- Exterior-excess, wind-cold syndrome: use it with *Gui Zhi* (Ramulus Cinnamomi) to enhance the diaphoretic action. **Exemplar Formula:** *Ma Huang Tang* (Ephedra Decoction).

2. Relieves Wheezing and Dyspnea, Stops Cough

Wind-cold constriction of the Lung leading to Lung qi reversal: *Ma Huang* ventilates Lung qi and is useful in treatment of wheezing, dyspnea and cough characterized by wind-cold attacking the exterior that leads to abnormal rising of Lung qi.

- Cough from wind-cold attacking the exterior and constricting Lung qi: use it with *Xing Ren* (Semen Armeniacae Amarum). *Ma Huang* and *Xing Ren* work synergistically to treat cough, as the former herb disperses Lung qi and relieves stagnation while the latter herb sends qi downward.
- Wheezing or cough caused by Lung heat: combine it with *Shi Gao* (Gypsum Fibrosum) and *Xing Ren* (Semen Armeniacae Amarum). *Ma Huang* and *Xing Ren* have synergistic functions in treating wheezing and dyspnea. *Shi Gao* clears Lung heat and neutralizes the warm property of *Ma Huang* to prevent the possible side effect of excess perspiration. **Exemplar Formula:** *Ma Xing Gan Shi Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- Wheezing or cough from wind-cold attack at the exterior and cold stagnation in the interior: add it to *Gan Jiang* (Rhizoma Zingiberis), *Xi Xin* (Herba Asari) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Xiao Qing*

Ma Huang (Herba Ephedrae)

Long Tang (Minor Bluegreen Dragon Decoction).

- Wheezing and dyspnea caused by stagnation of qi and phlegm: combine it with *Xing Ren* (Semen Armeniacae Amarum), *Chen Pi* (Pericarpium Citri Reticulatae) and *Hou Po* (Cortex Magnoliae Officinalis). **Exemplar Formula:** *Shen Mi Tang* (Mysterious Decoction).

3. Regulates Water Circulation and Relieves Edema

Edema with exterior syndrome: *Ma Huang* enters the Lung and Urinary Bladder channels to regulate water circulation and eliminate edema. Excess water is generally eliminated through perspiration, increased urination, or both.

- Edema with exterior wind-cold signs or symptoms: use *Ma Huang* with *Sheng Jiang* (Rhizoma Zingiberis Recens), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gan Cao* (Radix Glycyrrhizae) to dispel the exterior condition and eliminate water accumulation. **Exemplar Formula:** *Yue Bi Jia Zhu Tang* (Maidservant from Yue Decoction plus Atractylodes).

4. Disperses Cold

***Bi zheng* (painful obstruction syndrome):** Warm and dispersing in nature, *Ma Huang* disperses and eliminates cold and damp from the exterior parts of the body.

- *Bi zheng* caused by wind-damp: use it with *Yi Yi Ren* (Semen Coicis), *Xing Ren* (Semen Armeniacae Amarum) and *Gan Cao* (Radix Glycyrrhizae) to treat muscle aches and pain of the extremities caused by wind-damp.

Yin sores: This condition is characterized by localized, painful swellings without heads, that blend into the surrounding tissues. They often appear to be the same color as the skin and are not hot to the touch. The underlying cause of this problem is blood deficiency with stagnation of cold and phlegm.

- Yin sores: use *Ma Huang* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Jie Zi* (Semen Sinapis) or *Lu Jiao Jiao* (Gelatinum Cornu Cervi).
- Arteritis obliterans, obliterating phlebitis or Raynaud's disease: use it with *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Jie Zi* (Semen Sinapis), *Lu Jiao Jiao* (Gelatinum Cornu Cervi), *Rou Gui* (Cortex Cinnamomi) and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE

1.5 to 10 grams in decoction. The maximum dosage of *Ma Huang* is 20 to 25 grams. Use of *Ma Huang* in treating edema requires dosage between 10 and 15 grams.

The proper method for preparing *Ma Huang* is to predecoct it and remove the resultant foam from the solution prior to the addition of other herbs. Classic texts state that the foam is the component more likely to cause irritability. To minimize diaphoresis and neutralize the warm nature of *Ma Huang, Shi Gao* (Gypsum Fibrosum) is frequently used with *Ma Huang* in a three-to-one ratio (*Shi Gao* 3 : *Ma Huang* 1).

Different types of *Ma Huang* have slightly different therapeutic functions: unprocessed *Ma Huang* has a stronger function to induce perspiration and is commonly used to treat wind-cold conditions; honey-fried *Ma Huang* is weaker in inducing perspiration but more strongly moistens the Lung and relieves wheezing, dyspnea and cough; and crushed *Ma Huang Rong* is milder in inducing perspiration and is generally used in pediatric medicine to relieve exterior syndromes.

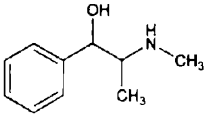
CAUTIONS / CONTRAINDICATIONS

- Because *Ma Huang* strongly functions to induce diaphoresis and ventilate the lungs, inappropriate use may damage qi, yin and body fluids. It should be used with caution in patients with weak constitutions, spontaneous perspiration arising from qi deficiency, night perspiration due to yin deficiency, wheezing or dyspnea caused by Kidney deficiency (manifesting in long exhalation and short inhalation), or edema due to Spleen deficiency.
- Chronic or repetitive use of *Ma Huang* to treat wheezing/dyspnea is not recommended, as it may damage Lung qi and lead to further complications. Other herbs must be added to harmonize its strong effects.
- Ingesting *Ma Huang* is not recommended in patients with Liver yang rising or yin-deficient fire, as its use may lead to vertigo, epistaxis, or hematemesis.
- *Ma Huang* has a stimulating effect on the sympathetic nervous system. Thus, it should be used with caution in patients with such medical conditions as convulsions, epilepsy and seizure disorders, diabetes mellitus, hypertension, hyperthyroidism and prostatic enlargement.
- Use *Ma Huang* with caution during pregnancy because of its stimulating effect on the uterus.[1]

OVERDOSAGE

Overdose of *Ma Huang* is characterized by stimulation of the sympathetic nervous system by the numerous ephedrine alkaloids in the herb. Symptoms include excitation, irritability, restlessness, hypersensitivity, tinnitus, insomnia, nausea, vomiting, red face, upper abdominal discomfort, poor appetite, thirst, perspiration, increased blood pressure, dizziness, elevated blood glucose levels, chest pain, and tremor. In severe cases, there may be cardiac arrhythmia, increased blood pressure, and possibly epilepsy and convulsions. Adverse reactions generally occur between one-half and two hours following ingestion of an excessive quantity of the herb.[2]

Ma Huang (Herba Ephedrae)



TREATMENT OF OVERDOSAGE

Overdose of *Ma Huang* may be treated with either of two herbal formulas:

- Formula one contains *Da Huang* (Radix et Rhizoma Rhei) 9g, *Hou Po* (Cortex Magnoliae Officinalis) 9g, *Mu Xiang* (Radix Aucklandiae) 9g, *Mang Xiao* (Natrii Sulfas) 15g, and *Gan Cao* (Radix Glycyrrhizae) 6g. The decoction is to be taken once every four hours until toxic symptoms are alleviated.
- Formula two contains *Lu Dou* (Semen Phaseoli Radiati) 15g and *Gan Cao* (Radix Glycyrrhizae) 30g cooked in water to yield 300 ml of decoction. Patients are instructed to take 150 ml per dose, every two hours, for 3 to 5 doses.[2,3]

CHEMICAL COMPOSITION

Ephedrine alkaloids 0.481-2.47% (l-ephedrine, d-pseudoephedrine, l-norephedrine, d-norpseudoephedrine, l-methylephedrine, d-methylpseudoephedrine), ephedroxane, 2,3,4-trimethyl-5-phenyloxazolidine benzylmethylamine, 2,3,5,6-tetramethylpyrazine, essential oil 0.25% (l-α-terpineol).[4,5]

Ephedrine

PHARMACOLOGICAL EFFECTS

- **Diaphoresis**: In humans, administration of ephedrine alkaloids is associated with increased perspiration, but only in subjects with elevated body temperature.[6]
- **Antipyretic**: Essential oil of *Ma Huang* is associated with antipyretic action in rabbits with artificially-induced fever. It also reduces temperature in mice with normal body temperature. However, it has no effect on cats with normal body temperature.[7]
- **Respiratory**: Both ephedrine and pseudoephedrine have mild, prolonged bronchodilating effects. Ephedrine has a more rapid onset of action, but its effectiveness may decrease if it is used repeatedly in a short period of time.[8] Water extract of *Ma Huang* administered via oral or intraperitoneal injection is also associated with an antitussive effect.[9]
- **Diuresis**: Pseudoephedrine has a diuretic function.[10]
- **Cardiovascular**: Use of *Ma Huang* is associated with an increase in both systolic and diastolic blood pressures. Ephedrine has a mild but prolonged effect to constrict blood vessels and raise blood pressure.[11]
- **CNS stimulant**: Ephedrine has a marked stimulating influence on the central nervous system (CNS), cardiovascular system, and respiratory system. It may cause such side effects as irritability, insomnia, restlessness and tremor.[12,13]
- **Antibiotic**: Decoction of *Ma Huang* has varying degrees of inhibitory effect *in vitro* against *Staphylococcus aureus*, α-streptococcus, β-streptococcus, *Bacillus anthracis*, *Corynebacterium diphtheriae*, *Pseudomonas aeruginosa*, *Bacillus dysenteriae*, and *Salmonella typhi*.[14] The essential oil of *Ma Huang* has an inhibitory effect against *E. coli*, *Candida albicans*, and various types of influenza virus.[15]

CLINICAL STUDIES AND RESEARCH

- **Infantile diarrhea**: According to one report, 138 patients with infantile diarrhea were treated with *Ma Huang* (2 to 4 grams) and *Qian Hu* (Radix Peucedani) (4 to 8 grams). The herbs were given once daily as an herbal decoction with the addition of a small amount of sugar. Out of 138 patients, 126 (91.3%) showed significant improvement, and 124 (90%) responded within 1 to 2 doses. This study demonstrates the *zang fu* relationship between the Lung and Large Intestine, in that ventilation of the Lung helps with water retention of the Large Intestine.[16]
- **Coughing and wheezing**: In a clinical trial, 260 patients with coughing, wheezing and asthma from various causes were treated with Chinese herbal formulas, with complete recovery in 148 patients, marked improvement in 107 patients, and no response in 5 patients. The formulas were given as decoctions, six to eight times daily for children, and three times daily for adults. The fundamental formula included *Ma Huang* 10g, *Pi Pa Ye* (Folium Eriobotryae) 10g, *Zi Wan* (Radix Asteris) 15g, *Kuan Dong Hua* (Flos Farfarae) 15g, *Bai Qian* (Rhizoma Cynanchi Stauntonii) 15g, *Sang Bai Pi* (Cortex Mori) 15g, *Ting Li Zi* (Semen Descurainiae seu Lepidii) 10g, *Bai Jie Zi* (Semen Sinapis) 10g, *Su Zi* (Fructus Perillae) 10g, *Lai Fu Zi* (Semen Raphani) 10g, *Wu Wei Zi* (Fructus Schisandrae Chinensis) 10g, *Tu Si Zi* (Semen Cuscutae) 10g, *Bei Mu* (Bulbus Fritillaria) 10g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Xing Ren* (Semen Armeniacae Amarum) 15g, and *Jie Geng* (Radix Platycodonis) 15g. Modifications to the fundamental formula included *Gan Jiang* (Rhizoma Zingiberis) for cold; *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis) for heat; *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) for deficiency; and *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) for excess.[17]
- **Asthma**: An herbal formula containing *Ma Huang*, *Di Long* (Pheretima), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Chan Tui* (Periostracum Cicadae) and *Gan Cao* (Radix Glycyrrhizae) was used to treat asthma patients. Minor modifications to the formula were made, depending on the condition of each individual patient, if deemed necessary by the doctors. Out of 55 patients, 28

Ma Huang (Herba Ephedrae)

showed marked improvement, 15 showed moderate improvement, and 2 showed no response.[18]

HERB-DRUG INTERACTION

- **General effect:** *Ma Huang* contains ephedrine alkaloids that stimulate the central nervous system and the cardiovascular system. Combining *Ma Huang* with cardiac glycosides may lead to cardiac arrhythmia. *Ma Huang* should not be combined with other sympathomimetic drugs, such as ephedrine, pseudoephedrine, theophylline, caffeine, monoamine oxidase inhibitors (MAOI), or substances with similar properties.[19]
- **Beta blockers:** The effect of beta blockers may be reduced when combined with *Ma Huang* because of increased levels of norepinephrine caused by the herb.[20] [Note: Examples of beta blockers include atenolol (Tenormin), metoprolol (Lopressor/Toprol), sotalol (Betapace), propranolol (Inderal), and labetalol (Normodyne/Trandate).]
- **Diuretics:** *Ma Huang* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[21] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

Ephedrine and pseudoephedrine are well-absorbed. Peak plasma concentration is reached 1 to 2 hours after oral ingestion of the herb. Ephedrine and pseudoephedrine are distributed throughout the body, with higher concentrations found in the liver and kidneys, followed by the brain, spleen, fatty tissues, and saliva. The half-lives of these compounds range from 4.73 to 7.1 or 13.4 hours (when the urinary pH is 5.2, 6, and 7, respectively). Up to 75% of these compounds can be recovered unchanged in the urine.[4]

The LD_{50} for water-extracted *Ma Huang* in mice via intraperitoneal injection is 650 mg/kg. The LD_{50} for essential oil of *Ma Huang* in mice is 1.35 ml/kg via intraperitoneal injection, and 2.79 ml/kg via oral ingestion.[22]

AUTHORS' COMMENTS

Ma Huang is one of the most extensively studied Chinese herbs. Several ephedrine alkaloids, such as ephedrine and pseudoephedrine, have been isolated and used as pharmaceutical drugs. Though the herb is not as potent as its drug counterpart, the herb still possesses strong medicinal properties and stimulates both the central nervous system and the cardiovascular system.

Ma Huang must be prescribed carefully and its use supervised. Respectful attention to dosages and the clear guidelines for use of this herb will result in safe applications in the majority of cases. Inappropriate or prolonged use, or high dosages, may lead to adverse reactions and unwanted side effects. While taking this herb, patient symptoms and progress must be closely monitored, as adverse reactions and side effects may occur in individuals with pre-existing medical conditions.

Traditionally, *Ma Huang* is pre-decocted and the resultant foam removed, prior to addition of the other herbs. Various sources offer several reasons for this. Some indicate that the foam may cause irritability. Others state that the foam is representative of the diaphoretic function of *Ma Huang* and is strongest in inducing perspiration. Therefore, the foam is best removed to prevent irritability and excessive diaphoresis.

Patients with initial wind-cold invasion may require the use of unprocessed *Ma Huang*, as it is strongest in inducing perspiration and driving out external pathogenic factors lingering in the *wei* (defense) level. However, if the patient has overcome the exterior condition but still is experiencing coughing, dyspnea or wheezing, then it is best to choose honey-fried *Ma Huang*, as it has a weaker diaphoretic function but is stronger to relieve rebellious Lung qi. Honey-fried *Ma Huang* should be used instead of unprocessed *Ma Huang* when treating respiratory disorders not caused by exterior wind-cold invasion manifesting in cough, dyspnea or wheezing.

According to the clinical experience of Dr. Chen Shu-Sheng, *Ma Huang* constricts blood vessels and should be used with caution for hypertensive patients. The strong diaphoretic effect contraindicates its use for weak patients or those experiencing excessive sweating. However, *Ma Huang Gen* (Radix Ephedrae) has the exact opposite effect. It dilates the blood vessels to lower blood pressure and consolidates the *wei* (defensive) level and stops perspiration. When used together, the herb and root regulate respiration and increase the physiological efficiency of the lung without causing the side effects of hyperactivity or increased blood pressure.

Gui Zhi (Ramulus Cinnamomi)

桂枝

Pinyin Name: *Gui Zhi*
Literal Name: "cinnamon twigs"
Alternate Chinese Names: *Liu Gui*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cinnamon twigs, cassia twigs
Botanical Name: *Cinnamomum cassia* Presl.
Pharmaceutical Name: Ramulus Cinnamomi
Properties: acrid, sweet, warm
Channels Entered: Heart, Lung, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior through Diaphoresis

Exterior-excess, wind-cold condition: Acrid, sweet and warm, *Gui Zhi* (Ramulus Cinnamomi) exerts a diaphoretic function to release the exterior. It induces perspiration, relieves the exterior and warms the yang. *Gui Zhi* is used for exterior-excess conditions in which there is an absence of perspiration due to wind-cold constricting the pores and not allowing perspiration to occur. This herb can also be used for exterior-deficiency conditions, in which perspiration results from *wei* (defensive) *qi* deficiency in controlling the opening and closing of pores.

- Exterior-excess, wind-cold conditions in the absence of perspiration: use *Gui Zhi* with *Ma Huang* (Herba Ephedrae). **Exemplar Formula:** *Ma Huang Tang* (Ephedra Decoction).
- Wind-cold, exterior-deficient conditions with perspiration and aversion to wind: combine it with *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Gui Zhi Tang* (Cinnamon Twig Decoction).

2. Warms and Opens the Channels and Collaterals

***Bi zheng* (painful obstruction syndrome):** *Gui Zhi* is acrid and warm and is commonly used to treat *bi zheng* caused by stagnation of wind, cold and dampness. *Gui Zhi* travels to the superficial layers of the body, warms the muscles, and opens the channels and collaterals, thus relieving pain. It may be used as a guiding herb, and to treat pain.

- *Bi zheng:* use it with *Chuan Wu* (Radix Aconiti Preparata) and *Cao Wu* (Radix Aconiti Kusnezoffii) to

Gui Zhi (Ramulus Cinnamomi)

dispel cold and dampness, open the channels and collaterals, and relieve pain.

- *Bi zheng* in the upper body, especially the shoulders: add *Jiang Huang* (Rhizoma Curcumae Longae) and *Fang Feng* (Radix Saposhnikoviae).
- Rheumatoid arthritis: combine with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), *Fang Feng* (Radix Saposhnikoviae), and *Wei Ling Xian* (Radix Clematidis).

3. Warms Yang to Eliminate Water or Phlegm Stagnation

Edema and dysuria: Yang deficiency interferes with normal transportation and transformation of fluids in the body. Such interference leads to abnormal water circulation and water accumulation, characterized by symptoms such as edema and dysuria.

- Edema and dysuria due to yang deficiency: use *Gui Zhi* with *Fu Ling* (Poria), *Zhu Ling* (Polyporus), *Ze Xie* (Rhizoma Alismatis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). **Exemplar Formula:** *Wu Ling San* (Five-Ingredient Powder with Poria).

***Tan yin* (phlegm retention):** *Gui Zhi* treats yang-deficiency accumulation of phlegm with presentations such as fullness of the chest and hypochondrium, dizziness, vertigo and palpitations. Excess accumulation in the upper *jiao* interferes with normal functioning of transportation and transformation.

- Phlegm accumulation with fullness in the chest and hypochondrium, dizziness, vertigo, and palpitations: combine *Gui Zhi* with *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gan Cao* (Radix Glycyrrhizae) to tonify yang and resolve phlegm stagnation. **Exemplar Formula:** *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction).

4. Warms Yang in the Chest

***Xiong bi* (painful obstruction of the chest):** *Gui Zhi* warms yang energy in the chest and eliminates cold or phlegm stagnation. With yang deficiency, cold and phlegm may invade the chest, leading to symptoms such as *xiong bi*, cough, chest pain that may radiate to the scapulae, shortness of breath, and related discomforts. *Gui Zhi* is commonly used today to treat myocardial infarction, angina pectoris and cardiac insufficiency caused by yang deficiency, when no signs of heat are present.

- *Xiong bi* due to yang deficiency: use *Gui Zhi* with *Gua Lou Shi* (Fructus Trichosanthis) and *Xie Bai* (Bulbus Allii Macrostemonis) to warm yang in the chest, activate qi circulation, and remove stagnation.
- Palpitations and intermittent pulse because of Heart yin and yang deficiencies: combine it with *Zhi Gan Cao* (Radix Glycyrrhizae Preparata), *Ren Shen* (Radix Ginseng) and *E Jiao* (Colla Corii Asini) to tonify Heart yin and yang and restore normal pulse. **Exemplar Formula:** *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction).

5. Warms Yang in the *Chong* (Thoroughfare) and *Ren* (Conception) Channels to Restore Normal Menstruation

In traditional Chinese medicine, the *chong* channel is the sea of blood and the *ren* channel governs the uterus. Yang deficiency of the *chong* and *ren* channels, combined with qi stagnation, leads to abnormal blood flow, manifesting in symptoms such as irregular menstruation, dysmenorrhea, amenorrhea and other gynecological disorders. *Gui Zhi* warms the *chong* and *ren* channels and disperses stagnation by facilitating the flow of blood in the vessels.

- Irregular menstruation due to yang deficiency and cold stagnation: use it with *Dang Gui* (Radicis Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) to warm the channels, eliminate cold stagnation, and nourish blood. **Exemplar Formula:** *Wen Jing Tang* (Warm the Menses Decoction).
- Blood stagnation and masses in the lower abdomen: combine this herb with *Mu Dan Pi* (Cortex Moutan) and *Tao Ren* (Semen Persicae) to disperse blood stasis. **Exemplar Formula:** *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill).

DOSAGE

5 to 10 grams. Maximum dosage for *Gui Zhi* is 30 grams. It may be used in decoction, pills, or powder.

CAUTIONS / CONTRAINDICATIONS

- Because *Gui Zhi* stimulates blood circulation, it should be used with caution in patients with high risk of bleeding, pregnant women, or women with hypermenorrhea.
- *Gui Zhi* is acrid and warm and may damage yin if used inappropriately. Therefore, it is contraindicated in patients with febrile disorders, yang excess related to yin deficiency, heat in the blood, or other heat-dominant disorders.

CHEMICAL COMPOSITION

Essential oils 0.43-1.35% (cinnamaldehyde, benzyl benzoate, cinnamyl acetate, calamenene, β-cadinene, terpinon-4-ol), trans-cinnamic acid, coumarin, protocatechuic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Gui Zhi* has both antibacterial and antiviral effects. It exerts an inhibitory effect against *Staphylococcus*

Gui Zhi (Ramulus Cinnamomi)

aureus, Salmonella typhi, some dermatophytes, and influenza viruses.[2]

- **Diuretic**: The essential oil of *Gui Zhi* has a mild diuretic effect to reduce edema.[3]
- **Diaphoretic and antipyretic**: The essential oil of *Gui Zhi* induces perspiration and lowers body temperature through dilation of blood vessels at the peripheral regions of the body.[4]
- **Analgesic**: It exerts analgesic action.[5]
- **Circulatory**: *Gui Zhi* dilates blood vessels and promotes blood circulation to the uterus.[6]
- **Other**: *Gui Zhi* has cardiotonic, sedative and hypnotic, and antitussive effects.[7]

CLINICAL STUDIES AND RESEARCH

- **Frostbite:** According to one report, 6 patients with frostbite were treated with an herbal decoction twice daily for 5 to 10 days with satisfactory results. The formula contained *Gui Zhi, Chi Shao* (Radix Paeoniae Rubrae), *Dang Gui* (Radicis Angelicae Sinensis), *Gan Cao* (Radix Glycyrrhizae), *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae).[8]

  In another study, *Gui Zhi* was used topically to treat frostbite with excellent results. The herbal decoction was prepared by cooking 60 grams of *Gui Zhi* in 1,000 ml of water for 10 minutes. The herbal decoction was applied topically to the affected area for 10 to 15 minutes twice daily. Treatment duration ranged between 1 and 6 topical applications.[9]
- **Facial numbness**: In a clinical study, 30 patients with facial numbness were treated by topical application of herbs, with complete recovery in 26 patients, moderate improvement in 3 patients, and no response in 1 patient. The duration of treatment ranged from 6 to 15 days. The herbal formula included *Gui Zhi* 30g, *Fang Feng* (Radix Saposhnikoviae) 20g, and *Chi Shao* (Radix Paeoniae Rubrae) 15g. The treatment protocol was to cook the herbs in decoction, and apply the decoction to the affected area with gentle massage for 20 minutes, twice daily. There should be mild warmth and redness in the area after each treatment session.[10]
- **Hypotension:** In one report, 117 patients with low blood pressure were treated with an herbal formula, with marked effectiveness in all patients within 2 to 3 days. The herbal formula consisted of *Gui Zhi* 40g, *Rou Gui* (Cortex Cinnamomi) 40g, and *Gan Cao* (Radix Glycyrrhizae) 20g, cooked in decoction and administered in three equally-divided doses daily.[11]
- **Arthritis**: In one report, 30 arthritic patients were treated with herbal formulas, with complete recovery in 15 patients, marked improvement in 6 patients, moderate effectiveness in 5 patients, and no response in 4 patients. The patients were given the herbs as decoction once daily. Duration of treatment was not specified. The herbal formula included *Gui Zhi* 15g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Gan Cao* (Radix Glycyrrhizae) 6g, *Ma Huang* (Herba Ephedrae) 6g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 12g, *Zhi Mu* (Radix Anemarrhenae) 10g, *Fang Feng* (Radix Saposhnikoviae) 10g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 30 to 60g, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 5g. For patients with chronic and stubborn arthritis, *Quan Xie* (Scorpio) 10g, *Wu Gong* (Scolopendra) 10g, *Wu Shao She* (Zaocys) 10g, and *Chuan Shan Jia* (Squama Manis) 10g were added to the formula.[12]

HERB-DRUG INTERACTION

Diuretics: *Gui Zhi* has a mild diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[13] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

The LD_{50} for cinnamic aldehyde in mice was 132 mg/kg via intravenous injection, 610 mg/kg via intraperitoneal injection, and 2,225 mg/kg via oral ingestion. Interestingly, there were more adverse toxicities and fatalities in the daytime than at night.[14]

Zi Su Ye (Folium Perillae)

紫蘇葉　紫苏叶

Pinyin Name: *Zi Su Ye*
Literal Name: "purple perilla leaf"
Alternate Chinese Names: *Su Ye, Zi Su*
Original Source: *Ben Cao Jing Ji Zhu* (Collection of Commentaries on the Classic of the Materia Medica) by Tao Hong-Jing in 480-498 A.D.
English Name: perilla, perilla leaf
Botanical Name: *Perilla frutescens* (L.) Britt. var. *crispa* (Thunb.) Hand. – Mazz.
Pharmaceutical Name: Folium Perillae
Properties: acrid, warm
Channels Entered: Lung, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Dispels Cold

Exterior wind-cold syndrome: Acrid and warm in nature, *Zi Su Ye* (Folium Perillae) releases the exterior, dispels wind and cold, and ventilates Lung qi. It is commonly used to treat exterior wind-cold syndrome.

- Exterior wind-cold syndrome with aversion to cold, fever, headache, nasal obstruction, absence of perspiration, and cough: use *Zi Su Ye* with *Qian Hu* (Radix Peucedani), *Xing Ren* (Semen Armeniacae Amarum) and *Jie Geng* (Radix Platycodonis). **Exemplar Formula:** *Xing Su San* (Apricot Kernel and Perilla Leaf Powder).
- Exterior wind-cold syndrome with qi stagnation and chest congestion: combine it with *Chen Pi* (Pericarpium Citri Reticulatae) and *Xiang Fu* (Rhizoma Cyperi) to activate and regulate qi circulation.

2. Regulates Qi and Expands the Chest, Harmonizes the Middle Jiao, Alleviates Nausea and Vomiting

Nausea and vomiting: *Zi Su Ye* is commonly used to treat chest fullness and congestion, nausea and vomiting secondary to qi stagnation of the Spleen and Stomach.

- Stomach flu, acute enteritis due to qi stagnation of the Spleen and Stomach, manifesting as abdominal pain, vomiting and diarrhea: use this herb with *Chen Pi* (Pericarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae) and *Huo Xiang* (Herba Agastache). **Exemplar Formula:** *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi).
- Qi stagnation of the Spleen and Stomach with heat: combine it with *Huang Lian* (Rhizoma Coptidis).
- Qi stagnation of the Spleen and Stomach with phlegm stagnation: add *Ban Xia* (Rhizoma Pinelliae) and *Hou Po* (Cortex Magnoliae Officinalis).

3. Calms the Fetus

Morning sickness or restless fetus: In pregnant women, upward reversal of fetal qi may lead to nausea and morning sickness. Abnormal descending of fetal qi may lead to restless fetus or threatened abortion. *Zi Su Ye* can be used during pregnancy to regulate qi circulation to relieve nausea and morning sickness, and stabilize the fetus.

- Morning sickness, restless fetus or threatened abortion: use this herb with *Chen Pi* (Pericarpium Citri Reticulatae), *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi) to regulate qi and stabilize pregnancy.

4. Alleviates Seafood Poisoning

Seafood poisoning: *Zi Su Ye* is commonly used to treat seafood poisoning characterized by nausea, vomiting, diarrhea and abdominal pain. It is most effective for poisoning from ingesting fish and crabs.

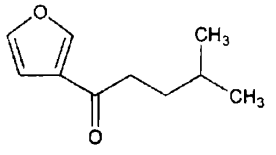
- Seafood poisoning: decoct *Zi Su Ye* by itself or in combination with *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Rash or itching because of allergy: combine it with *Chan Tui* (Periostracum Cicadae) and *Fang Feng* (Radix Saposhnikoviae).

DOSAGE

5 to 10 grams. The herbal decoction may be taken orally or applied topically. When cooking the decoction, *Zi Su Ye* should be added last and cooked for only a few minutes.

CAUTIONS / CONTRAINDICATIONS

- Since *Zi Su Ye* is acrid and warm, it can easily damage yin



Zi Su Ye (Folium Perillae)

and qi. Therefore, it should be used with caution in patients with febrile disorders, yin deficiency, qi deficiency, or exterior-deficient syndromes without perspiration.

- *Zi Su Ye* should also be used with caution for patients with nausea caused by heat.
- *Zi Su Ye* should be used only on a short-term basis. Long-term use may lead to qi deficiency.

CHEMICAL COMPOSITION

Essential oils 0.2-0.9% (perillaldehyde, elsholtziaketone, perilla ketone, naginataketone, isoegomaketone, dillapiol, elemicin, wyristicin, citral, caryophellene, farnesene, linalool, methene, menthol, trans-shisool, perilla alcohol, dihydroperillalcohol, perillene), apigenin, scutellarin, vicenin, shisonin, anthocyanins, cyanogenic glycosides.[1,2]

Perilla Ketone

PHARMACOLOGICAL EFFECTS

- **Antipyretic and diaphoretic**: Decoction of *Zi Su Ye* dilates peripheral blood vessels and stimulates perspiration. At 2 g/kg via oral ingestion, it has a mild antipyretic effect in rabbits.[3]
- **Respiratory**: *Zi Su Ye* has been shown to promote bronchodilation and relieve bronchospasm. It also reduces secretion from the bronchioli.[4]
- **Antibiotic**: *Zi Su Ye* has been shown to inhibit the activity of *Staphylococcus aureus*. The minimum inhibitory concentration (MIC) of *Zi Su Ye* extract is 200 to 1,600 mg/ml.[5]
- **Gastrointestinal**: The perilla ketone of *Zi Su Ye* stimulates the gastrointestinal tract by increasing stomach acid secretion and intestinal peristalsis in rats.[6]
- **Hyperglycemic**: Essential oils of *Zi Su Ye* at 0.35 ml/kg given via oral ingestion in rabbits increase blood glucose levels.[7]

CLINICAL STUDIES AND RESEARCH

- **Common warts**: In one study, patients with common warts were treated by topical application of herbs with satisfactory results. *Zi Su Ye* ground into paste was applied topically for 10 to 15 minutes once daily, to treat common warts. Observation of 20 patients treated with this method revealed satisfactory results, with treatment duration ranging from 2 to 6 treatments.[8]
- **Cervical bleeding**: *Zi Su Ye* was extracted to yield a final solution with concentration of 2 grams of the herb in 1 ml of final solution. The solution was sterilized and applied topically to the affected area to stop bleeding. Of 108 patients, 86 (79.63%) reported satisfactory responses.[9]

TOXICOLOGY

Administration of *Zi Su Ye* is occasionally associated with adverse reactions, over stimulation, and allergic reactions.[10]

SUPPLEMENT

- 蘇梗 / 苏梗 *Su Geng* (Caulis Perillae), first cited in *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D., is derived from branches of the same plant as *Zi Su Ye*. It is acrid, sweet, and slightly warm and enters the Lung, Spleen and Stomach. Its main functions are to expand the chest and hypochondrium, regulate qi and calm the fetus. Because of its mild nature, *Su Geng* is most suitable for deficient patients with qi stagnation in the middle *jiao*. Its diaphoretic function is weaker than that of *Zi Su Ye*. The usual dosage is 5 to 10 grams. *Su Geng* should be added to the decoction last, and cooked for only a short time.

AUTHORS' COMMENTS

Please refer to *Su Zi* (Fructus Perillae) for comparison and contrast of *Zi Su Ye* (Folium Perillae), *Su Zi* (Fructus Perillae), and *Su Geng* (Caulis Perillae).

Zi Su Ye, *Shi Chang Pu* (Rhizoma Acori), *Ze Xie* (Rhizoma Alismatis) and *Shan Zha* (Fructus Crataegi) taken as tea on a daily basis is effective to reduce body weight and lower cholesterol.

Sheng Jiang (Rhizoma Zingiberis Recens)

生薑 生姜

Pinyin Name: *Sheng Jiang*
Literal Name: "fresh ginger"
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: fresh ginger
Botanical Name: *Zingiber officinale* Rosc.
Pharmaceutical Name: Rhizoma Zingiberis Recens
Properties: acrid, slightly warm
Channels Entered: Lung, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Induces Perspiration

Exterior wind-cold syndrome: *Sheng Jiang* (Rhizoma Zingiberis Recens), used as food on many occasions, has a mild function to release the exterior and induce perspiration. It is commonly used to treat mild or early stages of wind-cold syndrome. Because it is relatively mild, it must be used with stronger diaphoretic herbs in order to induce perspiration for releasing exterior syndromes.

- Early stage of common colds or influenza: use *Sheng Jiang* alone, or with *Gui Zhi* (Ramulus Cinnamomi) to dispel wind-cold or induce diaphoresis. **Exemplar Formula:** *Gui Zhi Tang* (Cinnamon Twig Decoction).
- To prevent catching a cold during cold or rainy weather: cook 15 to 20 slices *Sheng Jiang* for 10 minutes as a decoction in about two bowls of water, with brown sugar added at the end. Serve the decoction while it is still warm to alleviate minor wind-cold signs and symptoms.

2. Warms the Middle Jiao and Alleviates Vomiting

Vomiting caused by Stomach cold: *Sheng Jiang* warms the Stomach, harmonizes the middle *jiao* and is commonly used to relieve nausea and vomiting.

- Nausea and vomiting: use it alone or with *Da Zao* (Fructus Jujubae).
- Nausea and vomiting due to Stomach cold: combine *Sheng Jiang* with *Ban Xia* (Rhizoma Pinelliae).
- Nausea and vomiting due to Stomach heat: use it with *Zhu Ru* (Caulis Bambusae in Taenia), *Pi Pa Ye* (Folium Eriobotryae) and *Huang Lian* (Rhizoma Coptidis). **Exemplar Formula:** *Ju Pi Zhu Ru Tang* (Tangerine Peel and Bamboo Shaving Decoction).

3. Warms the Lung and Stops Coughing

Cough with profuse sputum caused by wind-cold: Wind-cold constricts Lung qi and may lead to coughing and formation of phlegm. *Sheng Jiang* warms the Lung, dispels cold, and stops coughing.

- Cough: use it with *Zi Su Ye* (Folium Perillae), *Xing Ren* (Semen Armeniacae Amarum), *Zi Wan* (Radix Asteris) and *Chen Pi* (Pericarpium Citri Reticulatae). **Exemplar Formula:** *Xing Su San* (Apricot Kernel and Perilla Leaf Powder).

4. Eliminates Toxins

Seafood poisoning: *Sheng Jiang* eliminates toxins and treats food poisoning characterized by vomiting and diarrhea. It works best for food poisoning commonly associated with seafood such as shrimp and crabs.

- Seafood poisoning: use *Sheng Jiang* individually or with *Zi Su Ye* (Folium Perillae).

Toxicity of herbs: *Sheng Jiang* is commonly used to neutralize or eliminate the toxicity of other herbs, often by either simultaneous use or by using *Sheng Jiang* as a pre-processing agent.

- Detoxification: *Tian Nan Xing* (Rhizoma Arisaematis) and *Ban Xia* (Rhizoma Pinelliae) should be pre-processed with *Sheng Jiang* to reduce unwanted toxic side effects. If numbness and swelling of the tongue or throat occur, drink *Sheng Jiang* decoction immediately to neutralize the toxins.

DOSAGE

3 to 10 grams for fresh herb in decoction. Maximum dosage for *Sheng Jiang* is 30 grams. Fresh *Sheng Jiang* may be ground into paste for topical application.

Sheng Jiang (Rhizoma Zingiberis Recens)

CAUTIONS / CONTRAINDICATIONS

- *Sheng Jiang* is acrid and warm and may damage qi and yin. Therefore, it should not be used for patients who have yin deficiency, excess heat, or spontaneous perspiration because of qi deficiency.
- Due to its warm nature, *Sheng Jiang* may generate heat in the body. Thus, it should not be given on a long-term basis, in order to avoid causing heat accumulation.

CHEMICAL COMPOSITION

Essential oils 0.25-3.0% (zingiberol, zingiberene, phellandrene, camphene, citral, linalool, methyheptenone, nonyladehyde, d-borneol), geraniol, geranial, β-bisabolene, α-terpineol, β-sesquiphellandrene, arcurcumene, nerolidol, sesquiphellandrol, gingerol, methylgingerol, gingerdiones.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Oral administration of *Sheng Jiang* in rats has demonstrated a marked influence on the gastrointestinal system. It exerts protective effects on the gastrointestinal system by stimulating the production of stomach mucous membranes. It also increases stomach acid secretion and intestinal motility.[2]
- **Cardiovascular:** The use of *Sheng Jiang* has been associated with an increase in heart rate, respiration rate, and blood pressure.[3]
- **Antibiotic:** *Sheng Jiang* has been shown to have an inhibitory effect on *Salmonella typhi*, *Vibrio cholerae* and *Trichomonas vaginalis*.[4]

CLINICAL STUDIES AND RESEARCH

- **Arthritis and low back pain:** Injections of a *Sheng Jiang* preparation were given to 113 patients to evaluate its effect on arthritis and low back pain. The injections were administered to pressure points daily or every other day, for 3 to 5 treatments per course. The rate of effectiveness was 83%.[5]
- **Arthritis:** Injections of a *Sheng Jiang* preparation were given to 125 patients to evaluate its effectiveness in treating arthritis. The injections were administered to various pressure points in the upper and lower limbs daily or every other day. Each course of treatment consisted of 7 injections, with 4 to 7 days of rest in between courses of treatment. Of 125 patients, 113 showed improvement.[6]
- **Intestinal obstruction due to parasites:** In one report, 541 patients with intestinal obstruction caused by parasites were given an herbal preparation (30 grams of *Sheng Jiang* and 60 grams of honey). This was given three times daily at varying dosages depending on the age of the patients, that ranged from 1 to 15 years of age. The patients also received supportive treatment with allopathic medicine when necessary. Of 541 patients, 87.6% reported improvement.[7]
- **Nausea and vomiting:** A slice of *Sheng Jiang* placed topically on point *Neiguan* (PC 6) showed marked effectiveness in relieving nausea and vomiting in 10 patients.[8]
- **Severe nausea and vomiting:** Administration of *Sheng Jiang* via simple tea or decoction effectively reduced the severity of nausea and vomiting associated with chemotherapy and radiation treatments.[9]
- **Motion sickness:** In one report, patients with frequent history of motion sickness were treated with *Sheng Jiang* placed topically on *Neiguan* (PC 6), on the right hand for females and left hand for males. Of 39 patients treated, following a motorcycle ride only one experienced motion sickness.[10]
- **Vitiligo:** *Sheng Jiang* was reported to be effective in treating vitiligo when it was used to rub the affected area of the skin three to four times daily for 2 to 3 months.[11]
- **Burn:** Topical application of fresh *Sheng Jiang* juice with a cotton ball showed marked effectiveness in treating burns, whether blistered or not, in 400 to 500 patients, without unwanted side effects.[12]

TOXICOLOGY

No fatalities were noted following intramuscular injection of *Sheng Jiang* in mice at a dose 625 times the normal adult dose in humans.[13]

SUPPLEMENT

- 生薑皮 / 生姜皮 *Sheng Jiang Pi* (Pericarpium Zingiberis Recens), first cited in *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061, is derived from the skin of the ginger root. It is acrid and cool, and functions to harmonize the middle *jiao*, dispel water and reduce edema. It is often used in patients with edema and urinary dysfunction. *Sheng Jiang Pi*, *Da Fu Pi* (Pericarpium Arecae), *Sang Bai Pi* (Cortex Mori), *Fu Ling Pi* (Cortex Poria) and *Chen Pi* (Pericarpium Citri Reticulatae) are five herbs often combined together to relieve edema, such as in *Wu Pi Yin* (Five-Peel Decoction). The dosage for *Sheng Jiang Pi* is 3 to 10 grams.

AUTHORS' COMMENTS

Sheng Jiang (Rhizoma Zingiberis Recens) and *Gan Jiang* (Rhizoma Zingiberis) are two herbs with similar yet different functions. *Sheng Jiang* is acrid and warm, and is best at dispelling exterior wind-cold. *Gan Jiang* is acrid and hot, and is most effective to warm the interior.

Xiang Ru (Herba Elsholtziae seu Moslae)

香薷 香薷

Pinyin Name: *Xiang Ru*
Alternate Chinese Names: *Xi Xiang Ru*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: elsholtzia
Botanical Name: *Elsholtzia splendens* Nakai ex F. Maekawa (*Xiang Ru*); *Mosla chinensis* Maxim. (*Shi Xiang Ru*)
Pharmaceutical Name: Herba Elsholtziae seu Moslae
Properties: acrid, slightly warm
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Induces Diaphoresis

Wind-cold with dampness: *Xiang Ru* (Herba Elsholtziae seu Moslae) is best for patients who catch common colds while outdoors trying to cool off on hot summer nights. As the weather is humid in Asia, this acrid and slightly warm herb is used to dispel wind-cold and the dampness factor that is present during the summer. It is used less often in environments where the weather is predominantly dry.

- Exterior wind-cold syndrome in summer with fever, aversion to cold, headache, chest fullness and congestion, but no perspiration: use this herb with *Hou Po* (Cortex Magnoliae Officinalis) and *Bian Dou* (Semen Lablab Album) to dispel wind-cold. **Exemplar Formula:** *Xiang Ru Yin* (Elsholtzia Combination).
- Exterior wind-cold syndrome in summer with fever, chills, thirst, and no perspiration: combine it with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae) and *Bo He* (Herba Menthae).

2. Eliminates Dampness and Harmonizes the Middle Jiao

Gastrointestinal disorders in summer: *Xiang Ru* is commonly used to treat gastrointestinal disorders, such as nausea, vomiting and diarrhea, caused by excessive intake of cold or contaminated beverages or foods in the summer. These conditions are characterized by dampness attacking the middle *jiao*, impeding the Spleen's normal transformation and transportation functions. Again, *Xiang Ru* is not often used for this purpose in developed countries where sanitation is not a problem, or in areas with predominantly dry weather patterns.

- Nausea and vomiting: use it with *Hou Po* (Cortex Magnoliae Officinalis) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Diarrhea: combine it with *Bian Dou* (Semen Lablab

Xiang Ru (Herba Elsholtziae seu Moslae)

Album), *Huang Qin* (Radix Scutellariae), *Hou Po* (Cortex Magnoliae Officinalis) and *Fu Ling* (Poria).

3. Promotes Urination and Relieves Edema

Edema and dysuria: *Xiang Ru* raises yang qi, strengthens the Spleen, dispels dampness, and promotes circulation of water. It treats edema and dysuria, such as those seen in acute nephritis.

- Edema and dysuria: use *Xiang Ru* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

DOSAGE

3 to 10 grams. Maximum dosage is 30 grams. The decoction should be cooled to room temperature prior to administration if used to release the exterior and induce diaphoresis during the summer. *Xiang Ru* is often taken in pill form if intended to regulate water circulation and relieve edema.

CAUTIONS / CONTRAINDICATIONS

- Acrid and slightly warm, *Xiang Ru* may damage qi and yin. Thus, patients with qi or yin deficiency should not take this herb.
- Do not use *Xiang Ru* as tea for drinking on a daily or long-term basis.
- Administration of the warm decoction may cause vomiting, which may be alleviated by the addition of *Xing Ren* (Semen Armeniacae Amarum), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae) and other herbs that are bitter or have descending properties.

CHEMICAL COMPOSITION

Essential oils 0.1-0.9% (carvacrol, m-cymene, p-cymene, o-cymene, r-terpinene, humulene, α-phellandrene, β-ionone, α-terpineol, eugenol, cedrol), quercetin, apigenin, 2-methylbaicalein, ursolic acid, syringic acid, caffeic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antipyretic:** The essential oil of *Xiang Ru* has diaphoretic and antipyretic effects.[2]
- **Gastrointestinal:** *Xiang Ru* stimulates the secretion of gastric acid, but inhibits intestinal peristalsis in mice, rats and guinea pigs.[3]
- **Antibiotic:** It has inhibitory activity against *E. coli*, *Staphylococcus aureus*, β-hemolytic streptococcus, and some dermatomyces.[4]
- **Others:** Some studies report expectorant and diuretic effects.[5]

CLINICAL STUDIES AND RESEARCH

- **Common cold:** According to one report, 200 patients suffering from common colds were treated topically with an *herbal formula, with complete recovery in 196 cases and* no effect in 4 cases. Out of 196 that responded, 164 reported positive improvement after one dose and 32 reported positive effects after two doses. The herbal formula contained in fine powder: *Xiang Ru* 15g, *Ma Huang* (Herba Ephedrae) 15g, *Ban Lan Gen* (Radix Isatidis) 10g, *Pu Gong Ying* (Herba Taraxaci) 10g and *Jie Geng* (Radix Platycodonis) 12g. The herbal powder was placed topically on the umbilicus and held in place with gauze. The dosage was 3.5g for adults and 1.0g for pediatric patients.[6]
- **Diarrhea in the summer time:** An herbal decoction given three times daily was effective in 89 of 90 patients with diarrhea. The herbal decoction contained *Xiang Ru* 10g, *Qin Pi* (Cortex Fraxini) 10g, *Bian Dou* (Semen Lablab Album) 10g, *Liu Yi San* (Six-to-One Powder) 10g, *Hou Po* (Cortex Magnoliae Officinalis) 10g, *Huo Xiang* (Herba Agastache) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Mu Xiang* (Radix Aucklandiae) 10g, *Huang Lian* (Rhizoma Coptidis) 5g, and *Fu Ling* (Poria) 15g. If there were symptoms of food stagnation, *Shan Zha* (Fructus Crataegi) 10g, *Shen Qu* (Massa Fermentata) 10g, and *Mai Ya* (Fructus Hordei Germinatus) 10g were added.[7]

AUTHORS' COMMENTS

It is generally accepted that the herb of choice to dispel wind-cold from the exterior is *Ma Huang* (Herba Ephedrae) in winter and *Xiang Ru* in summer. Use of *Ma Huang* in summer is not appropriate, as it may be too strong and damage body fluids. Similarly, use of *Xiang Ru* in winter is not sufficient, as it is not powerful enough to dispel wind-cold under winter conditions.

Jing Jie (Herba Schizonepetae)

荆芥 荆芥

Pinyin Name: *Jing Jie*
Alternate Chinese Names: *Jing Jie Sui*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: schizonepeta, fine-leaf schizonepeta
Botanical Name: *Schizonepeta tenuifolia* Briq.
Pharmaceutical Name: Herba Schizonepetae
Properties: acrid, slightly warm
Channels Entered: Lung, Liver

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Dispels Wind

Wind-heat or wind-cold: *Jing Jie* (Herba Schizonepetae) is rather mild in action. It is acrid, yet not damaging to the yin; it is warm but not drying. It is commonly used to dispel wind-cold or wind-heat from the exterior.

- Exterior wind-cold with aversion to cold, fever, headache and no perspiration: use *Jing Jie* with *Fang Feng* (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii) to dispel wind-cold and release the exterior. **Exemplar Formula:** *Jing Fang Bai Du San* (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences).
- Exterior wind-heat with fever, headache, sore throat and red eyes: combine *Jing Jie* with *Bo He* (Herba Menthae), *Lian Qiao* (Fructus Forsythiae) and *Jin Yin Hua* (Flos Lonicerae) to dispel wind-heat. **Exemplar Formula:** *Yin Qiao San* (Honeysuckle and Forsythia Powder).

2. Dispels Wind and Relieves Muscle Spasms

- Postpartum spasms and trismus: *Jing Jie* is useful to relieve these problems caused by exposure to wind.
- Muscle cramps and spasms caused by wind exposure: use this herb by itself as powder, or in combination with other herbs that arrest wind and stop tremors.

3. Dispels Wind, Vents Rashes and Alleviates Itching

Dermatological disorders are often the direct manifestation of wind attacking the exterior of the body. *Jing Jie* dispels this wind and is commonly used to treat measles, rashes, eczema, pruritic itching, carbuncles, furuncles, abscesses, and similar eruptions or sores.

- Measles: use it with *Chan Tui* (Periostracum Cicadae), *Niu Bang Zi* (Fructus Arctii), *Bo He* (Herba Menthae), and *Jin Yin Hua* (Flos Lonicerae) to dispel wind and promote the eruption of measles.
- Pruritic itching: combine it with *Fang Feng* (Radix Saposhnikoviae) to dispel wind and relieve itching.
- Early-stage carbuncles, furuncles, and abscesses with heat: use *Jing Jie* with *Lian Qiao* (Fructus Forsythiae), *Bo He* (Herba Menthae), *Niu Bang Zi* (Fructus Arctii), *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae).
- Early-stage carbuncles, furuncles and abscesses with exterior signs and symptoms: use it with *Fang Feng* (Radix Saposhnikoviae), *Jin Yin Hua* (Flos Lonicerae) and *Lian Qiao* (Fructus Forsythiae).

4. Stops Bleeding

Bleeding from various causes: *Jing Jie* has excellent effects to stop bleeding, if the charred form is used.

- Epistaxis, hemoptysis and hematemesis: use it with fresh juice of *Sheng Di Huang* (Radix Rehmanniae).
- Hematochezia or bleeding hemorrhoids: add it to *Huai Hua* (Flos Sophorae), *Ce Bai Ye* (Cacumen Platycladi), and *Zhi Ke* (Fructus Aurantii). **Exemplar Formula:** *Huai Hua San* (Sophora Japonica Flower Powder).
- Hematuria: combine *Jing Jie* with *Xiao Ji* (Herba Cirisii), *Sheng Di Huang* (Radix Rehmanniae), *Ou Jie* (Nodus Nelumbinis Rhizomatis), *Hua Shi* (Talcum), *Tong Cao* (Medulla Tetrapanacis), and *Pu Huang* (Pollen Typhae).
- For hypermenorrhea, abnormal uterine bleeding or postpartum bleeding: use it with *E Jiao* (Colla Corii Asini), *Ai Ye* (Folium Artemisiae Argyi), and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE

5 to 10 grams. Maximum dosage of *Jing Jie* is 30 grams.

Jing Jie (Herba Schizonepetae)

The tip or flower of the plant has the strongest diaphoretic effect. For treatment of exterior conditions, prescribe the unprocessed form for patients without perspiration, and the stir-fried form for patients with perspiration. *Jing Jie* should be added last to decoctions and cooked for only a short time. To enhance the hemostatic function, the herb is charred until it turns into ash.

CAUTIONS / CONTRAINDICATIONS

- *Jing Jie* is not recommended if perspiration is not due to wind, such as in patients with *wei* (defensive) *qi* deficiency or yin-deficient heat.
- Contraindicated for patients experiencing spasms because of Liver wind.
- *Jing Jie* is contraindicated in cases of fully erupted measles or open sores.
- While taking *Jing Jie*, patients should avoid foods such as fish, crab, goose or duck, as consumption of these foods may increase itching of the skin.

CHEMICAL COMPOSITION

Essential oils 0.43-2.05% (menthone, pulegone, isomenthone, isopulegone, limonene), schizomodiol, schizonepetoside A-E. Charred *Jing Jie* has a significantly lower content of essential oils (0.06%).[1]

PHARMACOLOGICAL EFFECTS

- **Antipyretic and diaphoretic**: Water and alcohol extracts of *Jing Jie* given orally at 2 g/kg are associated with mild antipyretic effects in rabbits with artificially-induced fevers.[2]
- **Antibiotic**: Decoction of *Jing Jie* has shown antimicrobial effectiveness against *Staphylococcus aureus, Corynebacterium diphtheriae, Bacillus anthracis,* β-streptococcus, *Salmonella typhi, Bacillus dysenteriae, Pseudomonas aeruginosa,* and *Bacillus tuberculi.*[3]
- **Hemostatic**: In one laboratory study, the hemostatic effects of unprocessed *Jing Jie* and charred *Jing Jie* were evaluated in mice and rabbits. The study reported that unprocessed *Jing Jie* shortened coagulation time by 30%, while charred *Jing Jie* did so by 77.7%. The study concluded that charred *Jing Jie* is more effective than unprocessed *Jing Jie* as a hemostatic agent.[4]
- **Analgesic**: Decoction of *Jing Jie* demonstrated analgesic influence.[5]
- **Respiratory**: Essential oil of *Jing Jie* exerts bronchodilating action to relieve bronchospasm, treating wheezing and dyspnea.[6]

CLINICAL STUDIES AND RESEARCH

- **Dermatological disorders**: *Jing Jie* powder can be applied topically for various dermatological disorders, such as measles, pruritic rash and itching. Apply the powder to the affected area and gently rub it against the skin until there is a sensation of mild warmth. Mild dermatological conditions require 1 or 2 treatments, while severe conditions require 2 to 4 treatments.[7]

TOXICOLOGY

The LD_{50} for decoction of *Jing Jie* via intraperitoneal injection in mice is 30,046 mg/kg.[8]

SUPPLEMENT

- 荆穗 / 荆穗 *Jing Sui* (Flos Schizonepetae), the flower, treats wind invasion affecting the head. By comparison, *Jing Jie* (Herba Schizonepetae), the aerial part of the plant, treats wind invasion throughout the body.

Fang Feng (Radix Saposhnikoviae)

防風 防风

Pinyin Name: *Fang Feng*
Literal Name: "guard against wind," "wind-preventing herb"
Alternate Chinese Names: *Qing Fang Feng, Cao Fang Feng*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: siler
Botanical Name: *Saposhnikovia divaricata* (Turcz.) Schischk; *Ledebouriella divaricata* (Turcz.) Hiroe
Pharmaceutical Name: Radix Saposhnikoviae
Properties: acrid, sweet, slightly warm
Channels Entered: Urinary Bladder, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Releases the Exterior

Exterior wind-heat or wind-cold syndrome: Due to its acrid and sweet properties, *Fang Feng* (Radix Saposhnikoviae) is one of the most effective herbs for dispelling wind without causing dryness. Because the function of *Fang Feng* in dispelling wind is stronger than the influence of its warming property, it can be used for both wind-cold and wind-heat conditions. *Fang Feng* is the herb of choice when body aches and pain are the chief complaints in an exterior syndrome.

- Exterior wind-cold syndrome with aversion to cold, fever, and headache: use this herb with *Zi Su Ye* (Folium Perillae), *Jing Jie* (Herba Schizonepetae), and *Bai Zhi* (Radix Angelicae Dahuricae).
- Exterior wind-cold syndrome with aversion to cold, headache, muscle aches and pain: combine it with *Jing Jie* (Herba Schizonepetae), *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Qian Hu* (Radix Peucedani).
- Exterior wind-heat syndrome with red eyes and sore throat: combine it with *Jing Jie* (Herba Schizonepetae), *Lian Qiao* (Fructus Forsythiae) and *Bo He* (Herba Menthae).
- To strengthen *wei* (defensive) *qi*: add *Huang Qi* (Radix Astragali).
- Exterior wind-heat syndrome with accumulation of interior heat: use with *Ma Huang* (Herba Ephedrae) and *Jing Jie* (Herba Schizonepetae) to dispel wind-heat from the exterior, and with *Huang Qin* (Radix Scutellariae) and *Zhi Zi* (Fructus Gardeniae) to clear heat from the interior. **Exemplar Formula:** *Jing Fang Bai Du San* (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences).

Dermatological disorders with itching: Wind is the predominant factor in dermatological disorders such as rashes, eczema, boils, rubella and urticaria. *Fang Feng* dispels wind and relieves itching.

- Dermatological disorders with itching, rash, and irritation: use it with *Jing Jie* (Herba Schizonepetae) and *Chan Tui* (Periostracum Cicadae). **Exemplar Formula:** *Xiao Feng San* (Eliminate Wind Powder).
- Acne due to wind-heat attacking the upper body: use it with *Bo He* (Herba Menthae), *Lian Qiao* (Fructus Forsythiae), *Huang Qin* (Radix Scutellariae), and *Huang Lian* (Rhizoma Coptidis). **Exemplar Formula:** *Qing Shang Fang Feng Tang* (Clear the Upper and Guard the Wind Decoction).

2. Dispels Wind, Cold, and Dampness and Relieves Pain

***Bi zheng* (painful obstruction syndrome):** Wind, cold and dampness are factors that commonly attack the muscles and joints, leading to arthritis, also known as *bi zheng*. These pathogens obstruct the normal circulation of qi and blood, leading to joint pain and muscle spasms. This type of pain is usually aggravated in cold or rainy seasons.

- *Bi zheng* arising from wind, cold, and dampness: use *Fang Feng* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Dang Gui* (Radicis Angelicae Sinensis), *Jiang Huang* (Rhizoma Curcumae Longae), *Chi Shao* (Radix Paeoniae Rubrae), *Huang Qi* (Radix Astragali), and *Gan Cao* (Radix Glycyrrhizae) to eliminate pathogenic factors and relieve pain. **Exemplar Formula:** *Juan Bi Tang* (Remove Painful Obstruction Decoction).

Fang Feng (Radix Saposhnikoviae)

3. Dispels Internal Liver Wind and Relieves Muscle Spasms and Cramps

Muscle spasms and cramps are common manifestations of Liver wind. *Fang Feng* enters the Liver channel, dispels wind, and relieves muscle spasms and cramps. It is commonly used to treat conditions such as tetanus in which the patients have hyperreflexia, trismus, glottal spasms, generalized muscle spasms, trembling of the hands and feet, and seizures.

- Liver wind with spasms: use *Fang Feng* with *Tian Nan Xing* (Rhizoma Arisaematis), *Bai Fu Zi* (Rhizoma Typhonii), *Wu Gong* (Scolopendra), *Jiang Can* (Bombyx Batryticatus) and *Tian Ma* (Rhizoma Gastrodiae) to dispel wind, calm Liver wind, and relieve muscle spasms and cramps.

4. Relieves Diarrhea and Stops Bleeding

Liver and Spleen disharmony: Clinical manifestations include recurrent, painful diarrhea with borborygmus and abdominal pain that may or may not be relieved by evacuation. Bright red blood may also be present in the stool. *Fang Feng* can be used in combination with other herbs to treat diarrhea caused by Liver and Spleen disharmony.

- Diarrhea with abdominal pain: use *Fang Feng* with *Chen Pi* (Pericarpium Citri Reticulatae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Bai Shao* (Radix Paeoniae Alba) to stop diarrhea and relieve abdominal pain. **Exemplar Formula:** *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea).
- Chronic, recurrent diarrhea with blood caused by *chang feng* (intestinal wind): use this herb with charred *Di Yu* (Radix Sanguisorbae), charred *Huai Jiao* (Fructus Sophorae), and *Huai Hua* (Flos Sophorae).

5. Hemostatic

When charred to ashes, *Fang Feng* stops bleeding.

- Excessive menstrual bleeding: stir-fry *Fang Feng* until it turns to ash, then administer 6 grams orally, with water.

DOSAGE

3 to 10 grams. Maximum dosage of *Fang Feng* is 30 grams. Use the unprocessed form for the strongest exterior-releasing action; use the charred herb for maximum hemostatic effect.

CAUTIONS / CONTRAINDICATIONS

- Acrid and slightly warm, *Fang Feng* may consume qi, yin and body fluids. Therefore, it is contraindicated for patients who have yin-deficient fire, muscle cramps and spasms because of blood deficiency, or who have conditions that do not include the presence of wind, cold, or dampness.
- Since *Fang Feng* is ascending in nature, it should not be used in patients with headaches or dizziness due to Liver yang or Liver wind rising.

CHEMICAL COMPOSITION

Essential oil 0.3-0.6%, saccharides (saposhnikovan A, B, C), imperatorin, phellopterin, hamaudol, 3-o-angeloylhamaudol, ledebouriellol, sec-o-glycosylhamaudol, 5-o-methylvisamminol, cimifugin, prim-o-glycosylcimifugin, anomalin, xanthotoxin, scopoletin, falcarindiol.[1]

PHARMACOLOGICAL EFFECTS

- **Antipyretic:** Decoction of *Fang Feng* at 2 g/kg has a mild antipyretic effect in subjects with artificially-induced fever. The peak effect was observed within 1 to 2 hours after ingestion.[2]
- **Antibiotic:** *Fang Feng* has been shown to have antibacterial effect against *Shigella* spp., *Pseudomonas aeruginosa,* and *Staphylococcus aureus. Fang Feng* was also shown to exert antiviral action against influenza viruses.[3]

CLINICAL STUDIES AND RESEARCH

- **Antidote for arsenic poisoning:** In one study, 278 patients were treated for arsenic poisoning with an herbal decoction consisting of *Fang Feng* 12g, *Lu Dou* (Semen Phaseoli Radiati) 9g, *Gan Cao* (Radix Glycyrrhizae) 3g, and sugar 9g. The herbal decoction was given twice daily for 14 days per course of treatment, for a total of 2 courses. At the end of the treatment, 155 (55.76%) patients reported significant improvement in subjective signs and symptoms with normal levels of arsenic found through urinalysis.[4]
- **Chronic low back pain:** In one report, 336 patients were treated for chronic low back pain using an injected herbal formulation consisting of *Fang Feng, Niu Xi* (Radix Cyathulae seu Achyranthis), and *Gui Zhi* (Ramulus Cinnamomi). The treatment protocol was to inject 0.5 to 1.0 ml of the solution into tender points in the lower back once daily for 5 to 7 days. Out of 336 patients, the study reported an overall effective rate of 96% with 40% showing marked improvement.[5]

TOXICOLOGY

The LD_{50} for oral ingestion of *Fang Feng* in mice is 213.8 g/kg.[6]

AUTHORS' COMMENTS

Saposhnikovia divaricata is the standard source of *Fang Feng.*[7] *Ledebouriella divaricata* is considered to be the substitute.

Fang Feng can be used to detoxify the body from many substances, such as heavy metal (arsenic) and overdose of herbs such as *Fu Zi* (Radix Aconiti Lateralis Praeparata).

Qiang Huo (Rhizoma et Radix Notopterygii)

羌活

Pinyin Name: *Qiang Huo*
Alternate Chinese Names: *Chuan Qiang Huo*, *Xi Qiang Huo*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: notopterygium, incised notopterygium rhizome or root, forbes notopterygium rhizome or root
Botanical Name: *Notopterygium incisum* Ting. (*Qiang Huo*); *Notopterygium forbesii* Boiss. (*Quan Ye Qiang Huo*); *Notopterygium franchetii* Boiss. (*Chuan Qiang Huo*)
Pharmaceutical Name: Rhizoma et Radix Notopterygii
Properties: acrid, bitter, warm
Channels Entered: Urinary Bladder, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Dispels Cold

Pain due to wind-cold: Ascending and dispersing in nature, *Qiang Huo* (Rhizoma et Radix Notopterygii) strongly functions to release the exterior by dispelling cold and dampness in the channels at the superficial level. It is best for occipital headache or pain associated with feelings of heaviness, sleepiness or the lack of desire to move, all of which may be caused by dampness. It is often used as a channel guiding herb to the *taiyang* and *du* (governing) channels, where it exerts its best influence to relieve pain.

- Exterior wind-cold syndrome with aversion to cold, fever, headache and muscle aches: use *Qiang Huo* with *Bai Zhi* (Radix Angelicae Dahuricae), *Fang Feng* (Radix Saposhnikoviae), *Xi Xin* (Herba Asari) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). **Exemplar Formula:** *Jiu Wei Qiang Huo Tang* (Nine-Herb Decoction with Notopterygium).
- Occipital headache from wind-cold, without perspiration: use this herb with *Jing Jie* (Herba Schizonepetae) and *Fang Feng* (Radix Saposhnikoviae).
- Heavy-headed sensations: combine it with *Cang Zhu* (Rhizoma Atractylodis).
- Red eyes from wind-heat attacking the head: use *Qiang Huo* with *Long Dan Cao* (Radix Gentianae), *Huang Lian* (Rhizoma Coptidis), *Chan Tui* (Periostracum Cicadae) and *Bai Ji Li* (Fructus Tribuli).

2. Eliminates Wind, Cold and Dampness to Relieve Pain

***Bi zheng* (painful obstruction syndrome) due to wind, cold and dampness:** Wind, cold and dampness are three external factors that commonly attack the muscles and joints, leading to arthritis, which is also known as *bi zheng*. The exterior pathogens obstruct the normal circulation of qi and blood, leading to pain and spasms of the affected area. *Qiang Huo* is most effective to eliminate

Qiang Huo (Rhizoma et Radix Notopterygii)

wind, cold and dampness from the upper body and is commonly used to treat conditions such as occipital headache, neck and shoulder muscle aches and pains, and joint pain in the upper body.

- Muscle aches and joint pain caused by wind, cold and dampness: combine *Qiang Huo* with *Fang Feng* (Radix Saposhnikoviae), *Jiang Huang* (Rhizoma Curcumae Longae), *Dang Gui* (Radicis Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubrae) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Juan Bi Tang* (Remove Painful Obstruction Decoction).
- Arthritis of the upper body or limbs: use this herb with *Jiang Huang* (Rhizoma Curcumae Longae) and *Gui Zhi* (Ramulus Cinnamomi).
- Wind-damp headache: add it to *Fang Feng* (Radix Saposhnikoviae), *Gao Ben* (Rhizoma Ligustici), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) to dispel wind and relieve pain. **Exemplar Formula:** *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness).
- General arthritis: use it with *Du Huo* (Radix Angelicae Pubescentis), *Gui Zhi* (Ramulus Cinnamomi), *Chi Shao* (Radix Paeoniae Rubrae), *Hong Hua* (Flos Carthami) and *Wei Ling Xian* (Radix Clematidis).

DOSAGE

3 to 10 grams. Maximum dosage of *Qiang Huo* is 30 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Qiang Huo* is contraindicated for patients having febrile disorders, yin deficiency, or muscle aches and pain because of blood deficiency.
- It is also contraindicated for patients with *bi zheng* (painful obstruction syndrome) who have red tongues with little or no tongue coating.

OVERDOSAGE

Overdose of *Qiang Huo* may injure the Stomach and cause nausea and vomiting. This may be alleviated by decreasing the dosage or by taking it with herbs that harmonize the Stomach, such as *Da Zao* (Fructus Jujubae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

CHEMICAL COMPOSITION

Essential oil 0.16-2.70% (α-pinene, β-pinene, limonene, α-phellandrene), coumarins (nodakenin, notopterol, 6-O-transferuloynodakenin, isoimperatorin, cnidilin, nodakenetin, bergaptin, bergapten, bergaptol, demethylfuropinnarin, phellopterin, osthenol, notoptol, anhydronotoptol, karatavicin, marmesin, imperatorin, columbianetin), p-hydroxyphenethyl anisate, ferulic acid, phenethyl ferulate.[1,2]

PHARMACOLOGICAL EFFECTS

- **Antipyretic**: Essential oil of *Qiang Huo* administered via intraperitoneal injection and oral ingestion has been shown to lower body temperature in rats.[3]
- **Analgesic**: Essential oil of *Qiang Huo* administered via intraperitoneal injection for three days showed marked usefulness to relieve muscle aches and pain in mice.[4]
- **Cardiovascular**: The essential oil of *Qiang Huo* has been shown to increase blood circulation to the coronary artery in mice. *Qiang Huo* has also demonstrated good effects in treating arrhythmia in mice, especially if the arrhythmia is associated with overdose of aconitine.[5,6]

CLINICAL STUDIES AND RESEARCH

- **Common colds or influenza due to wind-cold**: In one report, 149 patients with exterior wind-cold syndrome were treated with *Jiu Wei Qiang Huo Tang* (Nine-Herb Decoction with Notopterygium). The study reported a 93.33% effective rate.[7]

TOXICOLOGY

No fatalities were observed in mice following either oral ingestion of water extract of *Qiang Huo* at 12 g/kg for 72 hours, or essential oil of *Qiang Huo* at 0.75 g/kg.[8] The LD_{50} in mice for essential oil of *Qiang Huo* via oral ingestion is 2.83 g/kg.[9]

AUTHORS' COMMENTS

Optimal treatment of headache requires use of channel-guiding herbs to deliver the therapeutic effect of the herbs to the affected area. The following is a list of the commonly used channel-guiding herbs:

- *Taiyang* channels: *Qiang Huo* (Rhizoma et Radix Notopterygii)
- *Shaoyang* channels: *Chai Hu* (Radix Bupleuri)
- *Yangming* channels: *Bai Zhi* (Radix Angelicae Dahuricae)
- *Taiyin* channels: *Cang Zhu* (Rhizoma Atractylodis)
- *Shaoyin* channels: *Xi Xin* (Herba Asari)
- *Jueyin* channels: *Wu Zhu Yu* (Fructus Evodiae)

Qiang Huo (Rhizoma et Radix Notopterygii), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Bai Zhi* (Radix Angelicae Dahuricae), *Chai Hu* (Radix Bupleuri) and *Gao Ben* (Rhizoma Ligustici) all treat headaches. According to Dr. Li Shou-Shan, the differences between these herbs are as follows:

- *Qiang Huo* is more specific to occipital headaches.
- *Chuan Xiong* is most effective for headaches related to menstruation.
- *Bai Zhi* focuses on frontal headaches.
- *Chai Hu* treats temporal headaches.
- *Gao Ben* is best for vertex headaches.

Qiang Huo (Rhizoma et Radix Notopterygii)

Gao Ben (Rhizoma Ligustici)

藁本

Pinyin Name: *Gao Ben*
Alternate Chinese Names: *Gao Ban*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ligusticum, chinese ligusticum rhizome, jehol ligusticum rhizome, Chinese lovage root
Botanical Name: *Ligusticum sinense* Oliv. (*Gao Ben*); *Ligusticum jeholense* Nakai et Kitag. (*Liaoning Gao Ben*)
Pharmaceutical Name: Rhizoma Ligustici
Properties: acrid, warm
Channels Entered: Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Dispels Cold

Headache due to wind-cold: Acrid and warm, *Gao Ben* (Rhizoma Ligustici) releases the exterior and dispels wind-cold. It is an essential herb in treating pain caused by wind or cold and is often used as a channel-guiding herb to lead the effects of other herbs to the head.

- Exterior wind-cold syndrome with aversion to cold, fever, headache, muscle aches and pain: use this herb with *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Cang Zhu* (Rhizoma Atractylodis) and *Chen Pi* (Pericarpium Citri Reticulatae).
- Exterior wind-cold syndrome with dampness: add to *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Fang Feng* (Radix Saposhnikoviae).

Vertex headache or lower back pain: *Gao Ben* enters the *du* (governing) channel. Thus, it can be used to treat pain at both ends of the *du* channel caused by wind-cold invasion.

2. Dispels Wind, Cold, and Damp and Relieves Pain

***Bi zheng* (painful obstruction syndrome):** Wind, cold and dampness are three exterior factors that commonly attack the muscles and joints, leading to *bi zheng*. Wind, cold and dampness obstruct the normal circulation of qi and blood, causing pain in the affected area. Warm and acrid, *Gao Ben* opens the channels and disperses stagnation. This herb is most effective in treating headaches caused by wind-cold.

- *Bi zheng* caused by wind, cold and dampness: add *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), and *Wei Ling Xian* (Radix Clematidis).
- Headache due to cold and dampness: use this herb with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Xi Xin* (Herba Asari).
- Frontal and migraine headaches: combine it with *Xi Xin* (Herba Asari), *Shi Gao* (Gypsum Fibrosum) and *Bai Zhi* (Radix Angelicae Dahuricae).

Gao Ben (Rhizoma Ligustici)

- Abdominal pain due to cold and dampness: use it with *Cang Zhu* (Rhizoma Atractylodis).

DOSAGE

3 to 10 grams. The maximum dosage of *Gao Ben* is 20 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Gao Ben* is contraindicated in patients with heat symptoms, or headache caused by blood deficiency or Liver yang rising.
- *Gao Ben* is acrid and warm and may damage the yin. Yin-deficient patients should use this herb with caution.
- Long-term use of *Gao Ben* is not recommended.

CHEMICAL COMPOSITION

Essential oils 0.38-0.65% (neo-cnidilide, β-phellandrene, trans-ocimene, 3-butylphalide), bergapten, scopoletin, vanillin.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: Essential oil of *Gao Ben* has an inhibitory effect against influenza viruses and many common dermatomycoses.[2,3]
- **Antipyretic and anti-inflammatory effects:** Essential oil of *Gao Ben* reduced body temperature and inflammation in mice.[4]
- **Effect on smooth muscle:** Essential oil of *Gao Ben* has an inhibitory effect on smooth muscle of the uterus and intestines.[5]

CLINICAL STUDIES AND RESEARCH

- **Headache**: In one study, 97 patients with headaches from various causes were treated with an herbal formula with up to 93.8% effectiveness. The herbal formula was given in decoction, and contained *Gao Ben* 15g, *Dang Gui* (Radicis Angelicae Sinensis) 15g, *Tao Ren* (Semen Persicae) 15g, *Hong Hua* (Flos Carthami) 15g, *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) 15g, *Huang Qi* (Radix Astragali) 15g, *Sheng Di Huang* (Radix Rehmanniae) 15g, *Dan Shen* (Radix Salviae Miltiorrhizae) 25g, *Long Gu* (Os Draconis) 25g, *Mu Li* (Concha Ostreae) 25g, *Xi Xin* (Herba Asari) 5g, *Gan Cao* (Radix Glycyrrhizae) 10g, and *Wu Gong* (Scolopendra) 3 pieces.[6]

TOXICOLOGY

The LD_{50} in mice for essential oil of *Gao Ben* given via oral ingestion was 70.17 g/kg (based on the use of dried herb).[7]

AUTHORS' COMMENTS

Gao Ben (Rhizoma Ligustici), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Bai Zhi* (Radix Angelicae Dahuricae), and *Chai Hu* (Radix Bupleuri) all treat headaches. According to Dr. Li Shou-Shan, the differences between these herbs are as follows:

- *Gao Ben* is best for vertex headaches.
- *Chuan Xiong* is most effective for headaches related to menstruation.
- *Qiang Huo* is more specific to occipital headaches.
- *Bai Zhi* focuses on frontal headaches.
- *Chai Hu* treats temporal headaches.

Ji Xiang Teng (Caulis Paederiae)

雞香藤　鸡香藤

Pinyin Name: *Ji Xiang Teng*
Alternate Chinese Names: *Ji Shi Teng, Wu De Teng, Chou Xing Teng, Niu Pi Dong*
English Name: paederia
Botanical Name: *Paederia scandens* (Lour.) Merr.
Pharmaceutical Name: Caulis Paederiae
Properties: sweet, neutral to slightly warm
Channels Entered: Lung, Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Cold

Body aches associated with an exterior condition: The chief characteristic of *Ji Xiang Teng* (Caulis Paederiae) is that it helps relieve body aches and joint pain caused by wind-cold invasion. This is the herb of choice for pain associated with a common cold. It can be used by itself to relieve pain, or combined with other warm diaphoretic herbs. Other clinical manifestations include clear nasal discharge, sputum and aversion to cold.

- Joint pain and body aches of the entire body from wind-cold: use *Ji Xiang Teng* with *Fang Feng* (Radix Saposhnikoviae), *Hong Gu She* (Radix Kadsura Japonicae) and *Dao Di Wu Gong* (Rhizoma Heliminthostachytis).
- Cough with profuse sputum: combine it with *Wu Tian* (Radix et Folium Viticis Quinatae) and *Fu Rong* (Radix Hibisci).

2. Dispels Cold and Dampness

***Bi zheng* (painful obstruction syndrome) caused by cold and dampness:** *Ji Xiang Teng* relieves pain by dispelling wind, cold and dampness. It treats *bi zheng* caused by cold and dampness, with pain in a fixed location, that worsens with exposure to cold.

- *Bi zheng:* use this herb with *Yi Tiao Gen* (Radix Moghaniae), *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae) and *Du Huo* (Radix Angelicae Pubescentis).

3. Eliminates Toxins

- Neurodermatitis: apply *Ji Xiang Teng* topically.
- Organophosphorus pesticide poisoning: combine this herb with *Lu Dou* (Semen Phaseoli Radiati). After ingestion of the herbs, vomiting or diarrhea may occur as signs of detoxification in progress.

DOSAGE

5 to 30 grams in decoction.

Cong Bai (Bulbus Allii Fistulosi)

葱白 蔥白

Pinyin Name: *Cong Bai*
Literal Name: "white allium"
Alternate Chinese Names: *Cong Jing Bai, Cong Bai Tou*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: allium, scallion, green onion
Botanical Name: *Allium fistulosum* L.
Pharmaceutical Name: Bulbus Allii Fistulosi
Properties: acrid, warm
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Induces Perspiration

Mild cases of wind-cold invasion: Acrid and warm, *Cong Bai* (Bulbus Allii Fistulosi) releases the exterior and induces perspiration. Its diaphoretic function, however, is rather weak, thus *Cong Bai* should only be used in treating early or mild cases of wind-cold syndrome.

- Wind-cold syndrome: use *Cong Bai* with *Dan Dou Chi* (Semen Sojae Praeparatum) to dispel wind-cold.
- Wind-cold syndrome without perspiration: combine it with *Ma Huang* (Herba Ephedrae) and *Ge Gen* (Radix Puerariae).
- Presence of exterior wind-cold with interior heat: combine it with *Zhi Zi* (Fructus Gardeniae), *Lian Qiao* (Fructus Forsythiae), *Bo He* (Herba Menthae) and *Dan Dou Chi* (Semen Sojae Praeparatum).

2. Disperses Cold and Unblocks Yang

Abdominal pain: *Cong Bai* treats abdominal pain characterized by cold stagnation in the interior, leading to inability of yang energy to circulate and warm the interior of the body. This inability of yang to enter and warm the interior subsequently leads to abdominal pain, clear and watery diarrhea, extreme cold of the body and extremities, and a weak and forceless pulse. Warm in nature, *Cong Bai* disperses cold and warms yang.

- Interior cold stagnation blocking the yang: use it with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis).
- Interior cold stagnation with abdominal coldness, pain and dysuria: place *Cong Bai* directly on the navel to disperse cold and to warm yang.

Dysuria and constipation: *Cong Bai* treats these conditions by unblocking yang qi.

- Dysuria: *Cong Bai* should be stir-fried and applied while warm as a topical on the lower abdomen.
- Constipation: use it with *E Jiao* (Colla Corii Asini).

3. Eliminates Toxins and Disperses Clumps

Sores and abscesses: Topical application of *Cong Bai* relieves toxicity and disperses clumps. Use the herb alone as a poultice.

4. Kills Parasites

Abdominal pain caused by intestinal parasites: The juice of *Cong Bai* kills intestinal parasites and relieves pain.

DOSAGE

3 to 10 grams for the fresh herb (or 2 to 5 scallions, using the white part and the root). The maximum dosage of fresh *Cong Bai* is 100 grams. For topical application, *Cong Bai* can be crushed into paste, made into a poultice or stir-fried.

CAUTIONS / CONTRAINDICATIONS

- *Cong Bai* should be used with caution in patients with yin deficiency and yang excess, and in patients with spontaneous perspiration arising from qi deficiency.
- *Cong Bai* is incompatible with honey (when used internally) and with *Chang Shan* (Radix Dichroae).

CHEMICAL COMPOSITION

Essential oils (allicin, disulfides, polysulfides, dipropyldisulfide, dipropyltrisulfide, allylpropyl disulfide, s-methylpropane trisulfonate), thiaheterocycles, s-allylmercaptocysteine, s-methylmercaptocysteine, s-propenyl-L-cysteine sulfoxide, cycloalliin.[1]

Cong Bai (Bulbus Allii Fistulosi)

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Cong Bai* has an inhibitory influence *in vitro* against *Corynebacterium diphtheriae, Staphylococcus* spp., *Streptococcus* spp., and *Shigella* spp., and dermatomyces.[2]
- **Others:** It has antipyretic, diuretic, and expectorant effects.[3]

CLINICAL STUDIES AND RESEARCH

- **Common cold:** Topical herbal paste (*Cong Bai, Sheng Jiang* (Rhizoma Zingiberis Recens) and salt) was applied to the center of the chest, back, soles, palms, popliteal fossa, and cubital fossa for 1 to 2 days in 107 patients, resulting in marked improvement.[4]
- **Acute abdominal pain caused by intestinal parasites:** According to one report, 25 children with acute abdominal pain caused by intestinal parasites were treated with an herbal solution (30 grams each of *Cong Bai* juice and sesame oil), taken on an empty stomach. Most patients reported pain relief after 1 to 2 doses.[5]
- **Intestinal obstruction caused by parasites:** In one report, parasitic intestinal obstruction in 24 patients was treated with an herbal solution (equal portions of *Cong Bai* and nut oil), with good results.[6]
- **Abscesses and inflammation of the skin:** An herbal paste (2 parts *Cong Bai* and 1 part honey) was applied topically, treating 100 patients with skin abscesses and inflammation with satisfactory results. The herbal paste was changed and re-applied once daily or every other day.[7]
- **Urticaria:** According to one study, 100 patients with urticaria were treated with Chinese herbs. Urticaria from wind-cold was treated with 15 bulbs of *Cong Bai*, 10 grams of *Jing Jie* (Herba Schizonepetae) and 3 grams of *Gan Cao* (Radix Glycyrrhizae). Urticaria from wind-heat was treated with 15 bulbs of *Cong Bai*, 15 grams of *Da Qing Ye* (Folium Isatidis), and 15 grams of *Lian Qiao* (Fructus Forsythiae). The herbal decoctions were given once daily. In addition, 20 bulbs of *Cong Bai* were cooked to prepare a topical solution that was applied to the affected area once daily. All 100 patients showed marked improvement within 1 to 8 days.[8]

Bai Zhi (Radix Angelicae Dahuricae)

白芷 白芷

Pinyin Name: *Bai Zhi*
Literal Name: "white rootlet"
Alternate Chinese Names: *Xiang Bai Zhi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: angelica, dahurican angelica root, Taiwan angelica root
Botanical Name: *Angelica dahurica* (Fisch ex Hoffm.) Benth. et Hook. f. (*Bai Zhi*); *Angelica dahurica* (Fisch. ex Hoffm.) Benth. et Hook. var. *formosana* (Boiss.) Shan et Yuan (*Hang Bai Zhi*)
Pharmaceutical Name: Radix Angelicae Dahuricae
Properties: acrid, warm
Channels Entered: Lung, Stomach, Spleen

Bai Zhi (Radix Angelicae Dahuricae)

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior, Dispels Wind and Opens Orifices

Wind-cold: Acrid and warm, *Bai Zhi* (Radix Angelicae Dahuricae) releases the exterior and dispels wind. It opens orifices to relieve nasal obstruction.

- Wind-cold with headache, muscle aches, nasal obstruction and clear nasal discharge: use *Bai Zhi* with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Dan Dou Chi* (Semen Sojae Praeparatum).
- Sinusitis and rhinitis with turbid white nasal discharge or nasal obstruction due to cold: use it with *Cang Er Zi* (Fructus Xanthii) and *Xin Yi Hua* (Flos Magnoliae) to dispel wind and open nasal passages. **Exemplar Formula:** *Cang Er San* (Xanthium Powder).
- Sinusitis and rhinitis with turbid yellow nasal discharge or nasal obstruction caused by heat: combine it with *Shi Gao* (Gypsum Fibrosum), *Huang Qin* (Radix Scutellariae) and *Pu Gong Ying* (Herba Taraxaci).

2. Dispels Cold and Relieves Pain

Pain along the Stomach channel: Acrid and warm, *Bai Zhi* releases the exterior and dispels wind and dampness from the Lung, Stomach and Large Intestine channels. It is most effective in treating disorders along the Stomach channel and is commonly used for frontal headaches, pain around the eyes, toothache, nasal obstruction and nasal discharge.

- Headache and nasal obstruction from wind-cold: use *Bai Zhi* with *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Fang Feng* (Radix Saposhnikoviae) to dispel wind-cold. **Exemplar Formula:** *Jiu Wei Qiang Huo Tang* (Nine-Herb Decoction with Notopterygium).
- *Yangming* channel headache with pain around the eyes, frontal headache, and toothache: use *Bai Zhi* alone, or with *Fang Feng* (Radix Saposhnikoviae) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). **Exemplar Formula:** *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea).
- Headache with excessive cold: combine this herb with *Xi Xin* (Herba Asari) and *Wu Tou* (Radix Aconiti) to dispel cold and relieve pain.
- Headache with excessive heat: combine it with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Shi Gao* (Gypsum Fibrosum), *Jing Jie* (Herba Schizonepetae) and *Fang Feng* (Radix Saposhnikoviae).
- Toothache: use *Bai Zhi* orally or topically to relieve pain.
- Muscle aches and pain caused by wind and dampness: add *Qiang Huo* (Rhizoma et Radix Notopterygii), *Gui Zhi* (Ramulus Cinnamomi), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). **Exemplar Formula:** *Shang Zhong Xia Tong Yong Tong Feng Wan* (Upper Middle and Lower General-Use Pills for Wind-Pain).

3. Reduces Swelling, Expels Pus and Eliminates Toxins

Sores, carbuncles or furuncles with pus and swelling: *Bai Zhi* eliminates the accumulation of wind and dampness that commonly causes muscle aches and itching. But accumulation of dampness in the skin can also result in sores and carbuncles. This herb helps to reduce swelling, discharge pus and regenerate tissue.

- Rashes and itching caused by wind and dampness: combine *Bai Zhi* with *Qin Jiao* (Radix Gentianae Macrophyllae), *Jing Jie* (Herba Schizonepetae), and *Xi Xian Cao* (Herba Siegesbeckiae).
- Dermatological disorders with abscesses and swelling: use it with *Jin Yin Hua* (Flos Lonicerae), *Chuan Shan Jia* (Squama Manis), and *Tian Hua Fen* (Radix Trichosanthis).
- Formation of pus without ulceration: use it with *Niu Bang Zi* (Fructus Arctii), *Jin Yin Hua* (Flos Lonicerae), *Chuan Shan Jia* (Squama Manis) and *Zao Jiao Ci* (Spina Gleditsiae).
- Formation of pus with ulceration or prolonged delay in healing: combine it with *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), *Jin Yin Hua* (Flos Lonicerae) and *Gan Cao* (Radix Glycyrrhizae).
- Acute appendicitis or intestinal abscess: combine it with *Mu Dan Pi* (Cortex Moutan), *Dong Gua Zi* (Semen Benincasae), *Bai Jiang Cao* (Herba cum Radice Patriniae), *Hong Teng* (Caulis Sargentodoxae) and *Da Huang* (Radix et Rhizoma Rhei).
- Breast abscesses: use *Bai Zhi* with *Chi Shao* (Radix Paeoniae Rubrae), *Hong Hua* (Flos Carthami), *Pu Gong Ying* (Herba Taraxaci), *Zi Hua Di Ding* (Herba Violae), *Ye Ju Hua* (Flos Chrysanthemi Indici) and *Jin Yin Hua* (Flos Lonicerae).

4. Dispels Dampness and Treats Leukorrhea and Diarrhea

Leukorrhea: *Bai Zhi* dispels accumulated damp in the lower *jiao* that causes leukorrhea.

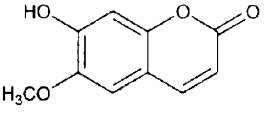
- White, turbid leukorrhea due to cold and dampness: use *Bai Zhi* with *Hai Piao Xiao* (Endoconcha Sepiae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Ji Guan Hua* (Flos Celosiae Cristatae).
- Yellow, turbid leukorrhea caused by heat and dampness: combine it with *Huang Bai* (Cortex Phellodendri) and *Che Qian Zi* (Semen Plantaginis).

Diarrhea: *Bai Zhi* dispels accumulation of dampness in the lower *jiao* that causes diarrhea.

- Chronic diarrhea due to Spleen deficiency and damp accumulation: combine this herb with *Rou Dou Kou* (Semen Myristicae), *He Zi* (Fructus Chebulae), *Fu Ling* (Poria) and *Qian Shi* (Semen Euryales).

Bai Zhi (Radix Angelicae Dahuricae)

DOSAGE



3 to 10 grams. The maximum dosage of *Bai Zhi* is 30 grams. It can be taken internally, or applied topically in powdered form. When treating dermatological disorders, the dosage should be decreased as the sores heal.

CAUTIONS / CONTRAINDICATIONS

- Acrid and warm, *Bai Zhi* may damage yin and should be used with caution for patients who have yin-deficient fire, Liver yang rising, or Liver or Kidney yin deficiency.
- This herb is contraindicated for patients with febrile disorders.
- Overdose of *Bai Zhi* may cause nausea, vomiting, numbness of the limbs, epilepsy and convulsions.

CHEMICAL COMPOSITION

Coumarins (oxypeucedanin, imperatorin, isoimperatorin), byak-angelicin, byak-angelicol, anhydrobyakangelicin, neobyakangelicol, oxypeucedanin hydrate, phellopterin, xanthotoxin, scopoletin, byakangelicin hydrate, xanthotoxol, isooxypeucedanin, cnidilin, pabulenol, essential oil 0.24% (methylcyclodecanc, l-tetradecene).[1,2]

Scopoletin

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *Bai Zhi* has an inhibitory effect against *E. coli*, *Bacillus dysenteriae*, *Bacillus proteus*, *Salmonella typhi*, *Pseudomonas aeruginosa*, *Vibrio cholerae*, *Mycobacterium tuberculosis hominis*, and *Shigella* spp.[3]
- **Anti-inflammatory:** Decoctions of *Bai Zhi* have demonstrated marked anti-inflammatory effects in mice. Administration of 4g/kg of *Bai Zhi* was effective in treating otitis media in mice.[4]
- **Analgesic and antipyretic:** Decoctions of *Bai Zhi* at a dosage of 15 g/kg have demonstrated significant analgesic and antipyretic actions in mice. The dosage of 8 g/kg was slightly less effective than the dosage of 15 g/kg.[5]
- **Antispasmodic:** Various components of *Bai Zhi* have demonstrated marked muscle-relaxant qualities to treat muscle spasms and cramps. Scopoletin showed marked antispasmodic effect on the uterus in mice with ED_{50} of 0.09 mg/kg.[6,7]
- **Other:** In laboratory animals, *Bai Zhi* affects the cardiovascular system by lowering heart rate and decreasing blood pressure, excites the respiratory system to increase the depth of breathing, and also stimulates the nervous system. In addition, it has a mild hemostatic effect.[8]

CLINICAL STUDIES AND RESEARCH

- **Headache:** According to one report, patients with occipital headaches were treated twice daily with 30 grams of *Bai Zhi* in decoction. Out of 73 patients, 69 showed signifi-cant improvement, 3 showed slight improvement, and 1 showed no response.[9]

  In another study, a 5% solution of *Bai Zhi* was given to 62 patients with headaches. One course of treatment ranged from 10 to 15 days, and patients received 1 to 2 courses of treatment. Of 62 patients, 54 showed significant improvement.[10]
- **Vitiligo:** Topical preparations of *Bai Zhi* were used to treat 321 patients with vitiligo. After topical application, the affected area was exposed to sunlight for periods of 5, 10 or 30 minutes. Of 321 patients, 61.5% showed significant improvement.[11]
- **Psoriasis:** In one study, 159 patients with psoriasis were treated with *Bai Zhi* in various preparations. The dosage forms included capsules for oral administration, and herbal decoction. All patients received treatment daily or every other day. The overall effective rate was 94.4%.[12]

HERB-DRUG INTERACTION

- **Liver metabolism:** Administration of *Bai Zhi* extract in rats is associated with an inhibitory effect on liver microsomal cytochrome P-450. Because of inhibited metabolism, concurrent use of the herb may lead to increased plasma concentration of other drugs, such as testosterone, tolbutamide, nifedipine, bufuralol and diazepam.[13]

TOXICOLOGY

The LD_{50} for decoction of *Bai Zhi* in mice via oral ingestion is 53.82 g/kg. Possible adverse reactions to *Bai Zhi* include increased blood pressure, slowed heart rate, increased depth of respiration, vomiting, and in severe cases of gross overdose, seizures and convulsions.[14,15,16,17,18]

AUTHORS' COMMENTS

Optimal treatment of headache requires use of channel-guiding herbs to deliver the therapeutic effect of the herbs to the affected area. The following is a list of the commonly used channel-guiding herbs:

- *Taiyang* channels: *Qiang Huo* (Rhizoma et Radix Notopterygii)
- *Shaoyang* channels: *Chai Hu* (Radix Bupleuri)
- *Yangming* channels: *Bai Zhi* (Radix Angelicae Dahuricae)
- *Taiyin* channels: *Cang Zhu* (Rhizoma Atractylodis)
- *Shaoyin* channels: *Xi Xin* (Herba Asari)
- *Jueyin* channels: *Wu Zhu Yu* (Fructus Evodiae)

Bai Zhi (Radix Angelicae Dahuricae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Qiang Huo* (Rhizoma

Bai Zhi (Radix Angelicae Dahuricae)

et Radix Notopterygii), *Chai Hu* (Radix Bupleuri) and *Gao Ben* (Rhizoma Ligustici) all treat headaches. According to Dr. Li Shou-Shan, the differences between these herbs are as follows:

- *Bai Zhi* focuses on frontal headaches.
- *Chuan Xiong* is most effective for menstrual headaches.
- *Qiang Huo* is more specific to occipital headaches.
- *Chai Hu* treats temporal headaches.
- *Gao Ben* is best for vertex headaches.

Bai Zhi is traditionally used as a component of cosmetic foundations. It whitens and softens the skin, and invigorates blood circulation.

Cang Er Zi (Fructus Xanthii)

蒼耳子 苍耳子

Pinyin Name: *Cang Er Zi*
Literal Name: "deep green ear seeds"
Alternate Chinese Names: *Cang Zi*, *Cang Er Ji Li*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: xanthium fruit, Siberian cocklebur fruit
Botanical Name: *Xanthium sibiricum* Patr. et Widd.; *Xanthium strumarium* L.
Pharmaceutical Name: Fructus Xanthii
Properties: bitter, acrid, warm
Channels Entered: Lung, Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Opens Nasal Passages and Relieves Pain

Sinus disorders with headache: Acrid in nature, *Cang Er Zi* (Fructus Xanthii) is commonly used for sinusitis, rhinitis, sinus headaches, nasal blockage, turbid nasal discharge or loss of smell.

- Sinusitis or rhinitis with nasal obstruction, loss of smell, and nasal discharge: combine this herb with *Bai Zhi* (Radix Angelicae Dahuricae) and *Xin Yi Hua* (Flos Magnoliae). **Exemplar Formula:** *Cang Er San* (Xanthium Powder).

Cang Er Zi (Fructus Xanthii)

- Sinus headache caused by wind-cold: use it with *Fang Feng* (Radix Saposhnikoviae), *Bai Zhi* (Radix Angelicae Dahuricae) and *Gao Ben* (Rhizoma Ligustici).

2. Dispels Wind and Dampness

***Bi zheng* (painful obstruction syndrome):** *Cang Er Zi* dispels wind and dampness from the muscles to relieve pain. Its clinical applications include *bi zheng* caused by wind and dampness, as well as muscle spasms and cramps.

- *Bi zheng*: use *Cang Er Zi* individually, or with *Wei Ling Xian* (Radix Clematidis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Cang Zhu* (Rhizoma Atractylodis).

Dermatological disorders: *Cang Er Zi* also dispels wind and dampness from the skin to relieve itching and rash.

- Itching and rash: use it with *Bai Ji Li* (Fructus Tribuli), *Di Fu Zi* (Fructus Kochiae), *Chan Tui* (Periostracum Cicadae), *Bai Xian Pi* (Cortex Dictamni) and *Jing Jie* (Herba Schizonepetae).

DOSAGE

3 to 10 grams. *Cang Er Zi* should be dry-fried to minimize toxicity and maximize extraction of active components. The general guideline is to dry-fry the seeds until the outside 'spikes' are blunted and loose their sharpness. The fresh, unprocessed herb is generally not used due to its significantly higher risk of toxicity.

CAUTIONS / CONTRAINDICATIONS

Due to its drying nature, *Cang Er Zi* consumes qi and blood, and should be used with caution in patients having these deficiencies. It should also be used with caution during pregnancy.

OVERDOSAGE

Overdose of *Cang Er Zi* may lead to nausea, vomiting, abdominal pain, diarrhea or constipation, headache, dizziness, lethargy, and poor appetite. Gross overdose of *Cang Er Zi* is divided into early or late stage. Early stage overdose is characterized by jaundice and hypochondriac pain. The late stage is characterized by jaundice, severe hypochondriac pain, tonic-clonic convulsions, and possibly death. In adults, adverse reactions may occur following ingestion of 30 pieces of the fresh, unprocessed seeds. Hepatitis and nephritis may occur following ingestion of 50 seeds, and death following 100 seeds.[1] [Note: Fresh, unprocessed seeds are significantly more toxic than dry-fried seeds.]

The entire xanthium plant is toxic. The fruit is more toxic than the leaves, and fresh leaves are more toxic than the dried ones. The toxic components of the herb are soluble in water. Toxic signs and symptoms include liver damage, unconsciousness, shock, and respiratory and renal suppression.

TREATMENT OF OVERDOSAGE

Overdose of *Cang Er Zi* may be treated by the following general methods:

- An herbal decoction using *Gan Cao* (Radix Glycyrrhizae) 30g and *Lu Dou* (Semen Phaseoli Radiati) 120g.
- An herbal decoction using *Ban Lan Gen* (Radix Isatidis) 120g.
- An herbal decoction using *Lu Gen* (Rhizoma Phragmitis) 60g, *Lu Dou* (Semen Phaseoli Radiati) 30g, *Jin Yin Hua* (Flos Lonicerae) 15g, *Ge Gen* (Radix Puerariae) 9g, and *Gan Cao* (Radix Glycyrrhizae) 9g.

For gastrointestinal bleeding caused by overdose of *Cang Er Zi*, treat with a decoction containing *Gan Cao* (Radix Glycyrrhizae) 30g, *Yuan Zhi* (Radix Polygalae) 9g, *Sha Shen* (Radix Glehniae seu Adenophorae) 9g, *Xue Yu Tan* (Crinis Carbonisatus) 9g, and *San Qi* (Radix Notoginseng) 1.5g. Take the decoction every 4 hours for 2 to 6 doses.[2]

CHEMICAL COMPOSITION

Xanthostrumarin 1.27%, resin 3.3%, oil 39%, essential oil, alkaloid, vitamin C, carbohydrates.[3]

PHARMACOLOGICAL EFFECTS

- **Antidiabetic:** Intraperitoneal injection of xanthostrumarin at 10 mg/kg may lower plasma glucose levels in rats for up to 2 hours.[4]
- **Antitussive:** Decoction of *Cang Er Zi* has been shown to suppress coughing.[5]

CLINICAL STUDIES AND RESEARCH

- **Chronic sinusitis:** Two-hundred and seven patients with chronic sinusitis were treated by topical application of *Cang Er Zi* with satisfactory results. The topical solution was prepared by crushing 30 to 40 pieces of the herb, cooking it with 30 ml sesame oil, then filtering out the herb. The herbal solution was applied to the nasal cavity via a cotton swab two to three times daily for 2 weeks per course of treatment.[6] In another study, 1,576 patients with chronic sinusitis were treated with 86.9% effective rate using topical application of an herbal formula. The herbal solution was instilled into the nose three to four times daily for 7 to 30 days per course of treatment, for a total of 2 to 3 courses total. The herbal solution was prepared by soaking *Cang Er Zi* 160g and *Xin Yi Hua* (Flos Magnoliae) 16g in 1,000 ml of sesame oil for 24 hours, then cooked and filtered to yield 800 ml of the final solution.[7]
- **Chronic tracheitis:** One report says 275 patients with chronic tracheitis were treated with a preparation of

Cang Er Zi (Fructus Xanthii)

Cang Er Zi with a 97.5% rate of effectiveness. Patients were given the herb three times daily for 10 days for each course of treatment.[8]

- **Pain in the low back and legs:** Trigger point injection of *Cang Er Zi* every other day for 10 days was 89% effective in treating 163 patients with pain in the lower back and legs from various causes.[9]
- **Acute bacterial dysentery:** Decoction of 120 to 150 grams of *Cang Er Zi* given three to four times daily was effective in treating 109 out of 110 patients with acute bacterial dysentery. Most patients responded within 2 to 8 days.[10]
- **Acute localized inflammation:** An herbal paste made from water extract of *Cang Er Zi* and vinegar was used to treat 152 patients with acute localized inflammations. The herbal paste was applied to the affected area for 1 to 2 days before removal and application of a new dose. The study determined that the treatment outcome was satisfactory.[11]

HERB-DRUG INTERACTION

- **Antidiabetics:** Herbs that lower plasma glucose levels, such as *Cang Er Zi*, should be used with caution with insulin, sulfonylureas, and other antidiabetic medications as the combination may have a synergistic effect, leading to hypoglycemia.[12] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (Diabeta/Micronase).]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of *Cang Er Zi* is 0.93 g/kg in mice.[13]

SUPPLEMENT

- 蒼耳根 / 苍耳根 *Cang Er Gen* (Radix Xanthii), the root, is bitter, cool and slightly toxic. It enters the Lung and clears heat, eliminates toxins, and treats common colds caused by wind-heat invasions, as well as reducing scrofulae or other toxic swellings such as tonsillitis. Because *Cang Er Gen* is slightly toxic, it is should be used with caution during pregnancy, and in cases of deficiency. The dose for *Cang Er Gen* is 3 to 12 grams.
- 蒼耳草 / 苍耳草 *Cang Er Cao* (Herba Xanthii), the entire plant, is acrid, bitter, cool, and slightly toxic. Its main functions include: dispelling wind, and clearing heat and toxins. Chief applications include: *bi zheng* (painful obstruction syndrome), spasms and cramps. It can be used for dermatological disorders, yin sores, rashes or pruritus. Because it is toxic, this herb should not be taken at a high dose when taken internally, nor should it be used by deficient patients or taken for a long period of time, as it may drain qi and blood. The recommended dose of *Cang Er Cao* is 6 to 15 grams.

AUTHORS' COMMENTS

Cang Er Zi has two main functions that are equally important: it dispels wind and dampness, and opens nasal passages. Thus, this herb is commonly classified as either an exterior-releasing herb or a wind-damp dispelling herb.

Cang Er Zi and *Tian Ma* (Rhizoma Gastrodiae) both treat wind. *Cang Er Zi* dispels external wind, and treats headaches and dizziness. *Tian Ma* extinguishes internal wind, and relieves headaches, dizziness and vertigo.

According to Dr. Gan Zhu-Wang, *Cang Er Zi*, *Bo He* (Herba Menthae), *Bai Zhi* (Radix Angelicae Dahuricae), and *Xin Yi Hua* (Flos Magnoliae) treat acute allergic rhinitis, while *He Zi* (Fructus Chebulae) and *Shi Liu Pi* (Pericarpium Granati) resolve clear white nasal discharge.

Xin Yi Hua (Flos Magnoliae)

辛夷花 辛夷花

Pinyin Name: *Xin Yi Hua*
Literal Name: "lily-flowered magnolia," "pungent magnolia flower"
Alternate Chinese Names: *Xin Yi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: magnolia flower, biond magnolia flower bud, sprenger magnolia flower bud, yulan magnolia flower bud
Botanical Name: *Magnolia biondii* Pamp. (*Qiao Mu Wang Chun Hua*); *Magnolia sprengeri* Pamp. (*Wu Dang Yu Lan*); *Magnolia denudata* Desr. (*Yu Lan*)
Pharmaceutical Name: Flos Magnoliae
Properties: acrid, warm
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Cold

Nasal obstruction due to wind-cold: *Xin Yi Hua* (Flos Magnoliae) has a rather mild function of dispelling exterior wind-cold. It is most effective for opening nasal obstruction and draining nasal discharge caused by wind-cold.

- Nasal obstruction and clear nasal discharge from wind-cold: use *Xin Yi Hua* with *Bai Zhi* (Radix Angelicae Dahuricae) and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Xin Yi San* (Magnolia Flower Powder).
- Wind-cold attacking the Lung and Stomach with continuous, clear, watery nasal discharge: combine it with *Xi Xin* (Herba Asari), *Gan Jiang* (Rhizoma Zingiberis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) to dispel cold.

2. Opens Nasal Orifices

Xin Yi Hua has an excellent dispersing function to open sensory orifices and unblock nasal obstruction.

- Sinusitis and rhinitis with loss of smell: use it with *Cang Er Zi* (Fructus Xanthii). **Exemplar Formula:** *Cang Er San* (Xanthium Powder).
- Sinusitis or rhinitis due to cold: combine it with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), and *Xi Xin* (Herba Asari). **Exemplar Formula:** *Xin Yi San* (Magnolia Flower Powder).
- Chronic sinusitis or rhinitis caused by damp-heat: use this herb with *Shi Gao* (Gypsum Fibrosum) and *Da Huang* (Radix et Rhizoma Rhei). **Exemplar Formula:** *Qing Bi Tang* (Clear the Nose Decoction).
- Sinusitis or rhinitis caused by heat: use it with *Zhi Zi* (Fructus Gardeniae), *Xuan Shen* (Radix Scrophulariae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Chai Hu* (Radix Bupleuri).
- Sinusitis or rhinitis with Lung heat: use it with *Zhi Zi* (Fructus Gardeniae), *Huang Qin* (Radix Scutellariae), *Shi Gao* (Gypsum Fibrosum) and *Sheng Ma* (Rhizoma Cimicifugae). **Exemplar Formula:** *Xin Yi Qing Fei Yin* (Magnolia and Gypsum Fibrosum Combination).

DOSAGE

3 to 10 grams. The maximum dosage of *Xin Yi Hua* is 20 grams. It may be given orally or applied topically. For oral administration, *Xin Yi Hua* should be enclosed in cheesecloth during cooking, as fibers from the flowers may be irritating to the throat. Topical applications use either the powdered form or the essential oil of the herb.

CAUTIONS / CONTRAINDICATIONS

Xin Yi Hua should be used with caution in patients with yin-deficient fire or Liver yang rising.

CHEMICAL COMPOSITION

Essential oils 2.68-5.0% (camphor, 1,8-cineole, β-pinene, sabinene, myrcene), lignans, pinoresinol bimethyl ether, lirioresinol bimethyl ether, magnolin, fargesin, sesamin, eudesmin, d-coclaurine, d-reticuline, yuzirine, rutin.[1]

PHARMACOLOGICAL EFFECTS

- **Effect on nasal mucosa:** Topical application of essential oil of *Xin Yi Hua* has been associated with reduction of mucous secretion, reduction of inflammation, and relief of nasal obstruction.[2]

Xin Yi Hua (Flos Magnoliae)

- **Antihypertensive**: Water and alcohol extracts of *Xin Yi Hua*, given via intramuscular or intraperitoneal injections, are associated with a decrease of blood pressure in anesthetized dogs, cats, rabbits, and rats. Intravenous injection is sometimes associated with stimulation of the respiratory system. In other experiments, *Xin Yi Hua* was found to be effective in cases of primary hypertension, but not necessarily effective in cases of secondary hypertension, such as renal hypertension.[3]
- **Analgesic**: In laboratory experiments, administration of 6.5 g/kg of alcohol extract and 15 g/kg of water extract of *Xin Yi Hua* showed comparable analgesic effect in mice.[4]
- **Uterine stimulant**: *Xin Yi Hua* has a stimulatory effect on the uterus in dogs and rabbits. The onset of action starts 20 to 60 minutes after ingestion, and lasts for 8 to 24 hours.[5]
- **Antibiotic**: Decoction of *Xin Yi Hua* has an inhibitory effect on dermatomycoses, and some species of streptococcus and staphylococcus.[6]

CLINICAL STUDIES AND RESEARCH

- **Sinusitis**: In one study, 46 patients with chronic sinusitis were treated with an herbal formula with marked effectiveness in 35 cases, moderate improvement in 8 cases, and no response in 3 cases. The herbal formula was given in decoction, once daily, for 7 days per course of treatment. The herbal formula contained *Xin Yi Hua* 12g, *Cang Er Zi* (Fructus Xanthii) 12g, *Gao Ben* (Rhizoma Ligustici) 9g, *Sheng Ma* (Rhizoma Cimicifugae) 9g, *Huang Qin* (Radix Scutellariae) 9g, *Fang Feng* (Radix Saposhnikoviae) 9g, *Jing Jie* (Herba Schizonepetae) 9g, *Niu Bang Zi* (Fructus Arctii) 9g, *Chan Tui* (Periostracum Cicadae) 9g, *Lian Qiao* (Fructus Forsythiae) 10g, *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) 10g, and *Bai Zhi* (Radix Angelicae Dahuricae) 15g. Modifications were made if deemed necessary.[7]
- **Sinusitis and rhinitis**: In one study, patients with sinusitis or rhinitis were treated with Chinese herbs once or twice daily. All patients were prescribed 3 grams of *Xin Yi Hua*. Those diagnosed with wind-cold also received 10 grams of *Huo Xiang* (Herba Agastache), and those with wind-heat also received 10 grams of *Huai Hua* (Flos Sophorae). Out of 120 patients, the effective rate was 95%.[8]
- **Sinusitis and rhinitis**: In one study, 2,450 patients with sinusitis or rhinitis were treated with intranasal instillation and intramuscular injection of *Xin Yi Hua* preparations. The patients in this study received varied doses according to their age. The study reported 17.3% had marked improvement, 28.5% had moderate improvement, 46.7% had slight improvement, and 7.5% showed no response.[9]

TOXICOLOGY

Xin Yi Hua has very low toxicity. No fatalities were reported following intravenous injection at 1 g/kg in dogs and 4.75 g/kg in rabbits. Furthermore, no abnormalities were noted following oral ingestion of alcohol extract at 18 g/kg and water extract at 30 g/kg in rats for 1 month.[10]

E Bu Shi Cao (Herba Centipedae)

鵝不食草
鹅不食草

Pinyin Name: *E Bu Shi Cao*
Alternate Chinese Names: *Shi Hu Wei, Die Zai Cao, Man Tian Xing*
English Name: centipeda herb, small centipeda herb
Botanical Name: *Centipeda minima* (L.) A.
Pharmaceutical Name: Herba Centipedae
Properties: acrid, warm
Channels Entered: Lung, Liver

CHINESE THERAPEUTIC ACTIONS

1. Opens the Nasal Orifices, Removes Superficial Visual Obstruction

Hypertrophic rhinitis, sinus polyps, nasal obstruction: *E Bu Shi Cao* (Herba Centipedae) opens the nasal orifices to treat symptoms related to nasal disorders.

- Nasal disorders: use *E Bu Shi Cao* with *Fu Rong* (Radix Hibisci) and *Xin Yi Hua* (Flos Magnoliae) in herbal decoction. The fresh juice of *E Bu Shi Cao* can also be applied topically as nose drops.

Cataract: *E Bu Shi Cao* removes superficial visual obstruction and treats cataracts.

- Cataracts: combine it with *Qian Li Guang* (Herba Senecionis Scandens).

2. Dispels Wind and Dampness and Benefits the Joints

Traumatic injuries, arthritis: *E Bu Shi Cao* treats arthritic pain caused by wind and dampness lodged in the joints after traumatic injuries.

- Pain: combine it with *Yi Tiao Gen* (Radix Moghaniae), *Jin Bu Huan* (Herba Lycopodii Serrati), *Mo Gu Xiao* (Caulis Hyptis Capitatae), *Huang Jin Gui* (Caulis Vanieriae) and *Liu Zhi Huang* (Herba Solidaginis).

DOSAGE

3 to 9 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *E Bu Shi Cao* with caution for patients with weak digestive systems.
- *E Bu Shi Cao* is contraindicated in patients with gastritis or duodenal ulcers.

AUTHORS' COMMENTS

Use of *E Bu Shi Cao* is sometimes associated with irritation to the stomach lining, which is why it should be used with caution in patients with sensitive stomachs. This side effect can be minimized by adding herbs that protect the stomach, such as such as *Bai Ji* (Rhizoma Bletillae), *Wu Bei Zi* (Galla Chinensis), *Hai Piao Xiao* (Endoconcha Sepiae) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).

Section 2

— Wind-Heat Releasing Herbs

Bo He (Herba Menthae)

薄荷 薄荷

Pinyin Name: *Bo He*
Alternate Chinese Names: *Bo He Ye, Bo He Geng, Su Bo He*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: mint, wild mint
Botanical Name: *Mentha haplocalyx* Briq.
Pharmaceutical Name: Herba Menthae
Properties: acrid, cool
Channels Entered: Lung, Liver

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Dispels Wind-Heat

Wind-heat: *Bo He* (Herba Menthae) is commonly used to treat the initial stages of febrile disorders, or wind-heat syndrome, characterized by symptoms such as headache, fever, the absence of perspiration, dry mouth and/or sore throat, yellow tongue coat, and superficial, rapid pulse. Because its acrid taste can overcome its cold nature, *Bo He* can also be used to treat wind-cold syndrome, if combined with acrid, warm herbs.

- Wind-heat syndrome: use this herb with *Jing Jie* (Herba Schizonepetae), *Jie Geng* (Radix Platycodonis), *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi) and *Niu Bang Zi* (Fructus Arctii) to dispel wind-heat and remove toxins. **Exemplar Formulas:** *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction) and *Yin Qiao San* (Honeysuckle and Forsythia Powder).
- Early-stage febrile disorders: combine it with *Chan Tui* (Periostracum Cicadae), *Shi Gao* (Gypsum Fibrosum) and *Gan Cao* (Radix Glycyrrhizae).
- Wind-cold syndrome: use it with *Zi Su Ye* (Folium Perillae), *Fang Feng* (Radix Saposhnikoviae), and *Qiang Huo* (Rhizoma et Radix Notopterygii).

2. Clears the Head, Brightens the Eyes and Benefits the Throat

Headache, sore throat, and red eyes: *Bo He* is commonly said to have light, floating or ascending properties. Thus, it is most effective in treating wind-heat in the upper body, such as disorders of the throat and head. The most suitable clinical applications include headache, sore throat, and red eyes.

- Sore throat from wind-heat: use this herb with *Niu Bang Zi* (Fructus Arctii), *Ban Lan Gen* (Radix Isatidis) and *She Gan* (Rhizoma Belamcandae).
- Sore throat with loss of voice: combine it with *Lian Qiao* (Fructus Forsythiae), *Jie Geng* (Radix Platycodonis) and *Gu Zhi Hua* (Semen Oroxyli).
- Red eyes from wind-heat: use it with *Ju Hua* (Flos Chrysanthemi), *Niu Bang Zi* (Fructus Arctii) and *Gan Cao* (Radix Glycyrrhizae).

Bo He (Herba Menthae)

3. Vents Rashes

Dermatological disorders: Dispersing by nature, *Bo He* is commonly used to treat wind-heat attacking the skin, characterized by disorders such as rashes, measles, and other dermatological diseases. It promotes a more rapid recovery by shortening the duration of illness.

- Measles: combine it with *Jing Jie* (Herba Schizonepetae), *Niu Bang Zi* (Fructus Arctii) and *Lian Qiao* (Fructus Forsythiae) to promote the eruption of measles.
- Rash, eczema and general itching: use it with *Chan Tui* (Periostracum Cicadae), *Jing Jie* (Herba Schizonepetae), *Di Fu Zi* (Fructus Kochiae) and *Niu Bang Zi* (Fructus Arctii).

4. Soothes and Relieves Liver Qi Stagnation

Liver qi stagnation: *Bo He* enters the Liver channel and is commonly used to treat Liver qi stagnation characterized by feelings of discomfort, distention, and pain in the chest and hypochondrium.

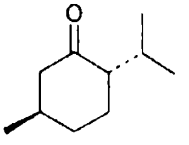
- Liver qi stagnation: use it with *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba), and *Dang Gui* (Radicis Angelicae Sinensis). **Exemplar Formula:** *Xiao Yao San* (Rambling Powder).
- Red eyes, blurred vision and headache in hypertension caused by Liver yang rising: add *Ju Hua* (Flos Chrysanthemi) and *Sang Ye* (Folium Mori).

5. Disperses Turbid Qi from the Abdomen

Damp-heat accumulation in the abdomen: In the summer, an inappropriate diet of uncooked or unsanitary food may introduce heat and dampness to the abdomen. With the accumulation of heat and dampness, patients will experience abdominal pain, vomiting, diarrhea, and other gastrointestinal disturbances. In combination with other herbs, *Bo He* can effectively treat this type of gastrointestinal disorder.

- Vomiting and diarrhea due to summer-heat and dampness: use it with *Huo Xiang* (Herba Agastache), *Lian Qiao* (Fructus Forsythiae), and *Bai Dou Kou* (Fructus Amomi Rotundus). **Exemplar Formula:** *Gan Lu Xiao Du Dan* (Sweet Dew Special Pill to Eliminate Toxin).

DOSAGE



2 to 10 grams. The maximum dosage of *Bo He* is 20 grams. *Bo He* should be added last to the decoction, and cooked only for a short period of time, no more than 5 to 10 minutes. The leaves have stronger diaphoretic action, while the stems have stronger qi-regulating action.

CAUTIONS / CONTRAINDICATIONS

- Aromatic and acrid, *Bo He* has a dispersing nature and may consume qi and yin. Therefore, it should be used with caution in patients with yin deficiency, yin-deficient heat, *xiao ke* (wasting and thirsting) syndrome, perspiration from qi deficiency, Liver yang excess, and those patients who are recovering from chronic illnesses or have deficiency symptoms.
- Chronic, repetitive use may lead to depletion of qi and yang reserves.

CHEMICAL COMPOSITION

Essential oils 1-3% (menthol, menthone, isomenthol, pulegone, menthenone, neomenthol), lipophilic flavones, coumarins.[1,2]

Menthone

PHARMACOLOGICAL EFFECTS

- **Dermatologic:** Topical application of *Bo He* increases local blood circulation. It produces a cool sensation initially, followed by a warm sensation. It is commonly used to relieve itching and pain.[3]
- **Others:** *Bo He* has antipyretic, diaphoretic and anti-inflammatory effects.[4]

CLINICAL STUDIES AND RESEARCH

- **Fever:** In one report, 73 patients with high fevers due to infection were treated successfully with an herbal formula. The overall effective rate was 92.76%, with 13 patients showing complete recovery within 24 hours. The herbal formula included 10 grams each of *Bo He, Jing Jie* (Herba Schizonepetae), *Jin Yin Hua* (Flos Lonicerae), *Xing Ren* (Semen Armeniacae Amarum), *Shi Gao* (Gypsum Fibrosum), *Qian Hu* (Radix Peucedani), *Huang Qin* (Radix Scutellariae), *Zhu Ye* (Herba Phyllostachys), *Chai Hu* (Radix Bupleuri), *Gan Cao* (Radix Glycyrrhizae), and *Ban Lan Gen* (Radix Isatidis), and 15 grams of *Lian Qiao* (Fructus Forsythiae). The herbal decoction was given four to eight times daily as needed to control fever.[5]
- **Acute mastitis:** In one report, topical application of an herbal solution to the affected area twice daily showed satisfactory results in 40 cases of acute mastitis. The herbal solution was made by cooking 60 grams each of *Bo He* and *Jie Geng* (Radix Platycodonis) with the herb residue filtered out to yield the topical solution.[6]

TOXICOLOGY

The LD_{50} for menthone in rats is 2.0 g/kg via subcutaneous injection.[7]

Bo He (Herba Menthae)

Niu Bang Zi (Fructus Arctii)

牛蒡子 牛蒡子

Pinyin Name: *Niu Bang Zi*
Alternate Chinese Names: *Su Nien Zi*, *Da Li Zi*, *E Shi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: arctium, achene of great burdock, burdock fruit
Botanical Name: *Arctium lappa* L.
Pharmaceutical Name: Fructus Arctii
Properties: acrid, bitter, cold
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Clears Heat

Wind-heat: Due to its cold nature, *Niu Bang Zi* (Fructus Arctii) effectively dispels wind-heat and toxins or wind-heat at the early stage of a febrile disorder. It is commonly used to treat wind-heat affecting the Lung, accompanied by headache, fever, sore throat with swelling and pain, cough, and yellow sputum.

- Sore throat caused by febrile disorder or wind-heat syndrome: use *Niu Bang Zi* with *Jin Yin Hua* (Flos Lonicerae), *Bo He* (Herba Menthae), *Jie Geng* (Radix Platycodonis), and *Lian Qiao* (Fructus Forsythiae). **Exemplar Formula:** *Yin Qiao San* (Honeysuckle and Forsythia Powder).
- Severe sore throat or swollen tonsils due to wind-heat with excessive heat and toxins: use this herb with *Ma Bo* (Lasiosphaera seu Calvatia), *Huang Qin* (Radix Scutellariae), *Shan Dou Gen* (Radix Sophorae Tonkinensis) or *Da Huang* (Radix et Rhizoma Rhei).
- Cough and phlegm due to wind-heat invading the Lung: add it to *Jie Geng* (Radix Platycodonis), *Sang Ye* (Folium Mori), *Bei Mu* (Bulbus Fritillaria) and *Gan Cao* (Radix Glycyrrhizae), to dispel wind-heat and clear Lung heat.

2. Eliminates Toxins and Vents Rashes

Dermatological disorders: *Niu Bang Zi* dispels wind-heat and eliminates toxic heat from the skin. It is commonly used to treat various dermatological disorders, such as red swellings, rashes, eczema, carbuncles, erythemas, mumps, acute febrile maculopapular rashes, and measles in cases of incomplete eruption or expression. *Niu Bang Zi* vents rashes, promotes their eruption and clears toxins from the body.

- Dermatological disorders caused by wind-heat (in which there is more itching but the basic condition is less severe): use *Niu Bang Zi* with *Chan Tui* (Periostracum Cicadae), *Bo He* (Herba Menthae), *Jing Jie* (Herba Schizonepetae) and *Ge Gen* (Radix Puerariae).
- Dermatological disorders from the accumulation of heat and toxins (there is more redness or pain, and the condition is more severe): use it with *Da Qing Ye* (Folium Isatidis), *Zi Cao Gen* (Radix Lithospermi) and *Sheng Ma* (Rhizoma Cimicifugae).

Niu Bang Zi (Fructus Arctii)

- Sores, carbuncles or fixed swellings with redness and pain: combine it with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Ku Shen Gen* (Radix Sophorae Flavescentis), *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis) and *Chi Shao* (Radix Paeoniae Rubrae).

3. Clears Heat and Eliminates Toxins from the Throat

Sore throat: *Niu Bang Zi* dispels wind-heat, eliminates toxins and is very effective in treating sore throat with severe pain and swelling, such as acute tonsillitis, pharyngitis and laryngitis.

- Sore throat: use it with *Ma Bo* (Lasiosphaera seu Calvatia), *Ban Lan Gen* (Radix Isatidis), *Xuan Shen* (Radix Scrophulariae), *Jie Geng* (Radix Platycodonis), and *Lian Qiao* (Fructus Forsythiae) to clear heat and eliminate toxins. **Exemplar Formula:** *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin).

DOSAGE

3 to 10 grams. The maximum dosage for *Niu Bang Zi* is 30 grams. The seeds should be crushed prior to cooking to maximize the available surface area and ensure complete extraction of the active constituents. Due to the cold thermal property of the herb, consumption of the unprocessed form is sometimes associated with diarrhea. Therefore, dry-frying the herb to increase its warmth will reduce the possibility of diarrhea.

CAUTIONS / CONTRAINDICATIONS

- Due to its cold nature, *Niu Bang Zi* should be used only for patients with heat or excess syndromes.
- Use of *Niu Bang Zi* is contraindicated in patients with Spleen qi deficiency with loose stools.

CHEMICAL COMPOSITION

Arctiin, arcti-genin, isoarctigenin, essential oil 25-30%, gobosterin, lappaol A,B,C,D,E,F,H.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Niu Bang Zi* has been shown to inhibit *Streptococcus pneumoniae* and some pathogenic fungi.[2]
- **Antidiabetic**: Extract of *Niu Bang Zi* has been shown to decrease blood glucose levels, with a prolonged duration of effect, in rats.[3]
- **Renal**: Intraperitoneal injection of arctiin at 10 mg/kg daily for 10 days showed promising results in treating kidney diseases by reducing the amount of protein present in the urine.[4]
- **Others**: *Niu Bang Zi* has anti-inflammatory, antipyretic and diuretic effects.[5]

CLINICAL STUDIES AND RESEARCH

- **Migraine**: *Niu Bang Zi* was used to treat migraine headache in 40 patients. Each patient received 9 grams of powdered *Niu Bang Zi*, taken with grain-based liquor, once daily. Patients were covered with blankets after administration of the herbs to enhance diaphoresis. Out of 40 patients, 34 reported significant improvement.[6]
- **Facial paralysis**: According to one report, 47 patients with facial paralysis were treated with an herbal decoction twice daily with all patients reporting at least slight improvement in their condition. The herbal formula contained *Niu Bang Zi* 30g, *Bai Zhi* (Radix Angelicae Dahuricae) 10g, *Nu Zhen Zi* (Fructus Ligustri Lucidi) 12g, and *Han Lian Cao* (Herba Ecliptae) 12g.[7]

HERB-DRUG INTERACTION

- **Antidiabetics:** Herbs that lower the plasma glucose levels, such as *Niu Bang Zi*, should be used with caution with insulin, sulfonylureas, and other antidiabetic medications as the combination may have a synergistic effect, leading to hypoglycemia.[8] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]
- **Acetaminophen**: It has been shown that *Niu Bang Gen* (Radix Arctii) has marked hepatoprotective effects. *Niu Bang Gen* suppressed the elevated SGOT and SGPT levels induced by carbon tetrachloride or acetaminophen in a dose-dependent manner. It also alleviated the severity of liver damage based on histopathological observations. The mechanism of this hepatoprotective action is based on the antioxidative effect of *Niu Bang Gen* on hepatocytes, hence eliminating the deleterious effects of toxic metabolites from carbon tetrachloride or acetaminophen.[9]

SUPPLEMENT

- 牛蒡根 / 牛蒡根 *Niu Bang Gen* (Radix Arctii) is derived from the root of the same plant as *Niu Bang Zi*. Historically, *Niu Bang Gen* has rarely been used. However, its use has increased in light of its beneficial action to protect the liver from chemically-induced damage, such as caused by use of acetaminophen or carbon tetrachloride.

Chan Tui (Periostracum Cicadae)

蟬蜕 蝉蜕

Pinyin Name: *Chan Tui*
Literal Name: "slough of cicada"
Alternate Chinese Names: *Chan Yi, Chan Ke*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: cicada moulting
Zoological Name: *Cryptotympana atrata* Fabr.; *Cryptotympana pustulata* Fabr.
Pharmaceutical Name: Periostracum Cicadae
Properties: sweet, cold
Channels Entered: Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Heat

Wind-heat: *Chan Tui* (Periostracum Cicadae) dispels wind-heat, especially from the head or eyes. It is commonly used to treat early-stage febrile disorders or wind-heat syndrome affecting the throat. Representative symptoms include loss or hoarseness of voice, sore throat, headache and fever.

- Early-stage febrile disorders or wind-heat syndrome: combine *Chan Tui* with *Ju Hua* (Flos Chrysanthemi), *Bo He* (Herba Menthae), and *Lian Qiao* (Fructus Forsythiae). **Exemplar Formula:** *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction).
- Loss of voice: combine it with *Pang Da Hai* (Semen Sterculiae Lychnophorae), *Niu Bang Zi* (Fructus Arctii), and *Jie Geng* (Radix Platycodonis).

2. Vents Rashes and Relieves Itching

Incomplete expression of rashes, and itching: *Chan Tui* dispels heat from the skin and is commonly used to treat various dermatological disorders, including but not limited to urticaria, rash, eczema, measles, chickenpox and itching. *Chan Tui* promotes a more rapid recovery by shortening the duration of illness.

- To promote the eruption of dermatological disorders: use it with *Niu Bang Zi* (Fructus Arctii), *Ge Gen* (Radix Puerariae) and *Bo He* (Herba Menthae).
- Itching: add to *Jing Jie* (Herba Schizonepetae), *Bai Ji Li* (Fructus Tribuli), and *Fang Feng* (Radix Saposhnikoviae).

3. Brightens the Eyes

Superficial visual obstruction: As the Liver opens to the eyes - either wind or wind-heat affecting the Liver will lead to superficial visual obstruction, blurred vision, red eyes and excessive secretion of tears.

- Red eyes: use *Chan Tui* with *Ju Hua* (Flos Chrysanthemi) and *Mu Zei* (Herba Equiseti Hiemalis).

4. Extinguishes Liver Wind and Relieves Spasms

Tetanus: *Chan Tui* enters the Liver channel and extinguishes Liver wind. It treats muscle spasms, twitching, convulsions with high fever, facial paralysis, post-stroke speech impairment, tetanus, and constant crying in infants, or infantile seizures.

- Muscle spasms and twitching: combine it with *Quan Xie*

Chan Tui (Periostracum Cicadae)

(Scorpio), *Jiang Can* (Bombyx Batryticatus), and *Gou Teng* (Ramulus Uncariae cum Uncis).

- Mild tetanus: use *Chan Tui* alone in powder and serve with rice-based liquor.
- Severe tetanus: *Chan Tui* is most useful in combination with *Tian Nan Xing* (Rhizoma Arisaematis), *Tian Ma* (Rhizoma Gastrodiae), *Jiang Can* (Bombyx Batryticatus), and *Quan Xie* (Scorpio).
- Constant crying in infants due to fear or fright: use this herb with *Gou Teng* (Ramulus Uncariae cum Uncis) and *Bo He* (Herba Menthae).

DOSAGE

3 to 10 grams. The maximum dosage of *Chan Tui* is 30 grams. It can also be used alone as powder or pills.

CAUTIONS / CONTRAINDICATIONS

- *Chan Tui* should be used with caution in pregnant women, as it may impair labor and cause difficulty in delivery.
- Chronic or repetitive use of *Chan Tui* may consume qi and yin. Therefore, use with caution in patients with these deficiencies.
- Use of *Chan Tui* may be associated with possible drowsiness and sedation. Therefore, individuals who take this herb should exercise caution in driving or operating heavy machinery.

CHEMICAL COMPOSITION

Protein, amino acid, organic acid, carbohydrates, lipids, essential oil.[1]

PHARMACOLOGICAL EFFECTS

- **CNS suppressant:** *Chan Tui* has demonstrated an inhibitory influence on the central nervous system (CNS). Laboratory experiments show that it prevents and treats seizures, treats tetanus, prolongs sleeping time induced by barbiturates, reduces spontaneous activity and counters excitation induced by caffeine in mice.[2,3]

CLINICAL STUDIES AND RESEARCH

- **Tetanus**: According to one report, 8 patients with tetanus were treated with *Chan Tui*. Adults received 45 to 60 grams of *Chan Tui* powder twice daily with 90 to 120 ml of grain-based liquor. The dosage for the children was adjusted according to their age and body weight. All patients received concurrent supportive treatment and antibiotic therapy. All patients recovered within 7 to 17 days.[4]
- **Chronic urticaria:** In one study, chronic urticaria was treated with 9 grams of an herbal formula, in pills, two to three times daily. The pills consisted of 2 parts *Chan Tui*, 1 part *Bai Ji Li* (Fructus Tribuli), and honey. Out of 30 patients, 7 reported significant improvement, 15 reported moderate improvement, and 5 reported slight improvement.[5]
- **Prolapse of rectum:** *Chan Tui* powder was used topically to treat rectal prolapse. Satisfactory results were reported in 15 patients who applied the herb topically after one to five applications.[6]

HERB-DRUG INTERACTION

- **Sedatives:** *Chan Tui* has an inhibitory influence on the central nervous system. It potentiates the sedative effect of barbiturates, and reduces the stimulant effect of caffeine.[7] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and others.]

TOXICOLOGY

No fatalities were reported following oral administration of alcohol extract of *Chan Tui* at 8,000 mg/kg in mice.[8,9]

AUTHORS' COMMENTS

According to the *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578, cicada treats all symptoms related to wind-heat. The entire insect is more effective for the treatment of diseases of the internal organs, such as to calm Liver wind and relieve muscle spasms. The moulted casing is more appropriate to treat exterior disorders, such as dermatological disorders caused by wind-heat.

Sang Ye (Folium Mori)

桑葉 桑叶

Pinyin Name: *Sang Ye*
Literal Name: "mulberry leaves"
Alternate Chinese Names: *Dong Sang Ye, Shuang Sang Ye*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: mulberry leaf
Botanical Name: *Morus alba* L.
Pharmaceutical Name: Folium Mori
Properties: bitter, sweet, cold
Channels Entered: Lung, Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Heat

Wind-heat: *Sang Ye* (Folium Mori) is one of the most commonly used herbs to treat wind-heat syndrome, characterized by cough, fever, headache and sore throat.

- Wind-heat with cough: use *Sang Ye* with *Ju Hua* (Flos Chrysanthemi), *Bo He* (Herba Menthae), *Lian Qiao* (Fructus Forsythiae), and *Jie Geng* (Radix Platycodonis).

2. Clears Lung Heat and Moistens Dryness

Heat and dryness injuring the Lung: Key symptoms include cough, scanty or no sputum, difficult-to-expectorate sputum, and dry mouth and throat caused by heat and dryness damaging the Lung.

- Lung heat and dryness: use *Sang Ye* with *Xing Ren* (Semen Armeniacae Amarum), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Mai Men Dong* (Radix Ophiopogonis) and *Sha Shen* (Radix Glehniae seu Adenophorae). **Exemplar Formula:** *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction).
- Coughing with blood: combine this herb with *Sheng Di Huang* (Radix Rehmanniae), *E Jiao* (Colla Corii Asini), *Shi Gao* (Gypsum Fibrosum) and *Pi Pa Ye* (Folium Eriobotryae).

3. Calms the Liver and Brightens the Eyes

Liver yang rising: *Sang Ye* enters the Liver channel to treat Liver yang rising, Liver fire and Liver yin deficiency. Liver yang rising is characterized by dizziness, vertigo and headache. Liver fire is characterized by redness, swelling and painful eyes. Liver yin deficiency is characterized by dizziness and blurred vision.

- Liver yang rising: use *Sang Ye* with *Ju Hua* (Flos Chrysanthemi), *Shi Jue Ming* (Concha Haliotidis), and *Bai Shao* (Radix Paeoniae Alba).
- Liver fire: combine it with *Ju Hua* (Flos Chrysanthemi), *Jue Ming Zi* (Semen Cassiae) and *Che Qian Zi* (Semen Plantaginis). *Sang Ye* is sometimes used as an external wash to relieve eye disorders caused by Liver fire.
- Liver yin deficiency: use it with *Hei Zhi Ma* (Semen Sesami Nigrum) and *Gou Qi Zi* (Fructus Lycii).

Eye disorders due to wind-heat: Key symptoms include itching and redness of the eyes.

- Itching and redness of the eyes: combine *Sang Ye* with *Chan Tui* (Periostracum Cicadae).

4. Cools the Blood and Stops Bleeding

Hematemesis due to heat: Excess heat in the Stomach forces blood out of its channels and thus causes vomiting of blood. *Sang Ye* can both cool the blood and stop bleeding.

- Hematemesis: use *Sang Ye* with blood-cooling herbs, such as *Xiao Ji* (Herba Cirisii).

DOSAGE

5 to 10 grams for dried *Sang Ye*, with a maximum dosage of 50 grams. Double the dosage up to 100 grams if fresh *Sang Ye* is used. *Sang Ye* may be taken internally as a decoction or applied topically as an herbal paste. For decoctions, *Sang Ye* processed with honey has a stronger function to moisten the Lung and relieve cough. For topical applications, it should be crushed into paste prior to use.

CAUTIONS / CONTRAINDICATIONS

- Due to its cold nature, *Sang Ye* should be used with caution for patients who have constitutional deficiencies or cold.

Sang Ye (Folium Mori)

CHEMICAL COMPOSITION

Flavonoids (rutin 1.38-3.06%, quercetin, isoquercitrin), moracetin, campesterol, lupeol, myoinsitol, inokosterone, ecdysterone, hemolysin, moracelin, scopoletin, scoplin, phenolics hydroxycinnamic acid, 8-cyclohexenyflavones, cyclomorusin, oxydihydromorusin, astragalin, morusenin A, B; hydroxycoumarin, essential oils (linalool, eugenol).[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Sang Ye* has bactericidal action against *Staphylococcus aureus*, β-hemolytic streptococcus, *Bacillus diphtheriae, E. coli, Pseudomonas aeruginosa,* and leptospirosis.[2]
- **Metabolic**: The use of *Sang Ye* has been associated with decreased blood glucose and serum cholesterol levels in rats.[3]

CLINICAL STUDIES AND RESEARCH

- **Elephantiasis**: In one study, 1,638 patients with elephantiasis were treated with injections of 4 ml of 25 to 50% solution of *Sang Ye* one or two times daily. These patients also received herbs to reduce swelling and promote diuresis. The lower limbs of these patients were wrapped. The treatment duration ranged between 15 and 20 days per treatment course, totaling three courses of treatment per patient. The overall effective rate was reported to be approximately 99%.[4]
- **Psoriasis:** Intramuscular injections of *Sang Ye* were evaluated in the treatment of psoriasis in 31 patients. The treatment protocol was to administer 4 ml of *Sang Ye* via injection twice daily, for 7 days per treatment course. The study reported significant improvement in 81% of the patients.[5]

TOXICOLOGY

No fatalities were reported following a bolus intraperitoneal injection of 10% *Sang Ye* in mice at a dosage 250 times the normal adult human dose. In a follow-up study, daily intraperitoneal injection with 10% *Sang Ye* for 21 days did not cause any damage to internal organs, such as the liver, kidneys, and lungs.[6]

AUTHORS' COMMENTS

According to the *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578, *Sang Ye* also stimulates hair growth.

Ju Hua (Flos Chrysanthemi)

菊花 菊花

Pinyin Name: *Ju Hua*
Literal Name: "chrysanthemum flower"
Alternate Chinese Names: *Hang Ju, Bai Ju Hua, Huang Ju Hua, Hang Ju Hua*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: chrysanthemum flower
Botanical Name: *Chrysanthemum morifolium* Ramat.
Pharmaceutical Name: Flos Chrysanthemi
Properties: acrid, sweet, bitter, cool
Channels Entered: Lung, Liver

Ju Hua (Flos Chrysanthemi)

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Heat

Wind-heat: *Ju Hua* (Flos Chrysanthemi) is commonly used to dispel wind-heat and treat early-stage febrile disorders and wind-heat syndromes characterized by headache, fever, red and painful eyes, dizziness, dry mouth and throat, and a yellow tongue coat.

- Febrile disorders and wind-heat syndrome: use *Ju Hua* with *Sang Ye* (Folium Mori), *Bo He* (Herba Menthae), *Lu Gen* (Rhizoma Phragmitis), and *Lian Qiao* (Fructus Forsythiae). **Exemplar Formula:** *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction).
- Headache: add *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), *Bai Zhi* (Radix Angelicae Dahuricae) and *Xi Xin* (Herba Asari) to relieve occipital or frontal headache, caused either by wind-heat or wind-cold.
- Headache from wind-heat: add it to *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Shi Gao* (Gypsum Fibrosum).
- Headache due to Liver wind and yin-deficient fire: use this herb with *Gou Teng* (Ramulus Uncariae cum Uncis), *Sheng Di Huang* (Radix Rehmanniae) and *Bai Shao* (Radix Paeoniae Alba).
- Wind-heat with sore throat: combine it with *Ban Lan Gen* (Radix Isatidis) or *Shan Dou Gen* (Radix Sophorae Tonkinensis).

2. Clears the Liver and Benefits the Eyes

Disorders of the eyes: *Ju Hua* is one of the most commonly used herbs in treatment of eye disorders. It treats eye disorders caused by wind-heat attacking the Liver channel, or Liver fire rising, with symptoms such as redness, swelling and pain in the eyes, superficial visual obstruction, and increased production of tears on exposure to wind. It treats blurred vision and dizziness from Liver and Kidney yin deficiencies. It is, however, contraindicated if the diagnosis is yang deficiency, or deficiency and cold.

- Redness, swelling and pain in the eyes: use *Ju Hua* with *Sang Ye* (Folium Mori), *Xia Ku Cao* (Spica Prunellae), *Chan Tui* (Periostracum Cicadae), *Mu Zei* (Herba Equiseti Hiemalis) and *Bai Ji Li* (Fructus Tribuli).
- Blurred vision and dizziness caused by Liver and Kidney yin deficiency: combine it with *Gou Qi Zi* (Fructus Lycii), *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae) and *Mu Dan Pi* (Cortex Moutan).
- Near-sightedness: add it to *Sheng Di Huang* (Radix Rehmanniae), *Tian Men Dong* (Radix Asparagi) and *Zhi Ke* (Fructus Aurantii).
- Superficial visual obstruction: use it with *Mi Meng Hua* (Flos Buddlejae), *Qing Xiang Zi* (Semen Celosiae), *Mu Zei* (Herba Equiseti Hiemalis), *Sang Ye* (Folium Mori) and *Chan Tui* (Periostracum Cicadae).
- Visual disturbances with dizziness and headache due to Liver yang rising: use *Ju Hua* with *Bai Ji Li* (Fructus Tribuli), *Jue Ming Zi* (Semen Cassiae), *Bai Shao* (Radix Paeoniae Alba) and *Man Jing Zi* (Fructus Viticis).

3. Calms Liver Yang

Hypertension: *Ju Hua* enters the Liver channel and calms rising Liver yang. It is commonly used to treat hypertension, dizziness, vertigo, and swelling and pain in the head associated with Liver yang rising.

- Liver yang rising: use it with *Shi Jue Ming* (Concha Haliotidis), *Bai Shao* (Radix Paeoniae Alba) and *Gou Teng* (Ramulus Uncariae cum Uncis).

4. Clears Heat and Eliminates Toxins

Dermatological disorders: *Ju Hua* clears heat and eliminates toxins from the exterior of the body and treats various dermatological disorders with abscesses and ulcerations.

- Sores, carbuncles and abscesses of the skin: use it with *Gan Cao* (Radix Glycyrrhizae), *Jin Yin Hua* (Flos Lonicerae) and *Pu Gong Ying* (Herba Taraxaci), and apply topically.

DOSAGE

10 to 15 grams. The maximum dosage of *Ju Hua* is 100 grams. *Ju Hua* can be used orally or topically. For oral administration, use in herbal decoction. For topical administration, the herb should be crushed into paste prior to application. It can also be taken as herbal tea on a daily basis to prevent buildup of heat.

CAUTIONS / CONTRAINDICATIONS

- Since *Ju Hua* is cool, it should be used with caution in patients with qi deficiency or cold in the Stomach, characterized by diarrhea, lack of appetite, or decreased food intake.
- *Ju Hua* is contraindicated for use in the presence of yang deficiency, or deficiency and cold.

CHEMICAL COMPOSITION

Essential oils 0.2-0.85% (borneol, bornyl acetate, chrysanthenone, camphor), flavone (luteolin, apigenin, acacetin), chrysanthemin A, B; chlorochrymorin, chrysandiol.[1]

PHARMACOLOGICAL EFFECTS

- **Vasodilative:** *Ju Hua* has been shown to dilate blood vessels. It increases blood perfusion to the coronary arteries, lowers blood pressure, and decreases body temperature.[2]
- **Antibiotic:** *Ju Hua* has been shown to inhibit *Staphylococcus aureus*, β-hemolytic streptococcus, and *Shigella sonnei*. It also has an inhibitory effect against leptospira at high doses.[3]

Ju Hua (Flos Chrysanthemi)

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease:** According to one study, 164 patients with coronary artery disease were treated with a preparation of *Ju Hua* (containing the equivalent of 50 grams of dried herb) for 2 months per treatment course, with a total treatment duration ranging between 1 and 2 courses. The study reported improvement based on symptom evaluation in 86.5% of patients, and improvement based on EKG evaluation in 45.3% of patients.[4]
- **Hypertension:** According to one report, 46 patients with hypertension were treated with herbs, with good results. The herbal formulation consisted of 24 to 30 grams each of *Ju Hua* and *Jin Yin Hua* (Flos Lonicerae) as the base formula. Furthermore, 12 grams of *Sang Ye* (Folium Mori) were added to address dizziness, and 12 to 24 grams of *Shan Zha* (Fructus Crataegi) to treat high cholesterol. After herbal treatment for 3 to 7 days, the study reported that 35 of 46 patients showed reduction of blood pressure, dizziness and insomnia.[5]

AUTHORS' COMMENTS

There are three different types of "*Ju Hua*" that are used medicinally:

- *Ye Ju Hua*, wild chrysanthemum flower, is strongest in clearing heat, eliminating toxins and treating sore throat, sores and carbuncles, and swollen, painful eyes.
- *Huang Ju Hua*, yellow chrysanthemum flower, is the strongest in dispelling wind-heat.
- *Bai Ju Hua*, white chrysanthemum flower, is strongest in sedating Liver fire, brightening the eyes and treating redness and pain in the eyes.

Man Jing Zi (Fructus Viticis)

蔓荆子 蔓荆子

Pinyin Name: *Man Jing Zi*
Alternate Chinese Names: *Man Jing Shi, Jing Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: vitex, chastetree fruit, three-leaf chastetree fruit
Botanical Name: *Vitex rotundifolia* L. (*Dan Ye Mang Jing*); *Vitex trifolia* L. (*Mang Jing*)
Pharmaceutical Name: Fructus Viticis
Properties: acrid, bitter, cool
Channels Entered: Liver, Stomach, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Heat

Wind-heat: With its ascending and dispersing properties, *Man Jing Zi* (Fructus Viticis) is a strategic choice for dispelling wind-heat from the head and face. Clinical applications include dizziness, headache, and swelling and pain in the gums. It is especially useful when treating temporal headaches.

- Headache due to wind-heat: combine *Man Jing Zi* with *Fang Feng* (Radix Saposhnikoviae), *Ju Hua* (Flos

Man Jing Zi (Fructus Viticis)

Chrysanthemi), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Shi Gao* (Gypsum Fibrosum).

- Headache, facial swelling and pain caused by wind-heat: add it to *Bo He* (Herba Menthae), *Jing Jie* (Herba Schizonepetae) and *Ju Hua* (Flos Chrysanthemi).
- Frontal or migraine headache: use *Man Jing Zi* individually, or in combination with *Ju Hua* (Flos Chrysanthemi), *Jing Jie* (Herba Schizonepetae) and *Tian Ma* (Rhizoma Gastrodiae).
- Temporal headache from wind-heat: use it with *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Ju Hua* (Flos Chrysanthemi) and *Bai Ji Li* (Fructus Tribuli).
- Headache from internal wind resulting from blood deficiency: combine it with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae) and *Si Wu Tang* (Four-Substance Decoction).

2. Dispels Wind-Heat in the Liver Channel, Brightens the Eyes

Eye disorders: *Man Jing Zi* dispels wind-heat attacking the Liver channel. As wind-heat travels upwards along the Liver channel, it causes dizziness, redness and swelling of the eyes, and excessive tears. *Man Jing Zi* is also used for other eye disorders if combined with appropriate herbs.

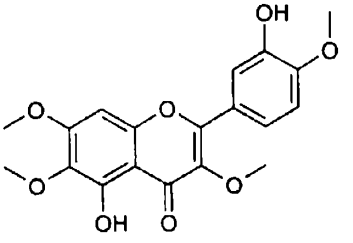
- Eye disorders due to wind-heat attacking the Liver channel: use this herb with *Ju Hua* (Flos Chrysanthemi), *Chan Tui* (Periostracum Cicadae) and *Bai Ji Li* (Fructus Tribuli).
- Eye disorders due to wind-cold: combine it with *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Bai Ji Li* (Fructus Tribuli), and *Gan Cao* (Radix Glycyrrhizae).

3. Dispels Wind and Relieves Pain

***Bi zheng* (painful obstruction syndrome):** *Man Jing Zi* dispels wind and dampness that has attacked the muscles, to relieve various aches and pains. It is commonly used to treat arthritis or painful joints with spasms and cramps caused by wind and dampness.

- *Bi zheng*: use it with *Fang Feng* (Radix Saposhnikoviae), *Qin Jiao* (Radix Gentianae Macrophyllae), and *Mu Gua* (Fructus Chaenomelis).

DOSAGE



6 to 12 grams. The maximum dosage of *Man Jing Zi* is 30 grams. This herb should be dry-fried and crushed to facilitate extraction of the active constituents.

CAUTIONS / CONTRAINDICATIONS

- *Man Jing Zi* should be used with caution for patients who have Spleen and Stomach deficiencies, or yin-deficient fire.
- *Man Jing Zi* should be used with caution in patients who have dizziness or headaches because of blood deficiency. In this case, blood tonics should be used.

CHEMICAL COMPOSITION

Vitexicarpin, vitexilactone, previtexilactone, luteolin, p-hydroxybenzoic acid, vanillic acid, camphene, pinene, vitamin A.[1,2]

Vitexicarpin

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: Vitexicarpin has an inhibitory effect against *Staphylococcus aureus*, *Bacillus cereus*, and *Bacillus megaterium*.[3]
- **Others**: It has antipyretic, analgesic and sedative effects.[4]

CLINICAL STUDIES AND RESEARCH

- **Allergic sinusitis:** According to one report, 35 patients with allergic sinusitis were treated with a topical solution consisting of 20% *Man Jing Ye* (Folium Viticis). The treatment protocol was to instill 3 to 5 drops of the solution directly into the nostrils three to five times daily for 2 days. This short-term treatment was effective for most patients.[5]

AUTHORS' COMMENTS

Man Jing Zi and *Tian Ma* (Rhizoma Gastrodiae) both treat headache due to wind. *Man Jing Zi* is used for headaches caused by exterior wind-heat, while *Tian Ma* is used for headaches and vertigo due to internal Liver wind.

Mu Zei (Herba Equiseti Hiemalis)

木賊　木贼

Pinyin Name: *Mu Zei*
Literal Name: "wood thief"
Alternate Chinese Names: *Mu Zei Cao, Jie Jie Cao*
Original Source: *Jia You Ben Cao* (Materia Medica of the Jia You Era) by Zhang Yu-Xi and Su Song in 1057-1060
English Name: equisetum, common scouring rush, Dutch rushes, rough horsetail
Botanical Name: *Equisetum hiemale* L.
Pharmaceutical Name: Herba Equiseti Hiemalis
Properties: sweet, bitter, neutral
Channels Entered: Lung, Liver, Gallbladder

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Heat, Brightens the Eyes and Removes Superficial Visual Obstruction

Eye disorders accompanying wind-heat invasion: *Mu Zei* (Herba Equiseti Hiemalis) dispels wind-heat affecting the Lung, Liver and Gallbladder channels. It is commonly used to treat red eyes, excessive tearing, blurred vision, and pterygium caused by wind-heat.

- Blurred vision and excessive tearing: use *Mu Zei* with *Cang Zhu* (Rhizoma Atractylodis).
- Redness, swelling and pain in the eyes, pterygium: combine it with *Ju Hua* (Flos Chrysanthemi).
- Red eyes: use *Mu Zei* with *Shi Jue Ming* (Concha Haliotidis).
- Night blindness due to Liver blood deficiency: combine this herb with *Ye Ming Sha* (Excrementum Vespertilionis Murini), *Dang Gui* (Radicis Angelicae Sinensis), *Chan Tui* (Periostracum Cicadae) and goat liver to tonify the Liver and nourish the blood.

2. Stops Bleeding

Hematochezia or hemorrhoids: *Mu Zei* has hemostatic action, and is commonly used to treat gastrointestinal bleeding and hemorrhoids.

- Hematochezia or hemorrhoids: use this herb with *Di Yu* (Radix Sanguisorbae) and *Huai Jiao* (Fructus Sophorae) to clear heat and stop bleeding.
- Bloody dysentery: use 15 or 30 grams of *Mu Zei* individually.

DOSAGE

3 to 10 grams. The maximum dosage of *Mu Zei* is 30 grams.

CAUTIONS / CONTRAINDICATIONS

- Use *Mu Zei* with caution for patients with deficiency of qi, blood, yin or yang.
- Use *Mu Zei* with caution for pregnant women.
- *Mu Zei* is not recommended for patients with red eyes caused by Liver yang rising.
- Long-term usage of this herb is not recommended.

CHEMICAL COMPOSITION

Flavones 0.10% (kaempferol, kaempferol-3,7-diglucoside, kaempferol-3-diglucoside, hippochaete, herbacetrin, gossypitrin), succinic acid, ferulic acid, caffic acid, vanillin, palustrine, dimethyl sulfone, thymine.[1]

PHARMACOLOGICAL EFFECTS

- **Antihypertensive**: Intraperitoneal injection of alcohol extract of *Mu Zei* has a prolonged influence in reducing blood pressure in anesthetized cats. The antihypertensive effect of *Mu Zei* has a positive dose-to-effect relationship.[2]
- **Others:** It has mild anti-inflammatory, diuretic, sedative, and antiplatelet actions.[3,4]

Yi Zhi Xiang (Herba Vernoniae Cinereae)

一枝香

Pinyin Name: *Yi Zhi Xiang*
Literal Name: "individual fragrance"
Alternate Chinese Names: *Shang Han Cao, Ye Zai Cao, Sheng Zhi Xiang*
English Name: vernonia
Botanical Name: *Vernonia cinerea* Less
Pharmaceutical Name: Herba Vernoniae Cinereae
Properties: acrid, bitter, cool
Channels Entered: Lung, Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Heat and Clears Lung Heat

Lung heat or wind-heat: *Yi Zhi Xiang* (Herba Vernoniae Cinereae) is excellent for treating invasion of wind-heat that is turning into Lung heat with sore throat, cough, yellow phlegm and possibly fever.

- Sore throat caused by wind-heat: use *Yi Zhi Xiang* with *Ban Lan Gen* (Radix Isatidis), *Zao Xiu* (Rhizoma Paridis) and *Da Qing Ye* (Folium Isatidis).
- Inflammation of the throat, bronchitis: combine it with *Zhu Zi Cao* (Herba Euphorbiae Thymifoliae), *Ya She Huang* (Herba Lippiae), *Pao Zai Cao* (Herba Physalis Angulatae) and *Ban Bian Lian* (Herba Lobeliae Chinensis).

2. Sedates Liver Fire

Yi Zhi Xiang disperses qi stagnation, reduces inflammation and eliminates toxins in cases of Liver fire.

- Conjunctivitis: use it with *Shan Pu Tao* (Radix Vitis Amurensis), *Qian Li Guang* (Herba Senecionis Scandens) and *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver).
- Bloody dysentery, abdominal bloating: combine this herb with *Feng Wei Cao* (Herba Pteris), *Bai Tou Weng* (Radix Pulsatillae), *Qin Pi* (Cortex Fraxini), *Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri), *Huai Hua* (Flos Sophorae) and charred *Di Yu* (Radix Sanguisorbae).

DOSAGE

6 to 30 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Yi Zhi Xiang* with caution in patients with deficiency and cold of the Spleen and Stomach.

Ge Gen (Radix Puerariae)

葛根 葛根

Pinyin Name: *Ge Gen*
Literal Name: "Ge's root"
Alternate Chinese Names: *Gan Ge, Fen Ge*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: pueraria root, kudzu, lobed kudzuvine root, thomson kudzuvine root
Botanical Name: *Pueraria lobata* (*Wild.*) Ohwi. (*Ye Ge*); *Pueraria thomsonii* Benth. (*Gan Ge*)
Pharmaceutical Name: Radix Puerariae
Properties: sweet, acrid, cool
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind from the Exterior and Releases Muscles

Wind-heat: *Ge Gen* (Radix Puerariae) is excellent for relieving wind-heat that manifests in headache, fever, stiffness and pain in the neck and shoulders. This herb enters the Spleen, which controls the muscles. *Ge Gen* is acrid and cool, and thus dispels pathogenic factors from the muscle layer and relieves pain. When combined with other herbs, it can treat both wind-cold and wind-heat syndromes. The unprocessed form is stronger for this application.

- Wind-cold syndrome without perspiration: use *Ge Gen* with *Gui Zhi* (Ramulus Cinnamomi) and *Ma Huang* (Herba Ephedrae) to promote diaphoresis and dispel wind-cold. **Exemplar Formula:** *Ge Gen Tang* (Kudzu Decoction).
- Wind-heat: use it with *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae) and *Shi Gao* (Gypsum Fibrosum). **Exemplar Formula:** *Chai Ge Jie Ji Tang* (Bupleurum and Kudzu Decoction to Release the Muscle Layer).
- Wind-cold syndrome with perspiration: add this herb to *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba) to dispel wind-cold and harmonize *wei* (defense) and *ying* (nutritive) levels. **Exemplar Formula:** *Gui Zhi Jia Ge Gen Tang* (Cinnamon Twig Decoction plus Kudzu).
- Half-exterior and half-interior syndrome: combine it with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae) and *Shi Gao* (Gypsum Fibrosum) to harmonize the exterior and the interior, and to relieve symptoms such as fever, aversion to heat, thirst, and inappropriate absence of perspiration.

2. Promotes the Eruption of Measles

Incomplete expression of measles: *Ge Gen* releases pathogenic factors from the skin and muscles, and is commonly used to promote eruption of measles.

- Measles: use *Ge Gen* with *Sheng Ma* (Rhizoma Cimicifugae), *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix Glycyrrhizae).

3. Clears Heat, Generates Fluids

Febrile disorders: *Ge Gen* has a dual action of clearing heat and generating body fluids simultaneously. It is commonly used for patients in whom internal heat is drying body fluids (especially those of the Stomach), leading to thirst, dry mouth, increased intake of water, and possibly fidgeting and irritability. It is one of the key herbs in clearing *yangming* stage heat where thirst is one of the predominant signs. Patients manifesting such symptoms might have febrile disorders or *xiao ke* (wasting and thirsting) syndrome.

- Internal heat with fluid deficiency: use *Ge Gen* with *Tian Hua Fen* (Radix Trichosanthis), *Huang Qi* (Radix Astragali), and *Mai Men Dong* (Radix Ophiopogonis). **Exemplar Formula:** *Yu Quan Wan* (Jade Spring Pills).
- *Xiao ke* (wasting and thirsting) syndrome: combine it with *Tian Hua Fen* (Radix Trichosanthis), *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae) to sedate heat, moisten dryness, and promote secretion of body fluids.
- Irritability: combine *Ge Gen* with *Zhi Zi* (Fructus Gardeniae).

Ge Gen (Radix Puerariae)

4. Lifts Yang Qi and Stops Diarrhea

Diarrhea due to damp-heat: *Ge Gen* separates the clear from the turbid, and with its ascending property, it helps to stop diarrhea. Clinical applications for disorders in the lower *jiao* include diarrhea with burning sensations of the anus, foul-smelling stools and fever. *Ge Gen* should be roasted to achieve this ascending function.

- Diarrhea due to damp-heat: add *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis). **Exemplar Formula:** *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction).

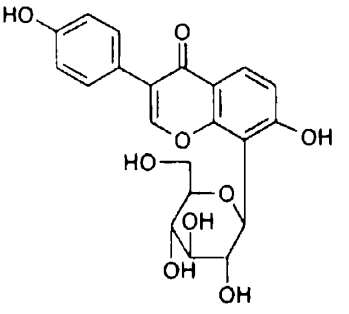
Chronic diarrhea from Spleen and Stomach qi prolapse: Due to its ascending nature, *Ge Gen* is commonly used to raise the yang qi of the Spleen and Stomach. Patients suffering from this condition will show fatigue, poor appetite and chronic diarrhea. The roasted form of *Ge Gen* should be used here to protect the middle *jiao*.

- Chronic diarrhea due to Spleen qi deficiency: use it with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Mu Xiang* (Radix Aucklandiae).

5. Treats Hypertension

Hypertension: *Ge Gen* has recently been used to successfully treat hypertension, headache, stiff neck, tinnitus and dizziness. It is also useful for coronary heart disease, angina pectoris and sudden deafness.

DOSAGE



10 to 20 grams. The maximum dosage of *Ge Gen* is 60 grams. The unprocessed herb has a stronger function to release pathogenic factors from the muscle layer and reduce fever. Roasting increases the warmth of any herb; therefore, roasted *Ge Gen* has a stronger effect to treat diarrhea, but is weaker for releasing the exterior than it would be in its unprocessed form.

CAUTIONS / CONTRAINDICATIONS

- Use of *Ge Gen* may be associated with nausea and vomiting because of its cool nature. Patients with cold in the Stomach, or yang deficiency, should use this herb with caution.
- *Ge Gen* also should be used with caution during the summer, when excess perspiration accompanies wind-heat invasion.

CHEMICAL COMPOSITION

Isoflavonoids 1.43 to 12.30% (puerarin, daidzin, daidzein, daidzein 4,7-diglucoside, formononetin, genistein), triterpenoid sapogenols.[1,2]

Puerarin

PHARMACOLOGICAL EFFECTS

- **Cardiovascular**: *Ge Gen* has marked effectiveness in dilating coronary blood vessels, relieving spasms of these vessels, and reducing the oxygen requirement of the cardiac muscles. In one laboratory study, administration of water or alcohol extracts of *Ge Gen* via intraperitoneal or subcutaneous injection was effective in treating rats with acute myocardial ischemia. *Ge Gen* also dilates the blood vessels of the brain and increases local perfusion.[3,4]
- **Antiplatelet**: Puerarin has been shown to inhibit platelet aggregation in mice.[5]
- **Antihypertensive**: Both water and alcohol extracts of *Ge Gen* have shown marked effectiveness in lowering blood pressure.[6]
- **Antipyretic**: *Ge Gen* has mild antipyretic action through vessel dilation.[7]
- **Antidiabetic**: Oral administration of *Ge Gen* in herbal decoction has been shown to have mild influence in lowering blood glucose levels.[8]
- **Antispasmodic**: *Ge Gen* has been shown to relieve intestinal muscle spasms and cramps.[9]
- **Antialcoholic**: Administration of isoflavonoids of *Ge Gen*, namely daidzin and daidzein, have been associated with marked antialcoholic effects in hamsters that were trained or genetically bred to prefer and consume large amounts of ethanol.[10]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disorder**: Intravenous injection of puerarin was evaluated for the treatment of coronary artery disorder. Thirty patients received this treatment for 6 days. The study authors reported a decrease of oxygen consumption requirement by cardiac muscle. The study concluded that puerarin injections may be useful in the treatment of coronary artery disease.[11]
- **Hypertension**: In one study, 222 patients with hypertension accompanied by neck stiffness and pain were treated with *Ge Gen*, with a rate of effectiveness between 78 and 90%.[12]

Ge Gen (Radix Puerariae)

- **Sudden deafness**: According to one report, 100 patients with sudden deafness were treated with *Ge Gen* pills and injectables. *Ge Gen* pills (1.5 to 4.5 grams of dried herb per dose) were administered orally three times daily and the injectables (100 mg of daidzein) were administered twice daily. The treatment duration ranged between 1 to 2 months, with an overall 76% rate of effectiveness.[13]
- **Migraine headache**: In one study, 53 patients with migraine headaches were given *Ge Gen* pills, containing 100 mg of puerarin, three times daily, for 2 to 22 days. The overall rate of effectiveness reported was 83%.[14]

HERB-DRUG INTERACTION

- **Antidiabetics:** It is prudent to use *Ge Gen* with caution with insulin, sulfonylureas, and other antidiabetic medications as the combination may have a synergistic effect, leading to hypoglycemia.[15] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]
- **Anticoagulant or antiplatelet drugs:** *Ge Gen* has an antiplatelet effect, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[16] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

No toxic reaction was observed following oral administration of *Ge Gen* powder at 10 to 20 g/kg for 3 days. The LD_{50} for intravenous injection of alcohol extract of *Ge Gen* is 2.1 +/- 0.12 g/kg in mice.[17]

SUPPLEMENT

- 葛花/葛花 *Ge Hua* (Flos Puerariae), the flower derived from the same plant as *Ge Gen*, is usually harvested as a bud, or before it completely blossoms. It was first cited in the *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century. It is sweet, neutral and enters the Stomach channel. It increases the metabolism of alcohol, relieves hangover and promotes the process of regaining sobriety. Common clinical applications include: excessive intake of alcohol, headache, fever, irritability, thirst, chest and abdominal fullness and distention, lack of appetite, vomiting of sour fluids. Both the root and the flower are believed to have the same property for treatment of alcoholism, hangover, and liver-related disorders caused by alcohol. *Ge Hua* is often combined with *Ren Shen* (Radix Ginseng), *Bai Dou Kou* (Fructus Amomi Rotundus) and *Chen Pi* (Pericarpium Citri Reticulatae) to relieve hangover, such as the combination *Ge Hua Jie Cheng San* (Pueraria Flower Powder for Detoxification and Awakening). Common dosage for *Ge Hua* is 3 to 12 grams in decoctions or in pills. *Ge Hua* is contraindicated in patients who are not experiencing hangover, as it may injure the yin with its strong dispersing property.

AUTHORS' COMMENTS

According to Dr. Chen Yuan-Da, *Ge Gen* is one of the best and most effective herbs for the treatment of acute neck and shoulder injuries. Immediate pain relief and increased range of motion can be achieved immediately when a large dose of *Ge Gen* is used in conjunction with *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix Glycyrrhizae).

Chai Hu (Radix Bupleuri)

柴胡

Pinyin Name: *Chai Hu*
Literal Name: "kindling of the barbarians"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: bupleurum, hare's ear, Chinese thorowax root, red thorowax root
Botanical Name: *Bupleurum chinense* DC. (*Bei Chai Hu*); *Bupleurum scorzoneraefolium* Willd. (*Nan Chai Hu*)
Pharmaceutical Name: Radix Bupleuri
Properties: bitter, acrid, cool
Channels Entered: Liver, Gallbladder

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes the Exterior and the Interior

***Shaoyang* syndrome:** *Chai Hu* (Radix Bupleuri), with its ascending and dispersing functions, is the key herb in treating *shaoyang* syndrome, a disorder in which the pathogenic factor is trapped halfway between the exterior and the interior. Due to the complexity of this condition, patients will exhibit both exterior and interior symptoms and signs, such as alternate spells of chills and fever, fullness and distention of the chest and hypochondriac region, a bitter taste in the mouth, dry throat, poor appetite, nausea and vertigo, irritability, and a wiry pulse. *Chai Hu* harmonizes *shaoyang* conditions, meaning that it will guide the trapped pathogenic factors outwards.

- *Shaoyang* syndrome: use *Chai Hu* with *Huang Qin* (Radix Scutellariae). *Chai Hu* eliminates the pathogenic factor from the exterior and *Huang Qin* clears heat from the interior. The combination of these two herbs eliminates pathogenic factors from both the exterior and the interior, and harmonizes half-exterior half-interior conditions. **Exemplar Formula:** *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).
- *Shaoyang* and *yangming* syndromes together: use this herb with *Huang Qin* (Radix Scutellariae), *Bai Shao* (Radix Paeoniae Alba), *Zhi Zi* (Fructus Gardeniae) and *Da Huang* (Radix et Rhizoma Rhei). **Exemplar Formula:** *Da Chai Hu Tang* (Major Bupleurum Decoction).
- Lingering exterior conditions with the pathogenic factor entering the *shaoyang* stage, with fever: combine *Chai Hu* with *Ge Gen* (Radix Puerariae) and *Huang Qin* (Radix Scutellariae). **Exemplar Formula:** *Chai Ge Jie Ji Tang* (Bupleurum and Pueraria Combination).

Malaria is considered a *shaoyang* disorder, as patients often have alternating spells of chills and fever. *Chai Hu* is used for its ability to dispel the pathogenic factor and harmonize the interior and exterior.

- Malaria: use *Chai Hu* with *Qing Hao* (Herba Artemisiae Annuae), *Bing Lang* (Semen Arecae), *Chang Shan* (Radix Dichroae) and *Cao Guo* (Fructus Tsaoko).

2. Spreads the Liver and Relieves Liver Qi Stagnation

Liver qi stagnation: Acrid and aromatic, *Chai Hu* has ascending and dispersing characteristics. It is commonly used to unblock Liver qi stagnation and spread Liver qi. Clinical manifestations of Liver qi stagnation include emotional distress, fullness and distention of the chest and hypochondrium, irritability, headache, eye disorders, breast swelling and pain, irregular menstruation, amenorrhea or menstrual cramps, and jaundice.

- Liver qi stagnation with stress and emotional distress: combine *Chai Hu* with *Bai Shao* (Radix Paeoniae Alba), *Dang Gui* (Radicis Angelicae Sinensis), and *Bo He* (Herba Menthae). **Exemplar Formula:** *Xiao Yao San* (Rambling Powder).
- Liver qi stagnation causing hypochondriac fullness and pain: use this herb with *Bai Shao* (Radix Paeoniae Alba), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Zhi Ke* (Fructus Aurantii). **Exemplar Formula:** *Chai Hu Shu Gan Tang* (Bupleurum Powder to Spread the Liver).
- Liver qi stagnation with cold extremities: add *Xiang Fu* (Rhizoma Cyperi), *Zhi Shi* (Fructus Aurantii Immaturus) and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Si Ni San* (Frigid Extremities Powder).
- Migraine headache: combine *Chai Hu* with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Xiang Fu*

Chai Hu (Radix Bupleuri)

(Rhizoma Cyperi) and *Bai Shao* (Radix Paeoniae Alba) to treat migraine headache caused by *shaoyang* fire attacking the head.

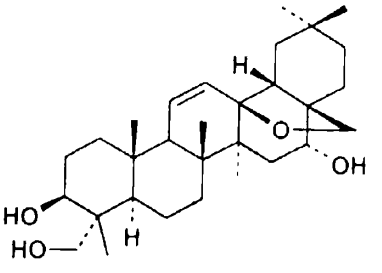
- Eye disorders: use it with *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), *Fang Feng* (Radix Saposhnikoviae) and *Jue Ming Zi* (Semen Cassiae) to treat eye disorders due to Liver fire rising, characterized by eye redness, swelling and pain.
- Irregular menstruation with pain and cramps: use *Chai Hu* with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Xiang Fu* (Rhizoma Cyperi) and *Mu Dan Pi* (Cortex Moutan) to nourish blood and regulate menstruation.
- Jaundice: add *Yin Chen Hao* (Herba Artemisiae Scopariae), *Da Huang* (Radix et Rhizoma Rhei), and *Zhi Zi* (Fructus Gardeniae) to clear damp-heat attacking both Liver and Gallbladder (leading to stasis of bile).

3. Lifts Yang Qi

Prolapsed organs: Because of its ascending nature, *Chai Hu* is commonly used to treat prolapse of internal organs caused by yang or qi deficiency. Clinical applications include prolapse of the rectum and uterus with shortness of breath, fatigue, hypermenorrhea, polyuria and other symptoms of yang and qi deficiency.

- Prolapse of internal organs: use *Chai Hu* with *Sheng Ma* (Rhizoma Cimicifugae) and *Huang Qi* (Radix Astragali) to raise yang and tonify qi. **Exemplar Formula:** *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).

DOSAGE



3 to 10 grams. The maximum dosage of *Chai Hu* is 60 grams. Treatment of organ prolapse relies on only a small dosage (3 grams) to raise yang qi. Treatment of malaria, however, requires a larger dose (10 to 15 grams). Unprocessed *Chai Hu* has a stronger effect to ascend and disperse, and is commonly used to release the exterior and reduce fever. The vinegar-fried herb more effectively regulates Liver qi, and is commonly used to relieve hypochondriac pain, abdominal pain, and menstrual cramps.

CAUTIONS / CONTRAINDICATIONS

- *Chai Hu* has ascending and dispersing functions, so prolonged use or overdose may consume yin. Therefore, this herb should be used with caution in yin-deficient patients, those with yin-deficient fire, Liver yang rising, or Liver wind rising.
- *Chai Hu* should not be used for an individual having only an exterior syndrome but no interior symptoms or condition. Use of *Chai Hu* under these circumstances may lead the pathogenic factor inward, making the disease more difficult to treat.

CHEMICAL COMPOSITION

Triterpenoids (saikosaponin A, B, C, D, E; saikogenin F, G, E; saikoside), essential oils 0.06-0.16% (r-heptalactone, r-decalactone), carbohydrates, flavone, coumarin, organic acid.[1,2]

Saikosaponin

PHARMACOLOGICAL EFFECTS

- **Analgesic and antipyretic**: According to laboratory studies, essential oil, saikosaponin, and decoction of *Chai Hu* all have demonstrated marked analgesic and antipyretic effects. The analgesic effect was partially blocked with oral ingestion of atropine at 25 mg/kg or subcutaneous injection of naloxone at 0.26 mg/kg.[3]
- **Sedative**: *Chai Hu* and saikosaponin have both demonstrated a sedative effect. Oral ingestion of saikosaponin at 200 to 800 mg/kg has a marked sedative effect in mice. At 500 mg/kg, saikosaponin prolonged sleeping time induced by barbiturates.[4]
- **Anti-inflammatory**: *Chai Hu* reduces inflammation by decreasing capillary permeability caused by histamine and 5-hydroxy-tryptamine.[5]
- **Hepatoprotective**: *Chai Hu* has demonstrated hepatoprotective activity in laboratory animals, especially against carbon tetrachloride-induced liver damage.[6]
- **Cholagogic**: *Chai Hu* has a marked cholagogic effect, achieved by increased production and excretion of bile.[7]
- **Antihyperlipidemic**: Saikosaponin A and D have demonstrated marked effectiveness in reducing triglycerides and moderate influence in reducing cholesterol.[8]
- **Immunostimulant**: *Chai Hu* stimulates both humoral and cellular immunity in mice.[9]
- **Antibiotic**: *Chai Hu* has demonstrated an inhibitory effect against β-hemolytic streptococcus, *Vibrio cholerae*, *Mycobacterium tuberculosis*, leptospira, some influenza viruses, poliomyelitis viruses, and hepatitis viruses.[10]

CLINICAL STUDIES AND RESEARCH

- **Common cold**: According to one study, 666 patients with common colds were treated with an herbal formulation consisting of *Chai Hu*, *Fang Feng* (Radix Saposhnikoviae), *Chen Pi* (Pericarpium Citri Reticulatae), *Bai Shao* (Radix Paeoniae Alba), *Gan Cao* (Radix Glycyrrhizae), and *Sheng*

Chai Hu (Radix Bupleuri)

Jiang (Rhizoma Zingiberis Recens). The patients received 12 grams of the herbal formulation three times daily. The rate of effectiveness was 79%.[11]

- **Cough**: In one study, 1,005 patients were treated with a preparation of *Chai Hu*. The etiology of cough included common cold, influenza, chronic bronchitis, pneumonia, and lung cancer. The effective rate was 85.5%.[12]
- **Infectious hepatitis**: Eleven patients with infectious hepatitis were treated with *Chai Hu* and *Gan Cao* (Radix Glycyrrhizae), at the dosage of 10 ml three times daily (equivalent to 15 grams of each herb per day). The dosage for children was adjusted accordingly. The overall results were satisfactory.[13]
- **Liver cirrhosis**: The combination of a *Chai Hu* and *Gan Cao* (Radix Glycyrrhizae) preparation has demonstrated preventative influence against liver cirrhosis in laboratory mice.[14]
- **Hyperlipidemia**: In one study, 86 patients with hyperlipidemia were treated with an herbal formula (3 grams of *Chai Hu* with *Luo Han Guo* (Fructus Momordicae) added as a flavoring agent) three times daily for 3 weeks per course of treatment. The study reported marked effectiveness in reduction of triglycerides.[15]
- **Erythema**: Thirteen patients with erythema were treated with 2 ml of *Chai Hu* injectable (equivalent to 4 grams of herb) twice daily for 10 days. The study reported good results in all patients.[16]
- **Globus hystericus**: According to one report, 25 patients with globus hystericus were treated with 2 ml of a *Chai Hu* preparation injected into *Tiantu* (CV 22) daily or every other day. After 4 treatments, 15 patients reported marked improvement, 6 reported moderate improvement, and 4 reported no response.[17]

HERB-DRUG INTERACTION

The following cases of herb-drug interaction are based on *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), an herbal formula that contains *Chai Hu* as the main ingredient. Additional information is not available at this time whether *Chai Hu*, as a single herb, is associated with the same risk of not.

- **Tolbutamide:** It was demonstrated in one study that the formula *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) reduced the bioavailability of tolbutamide after oral administration in rats. *Xiao Chai Hu Tang* was found to accelerate the initial absorption rate, reduce the area under the plasma concentration-time curve, and decrease the overall bioavailability of tolbutamide. The mechanism of interaction was not related to hepatic metabolism.[18]
- **Ofloxacin:** In an open, random-crossover investigation study with seven volunteers, a single dose of ofloxacin and a one-week dose of *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) were given concurrently. Using high-performance liquid chromatography to evaluate the bioavailability of ofloxacin, it was determined that there is no significant effect on the rate or extent of bioavailability of ofloxacin when given concurrently with *Xiao Chai Hu Tang*.[19]
- **Interferon:** It has been reported that increased risk of acute pneumonitis may be associated with use of interferon, Sho-saiko-to [*Xiao Chai Hu Tang* (Minor Bupleurum Decoction)], or both in combination. Among patients with chronic hepatitis or liver cirrhosis, the frequency of drug-induced pneumonitis was 0.5% in those given only interferon-alpha, 0.7% in those given only Sho-saiko-to, and 4.0% in those given both interferon-alpha and Sho-saiko-to. The herbs have not been shown to injure the lung tissues, but may over stimulate the neutrophils to release granulocytes elastase and oxygen radicals, which subsequently damage lung tissue. The fibroblasts that repair the damaged tissue may increase the risk of pulmonary fibrosis.[20,21]

TOXICOLOGY

Chai Hu has very low toxicity. The LD_{50} in mice is 1.19 g/kg via intraperitoneal injection for essential oil of *Chai Hu*, and 1.906 g/kg for saikosaponin.[22]

SUPPLEMENT

There are two types of *Chai Hu*:

- 北柴胡 *Bei Chai Hu* (Radix Bupleurum Chinensis), harvested in northern China, is generally used as the standard source for *Chai Hu*. It has an excellent ability to disperse stagnation and treat Liver qi stagnation accompanied by heat.
- 南柴胡 *Nan Chai Hu* (Radix Bupleurum Scorzoneraefolium), harvested in southern China, has a milder overall function.

AUTHORS' COMMENTS

Optimal treatment of headache requires use of channel-guiding herbs to deliver the therapeutic effect of the herbs to the affected area. The following is a list of the commonly used channel-guiding herbs:

- *Taiyang* channels: *Qiang Huo* (Rhizoma et Radix Notopterygii)
- *Shaoyang* channels: *Chai Hu* (Radix Bupleuri)
- *Yangming* channels: *Bai Zhi* (Radix Angelicae Dahuricae)
- *Taiyin* channels: *Cang Zhu* (Rhizoma Atractylodis)
- *Shaoyin* channels: *Xi Xin* (Herba Asari)
- *Jueyin* channels: *Wu Zhu Yu* (Fructus Evodiae)

Chai Hu (Radix Bupleuri), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Qiang Huo* (Rhizoma et Radix

Chai Hu (Radix Bupleuri)

Notopterygii), *Bai Zhi* (Radix Angelicae Dahuricae), and *Gao Ben* (Rhizoma Ligustici) all treat headaches. According to Dr. Li Shou-Shan, the differences between these herbs are as follows:

- *Chai Hu* treats temporal headaches.
- *Chuan Xiong* is most effective for headaches related to menstruation.
- *Qiang Huo* is more specific to occipital headaches.
- *Bai Zhi* focuses on frontal headaches.
- *Gao Ben* is best for vertex headaches.

Sheng Ma (Rhizoma Cimicifugae)

升麻

Pinyin Name: *Sheng Ma*
Literal Name: "ascending hemp"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cimicifuga, large trifoliolious bugbane rhizome, dahurian bugbane rhizome, skunk bugbane rhizome
Botanical Name: *Cimicifuga heracleifolia* Kom. (*Da San Ye Sheng Ma*); *Cimicifuga dahurica* (Turcz.) Maxim. (*Xing An Sheng Ma*); *Cimicifuga foetida* L. (*Sheng Ma*)
Pharmaceutical Name: Rhizoma Cimicifugae
Properties: acrid, sweet, cool
Channels Entered: Lung, Spleen, Large Intestine, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Vents Measles

Dermatological disorders: The ascending and dispersing influences of *Sheng Ma* (Rhizoma Cimicifugae) are commonly used to dispel wind-heat. Clinical applications include headache, fever, rash, itching, the initial stages of measles, or measles with incomplete eruptions.

- Measles: use *Sheng Ma* with *Ge Gen* (Radix Puerariae),

Sheng Ma (Rhizoma Cimicifugae)

Niu Bang Zi (Fructus Arctii), *Huang Qin* (Radix Scutellariae) and *Bo He* (Herba Menthae).

- Incomplete expression of measles: combine it with *Ge Gen* (Radix Puerariae), *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Sheng Ma Ge Gen Tang* (Cimicifuga and Kudzu Decoction).
- Facial skin disorders: add *He Ye* (Folium Nelumbinis), *Cang Zhu* (Rhizoma Atractylodis) and *Gan Cao* (Radix Glycyrrhizae).

2. Clears Heat and Eliminates Toxins

Various heat-toxin disorders: The disorder in which heat-toxins attack the *yangming* channel is characterized by headache, swelling and pain of the gums, and mouth and tongue ulceration. The attack of heat toxins in the throat is characterized by throat pain and soreness.

- Swollen, painful gums or oral ulcers: use *Sheng Ma* with *Huang Lian* (Rhizoma Coptidis), *Sheng Di Huang* (Radix Rehmanniae) and *Mu Dan Pi* (Cortex Moutan). **Exemplar Formula:** *Qing Wei San* (Clear the Stomach Powder).
- Throat pain and soreness: combine it with *Jie Geng* (Radix Platycodonis) and *Xuan Shen* (Radix Scrophulariae).
- Febrile diseases with maculae: add *Shi Gao* (Gypsum Fibrosum) and *Da Qing Ye* (Folium Isatidis).
- Toothache: use it with *Huang Lian* (Rhizoma Coptidis), *Shi Gao* (Gypsum Fibrosum) and *Sheng Di Huang* (Radix Rehmanniae).
- Carbuncles without abscess: combine this herb with *Lian Qiao* (Fructus Forsythiae), *Da Huang* (Radix et Rhizoma Rhei) and *Bai Lian* (Radix Ampelopsis).
- Carbuncles with abscesses and ulceration: use it with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae) and *Pu Gong Ying* (Herba Taraxaci).

3. Raises Yang Qi

Prolapse: The ascending influence of *Sheng Ma* is commonly used to treat prolapse of internal organs caused by yang or qi deficiency. Clinical applications include prolapse of the rectum and uterus with shortness of breath, fatigue, and other symptoms of yang and qi deficiencies. *Sheng Ma* also treats profuse bleeding resulting from qi deficiency. Processing the herb with honey enhances this function.

- Prolapse of internal organs: add *Chai Hu* (Radix Bupleuri) and *Huang Qi* (Radix Astragali) to raise yang and tonify qi. **Exemplar Formula:** *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).

DOSAGE

3 to 10 grams. The maximum dosage of *Sheng Ma* is 15 grams. Use smaller doses to raise yang qi. Use larger dosages to clear heat and eliminate toxins. Honey-processed *Sheng Ma* more effectively lifts yang qi.

CAUTIONS / CONTRAINDICATIONS

- Due to its ascending and floating nature, *Sheng Ma* should be used with caution in patients who have yin deficiency, bleeding in the upper body, Liver yang rising, heat signs, complete eruption of measles, nausea due to reversed Stomach qi, or dyspnea due to reversed Lung qi.

OVERDOSAGE

Overdose of *Sheng Ma* is associated with adverse reactions such as nausea, vomiting, headache, muscle stiffness, convulsions, and delirium.[1]

CHEMICAL COMPOSITION

Triterpenoids 4.17% (cimigenol, cimigenol xyloside, dahurinol, 12-hydroxycimigenol arabinoside), visnagin, visamminol, norvisnagin, cimifugin, isoferulic acid, ferulic acid, caffeic acid, cimicifugoside, cimicifogine.[2]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** *Sheng Ma* has an inhibitory effect on the cardiovascular system to lower blood pressure and heart rate.[3]
- **Antibiotic:** It has an inhibitory effect against *Mycobacterium tuberculosis*, dermatomyces, and many pathogenic fungi.[4]
- **Antipyretic:** Oral ingestion of *Sheng Ma* extract at 1 to 2 g/kg lowered body temperature in rats with artificially-induced fever.[5]
- **Others:** *Sheng Ma* has mild anti-inflammatory and analgesic effects.[6]

CLINICAL STUDIES AND RESEARCH

- **Gastric prolapse:** Intramuscular injection of an herbal preparation was evaluated for its effect in treating gastric prolapse. The herbal injectables contained *Sheng Ma* and *Huang Qi* (Radix Astragali). Acupuncture points included *Zusanli* (ST 36), *Weishu* (BL 21), and *Pishu* (BL 20), used in rotation in each treatment. The treatment protocol was to inject 3 ml of the preparation to each point one time daily for 6 days, followed by 1 day of rest. The patients were also advised to exercise. The length of treatment was between 1 and 3 months. Out of 146 patients, the effective rate was 96.7%.[7]
- **Severe rectal prolapse:** According to one report, 32 patients with severe rectal prolapse underwent an intensive herbal treatment that included administration of topical and oral herbs. The topical solution was prepared by adding 30 grams of *Mang Xiao* (Natrii Sulfas) and 9 grams of *Gan Cao* (Radix Glycyrrhizae) to 2,500 to 3,000 ml of boiling water, for 5 minutes. The oral herbal decoction consisted of 30 grams of *Dang Shen* (Radix Codonopsis), 9 grams of *Sheng Ma* and 6 grams of *Gan Cao* (Radix Glycyrrhizae). Patients

Sheng Ma (Rhizoma Cimicifugae)

were advised to sit and soak in the herbal solution twice daily, and take the herbal decoction two to four times daily. Of the 32 patients, 28 reported marked improvement and 4 reported moderate improvement.[8]

AUTHORS' COMMENTS

Sheng Ma, Chai Hu (Radix Bupleuri), and *Ge Gen* (Radix Puerariae) are three herbs with excellent ascending functions. They are commonly used to treat prolapse of internal organs, such as the stomach, uterus, and rectum.

Dan Dou Chi (Semen Sojae Praeparatum)

淡豆鼓

Pinyin Name: *Dan Dou Chi*
Alternate Chinese Names: *Xiang Dou Chi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: soja, soybean, fermented soybean
Botanical Name: *Glycine max* (L.) Merr.
Pharmaceutical Name: Semen Sojae Praeparatum
Properties: acrid, sweet, slightly bitter, cold
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior

Exterior syndromes: *Dan Dou Chi* (Semen Sojae Praeparatum) is relatively mild and is often used as a spice or food. The gentle action of this herb to dispel exterior pathogenic factors makes it suitable for irritability or exterior syndromes in chronic, deficiency or elderly patients. It can be used for both wind-cold and wind-heat syndromes.

- Wind-cold syndromes in the early stage: combine *Dan Dou Chi* with *Cong Bai* (Bulbus Allii Fistulosi) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Wind-cold syndrome with tight pulse and no perspiration: use it with *Ma Huang* (Herba Ephedrae), and *Ge Gen* (Radix Puerariae).
- Wind-heat syndromes: add *Bo He* (Herba Menthae), *Jin Yin Hua* (Flos Lonicerae) and *Lian Qiao* (Fructus Forsythiae). **Exemplar Formula:** *Yin Qiao San* (Honeysuckle and Forsythia Powder).

2. Eliminates Irritability and Harmonizes the Middle *Jiao*

Irritability and feelings of chest oppression: With its dispersing activity, *Dan Dou Chi* clears heat and relieves irritability and feelings of oppression in the chest. Furthermore, it clears heat in the Stomach to eliminate food stagnation from the gastrointestinal tract.

- Heat in the chest with irritability and insomnia: use *Dan Dou Chi* with *Zhi Zi* (Fructus Gardeniae). **Exemplar Formula:** *Zhi Zi Chi Tang* (Gardenia and Soja Decoction).
- Diarrhea from damp-heat in the middle *jiao*: add *Huang Lian* (Rhizoma Coptidis) and *Xie Bai* (Bulbus Allii Macrostemonis).

Dan Dou Chi (Semen Sojae Praeparatum)

- Lack of appetite because of Spleen deficiency or food stagnation: use *Dan Dou Chi* individually in decoction.

DOSAGE

10 to 15 grams. The maximum dosage of *Dan Dou Chi* is 50 grams. *Dan Dou Chi* has different properties and functions depending on the processing methods chosen. To maximize heat-clearing effect, *Dan Dou Chi* should be cooked prior to the addition of other herbs. To maximize the exterior-releasing function, this herb should be added to the decoction last and cooked only for a short time.

- Dry-frying increases its function to stop perspiration.
- Dry-frying with black beans changes the thermal property to neutral-to-warm.
- Dry-frying with salt enhances its emetic effect.
- Dry-frying with garlic helps to stop bleeding.
- Dry-frying with grain-based liquor enhances its ability to dispel wind.
- Dry-frying with *Cong Bai* (Bulbus Allii Fistulosi) enhances its diaphoretic effect.
- Dry-frying with *Xie Bai* (Bulbus Allii Macrostemonis) improves its effectiveness in treating diarrhea.

CHEMICAL COMPOSITION

Lipids, protein, carbohydrates, vitamin B_1, B_2.

PHARMACOLOGICAL EFFECTS

Diaphoretic: *Dan Dou Chi* has a very mild diaphoretic effect.[1]

SUPPLEMENT

- 大豆黄卷 *Da Dou Huang Juan* (Semen Glycines Germinatum), first cited in *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is the germinated form of unprocessed *Dan Dou Chi*. *Da Dou Huang Juan* is normally processed with *Ma Huang* (Herba Ephedrae) to enhance its diaphoretic effect. *Da Dou Huang Juan* is neutral, sweet and enters the Stomach channel. Its functions include releasing the exterior through diaphoresis, clearing damp-heat, raising yang qi and opening channels and collaterals. It is used for summer-heat or damp-heat combined with exterior patterns. It can also be used to treat spasms caused by *bi zheng* (painful obstruction syndrome). The normal dosage of *Da Dou Huang Juan* is 10 to 15 grams.

AUTHORS' COMMENTS

Dan Dou Chi can be either warm or cold depending on the herb with which it is processed. It is cold in nature and if processed with *Sang Ye* (Folium Mori) and *Qing Hao* (Herba Artemisiae Annuae). On the other hand, it is warm in thermal property if it is processed with *Zi Su Ye* (Folium Perillae) and *Ma Huang* (Herba Ephedrae). When using *Dan Dou Chi*, it is important to determine how it has been processed, so that it can be used appropriately.

Wu Tian (Radix et Folium Viticis Quinatae)

烏甜　乌甜

Pinyin Name: *Wu Tian*
Literal Name: "black sweet"
Alternate Chinese Names: *Wu Tian Ye, Pu Jiang Mu, Shan Pu Jiang, Mu Jing, Shan Mu Jing*
English Name: vitex root and leaves
Botanical Name: *Vitex quinata*
Pharmaceutical Name: Radix et Folium Viticis Quinatae
Properties: sweet, acrid, bland, cold
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Lung Heat, Cools Blood and Arrests Cough

Lung heat: *Wu Tian* (Radix et Folium Viticis Quinatae) treats various symptoms of Lung heat such as cough and hemoptysis.

- Cough caused by yin-deficient heat: use *Wu Tian* with *Bai He* (Bulbus Lilii), *Shi Hu* (Herba Dendrobii) and *Sang Bai Pi* (Cortex Mori).
- Dry cough: combine it with *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *E Jiao* (Colla Corii Asini) and *Pi Pa Ye* (Folium Eriobotryae).
- Epistaxis or hematemesis: use it with *Bai He* (Bulbus Lilii), *Mai Men Dong* (Radix Ophiopogonis), charred *Ai Ye* (Folium Artemisiae Argyi) and charred *Ce Bai Ye* (Cacumen Platycladi).
- Hemoptysis: add *Sang Ye* (Folium Mori), *Ce Bai Ye* (Cacumen Platycladi), *Zhu Ye* (Herba Phyllostachys) and *Ji Xue Teng* (Caulis Spatholobi).
- Chest congestion: use *Wu Tian* with *Chai Hu* (Radix Bupleuri), *Pi Pa Ye* (Folium Eriobotryae), *Ze Lan* (Herba Lycopi), *Ou Jie* (Nodus Nelumbinis Rhizomatis), *Zhi Ke* (Fructus Aurantii) and *Jie Geng* (Radix Platycodonis).
- Cough with profuse sputum: add *Jie Geng* (Radix Platycodonis) and *Gua Lou Shi* (Fructus Trichosanthis).

DOSAGE

3 to 12 grams in decoction.

AUTHORS' COMMENTS

Both *Wu Tian* and *Fu Rong* (Radix Hibisci) enter the Lung and treat Lung heat. However, *Wu Tian* treats Lung heat manifesting in cough or hemoptysis, while *Fu Rong* treats nasal disorders such as sinusitis.

Fu Ping (Herba Spirodelae)

浮萍 浮萍

Pinyin Name: *Fu Ping*
Literal Name: "floating spirodela"
Alternate Chinese Names: *Sui Ping, Tian Ping*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: spirodela, common duckweed
Botanical Name: *Spirodela polyrrhiza* (L.) Schleid.
Pharmaceutical Name: Herba Spirodelae
Properties: acrid, cold
Channels Entered: Lung, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Releases the Exterior and Induces Diaphoresis

Wind-heat: Acrid and cold, *Fu Ping* (Herba Spirodelae) has ascending and dispersing properties. It is commonly used to dispel wind-heat through diaphoresis. Common symptoms include fever, headache, absence of perspiration, thirst, sore throat, and a superficial, rapid pulse.

- Wind-heat syndrome: combine *Fu Ping* with *Jing Jie* (Herba Schizonepetae), *Bo He* (Herba Menthae), and *Lian Qiao* (Fructus Forsythiae).
- Wind-heat syndrome with thirst: use it with *Tian Hua Fen* (Radix Trichosanthis).

2. Vents Rashes and Stops Itching

Incomplete eruption of measles or rashes with itching: *Fu Ping* is commonly used for symptoms of wind attacking the skin, manifesting as measles, urticaria, rash and itching.

- Incomplete expression of measles: add this herb to *Bo He* (Herba Menthae), *Niu Bang Zi* (Fructus Arctii), and *Chan Tui* (Periostracum Cicadae).
- Itching: use it with *Niu Bang Zi* (Fructus Arctii) and *Bo He* (Herba Menthae).

3. Eliminates Water and Reduces Swelling and Edema

- **Exterior syndrome with edema and fever:** *Fu Ping* regulates water circulation and eliminates water accumulation. It is commonly used for patients with exterior syndromes accompanied by edema.

DOSAGE

3 to 10 grams. The maximum dosage of *Fu Ping* is 30 grams. Generally, this herb is added only in the last 5 to 10 minutes of cooking a decoction, to preserve its potency. *Fu Ping* may be used individually or in combination with other herbs, as a decoction or topical substance.

CAUTIONS / CONTRAINDICATIONS

- *Fu Ping* should be used with caution in patients who have spontaneous perspiration from qi deficiency, night sweating and/or thirst and dry mouth caused by yin deficiency.
- *Fu Ping* should also be used with caution in cases of edema caused by yang deficiency.

CHEMICAL COMPOSITION

Flavones (orientin, vitexin, isoorientin, isovitexin, rutin, luteolin-7-O-glucoside), stigmasterol, campesterol, β-sitosterol, protein 18-25% (albumins, glutelins), lycopersene.[1]

PHARMACOLOGICAL EFFECTS

- *Fu Ping* has mild cardiotonic, diuretic and antipyretic effects.[2]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 178-179
2. *Zhong Yao Xue* (Chinese Herbology), 1998; 108:109

Shuang Liu Huang (Herba Vernoniae Patulae)

雙柳黃 双柳黄

Pinyin Name: *Shuang Liu Huang*
Literal Name: "double willow yellow"
Alternate Chinese Names: *Xian Xia Hua, Gou Zi Hua, Gou Zi Cai*
English Name: half-spreading ironweed
Botanical Name: *Vernonia patula* (Ait.) Merr.
Pharmaceutical Name: Herba Vernoniae Patulae
Properties: bitter, neutral
Channels Entered: Lung, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Heat

Shuang Liu Huang (Herba Vernoniae Patulae) may be used alone to treat common colds or influenza characterized by wind-heat. It also relieves headache.

- Exterior wind-heat: use 3 grams of *Shuang Liu Huang*.
- Headache: use 10 grams of *Shuang Liu Huang*.

2. Clears Heat, Stops Diarrhea

Shuang Liu Huang clears heat, stops diarrhea, and is often incorporated in herbal formulas to treat traveler's diarrhea or dysentery.

DOSAGE

3 to 10 grams in decoction.

CHEMICAL COMPOSITION

Flavonoids, terpenoids, essential oil, amino acids, organic acids.[1]

Mao Zi Dun Tou (Herba Abutilon Indicum)

帽仔盾頭
帽仔盾头

Pinyin Name: *Mao Zi Dun Tou*
Alternate Chinese Names: *Mo Pan Cao, Mi Lan Cao, Si Mu Cao, Er Xiang Cao, Jin Hua Cao*
English Name: Indian abutilon
Botanical Name: *Abutilon indicum* (L.) Sweet.
Pharmaceutical Name: Herba Abutilon Indicum
Properties: sweet, neutral
Channels Entered: Lung, Liver, Gallbladder, Spleen
Safety Index: slightly toxic

Mao Zi Dun Tou (Herba Abutilon Indicum)

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Heat

Wind-heat: *Mao Zi Dun Tou* (Herba Abutilon Indicum) may be used to dispel wind-heat from the exterior with symptoms of sore throat, fever, cough with yellow sputum, or yellow nasal discharge.

- Wind-heat: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Huang Qin* (Radix Scutellariae), *Pu Gong Ying* (Herba Taraxaci), *Feng Wei Cao* (Herba Pteris) and *Ban Lan Gen* (Radix Isatidis).

2. Separates Turbidity, Opens Orifices, Invigorates Blood, and Reduces Swellings and Abscesses

Mao Zi Dun Tou is commonly used to treat deafness, tinnitus and ear pain. It has also been used to treat abscesses, swelling and splenomegaly.

- Deafness, tinnitus and ear pain arising from fire in the Liver and Gallbladder channels: use this herb with *Long Dan Cao* (Radix Gentianae), *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Hu Yao Huang* (Herba Leucas Mollissimae), *Ma Bian Cao* (Herba Verbenae) and *Qian Li Guang* (Herba Senecionis Scandens).
- Abscess and swelling: combine it with *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae), *Tian Hua Fen* (Radix Trichosanthis), *Xia Ku Cao* (Spica Prunellae), *Mu Li* (Concha Ostreae) and *Zao Jiao Ci* (Spina Gleditsiae).
- Splenomegaly: use *Mao Zi Dun Tou* with *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Mu Li* (Concha Ostreae), *Bie Jia* (Carapax Trionycis), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae) and *Tian Hua Fen* (Radix Trichosanthis).

3. Strengthens the Spleen and Promotes Digestion

Mao Zi Dun Tou treats chronic indigestion or weak digestion in children.

- Indigestion: combine it with *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Gan Cao* (Radix Glycyrrhizae), *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus) and *Shen Qu* (Massa Fermentata).

DOSAGE

1 to 3 grams.

CAUTIONS / CONTRAINDICATIONS

- *Mao Zi Dun Tou* is slightly toxic. Therefore, it should not be prescribed in excess of 5 (five) grams.

AUTHORS' COMMENTS

Mao Zi Dun Tou has long been used as a medicinal herb in various countries. It has been used in the Philippines, to treat constipation by lubricating the bowels; in India, to relieve cystitis by promoting urination; and in Malaysia, to relieve toothache and ear pain via topical application. Other historical applications indicate sedative, aphrodisiac, antitussive and anti-inflammatory uses.

Chapter 1 summary

— Exterior-Releasing Herbs

SECTION 1: WIND-COLD RELEASING HERBS

Name	Similarities	Differences
Ma Huang (Herba Ephedrae)	Induce perspiration, disperse cold	Dilates the Lung, relieves wheezing, regulates water, relieves edema
Gui Zhi (Ramulus Cinnamomi)		Warms the channels, unblocks the yang, relieves pain in the upper extremities
Zi Su Ye (Folium Perillae)	Dispel wind-cold, harmonize Spleen and Stomach	Regulates Spleen and Stomach qi, calms fetus and detoxifies
Sheng Jiang (Rhizoma Zingiberis Recens)		Warms the Stomach, relieves vomiting, detoxifies
Xiang Ru (Herba Elsholtziae seu Moslae)		Relieves summer-dampness, regulates water, relieves edema
Jing Jie (Herba Schizonepetae)	Dispel wind, release the exterior	Vents rashes, stops bleeding (the charred 'ash' form)
Fang Feng (Radix Saposhnikoviae)		Dispels both external and internal wind
Qiang Huo (Rhizoma et Radix Notopterygii)		Disperses cold, dries dampness, relieves upper body pain, treats occipital headache
Gao Ben (Rhizoma Ligustici)		Treats vertex headache
Ji Xiang Teng (Caulis Paederiae)		Relieves pain, clears toxins
Cong Bai (Bulbus Allii Fistulosi)		Disperses coldness, eliminates toxins to treat sores topically
Bai Zhi (Radix Angelicae Dahuricae)	Disperse wind-cold, open nasal passages	Treats frontal headache, clears turbid nasal discharge
Cang Er Zi (Fructus Xanthii)		Relieves continuous nasal discharge, treats headache
Xin Yi Hua (Flos Magnoliae)		Restores sense of smell, treats clear, watery nasal discharge
E Bu Shi Cao (Herba Centipedae)		Clears nose and removes visual obstruction

General Characteristics of Wind-Cold Releasing Herbs:

Taste: acrid
Thermal property: warm
Channels entered: Lung
Therapeutic actions: dispel wind-cold, release the exterior, induce diaphoresis

These herbs treat wind-cold, a condition characterized by aversion to wind and cold, chills more prominent than fever, body aches, the absence of perspiration, a thin, white tongue coating and superficial, tight pulse. Additional uses include treatment of dyspnea, cough, wheezing, edema, *bi zheng* (painful obstruction syndrome), arthritis, and dermatological disorders including but not limited to sores and abscesses.

Ma Huang (Herba Ephedrae) and ***Gui Zhi*** (Ramulus Cinnamomi) disperse wind-cold in the *taiyang* channels.

Ma Huang is the stronger of the two to induce perspiration and release the exterior. Therefore, it is more suitable for exterior excess conditions. In addition, *Ma Huang* dilates the Lung to relieve dyspnea and wheezing, and increases urine output to reduce edema.

Gui Zhi, moderate in potency, treats both excess and deficiency cases of wind-cold invasion. *Gui Zhi* warms the channels, the chest and the *chong* (thoroughfare) channel to treat *bi zheng* (painful obstruction syndrome), arthritis, chest pain and palpitations caused by cold and phlegm accumulation, and irregular menstruation or lower abdominal pain and coldness.

Chapter 1 summary

Zi Su Ye (Folium Perillae) disperses wind-cold, and regulates Spleen and Stomach qi. It expands the chest to relieve congestion, relieves nausea and vomiting, stabilizes the fetus during pregnancy, and relieves abdominal pain and diarrhea associated with seafood poisoning, all of which are problems caused by qi stagnation in the middle *jiao*. *Zi Su Ye*'s function of diaphoresis is not as strong as that of *Ma Huang* or *Gui Zhi*; it is therefore more suitable for clearing mild wind-cold invasions.

Sheng Jiang (Rhizoma Zingiberis Recens), gentle in nature, is used more frequently for milder cases of wind-cold invasion. With its excellent influence of harmonizing the middle *jiao*, *Sheng Jiang* increases the appetite, and relieves abdominal pain, diarrhea, nausea, and vomiting. It counteracts the toxicity of herbs such as *Ban Xia* (Rhizoma Pinelliae) and *Tian Nan Xing* (Rhizoma Arisaematis).

Xiang Ru (Herba Elsholtziae seu Moslae) is a key herb for treating summer night invasions of wind-cold-dampness manifesting in aversion to cold, fever, headache, abdominal pain, vomiting, diarrhea, and the absence of perspiration. It harmonizes the middle *jiao*, transforms dampness, and treats edema accompanied by dysuria.

Jing Jie (Herba Schizonepetae) and ***Fang Feng*** (Radix Saposhnikoviae) are both excellent herbs to disperse wind.

Jing Jie has a stronger diaphoretic function than *Fang Feng*. *Jing Jie* is acrid but mild, slightly warm but not drying, and depending on with what other herbs it is prescribed, disperses either wind-cold or wind-heat. Because the strength of *Jing Jie* is in dispelling wind, it treats various itching and dermatological disorders in which *wind* is the underlying cause. Charred *Jing Jie* stops bleeding.

Fang Feng dispels wind, cold and dampness. It relieves pain in the head, eyes, throat, body, and joints. It relieves arthritis caused by *bi zheng* (painful obstruction syndrome), or spasms, cramps or tetany from internal Liver wind.

Qiang Huo (Rhizoma et Radix Notopterygii) and ***Gao Ben*** (Rhizoma Ligustici) relieve arthritic pain, especially in the upper body.

Qiang Huo relieves pain of the *taiyang* Urinary Bladder channel, when there is neck and occipital stiffness and pain.

Gao Ben is best for vertex headaches.

Ji Xiang Teng (Caulis Paederiae) dispels wind, relieves pain, and clears toxins.

Cong Bai (Bulbus Allii Fistulosi) is relatively weak, and relieves mild cases of exterior wind-cold. It also warms the body to treat yang deficiency. Applied topically, *Cong Bai* alleviates carbuncles.

Bai Zhi (Radix Angelicae Dahuricae), acrid and aromatic, addresses wind-cold characterized by frontal headaches, supra-orbital pain, toothache and nasal obstruction. Because it also dries dampness, *Bai Zhi* treats *bi zheng* (painful obstruction syndrome), dermatological disorders that involve swelling and pus, and lower abdominal coldness and pain with leukorrhea.

Cang Er Zi (Fructus Xanthii) disperses wind, dispels dampness and induces perspiration. It is primarily used for headaches, yellow nasal discharge, itching rashes, *bi zheng* (painful obstruction syndrome) and spasms and cramps. However, it is slightly toxic and should be used with caution.

Xin Yi Hua (Flos Magnoliae) disperses wind-cold, opens nasal passages and relieves headache. It is best for sinusitis or to aid wind-cold sufferers who have lost their sense of smell because of nasal obstruction.

E Bu Shi Cao (Herba Centipedae) releases wind-cold to open nasal passages and clear visual obstruction. It also dispels wind-damp to benefit the joints.

Chapter 1 summary

SECTION 2: WIND-HEAT RELEASING HERBS

Name	Similarities	Differences
Bo He (Herba Menthae)	Disperse wind-heat, benefit the throat, vent rashes	Clears the head, weaker in dispersing wind-heat
Niu Bang Zi (Fructus Arctii)		Soothes sore throat, clears heat and eliminates toxins
Chan Tui (Periostracum Cicadae)		Benefits voice, relieves spasms, itching, superficial visual obstruction
Sang Ye (Folium Mori)	Disperse wind-heat, clear heat in the Liver, brighten the eyes	Clears the Lung, stops coughing, stops bleeding
Ju Hua (Flos Chrysanthemi)		Stronger in clearing heat in the Liver, clears toxins
Man Jing Zi (Fructus Viticis)		Relieves headache
Mu Zei (Herba Equiseti Hiemalis)		Stops bleeding
Yi Zhi Xiang (Herba Vernoniae Cinereae)		Clears Lung and Liver heat, clears toxins
Ge Gen (Radix Puerariae)	Relieve wind-heat, raise the yang	Relieves stiff neck, generates fluids, vents rashes
Chai Hu (Radix Bupleuri)		Harmonizes *shaoyang* channels, disperses Liver qi stagnation
Sheng Ma (Rhizoma Cimicifugae)		Vents rashes, clears heat and eliminates toxins
Dan Dou Chi (Semen Sojae Praeparatum)	Disperse wind-heat	Relieves irritability
Wu Tian (Radix et Folium Viticis Quinatae)		Cools blood, relieves cough
Fu Ping (Herba Spirodelae)		Dispels dampness
Shuang Liu Huang (Herba Vernoniae Patulae)		Clears heat and relieves diarrhea
Mao Zi Dun Tou (Herba Abutilon Indicum)		Opens sensory orifices, reduces swellings and abscesses

General Characteristics of Wind-Heat Releasing Herbs:

Taste: acrid
Thermal property: cool, cold
Channels entered: Lung, Liver
Therapeutic actions: dispel wind-heat, release the exterior, reduce swelling and inflammation

These herbs treat wind-heat, a condition characterized by sore throat, aversion to wind and cold, fever, dry throat, thirst, thin white or thin yellow tongue coating, and superficial, rapid pulse. They also address headache, red eyes, cough, rashes, and Liver qi stagnation.

Bo He (Herba Menthae), cool and acrid, induces perspiration. It clears wind-heat from the head, vents rashes and treats initial stages of warm febrile disorders in the absence of perspiration; it relieves headache, red eyes and sore throat, alleviates canker sores, and addresses itching of the skin with rashes that have not erupted. It is slightly aromatic and relieves chest and hypochondriac fullness and distention caused by Liver qi stagnation. This herb should be added at the end of cooking, and cooked only briefly, as the active constituents evaporate or become deactivated by prolonged exposure to heat.

Niu Bang Zi (Fructus Arctii), acrid, bitter and cold, disperses wind-heat, clears the Lung, dispels phlegm, vents rashes, eliminates toxins, and reduces swelling. It is used when wind-heat has begun turning into Lung heat, with yellow sputum, incomplete eruption of rashes, sore throat, carbuncles and other toxic sores.

Chan Tui (Periostracum Cicadae) is sweet and cold. In addition to dispersing wind-heat to promote the eruption of measles and relieve itching, *Chan Tui* benefits the throat, restores normal voice, and benefits the eyes to remove superficial visual obstructions.

Chapter 1 summary

Sang Ye (Folium Mori) and ***Ju Hua*** (Flos Chrysanthemi) clear the head, dispel wind-heat, sedate the Liver and brighten the eyes. They treat wind-heat disorders involving dizziness, or Liver yang rising that causes red eyes, dizziness and vertigo.

Sang Ye is cooler, and functions more strongly to disperse exterior wind-heat. Thus, it is used more to relieve cough, moisten the Lung, cool blood and stop bleeding.

Ju Hua more strongly sedates rising Liver yang. It also eliminates toxins to treat sores and carbuncles.

Man Jing Zi (Fructus Viticis) disperses wind-heat in the head, relieving headache, clearing red eyes, and soothing painful, swollen gums. *Man Jing Zi* is also useful in treatment of *bi zheng* (painful obstruction syndrome).

Mu Zei (Herba Equiseti Hiemalis) clears wind-heat, brightens the eyes, removes superficial visual obstruction and treats wind and heat in the Liver channel that cause red eyes, excessive tearing and visual disturbances. *Mu Zei* stops rectal or hemorrhoidal bleeding.

Yi Zhi Xiang (Herba Vernoniae Cinereae) disperses wind-heat, clears Lung heat, and purges Liver fire. Thus, it treats sore throat, bronchitis, conjunctivitis and dysentery.

Ge Gen (Radix Puerariae), light and ascending in nature, relieves muscle tightness and pain in the upper body. It also relieves fever, facilitates the eruption of rashes, generates body fluids and relieves thirst.

Chai Hu (Radix Bupleuri) raises yang qi, relieves exterior conditions, treats *shaoyang* disorders and spreads Liver qi. It treats pathogenic factors trapped between the *taiyang* and *yangming* stages, manifesting in alternating chills and fever. Other indications for use of *Chai Hu* are: organ prolapse (such as the rectum and uterus), Liver qi stagnation with chest and hypochondriac distention, fullness and pain, irregular menstruation and pre-menstrual syndrome.

Sheng Ma (Rhizoma Cimicifugae) lifts yang qi and relieves exterior conditions. It clears heat, eliminates toxins, and promotes the eruption of rashes. Clinical indications include incomplete expression of rashes, sore throat, canker sores, and toxic sores and carbuncles. Compared to *Chai Hu*, *Sheng Ma* has similar but stronger properties to raise yang qi and is mostly used for rectal and uterine prolapse, as seen in *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).

Dan Dou Chi (Semen Sojae Praeparatum) releases the exterior, induces perspiration and counters both wind-heat and wind-cold invasions. It also disperses heat in the body created by stagnation, to relieve irritability, insomnia or chest discomfort.

Wu Tian (Radix et Folium Viticis Quinatae) clears Lung heat, cools the blood and stops cough.

Fu Ping (Herba Spirodelae), acrid and cold in property, induces perspiration, relieves exterior conditions, and promotes water circulation. Clinical applications include edema, dysuria, incomplete eruption of rashes, itching of the skin, and wind-heat accompanied by fever and the absence of sweating.

Shuang Liu Huang (Herba Vernoniae Patulae) releases wind-heat from the exterior to treat common colds and influenza, and dispels heat from the Large Intestine to treat diarrhea.

Mao Zi Dun Tou (Herba Abutilon Indicum) dispels wind-heat from the exterior. It also opens sensory orifices by reducing swelling and abscesses. It treats common cold, deafness and tinnitus.

Chapter 2

— Heat-Clearing Herbs

Definition: Heat-clearing herbs address imbalances caused by excessive heat, whether mild or extreme, at various levels of pathological penetration of the body, by clearing heat, purging fire, or cooling organs or substances injured by heat.

Heat is a pathogenic factor in many disease patterns. Warmth, heat and fire refer to degrees of severity of the same pathological entity, with *warmth* being the mild expression, *heat* the moderate condition, and *fire* the extreme. Heat-clearing herbs address a range of heat disorders:

- invasion of heat from the exterior to the interior
- excess heat and fire affecting internal organs
- excess heat at *ying* (nutritive) and *xue* (blood) levels
- accumulation of damp-heat in various areas of the body
- febrile disorders
- formation of pus and abscesses in or outside of the body
- conditions characterized as deficiency heat

In general, cool herbs clear heat while cold herbs purge fire from the body.

Zhi Mu (Radix Anemarrhenae)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

SUBCATEGORIES OF ACTION

1. ***Heat-Clearing and Fire-Purging Herbs***: Usually sweet and cold, or bitter and cold, these herbs have strong therapeutic functions for treatment of moderate to severe cases of pathological conditions characterized by heat and fire affecting the Lung, Stomach, Heart, and Liver. Signs and symptoms: high fever, aversion to heat, thirst, restlessness, irritability, delirium, mania, red eyes, a yellow, dry tongue coat, and big, forceful pulse.
2. ***Heat-Clearing and Dampness-Drying Herbs***: Bitter, cold and drying, these herbs serve to clear heat, dry dampness, purge fire and eliminate toxins. Therefore, they are ideal for treating accumulations of damp-heat. Damp-heat in the intestines is characterized by symptoms such as burning diarrhea, dysentery, and hemorrhoids. Damp-heat in the Liver and Gallbladder creates jaundice, hypochondriac fullness and pain, and a bitter taste in the mouth. Damp-heat in the lower *jiao* gives rise to sensations of burning and pain during urination, genital itching, and yellow, turbid vaginal discharge in women. Other manifestations of damp-heat include eczema, abscess, swelling, ear infection, and suppurative diseases.
3. ***Heat-Clearing and Blood-Cooling Herbs***: The herbs that accomplish this are often cold with bitter, sweet, or salty tastes, and usually enter the Heart and Liver channels. These herbs clear heat and cool blood at the *ying* (nutritive) and *xue* (blood) levels, conditions characterized by restlessness, irritability, delirium, semiconsciousness, purpura and bleeding from various bodily orifices. Many herbs that clear heat and cool blood also nourish yin and promote the generation of body fluids.
4. ***Heat-Clearing and Toxin-Eliminating Herbs***: Heat and toxins imply infection and the presence of pus, abscesses, sores, and ulcerations, either internally or externally. With a wide range of therapeutic effects, these herbs commonly treat febrile diseases, diarrhea, dysentery, abscesses of internal organs, surface pus, burns, wounds, soreness and swelling of the throat, and similar imbalances.
5. ***Deficiency-Heat Clearing Herbs***: Deficiency heat is characterized by an underlying deficiency of yin with superficial manifestations of heat. Herbs that address deficiency heat are usually sweet and cold, and enter the Kidney and Liver channels. Deficiency heat signs and symptoms may indicate

Chapter 2 — Heat-Clearing Herbs

the presence of heat, but the actual cause of illness is deficiency of yin. Clinical manifestations include steaming bones sensations, warmth in the palms and soles, night sweats, dry throat and mouth, irritability, insomnia, red tongue with thin or no tongue coat, and thin, thready pulse. Herbs that clear deficiency heat also treat late stages of febrile disorders in which heat is lingering in the body, causing low-grade fever, tidal fevers, and/or sweating.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Optimal use of heat-clearing herbs requires careful differential diagnosis. Prior to prescribing heat-clearing herbs, one must determine the severity, location and characteristics of the heat.

- ***Severity*** of the pathogen may be classified as warmth, heat or fire. Warmth represents a mild condition, heat describes a moderate situation, and fire indicates a severe illness.
- ***Location*** must be accurate: heat may attack the exterior or the interior, individual organs, and *wei* (defensive), *qi* (energy), *ying* (nutritive), and *xue* (blood) levels.
- ***Characteristics*** of heat may be discerned in terms not just of temperature such as fire, but whether heat combines with other pathogens: damp-heat, toxic heat, or deficiency heat.

These diagnostic criteria are important in determining the selection of herbs of appropriate properties and potency to address the imbalance.

CAUTIONS/CONTRAINDICATIONS

- Heat-clearing herbs should be used only when needed. Overdose, prolonged use, or inappropriate use will damage the Spleen and Stomach, and consume yin and body fluids. Therefore, they should be prescribed carefully, and discontinued when the desired therapeutic results are achieved.
- Herbs that clear heat and dry dampness are drying in nature and will consume yin and body fluids. In cases of deficiency of the Spleen, Stomach, yin and body fluids, these herbs must be used with caution: it is advisable to add to the formula herbs that harmonize the middle *jiao*, or nourish yin and body fluids. In cases of cold and yang deficiency, bitter and cold heat-clearing herbs are contraindicated.
  - Heat-clearing herbs that are sweet and nourishing, such as *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), and *Zhi Mu* (Radix Anemarrhenae), may create dampness and must be used with caution in cases of damp-heat.
  - The bitter, cold properties of herbs that clear heat and dry dampness may damage the Spleen and Stomach, while their drying properties may consume yin. Therefore, these herbs should be used with caution in cases of deficiency of Spleen, Stomach, and body fluids: for protection, herbs that harmonize the middle *jiao* or nourish yin must be combined in the formula.
  - Excess heat and deficiency heat are opposite conditions and require completely different treatment. Using bitter and cold herbs in cases of deficiency heat will deplete yin and cause further deterioration of the condition. Using sweet and cold herbs in cases of excess heat will create more dampness and heat, complicating the condition.
- Correct identification of the location of the heat imbalance is also extremely important. Use of herbs that clear heat from the *xue* (blood) level to treat heat in the *qi* (energy) level directs the heat further inward and worsens the condition. On the other hand, using herbs that clear heat from the *qi* level to treat heat in the *xue* level will not be effective and will further delay recovery from a severe illness.

Use caution in cases involving deficiency: overdose, prolonged or inappropriate use of heat-clearing herbs damage the Spleen and Stomach, and consume yin and body fluids.

PROCESSING

Heat-clearing herbs are generally used with little special processing or preparation.

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: This includes antibacterial, antiviral and antifungal effects. More than 150 commonly-prescribed herbs have been tested for their antibiotic properties. The sensitivity of micro-

Chapter 2 — Heat-Clearing Herbs

organisms to the herbs is well established. Overall, researchers have concluded that herbs that clear heat and eliminate toxins have the most potent antibiotic effects. The benefits of using herbs to treat infections include a broad range of therapeutic actions and low risk of resistance, both of which may be attributed to the large number of bioactive components present within each herb, and the number of herbs present in each herbal formula.

The sensitivity of micro-organisms to heating-clearing herbs is well established: many of these herbs have anti-bacterial, antiviral and antifungal effects.

- **Antibacterial**: Herbs with antibacterial action include *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Da Qing Ye* (Folium Isatidis), *Ban Lan Gen* (Radix Isatidis), *Pu Gong Ying* (Herba Taraxaci), *Zhi Mu* (Radix Anemarrhenae), *Zhi Zi* (Fructus Gardeniae), *Xia Ku Cao* (Spica Prunellae), *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri), *Mu Dan Pi* (Cortex Moutan), *Chi Shao* (Radix Paeoniae Rubrae), and *Qing Hao* (Herba Artemisiae Annuae).
- **Antiviral**: Herbs with antiviral effects are *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Da Qing Ye* (Folium Isatidis), *Ban Lan Gen* (Radix Isatidis), *Pu Gong Ying* (Herba Taraxaci), *She Gan* (Rhizoma Belamcandae), *Chuan Xin Lian* (Herba Andrographis), *Huang Qin* (Radix Scutellariae), and *Huang Bai* (Cortex Phellodendri).
- **Antifungal:** These include *Ren Dong Teng* (Caulis Lonicerae), *Bai Tou Weng* (Radix Pulsatillae), *Yu Xing Cao* (Herba Houttuyniae), *Huang Bai* (Cortex Phellodendri), *Xuan Shen* (Radix Scrophulariae), *Mu Dan Pi* (Cortex Moutan), *Zi Cao Gen* (Radix Lithospermi) and *Qing Hao* (Herba Artemisiae Annuae).

- **Antineoplastic**: Many heat-clearing herbs have antineoplastic properties. While the exact mechanisms of this activity vary between herbs, the results include suppressed growth of cancer cells and enhanced immunity of host cells. Herbs with antineoplastic actions include *Qing Dai* (Indigo Naturalis), *Ya Dan Zi* (Fructus Bruceae), *Bai Hua She She Cao* (Herba Oldenlandia), *Ku Shen Gen* (Radix Sophorae Flavescentis), *Huang Lian* (Rhizoma Coptidis), *Xia Ku Cao* (Spica Prunellae), *Yu Xing Cao* (Herba Houttuyniae), *Ban Zhi Lian* (Herba Scutellariae Barbatae), and *Long Kui* (Herba Solanum Nigrum).
- **Antipyretic**: Fever is one of the main symptoms associated with infection. While elevation of body temperature is a defensive response, persistent high fever can cause a wide array of complications. The antipyretic effect of heat-clearing herbs is attributed to direct action on the central nervous system to reduce body temperature, or indirect action via treatment of infection. Herbs with distinct antipyretic action include *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Zhi Zi* (Fructus Gardeniae), *Da Qing Ye* (Folium Isatidis), *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Di Gu Pi* (Cortex Lycii), and others.
- **Anti-inflammatory**: Herbs that clear heat treat both acute and chronic inflammation. Generally speaking, these herbs are more effective for acute cases of inflammation characterized by swelling and increased capillary permeability. Examples include: *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *She Gan* (Rhizoma Belamcandae), *Da Qing Ye* (Folium Isatidis), *Chuan Xin Lian* (Herba Andrographis), *Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri) and *Huang Qin* (Radix Scutellariae).

  When treating chronic inflammation, herbs are gentler and less likely to cause side effects than oral steroids.

  Some herbs treat chronic cases of inflammation via stimulating the endocrine system to increase production of corticosteroids. When compared with oral steroids, herbs are gentler and less likely to cause side effects. Some examples are: *Chuan Xin Lian* (Herba Andrographis), *Shan Dou Gen* (Radix Sophorae Tonkinensis) and *Bai Hua She She Cao* (Herba Oldenlandia).
- **Immunologic**: Heat-clearing herbs have various effects on the immune system: some herbs potentiate both specific and non-specific immune response, other heat-clearing herbs suppress the immune system.
  - Herbs that stimulate the immune system by increasing the phagocytic activities of macrophages include *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), *Jin Yin Hua* (Flos Lonicerae), *Da Qing Ye* (Folium Isatidis), *Chuan Xin Lian* (Herba Andrographis), *Ye Ju Hua* (Flos Chrysanthemi Indici), and *Yu Xing Cao* (Herba Houttuyniae).

Chapter 2 — Heat-Clearing Herbs

- Herbs that enhance cellular immunity include *Bai Jiang Cao* (Herba cum Radice Patriniae), *Shan Dou Gen* (Radix Sophorae Tonkinensis), *Bai Hua She She Cao* (Herba Oldenlandia), *Huang Bai* (Cortex Phellodendri) and *Jin Yin Hua* (Flos Lonicerae).
- Herbs that suppress the immune system to treat allergy or auto-immune disorders include *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Mu Dan Pi* (Cortex Moutan), and *Chuan Xin Lian* (Herba Andrographis).

- **Hematological:** Unchecked febrile disorders often progress to heat attacking the *ying* (nutritive) and *xue* (blood) levels, conditions associated with increased activities of platelets, and coagulation. Therefore, many herbs that clear heat inhibit the aggregation of platelets and slow the coagulation process.
  - Herbs with antiplatelet activity include *Chi Shao* (Radix Paeoniae Rubrae), *Ban Lan Gen* (Radix Isatidis), *Ye Ju Hua* (Flos Chrysanthemi Indici), *Niu Huang* (Calculus Bovis), and *Chuan Xin Lian* (Herba Andrographis).
  - An herb with anticoagulant activity is *Chi Shao* (Radix Paeoniae Rubrae).
  - One example of an herb with thrombolytic action is *Niu Huang* (Calculus Bovis).
- **Antihypertensive**: Many herbs that clear heat also act to lower blood pressure. The mechanism of action includes suppression of sympathetic stimulation, dilation of blood vessels, and diuresis. However, it is important to keep in mind that the antihypertensive actions of some of these herbs are only documented by *in vitro* studies via intravenous injection, and may not be replicated in clinical situations *in vivo*. Please refer to the monograph of each herb for additional details. Herbs with antihypertensive properties include *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), *Zhi Mu* (Radix Anemarrhenae), *Di Gu Pi* (Cortex Lycii), *Mu Dan Pi* (Cortex Moutan), *Niu Huang* (Calculus Bovis), *Xuan Shen* (Radix Scrophulariae), *Lian Qiao* (Fructus Forsythiae), *Shan Dou Gen* (Radix Sophorae Tonkinensis), *Xia Ku Cao* (Spica Prunellae), *Long Dan Cao* (Radix Gentianae), *Ye Ju Hua* (Flos Chrysanthemi Indici) and *Ban Bian Lian* (Herba Lobeliae Chinensis).
- **Hepatoprotective**: In addition to clearing heat, many herbs also act to lower liver enzyme levels to protect the liver. These herbs may treat elevated liver enzymes, hepatitis, and drug- or chemical-induced liver damage. Herbs with hepatoprotective activity include *Huang Qin* (Radix Scutellariae), *Lian Qiao* (Fructus Forsythiae), *Zhi Zi* (Fructus Gardeniae), *Bai Jiang Cao* (Herba cum Radice Patriniae), *Pu Gong Ying* (Herba Taraxaci), and *Long Dan Cao* (Radix Gentianae).
- **Cholagogic**: Herbs with cholagogic activity promote and regulate the normal production and release of bile acids, therefore minimizing liver- and gallbladder-related diseases. These herbs may be used to treat jaundice, cholecystitis, and cholelithiasis. Herbs with cholagogic actions include *Jin Yin Hua* (Flos Lonicerae), *Yin Chen Hao* (Herba Artemisiae Scopariae), and *Chuan Xin Lian* (Herba Andrographis).
- **Cardiotonic**: Herbs with cardiotonic influence stimulate the heart tissues to treat cardiovascular diseases. Cardiotonic herbs include *Lian Qiao* (Fructus Forsythiae), *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), and *Zi Cao Gen* (Radix Lithospermi).

POTENTIAL HERB-DRUG INTERACTIONS

Antibiotic, antipyretic and anti-inflammatory properties are the primary pharmacological characteristics of heat-clearing herbs. Such herbs are commonly used to treat infection, fever and inflammation, all characterized by increase in body temperature. Generally speaking, heat-clearing herbs with these therapeutic effects are not known to interact adversely with drug therapies.

Heat-clearing herbs in general are not known to interact adversely with drug therapies.

- **Antibiotics**: The concurrent use of herbs and drugs with antibiotic effects may enable these substances to exert a synergistic effect, or potentiate the effects of one another. The potentiating of antibiotic action offers a tremendous advantage, especially if the target micro-organism has high resistance or tolerance to standard pharmacological therapies. For example, the addition of *baicalin*, a component of *Huang Qin* (Radix Scutellariae), was effective in restoring the antibiotic potency of β-lactam antibiotics (such as ampicillin, amoxicillin, methicillin and cefotaxime) against β-lactam-resistant *Staphylococcus aureus* and methicillin-resistant *Staphylococcus aureus* (MRSA).[1]

Chapter 2 — Heat-Clearing Herbs

- **Ciprofloxacin (Cipro)**: Some heat-clearing herbs and antibiotic drugs should not be combined. It has been shown that the absorption of ciprofloxacin (Cipro), a quinolone antibiotic, may be affected by concurrent use of *Pu Gong Ying* (Herba Taraxaci), due to the high mineral content of the latter. While the bioavailability of ciprofloxacin was not altered significantly, there were changes to other pharmacokinetic parameters.[2]
- **Antihypertensives**: Some heat-clearing herbs also reduce blood pressure. Thus, concurrent use of some herbs and drugs that affect blood pressure should be prescribed carefully and monitored closely to avoid potential fluctuations of blood pressure.

Section 1

— Heat-Clearing and Fire-Purging Herbs

Shi Gao (Gypsum Fibrosum)

石膏

Pinyin Name: *Shi Gao*
Literal Name: "stone paste"
Alternate Chinese Names: *Ruan Shi Gao, Bai Hu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: gypsum
Pharmaceutical Name: Gypsum Fibrosum
Properties: acrid, sweet, very cold
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Sedates Fire, Relieves Irritability and Quenches Thirst

Excess heat in the *qi* (energy) level: Unlike other heat-clearing herbs that have a drying effect, *Shi Gao* (Gypsum Fibrosum) sedates fire, relieves irritability and quenches thirst without drying body fluids. It is most suitable for fire in the Lung and Stomach, characterized by high fever, extreme thirst with preference for cold drinks, profuse sweating, and forceful pulse. The condition is also referred to as 'heat in the *qi* (energy) level' according to the *Wei Qi Ying Xue Bian Zheng* (Defensive, Qi, Nutritive, Blood Differentiation).

- Fire in the Lung and Stomach, at the *qi* (energy) level: use *Shi Gao* with *Zhi Mu* (Radix Anemarrhenae) to clear heat, sedate fire, and moisten dryness. **Exemplar Formula:** *Bai Hu Tang* (White Tiger Decoction).
- Exterior wind-cold and interior heat: add *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi). **Exemplar Formula:** *Da Qing Long Tang* (Major Bluegreen Dragon Decoction).
- Excessive heat in both *qi* (energy) and *xue* (blood) levels with continuous high fever and maculae: use this herb with *Mu Dan Pi* (Cortex Moutan), *Sheng Di Huang* (Radix Rehmanniae) and *Xuan Shen* (Radix Scrophulariae).
- Excessive heat with qi deficiency: combine it with *Ren Shen* (Radix Ginseng). **Exemplar Formula:** *Bai Hu Jia Ren Shen Tang* (White Tiger plus Ginseng Decoction).
- Excessive heat with qi and yin deficiencies: combine *Shi Gao* with *Ren Shen* (Radix Ginseng) and *Mai Men Dong* (Radix Ophiopogonis). **Exemplar Formula:** *Zhu Ye Shi Gao Tang* (Lophatherum and Gypsum Decoction).
- Toxic heat with infection: use it with *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae) and *Huang Bai* (Cortex Phellodendri). **Exemplar Formula:** *San Huang Shi Gao Tang* (Three-Yellow and Gypsum Decoction).
- Influenza, epidemic poliomyelitis, epidemic encephalitis B, with chills and high fever, headache, irritability, dry mouth, insomnia, and in severe cases, bleeding: add *Huang Lian* (Rhizoma Coptidis), *Zhi Zi* (Fructus Gardeniae), *Mu Dan Pi* (Cortex Moutan), *Chi Shao* (Radix Paeoniae Rubrae), and *Zhi Mu* (Radix

Shi Gao (Gypsum Fibrosum)

Anemarrhenae). **Exemplar Formula:** *Qing Wen Bai Du Yin* (Clear Epidemics and Overcome Toxin Decoction).

2. Clears Lung Heat

Excess heat in the Lung: Although *Shi Gao* does not relieve dyspnea or cough, it is essential in treating respiratory disorders caused by heat attacking the Lung. It sedates Lung heat and restores the ascending and descending functions of the Lung that have been impaired by heat. Clinical manifestations include: cough, dyspnea, wheezing, thirst, yellow sputum, red face, a rapid, forceful pulse and a red tongue. In western medicine, heat and toxins in the Lung closely resemble symptoms accompanying acute bronchitis, pneumonia, and pulmonary abscesses.

- Wheezing and dyspnea from Lung heat: add *Ma Huang* (Herba Ephedrae) and *Xing Ren* (Semen Armeniacae Amarum). **Exemplar Formula:** *Ma Xing Gan Shi Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- Heat and toxins in the Lung: use *Shi Gao* with *Jin Yin Hua* (Flos Lonicerae), *Huang Qin* (Radix Scutellariae) and *Yu Xing Cao* (Herba Houttuyniae).

3. Clears Heat in the Stomach and Stomach Channel

Stomach Heat: When heat attacks the Stomach, Stomach qi rebels or reverses leading to nausea and vomiting. Heat may also attack the Stomach channel, leading to various problems along its pathway such as headache, orbital pain, toothache, oral ulcers, swelling and pain in the gums, stomatitis, canker sores, and similar heat conditions.

- Nausea and vomiting: add *Ban Xia* (Rhizoma Pinelliae) and *Zhu Ru* (Caulis Bambusae in Taenia).
- Heat attacking the Stomach channel: use this herb with *Sheng Di Huang* (Radix Rehmanniae), *Zhi Mu* (Radix Anemarrhenae) and *Niu Xi* (Radix Cyathulae seu Achyranthis). **Exemplar Formula:** *Yu Nu Jian* (Jade Woman Decoction).

4. Clears Heat and Promotes Healing of Sores, Burns and Eczema

The calcined form of *Shi Gao* has excellent properties to clear heat, treat necrosis and generate flesh. When applied topically, it promotes healing of sores by reducing swelling and bleeding. It can be administered topically or orally.

- Sores, burns and eczema: use calcined *Shi Gao* alone or with *Qing Dai* (Indigo Naturalis) and *Huang Bai* (Cortex Phellodendri).

DOSAGE

15 to 60 grams. The maximum dosage is 100 grams. For oral administration, use unprocessed *Shi Gao*. When it is used in decoction, it should be crushed into fine powder and pre-decocted for 20 to 30 minutes prior to adding other herbs. Since it is a mineral substance and has low solubility, its common dosage is larger than that for other herbs. For oral ingestion as powder, however, the dosage must be decreased, since solubility in decoction is no longer an issue. For topical administration, use calcined *Shi Gao* to promote healing.

CAUTIONS / CONTRAINDICATIONS

- Use of *Shi Gao* is contraindicated in patients who have qi deficiency, yin deficiency, Spleen yang deficiency, deficient cold of the Stomach, or fever due to yin deficiency.
- Because *Shi Gao* is very cold in thermal nature, it is not suitable for long-term use. Its use should be terminated as soon as the desired effect is achieved.

CHEMICAL COMPOSITION

$(CaSO_4+2\ H_2O)$, CaO, SO_3, Al, Mg, Fe, Mn, Zn, Cu.[1]

PHARMACOLOGICAL EFFECTS

- **Antipyretic:** *Shi Gao* has antipyretic action but no diaphoretic effect. The antipyretic function of *Shi Gao* has a rapid onset, but only short duration of action. *Zhi Mu* (Radix Anemarrhenae), in comparison, has slower onset of action but much longer duration. Therefore, these two herbs are synergistic in action and are commonly combined.[2] **Exemplar Formula:** *Bai Hu Tang* (White Tiger Decoction).
- **Immunostimulant:** *Shi Gao* stimulates the immune system and increases phagocytic activity of macrophages. However, it does not have direct inhibitory effects on viruses or bacteria.[3]
- **Effect on healing:** Topical application of *Shi Gao* shortens the recovery time for rabbits with broken bones.[4]
- **Others:** *Shi Gao* has been shown to facilitate the passage of bile, shorten coagulation time, promote diuresis, and reduce spontaneous intake of water (thirst) in laboratory mice.[5]

CLINICAL STUDIES AND RESEARCH

- **Osteoarthrosis deformans endemica:** In Shanxi province, China, over 600 patients with osteoarthrosis deformans endemica were treated by oral ingestion of fine powder of *Shi Gao* at 1 to 3 grams per dose, twice daily. The study reported an overall rate of effectiveness of approximately 80%.[6]
- **Acute inflammation:** In one study, 126 patients with acute lymphadenitis, cellulitis or erysipelas were treated topically with an herbal formulation (3 parts of *Shi Gao* and 1 part China wood oil). The study excluded all

Shi Gao (Gypsum Fibrosum)

patients who had abscesses and ulcerations. The study reported satisfactory results.[7]

- **Burns:** In one study, 53 patients with burns were treated with fine powder of *Shi Gao* sprinkled on the affected area. The study reported a decrease in secretions, reduced incidence of infection, and shortened healing time.[8]
- **Acute sprain**: One report describes 15 patients with acute sprains who were treated with an herbal paste (fresh radish mixed with fine powder of *Shi Gao*) applied topically, with good results.[9]
- **Fever:** According to one report, 200 patients with high fever were treated with an herbal decoction (120 grams of *Shi Gao*, 3 grams of *Ma Huang* (Herba Ephedrae), and 3 grams of *Gui Zhi* (Ramulus Cinnamomi)). Of 200 patients, 181 showed a reduction in body temperature.[10]
- **Fever due to common colds or influenza:** Fifteen patients were treated with an herbal decoction (30 grams each of *Shi Gao* and *Ban Lan Gen* (Radix Isatidis)) with good results.[11]
- **Lobar pneumonia:** According to one report, 9 patients with lobar pneumonia were treated with *Bai Hu Tang* (White Tiger Decoction), with excellent results.[12]

TOXICOLOGY

Shi Gao has very little toxicity. No significant side effects were reported in doses up to 250 grams in humans.[13]

SUPPLEMENT

- 煅石膏 / 煅石膏 *Duan Shi Gao* (Gypsum Fibrosum Preparata), the calcined form of this substance, has excellent properties to clear heat, treat necrosis and generate flesh. It is generally used topically to reduce swelling and bleeding. *Duan Shi Gao* is generally not used internally because once calcined, it loses a major portion of its effectiveness in clearing heat and sedating fire. Furthermore, *Duan Shi Gao* has an astringent action and may cause stagnation and stasis in the middle *jiao*, and thus injure the Spleen and Stomach. In short, use unprocessed *Shi Gao* in decoction for oral ingestion, and calcined *Shi Gao* in powder for topical applications.

AUTHORS' COMMENTS

Shi Gao and *Han Shui Shi* (Mirabilite) both enter the Lung and Stomach to clear heat and sedate fire. *Shi Gao* is more effective to clear heat from *wei* (defense) and *qi* (energy) levels. *Han Shui Shi* is better to purge excess heat from the *xue* (blood) level.

Generally speaking, postpartum women experience deficiency and cold. However, *Shi Gao* can still be used if the diagnosis is heat in the *qi* (energy) level or in the Lung or Stomach. The same principle applies to patients recovering from febrile disorders. The key is to combine *Shi Gao* with tonic herbs such as *Ren Shen* (Radix Ginseng) or *Mai Men Dong* (Radix Ophiopogonis) so that heat can be cleared at the same time that the body is being tonified.

According to Dr. Zhang Xiao-Ping, the combination of *Shi Gao* and *Zhi Mu* (Radix Anemarrhenae) has excellent influence to lower plasma glucose levels to treat diabetes mellitus. These two herbs are especially effective in individuals with diabetes characterized by qi and yin deficiencies. However, it is important to note that high dosages are sometimes associated with hypoglycemia.

Dr. Zhang Xiao-Ping also states that the combination of *Shi Gao* and *Zhi Zi* (Fructus Gardeniae) is very effective to sedate Liver and Heart fire in hyperthyroid patients.

Dr. Shen Yen-Nan reports that fire in specific organs is effectively purged by key herbs, as listed here:

- Lung fire: *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori)
- Heart fire: *Huang Lian* (Rhizoma Coptidis)
- Stomach fire: *Shi Gao* (Gypsum Fibrosum)
- Liver fire: *Zhi Zi* (Fructus Gardeniae)
- Kidney fire: *Zhi Mu* (Radix Anemarrhenae)

Zhi Mu (Radix Anemarrhenae)

知母

Pinyin Name: *Zhi Mu*
Literal Name: "know about mother"
Alternate Chinese Names: *Mao Zhi Mu*, *Guang Zhi Mu*, *Zhi Mu Rou*, *Yan Zhi Mu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: anemarrhena, common anemarrhena rhizome
Botanical Name: *Anemarrhena asphodeloides* Bge.
Pharmaceutical Name: Radix Anemarrhenae
Properties: bitter, sweet, cold
Channels Entered: Lung, Stomach, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Sedates Fire

Lung and Stomach fire: Excess heat in the *qi* (energy) level or the Lung and Stomach channels will manifest in symptoms of high fever, irritability, perspiration, thirst with desire for cold drinks, and forceful, rapid pulse. *Zhi Mu* (Radix Anemarrhenae), unlike most heat-clearing herbs such as *Huang Lian* (Rhizoma Coptidis) and *Huang Bai* (Cortex Phellodendri) that are drying in nature, can sedate fire and moisten dryness simultaneously. It is the herb of choice when body fluids have been injured by excess heat in the body, manifesting in symptoms such as thirst and excess perspiration.

- Heat in the *qi* (energy) level: combine *Zhi Mu* with *Shi Gao* (Gypsum Fibrosum) to clear heat. **Exemplar Formula:** *Bai Hu Tang* (White Tiger Decoction).

2. Nourishes Yin and Moistens Dryness

Cough due to Lung heat, yin deficiency, or Lung dryness: In addition to its heat-clearing function, *Zhi Mu* also nourishes yin, relieves irritability, and quenches thirst. It is most useful when excess heat is present internally in combination with heat damaging the body fluids.

- Cough with sticky yellow sputum due to Lung heat and yin deficiency: use *Zhi Mu* with *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).
- Cough with excess Lung heat: combine it with *Huang Qin* (Radix Scutellariae) to clear heat.

3. Nourishes Yin and Clears Deficiency Fire

Liver and Kidney yin deficiencies: *Zhi Mu* is the ideal herb for patients experiencing yin-deficient fire because it has dual action to clear heat and nourish yin. Clinical applications include tidal fever, steaming bones sensations, irritability, *wu xin re* (five-center heat), and night sweats. It is an essential herb for the treatment of menopause.

- Yin-deficient fire: add *Huang Bai* (Cortex Phellodendri). **Exemplar Formulas:** *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill) and *Da Bu Yin Wan* (Great Tonify the Yin Pill).

4. Generates Fluids and Quenches Thirst

***Xiao ke* (wasting and thirsting) syndrome:** Deficiency fire damaging fluids can easily lead to thirst and dryness. *Zhi Mu* is commonly used for patients with *xiao ke* (wasting and thirsting) syndrome with thirst and increased water intake.

- Thirst due to heat in the Lung and Stomach damaging fluids: use *Zhi Mu* with *Shi Gao* (Gypsum Fibrosum), *Tian Hua Fen* (Radix Trichosanthis), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Huang Qi* (Radix Astragali).

5. Neutralizes Unwanted Effects of Warm Herbs

Because warm or hot herbs are drying by nature, use of these herbs in large doses or over a long period of time may damage yin and body fluids. *Zhi Mu* is commonly used in combination with such warm or hot herbs to neutralize the unwanted side effects without compromising overall effectiveness.

- When *Huang Qi* (Radix Astragali) or other qi-tonic herbs must be used, yang rises, leading to dryness and heat. *Zhi Mu* can be used to neutralize this heat and moisten dryness.
- When *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Qiang Huo* (Rhizoma et Radix Notopterygii) are needed for treatment of *bi zheng* (painful obstruction syndrome), *Zhi Mu* can be used to prevent the two hot herbs

Zhi Mu (Radix Anemarrhenae)

from damaging yin and fluids. **Exemplar Formula:** *Gui Zhi Shao Yao Zhi Mu Tang* (Cinnamon Twig, Peony, and Anemarrhena Decoction).

DOSAGE

6 to 12 grams. The maximum dosage of *Zhi Mu* is 30 grams. Use the unprocessed form to clear heat and sedate fire. Bitter and cold, the unprocessed form is commonly used to clear heat from the Lung, Stomach and Kidney. Frying *Zhi Mu* with salt facilitates its entrance to the Kidney, and potentiates its effect to clear deficiency heat from the lower *jiao*. Frying with grain-based liquor potentiates the effect of *Zhi Mu* to clear heat from the Lung.

CAUTIONS / CONTRAINDICATIONS

- Cold in nature, *Zhi Mu* is contraindicated in patients with diarrhea, Spleen or Stomach deficiencies, or Kidney deficiency.

CHEMICAL COMPOSITION

Timosaponin, mangiferin, sarsasapogenin, markogenin, neogitogenin, anemarns A,B,C,D.[1]

PHARMACOLOGICAL EFFECTS

- **Antidiabetic:** In healthy rabbits, oral ingestion of *Zhi Mu* at 200 mg/kg decreased blood glucose levels between 18% and 30%.for up to 6 hours. In rabbits with diabetes mellitus, oral ingestion of *Zhi Mu* at 500 mg/kg for 4 days reduced blood glucose levels and minimized atrophy of the pancreas. Anemarns A, B, C, and D all have antidiabetic effect, with B being the most potent.[2,3]
- **Antipyretic:** The antipyretic action of *Zhi Mu* has a slow onset but prolonged duration, while the same action of *Shi Gao* (Gypsum Fibrosum) has a rapid onset but short duration. Therefore, these two herbs have synergistic effects as they achieve immediate and prolonged antipyretic effects.[4] They are commonly combined, such as in *Bai Hu Tang* (White Tiger Decoction).
- **Antibiotic:** *Zhi Mu* has demonstrated inhibitory effects against *Staphylococcus aureus,* α- and β-hemolytic streptococcus, *Salmonella typhi, E. coli, Bacillus subtilis, Vibrio cholerae,* and *Pseudomonas* spp., *Mycobacterium* spp., and dermatophytes.[5,6]
- **Others:** *Zhi Mu* also displays antineoplastic and cholagogic activities.[7,8]

CLINICAL STUDIES AND RESEARCH

- **Prostatic hypertrophy:** In one study, 80 patients with prostatic hypertrophy were treated with an herbal formula with 86.3% reporting marked improvement. The formula contained *Zhi Mu* 20g, *Huang Bai* (Cortex Phellodendri) 20g, *Niu Xi* (Radix Cyathulae seu Achyranthis) 20g, *Dan Shen* (Radix Salviae Miltiorrhizae) 30 to 50g, *Da Huang* (Radix et Rhizoma Rhei) 10 to 15g, and *Yi Mu Cao* (Herba Leonuri) 50g.[9]
- **Acute rheumatism:** According to one report, 56 patients with acute-onset rheumatism were treated with an herbal formula with 71.4% effectiveness. The herbal formula contained *Zhi Mu* 30g, *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) 15g, *Gui Zhi* (Ramulus Cinnamomi) 15g, *Shi Gao* (Gypsum Fibrosum) 50g, and *Geng Mi* (Semen Oryzae) 50g. Modifications to the formula were made if deemed necessary by the practitioner.[10]

HERB-DRUG INTERACTION

- **Antidiabetics:** It is prudent to use *Zhi Mu* with caution with insulin, sulfonylureas, and other antidiabetic medications. Though no interaction has been documented, the combination of antidiabetic herbs and drugs may have a synergistic effect, leading to hypoglycemia.[11] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]

TOXICOLOGY

In rabbits, intravenous injection of a *Zhi Mu* preparation showed no toxicity at 0.5 ml, caused dyspnea and a small reduction in blood pressure at 1 to 3 ml, and led to respiratory depression and fatality at 7 ml.[12]

AUTHORS' COMMENTS

Depending on the other herbs with which it is combined, *Zhi Mu* has dual functions to clear excess or deficiency heat. It is used often because it nourishes fluids and clears heat simultaneously. Furthermore, *Zhi Mu* is often preferred over yin tonics, which are hard to digest and may cause dampness if not prescribed carefully.

Zhi Mu and *Shi Gao* (Gypsum Fibrosum) are often used synergistically to sedate fire and prevent the loss of yin. Sweet and cold, *Zhi Mu* clears heat, generates fluids and moistens dryness. It clears heat in all three *jiaos*, clearing Lung heat in the upper *jiao*, sedating Stomach fire in the middle *jiao*, and clearing deficiency fire of the Kidney in the lower *jiao*. Very cold in thermal nature, *Shi Gao* enters the *qi* (energy) level and is best in clearing excess heat in the Lung and Stomach. It is the herb of choice when clearing heat from the *qi* level manifesting in symptoms of high fever, extreme thirst with preference for cold drinks, profuse sweating and a forceful, rapid pulse. Together, *Zhi Mu* and *Shi Gao* sedate fire without drying yin.

Dr. Shen Yen-Nan reports that specific organs injured by fire can be treated with optimum results by key herbs, as follows:

- Lung fire: *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori)
- Heart fire: *Huang Lian* (Rhizoma Coptidis)
- Stomach fire: *Shi Gao* (Gypsum Fibrosum)
- Liver fire: *Zhi Zi* (Fructus Gardeniae)
- Kidney fire: *Zhi Mu* (Radix Anemarrhenae)

Qing Guo Gen (Radix Canarium Album)

青果根

Pinyin Name: *Qing Guo Gen*
Literal Name: "blue-green fruit root"
Alternate Chinese Names: *Gan Lan Gen, Jian Gan E Gen*
English Name: white olive root
Botanical Name: *Canarium album* (Lour.) Raeusch.
Pharmaceutical Name: Radix Canarium Album
Properties: sweet, sour, astringent, cool
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears the Lung, Benefits the Throat, Generates Body Fluids and Eliminates Toxins

Cough with profuse sputum, pharyngitis: *Qing Guo Gen* (Radix Canarium Album) reduces minor inflammation of the respiratory system involving sore throat, cough and profuse sputum.

- Cough with profuse sputum and pharyngitis: use *Qing Guo Gen* with *Fu Rong* (Radix Hibisci) and *Zao Xiu* (Rhizoma Paridis).
- Laryngitis: combine it with *Gu Zhi Hua* (Semen Oroxyli), *Pang Da Hai* (Semen Sterculiae Lychnophorae) and *Luo Han Guo* (Fructus Momordicae).

2. Strengthens the Spleen

Leukorrhea from Spleen deficiency: *Qing Guo Gen* treats leukorrhea from Spleen deficiency, indicated by clear or white vaginal discharge.

- Leukorrhea: use this herb with *Long Yan Hua* (Flos Longan) and *Bai Long Chuan Hua Tou* (Radix Clerodendron Paniculatum). It can also be used with *Wan Dai Tang* (End Discharge Decoction).

Stomach pain from Stomach qi deficiency: This type of pain caused by deficiency is typically dull, and can be temporarily reduced by applying pressure to the affected area.

- Stomach pain: use *Qing Guo Gen* with *Ren Shen* (Radix Ginseng), *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Gan Cao* (Radix Glycyrrhizae).
- Dysentery from deficiency: combine it with *Feng Wei Cao* (Herba Pteris), *Huo Xiang* (Herba Agastache), *Hou Po* (Cortex Magnoliae Officinalis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

DOSAGE

4.5 to 9 grams in decoction.

Han Shui Shi (Mirabilite)

寒水石

Pinyin Name: *Han Shui Shi*
Literal Name: "cold water stone"
Alternate Chinese Names: *Ling Shui Shi, Yan Jing Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: mirabilite crystal
Pharmaceutical Name: Mirabilite
Properties: salty, very cold
Channels Entered: Stomach, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Purges Fire

Han Shui Shi (Mirabilite) clears heat and purges fire from the *qi* (energy) level, a condition characterized by profuse perspiration, high fever, extreme thirst, and forceful pulse. It is also effective for treating heat attacking and covering the Pericardium, leading to delirium and semiconsciousness.

- Excess heat at the *qi* (energy) level: use *Han Shui Shi* with *Shi Gao* (Gypsum Fibrosum).
- Heat attacking and covering the Pericardium: combine it with herbs that function to open sensory orifices.

2. Topical Use to Sedate Fire and Toxins

Han Shui Shi is used topically to sedate fire and clear heat. Clinical applications include sore throat, stomatitis, burns, sores, infection and inflammation of the eyes, or other wounds with fire or heat components. *Han Shui Shi* is usually used individually in fine powder.

DOSAGE

10 to 15 grams. *Han Shui Shi* should be crushed into fine powder prior to oral or topical administration.

CAUTIONS / CONTRAINDICATIONS

- *Han Shui Shi* is contraindicated for patients with deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Sodium sulfate.[1]

SUPPLEMENT

Two other substances are sometimes substituted for *Han Shui Shi*. It is important to be aware of their differences in clinical use.

- 寒水石 *Han Shui Shi* (Mirabilite), sodium sulfate, is the correct and standard substance. It is the most potent form, with maximum water solubility at 34° C. The saturated solution will yield crystalline precipitates when placed in cold water.
- 紅石膏 / 红石膏 *Hong Shi Gao* (Gypsum Rubrae), calcium sulfate, is sometimes used as a substitute. It has low water solubility and does not yield crystalline precipitates.
- 方解石 / 方解石 *Fang Jie Shi* (Calcitum), calcium carbonate, is the other substitute. It is insoluble in water and does not yield crystalline precipitates.

AUTHORS' COMMENTS

When *Mang Xiao* (Natrii Sulfas) in saturated solution is cooled below room temperature, *Han Shui Shi* (Mirabilite) is formed as the crystalline precipitate. *Han Shui Shi* (Mirabilite) and *Mang Xiao* (Natrii Sulfas) have similar functions but are not interchangeable. *Han Shui Shi* clears heat from the Stomach, while *Mang Xiao* has a much broader effect to clear heat from Lung, Stomach and Large Intestine.

1. *Zhong Yao Xue* (Chinese Herbology), 1998; 131:132

Tian Hua Fen (Radix Trichosanthis)

天花粉　天花粉

Pinyin Name: *Tian Hua Fen*
Literal Name: "sky pollen," "heavenly flower powder"
Alternate Chinese Names: *Hua Fen, Gua Lou Gen*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: trichosanthes root, snake gourd root
Botanical Name: *Trichosanthes kirilowii* Maxim. (*Gua Lou*); *Trichosanthes japonica* Regel (*Ri Ben Gua Lou*)
Pharmaceutical Name: Radix Trichosanthis
Properties: bitter, slightly sweet, cold
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Generates Body Fluids

Heat injuring the yin/body fluids: *Tian Hua Fen* (Radix Trichosanthis) is most effective for moistening the Lung and clearing Stomach fire. When internal heat remains untreated, it may create dryness or damage yin. Irritability, dry lips, mouth and tongue, and thirst with desire to drink cold beverages, are diagnostic keys for heat-damaged fluids. This herb is essential in treating patients suffering from *xiao ke* (wasting and thirsting) syndrome.

- Heat and dryness in the Lung and Stomach: use *Tian Hua Fen* with *Mai Men Dong* (Radix Ophiopogonis), *Zhi Mu* (Radix Anemarrhenae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). These herbs are commonly used to treat excessive thirst and excessive water intake due to upper *xiao ke* (wasting and thirsting) syndrome. **Exemplar Formula:** *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction).
- Heat and dryness attacking the Lung with cough and thick, sticky sputum that is difficult to expectorate: use *Tian Hua Fen* with *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), and *Sang Bai Pi* (Cortex Mori).
- Dryness with irritability: combine it with *Shi Hu* (Herba Dendrobii), *Yu Zhu* (Rhizoma Polygonati Odorati) and *Mai Men Dong* (Radix Ophiopogonis).
- *Xiao ke* (wasting and thirsting) syndrome, diabetes mellitus, diabetes insipidus, hyperthyroidism: use *Tian Hua Fen* with *Sheng Di Huang* (Radix Rehmanniae), *Shi Gao* (Gypsum Fibrosum) *Zhi Mu* (Radix Anemarrhenae), *Shan Yao* (Rhizoma Dioscoreae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

2. Clears Heat, Dispels Pus

Carbuncles, abscesses and sores: Redness, swelling and pain with pus are signs of toxic heat accumulation. *Tian Hua Fen* is most effective in treating breast abscesses and is used both topically and internally for toxic heat problems.

- Skin abscesses and ulcerations: use *Tian Hua Fen* with *Jin Yin Hua* (Flos Lonicerae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), and *Zao Jiao Ci* (Spina Gleditsiae). **Exemplar Formula:** *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life).
- Abscess without ulceration or necrosis: combine this herb with *Chi Xiao Dou* (Semen Phaseoli) and vinegar, apply topically.
- Breast abscess: add *Ru Xiang* (Gummi Olibanum), *Gua Lou Shi* (Fructus Trichosanthis), *Bai Zhi* (Radix Angelicae Dahuricae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Pu Gong Ying* (Herba Taraxaci).
- Swelling and pain of external injuries: use *Tian Hua Fen* with blood-activating herbs such as *Ru Xiang* (Gummi Olibanum). **Exemplar Formula:** *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction).

DOSAGE

10 to 15 grams. The maximum dosage of *Tian Hua Fen* is 30 grams. This herb can be used in decoction or as topical powder.

CAUTIONS / CONTRAINDICATIONS

- Cold in nature, *Tian Hua Fen* should be used with caution in cases of deficiency and cold of the Spleen and Stomach.
- Use of *Tian Hua Fen* is contraindicated during pregnancy, as it may increase the risk of miscarriage.
- Concurrent use of *Tian Hua Fen* with *Wu Tou* (Radix Aconiti) or *Fu Zi* (Radix Aconiti Lateralis Praeparata) is contraindicated.
- Common side effects of *Tian Hua Fen* may include fever,

Tian Hua Fen (Radix Trichosanthis)

headache, dermatitis, sore throat, and muscle stiffness. Rare side effects include swelling, hypotension, arrhythmia, and bleeding from the liver or spleen.[1,2,3]

CHEMICAL COMPOSITION

Trichosanthin, stigmasterol, α-spinasterol, starch, amino acids.[4]

PHARMACOLOGICAL EFFECTS

- **Abortifacient:** In China, use of *Tian Hua Fen* is associated with termination of pregnancy. The proposed mechanism of action of *Tian Hua Fen* includes a direct effect on the placental villi and trophocytes leading to necrosis and death of the cells. *Tian Hua Fen* also stimulates the smooth muscle of the uterus to produce contractions.[5,6]
- **Antineoplastic:** *Tian Hua Fen* has demonstrated good results in treating cancer of the trophocyte. It is also effective in treating liver cancer with ascites in mice. It has not been shown to be effective for other types of cancer.[7]
- **Hyperglycemic:** Administration of *Tian Hua Fen* raises blood glucose levels in rabbits, especially in subjects that have been fasting.[8]
- **Antibiotic:** *Tian Hua Fen* has been shown to inhibit the activity of β-hemolytic streptococcus, *Diplococcus pneumoniae* and *Bacillus diphtheriae*. It also has an inhibiting influence on the replication of HIV virus *in vitro*.[9,10,11]

CLINICAL STUDIES AND RESEARCH

- **Abortion:** A preparation of *Tian Hua Fen* injected intramuscularly or into the amniotic sac has been used in over 10,000 patients seeking abortion in Shanghai, with 97% of the pregnancies terminated. In some cases, up to 150 hours passed before abortion occurred following *Tian Hua Fen* injection. Some patients experienced bleeding and allergic reactions. Injection of *Tian Hua Fen* into the amniotic sac was concluded to be more effective and cause fewer side effects than intramuscular injection. The women who received this treatment did not subsequently have trouble becoming pregnant, but did have a higher-than-average percentage of early delivery. Blood tests confirmed that traces of *Tian Hua Fen* may still be present in the patient up to six years following this procedure.[12]
- **Abortifacient:** Intramuscular injection of *Tian Hua Fen* has been effectively used in treatment of hydatid pregnancy, chorioepithelioma, and ectopic pregnancy.[13]

TOXICOLOGY

Moderate overdose of *Tian Hua Fen* in dogs (3 to 6 times the adult dose) is associated with lethargy, lack of energy, decreased food intake, and interference with heart, liver and kidney functions. Gross overdose (9 to 12 times the adult dose) for 1 to 2 weeks is associated with arrhythmia, necrosis of liver and kidney tissues, and death.[14]

AUTHORS' COMMENTS

Tian Hua Fen is commonly used in an herbal formula for treatment of diabetes mellitus. However, modern pharmacology confirms not only that *Tian Hua Fen* has no antidiabetic effect, but that it may in fact contribute to hyperglycemia. Two explanations have been offered to clarify this paradox.

- Diabetes is often diagnosed and treated as *xiao ke* (wasting and thirsting) syndrome, though it is not necessarily the same in all aspects. The diagnostic confirmation of diabetes mellitus is high blood glucose, while the diagnosis for *xiao ke* (wasting and thirsting) syndrome is the presence of polyuria, polydipsia, and polyphagia. These are two separate diagnoses. While *Tian Hua Fen* does not treat diabetes directly, it addresses yin deficiency that is present in both diabetes and *xiao ke* syndrome.
- The effect of an individual herb is different from that of an herbal formula. *Tian Hua Fen* may not lower blood glucose directly, but contributes to the overall treatment of diabetes mellitus by relieving the symptoms and complications.

Tian Hua Fen, *Tian Men Dong* (Radix Asparagi), and *Mai Men Dong* (Radix Ophiopogonis) have many similar functions to nourish yin and promote the generation of body fluids. *Tian Hua Fen* treats dryness caused by heat. *Tian Men Dong* treats Kidney yin-deficient fire with low-grade fever, night sweating and nocturnal emissions. *Mai Men Dong* treats Heart yin deficiency with fire due to heat in the *ying* (nutritive) level.

Dr. Hu Qing-Shan has successfully treated chronic granulocytic leukemia with this formula: *Tian Hua Fen* 40%, *Qing Dai* (Indigo Naturalis) 40%, *Niu Huang* (Calculus Bovis) 10%, and *Lu Hui* (Aloe) 10%. This is taken twice daily in 1.5 gram doses.

Lu Gen (Rhizoma Phragmitis)

蘆根　芦根

Pinyin Name: *Lu Gen*
Literal Name: "reed rhizome"
Alternate Chinese Names: *Wei Gen, Lu Zhu Gen*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: phragmites root, reed rhizome
Botanical Name: *Phragmites communis* Trin.
Pharmaceutical Name: Rhizoma Phragmitis
Properties: sweet, cold
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Promotes Generation of Body Fluids

Febrile disease injuring body fluids: Cold and sweet, *Lu Gen* (Rhizoma Phragmitis) clears heat and replenishes body fluids. It is most useful in treating patients with heat accompanied by fluid damage, characterized by fever, irritability, and thirst.

- Internal heat with thirst and dryness: use *Lu Gen* with *Tian Hua Fen* (Radix Trichosanthis) and *Mai Men Dong* (Radix Ophiopogonis).
- Internal heat with high fever: combine it with *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Wind-heat with thirst: add *Ju Hua* (Flos Chrysanthemi), *Jin Yin Hua* (Flos Lonicerae) and *Bo He* (Herba Menthae). **Exemplar Formulas:** *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction) and *Yin Qiao San* (Honeysuckle and Forsythia Powder).
- Irritability: use *Lu Gen* with *Zhi Zi* (Fructus Gardeniae).

2. Clears Stomach Heat, Regulates Stomach Qi

Nausea and vomiting: When heat attacks the Stomach, it may damage yin and cause thirst. Furthermore, Stomach heat may also affect the normal circulation of Stomach qi, leading to qi reversal, manifesting in nausea and vomiting.

- Nausea, vomiting and thirst due to Stomach heat: use *Lu Gen* with *Zhu Ru* (Caulis Bambusae in Taenia) and *Pi Pa Ye* (Folium Eriobotryae).
- Thirst and perspiration: combine it with *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).

3. Clears Lung Heat, Regulates Lung Qi

Lung heat with dryness: When heat attacks the Lung, it may damage yin and cause thirst and dry mouth, scanty, yellow, difficult-to-expectorate sputum, chest congestion, a tickling sensation in the throat, or, in severe cases, blood-streaked sputum. Furthermore, Lung heat may also affect the normal circulation of Lung qi, leading to qi reversal causing coughing.

- Cough and thirst caused by Lung heat: use *Lu Gen* with *Jie Geng* (Radix Platycodonis), *Xing Ren* (Semen Armeniacae Amarum) and *Sang Ye* (Folium Mori).
- Cough with thick and sticky sputum: use it with *Yi Yi Ren* (Semen Coicis), *Jin Yin Hua* (Flos Lonicerae), *Yu*

Lu Gen (Rhizoma Phragmitis)

Xing Cao (Herba Houttuyniae) and *Dong Gua Zi* (Semen Benincasae).

- Bronchitis with chest pain, congestion, the absence of perspiration, aversion to cold, fever: combine this herb with *Jing Jie* (Herba Schizonepetae), *Bo He* (Herba Menthae), and *Zi Su Ye* (Folium Perillae).
- Alternating chills and fever, chest congestion and pain: use it with *Chai Hu* (Radix Bupleuri) and *Qing Hao* (Herba Artemisiae Annuae).
- Blood-streaked sputum: use it with *Ou Jie* (Nodus Nelumbinis Rhizomatis), *Bai Mao Gen* (Rhizoma Imperatae) and *Bai Ji* (Rhizoma Bletillae).
- Lung abscess at the pus-forming stage with chest congestion, pain, cough, fever, and copious, bloody, foul-smelling sputum: combine *Lu Gen* with *Yi Yi Ren* (Semen Coicis), *Gua Lou Ren* (Semen Trichosanthis), and *Jie Geng* (Radix Platycodonis).
- Lung abscess during the suppuration stage: use *Lu Gen* with *Sha Shen* (Radix Glehniae seu Adenophorae), *Tian Hua Fen* (Radix Trichosanthis) and *Huang Qi* (Radix Astragali).

4. Clears Heat and Promotes Diuresis

Lu Gen clears heat and promotes diuresis. It treats *re lin* (heat dysuria) with scanty urine.

5. Vents Rashes

Early-stages of measles in children are treated with 30 to 60 grams of *Lu Gen* to clear heat, relieve itching and promote eruption of measles.

6. Relieves Food Poisoning

Lu Gen has a mild influence to treat food poisoning caused by ingestion of fish and crab. It also has mild action to relieve over-consumption of alcohol. Since its effect is rather mild, treatment in acute conditions requires combination with other herbs.

DOSAGE

10 to 30 grams of the dried herb. 15 to 60 grams of the fresh herb, with maximum (fresh) dosage of 100 grams. The fresh form of *Lu Gen* has a stronger function to clear heat and promote generation of body fluids.

CAUTIONS / CONTRAINDICATIONS

- Cold in nature, *Lu Gen* should be used with caution for patients who have deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Amino acids, fatty acids, sterols, tocopherols, polyphenols, caffeic acid, gentisic acid, dioxane lignin, guaiacyl, syringyl, 4-hydroxyphenyl, 2,5-dimethoxy-p-benzoquinone, p-hydroxybenzaldehyde, syringaldehyde, coniferaldehyde, vanillic acid, ferulic acid, p-coumaric acid, coixol, asparagine, arabinose, xylose, glucose.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Preparations of *Lu Gen* have a mild inhibitory effect on the smooth muscle of the intestines by slowing down intestinal peristalsis.[2]
- **CNS suppressant:** It has a mild sedative effect on the central nervous system (CNS) in rats and mice. It also counters the excitation induced by caffeine.[3]

AUTHORS' COMMENTS

Lu Gen is a versatile herb that clears heat from the Lung in the upper *jiao*, from the Stomach in the middle *jiao*, and from the Urinary Bladder in the lower *jiao*.

Zhu Ye (Herba Phyllostachys)

竹葉 竹叶

Pinyin Name: *Zhu Ye*
Literal Name: "bamboo leaves"
Alternate Chinese Names: *Xian Zhu Ye, Zhu Ye Juan Xin*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: bamboo leaves
Botanical Name: *Phyllostachys nigra* (Lodd.) Munro var. *henonis* (Mitf.) Stapf. Ex Rendle
Pharmaceutical Name: Herba Phyllostachys
Properties: sweet, bland, cold
Channels Entered: Heart, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Relieves Irritability and Generates Body Fluids

Febrile disorders: *Zhu Ye* (Herba Phyllostachys) treats heat in the Heart and Stomach, manifesting in symptoms of irritability and thirst. The Heart opens to the tongue, thus excess heat accumulation in the Heart may lead to ulcers on the tongue, insomnia, and restless crying in children. Clinically, heat attacking the Heart is characterized by irritability, while heat attacking the Stomach is characterized by thirst.

- Heat attacking the Heart with irritability: use *Zhu Ye* with *Zhi Mu* (Radix Anemarrhenae) and *Mai Men Dong* (Radix Ophiopogonis).
- Heat attacking the Stomach with thirst and stomatitis: combine it with *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Heat attacking both Lung and Stomach: add *Mai Men Dong* (Radix Ophiopogonis), *Lu Gen* (Rhizoma Phragmitis) and *Tian Hua Fen* (Radix Trichosanthis).
- Wind-heat with thirst: add *Lian Qiao* (Fructus Forsythiae).
- Ulcers on the tongue: combine *Zhu Ye* with *Lian Zi Xin* (Plumula Nelumbinis).
- Restless crying in children: use this herb with *Gou Teng* (Ramulus Uncariae cum Uncis), and *Chan Tui* (Periostracum Cicadae).
- Delirium: add *Tian Zhu Huang* (Concretio Silicea Bambusae) and *Shi Chang Pu* (Rhizoma Acori).

2. Clears Heat and Promotes Diuresis

***Re lin* (heat dysuria):** *Zhu Ye* clears heat from both the Heart and Small Intestine. The Heart and Small Intestine are connected through their *zang fu* organ relationship. Disorder in one frequently affects the function of the other. Heat in the Heart is characterized by irritability, while heat in the Small Intestine is characterized by dysuria, burning sensations and pain accompanying urination.

- Dysuria arising from heat in the Small Intestine: add *Zhu Ye* to *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Dao Chi San* (Guide Out the Red Powder).

DOSAGE

6 to 15 grams. The maximum dosage of *Zhu Ye* is 30 grams. The fresh herb has a stronger heat-clearing function than the dried form.

CAUTIONS / CONTRAINDICATIONS

- Use *Zhu Ye* with caution during pregnancy.

AUTHORS' COMMENTS

Zhu Ye and *Dan Zhu Ye* (Herba Lophatheri) are two different herbs, though they have similar names and functions. *Zhu Ye* is stronger to clear heat from the Stomach and Heart. *Dan Zhu Ye* is stronger to clear heat and promote urination.

Dan Zhu Ye (Herba Lophatheri)

淡竹葉 淡竹叶

Pinyin Name: *Dan Zhu Ye*
Literal Name: "bland bamboo leaves"
Alternate Chinese Names: *Zhu Ye Mai Dong*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: lophatherum, common lophatherum
Botanical Name: *Lophatherum gracile* Brongn.
Pharmaceutical Name: Herba Lophatheri
Properties: sweet, bland, cold
Channels Entered: Heart, Stomach, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Relieves Irritability

Heat in the Heart and Stomach: Heat in these two organs manifests as irritability and thirst, respectively. *Dan Zhu Ye* (Herba Lophatheri) has an ascending and light nature that enters the *qi* (energy) level to treat febrile disorders.

- Heat attacking the Stomach with thirst and stomatitis: combine *Dan Zhu Ye* with *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Heat attacking both Lung and Stomach: combine it with *Mai Men Dong* (Radix Ophiopogonis), *Lu Gen* (Rhizoma Phragmitis) and *Tian Hua Fen* (Radix Trichosanthis).
- Ulcers on the tongue: combine *Dan Zhu Ye* with *Lian Zi Xin* (Plumula Nelumbinis).

2. Promotes Diuresis

***Lin zheng* (dysuria syndrome):** *Dan Zhu Ye* clears heat from both the Heart and Small Intestine. The Heart and Small Intestine are connected through their *zang fu* organ relationship. Disorder in one frequently affects the functioning of the other. Heat in the Heart may cause ulceration of the mouth and tongue, and heat in the Small Intestine may cause dysuria with burning sensations and pain accompanying urination.

- Dysuria because of heat in the Small Intestine: use *Dan Zhu Ye* with *Chuan Mu Tong* (Caulis Clematidis Armandii), *Che Qian Zi* (Semen Plantaginis) and *Sheng Di Huang* (Radix Rehmanniae).

DOSAGE

6 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- Use *Dan Zhu Ye* with caution during pregnancy.

CHEMICAL COMPOSITION

Arundoin, cylindrin, taraxerol, friedelin, β-sitosterol, organic acids, amino acids, and sugars.[1]

PHARMACOLOGICAL EFFECTS

- **Antipyretic:** In animal studies, *Dan Zhu Ye* has demonstrated antipyretic action similar to phenacetin. The active constituent that lowers temperature can be extracted with water, but not with alcohol.[2]
- **Diuretic:** In human studies, 10 grams of *Dan Zhu Ye* increased the elimination of water and chlorides. When compared to other diuretic herbs, such as *Fu Ling* (Poria), *Zhu Ling* (Polyporus) or *Chuan Mu Tong* (Caulis Clematidis Armandii), *Dan Zhu Ye* is weaker as a diuretic, but stronger in excretion of chlorides.[3,4]

HERB-DRUG INTERACTION

- **Diuretics:** *Dan Zhu Ye* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes. [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).][5]

TOXICOLOGY

The LD_{50} of *Dan Zhu Ye* in mice is 64.5 g/kg.[6]

Dan Zhu Ye (Herba Lophatheri)

Zhi Zi (Fructus Gardeniae)

栀子 栀子

Pinyin Name: *Zhi Zi*
Alternate Chinese Names: *Shan Zhi Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: gardenia, cape jasmine fruit
Botanical Name: *Gardenia jasminoides* Ellis.
Pharmaceutical Name: Fructus Gardeniae
Properties: bitter, cold
Channels Entered: Heart, Lung, Stomach, San Jiao

CHINESE THERAPEUTIC ACTIONS

1. Sedates Fire and Relieves Irritability

Febrile disorders: *Zhi Zi* (Fructus Gardeniae) is one of the most-commonly used herbs to clear heat and sedate fire from all three *jiaos*. It is most effective if heat and fire are prominent in the Heart, Lung and Stomach. Clinical applications include: heat affecting the Heart leading to irritability, frustration and restlessness; heat affecting the Stomach causing heartburn; heat affecting the Liver leading to irritability and Liver qi stagnation; severe heat and toxins attacking the interior creating high fever, irritability, short temper, delirium or semiconsciousness; and heat attacking the skin developing into carbuncles and furuncles with or without abscesses and ulceration. Other symptoms include: headache, red eyes, toothache, sore throat, ulcers on the tongue, constipation, and yellow urine.

- Irritability and heartburn: use *Zhi Zi* with *Dan Dou Chi* (Semen Sojae Praeparatum). **Exemplar Formula:** *Zhi Zi Chi Tang* (Gardenia and Soja Decoction).
- Irritability, short temper: combine it with *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba) and *Mu Dan Pi* (Cortex Moutan). **Exemplar Formula:** *Jia Wei Xiao Yao San* (Augmented Rambling Powder).
- Depression with irritability: combine *Zhi Zi* with *Xiang Fu* (Rhizoma Cyperi), *Chuan Xiong* (Rhizoma Ligusticum Chuanxiong), and *Shen Qu* (Massa Fermentata). **Exemplar Formula:** *Yue Ju Wan* (Escape Restraint Pill).
- High fever, irritability, delirium or semiconsciousness: use this herb with *Huang Lian* (Rhizoma Coptidis), *Da Huang* (Radix et Rhizoma Rhei) and *Lian Qiao* (Fructus Forsythiae).
- Carbuncles and furuncles with or without abscesses and ulceration: use *Zhi Zi* topically or combine it with *Huang Lian* (Rhizoma Coptidis), *Da Huang* (Radix et Rhizoma Rhei) and *Lian Qiao* (Fructus Forsythiae). **Exemplar Formula:** *Qing Wen Bai Du Yin* (Clear Epidemics and Overcome Toxin Decoction).
- Constipation: add *Da Huang* (Radix et Rhizoma Rhei).

2. Drains Damp-Heat Downwards

Damp-heat in the Liver and Gallbladder: *Zhi Zi* enters the Liver and is commonly used to treat damp-heat in

Zhi Zi (Fructus Gardeniae)

the middle *jiao*. Clinical manifestations include jaundice, infectious hepatitis, cholecystitis, and cholelithiasis.

- Jaundice, infectious hepatitis, cholecystitis, and cholelithiasis: use *Zhi Zi* with *Yin Chen Hao* (Herba Artemisiae Scopariae), and *Da Huang* (Radix et Rhizoma Rhei). **Exemplar Formula:** *Yin Chen Hao Tang* (Artemisia Scoparia Decoction).

***Re lin* (heat dysuria):** Symptoms of damp-heat in the lower *jiao* include urinary tract infection, and dysuria.

- Urinary tract infection: use *Zhi Zi* with *Hua Shi* (Talcum), *Bian Xu* (Herba Polygoni Avicularis), and *Che Qian Zi* (Semen Plantaginis) to clear damp-heat and promote normal urination. **Exemplar Formula:** *Ba Zheng San* (Eight-Herb Powder for Rectification).

3. Clears Heat, Cools Blood and Stops Bleeding

Bleeding: *Zhi Zi* is commonly used to treat various bleeding disorders characterized by heat, including hematuria, hemoptysis, hematemesis, and epistaxis. The primary characteristic of heat driving blood out of the vessels is that the color of the blood is bright red, as opposed to the light color found in deficient conditions.

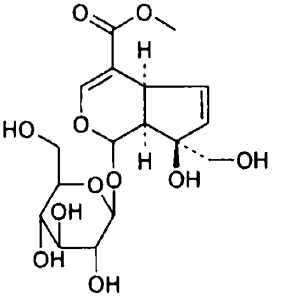
- Hematuria and *xue lin* (bloody dysuria): use *Zhi Zi* with *Xiao Ji* (Herba Cirisii), *Bai Mao Gen* (Rhizoma Imperatae) and *Huang Qin* (Radix Scutellariae). **Exemplar Formula:** *Xiao Ji Yin Zi* (Cephalanoplos Decoction).
- Hematemesis and epistaxis: combine it with *Da Ji* (Herba seu Radix Cirsii Japonici), *Xiao Ji* (Herba Cirisii) and *Ce Bai Ye* (Cacumen Platycladi). **Exemplar Formula:** *Shi Hui San* (Ten Partially-charred Substance Powder).
- Hemoptysis: use it with *Ou Jie* (Nodus Nelumbinis Rhizomatis), *Bai Mao Gen* (Rhizoma Imperatae), *Bai Ji* (Rhizoma Bletillae), and *Ce Bai Ye* (Cacumen Platycladi).

4. Reduces Swelling and Relieves Pain

Traumatic injuries with swelling and bruises: *Zhi Zi* reduces swelling, disperses stagnation, and relieves pain. Clinical applications include sprains, strains, soft-tissue injuries, and other musculoskeletal injuries.

- Traumatic or sports injuries: mix *Zhi Zi* powder with water, rice-wine vinegar and egg white to apply topically on affected areas. This method is commonly used in rural areas of China to relieve bruises, swelling and pain.

DOSAGE



3 to 10 grams in decoction. The maximum dosage of *Zhi Zi* for internal use is 20 grams. The dosage for topical use varies depending on the size of the affected area and severity of the injury. For oral administration, fresh *Zhi Zi* functions more effectively to clear heat and sedate fire. When prepared with ginger, it more strongly relieves nausea and vomiting. Dry-fried *Zhi Zi* is warmer, and is less likely to damage the Spleen and Stomach. Charred *Zhi Zi* has stronger action to stop bleeding.

CAUTIONS / CONTRAINDICATIONS

- Bitter and cold in nature, *Zhi Zi* should be used with caution in patients who have deficiency and cold of the Spleen and Stomach, characterized by loose stools and decreased intake of food.
- Use of this herb may be associated with possible drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operate heavy machinery.

CHEMICAL COMPOSITION

Gardenoside, geniposide, jeminoidin, genipin-1-β-D-gentiobioside, shanzhiside, genipin, geniposidic acid.[1,2]

Gardenoside

PHARMACOLOGICAL EFFECTS

- **Analgesic and sedative:** Intravenous injection of geniposide has demonstrated mild analgesic effects in mice.[3]
- **Antihypertensive:** *Zhi Zi* has demonstrated marked antihypertensive action in numerous studies. It is effective via oral, intravenous or intraperitoneal injections; effective in cats, mice and rabbits; and in normal or anesthetized subjects. It has been proposed by some that the hypotensive effect of *Zhi Zi* is because of its stimulation of the parasympathetic nervous system. It has been stated by others that the hypotensive effect results from the decrease of cardiac contractility and cardiac output associated with *Zhi Zi*. Possibilities that have been ruled out include inhibition of adrenal cortical secretion and inhibition of the baroreceptor reflex. Lastly, its antihypertensive effect cannot be negated by intravenous injection of procaine.[4]
- **Hepatoprotective:** Administration of *Zhi Zi* is associated with a marked hepatoprotective function as it lowers serum bilirubin, liver enzymes, and prevents the death of hepatocytes. In one study, the use of *Zhi Zi* effectively reduced liver damage caused by carbon tetrachloride. It

Zhi Zi (Fructus Gardeniae)

also reduces the extent and severity of liver damage associated with acute jaundice in mice. In another study, the risk of acute onset of hepatitis associated with aminogalactose extract is significantly reduced if extract of *Zhi Zi* was given 24 to 48 hours earlier as prophylaxis.[5,6]

- **Cholagogic:** Geniposide has demonstrated marked effectiveness to stimulate the production of bile, enhance contraction of the gallbladder, and increase excretion of bile into the intestines in rats and rabbits. The effective dose for geniposide is 25 mg/kg, given orally or intravenously.[7]
- **Gastrointestinal:** One report states that 25 mg/kg of geniposide given orally decreases the secretion of gastric acid and increases the pH in the stomach in rats. Intravenous injection of 100 mg/kg of geniposide decreases peristalsis of the gastrointestinal system.[8]
- **CNS suppressant:** Intraperitoneal injection of an extract of *Zhi Zi* in rats has an inhibitory effect on the central nervous system (CNS). It decreased spontaneous activity, increased the sleeping time induced by barbiturates by up to 12 times, and decreased body temperature by 3°C for up to 7 hours.[9]
- **Antibiotic:** *Zhi Zi* has demonstrated inhibitory activity against *Staphylococcus aureus*, *Neisseria meningitidis*, and dermatophytes. The herbal decoction has demonstrated bactericidal action against leptospira and schistosoma.[10]

CLINICAL STUDIES AND RESEARCH

- **Musculoskeletal sprain and strain:** In one study, 407 patients with musculoskeletal injuries were treated topically with an herbal paste (*Zhi Zi* mixed with a small amount of water and rubbing alcohol). The herbal paste was placed on the affected area and changed every 2 to 5 days. Patients with bone fractures were disqualified from the study, and patients with dislocations had their joints adjusted prior to herbal treatment. Out of 407 patients, the average time required was 30 hours to relieve pain, 2.5 days to reduce swelling and inflammation, 7.8 days to relieve bruises, and 5.1 days to resume normal physical activities.[11]
- **Coronary artery disorders:** Patients with coronary artery disorders were treated with an herbal paste applied topically on the chest directly adjacent to the heart. The herbal paste was removed and re-applied every 3 days for the first week, then every 7 days thereafter. Out of 50 patients, 22 reported significant improvement and 22 reported moderate improvement. The herbal paste was made by mixing 12 grams each of *Zhi Zi* and *Tao Ren* (Semen Persicae) with 30 grams of honey.[12]
- **Analgesic:** In one report, 110 patients with various aches and pains were treated with an herbal paste topically, with good results. The herbal paste was made by mixing 10 grams each of *Zhi Zi* and *Da Huang* (Radix et Rhizoma Rhei) with paraffin oil and 75% rubbing alcohol.[13]

HERB-DRUG INTERACTION

- **Sedatives:** *Zhi Zi* has a sedative effect, and concurrent use with barbiturates may increase the drug-induced sleeping time.[14] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and others.]

TOXICOLOGY

The LD_{50} for alcohol extract of *Zhi Zi* in mice is 107.4 g/kg via oral ingestion. For its isolated constituents, the LD_{50} for geniposide is 3 g/kg in mice via oral, intraperitoneal or intravenous administration. The LD_{50} for genipin is 237 mg/kg via oral ingestion, 190 mg/kg via intraperitoneal, and 153 mg/kg via intravenous injection.[15,16]

SUPPLEMENT

In addition to the fruit, other parts of *Zhi Zi* are also used for medicinal purposes, including

- 梔子仁 / 栀子仁 *Zhi Zi Ren* (Semen Gardeniae), the seeds, clears Heart fire and relieves irritability.
- 梔子皮 / 栀子皮 *Zhi Zi Pi* (Pericarpium Gardeniae), the skin, clears exterior heat.

AUTHORS' COMMENTS

Charred *Zhi Zi* is most effective in stopping bleeding as compared to unprocessed *Zhi Zi*. However, if the cause of bleeding is excessive heat driving blood out from the vessels, unprepared *Zhi Zi* should still be used, as charred *Zhi Zi* has lost most of its function to clear heat when it is turned into ashes.

Not only is *Zhi Zi* commonly used in clinical practice, its flower is also beautiful. According to ancient texts, the plant has the ability to clean the air and absorb toxins that may be harmful to the human body.

Dr. Shen Yen-Nan reports that specific organs injured by fire can be treated with optimum results by key herbs, as follows:

- Lung fire: *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori)
- Heart fire: *Huang Lian* (Rhizoma Coptidis)
- Stomach fire: *Shi Gao* (Gypsum Fibrosum)
- Liver fire: *Zhi Zi* (Fructus Gardeniae)
- Kidney fire: *Zhi Mu* (Radix Anemarrhenae)

Zhi Zi (Fructus Gardeniae)

Xia Ku Cao (Spica Prunellae)

夏枯草 夏枯草

Pinyin Name: *Xia Ku Cao*
Literal Name: "withered flower in summer," "summer withering grass"
Alternate Chinese Names: *Xia Ku Hua, Da Tou Hua*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: prunella, flower (fruit-spike) of common selfheal
Botanical Name: *Prunella vulgaris* L. (*Xia Ku Cao*)
Pharmaceutical Name: Spica Prunellae
Properties: bitter, acrid, cold
Channels Entered: Liver, Gallbladder

CHINESE THERAPEUTIC ACTIONS

1. Clears Liver Fire

Liver fire: Acrid and cold, *Xia Ku Cao* (Spica Prunellae) has dispersing and heat-clearing functions. It is commonly used to clear heat and sedate fire from the Liver and Gallbladder. Clinically, Liver fire flaring upwards is characterized by disorders of the eyes such as redness, swelling and pain in the eyes, photophobia, excessive tearing, headache and dizziness. Liver fire with blood deficiency is characterized by swelling and eye pain that worsens at night. Liver qi stagnation is characterized by hypochondriac fullness and pain, fidgeting, irritability, and emotional instability.

- Liver fire with eye disorders: use *Xia Ku Cao* with *Shi Jue Ming* (Concha Haliotidis), *Jue Ming Zi* (Semen Cassiae), and *Ju Hua* (Flos Chrysanthemi).
- Liver fire with blood deficiency: combine it with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Xuan Shen* (Radix Scrophulariae).
- Liver qi stagnation: add *Xiang Fu* (Rhizoma Cyperi) and *Chai Hu* (Radix Bupleuri).

Xia Ku Cao can be used to treat severe liver disorders involving enlargement and inflammation of the liver, such as hepatitis and hepatomegaly, characterized by excessive heat and fire.

- Enlargement and inflammation of the liver: use this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Huang Bai* (Cortex Phellodendri) and *Dan Shen* (Radix Salviae Miltiorrhizae).

2. Clears Hot Phlegm, Disperses Stagnation, and Resolves Nodules

Scrofula, lipoma, swollen glands, goiter, lumps or nodules: In TCM, nodules are considered to be abnormal accumulations of heat, toxins and phlegm. When heat persists in the body over a long time, body fluids dry into phlegm masses or nodules. When accompanied by qi

Xia Ku Cao (Spica Prunellae)

stagnation, the masses harden and become immobile. *Xia Ku Cao* effectively resolves nodules by clearing heat and softening and dispersing qi and phlegm stagnation.

- Phlegm stagnation caused by heat and fire: use *Xia Ku Cao* with *Xuan Shen* (Radix Scrophulariae), *Mu Li* (Concha Ostreae) and *Kun Bu* (Thallus Laminariae seu Eckloniae).

3. Lowers Blood Pressure

Hypertension: *Xia Ku Cao* is commonly used to treat hypertension associated with Liver fire and Liver yang rising.

- Hypertension: use *Xia Ku Cao* with *Gou Teng* (Ramulus Uncariae cum Uncis), *Di Long* (Pheretima) and *Du Zhong* (Cortex Eucommiae).
- Redness, swelling and eye pain caused by hypertension: use it with *Ju Hua* (Flos Chrysanthemi), *Shi Jue Ming* (Concha Haliotidis) and *Chan Tui* (Periostracum Cicadae).

DOSAGE

10 to 15 grams. The maximum dosage of *Xia Ku Cao* is 100 grams. *Xia Ku Cao* may be used singly or in an herbal formula. The flower is commonly used as the medicinal part of the plant. The entire plant, however, does have stronger potency than the flower for lowering blood pressure.

CAUTIONS / CONTRAINDICATIONS

- Cold in thermal nature, *Xia Ku Cao* should be used with caution in patients with Spleen and Stomach deficiencies.

CHEMICAL COMPOSITION

Prunellin, oleanolic acid, ursolic acid, carotene, camphor, fenchone, rutin, hyperin, hyperside, delphinidin, cyanidin, caffeic acid, rosmarinic acid, deucosterol, β-amyrin.[1]

PHARMACOLOGICAL EFFECTS

- **Antihypertensive:** Both water and alcohol extracts of *Xia Ku Cao* have a rapid onset of effect in reducing blood pressure. This antihypertensive effect is generally attributed to vasodilation, though some reports indicate otherwise. In dogs with renal hypertension, daily administration of *Xia Ku Cao* was effective in reducing blood pressure. Unfortunately, blood pressure returned to previous levels upon discontinuation of herbal therapy. The stems, leaves, flowers and entire plant all have antihypertensive functions.[2,3]
- **Anti-inflammatory:** *Xia Ku Cao* has demonstrated marked anti-inflammatory action in rabbits. The exact mechanism of action is unclear, but is thought to be due in part to increased secretion of ACTH and/or glucocorticoids.[4]
- **Antibiotic:** *Xia Ku Cao* has demonstrated inhibitory effects against *Shigella* spp., *Salmonella typhi*, *E. coli*, *Pseudomonas aeruginosa*, *Mycobacterium tuberculosis*, *Streptococcus* spp., and dermatophytes.[5]
- **Effect on lipoma:** *Xia Ku Cao* has marked effectiveness in treating lipoma in animals. However, this therapeutic effect is only achieved with a large dosage of the herb, which is associated with toxic reactions.[6]
- **Smooth muscle stimulant:** *Xia Ku Cao* stimulates contractility of uterine and intestinal muscles.[7]

CLINICAL STUDIES AND RESEARCH

- **Hypertension:** Administration of *Xia Ku Cao* as a single herb in 42 patients showed good results for treatment of hypertension.[8]
- **Pulmonary tuberculosis:** In one study, 18 patients were treated with 60 grams of *Xia Ku Cao* taken as decoction. The effective rate was 78.5%.[9]

TOXICOLOGY

No abnormalities of internal organs or fatalities were observed following an oral bolus dose of a *Xia Ku Cao* preparation at 10 g/kg in mice.[10]

SUPPLEMENT

- 夏枯花 *Xia Ku Hua* (Flos Prunellae), first cited in the *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is acrid, cold and enters the Lung. Its main function is to dispel phlegm from the Lung to treat cases of lung abscess. Pharmacologically, it has both antibiotic and antihypertensive effects. *Xia Ku Cao* (Spica Prunellae) and *Xia Ku Hua* (Flos Prunellae) have essentially the same components and are often used interchangeably. *Xia Ku Cao*, however, is often considered more desirable and more potent than *Xia Ku Hua*. The dosage of *Xia Ku Hua* is 10 to 15 grams.

Mí Meng Hua (Flos Buddlejae)

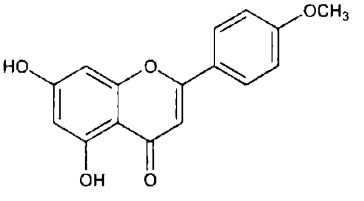
密蒙花 密蒙花

Pinyin Name: *Mi Meng Hua*
Literal Name: "dense-covered flower"
Alternate Chinese Names: *Meng Hua*
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: buddleja, pale butterfly bush flower
Botanical Name: *Buddleja officinalis* Maxim.
Pharmaceutical Name: Flos Buddlejae
Properties: sweet, cool
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Clears Liver Heat, Brightens the Eyes and Removes Superficial Visual Obstruction

Eye Disorders: *Mi Meng Hua* (Flos Buddlejae) shows good results in treatment of eye disorders caused by either excess or deficiency syndromes. Eye disorders may be caused by Liver heat or wind-heat attacking the eyes, leading to redness, swelling and pain, photophobia, and excessive tearing. On the other hand, eye disorders may be caused by deficiency heat leading to dry eyes and dizziness. *Mi Meng Hua* is effective in treating both, when combined with other appropriate herbs.



- Eye disorders caused by wind-heat: use *Mi Meng Hua* with *Ju Hua* (Flos Chrysanthemi) and *Mu Zei* (Herba Equiseti Hiemalis).
- Eye disorders from Liver heat: use it with *Bai Ji Li* (Fructus Tribuli), *Shi Jue Ming* (Concha Haliotidis), *Jue Ming Zi* (Semen Cassiae) and *Gu Jing Cao* (Flos Eriocauli).
- Eye disorders caused by deficiency heat: combine it with *Gou Qi Zi* (Fructus Lycii), *Sha Yuan Zi* (Semen Astragali Complanati) and *Tu Si Zi* (Semen Cuscutae).
- Blurred vision from Liver deficiency: add *Shi Jue Ming* (Concha Haliotidis) and *Gou Qi Zi* (Fructus Lycii).
- Superficial visual obstruction: use *Mi Meng Hua* with *Mu Zei* (Herba Equiseti Hiemalis), *Ye Ming Sha* (Excrementum Vespertilionis Murini) and *Chan Tui* (Periostracum Cicadae).
- Itching eyes: use it with *Man Jing Zi* (Fructus Viticis), *Fang Feng* (Radix Saposhnikoviae), *Jing Jie* (Herba Schizonepetae) and *Ju Hua* (Flos Chrysanthemi).

DOSAGE

6 to 10 grams in decoction. The maximum dosage of *Mi Meng Hua* is 20 grams.

CHEMICAL COMPOSITION

Buddleoglucoside, linarin, acaciin, acacetin, p-methoxycinnamoylaucubin, p-methoxycinnamoylcatapol, catalposide, catalpol, aucubin, echinacoside, acteoside.[1,2]

Acacetin

PHARMACOLOGICAL EFFECTS

- **Antispasmodic:** Acacetin has a mild action to relieve muscle spasms in rats. When given as intravenous injection at 40 mg/kg, it relaxes the smooth muscle of the bile duct.[3]
- **Diuretic:** Intravenous injection of a *Mi Meng Hua* preparation increases urine output by up to 75% in rabbits within 25 to 30 minutes.[4]

CLINICAL STUDIES AND RESEARCH

- **Conjunctivitis:** According to one report, 10 patients with infectious hemorrhagic conjunctivitis were treated with an herbal formula, with complete recovery in 9 patients within 2 to 6 doses. The herbal formula contained *Mi Meng Hua* 9g, *Qing Xiang Zi* (Semen Celosiae) 9g, *Dang Gui* (Radicis Angelicae Sinensis) 9g, *Chi Shao* (Radix Paeoniae Rubrae) 9g, *Chai Hu* (Radix Bupleuri) 9g, *Niu Xi* (Radix Cyathulae seu Achyranthis) 9g, *Jie Geng* (Radix Platycodonis) 9g, *Jue Ming Zi* (Semen Cassiae) 9g, *Hong Hua* (Flos Carthami) 6g, *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) 6g, *Tao Ren* (Semen Persicae) 12g, and *Sheng Di Huang* (Radix Rehmanniae)

Mi Meng Hua (Flos Buddlejae)

12g. Modifications included a larger dose of *Chai Hu* (Radix Bupleuri) for Liver qi stagnation, addition of *Mu Dan Pi* (Cortex Moutan) and *Di Gu Pi* (Cortex Lycii) for heat, and elimination of *Tao Ren* (Semen Persicae) during menses. The herbal formula was given as a decoction twice daily.[5]

- **Corneal ulcer:** In a clinical study, 121 patients with corneal ulcers were successfully treated using Chinese herbal medicine. Out of affected 129 eyes (several patients had ulcers in both eyes), the study reported complete recovery in 98 cases, moderate improvement in 22 cases, and no response in 9 cases. The herbal formula contained *Mi Meng Hua* 15g, *Huang Lian* (Rhizoma Coptidis) 15g, *Zi Cao Gen* (Radix Lithospermi) 15g, *Mu Zei* (Herba Equiseti Hiemalis) 20g, *Gu Jing Cao* (Flos Eriocauli) 20g, and *Qin Pi* (Cortex Fraxini) 20g. Modifications were made if deemed necessary. The herbs were cooked twice in 1500 ml of water for 20 minutes each time, and the two batches were mixed together and used as a topical application. The patients were instructed to soak a towel in the solution and apply the towel to the affected eye(s).[6]

HERB-DRUG INTERACTION

- **Diuretics:** *Mi Meng Hua* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes. [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).][7]

TOXICOLOGY

The LD_{50} for acacetin in mice is 933 mg/kg.[8]

Qing Xiang Zi (Semen Celosiae)

青葙子 青葙子

Pinyin Name: *Qing Xiang Zi*
Alternate Chinese Names: *Ji Guan Qian*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: celosia argentea seed, feather cockscomb seed
Botanical Name: *Celosia argentea* L.
Pharmaceutical Name: Semen Celosiae
Properties: bitter, cool
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Sedates Liver Fire and Benefits the Eyes

Eye disorders: *Qing Xiang Zi* (Semen Celosiae) treats eye disorders caused by Liver fire flaring upwards with symptoms such as redness, swelling and pain, photophobia, and excessive tearing.

Qing Xiang Zi (Semen Celosiae)

- Redness, swelling and eye pain due to Liver fire: use *Qing Xiang Zi* with *Jue Ming Zi* (Semen Cassiae) and *Xia Ku Cao* (Spica Prunellae).
- Redness, swelling and eye pain due to wind-heat: add *Mi Meng Hua* (Flos Buddlejae) and *Mu Zei* (Herba Equiseti Hiemalis).
- Night blindness: use *Qing Xiang Zi* with *Da Zao* (Fructus Jujubae).

2. Sedates Liver Fire and Lowers Blood Pressure

Hypertension: Clinical applications include Liver yang rising or Liver fire with headache, short temper and red eyes.

- Hypertension caused by Liver fire: use *Qing Xiang Zi* with *Xia Ku Cao* (Spica Prunellae), *Gou Teng* (Ramulus Uncariae cum Uncis) and *Shi Jue Ming* (Concha Haliotidis) to sedate Liver fire.
- Headache because of Liver fire: combine this herb with *Jue Ming Zi* (Semen Cassiae), *Huang Qin* (Radix Scutellariae) and *Xia Ku Cao* (Spica Prunellae).
- Epistaxis: apply decoction of *Qing Xiang Zi* topically into the nostrils.
- Eye disorders caused by wind-heat: use this herb with *Mi Meng Hua* (Flos Buddlejae) and *Mu Zei* (Herba Equiseti Hiemalis).

DOSAGE

6 to 15 grams in decoction. The maximum dosage of *Qing Xiang Zi* is 20 grams.

CAUTIONS / CONTRAINDICATIONS

- Cold in thermal nature, *Qing Xiang Zi* should be used with caution in patients with deficiency and cold of the Spleen and Stomach, qi and/or yang deficiency, and deficiency of the Liver or Kidney.
- *Qing Xiang Zi* dilates the pupils of the eyes. Therefore, it should be used with caution in individuals with eye disorders characterized by dilated pupils, such as in glaucoma.

CHEMICAL COMPOSITION

β-sitosterol, cholesteryl palmitate, 3,4-dihydroxyl benzaldehyde, p-hydroxyl benzoic acid, 3,4-dihydroxyl benzoic acid, nicotinic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antihypertensive:** *Qing Xiang Zi* has demonstrated moderate antihypertensive effects.[2]
- **Ophthalmic:** Decoction of *Qing Xiang Zi* given daily for 6 days lowered ocular pressure in rabbits.[3]
- **Antibiotic:** Decoction of *Qing Xiang Zi* has a strong inhibiting effect on *Pseudomonas aeruginosa*.[4]

Gu Jing Cao (Flos Eriocauli)

谷精草 谷精草

Pinyin Name: *Gu Jing Cao*
Literal Name: "grain essence herb"
Alternate Chinese Names: *Gu Jing Zhu*, *Dai Xing Cao*
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: eriocaulis, buerger pipewort flower
Botanical Name: *Eriocaulon buergerianum* Koern. (*Gu Jing Cao*); *Eriocaulon sieboldtianum* Seib. Et Zucc. (*Sai Gu Jing Cao*)
Pharmaceutical Name: Flos Eriocauli
Properties: sweet, neutral
Channels Entered: Liver, Stomach

Gu Jing Cao (Flos Eriocauli)

CHINESE THERAPEUTIC ACTIONS

Disperses Wind and Heat in the Liver Channel, Brightens the Eyes and Removes Superficial Visual Obstruction

Eye disorders caused by wind and heat in the Liver channel: Clinical manifestations include painful, swollen, red eyes, photophobia, excessive tearing, superficial visual obstructions, pterygium or spots in front of the eyes. These eye disorders can be attributed to both external wind-heat invasion and wind-heat attacking the Liver channel. *Gu Jing Cao* (Flos Eriocauli) can also be used for headache, toothache and sore throat caused by wind-heat invasion.

- Red eyes: use with *Ju Hua* (Flos Chrysanthemi), *Xia Ku Cao* (Spica Prunellae) and *Long Dan Cao* (Radix Gentianae).
- Itching of the eyes: add *Jing Jie* (Herba Schizonepetae) to *Gu Jing Cao*.
- Superficial visual obstruction: use it with *Chan Tui* (Periostracum Cicadae).

DOSAGE

6 to 10 grams in decoction.

CHEMICAL COMPOSITION

Phenolic compounds.[1]

PHARMACOLOGICAL EFFECTS

Antibiotic: Water decoction of *Gu Jing Cao* has an inhibiting effect *in vitro* against *Pseudomonas aeruginosa*, some dermatophytes, and pathogenic fungi.[2,3]

References

1. *CA*, 1991; 115:110604a
2. *Zhong Yao Xue* (Chinese Herbology), 1998; 133:134

Rui Ren (Semen Prinsepiae)

蕊仁 蕊仁

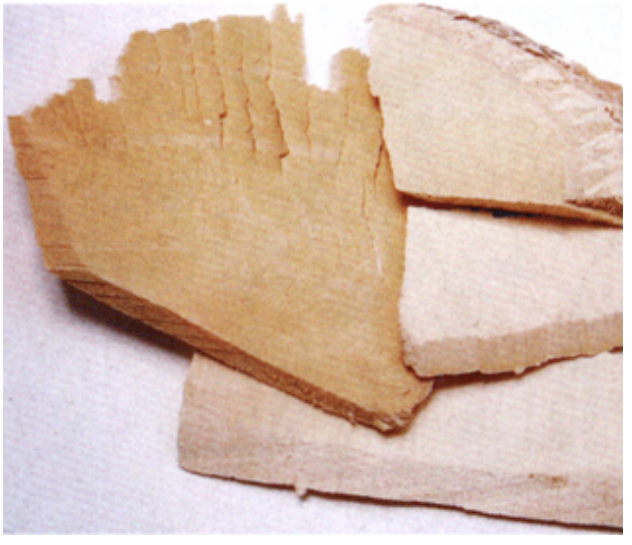
Pinyin Name: *Rui Ren*
Alternate Chinese Names: *Rui He, Rui Ren Rou, Rui Zi*
English Name: prinsepia seed, hedge prinsepia nut
Botanical Name: *Prinsepia uniflora* Batal
Pharmaceutical Name: Semen Prinsepiae
Properties: sweet, cool
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Disperses Wind, Clears Heat, Clears the Liver and Brightens the Eyes

Acute conjunctivitis or acute keratitis: Acute disorders involving the eyes usually are caused by wind or heat in the Liver channel. *Rui Ren* (Semen Prinsepiae) treats both types of acute inflammation. However, it is not suitable for eye disorders caused by deficiencies of the Liver and Kidney, manifesting as diminished or blurred vision.

- Acute conjunctivitis or keratitis: use *Rui Ren* with *Qian Li Guang* (Herba Senecionis Scandens) and *Ma Bian Cao* (Herba Verbenae), and add to *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver).



DOSAGE

4.5 to 9 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use of *Rui Ren* is contraindicated in patients with eye disorders caused by Liver and Kidney deficiencies.

Da Ding Huang (Caulis Euonymi)

大疔黄

Pinyin Name: *Da Ding Huang*
Literal Name: "anti-inflammatory big furuncle"
English Name: euonymus
Botanical Name: *Euonymus echinata* Wall.
Pharmaceutical Name: Caulis Euonymi
Properties: bitter, cold
Channels Entered: Liver, Lung

CHINESE THERAPEUTIC ACTIONS

Reduces Inflammation and Eliminates Toxins

Da Ding Huang (Caulis Euonymi) is a cold herb that treats various conditions characterized by heat, inflammation and toxin.

- Toxic swellings, carbuncles and furuncles: combine *Da Ding Huang* with *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life).
- Arthritis: use this herb with *Huang Jin Gui* (Caulis Vanieriae), *Mo Gu Xiao* (Caulis Hyptis Capitatae) and *Liu Zhi Huang* (Herba Solidaginis).

DOSAGE

6 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Da Ding Huang* with caution in patients with deficiency and cold of the Stomach and Spleen.

Ren Zhong Bai (Urinae Hominis Sedimen)

人中白

Pinyin Name: *Ren Zhong Bai*
Literal Name: "whiteness within man"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: human urine sediment
Zoological Name: *Homo sapiens* L. (*Ren Niao*)
Pharmaceutical Name: Urinae Hominis Sedimen
Properties: salty, neutral
Channels Entered: Liver, Kidney, San Jiao, Urinary Bladder

Ren Zhong Bai (Urinae Hominis Sedimen)

CHINESE THERAPEUTIC ACTIONS

Sedates Heat and Fire, Reduces Swelling, Stops Bleeding

Ren Zhong Bai (Urinae Hominis Sedimen) is used for a wide variety of conditions characterized by heat in the upper, middle and lower *jiaos*, including bleeding, soreness and swelling of the throat, ulceration of the mouth and gums, eczema, and headache.

- Edema: use *Ren Zhong Bai* as a sole remedy.
- Epistaxis: add it with *She Xiang* (Moschus).
- Frontal headache and migraine: use it with *Di Long* (Pheretima).

DOSAGE

3 to 6 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Ren Zhong Bai* is contraindicated in cases of deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Urea, sodium chloride, phosphoric acid, sulfuric acid, uric acid, hippuric acid, urobilin, and organic salts.[1]

References

1. *Dorland's Illustrated Medical Dictionary*, 1994; 1781

Shi Lian Zi (Herba Sinocrassulae Indicae)

石蓮子 石莲子

Pinyin Name: *Shi Lian Zi*
Literal Name: "stone lotus seed"
English Name: Indian sinocrassula
Botanical Name: *Sinocrassulae indicae*
Pharmaceutical Name: Herba Sinocrassulae Indicae
Properties: bitter, cold
Channels Entered: Large Intestine, Urinary Bladder, Stomach

CHINESE THERAPEUTIC ACTIONS

Clears Heat

Shi Lian Zi (Herba Sinocrassulae Indicae) is a cold herb that clears heat from the Large Intestine, Urinary Bladder, and Stomach.

- Chronic dysentery: use *Shi Lian Zi* with *Feng Wei Cao* (Herba Pteris), *Huang Lian* (Rhizoma Coptidis), *Bai Tou Weng* (Radix Pulsatillae), *Huang Bai* (Cortex Phellodendri) and *Bai Shao* (Radix Paeoniae Alba).
- Chronic turbid urine: combine this herb with *Shui Ding Xiang* (Herba Ludwigiae Prostratae) and *Ya She Huang* (Herba Lippiae).
- Nausea, hiccups and vomiting due to qi reversal of the Stomach: use it with *Xuan Fu Hua* (Flos Inulae), *Ban Xia* (Rhizoma Pinelliae), *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Dai Zhe Shi* (Haematitum).

DOSAGE

3 to 12 grams in decoction.

Lu Cha (Folium Camellia Sinensis)

綠茶 绿茶

Pinyin Name: *Lu Cha*
Literal Name: "green tea"
English Name: green tea
Botanical Name: *Camellia sinensis* L. Kuntze (*Cha*)
Pharmaceutical Name: Folium Camellia Sinensis
Properties: bitter, cold
Channels Entered: Stomach

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes the Stomach, Directs Rebellious Stomach Qi Downward and Relieves Diarrhea

Nausea, vomiting and diarrhea: *Lu Cha* (Folium Camellia Sinensis) treats generalized discomforts of the gastrointestinal tract caused by rebellious Stomach qi.

- General gastrointestinal discomfort: use *Lu Cha* with *Gan Cao* (Radix Glycyrrhizae) and *Da Zao* (Fructus Jujubae).
- Nausea and vomiting: add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Ban Xia* (Rhizoma Pinelliae).
- Diarrhea: combine this herb with *Ge Gen* (Radix Puerariae), *Huang Qin* (Radix Scutellariae) and *Lian Qiao* (Fructus Forsythiae).

2. Dispels Dampness

Obesity: *Lu Cha* is taken as a beverage or with food to remove excess fat or oil for slimming purposes. It helps to dispel accumulation of dampness in the intestines.

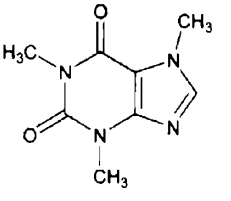
- Obesity: use *Lu Cha* with *Yi Yi Ren* (Semen Coicis) and *He Ye* (Folium Nelumbinis).

3. Clears the Head

Headache: *Lu Cha* clears the head and relieves headache. It is used as an adjuvant herb to prevent the drying, ascending and dispersing nature of diaphoretic herbs from harming the body.

- Headache: use this herb with *Bai Zhi* (Radix Angelicae Dahuricae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Qiang Huo* (Rhizoma et Radix Notopterygii). **Exemplar Formula:** *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea).

DOSAGE



3 to 12 grams in decoction. *Lu Cha* can be consumed as tea up to 5 cups per day when used as a beverage.

CAUTIONS / CONTRAINDICATIONS

- Use with caution in cases with Stomach qi deficiency as *Lu Cha* may cause irritation when taken to the excess. Fermented or processed teas, such as black tea or oolong, are gentler on the stomach than unprocessed green tea.

CHEMICAL COMPOSITION

Caffeine, theobromine, theophylline, xanthine, theafolia, theaflavine, theaflavin acid, thearubigene, quercetin, kaempferol, myrecetin, chlorogenic acid, theogallin.[1,2]

Caffeine

PHARMACOLOGICAL EFFECTS

- **CNS stimulant:** Administration of caffeine, one of the constituents of *Lu Cha*, is associated with stimulation of the central nervous system (CNS), leading to such effects as nervousness, insomnia, tachycardia, increased blood glucose and cholesterol levels, and high levels of stomach acid and heartburn.[3]
- **Antineoplastic:** Administration of *Lu Cha* is associated with beneficial results in subjects with cancer and undergoing chemotherapy. The polyphenol content of the herb may inhibit the formation of N-nitrosation by-products, which are known to be carcinogenic.[4]

Lu Cha (Folium Camellia Sinensis)

- **Effect on colon polyps:** In one study, consumption of *Lu Cha* was linked with decreased risk of developing adenomatous polyps of the sigmoid colon.[5]
- **Chemoprotective:** *Lu Cha* has chemoprotective effect, as pretreatment of animals with the herb suppressed the formation of experimentally-induced chromosome aberrations in bone marrow cells.[6]
- **Antimutagenic:** Various tea extracts (green tea, pauchong tea, oolong tea and black tea) and their components have demonstrated marked antimutagenic activity against N-methyl-N-nitro-N-nitrosoguanidine (MNNG), folpet, monocrotophos, and 2-acetylaminofluorene (AAF). Different teas have different effects against different chemical mutagens, and the differences in effect are attributed to the formation of different metabolites during various stages of tea fermentation.[7]
- **Cytoprotective:** *Lu Cha* extract and its phenolic compounds have been found to have marked cytoprotective effect. Specifically, the tea polyphenols protect liver cells against 1,4-naphthoquinone-induced liver toxicity in rats.[8]

CLINICAL STUDIES AND RESEARCH

- **Hypercholesterolemia:** In a clinical study, consumption of nine or more cups of *Lu Cha* per day was associated with a decrease in total cholesterol level but no decrease in triglycerides or HDL-cholesterol.[9]

HERB-DRUG INTERACTION

- **Oral contraceptives and cimetidine:** The effect of caffeine in *Lu Cha* may be potentiated when given in conjunction with oral contraceptives and cimetidine.[10]
- **Theophylline and ephedrine:** The combination of caffeine with theophylline and ephedrine may lead to increased thermogenesis, weight loss, agitation, tremors, and insomnia.[11]
- **Monoamine oxidase inhibitors (MAOI):** Combination of MAOI and excessive amounts of caffeine can cause hypertensive crisis.[12] [Note: Examples of MAOI include phenelzine (Nardil), tranylcypromine (Parnate), and isocarboxazid (Marplan).]
- **Antibiotics:** It has been reported that use of *Lu Cha* reversed MRSA and PRSA. Furthermore, it lowered minimum inhibitory concentration (MIC) of oxacillin and other β-lactams in MRSA.[13]

TOXICOLOGY

Increased consumption of caffeine in animals has been shown to be teratogenic. However, studies have been inconclusive about the effect of consumption of a moderate portion of the herb on the fetus.[14,15]

Wu Long Cha (Folium Camellia Sinensis Fermentata)

烏龍茶 乌龙茶

Pinyin Name: Wu Long Cha
English Name: oolong tea
Botanical Name: *Camellia sinensis* L. Kuntze (*Cha*)
Pharmaceutical Name: Folium Camellia Sinensis Fermentata
Properties: bitter, sweet, cool
Channels Entered: Heart, Lung, Stomach, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Detoxifies

Mild food poisoning: *Wu Long Cha* (Folium Camellia Sinensis Fermentata) contains tannic acid that can inhibit the spread of bacteria and therefore neutralizes the minor toxins present in many foods. Therefore, drinking tea can kill many of the bacteria and toxins that may cause various illnesses, mostly from food poisoning.

- Diarrhea with abdominal pain: use *Wu Long Cha* with *Huo Xiang* (Herba Agastache), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Ge Gen* (Radix Puerariae), *Pei Lan* (Herba Eupatorii) and *Da Suan* (Bulbus Alli Sativi).
- Vomiting: combine this herb with *Feng Wei Cao* (Herba Pteris), *Ban Xia* (Rhizoma Pinelliae), *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis).

2. Promotes Diuresis

Edema: *Wu Long Cha* promotes diuresis to treat edema.

- Edema: use *Wu Long Cha* with *Fen Fang Ji* (Radix Stephaniae Tetandrae), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).

3. Revives the *Shen* (Spirit), Clears the Head and Brightens the Eyes

Lassitude: *Wu Long Cha* functions to enhance alertness and relieve fatigue and weakness. It alleviates fatigue, weakness, withered *shen* (spirit), dizziness, hypersomnia, feelings of heaviness in the body, and inability to concentrate.

- Lassitude: combine it with *Xi Yang Shen* (Radix Panacis Quinquefolii), *Ci Wu Jia* (Radix et Caulis Acanthopanacis Senticosi), *Huang Qi* (Radix Astragali) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

Hangover: *Wu Long Cha* treats hangovers or alcohol poisoning.

- Hangover: use *Wu Long Cha* with *Ge Hua* (Flos Puerariae).

4. Dispels Grease

Intake of greasy food: *Wu Long Cha* promotes digestion and decreases absorption of grease and fats in the body. For this reason, it is customary in many cultures to drink a cup of tea after meals. All of the processed teas such as oolong, pu-er, and black tea are more effective in this than green tea, due to the fermentation process.

- Food stagnation: use it with *Shen Qu* (Massa Fermentata), *Shan Zha* (Fructus Crataegi), and *Mai Ya* (Fructus Hordei Germinatus).
- Excessive intake of greasy foods: combine it with *Chai Hu* (Radix Bupleuri), *Da Huang* (Radix et Rhizoma Rhei), *Zhi Shi* (Fructus Aurantii Immaturus), *Yin Chen Hao* (Herba Artemisiae Scopariae), *Bai Shao* (Radix Paeoniae Alba), *Ban Xia* (Rhizoma Pinelliae) and *Huang Qin* (Radix Scutellariae).

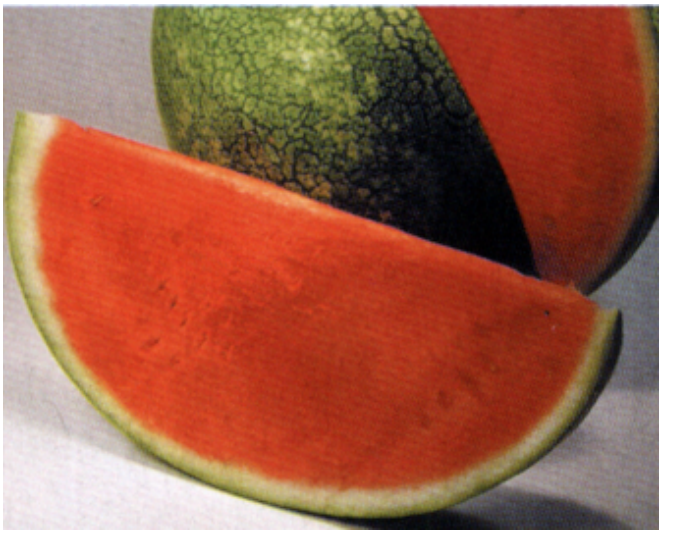
DOSAGE

3 to 12 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Wu Long Cha* should be used with caution in patients with deficiencies of the Spleen and Stomach. It should not be administered on an empty stomach.
- Patients with weak digestive systems should opt for fermented or processed teas such as oolong or black tea rather than the unprocessed green teas.

Wu Long Cha (Folium Camellia Sinensis Fermentata)



AUTHORS' COMMENTS

Lu Cha (Folium Camellia Sinensis) and *Wu Long Cha* (Folium Camellia Sinensis Fermentata) are derived from the same plant. *Lu Cha* is not fermented, while *Wu Long Cha* is. Refer to *Lu Cha* for additional details on chemical composition, pharmacological effects, clinical studies and research, and toxicology information for both herbs.

Xi Gua (Fructus Citrulli)

西瓜

Pinyin Name: *Xi Gua*
Literal Name: "west fruit"
Alternate Chinese Names: *Han Gua*
Original Source: *Ri Yong Ben Cao* (Household Materia Medica) by Wu Rui in 1330
English Name: watermelon fruit
Botanical Name: *Citrullus vulgaris* Schrad.
Pharmaceutical Name: Fructus Citrulli
Properties: sweet, cold
Channels Entered: Heart, Stomach, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

Clears Summer-Heat, Relieves Thirst, Promotes Urination

Xi Gua (Fructus Citrulli) has an excellent ability to clear heat and dampness in summer. It is commonly used to treat summer-heat that has damaged body fluids, leading to irritability, thirst, and dysuria. It may be used individually or in combination with other herbs.

DOSAGE

15 to 30 grams.

CAUTIONS / CONTRAINDICATIONS

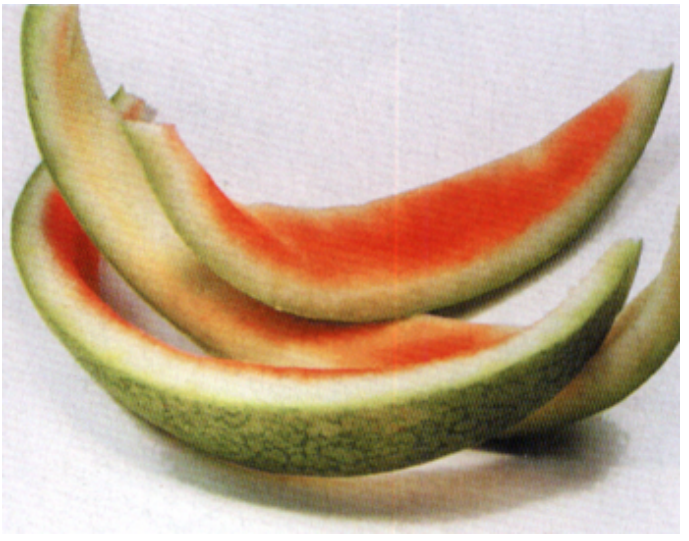
- Because of its sweet, cold nature, *Xi Gua* should be used with caution in cases of deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Citrulline, arginine, betaine, lycopene, phytofluene, alanine, glutamic acid, carotene, sugars, vitamin C.[1]

PHARMACOLOGICAL EFFECTS

Diuretic: *Xi Gua* has a mild diuretic effect.[2]



AUTHORS' COMMENTS

Xi Gua is commonly known as "natural *Bai Hu Tang* (White Tiger Decoction)," as it has excellent influence to clear heat and promote the generation of body fluids.

Xi Gua Pi (Pericarpium Citrulli)

西瓜皮

Pinyin Name: *Xi Gua Pi*
Literal Name: "west fruit peel"
Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481
English Name: watermelon peel, watermelon rind
Botanical Name: *Citrullus vulgaris* Schrad.
Pharmaceutical Name: Pericarpium Citrulli
Properties: sweet, cold
Channels Entered: Heart, Stomach, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

Promotes Urination, Clears Summer-Heat, Relieves Thirst

Xi Gua Pi (Pericarpium Citrulli) is commonly used to treat dysuria in cases which summer-heat is damaging body fluids. It may also be used topically to treat ulceration of the oral cavity.

- Summer-heat: use *Xi Gua Pi* with *He Ye* (Folium Nelumbinis) and *Jin Yin Hua* (Flos Lonicerae).

DOSAGE

15 to 30 grams.

CHEMICAL COMPOSITION

See *Xi Gua* (Fructus Citrulli).

SUPPLEMENT

- 西瓜翠皮 *Xi Gua Cui Pi* (Exocarpium Citrulli), the outermost layer of watermelon peel, is also used as a medicinal herb to clear heat and resolve summer dampness. It is used with *He Ye* (Folium Nelumbinis), *Jin Yin Hua* (Flos Lonicerae), and *Bian Dou Hua* (Flos Lablab Album) to treat exterior conditions in summer. The dosage is 5 to 10 grams.

AUTHORS' COMMENTS

Xi Gua (Fructus Citrulli) and *Xi Gua Pi* (Pericarpium Citrulli) clear summer-heat, relieve thirst, and promote urination, but to differing degrees:

- *Xi Gua* more effectively clears summer heat and dampness.
- *Xi Gua Pi* more strongly promotes urination.

Section 2

— Heat-Clearing and Dampness-Drying Herbs

Huang Qin (Radix Scutellariae)

黄芩 黄芩

Pinyin Name: *Huang Qin*
Alternate Chinese Names: *Lao Gen Zi Qin, Tiao Qin, Bei Qin, Pian Qin, Ku Qin*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: scute, scutellaria, baikal skullcap root
Botanical Name: *Scutellaria baicalensis* Georgi (*Huang Qin*); *Scutellaria amoena* C.H. Wright (*Xi Nan Huang Qin*); *Scutellaria rehderiana* Diels (*Gan Su Huang Qin*); *Scutellaria viscidula* Bge. (*Nian Mao Huang Qin*)
Pharmaceutical Name: Radix Scutellariae
Properties: bitter, cold
Channels Entered: Lung, Gallbladder, Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Dries Dampness

Damp-heat disorders: *Huang Qin* (Radix Scutellariae) treats a wide range of heat-related disorders characterized by fever, abdominal fullness, poor appetite, nausea, sensations of heaviness, thirst with no desire to drink, a red tongue with greasy, yellow coating, and rapid, slippery pulse.

- General damp-heat accumulation: use *Huang Qin* with *Hua Shi* (Talcum), *Tong Cao* (Medulla Tetrapanacis), and *Bai Dou Kou* (Fructus Amomi Rotundus).

Jaundice and hepatitis: Clinical applications for *Huang Qin* include jaundice with bright yellow skin, abdominal fullness, thirst, dysuria, a yellow, greasy tongue coating, and deep, slippery, rapid pulse.

- Jaundice: use *Huang Qin* with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae) and *Da Huang* (Radix et Rhizoma Rhei).
- Infectious hepatitis with jaundice: use this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Huang Bai* (Cortex Phellodendri), *Zhi Zi* (Fructus Gardeniae), *Da Huang* (Radix et Rhizoma Rhei), *Che Qian Zi* (Semen Plantaginis), *Bing Lang* (Semen Arecae), charred *Shen Qu* (Massa Fermentata), charred *Shan Zha* (Fructus Crataegi), and charred *Mai Ya* (Fructus Hordei Germinatus).
- Infectious hepatitis without jaundice: combine *Huang Qin* with *Chuan Lian Zi* (Fructus Toosendan), *Cao Dou Kou* (Semen Alpiniae Katsumadai), *Lai Fu Zi* (Semen Raphani), *Hong Hua* (Flos Carthami), *Qian Cao* (Radix Rubiae), *Bai Ji Li* (Fructus Tribuli), *Zao Jiao Ci* (Spina Gleditsiae), *Bing Lang* (Semen Arecae), charred *Shen Qu* (Massa Fermentata), charred *Shan Zha* (Fructus Crataegi), and charred *Mai Ya* (Fructus Hordei Germinatus).

Huang Qin (Radix Scutellariae)

Dysentery caused by damp-heat in the Stomach and Intestines: Damp-heat accumulation in the gastrointestinal tract manifests in symptoms of dysentery, burning sensations in the anus after defecation, foul-smelling diarrhea, fever, heat sensations in the chest and abdomen, irritability, thirst with dry mouth, a yellow tongue coating and rapid pulse.

- Dysentery or diarrhea with burning sensations of the anus: use *Huang Qin* with *Huang Lian* (Rhizoma Coptidis) and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction).

Heat in the middle *jiao*: Symptoms include sore throat, toothache, oral ulcers, tonsillitis, epigastric burning and discomfort, and constipation.

- Sore throat with lingering exterior symptoms: use *Huang Qin* with *Ban Lan Gen* (Radix Isatidis), *Bo He* (Herba Menthae), and *Xuan Shen* (Radix Scrophulariae).
- Toothache, oral ulcers: add *Deng Xin Cao* (Medulla Junci).
- Epigastric discomfort: add *Huang Lian* (Rhizoma Coptidis).
- Constipation: combine *Huang Qin* with *Da Huang* (Radix et Rhizoma Rhei).

***Re lin* (heat dysuria):** Damp-heat accumulation in the Urinary Bladder presents clinical manifestations of burning, scanty, painful, dark yellow urination. If dampness is severe, the urine also appears cloudy. If heat is severe, bleeding may occur.

- Burning dysuria: use *Huang Qin* with *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Che Qian Zi* (Semen Plantaginis).
- *Shi-re lin* (damp-heat dysuria) with qi deficiency: combine this herb with *Shi Lian Zi* (Herba Sinocrassulae Indicae), *Che Qian Zi* (Semen Plantaginis) and *Huang Qi* (Radix Astragali) to tonify qi and clear damp-heat. **Exemplar Formula:** *Qing Xin Lian Zi Yin* (Lotus Seed Decoction to Clear the Heart).

2. Clears Heat and Sedates Fire

Lung heat: Bitter and cold, *Huang Qin* has excellent properties to clear heat and sedate fire in the Lung. Clinical manifestations include cough with yellow sputum, yellow nasal discharge, fever, dyspnea, dry mouth, sore throat, thirst, red tongue with yellow coating, and a rapid pulse.

- Cough with wheezing or dyspnea: use this herb with *Ma Huang* (Herba Ephedrae), *Xing Ren* (Semen Armeniacae Amarum) and *Shi Gao* (Gypsum Fibrosum). **Exemplar Formula:** *Ma Xing Gan Shi Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- Chest congestion with profuse yellow sputum: combine it with *Gua Lou Shi* (Fructus Trichosanthis), *Sang Bai Pi* (Cortex Mori) and *Xing Ren* (Semen Armeniacae Amarum) to clear Lung heat and regulate qi circulation. **Exemplar Formula:** *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill).
- Cough due to heat: combine it with *Shi Gao* (Gypsum Fibrosum), *Zhi Zi* (Fructus Gardeniae), and *Sang Bai Pi* (Cortex Mori). **Exemplar Formula:** *Dun Sou San* (Long-Bout Cough Powder).
- Eye disorders with redness and pain: add *Dan Dou Chi* (Semen Sojae Praeparatum) and pork liver.

Excess heat in the *qi* (energy) level: Unremitting fever, or high fever in the *shaoyang* stage or entering the *yangming* stage. *Huang Qin* is excellent to clear heat in the upper *jiao* as well as clearing heat between different stages as it travels inward from the *taiyang* level.

- Excess heat with persistent high fever and irritability: use it with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), and *Mu Dan Pi* (Cortex Moutan) .
- *Shaoyang* syndrome with alternation of fever and chills: combine it with *Chai Hu* (Radix Bupleuri) to clear heat from both the interior and exterior. **Exemplar Formula:** *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).
- Cold and dampness at the exterior with heat in the interior: add *Qiang Huo* (Rhizoma et Radix Notopterygii) and other exterior-releasing herbs. **Exemplar Formula:** *Jiu Wei Qiang Huo Tang* (Nine-Herb Decoction with Notopterygium).

3. Clears Heat and Eliminates Toxins

Lesions, sores, ulcerations caused by toxic heat: *Huang Qin* is commonly used for disorders of the skin, eyes, throat, ears and nose.

- Lesions and sores with redness, swelling and pain: use *Huang Qin* with *Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri) and *Zhi Zi* (Fructus Gardeniae). **Exemplar Formula:** *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- General heat and toxins: combine this herb with *Huang Lian* (Rhizoma Coptidis), *Lian Qiao* (Fructus Forsythiae) and *Pu Gong Ying* (Herba Taraxaci).

4. Cools Blood and Stops Bleeding

Bleeding: Clinical applications include hematemesis, cough with blood-streaked sputum, hematuria, gastrointestinal bleeding, and hypermenorrhea caused by heat driving blood out of the vessels. The charred form of *Huang Qin* has the strongest hemostatic effect.

- Hematemesis and epistaxis: use *Huang Qin* with *San Qi* (Radix Notoginseng), *Huai Hua* (Flos Sophorae) and *Bai Mao Gen* (Rhizoma Imperatae).

Huang Qin (Radix Scutellariae)

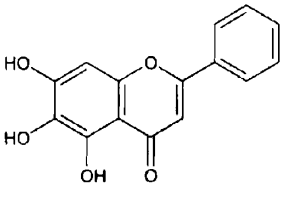
- Gastrointestinal bleeding: use it with *Huang Lian* (Rhizoma Coptidis) and *Fang Feng* (Radix Saposhnikoviae).

5. Calms and Stabilizes the Fetus

Restless fetus: *Huang Qin* stabilizes pregnancy by calming the fetus to relieve restlessness and constant kicking, a condition commonly described as heat in the womb.

- To calm the fetus: combine *Huang Qin* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Dang Gui* (Radicis Angelicae Sinensis).

DOSAGE



3 to 10 grams in decoction. The maximum dosage of *Huang Qin* is 30 grams. Use the fresh form to clear damp-heat in the Intestines; the dried, unprocessed form to clear heat and remove toxins; the dry-fried form to calm the fetus; the steamed with grain-based liquor form to clear Lung heat; and the charred form to stop bleeding.

CAUTIONS / CONTRAINDICATIONS

- Bitter and cold, *Huang Qin* should be used with caution as it may damage Stomach qi and injure Spleen yin.
- Patients with the following conditions should use *Huang Qin* with extreme caution: blood deficiency with abdominal pain, edema due to Spleen deficiency, loose stool because of Kidney deficiency, amenorrhea from blood deficiency, and unstable pregnancy caused by excess cold.

CHEMICAL COMPOSITION

Baicalin, baicalein, wogonin, wogonoside, chrysin, oroxylin A, oroxylin-A-glucuronide, skullcapflavone I, II; tenaxin II, koganebanacin, 7-melhoxy-baicalein, 2,5,8-trihydroxy-7-dimefhoxyflarone.[1,2]

Baicalein

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Baicalin has a wide-spectrum of inhibitory effect against *Staphylococcus aureus,* beta-hemolytic streptococcus, *Diplococcus pneumoniae, Pseudomonas aeruginosa, Bacillus dysenteriae, E. coli, Bordetella pertussis, Vibrio cholerae, Diplococcus meningitidis,* leptospira and various species of dermatophytes and influenza viruses. *Huang Qin* is most effective against *Staphylococcus aureus* and *Pseudomonas aeruginosa.* Furthermore, it was discovered that the effectiveness of standard antibiotics such as ampicillin, amoxicillin, methicillin and cefotaxime can be potentiated with addition of baicalin, a flavone isolated from the herb. With the addition of baicalin, the effectiveness of these beta-lactam antibiotics was restored against beta-lactam-resistant *Staphylococcus aureus* and methicillin-resistant *Staphylococcus aureus* (MRSA).[3,4]
- **Anti-inflammatory:** In laboratory studies, baicalin, baicalein, and extract of *Huang Qin* suppressed inflammation and swelling associated with allergic reactions in mice.[5]
- **Antipyretic:** Oral administration of *Huang Qin* decoction at the dosage of 2 g/kg has a marked effect to reduce temperature in rabbits with artificially-induced fever.[6]
- **Cholagogic and hepatoprotective:** In a laboratory study, both baicalin and baicalein have marked cholagogic influence to stimulate the production and excretion of bile acid in rabbits. In addition, baicalein has hepatoprotective effects.[7]
- **Antihypertensive:** *Huang Qin* lowers blood pressure through dilation of blood vessels and inhibition of the sympathetic nervous system.[8]
- **Others:** *Huang Qin* has mild sedative and diuretic effects.[9]

CLINICAL STUDIES AND RESEARCH

- **Hepatitis:** In one study, 268 patients with infectious or chronic hepatitis were treated with *Huang Qin* through oral administration and intramuscular injection. The duration of treatment was 1 month for both oral therapy (0.5 grams of baicalin three times daily) and injection therapy (60 to 120 mg of baicalin via intramuscular or intravenous injection). The effective rate was 63.6% for patients with infectious hepatitis and 73.3% for chronic hepatitis.[10]
- **Epidemic encephalitis:** One report states that 209 carriers of epidemic encephalitis were treated with 2 ml of 20% *Huang Qin* oral spray (equivalent to 0.4 grams of herb) with good effectiveness in all subjects.[11]
- **Scarlet fever:** Accordingly to one report, 9 grams of *Huang Qin* were given as herbal decoction two to three times daily for three days during the peak epidemic periods and showed good preventative influence in 1,577 healthy individuals.[12]
- **Hypertension:** Administration of 5 to 10 ml of a *Huang Qin* preparation three times daily showed good antihypertensive effect in 51 patients with hypertension.[13]
- **Trachoma:** In one study, 128 patients with trachoma were treated with 2% or 3% baicalin ophthalmic solution with a 97.1% rate of effectiveness.[14]

HERB-DRUG INTERACTION

- **Antibiotics:** Concurrent use of baicalin, a flavone isolated from *Huang Qin,* was found to have synergistic antibiotic

Huang Qin (Radix Scutellariae)

effect with beta-lactam antibiotics, such as ampicillin, amoxicillin, methicillin and cefotaxime. The addition of baicalin restored the effectiveness of these drugs against beta-lactam-resistant *Staphylococcus aureus* and methicillin-resistant *Staphylococcus aureus* (MRSA).[15]

TOXICOLOGY

While oral administration is associated with few unwanted side effects, intravenous injection of *Huang Qin* preparation has been linked with some toxic effects. The LD_{50} for baicalein via intraperitoneal injection is 3,081 mg/kg in mice. Oral administration of extract of *Huang Qin* at 15 g/kg did not cause nausea or vomiting in dogs. However, loose stools were observed following oral administration of *Huang Qin* at 5 g/kg for 8 weeks.[16,17]

AUTHORS' COMMENTS

Huang Qin, *Huang Lian* (Rhizoma Coptidis) and *Huang Bai* (Cortex Phellodendri) are commonly used to clear heat, sedate fire and dry dampness. Classic texts often describe *Huang Qin* to be most effective for Lung heat in the upper *jiao*, *Huang Lian* for Stomach fire in the middle *jiao* and *Huang Bai* for deficient Kidney fire in the lower *jiao*. This statement, however, is only a generalization, as all three herbs have many more functions.

According to Dr. Sam Liang, the combination of *Huang Qin*, *Huang Lian* (Rhizoma Coptidis), and *Da Huang* (Radix et Rhizoma Rhei), such as found in *San Huang Xie Xin Tang* (Three Yellows Decoction to Sedate the Epigastrium), used as a gargle is very effective to treat sore throat and stomatitis in HIV patients.

Dr. Shen Yen-Nan reports that specific organs injured by fire can be treated with optimum results by key herbs, as follows:

- Lung fire: *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori)
- Heart fire: *Huang Lian* (Rhizoma Coptidis)
- Stomach fire: *Shi Gao* (Gypsum Fibrosum)
- Liver fire: *Zhi Zi* (Fructus Gardeniae)
- Kidney fire: *Zhi Mu* (Radix Anemarrhenae)

There are four herbs commonly used to stabilize pregnancy:

- *Huang Qin* calms restless fetus caused by heat.
- *Sha Ren* (Fructus Amomi) regulates qi and calms restless fetus in the presence of qi stagnation and middle *jiao* deficiency.
- *Du Zhong* (Cortex Eucommiae) is most suitable to treat restless fetus caused by deficiency of the Kidney and Liver.
- *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) treats restless fetus from Spleen qi deficiency.

Huang Lian (Rhizoma Coptidis)

黄連 黄连

Pinyin Name: *Huang Lian*
Literal Name: "yellow connection," "yellow link"
Alternate Chinese Names: *Chuan Lian, Ya Lian, Wei Lian, Ji Zhua Lian*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: coptis, coptis root
Botanical Name: *Coptis chinensis* Franch. (*Huang Lian*); *Coptis deltoidea* C. Y. Cheng et Hsiao (*San Jiao Ye Huang Lian*); *Coptis teetoides* C. Y. Cheng. (*Yun Lian*); *Coptis omeiensis* (*Chen*) C. Y. Cheng (*E Mei Ye Lian*)
Pharmaceutical Name: Rhizoma Coptidis
Properties: bitter, cold
Channels Entered: Heart, Liver, Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Dries Dampness

Damp-heat in the Intestines: Very bitter, very cold, and extremely drying in nature, *Huang Lian* (Rhizoma Coptidis) is one of the strongest herbs to clear heat, dry dampness and eliminate toxins. It is commonly used to treat diarrhea or dysentery that may or may not contain pus and blood, burning sensations of the anus after defecation, foul-smelling stools, rectal tenesmus, feelings of incomplete evacuation, abdominal pain, epigastric distention and fullness, thirst with no desire to drink, vomiting or nausea, a slippery, rapid pulse, and a red tongue with greasy, yellow coating.

- Diarrhea or dysentery with burning sensations of the anus: combine *Huang Lian, Huang Bai* (Cortex Phellodendri), *Qin Pi* (Cortex Fraxini), and *Bai Tou Weng* (Radix Pulsatillae). **Exemplar Formula:** *Bai Tou Weng Tang* (Pulsatilla Decoction).
- Diarrhea with rectal tenesmus: use this herb with *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae). **Exemplar Formula:** *Shao Yao Tang* (Peony Decoction).
- Diarrhea in exterior syndromes: combine with *Ge Gen* (Radix Puerariae). **Exemplar Formula:** *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction).
- Diarrhea with bleeding: use *Huang Lian* with garlic.

Stomach heat: This condition is usually caused by frequent intake of spicy foods or a chronic state of Liver overacting on the Spleen and Stomach. Common symptoms and signs of Stomach heat include vomiting, nausea, gastric pain or burning sensations, acid regurgitation, foul breath, preference for cold drinks, constipation, hunger, swollen or painful gums, toothache, yellow and scanty urine with red tongue and yellow tongue coating. Heat in the Stomach reverses the normal downward flow of Stomach qi and causes nausea and vomiting. Heat enhances the digestive function of the Stomach and thus the patient feels constant hunger. Rising Stomach fire causes the burning epigastric pain, acid reflux, foul breath and swollen, painful gums.

- Nausea, vomiting and feelings of oppression in the chest: use *Huang Lian* with *Gan Jiang* (Rhizoma Zingiberis) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium).
- Nausea and vomiting from heat in the Stomach: use this herb with *Ban Xia* (Rhizoma Pinelliae) and *Zhu Ru* (Caulis Bambusae in Taenia).
- Gastric pain and ulcers due to Liver fire attacking the Stomach: combine it with *Wu Zhu Yu* (Fructus Evodiae), *Xiang Fu* (Rhizoma Cyperi) and *Yan Hu Suo* (Rhizoma Corydalis).
- Acid regurgitation: add *Hai Piao Xiao* (Endoconcha Sepiae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).
- Bleeding peptic ulcer: use *Huang Lian* with *Bai Ji* (Rhizoma Bletillae) and *Wu Bei Zi* (Galla Chinensis).
- Feeling of fullness and oppression beneath the Heart with pain during palpation: use it with *Ban Xia* (Rhizoma Pinelliae) and *Gua Lou Shi* (Fructus Trichosanthis). **Exemplar Formula:** *Xiao Xian Xiong*

Huang Lian (Rhizoma Coptidis)

Tang (Minor Sinking Into the Chest Decoction).

- Ulcers on the tongue: add *Xi Xin* (Herba Asari) and *Zhi Zi* (Fructus Gardeniae) to *Huang Lian.*
- Toothache from Stomach fire: use it with *Sheng Di Huang* (Radix Rehmanniae), *Sheng Ma* (Rhizoma Cimicifugae) and *Bai Zhi* (Radix Angelicae Dahuricae). **Exemplar Formula:** *Qing Wei San* (Clear the Stomach Powder).
- Excessive hunger and thirst from Stomach fire: combine it with *Tian Hua Fen* (Radix Trichosanthis) and *Sheng Di Huang* (Radix Rehmanniae).
- *Xiao ke* (wasting and thirsting) syndrome: use it with *Shi Gao* (Gypsum Fibrosum), *Tian Hua Fen* (Radix Trichosanthis) and *Zhi Mu* (Radix Anemarrhenae).

2. Sedates Fire

Liver fire: Clinical manifestations of Liver fire include dizziness, headache, redness of the face and eyes, a bitter taste in the mouth, dry throat, short temper, irritability, insomnia or nightmares, burning hypochondriac pain, tinnitus, constipation, hematemesis or epistaxis, a red tongue with yellow coating, and a wiry, slippery and rapid pulse.

- Liver fire: use *Huang Lian* with *Wu Zhu Yu* (Fructus Evodiae), *Chai Hu* (Radix Bupleuri) and *Bai Shao* (Radix Paeoniae Alba).
- Red eyes due to Liver yang rising: use it with *Shi Jue Ming* (Concha Haliotidis), *Jue Ming Zi* (Semen Cassiae), *Long Dan Cao* (Radix Gentianae), *Mu Zei* (Herba Equiseti Hiemalis) and *Ye Ming Sha* (Excrementum Vespertilionis Murini).
- Photophobia, blurred vision, spots in front of the eyes, night blindness and acute conjunctivitis caused by Liver blood deficiency and Liver yang rising: use *Huang Lian* alone in decoction. It can also be used as an external wash for the eyes.

Heart fire: Insomnia, tongue ulcers, irritability, mania, incoherent speech, hematemesis, epistaxis, burning sensations in the chest, thirst, red face, dry stools, scanty yellow urine, red tongue tip, scarlet red tongue body, and rapid pulse are all symptoms and signs associated with Heart fire.

- Insomnia and irritability caused by Heart fire: use *Huang Lian* with *Zhu Sha* (Cinnabaris) and *Sheng Di Huang* (Radix Rehmanniae).
- Insomnia and irritability associated with Heart fire and deficiencies of yin and blood: combine it with *E Jiao* (Colla Corii Asini) and *Bai Shao* (Radix Paeoniae Alba).
- Hematemesis and rectal bleeding due to heat in the blood: use *Huang Lian* with *Huang Qin* (Radix Scutellariae) and *Da Huang* (Radix et Rhizoma Rhei).
- Aversion to heat and irritability due to excess heat and fire: add *Zhi Zi* (Fructus Gardeniae) and *Huang Qin* (Radix Scutellariae). **Exemplar Formula:** *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- Delirium: use *Huang Lian* with *Shi Chang Pu* (Rhizoma Acori), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Lian Qiao* (Fructus Forsythiae), and *Sheng Di Huang* (Radix Rehmanniae).

3. Clears Fire Toxin

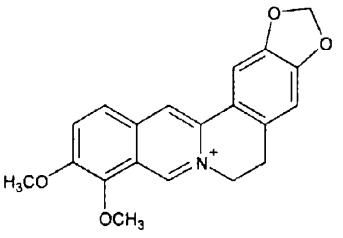
Dermatological disorders arising from toxic fire: *Huang Lian* is commonly used to eliminate heat and toxins present at the skin level, characterized by abscesses and lesions. Apply the powder of this herb topically.

- Abscesses, lesions, carbuncles, furuncles, burns, swelling and inflammation due to heat toxins: use this herb with *Huang Qin* (Radix Scutellariae), *Da Huang* (Radix et Rhizoma Rhei) and *Lian Qiao* (Fructus Forsythiae) to clear heat and eliminate toxins. **Exemplar Formula:** *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).

DOSAGE

2 to 10 grams in decoction. The maximum dosage of *Huang Lian* is 15 grams. *Huang Lian* has different functions depending on how it is processed:

- The unprocessed herb is stronger to clear heat, sedate fire and dry dampness.
- Frying with grain-based liquor gives *Huang Lian* an ascending function and diminishes its bitter and cold impact.
- Frying with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Wu Zhu Yu* (Fructus Evodiae) gives *Huang Lian* dispersing and ventilating functions, weakens its bitter and cold effects, and enhances its nausea-relieving function.
- Frying with pig bile enhances the effectiveness of *Huang Lian* to sedate fire of the Liver and Gallbladder.



CAUTIONS / CONTRAINDICATIONS

- *Huang Lian* is bitter, cold and drying. It must be used with caution in patients who have cold, yang deficiency, yin deficiency, or deficiency of the Spleen and Stomach.
- *Huang Lian* is relatively safe, but may be associated with the following side effects: allergic reaction, allergic rash, dizziness, headache, tinnitus, nausea, vomiting, palpitations, shortness of breath, abdominal fullness, diarrhea, and reduction of red blood cells.

CHEMICAL COMPOSITION

Berberine, coptisine, palmatine, jatrorrhizine, epiberberine, worenine, columbamine, magnoflorine.[1,2]

Huang Lian (Rhizoma Coptidis)

Berberine

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Huang Lian* has a broad spectrum of antibiotic effects against *Bacillus dysenteriae, Mycobacterium tuberculosis, Salmonella typhi, E. coli, Vibrio cholerae, Bacillus proteus, Pseudomonas aeruginosa, Diplococcus meningitidis, Staphylococcus aureus,* beta-hemolytic streptococcus, *Diplococcus pneumoniae, Corynebacterium diphtheriae, Bordetella pertussis, Bacillus anthracis,* and leptospira. The inhibitory effect is strongest against *E. coli, Mycobacterium tuberculosis,* and *Staphylococcus aureus.* Use of *Huang Lian* or its components individually is commonly associated with resistance. On the other hand, the use of *Huang Lian* within an herbal formula reportedly enhances its antibiotic effectiveness over tenfold with little incidence of resistance. Berberine, one of the components of *Huang Lian,* is most effective for gastrointestinal infection, but not for systemic infection, since it has poor absorption by the intestines and a short half-life. In addition to its antibacterial effect, *Huang Lian* also has antifungal and antiviral activities. According to one report, a 15% decoction of *Huang Lian* is effective against numerous pathogenic fungi and dermatophytes. Lastly, *Huang Lian* has an inhibitory effect against influenza and hepatitis viruses.[3,4,5]
- **Anti-inflammatory:** Oral administration of 50 mg/kg of berberine in rats has demonstrated a marked anti-inflammatory effect.[6]
- **Cardiovascular:** Intravenous injection of berberine at 0.1 to 6.0 mg/kg lowered blood pressure in anesthetized dogs, cats and rats. The mechanism of blood pressure reduction is dilation of the blood vessels and inhibition of secretion of the adrenal glands. Berberine also has antiarrhythmic actions.[7,8]
- **Antipyretic:** Intravenous injection of *Huang Lian* has demonstrated antipyretic effects in rabbits. Though the exact mechanism of action is unclear, it is related to cAMP in the central nervous system.[9]
- **Cholagogic:** *Huang Lian* and berberine act to increase production and decrease density of bile acid. Additionally, they reduce the plasma level of cholesterols.[10]
- **Antiulcer:** *Huang Lian* inhibits the secretion of gastric acid and is commonly used in conjunction with other herbs to treat peptic ulcers.[11]
- **Others:** *Huang Lian* has local anesthetic and antidiarrheal effects.[12]

CLINICAL STUDIES AND RESEARCH

- **Bacterial dysentery:** The use of *Huang Lian,* individually or in an herbal formula, was associated with excellent clinical results in treating over 1,000 patients with bacterial dysentery. The treatments showed marked effectiveness, a short treatment course, and low incidence of side effects.[13]
- **Acute gastroenteritis or enteritis:** An herbal formula (80% *Huang Lian* and 20% *Bai Dou Kou* (Fructus Amomi Rotundus)) was used to treat 100 patients with gastroenteritis at the dosage of 2 to 3 grams given four to six times daily. All patients reported marked improvement.[14]
- **Pulmonary tuberculosis:** In one study, 100 patients with pulmonary tuberculosis were treated with 0.3 grams of berberine three times daily for 3 months with good results.[15]
- **Suppurative otitis media:** An herbal solution (10% *Huang Lian* and 3% boric acid) was decocted twice and filtered. After cleaning the ears, the herbal solution was instilled in the affected ear three to four times daily. The effective rate was 50.8%.[16]
- **Arrhythmia:** One report describes 50 patients with hard-to-treat arrhythmia who were given 0.3 to 0.5 grams of berberine three to four times daily, with marked effectiveness in 40% of the patients.[17]
- **Hypertension:** Accordingly to one study, 88 hypertensive patients were treated with 0.6 to 1.8 grams of berberine three times daily with an effective rate of 70 to 93.3%.[18]
- **Osteomyelitis:** In one study, 87 patients with osteomyelitis were treated with *Huang Lian* decoction three times daily with a 100% success rate, with an average recovery period of 22.32 days. The decoction was prepared by cooking 65 grams of *Huang Lian* powder in 2,000 ml of boiling water for 15 minutes. The herb powder was not filtered out and no preservatives were added.[19]

HERB-DRUG INTERACTION

- **Cyclophosphamide:** It was reported in an *in vitro* study that the use of berberine in rats was effective in preventing cyclophosphamide-induced cystitis. According to the report, administration of berberine has a dose-dependent effect to block cyclophosphamide-induced bladder edema and hemorrhage, as well as nitric oxide metabolites increase in rat urine and plasma. The study suggested that berberine could be a potentially effective drug in the treatment of cyclophosphamide-induced cystitis, and provides bright hope for the prevention and treatment of cyclophosphamide urotoxicity.[20]

Huang Lian (Rhizoma Coptidis)

TOXICOLOGY

The LD_{50} for berberine in mice is 24.3 mg/kg via intraperitoneal injection, with respiratory depression as the main cause of death. In human, rare instances of fatality due to anaphylactic reaction have been reported after intravenous injection of berberine.[21] [Note: Anaphylactic shock is the most severe type of allergic reaction. Unfortunately, it is very difficult, if not impossible, to predict when patients will have such serious reactions. Though there is one case of anaphylactic reaction reported with injection of berberine, oral use of *Huang Lian* does not necessarily have a higher risk of allergy than other herbs.]

AUTHORS' COMMENTS

Huang Lian and *Suan Zao Ren* (Semen Zizyphi Spinosae) both treat insomnia. *Huang Lian* is used for excess fire in the Heart disturbing the *shen* (spirit) and *Suan Zao Ren* is used for Heart and Liver deficiencies with lack of nourishment to the Heart and *shen*.

Huang Lian (Rhizoma Coptidis) and *Hu Huang Lian* (Rhizoma Picrorhizae) have similar names and functions. *Huang Lian* clears excess heat with dampness and eliminates toxins to relieve sores and carbuncles. *Hu Huang Lian* is used for steaming bones sensations, *wu xin re* (five-center heat) and other deficiency heat symptoms.

Huang Lian, *Chuan Mu Tong* (Caulis Clematidis Armandii), *Mai Men Dong* (Radix Ophiopogonis), and *Tian Zhu Huang* (Concretio Silicea Bambusae) all clear the Heart and eliminate irritability.

- *Huang Lian* is used for febrile disease with excess fire in the Heart disturbing the *shen* (spirit), manifesting in irritability and insomnia.
- *Chuan Mu Tong* is a diuretic that clears damp-heat to relieve irritability with oral ulcers and yellow urine.
- *Mai Men Dong* is a tonic used for deficient Heart yin with heat that manifests as irritability and insomnia.
- *Tian Zhu Huang* dissolves hot phlegm and is best for irritability with spasms and convulsions.

Dr. Shen Yen-Nan reports that specific organs injured by fire can be treated with optimum results by key herbs, as follows:

- Lung fire: *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori)
- Heart fire: *Huang Lian* (Rhizoma Coptidis)
- Stomach fire: *Shi Gao* (Gypsum Fibrosum)
- Liver fire: *Zhi Zi* (Fructus Gardeniae)
- Kidney fire: *Zhi Mu* (Radix Anemarrhenae)

Huang Bai (Cortex Phellodendri)

黄柏

Pinyin Name: *Huang Bai*
Literal Name: "yellow fir"
Alternate Chinese Names: *Bai Pi, Huang Bo*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: phellodendron bark, Chinese cork tree bark, amur cork tree bark
Botanical Name: *Phellodendron amurense* Rupr. (*Guan Huang Bai*); *Phellodendron chinensis* Schneid. (*Chuan Huang Bai*)
Pharmaceutical Name: Cortex Phellodendri
Properties: bitter, cold
Channels Entered: Kidney, Urinary Bladder, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Dries Dampness

Damp-heat accumulation: Clinical manifestations of damp-heat include jaundice, dysentery, burning diarrhea, feelings of incomplete evacuation after defecation, bleeding hemorrhoids, yellow leukorrhea, dysuria, and *bi zheng* (painful obstruction syndrome) with swollen, burning joints. *Huang Bai* (Cortex Phellodendri) excels in clearing heat and drying dampness, especially from the lower *jiao*.

- Jaundice: combine *Huang Bai* with *Zhi Zi* (Fructus Gardeniae), *Da Huang* (Radix et Rhizoma Rhei) and *Yin Chen Hao* (Herba Artemisiae Scopariae). **Exemplar Formula:** *Yin Chen Hao Tang* (Artemisia Scoparia Decoction).
- Diarrhea: use it with *Huang Lian* (Rhizoma Coptidis), *Qin Pi* (Cortex Fraxini) and *Bai Tou Weng* (Radix Pulsatillae). **Exemplar Formula:** *Bai Tou Weng Tang* (Pulsatilla Decoction).
- Dysentery: use it with *Huang Lian* (Rhizoma Coptidis), *Mu Xiang* (Radix Aucklandiae), *Ma Chi Xian* (Herba Portulacae) and *Bai Shao* (Radix Paeoniae Alba).
- *Bi zheng* (painful obstruction syndrome) with swelling and burning pain: combine *Huang Bai* with *Cang Zhu* (Rhizoma Atractylodis), *Niu Xi* (Radix Cyathulae seu Achyranthis) and *Yi Yi Ren* (Semen Coicis).
- *Bi zheng* with sore and weak low back and knees: use it with *Du Zhong* (Cortex Eucommiae), *Dang Gui* (Radicis Angelicae Sinensis) and *Niu Xi* (Radix Cyathulae seu Achyranthis).
- *Lin zheng* (dysuria syndrome) or urinary tract infection: use it with *Bian Xu* (Herba Polygoni Avicularis) and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- Hematuria: use charred *Huang Bai*, charred *Bai Mao Gen* (Rhizoma Imperatae), *Da Ji* (Herba seu Radix Cirsii Japonici), *Xiao Ji* (Herba Cirisii), and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- Yellow leukorrhea: use it with *Zhi Zi* (Fructus Gardeniae), *Ze Xie* (Rhizoma Alismatis) and *Che Qian Zi* (Semen Plantaginis).
- Dysuria: combine it with *Bian Xu* (Herba Polygoni Avicularis), *Hua Shi* (Talcum) and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- Bleeding hemorrhoid: use it with charred *Huai Hua* (Flos Sophorae), *Di Yu* (Radix Sanguisorbae) and *Fang Feng* (Radix Saposhnikoviae).

2. Sedates Fire and Eliminates Toxins

Accumulation of toxic heat: In addition to clearing heat and drying dampness, *Huang Bai* is used both internally and externally to sedate fire and eliminate toxins. Clinically, it is commonly used to treat abscesses, sores, carbuncles, ulcerations, eczema, lesions, burns, redness, and eye swelling and pain.

- Skin abscesses and lesions: use *Huang Bai* with *Huang Lian* (Rhizoma Coptidis) and *Lian Qiao* (Fructus Forsythiae). **Exemplar Formula:** *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- Rash and eczema: use it with *Ku Shen Gen* (Radix Sophorae Flavescentis), *Chan Tui* (Periostracum Cicadae) and *Lian Qiao* (Fructus Forsythiae).
- Carbuncles or furuncles with abscesses and ulcerations: mix *Huang Bai* with *Zhu Dan* (Fel Porcus) and apply topically.
- Breast abscess: mix *Huang Bai* powder and egg whites, and apply topically.

Huang Bai (Cortex Phellodendri)

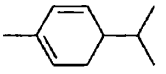
- Eye pain, redness and swelling: cook *Huang Bai* alone and channel the steam of the decoction directly to the eyes for maximum effectiveness.

3. Clears Deficiency Heat

Deficiency heat: *Huang Bai* consolidates Kidney yin and treats deficiency heat. It is commonly used to treat yin-deficient heat with symptoms such as steaming bones sensations, tidal fever, nocturnal emissions, night sweating, soreness and weakness of the lower back and knees, emaciation, dry throat, flushed cheeks, tinnitus, dizziness and insomnia. Men who have Kidney yin deficiency tend to be easily sexually aroused. Women exhibiting the signs of Kidney deficiency are often experiencing menopause and would have scanty menstruation or abnormal uterine bleeding. The typical pulse is thready and rapid. The tongue is usually dry, with a crack in the center.

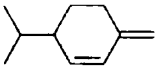
- Kidney yin deficiency with deficiency heat: use *Huang Bai* with *Zhi Mu* (Radix Anemarrhenae) to clear deficiency heat without further damaging yin. **Exemplar Formula:** *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill).
- Severe signs of yin-deficient fire: add *Qing Hao* (Herba Artemisiae Annuae) and *Bie Jia* (Carapax Trionycis). **Exemplar Formula:** *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-shelled Turtle Shell Decoction).
- Kidney yin and yang deficiencies with yin-deficiency fire: use this herb with *Zhi Mu* (Radix Anemarrhenae), *Xian Mao* (Rhizoma Curculiginis), *Yin Yang Huo* (Herba Epimedii), and *Ba Ji Tian* (Radix Morindae Officinalis). **Exemplar Formula:** *Er Xian Tang* (Two-Immortal Decoction).
- Night sweating: combine *Huang Bai* with *Fu Xiao Mai* (Semen Tritici Aestivi Levis).
- Irritability: use it with *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).

DOSAGE



3 to 10 grams in decoction. The maximum dosage of *Huang Bai* is 30 grams. The unprocessed herb more effectively clears excess heat and eliminates toxins. The salt-fried herb more effectively clears deficiency heat from the Kidney. Frying with grain-based liquor enhances its function to clear Heart fire. The charred herb more strongly stops bleeding.

CAUTIONS / CONTRAINDICATIONS



- Bitter and cold, *Huang Bai* consumes yin and fluids and is not suitable for long-term use, especially in patients with deficiency and cold of the Spleen and Stomach.
- *Huang Bai* is contraindicated in patients with general yang deficiency, or Spleen or Kidney yang deficiency.

CHEMICAL COMPOSITION

Berberine, palmatine, jatrorrhizine, α-phellodendrine, β-phellodendrine menisperine, candicine, magnoflorine, limonin, obacunone.[1,2]

α-phellodendrine

β-phellodendrine

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Huang Bai* has demonstrated moderate antibiotic action against *Staphylococcus aureus, Diplococcus pneumoniae, Corynebacterium diphtheriae, Bacillus dysenteriae,* β-hemolytic streptococcus, *Diplococcus meningitidis, Vibrio cholerae, Bacillus anthracis,* dermatophytes and leptospira. The leaves, *Huang Bai Ye* (Folium Phellodendri), have demonstrated antiviral effect against herpes virus.[3,4,5]
- **Antihypertensive:** Xylopinin, derived from phellodendrine, has demonstrated marked effectiveness to lower blood pressure via its effect on the central nervous system.[6]
- **Antitussive and expectorant:** The essential oil of *Huang Bai* has demonstrated antitussive and expectorant effects.[7]

CLINICAL STUDIES AND RESEARCH

- **Chronic bacterial dysentery:** In one study, 40 patients with chronic bacterial dysentery were given 4 grams of *Huang Bai* pills (prepared from *Huang Bai* powder mixed with 10% ethanol) twice daily for 7 days, with marked response in all patients.[8]
- **Chronic bronchitis:** The combination of *Huang Bai* and *Ku Shen Gen* (Radix Sophorae Flavescentis) demonstrated satisfactory antitussive, expectorant, and antiasthmatic effects in 300 patients with chronic bronchitis.[9]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of extract of *Huang Bai* is 2.7 g/kg in mice.[10]

AUTHORS' COMMENTS

Huang Bai does not have moistening or yin-tonifying functions. It is commonly used to clear deficiency heat of the Kidney and thus has been misconstrued by some to have yin-tonic functions. The reason Kidney yin can function properly after administrating *Huang Bai* is because of the ability of this herb to clear deficiency heat,

Huang Bai (Cortex Phellodendri)

thus the Kidney has a chance to restore water that would otherwise be 'burned up.' *Huang Bai* is drying in nature, and when improperly used or prescribed over a long period of time will damage yin. For that reason, it is often combined with other heat-clearing herbs such as *Zhi Mu* (Radix Anemarrhenae) that have moistening properties, so as to not damage the yin while clearing deficiency heat. If yin deficiency is severe, *Huang Bai* can be used with yin-tonic herbs to enhance their overall function.

Ji Xue Cao (Herba Centellae)

積雪草　积雪草

Pinyin Name: *Ji Xue Cao*
Alternate Chinese Names: *Di Qian Cao, Ma Ti Cao, Han Ke Cao*
English Name: asiatic pennywort, gotu kola
Botanical Name: *Centella asiatica* (Linn.) Urban.
Pharmaceutical Name: Herba Centellae
Properties: acrid, bitter, cold
Channels Entered: Liver, Spleen, Kidney, Small Intestine, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Damp-Heat

Enteritis, dysentery, abdominal pain: *Ji Xue Cao* (Herba Centellae) treats gastrointestinal disorders caused by accumulation of damp-heat.

- Enteritis, abdominal pain: use *Ji Xue Cao* with *Feng Wei Cao* (Herba Pteris), *Chuan Xin Lian* (Herba Andrographis), *Huang Lian* (Rhizoma Coptidis) and *Xian Feng Cao* (Herba Bidentis).
- Dysentery: use it with *Feng Wei Cao* (Herba Pteris), *Ge Gen* (Radix Puerariae), *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis).
- Summer-heat stroke: combine it with *Feng Wei Cao* (Herba Pteris), *He Ye* (Folium Nelumbinis), *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).

2. Cools Blood and Stops Bleeding

Bleeding due to heat in the *xue* (blood) level: *Ji Xue Cao* treats vomiting or uterine bleeding caused by heat in the blood.

3. Clears the Liver and Brightens the Eyes

Eye disorders: *Ji Xue Cao* treats eye disorders by clearing Liver heat. Clinical manifestations may include night blindness in children, inflammation, cataract, and glaucoma.

Jí Xue Cao (Herba Centellae)

DOSAGE

9 to 15 grams of dried Ji Xue Cao, 15 to 30 grams of the fresh herb, in decoction. It can also be crushed into herbal paste and applied topically.

CAUTIONS / CONTRAINDICATIONS

- Use *Ji Xue Cao* with caution during pregnancy due to its emmenagogic and abortifacient effects.[1]

CHEMICAL COMPOSITION

Asiatic acid, 3-glucosylquercetin, 3-glucosylkaempferol, asiaticoside, thankuniside, isothankuniside, madecassaside, brahmoside, brahminaside, brahmic acid, madasiatic acid, mesoinositol, centeilose.[2]

Long Dan Cao (Radix Gentianae)

龍膽草 龙胆草

Pinyin Name: *Long Dan Cao*
Literal Name: "dragon gallbladder herb"
Alternate Chinese Names: *Long Dan, Dan Cao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: gentiana
Botanical Name: *Gentiana scabra* Bunge. (*Long Dan Cao*); *Gentiana triflora* Pall. (*San Hua Long Dan*); *Gentiana manshurica* Kitag. (*Dong Bei Long Dan*); or *Gentiana rigescens* Franch. (*Jian Long Dan*)
Pharmaceutical Name: Radix Gentianae
Properties: bitter, cold
Channels Entered: Liver, Gallbladder, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Dries Dampness

Damp-heat in the Liver and Gallbladder: Damp-heat may affect not only the Liver and Gallbladder, but also the corresponding channels. Manifestations from affected Liver and Gallbladder organs include jaundice, eczema, thirst, no appetite, abdominal fullness, genital itching and swelling, foul-smelling yellow leukorrhea, and yellow, scanty urine. Damp-heat affecting the Liver and Gallbladder channels results in hypochondriac pain, headache, deafness, and red eyes. A bitter taste in the mouth is common to either level of involvement. *Long Dan Cao* (Radix Gentianae) effectively dispels damp-heat in the lower *jiao* and in the Liver channel (which travels through the genital region). It is excellent for treatment of sexually-transmitted diseases, infectious hepatitis, and jaundice with the above-mentioned symptoms.

- Damp-heat of the Liver and Gallbladder channels: use *Long Dan Cao* with *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae) and *Chuan Mu Tong* (Caulis Clematidis Armandii). **Exemplar Formula:** *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver).
- Jaundice: combine this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Zi* (Fructus Gardeniae).

2. Sedates Liver Heat

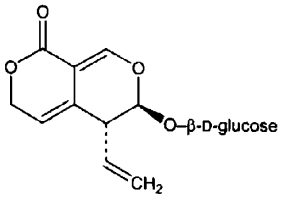
Rising Liver fire: Clinical manifestations include high fever, burning hypochondriac pain, a bitter taste in the mouth, dry throat, redness of the eyes and face, deafness or severe tinnitus, ear pain or discharge, headache, irritability, short temper, insomnia or nightmares, and constipation

Long Dan Cao (Radix Gentianae)

with yellow urine. In severe cases, rising Liver yang may turn to Liver wind, manifesting in convulsions, seizures, and hematemesis or epistaxis.

- Seizures and convulsions: use *Long Dan Cao* with *Niu Huang* (Calculus Bovis), *Gou Teng* (Ramulus Uncariae cum Uncis) and *Huang Lian* (Rhizoma Coptidis).
- Redness, swelling and pain in the eyes: add *Ju Hua* (Flos Chrysanthemi) and *Jue Ming Zi* (Semen Cassiae).

DOSAGE



3 to 8 grams in decoction. The maximum dosage of *Long Dan Cao* is 15 grams. *Long Dan Cao* is commonly used internally (as decoction, pills or powder) or externally (as powder).

CAUTIONS / CONTRAINDICATIONS

- Use of *Long Dan Cao* is contraindicated in patients who have deficiency and cold of the Spleen and Stomach, qi deficiency, or blood deficiency.
- *Long Dan Cao* may be taken before meals. A small dose of *Long Dan Cao* taken before meals may stimulate the secretion of gastric acid and enhance digestion and absorption. In patients with a sensitive gastrointestinal system, however, *Long Dan Cao* may be taken with meals.
- *Long Dan Cao*, in large dosages, is sometimes associated with side effects such as headache, facial flushing, and dizziness.[1]
- Use of this herb may be associated with possible drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Gentiopicrin, gentiopicroside, sweroside, swertiamarin, amarogentin, amaroswerin, gentianine, gentianose, sucrose.[2,3]

Gentiopicroside

PHARMACOLOGICAL EFFECTS

- **Cholagogic:** Administration of *Long Dan Cao* via oral ingestion or intravenous injection has been shown to increase the production and excretion of bile in dogs.[4]
- **Hepatoprotective:** Gentiopicroside has shown hepatoprotective effects in mice, especially against carbon tetrachloride-induced liver damage.[5]
- **Diuretic:** Intravenous injection of *Long Dan Cao* at 10 g/kg increased the average urine output from 0.76 ml per 30 minutes to 2.64 ml per 30 minutes in rabbits.[6]
- **Effects on the CNS:** At small dosages, a preparation of *Long Dan Cao* has excitatory effects on the central nervous system (CNS); at large dosages, it has sedative and tranquilizing effects on the central nervous system. Furthermore, it was reported that a preparation of *Long Dan Cao* decreased spontaneous activity in mice and potentiated the sedative effect of barbiturates.[7]
- **Antibiotic:** *Long Dan Cao* has demonstrated inhibitory effects against *Pseudomonas aeruginosa, Bacillus proteus, Salmonella typhi, Diplococcus meningitidis, Staphylococcus aureus,* and some dermatophytes.[8]
- **Gastrointestinal:** Administration of gentiopicroside via gastric tube is associated with an increase in gastric acid secretion in dogs. It has no effect when given sublingually or via intravenous injection.[9]

CLINICAL STUDIES AND RESEARCH

- **Hepatitis:** In one report, 26 patients with chronic infectious hepatitis and persistent high liver enzymes levels were treated with an herbal formula with *Long Dan Cao* as the main herb, with good results.[10]
- **Encephalitis B:** According to one report, 23 patients with fever because of encephalitis B were treated with *Long Dan Cao* and standard western medicine. Patients who were conscious received 10 to 15 ml of 20% *Long Dan Cao* syrup three times daily. Patients who were unconscious or unable to take herbs orally received intramuscular injections three to four times daily. Out of 23 patients, 7 showed improvement, 15 returned to normal temperatures within 3 days, and 1 did not respond to the treatment.[11]

HERB-DRUG INTERACTION

- **Diuretics:** *Long Dan Cao* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[12] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]
- **Sedatives:** *Long Dan Cao* has a sedative effect and potentiates the effect of barbiturates.[13] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

The LD_{50} for genianine in mice is 460 mg/kg via oral ingestion, 500 mg/kg via subcutaneous injection, and 250 to 300 mg/kg via intravenous injection.[14]

Long Dan Cao (Radix Gentianae)

AUTHORS' COMMENTS

According to Dr. Jiao Shu-De, the dosage of *Long Dan Cao* has a significant implication on the potential effects and side effects. At a low dosage (less than 1 gram), it stimulates the stomach to increase the production of gastric acid and improves digestion. At a large dosage, it irritates the stomach and causes such side effects as nausea, vomiting, and lack of appetite.

Ku Shen Gen (Radix Sophorae Flavescentis)

苦參根 苦参根

Pinyin Name: *Ku Shen Gen*
Literal Name: "bitter herb root," "bitter ginseng"
Alternate Chinese Names: *Ku Shen*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: sophora flavescens, light yellow sophora root
Botanical Name: *Sophora flavescens* Ait.
Pharmaceutical Name: Radix Sophorae Flavescentis
Properties: bitter, cold
Channels Entered: Heart, Liver, Stomach, Large Intestine, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Dries Dampness

Damp-heat in the lower *jiao*: *Ku Shen Gen* (Radix Sophorae Flavescentis) treats accumulation of damp-heat in the lower *jiao*, characterized by foul-smelling diarrhea, dysentery, foul-smelling yellow leukorrhea, genital itching, bleeding hemorrhoids, jaundice and various types of bleeding caused by heat driving blood out of the vessels.

- Jaundice: use *Ku Shen Gen* with *Zhi Zi* (Fructus Gardeniae), *Huang Bai* (Cortex Phellodendri) and *Long Dan Cao* (Radix Gentianae).
- Diarrhea: use *Ku Shen Gen* individually, or in combination with *Mu Xiang* (Radix Aucklandiae) and *Gan Cao* (Radix Glycyrrhizae).
- Yellow leukorrhea: combine it with *Huang Bai* (Cortex Phellodendri) and *She Chuang Zi* (Fructus Cnidii).
- Genital itching or vaginitis due to trichomonas infection: use this herb with *Huang Bai* (Cortex Phellodendri) and *She Chuang Zi* (Fructus Cnidii) as an herbal wash, and soak the affected area everyday for 10 minutes each time, at least 5 to 10 times total.
- Rectal bleeding caused by heat in the intestines, or hematemesis due to Stomach heat: use it with *Huai Hua*

Ku Shen Gen (Radix Sophorae Flavescentis)

(Flos Sophorae), and *Di Yu* (Radix Sanguisorbae).
- Hemorrhoid pain: add *Ku Lian Pi* (Cortex Meliae).

2. Dispels Wind, Kills Parasites, and Relieves Itching

Dermatological disorders: *Ku Shen Gen* is commonly used either internally or externally to treat dermatological disorders characterized by damp-heat. Clinical applications include itching, seepage, abscesses, urticaria, scabies, leprosy, genital itching, and similar skin problems.
- Skin itching with lesions and abscesses: use *Ku Shen Gen* with *Huang Bai* (Cortex Phellodendri), *She Chuang Zi* (Fructus Cnidii), and *Ming Fan* (Alumen), topically as herbal solution.
- Skin itching without lesions or abscesses: use it with *Chan Tui* (Periostracum Cicadae) and *Jing Jie* (Herba Schizonepetae).
- Genital itching: combine it with *She Chuang Zi* (Fructus Cnidii) as an herbal wash.
- Urticaria: use it with *Bai Xian Pi* (Cortex Dictamni), *Chi Shao* (Radix Paeoniae Rubrae), *Hong Hua* (Flos Carthami), *Sang Zhi* (Ramulus Mori), *Fang Feng* (Radix Saposhnikoviae), *Lian Qiao* (Fructus Forsythiae), *Chuan Shan Jia* (Squama Manis), *Zao Jiao Ci* (Spina Gleditsiae), *Chan Tui* (Periostracum Cicadae) and *She Tui* (Periostracum Serpentis).
- Genital sores: use *Ku Shen Gen* alone as an external wash.
- Leprosy: combine *Ku Shen Gen* with *Da Feng Zi* (Semen Hydnocarpi) and *Cang Er Zi* (Fructus Xanthii).

3. Promotes Urination

Damp-heat in the Urinary Bladder: *Ku Shen Gen* has heat-clearing and water-eliminating functions. It clears stagnation of damp-heat in the lower *jiao* to treat dysuria, with burning and pain sensations accompanying urination.
- Dysuria: use *Ku Shen Gen* individually, or use it with *Shi Wei* (Folium Pyrrosiae), *Che Qian Zi* (Semen Plantaginis) and *Pu Gong Ying* (Herba Taraxaci).
- Dysuria during pregnancy: use this herb with *Dang Gui* (Radicis Angelicae Sinensis) and *Bei Mu* (Bulbus Fritillaria).

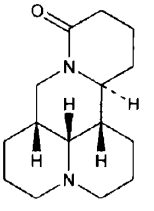
DOSAGE

3 to 10 grams in decoction. The maximum dosage of *Ku Shen Gen* is 30 grams. Use a smaller dosage for decoction and large dosage (15 to 30 grams) for topical applications as an external wash. *Ku Shen Gen* is extremely bitter and is commonly associated with nausea and vomiting because of its taste. Therefore, capsules or tablets are preferred, to improve patient compliance.

CAUTIONS / CONTRAINDICATIONS

- *Ku Shen Gen* is contraindicated in patients who have deficiency and cold of the Spleen and Stomach.
- *Ku Shen Gen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri) and should not be used concurrently.
- *Ku Shen Gen* antagonizes *Tu Si Zi* (Semen Cuscutae), *Lou Lu* (Radix Rhapontici) and *Bei Mu* (Bulbus Fritillaria), according to some traditional texts. The validity of this antagonism, however, has since been challenged.

OVERDOSAGE



Overdose of *Ku Shen Gen* is associated with adverse reactions such as irritability, muscle spasms and cramps, excitation, dyspnea, and in severe cases of gross overdose, respiratory failure.

TREATMENT OF OVERDOSAGE

Early-stage overdose (less than 4 hours) can be treated with emetic methods to eliminate the offending agent, or ingestion of activated charcoal to decrease absorption. Herbal decoction of 30 grams each of *Lu Dou* (Semen Phaseoli Radiati) and *Gan Cao* (Radix Glycyrrhizae) can also be administered for general detoxification purposes.[1]

CHEMICAL COMPOSITION

Alkaloids (matrine, oxymatrine, sophocarpine, sophoramine, sophoridine, sophoranol, anagyrine, N-methylcystisine, baptifoline), flavonoids (kushenols, kurarinol, formononetin), triterpenoids (soyasaponin).[2,3]

Matrine

PHARMACOLOGICAL EFFECTS

- **Antiarrhythmic:** *Ku Shen Gen* has demonstrated promise in the treatment of arrhythmia, especially if the condition is induced by excessive amounts of adrenaline or by aconite poisoning.[4]
- **Cardiovascular:** The alkaloids of *Ku Shen Gen* have been shown to dilate the blood vessels and increase blood perfusion to the cardiac muscles. In anesthetized rabbits, administration of *Ku Shen Gen* preparations lowered blood pressure, dilated peripheral blood vessels, and protected the heart from ischemia. In addition, it lowers blood cholesterol levels.[5,6]
- **Immunostimulant:** Intravenous or intramuscular injections of d-oxymatrine is associated with an increase in white blood cell count in mice.[7]
- **Respiratory:** *Ku Shen Gen* stimulates the beta receptors of

Ku Shen Gen (Radix Sophorae Flavescentis)

the sympathetic nervous system to relax the bronchioli and relieve asthma. Administration of alkaloids of *Ku Shen Gen* is over 90% effective in relieving asthma within one hour. *Ku Shen Gen* also has marked expectorant effect.[8,9]

- **Antibiotic:** *Ku Shen Gen* has demonstrated marked inhibitory action against *Bacillus dysenteriae, E. coli, Bacillus proteus,* β-hemolytic streptococcus, and *Staphylococcus aureus.*[10]
- **Antiparasitic:** *Ku Shen Gen* is effective against trichomonas infection, with effects comparable to *She Chuang Zi* (Fructus Cnidii).[11]
- **Antineoplastic:** Matrine, sophocarpine, and a decoction of *Ku Shen Gen* have demonstrated preliminary antineoplastic effects in laboratory mice.[12,13,14,15]

CLINICAL STUDIES AND RESEARCH

- **Bacterial dysentery:** In one study, 258 patients with bacterial dysentery were treated successfully with *Ku Shen Gen*, via tablets, decoction or injection.[16]
- **Chronic bronchitis or bronchial asthma:** A study of 517 patients with chronic bronchitis, wheezing and dyspnea were treated with *Ku Shen Gen* preparations with an 86.5% effective rate.[17]
- **Arrhythmia:** In one study, 100 patients with pre-ventricular contraction were treated with *Ku Shen Gen* injectable with good success. In another study, 167 patients with tachy-arrhythmia were treated with *Ku Shen Gen* with a 62% rate of effectiveness.[18]
- **Dermatological application:** Dermatological disorders in 148 patients, such as rashes, itching and eczema, were treated with *Ku Shen Gen* through intramuscular injection or oral decoction, with a 79% effective rate.[19]
- **Insomnia:** According to one report, 101 patients with insomnia were given 20 ml of *Ku Shen Gen* syrup (equivalent to 10 grams of herb) with good sedative/hypnotic effects. No significant side effects were reported.[20]

TOXICOLOGY

The LD_{50} for herbal extract of *Ku Shen Gen* in mice is 14.5 g/kg via oral ingestion and 14.4 g/kg via intramuscular injection.[21]

Section 3

— Heat-Clearing and Blood-Cooling Herbs

Xi Jiao (Cornu Rhinoceri)

犀角 犀角

Pinyin Name: *Xi Jiao*
Alternate Chinese Names: *Xi Niu Jiao, Wu Xi Jiao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: rhinoceros horn
Zoological Name: *Rhinoceros unicornis* L. (*Yin Du Xi*); *Rhinoceros sondaicus* Desmarest. (*Zhao Wa Xi*); *Rhinoceros sumatrensis* (Fischer) (*Su Men Da La Xi*); *Rhinoceros bicornis* L. (*Hei Xi*); *Rhinoceros simus* Burchell (*Bai Xi*)
Pharmaceutical Name: Cornu Rhinoceri
Properties: bitter, salty, cold
Channels Entered: Heart, Liver, Stomach
International Status: CITES I

CHINESE THERAPEUTIC ACTIONS

1. Cools the Blood and Stops Bleeding

Heat in the *xue* (blood) level: Excess heat can drive blood out of the vessels, causing bleeding, such as: epistaxis, hematemesis, hemoptysis, hematuria or hematochezia. *Xi Jiao* (Cornu Rhinoceri) enters the *xue* (blood) level and has historically been used to effectively treat the root cause of bleeding, by cooling the blood.

- Bleeding: use an appropriate substitute for *Xi Jiao* with *Sheng Di Huang* (Radix Rehmanniae), *Chi Shao* (Radix Paeoniae Rubrae) and *Mu Dan Pi* (Cortex Moutan).
- Severe bleeding: *Xi Jiao* would historically be combined with *Chi Shao* (Radix Paeoniae Rubrae), *Shi Gao* (Gypsum Fibrosum), *Bai Mao Gen* (Rhizoma Imperatae), *Da Ji* (Herba seu Radix Cirsii Japonici) and *Xiao Ji* (Herba Cirisii).

2. Eliminates Toxins and Clears Blotches on the Skin

Heat in the *ying* (nutritive) level: In addition to cooling blood, *Xi Jiao* sedates fire and eliminates toxins. It was commonly used to treat febrile disorders characterized by feverish sensations all over the body, dark-purplish macula and blotches on the skin, purpura and various kinds of bleeding. Heat and toxins attacking the throat is characterized by soreness, swelling and pain. Other signs may include fever that worsens at night, thirst with no desire to drink, irritability, insomnia, a scarlet red tongue and in severe cases, delirium.

- Febrile disorders: this substance would have been used with *Xuan Shen* (Radix Scrophulariae), *Shi Gao* (Gypsum Fibrosum) and *Da Qing Ye* (Folium Isatidis).
- Sore, swollen and painful throat: combine a similar substance with *Sheng Ma* (Rhizoma Cimicifugae), *Xuan Shen* (Radix Scrophulariae) and *Da Huang* (Radix et Rhizoma Rhei).

3. Calms the *Shen* (Spirit) and Extinguishes Liver Wind

Febrile disorders: In febrile disorders, heat travels inward as the disease progresses. As heat enters the *ying* (nutritive) and *xue* (blood) levels, it also affects the Heart and Liver. Clinical manifestations in this situation include unremitting high fever, irritability, insomnia, dark-purplish macula and blotches on the skin, hematemesis, epistaxis, muscle spasms and cramps, convulsions, delirium and mania. The Heart houses the *shen* (spirit): when it is invaded by heat, symptoms of insomnia,

Xi Jiao (Cornu Rhinoceri)

irritability and delirium may occur. The Liver controls the tendons: when Liver yang turns into Liver wind, convulsions occur.

- Delirium and mania in febrile disorders: *Xi Jiao* would be used with *Xuan Shen* (Radix Scrophulariae), *Dan Shen* (Radix Salviae Miltiorrhizae) and *Lian Qiao* (Fructus Forsythiae). **Exemplar Formula:** *Qing Ying Tang* (Clear the Nutrition Level Decoction).
- Convulsions in febrile disorders: combine a *Xi Jiao* substitute with *Ling Yang Jiao* (Cornu Saigae Tataricae), *Niu Huang* (Calculus Bovis) and *Bing Pian* (Borneolum Syntheticum).

HISTORICAL DOSAGE

0.5 to 1.5 grams in powder or pills, 2 to 6 grams in decoction. When used as powder, it was often taken with an herbal decoction.

CAUTIONS / CONTRAINDICATIONS

- *Xi Jiao* was used with caution during pregnancy as its cold nature could injure the fetus.
- *Xi Jiao* is counteracted by *Chuan Wu* (Radix Aconiti Preparata) and *Cao Wu* (Radix Aconiti Kusnezoffii).

CHEMICAL COMPOSITION

Keratin, cholesterol, calcium, guanidine derivatives.[1]

PHARMACOLOGICAL EFFECTS

- **Antiseizure and antiepileptic:** *Xi Jiao* is effective in preventing and treating seizures and epilepsy. In laboratory studies, it decreased fatalities from strychnine-induced seizures. It also prolonged sleeping time in mice induced by barbiturates. However, it does not counter the effects of pentylenetetrazol or caffeine.[2]
- **Cardiovascular:** A 10% water extract of *Xi Jiao* has demonstrated marked cardiotonic effect in frogs by direct stimulation of the cardiac muscle. It has positive inotropic and chronotropic effects, and it increases cardiac output. Overdose, however, may lead to paralysis of the cardiac muscle. In another study with anesthetized dogs and rabbits, intravenous injection of a decoction of *Xi Jiao* is associated with an initial rise of blood pressure, followed by a decline and then a gradual increase.[3]
- **Antipyretic:** *Xi Jiao* has a mixed effect in temperature regulation. It effectively reduces body temperature to normal in rabbits with fever artificially induced by *E. coli*. It is ineffective if the fever is artificially induced by injection of adrenaline.[4]
- **Immunologic:** Administration of *Xi Jiao* is associated with an initial decrease, followed by a substantial increase, of white blood cell counts.[5]
- **Smooth muscle stimulant:** It has a stimulating effect on the smooth muscles of the uterus and intestines.[6]

CLINICAL STUDIES AND RESEARCH

- **Hemorrhagic fever**: In one study, 450 patients with hemorrhagic fever were treated with satisfactory results using a modification of *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction). The exact formula contained *Xi Jiao* 9g, *Xian Di Huang* (Radix Rehmanniae Recens) 60 to 120g, *Chi Shao* (Radix Paeoniae Rubrae) 12g, *Mu Dan Pi* (Cortex Moutan) 12g, and *Da Huang* (Radix et Rhizoma Rhei) 15g. The formula was given as a decoction once daily. *Xi Jiao* was given as powder, to be mixed with the decoction immediately before ingestion.[7]

HERB-DRUG INTERACTION

- **Sedatives:** *Xi Jiao* has a sedative effect and potentiates the effect of barbiturates. However, it does not counter the effects of pentylenetetrazol or caffeine.[8]

SUPPLEMENT

- 水牛角 / 水牛角 *Shui Niu Jiao* (Cornu Bubali), the horn of water buffalo, was first cited in *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D. Today, *Shui Niu Jiao* is commonly used as a substitute for *Xi Jiao* since rhinoceros is an endangered species and commerce in *Xi Jiao* is illegal. *Shui Niu Jiao*, however, is much lower in potency and requires up to 8 to 10 times the normal dosage of *Xi Jiao* to achieve similar therapeutic effects. It is effective in treating patients with encephalitis B, high fever in infants and children, and thrombocytopenic purpura. This substance is usually used in decoctions. The appropriate dosage for *Shui Niu Jiao* is 20 to 40 grams.
- 黄牛角 / 黄牛角 *Huang Niu Jiao* (Cornu Bovis) is the horn from yellow cows, sometimes used as a substitute for *Xi Jiao*. In a clinical study of 414 cases, it effectively treated upper respiratory infection, pharyngitis, acute tonsillitis, acute hepatitis with jaundice and high fever.[9]
- 青牛角粉 / 青牛角粉 *Qing Niu Jiao Fen* (Cornu Bovis) is the powdered horn from black cows, also used as a substitute for *Xi Jiao*. In a clinical study, it effectively treated schizophrenia in up to 95.5% of the subjects. The treatment protocol started with 2 to 3 grams of powder with white sugar three times daily, and the dose was gradually increased each day. At the end of the 30-day treatment course, the dosage in some cases was up to 50 grams per day.[10]

AUTHORS' COMMENTS

Xi Jiao (Cornu Rhinoceri) is listed in Appendix I of the Convention on International Trade in Endangered

Xi Jiao (Cornu Rhinoceri)

Species of Wild Fauna and Flora (CITES). Trade in *Xi Jiao* is strictly prohibited. The discussion of *Xi Jiao* in this text is included only to offer 1) the accurate history of its critically important usage in traditional herbal medicine, and 2) models for appropriate usage of effective substitute substances (see Supplement). The information should not be interpreted as condoning illegal use of this endangered species. For more information, please refer to Appendix 10.

Sheng Di Huang (Radix Rehmanniae)

生地黄

Pinyin Name: *Sheng Di Huang*
Literal Name: "fresh earth's yellowness"
Alternate Chinese Names: *Sheng Di, Huai Sheng Di, Huai Di Huang, Gan Di Huang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: rehmannia, dried rehmannia rhizome, dried adhesive rehmannia rhizome
Botanical Name: *Rehmannia glutinosa* Libosch. F. *hueichingensis* (*Chao et Schih*) Hsiao. (*Huai Ching Di Huang*); *Rehmannia glutinosa* Libosch. (*Di Huang*)
Pharmaceutical Name: Radix Rehmanniae
Properties: sweet, bitter, cold
Channels Entered: Heart, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Cools the Blood

Sheng Di Huang (Radix Rehmanniae) treats heat invading the *ying* (nutritive) and *xue* (blood) levels, characterized by high fever, dry mouth and tongue, no thirst, restlessness and feverish sensations at night, delirium, and mania. The tongue is scarlet red.

- Heat in the *ying* (nutritive) and *xue* (blood) levels: use *Sheng Di Huang* with *Xuan Shen* (Radix Scrophulariae), and *Mai Men Dong* (Radix Ophiopogonis). **Exemplar Formula:** *Qing Ying Tang* (Clear the Nutrition Level Decoction).

Bleeding: Heat in the *xue* (blood) level forces blood out of the vessels, causing hematemesis, epistaxis, hematuria, gastrointestinal bleeding, purpura and excessive menstrual bleeding.

- Hematemesis and epistaxis: use *Sheng Di Huang* with *He Ye* (Folium Nelumbinis), *Ce Bai Ye* (Cacumen Platycladi) and *Ai Ye* (Folium Artemisiae Argyi). **Exemplar Formula:** *Si Sheng Wan* (Four-Fresh Pill).
- Gastrointestinal bleeding: use it with *Huang Qin* (Radix Scutellariae), *Huai Hua* (Flos Sophorae), *Di Yu* (Radix Sanguisorbae) and *Wu Mei* (Fructus Mume).

Sheng Di Huang (Radix Rehmanniae)

- Excessive menstrual bleeding: combine it with *Huang Qin* (Radix Scutellariae), *Dang Gui* (Radicis Angelicae Sinensis), *Ai Ye* (Folium Artemisiae Argyi) and *Ce Bai Ye* (Cacumen Platycladi).
- Purpura or bleeding with macula and blotches on the skin: add *Mu Dan Pi* (Cortex Moutan) and *Chi Shao* (Radix Paeoniae Rubrae).

Dermatological disorders: Heat in the *xue* (blood) level may also manifest as dermatological disorders, such as urticaria, rashes, and itching.

- Urticaria, rash and itching: use *Sheng Di Huang* with *Dang Gui* (Radicis Angelicae Sinensis), *Chan Tui* (Periostracum Cicadae), and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Xiao Feng San* (Eliminate Wind Powder).

2. Nourishes Yin and Promotes Generation of Body Fluids

Febrile disorders injuring the yin, *xiao ke* (wasting and thirsting) disorders: Sweet and juicy in nature, *Sheng Di Huang* clears heat, nourishes yin and promotes generation of body fluids. It is commonly used to treat complications of excess heat in which heat is drying body fluids. Heat is often characterized by fever and irritability, while yin or fluid deficiency is characterized by thirst, hot flashes, a dry, cracked tongue with cracks, dry mouth, steaming bones sensations, dry cough, throat pain and soreness, and night sweating. This herb is especially effective in treating *xiao ke* (wasting and thirsting) syndrome with irritability and thirst.

- Thirst due to heat with Stomach yin deficiency: use *Sheng Di Huang* with *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Men Dong* (Radix Ophiopogonis) and *Yu Zhu* (Rhizoma Polygonati Odorati).
- Thirst and irritability due to Lung heat: combine with *Tian Hua Fen* (Radix Trichosanthis), *Huang Lian* (Rhizoma Coptidis), and *Ou Jie* (Nodus Nelumbinis Rhizomatis).
- *Xiao ke* (wasting and thirsting) syndrome: use it with *Huang Qi* (Radix Astragali), *Ge Gen* (Radix Puerariae) and *Tian Hua Fen* (Radix Trichosanthis).

Late-stages febrile disorders: These conditions are often characterized by the presence of heat with severe damage to yin and body fluids. Clinical manifestations include tidal fevers with feverish sensations at night but coldness in the morning. *Sheng Di Huang* is an excellent herb for treatment of chronic disorders with deficiency heat symptoms such as tidal fever, flushed cheeks, irritability, thirst, poor appetite, and *wu xin re* (five-center heat).

- Tidal fever with heat and yin deficiency: use *Sheng Di Huang* with *Zhi Mu* (Radix Anemarrhenae), *Qing Hao* (Herba Artemisiae Annuae) and *Bie Jia* (Carapax Trionycis) to clear yin-deficient heat. **Exemplar Formula:** *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-shelled Turtle Shell Decoction).

Constipation: *Sheng Di Huang* treats constipation caused by heat entering the Large Intestine and drying fluids.

- Constipation from heat drying fluids in the Large Intestine: combine this herb with *Xuan Shen* (Radix Scrophulariae) and *Mai Men Dong* (Radix Ophiopogonis).

***Lin zheng* (dysuria syndrome):** *Sheng Di Huang* is also used to address *lin zheng* arising from heat attacking the Small Intestine and Urinary Bladder.

- *Lin zheng* (dysuria syndrome) from heat attacking Small Intestine and Urinary Bladder: use it with *Zhu Ye* (Herba Phyllostachys), *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE

10 to 30 grams in decoction. The maximum dosage of *Sheng Di Huang* is 100 grams. Because it is rich and may cause stagnation, *Sheng Di Huang* is often processed with *Sheng Jiang* (Rhizoma Zingiberis Recens) juice or prescribed with a small portion of *Sha Ren* (Fructus Amomi) to avoid the buildup of dampness. Stir-frying *Sheng Di Huang* with grain-based liquor reduces the cold, greasy and stagnating nature of the herb. Charring *Sheng Di Huang* increases the hemostatic function. Once charred, however, the herb becomes less potent in heat-clearing and blood-cooling functions.

CAUTIONS / CONTRAINDICATIONS

Sweet and stagnating in nature, *Sheng Di Huang* may create dampness in the middle *jiao* and is contraindicated in patients with Spleen and Stomach qi or yang deficiencies or those with abdominal fullness or diarrhea.

CHEMICAL COMPOSITION

Catalpol, 6-o-acetylcatalpol, aucubin, melittoside, rehmanniosides A,B,C,D; rehmaglutins A,B,C,D; glutinoside, rehmannans A,B,C; stachyose, D-mannitol.[1]

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory:** In laboratory studies, water and alcohol extracts of *Sheng Di Huang* at 10 g/kg/day for 5 days showed marked effectiveness in reducing inflammation and swelling in mice.[2]
- **Endocrine:** Administration of *Sheng Di Huang* has a definite effect on the endocrine system. It has been shown that the ingestion of *Sheng Di Huang* increases the plasma levels of adrenocortical hormone, even in the presence of

Sheng Di Huang (Radix Rehmanniae)

dexamethasone. It has been proposed that *Sheng Di Huang* works by inhibiting the negative feedback from the dexamethasone to the pituitary gland. Other herbs that have shown similar influence include *Zhi Mu* (Radix Anemarrhenae) and *Gan Cao* (Radix Glycyrrhizae).[3]

- **Others:** *Sheng Di Huang* has demonstrated cardiotonic, antihypertensive, hemostatic, hepatoprotective, diuretic and antibiotic effects.[4]

CLINICAL STUDIES AND RESEARCH

- **Arthritis:** In one study, 23 patients with rheumatoid arthritis were treated with 90 grams of *Sheng Di Huang* per day given as herbal decoction, with good results.[5]
- **Urticaria:** Rashes and urticaria in 37 patients were treated with *Sheng Di Huang*, 90 grams per day given as herbal decoction, with good results.[6]
- **Vertebral hyperostosis:** In another study, 183 patients with hypertrophy of the spinal cord were treated with injections of *Sheng Di Huang* or *Wei Ling Xian* (Radix Clematidis). The study reported good results, with *Sheng Di Huang* showing more effectiveness than *Wei Ling Xian*.[7]

TOXICOLOGY

No fatalities were reported in mice following oral ingestion of water or alcohol extracts of *Sheng Di Huang* at 60 g/kg/day for 3 days. No fatalities were reported in rats following oral ingestion of water or alcohol extracts of *Sheng Di Huang* at 18 g/kg/day for 15 days. There was no evidence of damage to the internal organs.[8]

SUPPLEMENT

- 鲜地黄 / 鲜地黄 *Xian Di Huang* (Radix Rehmanniae Recens), first cited in *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is hydrated rehmannia freshly harvested from the ground. It can be preserved in moist sand for 2 to 4 months. The function of *Xian Di Huang* and *Sheng Di Huang* is similar except *Xian Di Huang* is colder and stronger in cooling the blood and generating body fluids to relieve thirst. Its tonic function is weaker. It is best used in cases involving high fever and bleeding. The normal dosage of *Xian Di Huang* is usually 20 to 60 grams. It can also be taken as juice.

AUTHORS' COMMENTS

Please refer to *Shu Di Huang* (Radix Rehmanniae Preparata) for comparisons of *Shu Di Huang* (Radix Rehmanniae Preparata), *Sheng Di Huang*, and *Xian Di Huang* (Radix Rehmanniae Recens).

Xuan Shen (Radix Scrophulariae)

玄參 玄参

Pinyin Name: *Xuan Shen*
Literal Name: "dark root," "dark ginseng"
Alternate Chinese Names: *Yuan Shen, Hei Shen*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: scrophularia, figwort root
Botanical Name: *Scrophularia ningpoensis* Hemsl.
Pharmaceutical Name: Radix Scrophulariae
Properties: bitter, sweet, salty, cold
Channels Entered: Lung, Stomach, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Nourishes Yin

Heat in the *ying* (nutritive) level: Sweet, cold and moist in nature, *Xuan Shen* (Radix Scrophulariae) clears heat and nourishes yin. It is commonly used for situations where there is excess heat accompanied by consequent damage to yin or drying of body fluids. If heat enters the Lung and dries the fluids, symptoms will present as dry, non-productive cough, chest tightness, thirst, and dry mouth and throat. In febrile disorders where heat enters the *ying* (nutritive) level, attacks the Pericardium, and damages yin, symptoms will manifest as dry mouth, red tongue, delirium, and semiconsciousness.

- Lung heat with dryness: use *Xuan Shen* with *Bai He* (Bulbus Lilii), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal).
- Heat entering the *ying* (nutritive) level and damaging yin: combine it with *Sheng Di Huang* (Radix Rehmanniae), and *Lian Qiao* (Fructus Forsythiae).

Heat in the *xue* (blood) level: This condition is characterized by purpura, dark-purplish blotches on the skin, caused by heat driving blood out of the vessels.

- Purpura or blotches: use *Xuan Shen* with *Sheng Ma* (Rhizoma Cimicifugae) and *Shui Niu Jiao* (Cornu Bubali).

2. Eliminates Toxins and Disperses Nodules

Toxic nodules and palpable masses: Toxic heat is characterized by swelling, pain, abscesses and ulceration. Clinically, *Xuan Shen* is often used to treat sore throat, scrofula, goiter, nodules due to phlegm stagnation, and skin lesions with abscesses or ulcerations. It is best for dry, swollen, painful throat caused by the rising of yin-deficient heat and toxicity, not sore throat from exterior wind-heat.

- Sore throat with dryness and pain: use this herb with *Jie Geng* (Radix Platycodonis) and *Gan Cao* (Radix Glycyrrhizae).
- Diphtheria: combine it with *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), and *Mu Dan Pi* (Cortex Moutan). **Exemplar Formula:** *Yang Yin Qing Fei Tang* (Nourish the Yin and Clear the Lungs Decoction).
- Goiter, scrofula: add *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Mu Li* (Concha Ostreae). **Exemplar Formula:** *Xiao Luo Wan* (Reduce Scrofula Pill).
- Suppurative inflammation: combine it with *Jin Yin Hua* (Flos Lonicerae), *Dang Gui* (Radicis Angelicae Sinensis) and *Gan Cao* (Radix Glycyrrhizae).
- Skin lesions with abscesses or ulcerations: use *Xuan Shen* with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), and *Zi Hua Di Ding* (Herba Violae).

DOSAGE

10 to 15 grams in decoction. The maximum dosage of *Xuan Shen* is 50 grams. This herb is used internally or topically.

CAUTIONS / CONTRAINDICATIONS

- Cold in nature, *Xuan Shen* is contraindicated in patients who have dampness, deficiency and cold of the Spleen and Stomach.
- *Xuan Shen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).

CHEMICAL COMPOSITION

Scrophularin, iridioid, harpagoside, oleic acid, linoleic acid, and stearic acid.[1]

Xuan Shen (Radix Scrophulariae)

PHARMACOLOGICAL EFFECTS

- **Antihypertensive:** In dogs, cats, rabbits and other animals, water and alcohol extracts of *Xuan Shen* demonstrated antihypertensive action via vasodilation. Oral ingestion of a *Xuan Shen* decoction at 2 g/kg twice daily was effective in reducing blood pressure in dogs with renal hypertension. Intravenous injection of a *Xuan Shen* preparation dilated blood vessels, decreased heart rate, and increased urine output in mice. Alcohol extract of *Xuan Shen* increased blood flow to the coronary arteries and decreased oxygen requirement by the cardiac muscles.[2]
- **Antidiabetic:** Subcutaneous injection of *Xuan Shen* reduces blood glucose in rabbits.[3]
- **Antibiotic:** A 50% decoction of *Xuan Shen* has an inhibitory effect *in vitro* against *Staphylococcus aureus, Pseudomonas aeruginosa*, and some pathogenic fungi.[4]
- **Others:** *Xuan Shen* has sedative and antipyretic effects.[5]

CLINICAL STUDIES AND RESEARCH

- **Peeling of the skin:** According to one report, 50 patients with constant peeling of the skin were treated with an herbal tea once daily with good results. The herbal tea contained 30 grams each of *Xuan Shen* and *Sheng Di Huang* (Radix Rehmanniae).[6]

HERB-DRUG INTERACTION

- **Antidiabetics:** It is prudent to use *Xuan Shen* with caution with insulin, sulfonylureas, and other antidiabetic medications. Though the interaction has not been documented, the combination of antidiabetic herbs and drugs may have a synergistic effect, leading to hypoglycemia.[7] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]

AUTHORS' COMMENTS

When combined appropriately with other herbs, *Xuan Shen* effectively treats sore throat from various causes. Because *Xuan Shen* eliminates toxins, it can be combined with *Bo He* (Herba Menthae) and *Niu Bang Zi* (Fructus Arctii) to treat initial stages of wind-heat where there are slight signs of toxicity. It can be used with *Mai Men Dong* (Radix Ophiopogonis) and *Lian Qiao* (Fructus Forsythiae) for sore and swollen throat from toxicity and heat. When combined with *Sheng Di Huang* (Radix Rehmanniae) and *Mai Men Dong* (Radix Ophiopogonis), *Xuan Shen* can treat sore and dry throat caused by rising of deficiency fire.

According to Dr. Zhang Xiao-Ping, the combination of *Xuan Shen* and *Cang Zhu* (Rhizoma Atractylodis) has an excellent effect to lower plasma glucose levels to treat diabetes mellitus patients. These two herbs are especially effective in individuals who have diabetes characterized by qi and yin deficiencies.

Mu Dan Pi (Cortex Moutan)

牡丹皮

Pinyin Name: *Mu Dan Pi*
Alternate Chinese Names: *Dan Pi, Fen Dan Pi, Mu Dan Gen Pi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: moutan, tree peony bark
Botanical Name: *Paeonia suffruticosa* Andr.
Pharmaceutical Name: Cortex Moutan
Properties: bitter, acrid, cool
Channels Entered: Heart, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Cools Blood

Yin-deficient heat: *Mu Dan Pi* (Cortex Moutan) treats this imbalance to relieve steaming bones sensations, nighttime fevers, the absence of perspiration, and thirst. Typical patients with these symptoms are women experiencing menopause.

- Steaming bones sensations: use *Mu Dan Pi* with *Di Gu Pi* (Cortex Lycii), *Qing Hao* (Herba Artemisiae Annuae) and *Bie Jia* (Carapax Trionycis). **Exemplar Formula:** *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-shelled Turtle Shell Decoction).
- Menopause with yin deficiency and heat: use this herb with *Zhi Mu* (Radix Anemarrhenae) and *Sheng Di Huang* (Radix Rehmanniae).
- Spermatorrhea due to Kidney yin deficiency and heat: add *Ze Xie* (Rhizoma Alismatis), *Fu Ling* (Poria) and *Shan Zhu Yu* (Fructus Corni). **Exemplar Formula:** *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

Heat in the *xue* (blood) level: Maculae, bleeding-related blotches on the skin, purpura, hematemesis, hemoptysis, hematuria, and epistaxis are all commonly caused by heat driving the blood out of the vessels.

- Hematemesis and epistaxis because of heat in the *xue* (blood) level: use *Mu Dan Pi* with *Chi Shao* (Radix Paeoniae Rubrae) and *Sheng Di Huang* (Radix Rehmanniae).

Menstrual disorders: Clinical manifestations of heat affecting the *chong* (thoroughfare) and *ren* (conception) channels include hypermenorrhea, early menstruation, and epistaxis during menstruation. There are also forms of abnormal bleeding in which heat drives blood out of the vessels and thus creates shortened menstrual cycles, early menstruation or hypermenorrhea. Night fevers and morning or daytime chills are also common complaints. Often, premenstrual or postmenstrual feverish sensations may be present.

- Feverish sensations: use *Mu Dan Pi* with *Bai Shao* (Radix Paeoniae Alba), *Huang Qin* (Radix Scutellariae) and *Chai Hu* (Radix Bupleuri).

Liver yang rising or Liver fire: *Mu Dan Pi* treats hypertension, irritability, redness of the face and eyes, and short temper.

- Liver yang or Liver fire: use this herb with *Zhi Zi* (Fructus Gardeniae), *Chai Hu* (Radix Bupleuri) and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Jia Wei Xiao Yao San* (Augmented Rambling Powder).

2. Invigorates Blood Circulation and Disperses Blood Stasis

Amenorrhea or abdominal masses: Because of blood stagnation, patients may experience amenorrhea and abdominal masses such as fibroids, tumors or other similar masses. *Mu Dan Pi*, cool in thermal property, can invigorate blood circulation and disperse blood stasis without drying the body, which is not characteristic of most blood-invigorating herbs.

- Amenorrhea or dysmenorrhea with severe pain, stagnation and heat: use *Mu Dan Pi* with *Tao Ren* (Semen Persicae), *Chi Shao* (Radix Paeoniae Rubrae) and *Fu Ling* (Poria) to activate blood circulation, remove blood stagnation and relieve pain. **Exemplar Formula:** *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill).

Bruises resulting from traumatic injuries: *Mu Dan Pi* can be used for the bruises, broken bones, inflammation, swelling and pain associated with traumatic injuries.

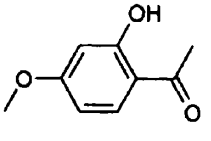
Mu Dan Pi (Cortex Moutan)

- Musculoskeletal injuries with inflammation, swelling, bruises and pain: use it with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *Su Mu* (Lignum Sappan).

Abscess: *Mu Dan Pi* is a key herb in treating abscess, especially intestinal abscess or appendicitis.

- Suppurative inflammation: combine this herb with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae) and *Bai Zhi* (Radix Angelicae Dahuricae).
- Intestinal abscess with abdominal pain and mucus in the stool: use it with *Da Huang* (Radix et Rhizoma Rhei), *Tao Ren* (Semen Persicae) and *Dong Gua Zi* (Semen Benincasae). **Exemplar Formula:** *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction).
- Acute appendicitis that has not suppurated, with fever, vomiting, and lower-right-quadrant pain: add *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas), *Tao Ren* (Semen Persicae), *Dong Gua Zi* (Semen Benincasae) and *Chi Shao* (Radix Paeoniae Rubrae).

DOSAGE



6 to 12 grams in decoction. The maximum dosage of *Mu Dan Pi* is 30 grams. The unprocessed herb is stronger to clear heat and cool blood; the liquor-fried herb (with grain-based liquor) more strongly activates blood circulation and disperses blood stagnation; and the charred herb more effectively stops bleeding.

CAUTIONS / CONTRAINDICATIONS

- Cold in nature, *Mu Dan Pi* should be used with caution in patients who are experiencing deficiency and cold.
- Since *Mu Dan Pi* has blood-activating and stasis-removing functions, it is contraindicated in patients who are pregnant or have excessive bleeding during menstruation.

CHEMICAL COMPOSITION

Paeonol, paeonoside, paeonolide, paeoniflorin, benzoylpaeoniflorin, oxypaeoniflorin, benzoyloxypaeoniflorin, apiopaeonoside.[1,2]

Paeonol

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory:** *Mu Dan Pi* has demonstrated strong anti-inflammatory actions, according to laboratory studies. The mechanism of the anti-inflammatory effect is attributed to inhibition of prostaglandin synthesis and decreased permeability of the blood vessels.[3,4]
- **Cardiovascular:** In anesthetized dogs, administration of *Mu Dan Pi* is associated with increased blood perfusion to the coronary arteries, decreased cardiac output and decreased load on the left ventricle. The herb has also been shown to have a protective effect against ischemia of the heart.[5,6]
- **Antihypertensive:** Decoction of *Mu Dan Pi* has prolonged antihypertensive effect in anesthetized dogs and rats. In dogs with essential and renal hypertension, oral ingestion of decoction of *Mu Dan Pi* at 5 to 10 g/kg/day for 7 days was effective in reducing blood pressure.[7]
- **Antibiotic:** *Mu Dan Pi* has demonstrated inhibitory influence against *Staphylococcus aureus*, β-hemolytic streptococcus, *Bacillus subtilis*, *E. coli*, *Shigella dysenteriae*, *Pseudomonas aeruginosa*, *Bacillus proteus*, *Diplococcus pneumoniae*, and *Vibrio cholerae*.[8]
- **Others:** *Mu Dan Pi* has analgesic, sedative, antiseizure, antipyretic and immune-enhancing effects.[9]

CLINICAL STUDIES AND RESEARCH

- **Allergic rhinitis:** In one study, 31 patients were treated with 50 ml of 10% *Mu Dan Pi* solution every night for 10 days with marked results. In another study, a preparation of *Mu Dan Pi* was used as topical solution three times daily in treating 140 patients with allergic rhinitis with an 87.1% effective rate.[10,11]
- **Purpura:** Anemic purpura in 32 patients was treated with an herbal formula with *Mu Dan Pi* with good results.[12]
- **Hypertension:** According to one report, 30 to 45 grams of *Mu Dan Pi* were cooked and the decoction was given in three equally-divided doses to 20 patients with hypertension, with marked effectiveness to lower blood pressure after approximately 5 days.[13]

TOXICOLOGY

No abnormalities were observed in liver, kidney, heart and blood exams following treatment of hypertension using *Mu Dan Pi* in dogs. The LD_{50} in mice for paeonol is 3,430 mg/kg for oral ingestion, 781 mg/kg for intraperitoneal injection, and 196 mg/kg for intravenous injection.[14]

SUPPLEMENT

- 牡丹葉 / 牡丹叶 *Mu Dan Ye* (Folium Moutan), the leaf of the same plant as *Mu Dan Pi*, can also be used to clear damp-heat from the intestines for indications such as bacterial dysentery. It was reported in one study that 29 patients with bacterial dysentery were treated with *Mu Dan Ye* with an effective rate of 96%. *Mu Dan Ye* was found to have inhibitory activities against *Shigella dysenteriae*, *Staphylococcus aureus*, and *Pseudomonas aeruginosa*.[15]

Mu Dan Pí (Cortex Moutan)

AUTHORS' COMMENTS

According to Dr. Xu Fu-He, *Mu Dan Pi* and *Zhi Zi* (Fructus Gardeniae) treat itching or heat sensations of the nipples when used internally and topically.

Chi Shao (Radix Paeoniae Rubrae)

赤芍 赤芍

Pinyin Name: *Chi Shao*
Literal Name: "bright red peony"
Alternate Chinese Names: *Chi Shao Yao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: red peony, red peony root
Botanical Name: *Paeonia veitchii* Lynch. (*Chuan Chi Shao*); *Paeonia abovata* Maxim. (*Cao Shao Yao*); *Paeonia lactiflora* Pall. (*Shao Yao*)
Pharmaceutical Name: Radix Paeoniae Rubrae
Properties: bitter, cool
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Cools Blood

Chi Shao (Radix Paeoniae Rubrae) treats various bleeding disorders caused by febrile disorders or heat attacking the *xue* (blood) level. Clinical manifestations include fever, macules or blotches on the skin, purpura, hematemesis, epistaxis and hematuria.

- Hematemesis or epistaxis: use *Chi Shao* with *Mu Dan Pi* (Cortex Moutan) and *Sheng Di Huang* (Radix Rehmanniae).
- Hematuria: combine it with *Xiao Ji* (Herba Cirisii), *Bai Mao Gen* (Rhizoma Imperatae), and *Qian Cao* (Radix Rubiae).
- Macules or blotches on the skin, purpura: use it with *Zi Cao Gen* (Radix Lithospermi), *Chan Tui* (Periostracum Cicadae), and *Hong Hua* (Flos Carthami).

2. Dispels Blood Stasis, Relieves Pain

Amenorrhea and dysmenorrhea: Blood stagnation in the uterus leads to amenorrhea or dysmenorrhea with blood clots. The blood is often dark in color, and pain is alleviated after clots have been dispelled.

- Amenorrhea or dysmenorrhea: use *Chi Shao* with *Dang Gui* (Radicis Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).

Chi Shao (Radix Paeoniae Rubrae)

Bruises from traumatic injuries: Internal injuries in the chest and abdomen are associated with blood stagnation. Blood stagnation may also present as palpable masses in the abdomen. *Chi Shao* has excellent action to disperse blood stagnation, relieve pain, and reduce swelling.

- Blood stagnation in the chest: use *Chi Shao* with *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). **Exemplar Formula:** *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).
- Blood stagnation in the hypochondrium: add *Yan Hu Suo* (Rhizoma Corydalis), *Hong Hua* (Flos Carthami), *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) and *Xiang Fu* (Rhizoma Cyperi). **Exemplar Formula:** *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction).
- Blood stagnation in the lower abdomen: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Pu Huang* (Pollen Typhae). **Exemplar Formula:** *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction).
- Palpable masses in the abdomen: use it with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).

Post-stroke hemiplegia: This condition is caused by severe qi and blood stagnation in the channels and collaterals.

- Hemiplegia with deficiency: use *Chi Shao* with *Huang Qi* (Radix Astragali) and *Di Long* (Pheretima).

3. Reduces Swelling from Sores and Abscesses

In sores, swellings and abscesses due to heat and toxicity, the lesions are red and painful to the touch.

- Sores and abscesses: add *Jin Yin Hua* (Flos Lonicerae), *Ru Xiang* (Gummi Olibanum) and *Zao Jiao Ci* (Spina Gleditsiae). **Exemplar Formula:** *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life).

4. Clears Heat and Relieves Eye Pain

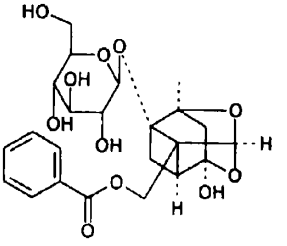
Rising Liver yang: Clinical manifestations include redness, swelling and pain in the eyes.

- Redness, swelling and pain in the eyes: use *Chi Shao* with *Ju Hua* (Flos Chrysanthemi), *Mu Zei* (Herba Equiseti Hiemalis) and *Xia Ku Cao* (Spica Prunellae).

Heat in the Urinary Bladder: *Chi Shao* treats burning dysuria and hematuria.

- Burning dysuria: use this herb with *Che Qian Zi* (Semen Plantaginis) and *Hua Shi* (Talcum).
- Hematuria: combine it with *Bai Mao Gen* (Rhizoma Imperatae), and *Ou Jie* (Nodus Nelumbinis Rhizomatis).

DOSAGE



6 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Chi Shao* is contraindicated in patients with deficiency and cold.
- *Chi Shao* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).

CHEMICAL COMPOSITION

Paeoniflorin, benzoylpaeoniflorin, oxypaeoniflorin, lactiflorin, daucosterol, d-catechin.[1,2]

Paeoniflorin

PHARMACOLOGICAL EFFECTS

- **Antiplatelet:** Administration of *Chi Shao* has demonstrated effectiveness to inhibit platelet aggregation in rabbits.[3]
- **Hematological:** Administration of *Chi Shao* has been shown to inhibit thrombus formation in rats.[4]
- **Cardiovascular:** Administration of *Chi Shao* reduces blood pressure and dilates the coronary artery. It does not, however, influence the heart rate. Increased resistance to hypoxia is also observed in animals that receive *Chi Shao*.[5]
- **Antispasmodic:** *Chi Shao* has an inhibitory effect on the smooth muscles of the intestines and uterus as demonstrated in rats and guinea pigs.[6]
- **Effects on the central nervous system:** Paeoniflorin has mild sedative, antiseizure and antipyretic effects as demonstrated in animal models.[7]
- **Antibiotic:** *Chi Shao* has an inhibitory effect against *Salmonella typhi*, *Pseudomonas aeruginosa*, *E. coli*, *Staphylococcus aureus*, β-hemolytic streptococcus, *Diplococcus pneumoniae*, *Vibrio cholerae*, and some dermatophytes and viruses.[8]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease:** In one study, 125 patients with coronary artery disease were treated with 40 grams of *Chi Shao* decoction three times daily, with satisfactory results.[9]
- **Cerebral thrombosis:** Intravenous infusion of *Chi Shao* injectables with D5W or D10W once daily was 92.01% effective for prevention of thrombus formation in 263 patients.[10]

Chi Shao (Radix Paeoniae Rubrae)

- **Cor pulmonale:** According to one report, 10 grams of *Chi Shao* given three times daily was effective in treating 30 patients with cor pulmonale.[11]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Chi Shao* has antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[12] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

Chi Shao is well-tolerated. The maximum safe dosage is 50 g/kg via intravenous injection in mice, which is roughly equivalent to 1,163 to 2,325 times the oral therapeutic dosage.[13]

AUTHORS' COMMENTS

Chi Shao (Radix Paeoniae Rubrae) and *Bai Shao* (Radix Paeoniae Alba) have similar names but different functions. Despite their differences, they are sometime used together in cases where there are concurrent excess and deficient conditions.

- *Chi Shao* invigorates blood and relieves stagnation. It sedates Liver fire and is dispersing in nature.
- *Bai Shao* nourishes blood and yin, softens the Liver, and is tonifying and consolidating in nature.

Zi Cao Gen (Radix Lithospermi)

紫草根 紫草根

Pinyin Name: *Zi Cao Gen*
Literal Name: "purple herb root"
Alternate Chinese Names: *Zi Cao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: lithospermum root
Botanical Name: *Lithospermum erythrorhizon* Sieb et Zucc. (*Zi Cao*); *Arnebiae euchroma* (*Xin Jiang Zi Cao*); *Arnebiae guttata* (*Nei Meng Zi Cao*)
Pharmaceutical Name: Radix Lithospermi
Properties: sweet, cold
Channels Entered: Heart, Liver

Zi Cao Gen (Radix Lithospermi)

CHINESE THERAPEUTIC ACTIONS

1. Cools Blood, Invigorates Blood Circulation, and Relieves Toxins

Incomplete eruption of measles: When there is lingering heat and toxicity in the *xue* (blood) level, measles cannot completely erupt, or the color of lesions may be dark red and purple. Cold in nature, *Zi Cao Gen* (Radix Lithospermi) cools the blood and eliminates heat and toxins from the blood. Clinically, it treats heat and toxins that are in the blood but are manifested in the skin, with such signs and symptoms as rashes, macula or blotches, and dark, purplish discoloration of the skin. Heat and toxicity may also affect the throat, leading to swelling and pain. Accompanying symptoms may include dry stools, fever and thirst.

- Macula or dark-purplish blotches with incomplete expression: use *Zi Cao Gen* with *Chan Tui* (Periostracum Cicadae), *Chi Shao* (Radix Paeoniae Rubrae) and *Lian Qiao* (Fructus Forsythiae).
- To prevent measles or to minimize the severity of symptoms: combine 3 to 6 grams of *Zi Cao Gen* with 1.3 to 3 grams of *Gan Cao* (Radix Glycyrrhizae) and serve as a decoction once a day for 3 to 7 days. It is recommended to begin this treatment within 5 days after contact with patients who have measles.
- Sore throat with swelling and pain: use it with *Lian Qiao* (Fructus Forsythiae) and *Shan Dou Gen* (Radix Sophorae Tonkinensis).

Bleeding: Heat in the blood may cause various types of bleeding, such as epistaxis and hematuria.

- Hematemesis or epistaxis: use *Zi Cao Gen* with *Sheng Di Huang* (Radix Rehmanniae), *Bai Guo* (Semen Ginkgo), *Fu Ling* (Poria) and *Mai Men Dong* (Radix Ophiopogonis).
- Hematuria: combine it with *Che Qian Zi* (Semen Plantaginis) and *Lian Qiao* (Fructus Forsythiae).
- General bleeding: add *Sheng Di Huang* (Radix Rehmanniae), *Xiao Ji* (Herba Cirisii), and *Bai Mao Gen* (Rhizoma Imperatae).

2. Eliminates Heat and Toxins from the Skin

Zi Cao Gen may be used topically or orally to eliminate heat and toxins from the skin. Clinical applications include carbuncles, furuncles, abscesses, lesions, eczema, cervical erosion, vaginal itching, and burns.

- Abscesses, lesions, ulceration: use this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Xue Jie* (Sanguis Draconis), and *Bai Zhi* (Radix Angelicae Dahuricae), topically or internally.
- Burns with redness, swelling and pain: mix *Zi Cao Gen* with *Dang Gui* (Radicis Angelicae Sinensis), vinegar and sesame oil, and apply topically.
- Itching and irritation from insect bites: mix *Zi Cao Gen* with *Bai Zhi* (Radix Angelicae Dahuricae), *Dang Gui* (Radicis Angelicae Sinensis), *Gan Cao* (Radix Glycyrrhizae) and sesame oil, and apply topically.

3. Moistens the Intestines and Unblocks the Bowels

Constipation: *Zi Cao Gen* can be used for constipation or dry stools caused by heat in the blood.

- Constipation: use it with *Da Huang* (Radix et Rhizoma Rhei).

DOSAGE

3 to 10 grams in decoctions. The maximum dosage of *Zi Cao Gen* is 20 grams. *Zi Cao Gen* may be used internally as herbal decoction, or topically as cream or ointment. *Zi Cao Gen* cooked in boiling water has less antibiotic activity.

CAUTIONS / CONTRAINDICATIONS

Cold in nature, *Zi Cao Gen* is contraindicated in patients with diarrhea, or deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Lithospermidin A, B; deoxyshikonin, dimethylacrylalkannin, acetylshikonin, dl-acetylalkannin, β-acetoxyisovalerylalkannin, dl-shikonin, β-hydroxyisovalerylalkannin, l-methoxy-acetylshikonin.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Zi Cao Gen* has been shown to inhibit *Staphylococcus aureus, E. coli, Bacillus dysenteriae,* and some dermatophytes and influenza viruses. It also has an inhibitory effect against herpes virus. Lastly, it has shown effectiveness in HBsAg in patients with hepatitis B.[2]
- **Anti-inflammatory:** *Zi Cao Gen* has marked anti-inflammatory effects, and promotes healing in animals.[3]
- **Contraceptive:** *Zi Cao Gen* has demonstrated effectiveness as a contraceptive. Administration of extract of *Zi Cao Gen* inhibited the estrual cycle in rats. The effect was completely reversible upon discontinuation of treatment. In follow-up studies, it was determined that oral administration of *Zi Cao Gen* is associated with an inhibition of gonad-stimulating hormone and chorionic gonadotropin. The net result of such endocrine influence is decrease in weight of the ovaries and uterus.[4]
- **Cardiotonic:** In anesthetized rabbits and toads, administration of *Zi Cao Gen* from Xinjiang province (*Arnebiae Euchroma*) has a stimulating effect on the heart at low doses, and an inhibitory effect at high doses. Administration of *Zi Cao Gen* is associated with a sharp decline of blood pressure in anesthetized animals, but has no significant effect on awake subjects.[5]

Zi Cao Gen (Radix Lithospermi)

- **Gastrointestinal:** Oral administration of *Zi Cao Gen* decoction has a stimulating effect on the smooth muscle of the intestines, leading to contraction.[6]
- **Antineoplastic:** Preparations of *Zi Cao Gen* have shown antineoplastic effects by interfering with DNA synthesis of cancer cells at G2 phase. Preliminary tests showed that it is effective against chorioepithelioma, chorioadenoma and acute lymphocytic leukemia. It also decreases the incidence of breast cancer in mice.[7,8,9]

CLINICAL STUDIES AND RESEARCH

- **Measles:** *Zi Cao Gen* is used as preventative therapy against measles. However, results from most clinical studies showed mixed effectiveness.[10]
- **Birth Control:** One report describes that 1.8 grams of a *Zi Cao Gen* preparation were given to 102 women three times daily for 9 days, beginning after the last day of menstruation. Out of 102 patients, the rate of effectiveness was 82.4%.[11]
- **Hepatitis:** Good results were shown when 270 patients with non-icteric hepatitis or chronic hepatitis were injected intramuscularly with 2 ml of a 0.1% *Zi Cao Gen* preparation.[12]
- **Purpura:** In one study, 28 patients with purpura were treated with *Zi Cao Gen* with good results.[13]
- **Phlebitis:** There was close to a 100% rate of effectiveness when 25 patients with phlebitis were treated three times daily with a *Zi Cao Gen* preparation (each dose contains approximately 1.5 grams of the dried herb).[14]
- **Burns:** According to one report, 285 patients with burns were treated with *Zi Cao Gen* oil, with improvement in all patients. In another study 1,153 patients were treated with *Zi Cao Gen* oil. All but one patient showed significant improvement.[15,16]
- **Cervical erosion:** Topical application of *Zi Cao Gen* oil once every other day for 10 days per course of treatment was 96% effective in treating 100 cases of cervical erosion.[17]
- **Psoriasis:** Intramuscular injection of *Zi Cao Gen* demonstrated marked effectiveness in treating psoriasis in 50 patients.[18]

TOXICOLOGY

Oral administration of a *Zi Cao Gen* syrup at 5 to 15 mg/kg for 2 months resulted in no abnormalities of the internal organs. However, overdose of *Zi Cao Gen* in laboratory animals has been associated with such adverse reactions as pyuria, hematuria, proteinuria, and diarrhea. Such reactions are reversed 2 days following discontinuation of the herbs.[19]

Fu Rong (Radix Hibisci)

芙蓉 芙蓉

Pinyin Name: *Fu Rong*
Alternate Chinese Names: *Shan Fu Rong, Gou Tou Fu Rong*
English Name: hibiscus root
Botanical Name: *Hibiscus taiwanensis*
Pharmaceutical Name: Radix Hibisci
Properties: acrid, cool
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears the Lung

Lung heat: Acrid and cool, *Fu Rong* (Radix Hibisci) clears Lung heat to relieve cough, dyspnea and yellow nasal discharge.

- Cough and dyspnea: use *Fu Rong* with *Da Qing Ye* (Folium Isatidis), *Pu Gong Ying* (Herba Taraxaci), *Huang Qin* (Radix Scutellariae), *Shi Gao* (Gypsum Fibrosum) and *Kuan Dong Hua* (Flos Farfarae).
- Sinusitis: use it with *Xin Yi Hua* (Flos Magnoliae) and *E Bu Shi Cao* (Herba Centipedae).

2. Reduces Inflammation and Relieves Pain

- Arthritis: combine *Fu Rong* with *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae) and *Yi Tiao Gen* (Radix Moghaniae).
- Hypermenorrhea and leukorrhea: use it with *Bai Long Chuan Hua Tou* (Radix Clerodendron Paniculatum) and *Ji Guan Hua* (Flos Celosiae Cristatae).
- Toxic swelling: apply *Fu Rong* topically.

DOSAGE

3 to 12 grams in decoction.

SUPPLEMENT

- 芙蓉葉 / 芙蓉叶 *Fu Rong Ye* (Folium Hibisci) treats dermatological disorders characterized by dampness, heat and toxins, such as carbuncles, furuncles and sores.

AUTHORS' COMMENTS

Most of the herbs that enter the Lung channel to treat respiratory disorders do not enter the nasal cavity. *Fu Rong* has the special characteristic of being able to treat nasal disorders such as allergies, rhinitis and sinusitis as well as clearing Lung heat.

Huang Teng (Caulis Fibraurea)

黄藤 黃藤

Pinyin Name: *Huang Teng*
Literal Name: "yellow vine"
Alternate Chinese Names: *Huang Teng Gen, Teng Gen*
English Name: fibraurea, common fibraurea stem
Botanical Name: *Fibraurea recisa* Pierre
Pharmaceutical Name: Caulis Fibraurea
Properties: bitter, cold
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Clears Heat

Huang Teng (Caulis Fibraurea) treats Liver heat rising upwards, which may lead to elevated blood pressure. It also dispels wind from the exterior to relieve itching of the skin.

- Hypertension from Liver heat: use *Huang Teng* with *Sheng Di Huang* (Radix Rehmanniae), *Tu Fu Ling* (Rhizoma Smilacis Glabrae), and *Gou Ji* (Rhizoma Cibotii).
- Itching of the skin: combine it with *Ban Zhi Lian* (Herba Scutellariae Barbatae) and *Bai Hua She She Cao* (Herba Oldenlandia).

DOSAGE

3 to 15 grams in decoction.

CHEMICAL COMPOSITION

Palmatine, jatrorrhizine, pseudocolumbamine, fibrauin, fibralactone, fibranine, fibramine, columbamine, fiblecin, fibleucinoside, tinophylloloside.[1]

References

Ji Guan Hua (Flos Celosiae Cristatae)

雞冠花 鸡冠花

Pinyin Name: *Ji Guan Hua*
Literal Name: "chicken crown flower"
Alternate Chinese Names: *Bai Ji Guan Hua, Ji Guan*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: celosia flower, cockscomb flower
Botanical Name: *Celosia cristata* L. (*Ji Guan*)
Pharmaceutical Name: Flos Celosiae Cristatae
Properties: sweet, cool
Channels Entered: Large Intestine, Liver

Ji Guan Hua (Flos Celosiae Cristatae)

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Cools Blood and Stops Bleeding

Ji Guan Hua (Flos Celosiae Cristatae) clears heat and stops bleeding from various parts of the body.

- Hematemesis or epistaxis: use *Ji Guan Hua* with *Hua Rui Shi* (Ophicalcitum), *Ce Bai Ye* (Cacumen Platycladi) and charred *Pu Huang* (Pollen Typhae).
- Intestinal bleeding, hemorrhoidal bleeding due to heat: combine it with *Huai Hua* (Flos Sophorae), charred *Di Yu* (Radix Sanguisorbae), *Huang Lian* (Rhizoma Coptidis), *Mu Xiang* (Radix Aucklandiae), *Bai Shao* (Radix Paeoniae Alba) and *Da Huang* (Radix et Rhizoma Rhei).
- Uterine bleeding: add *Hua Rui Shi* (Ophicalcitum), *Bai Ji* (Rhizoma Bletillae) and *Wu Bei Zi* (Galla Chinensis).

2. Consolidates *Jing* (Essence) and Stops Diarrhea

Ji Guan Hua consolidates and retains body fluids, and stops diarrhea, dysentery, and vaginal discharge.

- Diarrhea or dysentery: use this herb with *Ge Gen* (Radix Puerariae), *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- White vaginal discharge: add *Long Yan Hua* (Flos Longan).

DOSAGE

6 to 12 grams. The charred form increases the warmth and binding effects of the herb, and is commonly used to stop bleeding, diarrhea, and leukorrhea.

CAUTIONS / CONTRAINDICATIONS

- Since *Ji Guan Hua* consolidates essence, it is not suitable for patients with dampness and heat accumulation, as it may retain these pathogens in the body.

Dong Qing Ye (Folium Ilexis)

冬青葉 冬青叶

Pinyin Name: *Dong Qing Ye*
Literal Name: "blue-green leaves in winter"
Alternate Chinese Names: *Gong Lau Ye, Si Ji Qing*
English Name: ilex
Botanical Name: *Ilex chinensis* Sims
Pharmaceutical Name: Folium Ilexis
Properties: bitter, astringent, cold
Channels Entered: Lung, Heart

CHINESE THERAPEUTIC ACTIONS

1. Dispels Heat and Toxins

Bitter and cold, *Dong Qing Ye* (Folium Ilexis) dispels heat and toxins from the Lung to treat bronchitis, pneumonia, and other respiratory tract infections. It also eliminates heat and toxins from the skin to address chronic, non-healing sores, lesions, and ulcerations.

2. Cools Blood, Stops Bleeding

Dong Qing Ye is used topically to stop bleeding.

DOSAGE

10 to 30 grams.

CHEMICAL COMPOSITION

Protocatechuic acid[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Dong Qing Ye* has an inhibitory action *in vitro* against *Pseudomonas aeruginosa, E. coli, Salmonella typhi, Bacillus subtilis,* and *Staphylococcus aureus.* The minimum inhibitory concentration for the herbs was 12.5 mg/ml.[2]

Dong Qing Ye (Folium Ilexis)

CLINICAL STUDIES AND RESEARCH

- **Burns:** Topical application of *Dong Qing Ye* has shown good results in facilitating healing, reducing discharge of pus from abscesses, and controlling infection.[3]

TOXICOLOGY

No abnormalities were observed following oral ingestion of *Dong Qing Ye* at 10 g/kg for 14 days. In an acute toxicology study, the LD_{50} was 233 g/kg via oral ingestion in mice.[4]

— Heat-Clearing and Toxin-Eliminating Herbs

Jin Yin Hua (Flos Lonicerae)

金銀花　金银花

Pinyin Name: *Jin Yin Hua*
Literal Name: "golden silver flower"
Alternate Chinese Names: *Ren Dong Hua, Jin Hua, Er Hua, Shuang Hua*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: lonicera flower, honeysuckle flower
Botanical Name: *Lonicera japonica* Thunb. (*Ren Dong*); *Lonicera hypoglauca* Miq. (*Hong Xian Ren Dong*); *Lonicera confusa* DC. (*Shan Yin Hua*); *Lonicera dasystyla* Rehd. (*Mao Hua Zhu Ren Dong*)
Pharmaceutical Name: Flos Lonicerae
Properties: sweet, cold
Channels Entered: Lung, Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat

Heat in various stages of febrile disorders: Combined with other appropriate herbs, *Jin Yin Hua* (Flos Lonicerae) can be used for treatment of many heat conditions. Clinical manifestations of heat include wind-heat and early-stage febrile disorders with sore throat, fever, perspiration and thirst; heat in the *qi* (energy) level showing as high fever, thirst, perspiration and forceful pulse; summer-heat with fever, heaviness sensations and heat stroke; and heat in the *ying* (nutritive) and *xue* (blood) levels with irritability, insomnia, bleeding, purpura or macules on the skin, with a scarlet red tongue. Though *Jin Yin Hua* is useful against all types of heat, it is most commonly used and most effective against the initial stages of febrile disorders, in which heat is in the upper *jiao*, at the *wei* (defense) and *qi* (energy) levels.

- Wind-heat and early-stage febrile disorders: use *Jin Yin Hua* with *Jing Jie* (Herba Schizonepetae), *Bo He* (Herba Menthae), and *Lian Qiao* (Fructus Forsythiae). **Exemplar Formula:** *Yin Qiao San* (Honeysuckle and Forsythia Powder).
- Pneumonia with heat signs: use it with *Xing Ren* (Semen Armeniacae Amarum), *Lian Qiao* (Fructus Forsythiae), and *Niu Bang Zi* (Fructus Arctii).
- Bronchitis with heat signs: combine it with *Shi Gao* (Gypsum Fibrosum), *Ma Huang* (Herba Ephedrae), *Xing Ren* (Semen Armeniacae Amarum) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Ma Xing Gan Shi Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- Summer-heat: add *He Ye* (Folium Nelumbinis) and *Ju Hua* (Flos Chrysanthemi).
- Heat in the *qi* (energy) level with fever, irritability, thirst and forceful pulse: use *Jin Yin Hua* with *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Heat in the *ying* (nutritive) level with insomnia, irritability, blotches on the skin, dry mouth with dark-purplish

Jin Yin Hua (Flos Lonicerae)

tongue: use this herb with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae) and *Dan Shen* (Radix Salviae Miltiorrhizae). **Exemplar Formula**: *Qing Ying Tang* (Clear the Nutrition Level Decoction).

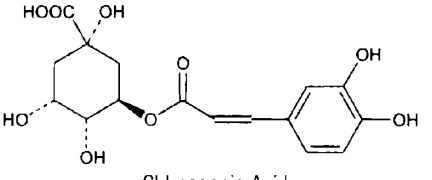
2. Clears Heat and Eliminates Toxins

Sores and abscesses due to heat toxins: *Jin Yin Hua* is commonly used to clear heat and eliminate toxins from the interior and the exterior. The combination of heat and toxins in the interior is characterized by sore throat, swelling, intestinal abscesses and lung abscesses at various stages of development. Toxic heat in the exterior is characterized by all kinds of dermatological sores, lesions, ulcerations, warts and furuncles. *Jin Yin Hua* is also used for syphilis.

- Throat soreness and swelling: use *Jin Yin Hua* with *Lian Qiao* (Fructus Forsythiae) and *Ban Lan Gen* (Radix Isatidis).
- Intestinal abscess: combine it with *Huang Qin* (Radix Scutellariae) and *Yi Yi Ren* (Semen Coicis) to clear damp-heat and toxins in the intestines.
- Sores, lesions, carbuncles and ulceration of the skin: add *Ju Hua* (Flos Chrysanthemi), *Pu Gong Ying* (Herba Taraxaci), and *Zi Hua Di Ding* (Herba Violae). **Exemplar Formulas:** *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins) and *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life).
- Suppurative inflammation of the legs: use *Jin Yin Hua*, *Xuan Shen* (Radix Scrophulariae), *Dang Gui* (Radicis Angelicae Sinensis) and *Gan Cao* (Radix Glycyrrhizae) in large dosages.

3. Treats Diarrhea or Dysentery Caused by Toxic Heat

Diarrhea or dysentery: Heat and toxins attacking the intestines often leads to diarrhea or dysentery, and rectal tenesmus with or without the presence of mucus and blood.



- Diarrhea with mucus but no blood: use *Jin Yin Hua* with sugar.
- Diarrhea with blood: use *Jin Yin Hua* with brown sugar.
- Diarrhea or dysentery with mucus due to damp-heat and toxins: combine it with *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Ge Gen* (Radix Puerariae), *Mu Xiang* (Radix Aucklandiae), *Ma Chi Xian* (Herba Portulacae) and *Bai Tou Weng* (Radix Pulsatillae).

DOSAGE

10 to 20 grams in decoction. In severe cases, the dosage of *Jin Yin Hua* can be increased up to 60 grams. Treatment of exterior conditions with *Jin Yin Hua* requires smaller dosages, while treatment of heat and toxins requires larger dosages. The charred form of this herb enhances hemostatic action for treating bloody diarrhea or bloody dysentery. Fresh *Jin Yin Hua* is more effective than the dried ones.

CHEMICAL COMPOSITION

Lonicein, loniceraflavone, loganin, tannin, chlorogenic acid, isochlorogenic acid, aromadendrene, linalool, geraniol, octanal, α-pinene, β-pinene, myrcene, 1,8-cineole, β-terpinene, hexenol, α-terpineol, neral, linalyl acetate, geranial, citronellol, terpinyl acetate, eugenol, β-eudesmol, geranyl acetate, α-copene, patchoulene, α-caryophyllene, β-caryophyllene, iso-bornyl acetate, farnesol, nerolidol.[1,2]

Chlorogenic Acid

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Jin Yin Hua* has demonstrated a broad spectrum of inhibitory actions against *Staphylococcus aureus*, β-hemolytic streptococcus, *E. coli*, *Bacillus dysenteriae*, *Vibrio cholerae*, *Salmonella typhi*, *Diplococcus pneumoniae*, *Diplococcus meningitidis*, *Pseudomonas aeruginosa*, and *Mycobacterium tuberculosis*. Chlorogenic acid and isochlorogenic acid have the strongest antibiotic effects. The fresh herb (just soaked in water) has a stronger antibiotic action than herbal decoction. The leaves have stronger antibiotic properties than the flowers.[3,4]
- **Anti-inflammatory and antipyretic:** *Jin Yin Hua* has demonstrated marked anti-inflammatory and antipyretic effects in mice and rabbits.[5]
- **CNS stimulant:** *Jin Yin Hua* has a mild stimulating influence on the central nervous system with one-sixth the potency of caffeine. The combination of *Jin Yin Hua* and caffeine showed no synergistic effect.[6]
- **Antihyperlipidemic:** Administration of 2.5 g/kg of *Jin Yin Hua* decreased absorption of cholesterol in the gastrointestinal tract in rats.[7]
- **Gastrointestinal:** Administration of a large dosage of *Jin Yin Hua* decoction is associated with increased motility of the stomach and the intestines. It also increases the excretion of bile acid and gastric acid.[8]

CLINICAL STUDIES AND RESEARCH

- **Appendicitis:** Administration of *Jin Yin Hua* via ionic penetration over 30 minutes daily for 10 to 20 treatments showed satisfactory results in 159 patients with appendicitis.[9]
- **Mastitis:** Administration of an herbal formula provided effective treatment for 10 patients with mastitis. The formula contained 45 grams of *Jin Yin Hua*, 15 grams of *Lu Jiao Shuang* (Cornu Cervi Degelatinatium), 12 grams of

Jin Yin Hua (Flos Lonicerae)

Wang Bu Liu Xing (Semen Vaccariae) and 1 cup of grain-based liquor.[10]

- **Common colds and influenza:** In one study, 1,150 patients with common colds or influenza were treated with *Yin Qiao San* (Honeysuckle and Forsythia Powder) with excellent results.[11]
- **Prevention of upper respiratory tract infections:** During the influenza season, administration of 1.2 ml of an herbal formula via inhalation of herbal vapor or instillation of herbal drops on the throat showed marked preventative effects in 393 children. The formula contained 60 grams of *Jin Yin Hua*, 60 grams of *Guan Zhong* (Rhizoma Dryopteridis), and 20 grams of *Gan Cao* (Radix Glycyrrhizae) cooked and concentrated to yield 120 ml of liquid extract.[12]

TOXICOLOGY

Oral ingestion of decoction of *Jin Yin Hua* is rarely associated with adverse reactions in rabbits, dogs, and other animals. The LD_{50} for extract of *Jin Yin Hua* in mice is 53 g/kg.[13]

Ren Dong Teng (Caulis Lonicerae)

忍冬藤　忍冬藤

Pinyin Name: *Ren Dong Teng*
Literal Name: "tolerate winter vine," "winter-tolerating vine"
Alternate Chinese Names: *Yin Hua Teng*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: lonicera vine, honeysuckle stem
Botanical Name: *Lonicera japonica* Thunb. (*Ren Dong*); *Lonicera hypoglauca* Miq. (*Hong Xian Ren Dong*); *Lonicera confusa* DC. (*Shan Yin Hua*); or *Lonicera dasystyla* Rehd. (*Mao Hua Zhu Ren Dong*)
Pharmaceutical Name: Caulis Lonicerae
Properties: sweet, cold
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Releases the Exterior

Ren Dong Teng (Caulis Lonicerae) has mild ability to clear heat and release the exterior.

2. Clears Heat and Eliminates Toxins

Ren Dong Teng has milder action to clear heat and eliminate toxins.

Ren Dong Teng (Caulis Lonicerae)

3. Dispels Wind and Dampness from the Exterior

Ren Dong Teng dispels wind and dampness attacking the skin and muscles. Clinically, it treats itching caused by wind, or *bi zheng* (painful obstruction syndrome) from wind, dampness or heat.

- *Bi zheng* (painful obstruction syndrome) with swelling, redness and burning pain: use *Ren Dong Teng* with *Wei Ling Xian* (Radix Clematidis), *Qin Jiao* (Radix Gentianae Macrophyllae), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis) and *Tou Gu Cao* (Caulis Impatientis).

DOSAGE

10 to 30 grams in decoction.

CHEMICAL COMPOSITION

Lonicein, luteolin-7-rhamnoglucoside, luteolin, loniceraflavone, loganin, tannins, chlorogenic acid, isochlorogenic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Ren Dong Teng* has demonstrated an inhibitory influence against *Staphylococcus aureus, Bacillus subtilis, Candida albicans, Salmonella typhi, Bacillus proteus, Bacillus dysenteriae,* and *H. suis.*[2]
- **Cardiovascular:** Luteolin increases systolic blood pressure, decreases diastolic pressure, and increases blood flow to the coronary artery in dogs.[3]
- **Antispasmodic:** Luteolin relieves spasms and cramps of the intestines and the respiratory tract.[4]

AUTHORS' COMMENTS

Both *Ren Dong Teng* (Caulis Lonicerae) and *Jin Yin Hua* (Flos Lonicerae) clear heat and release the exterior. *Ren Dong Teng* is milder in these actions.

Lian Qiao (Fructus Forsythiae)

連翹 连翘

Pinyin Name: *Lian Qiao*
Alternate Chinese Names: *Lian Ke, Huang Hua Ban*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: forsythia, weeping forsythia capsule
Botanical Name: *Forsythia suspensa* (Thunb.) Vahl.
Pharmaceutical Name: Fructus Forsythiae
Properties: bitter, cool
Channels Entered: Lung, Heart, Gallbladder

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat

Exterior wind-heat or early febrile disorders: Bitter and cold, *Lian Qiao* (Fructus Forsythiae) has ascending, floating and dispersing functions to clear heat and eliminate toxins. It is commonly used to treat exterior wind-heat or early-stage febrile disorders.

- Exterior wind-heat with sore throat: combine *Lian Qiao*

Lian Qiao (Fructus Forsythiae)

with *Jin Yin Hua* (Flos Lonicerae). **Exemplar Formula:** *Yin Qiao San* (Honeysuckle and Forsythia Powder).

- Early-stage febrile disorder with cough: add *Ju Hua* (Flos Chrysanthemi) and *Bo He* (Herba Menthae). **Exemplar Formula:** *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction).

Interior heat affecting the Heart and Pericardium: *Lian Qiao* also treats heat attacking the Heart and Pericardium that is causing high fever, irritability, and delirium. In severe cases, rising Heart fire manifests in red, swollen eyes, sore throat, and ulcers on the tongue.

- Heat attacking the Heart and Pericardium: use *Lian Qiao* with *Lian Zi Xin* (Plumula Nelumbinis).
- Rising Heart fire: combine it with *Sheng Di Huang* (Radix Rehmanniae), *Shi Gao* (Gypsum Fibrosum) and *Xuan Shen* (Radix Scrophulariae).

Heat in the *ying* (nutritive) level: Heat forces blood out of the vessels, leading to subcutaneous bleeding, macula and purpura.

- Macula caused by heat in the *ying* (nutritive) level: use *Lian Qiao* with *Chi Shao* (Radix Paeoniae Rubrae), *Zi Cao Gen* (Radix Lithospermi) and *Da Zao* (Fructus Jujubae).

2. Clears Heat and Eliminates Toxins

Abscess: *Lian Qiao* is one of the most effective and commonly-used herbs for clearing heat and eliminating toxins from both the interior and the exterior. Heat and toxins in the interior are characterized by sore throat, swelling, and intestinal and lung abscesses in various stages of development. Heat and toxins in the exterior are characterized by sores, lesions, ulcerations, lumps, nodules and furuncles.

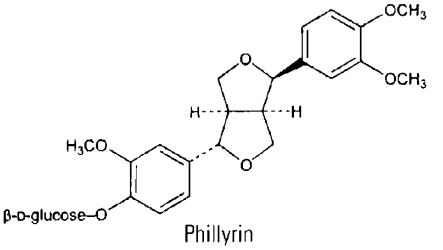
- Intestinal or lung abscesses: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Ye Ju Hua* (Flos Chrysanthemi Indici) and *Pu Gong Ying* (Herba Taraxaci).
- Throat soreness and pain: combine it with *Shan Dou Gen* (Radix Sophorae Tonkinensis), *Jie Geng* (Radix Platycodonis) and *Gan Cao* (Radix Glycyrrhizae).
- Lumps and nodules: add *Xia Ku Cao* (Spica Prunellae). **Exemplar Formula:** *Xiao Luo Wan* (Reduce Scrofula Pill).

3. Promotes Urination

***Lin zheng* (dysuria syndrome):** *Lian Qiao* treats *lin zheng*, in which heat has invaded the Urinary Bladder and is causing burning dysuria or hematuria.

- Dysuria: use it with *Dan Zhu Ye* (Herba Lophatheri), *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Che Qian Zi* (Semen Plantaginis).

DOSAGE



6 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Lian Qiao* with caution for patients experiencing diarrhea, or sores that are neither red nor painful.

CHEMICAL COMPOSITION

Lignoids: (phillyrin, phillygenin, (+)-pinorseinol, (+)-pinoresinol-β-D-glucoside), oleanolic acid, betulic acid, ursolic acid, rutin, forsythoside A, C, D; essential oils (α-pinene, β-pinene; terpinen-40ol; β-cymene).[1]

Phillyrin

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** The essential oil of *Lian Qiao* has demonstrated a broad spectrum of inhibitory effects against *Staphylococcus aureus, Diplococcus pneumoniae, Bacillus dysenteriae,* α-hemolytic streptococcus, β-hemolytic streptococcus, *Neisseria catarrhalis, Salmonella typhi, E. coli, Mycobacterium tuberculosis, Bacillus proteus, Bordetella pertussis, Corynebacterium diphtheriae,* leptospira, and some dermatophytes and influenza viruses.[2]
- **Anti-inflammatory:** In guinea pigs, injection of *Lian Qiao* decreases the permeability of the blood vessels to reduce inflammation.[3]
- **Cardiovascular:** *Lian Qiao* has a mixed effect on blood pressure. In anesthetized cats in shock, intravenous injection of *Lian Qiao* (dosage equivalent to 8 g/kg of dried herb) is associated with increases of blood pressure and cardiac contraction. In another study with healthy subjects, injection of a water extract of *Lian Qiao* is associated with reduction in blood pressure.[4,5]
- **Others:** *Lian Qiao* also has hepatoprotective, antipyretic, antiemetic and diuretic effects.[6]

CLINICAL STUDIES AND RESEARCH

- **Nephropathy:** In one study, 8 patients with acute nephritis and 1 patient with tuberculosis of the kidney were treated with Chinese herbal formulas with good results. The treatment protocol was to cook 30 grams of *Lian Qiao* in water to yield 150 ml of final decoction, taken in equally-divided doses, three times daily, before meals. The dosage for children was adjusted accordingly. The duration of treatment was between 5 and 10 days. Patients were advised to avoid spicy and salty foods.[7]
- **Purpura:** According to one report, 1 patient with thrombocytopenic purpura and 2 patients with allergic purpura

Lian Qiao (Fructus Forsythiae)

were treated with Chinese herbs with satisfactory results. The treatment protocol was to cook 30 grams of *Lian Qiao* in water to yield 150 ml of final decoction, taken in equally-divided doses, three times daily, before meals.[8]

TOXICOLOGY

The LD_{50} of *Lian Qiao* in mice is 172.21 g/kg via oral ingestion, and 20.96 g/kg via intraperitoneal injection.[9]

Guan Ye Lian Qiao (Herba Hypericum)

貫葉連翹 贯叶连翘

Pinyin Name: *Guan Ye Lian Qiao*
Alternate Chinese Names: *Tu Lian Qiao, Guan Ye Jin Si Tao, Jin Si Tao*
Original Source: *Ben Cao Gang Mu Shi Yi* (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765
English Name: St. John's Wort
Botanical Name: *Hypericum perforatum* L. (*Guan Ye Lian Qiao*)
Pharmaceutical Name: Herba Hypericum
Properties: bitter, acrid, astringent, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins

Toxic heat: *Guan Ye Lian Qiao* (Herba Hypericum) reduces swelling and inflammation to treat carbuncles, sores, snake and insect bites, and other disorders characterized by toxic heat.

- *Chang feng* (intestinal wind) with blood in the stools: combine *Guan Ye Lian Qiao* with dry-fried *Huai Hua* (Flos Sophorae) and *Zong Lu Pi* (Fibra Stipulae Trachycarpi).
- Urinary tract infection: use *Guan Ye Lian Qiao* as a single-herb remedy.
- Redness and swelling of the eyes: drink *Guan Ye Lian Qiao* as tea throughout the day.
- Snake and insect bites: ground the herb into paste and apply it topically.
- Tonsillitis: use the decoction as a gargle.

2. Stops Bleeding

Bleeding: *Guan Ye Lian Qiao* has an astringent effect to treat hemoptysis, hematemesis, and bleeding due to trauma.

- Hematemesis: add it to *Xian He Cao* (Herba Agrimoniae).
- Profuse uterine bleeding: use this herb with *Xian He Cao* (Herba Agrimoniae), *Han Lian Cao* (Herba Ecliptae), and charred *Pu Gong Ying* (Herba Taraxaci).

3. Dispels Wind-Damp

***Bi zheng* (painful obstruction syndrome)**: *Guan Ye Lian Qiao* dispels wind-damp from the exterior to relieve muscle aches and pain.

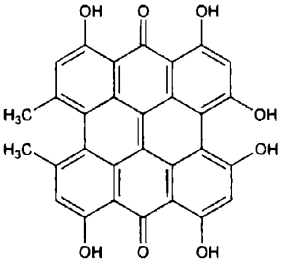
- *Bi zheng*: use it with *Xun Gu Feng* (Herba Aristolochiae Mollissimae), *Shen Jin Cao* (Herba Lycopodii), *Mu Gua* (Fructus Chaenomelis), and *Ji Xue Teng* (Caulis Spatholobi).

4. Relieves Depression

Depression: *Guan Ye Lian Qiao* regulates Liver qi to treat depression. It may be used individually, or combined with *Yue Ju Wan* (Escape Restraint Pill).

Guan Ye Lian Qiao (Herba Hypericum)

DOSAGE



6 to 9 grams in decoction. *Guan Ye Lian Qiao* is used both internally and topically.

CAUTIONS / CONTRAINDICATIONS

- Use of *Guan Ye Lian Qiao* may be associated with increased photosensitivity.

CHEMICAL COMPOSITION

Hypericin, hyperforin, hyperin, pseudohypericin, protohypericin, cyclopseudohypericin, desmethylcyclopseudohypericin, emodinanthranol.[1,2]

Hypericin

PHARMACOLOGICAL EFFECTS

- **Antitussive:** Intraperitoneal injection of hyperin in cats at 100 mg/kg had an antitussive effect.[3]
- **Analgesic:** Administration of hyperin is associated with an analgesic effect in mice.[4]
- **Antibiotic:** This herb has antibacterial action against *Staphylococcus aureus*, *Streptococcus pyogenes*, and *Streptococcus agalactiae*. In addition, hyperforin has an inhibitory effect against penicillin-resistant *Staphylococcus aureus* (PRSA) and methicillin-resistant *Staphylococcus aureus* (MRSA). Furthermore, hyperforin has antiviral action against herpes simplex virus, parainfluenza virus, vesicular stomatitis virus, and human cytomegalovirus.[5]
- **Antidepressant:** *Guan Ye Lian Qiao* extract has been shown to relieve depression by inhibiting the reuptake of serotonin and other neurotransmitters, such as norepinephrine and dopamine. Hyperforin is believed to be the main constituent responsible for the antidepressant activity.[6]

CLINICAL STUDIES AND RESEARCH

- **Depression:** *Guan Ye Lian Qiao* and fluoxetine demonstrated equivalent therapeutic effect for treatment of depression, according to a randomized, double-blind, comparative trial involving 149 outpatients with mild or moderate depression. The duration of treatment was 6 weeks. Patients in the herb group received 800 mg of *Guan Ye Lian Qiao* extract per day (5-7:1 extract, ethanol 60% solvent). Patients in the drug group received 20mg of fluoxetine.[7]

HERB-DRUG INTERACTION

- **SSRI's:** Since St. John's Wort and SSRI both inhibit the reuptake of serotonin, concurrent use of both the herb and the drug may lead to "serotonin syndrome" with symptoms such as sweating, tremor, flushing, confusion and agitation.[8] [Note: Examples of SSRI's include fluoxetine (Prozac), paroxetine (Paxil), sertraline (Zoloft), citalopram (Celexa), and fluvoxamine (Luvox).]
- **Antivirals:** It has been found that concurrent use of St. John's Wort and indinavir contributed to a 57% reduction in the area under the curve and an 81% decrease of the extrapolated 8-hour trough value for indinavir. The dose of St. John's Wort was 300 mg (standardized to 0.3% hypericin) three times daily, and the dose of indinavir was 800 mg every 8 hours.[9]
- **Digoxin (Lanoxin):** St. John's Wort taken concomitantly with digoxin resulted in a significant decrease in digoxin C_{max}, C_{trough}, and AUC (area under the curve).[10]
- **Metabolic effect:** St. John's Wort may lower the plasma levels of many drugs, such as cyclosporine (Sandimmune/Neoral), ethinyloestradiol and desogestrel (combined oral contraceptive), theophylline (Theo-Dur), digoxin (Lanoxin), and indinavir (Crixivan). The proposed mechanism of this interaction is the induction of the cytochrome P-450 system of the liver by St. John's Wort, leading to increased metabolism and reduced plasma concentration of the drugs.[11]

TOXICOLOGY

The LD^{50} of hyperin in mice via intraperitoneal injection is 0.5 g/kg.[12]

AUTHORS' COMMENTS

Guan Ye Lian Qiao (Herba Hypericum) is commonly known as St. John's Wort. Historically in China, this herb was used as a heat-clearing agent, to treat various types of infectious and inflammatory conditions. In Europe, it was used more as a nerve tonic, to address anxiety, depression, and restlessness.

Pu Gong Ying (Herba Taraxaci)

蒲公英 蒲公英

Pinyin Name: *Pu Gong Ying*
Alternate Chinese Names: *Huang Hua Di Ding, Pu Gong Ding, Puo Puo Ding*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: dandelion, Asian dandelion
Botanical Name: *Taraxacum mongolicum* Hand. –Mazz. (*Pu Gong Ying*)
Pharmaceutical Name: Herba Taraxaci
Properties: bitter, sweet, cold
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Toxic heat accumulation: *Pu Gong Ying* (Herba Taraxaci) is commonly used to clear heat and toxins from both the exterior and the interior. External heat and toxins are characterized by sores, lesions, and ulcerations. Internal heat and toxins are characterized by abscesses, nodules, intestinal abscesses, breast lumps, parotitis and tonsillitis. Entering the Liver channel, *Pu Gong Ying* is excellent in treating the beginning stages of breast abscess or lumps involving redness and pain.

- Sores, lesions and ulceration of the skin: use *Pu Gong Ying* with *Zi Hua Di Ding* (Herba Violae), *Jin Yin Hua* (Flos Lonicerae) and *Ye Ju Hua* (Flos Chrysanthemi Indici). **Exemplar Formula:** *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins).
- Breast lumps and abscesses: combine this herb with *Gua Lou Shi* (Fructus Trichosanthis), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Lu Feng Fang* (Nidus Vespae).
- Intestinal abscesses: combine it with *Da Huang* (Radix et Rhizoma Rhei), *Bai Jiang Cao* (Herba cum Radice Patriniae) and *Mu Dan Pi* (Cortex Moutan).
- Lung abscesses: use it with *Yu Xing Cao* (Herba Houttuyniae) and *Jie Geng* (Radix Platycodonis).
- Nodules on the neck, goiter: add *Xia Ku Cao* (Spica Prunellae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).
- Soreness and swelling of the throat: use *Pu Gong Ying* with *Xuan Shen* (Radix Scrophulariae) and *Ban Lan Gen* (Radix Isatidis).
- Eye redness, swelling and pain due to Liver heat: combine this herb with *Ju Hua* (Flos Chrysanthemi), *Xia Ku Cao* (Spica Prunellae) and *Huang Qin* (Radix Scutellariae).

2. Eliminates Damp-Heat

- Damp-heat jaundice: use *Pu Gong Ying* with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae) and *Da Huang* (Radix et Rhizoma Rhei). **Exemplar Formula:** *Yin Chen Hao Tang* (Artemisia Scoparia Decoction).

Pu Gong Ying (Herba Taraxaci)

3. Promotes Urination

***Re lin* (heat dysuria):** Heat invading the Urinary Bladder manifests in burning pain on urination. In this case, the urine is usually scanty and yellow.

- *Re lin* (heat dysuria): use *Pu Gong Ying* with *Jin Qian Cao* (Herba Lysimachiae) and *Bai Mao Gen* (Rhizoma Imperatae).

DOSAGE

10 to 30 grams in decoction. A large dose of fresh *Pu Gong Ying* is usually crushed into paste for topical application.

CAUTIONS / CONTRAINDICATIONS

- Large dosages are sometimes associated with diarrhea.
- Use of *Pu Gong Ying* is contraindicated for yin sores or carbuncles where there is no redness and pain.

CHEMICAL COMPOSITION

Taraxacerin, taraxasterol, taraxicin, xanthoph.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Pu Gong Ying* has bactericidal effects *in vitro* against *Staphylococcus aureus*, β-hemolytic streptococcus, *Diplococcus pneumoniae, Diplococcus meningitidis, Corynebacterium diphtheriae, Pseudomonas aeruginosa, Bacillus dysenteriae* and *Salmonella typhi*.[2]
- **Others:** *Pu Gong Ying* was noted to have immune-enhancing, hepatoprotective, diuretic and cholagogic effects.[3]

CLINICAL STUDIES AND RESEARCH

- **Acute tonsillitis:** In one report, 120 to 180 grams of *Pu Gong Ying* in decoction was successful in treating acute tonsillitis in 82 of 88 patients.[4]
- **Sore throat:** An herbal formula containing *Pu Gong Ying* and *Ban Lan Gen* (Radix Isatidis) was 98% effective in treating 45 patients with acute sore throat. The formula was cooked as decoction, with the steam channeled to the mouth for topical treatment of sore throat.[5]
- **Jaundice:** Oral and intramuscular injections of *Pu Gong Ying* were effective in lowering liver enzymes in 77 patients with icteric jaundice.[6]
- **Blurred vision:** *Pu Gong Ying* administered as oral decoction and ophthalmic solution three times daily was effective for treating patients with blurred vision. Out of 32 affected eyes, 8 showed significant improvement, 18 showed moderate improvement, and 6 showed no response.[7]
- **Burns:** An herbal paste made by mixing *Pu Gong Ying* with 75% rubbing alcohol was effective in treating 51 patients with infected burns.[8]
- **Parotitis:** Topical application of *Pu Gong Ying* every other day was found to be extremely effective in treating 40 patients with parotitis. The herbal paste was prepared by grinding 30 grams of the fresh herb (or 20 grams of dried herb) with one egg white. The resultant paste was applied to the affected area and covered with gauze.[9]

HERB-DRUG INTERACTION

- **Quinolone antibiotics:** It has been proposed that concurrent use of *Pu Gong Ying* and quinolone antibiotics may influence the bioavailability and disposition of the quinolone antibiotics. In one study, rats were divided into two groups with one receiving a single dose of ciprofloxacin and the other receiving both *Pu Gong Ying* and ciprofloxacin. Ciprofloxacin in plasma and urine was collected over 6 and 24 hours and evaluated by high performance liquid chromatography (HPLC). The results indicated that while the concurrent use of ciprofloxacin and *Pu Gong Ying* did not significantly alter the bioavailability of ciprofloxacin, it did lower the maximum plasma concentration (Cmax) by 73%, increase apparent volume of distribution by threefold, and increase terminal half-life from 1.96 to 5.71 hours. The decrease of maximum plasma concentration of ciprofloxacin has been attributed to the high mineral content of *Pu Gong Ying*.[10]

TOXICOLOGY

The LD_{50} for intravenous injection of *Pu Gong Ying* is 58.8 g/kg in mice.[11]

Zi Hua Di Ding (Herba Violae)

紫花地丁
紫花地丁

Pinyin Name: *Zi Hua Di Ding*
Literal Name: "purple flower earth herb," "purple flower earth spike"
Alternate Chinese Names: *Di Ding Cao, Di Ding*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: viola, tokyo violet herb
Botanical Name: *Viola yedoensis* Makino. (*Zi Hua Di Ding*)
Pharmaceutical Name: Herba Violae
Properties: bitter, acrid, cold
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

Clears Heat and Eliminates Toxins

Toxic heat: Bitter and cold, *Zi Hua Di Ding* (Herba Violae) has excellent properties to clear heat, eliminate toxins, reduce abscesses and cool blood. It can be used either internally or topically to reduce inflammation. It is also good for high fever and irritability accompanying bacterial infection.

- Furuncles, lesions, intestinal abscesses and erysipelas: combine *Zi Hua Di Ding* with *Pu Gong Ying* (Herba Taraxaci), *Jin Yin Hua* (Flos Lonicerae) and *Ye Ju Hua* (Flos Chrysanthemi Indici), internally or topically. **Exemplar Formula:** *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins).
- Furuncles, lesions, intestinal abscesses and erysipelas with deficiencies of qi and blood: use this herb with *Pu Gong Ying* (Herba Taraxaci), *Jin Yin Hua* (Flos Lonicerae), *Ye Ju Hua* (Flos Chrysanthemi Indici), *Huang Qi* (Radix Astragali) and *Dang Gui* (Radicis Angelicae Sinensis).
- Snake or insect bites: *Zi Hua Di Ding* treats snake or insect bites by reducing swelling and toxicity. Apply fresh juice of *Zi Hua Di Ding* topically to the affected area.
- Redness, swelling and eye pain caused by Liver heat: add *Ju Hua* (Flos Chrysanthemi) and *Xia Ku Cao* (Spica Prunellae).

DOSAGE

10 to 20 grams in decoction. Fresh *Zi Hua Di Ding* is usually crushed into paste for topical application.

CAUTIONS / CONTRAINDICATIONS

- Use *Zi Hua Di Ding* with caution on yin sores, furuncles, abscesses and lesions where there is no redness or pain.

CHEMICAL COMPOSITION

Palmitic acid, p-hydroxybenzoic acid, trans-p-hydroxycinnamic acid, butanedioic acid, tetracosanoyl-p-hydroxyl phenthylamine, kaempferol-3-o-rhamnopyranoside.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *Zi Hua Di Ding* has an inhibitory effect against *Pseudomonas aeruginosa, E. coli, Bacillus dysenteriae, Salmonella typhi, Staphylococcus aureus, Corynebacterium diphtheriae, Streptococcus* spp., *Diplococcus pneumoniae, Staphylococcus albus, Candida albicans, Bacillus proteus, Bacillus dysenteriae,* and leptospira.[2,3]
- **Others:** *Zi Hua Di Ding* has antipyretic and anti-inflammatory effects.[4]

Ye Ju Hua (Flos Chrysanthemi Indici)

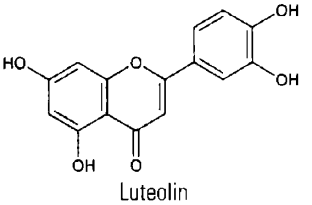
野菊花 野菊花

Pinyin Name: *Ye Ju Hua*
Literal Name: "wild chrysanthemum flower"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: wild chrysanthemum flower, flower of indian dendranthema
Botanical Name: *Chrysanthemum indicum* L.
Pharmaceutical Name: Flos Chrysanthemi Indici
Properties: bitter, acrid, cool
Channels Entered: Lung, Liver

CHINESE THERAPEUTIC ACTIONS

Clears Heat and Eliminates Toxins

Ye Ju Hua (Flos Chrysanthemi Indici) clears heat, eliminates toxins, and is commonly used to treat furuncles, carbuncles, sores, sore throat and red eyes.



- Carbuncles and furuncles: use *Ye Ju Hua* with *Pu Gong Ying* (Herba Taraxaci), *Zi Hua Di Ding* (Herba Violae) and *Jin Yin Hua* (Flos Lonicerae) internally or topically.
- Eye redness, swelling and pain: combine this herb with *Xia Ku Cao* (Spica Prunellae) and *Sang Ye* (Folium Mori) for use internally as an herbal decoction, or topically as an eyewash.
- Itching: use *Ye Ju Hua* alone internally as an herbal decoction or topically as an herbal wash.

DOSAGE

10 to 15 grams. *Ye Ju Hua* may be used both internally and externally.

CHEMICAL COMPOSITION

Essential oils 0.60-1.29% (camphor, α-pinene, carvone, eucalyptol, borneol), flavonoids (acaciin, linarin), chrysanthemin 0.42-0.45%, luteolin, acacetin.[1,2]

Luteolin

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** *Ye Ju Hua* has a marked influence on the cardiovascular system. In anesthetized cats, intravenous injection of alcohol extract of *Ye Ju Hua* increased blood perfusion to the coronary artery by up to 95% and lasted for approximately 40 minutes. In addition, it lowered the heart rate (by about 12%), decreased oxygen consumption by the cardiac muscle, and increased blood perfusion to other parts of the body, including the ears and kidneys. It has shown positive effectiveness in treatment of cardiac ischemia or angina in dogs.[3,4]
- **Antiplatelet:** Administration of *Ye Ju Hua* is associated with inhibition of platelet aggregation. The inhibition was concluded by the study to be 2.3 times stronger than the inhibition exerted by *Dan Shen* (Radix Salviae Miltiorrhizae).[5]
- **Antihypertensive:** Both water and alcohol extracts of *Ye Ju Hua* have demonstrated marked effectiveness to lower blood pressure. This was achieved with oral or intraperitoneal injections, in awake or anesthetized animals, such as rats, cats, and dogs. The duration of action was approximately 2 hours. There was no inhibition of the respiratory system. The proposed mechanisms of the antihypertensive effect include inhibition of adrenalin or dilation of the blood vessels.[6,7]
- **Antibiotic:** *Ye Ju Hua* has both antibacterial and antiviral functions against micro-organisms such as *Bacillus dysenteriae*, leptospira, influenza virus, herpes virus, and dermatophytes. The water decoction was found to have stronger antibiotic effect than alcohol decoction of the herb.[8,9,10,11]

CLINICAL STUDIES AND RESEARCH

- **Common colds and influenza:** In one report, 501 patients with common colds or influenza were treated by oral administration of *Ye Ju Hua* with good results. The treatment was more effective for those with chief complaints of fever, aversion to cold and headache, and less effective for those with cough. In addition, those with

Ye Ju Hua (Flos Chrysanthemi Indici)

common colds or influenza characterized by wind-heat responded better than those with wind-cold.[12]

- **Prostatitis or pelvic inflammation:** In one clinical study, administration of *Ye Ju Hua* as suppository was 93% effective in treating 175 patients with prostatitis and 84% effective in treating 131 patients with pelvic inflammatory disease.[13]
- **Others**: According to one report, 454 patients with chronic pelvic inflammation, cervical erosion, chronic enteritis, or acute bacterial dysentery were treated with 4 grams of *Ye Ju Hua* via various routes of administration with an overall effectiveness of 88.5%. Routes of administration included intramuscular injection, rectal suppository at bedtime, or oral solution.[14]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Ye Ju Hua* has antiplatelet influence, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[15] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

AUTHORS' COMMENTS

Please refer to *Ju Hua* (Flos Chrysanthemi) for comparison and contrast of different types of chrysanthemum flowers.

Lou Lu (Radix Rhapontici)

漏蘆 漏芦

Pinyin Name: *Lou Lu*
Literal Name: "leaking reed"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: rhaponticum, broadleaf globe thistle root
Botanical Name: *Rhaponticum uniflorum* (L.) DC. (*Chi Zhou Lou Lu*); *Echinops latifolius* Tausch (*Yu Zhou Lou Lu*)
Pharmaceutical Name: Radix Rhapontici
Properties: bitter, cold
Channels Entered: Stomach

Lou Lu (Radix Rhapontici)

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Eliminates Toxins, Drains Abscesses, Promotes Lactation

Breast abscesses: *Lou Lu* (Radix Rhapontici) enters the *yangming* Stomach channel to treat breast abscesses formed by the accumulation of toxicity and heat.

- Swelling, pain and abscess of the breast: use *Lou Lu* with *Pu Gong Ying* (Herba Taraxaci), *Lian Qiao* (Fructus Forsythiae) and *Da Huang* (Radix et Rhizoma Rhei).
- Breast abscess with pus, that has ruptured: combine this herb with *Tian Hua Fen* (Radix Trichosanthis) and *Dang Gui* (Radicis Angelicae Sinensis).
- Breast abscess without pus, that has not ruptured: use *Lou Lu* with *Gua Lou Shi* (Fructus Trichosanthis), *Bai Zhi* (Radix Angelicae Dahuricae), *Pu Gong Ying* (Herba Taraxaci), and *Zao Jiao Ci* (Spina Gleditsiae).

Obstruction of lactation: *Lou Lu* promotes lactation in women who experience heat and toxicity blocking the channels. The affected breast is usually red and swollen. *Lou Lu* clears heat, eliminates toxins, disperses stagnation and reduces abscesses and swelling. This herb, however, should not be used for women whose lactation difficulties are caused by deficiency and cold.

- Insufficient milk production, or obstruction of milk flow, due to heat: use *Lou Lu* with *Wang Bu Liu Xing* (Semen Vaccariae) and *Chuan Shan Jia* (Squama Manis).

Dermatological disorders: *Lou Lu* treats sores, carbuncles, erysipelas, sore throat, and red, swollen and painful lesions caused by toxic heat.

- Dermatological disorders: use *Lou Lu* alone, or with appropriate heat-clearing and toxin-eliminating herbs.
- Sore throat: combine it with *Xuan Shen* (Radix Scrophulariae) and *Ban Lan Gen* (Radix Isatidis).

DOSAGE

5 to 12 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use of *Lou Lu* is not recommended in patients with insufficient milk, or lack of milk secretion because of qi and blood deficiencies.

CHEMICAL COMPOSITION

Echinopsine, hentriacontane, cardopatine, taxarerol acetate, essential oil.[1]

PHARMACOLOGICAL EFFECTS

- **Antioxidant:** *Lou Lu* has a strong antioxidant effect to maintain and protect the integrity of the cells. Antioxidant effect was observed in both water and alcohol extracts of the herb.[2]
- **Effect on the central nervous system:** In laboratory studies in mice, alcohol extract of *Lou Lu* inhibited the MAO-B activities in the brain.[3]

AUTHORS' COMMENTS

There are up to ten different herbs with the name "*Lou Lu*" given as an alternate name. For example, *Bai Tou Weng* (Radix Pulsatillae) is incorrectly used as *Lou Lu* (Radix Rhapontici) in certain regions in China. Therefore, when *Lou Lu* is prescribed, the desired substance should be properly specified.

Niu Huang (Calculus Bovis)

牛黄

Pinyin Name: *Niu Huang*
Literal Name: "cattle yellow"
Alternate Chinese Names: *Dan Huang, Ren Gong Niu Huang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cattle gallstone, bezoar
Zoological Name: *Bos taurus* domesticus Gmelin (*Niu Huang*)
Pharmaceutical Name: Calculus Bovis
Properties: bitter, cool
Channels Entered: Liver, Heart

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Accumulation of heat toxins: *Niu Huang* (Calculus Bovis) treats accumulation of heat and toxins, a condition that refers to severe infection or inflammation.

- Sore, swollen throat, and ulcers on the throat or tongue: use *Niu Huang* with *Bing Pian* (Borneolum Syntheticum) and *Zhen Zhu* (Margarita) as powder. Apply topically.
- Boils, carbuncles, fibrocystic breast disorders and a wide variety of hot, painful swellings: combine it with *She Xiang* (Moschus), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

2. Transforms Phlegm and Opens Orifices

Febrile disease with fire and phlegm in the Pericardium: Manic patients with this condition usually experience extreme psychological stimulation or anger. In this case, fire has turned the body fluids into phlegm; as phlegm is combined with fire it blocks the sensory orifices, causing *shen* (spirit) to be unable to reside peacefully in the Heart. Clinical manifestations include unconsciousness, delirious speech and high fever.

- Unconsciousness, delirious speech, high fever and convulsions: use *Niu Huang* with *She Xiang* (Moschus) and *Bing Pian* (Borneolum Syntheticum).

3. Arrests Tremors and Extinguishes Wind

Liver wind rising: Symptoms include convulsions, stroke, tremors, spasms, high fever, epilepsy, lockjaw, or fainting due to emotional distress.

- Liver wind rising: use *Niu Huang* with *She Xiang* (Moschus), *Gou Teng* (Ramulus Uncariae cum Uncis), *Quan Xie* (Scorpio) or *Tian Zhu Huang* (Concretio Silicea Bambusae).

DOSAGE

0.2 to 0.5 grams. *Niu Huang* is used mainly as pills or powder, as this substance is very expensive, and sometimes difficult to obtain.

CAUTIONS / CONTRAINDICATIONS

- *Niu Huang* should be used with caution during pregnancy, and in patients not presenting with excess heat.
- Though *Niu Huang* has very low toxicity, side effects and allergic reactions have been reported. Adverse reactions include eczema, mental disturbances, upper gastrointestinal bleeding, hematochezia, hematemesis, diarrhea, and wheezing.[1]
- Use of *Niu Huang* may be associated with possible drowsiness and sedation. Therefore, individuals who take this substance should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Bile acid, bilirubin, cholesterol, amino acid.

PHARMACOLOGICAL EFFECTS

- **Effects on the central nervous system:** Administration of *Niu Huang* is associated with sedative, anticonvulsive and antipyretic effects. In one study, both *Niu Huang* and *Ren Gong Niu Huang* (Calculus Bovis Syntheticum) decreased spontaneous movement in mice. *Niu Huang* is also reported to counter the stimulation induced by caffeine and enhance the sedation caused by morphine and barbiturates. Though the exact mechanism of action is unclear, *Niu Huang* does have anticonvulsant effects, especially against convulsions induced by camphor or caffeine. Lastly, both *Niu Huang* and *Ren Gong Niu Huang* showed marked effectiveness against artificially-induced fever in rats and rabbits.[3,4,5,6]
- **Cardiovascular:** Administration of *Niu Huang* is associated with an inhibitory influence on the cardiovascular system characterized by a decrease of blood pressure and heart rate. Oral administration of 0.1 g/kg of *Niu Huang* significantly lowered blood pressure in mice with essential or renal hypertension. The hypotensive effect was reversed by atropine.[7,8]
- **Smooth muscle relaxant:** *Niu Huang* and *Ren Gong Niu*

Niu Huang (Calculus Bovis)

Huang (Calculus Bovis Syntheticum) have little effect on the normal contraction of the intestines. They do, however, relieve intestinal spasms and cramps by inhibiting the stimulation of smooth muscle by substances including (but not limited to) acetylcholine and barium chloride.[9]

- **Cholagogic:** According to studies in rabbits, administration of *Niu Huang* has a mild stimulating effect on the production and secretion of bile. The mild action is attributed to the mixed function of *Niu Huang* to simultaneously relax and contract the muscles and sphincter of the bile duct.[10]
- **Hematological:** Administration of *Niu Huang* is associated with an increase in red blood cell count in rabbits, with or without removal of the spleen. In another study, *Niu Huang* demonstrated a positive dose-effect relationship in treatment of anemia in rabbits.[11,12]
- **Anti-inflammatory:** Administration of *Niu Huang* via intraperitoneal injection once daily for 3 days was beneficial in treating ear inflammation in mice.[13]
- **Antibiotic:** *Niu Huang* inhibits *Mycobacterium tuberculosis* and *Staphylococcus aureus*.[14]

CLINICAL STUDIES AND RESEARCH

- **Infection:** In one clinical study, 476 patients with infections, such as upper respiratory infection, influenza, bronchitis, and pneumonia, were treated with a 75.2% success rate, using a preparation containing *Ren Gong Niu Huang* (Calculus Bovis Syntheticum).[15]

HERB-DRUG INTERACTION

- **Sedatives:** *Niu Huang* has a mild sedative effect. It reduces the stimulation induced by caffeine, and enhances the sedation caused by morphine and barbiturates.[16] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and others.]

TOXICOLOGY

No fatalities were reported in mice following a bolus intraperitoneal injection of *Niu Huang* at 2 g/kg. No abnormalities were reported following intraperitoneal injection of *Niu Huang* at 0.6 g/kg daily for 6 days in mice. Nor were any abnormalities reported in rats following intraperitoneal injection of *Niu Huang* at 0.1 g/kg daily for 15 weeks.[17]

SUPPLEMENT

- 人工牛黄 *Ren Gong Niu Huang* (Calculus Bovis Syntheticum) is often used as a substitute for *Niu Huang* due to lack of supply of the natural substance. *Ren Gong Niu Huang* is produced by artificially inducing the production of stones in cattle or pigs. Clinical researches show that the pharmacological and therapeutic effects appear to be comparable to those of the original substance.

Zao Xiu (Rhizoma Paridis)

蚤休

Pinyin Name: *Zao Xiu*
Alternate Chinese Names: *Qi Ye Yi Zhi Hua, Chong Lou, Cao He Che*
English Name: paris rhizome
Botanical Name: *Paris polyphylla* Smith var. *yunnanensis* (Franch.) Hand. – Mazz.; *Paris polyphylla* Smith var. *chinensis* (Franch.) Hara.
Pharmaceutical Name: Rhizoma Paridis
Properties: bitter, cool
Channels Entered: Liver
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Toxic heat: Clinical manifestations include swollen and painful sores, scrofula, abscesses and carbuncles. *Zao Xiu* (Rhizoma Paridis) is extremely effective in eliminating various toxins. It is also effective in treating tonsillitis.

- Sores, abscesses and carbuncles: use *Zao Xiu* with *Jin Yin Hua* (Flos Lonicerae), *Ye Ju Hua* (Flos Chrysanthemi Indici) and *Huang Lian* (Rhizoma Coptidis).
- Scrofula: add *Xia Ku Cao* (Spica Prunellae).
- Tonsillitis: combine this herb with *Huang Qin* (Radix Scutellariae), *Chi Shao* (Radix Paeoniae Rubrae), *She Gan* (Rhizoma Belamcandae) and *Xuan Shen* (Radix Scrophulariae).

Snake bites: *Zao Xiu* is used topically to relieve the redness, swelling and pain associated with snake bites.

- Snake bites: mix *Zao Xiu* powder with vinegar and apply topically. It can also be taken orally with *Bai Hua She She Cao* (Herba Oldenlandia) in a decoction.

2. Reduces Swelling and Stops Pain

Traumatic injuries: Post-traumatic inflammation, swelling, redness, pain and bleeding are all treated by this herb.

- Traumatic injuries: use *Zao Xiu* alone topically. It can also be taken orally with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *Yan Hu Suo* (Rhizoma Corydalis).

3. Extinguishes Liver Wind

Liver wind: Clinical manifestations include convulsions, dizziness, epilepsy, spasms and cramps.

- Liver wind: use *Zao Xiu* with *Chan Tui* (Periostracum Cicadae) and *Gou Teng* (Ramulus Uncariae cum Uncis).

DOSAGE

5 to 10 grams in decoction. Reduce the dosage if *Zao Xiu* is prescribed as powder or pills.

CAUTIONS / CONTRAINDICATIONS

Zao Xiu should be used with caution during pregnancy, and in patients with underlying deficiencies.

Xiong Dan (Fel Ursi)

熊膽 熊胆

Pinyin Name: *Xiong Dan*
Literal Name: "bear gallbladder"
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: bear gallbladder
Zoological Name: *Ursus arctos* L. (*Zhong Xiong*); *Selenarctos thibetanus* G. Cuvier (*Hei Xiong*)
Pharmaceutical Name: Fel Ursi
Properties: bitter, cold
Channels Entered: Gallbladder, Heart, Liver
International Status: CITES I

Xiong Dan (Fel Ursi)

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

The bitter, cold nature of *Xiong Dan* (Fel Ursi) and its affinity for the Liver, Gallbladder and Heart channels made it one of the best substances historically for addressing excess pathogens attacking these regions. *Xiong Dan* would have been used either internally or topically to clear heat and eliminate toxins. Clinical applications include skin lesions, abscesses and ulcerations, sore throat, hemorrhoids, and jaundice.

- Sore throat due to toxic heat: *Xiong Dan* was combined with *Ban Lan Gen* (Radix Isatidis) and *Niu Bang Zi* (Fructus Arctii).
- Hemorrhoids due to accumulation of toxic heat and dampness: it was used with *Bing Pian* (Borneolum Syntheticum) topically to reduce swelling, pain and inflammation.
- Jaundice arising from damp-heat and toxins: it was combined with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae) and *Da Huang* (Radix et Rhizoma Rhei).
- Topical use: this substance was used with *Bing Pian* (Borneolum Syntheticum) for swelling, pain and inflammation.

2. Extinguishes Liver Wind, Relieves Spasms

Liver wind: Clinical manifestations of Liver wind include muscle spasms and cramps, high fever, delirium, epilepsy, and childhood convulsions.

- Liver wind: *Xiong Dan* was used with *Zhu Sha* (Cinnabaris), *Yu Jin* (Radix Curcumae), and *Ming Fan* (Alumen).
- Childhood convulsions: add *Zhu Li* (Succus Bambusae).

3. Clears Liver Heat and Brightens the Eyes

Eye disorders: When Liver fire is present, clinical manifestations are redness, swelling and pain in the eyes, photophobia, excessive tearing, and visual obstruction.

- Eye disorders: *Xiong Dan* was used alone internally or topically.

DOSAGE

1.5 to 2.5 grams in powdered or pill form. *Xiong Dan* was used internally as pills or powder, and externally as drops. It was not generally used in decoctions.

CHEMICAL COMPOSITION

Tauroursodeoxycholic acid, taurocheuodeoxycholic acid, taurocholic acid, ursodeoxycholic acid, chenodeoxycholic acid, cholic acid, deoxycholic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Cholagogic**: *Xiong Dan* stimulates the production and excretion of bile. It also dissolves gallstones.[2]
- **Others**: *Xiong Dan* has antibiotic, anti-inflammatory, antitussive, antiasthmatic, and antihypertensive effects.[3]

CLINICAL STUDIES AND RESEARCH

- **Renal hypertension:** Five patients with renal hypertension were treated with 0.5 grams of *Xiong Dan* powder, twice daily, with good results.[4]
- **Cholelithiasis:** In one study, 234 patients with cholesterol-predominant gallstones were treated with *Xiong Dan*. The dosages ranged from 0.75 to 1 gram, taken in 3 or 4 divided doses, for 3 to 18 months. At the conclusion of the study, 93 patients (39.7%) showed reduction or dissolution of gallstones.[5]

SUPPLEMENT

- 牛膽 / 牛胆 *Niu Dan* (Fel Bovis) - gallbladders from cattle, and 豬膽 / 猪胆 *Zhu Dan* (Fel Porcus) - gallbladders from pigs, have similar functions as *Xiong Dan* and are commonly used as its substitutes. *Niu Dan* and *Zhu Dan*, however, are weaker and require higher dosages to achieve the same therapeutic effect.

AUTHORS' COMMENTS

Xiong Dan (Fel Ursi) belongs in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Trade in *Xiong Dan* is strictly prohibited. The discussion of *Xiong Dan* in this text is included only to offer 1) the accurate history of its critically important usage in traditional herbal medicine, and 2) models for appropriate usage of effective substitute substances (see Supplement). The information should not be interpreted as condoning illegal use of this endangered species. For more information, please refer to Appendix 10.

Bai Lian (Radix Ampelopsis)

白蘞

Pinyin Name: *Bai Lian*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ampelopsis, Japanese ampelopsis root
Botanical Name: *Ampelopsis japonica* (Thunb.) Makino (*Bai Lian*)
Pharmaceutical Name: Radix Ampelopsis
Properties: bitter, acrid, cool
Channels Entered: Heart, Stomach, Liver

CHINESE THERAPEUTIC ACTIONS

Clears Heat and Eliminates Toxins, Generates Flesh and Heals Wounds

Skin lesions: The bitter, cool attributes of *Bai Lian* (Radix Ampelopsis) help to reduce swelling, while the acrid quality of this herb helps to disperse stagnation. When used topically, it helps to heal ulcers by promoting the generation of flesh. Other clinical applications include carbuncles, sores, redness and swelling caused by damp-heat and toxicity.

- Sores, carbuncles, and other skin lesions: use *Bai Lian* with *Chi Xiao Dou* (Semen Phaseoli) and egg whites, and apply topically. Take with *Lian Qiao* (Fructus Forsythiae) internally.
- Burns: powdered *Bai Lian* can be applied topically as a single remedy.

DOSAGE

5 to 10 grams in decoctions.

CAUTIONS / CONTRAINDICATIONS

Bai Lian is incompatible with *Wu Tou* (Radix Aconiti).

Bai Xian Pi (Cortex Dictamni)

白鮮皮 白鮮皮

Pinyin Name: *Bai Xian Pi*
Literal Name: "white fresh bark"
Alternate Chinese Names: *Bai Tan*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: dictamnus, dense fruit pittany root bark
Botanical Name: *Dictamnus dasycarpus* Turcz. (*Bai Xian*)
Pharmaceutical Name: Cortex Dictamni
Properties: bitter, cold
Channels Entered: Spleen, Stomach

Bai Xian Pi (Cortex Dictamni)

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins, and Alleviates Itching

Dermatological disorders caused by damp-heat: Clinically, *Bai Xian Pi* (Cortex Dictamni) is used most often to treat sores, carbuncles, rashes, eczema, ulceration, swelling and pain in the genital region, and similar conditions. In these cases, there is usually profuse oozing of fluids and ulceration of lesions.

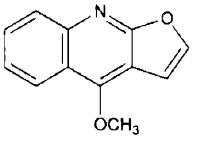
- Dermatological disorders characterized by damp, heat and toxins: use *Bai Xian Pi* with *Ku Shen Gen* (Radix Sophorae Flavescentis), *Cang Zhu* (Rhizoma Atractylodis), and *Di Fu Zi* (Fructus Kochiae) internally as an herbal decoction, or topically as an herbal wash.

2. Clears Damp-Heat

Damp-heat jaundice: *Bai Xian Pi* clears damp-heat to treat jaundice.

- Damp-heat jaundice: use this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Da Huang* (Radix et Rhizoma Rhei), and *Zhi Zi* (Fructus Gardeniae). **Exemplar Formula:** *Yin Chen Hao Tang* (Artemisia Scoparia Decoction).

***Bi zheng* (painful obstruction syndrome):** *Bai Xian Pi* treats *bi zheng* caused by accumulation of heat and dampness manifesting in symptoms such as heaviness, redness and burning pain.



- *Bi zheng*: use it with *Ren Dong Teng* (Caulis Lonicerae) and *Wei Ling Xian* (Radix Clematidis).

DOSAGE

5 to 10 grams in decoction. *Bai Xian Pi* is used internally or topically.

CHEMICAL COMPOSITION

Alkaloid (dictamnine, skimmianine), triterpenoids (dictamnolactone, obacunone), dictamnolide, campesterol, sitosterol, limonoids, fraxinellore, limonin, rutaevin.[1,2]

Dictamnine

PHARMACOLOGICAL EFFECTS

- **Antifungal:** The water decoction of *Bai Xian Pi* has an inhibitory effect against various pathogenic fungi.[3]
- **Cardiovascular:** A small dose of dictamnine stimulates frog heart specimens, increasing cardiac contractility and cardiac output. It also causes constriction of blood vessels in rabbits.[4]

CLINICAL STUDIES AND RESEARCH

- **Suppurative dermatological disorders:** Topical application of *Bai Xian Pi* in fine powder form was 100% effective in treating 33 cases of suppurative dermatological disorders.[5]

HERB-DRUG INTERACTION

- **Antineoplastic drugs:** It has been proposed that obacunone, a component of *Bai Xian Pi*, may potentiate the effect of microtubule inhibitors. It was found that with the presence of obacunone, the cytotoxicity of vincristine, vinblastine and paclitaxel are all potentiated. However, there were no potentiating cytotoxic effects between obacunone and other antineoplastic drugs such as adriamycin, cisplatin or 5-florouracil.[6]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of dictamnine is 150 to 250 mg/kg in mice.[7]

Qian Li Guang (Herba Senecionis Scandens)

千里光

Pinyin Name: *Qian Li Guang*
Literal Name: "thousand mile brightness"
Alternate Chinese Names: *Qian Li Ji, Jiu Li Ming, Jiu Li Guang, Wu Teng Yi, Hu Die Yi, Ban Tian Lei, Tei Shao Chou*
Original Source: *Ben Cao Gang Mu Shi Yi* (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765
English Name: senecio, climbing groundsel herb, ragwort herb
Botanical Name: *Senecio scandens* Buch.-Ham. (*Qian Li Guang*)
Pharmaceutical Name: Herba Senecionis Scandens
Properties: bitter, cold
Channels Entered: Lung, Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Dermatological disorders: *Qian Li Guang* (Herba Senecionis Scandens) is used internally or externally to treat heat, toxicity and dampness in carbuncles, eczema, diarrhea, dysentery and intestinal abscesses.

- Dermatological disorders: use *Qian Li Guang* with *Ye Ju Hua* (Flos Chrysanthemi Indici), *Jin Yin Hua* (Flos Lonicerae) and *Pu Gong Ying* (Herba Taraxaci).
- Diarrhea, dysentery, or intestinal abscesses: combine it with *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).

2. Clears Liver Yang and Brightens the Eyes

Redness and swelling of the eyes: Liver yang rising can cause eye redness, pain and swelling. *Qian Li Guang* is often made into eyedrops to treat acute or chronic conjunctivitis, trachoma, keratitis, and corneal ulcers.

- Eye disorders: use *Qian Li Guang* alone as a wash.

DOSAGE

10 to 30 grams in decoction.

CHEMICAL COMPOSITION

Flavoxanthin, chrysanthemaxanthin, alkaloids, essential oils, flavonoids.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** It has a broad spectrum of inhibitory activity against *Bacillus dysenteriae, Staphylococcus aureus, Salmonella typhi, Bacillus paratyphosus, Pseudomonas aeruginosa,* and *Diplococcus meningitidis.* The leaves and flowers have the strongest antibiotic effect, while the stems and roots have less.[2]

CLINICAL STUDIES AND RESEARCH

- **Inflammatory disorders:** In a clinical study, 1,338 patients suffering from inflammatory conditions were treated with three pills of *Qian Li Guang* (0.35 grams each) four times daily. Complete recovery was reported in 62% of the patients, improvement in 25%, and no response in 13%. Patients with acute tonsillitis, acute dysentery, acute enteritis, and acute appendicitis were most responsive to the treatment.[3]
- **Topical antibiotic:** Distillation of *Qian Li Guang* solution was used in place of rubbing alcohol to clean the skin. No infection was reported in over 1,600 patients with external injuries, and 24,000 patients who had intramuscular or subcutaneous injections.[4]

Jí Gu Cao (Herba Abri)

雞骨草 鸡骨草

Pinyin Name: *Ji Gu Cao*
Literal Name: "chicken bone herb"
Original Source: *Ling Nan Cai Yao Lu* (Records of Picking Herbs in Guangdong)
English Name: Abrus
Botanical Name: *Arbus fruticulosus* Wall. Ex Wight et Arn. (*Guan Dong Xiang Si Zi*)
Pharmaceutical Name: Herba Abri
Properties: sweet, cool
Channels Entered: Liver, Gallbladder

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Jaundice and infectious hepatitis caused by damp-heat: The sweet, cool nature of *Ji Gu Cao* (Herba Abri) and its affinity for the Liver and Gallbladder make it most useful to treat damp-heat jaundice and hepatitis.

- Jaundice and hepatitis: use *Ji Gu Cao* with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Da Huang* (Radix et Rhizoma Rhei) and *Bai Hua She She Cao* (Herba Oldenlandia).

2. Drains Dampness and Disperses Stagnation

Traumatic injuries: *Ji Gu Cao* reduces the inflammation and pain associated with post-traumatic injuries with blood stagnation.

DOSAGE

6 to 15 grams.

CHEMICAL COMPOSITION

Abrine, choline, saponins, tannins, anthraquinone glycosides, β-sitosterol, stigmasterol, chrysophanol, physcion.[1]

PHARMACOLOGICAL EFFECTS

- **Hepatoprotective:** The saponins of *Ji Gu Cao* have been shown to protect the liver from carbon tetrachloride-induced damage in animals.[2]

CLINICAL STUDIES AND RESEARCH

- **Hepatitis:** In one study, 70 patients with various types of hepatitis were treated with a decoction of *Ji Gu Cao* (120 grams of fresh herb or 60 grams of dried herb) and sugar (60 grams) taken in two equally-divided doses daily. The dosage was reduced by half in children. Patients were instructed to continue the herbal treatment until the symptoms resolved. The study reported satisfactory results, with good responses observed in early stages of the disorder and in children. The herbal treatment was most effective if started early, and not effective for chronic cases of hepatitis.[3]

Ban Bian Lian (Herba Lobeliae Chinensis)

半邊蓮 半边莲

Pinyin Name: *Ban Bian Lian*
Literal Name: "half-sided lotus," "half-edged lily"
Alternate Chinese Names: *Ji Jie Suo, Ban Bian Ju*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: lobelia, Chinese lobelia herb
Botanical Name: *Lobelia chinensis* Lour. (*Ban Bian Lian*)
Pharmaceutical Name: Herba Lobeliae Chinensis
Properties: acrid, cold
Channels Entered: Heart, Lung, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Toxic heat: *Ban Bian Lian* (Herba Lobeliae Chinensis) treats various dermatological conditions characterized by heat and toxins. Clinical applications include stings and bites from bees, snakes, scorpions and centipedes. It is also effective for sores, swellings, lesions and ulcerations.

- Insect or snake bites: use *Ban Bian Lian* both internally and topically simultaneously. Also, combine it with *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Jin Yin Hua* (Flos Lonicerae) and *Ye Ju Hua* (Flos Chrysanthemi Indici).
- Sores and lesions: use *Ban Bian Lian* with other herbs, internally or topically.

2. Regulates Water Circulation and Eliminates Water Retention

Edema: *Ban Bian Lian* regulates water circulation and reduces edema.

- Edema: use this herb with *Fu Ling* (Poria), *Zhu Ling* (Polyporus) and *Ze Xie* (Rhizoma Alismatis).

Ascites: *Ban Bian Lian* treats ascites whether caused by parasites or found in late stages of liver cirrhosis involving dysuria.

- Ascites: use *Ban Bian Lian* with *Hu Lu Ba* (Semen Trigonellae).

DOSAGE

10 to 20 grams of dried *Ban Bian Lian*, 30 to 60 grams of the fresh herb, in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Ban Bian Lian* is contraindicated in patients who have edema caused by deficiency.

CHEMICAL COMPOSITION

Lobeline, lobelanine, lobelanidine, isolobelanine, lobelinin.[1]

PHARMACOLOGICAL EFFECTS

- **Respiratory:** *Ban Bian Lian* has a stimulating effect on the respiratory system. It has been shown to effectively reverse respiratory depression associated with the use of morphine in dogs. It is also effective in reversing respiratory depression induced by insect or snake venom.[2]
- **Diuretic:** Intravenous injection of *Ban Bian Lian* in anesthetized dogs is associated with a marked and prolonged diuretic effect.[3]
- **Antihypertensive:** Intravenous injection of a *Ban Bian Lian* preparation is associated with a marked and prolonged influence to lower blood pressure in anesthetized dogs. Similar effects may be observed following oral administration, but 10 to 20 times the normal dosage is required.[4]
- **Others:** *Ban Bian Lian* has diuretic, cholagogic, hemostatic, and antibiotic effects.

CLINICAL STUDIES AND RESEARCH

- **Schistosomal ascites:** In a clinical study, 120 patients with late-stage schistosomal ascites were treated with an herbal decoction with an overall effective rate of 83.3%. The treatment protocol was to administer the decoction once daily, for a total of 30 days. The herbal formula contained *Ban Bian Lian* 30g, *Dan Shen* (Radix Salviae Miltiorrhizae) 9g, *Dang Gui* (Radicis Angelicae Sinensis) 6g, *Fu Ling* (Poria) 12g, and *Bing Lang* (Semen Arecae) 6g.[5]
- **Snake bites:** According to one report, 14 snake bite patients recovered completely with herbal treatment.

Ban Bian Lian (Herba Lobeliae Chinensis)

The treatment protocol included both oral and topical administration of *Ban Bian Lian*. For oral ingestion, 30 to 120 grams of the herb was used to prepare the decoction, which was taken in equally-divided portions three times daily. For topical application, the fresh herb was crushed into paste and applied onto the affected area.[6]

HERB-DRUG INTERACTION

- **Diuretics:** *Ban Bian Lian* has a diuretic effect. Though no potential interaction has been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[7] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

The LD_{50} for intravenous injection of a *Ban Bian Lian* preparation is 6.10 g/kg in mice. Symptoms of overdose included excitation, mania, and muscle contractions.[8]

Cha Chi Huang (Herba Stellariae Aquaticae)

茶匙癀

Pinyin Name: *Cha Chi Huang*
Alternate Chinese Names: *Ji Chang Cao, E Chang Cai, Chou Jin Cao, Ji Ran Cai, Ya Chang Cao, Niu Fan Lu, Ya Ran Cai*
English Name: stellaria
Botanical Name: *Stellaria aquatica* Scop.
Pharmaceutical Name: Herba Stellariae Aquaticae
Properties: acrid, slightly bitter, neutral
Channels Entered: Liver, Large Intestine, San Jiao

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Cha Chi Huang (Herba Stellariae Aquaticae) has a potent and broad spectrum of heat-clearing and toxin-eliminating effects. It is commonly used to treat infection, inflammation, swelling, and other presentations of heat and toxins.

- Dysentery: use *Cha Chi Huang* with *Feng Wei Cao* (Herba Pteris), *Huang Lian* (Rhizoma Coptidis), *Bai Tou Weng* (Radix Pulsatillae), *Ge Gen* (Radix Puerariae) and *Huang Qin* (Radix Scutellariae).
- Chronic appendicitis: use it with *Zao Jiao Ci* (Spina Gleditsiae), *Chuan Shan Jia* (Squama Manis), *Dong Gua Zi* (Semen Benincasae), *Mu Dan Pi* (Cortex Moutan), and *Da Huang* (Radix et Rhizoma Rhei). The formulas *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life) or *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction) can also be used.
- Hypertension from Liver fire: combine this herb with *Gou Teng* (Ramulus Uncariae cum Uncis), *Ge Gen* (Radix Puerariae), *Che Qian Zi* (Semen Plantaginis) and *Xia Ku Cao* (Spica Prunellae).
- Sores, carbuncles and toxic swelling: use it with *Jin Yin Hua* (Flos Lonicerae), *Zi Cao Gen* (Radix Lithospermi), *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis).

Cha Chi Huang (Herba Stellariae Aquaticae)

- Headache and eye disorders caused by Liver yang rising: use *Cha Chi Huang* with *Gou Teng* (Ramulus Uncariae cum Uncis), *Ge Gen* (Radix Puerariae), *Qing Xiang Zi* (Semen Celosiae) and *Xia Ku Cao* (Spica Prunellae).
- Palpable abdominal masses in postpartum women: combine it with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Tao Ren* (Semen Persicae), *Pao Jiang* (Rhizoma Zingiberis Preparatum) and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata).
- Irregular menstruation: add it to *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit) or *Jia Wei Xiao Yao San* (Augmented Rambling Powder).
- General inflammation: incorporate it with *Hu Yao Huang* (Herba Leucas Mollissimae), *Hu Zhang* (Rhizoma Polygoni Cuspidati) and *Liu Zhi Huang* (Herba Solidaginis).

2. Invigorates Blood, Breaks Blood Stasis and Reduces Swelling

Cha Chi Huang treats disorders characterized by blood stagnation and swelling in the local area.

- Endometriosis or cervicitis: combine *Cha Chi Huang* with *Tao Ren* (Semen Persicae), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Xiang Fu* (Rhizoma Cyperi), *Ya She Huang* (Herba Lippiae), *Pao Zai Cao* (Herba Physalis Angulatae), *Chuan Shan Jia* (Squama Manis), *Zao Jiao Ci* (Spina Gleditsiae) and *Mu Dan Pi* (Cortex Moutan).
- Hemorrhoids: use *Cha Chi Huang* alone as an external wash. It may also be combined with *Zao Jiao Ci* (Spina Gleditsiae). For best results, combine it with *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life) and *Shao Yao Tang* (Peony Decoction).
- Swellings and abscesses: use it with *Jin Yin Hua* (Flos Lonicerae), *Zi Cao Gen* (Radix Lithospermi), *Da Huang* (Radix et Rhizoma Rhei), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae) and *Gan Cao* (Radix Glycyrrhizae).

3. Promotes Urination

- Dysuria: use *Cha Chi Huang* with *Bian Xu* (Herba Polygoni Avicularis), *Qu Mai* (Herba Dianthi), *Che Qian Zi* (Semen Plantaginis), and *Shui Ding Xiang* (Herba Ludwigiae Prostratae) to promote the free flow of urine.

4. Promotes Lactation

- Blockage of lactation caused by inflammation and obstruction: combine *Cha Chi Huang* with *Chuan Shan Jia* (Squama Manis), *Wang Bu Liu Xing* (Semen Vaccariae), *Pu Gong Ying* (Herba Taraxaci) and *Chuan Mu Tong* (Caulis Clematidis Armandii).

DOSAGE

6 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Cha Chi Huang* with caution during pregnancy.
- *Cha Chi Huang* is contraindicated in patients who have weak constitutions.

Dao Di Wu Gong (Rhizoma Heliminthostachytis)

倒地蜈蚣　倒地蜈蚣

Pinyin Name: *Dao Di Wu Gong*
Literal Name: "upside-down centipede"
Alternate Chinese Names: *Di Wu Gong, Ru Di Wu Gong, Guo Lu Wu Gong, Di Ding Wu Gong*
English Name: Ceylan helminthostachys rhizome
Botanical Name: *Helminthostachys zeylanica* (L.) Hook
Pharmaceutical Name: Rhizoma Heliminthostachytis
Properties: bitter, cold
Channels Entered: Lung

Dao Di Wu Gong (Rhizoma Heliminthostachytis)

CHINESE THERAPEUTIC ACTIONS

Reduces Inflammation, Clears Heat, Eliminates Toxins, Reduces Swelling

Dao Di Wu Gong (Rhizoma Heliminthostachytis) clears heat, eliminates toxins, and reduces swelling and inflammation. It is generally combined with other herbs to enhance the heat-clearing effect.

- Stomatitis: crush and apply *Dao Di Wu Gong* topically. Internally, use this herb with *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), *Bo He* (Herba Menthae), *Lian Qiao* (Fructus Forsythiae), *Xuan Shen* (Radix Scrophulariae) and *Niu Bang Zi* (Fructus Arctii).
- Herpes zoster: crush the fresh herb to a paste consistency and apply topically to the affected area. For best results, internally, combine with *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life) and *Zheng Gu Zi Jin Dan* (Purple and Gold Pill for Righteous Bones).
- Dysentery: crush and mix this herb with honey for topical application. For internal use, use with *Chuan Xin Lian* (Herba Andrographis), *Ji Xue Cao* (Herba Centellae), *Feng Wei Cao* (Herba Pteris) and *Bai Tou Weng* (Radix Pulsatillae).
- Joint pain throughout the body, caused by wind-heat invasion: add *Dao Di Wu Gong* to *Hong Gu She* (Radix Kadsura Japonicae).
- Fever with inflammation: use it with *Da Ding Huang* (Caulis Euonymi).

DOSAGE

6 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

Dao Di Wu Gong should be used with caution for patients experiencing deficiency and coldness, because of its bitter, cold nature.

CHEMICAL COMPOSITION

Phosphorus, iron, calcium.

Jin Guo Lan (Radix Tinosporae)

金果欖　金果榄

Pinyin Name: *Jin Guo Lan*
Literal Name: "golden fruit"
Alternate Chinese Names: *Di Ku Dan, Jiu Niu Dan, Jin Niu Dan*
English Name: tinospora, arrow-shaped tinospora root, hairy stalk tinospora root
Botanical Name: *Tinospora capillipes* Gagn. (*Jin Guo Lan*); *Tinospora sagittata* Gagn. (*Qin Niu Dan*)
Pharmaceutical Name: Radix Tinosporae
Properties: bitter, cold
Channels Entered: Lung, Large Intestine

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Eliminates Toxins

Bitter and cold, *Jin Guo Lan* (Radix Tinosporae) clears heat from the Lung and toxins from the throat. Clinically, it is used mainly for disorders of the throat, such as soreness, swelling, and abscesses. It is also effective for treating gastrointestinal disorders arising from Stomach heat, such as abdominal pain and diarrhea. When used topically, it is effective in treating various dermatological disorders, such as carbuncles, furuncles, sores, and ulcers.

- Sore throat: use *Jin Guo Lan* individually, or with *Ban*

Jin Guo Lan (Radix Tinosporae)

Lan Gen (Radix Isatidis) and *Da Qing Ye* (Folium Isatidis).

- Carbuncles and furuncles: mix it with vinegar and apply topically.

DOSAGE

3 to 9 grams.

CHEMICAL COMPOSITION

Flavonoids.[1]

CLINICAL STUDIES AND RESEARCH

Phlebitis: In one study, 7 out of 8 patients with phlebitis had good results when they were treated by topical application of herbs. The topical preparation was made by mixing *Jin Guo Lan* with 75% rubbing alcohol.[2]

Liu Ye (Folium Salicis Babylonicae)

柳葉 柳叶

Pinyin Name: *Liu Ye*
Literal Name: "willow leaves"
Alternate Chinese Names: *Liu Shu Ye*
English Name: weeping willow, Babylon weeping willow leaves
Botanical Name: *Salix babylonica*
Pharmaceutical Name: Folium Salicis Babylonicae
Properties: bitter, cold
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Clears Heat and Eliminates Toxins

Liu Ye (Folium Salicis Babylonicae) clears heat and eliminates toxins, especially from the exterior of the body. It is used internally or topically to treat sores, lesions, carbuncles, and measles. It can also be used to treat dysuria.

- Sores and lesions: use *Liu Ye* with *Jin Yin Hua* (Flos Lonicerae) and *Lian Qiao* (Fructus Forsythiae).

DOSAGE

15 to 30 grams for dried *Liu Ye*, 30 to 60 grams of the fresh herb.

AUTHORS' COMMENTS

Willow bark, the bark from the Salix species, has been used in many cultures for treatment of fever and pain. Willow bark contains salicylic acid (1.5-12%) and salicin (0.1-2%). In fact, willow bark is the phytotherapeutic precursor to acetylsalicylic acid (aspirin), one of the most commonly used drugs in the world.

Bai Hua She She Cao (Herba Oldenlandia)

白花蛇舌草
白花蛇舌草

Pinyin Name: *Bai Hua She She Cao*
Literal Name: "white-flower snake tongue herb," "white-patterned snake's tongue herb"
Alternate Chinese Names: *She She Cao, Er Ye Lu*
Original Source: *Guangxi Zhong Yao Zhi* (Guangxi Journal of Chinese Herbal Medicines)
English Name: oldenlandia, spreading hedyotis herb
Botanical Name: *Oldenlandia diffusa* (Willd.) Roxb., [also known as *Hedyotis diffusa* (Willd.) Roxb.]
Pharmaceutical Name: Herba Oldenlandia
Properties: slightly bitter, sweet, cold
Channels Entered: Stomach, Large Intestine, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins, Reduces Abscesses

Toxic heat: *Bai Hua She She Cao* (Herba Oldenlandia) clears heat and eliminates toxins, and is commonly used both internally and topically. Clinical applications include intestinal abscesses, skin sores and carbuncles, sore throat, snake bite, tumors, cancer and hepatitis.

- Intestinal abscess: use *Bai Hua She She Cao* with *Hong Teng* (Caulis Sargentodoxae) and *Bai Jiang Cao* (Herba cum Radice Patriniae).
- Skin sores and carbuncles: use it with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae) and *Ye Ju Hua* (Flos Chrysanthemi Indici).
- Sore throat: combine it with *Xuan Shen* (Radix Scrophulariae), *Jie Geng* (Radix Platycodonis) and *Gan Cao* (Radix Glycyrrhizae).
- Snake bite: add it to *Ban Bian Lian* (Herba Lobeliae Chinensis) and *Zi Hua Di Ding* (Herba Violae), and apply topically.

Cancer: *Bai Hua She She Cao* has been used in recent years to treat various types of cancers. It is generally combined with other heat-clearing and toxins-eliminating herbs for optimal results.

- Cancer: use this herb with *Ban Zhi Lian* (Herba Scutellariae Barbatae), *Shan Ci Gu* (Pseudobulbus Cremastrae), *E Zhu* (Rhizoma Curcumae), *Shan Dou Gen* (Radix Sophorae Tonkinensis) and other antineoplastic herbs.
- Lung cancer: use *Bai Hua She She Cao* 60g, *Zi Cao Gen* (Radix Lithospermi) 60g, *Qian Hu* (Radix Peucedani) 30g, and *Niu Huang* (Calculus Bovis) 10g. The first three ingredients should be used in powdered extract form and mixed with powdered *Niu Huang* (Calculus Bovis). The dosage is 1.5 grams per dose, three times daily.
- Cancer of the esophagus, stomach and colon: use *Bai Hua She She Cao* 60g, *Huang Yao Zi* (Herba Dioscoreae Bulbiferae) 60g, *Shan Dou Gen* (Radix Sophorae Tonkinensis) 120g, *Bai Jiang Cao* (Herba cum Radice Patriniae) 120g, *Bai Xian Pi* (Cortex Dictamni) 120g, and *Xia Ku Cao* (Spica Prunellae) 120g. Powder and mix with honey to make pills. Administer 4 to 6 pills daily.

2. Drains Dampness

***Lin zheng* (dysuria syndrome):** *Bai Hua She She Cao* drains dampness to relieve pain and burning sensations on urination. It also treats damp-heat jaundice.

- *Shi-re lin* (damp-heat dysuria): use *Bai Hua She She Cao* with *Bai Mao Gen* (Rhizoma Imperatae), *Che Qian Cao* (Herba Plantaginis) and *Shi Wei* (Folium Pyrrosiae).
- Damp-heat jaundice: combine it with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Huang Bai* (Cortex Phellodendri) and *Zhi Zi* (Fructus Gardeniae).

DOSAGE

15 to 60 grams in decoction.

CHEMICAL COMPOSITION

Hentriacontane, stigmasterol, ursolic acid, oleanolic acid, β-sitosterol, β-sitosterol-D-glucoside, flavonoids.[1]

Bai Hua She She Cao (Herba Oldenlandia)

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Bai Hua She She Cao* has a mild inhibitory effect against *Staphylococcus aureus* and *Bacillus dysenteriae.*[2]
- **Antineoplastic:** Reports on the effect of *Bai Hua She She Cao* against cancer cells have not been consistent. Preliminary reports indicate that it inhibits the multiplication of cancer cells, though its clinical effectiveness has yet to be confirmed.[3]
- **Antivenom:** Injection of *Bai Hua She She Cao* decreases mortality in mice bitten by poisonous snakes.[4]

CLINICAL STUDIES AND RESEARCH

- **Appendicitis:** A journal that evaluated the treatment of appendicitis in over 1,000 patients concluded that the effectiveness of Chinese herbs was satisfactory. Simple cases of appendicitis were treated with 60 grams of *Bai Hua She She Cao* in decoction, given through two to three equally-divided doses. In severe cases, the herbal treatments were modified to include *Hai Jin Sha* (Herba Lygodii), *Ye Ju Hua* (Flos Chrysanthemi Indici), or combined with *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction), *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), or *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life).[5]
- **Snake bite:** According to one report, 19 snake bite patients were treated internally and topically with *Bai Hua She She Cao*, with complete recovery in all patients. The treatment protocol was to cook 15 grams of the herb in grain-based liquor, with 2/3 of the final solution given orally over 2 to 3 equally-divided doses, and 1/3 of the solution applied topically.[6]
- **Hepatitis:** In one study, 72 patients with acute icteric jaundice were treated with an herbal formula with 100% effectiveness. The average duration of hospitalization was 25.3 days. The herbal formula was given in syrup form. It contained 31.25 grams of *Bai Hua She She Cao*, 31.25 grams of *Xia Ku Cao* (Spica Prunellae), and 15.625 grams of *Gan Cao* (Radix Glycyrrhizae).[7]
- **Reduction of sperm production:** In a clinical study, 102 patients were treated with *Bai Hua She She Cao* for 3 weeks for evaluation of its effect on sperm production. The study reported that in 77% of patients, there was a 10-33% reduction of total sperm count.[8]
- **Cancer:** In one report, oral ingestion of *Bai Hua She She Cao* was found to have a dose-dependent effect to enhance macrophage function *in vitro* and inhibit tumor growth *in vivo.*[9]

AUTHORS' COMMENTS

Bai Hua She She Cao and *Tian Men Dong* (Radix Asparagi) have been used in combination to treat fibrocystic breast disorders, and cancers of the breast and the lymphatic system.

Diminished libido has been noted when *Bai Hua She She Cao* is prescribed at dosages in excess of 45 grams.

Tian Kui Zi (Radix Semiaquilegiae)

天葵子 天葵子

Pinyin Name: *Tian Kui Zi*
Alternate Chinese Names: *Tian Kui Gen, Zi Bei Tian Kui Zi, Qian Nian Lao Shu Shi*
Original Source: *Lei Gong Pao Zhi Lun* (Grandfather Lei's Discussions of Herb Preparation) by Lei Xiao in 470 A.D.
English Name: semiaquilegia, muskroot-like semiaquilegia root
Botanical Name: *Semiaquilegia adoxoides* (DC.) Mak. (*Tian Kui*)
Pharmaceutical Name: Radix Semiaquilegiae
Properties: sweet, bitter, cold
Channels Entered: Liver, Spleen, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

Clears Heat and Eliminates Toxins, Disperses Stagnation and Reduces Swelling

Tian Kui Zi (Radix Semiaquilegiae) resolves and reduces masses characterized by the presence of heat and toxins.

- Abscesses, sores and nodules: use *Tian Kui Zi* with *Jin Yin Hua* (Flos Lonicerae), *Ye Ju Hua* (Flos Chrysanthemi Indici), and *Zi Hua Di Ding* (Herba Violae). **Exemplar Formula:** *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins).
- Breast abscesses, fibrocystic breast disorder with red, painful, palpable masses: use it with *Pu Gong Ying* (Herba Taraxaci) and *Lou Lu* (Radix Rhapontici).
- Scrofula: combine it with *Xia Ku Cao* (Spica Prunellae), *Xuan Shen* (Radix Scrophulariae) and *Mu Li* (Concha Ostreae).
- Cancer of the liver, breast, or lymph nodes: use this herb with *Ban Zhi Lian* (Herba Scutellariae Barbatae), *Bai Hua She She Cao* (Herba Oldenlandia) and *Zao Xiu* (Rhizoma Paridis).

DOSAGE

3 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

Use *Tian Kui Zi* with caution in cases of deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Alkaloids, amino acids, coumarin.[1]

SUPPLEMENT

- 紫背天葵 / 紫背天葵 *Zi Bei Tian Kui* (Herba Semiaquilegiae), first cited in *Lei Gong Pao Zhi Lun* (Grandfather Lei's Discussions of Herb Preparation) by Lei Xiao in 470 A.D., is the aerial part of the same plant as *Tian Kui Zi* (Radix Semiaquilegiae). *Zi Bei Tian Kui* has mild functions to dispel masses and treat nodules, carbuncles, and abscesses. The dosage of *Zi Bei Tian Kui* is 3 to 10 grams.

Long Kui (Herba Solanum Nigrum)

龍葵 龙葵

Pinyin Name: *Long Kui*
English Name: solanum
Botanical Name: *Solanum nigrum*
Pharmaceutical Name: Herba Solanum Nigrum
Properties: slightly bitter, cold
Channels Entered: Lung, Urinary Bladder
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins, Invigorates Blood Circulation and Reduces Swelling

Long Kui (Herba Solanum Nigrum) is a cold and potent herb that treats cases of severe heat and toxins. Clinical applications include cancer, sore and swollen throat, toxic swellings, carbuncles, and itching of eczema and sores.

- Cancer: use *Long Kui* with *Ban Zhi Lian* (Herba Scutellariae Barbatae).
- Sore and swollen throat: use it with *Da Qing Ye* (Folium Isatidis), *Ma Bo* (Lasiosphaera seu Calvatia) and *She Gan* (Rhizoma Belamcandae).
- Sores, carbuncles and toxic swellings: combine it with *Pu Gong Ying* (Herba Taraxaci), *Ye Ju Hua* (Flos Chrysanthemi Indici) and *Zi Hua Di Ding* (Herba Violae) both internally and externally.
- Itching of eczema or sores: add *Chan Tui* (Periostracum Cicadae) and *Jing Jie* (Herba Schizonepetae).

2. Promotes Urination

***Lin zheng* (dysuria syndrome):** *Long Kui* clears heat and treats dysuria.

- *Re lin* (heat dysuria), edema or dysuria: use *Long Kui* with *Ze Xie* (Rhizoma Alismatis), *Shi Wei* (Folium Pyrrosiae) and *Che Qian Cao* (Herba Plantaginis).

DOSAGE

15 to 30 grams.

CHEMICAL COMPOSITION

Solanigrine, solasnine, chaconine, solanine, solamargine, solasodamine, solavilline.[1]

TOXICOLOGY

Decoction of *Long Kui* is slightly toxic. The LD_{50} in rats is 144 g/kg via oral ingestion, 56.8 g/kg via intraperitoneal injection.

Ban Zhi Lian (Herba Scutellariae Barbatae)

半枝蓮 半枝莲

Pinyin Name: *Ban Zhi Lian*
Literal Name: "half-branch lotus"
Alternate Chinese Names: *Bing Tou Cao, Han Xin Cao, Ya Shua Cao*
Original Source: *Jiang Su Zhi Wu Zhi* (Jiangsu Journal of Botany)
English Name: scute barbata, barbed skullcap herb
Botanical Name: *Scutellaria barbata* D. Don. (*Ban Zhi Lian*)
Pharmaceutical Name: Herba Scutellariae Barbatae
Properties: acrid, slightly bitter, cool
Channels Entered: Liver, Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Tumors characterized by heat and toxins: *Ban Zhi Lian* (Herba Scutellariae Barbatae) is most effective for cancers of the lung and gastrointestinal system.

- Cancer: use *Ban Zhi Lian* with other herbs with antineoplastic properties such as *Bai Hua She She Cao* (Herba Oldenlandia).

Lung abscess: Toxic heat accumulation with phlegm in the Lung results in lung abscesses.

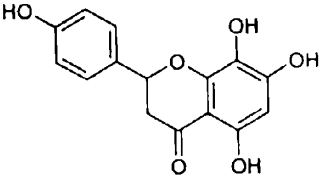
- Lung abscess: use *Ban Zhi Lian* with *Yu Xing Cao* (Herba Houttuyniae).

2. Promotes Urination and Reduces Swelling

Water retention: *Ban Zhi Lian* treats *re lin* (heat dysuria) manifesting as painful urination with scanty yellow urine. In addition, this herb treats edema and ascites associated with liver cirrhosis. It promotes normal urination and reduces water accumulation.

- Liver cirrhosis with edema and ascites: use *Ban Zhi Lian* with *Ze Xie* (Rhizoma Alismatis), *Ban Bian Lian* (Herba Lobeliae Chinensis), and *Yu Mi Xu* (Stigma Maydis).
- Liver cancer: combine it with *Bie Jia* (Carapax Trionycis), *Dan Shen* (Radix Salviae Miltiorrhizae), and *Bai Shao* (Radix Paeoniae Alba).

3. Stops Bleeding



Bleeding: *Ban Zhi Lian* has a mild function to treat traumatic injuries, hematemesis, epistaxis and hematuria associated with blood stagnation.

DOSAGE

10 to 30 grams in decoction. The dosage for fresh *Ban Zhi Lian* should be doubled.

CHEMICAL COMPOSITION

Carthamidin, isocarthamidin, scutellarein, apigenin, luteolin, β-sitosterol, organic alkaloids.[1,2]

Carthamidin

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Ban Zhi Lian* has inhibitory action against *Staphylococcus aureus, Salmonella typhi, Pseudomonas aeruginosa*, and *E. coli*.[3] Furthermore, apigenin and luteolin isolated from are selectively toxic to *S. aureus*, including the MRSA and methicillin-sensitive *S. aureus* strains.[4]
- **Antispasmodic:** Carthamidin inhibits contraction of smooth muscle.[5]
- **Antineoplastic:** *Ban Zhi Lian* has shown mild to moderate effectiveness in the treatment of acute leukemia.[6]

CLINICAL STUDIES AND RESEARCH

- **Cancer:** According to one report, oral ingestion of *Ban Zhi Lian* was found to have a dose-dependent effect to enhance macrophage function *in vitro* and inhibit tumor growth *in vivo*.[7]

TOXICOLOGY

The LD_{50} for intravenous injection of decoction of *Ban Zhi Lian* in mice is 6.10 g/kg (dosage of dried herb). The LD_{50} for oral administration of *Ban Zhi Lian* extract in rats is 75.1 g/kg (dosage of dried herb). No abnormalities were noted following intraperitoneal injection of 1 g/kg/day (dosage of dried herb) for three months.[8]

Shan Ci Gu (Pseudobulbus Cremastrae)

山慈姑

Pinyin Name: *Shan Ci Gu*
Literal Name: "benevolent aunt of the mountains"
Alternate Chinese Names: *Mao Ci Gu*, *Guang Ci Gu*
Original Source: *Jia You Ben Cao* (Materia Medica of the Jia You Era) by Zhang Yu-Xi and Su Song in 1057-1060
English Name: cremastra
Botanical Name: *Cremastra variabilis* (BL.) Nakai (*Du Juan Lan*); *Pleione bulbocodioides* (Franch.) Rolfe (*Du Suan Lan*)
Pharmaceutical Name: Pseudobulbus Cremastrae
Properties: acrid, cold
Channels Entered: Liver, Stomach
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Eliminates Toxins, Drains Abscesses, Dissipates Nodules

Toxic sores: *Shan Ci Gu* (Pseudobulbus Cremastrae) is applied topically or administered internally to treat ulcers, carbuncles, nodules, and toxic swellings and scrofula. It is also used to treat various types of cancer and tumors, such as carcinoma of the breast, cervix, esophagus, lung, stomach, and skin.

- Toxic sores: use *Shan Ci Gu* with *She Xiang* (Moschus) and *Da Ji* (Radix Euphorbiae seu Knoxiae).

DOSAGE

3 to 6 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Shan Ci Gu* with caution for patients having weak constitutions.

OVERDOSAGE

When used properly, *Shan Ci Gu* is only slightly toxic. However, overdose may result in nausea, vomiting, diarrhea, dehydration, abdominal pain, weakness, lethargy, hair loss, soreness and pain throughout the body, and mild suppression of the bone marrow and central nervous system. In serious cases, there may be severe muscle spasms and cramps throughout the entire body, leading to respiratory depression. Adverse reactions generally occur between 2 and 4 hours following ingestion of excessive amounts. In some cases, there may be a delay of

Shan Ci Gu (Pseudobulbus Cremastrae)

6 to 12 hours before the onset of symptoms. The toxic dose of *Shan Ci Gu* is between 15 and 45 grams.[1]

TREATMENT OF OVERDOSAGE

Vomiting and diarrhea associated with overdose of *Shan Ci Gu* are defensive reactions as they facilitate the elimination of the offending agent. However, excessive vomiting and diarrhea may deplete qi and body fluids. Excessive vomiting or diarrhea should be stopped once all the toxins are eliminated from the gastrointestinal tract.

Excessive vomiting may be relieved by taking 10 ml of fresh ginger juice mixed with 250 ml of vinegar. Excessive diarrhea may be treated with an herbal decoction of *Fang Feng* (Radix Saposhnikoviae) 15g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 30g, *Rou Gui* (Cortex Cinnamomi) 6g, and small amounts of vinegar, sugar and salt.[2]

Administration of egg whites, milk or powdered *Ou Jie* (Nodus Nelumbinis Rhizomatis) is beneficial, as they provide protection for the digestive tract and decrease the absorption of *Shan Ci Gu*.

Purgative methods are sometimes used to facilitate elimination of the herb, such as 9 grams of *Dang Gui* (Radicis Angelicae Sinensis), 30 grams of *Da Huang* (Radix et Rhizoma Rhei), and 30 grams of *Yuan Ming Fen* (Matrii Sulfas Exsiccatus).[3]

CHEMICAL COMPOSITION

Glycomannan, colchicine, tulipin, alkaloids, starch.[4]

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** Subcutaneous injection of a *Shan Ci Gu* preparation in mice at 2 mg/kg has shown an inhibitory effect on the replication of cells.[5]

Feng Wei Cao (Herba Pteris)

鳳尾草 凤尾草

Pinyin Name: *Feng Wei Cao*
Literal Name: "phoenix tail herb"
Alternate Chinese Names: *Feng Huang Cao, Feng Wei Jue*
Original Source: *Zhi Wu Ming Shi Tu Kao* (Illustrated Guide for Nomenclature and Identification of Botanical Products)
English Name: pteris, Chinese brake, huguenot fern, serrulate brake, spider brake
Botanical Name: *Pteris multifida* Poir. (*Feng Wei Cao*)
Pharmaceutical Name: Herba Pteris
Properties: bitter, cold
Channels Entered: Large Intestine, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Drains Dampness and Reduces Inflammation

Feng Wei Cao (Herba Pteris) treats the accumulation of damp-heat in the Large Intestine and Urinary Bladder.

- Sore and swollen throat: use *Feng Wei Cao* with *Da Qing Ye* (Folium Isatidis) and *Ban Lan Gen* (Radix Isatidis).
- Dysentery, diarrhea: add *Ma Chi Xian* (Herba Portulacae).

Feng Wei Cao (Herba Pteris)

- Chronic appendicitis: combine *Feng Wei Cao* with *Bai Jiang Cao* (Herba cum Radice Patriniae) and *Yi Yi Ren* (Semen Coicis).
- *Lin zheng* (dysuria syndrome) and jaundice: use it with *Che Qian Cao* (Herba Plantaginis), *Hai Jin Sha* (Herba Lygodii) and *Huang Bai* (Cortex Phellodendri).
- Hematuria, blood in the stool, epistaxis: use *Feng Wei Cao* with *Xiao Ji* (Herba Cirisii), *Pu Huang* (Pollen Typhae) and *Di Yu* (Radix Sanguisorbae).
- Cancer: combine this herb with *Bai Hua She She Cao* (Herba Oldenlandia), *Ban Zhi Lian* (Herba Scutellariae Barbatae) and other herbs with antineoplastic properties.

2. Cools the Blood and Eliminates Toxins

Feng Wei Cao treats heat and toxins in the blood, that are causing bleeding and cancer.

DOSAGE

10 to 20 grams in decoctions.

Dong Ling Cao (Herba Rabdosiae)

冬凌草 冬凌草

Pinyin Name: *Dong Ling Cao*
Alternate Chinese Names: *Shan Xiang Cao, Bing Ling Cao*
Original Source: *Zhong Guo Yao Dian* (Dictionary of Chinese Medicine) in 1977
English Name: rabdosia, blush red rabdosia herb
Botanical Name: *Rabdosia rubescens* (Hemsl.) Hara; *Rabdosia japonica* (Burm. f) Hara var. *glaucocalyx* (Maxim) Hara; *Rabdosia japonica* Maxim
Pharmaceutical Name: Herba Rabdosiae
Properties: bitter, sweet, cool
Channels Entered: Liver, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Dong Ling Cao (Herba Rabdosiae) is commonly used for the treatment of various disorders characterized by the presence of heat and toxins, such as sore throat, tonsillitis, and insect and snake bites.

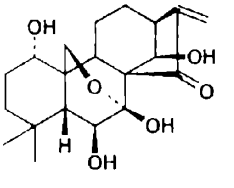
- Headaches due to common cold: use 30 grams of *Dong Ling Cao* individually in decoction.

2. Activates Blood Circulation and Relieves Pain

Dong Ling Cao is used internally and/or topically to treat musculoskeletal pain by activating blood circulation.

- Joint pain from wind and dampness: soak 90 grams of *Dong Ling Cao* in 500 ml of grain-based liquor. Take 30 ml of the tincture twice daily, in the morning and at night.
- Joint pain: soak the affected area in the solution made by cooking 250 grams of the herb in water.

DOSAGE



30 to 60 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Dong Ling Cao* may cause gastrointestinal side effects, such as nausea, vomiting, diarrhea and abdominal distention.

CHEMICAL COMPOSITION

Rubescensine A, B, C, D; ludongnin, lushanrubescensin, quidongnin, xindongnin A, B; α-amyrin, circiliol.[1,2]

Rubescensine

Dong Ling Cao (Herba Rabdosiae)

PHARMACOLOGICAL EFFECTS

- **Antineoplastic**: The use of rubescensine A has been shown to have antineoplastic effects against esophageal cancer and liver cancer in rats. The herb was administered via injection. No significant suppression of the bone marrow was observed. In another report, the use of rubescensine A was associated with a dose-dependent inhibitory effect on stomach cancer cells (MGc80-3).[3,4]
- **Antibiotic effect**: *Dong Ling Cao* has moderate inhibitory action against 19 different micro-organisms, and is especially effective against gram-positive species. The minimum inhibitory concentration was 31 ug/ml, against *Staphylococcus aureus*.[5]

CLINICAL STUDIES AND RESEARCH

- **Esophageal and cardiac cancer**: In one study, 95 patients with middle-to-late stage esophageal and cardiac cancers were treated with preparations of *Dong Ling Cao*. Preparation I was made by mixing the herb with syrup (1:1 ratio); the treatment protocol was to give 20 to 30 ml three times daily for 2 to 3 months per course of treatment. Preparation II was made by incorporating 4.5 to 5 grams of the herb into one pill; the treatment protocol was to give 5 to 8 pills three times daily for 2 to 3 months per course of treatment. Preparation III was made by mixing 75 to 100 mg of rubescensine A in 500 ml of D5W; the treatment protocol was to infuse the preparation intravenously every other day until a total of 3,000 to 3,500 mg of the compound had been given. The study concluded that the rate of effectiveness was 26.7% for Preparation I, 27.6% for Preparation II, and 31.8% for Preparation III.[6]
- **Liver cancer**: According to one report, 31 patients with primary liver cancer were treated successfully with preparations of *Dong Ling Cao*. Improved appetite and reduced pain were reported in 80% of the subjects. The survival rate after treatment was 29.6% after 6 months, 12% after 1 year, and 10% after 2 years.[7]

TOXICOLOGY

In an acute toxicology study, the LD_{50} for rubescensine A was 55.8 mg/kg in mice via intraperitoneal injection. Daily administration of 5 to 10 mg/kg of rubescensine A for 10 days in rats via intraperitoneal injection did not cause any significant changes to body weight, red blood cells, white blood cells, platelets, kidney and liver functions.[8]

AUTHORS' COMMENTS

Dong Ling Cao is also used in a formulation for treatment of prostate cancer. The formula includes *Dong Ling Cao*, *Huang Qin* (Radix Scutellariae), *Da Qing Ye* (Folium Isatidis), *San Qi* (Radix Notoginseng), *Ju Hua* (Flos Chrysanthemi), *Ling Zhi* (Ganoderma), *Gan Cao* (Radix Glycyrrhizae) and saw palmetto berries (Semen Serenoa Repens).

Chuí Pen Cao (Herba Sedi)

垂盆草 垂盆草

Pinyin Name: *Chui Pen Cao*
Alternate Chinese Names: *Fo Jia Cao, Gou Ya Cao, Shi Zi Jia*
English Name: sedum
Botanical Name: *Sedum sarmentosum* Bunge.
Pharmaceutical Name: Herba Sedi
Properties: sweet, bland, slightly sour, cool
Channels Entered: Liver, Gallbladder, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Carbuncles, cellulitis, toxic snake bites, burns, swollen throat: *Chui Pen Cao* (Herba Sedi) clears heat and toxins to treat these disorders. It is used alone internally or applied topically.

- Carbuncles, cellulitis, snake bites, burns: use *Chui Pen Cao* with *Ye Ju Hua* (Flos Chrysanthemi Indici), *Zi Hua Di Ding* (Herba Violae) and *Ban Bian Lian* (Herba Lobeliae Chinensis), applied to the affected area.

2. Dispels Dampness and Relieves Jaundice

Damp-heat jaundice: *Chui Pen Cao* clears damp-heat to relieve jaundice. It has recently been used to treat acute or chronic jaundice with or without infectious hepatitis. It also is effective in lowering liver enzymes.

- Damp-heat jaundice: use this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae) and *Da Huang* (Radix et Rhizoma Rhei).

DOSAGE

10 to 30 grams of dried *Chui Pen Cao*, 50 to 100 grams of the fresh herb.

CHEMICAL COMPOSITION

Sarmentosine, l-aspargine, l-aspartic acid, l-α-alanine, l-leucine, l-tyrosine, l-valine.[1]

PHARMACOLOGICAL EFFECTS

Chui Pen Cao has hepatoprotective and antibiotic effects.

TOXICOLOGY

No abnormalities of the blood, liver, kidney or other internal organs were reported following oral administration of *Chui Pen Cao* in dogs at 30 g/kg for 8 weeks. The LD_{50} of the herb via intraperitoneal injection in mice is 54.2 g/kg.[2]

Tu Fu Ling (Rhizoma Smilacis Glabrae)

土茯苓 土茯苓

Pinyin Name: *Tu Fu Ling*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: smilax, glabrous greenbrier rhizome
Botanical Name: *Smilax glabra* Roxb. (*Tu Fu Ling*)
Pharmaceutical Name: Rhizoma Smilacis Glabrae
Properties: sweet, bland, neutral
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Eliminates Toxic Heat

Syphilis: *Tu Fu Ling* (Rhizoma Smilacis Glabrae) treats syphilis caused by toxic heat and dampness.

- Syphilis: use *Tu Fu Ling* alone in a large dose (70 grams or more), or use it with *Jin Yin Hua* (Flos Lonicerae), *Bai Xian Pi* (Cortex Dictamni) and *Gan Cao* (Radix Glycyrrhizae).

2. Dispels Toxic Heat from the Skin

Dermatological disorders: *Tu Fu Ling* treats rashes, carbuncles, psoriasis, ulcers and hot skin lesions characterized by heat and toxins attacking the skin.

- Rash, carbuncles or psoriasis: use *Tu Fu Ling* with *Di Fu Zi* (Fructus Kochiae), *Ku Shen Gen* (Radix Sophorae Flavescentis) and *Cang Zhu* (Rhizoma Atractylodis).

3. Promotes Normal Urination

***Lin zheng* (dysuria syndrome):** *Tu Fu Ling* dispels heat from the lower *jiao* to treat *re lin* (heat dysuria) with burning sensations and painful urination.

- *Re lin* (heat dysuria): combine this herb with *Bai Mao Gen* (Rhizoma Imperatae), *Pu Gong Ying* (Herba Taraxaci) and *Chuan Mu Tong* (Caulis Clematidis Armandii).

DOSAGE

15 to 60 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- It has been reported that concurrent use of *Tu Fu Ling* and tea may be associated with hair loss. [Note: The report did not specify the exact type of tea consumed.]

CHEMICAL COMPOSITION

Saponin, rutin, resin, octacosanal, 16-hentriacontanone.[1,2]

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** Administration of *Tu Fu Ling* has shown promising effects in the treatment of cancer. In animal studies, it is especially effective against cancers of the urinary bladder and liver.[3,4]

CLINICAL STUDIES AND RESEARCH

- **Syphilis:** In one clinical study, 400 patients with syphilis were treated with an herbal formula with satisfactory results. The treatment protocol was to cook *Tu Fu Ling* 60 to 120g, *Cang Er Zi* (Fructus Xanthii) 15g, *Bai Xian Pi* (Cortex Dictamni) 15g, and *Gan Cao* (Radix Glycyrrhizae) 3 to 9g, in water and have the patients take the decoction in three equally-divided doses daily, for 30 days.[5]
- **Leptospirosis:** According to one report, 80 patients with leptospirosis were treated with an herbal formula with good results. The formula contained *Tu Fu Ling* 60g and *Gan Cao* (Radix Glycyrrhizae) 9g. The dosage of *Tu Fu Ling* was increased to 150g in those who were otherwise healthy but had severe cases of leptospirosis. Other herbs, such as *Huang Qin* (Radix Scutellariae), *Yin Chen Hao* (Herba Artemisiae Scopariae), *Fen Fang Ji* (Radix Stephaniae Tetandrae), and *Ze Xie* (Rhizoma Alismatis), were added if deemed necessary.[6]

TOXICOLOGY

There was one reported case of severe dermatological allergic reaction associated with the use of *Tu Fu Ling*.[7]

AUTHORS' COMMENTS

According to Dr. Zhang Liang-Lin, *Tu Fu Ling* and *Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) treat feelings of urinary bladder prolapse or burning sensations in the genitals.

Tu Fu Ling (Rhizoma Smilacis Glabrae)

Da Qing Ye (Folium Isatidis)

大青葉 大青叶

Pinyin Name: *Da Qing Ye*
Literal Name: "big green-blue leaves," "big green leaves"
Alternate Chinese Names: *Lan Ye*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: isatis leaves, indigo woad leaves
Botanical Name: *Isatis tinctoria* L. (*Song Lan*); *Isatis indigotica* Fort. (*Cao Da Qing*); *Baphicacanthus cusia* Bremek. (*Ma Lan*); *Polygonum tinctorium* Ait. (*Liao Lan*); *Clerodendron cyrtophyllum* Turcz. (*Lu Bian Qing*).
Pharmaceutical Name: Folium Isatidis
Properties: bitter, very cold
Channels Entered: Heart, Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Da Qing Ye (Folium Isatidis) is commonly used to clear heat and toxins from both the exterior or the interior, from the *qi* (energy) to the *xue* (blood) levels. Further, it is used for contagious epidemic febrile outbreaks. Bitter, cold, but not drying, *Da Qing Ye* has an excellent ability to clear heat and eliminate toxins without consuming yin.

Exterior wind-heat or early-stage febrile disorders: Clinical manifestations include high fever, sore throat and perspiration.

- Exterior wind-heat or early-stage febrile disorders: use *Da Qing Ye* with *Jin Yin Hua* (Flos Lonicerae), *Jing Jie* (Herba Schizonepetae), and *Niu Bang Zi* (Fructus Arctii).
- Throat soreness and pain: combine it with *Sheng Ma* (Rhizoma Cimicifugae), *Xuan Shen* (Radix Scrophulariae) and *Jin Yin Hua* (Flos Lonicerae).

Toxic heat: Clinical manifestations of toxic heat include measles, jaundice, encephalitis B, mumps, parotitis, scarlet fever, erysipelas, meningitis and any epidemic febrile disease that is contagious and manifests in high fever, purpura and, in severe cases, unconsciousness.

- Febrile disorders with excess heat and toxins, whether in the *qi* (energy), *ying* (nutritive), or the *xue* (blood) level: use *Da Qing Ye* with *Shi Gao* (Gypsum Fibrosum), *Xuan Shen* (Radix Scrophulariae) and *Sheng Di Huang* (Radix Rehmanniae).
- Jaundice: use this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Da Huang* (Radix et Rhizoma Rhei).
- Parotitis: add it to *Huang Qin* (Radix Scutellariae) and *Ban Lan Gen* (Radix Isatidis).

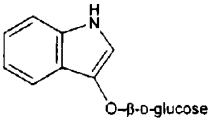
2. Cools Blood and Eliminates Maculae

Bleeding: Heat in the *xue* (blood) level forcing blood out

Da Qing Ye (Folium Isatidis)

of its vessels can manifest in maculae, blotches on the skin, purpura, hematemesis and epistaxis.
- Heat in the blood: use *Da Qing Ye* with *Zhi Mu* (Radix Anemarrhenae), *Shi Gao* (Gypsum Fibrosum), *Xuan Shen* (Radix Scrophulariae) and *Zhi Zi* (Fructus Gardeniae).

DOSAGE



10 to 20 grams in decoction. *Da Qing Ye* is used internally or externally.

CAUTIONS / CONTRAINDICATIONS

- *Da Qing Ye* is contraindicated for patients who have deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Indigo, indican, indirubin, fryptanthrin, glucobrassicin, neoglucobrassicin, glycobrassicin-1-sulzonate.[1,2]

Indican

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Da Qing Ye* has broad-spectrum antibacterial, antiviral and antifungal effects. Decoction of *Da Qing Ye* is effective against *Staphylococcus aureus,* α-hemolytic streptococcus, *Diplococcus meningitidis, Salmonella typhi, E. coli, Corynebacterium diphtheriae, Bacillus dysenteriae,* leptospira, encephalitis B virus, and HBsAg. In addition, fryptanthrin has a strong effect against various pathogenic fungi, especially ones on the skin and feet.[3,4]
- **Antineoplastic:** Indirubin has been shown to have a positive inhibiting effect against cancer cells in treating leukemia, sarcoma, and lung cancer in mice.[5]
- **Anti-inflammatory:** *Da Qing Ye* has mild anti-inflammatory and antipyretic effects.[6]

CLINICAL STUDIES AND RESEARCH

- **Upper respiratory infection:** In one study, 168 children with upper respiratory infections were treated with *Da Qing Ye* with good results. Among these cases, 95 had common colds or influenza, 29 had acute laryngitis, 25 had bronchitis, and 19 had tonsillitis. The dosage of *Da Qing Ye* solution was 6 ml per dose (each 2 ml contains 3.125 grams of dried herb) for children over 3 years of age, given three to six times daily.[7]
- **Measles and pneumonia:** In one study, 150 patients with measles and pneumonia were treated with satisfactory results using an herbal syrup containing equal portions of *Da Qing Ye* and *Pu Gong Ying* (Herba Taraxaci). The patients were advised to take the syrup three times daily.[8]
- **Encephalitis B:** Decoction of *Da Qing Ye* was found to be effective in treating 51 cases of encephalitis B. The decoction was prepared by cooking 30 grams of *Da Qing Ye* in water to yield 100 ml of decoction. The decoction was given every 4 hours; dosage was 10 to 20 ml for children under 1 year of age, 30 ml for children between 1 and 5, 50 ml for children between 6 and 10, and 80 ml for children between 11 and 13. The patients were advised to continue taking the herbs for 2 to 3 days after the fever subsided.[9]

HERB-DRUG INTERACTION

- **Sulfonylurea antidiabetics and sulfonamide antibiotics:** Patients who are allergic to sulfonylureas and sulfonamides may also be allergic to *Qing Dai* (Indigo Naturalis), *Da Qing Ye* (Folium Isatidis) and *Ban Lan Gen* (Radix Isatidis), according to Dr. Zhang Xiao-Ping. [Note: Examples of sulfonylureas include tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase); and examples of sulfonamides include sulfadiazine, sulfisoxazole, sulfamethoxazole, trimethoprim/sulfamethoxazole (Bactrim/Septra), and erythromycin/sulfisoxazole (Pediazole).]

TOXICOLOGY

Oral ingestion of indirubin at 5 g/kg/day in mice showed no adverse reaction and resulted in no fatalities.[10]

Ban Lan Gen (Radix Isatidis)

板藍根 板蓝根

Pinyin Name: *Ban Lan Gen*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: isatis root, indigo woad root
Botanical Name: *Isatis tinctoria* L. (*Song Lan*); *Isatis indigotica* Fort. (*Cao Da Qing*); *Baphicacanthus cusia* Bremek. (*Ma Lan*)
Pharmaceutical Name: Radix Isatidis
Properties: bitter, cold
Channels Entered: Heart, Stomach

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Eliminates Toxins, Cools Blood and Benefits the Throat

Toxic heat: Bitter and cold, *Ban Lan Gen* (Radix Isatidis) has excellent properties to clear heat and eliminate toxins. It is commonly used to clear heat and toxins from both the exterior and the interior, and from the *qi* (energy) and *xue* (blood) levels. Commonly seen symptoms include fever, sore throat, tonsillitis, blotches on the skin, and flushed and swollen face, with feverish sensations. This herb can be used to treat encephalitis B, hepatitis, chickenpox, epidemic parotitis, and viral dermatitis including herpes simplex, herpes zoster, pityriasis rosea and flat warts. It is most commonly used to treat sore throat in febrile disorders.

- Febrile disorders: use *Ban Lan Gen* with *Lian Qiao* (Fructus Forsythiae), *Xuan Shen* (Radix Scrophulariae) and *Niu Bang Zi* (Fructus Arctii). **Exemplar Formula:** *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin).
- Exterior wind-heat or early-stage febrile disorders: use it with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae) and *Jing Jie* (Herba Schizonepetae).
- Sore throat: combine it with *Niu Bang Zi* (Fructus Arctii), *Xuan Shen* (Radix Scrophulariae), *Shan Dou Gen* (Radix Sophorae Tonkinensis) and *Ma Bo* (Lasiosphaera seu Calvatia).

DOSAGE

10 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Oral use of *Ban Lan Gen* is relatively safe, with only occasional reports of gastrointestinal disturbances.
- Allergic reactions have been reported with both oral and intravenous administrations of this herb.

CHEMICAL COMPOSITION

Indican, indigo, indirubin, isatan B, uridine, hypoxanthine, uracil, salicylic acid, qingdainone, daucosterol, adenosine, kinetin.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Ban Lan Gen* has demonstrated marked antibacterial effects *in vitro* against *Staphylococcus aureus*, *Diplococcus pneumoniae*, *E. coli*, *Salmonella typhi*, and leptospira. It is also effective against certain influenza viruses.[2]
- **Immunostimulant**: Intraperitoneal injection of a *Ban Lan Gen* preparation has been associated with an increased activity of natural killer (NK) cells in mice. However, there was no increased production of said cells observed.[3]
- **Antiplatelet**: Administration of a *Ban Lan Gen* preparation is associated with marked inhibition of platelet aggregation in rabbits.[4]

CLINICAL STUDIES AND RESEARCH

- **Upper respiratory tract infection**: *Ban Lan Gen* is commonly incorporated into herbal formulas for treatment of upper respiratory tract infection. In one clinical study, 46 patients with acute tonsillitis were treated with an herbal formula, with complete recovery in 40 patients, and moderate improvement in 6 patients. The herbal formula contained such herbs as *Ban Lan Gen*, *Ge Gen* (Radix Puerariae), *Bai Hua She She Cao* (Herba Oldenlandia), *Chai Hu* (Radix Bupleuri), *Lian Qiao* (Fructus Forsythiae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *She Gan* (Rhizoma Belamcandae), and *Jing Jie* (Herba Schizonepetae).[5]
- **Encephalitis B**: Oral administration of *Ban Lan Gen* was found to be approximately 82% effective in treating patients with encephalitis B. There was an immediate reduction in body temperature.[6]

Ban Lan Gen (Radix Isatidis)

- **Hepatitis**: *Ban Lan Gen* has been used in various formulations for treatment of hepatitis. In one clinical trial with 53 patients, the combination of *Ban Lan Gen* and *Zhi Zi* (Fructus Gardeniae) was shown to be effective for treatment of icteric jaundice.[7]
- **Viral infection of the skin**: In a clinical study of 30 patients, administration of a *Ban Lan Gen* preparation was associated with marked effectiveness for treatment of herpes infection of the skin. The herbal preparation was applied topically to the affected area.[8]

HERB-DRUG INTERACTION

- **Sulfonylurea antidiabetics and sulfonamide antibiotics:** Patients who are allergic to sulfonylureas and sulfonamides may also be allergic to *Qing Dai* (Indigo Naturalis), *Da Qing Ye* (Folium Isatidis) and *Ban Lan Gen* (Radix Isatidis), according to Dr. Zhang Xiao-Ping. [Note: Examples of sulfonylureas include tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase); and examples of sulfonamides include sulfadiazine, sulfisoxazole, sulfamethoxazole, trimethoprim/sulfamethoxazole (Bactrim/Septra), and erythromycin/sulfisoxazole (Pediazole).]
- **Anticoagulant or antiplatelet drugs:** *Ban Lan Gen* has antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[9] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

AUTHORS' COMMENTS

Ban Lan Gen (Radix Isatidis) and *Da Qing Ye* (Folium Isatidis) are derived from the same plant and have many similar functions. *Ban Lan Gen* is stronger in eliminating heat and toxins to relieve sore throat. *Da Qing Ye* more strongly clears heat and cools the blood.

Qing Dai (Indigo Naturalis)

青黛

Pinyin Name: *Qing Dai*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: indigo, natural indigo
Botanical Name: *Isatis tinctoria* L. (*Song Lan*); *Isatis indigotica* Fort. (*Cao Da Qing*); *Baphicacanthus cusia* Bremek. (*Ma Lan*); *Polygonum tinctorium* Ait. (*Liao Lan*); *Clerodendron cyrtophyllum* Turcz. (*Lu Bian Qing*).
Pharmaceutical Name: Indigo Naturalis
Properties: salty, cold
Channels Entered: Liver, Lung, Stomach

Qing Dai (Indigo Naturalis)

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Convulsions arising from Liver wind: *Qing Dai* (Indigo Naturalis) is often used to treat childhood convulsions, and convulsions in adults accompanied by constipation, dizziness, delirium, incoherent speech, scanty yellow urine, and dysuria.

- Convulsions: use *Qing Dai* with *Niu Huang* (Calculus Bovis) and *Gou Teng* (Ramulus Uncariae cum Uncis). **Exemplar Formula:** *Dang Gui Long Hui Wan* (Tangkuei, Gentiana, and Aloe Pill).

Lung heat: Clinical manifestations include cough, dyspnea, and profuse, thick, yellow sputum.

- Lung heat: use *Qing Dai* with *Gua Lou Ren* (Semen Trichosanthis), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Fu Hai Shi* (Pumice).

Eczema and oral ulcers

- Eczema and oral ulcers: use powdered *Qing Dai* with *Bing Pian* (Borneolum Syntheticum) and *Huang Bai* (Cortex Phellodendri), topically.

2. Cools Blood and Disperses Stagnation

Bleeding: Heat forcing blood out of the vessels may result in hematemesis, hemoptysis, epistaxis, and subcutaneous bleeding that manifests in blotches on the skin or purpura.

- Bleeding: use *Qing Dai* with *Ce Bai Ye* (Cacumen Platycladi) and *Bai Mao Gen* (Rhizoma Imperatae).
- Blotches on the skin: use it with *Shi Gao* (Gypsum Fibrosum), *Sheng Di Huang* (Radix Rehmanniae) and *Sheng Ma* (Rhizoma Cimicifugae).

Mumps, sore throat: Toxic heat accumulation in the throat results in mumps, sore throat and other painful sores.

- Sore throat: use *Qing Dai* alone topically, or use with *Xuan Shen* (Radix Scrophulariae), *Jin Yin Hua* (Flos Lonicerae) and *Lian Qiao* (Fructus Forsythiae).

DOSAGE

1.5 to 3 grams in decoctions, 0.6 to 1 gram in powder. *Qing Dai* can be used topically alone or with oil.

CAUTIONS / CONTRAINDICATIONS

- Use *Qing Dai* with caution in patients who have deficiency and cold of the Stomach.
- Nausea, vomiting, abdominal pain, diarrhea or hematochezia may occur with overdose.
- In rare cases, use of *Qing Dai* may affect the liver function, decrease platelet count, and cause bone marrow suppression.

CHEMICAL COMPOSITION

Indigotin, indirubin, qingdainone, isatin, tryptanthrin, qingdaiin, laccerol, isoindigo.[1]

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** The use of indirubin has been associated with moderate inhibitory influence against tumor cells in animals. Subcutaneous and intraperitoneal injections of indirubin at 200 mg/kg for 6 to 7 days were found to inhibit the growth of tumor cells in mice with lung and breast cancers.[2]
- **Antibiotic:** Decoction of *Qing Dai* has inhibitory influence against *Staphylococcus aureus*, *Bacillus anthracis* and *Vibrio cholerae*.[3]

CLINICAL STUDIES AND RESEARCH

- **Chronic granulocytic leukemia:** In a clinical study, 314 patients with chronic granulocytic leukemia were treated with indirubin. The treatment protocol was to administer 150 to 200 mg per day (maximum of 300 to 400 mg) of indirubin in three equally-divided doses for 30 to 180 days. The study reported an overall effective rate of 87.26%, with marked improvement in 59.87% of patients.[4]
- **Psoriasis:** According to one report, 35 patients with psoriasis were treated with 25 to 50 mg of indirubin daily for 8 weeks with good improvement. The study reported that indirubin exerted definite inhibition on psoriasis.[5]
- **Stomatitis:** In one study, 297 of 319 patients (92.92%) reported positive benefits after using topical application of an herbal formula for treatment of stomatitis. The treatment protocol was to apply the powder of *Qing Dai* and *Zhen Zhu* (Margarita) topically three times daily.[6]

HERB-DRUG INTERACTION

- **Sulfonylurea antidiabetics and sulfonamide antibiotics:** Patients who are allergic to sulfonylureas and sulfonamides may also be allergic to *Qing Dai* (Indigo Naturalis), *Da Qing Ye* (Folium Isatidis) and *Ban Lan Gen* (Radix Isatidis), according to Dr. Zhang Xiao-Ping. [Note: Examples of sulfonylureas include tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase); and examples of sulfonamides include sulfadiazine, sulfisoxazole, sulfamethoxazole, trimethoprim/sulfamethoxazole (Bactrim/Septra), and erythromycin/sulfisoxazole (Pediazole).]

TOXICOLOGY

No toxicity was reported following oral ingestion of indirubin by mice at 5 g/kg for 5 consecutive days. The LD_{50} for intraperitoneal injection of indirubin in mice is 1.1 to 2.0 g/kg. In a long-term toxicology study, indirubin was given to dogs orally at doses of 20, 100, and 200 mg/kg

Qing Dai (Indigo Naturalis)

for 6 months. The study reported poor appetite, diarrhea, hematochezia, and elevation of SGPT. At all three dose levels, however, there was no evidence of abnormalities of blood, bone marrow, kidney or heart functions.[7]

AUTHORS' COMMENTS

Qing Dai is the processed powder of *Da Qing Ye* (Folium Isatidis). *Qing Dai* has essentially the same functions as *Da Qing Ye*. However, its ability to cool blood is stronger, and it also dispels Lung heat.

The following formula by Dr. Hu Qing-Shan has been used to treat chronic granulocytic leukemia: *Qing Dai* 40%, *Tian Hua Fen* (Radix Trichosanthis) 40%, *Niu Huang* (Calculus Bovis) 10%, and *Lu Hui* (Aloe) 10%. Administer 1.5 grams in powder twice daily.

Zhu Zi Cao (Herba Euphorbiae Thymifoliae)

珠仔草 珠仔草

Pinyin Name: *Zhu Zi Cao*
Alternate Chinese Names: *Xiao Fei Yang Cao*
English Name: thymifolia
Botanical Name: *Euphorbia thymifolia* L.
Pharmaceutical Name: Herba Euphorbiae Thymifoliae
Properties: sweet, cool
Channels Entered: Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins, Cools Blood

Toxic heat: *Zhu Zi Cao* (Herba Euphorbiae Thymifoliae) treats toxic heat in the body that may manifest in various symptoms such as bronchitis, sore throat, hepatitis, pneumonia, dysentery or hematemesis.

- Bronchitis, sore throat, fever: use *Zhu Zi Cao* with *Xian Feng Cao* (Herba Bidentis), *Yi Zhi Xiang* (Herba Vernoniae Cinereae), and *Pao Zai Cao* (Herba Physalis Angulatae).
- Hematemesis with bright red blood: use this herb with *Ce Bai Ye* (Cacumen Platycladi).
- Hepatitis: combine it with *Huang Shui Qie* (Herba Solani) and *Hu Zhang* (Rhizoma Polygoni Cuspidati).
- Pneumonia: use it with *Da Qing Ye* (Folium Isatidis) and *Pao Zai Cao* (Herba Physalis Angulatae).
- Dysentery: add *Yu Xing Cao* (Herba Houttuyniae).

2. Promotes Urination

***Lin zheng* (dysuria syndrome):** *Zhu Zi Cao* is often used with *Bi Zi Cao* (Herba Pogonantheri Criniti) and *Shui Ding Xiang* (Herba Ludwigiae Prostratae) to promote urination and treat dysuria.

DOSAGE

3 to 15 grams.

Chuan Xin Lian (Herba Andrographis)

穿心蓮 穿心莲

Pinyin Name: *Chuan Xin Lian*
Literal Name: "penetrate the heart lotus," "thread-the-heart lotus"
Alternate Chinese Names: *Yi Jian Xi, Lan He Lian, Ku Dan Cao*
Original Source: *Ling Nan Cai Yao Lu* (Records of Picking Herbs in Guangdong)
English Name: andrographis, common andrographis herb
Botanical Name: *Andrographis paniculata* (Burm.f.) Nees. (*Chuan Xin Lian*)
Pharmaceutical Name: Herba Andrographis
Properties: bitter, cold
Channels Entered: Lung, Stomach, Large Intestine, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Accumulation of heat and toxins: In recent years, *Chuan Xin Lian* (Herba Andrographis) has become one of the most commonly-used herbs to clear heat and eliminate toxins. Clinical manifestations include sore throat, fever, headache and cough. It can also be used to treat snake bites, eczema, sores, and carbuncles that involve toxic heat.

- Early-stage febrile disorders: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Ju Hua* (Flos Chrysanthemi) and *Niu Bang Zi* (Fructus Arctii).
- Cough due to Lung heat (including upper respiratory tract infection, bronchitis, or pneumonia), lung abscess, or sore throat: combine *Chuan Xin Lian* with *Yu Xing Cao* (Herba Houttuyniae) and *Jie Geng* (Radix Platycodonis).
- Eczema: apply powdered *Chuan Xin Lian* topically.
- Skin sores and carbuncles, or snake bite: use it with *Jin Yin Hua* (Flos Lonicerae) and *Ye Ju Hua* (Flos Chrysanthemi Indici). Or, mash the fresh herb into paste and apply topically.

2. Dries Dampness and Stops Diarrhea

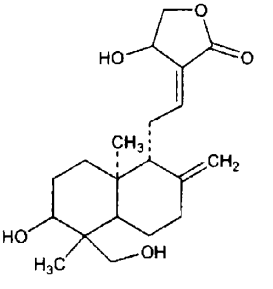
Diarrhea or dysentery due to damp-heat: Symptoms may include rectal tenesmus, feelings of incomplete defecation, a burning sensation in the anus after defecation, diarrhea with mucus, and poor appetite.

- Diarrhea or dysentery due to damp-heat: use *Chuan Xin Lian* with *Ma Chi Xian* (Herba Portulacae) and *Jin Yin Hua* (Flos Lonicerae).

***Lin zheng* (dysuria syndrome):** Clinical manifestations of *lin zheng* include frequent urinary urges, painful urination, and scanty yellow urine.

- *Re lin* (heat dysuria) with burning and pain: use *Chuan Xin Lian* with *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Che Qian Zi* (Semen Plantaginis) and *Bai Mao Gen* (Rhizoma Imperatae).

DOSAGE



6 to 15 grams in decoction. *Chuan Xin Lian* is now commonly used in powder or capsule form at lower dosages.

CAUTIONS / CONTRAINDICATIONS

- *Chuan Xin Lian* is bitter and cold. Large dosages or long-term consumption may injure Stomach qi.
- *Chuan Xin Lian* must be used with caution during pregnancy, because of its abortifacient effect.[1]

CHEMICAL COMPOSITION

Andrographolide, neoandrographolide, deoxyandrographolide, ninandrographolide, deoxyandrographiside, andrographiside, andrographoside, homoandrographolide.[2,3]

Andrographolide

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Chuan Xin Lian* has only a mild inhibitory

Chuan Xin Lian (Herba Andrographis)

effect *in vitro* against *Diplococcus pneumoniae* and β-hemolytic streptococcus. However, it is quite effective in treating infections *in vivo*. It has been proposed by many that its effectiveness in treating infections is due in part to its immune-enhancing effect.[4]

- **Antipyretic**: Andrographolide and neoandrographolide have antibiotic effects and are effective in reducing fever associated with infection.[5]
- **Anti-inflammatory**: In laboratory studies, administration of a preparation of *Chuan Xin Lian* is associated with stimulation of the adrenal cortex and secretion of corticosteroids, thereby exerting anti-inflammatory effects.[6]
- **Immunostimulant**: Decoction of *Chuan Xin Lian* enhances the immune system and increases the phagocytic activity of white blood cells.[7]
- **Antivenin**: Extract of *Chuan Xin Lian* may be used as an anti-snake venom, as it markedly delayed death of mice following snake bites. The exact mechanism of action is unclear.[8]
- **Abortifacient**: Intraperitoneal injection of *Chuan Xin Lian* terminated pregnancy in mice in the first, second or third trimester.[9]
- **Hepatoprotective and cholagogic**: *Chuan Xin Lian* increases the weight of the liver and the production and excretion of bile acid. In laboratory studies, andrographolide was effective in protecting the liver against foreign substances, such as carbon tetrachloride, and effectively lowered SGPT and SGOT.[10]
- **Cardiovascular**: Water extract of *Chuan Xin Lian* was found to have a marked effect on the cardiovascular system by decreasing the mean arterial blood pressure in a dose-dependent manner, without significant decrease in heart rate. Though the exact mechanism of action is unclear, it has been suggested that the hypotensive effect is related to α-adrenoceptors, not β-adrenoceptors.[11]

CLINICAL STUDIES AND RESEARCH

- **Nasosinusitis and rhinitis**: In one study, 242 patients with nasosinusitis and rhinitis were treated with 81% effectiveness using 1.8 grams of *Chuan Xin Lian* extract (6 pills per dose, 0.3 gram of herb per dose) internally, three times daily.[12]
- **Upper respiratory tract infection**: Injection of a *Chuan Xin Lian* preparation was used to treat 454 children with upper respiratory tract infection, with an 89.4% rate of effectiveness.[13]
- **Leptospirosis**: Andrographolide and deoxyandrographolide were used to treat 46 patients with leptospirosis, with an 87% rate of effectiveness.[14]

TOXICOLOGY

Intramuscular injection of *Chuan Xin Lian* was associated with one case of anaphylactic reaction.[15] [Note: Anaphylactic shock is the most severe type of allergic reaction. Unfortunately, it is very difficult, if not impossible, to predict when patients will have such serious reactions. Though there is one case of anaphylactic reaction reported in response to injection, oral use of *Chuan Xin Lian* does not necessarily have a higher risk of allergy than other herbs.]

Yu Xing Cao (Herba Houttuyniae)

魚腥草 鱼腥草

Pinyin Name: *Yu Xing Cao*
Literal Name: "fishy-smelling herb"
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: houttuynia, heart-leaf houttuynia
Botanical Name: *Houttuynia cordata* Thunb. (*Ji Cai*)
Pharmaceutical Name: Herba Houttuyniae
Properties: acrid, cool
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins and Drains Pus

Lung abscess: Acrid and cool, *Yu Xing Cao* (Herba Houttuyniae) dispels heat and toxins, and drains abscesses and pus. It is commonly used to treat various lung infections, lung abscesses with coughing, or vomiting with mucus and blood.

- Lung abscess: use *Yu Xing Cao* with *Jie Geng* (Radix Platycodonis), *Huang Qin* (Radix Scutellariae), and *Lu Gen* (Rhizoma Phragmitis).
- Cough caused by Lung heat: use it with *Zhi Mu* (Radix Anemarrhenae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Sang Bai Pi* (Cortex Mori).

Sores and skin lesions from heat and toxins: *Yu Xing Cao* is used both internally and topically to treat skin infections.

- Sores and skin lesions: combine it with *Ye Ju Hua* (Flos Chrysanthemi Indici), *Lian Qiao* (Fructus Forsythiae) and *Pu Gong Ying* (Herba Taraxaci), for use internally or topically.

Various infections: *Yu Xing Cao* effectively treats infection of the internal organs. Clinical applications include pneumonia, acute or chronic bronchitis and enteritis.

- Pneumonia, acute or chronic bronchitis: use this herb with *Xing Ren* (Semen Armeniacae Amarum), *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae).
- Enteritis: add *Bai Jiang Cao* (Herba cum Radice Patriniae).

2. Promotes Normal Urination

***Lin zheng* (dysuria syndrome)**: *Yu Xing Cao* drains heat and dampness from the lower *jiao* to promote normal urination and relieve *lin zheng*, urinary tract infection with frequent urinary urges, and scanty yellow urine.

- *Shi lin* (stone dysuria): use this herb with *Hai Jin Sha* (Herba Lygodii), *Shi Wei* (Folium Pyrrosiae) and *Jin Qian Cao* (Herba Lysimachiae).
- *Re lin* (heat dysuria): combine it with *Che Qian Zi* (Semen Plantaginis) and *Chuan Mu Tong* (Caulis Clematidis Armandii).

DOSAGE

15 to 30 grams in decoction. *Yu Xing Cao* should be decocted for only a short period of time. Double the dosage if the fresh form is used. *Yu Xing Cao* may be used topically, as a fresh herb crushed into paste, or as an herbal solution to be used as a rinse.

CHEMICAL COMPOSITION

Essential oil 0.022 to 0.025% (decanoylacetaldehyde, methyl nonyl ketone, laurinaldehyde, α-pinene, myrcene, limonene, linalool, citronellol, citral, 1,8-cineol, ocimene, carvacrol, thymol), flavonoids (quercetin, isoquercitrin, quercitrin, reynoutrin, hyperin, rutin, cordarine). Houttuynium is the synthetic sodium derivative of decanoylacetaldehyde.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Yu Xing Cao* has a broad spectrum of action to inhibit *Staphylococcus aureus*, β-hemolytic streptococcus, *Diplococcus pneumoniae*, *Neisseria catarrhalis*, *Corynebacterium diphtheriae*, *Bacillus proteus*, *Bacillus dysenteriae*, leptospira, dermatophytes and some influenza viruses.[2,3]
- **Immunostimulant**: Administration of *Yu Xing Cao* in rabbits is associated with an increase in phagocytic activities by the white blood cells, and an increase of serum properdin.[4]

Yu Xing Cao (Herba Houttuyniae)

- **Others**: *Yu Xing Cao* has anti-inflammatory, diuretic, analgesic, antitussive, and hemostatic effects.[5,6]

CLINICAL STUDIES AND RESEARCH

- **Pneumonia**: In one study, 25 of 28 patients with pneumonia showed complete recovery following an herbal treatment containing 30 grams of *Yu Xing Cao* and 15 grams of *Jie Geng* (Radix Platycodonis). The herbs were cooked in water to yield 200 ml of decoction. Patients were given 30 ml per dose, three to four times daily. Those with a profuse amount of thick sputum were also treated with inhalation of a 5% *Yu Xing Cao* solution.[7]
- **Chronic bronchitis**: In a clinical study, 190 patients with chronic bronchitis were divided into two groups and treated with houttuynium. In the first group, the study reported a 78% rate of effectiveness with intramuscular injection. In the second group, the study reported a 76.7% from oral ingestion of houttuynium.[8]
- **Inflammation**: Good results were reported when 183 patients with various inflammatory disorders were treated with houttuynium. The various disorders treated included cervicitis, pelvic inflammatory disease, pneumonia, pulmonary abscesses, and others.[9]
- **Nephrotic syndrome**: Five patients with nephrotic syndrome were treated with 100 grams of *Yu Xing Cao* in tea or decoction form, with good results.[10]
- **Leptospirosis**: A study reported that 15 to 30 grams of *Yu Xing Cao* per day was effective in prevention of leptospirosis in 1,603 patients. *In vitro* studies also showed that *Yu Xing Cao* inhibits leptospira.[11]
- **Cervical erosion**: Treatment of 679 patients with cervical erosion resulted in 86.2 to 99.3% effectiveness, using topical application of an herbal formula. The formula was prepared by mixing houttuynium, *Bing Pian* (Borneolum Syntheticum) and coconut oil.[12]
- **Atrophic sinusitis**: Nasal distillation of a *Yu Xing Cao* solution was used to treat 33 patients with atrophic sinusitis with satisfactory results.[13]
- **Angioma**: A preparation of *Yu Xing Cao* was reported to be 90.8% effective in treating 55 patients with angioma.[14]

TOXICOLOGY

Yu Xing Cao has very little toxicity. Injection in animals of doses up to 200 times the normal human dose for one week did not result in any abnormalities or fatalities.[15]

There was one instance of anaphylactic reaction associated with intramuscular injection of *Yu Xing Cao*.[16] [Note: Anaphylactic shock is the most severe type of allergic reaction. Unfortunately, it is very difficult, if not impossible, to predict when patients will have such serious reactions. Though there is one case of anaphylactic reaction reported with injection, oral use of *Yu Xing Cao* does not necessarily have a higher risk of allergy than other herbs.]

AUTHORS' COMMENTS

Yu Xing Cao, literally known as 'fishy-smelling herb,' has a distinct smell when freshly harvested from the ground. Therefore, the usual assumption is that the decoction must be difficult to swallow. However, decoction of this herb is dark red, and rather fragrant, without any unpleasant odor.

She Gan (Rhizoma Belamcandae)

射干

Pinyin Name: *She Gan*
Literal Name: "arrow shaft," "shooting dryness"
Alternate Chinese Names: *Wu San, Bian Zhu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: belamcanda, blackberry lily rhizome
Botanical Name: *Belamcanda chinensis* (L.) DC. (*She Gan*)
Pharmaceutical Name: Rhizoma Belamcandae
Properties: bitter, cold
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Sore throat: *She Gan* (Rhizoma Belamcandae) treats sore throat by eliminating heat, toxins and phlegm. Severe cases of sore throat caused by heat and toxins are characterized by sharp pain, redness of the affected area, swollen throat and excruciating pain when swallowing. Profuse phlegm and labored breathing with throttling sound are also common presentations of heat and toxins affecting the Lung.

- Sore throat with profuse phlegm: use *She Gan* with *Huang Qin* (Radix Scutellariae), *Jie Geng* (Radix Platycodonis) and *Gan Cao* (Radix Glycyrrhizae).
- Sore throat due to heat and toxins: combine it with *Sheng Ma* (Rhizoma Cimicifugae), *Ma Bo* (Lasiosphaera seu Calvatia), and *Xuan Shen* (Radix Scrophulariae).

2. Eliminates Phlegm and Relieves Wheezing

Dyspnea, cough with profuse sputum: Bitter, cold and dispersing in nature, *She Gan* dissolves sputum and relieves wheezing caused by accumulation of heat and phlegm in the Lung.

- Dyspnea, cough with profuse yellow sputum: use *She Gan* with *Sang Bai Pi* (Cortex Mori) and *Jie Geng* (Radix Platycodonis).
- Dyspnea, cough with profuse white or clear sputum: combine this herb with *Xi Xin* (Herba Asari), *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

DOSAGE

6 to 10 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *She Gan* is contraindicated during pregnancy.
- Use *She Gan* with caution for patients who have deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Tectoridin, tectorigenin, irigenin, belamcadin, iridin, mangiferin, iristectorin A, B; tectoruside, embinin.[1]

PHARMACOLOGICAL EFFECTS

- **Antiviral:** According to one report, 100% extract of *She Gan* has an inhibitory effect on dermatophytes and influenza viruses.[2]

CLINICAL STUDIES AND RESEARCH

- **Galacturia:** In a clinical study, 87 patients with galacturia were treated with decoction of *She Gan* three times daily with an 85.1% rate of effectiveness. Depending on the individual, the dosage was between 12 and 25 grams. In another study, 104 patients with galacturia were treated with a *She Gan* preparation with 90.4% effectiveness. Those with uncomplicated galacturia received *She Gan* 15g; those with a chronic condition received *She Gan* 15g, *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) 9g, and *Chi Shao* (Radix Paeoniae Rubrae) 12g; and those with galacturia and hematuria received *She Gan* 15g, *Sheng Di Huang* (Radix Rehmanniae) 15g, and *Xian He Cao* (Herba Agrimoniae) 15g.[3,4]

TOXICOLOGY

The LD_{50} for alcohol extract of *She Gan* (1:1) in mice via oral ingestion is 66.78 g/kg.[5]

She Gan (Rhizoma Belamcandae)

AUTHORS' COMMENTS

She Gan and *Shan Dou Gen* (Radix Sophorae Tonkinensis) have similar actions to clear heat. *She Gan* has a stronger function to dispel phlegm and disperse stagnation. *Shan Dou Gen* has a stronger function to sedate fire.

She Gan and *Ma Bo* (Lasiosphaera seu Calvatia) have similar functions to clear Lung heat. *She Gan* sedates Lung heat and disperses phlegm. It is best for heat-type cough with profuse phlegm. *Ma Bo* clears Lung heat and benefits the throat. It is used for sore throat, loss of voice and cough caused by heat and toxicity affecting the descending functions of the Lung.

Shan Dou Gen (Radix Sophorae Tonkinensis)

山豆根

Pinyin Name: *Shan Dou Gen*
Literal Name: "mountain bean root"
Alternate Chinese Names: *Guan Dou Gen, Nan Dou Gen*
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: sophora root, tonkin sophora root
Botanical Name: *Sophora tonkinensis* Gagnep. (*Yue Nan Hui*); *Sophora subprostrata* Chun et. T. Chen (*Guan Dou Gen*)
Pharmaceutical Name: Radix Sophorae Tonkinensis
Properties: bitter, cold
Channels Entered: Lung
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Sore throat: *Shan Dou Gen* (Radix Sophorae Tonkinensis) treats sore throat and reduces pain, as it has marked effectiveness to clear heat and eliminate toxins.

- Mild sore throat: use *Shan Dou Gen* individually as an herbal decoction or herbal gargle.
- Severe sore throat: use it with *Xuan Shen* (Radix Scrophulariae), *She Gan* (Rhizoma Belamcandae) and *Ban Lan Gen* (Radix Isatidis).

2. Treats Cancer, Abscesses, and Carbuncles

Shan Dou Gen treats throat or lung cancer, sores, and abscesses and carbuncles characterized by heat and toxins.

- Sore throat: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), and *Huang Lian* (Rhizoma Coptidis).
- Throat or lung cancers: combine it with *Ban Zhi Lian* (Herba Scutellariae Barbatae) and *Bai Hua She She Cao* (Herba Oldenlandia).

3. Relieves Jaundice

In the past, *Shan Dou Gen* was used for damp-heat jaundice. However, it is no longer used for this function today as there are other herbs that are more effective.

DOSAGE

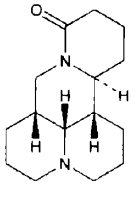
6 to 10 grams in decoction. *Shan Dou Gen* is used as a gargle or as powder on affected areas.

Shan Dou Gen (Radix Sophorae Tonkinensis)

CAUTIONS / CONTRAINDICATIONS

- *Shan Dou Gen* is contraindicated in patients with deficiency and cold of the Spleen and Stomach characterized by decreased appetite and loose stools.

OVERDOSAGE



Overdose of *Shan Dou Gen* is characterized by varying degrees of abdominal pain, dizziness, nausea, vomiting, pale face, increased or decreased heart rate, headache, weakness of the extremities, tremor, profuse perspiration, increased blood pressure, and loss of balance. Gross overdose is characterized by difficulty in breathing, spasms and cramps of the extremities, purple lips and face, and delirium. In severe cases, there may be respiratory depression and death. Such adverse reactions occur because *Shan Dou Gen* is a strong stimulant and may interfere with normal functions of the nervous and respiratory systems. Side effects have been observed in dosages as low as 12 grams. The lethal dosage is generally considered to be 60 grams or higher.

TREATMENT OF OVERDOSAGE

Overdose of *Shan Dou Gen* may be treated with an herbal decoction containing 60 grams of *Lu Dou* (Semen Phaseoli Radiati), 30 grams of *Gan Cao* (Radix Glycyrrhizae), 24 grams of *Jin Yin Hua* (Flos Lonicerae), and 9 grams of *Chuan Xin Lian* (Herba Andrographis).[1]

CHEMICAL COMPOSITION

Alkaloids (matrine, oxymatrine, methylcytisine, anagyrine, sophocarpine), flavonoids (sophoradochromene, genistein, pterocarpine, trifolirhizin, sophoraflavone A, B, bayin), sophoradin, sophoranone.[2,3]

Matrine

PHARMACOLOGICAL EFFECTS

- **Antiarrhythmic:** Administration of *Shan Dou Gen* via intramuscular or intraperitoneal injections has been found to be effective in treating animals with drug-induced arrhythmias. *Shan Dou Gen* has a negative chronotropic and positive inotropic effect on the right ventricle of the heart in guinea pigs.[4]
- **Immunostimulant:** Administration of *Shan Dou Gen* orally in mice is associated with an increase of IgM and IgG.[5]
- **CNS suppressant:** The alkaloids of *Shan Dou Gen* have a marked inhibitory effect on the central nervous system (CNS), leading to sedation, analgesia, and lowered body temperature in mice. It is also effective in preventing and treating drug-induced seizures.[6]
- **Antiasthmatic:** Alkaloids of *Shan Dou Gen*, such as matrine, oxymatrine, methylcytisine, anagyrine, and sophocarpine have shown marked antiasthmatic effects. By comparison to aminophylline, oxymatrine has similar but prolonged antiasthmatic effects.[7,8]
- **Antipyretic:** Matrine, oxymatrine, and sophocarpine have all demonstrated marked ability to reduce body temperature in mice. The exact mechanism of action is unclear.[9]
- **Hepatoprotective:** Reports have indicated that administration of *Shan Dou Gen* is associated with a hepatoprotective function by lowering the liver enzymes and minimizing liver damage caused by carbon tetrahydrochloride.[10]
- **Antiulcer:** The alcohol extract of *Shan Dou Gen* inhibits the secretion of gastric acid in rats. Components with this action included sophoradin and sophoranone.[11]
- **Antineoplastic:** Administration of *Shan Dou Gen* via oral or intraperitoneal routes has been associated with antineoplastic effects in mice, especially against uterine, abdominal and liver cancers. The antineoplastic components of the herb have been identified as the alkaloids of the herb, such as matrine, oxymatrine, and sophocarpine.[12,13]
- **Antibiotic:** *Shan Dou Gen* has an inhibitory effect against *Bacillus dysenteriae, Bacillus proteus, E. coli, Staphylococcus aureus*, and *Pseudomonas aeruginosa*.[14]

CLINICAL STUDIES AND RESEARCH

- **Sore throat:** An herbal formula containing *Shan Dou Gen, Lian Qiao* (Fructus Forsythiae), *She Gan* (Rhizoma Belamcandae) and *Tian Hua Fen* (Radix Trichosanthis) was evaluated for its effectiveness in treatment of sore throat. Out of 120 patients who took 15 doses of the formula, 84 reported complete recovery, 30 showed marked improvement, and 6 had no response. The overall rate of effectiveness was 95%.[15]
- **Hepatitis:** Injection of a *Shan Dou Gen* preparation containing primarily alkaloids was 91.8% effective in 402 patients with hepatitis. The study reported that most patients showed a significant reduction of liver enzymes within 2 to 4 weeks.[16]
- **Arrhythmia:** Eleven patients with arrhythmia were treated with 40 grams of *Shan Dou Gen* with marked improvement in 7 patients, improvement in 3 patients, and no results in 1 patient.[17]

TOXICOLOGY

Shan Dou Gen is slightly toxic. In a toxicology study in mice, the LD_{50} of decoction of *Shan Dou Gen* via intraperitoneal injection is 15.6 g/kg.[18]

Shan Dou Gen (Radix Sophorae Tonkinensis)

SUPPLEMENT

- 北豆根 *Bei Dou Gen* (Rhizoma Menispermi), *Menispermum dahuricum* DC., is sometimes used as a substitute for *Shan Dou Gen* in northern China. Bitter and cold, *Bei Dou Gen* clears heat and toxins. It is commonly used to treat throat soreness and pain. The recommended dosage of *Bei Dou Gen* is 3 to 10 grams.

Ma Bo (Lasiosphaera seu Calvatia)

馬勃　马勃

Pinyin Name: *Ma Bo*

Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.

English Name: lasiosphaera (puffball)

Botanical Name: *Lasiosphaera fenzlii* Reich. (*Tuo Pi Ma Bo*); *Calvatia gigantea* (Batsch ex Pers.) Lloyd. (*Da Ma Bo*); *Calvatia lilacina* (Mont. et Ber.) Lloyd (*Zi She Ma Bo*)

Pharmaceutical Name: Lasiosphaera seu Calvatia

Properties: acrid, neutral to cool

Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears the Lung, Benefits the Throat, and Eliminates Toxins

Sore throat: *Ma Bo* (Lasiosphaera seu Calvatia) enters the Lung and is commonly used to clear heat and eliminate toxins from the upper body. It treats Lung heat with cough, a sore, swollen, red throat, and loss of voice. *Ma Bo* cools the blood and is best for the type of sore throat involving bleeding or ulceration. Other symptoms may include redness and swelling of the face, and fever.

Ma Bo (Lasiosphaera seu Calvatia)

Disorders exhibiting such symptoms may include infectious parotitis and tonsillitis.

- Throat swelling and pain: use *Ma Bo* with *Xuan Shen* (Radix Scrophulariae), *She Gan* (Rhizoma Belamcandae) and *Ban Lan Gen* (Radix Isatidis).
- Sore throat: sprinkle *Ma Bo* onto the affected area.
- Loss of voice: use it with *Gu Zhi Hua* (Semen Oroxyli) and *Chan Tui* (Periostracum Cicadae).

2. Stops Bleeding

Bleeding: *Ma Bo*, used internally or topically, stops bleeding caused by heat driving blood out of the vessels. Clinical applications include epistaxis and hematemesis. This herb is also used topically for frostbite or bleeding resulting from sports injuries.

- Epistaxis and hematemesis: combine it with *Bai Mao Gen* (Rhizoma Imperatae), *Ou Jie* (Nodus Nelumbinis Rhizomatis) and *Ce Bai Ye* (Cacumen Platycladi).

DOSAGE

3 to 6 grams in decoction. *Ma Bo* should be wrapped in cheesecloth prior to cooking. *Ma Bo* can be placed directly on the throat in powder form to reduce swelling and pain.

CHEMICAL COMPOSITION

Gemmatein, urea.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic**: Constituents of *Ma Bo* have a mild influence to stop bleeding.[2]
- **Antibiotic**: This substance has an inhibitory effect against *Staphylococcus aureus*, *Pseudomonas aeruginosa*, *Bacillus proteus*, and *Diplococcus pneumoniae*.[3]

CLINICAL STUDIES AND RESEARCH

- **Bleeding**: *Ma Bo* has shown good results in stopping bleeding in patients with bleeding from the oral cavity.[4]
- **Post-surgical bleeding**: Topical application of 1 to 4 grams of *Ma Bo* powder has shown marked hemostatic effect both during and after surgery.[5]
- **External use**: Topical application of powdered *Ma Bo* was effective in treatment of external injury and frostbite.[6]

Pao Zai Cao (Herba Physalis Angulatae)

炮仔草 炮仔草

Pinyin Name: *Pao Zai Cao*
Alternate Chinese Names: *Deng Long Cao, Ding Ren Zai Cao, Gua Jin Deng, Gui Deng Long*
English Name: physalis angulata
Botanical Name: *Physalis angulata* L.
Pharmaceutical Name: Herba Physalis Angulatae
Properties: bitter, cool
Channels Entered: Lung, Urinary Bladder, Liver, Kidney

Pao Zai Cao (Herba Physalis Angulatae)

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Arrests Cough

Pao Zai Cao (Herba Physalis Angulatae) clears heat from the Lung to treat coughing and sore throat.

- Wind-heat with cough and sore throat: use *Pao Zai Cao* with *Yi Zhi Xiang* (Herba Vernoniae Cinereae), *Da Qing Ye* (Folium Isatidis) and *Ya She Huang* (Herba Lippiae).

2. Reduces Inflammation and Eliminates Toxins

- Gynecological disorders from inflammation, such as dysmenorrhea or inflammation of the uterus, fallopian tubes and ovaries: use *Pao Zai Cao* with *Hu Yao Huang* (Herba Leucas Mollissimae), *Ma Bian Cao* (Herba Verbenae), *Yi Mu Cao* (Herba Leonuri) and *Ya She Huang* (Herba Lippiae).
- *Chang feng* (intestinal wind) with bright bleeding from the rectum before passage of stools, and abdominal pain: use this herb with *Qing Mu Xiang* (Radix Aristolochiae) and *Ma Ti Jin* (Herba Dichondrae Repentis).
- Oral sores, stomatitis because of Stomach heat: use it with *Xian Feng Cao* (Herba Bidentis), *Huang Lian* (Rhizoma Coptidis) and *Lu Gen* (Rhizoma Phragmitis).
- Snake bite or toxic swelling and pain: apply *Pao Zai Cao* topically.

DOSAGE

3 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Pao Zai Cao* is contraindicated during pregnancy.

Dao Diao Jin Zhong (Melothria Maderospatana)

倒吊金鐘
倒吊金钟

Pinyin Name: *Dao Diao Jin Zhong*
Alternate Chinese Names: *Feng Fang Ran*
English Name: melothria
Botanical Name: *Melothria maderaspatana* M.J. Roem.
Pharmaceutical Name: Melothria Maderospatana
Properties: sweet, bitter, cool
Channels Entered: Lung, Liver, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Eliminates Toxins and Relieves Pain

Febrile disorders, jaundice, dysuria, fetal toxicosis, various toxic swellings, lung abscesses: *Dao Diao Jin Zhong* (Melothria Maderospatana) treats a wide range of disorders caused by heat and toxicity.

- Lung abscess: use *Dao Diao Jin Zhong* with *Pu Gong Ying* (Herba Taraxaci), *Bai Jiang Cao* (Herba cum Radice Patriniae) and *Da Qing Ye* (Folium Isatidis).
- Febrile disorders with irritability and stifling sensations in the chest: use it with *Xian Feng Cao* (Herba Bidentis) and *Ji Xue Cao* (Herba Centellae).
- Jaundice: add it to *Yin Chen Hao* (Herba Artemisiae Scopariae).
- Dysuria or frequent urinary urges: combine this herb with *Shui Ding Xiang* (Herba Ludwigiae Prostratae) and *Shan Pu Tao* (Radix Vitis Amurensis).
- Toxic swelling: use it with *Hu Yao Huang* (Herba Leucas Mollissimae), *Shu Wei Huang* (Herba Rostellulariae), and *Cha Chi Huang* (Herba Stellariae Aquaticae).

Dao Diao Jin Zhong (Melothria Maderospatana)

DOSAGE

3 to 12 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use with caution for patients with Spleen deficiency.

Ma Chi Xian (Herba Portulacae)

馬齒莧 马齿苋

Pinyin Name: *Ma Chi Xian*
Literal Name: "horse's teeth amaranth"
Alternate Chinese Names: *Ma Chi Cai*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: portulaca
Botanical Name: *Portulaca oleracea* L. (*Ma Chi Xian*)
Pharmaceutical Name: Herba Portulacae
Properties: sour, cold
Channels Entered: Large Intestine, Liver

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Damp-heat diarrhea and dysentery: Cold in nature, *Ma Chi Xian* (Herba Portulacae) clears heat and eliminates toxins. Sour-tasting, *Ma Chi Xian* prevents excessive loss of body fluids. Clinically, it treats damp-heat diarrhea with mucus and blood. Juice from the fresh herb is especially effective for bacterial dysentery and feelings of incomplete defecation.

- Bacterial diarrhea or dysentery: grind fresh *Ma Chi Xian* for juice and serve the fresh juice. If the raw herb is unavailable, post-decoct *Ma Chi Xian* and serve it with garlic, or use it as decoction with *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- White leukorrhea with or without the presence of blood: use it with *Hai Piao Xiao* (Endoconcha Sepiae).
- Intestinal abscess: combine this herb with *Pu Gong Ying* (Herba Taraxaci).
- Heat and toxins in the skin: use *Ma Chi Xian* topically.
- Sores, hemorrhoids, lesions, ulcerations, or eczema due to toxic heat: use the crushed paste of fresh *Ma Chi Xian*, apply topically.

2. Cools Blood, Stops Bleeding, Treats *Lin Zheng* (Dysuria Syndrome)

Bleeding: *Ma Chi Xian* cools the blood and treats various kinds of bleeding from the lower body, such as profuse menstrual bleeding, *xue lin* (bloody dysuria) and *re lin* (heat dysuria). *Ma Chi Xian* is used as a single-herb treatment, or is combined with other hemostatic herbs.

DOSAGE

9 to 15 grams for the dried herb, 30 to 60 grams for the fresh herb, in decoction. *Ma Chi Xian* is commonly used both internally and topically.

CHEMICAL COMPOSITION

Nor-adrenaline 0.25%, l-noradrenaline, dopamine, malic acid, citric acid, glutamic acid, aspartic acid, alanine, galacturonic acid, arabinose, galactose, rhamnose, betacyanin, oleracin I, II; ferulic acid, β-amyrin, lupeol, nicotinic acid, tocopherol, β-carotene.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: The water extract of *Ma Chi Xian* has an inhibitory effect *in vitro* against *Bacillus dysenteriae*;

Ma Chi Xian (Herba Portulacae)

while an alcohol extract of the herb is effective against *E. coli*, *Salmonella typhi*, *Staphylococcus aureus* and some dermatophytes.[2]

- **Uterine stimulant**: Extract of *Ma Chi Xian* has a stimulating effect on the smooth muscles of the intestines and uterus in rats, rabbits, and guinea pigs. It leads to increased peristalsis of the intestines and contraction of the uterus. It was noted in another study that *Ma Chi Xian* has mixed effects on the uterus. While the stem may stimulate the uterus and lead to contraction, the leaves may inhibit the uterus and lead to relaxation.[3,4,5]

CLINICAL STUDIES AND RESEARCH

- **Bacterial dysentery**: Patients with acute and chronic dysentery were treated with a 50% decoction of *Ma Chi Xian* with marked effectiveness. The study reported 89.12% effectiveness in 331 patients with acute bacterial dysentery, and 83.62% effectiveness in 403 patients with chronic bacterial dysentery. The treatment protocol was to give 40 ml of the decoction three times daily, for 7 to 14 days per course of treatment. The dosage and duration of treatment were increased for those who did not initially respond.[6]
- **Whooping cough**: In one study, 54 patients with whooping cough showed satisfactory responses following an herbal treatment. The treatment protocol was to give 100 ml of 50% *Ma Chi Xian* syrup in equally-divided portions four times daily over three days.[7]
- **Parasitic infection**: Hookworm infestations in 41 patients were treated with an herbal decoction with a 87.8% rate of complete recovery. The treatment protocol was to cook 90 grams of fresh *Ma Chi Xian* in two bowls of water. After simmering to evaporate 20% of the water, the decoction was filtered out and 15 grams each of clear vinegar and white sugar were added. The patients were given the decoction once daily, before bedtime.[8]
- **Vitiligo**: After topical application of herbs in 125 patients with vitiligo, 91.2% of patients reported some improvement and 45.6% showed complete recovery. The treatment protocol was to mix the juice of *Ma Chi Xian* with sugar and vinegar. Patients were asked to apply the herbal formulation topically and stay in the sun. The duration of sunbath was not specified.[9]
- **Suppurative dermatological diseases**: Concurrent administration of *Ma Chi Xian* orally and topically was reported to be very effective in treating various suppurative dermatological disorders.[10]
- **Cervical erosion**: In a clinical study, 212 patients with cervical erosion were treated with an herbal formula for 20 days, with an overall success rate of 97.2%. The herbal formula was prepared by cooking 3,500 grams of *Ma Chi Xian* and 500 grams of *Gan Cao* (Radix Glycyrrhizae) in water to yield 300 ml of final decoction. The pills were made by adding 2,000 grams of starch to 300 ml of decoction. Patients were instructed to take 2 grams of herbs in pills twice daily, for two courses (20 days) of treatment.[11]
- **Uterine bleeding**: Intramuscular injection of *Ma Chi Xian* was effective in treating over 500 patients with various causes of uterine bleeding, including but not limited to postpartum bleeding, cesarean section, miscarriage, and abortion.[12]
- **Others**: According to one report, 60 grams of *Ma Chi Xian* and 30 grams of brown sugar cooked in decoction were found to be effective in treating 4 cases of hematuria, 98 cases of urinary tract infection, 32 cases of bacterial infection, 39 cases of enteritis, and 112 cases of suppurative dermatological disorders.[13]

Qin Pi (Cortex Fraxini)

秦皮

Pinyin Name: *Qin Pi*
Alternate Chinese Names: *La Shu Pi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: fraxinus, ash bark
Botanical Name: *Fraxinus rhynchophylla* Hance. (*Ku Li Bai La Shu*); *Fraxinus chinensis* Roxb. (*Bai La Shu*); *Fraxinus bungeana* DC. (*Bai La Shu*); *Fraxinus chinensis* Roxb. var. *acuminata*. (*Jien Ye Bai La Shu*)
Pharmaceutical Name: Cortex Fraxini
Properties: bitter, cold
Channels Entered: Gallbladder, Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins, and Dries Dampness

Diarrhea and dysentery due to damp-heat: *Qin Pi* (Cortex Fraxini) has a unique ability to concurrently purge damp-heat and retain body fluids. It is commonly used to treat diarrhea or dysentery involving rectal tenesmus, abdominal pain, hematochezia, a yellow, greasy tongue coating, and thirst with no desire to drink.

- Diarrhea or dysentery with rectal tenesmus due to damp-heat: use *Qin Pi* with *Bai Tou Weng* (Radix Pulsatillae) and *Huang Lian* (Rhizoma Coptidis). **Exemplar Formula**: *Bai Tou Weng Tang* (Pulsatilla Decoction).

Damp-heat leukorrhea: *Qin Pi* treats foul-smelling yellow, turbid leukorrhea.

- Damp-heat leukorrhea: use this herb with *Mu Dan Pi* (Cortex Moutan).

2. Clears Liver Fire and Brightens the Eyes

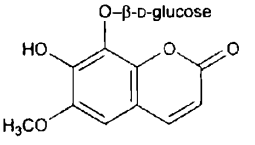
Eye disorders caused by Liver yang rising: Clinical manifestations include eye redness, swelling, and pain, photophobia, tearing upon exposure to wind, and superficial visual obstruction.

- Eye redness and swelling due to Liver fire: use *Qin Pi* alone as a wash, or combine it with *Jue Ming Zi* (Semen Cassiae), *Mu Zei* (Herba Equiseti Hiemalis) and *Ju Hua* (Flos Chrysanthemi).

3. Redirects Lung Qi to Relieve Cough and Wheezing

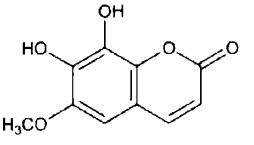
Cough or dyspnea: *Qin Pi* clears Lung heat and causes Lung qi to descend to treat cough, wheezing and dyspnea. It can be used individually or in combination with other herbs.

DOSAGE



6 to 12 grams in decoction.

CAUTIONS / CONTRAINDICATIONS



- *Qin Pi* should be used with caution in patients with deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Coumarin (aesculin, aesculetin, fraxin, fraxetin, fraximol, fraxidin, isofraxidin, cichorin), tannin.[1,2]

Fraxin

Fraxetin

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Qin Pi* has demonstrated inhibitory action against *Staphylococcus aureus*, *Bacillus dysenteriae*, *E. coli*, *Neisseria catarrhalis*, and α-hemolytic streptococcus.[3,4]

Qin Pi (Cortex Fraxini)

- **Respiratory**: Aesculetin and fraxin from *Qin Pi* have demonstrated marked antitussive, expectorant, and anti-asthmatic effects in animals.[5]
- **Anti-inflammatory**: Aesculin has demonstrated definite anti-inflammatory influence, possibly through an increased secretion of corticosteroids from the adrenal glands.[6]
- **Others**: *Qin Pi* has sedative, analgesic, antiseizure, and diuretic effects.

CLINICAL STUDIES AND RESEARCH

- **Bacterial dysentery**: Fifty patients with bacterial dysentery were treated with an 80% success rate using an herbal formulation containing *Qin Pi*.[7]
- **Chronic bronchitis**: In one study, 530 patients with chronic bronchitis were treated through inhalation of steam from *Qin Pi* decoction. The treatment demonstrated marked antitussive, antiasthmatic and expectorant results in 92.9% of the patients.[8]

TOXICOLOGY

No fatalities were reported following intraperitoneal injection of aesculetin in mice at 3 g/kg.[9]

SUPPLEMENT

- 核桃楸皮 *He Tao Qiu Pi* (Cortex Juglans), *Juglans mandshurica* Maxim., is bitter and cold. It clears heat, eliminates toxins, stops diarrhea and dysentery, and treats eye infections. The dosage of *He Tao Qiu Pi* is 4.5 to 9 grams in decoction. *Qin Pi* (Cortex Fraxini) is sometimes substituted incorrectly with *He Tao Qiu Pi* (Cortex Juglans). Though these two herbs have some overlapping characteristics, they should not be used interchangeably as there are also significant differences.

Bai Tou Weng (Radix Pulsatillae)

白頭翁 白头翁

Pinyin Name: *Bai Tou Weng*
Literal Name: "white-headed gentleman"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: pulsatilla, Chinese pulsatilla root
Botanical Name: *Pulsatilla chinensis* (Bge.) Regel (*Bai Tou Weng*)
Pharmaceutical Name: Radix Pulsatillae
Properties: bitter, cold
Channels Entered: Large Intestine

Bai Tou Weng (Radix Pulsatillae)

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Eliminates Toxins, and Cools Blood

Diarrhea, dysentery: These conditions are characterized by damp-heat in the Large Intestine causing bloody diarrhea or dysentery. *Bai Tou Weng* (Radix Pulsatillae) is an essential herb in treating amoebic dysentery. Other symptoms may include rectal tenesmus, abdominal pain and frequent urges to defecate.

- Diarrhea or dysentery with mucus and blood caused by damp-heat: use *Bai Tou Weng* with *Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri) and *Qin Pi* (Cortex Fraxini). **Exemplar Formula:** *Bai Tou Weng Tang* (Pulsatilla Decoction).

Hemorrhoids from damp-heat and toxicity:

- Hemorrhoids: use *Bai Tou Weng* internally or topically.
- Bleeding hemorrhoids: combine it with *Di Yu* (Radix Sanguisorbae), charred *Huai Hua* (Flos Sophorae) and charred *Huang Qin* (Radix Scutellariae).

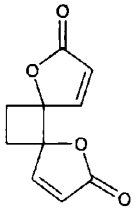
Scrofula:

- Scrofula: use *Bai Tou Weng* internally or topically, as a single-herb remedy or in a formula.

Febrile malarial disorders:

- Febrile malarial disorders: use *Bai Tou Weng* with *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae) and *Bing Lang* (Semen Arecae).

DOSAGE



6 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Bai Tou Weng* is contraindicated for patients with diarrhea or dysentery caused by cold and deficiency.

CHEMICAL COMPOSITION

Protoanemonin, anemonin, ranunculin.[1,2]

Anemonin

PHARMACOLOGICAL EFFECTS

- **Antiamebic:** *Bai Tou Weng* has an inhibitory effect against amoeba *in vitro* and *in vivo*, but only at large doses. In one study, decoction of *Bai Tou Weng* at 1 g/kg for 6 days effectively treated amoebic dysentery in mice. However, the treatment was ineffective when the dosage was reduced to 0.3 g/kg.[3]
- **Antibiotic:** The fresh juice, decoction and alcohol extract of *Bai Tou Weng* have all shown an inhibitory effect against *Staphylococcus aureus, Pseudomonas aeruginosa, Bacillus dysenteriae, Salmonella typhi, Bacillus subtilis, Corynebacterium diphtheriae, Mycobacterium tuberculosis, Candida albicans*, and others.[4]
- **Others:** *Bai Tou Weng* has cardiotonic, sedative, and analgesic effects.[5]

CLINICAL STUDIES AND RESEARCH

- **Amoebic dysentery:** In one report, 26 patients with amoebic dysentery were treated with a 100% success rate using a 50% decoction of *Bai Tou Weng*. The dosage was 5 to 10 ml, three times daily, for a total of 60 to 300 ml.[6]
- **Scrofula:** Thirty patients with scrofula were treated with good results, using a decoction of *Bai Tou Weng*. The treatment protocol was to cook 30 grams of *Bai Tou Weng* in water, and take the final decoction in four equally-divided doses.[7]
- **Uterine bleeding:** In one study, 106 patients with uterine bleeding were treated with a 93.4% rate of effectiveness using an herbal decoction. The herbal formula contained 90 grams of *Bai Tou Weng*, and 60 grams each of *Di Yu* (Radix Sanguisorbae) and white sugar, with other herbs as deemed necessary.[8]
- **Toothache:** According to one report, 25 patients with toothache were treated with good results using a decoction of *Bai Tou Weng*, one to three times daily.[9]
- **Dermatitis:** In one study, 107 patients with dermatitis were treated with topical application of *Bai Tou Weng*, with complete recovery in 66 cases, significant improvement in 23 cases, moderate improvement in 12 cases, and no response in 6 cases. The treatment protocol was to soak fresh *Bai Tou Weng* leaves in water, gently rub the soaked leaves on the skin, then cover the affected area with gauze. Apply gentle had pressure to the skin for 20 minutes. Patients generally report a warm, burning sensation, which lasts approximately 20 minutes.[10]

TOXICOLOGY

Decoction of *Bai Tou Weng* has very low toxicity.[11]

SUPPLEMENT

- 白頭翁莖/白头翁茎 *Bai Tou Weng Jing* (Caulis Pulsatillae) and 白頭翁葉/白头翁叶 *Bai Tou Weng Ye* (Folium Pulsatillae) have antirheumatic functions, cardiotonic effects, and are slightly toxic. The root, *Bai Tou Weng* (Radix Pulsatillae), on the other hand, has antibiotic effects and is commonly used to treat bacterial or

Bai Tou Weng (Radix Pulsatillae)

amoebic dysentery. The stems and leaves of this plant are not interchangeable with the root, as their functions and properties are significantly different.

AUTHORS' COMMENTS

Bai Tou Weng, *Huang Lian* (Rhizoma Coptidis), and *Qin Pi* (Cortex Fraxini) are commonly used to treat diarrhea and dysentery.

- *Bai Tou Weng* clears heat and toxins from the blood. It has antibiotic effects against amoebae.
- *Huang Lian* clears heat and dries up dampness. It has antibiotic effects against bacteria.
- *Qin Pi* dispels damp-heat and preserves body fluids in the intestines. It has antibiotic effects against bacteria.

Ya Dan Zi (Fructus Bruceae)

鸦膽子　鸦胆子

Pinyin Name: *Ya Dan Zi*
Literal Name: "duck's gallbladder seed"
Alternate Chinese Names: *Ku Shen Zi*
Original Source: *Ben Cao Gang Mu Shi Yi* (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765
English Name: brucea seed, java brucea fruit
Botanical Name: *Brucea javanica* (L.) Merr. (*Ya Dan Zi*)
Pharmaceutical Name: Fructus Bruceae
Properties: bitter, cold
Channels Entered: Large Intestine, Liver
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Dysentery: *Ya Dan Zi* (Fructus Bruceae) is especially effective for treatment of chronic intermittent dysentery, in which there seem to be periods of rest and recurrence over a period of one to two years. This herb is taken on an empty stomach during attacks, and Spleen tonic herbs are taken during remission periods. *Ya Dan Zi* is also good for rectal tenesmus with dysentery containing blood and mucus, and dysentery caused by protozoans and amoebas.

- Bloody dysentery: wrap *Ya Dan Zi* inside *Long Yan Rou* (Arillus Longan) for oral consumption.

Ya Dan Zi (Fructus Bruceae)

2. Treats Malaria

Ya Dan Zi treats malaria characterized by alternating fever and chills, in which each episode may last 2 to 3 days.

- Malaria: use *Ya Dan Zi* in capsules for 3 to 5 days.

3. Treats Cancer

Ya Dan Zi is used in treatment of cancers of the colon, breast, esophagus, stomach, cervix and rectum that are caused by toxic heat.

4. Softens Hardness

Ya Dan Zi is used topically to soften nodules and hardnesses. Indications include warts and corns. For treatment of warts and corns, crush the herb and mix with grain-based liquor, make it into a paste, and apply topically.

DOSAGE

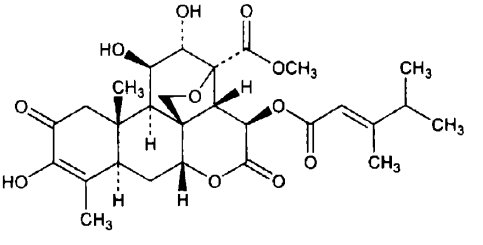
The dosage of *Ya Dan Zi* is 10 to 15 seeds for malaria, and 10 to 30 seeds for dysentery. Remove the shells and use only the seeds. This extremely bitter herb is not suitable for decoction. Instead, it is often given in capsule or tablet form; or wrapped inside *Long Yan Rou* (Arillus Longan) to mask the bitter taste. *Ya Dan Zi* is also used in powder form at the dosage of 1.5 to 2 grams.

CAUTIONS / CONTRAINDICATIONS

- *Ya Dan Zi* is contraindicated for long-term use or in high doses. Administration should be stopped once the desired effect is achieved.
- *Ya Dan Zi* is contraindicated during pregnancy, and in children and elderly patients. It is also contraindicated in individuals with deficiency of the Spleen and Stomach, as this herb is very irritating to the gastrointestinal tract.
- *Ya Dan Zi* is contraindicated in individuals with pre-existing liver and kidney disorders.

OVERDOSAGE

Overdose of *Ya Dan Zi* is characterized by nausea, vomiting, poor appetite, abdominal pain, diarrhea, dizziness, lethargy, blood in the stools, and upper gastrointestinal bleeding. In severe cases, there may be dyspnea, anuria, increased body temperature, convulsions, numbness or paralysis of the extremities, kidney and liver damage, and unconsciousness. Adverse reactions usually occur within 20 to 60 minutes after ingestion of the herbs. Overdose in adults may occur following ingestion of 50 seeds of *Ya Dan Zi*.



TREATMENT OF OVERDOSAGE

Overdose may be treated with general or specific methods using herbal decoction:

- Overdose in general can be treated with an herbal decoction given three times daily, with the following ingredients: *Gan Cao* (Radix Glycyrrhizae) 12g, *Lu Dou* (Semen Phaseoli Radiati) 15 to 30g, and *Lu Gen* (Rhizoma Phragmitis) 50 to 80g.
- Overdose with upper gastrointestinal bleeding should be treated with an herbal decoction of *Gan Cao* (Radix Glycyrrhizae) 50g, *Yuan Zhi* (Radix Polygalae) 9g, *Sha Shen* (Radix Glehniae seu Adenophorae) 15g, charred *Di Yu* (Radix Sanguisorbae) 9g, *Xue Yu Tan* (Crinis Carbonisatus) 9g, and *San Qi* (Radix Notoginseng) 2g.[1]

CHEMICAL COMPOSITION

Glyceroltrioleate, oleic acid, linoleic acid, bruceantin, bruceanlinol, bruceine A, B, C; dehydro brucein A, brusatol, bruceine C, D; yadanzioside A, F, and I; bruceoside A and B.[2,3,4]

Bruceantin

PHARMACOLOGICAL EFFECTS

- **Antiamebic:** Bruceantin and bruceine C have both demonstrated marked effectiveness against *Entamoeba histolitica*.[5]
- **Antimalarial:** Many constituents of *Ya Dan Zi* have demonstrated marked antimalarial action, including but not limited to bruceantin, bruceanlinol, bruceine A, B, and C; dehydro brucein A, brusatol, bruceine D, yadanzioside A, F, and I.[6]
- **Antineoplastic:** Many components of *Ya Dan Zi* have demonstrated antineoplastic effects, such as bruceoside A and B.[7]

CLINICAL STUDIES AND RESEARCH

- **Amoebic dysentery:** Sixty-five patients with amoebic dysentery were treated with *Ya Dan Zi* with approximately 94% effectiveness. The patients were given the herbs in both capsule (three times daily) and liquid (once daily) forms for 10 days per course of treatment.[8]
- **Malaria:** Good results were reported when 27 patients with malaria were treated with *Ya Dan Zi*. The treatment protocol was to grind 12 seeds into fine powder and place it in capsules. Patients were instructed to take the capsules three times daily on an empty stomach. This treatment was effective against many types of malaria, especially those in which the outbreaks take place during daytime.[9]

Ya Dan Zi (Fructus Bruceae)

- **Warts:** In one study, 3 to 5 grams of *Ya Dan Zi* crushed into powder and soaked in 75% alcohol overnight was effective as a topical agent for treating warts. The solution was applied to the affected area two to three times daily.[10]
- **Cancer:** In a multi-center study, 388 patients with esophageal, stomach, rectal, and cervical cancers were treated with intravenous injection of *Ya Dan Zi*. The study reported an overall effectiveness of 71.6% in terms of prolonging life.[11]

TOXICOLOGY

One instance of anaphylactic reaction was reported following the use of *Ya Dan Zi*. The clinical presentation included numbness of the extremities, perspiration, cyanotic face, urinary and bowel incontinence, dyspnea, and unconsciousness.[12] [Note: Anaphylactic shock is the most severe type of allergic reaction. Unfortunately, it is very difficult, if not impossible, to predict when patients will have such serious reactions. Though there has been one case of anaphylactic reaction reported, use of *Ya Dan Zi* does not necessarily have a higher risk of allergy than other herbs.]

Hong Teng (Caulis Sargentodoxae)

紅藤　红藤

Pinyin Name: *Hong Teng*
Literal Name: "red vine"
Alternate Chinese Names: *Da Xue Teng, Xue Teng, Huo Xue Teng*
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: sargentodoxa vine
Botanical Name: *Sargentodoxa cuneata* Rehd. et Wils. (*Da Xue Teng*)
Pharmaceutical Name: Caulis Sargentodoxae
Properties: bitter, neutral
Channels Entered: Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Intestinal abscess: *Hong Teng* (Caulis Sargentodoxae) clears heat, eliminates toxins, activates blood circulation and relieves pain. It is one of the most commonly used herbs to treat intestinal abscesses characterized by accumulation of

Hong Teng (Caulis Sargentodoxae)

heat and toxins, and stagnation of qi and blood. *Hong Teng* is also effective for treatment of appendicitis.

- Intestinal abscess: use *Hong Teng* with *Da Huang* (Radix et Rhizoma Rhei), *Lian Qiao* (Fructus Forsythiae), *Pu Gong Ying* (Herba Taraxaci) and *Mu Dan Pi* (Cortex Moutan). **Exemplar formula**: *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction).
- Appendicitis: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Zi Hua Di Ding* (Herba Violae), and *Pu Gong Ying* (Herba Taraxaci).

2. Dispels Stasis and Relieves Pain

Blood stagnation: *Hong Teng* treats sharp pain caused by blood stasis. Clinical applications include *bi zheng* (painful obstruction syndrome), traumatic or sports injuries, and menstrual pain.

- Pain: combine it with *Dang Gui* (Radicis Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubrae), *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), and *Pu Huang* (Pollen Typhae).

DOSAGE

10 to 15 grams in decoction. The maximum dosage of *Hong Teng* is 30 grams. It is commonly used as an herbal decoction or herbal wine.

CAUTIONS / CONTRAINDICATIONS

Tannin, emodin, physcion, daucosteral, β-sitosterol, salidroside, liriodendrin.[1,2]

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Hong Teng* has an inhibitory effect on *Staphylococcus aureus*, β-streptococcus, *E. coli*, *Pseudomonas aeruginosa*, and *Neisseria catarrhalis*.[3]
- **Cardiovascular**: According to numerous *in vitro* and *in vivo* studies, administration of *Hong Teng* is associated with inhibition of platelet aggregation, increased blood perfusion to the coronary artery, inhibited formation of thrombin, and elevated plasma levels of cAMP.[4]

CLINICAL STUDIES AND RESEARCH

- **Appendicitis**: In one study, acute non-complicated appendicitis in 1,213 patients was treated with an herbal preparation, with over 90% effectiveness. The herbal preparation contained extracts of *Hong Teng*, *Pu Gong Ying* (Herba Taraxaci), *Da Huang* (Radix et Rhizoma Rhei), and *Hou Po* (Cortex Magnoliae Officinalis). Excipients included starch and magnesium stearate.[5]
- **Acute mastitis**: In a clinical study, decoction of 60 to 90 grams of *Hong Teng* taken in two equally-divided doses was effective in treating patients with acute mastitis. Out of 24 cases, 21 showed complete recovery, 2 showed moderate improvement, and 1 had no response.[6]

AUTHORS' COMMENTS

Hong Teng (Caulis Sargentodoxae) and *Ji Xue Teng* (Caulis Spatholobi) are sometimes used interchangeably in certain parts of China. Both herbs invigorate blood circulation, open channels and collaterals, and relieve pain. The difference, however, is that *Hong Teng* treats intestinal abscess while *Ji Xue Teng* invigorates and tonifies blood. These two herbs have some similarities yet significantly distinct functions, and should not be confused or substituted casually for each other.

According to Dr. Zhang Liang-Lin, *Hong Teng*, *Bai Jiang Cao* (Herba cum Radice Patriniae), *Yi Yi Ren* (Semen Coicis) and *Gan Cao* (Radix Glycyrrhizae) work synergistically to drain dampness and dispel excessive vaginal discharge.

Bai Jiang Cao (Herba cum Radice Patriniae)

敗醬草 败酱草

Pinyin Name: *Bai Jiang Cao*
Literal Name: "spoiled paste herb"
Alternate Chinese Names: *Bai Jiang, Ku Cai*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: thlaspi, dahurian patrinia herb, white flower patrinia
Botanical Name: *Patrinia scabiosaefolia* Fisch. Ex Link. (*Huang Hua Bai Jiang*); *Patrinia villosa* Juss. (*Bai Hua Bai Jiang*)
Pharmaceutical Name: Herba cum Radice Patriniae
Properties: acrid, bitter, cool
Channels Entered: Stomach, Large Intestine, Liver

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins, Drains Pus and Abscesses

Abscess: Acrid, bitter and cold, *Bai Jiang Cao* (Herba cum Radice Patriniae) is commonly used to eliminate heat and toxins with or without the accompanying formation of abscesses. Clinical applications include intestinal or lung abscesses and various swellings, sores, lesions and pain. This herb is especially effective in the treatment of intestinal abscess.

- Intestinal abscesses with pus: use *Bai Jiang Cao* with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Yi Yi Ren* (Semen Coicis).
- Intestinal abscesses with no pus: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Da Huang* (Radix et Rhizoma Rhei) and *Mu Dan Pi* (Cortex Moutan).
- Lung abscess with fever, and cough with mucus and blood: combine *Bai Jiang Cao* with *Yu Xing Cao* (Herba Houttuyniae), *Huang Qin* (Radix Scutellariae) and *Jie Geng* (Radix Platycodonis).

2. Resolves Bruises and Relieves Pain

Chest and abdominal pain: *Bai Jiang Cao* enters the blood to eliminate blood stasis and relieve pain. It is commonly used to treat chest and abdominal pain, abdominal fullness and masses due to blood stasis, or postpartum abdominal pain caused by blood stasis.

- Blood stasis: combine it with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) and *Xiang Fu* (Rhizoma Cyperi).

DOSAGE

6 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Bai Jiang Cao* is contraindicated in patients experiencing abdominal pain from cold and deficiency.
- Use of *Bai Jiang Cao* may be associated with possible drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Villoside, loganin, morroniside, patrinoside, scabioside, oleanolic acid, hederagenin, daucosterol.[1]

PHARMACOLOGICAL EFFECTS

- **Sedative and hypnotic**: Both alcohol extract and essential oil of *Bai Jiang Cao* have demonstrated marked sedative and hypnotic effects. They also potentiate the effect of barbiturates. The sedative and hypnotic effect of *Bai Jiang Cao* is approximately double that of *Xie Cao* (Radix et Rhizoma Valerianae).[2]
- **Hepatoprotective**: *Bai Jiang Cao* promotes the generation of hepatocytes and prevents mutation.[3]
- **Antibiotic**: *Bai Jiang Cao* has an inhibitory effect against *Staphylococcus aureus*, *Staphylococcus albus*, *Corynebacterium diphtheriae*, and influenza viruses.[4]

CLINICAL STUDIES AND RESEARCH

- **Insomnia:** In a clinical study, 406 patients with insomnia characterized by neurasthenia were treated with alcohol tincture, alcohol extract, and essential oil of *Bai Jiang Cao*. The study reported that the essential oil was most effective, with a success rate of over 50%. The results with alcohol tincture and alcohol extract were less satisfactory.[5]

Bai Jiang Cao (Herba cum Radice Patriniae)

- **Common colds and influenza:** In one study, 2,233 patients with common colds and 401 patients with influenza were treated with preparations of *Bai Jiang Cao* with 82.2% and 86.5% overall rates of effectiveness, respectively. Dosage forms included decoction and pills. The herbal treatment was most effective in alleviating fever, aversion to cold, stuffy nose, runny nose and body aches. No significant side effects were reported.[6]

HERB-DRUG INTERACTION

- **Sedatives:** *Bai Jiang Cao* has marked sedative and hypnotic effects. Concurrent administration of the herb with barbiturates will lead to prolonged sedation.[7] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

Hu Yao Huang (Herba Leucas Mollissimae)

虎咬癀

Pinyin Name: *Hu Yao Huang*
Alternate Chinese Names: *Bai Hua Cao*
English Name: leucas
Botanical Name: *Leucas mollissima* Wall. var. *chinensis* Benth
Pharmaceutical Name: Herba Leucas Mollissimae
Properties: bitter, cool
Channels Entered: Large Intestine, Small Intestine, Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Hu Yao Huang (Herba Leucas Mollissimae) has a general and broad-ranging heat-clearing effects. It treats infection and inflammation in many parts of the body.

- Enteritis: use *Hu Yao Huang* with *Ma Bian Cao* (Herba Verbenae), *Pao Zai Cao* (Herba Physalis Angulatae), and *Xian Feng Cao* (Herba Bidentis). It can be combined with *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction) for best results.
- Appendicitis: use this herb with *Ma Bian Cao* (Herba Verbenae), *Da Huang* (Radix et Rhizoma Rhei), *Mu Dan Pi* (Cortex Moutan), and *Dong Gua Zi* (Semen Benincasae).
- Dysentery: combine it with *Feng Wei Cao* (Herba Pteris) and *Chuan Xin Lian* (Herba Andrographis), or with *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction).
- Lung heat with cough: add *Fu Rong* (Radix Hibisci) and *Da Qing Ye* (Folium Isatidis).

Hu Yao Huang (Herba Leucas Mollissimae)

- Leukorrhea: use *Hu Yao Huang* with *Yi Mu Cao* (Herba Leonuri), *Long Yan Hua* (Flos Longan) and *Bai Guo* (Semen Ginkgo).
- Summer-heat stroke: combine it with *Feng Wei Cao* (Herba Pteris), *He Ye* (Folium Nelumbinis), *Ji Xue Cao* (Herba Centellae), *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Jaundice: use it with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Zi* (Fructus Gardeniae).

2. Invigorates Blood Circulation, Promotes Diuresis

- Uterine infection: use *Hu Yao Huang* with *Ma Bian Cao* (Herba Verbenae), *Feng Wei Cao* (Herba Pteris), and *Xian Feng Cao* (Herba Bidentis).
- Nephritis, dysuria: use it with *Hai Jin Sha* (Herba Lygodii), *Jin Qian Cao* (Herba Lysimachiae) and *Bai Mao Gen* (Rhizoma Imperatae).

DOSAGE

6 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Hu Yao Huang* is contraindicated during pregnancy.

Huang Shui Qie (Herba Solani)

黄水茄 黄水茄

Pinyin Name: *Huang Shui Qie*
Alternate Chinese Names: *Huang Guo Qie*
English Name: solanum
Botanical Name: *Solanum xanthocarpum* Schrad. et Wendl. (*Huang Guo Qie*)
Pharmaceutical Name: Herba Solani
Properties: acrid, bitter, cold
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Anchors Liver Yang, Eliminates Toxins, Reduces Inflammation and Relieves Pain

Liver fire: *Huang Shui Qie* (Herba Solani) treats various disorders caused by Liver fire. It is a strong toxin-eliminating herb that has been recently used for hepatitis A, B and C.

- Hepatitis: use *Huang Shui Qie* with *Hua Shi Cao* (Herba Orthosiphon Aristatus), *Bai Jiang Cao* (Herba cum Radice Patriniae), *Hu Zhang* (Rhizoma Polygoni Cuspidati) and *Hu Yao Huang* (Herba Leucas Mollissimae).
- Liver cirrhosis: use it with *Zhi Zi* (Fructus Gardeniae), *Wu Tian* (Radix et Folium Viticis Quinatae), and *Hu Zhang* (Rhizoma Polygoni Cuspidati). For best result, use it with *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).
- Eye disorders caused by excess conditions: combine this

herb with *Qian Li Guang* (Herba Senecionis Scandens), *Xia Ku Cao* (Spica Prunellae) and *Jue Ming Zi* (Semen Cassiae).
- Sinusitis: use it with *Fu Rong* (Radix Hibisci) and *Wu Tian* (Radix et Folium Viticis Quinatae).
- Itchy skin and various dermatological disorders: use it with *Fang Feng* (Radix Saposhnikoviae), *Jing Jie* (Herba Schizonepetae), *Ku Shen Gen* (Radix Sophorae Flavescentis), *Bai Hua She She Cao* (Herba Oldenlandia) and *Ban Zhi Lian* (Herba Scutellariae Barbatae).
- Pleuritis and edema: combine it with *Ding Shu Xiu* (Herba Elephantopus Scaber) and *Shan Pu Tao* (Radix Vitis Amurensis).

DOSAGE

3 to 9 grams in decoction.

CHEMICAL COMPOSITION

Solasonine, solamargine, solasurine, solasodine, methyl caffeate, caffeic acid.[1]

Shan Ma Ti (Radix Rauvolfiae)

山馬蹄 山马蹄

Pinyin Name: *Shan Ma Ti*
Alternate Chinese Names: *Luo Fu Mu, Shan Hu Jiao, Bai Hua Lian, Du Gou Yao*
English Name: devil pepper root
Botanical Name: *Rauvolfia verticillata* (Lour.) Baill (*Luo Fu Mu*)
Pharmaceutical Name: Radix Rauvolfiae
Properties: bitter, cold
Channels Entered: Lung, Liver, Heart
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Invigorates Blood Circulation, Relieves Pain, Clears Heat and Toxins

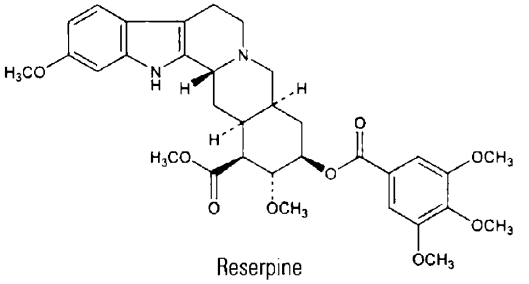
Shan Ma Ti (Radix Rauvolfiae) treats toxic snake bites, sore throat, bleeding from knife wounds, dermatological lesions, herpes zoster, leukorrhea, and heat stroke.
- Toxic snake bites or bleeding from knife wounds: crush the leaves of *Shan Ma Ti* and apply topically.
- Sore throat: use it with *Da Qing Ye* (Folium Isatidis), *She Gan* (Rhizoma Belamcandae) and *Zao Xiu* (Rhizoma Paridis).
- Dermatological lesions: combine it with *Ku Shen Gen* (Radix Sophorae Flavescentis), *Ren Dong Teng* (Caulis Lonicerae), *Wan Dian Jin* (Radix Ilicis Asprellae), and *Dao Di Wu Gong* (Rhizoma Heliminthostachytis). It can also be used alone as an external wash.
- Herpes zoster: add *Ma Bian Cao* (Herba Verbenae) and *Qi Li San* (Seven-Thousandths of a Tael Powder).
- Leukorrhea: use *Shan Ma Ti* with *Ji Guan Hua* (Flos Celosiae Cristatae) and *Bai Long Chuan Hua Tou* (Radix Clerodendron Paniculatum).
- Heat stroke: combine it with *Hu Yao Huang* (Herba Leucas Mollissimae) and *Feng Wei Cao* (Herba Pteris).

2. Anchors Rising Liver Yang and Lowers Blood Pressure

- Hypertension: use *Shan Ma Ti* with *Cha Chi Huang* (Herba Stellariae Aquaticae), *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Xia Ku Cao* (Spica Prunellae), and *Xi Xian Cao* (Herba Siegesbeckiae).

DOSAGE

3 to 15 grams in decoction.



Shan Ma Ti (Radix Rauvolfiae)

CAUTIONS / CONTRAINDICATIONS

Shan Ma Ti is contraindicated in patients with weak digestive systems, or in cases of qi and blood deficiencies.

CHEMICAL COMPOSITION

Serpine, raujemidine, aricine, isoreserpiline, yohimbine isomer, reserpiline, reserpine.[1,2]

Reserpine

Pu Yin (Radix Wikstroemia Indica)

埔銀 埔银

Pinyin Name: *Pu Yin*
Alternate Chinese Names: *Jiu Xin Yao, Liao Ge Wang, Jin Yao Dai, Shan Pu Run*
English Name: Indian stringbush
Botanical Name: *Wikstroemia indica* C.A. Mey.
Pharmaceutical Name: Radix Wikstroemia Indica
Properties: bitter, cold
Channels Entered: Lung, Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Eliminates Toxins, Breaks Masses and Dispels Water

Pu Yin (Radix Wikstroemia Indica) has a general effect to clear heat and eliminate toxins.

- Pneumonia, tonsillitis, scrofula: use *Pu Yin* with *Da Qing Ye* (Folium Isatidis), *Ban Lan Gen* (Radix Isatidis) and *Zao Jiao* (Fructus Gleditsiae).
- Liver cirrhosis with ascites: add it with *Bai Jiang Cao* (Herba cum Radice Patriniae) to *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).
- Gout, arthritis: use it with *Yi Tiao Gen* (Radix Moghaniae).
- Carbuncles and toxic lesions: Apply *Pu Yin* topically.

DOSAGE

3 to 9 grams.

CAUTIONS / CONTRAINDICATIONS

- *Pu Yin* is contraindicated during pregnancy and for those experiencing deficiency and cold.

OVERDOSAGE

Vomiting, abdominal pain, diarrhea, swelling of the throat, difficult respiration, and unconsciousness has been associated with overdose of *Pu Yin*.

TREATMENT OF OVERDOSAGE

Overdose of *Pu Yin* is treated with administration of

milk or egg whites with decoction of 30 grams of *Jie Geng* (Radix Platycodonis). Another formula that is also beneficial contains *Shi Chang Pu* (Rhizoma Acori) 30g, *Hei Dou* (Semen Glycine Max) 15g, *Lu Gen* (Rhizoma Phragmitis) 120g, *Bai Mao Gen* (Rhizoma Imperatae) 30g and *Jin Yin Hua* (Flos Lonicerae) 15g.

AUTHORS' COMMENTS

According to Dr. Cheng Jian-Hua, *Pu Yin* treats lung and liver cancer when taken internally, and skin cancer when applied topically.

Shu Wei Huang (Herba Rostellulariae)

鼠尾癀

Pinyin Name: *Shu Wei Huang*
Alternate Chinese Names: *Jue Chuang, Ci Wei Huang, Su Wei Hong*
English Name: rostellularia, justicia
Botanical Name: *Rostellularia procumbens* (L.); *Justicia procumbens* (L.)
Pharmaceutical Name: Herba Rostellulariae
Properties: bitter, cold
Channels Entered: Liver, Lung

CHINESE THERAPEUTIC ACTIONS

Regulates Qi, Invigorates Blood and Reduces Inflammation

Shu Wei Huang (Herba Rostellulariae) moves qi and blood circulation to clear heat and reduce inflammation.

- Wind-heat invasion causing sore throat: use *Shu Wei Huang* with *Da Qing Ye* (Folium Isatidis) and *Ban Lan Gen* (Radix Isatidis).
- Scrofula: combine *Shu Wei Huang* with *Xia Ku Cao* (Spica Prunellae).
- Summer-heat stroke: use it with *Feng Wei Cao* (Herba Pteris), *Hu Yao Huang* (Herba Leucas Mollissimae), *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Sores, carbuncles, cellulitis, toxic swellings: combine this herb with *Pao Zai Cao* (Herba Physalis Angulatae), *Xian Feng Cao* (Herba Bidentis), *Zao Jiao Ci* (Spina Gleditsiae), *Chuan Shan Jia* (Squama Manis), *Fang Feng* (Radix Saposhnikoviae), *Bai Zhi* (Radix Angelicae Dahuricae), *Tian Hua Fen* (Radix Trichosanthis), *Jin Yin Hua* (Flos Lonicerae) and *Lian Qiao* (Fructus Forsythiae) for internal use. Externally, use it with *Pao Zai Cao* (Herba Physalis Angulatae) and *Xian Feng Cao* (Herba Bidentis).
- Gonorrhea or sexually-transmitted diseases caused by damp-heat with yellow discharge: combine *Shu Wei Huang* with *Long Dan Cao* (Radix Gentianae), *Huang Qin* (Radix Scutellariae), *Che Qian Zi* (Semen Plantaginis), *Chuan Mu Tong* (Caulis Clematidis Armandii), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Bian Xu* (Herba Polygoni Avicularis), and *Qu Mai* (Herba Dianthi).

DOSAGE

5 to 15 grams

CAUTIONS / CONTRAINDICATIONS

- Use *Shu Wei Huang* with caution in patients with deficiency and cold of the Spleen and Stomach.
- *Shu Wei Huang* is contraindicated during pregnancy.

Xiang Si Cao (Herba Eupatorii Formosani)

相思草 相思草

Pinyin Name: *Xiang Si Cao*
Alternate Chinese Names: *Liu Yue Xue, Shan Ze Lan, Da Ben Bai Hua Zai Cao, Jian Wei Feng*
English Name: eupatorium
Botanical Name: *Eupatorium formosanu*
Pharmaceutical Name: Herba Eupatorii Formosani
Properties: neutral, cool
Channels Entered: Lung, Large Intestine, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Eliminates Toxins, Reduces Swelling, Opens Channels and Promotes Urination

Xiang Si Cao (Herba Eupatorii Formosani) has a general effect to clear heat, eliminate toxins, and reduce accumulation of water.

- Acute appendicitis, abdominal pain: use *Xiang Si Cao* with *Xian Feng Cao* (Herba Bidentis), *Dong Gua Zi* (Semen Benincasae), *Da Huang* (Radix et Rhizoma Rhei) and *Mu Dan Pi* (Cortex Moutan).
- Pleurisy: use it with *Wang Bu Liu Xing* (Semen Vaccariae), *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae), *Chi Shao* (Radix Paeoniae Rubrae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Da Qing Ye* (Folium Isatidis), *Pu Gong Ying* (Herba Taraxaci), and *Ban Lan Gen* (Radix Isatidis).
- Pneumonia: combine it with *Wan Dian Jin* (Radix Ilicis Asprellae), *Da Qing Ye* (Folium Isatidis), *Yu Xing Cao* (Herba Houttuyniae), *Yi Zhi Xiang* (Herba Vernoniae Cinereae), *Pu Gong Ying* (Herba Taraxaci), and *Huang Qin* (Radix Scutellariae).
- Leukemia: add *Bai Hua She She Cao* (Herba Oldenlandia) and *Ban Zhi Lian* (Herba Scutellariae Barbatae).
- High uric acid: combine this herb with *Shan Pu Tao* (Radix Vitis Amurensis), *Shui Ding Xiang* (Herba Ludwigiae Prostratae), and *Ding Shu Xiu* (Herba Elephantopus Scaber).
- Diabetes: add *Huang Shui Qie* (Herba Solani), *Yu Mi Xu* (Stigma Maydis), *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Hypertension: use it with *Xia Ku Cao* (Spica Prunellae), *Tian Ma* (Rhizoma Gastrodiae) and *Jue Ming Zi* (Semen Cassiae).

DOSAGE

6 to 30 grams in decoction.

Ya She Huang (Herba Lippiae)

鴨舌癀　鸭舌癀

Pinyin Name: *Ya She Huang*
Literal Name: "duck tongue yellow"
Alternate Chinese Names: *Ya Zuai Huang, Shi Chi*
English Name: lippia
Botanical Name: *Lippia nodiflora* (Linn.) L.C. Richard.
Pharmaceutical Name: Herba Lippiae
Properties: acrid, bitter, cool
Channels Entered: Liver, Kidney
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

Regulates Menstruation and Reduces Inflammation

Ya She Huang (Herba Lippiae) effectively clears heat and reduces inflammation. It is commonly used for treating gynecological disorders.

- Irregular menstruation, amenorrhea or menstrual pain because of blood stagnation and heat in the lower *jiao*: use *Ya She Huang* with *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction).
- White discharge: combine it with *Ji Guan Hua* (Flos Celosiae Cristatae) and *Ma Chi Xian* (Herba Portulacae).
- Infertility due to chronic inflammation of the pelvic cavity: use this herb with *Feng Wei Cao* (Herba Pteris), *Ya She Huang* (Herba Lippiae), *Ma Bian Cao* (Herba Verbenae), *Hong Hua* (Flos Carthami), *Mu Dan Pi* (Cortex Moutan), *Tao Ren* (Semen Persicae), and *Chi Shao* (Radix Paeoniae Rubrae). *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) can also be added to enhance the overall effect.
- Gonorrhea: use it with *Feng Wei Cao* (Herba Pteris) and *Yi Mu Cao* (Herba Leonuri). Combine it with *Ba Zheng San* (Eight-Herb Powder for Rectification) to enhance the overall effect.
- Herpes zoster: apply *Ya She Huang* powder externally.
- Tonsillitis, parotitis, upper respiratory infection or toxic swelling: use it with *Da Qing Ye* (Folium Isatidis), *Ma Bo* (Lasiosphaera seu Calvatia) and *Shu Wei Huang* (Herba Rostellulariae).

DOSAGE

6 to 15 grams in decoction.

CHEMICAL COMPOSITION

Flavonoids.

Lu Dou (Semen Phaseoli Radiati)

綠豆 绿豆

Pinyin Name: *Lu Dou*
Literal Name: "green beans"
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: mung beans, phaseolus
Botanical Name: *Phaseolus radiatus* L. (*Lu Dou*)
Pharmaceutical Name: Semen Phaseoli Radiati
Properties: sweet, cold
Channels Entered: Heart, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Relieves Toxicity

Lu Dou (Semen Phaseoli Radiati) is commonly used to dispel heat and toxins from the exterior of the body, treating disorders such as carbuncles, furuncles, sores, and ulcers. It is also an effective antidote for the overdose of many toxic substances.

- Heat and toxins on the exterior: use *Lu Dou* as a single-herb remedy for internal consumption. This herb can also be applied topically in combination with *Da Huang* (Radix et Rhizoma Rhei), *Bo He* (Herba Menthae) and honey.
- Overdose of *Ba Dou* (Fructus Crotonis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) causing irritation and thirst: use *Lu Dou* individually. It can also be combined with *Huang Lian* (Rhizoma Coptidis) and *Gan Cao* (Radix Glycyrrhizae) for a stronger effect.

2. Dispels Summer-Heat and Relieves Thirst

Lu Dou is commonly used as food or dessert in the summertime to clear heat, relieve thirst, alleviate restlessness, and lower body temperature. It is also effective to prevent heat stroke due to summer-heat.

DOSAGE

15 to 30 grams. *Lu Dou* may safely be used up to 120 grams in decoction in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Lu Dou* should be used with caution in patients with deficiency and cold of the Spleen and Stomach characterized by loose stools.

CHEMICAL COMPOSITION

Phosphatidyl choline, phosphatidylethanolamine, phosphatidylinositol, phosphatidylglycerol, phosphatidylserine, phosphatidic acid, protein, carbohydrates, calcium, phosphorus, iron, vitamin A, B, C.[1]

CLINICAL STUDIES AND RESEARCH

- **Pesticide poisoning**: Three farmers experiencing pesticide poisoning were treated with an herbal solution with complete recovery after 3 doses. The herbal solution was prepared by soaking 500 grams of finely-powdered *Lu Dou* with 60 grams of salt in 2,000 ml of water for several minutes. The residue of the herbs was filtered out prior to ingestion of the herbal solution.[2]
- **Heat stroke**: According to one report, heat stroke in summer can be prevented by ingestion of an herbal formula that contains 500 grams of *Lu Dou*, and 30 grams of *Gan Cao* (Radix Glycyrrhizae), cooked in 5,000 ml of water to yield the final decoction. The herbal decoction may be taken warm or cold.[3]

SUPPLEMENT

- 綠豆衣 / 绿豆衣 *Lu Dou Yi* (Pericarpium Phaseoli Radiati), first cited in *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D., is the outer skin of the seed. *Lu Dou Yi* is sweet and cold, and enters the Heart and Stomach. In comparison with *Lu Dou*, *Lu Dou Yi* has similar but weaker functions to clear summer-heat and dampness and eliminate toxins. The dosage is 6 to 12 grams.
- 黑豆 *Hei Dou* (Semen Glycine Max), also referred to as black bean or black soybean, is another commonly used

herb. Its main functions and indications for use are: to tonify the Kidney to relieve lower back and knee weakness and pain, to nourish the skin and muscles for better physical appearance, and to clear heat and relieve toxicity in cases of overdose and poisoning.

AUTHORS' COMMENTS

According to Dr. Zhang Xue-Wen, *Lu Dou*, *Gan Cao* (Radix Glycyrrhizae), and *Bai Mao Gen* (Rhizoma Imperatae) are an effective combination to treat food poisoning. *Lu Dou* and *Gan Cao* clear heat and toxins, and are commonly used to eliminate toxicity from herbs, drugs and food. *Bai Mao Gen* clears heat and promotes diuresis to quickly dispel toxins from the body, prevents internal bleeding, and protects the kidneys.

He Ye (Folium Nelumbinis)

荷葉 荷叶

Pinyin Name: *He Ye*
Literal Name: "lotus leaves"
Alternate Chinese Names: *Ou Ye*
Original Source: *Shi Liao Ben Cao* (Materia Medica of Diet Therapy) by Meng Shan in the seventh Century
English Name: lotus leaf
Botanical Name: *Nelumbo nucifera* Gaertn. (*Lian*)
Pharmaceutical Name: Folium Nelumbinis
Properties: bitter, astringent, neutral
Channels Entered: Heart, Liver, and Spleen

CHINESE THERAPEUTIC ACTIONS

1. Clears Summer-Heat and Dissolves Dampness

Summer-heat: *He Ye* (Folium Nelumbinis) clears summer-heat and dampness, a condition characterized by fever, irritability, sweating, and scanty urine.

- Summer-heat and dampness: use *He Ye* with *Jin Yin Hua* (Flos Lonicerae), *Bian Dou Hua* (Flos Lablab Album), *Xi Gua* (Fructus Citrulli) and *Hou Po* (Cortex Magnoliae Officinalis).
- Obesity: cook *He Ye* and *Yi Yi Ren* (Semen Coicis) together and drink daily as tea.

2. Stops Bleeding

Bleeding: *He Ye* treats bleeding disorders. It is commonly used with other herbs that have hemostatic functions.

He Ye (Folium Nelumbinis)

DOSAGE

3 to 10 grams. Unprocessed *He Ye* functions more effectively to clear heat. The charred herb more strongly stops bleeding.

CAUTIONS / CONTRAINDICATIONS

- *He Ye* should be used with caution if the cause of bleeding is cold.

AUTHORS' COMMENTS

There are eight parts of the lotus plant that are used as medicines. Please refer to *Lian Zi* (Semen Nelumbinis) for complete description.

Section 5

— Deficiency-Heat Clearing Herbs

Qing Hao (Herba Artemisiae Annuae)

青蒿 青蒿

Pinyin Name: *Qing Hao*
Literal Name: "bluegreen artemisia"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: artemisia, sweet wormwood herb
Botanical Name: *Artemisia annua* L. (*Huang Hua Hao*); *Artemisia apiacea* Hance (*Qing Hao*)
Pharmaceutical Name: Herba Artemisiae Annuae
Properties: bitter, acrid, cold
Channels Entered: Liver, Gallbladder, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Treats Malaria

Malaria with alternating chills and fever: *Qing Hao* (Herba Artemisiae Annuae) is traditionally used to clear heat, summer-heat or damp-heat. However, its most distinct function is in the treatment of malaria, where its effectiveness is confirmed by both historical data and modern pharmacology. *Qing Hao* can be used individually or in combination with other herbs to treat malaria and relieve alternation of fever and chills. Fresh *Qing Hao* given as juice is most effective for this application.

- Malaria: use a large dose of fresh *Qing Hao* by itself.
- Malaria with nausea, vomiting and feelings of oppression in the chest due to damp-heat: use this herb with *Huang Qin* (Radix Scutellariae) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula**: *Hao Qin Qing Dan Tang* (Artemisia Annua and Scutellaria Decoction to Clear the Gallbladder).
- Malaria with alternating chills and fever: add *Qing Hao* to *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).

2. Clears Yin-Deficient Heat

Yin-deficient heat: Clinical manifestations of yin-deficient heat include steaming-bones sensations with no perspiration, tidal fever, unremitting low-grade fever, *wu xin re* (five-center heat), thirst, soreness and weakness of the lower back and knees, and irritability. *Qing Hao* has distinct ventilating and dispersing functions without consuming yin or body fluids. Therefore, it is commonly used to clear heat in patients who have an underlying yin deficiency.

- Yin-deficient heat: use *Qing Hao* with *Bie Jia* (Carapax Trionycis), *Zhi Mu* (Radix Anemarrhenae), and *Qin Jiao* (Radix Gentianae Macrophyllae).

3. Cools Blood

Late-stage febrile disorders: Clinically, the patient will experience feelings of warmth at night and chills in the morning, constant feelings of warmth or low-grade fever, thirst, flushed face, irritability, and an absence of perspiration. *Qing Hao* is commonly used to treat chronic febrile disorders where the heat factor has entered the *ying* (nutritive) level.

Qing Hao (Herba Artemisiae Annuae)

- Heat in the *ying* (nutritive) level with constant feverish sensations: use *Qing Hao* with *Bie Jia* (Carapax Trionycis), *Mu Dan Pi* (Cortex Moutan) and *Sheng Di Huang* (Radix Rehmanniae). **Exemplar Formula**: *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-shelled Turtle Shell Decoction).

4. Clears Summer-Heat or Damp-Heat

Qing Hao treats summer-heat or damp-heat characterized by fever, with or without perspiration, heavy limbs, and a stifling sensation in the chest. Fresh *Qing Hao* is most effective for this application.

- Summer-heat or damp-heat: use this herb with *He Ye* (Folium Nelumbinis).
- Summer-heat or damp-heat in infants or children with fever and dysuria: add *Che Qian Cao* (Herba Plantaginis).

5. Clears Liver Heat and Brightens the Eyes

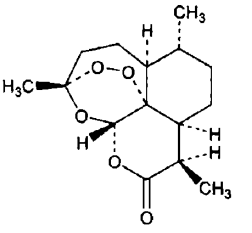
Eye disorders: *Qing Hao* treats Liver Yang rising that is causing red eyes, dizziness, and photophobia.

- Disorders of the eyes: use *Qing Hao* with *Ju Hua* (Flos Chrysanthemi), *Shi Jue Ming* (Concha Haliotidis), *Jue Ming Zi* (Semen Cassiae) and *Huang Qin* (Radix Scutellariae).

Damp-heat jaundice: Accompanying symptoms may include dysuria and scanty, yellow urine.

- Jaundice: use *Qing Hao* with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Huang Bai* (Cortex Phellodendri), *Che Qian Zi* (Semen Plantaginis) and *Zhi Zi* (Fructus Gardeniae).

DOSAGE



3 to 10 grams in decoction. *Qing Hao* should only be cooked for a short period of time as a decoction. *Qing Hao* may be used in decoctions or as juice squeezed from the fresh herb. The fresh herb squeezed into juice is often more effective than decoction, as the active constituents have not been destroyed by heat.

CAUTIONS / CONTRAINDICATIONS

- *Qing Hao* should be used with caution in patients who have deficiency and cold of the Spleen and Stomach.
- *Qing Hao* should be cooked only for a short period of time, as heat may make the herb less effective.

CHEMICAL COMPOSITION

Artemisinin, arteannuin, essential oils 0.20-0.25% (artemisia ketone, isoartemisia ketone, camphene, β-pinene, β-caryophyllene, l-camphor).[1,2]

Artemisinin

PHARMACOLOGICAL EFFECTS

- **Antimalarial**: Artemisinin has demonstrated excellent effectiveness against malarial parasites. It is one of the most powerful schizonticidal agents to treat falciparum malaria. The mechanism of this antimalarial effect is believed to be associated with the blocked utilization of host erythrocyte protein by the plasmodium, causing starvation and death. However, this compound is not effective as a prophylactic agent because it affects neither the sexual nor the exoerythrocytic forms of the plasmodium.[3,4,5]
- **Antibiotic**: Decoction of *Qing Hao* has been shown to inhibit *Staphylococcus aureus*, *Neisseria catarrhalis*, *Bacillus anthracis*, *Corynebacterium diphtheriae*, *Pseudomonas aeruginosa*, *Bacillus dysenteriae*, and *Mycobacterium tuberculosis*. The essential oil of *Qing Hao* is effective against some dermatophytes.[6,7]
- **Antihypertensive**: Intravenous injection of arteannuin in rabbits lowered blood pressure, decreased heart rate, inhibited contraction of the cardiac muscle, and decreased blood perfusion to the coronary artery. In another study, intravenous injection of *Qing Hao* at 20 mg/kg was effective in treating aconitine-induced arrhythmias in rabbits.[8,9]
- **Antipyretic**: Injection of *Qing Hao* was effective in reducing body temperature in rabbits with artificially-induced fevers.[10]
- **Cholagogic**: *Qing Hao* has been shown to increase the production and excretion of bile in rats.[11]

CLINICAL STUDIES AND RESEARCH

- **Malaria**: The use of *Qing Hao* in treatment of malaria is well-established. In one study, 488 patients with malaria were treated with preparations of *Qing Hao* with close to 100% effectiveness. In another study, 125 patients with malaria were treated with preparations of *Qing Hao* three hours prior to the onset of illness. *Qing Hao* was administered as decoction (the herbs were cooked for no more than 15 minutes), tea (the herbs were soaked in 60° C water for 24 hours), and juice (the fresh herbs were put through a juicer). The dosage was 120 grams of fresh *Qing Hao*. The success rate was approximately 80%. Lastly, a study including 2,009 patients with malaria demonstrated that the participants were effectively

Qing Hao (Herba Artemisiae Annuae)

treated with preparations of *Qing Hao* through intramuscular injection.[14]

- **Chronic bronchitis:** Essential oil of *Qing Hao* demonstrated marked expectorant, antitussive and antiasthmatic effects in 1,485 patients with chronic bronchitis.[15]
- **High fever:** Intramuscular injections of a *Qing Hao* preparation were given one to two times daily to 126 patients with high fever, with an effective rate of 68.25%.[16]

HERB-DRUG INTERACTION

- **Azole antifungals and calcium channel blockers:** Artelinic acid (AL), a water-soluble artemisinin analogue for treatment of multi-drug resistant malaria, is metabolized to the active metabolite dihydroqinghaosu (DQHS) solely by liver enzyme CYP3A4/5. In human liver microsomes, ketoconazole and miconazole were potent competitive inhibitors of DQHS formation. Verapamil is a non-competitive inhibitor of DQHS formation in human liver microsomes. Therefore, it has been suggested that azole antifungals and calcium channel blockers may present clinically significant herb-drug interactions with *Qing Hao*.[17] [Note: Examples of azole antifungals include griseofulvin (Gris-PEG), nystatin (Mycostatin), ketoconazole (Nizoral), fluconazole (Diflucan), and itraconazole (Sporanox); and examples of calcium channel blockers include nifedipine (Procardia/Adalat), amlodipine (Norvasc), diltiazem (Cardizem), and verapamil (Calan/Isoptin/Verelan).]

TOXICOLOGY

Qing Hao has shown few adverse reactions in toxicology studies. In acute toxicology studies, the LD_{50} was not determined as no fatalities were observed in the subjects. In chronic toxicology studies, no abnormalities were reported in heart, liver, kidney, and other vital organs following long-term administration.[18]

AUTHORS' COMMENTS

According to the World Health Organization (WHO), over 1.5 million malaria patients in southeast Asia and Latin America were treated with artemisinin, a constituent of *Qing Hao*. In China, *falciparum plasmodium* resistance to chloroquine is 84.6%, but only 2.2-2.4% to artemisinin. Thus, artemisinin has completely replaced chloroquine and quinine as drugs of choice for treatment of malaria. However, it is important to keep in mind that while artemisinin is effective as a drug for treatment, it is not effective as a casual prophylactic agent.[19]

According to Dr. Cheng Chun-Fu, the decoction of *Qing Hao* and *Mang Xiao* (Natrii Sulfas) used to wash the scalp, relieves itching and dandruff and treats hair loss. This topical combination also clears redness, itching and rashes in the axillary and genital areas.

Bai Wei (Radix Cynanchi Atrati)

白薇 白薇

Pinyin Name: *Bai Wei*
Literal Name: "white rose"
Alternate Chinese Names: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cynanchum, blackened swallowwort root, versicolorous swallowwort root
Botanical Name: *Cynanchum atratum* Bge. (*Bai Wei*); *Cynanchum versicolor* Bge. (*Man Sheng Bai Wei*)
Pharmaceutical Name: Radix Cynanchi Atrati
Properties: bitter, salty, cold
Channels Entered: Stomach, Liver

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Cools Blood

Heat in the *ying* (nutritive) level: Bitter and cold in nature, *Bai Wei* (Radix Cynanchi Atrati) clears heat and cools blood. It treats both deficiency heat and excess heat. Deficiency heat is often characterized by yin or blood deficiency caused by chronic illness. *Bai Wei* is most helpful in the recovery stage of febrile disorders: in these cases, the high fever has subsided, but injured yin causes difficulties for the body in restoring normal qi, and yin-deficient heat signs persist. The most common signs and symptoms include unremitting low-grade fever, *wu xin re* (five-center heat), flushed face, irritability and steaming bones sensations, poor appetite, and in severe cases, heat sensations at night and cold sensations in the morning.

- Late-stage febrile disorders characterized by lingering fever due to yin deficiency and heat: use *Bai Wei* with *Di Gu Pi* (Cortex Lycii), *Mai Men Dong* (Radix Ophiopogonis) and *Sheng Di Huang* (Radix Rehmanniae).
- Fever, steaming bones sensations and night sweats because of yin-deficient heat: use it with *Di Gu Pi* (Cortex Lycii) to dispel yin-deficient heat.

Heat in postpartum women: Other clinical manifestations of heat include nausea, irritability, feverish sensations, enuresis or burning urination. *Bai Wei* enters the *chong* (thoroughfare) and *ren* (conception) channels to clear heat in the *xue* (blood) level. Deficiency heat symptoms in postpartum women are often the result of sudden loss of blood.

- Postpartum fever due to blood deficiency and heat: use this herb with *Dang Gui* (Radicis Angelicae Sinensis) and *Ren Shen* (Radix Ginseng) to clear heat and nourish qi and blood.

Exterior wind-heat or Lung heat: *Bai Wei* can be used to treat wind-heat in the exterior or Lung heat with or without an underlying yin deficiency. The chief manifestations are cough with fever and yellow phlegm.

- Exterior wind-heat syndrome with underlying yin deficiency: combine *Bai Wei* with *Bo He* (Herba Menthae), *Dan Dou Chi* (Semen Sojae Praeparatum) and *Yu Zhu* (Rhizoma Polygonati Odorati).
- Cough due to Lung heat: use this herb with *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Qian Hu* (Radix Peucedani) and *Pi Pa Ye* (Folium Eriobotryae).

2. Cools the Blood and Promotes Urination

***Lin zheng* (dysuria syndrome):** *Bai Wei* cools the blood and promotes normal urination. It is commonly used to treat burning and painful urination caused by *xue lin* (bloody dysuria) with heat.

- Postpartum dysuria: combine *Bai Wei* and *Bai Shao* (Radix Paeoniae Alba).
- *Xue lin* (bloody dysuria) with heat: use it with *Hua Shi* (Talcum), *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Sheng Di Huang* (Radix Rehmanniae).
- Prostate inflammation caused by heat in the lower *jiao*: combine it with *Che Qian Zi* (Semen Plantaginis) and *Hua Shi* (Talcum).

3. Eliminates Heat and Toxins

Presentations of heat and toxins include sore throat, skin lesions and abscesses, snake bites and similar ailments. *Bai Wei* may be used internally or topically to eliminate heat and toxins.

DOSAGE

3 to 12 grams in decoction. The maximum dosage of

Bai Wei (Radix Cynanchi Atrati)

Bai Wei is 30 grams. *Bai Wei* is used both internally and externally.

CAUTIONS / CONTRAINDICATIONS

- Cold in nature, *Bai Wei* should be used with caution in patients with deficiency and cold of the Spleen and Stomach, characterized by loose stools or decreased intake of food.
- *Bai Wei* should be used with caution in patients who do not have heat in the blood.

CHEMICAL COMPOSITION

Cynatratoside A, B, C, D, E, F; atratoside A, B, C, D; cynarersicoside C, D; neocynanversicoside, glaucogenin D.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Preparations of *Bai Wei* have shown positive inotropic and negative chronotropic effects. It is effective in treating congestive heart failure.[2]
- **Antibiotic:** It has an inhibitory effect *in vitro* against *Diplococcus pneumoniae*.[3]

CLINICAL STUDIES AND RESEARCH

- **Hemiplegia:** In one study, 3 patients with hemiplegia were treated with great success using an herbal decoction given once or twice daily. The herbal formula contained 15 grams of *Bai Wei*, 9 grams of *Ze Lan* (Herba Lycopi), and 6 grams of *Chuan Shan Jia* (Squama Manis).[4]

AUTHORS' COMMENTS

Historically, *Bai Wei* has been used as a key herb in treatment of malaria. However, while *Bai Wei* addresses the symptoms of deficiency heat, it does not have antimalarial action to treat the cause of this illness. Thus, *Bai Wei* is no longer used for treatment of malaria, but only for management of deficiency heat in post-febrile conditions.

Di Gu Pi (Cortex Lycii)

地骨皮 地骨皮

Pinyin Name: *Di Gu Pi*
Literal Name: "ground bone skin," "earth bone bark"
Alternate Chinese Names: *Gou Qi Gen Pi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: lycium root bark, barbary wolfberry root bark, Chinese wolfberry root bark
Botanical Name: *Lycium barbarum* (*Ning Xia Gou Ji*); *Lycium chinense* Mill (*Mu Gou Ji*)
Pharmaceutical Name: Cortex Lycii
Properties: sweet, bland, cold
Channels Entered: Lung, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Cools Blood and Relieves Steaming Bones Sensation

Yin deficiency with heat in the blood: *Di Gu Pi* (Cortex Lycii) enters the bones, clears heat from within, and relieves steaming bones sensations and night sweats.

- Steaming bones sensation with tidal fever and night sweats caused by yin deficiency and heat: use *Di Gu Pi*

Di Gu Pi (Cortex Lycii)

with *Zhi Mu* (Radix Anemarrhenae), *Bie Jia* (Carapax Trionycis) and *Qin Jiao* (Radix Gentianae Macrophyllae).
- *Gan ji* (infantile malnutrition) with heat sensations: use this herb with *Zhi Mu* (Radix Anemarrhenae) and *Bie Jia* (Carapax Trionycis).
- Fever, irritability and steaming bones sensation due to heat in the muscles and the bones: combine it with *Fang Feng* (Radix Saposhnikoviae) and *Gan Cao* (Radix Glycyrrhizae).

***Xiao ke* (wasting and thirsting) syndrome**: When heat damages body fluids over a long period of time, patients with *xiao ke* syndromes experience thirst, dry mouth, irritability and polyuria. *Di Gu Pi* is especially good for the type of thirst that cannot be relieved by water intake.
- *Xiao ke* syndrome: use *Di Gu Pi* with *Tian Hua Fen* (Radix Trichosanthis), *Sheng Di Huang* (Radix Rehmanniae), *Zhi Mu* (Radix Anemarrhenae) and *Shi Gao* (Gypsum Fibrosum).
- *Xiao ke* syndrome with constant thirst and water ingestion: combine this herb with *Lu Gen* (Rhizoma Phragmitis), *Mai Men Dong* (Radix Ophiopogonis), *Tian Hua Fen* (Radix Trichosanthis) and *Da Zao* (Fructus Jujubae).

Toothache from rising deficient Kidney fire: For patients with Kidney yin deficiency, fire may attack the Kidney channel, as heat travels upwards and causes toothache. Sweet, cold and moistening, *Di Gu Pi* clears various yin-deficient heat conditions.
- Toothache: add *Di Gu Pi* to *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill).

2. Clears Lung Heat

Cough due to Lung heat: *Di Gu Pi* is effective in treating cough, wheezing and dyspnea due to Lung heat. It is also effective for treatment of Lung heat with fluid damage. When heat travels down to the paired organ of Lung, the Large Intestine, constipation or dry stools occur.
- Cough, wheezing and dyspnea: use this herb with *Sang Bai Pi* (Cortex Mori) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula**: *Xie Bai San* (Drain the White Powder).
- Constipation: combine it with *Da Huang* (Radix et Rhizoma Rhei), *Gua Lou Shi* (Fructus Trichosanthis) and *Xing Ren* (Semen Armeniacae Amarum).

3. Clears Heat, Cools Blood, and Stops Bleeding

Bleeding: *Di Gu Pi* commonly treats various bleeding disorders characterized by heat in the blood forcing blood out of the vessels. It clears heat, cools the blood, and stops bleeding.
- Hematemesis and epistaxis due to heat in the blood: use this herb with *Bai Mao Gen* (Rhizoma Imperatae), *Ou Jie* (Nodus Nelumbinis Rhizomatis) and *Ce Bai Ye* (Cacumen Platycladi) to cool blood and stop bleeding.
- Hematuria: use it with *Gou Qi Zi* (Fructus Lycii) in powder form.
- Cough with blood-streaked sputum: use it with *Mai Men Dong* (Radix Ophiopogonis) and *Ce Bai Ye* (Cacumen Platycladi).

DOSAGE

6 to 15 grams in decoction. The maximum dosage of *Di Gu Pi* is 60 grams.

CAUTIONS / CONTRAINDICATIONS

- Cold in nature, *Di Gu Pi* should be used with caution in patients who have deficiency and cold of the Spleen and Stomach, characterized by loose stools.
- *Di Gu Pi* is contraindicated for patients with exterior wind-cold or wind-heat conditions.
- Use *Di Gu Pi* with caution in patients who have true cold but false heat.

CHEMICAL COMPOSITION

Betaine, lyciumins A, B; kukoamine A, lyciumamide, cinnamic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Di Gu Pi* has been shown to inhibit the activity of typhoid, paratyphoid and shigella.[2]
- **Antihypertensive**: Intravenous injection of a *Di Gu Pi* preparation in anesthetized dogs, cats and rats lowered blood pressure by 53%, 67%, and 27%, respectively. Alcohol extracts of *Di Gu Pi* and kukoamine A also have antihypertensive effects. Lyciumins A and B are angiotensin converting enzyme (ACE) inhibitors, and have marked effects to lower blood pressure.[3]
- **Antipyretic**: Both oral and intravenous administrations of water and alcohol extracts of *Di Gu Pi* have marked effectiveness in reducing body temperature in rabbits.[4]
- **Antidiabetic**: Oral ingestion of decoction of *Di Gu Pi* at 8 g/kg lowered blood glucose in healthy rabbits by 14% for up to 7 or 8 hours.[5]

CLINICAL STUDIES AND RESEARCH

- **Hypertension:** In one study, primary hypertension patients were treated with *Di Gu Pi* (decoction of 60 grams of the herb with a small quantity of sugar) once every other day for 5 doses per course of treatment, for a total of 2 to 3 courses. Out of 50 patients, 40% showed marked improvement and 94% showed some improvement.[6]
- **Diabetes mellitus:** According to one report, 16 patients with diabetes mellitus were treated with a twice-daily regimen that consisted of *Di Gu Pi* (50 grams of herb in

Dí Gu Pí (Cortex Lycii)

decoction), 100 mg of vitamin C and 100 mg of vitamin B1 injected intramuscularly. The study reported satisfactory results.[7]

- **Corns:** In one study, 25 patients with corns were successfully treated with a topical herbal preparation made with 6 grams of *Di Gu Pi* and 3 grams of *Hong Hua* (Flos Carthami) crushed into a fine powder and mixed with sesame oil and flour. After the outer layer of the corn was removed, the herbs were applied topically and covered with gauze. The herbs were removed and re-applied every two days.[8]

HERB-DRUG INTERACTION

- **Antidiabetics:** It is prudent to use *Di Gu Pi* with caution with insulin, sulfonylureas, and other antidiabetic medications, as the combination may have synergistic effects, leading to hypoglycemia. [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).][9]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of a *Di Gu Pi* preparation in mice is 12.8 g/kg.[10]

AUTHORS' COMMENTS

Di Gu Pi and *Sang Bai Pi* (Cortex Mori) both clear heat, but from different parts of the body. *Di Gu Pi* sedates Lung fire and clears heat in the *xue* (blood) level. *Sang Bai Pi* clears Lung heat and sedates fire from the *qi* (energy) level. Their differences make them useful together to eliminate heat in both *xue* (blood) and *qi* (energy) levels.

Yín Chaí Hu (Radix Stellariae)

銀柴胡 银柴胡

Pinyin Name: *Yin Chai Hu*
Literal Name: "silver barbarian kindling"
Alternate Chinese Names: *Yin Hu*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: stellaria root, starwort root
Botanical Name: *Stellaria dichotoma* L. var. *lanceolata* Bge. (*Yin Chai Hu*)
Pharmaceutical Name: Radix Stellariae
Properties: sweet, cool
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Deficiency Heat

Yin-deficient heat: Because it is not bitter and only cool (not cold) in nature, *Yin Chai Hu* (Radix Stellariae) is an excellent herb to clear deficiency heat without damaging yin. It is commonly used to treat yin-deficient heat char-

Yin Chai Hu (Radix Stellariae)

acterized by night sweats, steaming bones sensations, irritability, *wu xin re* (five-center heat), flushed cheeks and tidal fever.

- Yin-deficient heat with night sweats and steaming-bones sensation: use *Yin Chai Hu* with *Di Gu Pi* (Cortex Lycii), *Qing Hao* (Herba Artemisiae Annuae) and *Bie Jia* (Carapax Trionycis).
- Febrile disorders with tidal fever, thin body frame, dry skin and nails: add *Bie Jia* (Carapax Trionycis).

2. Clears Heat

***Gan ji* (infantile malnutrition):** *Yin Chai Hu* is commonly used to treat malnutrition in infants due to accumulation of heat. Clinical applications of *Yin Chai Hu* include malnutrition, fever, enlarged abdomen, and weight loss.

- *Gan ji* with fever: use it with *Dang Shen* (Radix Codonopsis), *Zhi Zi* (Fructus Gardeniae), *Hu Huang Lian* (Rhizoma Picrorhizae), and *Huang Qin* (Radix Scutellariae).

DOSAGE

3 to 10 grams in decoction. The maximum dosage of *Yin Chai Hu* is 20 grams.

CAUTIONS / CONTRAINDICATIONS

- *Yin Chai Hu* is contraindicated in patients who have exterior wind-cold conditions, or in patients who have blood deficiency without heat signs.

CHEMICAL COMPOSITION

Saponins.[1]

AUTHORS' COMMENTS

Yin Chai Hu (Radix Stellariae) and *Chai Hu* (Radix Bupleuri) have similar names and functions. Both clear heat and reduce fever. *Yin Chai Hu* is most effective for treating deficiency heat and fever, such as tidal fever, steaming-bones sensations, night sweats due to yin-deficient heat, and *gan ji* (infantile malnutrition) with fever. *Chai Hu*, on the other hand, is more effective for treating *shaoyang* syndrome with alternating chills and fever. Furthermore, *Chai Hu* functions to raise yang qi and regulate Liver qi stagnation.

References

1. *Zhong Yao Xue* (Chinese Herbology), 1998; 246

Hu Huang Lian (Rhizoma Picrorhizae)

胡黃連 胡黄连

Pinyin Name: *Hu Huang Lian*
Literal Name: "barbarian yellow connection," "barbarian yellow link"
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: picrorhiza, figwort flower rhizome
Botanical Name: *Picrorrhiza kurrooa* Royle ex Benth. (*Hu Huang Lian*); *Picrorrhiza scrophulariaeflora* Pennell. (*Xi Zhang Hu Huang Lian*)
Pharmaceutical Name: Rhizoma Picrorhizae
Properties: bitter, cold
Channels Entered: Heart, Liver, Stomach, Large Intestine

Hu Huang Lian (Rhizoma Picrorhizae)

CHINESE THERAPEUTIC ACTIONS

1. Clears Deficiency Heat

Yin-deficient heat: *Hu Huang Lian* (Rhizoma Picrorhizae) is commonly used to dispel yin-deficient heat, characterized by steaming bones sensations, tidal fever, and night sweating.

- Yin-deficient heat: use *Hu Huang Lian* with *Yin Chai Hu* (Radix Stellariae), *Di Gu Pi* (Cortex Lycii) and *Zhi Mu* (Radix Anemarrhenae).

***Gan ji* (infantile malnutrition)**: *Hu Huang Lian* treats malnutrition in infants due to accumulation of heat, characterized by malnutrition, fever, enlarged abdomen, and weight loss.

- *Gan ji* with fever: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shan Zha* (Fructus Crataegi), and *Shi Jun Zi* (Fructus Quisqualis) to strengthen the Spleen and clear heat. **Exemplar Formula**: *Jin Jian Fei Er Wan* (Golden Pills to Construct a Fat Child).

2. Clears Heat and Dries Dampness

Bitter and cold, *Hu Huang Lian* treats disorders characterized by damp-heat, such as diarrhea, dysentery, abscesses and lesions.

- Bloody dysentery: use this herb with *Wu Mei* (Fructus Mume) and *Fu Long Gan* (Terra Flava Usta).
- Chronic diarrhea: combine it with *Gan Jiang* (Rhizoma Zingiberis).
- Hemorrhoids: take *Hu Huang Lian* with goose gallbladder.

DOSAGE

3 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- *Hu Huang Lian* should be used with caution in patients who have deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Kutkin, picroside I, picroside II, kutkoside, D-mannitol, vanillic acid, kutkiol, kutkisterol, apocynin, picroside, putkoside, kurroside.[1]

PHARMACOLOGICAL EFFECTS

- **Cholagogic**: Vanilloylcatalpol, a derivative of picroside II, markedly increases production and excretion of bile in mice. It also has hepatoprotective effects, especially against carbon tetrachloride.[2]
- **Antibiotic**: *Hu Huang Lian* has been shown to inhibit the growth of some dermatophytes and pathogenic fungi.[3]

CLINICAL STUDIES AND RESEARCH

- **Bacterial dysentery**: In one study, 45 patients with bacterial dysentery were treated with 2 to 6 grams of powdered *Hu Huang Lian* in three equally-divided doses daily, with excellent success.[4]

AUTHORS' COMMENTS

Hu Huang Lian (Rhizoma Picrorhizae) and *Huang Lian* (Rhizoma Coptidis) have similar names, but different functions. *Hu Huang Lian* primarily clears deficiency heat. *Huang Lian* mainly clears excess, such as damp-heat.

Hu Huang Lian has similar effects to those of *Yin Chai Hu* (Radix Stellariae) to clear deficiency heat, but is stronger than *Yin Chai Hu*.

Chapter 2 summary

— Heat-Clearing Herbs

SECTION 1: HEAT-CLEARING AND FIRE-PURGING HERBS

Name	Similarities	Differences
Shi Gao (Gypsum Fibrosum)	Sedate excess fire in the Stomach and Lung	Strongly clears excess heat
Zhi Mu (Radix Anemarrhenae)		Nourishes yin, moistens dryness
Qing Guo Gen (Radix Canarium Album)		Generates body fluids, strengthens Spleen
Han Shui Shi (Mirabilite)		Treats burns when used externally
Tian Hua Fen (Radix Trichosanthis)	Clear heat, generate body fluids	Dispels pus
Lu Gen (Rhizoma Phragmitis)		Clears Stomach and Lung heat
Zhu Ye (Herba Phyllostachys)		Relieves dysuria
Dan Zhu Ye (Herba Lophatheri)		Relieves dysuria
Zhi Zi (Fructus Gardeniae)	Clear fire in the Liver and Gallbladder	Cools blood, eliminates toxins, dries dampness; for heat in all three *jiaos*
Xia Ku Cao (Spica Prunellae)		Disperses nodules and scrofulae due to Liver qi stagnation
Mi Meng Hua (Flos Buddlejae)	Sedate Liver, treat eye disorders	Sedates Liver fire
Qing Xiang Zi (Semen Celosiae)		Sedates Liver fire
Gu Jing Cao (Flos Eriocauli)		Disperses wind-heat in the Liver channel
Rui Ren (Semen Prinsepiae)		Clears the Liver, brightens the eyes
Da Ding Huang (Caulis Euonymi)	Clear heat, purge fire	Eliminates toxins, reduces inflammation
Ren Zhong Bai (Urinae Hominis Sedimen)		Stops bleeding
Shi Lian Zi (Herba Sinocrassulae Indicae)		Relieves irritability, stops dysentery
Lu Cha (Folium Camellia Sinensis)	Clear heat, promote diuresis	Clears Stomach heat, dispels dampness, relieves headache
Wu Long Cha (Folium Camellia Sinensis Fermentata)		Clears heat, relieves headache
Xi Gua (Fructus Citrulli)		Relieves thirst
Xi Gua Pi (Pericarpium Citrulli)		Promotes urination, clears heat

General Characteristics of Heat-Clearing and Fire-Purging Herbs:

Taste: sweet, bitter
Thermal property: cool, cold
Channels entered: Lung, Stomach, Heart, Liver
Therapeutic actions: clear heat and purge fire

These herbs are mainly used to sedate excess heat in the *qi* (energy) level or excess heat in the Lung or Stomach. Excess conditions include excess heat, excess fire, or Lung or Stomach heat.

Shi Gao (Gypsum Fibrosum) and ***Zhi Mu*** (Radix Anemarrhenae) are the most commonly used herbs to clear heat, sedate fire, dispel irritability and relieve thirst, and are often used together for synergistic effect, such as in *Bai Hu Tang* (White Tiger Decoction). They are used for excess heat in the *qi* (energy) level with symptoms of high fever, irritability and thirst. They also clear Lung heat to relieve cough and dyspnea.

Shi Gao is stronger in clearing heat and descending fire. It should only be used in cases of excess heat.

Chapter 2 summary

Zhi Mu clears heat and moistens the Lung simultaneously, and clears heat and purges fire in both excess and deficiency conditions.

Qing Guo Gen (Radix Canarium Album) eliminates heat and toxins from the throat, and promotes generation of fluids.

Han Shui Shi (Mirabilite), like *Shi Gao* (Gypsum Fibrosum), clears heat and purges fire. However, it is not used as often as *Shi Gao*, since it does not clear the Lung or relieve dyspnea and cough.

Tian Hua Fen (Radix Trichosanthis) and ***Zhi Mu*** (Radix Anemarrhenae) are commonly used to clear heat in individuals with underlying deficiencies.

Tian Hua Fen clears heat, generates body fluids, relieves thirst and alleviates consumption of body fluids by febrile disorders.

Zhi Mu is stronger to clear heat and purge fire.

Lu Gen (Rhizoma Phragmitis) and ***Zhu Ye*** (Herba Phyllostachys) clear interior and exterior heat and reduce irritability.

Lu Gen generates body fluids, relieves thirst, clears Stomach heat to stop vomiting, and dispels Lung heat to eliminate phlegm and abscess.

Zhu Ye clears Heart heat and promotes diuresis.

Zhu Ye (Herba Phyllostachys) and ***Dan Zhu Ye*** (Herba Lophatheri) clear heat and promote diuresis.

Zhu Ye more directly clears Heart and Stomach fire.

Dan Zhu Ye more effectively clears heat and promotes diuresis.

Zhi Zi (Fructus Gardeniae) effectively clears excess heat or damp-heat at *qi* (energy) or *xue* (blood) levels, from all three *jiaos*. Externally, it disperses stagnation, reduces swelling and treats sprains and strains.

Zhi Zi (Fructus Gardeniae) and ***Xia Ku Cao*** (Spica Prunellae) effectively clear heat from the Liver and Gallbladder.

Zhi Zi exerts a broader effect as it clears heat from all three *jiaos*.

Xia Ku Cao is more focused on clearing heat from the Liver and Gallbladder.

Xia Ku Cao (Spica Prunellae), ***Mi Meng Hua*** (Flos Buddlejae), ***Qing Xiang Zi*** (Semen Celosiae), ***Gu Jing Cao*** (Flos Eriocauli), and ***Rui Ren*** (Semen Prinsepiae) all sedate Liver fire and treat various disorders of the eyes, such as redness, swelling and pain.

Xia Ku Cao is best for pain in the eyeball, especially during the night, caused by Liver fire and qi stagnation.

Mi Meng Hua nourishes the Liver, moistens dryness and treats eye disorders caused by excess or deficiency conditions.

Qing Xiang Zi and *Gu Jing Cao* treat eye disorders caused by excess heat and Liver fire.

Rui Ren helps eye disorders characterized by excess, but not by deficiency.

Da Ding Huang (Caulis Euonymi), ***Ren Zhong Bai*** (Urinae Hominis Sedimen) and ***Shi Lian Zi*** (Herba Sinocrassulae Indicae) clear heat and purge fire.

Da Ding Huang is most effective to reduce inflammation and eliminate toxins.

Ren Zhong Bai clears heat from the upper, middle and lower *jiaos* to stop bleeding.

Shi Lian Zi clears heat from the Heart to relieve irritability, and heat from the Large Intestine to treat dysentery.

Chapter 2 summary

Lu Cha (Folium Camellia Sinensis), ***Wu Long Cha*** (Folium Camellia Sinensis Fermentata), ***Xi Gua*** (Fructus Citrulli) and ***Xi Gua Pi*** (Pericarpium Citrulli) clear heat and promote diuresis.

Lu Cha and *Wu Long Cha* are derived from the same plant, and have essentially the same functions to treat Stomach disorders (nausea, vomiting and diarrhea), clear the head, and brighten the eyes. *Lu Cha* is the unprocessed tea leaf while *Wu Long Cha* is the fermented leaf.

Xi Gua and *Xi Gua Pi* are derived from the same plant, and function to clear heat and promote urination. *Xi Gua* more effectively clears heat and relieves thirst. *Xi Gua Pi* more strongly promotes urination.

SECTION 2: HEAT-CLEARING AND DAMPNESS-DRYING HERBS

Name	Similarities	Differences
Huang Qin (Radix Scutellariae)	Clear heat, sedate fire, eliminate toxins, dry dampness	Clears heat from upper *jiao*, sedates Lung heat, stabilizes fetus
Huang Lian (Rhizoma Coptidis)		Clears heat from middle *jiao*, clears fire in the Heart, Liver, Stomach and Large Intestine
Huang Bai (Cortex Phellodendri)		Clears deficiency Kidney fire and lower *jiao* heat
Ji Xue Cao (Herba Centellae)		Cools blood and stops bleeding, clears the Liver, brightens eyes
Long Dan Cao (Radix Gentianae)	Clear heat, dry dampness	Sedates damp-heat in the Liver and Gallbladder channels, dispels damp-heat from lower *jiao*
Ku Shen Gen (Radix Sophorae Flavescentis)		Dispels damp-heat from lower *jiao*, used externally to relieve itching

General Characteristics of Heat-Clearing and Dampness-Drying Herbs:

Taste: bitter
Thermal property: cold
Channels entered: Liver, Gallbladder, Large Intestine, Small Intestine
Therapeutic actions: clear heat, sedate fire, dry dampness

Theses herbs treat disorders characterized by heat, fire and dampness, such as hepatitis, jaundice, dysentery, hemorrhoids, infections, sores, abscesses, and others.

Huang Qin (Radix Scutellariae), ***Huang Lian*** (Rhizoma Coptidis) and ***Huang Bai*** (Cortex Phellodendri) are known as the "*san huang*," literally 'three yellows.' Bitter, cold and drying in nature, all three herbs clear heat, dry dampness, sedate fire and eliminate toxins. They treat various damp-heat and toxic heat syndromes.

Huang Qin more effectively clears heat from the upper *jiao*. It clears Lung heat, stops bleeding, promotes diuresis, and stabilizes the fetus.

Huang Lian more effectively clears heat from the middle *jiao*. It sedates fire in the Stomach, Large Intestine, Heart and Liver. *Huang Lian* is the strongest of the "three yellows."

Huang Bai more effectively clears heat from the lower *jiao*. It treats lower *jiao* damp-heat with leukorrhea, edema, heat in the lower body and jaundice. It clears both excess and deficiency heat.

Huang Bai (Cortex Phellodendri) and ***Zhi Mu*** (Radix Anemarrhenae) are commonly combined because of their excellent synergistic effect to consolidate yin and clear deficiency heat.

Huang Bai dries dampness, eliminates toxins, and dispels damp-heat in the lower *jiao*.

Zhi Mu is nourishing and clears deficiency fire of the Kidney.

Ji Xue Cao (Herba Centellae) eliminates damp-heat, cools blood to stop bleeding, and clears Liver heat to brighten the eyes. However, it is not as potent as the "three yellows" and is rarely used.

Chapter 2 summary

Long Dan Cao (Radix Gentianae) and ***Xia Ku Cao*** (Spica Prunellae) clear the Liver, brighten the eyes, and sedate Liver fire involving red, painful and swollen eyes.

Long Dan Cao is very cold and very drying. It is one of the strongest herbs to sedate Liver fire and dry dampness. It also is excellent for symptoms associated with Liver fire flaring upwards or damp-heat in the Liver channel in the lower *jiao*. This herb is reserved for use only in excess conditions.

Xia Ku Cao, milder in action, clears heat and disperses stagnation simultaneously. It treats goiter, nodules and masses, and relieves eye pain caused by Liver heat or Liver qi stagnation.

Ku Shen Gen (Radix Sophorae Flavescentis) dries dampness and kills parasites, treating damp-heat in the lower *jiao* as found in dysentery, jaundice, yellow leukorrhea, *re lin* (heat dysuria), or itching skin and eczema. Today, *Ku Shen Gen* is also being used to treat dyspnea, arrhythmia and elevated white blood cell counts.

SECTION 3: HEAT-CLEARING AND BLOOD-COOLING HERBS

Name	Similarities	Differences
Xi Jiao (Cornu Rhinoceri)	Clear heat, cool blood	Eliminates toxins, clears the Heart, extinguishes Liver wind
Sheng Di Huang (Radix Rehmanniae)		Nourishes yin, promotes generation of body fluids
Xuan Shen (Radix Scrophulariae)		Nourishes yin, purges fire, eliminates toxins
Mu Dan Pi (Cortex Moutan)		Invigorates blood circulation, purges Liver fire, clears Heart fire
Chi Shao (Radix Paeoniae Rubrae)		Invigorates blood circulation, purges Liver fire, relieves pain
Zi Cao Gen (Radix Lithospermi)		Eliminates toxins, promotes eruption of measles
Fu Rong (Radix Hibisci)		Clears Lung heat, reduces inflammation and pain
Huang Teng (Caulis Fibraurea)		Dispels wind from the exterior
Ji Guan Hua (Flos Celosiae Cristatae)		Stops bleeding
Dong Qing Ye (Folium Ilexis)		Clears heat, eliminates toxins

General Characteristics of Heat-Clearing and Blood-Cooling Herbs:

Taste: bitter, sweet, salty
Thermal property: cold
Channels entered: Heart, Liver
Therapeutic actions: clear heat, cool blood

These herbs clear heat and cool blood at the *ying* (nutritive) and *xue* (blood) levels, conditions characterized by restlessness, irritability, delirium, high fever, altered consciousness, purpura, and bleeding.

Xi Jiao (Cornu Rhinoceri) cools blood, stops bleeding, eliminates toxins, clears the Heart and extinguishes Liver wind. It has historically been excellent for treatment of heat in the blood characterized by high fever with delirium and incoherent speech, purpura, and reckless movement of blood (with bleeding from the nose and the mouth). *Shui Niu Jiao* (Cornu Bubali) is now used as a substitute, because *Xi Jiao* is an endangered animal and its use is prohibited.

Sheng Di Huang (Radix Rehmanniae) and ***Xuan Shen*** (Radix Scrophulariae) both nourish the yin and cool the blood simultaneously. They are used for heat in the *ying* (nutritive) and *xue* (blood) levels characterized by purple blotches on the skin, bleeding, yin-deficient heat, thirst and body fluid deficiency.

Sheng Di Huang has a stronger tonic function to nourish yin and generate body fluids.

Xuan Shen is more effective to eliminate toxins, dispel heat, and treat sore throat, scrofula and goiter.

Chapter 2 summary

Mu Dan Pi (Cortex Moutan) and ***Chi Shao*** (Radix Paeoniae Rubrae) cool and invigorate blood circulation, clear heat in the *ying* (nutritive) and *xue* (blood) levels with purpura, hematemesis, bleeding and amenorrhea.

Mu Dan Pi more strongly clears Heart fire and cools blood to treat yin-deficient heat.

Chi Shao more effectively clears Liver fire, regulates blood circulation, and relieves pain caused by heat and blood stagnation.

Mu Dan Pi (Cortex Moutan) and ***Di Gu Pi*** (Cortex Lycii) clear deficiency heat and treat steaming bones sensations.

Mu Dan Pi is better for treating steaming bones sensations without perspiration

Di Gu Pi is more effective for alleviating steaming bones sensations with perspiration.

Zi Cao Gen (Radix Lithospermi) cools the blood, promotes eruption of measles and treats purple blotches on the skin caused by heat in the vessels. Used externally, it treats burns, ulcerations and eczema.

Fu Rong (Radix Hibisci) cools the blood, clears heat from the Lung, and reduces inflammation and pain.

Huang Teng (Caulis Fibraurea) cools the blood, clears heat from the Liver, and lowers blood pressure.

Ji Guan Hua (Flos Celosiae Cristatae) clears heat, cools blood, stops bleeding, and stops the loss of fluids from the lower *jiao*, such as found in diarrhea, dysentery, and vaginal discharge.

Dong Qing Ye (Folium Ilexis) clears heat and eliminates toxins, cools blood and stops bleeding.

SECTION 4: HEAT-CLEARING AND TOXIN-ELIMINATING HERBS

Name	Similarities	Differences
Jin Yin Hua (Flos Lonicerae)	Clear heat, eliminate toxins, reduce abscesses, sores, and swellings	Treats wind-heat, summer-heat, dysentery, and intestinal abscesses
Ren Dong Teng (Caulis Lonicerae)		Dispels wind, dampness and heat from the exterior
Lian Qiao (Fructus Forsythiae)		Sedates heart fire, treats nodules/abscesses
Guan Ye Lian Qiao (Herba Hypericum)		Stops bleeding, dispels wind-damp
Pu Gong Ying (Herba Taraxaci)		Treats breast abscesses
Zi Hua Di Ding (Herba Violae)		Treats skin lesions, snake bites
Ye Ju Hua (Flos Chrysanthemi Indici)		Treats skin and eye disorders
Lou Lu (Radix Rhapontici)		Treats breast disorders
Niu Huang (Calculus Bovis)		Disperses wind, dispels phlegm
Zao Xiu (Rhizoma Paridis)		Extinguishes Liver wind, disperses blood stagnation
Xiong Dan (Fel Ursi)		Extinguishes Liver wind and Liver yang rising
Bai Lian (Radix Ampelopsis)		Treats burns
Bai Xian Pi (Cortex Dictamni)		Relieves damp-heat itching and jaundice
Qian Li Guang (Herba Senecionis Scandens)		Brightens the eyes and treats eye disorders
Ji Gu Cao (Herba Abri)		Treats jaundice, *bi zheng* (painful obstruction syndrome)
Ban Bian Lian (Herba Lobeliae Chinensis)		Treats snake bites, bee stings, ascites
Cha Chi Huang (Herba Stellariae Aquaticae)		Invigorates blood circulation and eliminates blood stagnation
Dao Di Wu Gong (Rhizoma Heliminthostachytis)		Reduces swelling and inflammation
Jin Guo Lan (Radix Tinosporae)		Clears damp-heat from the skin
Liu Ye (Folium Salicis Babylonicae)		Clears heat and toxins from the skin

Chapter 2 summary

Name	Similarities	Differences
Bai Hua She She Cao (Herba Oldenlandia)	Clear heat, eliminate toxins, treat cancer	Promotes urination to treat dysuria
Tian Kui Zi (Radix Semiaquilegiae)		Promotes urination, reduces abscesses
Long Kui (Herba Solanum Nigrum)		Promotes urination to alleviate edema
Ban Zhi Lian (Herba Scutellariae Barbatae)		Promotes urination
Shan Ci Gu (Pseudobulbus Cremastrae)		Reduces masses
Feng Wei Cao (Herba Pteris)		Dispels damp-heat
Dong Ling Cao (Herba Rabdosiae Rubescentis)		Invigorates blood circulation to relieve pain
Chui Pen Cao (Herba Sedi)	Clear heat, eliminate toxins, dispel dampness	Treats jaundice and hepatitis
Tu Fu Ling (Rhizoma Smilacis Glabrae)		Treats syphilis
Da Qing Ye (Folium Isatidis)	Clear heat, eliminate toxins, cool blood, disperse spots on the skin	Treats infectious respiratory disorders and purpura, cools blood
Ban Lan Gen (Radix Isatidis)		Relieves sore throat
Qing Dai (Indigo Naturalis)		Sedates Liver fire and Lung heat
Zhu Zi Cao (Herba Enphorbiae Thymifoliae)		Treats toxic heat
Chuan Xin Lian (Herba Andrographis)	Clear heat, eliminate toxins from the Lung	Strongly eliminates toxins, clears damp-heat in the lower *jiao*
Yu Xing Cao (Herba Houttuyniae)		Dispels Lung abscesses
She Gan (Rhizoma Belamcandae)		Treats sore throat, phlegm and cough
Shan Dou Gen (Radix Sophorae Tonkinensis)		Treats sore throat, reduces swellings, treats cancer
Ma Bo (Lasiosphaera seu Calvatia)		Stops bleeding
Pao Zai Cao (Herba Physalis Angulatae)		Relieves cough, promotes diuresis
Dao Diao Jin Zhong (Melothria Maderospatana)		Relieves pain
Ma Chi Xian (Herba Portulacae)	Clear heat, eliminate toxins, treat dysentery and diarrhea	Treats sores, carbuncles, eczema, bacterial dysentery; alleviates feeling of incomplete evacuation
Qin Pi (Cortex Fraxini)		Sedates Liver yang rising, treats bacterial dysentery
Bai Tou Weng (Radix Pulsatillae)		Treats amoebic and bacterial dysentery with toxic heat, mucus and blood
Ya Dan Zi (Fructus Bruceae)		Treats malaria, cancer, and amoebic dysentery
Hong Teng (Caulis Sargentodoxae)	Clear heat, eliminate toxins, treat intestinal abscess	Invigorates blood circulation, relieves pain
Bai Jiang Cao (Herba cum Radice Patriniae)		Dispels pus
Hu Yao Huang (Herba Leucas Mollissimae)		Promotes diuresis, invigorates blood circulation
Huang Shui Qie (Herba Solani)	Clear heat, eliminate toxins	Clears Liver fire, reduces inflammation and relieves pain
Shan Ma Ti (Radix Rauvolfiae)		Anchors Liver yang
Pu Yin (Radix Wikstroemia Indica)		Breaks masses, eliminates water accumulation
Shu Wei Huang (Herba Rostellulariae)		Regulates qi, invigorates blood
Xiang Si Cao (Herba Eupatorii Formosani)		Opens channels and collaterals, promotes urination
Ya She Huang (Herba Lippiae)		Regulates menstruation, reduces inflammation
Lu Dou (Semen Phaseoli Radiati)	Clear summer-heat	Detoxifies other herbs, relieves thirst
He Ye (Folium Nelumbinis)		Stops bleeding

General Characteristics of Heat-Clearing and Toxin-Eliminating Herbs:

Taste: bitter

Thermal property: cold

Channels entered: varies

Therapeutic actions: clear heat, eliminate toxins, treat sores and abscesses

Chapter 2 summary

Herbs in this category have a wide range of therapeutic effect in treating disorders characterized by heat and toxins, such as febrile disorders, infection, inflammation, diarrhea, dysentery, sores, abscesses, ulcers, burns, cancer, and many others.

Jin Yin Hua (Flos Lonicerae) and ***Lian Qiao*** (Fructus Forsythiae) are the most commonly used herbs for clearing heat and eliminating toxins. They disperse wind-heat and clear heat in the *qi* (energy) and *xue* (blood) levels, treat febrile disorders or symptoms related to toxic heat accumulation.

Jin Yin Hua disperses wind-heat, clears summer-heat and treats dysentery and intestinal abscesses. It is better for toxic heat attacking the entire body.

Lian Qiao clears heat, dispels stagnant heat in the chest and diaphragm, and cools blood to relieve blotches on the skin. It is better for toxic heat isolated to a local area. *Lian Qiao* is one of the most important herbs for treatment of abscesses.

Jin Yin Hua (Flos Lonicerae) and ***Ren Dong Teng*** (Caulis Lonicerae) are derived from the same plant.

Jin Yin Hua has stronger effects to clear heat, eliminate toxins and release the exterior.

Ren Dong Teng, weaker overall, is used much less than *Jin Yin Hua*.

Lian Qiao (Fructus Forsythiae) and ***Guan Ye Lian Qiao*** (Herba Hypericum) both clear heat, eliminate toxins, and treat sores and abscesses.

Lian Qiao is more potent, and is effective for toxic heat affecting the interior and exterior.

Guan Ye Lian Qiao is less effective, and is generally reserved for topical use.

Pu Gong Ying (Herba Taraxaci), ***Zi Hua Di Ding*** (Herba Violae), ***Ye Ju Hua*** (Flos Chrysanthemi Indici), and ***Lou Lu*** (Radix Rhapontici) clear heat, eliminate toxins, and treat sores. All three herbs have a wide range of applications to treat internal and external disorders.

Pu Gong Ying is effective for sores and abscesses of the skin, breast, lung, intestines, throat, and other parts of the body.

Zi Hua Di Ding treats abscesses, sores and snake bites.

Ye Ju Hua is most effective for skin, eye and cardiovascular disorders.

Lou Lu is more effective for breast fibroids and abscesses than for other uses.

Niu Huang (Calculus Bovis) has numerous functions that make it useful for many disorders. It clears heat and eliminates toxins to treat carbuncles and cellulitis, extinguishes wind to relieve spasms and tremors, and disperses phlegm and opens orifices to treat high fevers with delirium. As one of the more potent and expensive herbs, it is used in small quantities and only in pill form for maximum therapeutic benefit and cost effectiveness.

Zao Xiu (Rhizoma Paridis) clears heat, eliminates toxins, extinguishes Liver wind, and treats seizures, epilepsy, carbuncles, swellings and sores, snake bites, the pain of blood stagnation, and bleeding from external injuries.

Xiong Dan (Fel Ursi) has long been revered for its potency to clear heat, eliminate toxins, relieve spasms, and brighten the eyes. Historical clinical applications included sores, carbuncles, swellings, convulsions, tremors, redness, and eye swelling and pain. *Xiong Dan* was used internally or externally. *Xiong Dan*, bear gallbladder, is not only very expensive, it is difficult to find and unwise to pursue: most bears are protected or endangered species. *Zhu Dan* (Fel Porcus), pig gallbladder, is often used as an alternative.

Bai Lian (Radix Ampelopsis) and ***Bai Xian Pi*** (Cortex Dictamni) clear heat and are used both internally and externally to treat sores, furuncles and carbuncles.

Bai Lian treats burns.

Bai Xian Pi dispels dampness and relieves itching and jaundice.

Chapter 2 summary

Qian Li Guang (Herba Senecionis Scandens) clears heat, eliminates toxins, treats sores, carbuncles and eczema, and brightens the eyes to treat redness, swelling and pain.

Ji Gu Cao (Herba Abri) clears heat, eliminates toxins, drains dampness, disperses stagnation, and treats jaundice and *bi zheng* (painful obstruction syndrome).

Ban Bian Lian (Herba Lobeliae Chinensis) and ***Ban Zhi Lian*** (Herba Scutellariae Barbatae) clear heat, eliminate toxins, promote diuresis to reduce swelling, and treat carbuncles, swellings, toxic snake bites and edema.

Ban Bian Lian relieves snake bites and promotes diuresis to relieve edema.

Ban Zhi Lian has strong antibiotic action and is commonly used for cancer.

Cha Chi Huang (Herba Stellariae Aquaticae) clears heat, eliminates toxins, invigorates blood circulation and eliminates blood stagnation. Clinical applications include dysentery, sores, carbuncles, toxic swellings, endometriosis, cervicitis, hemorrhoids and other conditions characterized by general inflammation.

Dao Di Wu Gong (Rhizoma Heliminthostachytis) clears heat, eliminates toxins, and reduces swelling and inflammation.

Jin Guo Lan (Radix Tinosporae) clears heat and toxins from the Lung and the skin.

Liu Ye (Folium Salicis Babylonicae) clears heat and toxins from the exterior of the body.

Bai Hua She She Cao (Herba Oldenlandia), ***Tian Kui Zi*** (Radix Semiaquilegiae), ***Long Kui*** (Herba Solanum Nigrum), ***Ban Zhi Lian*** (Herba Scutellariae Barbatae), ***Shan Ci Gu*** (Pseudobulbus Cremastrae), ***Feng Wei Cao*** (Herba Pteris) and ***Dong Ling Cao*** (Herba Rabdosiae Rubescentis) clear heat, eliminate toxin, and have promising antineoplastic activities for treatment of cancer. In addition, many of these herbs promote normal urination and treat dysuria.

Bai Hua She She Cao clears heat, eliminates toxins, and treats toxic sores, intestinal abscesses, sore throat, toxic snake bites, dysentery, and cancers of the breast and the lymphatic system.

Tian Kui Zi and *Long Kui* have similar functions to clear heat, disperse stagnation, and reduce swelling.

Ban Zhi Lian has a strong effect to clear heat toxins to treat cancers of the lung and the gastrointestinal tract.

Shan Ci Gu eliminates toxins and treats carbuncles, cellulitis, and cancers of the breast, cervix, esophagus, lungs, stomach, and skin.

Feng Wei Cao eliminates toxicity and dries dampness to treat diarrhea, sore throat, and jaundice.

Dong Ling Cao clears heat and toxins to treat esophageal, stomach, liver, and prostate cancers.

Chui Pen Cao (Herba Sedi) and ***Tu Fu Ling*** (Rhizoma Smilacis Glabrae) eliminate toxins, dispel dampness, and treat swelling and carbuncles.

Chui Pen Cao treats damp-heat jaundice and hepatitis.

Tu Fu Ling treats syphilis with damp-heat in the lower *jiao*.

Da Qing Ye (Folium Isatidis) and ***Ban Lan Gen*** (Radix Isatidis) are derived from different parts of the same plant. Both cool the blood, eliminate toxins and treat febrile disorders and purple blotches on the skin. They have shown excellent antibiotic effects and are used frequently for infectious diseases, especially infections of the upper respiratory tract.

Da Qing Ye is cooler and more dispersing in nature. It clears both exterior and interior heat, and disperses heat in the *qi* (energy) and *xue* (blood) levels to cool blood.

Ban Lan Gen is more clearing and descending in nature. It eliminates toxins and relieves sore throat.

Chapter 2 summary

Qing Dai (Indigo Naturalis), a processed derivative of ***Da Qing Ye*** (Folium Isatidis), cools the blood, eliminates toxins, clears the Liver, and eliminates wind. It is also used externally to treat eczema and mumps.

Zhu Zi Cao (Herba Enphorbiae Thymifoliae) clears heat, eliminates toxins, and cools blood. Its clinical applications include bronchitis, sore throat, hepatitis, pneumonia, dysentery and hematemesis.

Chuan Xin Lian (Herba Andrographis) clears heat, eliminates toxins and dries dampness. It treats dysentery, coughing caused by heat, sore throat and other febrile disorders.

Yu Xing Cao (Herba Houttuyniae) clears heat and eliminates toxins, and is one of the best herbs for treatment of lung abscesses. It has a wide range of applications, including but not limited to cough caused by heat, *re lin* (heat dysuria), dysentery, diarrhea, carbuncles and swelling.

She Gan (Rhizoma Belamcandae), ***Shan Dou Gen*** (Radix Sophorae Tonkinensis), and ***Ma Bo*** (Lasiosphaera seu Calvatia) clear heat, eliminate toxins, and treat severe soreness, swelling and pain of the throat.

She Gan dispels phlegm, relieves sore throat, and arrests dyspnea.

Shan Dou Gen more strongly eliminates toxins and reduces swelling.

Ma Bo relieves severe sore throat, stops bleeding, and helps with wound healing.

Pao Zai Cao (Herba Physalis Angulatae) and ***Dao Diao Jin Zhong*** (Melothria Maderospatana) clear heat and eliminate toxins from the Lung to treat disorders of the Lung with coughing, phlegm, and abscesses. They are also effective for cases of heat and toxins attacking the Urinary Bladder and Kidney, such as in dysuria, toxic swellings and gynecological disorders caused by inflammation.

Ma Chi Xian (Herba Portulacae), ***Qin Pi*** (Cortex Fraxini), ***Bai Tou Weng*** (Radix Pulsatillae) and ***Ya Dan Zi*** (Fructus Bruceae) all clear heat, eliminate toxins and treat dysentery.

Ma Chi Xian treats bacterial dysentery with feelings of incomplete evacuation. It also treats uterine bleeding and carbuncles with swelling.

Qin Pi treats bacterial dysentery with its astringent effect. It also treats coughing accompanied by redness and pain of the eyes.

Bai Tou Weng treats both amoebic and bacterial dysentery.

Ya Dan Zi is effective for amoebic dysentery only. However, it also treats malaria, cancer and warts when used externally.

Hong Teng (Caulis Sargentodoxae), ***Bai Jiang Cao*** (Herba cum Radice Patriniae) and ***Hu Yao Huang*** (Herba Leucas Mollissimae) clear heat, eliminate toxins, invigorate blood circulation, and have excellent functions to treat abscesses of the intestines, such as enteritis, appendicitis, and dysentery.

Hong Teng disperses stagnation, relieves pain, and treats traumatic pain, dysmenorrhea and the pain associated with *bi zheng* (painful obstruction syndrome).

Bai Jiang Cao functions more effectively to dispel pus.

Hu Yao Huang promotes urination to treat dysuria and nephritis.

Huang Shui Qie (Herba Solani), ***Shan Ma Ti*** (Radix Rauvolfiae), ***Pu Yin*** (Radix Wikstroemia Indica), ***Shu Wei Huang*** (Herba Rostellulariae), ***Xiang Si Cao*** (Herba Eupatorii Formosani) and ***Ya She Huang*** (Herba Lippiae) have general effectiveness in clearing heat and eliminating toxins. Many of these herbs are only found in southeast China. Therefore, despite having excellent functions, they are not cited in most texts, and are so far underused in clinical practice.

Chapter 2 summary

Huang Shui Qie and *Shan Ma Ti* clear Liver fire and sedate Liver yang.

Pu Yin has a special effect to break masses and eliminate water accumulation, as is found in liver cirrhosis with ascites.

Shu Wei Huang regulates qi and blood circulation.

Xiang Si Cao and *Ya She Huang* treat a variety of inflammatory conditions.

Lu Dou (Semen Phaseoli Radiati) and ***He Ye*** (Folium Nelumbinis) clear summer-damp-heat.

Lu Dou eliminates toxins and treats sores and carbuncles. Used during the summertime, it relieves summer-heat, irritability and thirst. It is also used as an antidote to treat the toxicity associated with *Ba Dou* (Fructus Crotonis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).

He Ye stops bleeding in cases of yang deficiency.

SECTION 5: DEFICIENCY-HEAT CLEARING HERBS

Name	Similarities	Differences
Qing Hao (Herba Artemisiae Annuae)	Clear deficiency heat	Treats malaria
Bai Wei (Radix Cynanchi Atrati)		Cools blood
Di Gu Pi (Cortex Lycii)		Clears Lung heat
Yin Chai Hu (Radix Stellariae)		Treats deficiency heat
Hu Huang Lian (Rhizoma Picrorhizae)		Dries dampness, eliminates toxins

General Characteristics of Deficiency-Heat Clearing Herbs:

Taste: sweet
Thermal property: cold
Channels entered: Kidney, Liver
Therapeutic actions: clear deficient heat

These herbs treat deficiency heat with symptoms and signs such as steaming bones sensations, warmth in the palms and soles, night sweats, hot flashes, afternoon fever, dry throat and mouth, irritability, insomnia, a red tongue with thin or no tongue coat, and thin, thready pulse.

Qing Hao (Herba Artemisiae Annuae) clears deficiency heat, and is the best herb for treatment of malaria. It relieves summer-heat and exterior conditions common during the summer.

Bai Wei (Radix Cynanchi Atrati) clears deficiency heat in febrile disorders caused by exterior pathogenic invasion, and treats *lin zheng* (dysuria syndrome) and sores.

Di Gu Pi (Cortex Lycii) clears deficiency heat and Lung heat, cools blood, stops bleeding and relieves thirst and irritability.

Yin Chai Hu (Radix Stellariae) and ***Hu Huang Lian*** (Rhizoma Picrorhizae) clear deficiency heat, steaming bones sensations, and tidal fever.

Yin Chai Hu clears deficiency heat.

Hu Huang Lian dries dampness, eliminates toxins and treats dysentery and diarrhea.

Hu Huang Lian (Rhizoma Picrorhizae) and ***Huang Lian*** (Rhizoma Coptidis) are from different geographic regions but both clear heat, dry dampness and eliminate toxins.

Hu Huang Lian clears deficiency heat.

Huang Lian sedates excess fire, damp-heat and toxic heat.

Chapter 3

— Downward Draining Herbs

Definition: "Downward draining" describes the action of substances that eliminate pathogenic factors and conditions via purgative, laxative or cathartic means.

Herbs that drain downward are commonly used to treat internal accumulations of pathogenic factors, or excess conditions. The terms 'pathogenic factors' or 'excess conditions' in this context refer to internal heat, cold, or dampness, and to manifestations of constipation, food stagnation, intestinal obstruction, and water accumulation. These conditions interfere with normal physiological functioning of the body and cause illness. Herbs that drain downward remove the pathogens or blockages and thus assist the body in resuming its normal functions. These substances are categorized as purgatives, moist laxatives, or harsh expellants (cathartics), all of which eliminate pathogenic factors via defecation and/or urination.

Draining downward treats internal accumulations of pathogens, including constipation, ascites, and water accumulation.

SUBCATEGORIES OF ACTION

1. ***Purgatives***: These herbs function to strongly induce defecation and eliminate constipation and accumulations of excess in the body. Cold purgatives are bitter and cold, and treat accumulations of heat and fire in the body. Warm purgatives are acrid and warm, and treat acute conditions of cold accumulation in the body. Purgative herbs are commonly prescribed with qi-regulating herbs, as the accumulation of excess is usually accompanied by stagnation of qi. Purgative herbs are sometimes combined with qi or blood tonics for chronic and habitual constipation in elderly patients who have weak constitutions.
2. ***Moist laxatives***: Most herbs in this subcategory are sweet and nourishing seeds that contain significant amounts of lipids to moisten the bowels and relieve constipation. They are most suitable in treatment of mild to moderate cases of constipation that do not require strong purgatives or harsh cathartics. Moist laxatives are most beneficial for treatment of constipation in elderly patients, or patients with weak constitutions, or deficiency of blood or body fluids. Herbs that regulate qi, tonify blood and nourish yin are commonly combined with moist laxatives to enhance their overall effectiveness.
3. ***Harsh expellants (cathartics)***: Mostly bitter, cold and toxic, these herbs eliminate pathogenic factors from the body by strongly promoting bowel movement and urination. Because these herbs are extremely harsh and have toxic aspects, they must be reserved for treatment of individuals who are otherwise strong enough to tolerate such approaches. Clinical applications include severe constipation, ascites, and water accumulation. It is also recommended that a small quantity of tonic herbs be combined in the formula to prevent damage to the body from loss of essential components along with removal of pathogenic factors.

Da Huang (Radix et Rhizoma Rhei)
Ben Cao Gang Mu (Materia Medica),
by Li Shi-Zhen, 1578 A.D.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Diagnosis of constipation is simple and straightforward, based on information obtained during patient intake. The absence of bowel movement, or difficulty in voiding the bowels, possibly accompanied by fullness, bloating, pain, fever or local inflammation, are some of the factors to consider. Once this diagnosis is made, optimal treatment requires determination of both the severity of constipation and the underlying condition of the patient. While moist laxatives are sufficient for mild to moderate cases, strong purgatives and harsh cathartics may be required for severe constipation. Determining the underlying condition of the patient is also important: weak,

Chapter 3 — Downward Draining Herbs

deficient or elderly patients, or menstruating or postpartum women may not be able to safely tolerate purgatives and cathartics. Other conditions combined with constipation may require careful differential diagnosis and treatment. While most cases can be categorized as the effects of excess heat or excess cold in the interior, other complications may also be present. Therefore, it is often necessary to combine herbs that drain downward with substances to address complicating factors.

Purgatives and harsh expellants (cathartics) should be used with extreme caution in elderly patients, and menstruating, pregnant or postpartum women.

CAUTIONS/CONTRAINDICATIONS

Purgatives and harsh expellants (cathartics) should be used with extreme caution in elderly patients, in menstruating, pregnant or postpartum women, and patients with qi, blood, yin, or yang deficiencies.

PROCESSING

Purgative and harsh cathartic substances may require special processing and preparation to both preserve their functions and minimize unwanted side effects. Specific details are listed in each herb monograph.

PHARMACOLOGICAL EFFECTS

- **Laxative:** Many herbs in this category promote bowel movement. Mechanisms of action include osmotic effect to increase the content of water in the intestines; stimulating action to increase the speed of intestinal peristalsis; and moistening influence to promote bowel movement.
- **Diuretic**: Many herbs in this category regulate water circulation and eliminate water accumulation. Herbs with diuretic action include *Gan Sui* (Radix Euphorbiae Kansui), *Da Ji* (Radix Euphorbiae seu Knoxiae), *Shang Lu* (Radix Phytolaccae), and *Qian Niu Zi* (Semen Pharbitidis).
- **Antibiotic**: Some downward-draining herbs have broad-spectrum antibiotic activities to kill bacteria, viruses, and dermatophytes, such as *Da Huang* (Radix et Rhizoma Rhei), *Lu Hui* (Aloe) and *Fan Xie Ye* (Folium Sennae).
- **Cholagogic**: Some herbs increase the production of bile by the liver and excretion of bile acids by the gallbladder, including substances such as *Mang Xiao* (Natrii Sulfas) and *Da Huang* (Radix et Rhizoma Rhei).
- **Hemostatic**: Some herbs may be used to stop bleeding, such as *Da Huang* (Radix et Rhizoma Rhei) and *Fan Xie Ye* (Folium Sennae).

POTENTIAL HERB-DRUG INTERACTIONS

Downward-draining herbs are well recognized for their purgative and laxative effects. While proper use of these herbs effectively treats constipation, inappropriate use may lead to diarrhea, dehydration and electrolyte imbalance. Therefore, individuals ingesting such herbs should receive adequate amounts of water and electrolytes, and should be monitored for warning signs such as spasms and cramps.

- Downward draining herbs should be used with caution in patients taking pharmaceutical laxatives and diuretics, as these drugs also contribute to the elimination of water and electrolytes. The inappropriate or excessive combination of herbs and pharmaceuticals in this case might cause or exaggerate diarrhea, dehydration, and electrolyte imbalance.

Section 1

— Purgatives

Da Huang (Radix et Rhizoma Rhei)

大黄

Pinyin Name: *Da Huang*
Literal Name: "big yellow," "greater yellow root"
Alternate Chinese Names: *Jiang Jun, Chuan Jun, Jin Wen*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: rhubarb root
Botanical Name: *Rheum palmatum* L. (*Zhang Ye Da Huang*); *Rheum tanguticum* Maxim ex Balf. (*Tang Gu Te Da Huang*); or *Rheum officinale* Baill. (*Da Huang*)
Pharmaceutical Name: Radix et Rhizoma Rhei
Properties: bitter, cold
Channels Entered: Spleen, Stomach, Large Intestine, Liver, Heart

CHINESE THERAPEUTIC ACTIONS

1. Attacks Accumulations by Purging Downwards

Constipation: *Da Huang* (Radix et Rhizoma Rhei) has excellent purgative properties to treat a wide variety of accumulations, including constipation, epigastric distention, fullness and abdominal pain that worsens with pressure and palpation. Bitter, cold and descending in nature, *Da Huang* is best used to treat constipation caused by excess heat. It also treats excess heat in the *fu* (hollow) organs during the *yangming* stage of illness, a condition characterized by high fever, delirium, semi-consciousness, and convulsions. *Da Huang* purges the accumulation and eliminates heat, thereby relieving the condition and preserving yin.

Da Huang is often combined with *Mang Xiao* (Natrii Sulfas) to treat excess-type constipation caused by heat. *Mang Xiao* is salty and softens the stool while *Da Huang* has a strong purgative effect to drive out stagnation. Both *Da Huang* and *Mang Xiao* clear heat in the *xue* (blood) level. These two herbs are the chief ingredients in the primary formula for treatment of constipation, *Da Cheng Qi Tang* (Major Order the Qi Decoction).

Heat and qi stagnation often accompany constipation. The purgative effect of *Da Huang* is greatly enhanced by adding qi-regulating herbs such as *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus). Typical symptoms that require addition of these herbs include abdominal bloating, distention and pain. A larger dose of *Da Huang* should be used if heat and constipation are more severe than the bloating, distention and pain.

- Severe constipation due to accumulation of excess heat: use *Da Huang* with *Mang Xiao* (Natrii Sulfas), *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus) to soften the hardness, relieve constipation and purge excess heat. **Exemplar Formula:** *Da Cheng Qi Tang* (Major Order the Qi Decoction).
- Moderate constipation from accumulation of heat: use it with *Huo Ma Ren* (Fructus Cannabis), *Xing Ren* (Semen

Da Huang (Radix et Rhizoma Rhei)

Armeniacae Amarum) and honey. **Exemplar Formula:** *Ma Zi Ren Wan* (Hemp Seed Pill).

Severe constipation sometimes presents as extremely dry, hard, fecal matter obstructing the large intestine. Attempts to defecate result only in the passage of clear, foul-smelling liquid, without expelling solid stools. Abdominal pain persists despite passage of liquids.

- Severe constipation with passage of liquid but no solid stool: use *Da Huang* with *Mang Xiao* (Natrii Sulfas) to soften the stool, moisten the intestines, and relieve constipation.

In addition to excess heat, constipation is often accompanied by complications, such as qi deficiency, blood deficiency, fluid deficiency, or Spleen yang deficiency. Optimal therapy requires concurrent focus on treatment of the disease without damaging the body, by using purgatives and tonics together. Such concurrent treatment ensures that purgative herbs will not damage the body, and tonic herbs will not cause further stagnation.

- Excess heat in the *fu* (hollow) organs during the *yangming* stage of illness with qi and blood deficiencies: use *Da Huang* with *Ren Shen* (Radix Ginseng) and *Dang Gui* (Radicis Angelicae Sinensis) to tonify qi and blood. **Exemplar Formula:** *Huang Long Tang* (Yellow Dragon Decoction).
- Constipation with heat consuming body fluids: use this herb with *Mai Men Dong* (Radix Ophiopogonis), *Sheng Di Huang* (Radix Rehmanniae) and *Xuan Shen* (Radix Scrophulariae) to nourish yin and promote generation of body fluids.
- Constipation with Spleen yang deficiency and accumulation of cold: combine it with *Ren Shen* (Radix Ginseng) and *Gan Cao* (Radix Glycyrrhizae) to tonify the Spleen, and *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis) to dispel cold.
- Habitual constipation with deficiency: combine it with honey and seeds such as *Huo Ma Ren* (Fructus Cannabis) and *Xing Ren* (Semen Armeniacae Amarum) to lubricate the intestines and thus facilitate passage of stools.

Dysentery: *Da Huang* is also used in treatment of late-stage dysentery, when there is accumulation of damp-heat after numerous episodes of diarrhea characterized by rectal tenesmus and feelings of incomplete evacuation after defecation. To complete the treatment, *Da Huang* clears and purges the remaining accumulation of damp-heat in the intestines, preventing chronic complications.

- Dysentery: cook *Da Huang* with grain-based liquor.
- Dysentery with excess damp-heat: use it with *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae) and *Bai Shao* (Radix Paeoniae Alba).
- Chronic dysentery with accumulation of damp-heat and Spleen yang deficiency: combine this herb with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis).

Parasites: *Da Huang* is commonly used with antiparasitic herbs or formulas to enhance the expulsion of parasites.

2. Purges Fire

Da Huang has an excellent ability to purge excess fire whether constipation is present or not. Clinical indications include excessive fire flaring upward, attacking the head, and leading to headache, red eyes, sore throat, swelling and pain of the gums, and oral ulcers.

- Excess upward flaring of heat attacking the head: use *Da Huang* with *Mang Xiao* (Natrii Sulfas), *Zhi Zi* (Fructus Gardeniae), *Huang Qin* (Radix Scutellariae), and *Lian Qiao* (Fructus Forsythiae) to clear heat from the head and the upper *jiao*. **Exemplar Formula:** *Liang Ge San* (Cool the Diaphragm Powder).
- Liver fire with headaches, irritability, convulsions and constipation: combine this herb with *Long Dan Cao* (Radix Gentianae), *Zhi Zi* (Fructus Gardeniae) and *Xia Ku Cao* (Spica Prunellae).

Da Huang cools the blood, stops bleeding, and treats various bleeding disorders caused by heat and fire attacking the *xue* (blood) level. The blood is usually bright red and generally profuse in these cases. Since *Da Huang* has a strong purgative function, it is unique in that it purges heat and stops bleeding without leaving blood stasis behind. It may be used individually or in combination with other herbs that tonify yin or clear heat.

- Epistaxis and hematemesis because of Heart fire: use this herb with *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- Hematemesis due to chronic weakness and deficiency: use *Da Huang* powder with juice from *Sheng Di Huang* (Radix Rehmanniae).
- Upper gastrointestinal tract bleeding: ingest powdered *Da Huang* alone.

3. Clears Heat and Eliminates Toxins

Da Huang is commonly used internally or topically to clear heat and eliminate toxins. Indications for internal use include intestinal abscesses, and for topical use include cellulitis, swelling, abscesses, carbuncles and burns.

- Intestinal abscess: use *Da Huang* with *Mu Dan Pi* (Cortex Moutan), *Tao Ren* (Semen Persicae), *Mang Xiao* (Natrii Sulfas) and *Hong Teng* (Caulis Sargentodoxae). **Exemplar Formula:** *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction).

Da Huang (Radix et Rhizoma Rhei)

- Cellulitis on the back with constipation and a forceful pulse: ingest this herb with *Bai Zhi* (Radix Angelicae Dahuricae) as powder, decoction or in combination with scallion and grain-based liquor.
- Burns: mix powdered *Da Huang* with sesame oil and apply topically.

4. Activates Blood Circulation and Removes Blood Stasis

Da Huang has two unique functions in activating blood circulation and removing blood stasis. First, it eliminates blood stasis and bruises through its purgative function; then it clears heat related to the stasis. Clinical applications include amenorrhea due to blood stasis, postpartum blood stasis, palpable abdominal masses and blood stasis due to external or traumatic injuries. It is often used for amenorrhea accompanied by dry skin, emaciation, poor appetite, lower abdominal fullness, night sweating and withered *shen* (spirit).

- Blood stasis: use *Da Huang* individually or in herbal combinations.
- Moderate blood stasis: combine it with *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Severe blood stasis: add *Shui Zhi* (Hirudo) and *Meng Chong* (Tabanus).
- Chronic blood stasis with qi and blood deficiencies: use *Da Huang* with *Ren Shen* (Radix Ginseng) and *E Jiao* (Colla Corii Asini).
- Amenorrhea: add *Meng Chong* (Tabanus) and *Di Bie Chong* (Eupolyphaga).

5. Clears Damp-Heat and Promotes Diuresis

Da Huang treats water accumulation in patients who have no deficiencies. It is commonly combined with diuretic or cathartic herbs to dispel water, clear damp-heat and promote normal urination. Additionally, *Da Huang* drains damp-heat and is an important herb in treating jaundice.

- Water accumulation characterized by edema and abdominal fullness: use it with *Fen Fang Ji* (Radix Stephaniae Tetandrae) and *Ting Li Zi* (Semen Descurainiae seu Lepidii).
- Accumulation of water and heat in the chest: combine it with *Gan Sui* (Radix Euphorbiae Kansui) and *Mang Xiao* (Natrii Sulfas).
- *Re lin* (heat dysuria): add *Chuan Mu Tong* (Caulis Clematidis Armandii), *Che Qian Zi* (Semen Plantaginis) and *Zhi Zi* (Fructus Gardeniae). **Exemplar Formula:** *Ba Zheng San* (Eight-Herb Powder for Rectification).
- Damp-heat jaundice: use *Da Huang* with *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae). **Exemplar Formula:** *Yin Chen Hao Tang* (Artemisia Scoparia Decoction).
- Damp-heat throughout the body: combine it with *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae). **Exemplar Formula:** *San Huang Xie Xin Tang* (Three Yellows Decoction to Sedate the Epigastrium).

Da Huang also treats chronic accumulation of phlegm heat characterized by cough, dyspnea, mania, disorientation and other symptoms associated with hot phlegm misting the Heart.

DOSAGE

5 to 10 grams; up to 15 to 20 grams in severe cases. Reduce the dosage of *Da Huang* by half when using as powder internally. *Da Huang* should be cooked for only a short period of time (thus, added at the end of decoction and cooked for only 5 to 10 minutes) to preserve its purgative function. Frying with grain-based liquor enhances its function to clear heat from the upper body, activate blood circulation and remove blood stasis, but weakens its effect to treat constipation. Charred *Da Huang* has a stronger hemostatic function.

Ingestion of *Da Huang* is often associated with nausea and vomiting, since this herb is bitter and irritating to the stomach. If the patient vomits after drinking a decoction containing *Da Huang*, let the decoction cool to room temperature. Before giving the patient the cooled decoction, serve a cup of a decoction composed of 1 gram of *Da Huang* and 1 gram of *Gan Cao* (Radix Glycyrrhizae), wait 15 minutes, and then administer the original decoction.

Because the components of *Da Huang* responsible for purgative actions are extremely sensitive to heat, its potency is heavily dependant on the processing methods. In one study, the purgative effect of *Da Huang* was evaluated using different preparations. The ED_{50} (effective dose) was 0.18 g/kg for fresh *Da Huang*, 0.25 g/kg for the vinegar-processed herb, 0.26 g/kg for herb processed with grain-based liquor, 3.42 g/kg for herb decocted with grain-based liquor, 7.26 g/kg for herb decocted with vinegar, and >12.00 g/kg for charred *Da Huang*.[1]

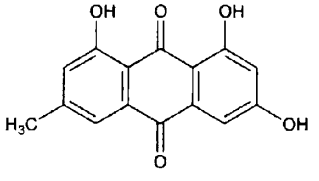
CAUTIONS / CONTRAINDICATIONS

- Extremely bitter and cold, *Da Huang* may damage the Spleen and Stomach and should be used with caution. Possible side effects may include nausea, vomiting and poor appetite.
- Use of *Da Huang* is contraindicated in patients who do not have constipation or blood stagnation.
- Use *Da Huang* with caution in patients who are menstruating, or in postpartum women without stasis.

Da Huang (Radix et Rhizoma Rhei)

- *Da Huang* is contraindicated in patients with qi and blood deficiencies, and in pregnancy.
- Nursing mothers should take *Da Huang* with great caution as it may enter breast milk, causing diarrhea in the infant.

OVERDOSAGE



In humans, the use of *Da Huang* is relatively safe. However, with overdose, adverse reactions such as diarrhea, nausea, vomiting, dizziness, and abdominal pain may occur. In one study with 30 subjects, oral administration of 3 grams of *Da Huang* three times daily for 5 days caused adverse reactions such as diarrhea, abdominal pain, vomiting, nausea, and borborygmus.[2]

TREATMENT OF OVERDOSAGE

Overdosage associated with *Da Huang* can be treated symptomatically using acupuncture, moxa and herbs. Adequate intake of fluids during treatment with *Da Huang* is important to avoid dehydration.

CHEMICAL COMPOSITION

Sennoside A,B,C,D,E,F; emodin, aloe-emodin, chrysophanol, rhein, physcion, rhein-8-mono-β-D-glucoside, physcion monoglucoside, aloe-emodin-8-monoglucoside, emodin monoglucoside, chrysophanol monoglucoside.[3,4]

Emodin

PHARMACOLOGICAL EFFECTS

- **Laxative:** *Da Huang* has a remarkable purgative effect. Sennoside A, aloe-emodin, and rhein are components most responsible for this purgative action. *Da Huang* works directly on the large intestine to increase contraction and peristalsis. However, the purgative effect does not occur until 6 to 8 hours after oral ingestion, which indicates that the herb must be absorbed systemically before it exerts its effect on the large intestine. It has no effect on the small intestine and will not interfere with normal absorption of nutrients. Interestingly, *Da Huang* contains a small amount of tannin that may cause constipation if used repeatedly for a prolonged period of time.[5]
- **Hepatoprotective:** *Da Huang* has a hepatoprotective effect, especially against carbon tetrachloride-induced liver damage. In mice with acute icteric jaundice, administration of *Da Huang* was effective in reducing the extent of liver damage (necrosis of hepatocytes), while the placebo group made no comparable progress.[6]
- **Cholagogic:** Intravenous injection of alcohol extract of *Da Huang* was effective in increasing the excretion of bile in dogs and cats within 5 to 15 minutes. The peak effect was observed after 8 to 10 minutes, and the duration of action was approximately 30 minutes.[7]
- **Hemostatic:** Intraperitoneal injection of *Da Huang* was effective in stopping bleeding in mice. The hemostatic effect is attributed to the herb's ability to increase viscosity of the blood and to facilitate aggregation of platelets.[8,9]
- **Antibiotic:** *Da Huang* has a broad spectrum antibiotic effect. It is most effective against the streptococcus and staphylococcus species of bacteria. It also inhibits the activity of *Corynebacterium diphtheriae, Bacillus subtilis, Salmonella typhi,* and *Bacillus dysenteriae.* Constituents responsible for the antibiotic effect include emodin, rhein, and aloe-emodin.[10]
- **Cardiovascular:** Administration of *Da Huang* has various impacts on the cardiovascular system. In one study, intravenous injection reduced blood pressure by 20% and heart rate by 12% in mice. In another study, administration of a *Da Huang* preparation to anesthetized dogs is associated with a decrease in oxygen consumption of the cardiac muscle, and with reduction of heart rate and peripheral resistance.[11,12]
- **Nephroprotective:** Decoction of *Da Huang* effectively reduces blood urea nitrogen (BUN) and creatinine as demonstrated in both *in vitro* and *in vivo* studies.[13]
- **Others:** Administration of *Da Huang* is associated with antipyretic, analgesic, and anti-inflammatory effects.[14]

CLINICAL STUDIES AND RESEARCH

- **Nephropathy:** Twenty patients with various degrees of renal impairment were treated with an herbal formula with marked reduction of blood urea nitrogen (BUN) and creatinine levels. Treatment was most effective in mild-to-moderate cases of renal impairment. The herbal formula contained *Da Huang* 30 to 60g (10g if post-decocted), calcined *Mu Li* (Concha Ostreae) 30g, and *Pu Gong Ying* (Herba Taraxaci) 20g. The treatment protocol was to instill 600 to 800 ml of herbal decoction as a rectal enema one to two times daily. Most patients had between 4 and 6 bowel movements per day.[15]
- **Upper gastrointestinal bleeding:** In one clinical study, 890 patients with upper gastrointestinal bleeding were treated with 3 grams of powdered *Da Huang* (in pills or syrup) three times daily, with a 97% rate of effectiveness. The average time required to stop bleeding was 2 days, as determined by hemoccult testing. All other herbs and drugs were discontinued for the duration of the study. In severe cases of bleeding, supportive treatments such as intravenous fluids

Da Huang (Radix et Rhizoma Rhei)

and blood transfusion were administered.[16]

- **Acute pancreatitis:** According to one report, 100 patients with pancreatitis were treated with *Da Huang* with great success. Initial treatment included decoction of 30 to 60 grams of *Da Huang* every 1 to 2 hours until symptoms returned to normal. After the patients stabilized, they were switched to tablets of *Da Huang*, 3 grams twice daily. The total dosage of *Da Huang* per patient was 450 grams. The study reported close to 100% effectiveness. The time required was 2 days for normalization of amylase in urine and 3 days for relief of pain.[17]
- **Enteritis:** Patients with hemorrhagic necrotic enteritis were treated with good results using 24 to 30 grams of fresh unprocessed *Da Huang* two to three times daily. The study reported improvement in 12 of 14 patients after 2 to 6 doses, with relief of pain and diminished amount of hematochezia.[18]
- **Constipation:** One report cites 72 patients with cerebral vascular accident (11 due to hemorrhage and 61 due to embolism) that were admitted to the hospital and treated for related constipation with an herbal decoction, with good results. Records indicated that all patients had greasy or dry yellow tongue coats, and had passed no bowel movements within the previous four days. The herbal prescription contained *Da Huang* 12g, *Mang Xiao* (Natrii Sulfas) 10g, *Zhi Shi* (Fructus Aurantii Immaturus) 9g, and *Gan Cao* (Radix Glycyrrhizae) 6g, cooked to yield a final decoction of 200 ml. The decoction was divided into 2 doses, taken 2 hours apart. Most people responded within 1 to 2 doses.[19]
- **Hyperlipidemia:** A preparation of *Da Huang* given three times daily for 3 weeks was 76% effective in reducing plasma triglycerides and β-lipoprotein levels in 47 patients.[20]
- **Acute icteric hepatitis:** According to one report, 80 cases of acute icteric hepatitis were treated with a large dosage of *Da Huang* with a 95% rate of effectiveness based on symptomatic evaluation and improvement of liver function. The treatment protocol was 50 grams of *Da Huang* for adults, and 25 to 30 grams for children, given as decoction one time daily.[21]
- **Tonsillitis:** In a clinical study, 22 patients with acute tonsillitis experienced complete recovery within 2 to 4 days, using *Da Huang*. The treatment protocol was to soak fresh *Da Huang* in 250 ml of hot water and drink the solution every 2 hours as needed. Each set of herbs could be used up to four times before replacement. The dosage of *Da Huang* was 15 grams for adults, and 8 to 10 grams for children.[22] In another study, 40 children with acute tonsillitis were treated with an 85% success rate using 6 to 9 grams of *Da Huang* soaked in hot water, every 2 hours.[23]

HERB-DRUG INTERACTION

- **Cardiac glycosides:** Prolonged use of *Da Huang* may cause loss of potassium, leading to increased toxicity of cardiac glycosides, such as digoxin (Lanoxin).[24]

TOXICOLOGY

In acute toxicology studies in mice, the LD_{50} for decoction of *Da Huang* via oral ingestion is 153 g/kg. In chronic toxicology studies in mice, administration of *Da Huang* on a long-term basis may cause severe diarrhea, inhibition of the immune system, and decrease in weight of the reproductive organs.[25,26]

AUTHORS' COMMENTS

Da Huang is the key herb in treating excess-type constipation involving heat. Constipation may cause various toxins to be absorbed by the intestines, thus causing symptoms of fever, delirium, headache, and in severe cases, unconsciousness. *Da Huang* restores normal bodily metabolism by purging the excess accumulation and thus preventing further absorption of toxins and accumulation of heat.

Da Huang has the unique characteristic of being able to simultaneously treat both constipation and dysentery. For treatment of constipation, its main function is to dispel stagnation and induce bowel movement by purging heat accumulation in the intestines. The initial stage of dysentery includes diarrhea with a feeling of incomplete evacuation and rectal tenesmus caused by damp-heat. *Da Huang* is used in this case to treat the root of the problem, namely damp-heat. Use of *Da Huang* is necessary to purge damp-heat to ensure successful and complete recovery. If antidiarrheal herbs are used, the condition may improve slightly but may turn from acute to chronic dysentery as the pathogenic factors are trapped in the intestines. Though constipation and dysentery may manifest in completely different symptoms, the cause of stagnation and heat is the same. For that reason, *Da Huang* can be used for both cases.

It may seem paradoxical that, although *Da Huang* has descending properties, it is used in treatment of disorders of the head such as red eyes, sore throat, swollen and painful gums, hematemesis, and epistaxis. It may be helpful to consider that these symptoms are caused by a flaring up of heat, not by heat accumulation in the local region. In these cases, instead of choosing herbs that go to the head, it is better to choose an herb such as *Da Huang* that has descending properties to bring the flaring up of fire back down.

According to Dr. Zhang Xiao-Ping, a small amount of the downward-directing *Da Huang*, used for patients with hypertension, sedates rising Liver fire.

Mang Xiao (Natrii Sulfas)

芒硝 芒硝

Pinyin Name: *Mang Xiao*
Alternate Chinese Names: *Pi Xiao, Ma Ya Xiao*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: sodium sulfate, mirabilite, mirabilitum
Pharmaceutical Name: Natrii Sulfas
Properties: salty, bitter, cold
Channels Entered: Lung, Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Purges Excess, Softens Hardness

Constipation due to excess heat accumulation in the Large Intestine: Bitter, salty and cold, *Mang Xiao* (Natrii Sulfas) treats constipation by softening hardness, eliminating stagnation and purging heat. *Mang Xiao* moistens the intestines, softens the stool and is best for constipation characterized by dry, hard stools.

- Severe constipation due to accumulation of excess heat: use *Mang Xiao* with *Da Huang* (Radix et Rhizoma Rhei),

Mang Xiao (Natrii Sulfas)

Hou Po (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus) to soften hardness, relieve constipation and purge excess heat. **Exemplar Formula:** *Da Cheng Qi Tang* (Major Order the Qi Decoction).

- Moderate constipation due to accumulation of excess heat: combine this herb with *Da Huang* (Radix et Rhizoma Rhei) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Tiao Wei Cheng Qi Tang* (Regulate the Stomach and Order the Qi Decoction).

2. Clears Heat and Sedates Fire

Externally contracted febrile diseases: *Mang Xiao* clears heat from the Lung and Stomach, that is often characterized by high fever, irritability, thirst, delirium and constipation.

- Heat in the Lung and Stomach: use *Mang Xiao* with *Da Huang* (Radix et Rhizoma Rhei), *Huang Qin* (Radix Scutellariae), and *Zhi Zi* (Fructus Gardeniae).

Cough, mania and upper back pain caused by hot phlegm: Stagnation of phlegm in the body creates secondary heat and fire. Phlegm and heat attacking the Lung lead to cough, dyspnea and yellow sticky sputum; phlegm and heat obstructing the channels and collaterals cause swelling and pain in the upper body and the extremities; and phlegm and heat misting the Heart leads to delirium and mania.

- Phlegm and heat in the Lung: use *Mang Xiao* with *Huang Qin* (Radix Scutellariae), *Qing Dai* (Indigo Naturalis) and *Gua Lou Ren* (Semen Trichosanthis).
- Phlegm and heat obstructing the channels and collaterals: combine this herb with *Ban Xia* (Rhizoma Pinelliae), *Fu Ling* (Poria) and *Zhi Ke* (Fructus Aurantii).
- Phlegm and heat misting the Heart: also add *Dai Zhe Shi* (Haematitum), *Da Huang* (Radix et Rhizoma Rhei), *Ban Xia* (Rhizoma Pinelliae) and *Yu Jin* (Radix Curcumae). Or, use *Mang Xiao* instead of salt when cooking vegetables.

Nodules, lumps, abscesses and swellings characterized by heat and toxins: When applied topically, *Mang Xiao* clears heat, softens hardness, and reduces abscesses and swelling. It treats breast lumps with redness and swelling that have no pus discharge. It is used topically to stop lactation, and treat oral ulcers and sore throat.

- Breast lumps without pus: apply *Mang Xiao* topically to soften nodules and reduce swellings.
- For cessation of lactation: apply *Mang Xiao* topically.
- Oral ulcers and sore throat: combine it with *Peng Sha* (Borax), *Bing Pian* (Borneolum Syntheticum) and *Zhu Sha* (Cinnabaris), and apply topically.

DOSAGE

10 to 15 grams. Dissolve in hot water or herbal decoction immediately before administration.

CAUTIONS / CONTRAINDICATIONS

- *Mang Xiao* is contraindicated in patients who have deficiency and cold of the Spleen and Stomach.
- Use of *Mang Xiao* is contraindicated during pregnancy.
- Use of *Mang Xiao* topically for breast abscess in a nursing mother may lead to decreased (or termination of) lactation. Therefore, it should be used only if necessary, and discontinued immediately when the desired effect is achieved.

CHEMICAL COMPOSITION

Hydrated sodium sulfate ($Na_2SO_4+10H_2O$) 96-98%, sodium chloride, magnesium chloride, magnesium sulfate, calcium sulfate.[1]

PHARMACOLOGICAL EFFECTS

- **Laxative:** *Mang Xiao* is an osmotic agent and has a marked purgative effect. Following oral administration, it remains in the gastrointestinal system and is not absorbed systemically. As an osmotic agent, it increases water content and pressure in the intestines, thus inducing peristalsis and bowel movement. *Mang Xiao* is most effective when taken with a large amount of water. The laxative effect is usually achieved within 4 to 6 hours following oral ingestion.[2]

CLINICAL STUDIES AND RESEARCH

- **Cessation of lactation:** Lactation was successfully terminated in 33 women following topical application of *Mang Xiao*. The treatment protocol was to use 200 grams of powdered *Mang Xiao* covered with gauze, applied equally to both breasts for 24 hours. The same protocol may be repeated one or two times more if necessary.[3]
- **Rectal disorders:** In one study, 4,834 patients with various rectal disorders, including but not limited to hemorrhoids and colitis, were treated with a 3% *Mang Xiao* soaking solution, with good results.[4]

SUPPLEMENT

There are three types of this medicinal substance: *Po Xiao* (Sal Glauberis), *Mang Xiao* (Natrii Sulfas), and *Yuan Ming Fen* (Matrii Sulfas Exsiccatus).

- 樸硝 / 朴硝 *Po Xiao* (Sal Glauberis) is the crude form of sodium sulfate. Because of impurities, it is often used only topically for swellings and nodules.
- 芒硝 / 芒硝 *Mang Xiao* (Natrii Sulfas), sodium sulfate, is used both internally and topically. *Mang Xiao* is derived by dissolving *Po Xiao* in warm water, and filtering out the impurities.
- 元明粉 *Yuan Ming Fen* (Matrii Sulfas Exsiccatus) is the

Mang Xiao (Natrii Sulfas)

purest form and is best used as powder for oral ingestion, or used topically for sore throat, oral ulcers and eye disorders. *Yuan Ming Fen* is less effective as a laxative, compared to *Mang Xiao,* and weaker in clearing heat.

AUTHORS' COMMENTS

Da Huang (Radix et Rhizoma Rhei) and *Mang Xiao* are commonly prescribed together to treat excess-type constipation caused by heat. From the traditional Chinese medicine perspective, they work synergistically because *Da Huang* has a strong purgative effect to drive out stagnation and *Mang Xiao* softens the stool and facilitates the passage of stools. From a pharmacological perspective, they work synergistically because *Da Huang* increases intestinal peristalsis, and *Mang Xiao* increases bowel fluid content, to achieve bowel movements. In short, these two substances are the strongest pair of herbs to treat constipation.

Mang Xiao is an osmotic agent that has a marked purgative effect. Since it does not require systemic absorption for its action, it has an immediate onset of purgative effect. For this reason, *Mang Xiao* is sometimes used as the substance of choice to induce evacuation of intestinal contents in cases of ingestion of poisonous or toxic substances.

Fan Xie Ye (Folium Sennae)

番瀉葉　番泻叶

Pinyin Name: *Fan Xie Ye*
Literal Name: "barbarian purgative leaves," "purgative leaves of the foreigners"
Original Source: *Zhong Guo Yao Xue Da Ci Dian* (Grand Dictionary of Chinese Herbal Medicine) in 1935
English Name: senna leaves
Botanical Name: *Cassia angustifolia* Vahl. (*Xia Ye Fan Xie*); *Cassia acutifolia* Del. (*Jian Ye Fan Xie*)
Pharmaceutical Name: Folium Sennae
Properties: sweet, bitter, cold
Channels Entered: Large Intestine

CHINESE THERAPEUTIC ACTIONS

Purges Downward, Clears Heat

Fan Xie Ye (Folium Sennae) purges accumulation and clears heat. It is commonly used to relieve constipation caused by heat and stagnation. Clinical applications include relieving acute or chronic constipation, and cleansing the intestines prior to x-ray or abdominal surgery.

- Mild constipation: soak *Fan Xie Ye* in hot water and serve as tea.
- Moderate constipation: use it with *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus).

DOSAGE

1.5 to 3.0 grams when used as a mild laxative. The

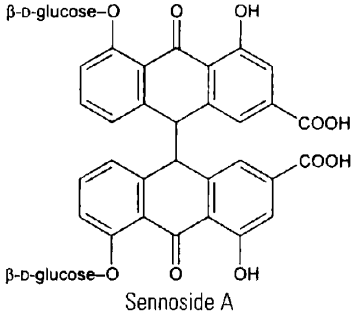
Fan Xie Ye (Folium Sennae)

maximum dosage of *Fan Xie Ye* is 5 to 10 grams. This herb is usually steeped in hot water for no more than 15 minutes, and consumed as tea.

CAUTIONS / CONTRAINDICATIONS

- *Fan Xie Ye* must be used with extreme caution for patients who are weak, pregnant or nursing.
- This herb promotes blood circulation to the lower body and thus should be used with caution in patients who are menstruating or have hemorrhoids.

OVERDOSAGE



Overdose of *Fan Xie Ye* is associated with nausea, vomiting, abdominal pain, numbness of the lips, mouth and extremities, swelling of the hands and fingers, dizziness and loss of balance. In severe cases, there may be labored breathing, tonic-clonic contraction of the extremities, locked jaws, clenched fists, foaming at the mouth, and unconsciousness.[1]

TREATMENT OF OVERDOSAGE

Overdose or adverse reactions associated with *Fan Xie Ye* are treated symptomatically using acupuncture, moxa and herbs. Adequate intake of fluids is important to avoid dehydration.

CHEMICAL COMPOSITION

Sennoside A,B,C,D; rhein, aloe-emodin, chrysophanol.[2,3]

Sennoside A

PHARMACOLOGICAL EFFECTS

- **Laxative:** Sennoside A and B both have marked laxative effects. Following oral administration, these substances are absorbed systemically, and converted to active components. They then exert their laxative effect on the large intestine.[4]
- **Antibiotic:** It has an inhibitory effect on *E. coli, Bacillus dysenteriae, Bacillus proteus, Candida albicans*, and some pathogenic fungi.[5]
- **Hemostatic:** Oral administration of *Fan Xie Ye* powder helps to stop bleeding. The hemostatic effect is attributed to increased platelet activities.[6]

CLINICAL STUDIES AND RESEARCH

- **Intestinal obstruction:** In one study, 106 patients with acute intestinal obstruction were treated with gastric lavage of stomach contents, followed by a decoction of 15 to 30 grams of *Fan Xie Ye*. The study reported an overall effective rate of 69.8%. Of those who responded to the treatment, over 90% showed laxative action within 24 hours. Surgery was performed on those who did not respond.[7]
- **Pancreatitis:** Patients with pancreatitis were treated with a standard therapy of 10 grams of *Fan Xie Ye* in capsules three times daily. The same treatment was repeated for those who did not have a bowel movement within 24 hours. Complete recovery was reported in most of 100 patients with acute pancreatitis within 2 to 4 days.[8]
- **Cholecystitis and cholelithiasis:** In one study, 49 patients with cholecystitis and/or cholelithiasis were treated with 10 grams of *Fan Xie Ye* in capsules three times daily with great success. In another study, 20 patients with cholecystitis and/or cholelithiasis were treated with 10 gram of *Fan Xie Ye* in capsules, three times daily with good results.[9,10]
- **Gastrointestinal bleeding:** One study describes 346 patients with gastric or duodenal bleeding characterized by hematemesis or hematochezia who were treated with *Fan Xie Ye* with a 94.2% success rate. Bleeding stopped after approximately 2 to 3 days. All patients were treated with a standard therapy of 10 grams of *Fan Xie Ye* in capsules, three times daily.[11]
- **Constipation:** According to another study, 137 patients with constipation were treated with a 95.1% rate of effectiveness using *Fan Xie Ye* soaked in hot water to make tea. The dosage was 3 to 6 grams for moderate constipation, and 10 grams for severe constipation. The study also noted that the treatment was effective for constipation in elderly, hypertensive, postpartum, or post-surgical patients.[12]
- **Post-surgical constipation:** Administration of 4 grams of *Fan Xie Ye* soaked in hot water effectively induced bowel movement and restored intestinal functioning within 24 hours. The overall rate of effectiveness was 95.6% for 276 post-surgical patients.[13]

HERB-DRUG INTERACTION

- **Diuretics:** Overuse of *Fan Xie Ye* aggravates loss of potassium associated with the use of diuretic drugs.[14] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]
- **Cardiac glycosides:** Excessive loss of potassium increases toxicity of cardiac glycosides, such as digoxin (Lanoxin).[15]

TOXICOLOGY

The LD_{50} for sennoside in mice is 1.4 g/kg, which is

Fan Xie Ye (Folium Sennae)

equivalent to 36.3 g/kg of *Fan Xie Ye*, or approximately 300 times the normal adult dose.[16,17]

AUTHORS' COMMENTS

Besides treating constipation, *Fan Xie Ye* has been used effectively in the treatment of acute pancreatitis, cholecystitis and gastrointestinal bleeding.

Fan Xie Ye and *Da Huang* (Radix et Rhizoma Rhei) both purge downward and treat constipation due to heat. Similarly, both are to be used with caution or are contraindicated in pregnant, lactating and menstruating women. However, the primary and only function of *Fan Xie Ye* is to purge heat and relieve constipation. *Da Huang*, besides its purgative function, also purges fire, eliminates toxins, and disperses blood stagnation.

Lu Hui (Aloe)

蘆薈 芦荟

Pinyin Name: *Lu Hui*
Alternate Chinese Names: *Xiang Dan*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: aloe
Botanical Name: *Aloe vera* L. (*Ku La Suo Lu Hui*); *Aloe ferox* Mill (*Hao Wang Jiao Lu Hui*)
Pharmaceutical Name: Aloe
Properties: bitter, cold
Channels Entered: Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Purges Downwards

Excess-type constipation: *Lu Hui* (Aloe) is most effective if constipation is accompanied by heat attacking the Heart and leading to irritability and insomnia. The purgative action removes the source of the heat so that the Heart energy can settle.

- Constipation with irritability and insomnia: use *Lu Hui* with *Zhu Sha* (Cinnabaris).

Lu Hui (Aloe)

2. Clears Liver Fire

Liver fire: Excess Liver fire is characterized by symptoms such as headache, hypochondriac pain, red eyes, dizziness, irritability, constipation and infantile convulsions.

- Liver fire: use *Lu Hui* with *Long Dan Cao* (Radix Gentianae), *Zhi Zi* (Fructus Gardeniae) and *Qing Dai* (Indigo Naturalis). **Exemplar Formula:** *Dang Gui Long Hui Wan* (Tangkuei, Gentiana, and Aloe Pill).
- Infantile convulsions with Liver heat and phlegm: use this herb with *Dan Nan Xing* (Arisaema cum Bile) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).
- Hepatitis: use a small dose of *Lu Hui* as the guiding herb with others herbs that clear damp-heat from the Liver, such as *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae).

3. Kills Parasites

Intestinal parasites: *Lu Hui* kills roundworm and ringworm to treat malnutrition caused by intestinal parasites in infants and children.

- Intestinal parasites: use powdered *Lu Hui* and *Shi Jun Zi* (Fructus Quisqualis) in equal portions and serve with rice water.
- *Gan ji* (infantile malnutrition) with intestinal parasites and Spleen deficiency: combine it with *Ren Shen* (Radix Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

Lu Hui can also be used topically to treat itching due to parasites, or to chronic skin disorders that do not respond to other treatments.

- Itching due to parasites: apply powdered *Lu Hui* and *Gan Cao* (Radix Glycyrrhizae) topically.
- Hemorrhoids: apply *Lu Hui* and *Bing Pian* (Borneolum Syntheticum) topically.

DOSAGE

0.6 to 1.5 grams in powder, capsules or pills. Decoction is not recommended, as *Lu Hui* is extremely bitter and has an unpleasant smell.

CAUTIONS / CONTRAINDICATIONS

- *Lu Hui* is contraindicated during pregnancy, and in cases of deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Alon, aloe-emodin.[1]

PHARMACOLOGICAL EFFECTS

- **Laxative:** Alon has a marked laxative effect.[2]
- **Antibiotic:** Water extract of *Lu Hui* has various degrees of inhibitory action against pathogenic fungi and dermatophytes.[3]
- **Antineoplastic:** Alcohol extract of *Lu Hui* has demonstrated preliminary ability to inhibit the growth of cancer cells.[4]

HERB-DRUG INTERACTION

- **Cardiac glycosides:** Overuse of *Lu Hui* may cause potassium depletion, leading to increased toxicity of cardiac glycosides, such as digoxin (Lanoxin).[5]

TOXICOLOGY

No fatalities or bodily abnormalities were reported following intramuscular injection of *Lu Hui* continuously for six months (daily dosage was equivalent to 10 mg/kg of bulk herb). There was, however, necrosis of tissue at the injection site.[6]

AUTHORS' COMMENTS

Classic text states that *Lu Hui* can be used to treat overdose of *Ba Dou* (Fructus Crotonis).

Ba Dou (Fructus Crotonis)

巴豆

Pinyin Name: *Ba Dou*
Literal Name: "clinging bean"
Alternate Chinese Names: *Ba Ji, Gang Zi, Jiang Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: croton fruit, croton seed
Botanical Name: *Croton tiglium* L. (*Ba Dou*)
Pharmaceutical Name: Fructus Crotonis
Properties: acrid, hot
Channels Entered: Stomach, Large Intestine
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Purges Cold Accumulation

Food stagnation or constipation due to cold: *Ba Dou* (Fructus Crotonis) is one of the strongest cathartic herbs that purges abdominal stagnation caused by cold. It is best for patients who exhibit the following symptoms: sudden abdominal and epigastric fullness, distention, piercing pain and constipation. It is frequently used for acute intestinal obstruction.

- Acute intestinal obstruction: use *Ba Dou* with *Da Huang* (Radix et Rhizoma Rhei) and *Gan Jiang* (Rhizoma Zingiberis).

2. Eliminates Water Accumulation

Ascites: use it with *Xing Ren* (Semen Armeniacae Amarum) as a pill for late stage ascites due to schistosomal cirrhosis.

3. Eliminates Phlegm

Obstruction of the throat due to phlegm accumulation: *Ba Dou* induces vomiting and expels phlegm obstruction of the throat that is causing suffocation, dyspnea, and profuse sputum.

Lung abscess with profuse sputum: *Ba Dou* dispels sputum when used with *Jie Geng* (Radix Platycodonis) and *Bei Mu* (Bulbus Fritillaria).

4. Stops Diarrhea

Chronic diarrhea due to cold: The dry-fried form of *Ba Dou* treats diarrhea due to cold accumulation in the abdomen. It is imperative to ensure that the dry-fried form does not contain any essential oil, which may worsen the diarrhea.

5. Kills Parasites and Heals Ulceration

Ba Dou can be used topically to treat ulcerations, sores, scabies, abscesses, and swelling and other dermatological disorders. *Ba Dou* should not be applied to the head, face or the genital areas.

- Skin disorders: use it topically with *Xiong Huang* (Realgar) as a paste. If the sore has not ulcerated, use *Ba Dou* with *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) to promote eruption and healing.

DOSAGE

0.1 to 0.3 grams in capsule, powder or pill forms. For treatment of food stagnation in infants between 6 to 12 months of age, the dosage should not exceed 0.09 gram. For treatment of diarrhea, use only the dry-fried form of *Ba Dou* that does not have any essential oils.

CAUTIONS / CONTRAINDICATIONS

- *Ba Dou* is toxic, and is one of the most potent cathartics. It must be used with extreme caution, and only when necessary.
- Do not serve *Ba Dou* decoction with hot beverages as it will enhance the purgative function of the herb.
- *Ba Dou* is contraindicated in pregnancy, as it may irritate the uterus and cause abortion.
- *Ba Dou* antagonizes *Che Qian Zi* (Semen Plantaginis).
- According to classic texts, it is incompatible with *Qian Niu Zi* (Semen Pharbitidis).
- Direct contact between *Ba Dou* and the skin or mucous membranes may lead to dermatitis, itching, burning sensations, swelling and other allergic reactions. Therefore, topical application to the face or genital areas is contraindicated.[1]

Ba Dou (Fructus Crotonis)

OVERDOSAGE

Overdose generally occurs within 1 to 3 hours after ingestion. Clinical manifestations include nausea, vomiting, burning sensations of the mouth and throat, poor appetite, severe abdominal pain, hematemesis, hematochezia, rectal tenesmus, and profuse diarrhea with the presence of mucus and blood. *Ba Dou* is also toxic to the kidneys and may cause such symptoms as hematuria, dysuria, anuria and proteinuria. Severe overdose is characterized by hypotension, cyanotic face, rapid heartbeat but weak pulse, dyspnea, decreased body temperature, respiratory depression, and in severe cases, shock.[2]

TREATMENT OF OVERDOSAGE

Many methods have been used successfully for treatment of overdose:

- An herbal decoction of *Ban Lan Gen* (Radix Isatidis) and sugar.
- Administration of 60 to 120 ml of peanut oil.
- An herbal decoction with 12 grams of *Xuan Shen* (Radix Scrophulariae) and 15 grams of *Shi Chang Pu* (Rhizoma Acori) administered every four hours for a total of 3 to 4 doses.
- An herbal decoction with 150 grams of *Lu Dou* (Semen Phaseoli Radiati), 9 grams of *Huang Bai* (Cortex Phellodendri), and 9 grams of *Gan Cao* (Radix Glycyrrhizae) given every three hours for a total of 2 to 4 doses.
- An herbal decoction with *Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri), *Bai Shao* (Radix Paeoniae Alba), *Che Qian Zi* (Semen Plantaginis) and *Shi Hu* (Herba Dendrobii) may be prescribed to counteract the side effects of *Ba Dou*.
- Diarrhea can be treated with administration of a cold decoction containing *Huang Lian* (Rhizoma Coptidis) and *Huang Bai* (Cortex Phellodendri), with cold congee.
- Dermatitis can be resolved by applying a solution of *Huang Lian* topically.[3]

CHEMICAL COMPOSITION

Croton resin, phorbol, crotonic acid, cocarcinogen, crotin, crotonoside, ricinine.[4]

PHARMACOLOGICAL EFFECTS

- **Cathartic:** *Ba Dou* has a stimulating effect on the mucous membranes of the intestines, leading to increased secretion, peristalsis, and bowel movements within 30 minutes to 3 hours.[5]
- **Antibiotic:** Decoction of *Ba Dou* has an inhibitory effect against *Pseudomonas aeruginosa*, *Staphylococcus aureus*, and *Corynebacterium diphtheriae*.[6]
- **Analgesic:** Essential oil of *Ba Dou* administered via oral, subcutaneous or intraperitoneal injection, has an analgesic effect in mice. The exact mechanism of action is unclear.[7]
- **Antineoplastic:** Extract of *Ba Dou* had an inhibiting effect on the growth of cancer cells in mice with sarcoma, cervical cancer, and skin cancer.[8,9,10]

CLINICAL STUDIES AND RESEARCH

- **Intestinal obstruction:** According to one report, 40 out of 50 patients with intestinal obstructions were treated with a preparation of *Ba Dou*, with complete recovery. The treatment protocol stated that *Ba Dou* must be prepared by extracting and discarding the essential oil prior to use. The dosage of the herb was 150 to 300 mg. Most patients showed relief within a short period of time. However, a second dose within 3 to 4 hours was repeated if necessary.[11]

TOXICOLOGY

Ingestion of 20 drops of *Ba Dou* oil is lethal in humans. In guinea pigs, injection of *Ba Dou* oil led to proteinuria and hematuria.[12]

Section 2

— Moist Laxatives

Huo Ma Ren (Fructus Cannabis)

火麻仁

Pinyin Name: *Huo Ma Ren*
Literal Name: "fire hemp seeds"
Alternate Chinese Names: *Da Ma Ren, Da Ma Zi, Ma Zi Ren*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: linum, hemp seed, cannabis seed, marijuana seed
Botanical Name: *Cannabis sativa* L. (*Da Ma*)
Pharmaceutical Name: Fructus Cannabis
Properties: sweet, neutral
Channels Entered: Spleen, Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Lubricates the Intestines

Constipation: *Huo Ma Ren* (Fructus Cannabis), rich in oil, lubricates the intestines and relieves constipation. It is most effective in treating constipation in postpartum women or geriatric patients, characterized by dry stools, generalized weakness and deficiency of body fluids.

- Constipation due to deficiency of body fluids: use *Huo Ma Ren* with *Yu Li Ren* (Semen Pruni), *Gua Lou Ren* (Semen Trichosanthis) and *Xing Ren* (Semen Armeniacae Amarum).
- Constipation with blood deficiency: use it with *Dang Gui* (Radicis Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Constipation with yin deficiency: add *Mai Men Dong* (Radix Ophiopogonis) and *Sheng Di Huang* (Radix Rehmanniae).
- Constipation with qi deficiency: combine *Huo Ma Ren* with *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis).
- Habitual constipation: combine it with *Tao Ren* (Semen Persicae) and *Dang Gui* (Radicis Angelicae Sinensis). **Exemplar Formula:** *Run Chang Wan* (Moisten the Intestines Pill).
- Severe constipation due to general deficiency: use it with *Da Huang* (Radix et Rhizoma Rhei), *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus). **Exemplar Formula:** *Ma Zi Ren Wan* (Hemp Seed Pill).

2. Moistens Dryness, Benefits the Hair

Huo Ma Ren has a moistening effect that promotes hair growth and treats dry hair.

- Hair loss with blood deficiency: apply *Huo Ma Ren* essential oil topically on the scalp. Take *He Shou Wu* (Radix Polygoni Multiflori) orally.
- Hair loss or dry hair: use *Huo Ma Ren* as a rinse or shampoo.
- Scalp ulcers: mix *Huo Ma Ren* powder with water and honey, apply topically.

DOSAGE

10 to 15 grams. *Huo Ma Ren* seeds should be crushed

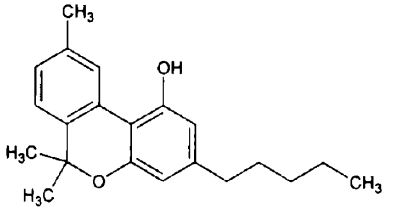
Huo Ma Ren (Fructus Cannabis)

prior to cooking. Dry-frying the herb minimizes toxicity and maximizes extraction of active components. *Huo Ma Ren* is also used topically as a powder or essential oil.

CAUTIONS / CONTRAINDICATIONS

- Avoid use of the unprocessed herb, as it is slightly toxic.

OVERDOSAGE



Overdose of *Huo Ma Ren* is characterized by symptoms and signs such as nausea, vomiting, diarrhea, numb extremities, muscle spasms, irritability, restlessness, convulsions, cramps, dilation of the pupils, increased heart rate, drowsiness, headache, dizziness, pale face, blurred vision, tremor, semiconsciousness and delirium. These reactions generally occur within 2 hours of the time of ingestion.

TREATMENT OF OVERDOSAGE

Overdose may be treated by ingestion of milk or egg whites to reduce absorption of the herb. If necessary, gastric lavage using 1:5000 potassium permanganate, or administration of activated charcoal, reduces absorption. Intravenous fluids, balancing electrolytes, and other symptomatic treatment may also be beneficial.[1]

CHEMICAL COMPOSITION

Cannabinol, trigonelline, isoleucin betaine, muscarin.[2,3]

Cannabinol

PHARMACOLOGICAL EFFECTS

- **Laxative:** *Huo Ma Ren* stimulates the intestines, increases peristalsis, and promotes bowel movement.[4]
- **Antihypertensive:** Alcohol extract of *Huo Ma Ren* has a mild tendency to lower blood pressure in cats and rabbits.[5]
- **Antihyperlipidemic:** Continuous administration of *Huo Ma Ren* for 4 weeks significantly reduced plasma cholesterol levels in rats, compared to the placebo group.[6]

AUTHORS' COMMENTS

Cannabis is a highly regulated substance in many countries. Fresh seeds are generally designated a controlled substance, since they can be planted and propagated. But after processing, the seeds can no longer germinate and thus are not considered a controlled substance. Therefore, most countries require that the seeds be fully processed prior to importation.

Huo Ma Ren and *Yu Li Ren* (Semen Pruni) both treat constipation. *Huo Ma Ren* generates fluids, moistens the intestines and relieves constipation. *Yu Li Ren* regulates Large Intestine qi to relieve constipation.

Huo Ma Ren (Fructus Cannabis) and *Hu Ma Ren* (Semen Sesami Nigrum) have similar pinyin names, but completely different functions. *Huo Ma Ren* generates body fluids and treats constipation. *Hu Ma Ren* tonifies the Liver and Kidney, and nourishes blood and *jing* (essence) to moisten dryness. [Note: *Hu Ma Ren* is an alternate name of *Hei Zhi Ma*.]

Yu Li Ren (Semen Pruni)

郁李仁

Pinyin Name: *Yu Li Ren*
Literal Name: "constrained plum pit"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: prunus seed, Chinese dwarf cherry seed, bunge cherry seed, dwarf flowering cherry seed, Chinese bushcherry seed, downy cherry seed
Botanical Name: *Prunus humilis* Bge. (*Ou Li*); *Prunus japonica* Thunb. (*Yu Li*); *Prunus tomentosa* Thunb. (*Mao Ying Tao*)
Pharmaceutical Name: Semen Pruni
Properties: acrid, bitter, sweet, neutral
Channels Entered: Spleen, Large Intestine, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Moistens the Intestines and Relieves Constipation

Yu Li Ren (Semen Pruni), rich in oil, lubricates the intestines and relieves constipation. It is most effective in treating constipation characterized by dry stools, general dryness and weakness, or deficiency of body fluids or blood.

- Constipation: combine *Yu Li Ren, Huo Ma Ren* (Fructus Cannabis), *Bai Zi Ren* (Semen Platycladi) and *Xing Ren* (Semen Armeniacae Amarum).
- Constipation with blood deficiency: combine it with *Sheng Di Huang* (Radix Rehmanniae), *Dang Gui* (Radicis Angelicae Sinensis), and *He Shou Wu* (Radix Polygoni Multiflori).

2. Regulates Water and Reduces Swelling

Yu Li Ren regulates water circulation and treats edema-related abdominal fullness.

- Abdominal fullness with edema: add *Sang Bai Pi* (Cortex Mori), *Chi Xiao Dou* (Semen Phaseoli) and *Chen Pi* (Pericarpium Citri Reticulatae).

Yu Li Ren regulates qi and is used for cough and dyspnea.

DOSAGE

5 to 10 grams in decoction. *Yu Li Ren* seeds should be crushed prior to decoction.

CHEMICAL COMPOSITION

Amygadin, saponin (0.96%), lipids (58.3-74.2%), organic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Laxative:** Decoction of *Yu Li Ren* increases peristalsis and promotes bowel movement in mice.[2]

AUTHORS' COMMENTS

Yu Li Ren and *Bai Zi Ren* (Semen Platycladi) both treat constipation. *Yu Li Ren* is better for dry stools caused by generalized dryness, whereas *Bai Zi Ren* is better for constipation caused by blood deficiency and intestinal dryness.

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 1215

Section 3

— Harsh Expellants (Cathartics)

Gan Sui (Radix Euphorbiae Kansui)

甘遂

Pinyin Name: *Gan Sui*
Literal Name: "sweet process"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: euphorbia, gansui root, kansui root
Botanical Name: *Euphorbia kansui* T. N. Liou ex T. P. Wang. (*Gan Sui*)
Pharmaceutical Name: Radix Euphorbiae Kansui
Properties: bitter, sweet, cold
Channels Entered: Lung, Kidney, Large Intestine
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Purges Downwards and Eliminates Water Accumulation

Gan Sui (Radix Euphorbiae Kansui) has an extremely strong purgative effect to drive out water accumulation. It treats ascites, characterized by water accumulation in the abdominal and chest regions with edema of the face and extremities.

- Ascites: use *Gan Sui* with *Qian Niu Zi* (Semen Pharbitidis).
- Water retention in the chest and hypochondrium: use it with *Da Ji* (Radix Euphorbiae seu Knoxiae) and *Bai Jie Zi* (Semen Sinapis).
- Water retention with heat in the chest: add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- Intestinal obstruction with fluid retention: combine *Gan Sui* with *Da Huang* (Radix et Rhizoma Rhei), *Hou Po* (Cortex Magnoliae Officinalis) and *Tao Ren* (Semen Persicae).

2. Eliminates Phlegm

Gan Sui treats seizures and epilepsy caused by phlegm and heat stagnation.

- Seizures and epilepsy due to phlegm stagnation: use it with *Da Huang* (Radix et Rhizoma Rhei), *Dai Zhe Shi* (Haematitum) and *Ban Xia* (Rhizoma Pinelliae).

DOSAGE

0.5 to 1.0 gram in powder or pill form. Unprocessed *Gan Sui* is more toxic; the vinegar-fried herb is less toxic. Since *Gan Sui* has low water solubility, it is less effective when cooked in an herbal decoction, compared to when delivered in powder or as pills. Therefore, the powder should be added to the strained decoction before ingestion.

CAUTIONS / CONTRAINDICATIONS

- *Gan Sui* is incompatible with *Gan Cao* (Radix Glycyrrhizae), according to classic texts.
- *Gan Sui* is extremely irritating to the gastrointestinal tract. Individuals with sensitive stomachs should take

Gan Sui (Radix Euphorbiae Kansui)

Gan Sui in capsules, or in conjunction with *Da Zao* (Fructus Jujubae) tea.

- *Gan Sui* is a potent cathartic. It must be used with extreme caution, and only when necessary. It should not be given for an extended period of time. The dosage should not exceed the recommended amount.
- *Gan Sui* is suitable only for symptomatic relief in acute cases of ascites and constipation.
- Treatment with *Gan Sui* should be alternated with use of herbs that tonify the Spleen, to prevent over-consumption of qi.
- *Gan Sui* is contraindicated for patients who are pregnant, weak, have qi, blood, yin or yang deficiencies, have a tendency to bleed excessively, a history of ulcers, or upper gastrointestinal bleeding, cardiovascular disorders, or impairment of kidney function. Use of *Gan Sui* in these patients will consume qi and cause complications.

OVERDOSAGE

Overdose of *Gan Sui* is characterized by nausea, vomiting, abdominal pain, diarrhea with mucus and blood, headache, dizziness, palpitations, decreased blood pressure, delirium, decreased body temperature, dehydration, unconsciousness, dilated pupils, and convulsions. Adverse reactions usually occur within 30 minutes to 2 hours after ingestion. Overdose may occur at doses between 9 and 15 grams.[1]

TREATMENT OF OVERDOSAGE

- General detoxification: administer an herbal decoction of 30 grams of *Lu Dou* (Semen Phaseoli Radiati), 9 grams of *Huang Bai* (Cortex Phellodendri), and 6 grams of *Huang Lian* (Rhizoma Coptidis).
- Nausea and vomiting: administer an herbal decoction of *Sheng Jiang* (Rhizoma Zingiberis Recens) or *Da Zao* (Fructus Jujubae).
- Continuous diarrhea: administer an herbal decoction of 9 grams of *Ren Shen* (Radix Ginseng) and 6 grams of *Huang Lian* (Rhizoma Coptidis).

CHEMICAL COMPOSITION

Euphorbone, euphorbol, kanzuiol, euphol, ingenol, 13-oxyingenol, kansuinine A, B.[2]

PHARMACOLOGICAL EFFECTS

- **Cathartic:** *Gan Sui* stimulates the intestines, promotes peristalsis, and relieves constipation. Fresh *Gan Sui* has potent cathartic and toxic effects. Processing with vinegar reduces both cathartic and toxic effects.[3]
- **Abortifacient:** Intramuscular injection of alcohol extract of *Gan Sui* induces abortion in mice.[4]

CLINICAL STUDIES AND RESEARCH

- **Intestinal obstruction:** In one clinical study, 50 patients with intestinal obstruction (due to roundworms in 24 cases) were treated with 0.3 gram of *Gan Sui* powder, repeated in 2 to 4 hours. Of 50 cases, 44 experienced complete recovery.[5]
- **Abortion:** In China, a large-scale study demonstrated the efficacy of using a low dose of *Gan Sui* to induce abortion, for women seeking to terminate pregnancy. Over 6,000 women received intra-amniotic injection of a 50% *Gan Sui* solution. The low dosage (0.4 to 1.0 ml) showed effectiveness within 26 to 28 hours in 99.31-100% of these cases.[6]

TOXICOLOGY

The LD_{50} for alcohol extract of *Gan Sui* via intraperitoneal injection is 346.1 mg/kg in mice.[7]

AUTHORS' COMMENTS

In comparison with *Da Ji* (Radix Euphorbiae seu Knoxiae), *Gan Sui* has similar but stronger purgative effects.

Da Ji (Radix Euphorbiae seu Knoxiae)

大戟

Pinyin Name: *Da Ji*
Literal Name: "big lance from the capital"
Alternate Chinese Names: *Xia Ma Xian, Long Hu Cao, Jiu Tou Shi Zi Cao, Gu Zhang Cao, Tian Ping Yi Zhi Xiang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: euphorbia, knoxia
Botanical Name: *Euphorbia pekinensis* Rupr. (*Jing Da Ji*); *Knoxia valerianoides* Thorel et. Pitard. (*Hong Da Ji*)
Pharmaceutical Name: Radix Euphorbiae seu Knoxiae
Properties: bitter, acrid, cold
Channels Entered: Spleen, Kidney, Large Intestine
Safety Index: extremely toxic

CHINESE THERAPEUTIC ACTIONS

1. Purges Downwards and Eliminates Water Accumulation

Edema, ascites and water accumulation in the chest cavity: *Da Ji* (Radix Euphorbiae seu Knoxiae) has a strong purgative function to drive out water accumulation. It treats ascites, characterized by water accumulation in the abdominal and chest regions, involving edema of the face and extremities.

- Ascites: cook *Da Ji* with *Da Zao* (Fructus Jujubae), and eat the *Da Zao*.
- Liver cirrhosis with ascites: use *Da Ji* individually as decoction or powder.

2. Reduces Swelling and Disperses Nodules

Da Ji, used internally or topically, reduces swelling and disperses nodules. Clinical applications include sores, abscesses, lesions, and scrofula.

DOSAGE

1.5 to 3.0 grams in decoction, 0.5 to 1.0 gram in powder. *Da Ji* should be processed with vinegar to reduce toxicity.

CAUTIONS / CONTRAINDICATIONS

- *Da Ji* is incompatible with *Gan Cao* (Radix Glycyrrhizae), according to classic texts.
- *Da Ji* has potent purgative action and must be used with caution and only when necessary.
- *Da Ji* is contraindicated for patients who are pregnant, weak, have qi, blood, yin or yang deficiencies, have a tendency to bleed excessively, a history of ulcers, or upper gastrointestinal bleeding, cardiovascular disorders, or impairment of kidney function.
- Treatment of ascites with *Da Ji* should be alternated with use of herbs that tonify the Spleen to prevent over-consumption of qi.

OVERDOSAGE

Overdose of *Da Ji* may occur by direct contact or following systemic absorption. Dermatitis may occur with direct skin contact, and conjunctivitis with direct eye contact. Systemic reaction following oral ingestion includes redness and swelling of the mouth and throat, nausea, vomiting, headache, drowsiness, abdominal pain, diarrhea, decreased blood pressure, dehydration, and electrolyte imbalance. Overdose or prolonged use of *Da Ji* may cause bleeding and semiconsciousness. In severe cases, there may be hematemesis, hematochezia, dilation of the pupils, severe muscle spasms and cramps, and respiratory depression. Overall, gastrointestinal irritation is the most common side effect.

TREATMENT OF OVERDOSAGE

Administration of *Da Ji* is sometimes associated with nausea and vomiting, which can be alleviated by giving *Sheng Jiang* (Rhizoma Zingiberis Recens) or *Da Zao* (Fructus Jujubae) decoction.

Three herbal treatments have been used successfully to clear *Da Ji* overdose:

1. The first formula contains 30 grams of *Che Qian Zi* (Semen Plantaginis) and 30 grams of *Bai Mao Gen* (Rhizoma Imperatae) cooked in water to yield 300 ml of decoction.

Da Ji (Radix Euphorbiae seu Knoxiae)

2. The second formula consists of 120 grams of *Lu Gen* (Rhizoma Phragmitis), 30 grams of *Bai Mao Gen* (Rhizoma Imperatae), and 15 grams of *Jin Yin Hua* (Flos Lonicerae) cooked in water to yield 200 ml of decoction.
3. The third formula contains 30 grams of *Shi Chang Pu* (Rhizoma Acori) and 15 grams of *Hei Dou* (Semen Glycine Max) cooked in water to yield 200 ml of decoction.[1]

CHEMICAL COMPOSITION

Euphorbon, alkaloids, vitamin C, euphorbia A, B, C.[2]

PHARMACOLOGICAL EFFECTS

- **Cathartic:** Both water and alcohol extracts of *Da Ji* have marked cathartic effects.[3]
- **Antibiotic:** *Da Ji* has an inhibitory effect against *Staphylococcus aureus*, *Pseudomonas aeruginosa*, *Bacillus dysenteriae*, *Diplococcus pneumoniae*, and β-hemolytic streptococcus.[4]

SUPPLEMENT

There are two distinct herbs used as the purgative '*Da Ji*:'

- 紅大戟 / 红大戟 *Hong Da Ji* (Radix Knoxiae) is the one most commonly used, and more strongly reduces swelling and nodules.
- 京大戟 *Jing Da Ji* (Radix Euphorbiae Pekinensis) is stronger in dispelling water.

AUTHORS' COMMENTS

Da Ji (Radix Euphorbiae seu Knoxiae) and *Da Ji* (Herba seu Radix Cirsii Japonici) have identical pinyin names, but are two distinct herbs with completely different functions. *Da Ji* (Radix Euphorbiae seu Knoxiae) has cathartic properties and treats excess conditions. *Da Ji* (Herba seu Radix Cirsii Japonici) exerts hemostatic action and stops bleeding. To avoid errors and confusion, one must specify which "*Da Ji*" is to be used, whether in written or verbal communication.

Da Ji (Radix Euphorbiae seu Knoxiae) has similar effects to those of *Gan Sui* (Radix Euphorbiae Kansui), but is stronger than *Gan Sui*.

Yuan Hua (Flos Genkwa)

芫花 芫花

Pinyin Name: *Yuan Hua*
Alternate Chinese Names: *Lao Shu Hua, Tou Tong Hua, Du Yu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: genkwa flower, lilac daphne flower bud
Botanical Name: *Daphne genkwa* Sieb. et Zucc. (*Yuan Hua*)
Pharmaceutical Name: Flos Genkwa
Properties: acrid, bitter, warm
Channels Entered: Lung, Kidney, Large Intestine
Safety Index: toxic

Yuan Hua (Flos Genkwa)

CHINESE THERAPEUTIC ACTIONS

1. Purges Stagnation and Eliminates Water Accumulation

Ascites, edema and water retention in the chest: *Yuan Hua* (Flos Genkwa) treats excess-type water accumulation in the chest and abdominal region involving edema of the face and extremities.

- Ascites and edema: use *Yuan Hua* with *Gan Sui* (Radix Euphorbiae Kansui), *Da Huang* (Radix et Rhizoma Rhei), *Ting Li Zi* (Semen Descurainiae seu Lepidii) and *Ba Dou* (Fructus Crotonis) in pill form.
- Bloating and abdominal distention caused by parasites: use this herb with *Zhi Ke* (Fructus Aurantii).

2. Eliminates Phlegm, Relieves Cough

Yuan Hua treats chronic bronchitis caused by cold phlegm obstruction. Use *Yuan Hua* alone and mix with sugar before serving.

3. Kills Parasites, Drains Abscesses

Dermatological disorders: *Yuan Hua* treats tinea capitis, carbuncles on the head, eczema, mastitis and various ulcerations and sores.

- Dermatological disorders: use *Yuan Hua* as powder and apply topically with *Xiong Huang* (Realgar) and lard.
- Mastitis: boil an egg in water with *Yuan Hua*, eat the egg, and drink the decoction.

4. Stops Pain

- Toothache: apply *Yuan Hua* topically as powder.
- Pain due to qi and blood stagnation: use it with *Yan Hu Suo* (Rhizoma Corydalis).

DOSAGE

1.5 to 3 grams in decoction. 0.5 to 1 gram in powdered form. Unprocessed *Yuan Hua* has drastic, toxic effects. Frying it with vinegar reduces this toxicity, and minimizes side effects such as diarrhea and abdominal pain.

CAUTIONS / CONTRAINDICATIONS

- *Yuan Hua*, a potent purgative, must be used with extreme caution, only when necessary. It is only suitable for symptomatic relief in acute cases of ascites and constipation.
- *Yuan Hua* is contraindicated if the patient shows poor appetite, fatigue or weakness. Prolonged use, or usage of this herb for patients with deficiency, or overdose, may consume qi and may cause bleeding and semiconsciousness.
- *Yuan Hua* is contraindicated in patients who are pregnant, weak, have deficiencies or a tendency toward excessive bleeding, a history of ulcers, upper gastrointestinal bleeding, cardiovascular disorders, or impaired kidney function.
- *Yuan Hua* is incompatible with *Gan Cao* (Radix Glycyrrhizae), according to classic texts.
- Treatment of ascites with *Yuan Hua* should be alternated with use of herbs that tonify the Spleen to prevent overconsumption of qi.
- Administration of *Yuan Hua* is sometimes associated with nausea and vomiting that can be alleviated by giving *Sheng Jiang* (Rhizoma Zingiberis Recens) or *Da Zao* (Fructus Jujubae).

CHEMICAL COMPOSITION

Genkwanin, apigenin, yuankanin, luteolin, genkwadaphnin, yuanhuacine, sitosterol, benzoic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Cathartic:** Both water and alcohol extracts of *Yuan Hua* stimulate the intestines to increase peristalsis and promote bowel movement. At large doses, however, they may instead have an inhibiting effect.[2]
- **Antitussive and expectorant:** Inhalation therapy using *Yuan Hua* solution has marked antitussive and expectorant effects in mice. The mechanism of action has been attributed to its ability to reduce inflammation and decrease viscosity of the sputum.[3]
- **Analgesic:** Decoction of *Yuan Hua* has a mild-to-moderate analgesic action via its effect on the central nervous system.[4]
- **Antibiotic:** Vinegar- or alcohol-processed *Yuan Hua* inhibits *Diplococcus pneumoniae*, β-hemolytic streptococcus, and influenza virus.[5]
- **Diuretic:** In a placebo-controlled laboratory study, oral administration of decoction of *Yuan Hua* at 10 g/kg significantly increased the excretion of water and sodium. At 20 g/kg, there was an increased excretion of water, sodium, and potassium. No effect was observed at 5 to 10 g/kg.[6]

CLINICAL STUDIES AND RESEARCH

- **Frostbite:** Patients with early-stage frostbite characterized by swelling, pain and itching were treated with topical application of an herbal solution, with good results. The treatment protocol was to cook 15 grams each of *Yuan Hua* and *Gan Cao* (Radix Glycyrrhizae) in water to yield 2,000 ml of the final solution. Patients were instructed to soak the affected area in the warm solution for 30 minutes twice daily for 2 to 3 days. Patients were instructed not to drink the solution, as *Yuan Hua* and *Gan Cao* are incompatible for oral ingestion.[7]
- **Chronic bronchitis:** In one study, 231 patients with chronic bronchitis were treated with preparations of *Yuan Hua*, with an overall effective rate of 91.34%. The treatment protocol was to administer 0.5 to 1.0 gram the herbs two to three times daily for 10 days per course of treatment, with 3 to 5 days of rest between each course, for a total of 3 courses of treatment. The study also noted

Yuan Hua (Flos Genkwa)

that those with uncomplicated bronchitis (without wheezing and dyspnea) characterized by cold were most responsive to the treatment.[8]

- **Abortion:** According to one report, an intra-amniotic injection of an alcohol extract of *Yuan Hua* was used in 2,674 women seeking abortion in the second trimester of pregnancy, with 99.4% experiencing termination of pregnancy. Adverse reactions reported following this procedure included one case each of peritonitis, necrosis of the myometrium, stillbirth, and acute renal failure.[9]
- **Hepatitis:** Administration of water-extract of *Yuan Hua* was found effective in treating 20 patients with acute infectious hepatitis, 12 patients with chronic hepatitis, and 8 patients with drug-induced hepatitis.[10]

TOXICOLOGY

The LD_{50} of *Yuan Hua* in mice via oral ingestion is 17.78 g/kg for water extract, 14.05 g/kg for alcohol extract, and 8.48 g/kg for vinegar-processed extract. The LD_{50} of *Yuan Hua* in mice via intraperitoneal injection is 9.25 g/kg for water extract, 7.07 g/kg for alcohol extract, and 1.0 g/kg for vinegar-processed extract. Therefore, it can be inferred that processing with vinegar reduces the toxicity of *Yuan Hua*.[11,12,13]

AUTHORS' COMMENTS

Yuan Hua has similar actions to purge stagnation and eliminate water accumulation to that of *Gan Sui* (Radix Euphorbiae Kansui) and *Da Ji* (Radix Euphorbiae seu Knoxiae). *Gan Sui* is the strongest of the three.

Qian Niu Zi (Semen Pharbitidis)

牽牛子 牽牛子

Pinyin Name: *Qian Niu Zi*
Literal Name: "cowherd seeds"
Alternate Chinese Names: *Hei Bai Niu, Er Niu, La Ba Hua Zi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: pharbitis, pharbitis seed, morning glory seed
Botanical Name: *Pharbitis nil* (L.) Choisy. (*Lie Ye Qian Niu*); *Pharbitis purpurea* (L.) Voigt (*Yuan Ye Qian Niu*)
Pharmaceutical Name: Semen Pharbitidis
Properties: bitter, acrid, cold
Channels Entered: Lung, Kidney, Large Intestine
Safety Index: toxic

Qian Niu Zi (Semen Pharbitidis)

CHINESE THERAPEUTIC ACTIONS

1. Purges Downward and Promotes Diuresis

Qian Niu Zi (Semen Pharbitidis) purges and eliminates accumulations through defecation and urination. Clinical applications include ascites and edema. This herb should be used only for excess conditions and in patients who are not deficient in qi, blood or yin.

- Mild edema: use powdered *Qian Niu Zi* as a single-herb remedy.
- Ascites and edema with qi stagnation: use it with *Mu Xiang* (Radix Aucklandiae) and *Hou Po* (Cortex Magnoliae Officinalis).
- Edema in children: combine it with *Qing Pi* (Pericarpium Citri Reticulatae Viride) or *Mu Xiang* (Radix Aucklandiae).
- Nephritis with edema, or liver cirrhosis with ascites: use this herb with *Sheng Jiang* (Rhizoma Zingiberis Recens), *Da Zao* (Fructus Jujubae) and brown sugar to make pills.

2. Redirects Lung Qi and Eliminates Phlegm

Qian Niu Zi treats acute coughing and wheezing caused by phlegm stagnation in the chest and abnormal rising of qi. Clinical manifestations of this syndrome include wheezing, dyspnea, fullness of the chest, labored breathing, flared nostrils and a throttling sound in the throat because of the presence of sputum.

- Cough and wheezing: use it with *Da Huang* (Radix et Rhizoma Rhei) and *Bing Lang* (Semen Arecae).

3. Reduces Stagnation and Purges Constipation

Qian Niu Zi treats constipation through its purgative action. A small dosage treats constipation or food stagnation, while a large dosage leads to watery diarrhea.

- Constipation: use it with *Tao Ren* (Semen Persicae).
- Severe constipation: add *Da Huang* (Radix et Rhizoma Rhei).

4. Kills Parasites

Qian Niu Zi kills intestinal parasites, and is especially effective against roundworm and tapeworm. Since this herb has both antiparasitic and purgative functions, it kills and expels intestinal parasites simultaneously. Addition of purgative herbs to expel parasites is not necessary.

- Intestinal parasitic infestation: use it with *Bing Lang* (Semen Arecae) and other antiparasitic herbs.

DOSAGE

3 to 10 grams in decoction, 1.5 to 3.0 grams as powder. Fresh *Qian Niu Zi* is more potent, but also has more side effects. The dry-fried herb is milder, and has fewer side effects. Dry-fried *Qian Niu Zi* is considered the preferred form, as it has fewer side effects, moderated purgative action, and when cooked in a decoction, a more complete extraction of active components.

CAUTIONS / CONTRAINDICATIONS

- Use of *Qian Niu Zi* is contraindicated during pregnancy, or in cases of Stomach qi deficiency.
- According to some classic texts, it is incompatible with *Ba Dou* (Fructus Crotonis).

OVERDOSAGE

Early reaction to overdose of *Qian Niu Zi* (Semen Pharbitidis) is characterized by dizziness, headache, severe vomiting, abdominal pain and diarrhea, green watery stools with mucous, increased heart rate (up to 120 beats per minute), impaired speech, fever, blood and cells in the urine, and deep thready pulse. Late or severe reaction is characterized by fever, unconsciousness, cold extremities, with purple lips, skin and nails, and shortness of breath.[1]

Overdose of *Qian Niu Zi* may damage the gastrointestinal and urinary tracts and the central nervous system. The herb may be irritating to the gastrointestinal tract and may increase intestinal peristalsis, leading to symptoms such as nausea, vomiting, abdominal pain, diarrhea, and blood and mucus in the stools. Irritation may also occur in the urinary tract, leading to increased urination and hematuria. In severe cases, overdose may disturb the central nervous system, leading to impaired speech and unconsciousness. Adverse reactions to *Qian Niu Zi* are usually associated with doses between 15 and 45 grams. One case of fatality was documented following gross overdose of 195 grams.[2]

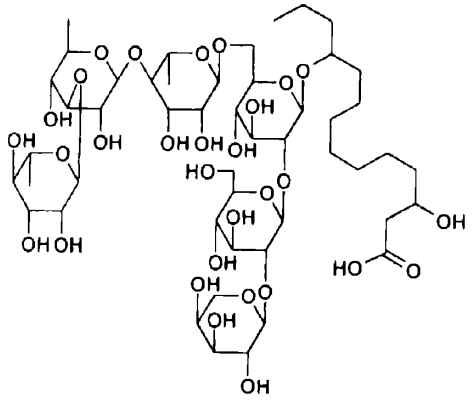
TREATMENT OF OVERDOSAGE

Most patients will have severe vomiting with overdose of *Qian Niu Zi*, so the emetic method is often ineffective and unnecessary. Instead, treatment should be focused on minimizing absorption of the offending agent, which can be achieved with administration of 12 grams of *Wu Bei Zi* (Galla Chinensis) in powder, 6 egg whites, and 60 grams of honey all mixed with warm water. An herbal decoction with 120 grams of *Lu Dou* (Semen Phaseoli Radiati) can also be used in place of water, to rehydrate the body and eliminate the toxin.

One formula that has been successfully used for treatment of overdose include *Huang Qi* (Radix Astragali) 30g, *Xian He Cao* (Herba Agrimoniae) 30g, *Dang Shen* (Radix Codonopsis) 15g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 9g, *Fu Ling* (Poria) 9g, *Zhi Zi* (Fructus Gardeniae) 9g, and *Huang Lian* (Rhizoma Coptidis) 6g.

If the adverse reaction is characterized by continuous diarrhea leading to severe weakness and fatigue, an

Qian Niu Zi (Semen Pharbitidis)



herbal decoction of *Chi Shi Zhi* (Halloysitum Rubrum) 30g, *Gan Cao* (Radix Glycyrrhizae) 15g, and *Geng Mi* (Semen Oryzae) 30g should be given.

Patients with hematuria should be treated twice daily with a decoction of *San Qi* (Radix Notoginseng) 6g, *Gan Cao* (Radix Glycyrrhizae) 15g, *Sheng Di Huang* (Radix Rehmanniae) 30g, and *Xi Jiao* (Cornu Rhinoceri) 9g. [Note: *Shui Niu Jiao* (Cornu Bubali) should be used in place of *Xi Jiao*, a protected animal.] This is served at room temperature.

Adverse reactions characterized by altered consciousness and impaired speech should be treated with herbs that open the sensory orifices, such as *Fang Feng* (Radix Saposhnikoviae) 15g, *Bai Fu Zi* (Rhizoma Typhonii) 15g, *Dan Nan Xing* (Arisaema cum Bile) 15g, *Gan Cao* (Radix Glycyrrhizae) 10g, *Yuan Zhi* (Radix Polygalae) 6g, *Zhu Li* (Succus Bambusae) 3 spoonfuls, *Sheng Jiang* (Rhizoma Zingiberis Recens) 3 spoonfuls of juice, and *Niu Huang* (Calculus Bovis) 0.3g.[3]

CHEMICAL COMPOSITION

Pharbitin 2%, pharbitic acid C, D; lysergol, chanoclavine, penniclavine, isopenniclavine, elymoclavine, gibberellin, gibberellin glucoside.[4]

Pharbitic acid D

PHARMACOLOGICAL EFFECTS

- **Cathartic:** *Qian Niu Zi* stimulates intestinal peristalsis and promotes bowel movement. It must be processed at a low temperature or by soaking in alcohol. It is ineffective if cooked at a high temperature.[5]
- **Antiparasitic:** *Qian Niu Zi* has antiparasitic action against roundworms derived from pigs, according to *in vitro* studies.[6]

CLINICAL STUDIES AND RESEARCH

- **Epilepsy:** In one clinical study, 115 patients with epilepsy were treated with preparations of *Qian Niu Zi* for 3 months with 56.7% effectiveness.[7]

AUTHORS' COMMENTS

Traditionally, *Qian Niu Zi* has been separated into white and black seeds. The white seeds were supposed to be stronger in descending Lung qi and eliminating phlegm, and the black seeds were supposed to be stronger in dispelling water. However, contemporary research has shown that there is no effective difference between the two. Thus, they are no longer classified as separate herbs.

Shang Lu (Radix Phytolaccae)

商陸 商陆

Pinyin Name: *Shang Lu*
Literal Name: "commerce continent"
Alternate Chinese Names: *Bai Mu Ji, Shan Luo Bo, Ye Luo Bo*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: phytolacca, poke root, pokeberry root
Botanical Name: *Phytolacca acinosa* Roxb. (*Shang Lu*)
Pharmaceutical Name: Radix Phytolaccae
Properties: bitter, cold
Channels Entered: Lung, Kidney, Large Intestine
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Eliminates Water Accumulation

Ascites, edema: *Shang Lu* (Radix Phytolaccae) has a potent ability to eliminate water accumulation to treat ascites and edema.

- Ascites and edema: use *Shang Lu* with *Ze Xie* (Rhizoma Alismatis), *Chi Xiao Dou* (Semen Phaseoli), *Da Fu Pi* (Pericarpium Arecae) and *Bing Lang* (Semen Arecae).

2. Reduces Swelling and Disperses Stagnation

Shang Lu may be crushed and applied topically to treat swelling and nodules.

DOSAGE

5 to 10 grams in decoction. Processing with vinegar decreases the toxicity of *Shang Lu*.

CAUTIONS / CONTRAINDICATIONS

- *Shang Lu* is contraindicated during pregnancy, due to its toxicity.
- *Gan Cao* (Radix Glycyrrhizae) and *Lu Dou* (Semen Phaseoli Radiati) are generally prescribed with *Shang Lu* to minimize its toxicity.

OVERDOSAGE

Overdose of *Shang Lu* is characterized by nausea, vomiting, diarrhea, headache, slurred speech, irritability or muscle twitching. In severe cases, there may be a sudden drop in blood pressure, unconsciousness, dilation of pupils, and heart failure.

TREATMENT OF OVERDOSAGE

Overdose of *Shang Lu* can be treated by emetic methods within the first 4 hours, followed by administration of egg whites or rice porridge. An herbal decoction that has been used successfully includes *Shi Chang Pu* (Rhizoma Acori) 9g, *Huang Bai* (Cortex Phellodendri) 9g, *Chuan Lian Zi* (Fructus Toosendan) 9g, and *Yan Hu Suo* (Rhizoma Corydalis) 12g.[1]

Adverse reactions characterized by abdominal pain, diarrhea, and fever can be treated with an herbal decoction containing *Fang Feng* (Radix Saposhnikoviae) 15g, *Gan Cao* (Radix Glycyrrhizae) 15g, *Rou Gui* (Cortex Cinnamomi) 3g, and *Lu Dou* (Semen Phaseoli Radiati) 60g.[2]

CHEMICAL COMPOSITION

Phytolaccagenin, phytolaccoside A,B,D,E,F,D_2; jaligonic acid.[3]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Administration of *Shang Lu* has different effects on different subjects. In anesthetized dogs, it has no effect on diuresis or blood pressure. In frogs and toads, it has significant diuretic and vasodilating effects.[4]
- **Antitussive and expectorant:** Both water and alcohol extracts of *Shang Lu* have antitussive and expectorant effects.[5]
- **Antibiotic:** Both water and alcohol extracts of *Shang Lu* inhibit *Bacillus dysenteriae*, *Diplococcus pneumoniae*, and some dermatophytes.[6]

CLINICAL STUDIES AND RESEARCH

- **Chronic bronchitis:** A study on treatment of chronic bronchitis reported that alcohol extract of *Shang Lu* has marked antitussive, expectorant, and antiasthmatic effects. It was noted that *Shang Lu* was especially effective in patients who have adrenal cortical insufficiency.[7]
- **Psoriasis:** In one report, 40 patients with psoriasis were

Shang Lu (Radix Phytolaccae)

treated with a *Shang Lu* preparation, with complete recovery in 12 patients, significant improvement in 9 patients, some improvement in 11 patients, and no response in 8 patients. *Shang Lu* was steamed in a pressure cooker for 2 hours, then baked until dry. Patients were given 3 grams of the herb three times daily, for 10 to 60 days. Most patients showed improvement 20 to 30 days after initiation of treatment. No significant side effects were reported. However, 2 patients reported atropine-like side effects within 2 hours of taking the herb, and were treated accordingly.[8]

- **Hyperplasia of mammary glands:** In a clinical study, 253 patients with hyperplasia of the mammary glands were treated with a preparation of *Shang Lu*. They responded with a 37.15% rate of recovery, and 94.86% overall rate of effectiveness. Patients were given the herb in pills three times daily, starting with 3 grams per dose and gradually increasing to 10 grams per dose.[9]

TOXICOLOGY

The LD_{50} for *Shang Lu* in mice via oral administration is 26 g/kg for water solution, 28 g/kg for water decoction, and 46.5 g/kg for alcohol tincture. Cooking the herb in boiling water for 2 hours decreased the toxicity.[10]

AUTHORS' COMMENTS

There are two types of *Shang Lu*: white and red. The white type is the standard herb used by pharmacies. The red type is toxic and may cause diarrhea and bleeding, leading to death. The red type is twice as toxic as the white type.

Shang Lu and *Ren Shen* (Radix Ginseng) are similar in physical appearance, but exert completely different effects. Proper care must be taken to ensure that they are appropriately identified and not used incorrectly.

Shang Lu is a mild cathartic in comparison with others within this category.

Chapter 3 summary

— Downward Draining Herbs

SECTION 1: PURGATIVES

Name	Similarities	Differences
Da Huang (Radix et Rhizoma Rhei)	Purgative, downward draining	Sedates fire, eliminates toxins, and invigorates the blood to relieve stagnation
Mang Xiao (Natrii Sulfas)		Softens hardness, sedates fire
Fan Xie Ye (Folium Sennae)		Milder, used for habitual constipation
Lu Hui (Aloe)		Sedates Liver fire, kills parasites
Ba Dou (Fructus Crotonis)		For cold type constipation, dispels water and phlegm, and is used externally to kill parasites

General Characteristics of Purgatives:

Taste: bitter
Thermal property: cold
Channels entered: Large Intestine
Therapeutic actions: clear heat, sedate fire, purge stagnation and relieve constipation

Purgative herbs primarily treat constipation and stagnation in the Large Intestine, caused by or accompanied by heat, fire, toxins, or hardness. These strong herbs should be reserved for severe constipation in patients who are strong and otherwise healthy. They should be used only with extreme caution for weak individuals or those experiencing generalized deficiencies.

Da Huang (Radix et Rhizoma Rhei) is the most widely-used purgative. It sedates fire, clears toxins, invigorates blood circulation, eliminates blood stasis, and purges accumulation. Extremely bitter and cold, *Da Huang* should be reserved for heat and excess conditions. It can be used for constipation due to excess cold, provided that appropriate warming herbs are added. Processing methods and time influence the purgative intensity of *Da Huang*: use of the unprocessed form and/or post-decoction maintains a strong purgative effect, while using the processed form or exposing it to prolonged cooking weakens its purgative effect.

Mang Xiao (Natrii Sulfas) purges downward, clears heat and is used primarily to soften hardness, that is, to soften dry stools to facilitate passage. Used externally, *Mang Xiao* softens hard nodules or masses, especially in the breasts. Dissolved in water and applied topically, it treats various oral disorders such as sores or lesions caused by heat. The decocted form is not recommended for topical application.

Da Huang (Radix et Rhizoma Rhei) and ***Mang Xiao*** (Natrii Sulfas) are frequently paired together for their synergistic effect to treat constipation.

Fan Xie Ye (Folium Sennae), quite similar to *Da Huang* (Radix et Rhizoma Rhei), addresses constipation caused by heat and treats acute gastrointestinal bleeding. It has been used to cleanse the colon prior to x-ray examination or surgery. *Fan Xie Ye* may be taken as tea simply by soaking the herb in hot water.

Lu Hui (Aloe) treats constipation resulting from Liver fire. It also kills parasites in children to treat concurrent malnutrition, and, when applied externally, kills parasites, relieves itching and treats

Chapter 3 summary

stubborn dermatological disorders. Because it is extremely bitter, this herb is often made into pills or administered in capsules. Decocting this herb is not recommended.

Ba Dou (Fructus Crotonis), the only purgative listed here that is acrid, hot and toxic, addresses constipation arising from cold accumulation. It strongly purges downward, removing intestinal obstruction ('opening' the intestines), and purging water to reduce ascites or edema. *Ba Dou* induces vomiting, stops drooling of saliva, treats lung abscesses and throat obstruction caused by phlegm. Additionally, the action of this herb can rise or descend, depending on how it is combined and administered.

SECTION 2: MOIST LAXATIVES

Name	Similarities	Differences
Huo Ma Ren (Fructus Cannabis)	Lubricate the bowels, promote defecation	Moistens dryness, nourishes hair and kills parasites
Yu Li Ren (Semen Pruni)		Promotes diuresis, reduces swelling

General Characteristics of Moist Laxatives:

Taste: sweet
Thermal property: neutral
Channels entered: Spleen, Stomach, Large Intestine, Small Intestine
Therapeutic actions: lubricate the bowels to relieve constipation

Moist laxatives lubricate the Large Intestine, facilitating the passage of stools. Milder and gentler than purgatives, these more suitably treat constipation caused by deficiency: weak constitution, body fluid deficiency or blood deficiency.

Huo Ma Ren (Fructus Cannabis) and ***Yu Li Ren*** (Semen Pruni) are the most commonly used substances with these attributes.

Huo Ma Ren moistens dryness.

Yu Li Ren promotes diuresis, reduces swelling and treats edema while contributing to lubrication of the bowels.

SECTION 3: HARSH EXPELLANTS (CATHARTICS)

Name	Similarities	Differences
Gan Sui (Radix Euphorbiae Kansui)	Strongly purge stool and water from the body	Toxic, strongest in purging water
Da Ji (Radix Euphorbiae seu Knoxiae)		Toxic, weaker in purging water
Yuan Hua (Flos Genkwa)		Dispels water accumulation in the thoracic area, used externally to kill parasites
Qian Niu Zi (Semen Pharbitidis)		Promotes diuresis, reduces stagnation and kills roundworms and pinworms
Shang Lu (Radix Phytolaccae)		Reduces swelling and disperses stagnation when used externally

General Characteristics of Harsh Expellants (Cathartics):

Taste: bitter
Thermal property: cold
Channels entered: varies
Therapeutic actions: promote bowel movement and urination
Safety index: many are toxic

Chapter 3 summary

Harsh expellants (cathartics) have potent effects to purge downwards, for treatment of severe constipation, ascites, and water accumulation. They must be used with great caution, especially in elderly patients, menstruating, pregnant, or postpartum women, or patients deficient in qi, blood or yin. Clinically, these herbs are rarely used.

Gan Sui (Radix Euphorbiae Kansui), ***Da Ji*** (Radix Euphorbiae seu Knoxiae), and ***Yuan Hua*** (Flos Genkwa) have strong cathartic effects to treat edema, ascites and pleurisy. They are used mainly to remove water from the abdominal cavity. Processing these herbs with vinegar decreases their toxicity.

Gan Sui, strongest in driving out water accumulation, has significant toxicity and side effects. It treats mania and epilepsy caused by phlegm accumulation. Because the active constituents of this herb do not dissolve in water, it is most suitable for dispensing in pill or powdered form. Decocting *Gan Sui* dramatically decreases its potency.

Da Ji purges water accumulation, dissolves stagnation, reduces swelling, and treats toxic carbuncles and swellings.

Yuan Hua purges water and dispels phlegm to relieve cough. Used externally, it kills parasites and reduces swellings and abscesses.

Qian Niu Zi (Semen Pharbitidis) and ***Shang Lu*** (Radix Phytolaccae) have diuretic functions.

Qian Niu Zi purges water and treats edema when used in large doses. Small doses relieve stagnation and promote bowel movement. It also sedates Lung qi, dispels phlegm accumulation and treats cough and dyspnea due to phlegm accumulation. It kills parasites when used externally. Unprocessed *Qian Niu Zi* is stronger than the processed form.

Shang Lu (Radix Phytolaccae), used internally, treats edema; and externally, reduces swelling and disperses stagnation. *Shang Lu* is stronger than *Gan Sui* in dispelling water.

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH DOWNWARD DRAINING FUNCTIONS

Name	Functional Category
Bai Zi Ren (Semen Platycladi)	*Shen*-Calming Herbs (Chapter 14)
Dang Gui (Radicis Angelicae Sinensis)	Tonic Herbs (Chapter 17)

Chapter 4

— Wind-Damp Dispelling Herbs

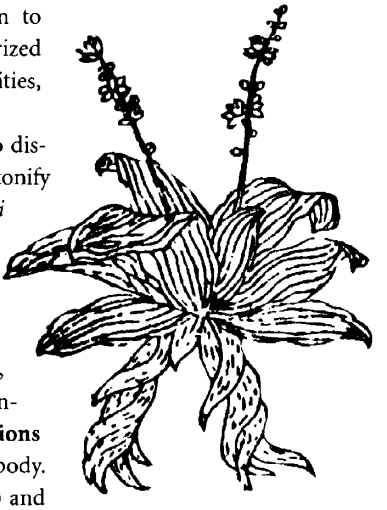
Definition: Herbs that dispel wind and dampness eliminate these pathogenic factors from muscles and joints to relieve obstruction and pain associated with *bi zheng* (painful obstruction syndrome).

Wind, cold and dampness are environmental factors responsible for causing *bi zheng* (painful obstruction syndrome), characterized by stagnation and pain attacking muscles, joints, tendons and bones. In addition to dispelling wind, cold and dampness, these herbs relieve pain, relax muscles and tendons, open the channels and collaterals, and strengthen tendons and bones. Signs and symptoms of wind-damp affecting the muscles and joints include muscle aches and pain, muscle spasms and cramps, weakness and pain of the lower back and knees, numbness and atrophy of the muscles, and paralysis. Clinical applications of herbs that dispel wind and dampness include treatment of arthritis, arthralgia, sciatica, bone spurs, and post-stroke complications such as hemiplegia and paralysis.



Wind-damp dispelling herbs are generally acrid and bitter, qualities that disperse wind and dry dampness, respectively. These substances are either warm or cold, to treat cold or hot *bi zheng* (painful obstruction syndrome). Most of these herbs enter the Liver and Kidney, as these are the organs that control tendons and bones.

Wind-damp dispelling herbs eliminate pathogens from muscles and joints in disorders such as arthritis, arthralgia, sciatica, bone spurs, and post-stroke complications.

SUBCATEGORIES OF ACTION

Herbs that dispel wind and dampness are generally acrid and bitter, to disperse and drain pathogenic factors. Most enter the Liver and Kidney channels to strengthen soft tissue and promote healing. They are commonly considered in three subcategories:

1. ***Dispel wind and damp to relieve pain***: These herbs strongly dispel exterior pathogenic factors of wind, cold and damp in patients who have no interior deficiency. The same herbs relieve pain.
2. ***Open peripheral channels and collaterals***: These herbs eliminate stagnation to address chronic and stubborn *bi zheng* (painful obstruction syndrome), characterized by decreased range of movement of the joints, decreased mobility of the extremities, bodily numbness, hemiplegia and paralysis.
3. ***Dispel wind and damp by strengthening the tendons and bones***: In addition to dispelling wind, cold and damp, these herbs enter the Liver and Kidney channels to tonify the tendons and bones. They are most effective for treating chronic cases of *bi zheng* (painful obstruction syndrome) characterized by weakness, deficiency and atrophy of the soft tissues.

Qin Jiao (Radix Gentianae Macrophyllae) *Ben Cao Gang Mu* (Materia Medica), by Li Shi-Zhen, 1578 A.D.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Bi zheng (painful obstruction syndrome) is usually caused by exterior factors, interior conditions, or the combination of both. **Exterior factors** refers to environmental pathogenic factors, namely wind, cold and dampness. **Interior conditions** refers to imbalances affecting the constitution and internal health of the body. Individuals with constitutional deficiencies, such as deficiency of *wei* (defensive) and *zheng* (upright) *qi*, are more susceptible to the invasion of wind, cold and dampness than those who are hearty and robust. There are several different types of *bi zheng* (painful obstruction syndrome):

Chapter 4 — Wind-Damp Dispelling Herbs

- *Xing bi* (mobile painful obstruction) is caused by wind attacking the body. Similar to wind that is light and mobile, *xing bi* is characterized by pain in the upper body, specifically pain that travels from one area to another.
- *Tong bi* (extremely painful obstruction) is characterized by cold. Similar to cold that is stationary and constricting, *tong bi* is distinguished by severe pain at a fixed location. This type of pain intensifies with exposure to cold, and is relieved by exposure to warmth.
- *Zhuo bi* (fixed painful obstruction) often occurs when damp affects specific, fixed area(s). Similar to dampness that is heavy and sinking, *zhuo bi* is characterized by pain and swelling in the lower extremities.
- *Re bi* (heat painful obstruction) is characterized by local redness, swelling, burning sensations and pain. The development of heat is often caused by prolonged obstruction of the channels and collaterals by wind, cold or damp.
- *Wan bi* (stubborn painful obstruction) generally occurs after chronic or repetitive injuries to the same areas, causing stiffness, numbness, and lack of mobility.
- *Wei bi* (atrophic painful obstruction) is caused by deficiency of the Liver and Kidney, with such presentations as atrophy, weakness and pain of the muscles and bones.
- *Xue bi* (blood painful obstruction) describes *bi zheng* (painful obstruction syndrome) related to blood. Dull pain may be caused by blood deficiency and its inability to nourish the tendons and bones. Sharp pain is often related to blood stagnation blocking the channels and collaterals.
- *Zhou bi* (generalized painful obstruction) is characterized by generalized pain that also affects the bones and joints.

CAUTIONS/CONTRAINDICATIONS

- Bitter, warm, aromatic and drying herbs may consume yin and blood and should be used with caution in patients experiencing deficiency of yin and/or blood.
- Herbs that dispel wind and dampness are contraindicated in cases of endogenous Liver wind. External wind and internal wind have very different clinical presentations, and require distinctly different treatments.

PROCESSING

Because of the chronic nature of *bi zheng* (painful obstruction syndrome) ailments, dosage forms are often changed from decoction to herbal wines, pills, or tablets to improve patient compliance. In addition to the actions of the herbs, the alcohol of the wines provides dispersing and analgesic effects. Grain-based liquor is the solvent of choice. Alcohol-based tinctures are used both internally and externally.

PHARMACOLOGICAL EFFECTS

Wind-damp dispelling herbs have excellent anti-inflammatory and analgesic effects.

- **Anti-inflammatory**: Wind-damp dispelling herbs are excellent substances to reduce inflammation. The mechanisms of this action vary depending on the herb. Some reduce inflammation and swelling by decreasing permeability of the capillaries, such as *Du Huo* (Radix Angelicae Pubescentis) and *Wu Jia Pi* (Cortex Acanthopanacis); others stimulate the endocrine system to increase the secretion of corticosteroids that, in turn, reduce inflammation, such as *Qin Jiao* (Radix Gentianae Macrophyllae) and *Lei Gong Teng* (Radix Tripterygii Wilfordii).
- **Analgesic**: These herbs have varying degrees of analgesic activity. *Qing Feng Teng* (Caulis Sinomenii) relieves pain via its effect on the central nervous system. Prolonged use of *Qing Feng Teng* is associated with tolerance, but not dependence. *Fen Fang Ji* (Radix Stephaniae Tetandrae) also has a marked analgesic effect. On a weight-to-weight comparison, the analgesic effect of the pure alkaloids of *Fen Fang Ji* is approximately 1/8th the strength of morphine.
- **Immunosuppressive**: Some herbs exert inhibitory influences on the immune system, leading to suppressed phagocytic activity of macrophages, and decreased production of T-lymphocytes, IgM, and IgG. Herbs with such actions include *Lei Gong Teng* (Radix Tripterygii Wilfordii), *Du*

Chapter 4 — Wind-Damp Dispelling Herbs

Huo (Radix Angelicae Pubescentis), *Qing Feng Teng* (Caulis Sinomenii), and *Xi Xian Cao* (Herba Siegesbeckiae).

- **Antipyretic**: Herbs with antipyretic properties include *Qin Jiao* (Radix Gentianae Macrophyllae) and *Fen Fang Ji* (Radix Stephaniae Tetandrae).
- **Sedative**: Sedative herbs include *Qin Jiao* (Radix Gentianae Macrophyllae), *Ci Wu Jia* (Radix et Caulis Acanthopanacis Senticosi), *Qing Feng Teng* (Caulis Sinomenii), and *Xu Chang Qing* (Radix Cynanchi Paniculati).

POTENTIAL HERB-DRUG INTERACTIONS

- **Analgesics and anti-inflammatories**: Herbs that dispel wind and dampness are usually characterized by pronounced analgesic and anti-inflammatory activity. While their mechanisms of action vary, there is little or no documentation of any incidents of adverse interaction between analgesic and anti-inflammatory herbs and drug therapy.
- **Antiplatelets and anticoagulants**: Some herbs in this category, such as *Du Huo* (Radix Angelicae Pubescentis), mildly inhibit platelet aggregation, and should be taken with caution by patients who are using anticoagulant or antiplatelet drugs.[1]
- **Sedatives**: Some herbs have sedative and hypnotic effects, and should be used with caution with drugs exerting similar actions, to avoid causing excessive drowsiness and sedation. Furthermore, individuals who take such herbs should exercise caution if driving or operating heavy machinery.

Section 1

–Wind-Damp Dispelling and Pain-Relieving Herbs

Du Huo (Radix Angelicae Pubescentis)

獨活 独活

Pinyin Name: *Du Huo*
Literal Name: "self-reliant existence"
Alternate Chinese Names: *Xiang Du Huo*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: pubescent angelica root, double teeth pubescent angelica root
Botanical Name: *Angelica pubescens* Maxim. F. biserrata Shan et Yuan. (*Mao Dang Gui*)
Pharmaceutical Name: Radix Angelicae Pubescentis
Properties: acrid, bitter, warm
Channels Entered: Liver, Kidney, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness to Relieve Pain

***Bi zheng* (painful obstruction syndrome):** Wind, cold and dampness are responsible for the majority of *bi zheng* afflictions. These pathogens block the channels and collaterals and lead to stagnation of qi and blood. Acrid, bitter and warm, *Du Huo* (Radix Angelicae Pubescentis) enters the peripheral channels and collaterals to dispel wind, cold and dampness. It relieves various acute and chronic aches and pains of the muscles and joints. Furthermore, *Du Huo* enters the Liver and Kidney channels and benefits the tendons and bones. Clinically, *Du Huo* treats such disorders as muscle and joint aches and pains, low back pain, weak knees, and muscle atrophy. This herb is best for pain in the lower body (back and knees).

- Low back pain and weak knees: use *Du Huo* with *Sang Ji Sheng* (Herba Taxilli), *Du Zhong* (Cortex Eucommiae) and *Dang Gui* (Radicis Angelicae Sinensis) to tonify the Liver and Kidney. **Exemplar Formula:** *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction).

***Shaoyin* stage headache and toothache:**

- Headache: combine *Du Huo* with *Xi Xin* (Herba Asari) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Toothache: prepare *Du Huo* individually in an herbal decoction, to be used for gargling while warm.
- Toothache and swollen gums due to wind-heat or Stomach heat: use it with *Shi Gao* (Gypsum Fibrosum), *Sheng Di Huang* (Radix Rehmanniae) and *Sheng Ma* (Rhizoma Cimicifugae).

Dermatological disorders:

- Rash and itching: use *Du Huo* with *Fang Feng* (Radix Saposhnikoviae) and *Di Fu Zi* (Fructus Kochiae).

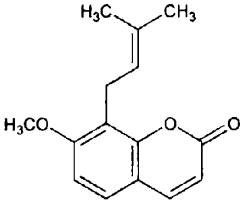
2. Releases the Exterior

Wind-cold disorder with dampness: Acrid, dispersing and warm, *Du Huo* dispels the pathogenic factors wind, cold or dampness from the exterior. Clinically, it treats exterior wind-cold with dampness characterized by symptoms such as aversion to cold, fever, headache, sensations of heaviness, and muscle aches and pain.

Du Huo (Radix Angelicae Pubescentis)

- Muscle aches and pain due to exterior wind, cold and dampness: use *Du Huo* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), and *Gao Ben* (Rhizoma Ligustici). **Exemplar Formula:** *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness).

DOSAGE



3 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- Drying in nature, *Du Huo* should be used with caution in patients who have yin and/or blood deficiencies.
- *Du Huo* is contraindicated for patients who have internal Liver wind.
- Overdose of *Du Huo* is sometimes associated with increased photosensitivity.

CHEMICAL COMPOSITION

Osthole, columbianetin, columbianctin acetate, bergapten, columbianadin, xanthotoxin, isoimperatorin, angelol B, anpubesol, umbelliferone, columbianctin-β-D-glucopyranoside, and isoangelol.[1,2]

Osthole

PHARMACOLOGICAL EFFECTS

- **Analgesic and anti-inflammatory:** Intraperitoneal injection of *Du Huo* at 2 g/kg has demonstrated marked analgesic and anti-inflammatory effects in mice. It also has a mild sedative effect in mice and rats.[3]
- **Antihypertensive:** *Du Huo* herbal decoction has been shown to have marked antihypertensive action in anesthetized dogs and cats. However, the duration of action is rather short, lasting only 1 to 2 hours.[4]
- **Antiplatelet:** Some constituents isolated from *Du Huo* have demonstrated a mild inhibitory effect on platelet aggregation in mice.[5]
- **Gastrointestinal:** *Du Huo* has demonstrated efficacy in treating peptic ulcers and relieving intestinal spasms in rabbits.[6]
- **Antibiotic:** *Du Huo* has been shown to have an inhibitory effect on *Mycobacterium tuberculosis, E. coli, Bacillus dysenteriae, Salmonella typhi, Pseudomonas aeruginosa,* and *Vibrio cholerae.*[7]
- **Respiratory:** Osthole, an constituent isolated from *Du Huo*, has a non-specific relaxant effect on the trachea by inhibiting the cAMP and cGMP phosphodiesterases, as concluded by an *in vitro* study with guinea-pig trachea. The proposed mechanism of action of osthole is suppression of the contraction response curves of tracheal smooth muscle caused by carbachol, prostaglandin F2 alpha (PGF2 alpha), U46619 (thromboxane A2 analogue) and leukotriene C4 (LTC4), in a concentration-dependent manner. The relaxant actions of osthole were not affected by propranolol, glibenclamide, or removal of the tracheal epithelium.[8]

CLINICAL STUDIES AND RESEARCH

- **Chronic tracheitis:** According to one report, 450 patients with chronic tracheitis were treated with an herbal decoction (9 grams of *Du Huo* and 15 grams of brown sugar) divided equally and taken three to four times daily. The rate of effectiveness was 73.7%.[9]
- **Vitiligo:** In one study, 307 patients with vitiligo were treated with topical application of a *Du Huo* preparation in conjunction with UV ray therapy. The treatment was 54.4% effective.[10]
- **Psoriasis:** According to one report, 92 patients with psoriasis were treated with a *Du Huo* preparation and UV ray therapy. The herb was given after meals, and the UV ray therapy was administered 1.5 to 2 hours after herbal therapy. The rate of effectiveness was 66.3%.[11]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** Since components of *Du Huo* have an inhibitory effect on platelet aggregation, *Du Huo* should be given with caution to patients who are taking anticoagulant or antiplatelet drugs.[12] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

The LD_{50} in rats via intramuscular injection is 160 mg/kg for xanthotoxin and 945 mg/kg for bergapten. Toxic effects due to gross overdose in mice are liver and kidney damage.[13]

AUTHORS' COMMENTS

Du Huo (Radix Angelicae Pubescentis) and *Qiang Huo* (Rhizoma et Radix Notopterygii) share functions to dispel wind, dry dampness, relieve pain, and treat *bi zheng* (painful obstruction syndrome). They were used interchangeably in the early history of traditional Chinese medicine; in fact, they were not separated as two distinct

herbs until the *Tang* dynasty. By contrast, *Du Huo* is more commonly used to dispel wind, cold and dampness from the lower body to relieve pain; while *Qiang Huo* is more commonly used to release the exterior and treat aches and pains in the upper body.

Wei Ling Xian (Radix Clematidis)

威靈仙 威灵仙

Pinyin Name: *Wei Ling Xian*
Literal Name: "mighty curative immortal," "powerful soul root," "awesome spiritual immortal"
Alternate Chinese Names: *Ling Xian*, *Tie Jiao Wei Ling Xian*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: clematis, Chinese clematis root, six-petal clematis root
Botanical Name: *Clematis chinensis* Osbeck (*Wei Ling Xian*); *Clematis hexapetala* Pall. (*Mian Tuan Tie Xian Lian*); *Clematis manshurica* Rupr. (*Dong Bei Tie Xian Lian*)
Pharmaceutical Name: Radix Clematidis
Properties: acrid, salty, warm
Channels Entered: Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness, Opens Channels and Collaterals, Relieves Pain

***Bi zheng* (painful obstruction syndrome):** Acrid and warm, *Wei Ling Xian* (Radix Clematidis) has excellent dispersing and penetrating functions. It disperses and dispels wind and dampness from the muscles, penetrates and opens peripheral channels and collaterals, and relieves *bi zheng*. Clinically, it is best for musculoskeletal pain, spasms and cramps of the muscles, numbness and pain in the extremities, and difficulty with extension and flexion.

- Low back pain or leg pain: combine *Wei Ling Xian* with *Du Huo* (Radix Angelicae Pubescentis) and warm rice wine.
- Musculoskeletal pain caused by accumulation of wind and dampness or external injuries: use this herb with *Rou Gui* (Cortex Cinnamomi) and *Dang Gui* (Radicis Angelicae Sinensis).

2. Treats Fish Bones Blocking the Throat

Fish bones blocking the throat: *Wei Ling Xian* treats

Wei Ling Xian (Radix Clematidis)

obstruction caused by fish bones lodged in the throat that cannot be swallowed or cleared by vomiting. Combine *Wei Ling Xian*, *Sha Ren* (Fructus Amomi) and sugar. A small amount of vinegar can also be added to the decoction. Swallow the decoction slowly.

Lastly, *Wei Ling Xian* disperses stagnation and accumulations to treat hiccups, phlegm obstruction, and distention, when combined with appropriate herbs.

DOSAGE

5 to 10 grams. Use up to 30 grams of *Wei Ling Xian* to treat obstruction of fish bones in the throat.

CAUTIONS / CONTRAINDICATIONS

- The penetrating action of *Wei Ling Xian* is so strong that it should be used with caution in women who are pregnant, or in patients with generalized weakness, or who have deficiency of qi and/or blood.
- Topical application of *Wei Ling Xian* has been associated with adverse dermatological reactions such as rash, swelling, itching, and pain.[1]

OVERDOSAGE

Though uncommon, incidences of gastrointestinal bleeding caused by overdose of *Wei Ling Xian* have been reported.[2]

CHEMICAL COMPOSITION

Protoanemonin, anemonin, anemonol.[3]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Administration of *Wei Ling Xian* is associated with increased peristalsis of smooth muscle in the gastrointestinal tract in anesthetized dogs.[4]
- **Cardiovascular:** Water extract of *Wei Ling Xian* has a protective effect against lack of oxygen and blood perfusion to the cardiac muscles in rats.[5]
- **Abortifacient:** Alcohol extract of *Wei Ling Xian* may induce abortion in mice in the second trimester.[6]

CLINICAL STUDIES AND RESEARCH

- **Obstruction by fish bones:** Obstruction caused by fish bones in the throat is commonly treated by administering a decoction of *Wei Ling Xian*, due in part to its effect of relaxing the pharynx to facilitate passage of the bone. In one study, 104 patients with such obstructions were treated with decoction of *Wei Ling Xian* with or without vinegar, with an overall 87.6% rate of effectiveness.[7]
- **Hypertrophic spondylitis:** According to one report, 65 patients with hypertrophic spondylitis were treated with intramuscular injection or trigger point injection of a *Wei Ling Xian* preparation, with marked success.[8]
- **Nausea:** Over 60 patients with nausea were treated with greater than 90% effectiveness, using an herbal decoction containing 30 grams each of *Wei Ling Xian* and honey.[9]
- **Cholelithiasis:** Oral administration of a decoction of 30 to 60 grams of *Wei Ling Xian* was reportedly 87% effective in treating 120 patients with cholelithiasis.[10]

AUTHORS' COMMENTS

According to Dr. He Zi-Jun, herbs such as *Wei Ling Xian* and *Shi Chang Pu* (Rhizoma Acori) are effective for male patients with ejaculation difficulties, as the herbs have penetrating effects to open closed orifices.

Dr. Guan You-Bo states that *Wei Ling Xian*, *Bai Shao* (Radix Paeoniae Alba), *Gan Cao* (Radix Glycyrrhizae), and *Mu Gua* (Fructus Chaenomelis) alleviate the pain and numbness associated with bone spurs of the neck, spine and heels.

Classic texts state that *Wei Ling Xian* "dissolves" fish bones that are obstructing the throat. This statement, however, is not strictly correct, since this herb does not literally "dissolve" fish bones. Instead, *Wei Ling Xian* relaxes the throat muscles, thereby helping to dislodge the obstruction.

Fen Fang Ji (Radix Stephaniae Tetandrae)

粉防己

Pinyin Name: *Fen Fang Ji*
Alternate Chinese Names: *Han Fang Ji, Fang Ji*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: stephania, four-stamen stephania root
Botanical Name: *Stephania tetrandra* S. Moore (*Fen Fang Ji*)
Pharmaceutical Name: Radix Stephaniae Tetandrae
Properties: acrid, bitter, cold
Channels Entered: Urinary Bladder, Lung, Kidney
Safety Index: Safe

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness to Relieve Pain

***Bi zheng* (painful obstruction syndrome):** Acrid and bitter, *Fen Fang Ji* (Radix Stephaniae Tetandrae) is an excellent herb to dispel wind and dampness, eliminate stagnation from the channels and collaterals, and relieve pain. Because it is cold and has diuretic effects, it is best for the type of pain caused by heat and dampness.

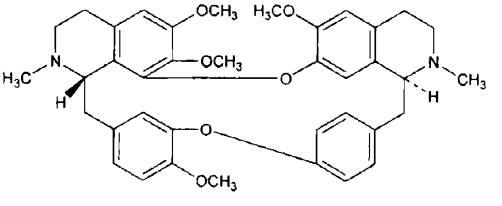
- *Bi zheng* caused by dampness and heat: use *Fen Fang Ji* with *Yi Yi Ren* (Semen Coicis) and *Can Sha* (Excrementum Bombycis Mori).
- *Bi zheng* from cold and dampness: use it with *Wu Tou* (Radix Aconiti), *Gui Zhi* (Ramulus Cinnamomi), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

2. Promotes Diuresis

Edema: *Fen Fang Ji* regulates water circulation and promotes normal urination. It clears damp-heat in the lower *jiao* and is commonly used to treat edema, ascites, leg *qi* and other disorders associated with water accumulation.

- Edema accompanying deficiency: use *Fen Fang Ji* with *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).
- Dysuria and constipation due to water accumulation: combine it with *Jiao Mu* (Semen Zanthoxyli Bungeani), *Ting Li Zi* (Semen Descurainiae seu Lepidii) and *Da Huang* (Radix et Rhizoma Rhei).
- Leg *qi*: use this herb with *Fu Ling* (Poria), *Huang Qi* (Radix Astragali), *Gui Zhi* (Ramulus Cinnamomi) and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE



4.5 to 9 grams.

CAUTIONS / CONTRAINDICATIONS

- Bitter and cold, *Fen Fang Ji* is damaging to the middle *jiao* and should be used with caution in patients with yin deficiency, in patients having no signs of damp-heat, or in patients with deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

1.2 to 2.3% tetrandrine ($C_{38}H_{42}N_2O_6$), fenfangjine, cyclanoline, menisine, menisidine, oxofangchirine, stephenanthrine, stepholidine, bisbenzylisoquinoline.[1,2]

Tetrandrine

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** *Fen Fang Ji* has been shown to lower blood pressure, dilate coronary blood vessels, increase blood perfusion to cardiac muscles, and decrease oxygen consumption of cardiac muscles. Tetrandrine has an antiarrhythmic effect.[3]
- **Analgesic and anti-inflammatory:** *Fen Fang Ji* has demonstrated marked analgesic, anti-inflammatory, and antipyretic effects. Some studies have shown *Fen Fang Ji* to be more potent in its analgesic effect than *Yan Hu Suo* (Rhizoma Corydalis), but less potent than morphine.[4]
- **Antispasmodic:** *Fen Fang Ji* has been shown to have a relaxant effect on smooth muscle.[5]

Fen Fang Ji (Radix Stephaniae Tetandrae)

CLINICAL STUDIES AND RESEARCH

- **Hypertension:** Intravenous infusion of fenfangjine lowered blood pressure in 84.07% of patients. Of 270 patients, 256 received the herbs via intravenous injection and 14 via oral ingestion. The study also indicated that this treatment was effective for patients in hypertensive crisis.[6]
- **Coronary artery disorders:** Intravenous injections of an herbal preparation (2 to 3 mg/kg of fenfangjine A with 20 ml of normal saline) were administered twice daily for 2 weeks. The study concluded this therapy to be effective for patients with coronary artery disorder with hypertension.[7]
- **Silicosis:** In one study, 33 patients were treated with 200 to 300 mg of tetrandrine, three times daily after meals, for a total of 3 years, with marked improvement. The first and second courses of treatment were each 6 months, separated by 3-to-6 month intervals of rest. The third and fourth courses of treatment were 3 months each, with 2 months of rest.[8]
- **Lung cancer:** Intravenous injections of an herbal preparation (180 to 300 mg of fenfangjine A mixed with normal saline or D5W) were given to 97 patients with lung cancer, with promising results. Fenfangjine A appeared to have an inhibitory effect on the DNA and RNA of the cancer cells.[9]

HERB-DRUG INTERACTION

- **Diuretics:** *Fen Fang Ji* has a diuretic effect. Though this potential interaction has not been documented as an actual occurrence, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[10] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

SUPPLEMENT

- 木防己 *Mu Fang Ji* (Radix Couulus Trilobus), *Couulus trilobus* (Thunb) DC, promotes the circulation of water and eliminates water accumulation. Though *Mu Fang Ji* is similar in name to *Fen Fang Ji* or *Han Fang Ji*, it must not be confused with or used interchangeably with either of these herbs. Proper identification must be made prior to prescribing and dispensing this herb. [Note: Historically, '*Mu Fang Ji*' was used as an alternate name for *Fen Fang Ji* or *Han Fang Ji*, contributing to confusion.]

Fen Fang Ji and *Han Fang Ji* both refer to the plant *Stephania tetrandra*. *Fen Fang Ji* is the standard pinyin name according to *Zhong Hua Ren Min Gong He Guo Yao Dian* (Chinese Herbal Pharmacopoeia by People's Republic of China) published in 2000. *Han Fang Ji* is the pinyin name used by most contemporary doctors and herbalists.

AUTHORS' COMMENTS

Fen Fang Ji (Radix Stephaniae Tetandrae) and *Guang Fang Ji* (Radix Aristolochiae Fangchi), despite similar names and functions, have completely different toxicological profiles and should never be used interchangeably. Please refer to *Guang Fang Ji* for additional details on toxicology.

Guang Fang Ji (Radix Aristolochiae Fangchi)

廣防己 广防己

Pinyin Name: *Guang Fang Ji*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: aristolochia root, fangchi root, southern fangchi root
Botanical Name: *Aristolochia fangchi* Y.C. Wu ex L.D.
Pharmaceutical Name: Radix Aristolochiae Fangchi
Properties: acrid, bitter, cold
Channels Entered: Urinary Bladder, Lung
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

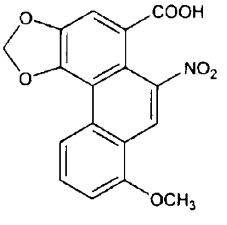
1. Dispels Wind and Dampness to Relieve Pain

***Bi zheng* (painful obstruction syndrome):** Acrid, bitter, and cold, *Guang Fang Ji* (Radix Aristolochiae Fangchi) treats *bi zheng* characterized by damp-heat or wind-damp.

2. Promotes Diuresis

Edema: *Guang Fang Ji* regulates water circulation and promotes normal urination. It treats edema in the legs, and dysuria.

DOSAGE



4.5 to 9 grams.

CAUTIONS / CONTRAINDICATIONS

- Use with caution in patients having deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Aristolochic acid I, II.[1,2]

Aristolochic Acid

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory**: Aristolochic acid has an anti-inflammatory action via its regulatory effect in prostaglandin synthesis.[3]
- **Immunostimulant**: In a human study, administration of aristolochic acid at a dosage of 0.9 mg/kg for 3 days was associated with increased phagocytic activities.[4]

TOXICOLOGY

Guang Fang Ji is toxic and its use should be avoided. The toxic component of *Guang Fang Ji* is generally believed to be aristolochic acid. *Guang Fang Ji* has been shown to have a toxic effect on the liver, kidneys and adrenal glands. Therefore, it is particularly contraindicated in patients who have impairment of these organs. It should be used with extreme caution in patients who are taking hepatotoxic or nephrotoxic medications.

According to one report in the early 1990s, a weight loss clinic in Belgium treated a group of women with a slimming preparation that contained a blend of pharmaceuticals and herbs: fenfluramine, diethylpropion, cascara powder, belladonna extract, acetazolamide, "*Fang Ji*" and *Hou Po* (Cortex Magnoliae Officinalis). In those who ingested this preparation, 33 cases of nephropathy were reported initially. To date, more than 100 cases of nephropathy have been reported. Many hypotheses have been published on why there was an "outbreak" of nephropathy in Belgium. Some suggest that the primary reason for nephropathy was the substitution of *Guang Fang Ji* (Radix Aristolochiae Fangchi) for *Fen Fang Ji* (Radix Stephaniae Tetandrae). Some believe the culprit to be the concurrent use of *Guang Fang Ji* (containing aristolochic acid) with another potential nephrotoxin, acetazolamide. Others propose that the main reason for the outbreak was the use of *Guang Fang Ji* in powder (uncooked) instead of decoction (cooked). Decoction is believed to be a much safer mode of administration because the concentration of aristolochic acid is much lower in decoction, since it has low water solubility.[5,6]

AUTHORS' COMMENTS

Guang Fang Ji (Radix Aristolochiae Fangchi) and *Fen Fang Ji* (Radix Stephaniae Tetandrae) have similar names and functions. *Guang Fang Ji* more effectively dispels wind and dampness to treat *bi zheng* (painful obstruction syndrome). *Fen Fang Ji* more strongly promotes diuresis to treat edema. Despite their similarities, these two herbs, have completely different toxicological profiles and should never be used interchangeably.

Xu Chang Qing (Radix Cynanchi Paniculati)

徐長卿 徐长卿

Pinyin Name: *Xu Chang Qing*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: paniculate swallowwort root
Botanical Name: *Cynanchum paniculatum* (Bge.) Kitag. (*Xu Chang Qing*)
Pharmaceutical Name: Radix Cynanchi Paniculati
Properties: acrid, warm
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Relieves Pain

***Bi zheng* (painful obstruction syndrome):** *Xu Chang Qing* (Radix Cynanchi Paniculati) is widely used with other herbs to treat pain caused by wind-damp, qi stagnation, cold accumulation and blood stagnation. It has also been used recently to treat trauma-related, cancer-related and post-surgical pain.

- *Bi zheng* due to wind and dampness: use *Xu Chang Qing* with *Wei Ling Xian* (Radix Clematidis) and *Wu Jia Pi* (Cortex Acanthopanacis).
- Back pain and soreness: use it with *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci) and *Du Huo* (Radix Angelicae Pubescentis).
- Epigastric and abdominal pain: combine it with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) and *Xiang Fu* (Rhizoma Cyperi).
- Trauma-related pain and menstrual cramps: use it with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) and *Tao Ren* (Semen Persicae).

2. Relieves Itching and Eliminates Toxins

Itching of the skin: *Xu Chang Qing* has a strong effect to dispel wind and relieve itching. It is commonly used for eczema, wind rashes and other dermatological disorders where itching is the predominant sign.

Xu Chang Qing (Radix Cynanchi Paniculati)

- Itching: use *Xu Chang Qing* with *Ku Shen Gen* (Radix Sophorae Flavescentis), *Di Fu Zi* (Fructus Kochiae) and *Bai Xian Pi* (Cortex Dictamni), both internally and topically.

Sores, carbuncles, and snake bites: *Xu Chang Qing* eliminates toxins and can be used for swelling and pain caused by toxins.

- Snake bite, sores and carbuncles: use this herb with *Ban Bian Lian* (Herba Lobeliae Chinensis) and *Ye Ju Hua* (Flos Chrysanthemi Indici).

DOSAGE

3 to 10 grams in decoction, 1.5 to 3 grams in powdered form. *Xu Chang Qing* may be prescribed up to 10 to 20 grams when the entire plant is used. Because this herb is aromatic or acrid in nature, it should not be cooked for a prolonged period of time.

CHEMICAL COMPOSITION

Paeonol, isopaeonol, cynapanoside A,B,C; cynatratoside B.[1]

PHARMACOLOGICAL EFFECTS

- **Analgesic:** Intraperitoneal injection of *Xu Chang Qing* at 10 g/kg in mice showed marked analgesic action that started 10 minutes after injection, and lasted for up to 60 minutes.[2]
- **Sedative:** Intraperitoneal injection of *Xu Chang Qing* at 5 to 10 g/kg in mice showed marked sedative effects by decreasing spontaneous movement and reaction to external stimuli, for up to 60 minutes.[3]
- **Effect on temperature regulation:** Intraperitoneal injection of a *Xu Chang Qing* preparation at 3 g/kg lowered body temperature by approximately 0.9° C for up to 30 minutes.[4]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of *Xu Chang Qing* is 32.93 g/kg in mice.[5]

Can Sha (Excrementum Bombycis Mori)

蠶砂　蚕砂

Pinyin Name: *Can Sha*
Literal Name: "silkworm sand"
Alternate Chinese Names: *Can Shi, Yuan Can Sha, Wan Can Sha*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: silkworm droppings, silkworm feces
Zoological Name: *Bombyx mori* L. (*Jia Can*)
Pharmaceutical Name: Excrementum Bombycis Mori
Properties: sweet, acrid, warm
Channels Entered: Liver, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness

***Bi zheng* (painful obstruction syndrome) and itching skin:** Acrid and warm, *Can Sha* (Excrementum Bombycis Mori) dispels wind, dries dampness, and opens peripheral channels and collaterals. Clinically, it

Can Sha (Excrementum Bombycis Mori)

treats disorders characterized by accumulation of wind and dampness in the extremities, such as *bi zheng*, muscle aches and pain, itching and eczema.

- *Bi zheng* due to wind-damp: use *Can Sha* with *Fen Fang Ji* (Radix Stephaniae Tetandrae), *Yi Yi Ren* (Semen Coicis) and *Lian Qiao* (Fructus Forsythiae).
- Hemiplegia: place *Can Sha* in a cotton bag, heat it thoroughly with steam, then place the bag directly on the affected area.
- Headache from accumulation of dampness: use this herb with *Bai Zhi* (Radix Angelicae Dahuricae) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Itching, eczema and other dermatological disorders: use *Can Sha* internally or topically.

2. Dissolves Turbidity and Dampness, Harmonizes the Stomach

Vomiting, diarrhea, headache and abdominal cramps: *Can Sha* dissolves dampness from the middle *jiao* and harmonizes the Spleen and Stomach. It relieves nausea, vomiting, spasms, cramps and pain.

- Nausea, vomiting and abdominal cramps: use *Can Sha* with *Mu Gua* (Fructus Chaenomelis), *Wu Zhu Yu* (Fructus Evodiae) and *Huang Qin* (Radix Scutellariae).
- Headache due to turbidity and accumulated dampness: use this herb with *Bai Zhi* (Radix Angelicae Dahuricae) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).

DOSAGE

5 to 10 grams.

CHEMICAL COMPOSITION

Phytol, β-sitosterol, ergosterol, bombiprenone, protocatechuric acid, caffeic acid.[1]

CLINICAL STUDIES AND RESEARCH

- **Urticaria:** In one study, 19 patients with urticaria were treated with satisfactory results using both oral and topical applications of *Can Sha*. The oral treatment protocol was to cook 60 grams of this substance in water and take the decoction twice daily. The topical solution was prepared by cooking 120 grams of *Can Sha* in water and applying the decoction topically as an herbal wash, twice daily, for 20 minutes per treatment.[2]
- **Profuse menstrual bleeding:** Profuse menstrual bleeding may be effectively treated by ingesting 6 grams of charred *Can Sha* with grain-based liquor.[3]
- **Leukopenia:** In one report, 265 patients with leukopenia were treated with a preparation of *Can Sha* three times daily, for 30 days per course of treatment, with an 88.7% overall rate of effectiveness.[4]

Song Jie (Lignum Pini Nodi)

松節　松节

Pinyin Name: *Song Jie*
Literal Name: "pine joint"
Alternate Chinese Names: *Ma Wei Song, You Song Jie*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: knotty pine
Botanical Name: *Pinus tabulaeformis* Carr. (*Mu You Song*); *Pinus massoniana* Lamb. (*Ma Wei Song*)
Pharmaceutical Name: Lignum Pini Nodi
Properties: bitter, warm
Channels Entered: Liver

Song Jie (Lignum Pini Nodi)

CHINESE THERAPEUTIC ACTIONS

Dispels Wind, Dries Dampness and Relieves Pain

***Bi zheng* (painful obstruction syndrome), traumatic injuries:** Typical manifestations include fixed, deep pain in the joints with difficulty flexing or moving. *Song Jie* (Lignum Pini Nodi) has a warm, drying nature that makes it useful for dispelling pain caused by cold and dampness. *Song Jie* is often soaked in grain-based liquor and used with pepper to potentiate its effect to eliminate stagnation and relieve pain.

- *Bi zheng*: use *Song Jie* with *Hai Feng Teng* (Caulis Piperis Kadsurae), *Du Huo* (Radix Angelicae Pubescentis) and *Dang Gui* (Radicis Angelicae Sinensis).
- Trauma-related pain: use it with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *Su Mu* (Lignum Sappan).

DOSAGE

10 to 15 grams.

CHEMICAL COMPOSITION

α-pinene, β-pinene, resin.[1]

SUPPLEMENT

- 松葉 / 松叶 *Song Ye* (Folium Pini), first cited in *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D., is the leaf of the same plant as *Song Jie*. *Song Ye* is bitter and warm, and dispels wind and dries dampness. It also kills parasites and stops itching. The recommended dose for *Song Ye* is 6 to 15 grams.
- 松果 *Song Guo* (Fructus Pini), first cited in *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D., is the fruit or pine cone of the same plant as *Song Jie*. *Song Guo* is bitter and warm. It dispels wind, dries dampness, moistens the intestines and relieves pain. The recommended dosage of *Song Guo* is 6 to 10 grams.

Qi Ye Lian (Radix Schefflerae)

七葉蓮 七叶莲

Pinyin Name: *Qi Ye Lian*
Literal Name: "seven-leaf lotus"
Alternate Chinese Names: *Qi Ye Teng, Qi Jia Pi*
English Name: schefflera, scandent schefflera root, Taiwan schefflera root
Botanical Name: *Schefflera arboricola* Hayata; *Schefflera kwangsiensis* Merr. Ex Li.
Pharmaceutical Name: Radix Schefflerae
Properties: bitter, acrid, warm
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Dispels Wind-Damp, Relieves Pain

***Bi zheng* (painful obstruction syndrome):** *Qi Ye Lian* (Radix Schefflerae) dispels wind-damp from the extremities to treat *bi zheng*. It also treats traumatic injuries with pain and swelling.

- *Bi zheng*: fry *Qi Ye Lian* with grain-based liquor, and apply it topically.
- Traumatic injuries: grind the herb into paste and apply topically.

Qi Ye Lian (Radix Schefflerae)

DOSAGE

10 to 15 grams. *Qi Ye Lian* is used both internally and externally.

CAUTIONS / CONTRAINDICATIONS

- *Qi Ye Lian* should be used with caution during pregnancy.

CHEMICAL COMPOSITION

Organic acid, mucic acid, fumaric acid, butanedioic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Analgesic**: *Qi Ye Lian* has a marked analgesic effect, which is achieved with oral ingestion, intramuscular injection, and trigger point injection of the herb.[2]

CLINICAL STUDIES AND RESEARCH

- **Pain:** *Qi Ye Lian* has been used *in vivo* to treat various disorders involving pain, including kidney stones, gallstones, fractured bones, pancreatitis, and arthritis. [3]
- **Anesthesia:** Injection of *Qi Ye Lian* into ear points was effective in patients requiring extensive dental work, such as tooth extraction. The rate of effectiveness was 89.4% among 112 patients. [4]

Lei Gong Teng (Radix Tripterygii Wilfordii)

雷公藤 雷公藤

Pinyin Name: *Lei Gong Teng*
Literal Name: "thunder vine"
Original Source: *Zhong Guo Yao Ci Dian* (Journal of Chinese Medicinal Plants)
English Name: tripterygium, common broad lily root
Botanical Name: *Tripterygium wilfordii* Hook. f. (*Lei Gong Teng*)
Pharmaceutical Name: Radix Tripterygii Wilfordii
Properties: bitter, acrid, cool
Channels Entered: Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness

***Bi zheng* (painful obstruction syndrome):** *Lei Gong Teng* (Radix Tripterygii Wilfordii) relieves pain and reduces swelling, in patients who have swollen joints and difficulty moving. It can be used alone or with other antirheumatic herbs.

- *Bi zheng*: use *Lei Gong Teng* with *Fen Fang Ji* (Radix Stephaniae Tetandrae).

2. Kills Parasites and Eliminates Toxins

Maggots, rats and snake venom: *Lei Gong Teng* is used topically as an antitoxin for wounds infested by maggots, or caused by rat or snake bites.

DOSAGE

5 to 12 grams. Peel and discard the root bark of *Lei Gong Teng* before decocting. Prolonged decoction (between one and two hours) is recommended to decrease its toxicity. *Lei Gong Teng* should be taken after meals.

Lei Gong Teng (Radix Tripterygii Wilfordii)

CAUTIONS / CONTRAINDICATIONS

- *Lei Gong Teng* is contraindicated in pregnancy.
- It should be used with caution in geriatric and pediatric patients.
- It should also be used with caution for patients with heart, stomach and spleen disorders.
- *Lei Gong Teng* is toxic, and should not be used for patients who have compromised hepatic functions.[1]

OVERDOSAGE

The entire tripterygium plant is toxic. The toxicity of the root and bark is greater than that of other parts of the plant. The fresh form is more toxic than the dried form that has been stored for at least a year. Toxic signs include local irritation of the gastrointestinal tract, damage to the central nervous system, internal bleeding and necrosis of the organs. In severe cases, gross overdose of *Lei Gong Teng* may cause bleeding in the stomach, intestines, liver and lungs. Other symptoms include dizziness, dry mouth, palpitations, necrosis of mucous membranes and irregular menstruation.

Any adverse reactions generally occur within 2 to 3 hours after ingestion of the herb. Early reaction is characterized by headache, dizziness, palpitation, fatigue, severe vomiting (sometimes with blood), chills, fever (up to 40° C), continuous abdominal pain, diarrhea (with dark watery stools), generalized aches and pain, tachycardia and irregular heart rhythms. In some cases, patients may present with frequent urination with urgency, and feelings of stabbing pain during urination. Other patients may exhibit delayed symptoms after 2 to 3 days, such as low back pain, hair loss, facial edema, decreased or increased urinary output, and in severe cases, low blood pressure, low body temperature, altered consciousness, convulsions, difficult respiration and purple lips. Hematological disorders have also been noted following chronic use of the herb, with decreased white blood cell and platelet counts due to bone marrow suppression.[2]

TREATMENT OF OVERDOSAGE

Early-stage overdose (within 4 hours of ingestion) should be treated with emetic methods or gastric lavage to eliminate the offending agent from the body. Successful cases of detoxification have been reported using gastric lavage, even with gross overdose.[3]

Systemic reaction to the herb is generally treated with *Feng Wei Cao* (Herba Pteris) or *San Qi* (Radix Notoginseng) given as decoction.[4]

While this herb is toxic to humans, it has no toxicity for goats and rabbits. It was found that goats or rabbits that consume *Lei Gong Teng* regularly have developed resistance and antibodies to the toxicity of the herb. The consumption of fresh blood (200 to 300 ml) from goats and rabbits has been used successfully to treat overdose of the herb, using the rationale that the blood of these two animals contains substances that antidote the herb.[5]

CHEMICAL COMPOSITION

Alkaloids (wilfordine, wilforine, wilforidine, wilforgine, wilfortrine, wilforzine, wilformine, wilfornine, euonine, celacinnine, celafurine, celabenzine, neowilforine, regilidine), terpenoids (triptolide T13, tripdiolide, tripterolide, triptonide, triptolidenol T9, hypolide, triptonoterpenol, triptophenolide methylether, neotriptophenolide, isotriptophenolide, isoneotriptophenolide, triptonoterpene, triptonoterpene methylether, tripdioltonide, tripdiolide T8, triptriolide T11, triptolide T10, wilforlide A T1, triptotriterpenoidal lactone A, wilforlide B, triptotriterpenic acid A T3, triptotriterpenic acid B T2, triptoterpenic acid C T28, selaspermic acid, wilfornide, triptofordin A,B,C-1,C-2, D).[6]

PHARMACOLOGICAL EFFECTS

- **Antiviral:** Sesquiterpenes isolated from *Lei Gong Teng* were found to have moderate virucidal activity against several enveloped viruses including HSV-1, HCMV, measles virus and influenza A virus. The mechanism of action has been attributed to the suppressed viral protein synthesis of infected cells at early steps of viral replication and exerted inhibition of translation of the transcripts of the immediate early genes.[7]
- **Antiarthritic:** According to *in vitro* studies, administration of an extract of *Lei Gong Teng* once daily for 14 days exhibited a marked effect to suppress the development of arthritis, antibody production and delayed-type hypersensitivity to Type II collagen. On the other hand, therapeutic administration of the herbal extract did not affect the clinical course of the disease.[8]

CLINICAL STUDIES AND RESEARCH

- **Rheumatoid arthritis:** In one study, the combination of *Lei Gong Teng* and *Fen Fang Ji* (Radix Stephaniae Tetandrae) was found to have a powerful suppressive effect on human immune responses for treatment of rheumatoid arthritis. The mechanisms of action included inhibition of prostaglandin E2 secretion from monocytes, and inhibited IL-1, IL-6, IL-8, and tumor necrosis factor-alpha.[9]
- **Glomerulonephritis:** According to one study, administration of *Lei Gong Teng* was shown to reduce proteinuria in 102 patients with glomerulonephritis. The treatment protocol was to administer 15 to 18 grams of the herb per day, for a total of one to nine months of treatment. The rate of effectiveness was 72.5%.[10]

Lei Gong Teng (Radix Tripterygii Wilfordii)

TOXICOLOGY

While the side effects of *Lei Gong Teng* are related mostly to gastrointestinal upset, infertility and suppression of lymphocyte proliferation, one fatality has been reported. After ingesting the herb, the patient developed hypovolemic shock and cardiac damage, and died three days later. There was no information available on the prior physical condition of the deceased nor what dosage of the herb was consumed.[11]

AUTHORS' COMMENTS

According to Dr. Zhu Fang-Shou, *Lei Gong Teng* is excellent for rheumatoid arthritis, various *bi zheng* (painful obstruction syndrome) imbalances, and the pain associated with bone spurs. However, because *Lei Gong Teng* is toxic, the daily dose should be kept between 5 and 12 grams, with a maximum of 15 grams. In addition, *Lei Gong Teng* should be cooked for at least 60 minutes, before the addition of other herbs, and then cooked for another 15 minutes. Side effects are minimal when this herb is prescribed following the proper dosage and preparation. *Lei Gong Teng* is contraindicated in patients with pre-existing cardiovascular or hepatic disorders.

Qin Jiao (Radix Gentianae Macrophyllae)

秦艽 秦艽

Pinyin Name: *Qin Jiao*
Alternate Chinese Names: *Zuo Qin Jiao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: gentiana macrophylla root
Botanical Name: *Gentiana macrophylla* Pall. (*Qin Jiao*); *Gentiana straminea* Maxim. (*Ma Hua Qin Jiao*); *Gentiana crassicaulis* Duthie ex Burk. (*Cu Jin Qin Jiao*); *Gentiana dahurica* Fisch. (*Xiao Qin Jiao*)
Pharmaceutical Name: Radix Gentianae Macrophyllae
Properties: bitter, acrid, cool
Channels Entered: Stomach, Liver, Gallbladder

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness, Opens Channels and Collaterals, Relaxes the Sinews

***Bi zheng* (painful obstruction syndrome):** Acrid and bitter, *Qin Jiao* (Radix Gentianae Macrophyllae) has a dispersing nature that dispels dampness and opens peripheral channels and collaterals. It treats musculoskeletal and joint disorders, whether acute or chronic, hot or cold in nature. Since *Qin Jiao* is cool, it is most effective for *bi zheng* caused by heat, with redness, swelling and inflammation. It also relieves stiffness and

Qin Jiao (Radix Gentianae Macrophyllae)

tightness of the joints.

- Hot *bi zheng* with redness, swelling and pain: use *Qin Jiao* with *Fen Fang Ji* (Radix Stephaniae Tetandrae), *Zhi Mu* (Radix Anemarrhenae) and *Ren Dong Teng* (Caulis Lonicerae).
- Cold *bi zheng* with pain and difficulty moving: use *Qin Jiao* with *Du Huo* (Radix Angelicae Pubescentis), *Gui Zhi* (Ramulus Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- Paralysis and post-stroke complications: use it with *Tian Ma* (Rhizoma Gastrodiae), *Dang Gui* (Radicis Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).

2. Clears Deficiency Heat

Steaming bones sensations, tidal fever: Unlike other herbs that dispel wind-damp, *Qin Jiao* is not drying in nature. This makes it an excellent herb to clear deficiency heat without consuming yin or body fluids. Other typical signs of yin deficiency include afternoon fever, flushed cheeks, emaciation, night sweats, a dry and red tongue with a crack in the center, and a thready, rapid pulse.

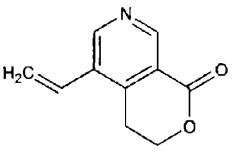
- Deficiency heat characterized by steaming bones sensations and tidal fever: use *Qin Jiao* with *Qing Hao* (Herba Artemisiae Annuae), *Zhi Mu* (Radix Anemarrhenae), and *Bie Jia* (Carapax Trionycis). **Exemplar Formula:** *Qin Jiao Bie Jia San* (Gentiana Macrophylla and Soft-shelled Turtle Shell Powder).

3. Relieves Jaundice

Jaundice: *Qin Jiao* dispels dampness to assist in the treatment of jaundice. It is rather mild in this action and must be combined with other herbs. It also promotes bowel movement and dispels water accumulation.

- Jaundice: use this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Zi* (Fructus Gardeniae).
- Infectious hepatitis with jaundice: combine it with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Huang Bai* (Cortex Phellodendri), *Che Qian Zi* (Semen Plantaginis), *Zhi Zi* (Fructus Gardeniae), *Fu Ling* (Poria), *Pu Gong Ying* (Herba Taraxaci) and *Da Huang* (Radix et Rhizoma Rhei).

DOSAGE



5 to 10 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Qin Jiao* with caution in patients with deficiency and cold of the Spleen and Stomach, or those with loose stools.
- Use of this herb may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Gentianine, gentianidine, gentiopieroside, gentianel, homoorientin, sapoknaretin.[1]

Gentianine

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory:** Gentianine has shown marked anti-inflammatory action via stimulation of the endocrine system to increase the secretion of hormones by the adrenal glands.[2]
- **Sedative:** Administration of *Qin Jiao* has demonstrated sedative effects via inhibition of the central nervous system in mice and rats. It also prolonged sleeping time when combined with barbiturates. However, a high dose of *Qin Jiao* is sometimes associated with excitation of the central nervous system.[3]
- **Cardiovascular:** Gentianine has been shown to lower blood pressure and decrease heart rate in guinea pigs, dogs and rabbits. The antihypertensive effect has a short duration, but is not affected by injection of atropine.[4]
- **Hyperglycemic:** Administration of gentianine is associated with an increase in blood glucose levels in mice. The mechanism of the hyperglycemic effect is attributed to stimulation of the endocrine system. When the adrenal glands of subjects were removed, gentianine could no longer raise blood glucose levels.[5]

CLINICAL STUDIES AND RESEARCH

- **Acute infantile jaundice or infectious hepatitis:** Twenty patients with jaundice or hepatitis characterized by heat were given *Qin Jiao*, *Huang Qin* (Radix Scutellariae) and *Lian Qiao* (Fructus Forsythiae); and patients with jaundice or hepatitis characterized by dampness were given *Qin Jiao*, *Cang Zhu* (Rhizoma Atractylodis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Hou Po* (Cortex Magnoliae Officinalis). Each course of treatment was 14 days. Positive results were reported in both groups.[6]
- **Tooth extraction:** *Qin Jiao* and *Fen Fang Ji* (Radix Stephaniae Tetandrae) showed marked analgesic and anti-inflammatory effectiveness in 26 patients who had tooth extractions. The herbs were given as 300 mg capsules, with equal amounts of each herb. All patients received 2 capsules 30 minutes prior to the procedure, and every 6 hours after the procedure for 3 days.[7]

HERB-DRUG INTERACTION

- **Sedatives:** *Qin Jiao* has an inhibitory effect on the central

Qin Jiao (Radix Gentianae Macrophyllae)

nervous system to induce sedation. It potentiates the sedative effect of barbiturates.[8] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

The LD_{50} for gentianine in mice is 480 mg/kg via oral administration, 350 mg/kg via intraperitoneal, and 250 to 300 mg/kg via intravenous injections.[9]

AUTHORS' COMMENTS

Dr. Wei Jia states that *Qin Jiao* is one of the best herbs to relieve joint pain associated with weather changes.

Hong Gu She (Radix Kadsura Japonicae)

紅骨蛇　红骨蛇

Pinyin Name: *Hong Gu She*
Literal Name: "red bone snake"
Alternate Chinese Names: *Hong Gu She Tou*
English Name: kadsura
Botanical Name: *Kadsura japonica* Dun
Pharmaceutical Name: Radix Kadsura Japonicae
Properties: acrid, bitter, cool
Channels Entered: Lung, Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Relieves Pain

Hong Gu She (Radix Kadsura Japonicae) opens the peripheral channels and collaterals to alleviate pain, relax the tendons, and relieve spasms and cramps.

- Wind-heat with headache and body aches: use *Hong Gu She* with *Dao Di Wu Gong* (Rhizoma Heliminthostachytis).
- Postpartum exterior invasion: use it with *Ji Xiang Teng* (Caulis Paederiae).

2. Reduces Swelling and Inflammation

Diarrhea with abdominal pain and vomiting: use *Hong Gu She* with *Ji Xue Cao* (Herba Centellae) and *Xian Feng Cao* (Herba Bidentis).

- Dizziness with an imbalance in the inner ear due to deficiency: combine this herb with *Suan Zao Ren* (Semen Zizyphi Spinosae), *Shan Yao* (Rhizoma Dioscoreae), *Dang Gui* (Radicis Angelicae Sinensis), and *Long Yan Rou* (Arillus Longan).
- Dizziness with an imbalance in the inner ear due to excess: use *Hong Gu She* with *Ban Xia* (Rhizoma Pinelliae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Long Dan Cao*

Hong Gu She (Radix Kadsura Japonicae)

(Radix Gentianae) and *Huang Qin* (Radix Scutellariae).
- Diabetes: add *Gou Qi Gen* (Radix Lycii).

DOSAGE

3 to 9 grams.

CHEMICAL COMPOSITION

Xyloglucoronit $(C_{11}H_{16}O_{10})_5$.

Tou Gu Cao (Caulis Impatientis)

透骨草 透骨草

Pinyin Name: *Tou Gu Cao*
Literal Name: "penetrate the bone herb"
English Name: garden balsam
Botanical Name: *Impatiens balsamina* Line
Pharmaceutical Name: Caulis Impatientis
Properties: bitter, slightly sweet and acrid, cool
Channels Entered: Liver, Spleen, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Invigorates Blood Circulation and Breaks Blood Stasis

Tou Gu Cao (Caulis Impatientis) treats external and traumatic injuries characterized by bruises, swelling, inflammation, blood stasis and pain. In addition to moving blood stagnation, it reduces swelling and promotes generation of tissues.
- Trauma-related pain and bleeding: use *Tou Gu Cao* with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *Chi Shao* (Radix Paeoniae Rubrae).

2. Clears Heat, Eliminates Toxins, Cools Blood and Relieves Pain

- Toxic sores, carbuncles and swellings: apply *Tou Gu Cao* topically.
- Burns: apply it topically.
- Hematemesis, abnormal uterine bleeding, epistaxis and hematuria due to heat: use this herb with *Zhi Zi* (Fructus Gardeniae), *Pu Huang* (Pollen Typhae), *Huang Qin* (Radix Scutellariae), and *Huai Hua* (Flos Sophorae).

3. Drains Damp-Heat

- Acute jaundice with hepatitis, fever, poor appetite and hepatomegaly: use *Tou Gu Cao* with *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis), *Huang Bai* (Cortex Phellodendri), *Long Dan Cao* (Radix Gentianae) and *Xia Ku Cao* (Spica Prunellae). Formulas to combine with this herb included *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) and *Jia Wei Xiao Yao San* (Augmented Rambling Powder).

DOSAGE

10 to 20 grams in decoction.

AUTHORS' COMMENTS

There are three different herbs with the pinyin names "*Tou Gu Cao*:" Caulis Impatientis, Caulis Leptostachya and Caulis Speranskla Tuberculata. Detailed information on the properties and uses of Caulis Leptostachya and Caulis Speranskla Tuberculata was unavailable at the time of publication.

Yí Wu Gen (Radix Elaeagni)

宜梧根

Pinyin Name: *Yi Wu Gen*
English Name: elaeagnus
Botanical Name: *Elaeagnus oldhamii* Maxim
Pharmaceutical Name: Radix Elaeagni
Properties: bland, cool
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness

***Bi zheng* (painful obstruction syndrome):** *Yi Wu Gen* (Radix Elaeagni) dispels wind and dampness to relieve *bi zheng*, muscle aches, and pain.

- *Bi zheng*: use *Yi Wu Gen* with *Huang Jin Gui* (Caulis Vanieriae) and *Wan Dian Jin* (Radix Ilicis Asprellae).
- Weakness of extremities: use it with *Yi Tiao Gen* (Radix Moghaniae), *Wang Bu Liu Xing* (Semen Vaccariae), *Ji Xue Teng* (Caulis Spatholobi) and *Gu Sui Bu* (Rhizoma Drynariae).
- Chronic arthritis: combine it with *Ding Shu Xiu* (Herba Elephantopus Scaber), *Xiao Jin Ying* (Fructus Rosae Cymosae) and *Bai Long Chuan Hua Tou* (Radix Clerodendron Paniculatum).
- Postpartum exterior wind invasion: add *Da Feng Teng* (Caulis Sinomenii).

2. Reduces Swelling and Dispels Stagnation

- Traumatic injury: use *Yi Wu Gen* with *San Qi* (Radix Notoginseng), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae) and *Yi Tiao Gen* (Radix Moghaniae).

DOSAGE

3 to 9 grams.

Hai Fu Rong (Herba Limonium Wrightii)

海芙蓉 海芙蓉

Pinyin Name: *Hai Fu Rong*
Alternate Chinese Names: *Huang Hua Shi Cong Rong, Hai Huang Jin*
English Name: limonium
Botanical Name: *Limonium wrightii* (Hance) O. Ktze var. *luteum* (Hara)
Pharmaceutical Name: Herba Limonium Wrightii
Properties: acrid, bitter, cold
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness

***Bi zheng* (painful obstruction syndrome):** *Hai Fu Rong* (Herba Limonium Wrightii) treats *bi zheng* caused by heat. The chief characteristics of this imbalance include redness, burning and swelling of the joints. This herb is also used to treat arthritis and neuralgia.

- Arthritis, neuralgia: use *Hai Fu Rong* with *Ji Xiang Teng* (Caulis Paederiae), *Da Feng Teng* (Caulis Sinomenii) and *Qin Jiao* (Radix Gentianae Macrophyllae).

Traumatic Injuries: *Hai Fu Rong* relieves pain associated with traumatic injuries, with redness, local inflammation and bruises.

- Pain of traumatic injuries: use it with *Huang Jin Gui* (Caulis Vanieriae) and *E Bu Shi Cao* (Herba Centipedae).

2. Lowers Blood Pressure

- **Hypertension:** use *Hai Fu Rong* with *Cha Chi Huang* (Herba Stellariae Aquaticae) and *Xia Ku Cao* (Spica Prunellae).

DOSAGE

3 to 12 grams.

Qing Feng Teng (Caulis Sinomenii)

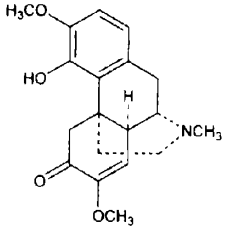
青風藤 青风藤

Pinyin Name: *Qing Feng Teng*
Literal Name: "blue-green wind vine"
Alternate Chinese Names: *Da Feng Teng, Feng Teng, Lao Teng, Hai Feng Teng*
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: sinomenium, Orient vine stem, Japanese sabia stem
Botanical Name: *Sinomenium acutum* (Thunb.) Rehd. et Wils. (*Qing Teng*), *Sinomenium acutum* (Thunb.) Rehd. et Wils. var. *cinoreum* Rehd. et Wils. (*Mao Qing Teng*)
Pharmaceutical Name: Caulis Sinomenii
Properties: bitter, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Dispels Wind and Relieves Pain

***Bi zheng* (painful obstruction syndrome):** *Qing Feng Teng* (Caulis Sinomenii) dispels wind and dampness, opens the channels and relieves pain. It is often used for patients experiencing joint tightness and pain with swelling. This herb also treats leg *qi*. It is used alone or with other antirheumatic herbs in grain-based liquor or in decoction.



- Arthroncus of the knee, rheumatoid arthritis: use *Qing Feng Teng* with *Huang Jin Gui* (Caulis Vanieriae), *Rou Cong Rong* (Herba Cistanches), *Chuan Niu Xi* (Radix Cyathulae), *Xu Duan* (Radix Dipsaci), *Gu Sui Bu* (Rhizoma Drynariae) and *Yi Wu Gen* (Radix Elaeagni).
- Back pain, soreness of tendons and muscles, infantile paralysis or hemiplegia: use *Qing Feng Teng* both as a tea and as a bath for soaking.

DOSAGE

6 to 12 grams.

CHEMICAL COMPOSITION

Sinomenine, sinoacutine, disinomenine, magnoflorine, N-acetylsinomenine.[1,2]

Sinomenine

PHARMACOLOGICAL EFFECTS

- **Analgesic and anti-inflammatory:** *Qing Feng Teng* has demonstrated marked analgesic and anti-inflammatory effectiveness. Although the exact mechanism is unclear, it has been proposed that it works via stimulation of the endocrine system, which consequently increases production of adrenal hormones. In laboratory studies, the analgesic effect was estimated to be $1/10^{th}$ – $2/5^{th}$ that of morphine. However, in comparison with morphine, there is no evidence of dependence associated with use of *Qing Feng Teng*, and tolerance develops much more slowly.[3]
- **Antihypertensive:** Administration of *Qing Feng Teng* is associated with a rapid decline of blood pressure. Repeated dosing, however, is associated with tolerance. The exact mechanism of this action is unclear.[4]
- **Antitussive:** Marked antitussive effect was demonstrated in rats and cats.[5]

CLINICAL STUDIES AND RESEARCH

- **Arthritis:** Administration of *Qing Feng Teng* was reported to be effective for treating pain in 93.4% of 311 patients. The herb was given in various dosage forms, including injection, decoction, and pills. Full details of the study were unavailable.[6]
- **Arrhythmia:** In a clinical study, 60 patients with various arrhythmia problems were treated with a preparation of *Qing Feng Teng* for 2 weeks, with satisfactory results.[7]

TOXICOLOGY

Rare cases of eczema and neutropenia have been reported following the use of *Qing Feng Teng*.[8]

Qing Feng Teng (Caulis Sinomenii)

Ma An Teng (Herba Ipomoea Pes-caprae)

馬鞍藤　马鞍藤

Pinyin Name: *Ma An Teng*
Alternate Chinese Names: *Er Ye Hong Su*
English Name: beach morning glory
Botanical Name: *Ipomoea pres-caprae* (L.) Sweet.
Pharmaceutical Name: Herba Ipomoea Pes-caprae
Properties: acrid, bitter, neutral
Channels Entered: Liver, Kidney, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness

***Bi zheng* (painful obstruction syndrome):** *Ma An Teng* (Herba Ipomoea Pes-caprae) dispels wind and dampness to treat arthritis, rheumatoid arthritis, and soreness and pain in the back, tendons and bones.

- Arthritis, rheumatoid arthritis: use *Ma An Teng* with *Po Bu Zi Ye* (Folium Cordia Dichotoma), *Gou Teng* (Ramulus Uncariae cum Uncis), *Ji Xue Teng* (Caulis Spatholobi) and *Dang Gui* (Radicis Angelicae Sinensis).
- Soreness and pain in the back, tendons and bones: combine it with *Wan Dian Jin* (Radix Ilicis Asprellae) and *Huang Jin Gui* (Caulis Vanieriae).

2. Reduces Carbuncles and Disperses Nodules

- Nodules, carbuncles, furuncles and swelling: apply *Ma An Teng* externally.
- Bleeding hemorrhoids: use it with *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life) and *Huai Hua* (Flos Sophorae).

DOSAGE

3 to 12 grams.

Section 2

— Wind-Damp Dispelling and Channel- and Collateral-Opening Herbs

Mu Gua (Fructus Chaenomelis)

木瓜

Pinyin Name: *Mu Gua*
Literal Name: "wood fruit," "wood melon"
Alternate Chinese Names: *Zuo Pi Mu Gua*, *Guan Pi Mu Gua*, *Xuan Mu Gua*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: chaenomeles, papaya
Botanical Name: *Chaenomeles lagenaria* (Loisel.) Koidz. (*Zhou Pi Mu Gua*); *Chaenomeles sinensis* (Thouin) Koehne (*Guang Pi Mu Gua*).
Pharmaceutical Name: Fructus Chaenomelis
Properties: sour, warm
Channels Entered: Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Relaxes Sinews, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome), stiffness and spasms of the sinews:** Warm yet not drying, sour yet not astringent, *Mu Gua* (Fructus Chaenomelis) enters the Liver to nourish the muscles and tendons. It is one of the most commonly used herbs to treat musculoskeletal disorders characterized by muscle cramps, spasms, and stiffness. *Mu Gua* is useful in treatment of both acute and chronic conditions, and is most effective for treating the lower body.

- Muscle stiffness and spasms with difficult movement: use *Mu Gua* with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *Sheng Di Huang* (Radix Rehmanniae).
- Muscle spasms due to blood deficiency: combine it with *Dang Gui* (Radicis Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba).
- Weakness and atrophy of muscles in the lower extremities: use it with *Du Huo* (Radix Angelicae Pubescentis).

Leg *qi* with edema, swelling and pain:

- Leg *qi* with swelling and pain in the lower extremities: add *Mu Gua* to *Wu Zhu Yu* (Fructus Evodiae), *Zi Su Ye* (Folium Perillae) and *Bing Lang* (Semen Arecae).

2. Dissolves Dampness and Harmonizes the Stomach

Vomiting, diarrhea and cramps: *Mu Gua* dissolves dampness from the middle *jiao* and harmonizes the Spleen and Stomach to relieve nausea, vomiting and abdominal pain. Its sour taste helps to generate body fluids, so *Mu Gua* is also useful for treating severe abdominal cramps, or calf muscle and lower leg cramps following excessive loss of fluids from vomiting.

- Nausea, vomiting and cramps: use *Mu Gua* with *Xiao Hui Xiang* (Fructus Foeniculi) and *Wu Zhu Yu* (Fructus Evodiae).

Mu Gua (Fructus Chaenomelis)

3. Promotes Digestion

Indigestion or food stagnation: *Mu Gua* has mild action to promote digestion and relieve food stagnation.

Degenerative gastritis: Because of its sour taste, *Mu Gua* has been used to promote gastric secretion in patients with degenerative gastritis where there is atrophy of the gastric glands.

DOSAGE

6 to 12 grams.

CHEMICAL COMPOSITION

Oleanolic acid, malic acid, saponins, tannins.[1]

PHARMACOLOGICAL EFFECTS

- **Hepatoprotective:** Administration of *Mu Gua* in mice had a marked protective effect on the liver by lowering elevated liver enzyme levels and preventing the death of hepatocytes.[2]
- **Antineoplastic:** *Mu Gua* was found to have an inhibiting effect on the growth of cancer cells in mice.[3]

CLINICAL STUDIES AND RESEARCH

- **Icteric jaundice:** According to one report, 70 patients with acute icteric jaundice were treated with 5 to 10 grams of *Mu Gua* three times daily, with marked improvement. Therapeutic benefits included symptomatic improvement, relief of jaundice, and improvement of liver function.[4]
- **Acute bacterial dysentery:** Administration of 5 pills of a preparation of *Mu Gua* (equivalent to approximately 5-6 grams of dried herb) to patients with acute bacterial dysentery three times daily for 5 to 7 days, was 96.28% effective. The study also reported complete recovery in 85.98% of these cases.[5]

SUPPLEMENT

The following are other species of herbs from various regions of China that have been used for the same function as *Mu Gua: Xi Nan Mu Gua* (Fructus Chaenomeles Lagenaria Cathayensis), *Wei Shi Mu Gua* (Fructus Chaenomeles Lagenaria Wilsonii), *Chiu Mu Gua* (Fructus Chaenomeles Speciosa), *Mao Ye Mu Gua* (Fructus Chaenomeles Cathayensis), and *Xi Zhang Mu Gua* (Fructus Chaenomeles Thibetica).

AUTHORS' COMMENTS

Dr. Chang Jie-An states that *Mu Gua* helps patients who suffer from diarrhea or loose stools containing undigested food. These patients exhibit weak digestive functions, in which diarrhea occurs immediately following intake of greasy, cold or raw food. *Mu Gua* contains digestive enzymes and is sour, which binds the intestines to control diarrhea.

Luo Shi Teng (Caulis Trachelospermi)

絡石藤 络石藤

Pinyin Name: *Luo Shi Teng*
Literal Name: "collateral stone vine"
Alternate Chinese Names: *Luo Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: star jasmine vine, Chinese star jasmine stem, confederate jasmine stem
Botanical Name: *Trachelospermum jasminoides* (Lindl.) Lem. (*Luo Shi*)
Pharmaceutical Name: Caulis Trachelospermi
Properties: bitter, cool
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome):** *Luo Shi Teng* (Caulis Trachelospermi) treats musculoskeletal pain, and muscle spasms and cramps caused by wind obstructing the channels and collaterals. Since *Luo Shi Teng* is cool in thermal property, it is most effective for *bi zheng* caused by heat.

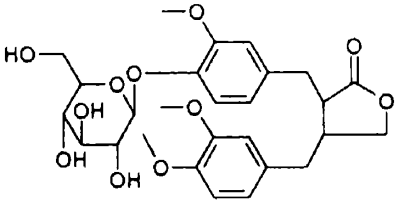
- *Bi zheng*: use *Luo Shi Teng* with *Wu Jia Pi* (Cortex Acanthopanacis) and *Niu Xi* (Radix Cyathulae seu Achyranthis) with other herbs to strengthen the sinews in herbal decoction.
- Pain and spasms of the extremities: add *Ren Dong Teng* (Caulis Lonicerae).

2. Cools Blood, Reduces Swelling

Sore throat: *Luo Shi Teng* cools blood and reduces swelling and inflammation. It treats soreness and swelling of the throat, and abscesses and sores on the skin.

- Sore and swollen throat: cook *Luo Shi Teng* alone and slowly sip the herbal decoction.

Abscesses and sores:



- Skin abscesses and sores: use *Luo Shi Teng* with *Zao Jiao Ci* (Spina Gleditsiae), *Gua Lou Shi* (Fructus Trichosanthis), and *Ru Xiang* (Gummi Olibanum).

DOSAGE

6 to 15 grams. *Luo Shi Teng* is commonly used as decoction or herbal wine.

CHEMICAL COMPOSITION

Coronaridine, voacangine, 19-epi-voacangavine, ibogaine, tabernaemontanine, vobasine, apigenin, campesterol, arctiin, tracheloside, nortracheloside, matairesinoside, dambonitol, cymarose.[1,2]

Arctiin

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *Luo Shi Teng* has an inhibitory effect on *Salmonella typhi*, *Staphylococcus aureus*, and *Bacillus dysenteriae*.[3]
- **Cardiovascular:** At low doses, arctiin stimulates the central nervous system to increase the rate of respiration. At high doses, it inhibits the central nervous system to decrease respiration rate, dilate blood vessels and decrease blood pressure.[4]

Sang Zhi (Ramulus Mori)

桑枝

Pinyin Name: *Sang Zhi*
Literal Name: "mulberry twigs"
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: mulberry twig
Botanical Name: *Morus alba* L. (*Sang Shu*)
Pharmaceutical Name: Ramulus Mori
Properties: bitter, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome), tightness and spasms of the limbs:** *Sang Zhi* (Ramulus Mori) dispels wind and dampness, opens peripheral channels and collaterals, and benefits the joints. Clinically, it treats *bi zheng*, muscle aches and pain, and muscle spasms and cramps. It is most effective for *bi zheng* caused by heat, with pain in the upper extremities.

- Wind-heat *bi zheng* of the shoulder and arms: use *Sang Zhi* as a single herb.
- Generalized *bi zheng*: use it with *Fen Fang Ji* (Radix Stephaniae Tetandrae), *Wei Ling Xian* (Radix Clematidis), and *Du Huo* (Radix Angelicae Pubescentis).
- Hemiplegia or post-stroke paralysis: use a large dosage of this herb.

2. Promotes Diuresis and Reduces Swelling

Edema: *Sang Zhi* regulates water circulation to treat edema and dysuria involving painful limbs.

DOSAGE

10 to 30 grams. Unprocessed *Sang Zhi* has a slow and moderate overall action. Frying it with grain-based liquor will enhance its effect to dispel wind and dampness, open channels and collaterals, and relieve pain.

CHEMICAL COMPOSITION

Mulberrin, mulberrochromene, cyclomulberrin, cyclomulberrochromene, morin, dihydromorin, dihydrokaempferol, maclurin.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Sang Zhi* has an inhibiting influence against *Staphylococcus aureus*, *Bacillus dysenteriae*, *Salmonella typhi*, and numerous pathogenic fungi.[2,3]
- **Others:** It has antihypertensive, antineoplastic and spasmolytic effects.[4,5]

CLINICAL STUDIES AND RESEARCH

- **Tendonitis:** In one study, patients with tendonitis of the elbow were treated with herbal formulas. Of 15 patients, there was complete recovery in 10 cases, marked improvement in 4 cases, and no response in 1 case. The patients were instructed to take one dose daily of an herbal formula that contained *Sang Zhi* 20g, *Ji Xue Teng* (Caulis Spatholobi) 30g, *Wei Ling Xian* (Radix Clematidis) 30g, *Dang Gui* (Radicis Angelicae Sinensis) 20g, *Qiang Huo* (Rhizoma et Radix Notopterygii) 15g, *Gui Zhi* (Ramulus Cinnamomi) 15g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Jiang Huang* (Rhizoma Curcumae Longae) 15g, *Fang Feng* (Radix Saposhnikoviae) 15g, and *Xi Xin* (Herba Asari) 5g (post-decocted). Modifications were made if deemed necessary by adding *Huang Qi* (Radix Astragali) 20g for right shoulder pain; *He Shou Wu* (Radix Polygoni Multiflori) 20g for left shoulder pain; *Ru Xiang* (Gummi Olibanum) 15g and *Mo Yao* (Myrrha) 15g for severe pain; *Quan Xie* (Scorpio) 5g and *Jiang Can* (Bombyx Batryticatus) 10g for numbness; *Xu Duan* (Radix Dipsaci) 20g and *Sang Ji Sheng* (Herba Taxilli) 15g for low back pain; and *Chuan Shan Jia* (Squama Manis) 10g and *Wu Shao She* (Zaocys) 15g for a chronic non-healing condition.[6]

AUTHORS' COMMENTS

Sang Zhi, *Gui Zhi* (Ramulus Cinnamomi), *Niu Xi* (Radix Cyathulae seu Achyranthis) and *Mu Gua* (Fructus

Sang Zhi (Ramulus Mori)

Chaenomelis) are commonly used to treat *bi zheng* (painful obstruction syndrome). *Sang Zhi* and *Gui Zhi* are most effective for the upper body; while *Niu Xi* and *Mu Gua* (Fructus Chaenomelis) are most effective for the lower body. *Sang Zhi* is most effective for hot *bi zheng*; while *Gui Zhi* is most effective for cold *bi zheng*. *Mu Gua* treats pain by relieving muscle spasms and cramps; while *Niu Xi* treats pain by tonifying the Liver and Kidney.

Qian Nian Jian (Rhizoma Homalomenae)

千年健

Pinyin Name: *Qian Nian Jian*
Literal Name: "thousand year vitality," "thousand years of health"
Original Source: *Ben Cao Gang Mu Shi Yi* (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765
English Name: homalomena, obscured homalomena rhizome
Botanical Name: *Homalomena occulta* (Lour.) Schott (*Qian Nian Jian*)
Pharmaceutical Name: Rhizoma Homalomenae
Properties: bitter, acrid, warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

Dispels Wind and Dampness, Strengthens Tendons and Bones

***Bi zheng* (painful obstruction syndrome), numbness and tightness of tendons:** Acrid, bitter and warm, *Qian Nian Jian* (Rhizoma Homalomenae) dispels wind and dampness and opens peripheral channels and collaterals. Furthermore, it strengthens tendons and bones to relieve pain deep inside the extremities. It treats both acute and chronic pain, such as coldness and pain of the low back and knee, and numbness and spasms in the lower extremities. *Qian Nian Jian* is most suitable for elderly patients with weakness in the tendons and bones, and numbness and tightness in limbs and joints.

- Muscle and joint pain: use *Qian Nian Jian* with *Luo Shi Teng* (Caulis Trachelospermi), *Hai Feng Teng* (Caulis Piperis Kadsurae), and *Niu Xi* (Radix Cyathulae seu Achyranthis).
- *Bi zheng* in the elderly: use this herb with *Du Huo* (Radix Angelicae Pubescentis), *Wu Jia Pi* (Cortex Acanthopanacis), *Shu Di Huang* (Radix Rehmanniae Preparata), *Xu Duan* (Radix Dipsaci) and other tonic herbs, to remedy deficiencies.

DOSAGE

5 to 10 grams. *Qian Nian Jian* is commonly used as herbal wine, as pills, or in decoction.

OVERDOSAGE

There have been two reported cases of overdose of *Qian Nian Jian*. The adverse reactions reported following ingestion included nausea, vomiting, dizziness, convulsions, unconsciousness, and urinary and bowel incontinence.

Qian Nian Jian (Rhizoma Homalomenae)

Both patients were treated with gastric lavage, followed by ingestion of a *Gan Cao* (Radix Glycyrrhizae) decoction, and recovered shortly thereafter.[1]

CHEMICAL COMPOSITION

α-pinene, β-pinene, limonene, geranial, geraniol, nerol, linalool, β-terpineol, patchouli alcohol, isoborneol, cedrol, 4-cadinene.[2]

PHARMACOLOGICAL EFFECTS

Antibiotic: Essential oil of *Qian Nian Jian* has a mild antibiotic effect *in vitro*.[3]

References

Hai Feng Teng (Caulis Piperis Kadsurae)

海風藤 海风藤

Pinyin Name: *Hai Feng Teng*
Literal Name: "sea wind vine"
Original Source: *Ben Cao Zai Xin* (Renewed Materia Medica)
English Name: kadsura stem, futokadsura stem, kadsura pepper stem
Botanical Name: *Piper futokadsura* Sieb. et Zucc. (*Feng Teng*); *Piper wallichii* (Miq); *Piper kadsura* (choisy) Ohwi
Pharmaceutical Name: Caulis Piperis Kadsurae
Properties: acrid, bitter, slightly warm
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Dispels Wind-Dampness, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome), traumatic injuries:** Acrid, warm and dispersing in nature, *Hai Feng Teng* (Caulis Piperis Kadsurae) treats painful joints, spasms and pain of the lower back and knees. It also alleviates pain from traumatic injury.

- *Bi zheng*: use *Hai Feng Teng* with *Gui Zhi* (Ramulus Cinnamomi), *Qin Jiao* (Radix Gentianae Macrophyllae), *Dang Gui* (Radicis Angelicae Sinensis) and other blood-invigorating herbs.

DOSAGE

5 to 10 grams.

CHEMICAL COMPOSITION

Futoenone, futoamide, futoguinol, α-pinene, β-pinene, limonene.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Hai Feng Teng* is associated with decreased vascular resistance, increased blood perfusion to the coronary artery and peripheral parts of the body, and decreased blood pressure. It shows promise for treatment of coronary artery disease and cerebral thrombosis.[2]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease and angina:** Intravenous infusion of a *Hai Feng Teng* preparation in 250 ml of D10W once daily for 14 days produced good results in treating

Hai Feng Teng (Caulis Piperis Kadsurae)

56 patients with coronary artery disease and angina.[3]

- **Cerebral thrombosis:** Intravenous infusion of a *Hai Feng Teng* preparation in 500 ml of D10W once daily showed an overall 83.9% rate of effectiveness in 87 patients with cerebral thrombosis.[4] In another study, 50 patients with cerebral thrombosis or embolism were treated with *Hai Feng Teng* with an 86.1% rate of effectiveness.[5]

Hai Tong Pi (Cortex Erythrinae)

海桐皮

Pinyin Name: *Hai Tong Pi*
Original Source: *Hai Yao Ben Cao* (Materia Medica of Herbs from [Across the] Seas) by Li Xun in 907-960 A.D.
English Name: erythrina, Oriental variegated coral bean bark, Himalayan coral bean bark
Botanical Name: *Erythrina variegata* L. var. *orientalis* (L.) Merr. (*Ci Tong*)
Pharmaceutical Name: Cortex Erythrinae
Properties: bitter, acrid, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome):** Acrid, bitter, drying and dispersing in nature, *Hai Tong Pi* (Cortex Erythrinae) dispels wind and dampness and opens peripheral channels and collaterals. It treats various musculoskeletal disorders, such as muscle aches and pain, spasms and cramps, and pain in the low back. It has a moderate pain-relieving action, and must be combined with other herbs for full effectiveness.

- Lower body aches and pains with dampness and heat: use *Hai Tong Pi* with *Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- Chronic joint pain due to wind, cold and dampness: use this herb with *Niu Xi* (Radix Cyathulae seu Achyranthis) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- Pain and swelling of the joints: add *Gui Zhi* (Ramulus Cinnamomi).

2. Kills Parasites and Relieves Itching

Used topically, *Hai Tong Pi* kills parasites and relieves itching. It treats itchy skin lesions and infections.

- Itchy skin lesions and infections: use *Hai Tong Pi* with *She Chuang Zi* (Fructus Cnidii) and *Da Huang* (Radix et Rhizoma Rhei). Cook as decoction for use as a topical herbal wash. Or, place the herbs in alcohol and apply the tincture to the affected area.

DOSAGE

6 to 12 grams. *Hai Tong Pi* is commonly used internally as a decoction. It is also used topically by mixing the powdered herb with water and applying the resultant paste to the affected areas.

Hai Tong Pi (Cortex Erythrinae)

CAUTIONS / CONTRAINDICATIONS

- *Hai Tong Pi* should be used with caution in cases of blood deficiency.

CHEMICAL COMPOSITION

Erythraline, amino acids, organic acids.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Hai Tong Pi* inhibits *Staphylococcus aureus*, some pathogenic fungi and dermatophytes.[2]

Xun Gu Feng (Herba Aristolochiae Mollissimae)

尋骨風 寻骨风

Pinyin Name: *Xun Gu Feng*
Literal Name: "wind that searches the bone"
English Name: aristolochia
Botanical Name: *Aristolochia mollissima* Hance
Pharmaceutical Name: Herba Aristolochiae Mollissimae
Properties: acrid, bitter, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Dispels Wind-Dampness, Opens Channels and Collaterals and Relieves Pain

***Bi zheng* (painful obstruction syndrome), traumatic injuries:** Acrid and dispersing in nature, *Xun Gu Feng* (Herba Aristolochiae Mollissimae) treats joint pain, numbness of the limbs, spasms, cramps, and pain associated with traumatic injuries. It is often used with other antirheumatic herbs to enhance the overall function of the formula. It is also used alone in decoction or herbal wine.

Xun Gu Feng is also effective to treat stomach pain and toothache.

DOSAGE

10 to 15 grams.

CHEMICAL COMPOSITION

Aristolochic acid A,D; aristolactone, mollislactone, allantoin, β-sitosterol, 9-ethoxy-aristolactam, 9-ethoxy-aristolactone, neo-aristolactone.[1]

TOXICOLOGY

The LD_{50} for oral administration of *Xun Gu Feng* via decoction in mice is 64.11 g/kg.[2]

Xun Gu Feng contains a trace amount of aristolochic acid. For more information on the toxicology of this compound, please refer to *Guang Fang Ji* (Radix Aristolochiae Fangchi) or *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis).

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 165

Bai Hua She (Bungarus Parvus)

白花蛇 白花蛇

Pinyin Name: *Bai Hua She*
Literal Name: "white flower snake," "white-patterned snake"
Original Source: *Lei Gong Pao Zhi Lun* (Grandfather Lei's Discussions of Herb Preparation) by Lei Xiao in 470 A.D.
English Name: bungarus
Zoological Name: *Bungarus multicinctus* Blyth (*Yin Huan She*)
Pharmaceutical Name: Bungarus Parvus
Properties: sweet, salty, warm
Channels Entered: Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome), numbness and paralysis:** *Bai Hua She* (Bungarus Parvus) has an excellent dispersing function that travels along the skin, enters the internal organs and penetrates to the bone. It dispels wind, opens channels and collaterals, and stops convulsions. Clinical applications include *bi zheng* and post-stroke complications such as deviation of the face, muscle paralysis and hemiplegia. It is best for chronic or stubborn numbness and pain.

- Chronic *bi zheng* with severe spasms, pain, or numbness: use *Bai Hua She* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), and *Qin Jiao* (Radix Gentianae Macrophyllae).
- *Bi zheng* due to wind and dampness: use it with *Tian Ma* (Rhizoma Gastrodiae), *Jing Jie* (Herba Schizonepetae) and *Bo He* (Herba Menthae).
- Post-stroke complications such as muscle paralysis and hemiplegia: combine it with *Quan Xie* (Scorpio), *Tian Ma* (Rhizoma Gastrodiae) and *Dang Gui* (Radicis Angelicae Sinensis).

2. Dispels Wind from the Skin

Bai Hua She dispels wind from the skin to treat dermatological disorders, such as itching, rash, tinea, chronic non-healing ulcers and other skin disorders.

- Itching and rashes: use it with *Dang Gui* (Radicis Angelicae Sinensis), *He Shou Wu* (Radix Polygoni Multiflori) and *Bai Shao* (Radix Paeoniae Alba).

3. Stops Convulsions

Bai Hua She dispels wind from the muscles to relieve muscle cramps and spasms. It also treats seizures, convulsions, acute and chronic childhood convulsions, tetanus, and wind-stroke.

- Tetanus: use *Bai Hua She* with *Wu Shao She* (Zaocys) and *Wu Gong* (Scolopendra).

DOSAGE

3 to 10 grams in decoction, 1.0 to 1.5 grams in powder form. *Bai Hua She* is also used as a medicinal wine. Frying with grain-based liquor will reduce its odor, prevent spoilage, and potentiate its effect to treat *bi zheng* (painful obstruction syndrome).

CAUTIONS / CONTRAINDICATIONS

- Use *Bai Hua She* with caution in patients with yin deficiency or blood dryness, or individuals at risk for endogenous wind rising because of blood deficiency.

CHEMICAL COMPOSITION

Guanoside, α-bungarotoxin, β-bungarotoxin, protein, lipids.[1]

PHARMACOLOGICAL EFFECTS

- **Hematological:** Administration of *Bai Hua She* is associated with antiplatelet and anticoagulant effects.[2]
- **Analgesic:** Administration of *Bai Hua She* is associated with marked analgesic effects in rats. The snake venom at 0.188 mg/kg is approximately three to four times more potent than morphine at 1 mg/kg. In addition, the use of snake venom is not associated with tolerance or dependence, and is effective for pain from many causes, including nerve pain and cancer.[3]

Bai Hua She (Bungarus Parvus)

CLINICAL STUDIES AND RESEARCH

- **Clotting disorders:** *Bai Hua She* has a marked anticoagulant effect and is commonly used to treat patients with various clotting disorders, such as angiitis, arteritis, phlebitis, and Raynaud's disease.[4,5]
- **Coronary artery disorders:** Intravenous infusion of a *Bai Hua She* preparation once daily was beneficial in treating 50 patients with coronary artery disorders.[6]
- **Pain:** Oral administration of a *Bai Hua She* preparation was effective in treating 484 pain patients, with good results and few side effects. Tolerance and dependence were not observed.[7] In another study, intramuscular injection or trigger point injection of a *Bai Hua She* preparation was effective in treating 467 patients with various sources of pain, such as headache, neuropathic pain, or rheumatism. The overall rate of effectiveness was 81.8%.[8]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Bai Hua She* has antiplatelet and anticoagulant effects, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though no examples of this potential interaction have not been documented, this herb may potentiate the effect of drugs such as warfarin. [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).][9]

SUPPLEMENT

- 蕲蛇 / 蘄蛇 *Qi She* (Agkistrodon), *Agkistrodon acutus* (Gunther), is sometimes used as a substitute for *Bai Hua She* (Bungarus Parvus). Both substances have very similar therapeutic effects.

AUTHORS' COMMENTS

Bai Hua She and *Wu Shao She* (Zaocys) are very similar in function and indications. *Bai Hua She* is stronger, but slightly toxic; *Wu Shao She* is weaker, but not toxic.

Wu Shao She (Zaocys)

烏蛸蛇 乌蛸蛇

Pinyin Name: *Wu Shao She*
Literal Name: "black-striped snake"
English Name: zaocys, black snake
Zoological Name: *Zaocys dhumnades* (Cantor) (*Wu Shao She*)
Pharmaceutical Name: Zaocys
Properties: sweet, salty, neutral
Channels Entered: Spleen, Liver

Wu Shao She (Zaocys)

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome):** *Wu Shao She* (Zaocys) has an excellent dispersing action that enters the internal organs and penetrates to the skin. It dispels wind, opens channels and collaterals, and stops convulsions. Clinical applications include *bi zheng*, and post-stroke complications such as deviation of the face, muscle paralysis and hemiplegia.

- *Bi zheng*: use *Wu Shao She* with *Di Long* (Pheretima).

2. Stops Convulsions

Wu Shao She dispels wind from the muscles to relieve cramps and spasms. It treats seizures, convulsions, tetanus, and wind-stroke.

- Convulsions: use it with *Wu Gong* (Scolopendra) and *Quan Xie* (Scorpio).

DOSAGE

5 to 10 grams in decoction, 2 to 3 grams as powder. Frying with grain-based liquor reduces the odor, prevents spoilage, and potentiates its effect to treat *bi zheng* (painful obstruction syndrome).

CHEMICAL COMPOSITION

Lipids, 17 various amino acids.[1]

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory:** Injection of water and alcohol extracts of *Wu Shao She* reduced swelling and inflammation in rats.[2]
- **Analgesic:** Alcohol extract of *Wu Shao She* at 40 mg/kg showed marked analgesic effects in rats.[3]
- **Sedative:** Intraperitoneal injection of *Wu Shao She* was associated with a marked sedative effect in mice. The potency is similar to phenobarbital.[4]
- **Antiseizure:** Intraperitoneal injection of *Wu Shao She* in mice has a similar antiseizure influence to that of phenobarbital.[5]

TOXICOLOGY

The LD_{50} for *Wu Shao She* in mice is 166.2 g/kg for water extract and 20.41 g/kg for alcohol extract. Adverse reactions caused by overdose included muscle stiffness, diminished or absent physical activity, and respiratory depression.[6]

She Tui (Periostracum Serpentis)

蛇蜕

Pinyin Name: *She Tui*
Literal Name: "snake skin slough"
Alternate Chinese Names: *Long Yi*
English Name: sloughed snake skin
Zoological Name: *Elaphe taeniurus* Cope. (*Hei Mei Jin She*); *Elaphe carinata* (Guenther) (*Jin She*)
Pharmaceutical Name: Periostracum Serpentis
Properties: sweet, salty, neutral
Channels Entered: Liver

She Tui (Periostracum Serpentis)

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Stops Spasms

She Tui (Periostracum Serpentis) dispels wind to stop seizures and convulsions in children.

2. Dispels Wind from the Skin

She Tui dispels wind from the skin to relieve itching.

- Itching and rash: use it with *Chan Tui* (Periostracum Cicadae), *Sheng Di Huang* (Radix Rehmanniae) and *Dang Gui* (Radicis Angelicae Sinensis).

3. Benefits the Eyes

She Tui improves vision and treats pterygium or disorders of the cornea.

- Pterygium or disorders of the cornea: combine it with *Chan Tui* (Periostracum Cicadae) and *Bai Ji Li* (Fructus Tribuli).

DOSAGE

2 to 3 grams in decoction, 0.3 to 0.6 gram as powder. Frying *She Tui* with grain-based liquor reduces its odor, prevents spoilage, and potentiates its effect to treat *bi zheng* (painful obstruction syndrome).

CHEMICAL COMPOSITION

Ossein, fatty acids, amino acids.[1]

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory:** Intravenous injection of a *She Tui* preparation is associated with marked reduction of inflammation and swelling. The peak effect is reached approximately 2 hours after the injection. The anti-inflammatory effect of *She Tui* is similar to that of indomethacin. Oral ingestion showed no tendency to reduce inflammation in rats.[2]

References

Xia Tian Wu (Rhizoma Corydalis Decumbentis)

夏天無 夏天无

Pinyin Name: *Xia Tian Wu*
Literal Name: "not in summer"
English Name: decumbent corydalis rhizome
Botanical Name: *Corydalis decumbens* (Thunb.) Pers.
Pharmaceutical Name: Rhizoma Corydalis Decumbentis
Properties: acrid, bitter, warm
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness

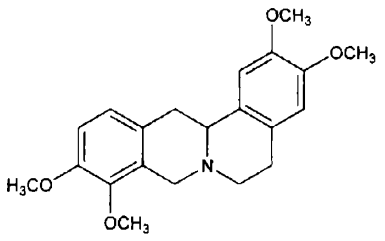
***Bi zheng* (painful obstruction syndrome):** *Xia Tian Wu* (Rhizoma Corydalis Decumbentis) treats joint pain and/or paralysis and numbness. It is used alone or with other herbs that dispel wind-dampness.

2. Invigorates Blood Circulation and Stops Pain

Trauma-related pain, epigastric and abdominal pain: *Xia Tian Wu* strongly relieves pain and invigorates blood. It is used alone or with other herbs that dispel wind-dampness.

DOSAGE

5 to 15 grams. Decrease the dosage when using *Xia Tian Wu* as a powder or in pills.



CAUTIONS / CONTRAINDICATIONS

- Use of *Xia Tian Wu* is sometimes associated with nausea, vomiting and gastrointestinal disturbance.

CHEMICAL COMPOSITION

Tetrahydropalmatine, protopine, bulbocapnine, adlumidine, bicuculline, palmatine, decumbenine, corlumidine, berberine, jatrorrhizine, hydrastinine, corydaline, decumbenine, hydroxyhydrastine.[1,2]

Xia Tian Wu (Rhizoma Corydalis Decumbentis)

Tetrahydropalmatine

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Injection of *Xia Tian Wu* in anesthetized dogs is associated with dilation of blood vessels, decreased vascular resistance, and increased blood perfusion to peripheral parts of the body. The vasodilating effect is not countered by injection of atropine.[3,4]
- **Antiplatelet:** Injection of *Xia Tian Wu* is associated with an inhibitory effect on aggregation of platelets in rats.[5]
- **Analgesic:** Tetrahydropalmatine is present in both *Xia Tian Wu* and *Yan Hu Suo* (Rhizoma Corydalis). For a complete explanation of western therapeutic properties, please refer to the *Yan Hu Suo* monograph.

CLINICAL STUDIES AND RESEARCH

- **Pain management:** Administration of *Xia Tian Wu* is associated with a marked reduction of pain. Greater than 90% effectiveness was reported in 88 patients with wind-damp *bi zheng* (painful obstruction syndrome), 46 patients with acute back injury, and 60 patients with chronic lower back and leg injuries. Routes of administration varied, but included trigger point injection, and administration of suspension or pills.[6,7,8]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Xia Tian Wu* exerts antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though no examples of this potential interaction have been documented, this herb may potentiate the effect of drugs such as warfarin. [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).][9]

TOXICOLOGY

The LD_{50} for *Xia Tian Wu* in mice is 24.04 g/kg via subcutaneous injection, and 7.63 g/kg via intravenous injection.[10]

AUTHORS' COMMENTS

Xia Tian Wu (Rhizoma Corydalis Decumbentis) has long been used as a replacement for *Yan Hu Suo* (Rhizoma Corydalis), since both herbs belong in the same genus and have similar analgesic effects.

Chuan Shan Long (Rhizoma Dioscoreae Nipponicae)

穿山龍 穿山龙

Pinyin Name: *Chuan Shan Long*
Literal Name: "penetrate mountain dragon"
Original Source: *Dong Bei Zhi Wu Zhi* (Northeast Journal of Herbal Medicine)
English Name: dioscorea nipponica
Botanical Name: *Dioscorea nipponica* Makino. (*Chuan Long Shu*)
Pharmaceutical Name: Rhizoma Dioscoreae Nipponicae
Properties: bitter, cool
Channels Entered: Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness, Invigorates Blood and Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome):** *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae) relieves painful joints with numbness and difficulty of movement. It also alleviates the pain of traumatic injuries. It is often used alone or with other herbs that dispel wind-dampness, in grain-based liquor or in decoction.

***Xiong bi* (painful obstruction of the chest):** *Chuan Shan Long* invigorates blood circulation, opens channels and collaterals, and treats *xiong bi* caused by blood stagnation. Clinical applications include coronary artery disease and angina.

2. Relieves Cough and Dissolves Phlegm

Cough and wheezing due to Lung heat: Being cool in thermal property, *Chuan Shan Long* is good for treatment of respiratory disorders manifesting in cough, dyspnea and wheezing caused by heat.

- Cough and wheezing: use it with *Gua Lou Shi* (Fructus Trichosanthis) and *Huang Qin* (Radix Scutellariae).

DOSAGE

10 to 15 grams.

CHEMICAL COMPOSITION

Dioscin, diosgenin.[1]

TOXICOLOGY

No abnormalities in mice were observed following oral administration of *Chuan Shan Long* at 60 to 180 mg/kg for 7 weeks. The maximum dose for oral administration of *Chuan Shan Long* in mice is 15.6 g/kg. The LD_{50} for intravenous injection of a *Chuan Shan Long* preparation is 750 mg/kg in mice.[2]

Lao Guan Cao (Herba Erodii seu Geranii)

老鸛草 老鸛草

Pinyin Name: *Lao Guan Cao*
Literal Name: "old crane herb"
English Name: erodium, geranium, common heron's bill herb, wilford crane's bill herb
Botanical Name: *Erodium stephanianum* Willd.; *Geranium wilfordii* Maxim.
Pharmaceutical Name: Herba Erodii seu Geranii
Properties: acrid, bitter, neutral
Channels Entered: Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness

***Bi zheng* (painful obstruction syndrome):** *Lao Guan Cao* (Herba Erodii seu Geranii) relaxes the tendons and invigorates circulation in the channels and collaterals. It relieves joint pain, numbness of the limbs, soreness and pain of the sinews, difficulty of movement, and trauma-related pain.

- *Bi zheng*: use *Lao Guan Cao* with *Sang Zhi* (Ramulus Mori), *Ji Xue Teng* (Caulis Spatholobi) and *Dang Gui* (Radicis Angelicae Sinensis).

2. Stops Diarrhea

Diarrhea or dysentery caused by damp-heat: *Lao Guan Cao* treats acute or chronic diarrhea or dysentery.

- Diarrhea or dysentery: add *Di Jin Cao* (Herba Euphorbiae Humifusae).

DOSAGE

10 to 30 grams.

CHEMICAL COMPOSITION

Geraniol, geraniin.[1]

TOXICOLOGY

The LD_{50} for oral injection of *Lao Guan Cao* is 99 g/kg in mice.[2]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 443

Shen Jin Cao (Herba Lycopodii)

伸筋草 伸筋草

Pinyin Name: *Shen Jin Cao*
Literal Name: "stretch the tendon herb"
Alternate Chinese Names: *Da Shen Jin, Da Shen Jin Teng*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: lycopodium, common club moss, wolf's claw club moss
Botanical Name: *Lycopodium clavatum* L. (*Shi Song*); *Lycopodium cernnum* L. (*Sheng Jin Cao*); *Smilax nipponica* Miq. (*Da Shen Jin*)
Pharmaceutical Name: Herba Lycopodii
Properties: bitter, acrid, warm
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Dispels Wind and Dampness, Relaxes the Tendons and Sinews, Opens the Channels and Collaterals

***Bi zheng* (painful obstruction syndrome):** *Shen Jin Cao* (Herba Lycopodii) is acrid, warm and dispersing in nature. It treats tightness of the tendons involving difficulty of movement and painful joints. It also treats trauma-related pain.

- *Bi zheng*: use *Shen Jin Cao* with *Tou Gu Cao* (Caulis Impatientis), *Sang Zhi* (Ramulus Mori) and *Wu Jia Pi* (Cortex Acanthopanacis).
- Trauma-related pain: add *Lian Qian Cao* (Herba Glechomae).

DOSAGE

6 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- *Shen Jin Cao* is contraindicated in pregnant women.

CHEMICAL COMPOSITION

Lycopodine, clavatine, clavolonine, fawcettiine, fawcettimine, deacetylfawcettiine, dihydrolycopodine, clavalonine, clavatoxine, nicotine, dehydrolycopodine, vanillic acid, ferulic acid, azelaic acid, oleic acid, and lycopodic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antipyretic:** Administration of both water and alcohol extracts of *Shen Jin Cao* is associated with a reduction of body temperature in rabbits.[2]

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 1071-1072

Xi Xian Cao (Herba Siegesbeckiae)

豨莶草 豨莶草

Pinyin Name: *Xi Xian Cao*
Alternate Chinese Names: *Xi Xian*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: siegesbeckia
Botanical Name: *Siegesbeckia orientalis* L. (*Xi Xian*); *Siegesbeckia pubescens* Mak. (*Xian Geng Xi Xian*); *Siegesbeckia glabrescens* Mak. (*Mao Geng Xi Xian*)
Pharmaceutical Name: Herba Siegesbeckiae
Properties: bitter, cold
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome), numbness, spasms and paralysis:** *Xi Xian Cao* (Herba Siegesbeckiae) benefits the sinews, and dispels wind and dampness, treating *bi zheng* and musculoskeletal disorders. Furthermore, it opens peripheral channels and collaterals, and treats muscle spasms and cramps, muscle weakness and paralysis. This herb is often processed with grain-based liquor or made into honey pills to reduce side effects that may occur due to its cold and bitter nature.

- *Bi zheng*: use *Xi Xian Cao* with *Wei Ling Xian* (Radix Clematidis).

2. Clears Heat and Eliminates Toxins

Xi Xian Cao clears heat and toxins from the skin to treat various dermatological disorders caused by wind, damp and heat, such as sores, itching and rashes. Historically, *Xi Xian* Cao is also used to treat jaundice and malaria.

- Dermatological disorders: use *Xi Xian Cao* internally or topically.

3. Lowers Blood Pressure

Hypertension: *Xi Xian Cao* is now being used to treat hypertension due to heat.

- Hypertension: combine with *Chou Wu Tong* (Folium Clerodendri Trichotomi).

DOSAGE

10 to 15 grams. *Xi Xian Cao* processed with grain-based liquor is stronger for treatment of *bi zheng* (painful obstruction syndrome). The fresh herb more effectively clears heat and eliminates toxins.

CAUTIONS / CONTRAINDICATIONS

- *Xi Xian Cao* should be used with extreme caution in pregnant women and in children, as it may suppress normal development.[1]

CHEMICAL COMPOSITION

Darutoside, darutigenol, neodarutoside.[2]

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory:** Oral administration of a preparation of *Xi Xian Cao* for 10 days effectively reduced swelling in the legs of rats.[3]
- **Antihypertensive:** Water and alcohol extracts of *Xi Xian Cao* dilated the blood vessels and reduced blood pressure in cats and rabbits. The duration of action is approximately 1.5 hours.[4]
- **Immunosuppressive:** Administration of *Xi Xian Cao* is associated with an inhibitory effect on the immune system in mice. Daily administration of the decoction reduced both cellular and humoral immunities.[5]
- **Antibiotic:** It has an inhibitory effect against *Staphylococcus aureus*, *E. coli*, *Pseudomonas aeruginosa*, *Bacillus dysenteriae*, *Salmonella typhi*, and *Staphylococcus albus*.[6]

CLINICAL STUDIES AND RESEARCH

- ***Bi zheng* (painful obstruction syndrome):** Good results were reported when 100 grams of *Xi Xian Cao* and 30 grams of *Dang Gui* (Radicis Angelicae Sinensis) were used to treat *bi zheng* and other musculoskeletal disorders caused by wind-damp.[7]

TOXICOLOGY

The LD_{50} for intravenous injection of *Xi Xian Cao* in mice is equivalent to 45.54 g/kg of dried herb. Via

intraperitoneal injection, mice can tolerate up to 400 times the normal adult dose.[8]

Chou Wu Tong (Folium Clerodendri Trichotomi)

臭梧桐

Pinyin Name: *Chou Wu Tong*
Literal Name: "stinky Chinese parasol tree"
Alternate Chinese Names: *Ba Jiao Wu Tong, Ai Tong Zi*
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: glory bower leaves, harlequin glorybower leaves, hairy clerodendron
Botanical Name: *Clerodendron trichotomum* Thunb.
Pharmaceutical Name: Folium Clerodendri Trichotomi
Properties: acrid, bitter, sweet, cool
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Damp

***Bi zheng* (painful obstruction syndrome):** *Chou Wu Tong* (Folium Clerodendri Trichotomi) treats musculoskeletal pain, numbness of the extremities, paralysis and hemiplegia. *Chou Wu Tong*, when used topically as a wash or soak, effectively treats eczema and itching of the skin.

- *Bi zheng*: use *Chou Wu Tong* with *Xi Xian Cao* (Herba Siegesbeckiae).

2. Lowers Blood Pressure

Hypertension: *Chou Wu Tong* lowers blood pressure to treat hypertension. This herb is most effective if the leaves are harvested before the flowers bloom. *Chou Wu Tong* should not be cooked at a high temperature or for a prolonged period of time, as processing with heat makes the herb less effective.

- Hypertension: combine with *Xi Xian Cao* (Herba Siegesbeckiae).

DOSAGE

5 to 15 grams. Fresh *Chou Wu Tong* harvested before the flowers bloom is most effective for treatment of hypertension.

CHEMICAL COMPOSITION

Clerodendtin, meso-inositol, clerodendronin A, B.[1]

PHARMACOLOGICAL EFFECTS

- *Chou Wu Tong* has been shown to have antihypertensive, sedative and analgesic effects.[2]

CLINICAL STUDIES AND RESEARCH

- **Malaria:** In one study, 226 patients were treated with a

Chou Wu Tong (Folium Clerodendri Trichotomi)

preparation of *Chou Wu Tong*, with good results.[3]

- **Hypertension:** A preparation of *Chou Wu Tong* given three to four times daily had an 81.87% rate of effectiveness in treating 171 patients with hypertension.[4]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 457
2. *Zhong Yao Xue* (Chinese Herbology), 1998; 290:291

Huang Jin Gui (Caulis Vanieriae)

黄金桂

Pinyin Name: *Huang Jin Gui*
Alternate Chinese Names: *Ci Ge Zi*, *Xiang Gang Zhe Shu*
English Name: vanieria
Botanical Name: *Vanieria gerontogea* Sieb. et Zucc.
Pharmaceutical Name: Caulis Vanieriae
Properties: bland, cool
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

Relieves Pain

Huang Jin Gui (Caulis Vanieriae) dispels wind, invigorates blood circulation, opens channels and collaterals, clears heat, eliminates toxins, reduces swelling and relieves pain.

- Trauma-related pain: use *Huang Jin Gui* with *Wan Dian Jin* (Radix Ilicis Asprellae), *Zou Ma Tai* (Rhizoma Ardisiae), *Du Zhong* (Cortex Eucommiae), *Chuan Niu Xi* (Radix Cyathulae) and *Wang Bu Liu Xing* (Semen Vaccariae).
- *Bi zheng* (painful obstruction syndrome), rheumatoid arthritis: use this herb with *Rou Cong Rong* (Herba Cistanches), *Chuan Niu Xi* (Radix Cyathulae), and *Xu Duan* (Radix Dipsaci).
- Neuralgia: combine it with *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae) and *Jin Bu Huan* (Herba Lycopodii Serrati).

DOSAGE

5 to 30 grams in decoction.

Liu Zhi Huang (Herba Solidaginis)

柳枝癀

Pinyin Name: *Liu Zhi Huang*
Alternate Chinese Names: *Yi Zhi Huang Hua*, *Ye Huang Ju*
English Name: solidago
Botanical Name: *Solidago virga-aurea* L. var. *leiocapa* (Benth.) A. Gray.
Pharmaceutical Name: Herba Solidaginis
Properties: bitter, sweet, cold
Channels Entered: Lung, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Relieves Pain, Reduces Inflammation, and Opens Channels and Collaterals

Liu Zhi Huang (Herba Solidaginis) effectively opens channels and collaterals to relieve pain and reduce inflammation.

- Trauma-related pain or tightness of tendons: use *Liu Zhi Huang* with *Mo Gu Xiao* (Caulis Hyptis Capitatae), *Huang Jin Gui* (Caulis Vanieriae), *Yi Tiao Gen* (Radix Moghaniae), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Mu Gua* (Fructus Chaenomelis) and *Bai Shao* (Radix Paeoniae Alba).

2. Reduces Swelling and Eliminates Toxins

- Jaundice: use *Liu Zhi Huang* with *Shui Ding Xiang* (Herba Ludwigiae Prostratae), *Zhi Zi* (Fructus Gardeniae), *Da Huang* (Radix et Rhizoma Rhei) and *Yin Chen Hao* (Herba Artemisiae Scopariae).
- Influenza, sore throat, tonsillitis: use this herb with *Yi Zhi Xiang* (Herba Vernoniae Cinereae) and *Ban Lan Gen* (Radix Isatidis).
- Tinea unguium, athlete's foot: apply *Liu Zhi Huang* topically.

DOSAGE

3 to 12 grams.

CHEMICAL COMPOSITION

Essential oil, saponins, flavones, rutin.

AUTHORS' COMMENTS

According to Dr. Chang Wei-Yen, *Liu Zhi Huang*, *Huang Jin Gui* (Caulis Vanieriae) and *Mo Gu Xiao* (Caulis Hyptis Capitatae) should always be used together for synergistic action to reduce inflammation and relieve pain of the spine.

Yi Tiao Gen (Radix Moghaniae)

一條根 一条根

Pinyin Name: *Yi Tiao Gen*
Alternate Chinese Names: *Qian Jin Ba, Chou Kong Zai*
English Name: moghania
Botanical Name: *Moghania lineate* (L.) O. Kuntze
Pharmaceutical Name: Radix Moghaniae
Properties: acrid, warm
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

Dispels Wind and Dampness, Opens Channels and Collaterals

***Bi zheng* (painful obstruction syndrome):** *Yi Tiao Gen* (Radix Moghaniae) enters the channels and collaterals to treat musculoskeletal pain, stiffness and soreness.

- *Bi zheng*, tendon and bone pain: use *Yi Tiao Gen* with *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae), *Huang Jin Gui* (Caulis Vanieriae) and *Niu Xi* (Radix Cyathulae seu Achyranthis).
- Sore legs from Liver and Kidney yin deficiencies: use this herb with *Chun Gen Pi* (Cortex Ailanthi), *Xu Duan* (Radix Dipsaci), *Gui Zhi* (Ramulus Cinnamomi), *Mu Gua* (Fructus Chaenomelis), *Du Huo* (Radix Angelicae Pubescentis), *Sang Ji Sheng* (Herba Taxilli) and *Du Zhong* (Cortex Eucommiae).
- Fractured bones: combine *Yi Tiao Gen* with *Xu Duan* (Radix Dipsaci), *Du Zhong* (Cortex Eucommiae) and *Zi Ran Tong* (Pyritum) to help with healing of bones.
- Sciatica: use it with *Xi Xian Cao* (Herba Siegesbeckiae), *Po Bu Zi Ye* (Folium Cordia Dichotoma), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

DOSAGE

3 to 12 grams.

CAUTIONS / CONTRAINDICATIONS

- Use with caution in patients who have weak digestive systems.

Section 3

—Wind-Damp Dispelling and Tendon- and Bone-Strengthening Herbs

Sang Ji Sheng (Herba Taxilli)

桑寄生

Pinyin Name: *Sang Ji Sheng*
Literal Name: "mulberry parasite," "mulberry parasitic herb"
Alternate Chinese Names: *Guang Ji Sheng, Bei Ji Sheng, Liu Ji Sheng*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: taxillus, Chinese taxillus
Botanical Name: *Taxillus chinensis* (DC.) Danser
Pharmaceutical Name: Herba Taxilli
Properties: bitter, neutral
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney, Strengthens Sinews and Bones, Dispels Wind-Dampness

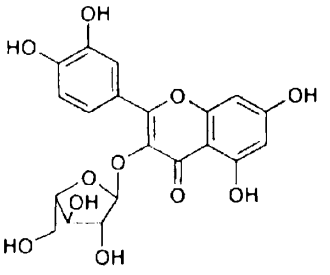
***Bi zheng* (painful obstruction syndrome), soreness and weakness of the lower back and knees:** The Liver governs the tendons, and the Kidney governs the bones. Yin deficiency in these two organs will lead to chronic *bi zheng* with accumulation of wind-damp. *Sang Ji Sheng* (Herba Taxilli) is essential in treating elderly patients or yin-deficient patients with chronic lower back and knee weakness, soreness and pain. Other symptoms include tightness and weakness of sinews and tendons, joint pain, and in severe cases, atrophy of bones and tendons.

- Lower back and knee soreness and weakness: combine *Sang Ji Sheng* with *Du Zhong* (Cortex Eucommiae), *Du Huo* (Radix Angelicae Pubescentis) and *Chuan Niu Xi* (Radix Cyathulae). **Exemplar Formula:** *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction).

2. Calms the Fetus

Restless fetus: *Sang Ji Sheng*, with its tonic nature, is used for restless fetus associated with yin and blood deficiencies. Other symptoms may include bleeding and back pain.

- Restless fetus, back pain due to yin and blood deficiencies: combine *Sang Ji Sheng* with *Xu Duan* (Radix Dipsaci), *Dang Gui* (Radicis Angelicae Sinensis) and *Du Zhong* (Cortex Eucommiae).
- Bleeding after miscarriage: use this herb with *E Jiao* (Colla Corii Asini) and charred *Ai Ye* (Folium Artemisiae Argyi) to stop bleeding.



DOSAGE

10 to 20 grams.

CHEMICAL COMPOSITION

Quercetin, avicullarin, coriamyrtin, tutin, coratin, d-catechin, quercitrin, hyperin, hyperoside.[1,2]

Sang Ji Sheng (Herba Taxilli)

Avicullarin

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Both water and alcohol extracts of *Sang Ji Sheng* used in anesthetized dogs have been shown to lower blood pressure, dilate the coronary artery, and increase perfusion to cardiac muscles.[3]
- **Anticoagulant:** *Sang Ji Sheng* has been shown to inhibit platelet aggregation and prevent the formation of emboli.[4]
- **CNS suppressant:** Preparations of *Sang Ji Sheng* have been shown to exert an inhibitory influence on the central nervous system (CNS).[5]
- **Diuretic:** Avicullarin, given orally or via intravenous injection, has demonstrated a marked diuretic effect in anesthetized dogs.[6]
- **Antiviral:** *Sang Ji Sheng* has demonstrated an inhibitory effect against many ECHO 6.9, coxsackie A9, B4, and B5 viruses.[7]

CLINICAL STUDIES AND RESEARCH

- **Myocardial infarction:** In one study, 180 patients with myocardial infarction were treated with intravenous injection of a *Sang Ji Sheng* preparation. One ml of *Sang Ji Sheng* injectable was equivalent to 2 grams of fresh herb. The intravenous solution was prepared by mixing 12 ml of *Sang Ji Sheng* in injectable form with 20 ml of 25% glucose solution; or by mixing 18 ml of injectable *Sang Ji Sheng* with 250 ml of a 5% glucose solution. The intravenous solution was administered once daily for 14 days with improvement noted in 82.8% of the subjects.[8]
- **Myocardial infarction:** According to one report, 54 patients with past histories of myocardial infarction were treated with *Sang Ji Sheng* tea (using 40 grams of herb per dose) twice daily for 6 weeks. Improvement was noted in 76% of subjects.[9]
- **Chronic tracheitis:** In one study, 200 patients with chronic tracheitis were treated with an herbal decoction, with 42 patients reporting marked improvement and 69 experiencing moderate improvement. The herbal formula was prepared by cooking 9 grams of *Sang Ji Sheng*, and 4.5 grams of *Chen Pi* (Pericarpium Citri Reticulatae) in 200 ml of water.[10]
- **Poliomyelitis:** Intramuscular injections of an herbal preparation (equal parts of *Sang Ji Sheng* and *Yin Yang Huo* (Herba Epimedii)) were given to poliomyelitis patients with promising results.[11]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** Since *Sang Ji Sheng* has been shown to inhibit aggregation of platelets, it should be used with caution in patients who take anticoagulant or antiplatelet medications.[12] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]
- **Diuretics:** *Sang Ji Sheng* has a diuretic effect. Though no examples of adverse interaction have been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[13] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of avicullarin in mice is 1.17 g/kg. The cause of fatality included seizures and respiratory depression.[14]

AUTHORS' COMMENTS

Taxillus chinensis is the standard name and official source for *Sang Ji Sheng*.[15] The previous names, such as *Loranthus parasiticus, Loranthus yadorik*, and *Viscum coloratum*, are no longer used.

Other traditional texts have reported *Sang Ji Sheng* to be able to treat disorders such as hair loss, looseness of teeth and insufficient breast milk.

Sang Ji Sheng and *Wu Jia Pi* (Cortex Acanthopanacis) both tonify the Liver and the Kidney to treat *bi zheng* (painful obstruction syndrome). They differ in that *Sang Ji Sheng* also calms a restless fetus, while *Wu Jia Pi* is a diuretic that treats edema.

Sang Ji Sheng and *Du Zhong* (Cortex Eucommiae) both treat low back pain. However, *Sang Ji Sheng* dispels wind-damp and tonifies blood to treat pain. *Du Zhong* tonifies qi and strengthens soft tissues to relieve pain. Their differences are complimentary, thus, they are often used as a pair.

Wu Jia Pi (Cortex Acanthopanacis)

五加皮

Pinyin Name: *Wu Jia Pi*
Literal Name: "five plus bark," "bark of five additions"
Alternate Chinese Names: *Nan Wu Jia Pi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: acanthopanax, acanthopanax root bark, slender style acanthopanax root bark
Botanical Name: *Acanthopanax gracilistylus* W.W. Smith (*Xi Zhu Wu Jia*); substitutes include *Acanthopanax sessiliforus* (*Duan Geng Wu Jia; Wu Geng Wu Jia*); *Acanthopanax henryi* (*Zao Ye Wu Jia*); *Acanthopanax giraldii* (*Hong Mao Wu Jia*); *Acanthopanax leucorrhizus* (*Teng Wu Jia*); and *Acanthopanax setchuenensis* (*Shu Wu Jia*). Acanthopanax is also referred to as Eleutherococcus in literature.
Pharmaceutical Name: Cortex Acanthopanacis
Properties: acrid, bitter, warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind and Dampness, Strengthens Bones and Tendons

***Bi zheng* (painful obstruction syndrome), weakness and soreness of the back and knees:** *Wu Jia Pi* (Cortex Acanthopanacis) dispels wind and dampness to relieve muscle aches and pain. It also tonifies the Kidney and Liver to strengthen bones and tendons. Clinical applications include *bi zheng* due to wind, cold or dampness, muscle spasms and cramps due to excess or deficient conditions, and weakness of the low back and knees due to Liver and Kidney deficiencies. It is especially useful for elderly patients who have muscular atrophy, or for children who have delayed development of motor functions. For daily intake, this herb is commonly used alone, as an herbal wine.

- *Bi zheng* due to wind, cold or dampness: use *Wu Jia Pi* with *Mu Gua* (Fructus Chaenomelis) and *Chuan Niu Xi* (Radix Cyathulae).
- Traumatic injuries with bruises or broken bones: use it with *Zi Ran Tong* (Pyritum), *Di Bie Chong* (Eupolyphaga) and *Ru Xiang* (Gummi Olibanum).
- Delayed motor development in children: combine this herb with *Mu Gua* (Fructus Chaenomelis), *Chuan Niu Xi* (Radix Cyathulae), *Sang Ji Sheng* (Herba Taxilli), and *Xu Duan* (Radix Dipsaci).

Wu Jia Pi (Cortex Acanthopanacis)

2. Dispels Water Retention

Edema: *Wu Jia Pi* regulates water circulation to treat edema and dysuria.

- Edema: add *Fu Ling Pi* (Cortex Poria), *Da Fu Pi* (Pericarpium Arecae), and *Sheng Jiang Pi* (Pericarpium Zingiberis Recens) to this herb. **Exemplar Formula:** *Wu Pi Yin* (Five-Peel Decoction).

DOSAGE

5 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Wu Jia Pi* may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Palmitic acid, linolenic acid, tannin, vitamin A, vitamin B.[1]

PHARMACOLOGICAL EFFECTS

- **Adaptogenic:** Administration of *Wu Jia Pi* is associated with a marked adaptogenic effect. In mice that were given the herb daily for 9 days, there was a significant increase in swimming endurance compared to the performance of the placebo group that did not receive any herbs.[2]
- **Immunostimulant:** Administration of *Wu Jia Pi* has shown marked effectiveness in enhancing the immune system. Therapeutic benefits include elevated white blood cell count, increased phagocytic activity, and increased production of interferon.[3]
- **Sedative:** Administration of *Wu Jia Pi* to mice is associated with only mild sedative effects. However, it potentiates the sedative effect of barbiturates and leads to prolonged sleeping time.[4]
- **Anti-inflammatory and analgesic:** Intraperitoneal injection of *Wu Jia Pi* has marked anti-inflammatory and analgesic effects in rats. In another study, oral administration of alcohol extract of *Wu Jia Pi* reduced pain and swelling for up to five hours, with peak effect at hours two and three.[5,6]
- **Vasodilative:** *Wu Jia Pi* dilates blood vessels to increase blood perfusion to the coronary artery and thus decrease blood pressure.[7]
- **Others:** *Wu Jia Pi* also has antitussive, expectorant, anti-asthmatic and antineoplastic properties.[8]

CLINICAL STUDIES AND RESEARCH

- **Leukopenia:** Two separate clinical trials have shown administration of *Wu Jia Pi* to be effective in treating patients with leukopenia.[9,10]
- **Cerebral thrombosis:** The combination of oral decoction and intravenous infusion of *Wu Jia Pi* once daily was beneficial in treating 20 patients with cerebral thrombosis.[11]
- **Hypotension:** A preparation of *Wu Jia Pi* given three times daily for 20 days was beneficial in treatment of hypotension.[12]

HERB-DRUG INTERACTION

- **Sedatives:** *Wu Jia Pi* has a mild sedative effect, and potentiates the sedative effect of barbiturates.[13] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

No fatalities were reported following oral administration of *Wu Jia Pi* at 480 g/kg/day for 3 days in mice.[14]

SUPPLEMENT

- 北五加皮 *Bei Wu Jia Pi* (Cortex Periploca Sepium Radicis), *Periploca sepium* Bge., is sometimes incorrectly used as a substitute for *Wu Jia Pi* (Cortex Acanthopanacis), as both have a similar appearance and smell. These two herbs are completely different in function and should not be used interchangeably. *Bei Wu Jia Pi*, literally meaning '*Wu Jia Pi* from the north,' grows in the northern regions of China. *Bei Wu Jia Pi* has cardiotonic and diuretic functions; it is also toxic, and its use requires only a small dosage. *Wu Jia Pi*, also known as *Nan Wu Jia Pi*, literally meaning '*Wu Jia Pi* from the south,' grows in southern parts of China.

AUTHORS' COMMENTS

Wu Jia Pi and *Sang Ji Sheng* (Herba Taxilli) both tonify the Liver and Kidney to treat *bi zheng* (painful obstruction syndrome). They differ in that *Wu Jia Pi* is also a diuretic that treats edema, whereas *Sang Ji Sheng* can calm a restless fetus.

Hu Gu (Os Tigris)

虎骨 虎骨

Pinyin Name: *Hu Gu*
Literal Name: "tiger bone"
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: tiger bone
Zoological Name: *Pathera tigris* L. (*Hu*)
Pharmaceutical Name: Os Tigris
Properties: acrid, warm
Channels Entered: Liver, Kidney
International Status: CITES I

CHINESE THERAPEUTIC ACTIONS

Dispels Wind, Relieves Pain, Strengthens Sinews and Bones

***Bi zheng* (painful obstruction syndrome), weakness and soreness of the back and knees:** Dispersing, warming and tonifying in nature, *Hu Gu* (Os Tigris) was historically used to open channels and collaterals, tonify the Liver and Kidney, strengthen the sinews and bones, and stop pain. It best treated migratory pain, spasms and cramps caused by deficiencies of the Liver and Kidney. *Hu Gu* was the substance of choice when treating weakness and soreness of the lower back and knees, and for cold pain in the bones.

- *Bi zheng*, weakness and soreness of the back and knees: *Hu Gu* was used alone as a medicinal wine, or with *Mu Gua* (Fructus Chaenomelis), *Niu Xi* (Radix Cyathulae seu Achyranthis) and *Wu Jia Pi* (Cortex Acanthopanacis).

DOSAGE

3 to 6 grams. *Hu Gu* was used as powder, pills or herbal tincture. Unprocessed *Hu Gu* is hard, and has a distinct odor. It was necessary to dry-fry *Hu Gu* or fry it with sesame oil to eliminate the odor and facilitate extraction of the active constituents. Preparation of the substance was done at a moderate temperature: processing at high temperatures or under high pressure reduces the effectiveness of the resultant substance.

CHEMICAL COMPOSITION

Calcium, protein, amino acids.[1]

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory:** Administrating *Hu Gu* or *Gou Gu* (Os Canitis) in powdered form showed marked effectiveness to stop inflammation and reduce permeability of the capillaries. The mechanism of its anti-inflammatory effect is attributed to stimulation of the endocrine system and increased production of hormones by the adrenal glands.[2]
- **Sedative and analgesic:** Both *Hu Gu* and *Gou Gu* (Os Canitis) have shown sedative and analgesic effects in rats.[3]

SUPPLEMENT

- 豬骨 / 猪骨 *Zhu Gu* (Os Porcus) – bones from pigs, and 狗骨 / 狗骨 *Gou Gu* (Os Canitis) – bones from dogs, are generally used today as a replacement for *Hu Gu*. They have similar functions to *Hu Gu*, but are not as strong.

AUTHORS' COMMENTS

Hu Gu is listed in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Trade in *Hu Gu* is strictly prohibited. The discussion of *Hu Gu* in this text is included only to offer 1) the accurate history of its critically important usage in traditional herbal medicine, and 2) models for appropriate usage of effective substitute substances (see Supplement). The information should not be interpreted as condoning illegal use of this endangered species. For more information, please refer to Appendix 10.

Lu Han Cao (Herba Pyrolae)

鹿含草 鹿含草

Pinyin Name: *Lu Han Cao*
Alternate Chinese Names: *Lu Xian Cao, Lu Shou Cha*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: pyrola
Botanical Name: *Pyrola rotundifolia L. (Lu Ti Cao); Pyrola calliantha (Lu Ti Cao); Pyrola decorata (Pu Tong Lu Ti Cao)*
Pharmaceutical Name: Herba Pyrolae
Properties: sweet, bitter, warm
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Dampness, Strengthens Tendons and Bones

***Bi zheng* (painful obstruction syndrome):** *Lu Han Cao* (Herba Pyrolae) dispels wind-dampness and tonifies the Liver and Kidney. It treats *bi zheng* with low back pain and degeneration of the tendons and bones, caused by Kidney and Liver deficiencies. It alleviates weakness and soreness of the joints accompanied by cold sensations. It is also used for bone spurs.

- Soreness, weakness and coldness of the lower back and knees: use *Lu Han Cao* with *Du Zhong* (Cortex Eucommiae), *Niu Xi* (Radix Cyathulae seu Achyranthis) and *Tu Si Zi* (Semen Cuscutae).
- Bone spurs: combine it with *Po Bu Zi Ye* (Folium Cordia Dichotoma), *Yin Yang Huo* (Herba Epimedii), *Gu Sui Bu* (Rhizoma Drynariae) and *Ji Xue Teng* (Caulis Spatholobi).

2. Tonifies Lung and Kidney

Chronic cough, asthma due to Kidney deficiency: *Lu Han Cao* has a mild effect to moisten the Lung. It is best for chronic respiratory disorders such as dry, feeble cough, or asthma from Kidney deficiency.

3. Stops Bleeding

Bleeding: When combined with other hemostatic herbs, *Lu Han Cao* treats epistaxis, hematemesis, hypermenorrhea and abnormal uterine bleeding. Crush the fresh form of this herb into a paste to be applied topically, to stop local bleeding due to traumatic injuries.

4. Nourishes the Heart and Stops Perspiration

Lu Han Cao stops palpitations and night sweating associated with yin deficiency.

DOSAGE

10 to 30 grams in decoction, pills or powder.

CHEMICAL COMPOSITION

Arbutin, chimaphillin, einulsin.[1]

HERB-DRUG INTERACTION

- **Aminoglycosides**: In one study, compound injection of *Lu Han Cao* and *Huang Qi* (Radix Astragali) in guinea pigs was found to be effective in preventing the ototoxicity and nephrotoxicity associated with use of aminoglycosides.[2] [Note: Examples of aminoglycosides include gentamicin, tobramycin, amikacin.]

TOXICOLOGY

The LD_{50} for intravenous injection of *Lu Han Cao* is 9.73/kg in mice. No abnormalities were observed in mice following oral administration of *Lu Han Cao* at 60 g/kg for one week.[3]

Shí Nan Teng (Ramulus Piper)

石南藤 石南藤

Pinyin Name: *Shi Nan Teng*
Alternate Chinese Names: *Nan Teng, Ding Gong Teng*
English Name: piper vine
Botanical Name: *Piper wallichii* Hand.-Mazz. var. *hupehense* Hang.-Mazz.; *Piper aurantiacum* Wall.ex C.DC.; *Piper puberulum* (Benth.) Maxim.
Pharmaceutical Name: Ramulus Piper
Properties: acrid, warm
Channels Entered: Liver, Lung, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind-Cold Invasion, Strengthens the Back and Legs

- *Bi zheng* (painful obstruction syndrome) due to wind-cold, weak legs: use *Shi Nan Teng* (Ramulus Piper) with *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae), *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci) and *Du Huo* (Radix Angelicae Pubescentis).

2. Arrests Cough

- Cough with dyspnea due to wind-cold: combine *Shi Nan Teng* with *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction).

DOSAGE

6 to 20 grams.

CAUTIONS / CONTRAINDICATIONS

- Use *Shi Nan Teng* with caution in patients with deficiency and cold of the Spleen and Stomach.

Zou Ma Tai (Rhizoma Ardisiae)

走馬胎 走马胎

Pinyin Name: *Zou Ma Tai*
Alternate Chinese Names: *Ma Tai, Shuang Ma Tai*
English Name: ardisia root, giant leaf ardisia rhizome
Botanical Name: *Ardisia gigantifolia* Stapf.
Pharmaceutical Name: Rhizoma Ardisiae
Properties: acrid, neutral
Channels Entered: Lung, Stomach, Spleen, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind

Exterior condition: *Zou Ma Tai* (Rhizoma Ardisiae) treats wind-heat or wind-cold invasions. It is also commonly used for exterior invasion in postpartum patients.

- Wind-heat: use *Zou Ma Tai* with *Da Qing Ye* (Folium Isatidis).
- Wind-cold: use this herb with *Gui Zhi* (Ramulus Cinnamomi).

2. Generates Flesh, Strengthens Bones and Tendons

- Arthritis or numbness and pain in the extremities in the elderly: use this herb with *Qian Nian Jian* (Rhizoma Homalomenae), and *Ji Xiang Teng* (Caulis Paederiae).

3. Strengthens the Stomach and Regulates the Digestive Track

- Dysentery: add *Feng Wei Cao* (Herba Pteris).

DOSAGE

3 to 12 grams.

AUTHORS' COMMENTS

Zou Ma Tai, used externally, treats toxic swellings.

Chapter 4 summary

— Wind-Damp Dispelling Herbs

SECTION 1: WIND-DAMP DISPELLING AND PAIN-RELIEVING HERBS

Name	Similarities	Differences
Du Huo (Radix Angelicae Pubescentis)	Dispel wind-dampness, alleviate pain	Mostly addresses lower body pain
Wei Ling Xian (Radix Clematidis)		Treats fish bones obstructing the throat
Fen Fang Ji (Radix Stephaniae Tetandrae)		Promotes diuresis and reduces swelling
Xu Chang Qing (Radix Cynanchi Paniculati)		Treats traumatic injuries, relieves itching and toxic snake bites
Can Sha (Excrementum Bombycis Mori)		Harmonizes Stomach, disperses turbidity to treat vomiting, relieves itching and eczema when used externally
Song Jie (Lignum Pini Nodi)		Relieves pain associated with *bi zheng* (painful obstruction syndrome) and trauma
Qi Ye Lian (Radix Schefflerae)		Relieves pain associated with *bi zheng* (painful obstruction syndrome) and trauma
Lei Gong Teng (Radix Tripterygii Wilfordii)		Toxic, kills parasites and treats snake bites
Qin Jiao (Radix Gentianae Macrophyllae)		Clears deficiency heat and relieves jaundice
Hong Gu She (Radix Kadsura Japonicae)		Cools blood, reduces inflammation and pain, relieves spasms and cramps
Tou Gu Cao (Caulis Impatientis)		Invigorates blood circulation, dispels blood stagnation
Yi Wu Gen (Radix Elaeagni)		Reduces swelling and eliminates stagnation
Hai Fu Rong (Herba Limonium Wrightii)		Lowers blood pressure
Qing Feng Teng (Caulis Sinomenii)		Reduces swelling and pain
Ma An Teng (Herba Ipomoea Pes-caprae)		Reduces carbuncles and disperses nodules

General Characteristics of Wind-Damp Dispelling and Pain-Relieving Herbs:

Taste: acrid, bitter
Thermal property: varies
Channels entered: Kidney, Liver
Therapeutic actions: disperse wind, cold, and damp; and relieve pain

These herbs dispel wind, cold and damp to treat muscle aches and pains, spasms and cramps, and weakness and pain of the lower back and knees.

Du Huo (Radix Angelicae Pubescentis) is most suitable for back pain due to excess-type wind-damp invasion with coldness. In addition, it has a strong effect to relieve pain and release the exterior. *Du Huo*, however, does not have a tonic effect, and is therefore not suitable by itself for patients who are weak or deficient. *Du Huo* is combined with *Sang Ji Sheng* (Herba Taxilli) to treat chronic back pain due to deficiency.

Wei Ling Xian (Radix Clematidis), extremely penetrating in nature, opens channels and collaterals, and treats fish bones lodged in the throat.

Fen Fang Ji (Radix Stephaniae Tetandrae), in addition to having an antirheumatic effect, promotes diuresis and reduces swelling. Cold in thermal property, it relieves pain, regulates water circulation, and relieves edema.

Chapter 4 summary

Xu Chang Qing (Radix Cynanchi Paniculati) dispels wind and relieves pain. In addition to alleviating arthritis pain, it treats trauma-related pain, epigastric and abdominal pain and toothache. It relieves the itching of various dermatological disorders and detoxifies snake bites.

Can Sha (Excrementum Bombycis Mori) treats vomiting, diarrhea and cramps, dispels dampness and relieves itching.

Song Jie (Lignum Pini Nodi) and ***Qi Ye Lian*** (Radix Schefflerae) dispel wind-damp, relieves pain, and most suitable for *bi zheng* (painful obstruction syndrome) and traumatic injuries.

Lei Gong Teng (Radix Tripterygii Wilfordii) strongly dispels wind-dampness, relieves pain, and treats arthritis. However, it is toxic and should be used with caution.

Qin Jiao (Radix Gentianae Macrophyllae) dispels wind-dampness and clears deficiency heat to relieve jaundice, lowers blood pressure and soothes itching.

Hong Gu She (Radix Kadsura Japonicae) relieves spasms and cramps to reduce inflammation and pain.

Tou Gu Cao (Caulis Impatientis) invigorates blood circulation, dispels blood stagnation, and is especially effective for pain associated with blood stagnation.

Yi Wu Gen (Radix Elaeagni) relieves pain accompanied by swelling and inflammation.

Hai Fu Rong (Herba Limonium Wrightii) and ***Qing Feng Teng*** (Caulis Sinomenii) have a generalized effect to dispel wind-dampness and relieve pain.

Ma An Teng (Herba Ipomoea Pes-caprae) dispels wind-dampness, relieves pain, and dispels heat and toxins from the exterior to reduce carbuncles and nodules.

SECTION 2: WIND-DAMP DISPELLING AND CHANNELS- AND COLLATERALS-OPENING HERBS

Name	Similarities	Differences
Mu Gua (Fructus Chaenomelis)	Dispel wind-dampness and open channels and collaterals	Relaxes tendons, dissolves dampness, harmonizes Stomach
Luo Shi Teng (Caulis Trachelospermi)		Cools blood, reduces swelling for swollen throat
Sang Zhi (Ramulus Mori)		Relieves pain and stiffness of extremities
Qian Nian Jian (Rhizoma Homalomenae)		Relieves stiff and numb extremities
Hai Feng Teng (Caulis Piperis Kadsurae)		Relieves pain associated with *bi zheng* (painful obstruction syndrome) and trauma
Hai Tong Pi (Cortex Erythrinae)		Treats dermatological disorders when used externally
Xun Gu Feng (Herba Aristolochiae Mollissimae)		Relieves pain associated with *bi zheng* (painful obstruction syndrome) and trauma
Bai Hua She (Bungarus Parvus)		Strongly opens channels, and extinguishes wind to relieve convulsions
Wu Shao She (Zaocys)		Opens channels, and extinguishes wind to relieve convulsions
She Tui (Periostracum Serpentis)		Extinguishes wind to relieve itching, convulsions and superficial visual obstruction
Xia Tian Wu (Rhizoma Corydalis Decumbentis)		Invigorates blood circulation, treats trauma-related injuries; also relieves abdominal and epigastric pain
Chuan Shan Long (Rhizoma Dioscoreae Nipponicae)		Invigorates blood circulation to treat *xiong bi* (painful obstruction of the chest); relieves cough, dispels hot phlegm

Chapter 4 summary

Name	Similarities	Differences
Lao Guan Cao (Herba Erodii seu Geranii)		Stops damp-heat diarrhea
Shen Jin Cao (Herba Lycopodii)		Eases tendons that are tight from chronic *bi zheng* (painful obstruction syndrome)
Xi Xian Cao (Herba Siegesbeckiae)		Clears heat, eliminates toxins, relieves carbuncles, swellings and eczema
Chou Wu Tong (Folium Clerodendri Trichotomi)		Relieves skin itching and eczema
Huang Jin Gui (Caulis Vanieriae)		Opens channels and collaterals, reduces swelling and pain
Liu Zhi Huang (Herba Solidaginis)		Opens channels and collaterals, reduces swelling and pain
Yi Tiao Gen (Radix Moghaniae)		Opens channels and collaterals

General Characteristics of Wind-Damp Dispelling and Channels- and Collaterals-Opening Herbs:

Taste: acrid, bitter
Thermal property: varies
Channels entered: Kidney, Liver
Therapeutic actions: relieve pain; reduce stiffness, soreness, and swelling; and restore mobility

These herbs open peripheral channels and collaterals to treat chronic, stubborn *bi zheng* (painful obstruction syndrome) accompanied by decreased range of joint motion, decreased mobility of extremities, numbness, hemiplegia and paralysis.

Mu Gua (Fructus Chaenomelis) and ***Can Sha*** (Excrementum Bombycis Mori) treat vomiting, diarrhea and cramps.

Mu Gua more effectively relaxes tendons and opens the collaterals, and treats swelling and pain in the legs.

Can Sha dispels dampness and relieves itching.

Luo Shi Teng (Caulis Trachelospermi), ***Sang Zhi*** (Ramulus Mori), and ***Qian Nian Jian*** (Rhizoma Homalomenae) dispel wind and open the collaterals, and are most suitable to treat *bi zheng* (painful obstruction syndrome) caused by wind-dampness, with tightness and cramping of the tendons.

Luo Shi Teng is slightly cold, cools the blood, reduces swelling and treats swollen throat, swellings or carbuncles.

Sang Zhi is neutral, and treats pain in the upper limbs.

Qian Nian Jian is warm, and relieves muscle stiffness and numbness.

Hai Feng Teng (Caulis Piperis Kadsurae), ***Hai Tong Pi*** (Cortex Erythrinae) and ***Xun Gu Feng*** (Herba Aristolochiae Mollissimae) dispel wind, open the collaterals and relieve pain, and are mostly used to treat pain, spasms and tightness from wind-dampness.

Hai Feng Teng relieves pain associated with trauma and *bi zheng* (painful obstruction syndrome).

Hai Tong Pi treats pain in the lower back.

Xun Gu Feng also treats stomach pain and toothache.

Bai Hua She (Bungarus Parvus) and ***Wu Shao She*** (Zaocys) treat chronic stubborn pain, numbness, spasms or itching. They also extinguish wind and treat convulsions and tetany.

Bai Hua She is stronger but also more toxic.

Wu Shao She is not toxic but is less potent in action.

Chapter 4 summary

She Tui (Periostracum Serpentis) extinguishes wind, stops convulsions, relieves itching, and treats superficial visual obstruction. It is weaker than *Bai Hua She* (Bungarus Parvus) and *Wu Shao She* (Zaocys).

Xia Tian Wu (Rhizoma Corydalis Decumbentis) and ***Chuan Shan Long*** (Rhizoma Dioscoreae Nipponicae) dispel wind, open collaterals, and relieve pain and spasms.

Xia Tian Wu treats hemiplegia and paralysis and has a strong pain-relieving effect.

Chuan Shan Long treats *xiong bi* (painful obstruction of the chest).

Lao Guan Cao (Herba Erodii seu Geranii) dispels wind-dampness and opens collaterals to treat pain and spasms, and stops damp-heat diarrhea.

Shen Jin Cao (Herba Lycopodii) opens channels and collaterals, treating pain in the extremities, such as is found in trauma or *bi zheng* (painful obstruction syndrome).

Xi Xian Cao (Herba Siegesbeckiae) treats numbness and tightness of the extremities, and eliminates toxins to heal carbuncles and sores.

Chou Wu Tong (Folium Clerodendri Trichotomi) dispels wind-dampness, lowers blood pressure, and relieves itching.

Huang Jin Gui (Caulis Vanieriae) and ***Liu Zhi Huang*** (Herba Solidaginis) are both excellent to dispel wind-dampness, open channels and collaterals, and reduce swelling and inflammation. They are commonly used together for synergistic benefit.

Yi Tiao Gen (Radix Moghaniae) dispels wind-dampness and opens channels and collaterals.

SECTION 3: WIND-DAMP DISPELLING AND TENDON- AND BONE-STRENGTHENING HERBS

Name	Similarities	Differences
Sang Ji Sheng (Herba Taxilli)	Dispel wind-damp, strengthen tendons and bones	Stabilizes fetus
Wu Jia Pi (Cortex Acanthopanacis)		Promotes diuresis and reduces swelling
Hu Gu (Os Tigris)		Strongly relieves pain and dispels wind
Lu Han Cao (Herba Pyrolae)		Tonifies Lung and Kidney for chronic cough or asthma, stops bleeding
Shi Nan Teng (Ramulus Piper)		Strengthens back and legs
Zou Ma Tai (Rhizoma Ardisiae)		Strengthens tendons and bones

General Characteristics of Wind-Damp Dispelling and Tendon- and Bone-Strengthening Herbs:

Taste: acrid, bitter

Thermal property: warm

Channels entered: Kidney, Liver

Therapeutic actions: dispel wind, damp, cold; and tonify tendons and bones

These herbs tonify the Liver and Kidney to treat chronic *bi zheng* (painful obstruction syndrome) characterized by pain, weakness, deficiency and atrophy of soft tissues.

Sang Ji Sheng (Herba Taxilli) is often used with ***Du Huo*** (Radix Angelicae Pubescentis) to treat back pain. Together, they have excellent synergistic action as both address deficiency and excess conditions, in chronic or acute situations.

Sang Ji Sheng tonifies the Liver and Kidney to strengthen the sinews and bones.

Du Huo dispels wind-damp-cold from the exterior to relieve pain.

Chapter 4 summary

Wu Jia Pi (Cortex Acanthopanacis), besides having an antirheumatic effect, promotes diuresis and reduces swelling. It tonifies the Kidney and Liver to strengthen tendons and bones.

Hu Gu (Os Tigris), no longer a legal substance, has shown historically that it strongly dispels wind-damp, relieves pain, and strengthens tendons and bones. Use of *Hu Gu* is prohibited since tiger is an endangered animal. Bones from pigs or cattle are generally used as substitutes.

Lu Han Cao (Herba Pyrolae) dispels wind-dampness and tonifies the Liver and Kidney. It also tonifies the Lung to relieve deficiency cough and dyspnea. It stops epistaxis and uterine bleeding.

Shi Nan Teng (Ramulus Piper) and ***Zou Ma Tai*** (Rhizoma Ardisiae) dispel wind-dampness and strengthen soft tissues.

Shi Nan Teng is more specific for the back and legs.

Zou Ma Tai strengthens tendons and bones throughout the body.

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH WIND-DAMP DISPELLING FUNCTIONS

Name	Functional Category
Ba Ji Tian (Radix Morindae Officinalis)	Tonic Herbs (Chapter 17)
Bai Long Chuan Hua Tou (Radix Clerodendron Paniculatum)	Water-Regulating and Damp-Resolving Herbs (Chapter 6)

Chapter 5

— Aromatic Damp-Dissolving Herbs

Definition: Aromatic and fragrant, these herbs enhance the function of the Spleen to dissolve, dry or disperse dampness, transforming and transporting substances that would otherwise accumulate to cause damp imbalance or obstruction.

"Dampness" refers to the environmental pathogenic factor that tends to accumulate in the middle *jiao* and obstruct the normal transforming and transporting functions of the Spleen and Stomach. Symptoms of the presence of dampness include fullness and distention of the epigastrium and abdomen, nausea, vomiting, poor appetite, heaviness of the extremities, loose stools, and a thick, greasy tongue coat. Acrid, bitter, warm and drying, many of these herbs enter and strengthen the Spleen and Stomach, to activate qi circulation, dissolve dampness, and improve the Spleen's transformation and transportation activities.

Aromatic damp-dissolving herbs work for restoration of Spleen and Stomach transformation and transportation activities.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Dampness may be divided into damp-cold or damp-heat: each condition must be treated accordingly. Because accumulation of dampness is often accompanied by stagnation, it is beneficial to use herbs that simultaneously activate the qi. Accumulation of dampness may also lead to edema; therefore, herbs that regulate water circulation may be added.

CAUTIONS/CONTRAINDICATIONS

Long-term use of warming and drying herbs may consume yin and body fluids. Thus, they should not be used for very long in patients with such deficiencies. This applies in particular to *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis) and *Cao Guo* (Fructus Tsaoko), herbs with the strongest drying abilities.

PROCESSING

Most of these herbs are aromatic and contain large percentages of essential oils that evaporate easily. Therefore, they should be added towards the end or at the close of cooking to avoid loss of active components and potency from over-cooking, a process known as post-decoction.

These herbs are post-decocted to avoid loss of active components and potency.

Bai Dou Kou (Fructus Amoni Rotundus)
Ben Cao Gang Mu (Materia Medica),
by Li Shi-Zhen, 1578 A.D.

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Many aromatic damp-dissolving substances stimulate the gastrointestinal system to increase peristalsis of the intestines and production of gastric acid, to treat indigestion, fullness and distention of the abdomen, and abdominal spasms and cramps.
- **Antibiotic:** Some of these herbs have antibiotic actions, such as *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis), *Huo Xiang* (Herba Agastache), *Bai Bu* (Radix Stemonae) and *Sha Ren* (Fructus Amomi).

Chapter 5 — Aromatic Damp-Dissolving Herbs

POTENTIAL HERB-DRUG INTERACTIONS

- **Antiulcer**: Aromatic and damp-resolving herbs may stimulate the digestive system to produce more stomach acid and increase peristalsis. Therefore, they should be used with caution in patients who are taking histamine-2 receptor antagonists (such as ranitidine or famotidine) or proton-pump inhibitors (such as omeprazole or lansoprazole).
- **Antiplatelets and anticoagulants**: Some herbs, such as *Hou Po* (Cortex Magnoliae Officinalis) and *Sha Ren* (Fructus Amomi), have anticoagulant properties and should be used with caution for patients using anticoagulant or antiplatelet drugs.[1,2]

Cang Zhu (Rhizoma Atractylodis)

蒼朮 苍术

Pinyin Name: *Cang Zhu*
Literal Name: "gray rhizome," "gray essence"
Original Source: *Jing Shi Zheng Lei Bei Ji Ben Cao* (Differentiation and Application of Materia Medica) by Tang Shen-Wei in 1082
English Name: atractylodes, sword-like atractylodes rhizome, Chinese atractylodes rhizome
Botanical Name: *Atractylodes lancea* (Thunb.) DC. (*Nan Cang Zhu*); *Atractylodes chinensis* (DC.) Koidz. (*Bei Cang Zhu*)
Pharmaceutical Name: Rhizoma Atractylodis
Properties: acrid, bitter, warm, aromatic
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dries Dampness, Strengthens the Spleen

Aromatic and drying in nature, *Cang Zhu* (Rhizoma Atractylodis) dries dampness and strengthens the Spleen. It is commonly used when the accumulation of dampness impairs the Spleen's transformation and transportation functioning, leading to epigastric and abdominal fullness and distention, nausea, vomiting, loose stools, diarrhea, feeling of heaviness of the body and extremities, and a greasy tongue coat.

- Accumulation of dampness in the Spleen: use *Cang Zhu* with *Hou Po* (Cortex Magnoliae Officinalis) and *Chen Pi* (Pericarpium Citri Reticulatae). **Exemplar Formula:** *Ping Wei San* (Calm the Stomach Powder).
- Diarrhea due to accumulation of dampness: use *Cang Zhu* (Rhizoma Atractylodis) individually, or in combination with *Shen Qu* (Massa Fermentata) and *Hua Jiao* (Pericarpium Zanthoxyli).
- Infantile diarrhea with food stagnation: add *Shan Zha* (Fructus Crataegi).
- Infantile diarrhea from damp-heat: add *Hua Shi* (Talcum).
- Infantile diarrhea from deficiency and cold: use it with *Gan Jiang* (Rhizoma Zingiberis).
- Chronic accumulation of dampness in the Spleen with hypochondriac pain, acid reflux, and poor appetite: add *Da Zao* (Fructus Jujubae).

2. Induces Perspiration, Dispels Wind-Dampness

Cang Zhu dispels wind-cold with dampness, characterized by fever, chills, headache, body aches, the absence of perspiration, and nasal obstruction.

- Wind-cold with dampness: use this herb with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Bai Zhi* (Radix Angelicae Dahuricae), *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Xi Xin* (Herba Asari).

Cang Zhu treats febrile disorders with dampness, characterized by persistent fever, heavy sensations of the body, feelings of chest oppression, and thirst with no desire to drink.

- Febrile disorders with dampness: add it to *Bai Hu Tang* (White Tiger Decoction).

***Bi zheng* (painful obstruction syndrome):** This condition is often caused by obstruction of wind, cold or dampness. *Cang Zhu* dispels wind and dampness to relieve pain.

- *Bi zheng* with swelling and pain caused by dampness: use *Cang Zhu* with *Fen Fang Ji* (Radix Stephaniae Tetandrae) and *Yi Yi Ren* (Semen Coicis).
- *Bi zheng* with knee pain and swelling, muscle weakness or atrophy, and difficulty walking because of damp-heat in the lower half of the body: use this herb with *Huang Bai* (Cortex Phellodendri). **Exemplar Formula:** *Er Miao San* (Two-Marvel Powder).
- Musculoskeletal disorders of the arms and shoulders caused by phlegm stagnation: combine *Cang Zhu* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). **Exemplar Formula:** *Er Zhu Tang* (Two Atractylodes Decoction).

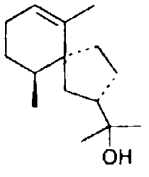
3. Benefits the Eyes

Night blindness or diminished vision: Traditionally, *Cang Zhu* is used with food to treat eye disorders.

- Cataracts, glaucoma and night blindness: use it with *Hei Zhi Ma* (Semen Sesami Nigrum).
- Night blindness: cook *Cang Zhu* with pig or goat liver and take daily as food.

Cang Zhu (Rhizoma Atractylodis)

DOSAGE



5 to 10 grams in decoction. Unprocessed *Cang Zhu* is very dry in nature and strongly dispels dampness. Dry-frying the herb significantly reduces its drying property and its effectiveness in dispelling dampness. Therefore, dry-fried *Cang Zhu* is generally used to bind the intestines and stop diarrhea.

CAUTIONS / CONTRAINDICATIONS

- Use *Cang Zhu* with caution for patients with yin-deficient heat, or patients who have spontaneous perspiration due to *wei* (defensive) *qi* deficiency.

CHEMICAL COMPOSITION

Essential oils (β-eudesmol, hinesol, atractylodin, atractylone).[1,2]

Hinesol

PHARMACOLOGICAL EFFECTS

- **Hepatoprotective:** Decoction of *Cang Zhu* has marked hepatoprotective functions, especially against carbon tetrachloride, in mice.[3]
- **Antidiabetic:** Both water and alcohol extracts of *Cang Zhu* administered for 10 days demonstrated consistent antidiabetic effects. Seven to fourteen days after cessation of administration of the herb, the blood glucose levels started to increase again, but were still lower than previous levels.[4]
- **Antibiotic:** *Cang Zhu* has been shown to kill *Staphylococcus aureus*, some dermatophytes, and some viruses.[5]
- **Genitourinary:** Decoction of *Cang Zhu* did not have a diuretic effect in rats. It, did, however, increase the excretion of sodium and chloride in the urine.[6]
- **Gastrointestinal:** Administration of *Cang Zhu* relieved spasms and cramps in mice intestines by blocking stimulation of the parasympathetic nervous system.[7]
- **Cardiovascular:** Intravenous injection of *Cang Zhu* is associated with increased blood pressure at low doses, but decreased blood pressure at high doses.[8]

CLINICAL STUDIES AND RESEARCH

- **Infantile rickets:** One report describes 120 infants between 2 and 3 years of age who were treated orally with 0.066 ml of essential oil of *Cang Zhu*, three times daily for 1 to 2 weeks, with an 85.4% rate of effectiveness.[9] In another study, 1,006 infants were treated with *Cang Zhu* syrup (contains 4.5 grams of *Cang Zhu*) twice daily for 15 days. According to the study, 541 patients (53.8%) showed marked improvement, 340 patients (33.7%) showed moderate improvement, and 125 patients (12.4%) had no response.[10]
- **Prevention of respiratory tract infections:** Incense made of *Cang Zhu* and *Ai Ye* (Folium Artemisiae Argyi) was burned in schools where there were widespread respiratory tract infections, with good preventative results.[11]
- **Gastric prolapse:** Daily ingestion of 20 grams of *Cang Zhu* as tea was found to be effective in treating prolapse of the stomach.[12]

HERB-DRUG INTERACTION

- **Omeprazole:** It has been suggested that hinesol, one of the components of *Cang Zhu*, is a relatively specific inhibitor of H+, K+ -ATPase. Hinesol also enhanced the inhibitory effect of omeprazole on H+, K+ -ATPase, though the exact inhibitory sites are different.[13]
- **Antidiabetics:** It is prudent to use *Cang Zhu* with caution with insulin, sulfonylureas, and other antidiabetic medications. Though the potential interaction has not been documented, the combination of antidiabetic herbs and drugs may have a synergistic effect, leading to hypoglycemia.[14] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]
- **Diuretics:** *Cang Zhu* has a diuretic effect. Though this potential interaction has not been documented, concurrent use of this herb with diuretic drugs may lead to increased elimination of water and/or electrolytes.[15] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

AUTHORS' COMMENTS

Optimal treatment of headaches requires use of channel-guiding herbs to deliver the therapeutic effect of the herbs to the affected area. The following is a list of the commonly used channel-guiding herbs:

- *Taiyang* channels: *Qiang Huo* (Rhizoma et Radix Notopterygii)
- *Shaoyang* channels: *Chai Hu* (Radix Bupleuri)
- *Yangming* channels: *Bai Zhi* (Radix Angelicae Dahuricae)
- *Taiyin* channels: *Cang Zhu* (Rhizoma Atractylodis)
- *Shaoyin* channels: *Xi Xin* (Herba Asari)
- *Jueyin* channels: *Wu Zhu Yu* (Fructus Evodiae)

Cang Zhu (Rhizoma Atractylodis)

Hou Po (Cortex Magnoliae Officinalis)

厚朴

Pinyin Name: *Hou Po*
Alternate Chinese Names: *Chuan Po, Lie Po, Chi Po*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: magnolia bark
Botanical Name: *Magnolia officinalis* Rehd. et. Eils. (*Hou Po*); *Magnolia officinalis* Rehd. et. Wils. var *biloba* Rehd. et Wils. (*Ao Ye Hou Po*)
Pharmaceutical Name: Cortex Magnoliae Officinalis
Properties: bitter, acrid, warm, aromatic
Channels Entered: Large Intestine, Lung, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi and Reduces Stagnation

Stagnation of the middle *jiao*: Acrid, warm and dispersing in nature, *Hou Po* (Cortex Magnoliae Officinalis) is an excellent herb to promote movement of qi and reduce stagnation. It is the key herb for treatment of qi stagnation of the Spleen and Stomach that is causing epigastric and abdominal fullness and distention, loss of appetite, and poor digestion. It is an indispensable herb when treating bloating, distention and other related signs of qi stagnation.

- Qi stagnation of the Spleen and Stomach: use *Hou Po* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Zhi Ke* (Fructus Aurantii) and *Sheng Jiang* (Rhizoma Zingiberis Recens). Serve with grain-based liquor.
- Stagnation of qi with cold in the Spleen and Stomach: combine this herb with *Gui Zhi* (Ramulus Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis) to warm the middle *jiao*.
- Hypochondriac pain due to Liver qi stagnation: use it with *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Chuan Lian Zi* (Fructus Toosendan).

Food stagnation: Food stagnation leads to qi stagnation that impairs the normal transformation and transportation functions of the Spleen and Stomach. This causes poor digestion, and in severe cases, abdominal pain and constipation.

- Food stagnation: use *Hou Po* with *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus), and *Shen Qu* (Massa Fermentata) to promote digestion.
- Food stagnation with abdominal pain and constipation: add *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Shi* (Fructus Aurantii Immaturus). **Exemplar Formulas:** *Da Cheng Qi Tang* (Major Order the Qi Decoction) and *Xiao*

Hou Po (Cortex Magnoliae Officinalis)

Cheng Qi Tang (Minor Order the Qi Decoction).

- Paralytic ileus: use a larger dosage of *Hou Po* with *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Shi* (Fructus Aurantii Immaturus).

2. Regulates Qi Circulation and Dries Dampness

In addition to regulating qi circulation of the Spleen and Stomach, *Hou Po* dries dampness. Clinically, qi stagnation with accumulation of dampness in the middle *jiao* is characterized by epigastric and abdominal fullness, nausea, vomiting, decreased intake of food, and a greasy tongue coat.

- Accumulation of dampness with qi stagnation: use *Hou Po* with *Cang Zhu* (Rhizoma Atractylodis) and *Chen Pi* (Pericarpium Citri Reticulatae). **Exemplar Formula:** *Ping Wei San* (Calm the Stomach Powder).
- Accumulation of dampness with cold: use *Hou Po* with *Gan Jiang* (Rhizoma Zingiberis) and *Cao Dou Kou* (Semen Alpiniae Katsumadai). **Exemplar Formula:** *Hou Po Wen Zhong Tang* (Magnolia Bark Decoction for Warming the Middle).

Accumulation of dampness may also cause diarrhea.

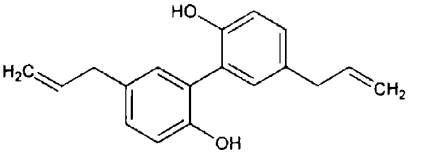
- Diarrhea due to cold and dampness: use *Hou Po* with *Gan Jiang* (Rhizoma Zingiberis).
- Diarrhea due to heat and dampness: add *Huang Lian* (Rhizoma Coptidis).

3. Descends Qi, Dissolves Phlegm, Relieves Wheezing

Hou Po treats cough and wheezing when phlegm blocks the normal circulation of qi in the Lung. It is best for tightness in the chest, dyspnea, and cough and wheezing accompanied by profuse phlegm.

- Cough and wheezing due to excess in the upper *jiao* (phlegm obstruction in the Lung), with deficiency in the lower *jiao* (Kidney deficiency): use it with *Su Zi* (Fructus Perillae), *Rou Gui* (Cortex Cinnamomi) and *Dang Gui* (Radicis Angelicae Sinensis). **Exemplar Formula:** *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward).
- Cough and wheezing due to wind-cold: combine *Hou Po* with *Xing Ren* (Semen Armeniacae Amarum), *Gui Zhi* (Ramulus Cinnamomi), and *Sheng Jiang* (Rhizoma Zingiberis Recens).

DOSAGE



3 to 10 grams in decoction. Bitter, acrid and warm, unprocessed *Hou Po* is sometimes irritating to the throat and may cause nausea. After it has been processed with *Sheng Jiang* (Rhizoma Zingiberis Recens), this herb has reduced bitterness and stimulatory effect, and is less likely to cause nausea and stomach discomfort.

CAUTIONS / CONTRAINDICATIONS

- Use *Hou Po* with caution during pregnancy, or in cases of qi deficiency.

CHEMICAL COMPOSITION

Essential oils (machilol), magnolol, magnocurarine, magnoloside.[1,2]

Magnolol

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Administration of *Hou Po* in various forms has shown an inhibitory influence on the gastrointestinal system, leading to decreased secretion of gastric acid and reduced contractions in the duodenum.[3,4]
- **Anticoagulant:** Magnolol has a mild anticoagulant effect.[5]
- **CNS suppressant:** Extract of *Hou Po* given via intraperitoneal and oral administration has demonstrated an inhibiting effect on the central nervous system (CNS). The exact mechanism of action is unclear, but may be related to GABA receptors.[6]
- **Antihypertensive:** Intravenous injection of magnocurarine at 3 mg/kg in cats lowered blood pressure by 20 mmHg for 10 minutes.[7]
- **Respiratory**: Decoction of *Hou Po* has a stimulating effect on the respiratory system at small doses, but an inhibiting effect at large doses.[8]
- **Antibiotic:** Extract of *Hou Po* has an inhibitory effect against *Streptococcus matuans*, *Staphylococcus aureus*, *Bacillus subtilis*, *Diplococcus pneumoniae*, and *Bacillus dysenteriae*.[9,10,11]

CLINICAL STUDIES AND RESEARCH

- **Post-surgical bloating:** Prior to hysterectomy, 5 to 10 grams of *Hou Po* were given to 36 women. The study reported that the patients were much less likely to experience abdominal bloating following surgery.[12]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Hou Po* has a mild anticoagulant effect, and should be used with caution in patients who take anticoagulant or antiplatelet medications.[13] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin,

Hou Po (Cortex Magnoliae Officinalis)

dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

The LD_{50} for decoction of *Hou Po* is 6.12 g/kg in mice via intraperitoneal injection, and 4.25 g/kg in cats via intravenous injection. No fatalities were recorded following a bolus dose of decoction of *Hou Po* at 60 g/kg in mice.[14,15]

SUPPLEMENT

- 厚朴花 / 厚朴花 *Hou Po Hua* (Flos Magnoliae Officinalis), first cited in *Yin Pian Xin Can* (New References of Prepared Medicines), is derived from the flower of the same plant as *Hou Po*. *Hou Po Hua* regulates Liver qi and treats Liver and Stomach qi stagnation manifesting in poor appetite, dull epigastric fullness and pain. *Hou Po Hua* is slightly milder in its overall function than *Hou Po*, but is less drying in nature. *Hou Po Hua* is better for qi stagnation of the upper and middle *jiaos* while *Hou Po* is better for qi stagnation of the middle and lower *jiaos*. The dosage for *Hou Po Hua* is 3 to 6 grams.

AUTHORS' COMMENTS

Hou Po regulates qi, warms the middle *jiao* and dries dampness. It is one of the most important herbs used to treat fullness and distention. It treats food stagnation, accumulated dampness, and cold and qi stagnation causing abdominal discomfort. It has been used recently for post-surgical abdominal bloating, and prior to administering anesthesia for hysterectomy, to prevent abdominal bloating.

Hou Po is quite strong in its qi-regulating function. Some describe its potent effect as "breaking open the qi." Therefore, when this herb is used improperly, *yuan* (source) *qi* can be injured. It should be used with caution for deficient patients with bloating so it does not injure the qi. This caution does not prohibit the use of *Hou Po* for deficient patients altogether, it simply indicates that the dosage should be decreased and/or it should be combined with qi tonics such as *Ren Shen* (Radix Ginseng) and *Gan Cao* (Radix Glycyrrhizae).

Some records have shown that this herb helps to unblock the yang when used in a small dosage. When used in large dosages, it breaks open qi.

Huo Xiang (Herba Agastache)

藿香 藿香

Pinyin Name: *Huo Xiang*
Literal Name: "aromatic bean leaf"
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: agastache, wrinkled giant hyssop
Botanical Name: *Agastache rugosus* (Fisch. et. Mey.) O. Ktze. (*Huo Xiang*)
Pharmaceutical Name: Herba Agastache
Properties: acrid, slightly warm, aromatic
Channels Entered: Spleen, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Dispels Damp, Releases the Exterior and Relieves Summer-Damp

Accumulation of dampness: Aromatic and acrid, *Huo Xiang* (Herba Agastache) is very strong and quite drying in nature. It harmonizes the middle *jiao* and is an excellent herb to dispel summer-dampness from both the interior and exterior. When summer-dampness is stagnant in the middle *jiao*, the normal transformation and transportation functions of the Spleen and Stomach are affected, leading to symptoms such as abdominal and epigastric fullness and distention, poor appetite, nausea, vomiting, diarrhea, and greasy tongue coat.

- Summer-heat and damp stagnation in the middle *jiao*: use *Huo Xiang* with *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis), and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Bu Huan Jin Zheng Qi San* (Rectify the Qi Powder Worth More than Gold).
- Initial stage of dampness attacking the *qi* (energy) level with fever, feelings of heaviness, chest oppression, nausea, a dense feeling in the mouth (profuse accumulation of thick, sticky saliva and phlegm) and absence of thirst: combine *Huo Xiang* with *Hua Shi* (Talcum), *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Huang Qin* (Radix Scutellariae).

Summer-damp: *Huo Xiang* dispels summer-dampness from the exterior. When summer-damp is accompanied by wind-cold, patients may have fever, chills, headache, feelings of chest oppression, abdominal fullness, nausea, vomiting, diarrhea and fatigue.

- Summer-dampness with wind-cold: use this herb with *Zi Su Ye* (Folium Perillae) and *Bai Zhi* (Radix Angelicae Dahuricae).

Summer-heat and dampness: This condition is characterized by fever, heavy sensations in the extremities, a feeling of oppression in the chest, abdominal fullness, dysuria, and constipation.

- Summer-heat and dampness: use *Huo Xiang* with *Hua Shi* (Talcum), *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Huang Qin* (Radix Scutellariae).

2. Relieves Nausea and Vomiting

Huo Xiang does an excellent job of harmonizing the Stomach and relieving nausea and vomiting. It is most suitable for patients experiencing dampness and turbidity in the middle *jiao*.

- Nausea and vomiting: use *Huo Xiang* individually, or in combination with *Ban Xia* (Rhizoma Pinelliae).
- Nausea and vomiting from damp-heat: use it with *Huang Lian* (Rhizoma Coptidis) and *Zhu Ru* (Caulis Bambusae in Taenia).
- Nausea and vomiting with Spleen and Stomach deficiencies: add *Dang Shen* (Radix Codonopsis) and *Gan Cao* (Radix Glycyrrhizae).
- Nausea and vomiting during pregnancy: combine this herb with *Ban Xia* (Rhizoma Pinelliae) and *Sha Ren* (Fructus Amomi).

3. Treats Fungal Infection

Topical use of *Huo Xiang* has demonstrated effectiveness in treatment of fungal infections of the hands and feet.

- Fungal infection: combine *Huo Xiang* with *Da Huang* (Radix et Rhizoma Rhei), *Zao Fan* (Melanterite), and *Huang Jing* (Rhizoma Polygonati). Soak the herbs in vinegar for 1 week and filter out the solution. Soak the affected area in the herbal solution once daily for 30 minutes.

Huo Xiang (Herba Agastache)

DOSAGE

5 to 10 grams. Double the dosage if the fresh form is used. *Huo Xiang* is commonly used internally as decoction or tea, or topically. Due to its aromatic nature, *Huo Xiang* is generally added to the decoction at the end of the cooking process, to preserve its effectiveness.

CHEMICAL COMPOSITION

Essential oil 1.5%, patchoulialcohol, cinnamic aldehyde, benzaldehyde, eugenol, patchoulipyridine, epiguaipyridine, β-elemene, caryophyllene, alloaromadendrene, γ-patchoulene, α-guaiene, γ-guaiene, α-patchoulene.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** It has a broad spectrum antibiotic effect against *Candida albicans, Staphylococcus aureus, Pseudomonas aeruginosa, E. coli, Bacillus dysenteriae,* α-hemolytic streptococcus, *Bacillus dysenteriae, Diplococcus pneumoniae,* and some dermatophytes.[2]
- **Gastrointestinal:** *Huo Xiang* increases the secretion of gastric acid and promotes digestion.[3]

CLINICAL STUDIES AND RESEARCH

- **Infantile diarrhea:** In one study, 112 infants with diarrhea were treated with herbal decoctions, with complete recovery in all cases. The primary herbal formula contained *Huo Xiang* 6g, *Cang Zhu* (Rhizoma Atractylodis) 6g, *Che Qian Zi* (Semen Plantaginis) 9g, *Hou Po* (Cortex Magnoliae Officinalis) 4g, *Chen Pi* (Pericarpium Citri Reticulatae) 4g, *Gan Cao* (Radix Glycyrrhizae) 3g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 3 pieces, *Da Zao* (Fructus Jujubae) 5 to 7 pieces, and others as deemed necessary.[4]

SUPPLEMENT

- 廣藿香 / 广藿香 *Guang Huo Xiang* (Herba Pogostemonis) is derived from the plant *Pogostemon cablin* (Blanco) Benth. It is commonly used as a substitute for *Huo Xiang*, because it has similar functions and applications. The dosage for *Guang Huo Xiang* is 3 to 9 grams.

Pei Lan (Herba Eupatorii)

佩蘭 佩兰

Pinyin Name: *Pei Lan*
Literal Name: "wearing orchid," "ornamental orchid"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: eupatorium, fortune eupatorium
Botanical Name: *Eupatorium fortunei* Turcz. (*Lan Cao*)
Pharmaceutical Name: Herba Eupatorii
Properties: acrid, neutral, aromatic
Channels Entered: Spleen, Stomach, Lung

Pei Lan (Herba Eupatorii)

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Dampness and Dispels Summer-Damp

Aromatic and acrid, *Pei Lan* (Herba Eupatorii) dispels summer-damp with or without heat from the middle *jiao*.

- Summer-dampness: use *Pei Lan* with *Huo Xiang* (Herba Agastache), *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis), and *Bai Dou Kou* (Fructus Amomi Rotundus).
- Summer-heat and dampness: use it with *Hua Shi* (Talcum), *Huang Qin* (Radix Scutellariae), and *Yi Yi Ren* (Semen Coicis).

2. Eliminates Damp-Heat from the Spleen

Damp-heat accumulation in the Spleen: This disorder is caused by excessive intake of fatty food, that leads to accumulation of heat and dampness in the Spleen, causing symptoms such as a sweet and greasy taste in the mouth, epigastric and abdominal fullness and distention, thick sticky saliva or sputum with bubbles, and foul breath.

- Early stage damp-heat accumulation: use *Pei Lan* alone.
- Chronic accumulation of damp-heat: combine it with *Tian Hua Fen* (Radix Trichosanthis), *Mai Men Dong* (Radix Ophiopogonis) and *Huang Lian* (Rhizoma Coptidis) to nourish yin, promote the generation of body fluids, and clear heat.

DOSAGE

5 to 10 grams in decoctions. Double the dosage when using fresh *Pei Lan*.

CHEMICAL COMPOSITION

p-cymene, methyl thymyl ether, neryl acetate, lindelofine, supinine, β-amyrin palmitate, β-amyrin acetate, taraxasteryl palmitate, taraxasteryl acetate, taraxasterol, octacosanol, stigmasterol, β-sitosterol, palmitic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *Pei Lan* exerts antibacterial activities against *Corynebacterium diphtheriae*, *Staphylococcus aureus*, sarcinae, *Bacillus proteus*, and *Salmonella typhi*; and the essential oil has an antiviral effect against influenza viruses.[2]

CLINICAL STUDIES AND RESEARCH

- **Snake bite:** In one report, 30 patients with snake bite were treated with a topical application of *Pei Lan*, with marked improvement of 8 cases within 2 days, 12 cases within 3 days, and 10 cases within 4 days. The treatment protocol was to first remove the snake venom, clean the affected area, and apply fresh herbal paste of *Pei Lan* topically. The herbal paste was removed and re-applied every 2 to 3 days.[3]

AUTHORS' COMMENTS

Pei Lan and *Huo Xiang* (Herba Agastache) are both acrid and aromatic, and dispel dampness and summer-dampness, and awaken the Spleen. These herbs are frequently used together to treat dampness accumulation in the middle *jiao* that manifests in nausea, vomiting, heavy sensations of the limbs, fatigue and possibly some exterior symptoms. *Pei Lan* has a mild exterior-relieving function. It is best for retention of dampness and turbidity manifesting in chest oppression and a sweet taste in the mouth with profuse thick and sticky saliva. By contrast, *Huo Xiang* more effectively disperses dampness in the middle *jiao* manifesting as nausea, vomiting and a thick, greasy tongue coating.

Sha Ren (Fructus Amomi)

砂仁

Pinyin Name: *Sha Ren*
Literal Name: "sand seeds"
Alternate Chinese Names: *Suo Sha Mi, Chun Sha Ren*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: amomum, villous amomum fruit
Botanical Name: *Amomum villosum* Lour. (*Yang Chun Sha*); *Amomum xanthioides* Wall. (*Suo Sha*)
Pharmaceutical Name: Fructus Amomi
Properties: acrid, warm, aromatic
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi, Dissolves Dampness, Strengthens the Spleen

Accumulation of dampness: Acrid, warm and aromatic, *Sha Ren* (Fructus Amomi) treats disorders characterized by Spleen and Stomach qi stagnation accompanied by an accumulation of dampness. *Sha Ren* not only dispels dampness in these organs, it also restores their normal transportation and transformation functions. Damp accumulation in the middle *jiao* is characterized by epigastric and abdominal distention and pain, lack of appetite, nausea, and vomiting. *Sha Ren* is often used with tonic herbs to offset their possible side effect of indigestion.

- Spleen and Stomach qi stagnation: use *Sha Ren* with *Mu Xiang* (Radix Aucklandiae).
- Spleen and Stomach qi stagnation with indigestion: use this herb with *Zhi Shi* (Fructus Aurantii Immaturus) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Food stagnation with indigestion (acid regurgitation with rotten food smell): combine it with *Lai Fu Zi* (Semen Raphani), *Shan Zha* (Fructus Crataegi) and *Zhi Shi* (Fructus Aurantii Immaturus).
- Accumulation of dampness in the middle *jiao*: use *Sha Ren* with *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis) and *Bai Dou Kou* (Fructus Amomi Rotundus).
- Spleen and Stomach deficiency: use it with *Ren Shen* (Radix Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

2. Warms the Middle, Stops Diarrhea

Diarrhea: *Sha Ren* is warm and is thus most suitable for addressing cold and damp accumulation in the middle *jiao* manifesting as diarrhea.

- Cold, damp diarrhea: use *Sha Ren* with *Gan Jiang* (Rhizoma Zingiberis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).

3. Stabilizes Pregnancy

Sha Ren calms the fetus and stabilizes pregnancy. It is commonly used to treat bleeding, abdominal pain, severe nausea and vomiting, and restless fetus associated with an unstable pregnancy.

- Bleeding and abdominal pain during pregnancy: use *Sha Ren* (Fructus Amomi) individually.
- Severe nausea and vomiting during pregnancy: add *Ban Xia* (Rhizoma Pinelliae).
- Restless fetus: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Su Geng* (Caulis Perillae).
- Unstable pregnancy due to Kidney deficiency: combine it with *Sang Ji Sheng* (Herba Taxilli), *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci).

DOSAGE

3 to 6 grams. *Sha Ren* should be added last to the decoction, as prolonged cooking destroys its effectiveness. The fresh herb has a stronger function than the dried herb to regulate qi, reduce distention, and relieve pain. Salt-fried *Sha Ren* functions more effectively to descend qi, calm the fetus, and stop frequent urination or diarrhea.

CAUTIONS / CONTRAINDICATIONS

- *Sha Ren* is contraindicated in patients with yin-deficient heat.
- Oral ingestion of *Sha Ren* is sometimes associated with allergic reactions.[1]

CHEMICAL COMPOSITION

Essential oils (α-thujene, alloocimene, ocimene,

Sha Ren (Fructus Amomi)

β-elemene, β-caryophyllene, β-bergamontene, β-farnesene, humulene, santalol, palmitic acid), saponins, zinc, copper, iron.[2]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** In laboratory studies, decoction of *Sha Ren* at a low concentration has a stimulating effect on the intestines of rats and rabbits. On the other hand, decoction at a high concentration has an inhibiting effect. Clinically, *Sha Ren* is commonly used to relieve bloating, spasms, and pain.[3]
- **Antiplatelet:** Oral administration of *Sha Ren* at 0.6 to 1.2 g/kg in rabbits is associated with a mild antiplatelet effect 15, 30, 60 and 90 minutes after ingestion.[4]

CLINICAL STUDIES AND RESEARCH

- **Nausea:** Eleven patients with nausea were treated orally with 2 grams of powdered *Sha Ren* three times daily, with good results.[5]
- **Peptic ulcer disease:** In one study, 43 patients with gastric or duodenal ulcers were treated effectively using *Sha Ren* in powdered form. The treatment protocol was to give 1.5 grams twice daily for 1 week, and 1.5 grams once daily for another week. The patients were given one day of rest between the two courses of treatment. The study reported significant improvement in symptoms such as epigastric pain, abdominal distention, and acid reflux.[6]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Sha Ren* has antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin. [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).][7]

TOXICOLOGY

In one study, oral administration of decoction of *Sha Ren* at 25 g/kg in 10 mice for 3 days showed no signs of toxicity and caused no fatalities. In another study, no abnormalities were observed in liver and kidney functions following oral administration of *Sha Ren* decoction in 10 rats at 1.62 g/kg for 30 days.[8]

SUPPLEMENT

- 砂仁殼 / 砂仁壳 *Sha Ren Ke* (Pericarpium Amomi), first cited in *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578 A.D., is derived from the shell of the same fruit as *Sha Ren*. The taste, properties and functions of *Sha Ren Ke* are similar to but weaker than those of *Sha Ren*. *Sha Ren Ke* is more suitable for less severe cases of qi stagnation in the middle *jiao* manifesting in epigastric and abdominal fullness, distention and poor appetite. The recommended dosage of *Sha Ren Ke* is 3 to 5 grams.

AUTHORS' COMMENTS

There are four herbs that are commonly used to stabilize pregnancy, each having a particular influence:

- *Sha Ren* (Fructus Amomi) regulates qi and calms restless fetus in the presence of qi stagnation and middle *jiao* deficiency.
- *Du Zhong* (Cortex Eucommiae) is most suitable to treat restless fetus caused by deficiency of the Kidney and Liver.
- *Huang Qin* (Radix Scutellariae) calms restless fetus caused by heat.
- *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) treats restless fetus from Spleen qi deficiency.

Bai Dou Kou (Fructus Amomi Rotundus)

白豆蔻 白豆蔻

Pinyin Name: *Bai Dou Kou*
Alternate Chinese Names: *Dou Kou*
Literal Name: "white cardamon"
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: amomum, cardamon
Botanical Name: *Amomum kravanh* Pirre ex Gagnep. (*Bai Dou Kou*); *Amomum compactum* Soland ex Maton (*Zhao Wa Bai Dou Kou*)
Pharmaceutical Name: Fructus Amomi Rotundus
Properties: acrid, warm, aromatic
Channels Entered: Lung, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi, Dissolves Dampness, Strengthens the Stomach

Acrid, aromatic and warm, *Bai Dou Kou* (Fructus Amomi Rotundus) moves the qi and dissolves dampness from the interior and exterior. Accumulation of dampness in the interior, or the middle *jiao*, prevents the Spleen and Stomach from performing their normal transportation and transformation functions, leading to epigastric and abdominal fullness, distention and poor appetite.

- Accumulation of dampness in the middle *jiao*: use *Bai Dou Kou* with *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis) and *Chen Pi* (Pericarpium Citri Reticulatae).

Some exterior syndromes, namely damp-heat febrile disorders, are sometimes complicated by an accumulation of dampness. If there is more dampness than heat, patients will experience chest congestion, lack of appetite, and a feeling of heaviness in the body and extremities. If there is more heat than dampness, patients may experience persistent fever, thick, yellow tongue coating and dysuria.

- Exterior syndrome with more dampness than heat: use *Bai Dou Kou* with *Xing Ren* (Semen Armeniacae Amarum), *Yi Yi Ren* (Semen Coicis) and *Hou Po* (Cortex Magnoliae Officinalis).
- Exterior syndrome with more heat than dampness: combine this herb with *Huang Qin* (Radix Scutellariae), *Hua Shi* (Talcum), and *Zhu Ling* (Polyporus).

2. Warms the Stomach, Relieves Nausea

Bai Dou Kou warms the Stomach, dispels cold, and relieves nausea. It treats abdominal pain, nausea, vomiting, and other conditions characterized by cold in the Stomach. It is safe for pregnant women and for infants with such conditions.

- Nausea and vomiting: use it with *Ban Xia* (Rhizoma Pinelliae) and *Huo Xiang* (Herba Agastache).
- Vomiting in infants: treat by using the powder of *Bai Dou Kou, Sha Ren* (Fructus Amomi) and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE

3 to 6 grams. *Bai Dou Kou* should be ground into powder and added towards the end of decocting, as prolonged cooking destroys its effectiveness. The decoction should be served immediately, while warm, for maximum effect. Since essential oils of *Bai Dou Kou* are quite volatile, dry-frying the herb significantly decreases its potency.

CAUTIONS / CONTRAINDICATIONS

- Use of *Bai Dou Kou* is contraindicated in patients with yin or blood deficiency.

CHEMICAL COMPOSITION

Essential oils (1,8-cineol, α-terpineol, α-pinene, β-pinene, humalene, caryophyllene, mycene, p-cymene, humalene epoxide, sabinene, limonene, terpinene-4-ol, myrtenol); saponin, starch.[1,2]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Administration of *Bai Dou Kou* is associated with increased secretion of gastric acid, increased intestinal peristalsis, and decreased vomiting.[3]

SUPPLEMENT

- 白豆蔻殼 / 白豆蔻壳 *Bai Dou Kou Ke* (Pericarpium

Bai Dou Kou (Fructus Amomi Rotundus)

Amomi Rotundus), first cited in *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578, is derived from the shell of *Bai Dou Kou* (Fructus Amomi Rotundus). *Bai Dou Kou Ke* has similar properties and functions to those of *Bai Dou Kou*, but is not as warm in thermal property and milder in potency. *Bai Dou Kou Ke* is most suitable for dampness accumulation and qi stagnation of the chest and abdomen manifesting in a stifling sensation of the chest and poor appetite. Common dosage for *Bai Dou Kou Ke* is 3 to 5 grams.

AUTHORS' COMMENTS

Bai Dou Kou (Fructus Amomi Rotundus) and *Rou Dou Kou* (Semen Myristicae) both warm the middle *jiao* and regulate qi. They are both suitable for deficiency and cold of the Spleen and Stomach with qi stagnation, causing symptoms such as epigastric and abdominal fullness and pain, diarrhea, and vomiting.

- *Bai Dou Kou* regulates qi and relieves nausea and vomiting. It is used more commonly to dry middle *jiao* dampness and relieve abdominal fullness and poor appetite.
- *Rou Dou Kou* is also an astringent and stops chronic diarrhea (especially early morning diarrhea caused by Spleen and Kidney yang deficiencies).

Bai Dou Kou (Fructus Amomi Rotundus), *Rou Dou Kou* (Semen Myristicae), and *Cao Dou Kou* (Semen Alpiniae Katsumadai) have similar pinyin names, but different functions. To avoid confusion, they should not be abbreviated as "*Dou Kou*."

- *Bai Dou Kou* regulates qi, dissolves dampness, and strengthens the Stomach
- *Rou Dou Kou* binds the intestines and stops diarrhea.
- *Cao Dou Kou* warms the middle *jiao* and dries dampness.

Cao Guo (Fructus Tsaoko)

草果 草果

Pinyin Name: *Cao Guo*
Literal Name: "grass fruit"
Original Source: *Yin Shan Zheng Yao* (Correct Guide to Eating and Drinking)
English Name: tsaoko fruit
Botanical Name: *Amomum tsao-ko* Crevost et Lemaire (*Cao Guo*)
Pharmaceutical Name: Fructus Tsaoko
Properties: acrid, warm, aromatic
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Warms the Middle *Jiao*, Dries Dampness

Accumulation of cold and damp in the middle *jiao*: *Cao Guo* (Fructus Tsaoko) treats abdominal coldness and pain, abdominal fullness, nausea, vomiting, diarrhea, and greasy tongue coating.

- Accumulation of damp and cold (more damp) in the middle *jiao*: use *Cao Guo* with *Cang Zhu* (Rhizoma

Cao Guo (Fructus Tsaoko)

Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis) and *Huo Xiang* (Herba Agastache).

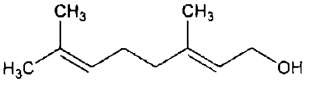
- Accumulation of cold and damp (more cold) in the middle *jiao*: add *Wu Zhu Yu* (Fructus Evodiae) and *Gan Jiang* (Rhizoma Zingiberis).

2. Treats Malaria

Warm and drying, *Cao Guo* treats malaria characterized by cold and dampness.

- Malaria: use it with *Chang Shan* (Radix Dichroae), *Bing Lang* (Semen Arecae), and *Zhi Mu* (Radix Anemarrhenae).

DOSAGE



3 to 6 grams. Frying *Cao Guo* with *Sheng Jiang* (Rhizoma Zingiberis Recens) increases its effectiveness to warm the interior, dispel cold, and relieve pain.

CAUTIONS / CONTRAINDICATIONS

- Warm and drying, *Cao Guo* consumes body fluids and thus is contraindicated in patients with yin deficiency or blood deficiency.

CHEMICAL COMPOSITION

Geraniol.[1,2]

Geraniol

PHARMACOLOGICAL EFFECTS

- **Respiratory:** Components isolated from *Cao Guo* have demonstrated antitussive, expectorant, and antiasthmatic effects.[3]
- **Antibiotic:** Preparations of *Cao Guo* inhibit the growth of some bacteria and pathogenic fungi.[4]

TOXICOLOGY

The LD_{50} for geraniol is 4.8 g/kg in rats via oral administration, and 50 mg/kg in rabbits via intravenous injection.[5]

AUTHORS' COMMENTS

Cao Guo has effects similar to but slightly weaker than *Cao Dou Kou* (Semen Alpiniae Katsumadai).

Cao Dou Kou (Semen Alpiniae Katsumadai)

CHINESE THERAPEUTIC ACTIONS

Warms the Middle *Jiao*, Dries Dampness

Cao Dou Kou (Semen Alpiniae Katsumadai) treats accumulation of cold and dampness in the middle *jiao* characterized by abdominal coldness and pain, vomitus of clear liquids, lack of appetite, loose stools and a white, greasy tongue coat.

- Accumulation of cold and damp in the middle *jiao*: use *Cao Dou Kou* with *Wu Zhu Yu* (Fructus Evodiae) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- Accumulation of damp in the middle *jiao*: use it with *Cang Zhu* (Rhizoma Atractylodis) and *Hou Po* (Cortex Magnoliae Officinalis).
- Chronic diarrhea due to deficiency and cold: add *Rou Gui* (Cortex Cinnamomi), *Gan Jiang* (Rhizoma Zingiberis), and *Rou Dou Kou* (Semen Myristicae).
- Nausea and vomiting due to accumulation of cold phlegm: combine this herb with *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

DOSAGE

3 to 6 grams in decoction. *Cao Dou Kou* should be added at the close of cooking, as prolonged cooking destroys its effectiveness.

CAUTIONS / CONTRAINDICATIONS

- *Cao Dou Kou* is contraindicated in patients who have yin or blood deficiencies.

CHEMICAL COMPOSITION

Essential oil, alpinetin, 7-hydroxy-5-methoxyflavanone, cardamonin, 2,4-dihydroxy-6-methoxychalcone.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *Cao Dou Kou* has an inhibitory effect *in vitro* against *Staphylococcus aureus*, *Bacillus dysenteriae*, and *E. coli*.[2]
- **Gastrointestinal:** A low dose of a *Cao Dou Kou* decoction has a stimulating effect on the intestines, while a large dose of the decoction has an inhibiting effect.[3]

AUTHORS' COMMENTS

Cao Dou Kou (Semen Alpiniae Katsumadai), *Bai Dou Kou* (Fructus Amomi Rotundus), and *Rou Dou Kou* (Semen Myristicae) have similar pinyin names, but different functions. To avoid confusion, they should not be abbreviated as "*Dou Kou*."

- *Cao Dou Kou* warms the middle *jiao* and dries dampness.
- *Bai Dou Kou* regulates qi, dissolves dampness, and strengthens the Stomach
- *Rou Dou Kou* binds the intestines and stops diarrhea.

Chapter 5 summary

— Aromatic Damp-Dissolving Herbs

Name	Similarities	Differences
Cang Zhu (Rhizoma Atractylodis)	Strong aromatic properties to dry dampness	Strongly dries dampness, strengthens the Spleen, dispels wind-dampness
Hou Po (Cortex Magnoliae Officinalis)		Regulates qi, breaks stagnation, relieves bloating and distention, descends Lung qi to relieve dyspnea
Huo Xiang (Herba Agastache)	Dissolve dampness, relieve summer-heat	Dissolves dampness from middle *jiao*, stops vomiting, releases exterior
Pei Lan (Herba Eupatorii)		Mildly releases the exterior
Sha Ren (Fructus Amomi)	Invigorate qi circulation, dissolve dampness	Warms the middle *jiao* to treat diarrhea due to coldness, stabilizes the fetus
Bai Dou Kou (Fructus Amomi Rotundus)		Dissolves dampness in the middle and upper *jiaos*, most suitable for initial stages of vomiting
Cao Guo (Fructus Tsaoko)	Dry dampness, warm middle *jiao*	Dries dampness, treats malaria
Cao Dou Kou (Semen Alpiniae Katsumadai)		Strengthens the Spleen and Stomach

General Characteristics of Aromatic Damp-Dissolving Herbs:

Taste: acrid, bitter
Thermal property: warm and drying
Channels entered: Spleen and Stomach
Therapeutic actions: dissolve dampness, eliminate damp-heat, harmonize the Spleen and Stomach

These aromatic herbs regulate qi, dissolve dampness, and strengthen the Spleen. They are mainly used to treat dampness obstructing the middle *jiao*, summer-dampness, damp-heat and other symptoms related to disharmony of the Spleen and Stomach.

Cang Zhu (Rhizoma Atractylodis) and ***Hou Po*** (Cortex Magnoliae Officinalis), strongest in drying dampness, are the chief herbs used for dry dampness obstructing the middle *jiao*. They are often used together for synergistic effects.

Cang Zhu is one of the most important herbs to dry dampness as it is useful in treatment of both external and internal disorders. It induces perspiration and treats external conditions characterized by accumulation of wind-damp in the muscle and skin level, such as *bi zheng* (painful obstruction syndrome). Internally, it dries dampness, strengthens the Spleen and dispels dampness obstructing the middle *jiao*. It can be combined with bitter and cold herbs like *Huang Bai* (Cortex Phellodendri) to treat damp-heat in the lower *jiao*. Also, this herb brightens the vision and treats cataracts, glaucoma and night blindness.

Hou Po disperses stagnation and relieves epigastric and abdominal fullness and distention. It treats cold accumulation, obstruction by dampness, food stagnation and qi stagnation that are individually or jointly causing bloating, fullness and distention. It regulates qi, warms the middle *jiao*. and disperses fullness caused by cold accumulation with qi stagnation. It redirects Lung qi to relieve dyspnea, cough and phlegm.

Huo Xiang (Herba Agastache) and ***Pei Lan*** (Herba Eupatorii) dissolve dampness and relieve summer-heat.

Chapter 5 summary

Huo Xiang is warm, and more strongly dries dampness. It also harmonizes the Stomach to relieve vomiting. When used topically, *Huo Xiang* treats dermatological disorders, such as fungal infection.

Pei Lan is neutral and mostly used to treat damp-heat accumulation in the middle *jiao* that impairs Spleen function. It also has a mild function to release the exterior.

Sha Ren (Fructus Amomi) and ***Bai Dou Kou*** (Fructus Amomi Rotundus) regulate qi, dissolve dampness and treat dampness obstructing the middle *jiao* accompanied by Spleen and Stomach qi stagnation.

Sha Ren more strongly relieves diarrhea due to cold in the Spleen, and stabilizes the fetus.

Bai Dou Kou more effectively stops vomiting caused by cold and dampness accumulation in the middle *jiao*.

Cao Guo (Fructus Tsaoko) and ***Cao Dou Kou*** (Semen Alpiniae Katsumadai) warm the middle *jiao* and dry dampness, and treat cold and dampness in the Spleen and Stomach.

Cao Guo more strongly dries dampness, and treats malaria.

Cao Dou Kou, acrid and aromatic, strengthens the Spleen.

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH DAMP-DISSOLVING FUNCTIONS

Name	Functional Category
Bai Zhu (Rhizoma Atractylodis Macrocephalae)	Tonic Herbs (Chapter 17)

Chapter 6

— Water-Regulating and Damp-Resolving Herbs

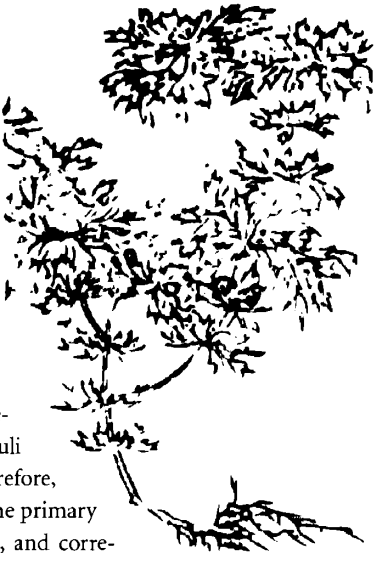
Definition: Substances that regulate water and resolve dampness act to normalize water circulation, eliminate water accumulation and drain dampness.

These herbs function to promote normal urination, increase urinary output, and eliminate bodily accumulation of water and dampness. They are primarily used to treat *lin zheng* (dysuria syndrome), dysuria, anuria, edema, and phlegm accumulation. Other applications include jaundice, sores, febrile disorders, *bi zheng* (painful obstruction syndrome), and leukorrhea.



SUBCATEGORIES OF ACTION

1. ***Promote diuresis***: These sweet and/or bland herbs, neutral or cool, promote diuresis and are commonly used to treat accumulations of water, dampness and phlegm.
2. ***Drain damp-heat***: These herbs are either bitter or sweet, and cold. In addition to promoting diuresis, they drain damp-heat, and are commonly used to treat dysuria, infection in the genito-urinary tract, or stones in the urinary tract.

Differential Diagnosis and Treatment:
Treatment of Water Element disorders requires careful *zang-fu* differential diagnosis. The ***Lung***, ***Spleen*** and ***Kidney*** control the circulation of water:

the ***Spleen*** absorbs water,
the ***Lung*** distributes water, and
the ***Kidney*** eliminates water.

When these organs fail to carry out their normal functions, disease occurs. **Spleen yang deficiency** results in unabsorbed water accumulating in the body as dampness, rather than being efficiently absorbed or processed. **Lung qi deficiency** permits water to accumulate in the Lung and skin, instead of being appropriately distributed. **Kidney yang deficiency** manifests in dysuria and water accumulating in the lower extremities, rather than being promptly eliminated. **Urinary Bladder qi deficiency**, failing to maintain proper volume of urinary output, compromises proper water circulation and contributes to fluid build-up.

Yin Chen Hao (Herba Artemisiae Scopariae)
Ben Cao Gang Mu (Materia Medica),
by Li Shi-Zhen, 1578 A.D.

Complicating factors include increasing levels of combined damp and heat (aptly renamed 'damp-heat') in the lower *jiao*, hematuria, and the formation of urinary calculi [with the resultant inflammation and pain known as '*shi lin*' (stone dysuria)]. Therefore, in addition to selecting herbs that regulate water and drain dampness to address the primary syndrome, successful treatment requires correct diagnosis of any complications, and corresponding modification of herbal choices.

Appropriate treatment to remove (that is, 'drain') accumulations, or to transform damp or phlegm into valuable circulating fluids, may alleviate blockages of qi flow or restore generation of yang energy and thus allow the key organs to regain correct functioning. However, a superior practitioner will be alert to assess whether qi- and/or yang-tonifying herbs are necessary with (or following) treatment of the damp, phlegm, damp-heat or combined accumulations.

Chapter 6 –Water-Regulating and Damp-Resolving Herbs

CAUTIONS/CONTRAINDICATIONS

Decreased urinary output may be the result of *either* accumulation of water in the body *or* deficiency of yin and body fluids. Herbs that regulate water and drain dampness may further deplete yin and body fluids, thus causing further injury to individuals already experiencing these deficiencies.

PROCESSING

Timing of harvest and methods of preparation have a significant impact on the clinical effectiveness of these herbs; so it is wise to observe any processing advice available. Some examples: to achieve maximum therapeutic effectiveness, *Ze Xie* (Rhizoma Alismatis) should be harvested in the fall and winter, but not in the summer. *Ban Bian Lian* (Herba Lobeliae Chinensis) should be harvested prior to flowering. Preparations of fresh or alcohol-processed *Ze Xie* have a much stronger diuretic action than salt-processed *Ze Xie.*

PHARMACOLOGICAL EFFECTS

Many water-regulating and damp-resolving herbs have potent influence to increase the elimination of water and electrolytes.

- **Diuretic:** Many herbs are quite potent in increasing urinary output. While the diuretic influence of these herbs may not strongly affect healthy individuals, it has a significant impact on individuals experiencing edema or chronic nephritis. Herbs with diuretic action include *Fu Ling* (Poria), *Zhu Ling* (Polyporus), *Ze Xie* (Rhizoma Alismatis), *Ban Bian Lian* (Herba Lobeliae Chinensis), *Yu Mi Xu* (Stigma Maydis), *Chuan Mu Tong* (Caulis Clematidis Armandii), *Bian Xu* (Herba Polygoni Avicularis), *Qu Mai* (Herba Dianthi), *Jin Qian Cao* (Herba Lysimachiae) and *Yin Chen Hao* (Herba Artemisiae Scopariae).
- **Antibiotic:** Many herbs inhibit the growth or activity of bacteria, fungi and parasites.
  - Herbs with antibacterial properties include *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), *Ban Bian Lian* (Herba Lobeliae Chinensis), *Zhu Ling* (Polyporus), *Che Qian Zi* (Semen Plantaginis), *Bian Xu* (Herba Polygoni Avicularis), *Jin Qian Cao* (Herba Lysimachiae), *Yin Chen Hao* (Herba Artemisiae Scopariae), *Qu Mai* (Herba Dianthi), and *Chi Xiao Dou* (Semen Phaseoli).
  - Herbs with antifungal effects include *Che Qian Zi* (Semen Plantaginis), *Chuan Mu Tong* (Caulis Clematidis Armandii), *Bian Xu* (Herba Polygoni Avicularis), *Di Fu Zi* (Fructus Kochiae) and *Yin Chen Hao* (Herba Artemisiae Scopariae).
  - Among antiparasitic herbs are *Che Qian Zi* (Semen Plantaginis) and *Yin Chen Hao* (Herba Artemisiae Scopariae).
- **Cholagogic:** Some herbs promote bile secretion, among them: *Yin Chen Hao* (Herba Artemisiae Scopariae), *Ban Bian Lian* (Herba Lobeliae Chinensis), *Yu Mi Xu* (Stigma Maydis), *Bian Xu* (Herba Polygoni Avicularis), and *Jin Qian Cao* (Herba Lysimachiae).
- **Metabolic influence:** *Ze Xie* (Rhizoma Alismatis), *Yin Chen Hao* (Herba Artemisiae Scopariae) and others may lower blood cholesterol and triglyceride levels.

POTENTIAL HERB-DRUG INTERACTIONS

- **Diuretics:** Herbs that regulate water and transform dampness often have diuretic characteristics to eliminate the accumulation of excess water in the body. Therefore, it is prudent to avoid combining these herbs with drugs that exert diuretic effects, as there may be additive or synergistic results. Combination therapy may lead to excessive loss of fluids and electrolytes.[1]

Fu Ling (Poria)

茯苓 茯苓

Pinyin Name: *Fu Ling*
Alternate Chinese Names: *Yun Ling*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: poria, indian bread, tuckahoe
Botanical Name: *Poria cocos* (Schw.) Wolf (*Fu Ling*)
Pharmaceutical Name: Poria
Properties: sweet, bland, neutral
Channels Entered: Heart, Spleen, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Promotes Urination and Resolves Dampness

Accumulation of water and dampness: Because of its neutral thermal property, *Fu Ling* (Poria) is frequently used to promote urination and eliminate dampness without damaging qi. It is commonly used to treat edema, fullness and distention, dysuria, and internal accumulations of water or phlegm. Because it is neutral, *Fu Ling* is useful for conditions that are excess or deficient, hot or cold.

- Dysuria: combine *Fu Ling* with *Zhu Ling* (Polyporus) and *Ze Xie* (Rhizoma Alismatis). **Exemplar Formula:** *Wu Lin San* (Five-Ingredient Powder for Painful Urinary Dysfunction).
- Edema caused by Spleen and Kidney yang deficiencies: use this herb with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Edema with dysuria: combine it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gui Zhi* (Ramulus Cinnamomi).
- Phlegm accumulation: add *Zhu Ling* (Polyporus) and *Ze Xie* (Rhizoma Alismatis).
- Phlegm accumulation with Spleen deficiency: increase dosage of *Fu Ling*, or add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Phlegm accumulation with vertigo: combine it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Tian Ma* (Rhizoma Gastrodiae).

2. Strengthens the Spleen

Spleen qi deficiency: Spleen qi deficiency is the leading cause of accumulation of dampness in the body. *Fu Ling* strengthens and tonifies the Spleen to treat edema, loose stools, fatigue, poor appetite and lack of energy.

- Loose stools because of Spleen qi deficiency: combine this herb with *Ren Shen* (Radix Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). **Exemplar Formula:** *Shen Ling Bai Zhu San* (Ginseng, Poria and Atractylodes Macrocephala Powder).
- Irritable bowel syndrome from Spleen qi deficiency: add *Gui Zhi* (Ramulus Cinnamomi), *Bai Shao* (Radix Paeoniae Alba), *Gan Cao* (Radix Glycyrrhizae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Mu Xiang* (Radix Aucklandiae), *Rou Dou Kou* (Semen Myristicae) and *Wu Zhu Yu* (Fructus Evodiae).

3. Calms the *Shen* (Spirit)

***Shen* disturbance:** *Fu Ling* calms the *shen* to treat insomnia and palpitations caused either by deficiency of the Heart and Spleen, or by phlegm obstructing the Heart.

- Insomnia and palpitations caused by deficiency of the Heart and Spleen: combine *Fu Ling* with *Dang Shen* (Radix Codonopsis), *Long Yan Rou* (Arillus Longan), and *Suan Zao Ren* (Semen Zizyphi Spinosae).
- Insomnia and palpitations because of phlegm obstructing the Heart: use it with *Shi Chang Pu* (Rhizoma Acori) and *Yuan Zhi* (Radix Polygalae Tenufoliae).

DOSAGE

10 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Fu Ling* with caution in patients with yin deficiency and/or spermatorrhea.

CHEMICAL COMPOSITION

Pachymose, pachyman, pachymaran, tumulosic acid, poriaic acid A, B, C.[1]

Fu Ling (Poria)

PHARMACOLOGICAL EFFECTS

- **Diuretic:** There are conflicting reports on the diuretic influence of *Fu Ling*. In one study, a 70% alcohol extract of *Fu Ling* (the alcohol was removed prior to administration) was associated with a significant increase in urine output in healthy rabbits. In another study, intravenous injection of water extract of *Fu Ling* showed no diuretic effect in dogs or mice.[2]
- **Antineoplastic**: *Fu Ling* as such does not have antineoplastic activity. However, a derivative of pachyman inhibits cancer cell activity in mice with sarcoma.[3]
- **Sedative:** Intraperitoneal injection of a decoction of *Fu Shen* (Poria Paradicis) had a mild sedative effect in mice previously dosed with or without caffeine.[4]
- **Antibiotic:** Water decoction of *Fu Ling* has a bacteriostatic effect on *Staphylococcus aureus, E. coli,* and *Bacillus proteus,* and the alcohol-extracted form has a bactericidal effect against leptospira.[5,6]

CLINICAL STUDIES AND RESEARCH

- **Edema:** Thirty patients with edema were treated with a preparation of *Fu Ling*, with marked effectiveness in 23 cases and moderate effectiveness in 7 cases. The herbs were given in the form of cookies, each containing at least 30% (3.5 grams) *Fu Ling*. The treatment protocol was to ingest 8 cookies, three times daily for 7 days, for each course of treatment. The dosage was adjusted for children. All other diuretics were discontinued prior to herbal treatment.[7]
- **Tumor**: A preparation of *Fu Ling* was evaluated for its antineoplastic effect in 70 patients in an oncology hospital in Fuzhou, China. Some patients received herbal treatment only, while others used it in conjunction with chemotherapy, radiation, and/or surgery. It was observed that *Fu Ling* strengthens the body, enhances the immune system, improves liver and kidney functions, improves appetite, supports increased body weight, and minimizes the adverse reactions associated with chemotherapy.[8]
- **Schizophrenia:** In one study, 53 patients with chronic schizophrenia were treated with 60 grams of *Fu Ling* in decoction once daily for 1 to 3 months. The study reported complete recovery in 3 cases, moderate improvement in 11 cases, slight improvement in 16 cases, and no response in 23 cases.[9]

HERB-DRUG INTERACTION

- **Ethanol:** In an *in vitro* study, a traditional Chinese medicinal preparation including *Fu Ling, Ren Shen* (Radix Ginseng), *Yuan Zhi* (Radix Polygalae Tenufoliae), and *Shi Chang Pu* (Rhizoma Acori) was found to reduce the ethanol-induced impairment of memory registration. It also ameliorated the scopolamine-induced memory registration deficit. These results suggest that this herbal preparation ameliorates the impairment effect of ethanol on learning and memory processes.[10]
- **Diuretics:** Although no documented cases of this interaction have been reported, it is prudent to avoid combination of herbs and drugs that exert diuretic effects, as there may be additive or synergistic effects. Combination therapy may lead to excessive loss of fluid and electrolytes.[11] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

No significant adverse reactions or side effects were reported following toxicology studies in dogs. When *Fu Ling* was given to mice for 2 weeks at a dosage 500 times the normal adult dose, a slight decrease in body weight and increase in white blood cell counts was noted.[12,13]

SUPPLEMENT

Various segments of this fungal herb have differing functions and names.

- 茯苓皮 / 茯苓皮 *Fu Ling Pi* (Cortex Poria), the outer layer, is the better choice to eliminate dampness. It has the same properties and taste as *Fu Ling*. The strongest functions of *Fu ling Pi* are to dispel edema and promote urination. It is commonly combined with *Sheng Jiang Pi* (Pericarpium Zingiberis Recens), *Sang Bai Pi* (Cortex Mori) and *Da Fu Pi* (Pericarpium Arecae). Recommended dose in decoctions for *Fu Ling Pi* is 10 to 15 grams.
- 白茯苓 / 白茯苓 *Bai Fu Ling* (Poria Alba), the inner part, functions best to strengthen the Spleen. *Bai Fu Ling* and *Fu Ling* are generally considered to be interchangeable names for the same herb.
- 赤茯苓 / 赤茯苓 *Chi Fu Ling* (Poria Rubrae), the outer, light red layer, treats damp-heat. It treats *re lin* (heat dysuria).
- 茯神 / 茯神 *Fu Shen* (Poria Paradicis), the innermost part surrounding the root, has stronger *shen* (spirit)-calming influence to treat insomnia, forgetfulness and palpitations.

AUTHORS' COMMENTS

Fu Ling is a fungus that may be thinly sliced, in typical white 'curls,' or cut into blocks approximately 2 cm thick. For decoctions, select the thin cut: the greater exposed surface area of the curls permits maximum extraction of active constituents. The dense nature of the block cut prevents full penetration by the water during cooking. Even after cooking, a block of *Fu Ling* may be completely dry in the center.

Fu Ling and *Zhu Ling* (Polyporus) both are commonly

Fu Ling (Poria)

used to regulate water. *Fu Ling* dispels dampness and benefits the Heart and Spleen; therefore it is often added to tonic herbs to promote restored organ function. *Zhu Ling* has a stronger diuretic function than *Fu Ling* but does not serve as a tonic. It is used mostly to dispel dampness but does not restore the body's ability to regulate water.

In the past, *Fu Ling* was coated with *Zhu Sha* (Cinnabaris) at times for the purpqse of calming the *shen* (spirit). However, this is rarely done now.

Zhu Ling (Polyporus)

豬苓 猪苓

Pinyin Name: *Zhu Ling*
Literal Name: "pig's fungus"
Alternate Chinese Names: *Zhu Shi Ling*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: polyporus
Botanical Name: *Polyporus umbellatus* (Pers.) Fries (*Zhu Ling*)
Pharmaceutical Name: Polyporus
Properties: sweet, bland, neutral
Channels Entered: Kidney, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

Promotes Urination and Resolves Dampness

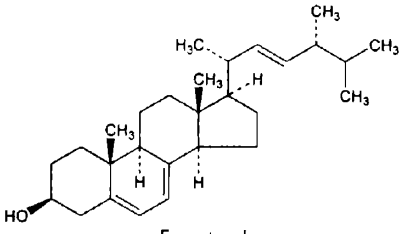
Accumulation of water and dampness: Bland and neutral, *Zhu Ling* (Polyporus) promotes urination, eliminates dampness and water accumulation, and treats edema, scanty urine, jaundice, diarrhea, and *lin zheng* (dysuria syndrome).

- Generalized edema: use *Zhu Ling* individually
- Edema arising from Spleen deficiency: use it with *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Fever, dysuria, thirst, and irritability caused by accumulation of water and heat with yin deficiency: use *Zhu Ling* with *Hua Shi* (Talcum) and *E Jiao* (Colla Corii Asini). **Exemplar Formula:** *Zhu Ling Tang* (Polyporus Decoction).
- *Lin zheng* (dysuria syndrome) resulting from dampness and heat: use it with *Chuan Mu Tong* (Caulis Clematidis Armandii), *Che Qian Zi* (Semen Plantaginis) and *Hua Shi* (Talcum).
- Diarrhea caused by cold-damp accumulation in the intestines: combine it with *Rou Dou Kou* (Semen Myristicae) and *Huang Bai* (Cortex Phellodendri).

Zhu Ling (Polyporus)

- Epigastric distention and fullness: use it with *Bian Xu* (Herba Polygoni Avicularis), *Qu Mai* (Herba Dianthi), *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Hua Shi* (Talcum).
- Jaundice: combine *Zhu Ling* with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae), *Huang Bai* (Cortex Phellodendri), *Ze Xie* (Rhizoma Alismatis) and *Da Huang* (Radix et Rhizoma Rhei).

DOSAGE



5 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- *Zhu Ling* is not recommended for patients with dizziness caused by yin deficiency, or those experiencing thirst and dampness.

CHEMICAL COMPOSITION

Ergosterol, biotin, polyporenic acid A, C; polyporusterone.[1,2]

Ergosterol

PHARMACOLOGICAL EFFECTS

- **Diuretic**: Intravenous or intramuscular injections of *Zhu Ling* decoction in dogs increases the excretion of water, sodium, chloride, and potassium.[3]
- **Antineoplastic**: A preparation of *Zhu Ling* inhibited the growth of cancer cells in mice with liver cancer.[4]
- **Antibiotic**: Alcohol extract of *Zhu Ling* has an inhibitory influence on *Staphylococcus aureus* and *E. coli*.[5]
- **Immunologic**: Administration of a *Zhu Ling* preparation is associated with an increased production of and greater activity in the T-cells.[6]
- **Hepatoprotective**: Intraperitoneal injection of a *Zhu Ling* preparation has a protective effect against carbon tetrachloride-induced hepatitis in rats.[7,8]

CLINICAL STUDIES AND RESEARCH

- **Tumor**: Administration of a *Zhu Ling* preparation was associated with a positive effect in enhancing the immune system and suppressing the growth of cancer cells in 200 patients with lung cancer, 40 patients with leukemia, and 68 patients with liver, nose or throat cancers. No significant side effects were reported.[9]
- **Psoriasis**: Intramuscular injections of *Zhu Ling* twice daily for 2 weeks or more was effective in treating psoriasis patients. Out of 265 cases, 83 showed complete remission, 67 showed moderate improvement, 79 showed slight improvement, and 36 had no response. Out of 83 cases who were in complete remission, 13 later had a recurrence. The overall rate of effectiveness was 86.4%.[10]
- **Chronic viral hepatitis**: Intramuscular injection of a *Zhu Ling* preparation was effective in treating 359 patients with chronic viral hepatitis. The treatment protocol was 20 days of therapy followed by 10 days of rest, for a total of 3 months per course of treatment. Therapeutic effects included symptomatic improvement and a decrease in liver enzyme levels. No significant side effects or adverse reactions were reported.[11]

HERB-DRUG INTERACTION

- **Diuretics**: Although no documented cases of this interaction have been reported, it is prudent to avoid combination of herbs and drugs that exert diuretic effects, as there may be additive or synergistic effects, possibly leading to excessive loss of fluids and electrolytes.[12] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

No fatalities or organ abnormalities were reported in mice following a bolus dose of *Zhu Ling* at 2,000 times the normal adult dose, or after continuous administration for 28 days at 100 times the normal adult dose.[13]

AUTHORS' COMMENTS

Zhu Ling has similar diuretic functions to those of *Fu Ling* (Poria), but is stronger. See Authors' Comment, *Fu Ling*.

Ze Xie (Rhizoma Alismatis)

澤瀉 泽泻

Pinyin Name: *Ze Xie*
Literal Name: "marsh drain"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: alisma, Oriental water plantain rhizome
Botanical Name: *Alisma orientalis* (Sam.) Juzep. (*Ze Xie*)
Pharmaceutical Name: Rhizoma Alismatis
Properties: sweet, bland, cold
Channels Entered: Kidney, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Regulates Water Circulation and Resolves Dampness

Water and dampness accumulation: *Ze Xie* (Rhizoma Alismatis) has a potent function to regulate water circulation and resolve dampness. It treats edema, *lin zheng* (dysuria syndrome), urinary disorders, vertigo, and other disorders characterized by accumulation of water and dampness.

- Generalized edema: use *Ze Xie* with *Fu Ling* (Poria) and *Zhu Ling* (Polyporus).
- Edema in pregnancy: use it with *Sang Bai Pi* (Cortex Mori), *Zhi Ke* (Fructus Aurantii), *Sang Ji Sheng* (Herba Taxilli), *Fu Ling* (Poria) and *Da Fu Pi* (Pericarpium Arecae).
- *Shi lin* (stone dysuria): combine it with *Hai Jin Sha* (Herba Lygodii), *Jin Qian Cao* (Herba Lysimachiae), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Ze Lan* (Herba Lycopi), *Dong Kui Zi* (Semen Malvae) and *Zhu Ling* (Polyporus).
- *Shi-re lin* (damp-heat dysuria): combine this herb with *Hua Shi* (Talcum) and *Che Qian Zi* (Semen Plantaginis).
- *Gao lin* (cloudy dysuria): use it with *Fu Ling* (Poria), *Hai Jin Sha* (Herba Lygodii), *Hua Shi* (Talcum) and *Bi Xie* (Rhizoma Dioscoreae Hypoglaucae).
- Vertigo, dizziness, and tinnitus due to phlegm accumulation: use it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Damp-heat in the Liver and Gallbladder, manifesting in jaundice, red eyes, hypochondriac pain, nausea, poor appetite, and scanty dark urine: combine *Ze Xie* with *Chai Hu* (Radix Bupleuri), *Long Dan Cao* (Radix Gentianae), *Huang Qin* (Radix Scutellariae), *Yin Chen Hao* (Herba Artemisiae Scopariae), *Qing Dai* (Indigo Naturalis) and *Che Qian Zi* (Semen Plantaginis).

2. Clears Deficiency Fire from the Kidney

Ze Xie treats spermatorrhea, nocturnal emissions, and premature ejaculation, which are symptoms commonly associated with the rising fire from Kidney yin deficiency.

- Deficiency fire from the Kidney: use *Ze Xie* with *Sheng Di Huang* (Radix Rehmanniae), *Zhi Mu* (Radix Anemarrhenae) and *Huang Bai* (Cortex Phellodendri).

DOSAGE

5 to 10 grams. Use up to 15, 18 or even 30 grams of *Ze Xie* in severe cases. The unprocessed herb greatly strengthens the Spleen and regulates water, and is commonly used for treating edema, dysuria, and jaundice. Frying *Ze Xie* with salt enhances its effect of nourishing yin, purging heat and regulating water circulation. Salt-fried *Ze Xie* is commonly used to treat knee and lower back weakness and pain. Dry-frying the herb enhances its strengthening influence on the Spleen, commonly helping to resolve diarrhea and vertigo.

CHEMICAL COMPOSITION

Alisol A, alisol B, alisol A monoacetate, alisol B monoacetate, alisol C monoacetate, epialisol A, alismol, alismoxide, alismin, starch, protein, essential oil.[1]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Administration of *Ze Xie* is associated with marked diuretic effects. However, it is not clear whether there is also an increase in excretion of sodium and potassium.[2]
- **Antihyperlipidemic:** In one study, *Ze Xie* was effective in treating hyperlipidemia, arteriosclerosis and fatty liver.[3]
- **Antihypertensive:** Intravenous injection of an extract of *Ze Xie* had a mild antihypertensive effect that lasted approximately 30 minutes.[4]

Ze Xie (Rhizoma Alismatis)

CLINICAL STUDIES AND RESEARCH

- **Hypercholesterolemia:** Extract of *Ze Xie* (dosage equivalent to 27 grams of dried herb per day) given three times daily for one month showed good results in 110 patients with high cholesterol and triglyceride levels. There was a 9% reduction of these levels in the 44 patients with the highest cholesterol levels, with the average dropping from 258.4 mg/dL to 235.2 mg/dL. There was a 10% or higher reduction of levels in approximately 50% of all patients. Of 103 patients with high triglyceride levels, the average dropped from 337.1 mg/dL to 258.0 mg/dL.[5]
- **Dizziness and vertigo:** In one study, 55 patients with dizziness and vertigo reported complete recovery following treatments with an herbal decoction. The herbal formula contained 30 to 60 grams of *Ze Xie* and 10 to 15 grams of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). The patients were instructed to take the decoction twice daily. The duration of treatment was between 1 and 9 days.[6]

HERB-DRUG INTERACTION

- **Diuretics:** Although no documented cases of this interaction have been reported, it is prudent to avoid combination of herbs and drugs that exert diuretic effects, as there may be additive or synergistic effects. Combination therapy may lead to excessive loss of fluids and electrolytes. [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).][7]

TOXICOLOGY

Oral administration of an extract of *Ze Xie* at 1 g/kg and 2 g/kg in rats (20 and 40 times the normal adult dose, respectively) for 3 months showed no tendency to cause abnormalities of the internal organs. The LD_{50} for an alcohol extract of *Ze Xie* in rats is 0.98 g/kg via intravenous injection and 1.27 g/kg via intraperitoneal injection.[8]

AUTHORS' COMMENTS

Tonic herbs may create unnecessary heat in the body, causing the formation and rising of Kidney fire. *Ze Xie* is frequently combined with tonic herbs to prevent this side effect, such as in *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

Ze Xie, *Zi Su Ye* (Folium Perillae), *Shi Chang Pu* (Rhizoma Acori), and *Shan Zha* (Fructus Crataegi) taken as tea on a daily basis, are effective to reduce body weight and lower cholesterol levels.

Yi Yi Ren (Semen Coicis)

薏苡仁 薏苡仁

Pinyin Name: *Yi Yi Ren*
Alternate Chinese Names: *Mi Ren, Yi Ren, Yi Mi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: coix seeds, Job's tears
Botanical Name: *Coix lacryma-jobi* L. var. *ma-yuen* (Roman) Stapf (*Yi Yi*)
Pharmaceutical Name: Semen Coicis
Properties: sweet, bland, cool
Channels Entered: Spleen, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen and Resolves Dampness

Dampness accumulation due to Spleen deficiency: Clinical presentations of this imbalance include leg *qi*, damp febrile disorders, edema, and *lin zheng* (dysuria syndrome). The sweet, bland, cool properties of *Yi Yi Ren* (Semen Coicis) make it particularly useful to strengthen the Spleen and address imbalances including dampness and other water element difficulties.

- Accumulation of dampness and Spleen deficiency: combine *Yi Yi Ren* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Bian Dou* (Semen Lablab Album) and *Chi Xiao Dou* (Semen Phaseoli).
- Shortness of breath due to water accumulation: use this herb in combination with *Yu Li Ren* (Semen Pruni).
- *Re lin* (heat dysuria): use it with *Che Qian Zi* (Semen Plantaginis) and *Hua Shi* (Talcum).
- *Shi lin* (stone dysuria): add *Hai Jin Sha* (Herba Lygodii) and *Jin Qian Cao* (Herba Lysimachiae).
- Deficiency of the Spleen and Stomach, with loose stools and decreased food intake: combine this herb with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Shan Yao* (Rhizoma Dioscoreae).
- Damp febrile disorders with feelings of oppression in the chest, lack of appetite, and a thick, greasy tongue coat: use it with *Xing Ren* (Semen Armeniacae Amarum), *Bai Dou Kou* (Fructus Amomi Rotundus) and *Hou Po* (Cortex Magnoliae Officinalis).

2. Resolves Dampness and Relieves Pain

***Bi zheng* (painful obstruction syndrome):** *Yi Yi Ren* eliminates dampness from the muscles to relieve pain. It is best for tightness and spasms of the tendons restricting flexibility. It also effectively treats muscle, joint and tendon pain caused by accumulated dampness.

- *Bi zheng* due to dampness: cook *Yi Yi Ren* and rice as porridge on a daily basis.
- *Bi zheng* due to the accumulation of wind and dampness at the exterior: use it with *Ma Huang* (Herba Ephedrae), *Xing Ren* (Semen Armeniacae Amarum) and *Gan Cao* (Radix Glycyrrhizae).
- *Bi zheng* due to wind and dampness: combine it with *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi), and *Cang Zhu* (Rhizoma Atractylodis). **Exemplar Formula:** *Yi Yi Ren Tang* (Coicis Decoction).
- *Wei* (atrophy) syndrome and muscle weakness due to damp-heat: add it to *Cang Zhu* (Rhizoma Atractylodis), *Huang Bai* (Cortex Phellodendri) and *Niu Xi* (Radix Cyathulae seu Achyranthis). **Exemplar Formula:** *Si Miao San* (Four-Marvel Powder).

3. Clears Heat and Dispels Pus

By entering the Lung channel with its cooling influence, *Yi Yi Ren* treats lung abscesses characterized by purulent, thick sputum containing pus and blood, and cough with nasal discharge. It also treats intestinal abscesses, by virtue of the organ partnership between the Lung and Large Intestine.

- Lung abscess: use *Yi Yi Ren* with *Dong Gua Zi* (Semen Benincasae) and *Tao Ren* (Semen Persicae).
- Suppurated lung abscesses with profuse, thick, bloody sputum: add *Jie Geng* (Radix Platycodonis) and *Bai Ji* (Rhizoma Bletillae).
- Intestinal abscess: combine this herb with *Mu Dan Pi* (Cortex Moutan), *Tao Ren* (Semen Persicae) and *Bai Jiang Cao* (Herba cum Radice Patriniae).
- Acute appendicitis: use it with *Jin Yin Hua* (Flos

Yi Yi Ren (Semen Coicis)

Lonicerae), *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Di Yu* (Radix Sanguisorbae), *Huang Qin* (Radix Scutellariae), *Da Huang* (Radix et Rhizoma Rhei) and *Mu Dan Pi* (Cortex Moutan). **Exemplar Formula:** *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction).

DOSAGE

10 to 30 grams. *Yi Yi Ren* may be taken as decoction, pills, powder, and food (porridge or other preparations). *Yi Yi Ren* must be taken at large dosages for a long time, since it is relatively mild. The unprocessed herb functions better to clear heat and regulate water circulation. The dry-fried herb has enhanced effectiveness to tonify the Spleen and relieve diarrhea.

CAUTIONS / CONTRAINDICATIONS

- Use *Yi Yi Ren* with caution in patients with spermatorrhea and polyuria.
- *Yi Yi Ren* is contraindicated during pregnancy.

CHEMICAL COMPOSITION

Coixol, coixenolide, coixan A, B, C; protein, lipids.[1]

PHARMACOLOGICAL EFFECTS

- **Antineoplastic**: Alcohol extract of *Yi Yi Ren* is associated with mild antineoplastic action according to some *in vitro* studies.[2]
- **Effects on muscles**: Administration of essential oil of *Yi Yi Ren* is associated with an inhibitory effect on the skeletal muscle, a stimulating effect on the smooth muscle of the uterus, and varied effects on the smooth muscle of the intestines.[3]
- **Sedative, analgesic and antipyretic** properties have been observed, in relatively mild degrees.[4]

CLINICAL STUDIES AND RESEARCH

- **Flat Warts**: In one study, patients with flat warts were treated with 60 grams of *Yi Yi Ren* taken daily as food, for 7 to 16 days. Out of 23 patients, 11 showed complete recovery, 6 showed mild improvement, and 6 showed no response.[5]

SUPPLEMENT

- 薏苡根 / 薏苡根 *Yi Yi Gen* (Radix Coicis), first cited in the *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is derived from the same plant as *Yi Yi Ren* (Semen Coicis). Bitter, sweet and cold, *Yi Yi Gen* clears heat and dispels dampness. Clinical applications include *re lin* (heat dysuria), *xue lin* (bloody dysuria), edema and lung abscesses. It also dispels roundworms. Suggested dosage for *Yi Yi Gen* is 10 to 15 grams. When using this herb in the fresh form, the dosage is 30 to 60 grams. *Yi Yi Gen* is contraindicated during pregnancy.

AUTHORS' COMMENTS

Yi Yi Ren is one of the most helpful herbs for treatment of acne. It is combined with *Qing Shang Fang Feng Tang* (Clear the Upper and Guard the Wind Decoction) to treat acne with whiteheads. It is used with *Huang Lian Shang Qing Wan* (Coptis Pills to Clear the Upper) to treat acne pustules that are red and inflamed.

According to Dr. Yin Hui-He, when treating patients with Large Intestine disorders that manifest in pus or blood in the stools, accompanied by feelings of incomplete evacuation after defecation, herbs such as *Yi Yi Ren* (Semen Coicis), *Tao Ren* (Semen Persicae), *Dong Gua Zi* (Semen Benincasae) and *Huang Qin* (Radix Scutellariae) are useful. They enter the Lung, the paired organ of the Large Intestine, and drain dampness. This principle can also be applied when treating inflammatory bowel disorders.

Che Qian Zi (Semen Plantaginis)

車前子 车前子

Pinyin Name: *Che Qian Zi*
Literal Name: "seed in front of cart," "seed-before-cart," "before the cart seeds"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: plantago seed, asiatic plantain seed, plantain seed
Botanical Name: *Plantago asiatica* L. (*Che Qian*); *Plantago depressa* Willd (*Ping Che Qian*)
Pharmaceutical Name: Semen Plantaginis
Properties: sweet, cold
Channels Entered: Kidney, Urinary Bladder, Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Damp-Heat and Resolves Dampness

***Lin zheng* (dysuria syndrome) and edema:** Sweet and cold, *Che Qian Zi* (Semen Plantaginis) dispels damp-heat from the lower *jiao*. It treats edema and *re lin* (heat dysuria). Clinical manifestations include: burning dysuria, urgency with inability to urinate, painful urination, and dribbling urination with pain and swelling.

- *Shi-re lin* (damp-heat dysuria): use *Che Qian Zi* with *Chuan Mu Tong* (Caulis Clematidis Armandii), *Hua Shi* (Talcum) and *Zhi Zi* (Fructus Gardeniae). **Exemplar Formula:** *Ba Zheng San* (Eight-Herb Powder for Rectification).
- Edema: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis).

2. Resolves Dampness and Stops Diarrhea

Dampness accumulation in the intestines causing diarrhea: *Che Qian Zi* consolidates and hardens the stool by promoting urination. It is usually used alone in powder form for this purpose.

- Diarrhea due to summer-damp: use *Che Qian Zi* with *Xiang Ru* (Herba Elsholtziae seu Moslae) and *Huo Xiang* (Herba Agastache).
- Diarrhea with dysuria: use it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).
- Summer diarrhea in children: combine it with *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Gan Cao* (Radix Glycyrrhizae), *Fu Ling* (Poria) and *Chen Pi* (Pericarpium Citri Reticulatae).

3. Clears Liver Heat and Benefits the Eyes

Eye disorders: *Che Qian Zi* treats eye problems caused by Liver fire, and headaches provoked by Liver yang rising.

- Eye redness, swelling and pain from Liver fire: use this herb with *Huang Lian* (Rhizoma Coptidis), *Jue Ming Zi* (Semen Cassiae), *Man Jing Zi* (Fructus Viticis), *Sang Ye* (Folium Mori), *Mi Meng Hua* (Flos Buddlejae) and *Ju Hua* (Flos Chrysanthemi).
- Headache due to Liver yang rising: combine it with herbs that anchor Liver yang, such as *Shi Jue Ming* (Concha Haliotidis).

Dizziness and blurred vision due to Liver and Kidney deficiencies: *Che Qian Zi* supports healing of deficiency-induced eye disorders.

- Dizziness and blurred vision: add *Shu Di Huang* (Radix Rehmanniae Preparata), *Shi Hu* (Herba Dendrobii), *Gou Qi Zi* (Fructus Lycii) and *Tu Si Zi* (Semen Cuscutae).

4. Clears the Lung and Dissolves Phlegm

Cough due to Lung heat: *Che Qian Zi* treats cough with thick yellow sputum caused by Lung heat.

- Cough from Lung heat: use it with *Huang Qin* (Radix Scutellariae), *Yu Xing Cao* (Herba Houttuyniae), and *Bei Mu* (Bulbus Fritillaria).
- Lung yin deficiency cough: add *Mai Men Dong* (Radix Ophiopogonis) and *Nan Sha Shen* (Radix Adenophorae).

DOSAGE

5 to 10 grams. Place *Che Qian Zi* in cheesecloth when decocting to maximize cooking efficiency (this prevents the seeds from floating to the top and sides of the cooking pot). Frying the herb with salt directs the effects to the lower parts of the body, thus enhancing its tonic influence on the Liver and Kidney. In addition, frying with salt facilitates and increases extraction of active components.

Che Qian Zi (Semen Plantaginis)

CHEMICAL COMPOSITION

Planterolic acid, plantagin, plantenolic acid, plantasan, D-xylose, D-galacturonic acid, L-rhamnose, D-galactose, L-arabinose.[1]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** There are conflicting reports on the effectiveness of *Che Qian Zi* as a diuretic. While older reports stated that the herb may increase excretion of urine, newer reports on healthy humans and animals showed no diuretic effect.[2,3]
- **Antitussive and expectorant:** Both *Che Qian Zi* and *Che Qian Cao* (Herba Plantaginis) have expectorant and antitussive effects (see supplemental discussion below).[4]

CLINICAL STUDIES AND RESEARCH

- **Infantile diarrhea**: In one study, 63 of 69 infants with diarrhea showed complete recovery within 1 to 2 days following treatment using an herbal decoction containing 30 grams of *Che Qian Zi* and a small amount of sugar.[5]

HERB-DRUG INTERACTION

- **Absorption:** *Che Qian Zi* may reduce the absorption of oral medications, such as lithium.[6] It may also inhibit the absorption of carbohydrates, thus requiring the adjustment of insulin dosage in diabetic patients.[7]
- **Diuretics:** Although no documented cases of this interaction have been reported, it is prudent to avoid combination of herbs and drugs that exert diuretic effects, as there may be additive or synergistic effects. Combination therapy may lead to excessive loss of fluids and electrolytes. [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).][8]

TOXICOLOGY

No abnormalities were noted following oral administration of *Che Qian Zi* in rats at 2 to 3 g/kg for 28 days and in dogs at 3 to 5 g/kg for 3 weeks.[9]

SUPPLEMENT

- 車前草 / 车前草 *Che Qian Cao* (Herba Plantaginis), first cited in *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is the entire plant that produces the seeds called *Che Qian Zi*. *Che Qian Cao* is sweet, cold and enters the Liver, Kidney, Lung, and Small Intestine channels. It has functions similar to those of *Che Qian Zi* to dispel water, clear heat, brighten the eyes, dispel phlegm and stop coughing. Clinical applications of *Che Qian Cao* include edema, *lin zheng* (dysuria syndrome), redness and swelling of the eyes, and Lung heat with cough. It is most effective for ulcers or acute diarrhea or dysentery caused by toxic heat. Recommended dosage for *Che Qian Cao* is 10 to 15 grams. When using the fresh form, double the dosage. *Che Qian Cao* is also used as a topical substance to treat ulcers and sores.

  Che Qian Cao has been used to effectively treat bacterial dysentery. According to one report, 88 patients with acute or chronic bacterial dysentery were treated with an herbal decoction, with 71.6% showing complete recovery and a total of 84% showing marked improvement. The herbal decoction contained 100% fresh *Che Qian Cao*. Patients were instructed to take 60 to 120 ml per dose, three times daily (or every 4 hours), for 7 to 10 days. Some patients received up to 200 ml per dose and some were treated for up to one month.[10]

AUTHORS' COMMENTS

There are many species of plantago within the family of Plantaginaceae. In traditional Chinese medicine, *Plantago depressa* and *Plantago asiatica* are the two commonly-used species, for they are widely available on the Asian continent. Beyond the Asian continent, *Plantago psyllium* and *Plantago arenaria* can be found in Spain, and *Plantago ovata* is found in southern Europe and northern Africa. According to the literature, all species of plantago have similar functions and indications and can be used interchangeably. Therapeutic effects include diuresis, promotion of regular bowel movement, and antibacterial and antifungal effects.

Hua Shi (Talcum)

滑石 滑石

Pinyin Name: *Hua Shi*
Literal Name: "slippery rock"
Alternate Chinese Names: *Fei Hua Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: talc
Pharmaceutical Name: Talcum
Properties: sweet, bland, cold
Channels Entered: Stomach, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Resolves Dampness

***Lin zheng* (dysuria syndrome):** Cold in nature, *Hua Shi* (Talcum) enters the Urinary Bladder channel to clear heat and promote normal diuresis. It is one of the most commonly used herbs in treatment of various *lin zheng*.

- *Re lin* (heat dysuria) with burning and pain during urination: combine *Hua Shi* with *Chuan Mu Tong* (Caulis Clematidis Armandii). **Exemplar Formula:** *Ba Zheng San* (Eight-Herb Powder for Rectification).
- *Shi-re lin* (damp-heat dysuria) with pain and cloudy urine: add *Che Qian Zi* (Semen Plantaginis), *Zhi Zi* (Fructus Gardeniae) and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- *Shi lin* (stone dysuria): use it with *Jin Qian Cao* (Herba Lysimachiae), *Hai Jin Sha* (Herba Lygodii) and *Shi Wei* (Folium Pyrrosiae).
- *Xue lin* (bloody dysuria): combine it with *Da Ji* (Herba seu Radix Cirsii Japonici), *Ce Bai Ye* (Cacumen Platycladi), and *Bai Mao Gen* (Rhizoma Imperatae).

2. Clears Summer-Heat

Hua Shi clears summer-heat to treat irritability, thirst, dysuria and watery diarrhea.

- Summer-heat: combine *Hua Shi* with *Gan Cao* (Radix Glycyrrhizae) at a six-to-one ratio. **Exemplar Formula:** *Liu Yi San* (Six-to-One Powder).
- Heatstroke with vomiting and diarrhea: use *Hua Shi* with *Huo Xiang* (Herba Agastache), *Pei Lan* (Herba Eupatorii), *Zhu Ru* (Caulis Bambusae in Taenia) and *Ban Xia* (Rhizoma Pinelliae).
- Damp febrile disorder obstructing the *qi* (energy) level with unremitting fever, heavy sensations of the body and limbs, poor appetite, listlessness with thick, greasy coating and slippery pulse: add *Huang Qin* (Radix Scutellariae) and *Tong Cao* (Medulla Tetrapanacis).

3. Topical Use to Clear Heat and Dry Dampness

Dermatological disorders: Clinical applications include eczema, rash, athlete's foot, sudamen, and other damp skin disorders.

- Dermatological disorders: use *Hua Shi* with *Duan Shi Gao* (Gypsum Fibrosum Preparata). Apply as powder, topically.

DOSAGE

10 to 15 grams. *Hua Shi* should be wrapped in cheesecloth for decoction.

CAUTIONS / CONTRAINDICATIONS

- Use care when giving *Hua Shi* to patients who have Spleen deficiency, spermatorrhea, polyuria and/or febrile disorders with consequent consumption of body fluids.

CHEMICAL COMPOSITION

$Mg_3(Si_4O_{10})(OH)_2$ [1]

PHARMACOLOGICAL EFFECTS

- **Effects on skin and mucous membranes:** *Hua Shi* has small particles and a large surface area. Applied externally, *Hua Shi* absorbs large amounts of chemicals and toxins to protect the skin from irritation. Taken internally, *Hua Shi* protects the stomach lining from gastritis, suppresses nausea and vomiting, and reduces the absorption of toxins through the intestinal tract.[2]

Hua Shi (Talcum)

CLINICAL STUDIES AND RESEARCH

- **Urinary tract infection:** In one study, 30 grams of *Hua Shi* and 5 grams of *Gan Cao* (Radix Glycyrrhizae) were mixed and ground into fine powder for treatment of urinary tract infections. Patients were given 5.8 grams of the powder with warm water twice daily. Of 10 patients, most experienced complete recovery within 3 to 4 days, although some required up to 6 days of treatment.[3]

TOXICOLOGY

Hua Shi increases the incidence of granulomas in the abdomen, rectum and vagina. When used topically in the vagina as a contraceptive, *Hua Shi* increases the risk of uterine fibroids by three-fold.[4]

Chuan Mu Tong (Caulis Clematidis Armandii)

川木通

Pinyin Name: *Chuan Mu Tong*
Literal Name: "open-ended wood from Sichuan"
Alternate Chinese Names: *Mu Tong*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: clematis, armand clematis stem, anemone clematis stem
Botanical Name: *Clematis armandii* Franch. (*Xiao Mu Tong*); *Clematis montana* Buch.-Ham. (*Xiu Chiu Teng*)
Pharmaceutical Name: Caulis Clematidis Armandii
Properties: bitter, cold
Channels Entered: Urinary Bladder, Heart, Small Intestine
Safety Index: Safe

CHINESE THERAPEUTIC ACTIONS

1. Promotes Urination

***Lin zheng* (dysuria syndrome):** *Chuan Mu Tong* (Caulis Clematidis Armandii) is commonly used to treat dysuria characterized by burning sensations and pain during urination, indicating an accumulation of damp-heat in the Urinary Bladder.

- *Shi-re lin* (damp-heat dysuria): combine *Chuan Mu Tong* with *Che Qian Zi* (Semen Plantaginis), *Zhi Zi* (Fructus Gardeniae), *Hua Shi* (Talcum), and *Da Huang* (Radix et Rhizoma Rhei).
- *Xue lin* (bloody dysuria): add *Pu Huang* (Pollen Typhae) and *Ou Jie* (Nodus Nelumbinis Rhizomatis) to *Chuan Mu Tong.*
- *Shi lin* (stone dysuria): use it with *Jin Qian Cao* (Herba Lysimachiae) and *Hai Jin Sha* (Herba Lygodii).

2. Sedates Heart and Small Intestine Fire

Heart fire: *Chuan Mu Tong* treats ulcerations of the tongue and mouth, irritability, and burning urination caused by heat in the Heart and Small Intestine channels (paired organs in *zang fu* relationship).

- Heat or fire in the Heart and Small Intestine: add *Sheng Di Huang* (Radix Rehmanniae), *Zhu Ye* (Herba Phyllostachys), *Gan Cao* (Radix Glycyrrhizae), *Deng Xin Cao* (Medulla Junci) and *Zhi Zi* (Fructus Gardeniae).

Chuan Mu Tong (Caulis Clematidis Armandii)

3. Opens Channels to Relieve Pain

Chuan Mu Tong is used as a single-herb remedy to relieve pain or *bi zheng* (painful obstruction syndrome) with blood stagnation in the channels.

4. Promotes Lactation

Insufficient lactation: *Chuan Mu Tong* is often cooked with pig's feet and soy sauce and served as a food to promote lactation in nursing mothers.

- To promote secretion of breast milk: use this herb with *Chuan Shan Jia* (Squama Manis) and *Wang Bu Liu Xing* (Semen Vaccariae).

DOSAGE

3 to 6 grams in decoction.

CHEMICAL COMPOSITION

Climontanoside B.[1]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Oral ingestion or intravenous injection of a decoction of *Chuan Mu Tong* creates marked diuretic results in rabbits.[2]

CLINICAL STUDIES AND RESEARCH

- ***Bi zheng* (painful obstruction syndrome):** Four patients with chronic numbness and pain were treated with a decoction of *Chuan Mu Tong* and experienced relief from pain within four doses. The decoction was prepared by cooking 50 to 75 grams of *Chuan Mu Tong* in water to yield 50 to 100 ml of tea. The patients were given 25 to 30 ml of decoction per dose, two to three times daily.[3]
- ***Lin zheng* (dysuria syndrome):** According to one report, 58 patients with *lin zheng* were treated with great success using an herbal formula containing *Chuan Mu Tong* 20g, *Huang Qin* (Radix Scutellariae) 20g, *Che Qian Zi* (Semen Plantaginis) 20g, *Long Dan Cao* (Radix Gentianae) 15g, *Dang Gui* (Radicis Angelicae Sinensis) 15g, *Chai Hu* (Radix Bupleuri) 15g, *Ze Xie* (Rhizoma Alismatis) 15g, *Zhi Zi* (Fructus Gardeniae) 15g, *Sheng Di Huang* (Radix Rehmanniae) 25g, and *Gan Cao* (Radix Glycyrrhizae) 5g.[4]

SUPPLEMENT

"*Mu Tong*" may be derived from the following plants: clematis and akebia.

- 川木通 *Chuan Mu Tong* (Caulis Clematidis Armandii): *Clematis armandii* and *Clematis montana* are known as "*Chuan Mu Tong*," and are the most common botanical sources of "*Mu Tong*." They originate from the Sichuan and Guizhou areas. *Chuan Mu Tong* is now used as the preferred source of "*Mu Tong*."
- 五葉木通 / 五叶木通 *Wu Ye Mu Tong* (Caulis Akebia Quinata) is not used frequently. The botanical name is *Akebia quinata* (Thunb.) Decue.
- 三葉木通 / 三叶木通 *San Ye Mu Tong* (Caulis Akebia Trifoliata) is also not used frequently. The botanical name is *Akebia trifoliata* (Thunb.) Koidz.
- 白木通 *Bai Mu Tong* (Caulis Akebia Trifoliata Australis) is also not used frequently. The botanical name is *Akebia trifoliata* (Thunb.) Koidz. var. *australis* (Diels) Rehd.

AUTHORS' COMMENTS

Chuan Mu Tong and *Ze Xie* (Rhizoma Alismatis) both have diuretic action. *Chuan Mu Tong* more effectively dispels heat in the Heart and Small Intestine, whereas *Ze Xie* (Rhizoma Alismatis) more strongly clears damp-heat from the Liver and Kidney channels.

According to Dr. Wang Shi-Xiang, when treating *bi zheng* (painful obstruction syndrome), the use of *Chuan Mu Tong* (Caulis Clematidis Armandii) may cause nausea and vomiting. *Gan Cao* (Radix Glycyrrhizae) and *Chen Pi* (Pericarpium Citri Reticulatae) are added to counter these side effects.

Chuan Mu Tong (Caulis Clematidis Armandii), *Mai Men Dong* (Radix Ophiopogonis), *Huang Lian* (Rhizoma Coptidis), and *Tian Zhu Huang* (Concretio Silicea Bambusae) all clear the Heart and eliminate irritability.

- *Chuan Mu Tong* is a diuretic that clears damp-heat to relieve irritability with oral ulcers and yellow urine.
- *Mai Men Dong* is a tonic used for deficient Heart yin with heat that manifests as irritability and insomnia.
- *Huang Lian* is used for febrile disease with excess fire in the Heart disturbing *shen* (spirit), thus manifesting in irritability and insomnia.
- *Tian Zhu Huang* dissolves hot phlegm and is best for irritability with spasms and convulsions.

Guan Mu Tong (Caulis Aristolochiae Manshuriensis)

關木通 关木通

Pinyin Name: *Guan Mu Tong*
Literal Name: "open-ended wood from Guan"
Alternate Chinese Names: *Dong Bei Ma Dou Ling*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: aristolochia stem, Manchurian dutchman's pipe stem
Botanical Name: *Aristolochia manshuriensis* Kom. (*Dong Bei Ma Dou Ling*; *Guan Mu Tong*)
Pharmaceutical Name: Caulis Aristolochiae Manshuriensis
Properties: bitter, cold
Channels Entered: Urinary Bladder, Heart, Small Intestine
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Promotes Urination

***Lin zheng* (dysuria syndrome):** *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis) has historically been used to treat dysuria, particularly the accumulation of damp-heat in the Urinary Bladder, characterized by a burning sensation and pain during urination.

- *Lin zheng* due to damp-heat: this herb was combined with *Che Qian Zi* (Semen Plantaginis), *Zhi Zi* (Fructus Gardeniae), *Hua Shi* (Talcum), and *Da Huang* (Radix et Rhizoma Rhei).
- *Xue lin* (bloody dysuria): used with *Pu Huang* (Pollen Typhae) and *Ou Jie* (Nodus Nelumbinis Rhizomatis).
- *Shi lin* (stone dysuria): combined with *Jin Qian Cao* (Herba Lysimachiae) and *Hai Jin Sha* (Herba Lygodii).

2. Sedates Heart and Small Intestine Fire

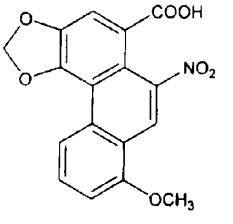
Heart fire: *Guan Mu Tong* has been used to treat ulcerations of the mouth and tongue, irritability and burning urination caused by heat in the Heart and Small Intestine, *zang fu* partners.

- Heat in the Heart and Small Intestine: used with *Sheng Di Huang* (Radix Rehmanniae), *Zhu Ye* (Herba Phyllostachys), *Gan Cao* (Radix Glycyrrhizae), *Deng Xin Cao* (Medulla Junci) and *Zhi Zi* (Fructus Gardeniae).

DOSAGE

3 to 6 grams in decoction.

CAUTIONS / CONTRAINDICATIONS



- *Guan Mu Tong* is contraindicated during pregnancy, and in cases of compromised kidney function.
- Do not use *Guan Mu Tong* in large doses, or for prolonged periods of time.

OVERDOSAGE

Overdose of *Guan Mu Tong* may cause upper abdominal discomfort, nausea, vomiting, diarrhea, abdominal distention, poor appetite, headache, chest congestion, facial edema, palpitations, frequent urination, low back pain, edema of the entire body, dysuria, anuria, increased blood pressure, hematuria, delirium, proteinuria, cylindruria, increased protein nitrogen in blood and urine, and hyperkalemia. In severe cases, overdose of *Guan Mu Tong* (over 60 grams) has been associated with nephropathy. [1,2]

CHEMICAL COMPOSITION

Aristolochic acid A, D; aristoloside, magnoflorine, β-sitosterol, oleanolic acid, hederagenin, sodium, potassium, chloride, iron, zinc, copper.[3,4]

Aristolochic Acid

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Oral ingestion of *Guan Mu Tong* in rats demonstrates marked diuretic influence, increasing

Guan Mu Tong (Caulis Aristolochiae Manshuriensis)

elimination of water, sodium, potassium and chloride.[5]

- **Cardiovascular:** Intravenous injection stimulates the cardiac muscle of frog specimens, increasing the contractile force of the heart.[6]
- **Antibiotic:** Aristolochic acid tablets (0.15 mg per tablet) are commercially available for treatment of infection. The recommended dose for treatment of infection is 1 to 2 tablets three times daily.[7]

CLINICAL STUDIES AND RESEARCH

- **Urinary stones:** In one study, 132 patients with urinary tract stones were treated with an herbal formula, with a 76.3% success rate in passing the stones. Time required to pass the stones varied from 6 to 73 days. The herbal formula contained *Guan Mu Tong*, *Qu Mai* (Herba Dianthi), *Bian Xu* (Herba Polygoni Avicularis), *Che Qian Zi* (Semen Plantaginis), *Hua Shi* (Talcum), *Zhi Zi* (Fructus Gardeniae), *Jin Qian Cao* (Herba Lysimachiae), *Hai Jin Sha* (Herba Lygodii), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).[8]
- **Urinary stones:** In another study, 215 patients with urinary stones were treated with an herbal decoction on a daily basis, with 127 patients successfully (58.9%) passing the stones. The herbal formula included *Guan Mu Tong*, *Qu Mai* (Herba Dianthi), *Zhi Zi* (Fructus Gardeniae), *Jin Qian Cao* (Herba Lysimachiae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Hu Po* (Succinum), *Sheng Di Huang* (Radix Rehmanniae), *Huai Niu Xi* (Radix Achyranthis Bidentatae), *Huang Bai* (Cortex Phellodendri), *Hai Jin Sha* (Herba Lygodii) and *Gan Cao* (Radix Glycyrrhizae).[9]

SUPPLEMENT

- 關木通 / 关木通 *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis), 大葉馬兜鈴 / 大叶马兜铃 *Da Ye Ma Dou Ling* (Caulis Aristolochia Kaempferi), and 淮通馬兜鈴 / 淮通马兜铃 *Huai Tong Ma Dou Ling* (Caulis Aristolochia Moupinensis) are sometimes used. The use of aristolochia types of "*Mu Tong*" is strongly discouraged because of toxicity associated with aristolochic acid.[10,11]

AUTHORS' COMMENTS

It is wise to be able to discern various types of "*Mu Tong.*" Visual inspection shows that *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis), the undesirable species, is long and round, approximately 1 – 2 meters in length by 1 – 6 centimeters in diameter. The outer layer is grayish-yellow or light brown in color. It has enlarged joints in-between parts of the plant and a distinct camphor-like odor. By contrast, *Chuan Mu Tong* (Caulis Clematidis Armandii) or *Chuan Mu Tong* (Caulis Clematidis Montana) is long and round, 50 to 100 cm in length, and 2 to 3.5 cm in diameter. The outer layer is light to dark yellow/brown in color. It has no joints and no odor.[12]

Tong Cao (Medulla Tetrapanacis)

通草 通草

Pinyin Name: *Tong Cao*
Literal Name: "unblocking herb"
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: tetrapanax, rice paper plant pith
Botanical Name: *Tetrapanax papyriferus* (Hook.) K. Koch (*Tong Tuo Mu*)
Pharmaceutical Name: Medulla Tetrapanacis
Properties: sweet, bland, cool
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Promotes Urination and Resolves Dampness

Tong Cao (Medulla Tetrapanacis) treats *lin zheng* (dysuria syndrome) by promoting urination and resolving dampness. Clinical manifestations include painful and/or dribbling urination with heat sensations.

- Dysuria and pain caused by damp-heat in the Urinary Bladder: add *Tong Cao* to *Shi Wei* (Folium Pyrrosiae) and *Qu Mai* (Herba Dianthi).
- Painful urination, turbid cloudy urine, and heaviness of the body due to damp-heat: use *Tong Cao* with *Bai Dou Kou* (Fructus Amomi Rotundus), *Hua Shi* (Talcum) and *Yi Yi Ren* (Semen Coicis).
- Edema with dysuria: combine it with *Fen Fang Ji* (Radix Stephaniae Tetandrae), *Fu Ling* (Poria), *Zhu Ling* (Polyporus), and *Da Fu Pi* (Pericarpium Arecae).
- Damp febrile disorders with sensations of heaviness of the body, the absence of thirst, oppression in the chest, afternoon fever and dysuria: add *Yi Yi Ren* (Semen Coicis), *Hua Shi* (Talcum), *Ban Xia* (Rhizoma Pinelliae), *Hou Po* (Cortex Magnoliae Officinalis) and *Bai Dou Kou* (Fructus Amomi Rotundus).

2. Promotes Lactation

Tong Cao promotes secretion of breast milk in nursing mothers.

- To promote lactation, combine *Tong Cao* in decoction with *Chuan Shan Jia* (Squama Manis) and *Wang Bu Liu Xing* (Semen Vaccariae).

DOSAGE

2 to 5 grams. Use 15 to 18 grams of *Tong Cao* when the intent is to promote lactation.

CAUTIONS / CONTRAINDICATIONS

- Use of *Tong Cao* is not recommended for pregnant women.

CHEMICAL COMPOSITION

Uronic acid, galactose, galacturonic acid, glucose, xylose, lipid 1.70%, protein 1.10%, fiber 48.73%, total ash content 5.95%.[1]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Administration of *Tong Cao* is associated with an increase in excretion of water, sodium, chloride and potassium in rats.[2]

HERB-DRUG INTERACTION

- **Diuretics:** *Tong Cao* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[3] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

SUPPLEMENT

- 梗通草 / 梗通草 *Geng Tong Cao* (Ramulus Aeschynomene Indica), first cited in *Ben Cao Zheng Yi* (Truth and False Information of Materia Medica) by Zhang Shan-Lei in 1920, has functions, and properties similar to those of *Tong Cao*. *Geng Tong Cao* promotes diuresis, treats *lin zheng* (dysuria syndrome) and promotes lactation. Recommended dosage of *Geng Tong Cao* is 3 to 6 grams.

AUTHORS' COMMENTS

Tong Cao and *Chuan Mu Tong* (Caulis Clematidis Armandii) both promote lactation. However, *Tong Cao* is

sweet and is often preferred over *Chuan Mu Tong*, which is bitter. Other foods commonly used with or without *Tong Cao* and/or *Chuan Mu Tong* to promote lactation include pig's feet, fish, peanuts and papaya.

Deng Xin Cao (Medulla Junci)

燈心草 灯心草

Pinyin Name: *Deng Xin Cao*
Literal Name: "lamp wick herb"
Alternate Chinese Names: *Deng Xin*, *Deng Cao*
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: juncus, rush
Botanical Name: *Juncus offusus* L. var. *decipiens* Buchen. (*Deng Xin Cao*)
Pharmaceutical Name: Medulla Junci
Properties: sweet, bland, cool
Channels Entered: Heart, Lung, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Promotes Urination to Treat *Lin Zheng* (Dysuria Syndrome)

***Re lin* (heat dysuria):** Because it is cool, *Deng Xin Cao* (Medulla Junci) effectively treats urinary disorders arising from accumulated damp and heat in the lower *jiao*. Its diuretic effect, however, is relatively mild and must be supplemented with other herbs for maximum effect. *Deng Xin Cao* also promotes urination and treats generalized edema or edema from nephritis.

- Dysuria: add this herb to *Dan Zhu Ye* (Herba Lophatheri) and *Che Qian Cao* (Herba Plantaginis).
- Generalized edema: use a large dose of *Deng Xin Cao*.
- Edema due to nephritis: combine it with *Che Qian Cao* (Herba Plantaginis) and *Bai Mao Gen* (Rhizoma Imperatae).

2. Clears Heart Heat and Sedates Fire

***Shen* (spirit) disturbance:** *Deng Xin Cao* clears Heart fire and treats related symptoms. Clinical applications include insomnia, irritability, and infantile crying at night.

- Insomnia and irritability: combine this herb with *Zhu Sha* (Cinnabaris), *Suan Zao Ren* (Semen Zizyphi Spinosae) and *Fu Shen* (Poria Paradicis).
- Infantile crying at night: add *Suan Zao Ren* (Semen Zizyphi Spinosae), *Xiao Mai* (Fructus Tritici) and *Fu Shen* (Poria Paradicis).

3. Clears Lung Heat

Throat inflammation: *Deng Xin Cao* treats sore throat caused by heat in the Lung. Use charred *Deng Xin Cao* either internally or topically to relieve pain.

- Apply the powdered herb topically: administer by conveying the powder through the mouth (such as by pouring or blowing through a straw) to apply directly to the mucous membranes of the throat.

4. Cools Blood, Stops Bleeding

Charred *Deng Xin Cao* cools blood and stops bleeding.

Deng Xin Cao (Medulla Junci)

DOSAGE

1.5 to 2.5 grams in decoction or pills. Unprocessed *Deng Xin Cao* clears heat and regulates water circulation. The charred herb cools blood and stops bleeding.

CAUTIONS / CONTRAINDICATIONS

- Use of *Deng Xin Cao* is contraindicated for patients with deficiency and cold in the middle *jiao*, or in cases of urinary incontinence.

CHEMICAL COMPOSITION

Araban, xylan, methyl pentosan, luteolin, luteolin-7-glucoside, tripeptide, effusol.[1]

CLINICAL STUDIES AND RESEARCH

- **Chronic nephritis:** An herbal decoction of 60 grams of fresh *Deng Xin Cao* and 300 grams of tofu was used for patients with chronic nephritis. The decoction was administered once daily for 30 days per course of treatment. A one-week rest was given before continuing, if more than one course was necessary. Out of 30 patients, the study reported complete recovery in 16 cases, significant improvement in 8 cases, slight improvement in 2 cases, and no response in 4 cases.[2]

AUTHORS' COMMENTS

Deng Xin Cao and *Zhu Ye* (Herba Phyllostachys) both clear Heart fire and promote diuresis. *Deng Xin Cao* is better for *lin zheng* (dysuria syndrome) with burning and painful urination. *Zhu Ye* more effectively sedates Heart fire to treat irritability and insomnia.

References

Di Fu Zi (Fructus Kochiae)

地膚子 地肤子

Pinyin Name: *Di Fu Zi*
Literal Name: "earth skin seed"
Alternate Chinese Names: *Luo Sao Zi, Di Kui, Di Mai*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: kochia, belvedere fruit, broom cypress fruit
Botanical Name: *Kochia scoparia* (L.) schrad. (*Di Fu*)
Pharmaceutical Name: Fructus Kochiae
Properties: sweet, bitter, cold
Channels Entered: Urinary Bladder, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Clears Damp-Heat and Promotes Urination

***Lin zheng* (dysuria syndrome):** *Di Fu Zi* (Fructus Kochiae) clears damp-heat and promotes urination. It is commonly used to treat *shi-re lin* (damp-heat dysuria) with burning, scanty, dark urine.

- *Shi-re lin* (damp-heat dysuria): use *Di Fu Zi* with *Che Qian Zi* (Semen Plantaginis), *Hua Shi* (Talcum) and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- Urinary tract infection during pregnancy: use *Di Fu Zi* alone.
- Urinary tract infection or bladder infection: combine it with *Zhu Ling* (Polyporus), *Che Qian Zi* (Semen Plantaginis), *Tong Cao* (Medulla Tetrapanacis) and *Gan Cao* (Radix Glycyrrhizae).

Dí Fu Zí (Fructus Kochiae)

2. Dispels Dampness to Relieve Itching

Di Fu Zi dispels dampness from the skin to relieve the itching and inflammation of eczema, scabies, urticaria, and other dermatological disorders. It also effectively treats genital itching. It is commonly used internally or topically as a powder or wash.

- Itching: use this herb with *Bai Xian Pi* (Cortex Dictamni), *Ku Shen Gen* (Radix Sophorae Flavescentis) and *She Chuang Zi* (Fructus Cnidii). Apply topically in powdered form.
- Eczema: combine it with *Mu Dan Pi* (Cortex Moutan), *Bai Xian Pi* (Cortex Dictamni), *Huang Bai* (Cortex Phellodendri) and *Jin Yin Hua* (Flos Lonicerae), in decoction.
- Urticaria with redness and itching: combine it with *Jin Yin Hua* (Flos Lonicerae), *Fang Feng* (Radix Saposhnikoviae), *Bo He* (Herba Menthae), *Ju Hua* (Flos Chrysanthemi) and *Huang Bai* (Cortex Phellodendri) for internal use.
- Eye redness and pain: use *Di Fu Zi* as a tea with *Jue Ming Zi* (Semen Cassiae), *Qing Xiang Zi* (Semen Celosiae) and *Gu Jing Cao* (Flos Eriocauli).

DOSAGE

10 to 15 grams.

CHEMICAL COMPOSITION

Oleanolic acid, ecdysteroid, triterpenoid saponins, alkaloids.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Water extract of *Di Fu Zi* has an inhibitory effect *in vitro* on some dermatophytes and pathogenic fungi.[2]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 577
2. *Yun Nan Zhong Yao Zhi* (Yunan Journal of Chinese Herbal Medicine), 1990; 244

Bían Xu (Herba Polygoni Avicularis)

萹蓄

Pinyin Name: *Bian Xu*
Alternate Chinese Names: *Bian Zhu*, *Dao Sheng Cao*, *Niu Bian Cao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: common knotgrass herb
Botanical Name: *Polygonum aviculare* L. (*Bian Xu*)
Pharmaceutical Name: Herba Polygoni Avicularis
Properties: bitter, cool
Channels Entered: Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Promotes Diuresis

***Lin zheng* (dysuria syndrome):** *Bian Xu* (Herba Polygoni Avicularis) dispels damp-heat and promotes urination. It is commonly used to treat *re lin* (heat dysuria) with burning and pain. It also is effective in treating urethral calculi.

- *Shi-re lin* (damp-heat dysuria) with burning sensations and pain during urination: use *Bian Xu* with *Chuan Mu Tong* (Caulis Clematidis Armandii), *Che Qian Zi* (Semen Plantaginis), *Zhi Zi* (Fructus Gardeniae) and *Hua Shi* (Talcum). **Exemplar Formula:** *Ba Zheng San* (Eight-Herb Powder for Rectification).
- *Xue lin* (bloody dysuria) with hematuria: use this herb

Bian Xu (Herba Polygoni Avicularis)

with *Xiao Ji* (Herba Cirisii), *Pu Huang* (Pollen Typhae) and *Bai Mao Gen* (Rhizoma Imperatae).

- *Shi lin* (stone dysuria) with kidney stones: use it with *Jin Qian Cao* (Herba Lysimachiae) and *Hai Jin Sha* (Herba Lygodii).

Jaundice: *Bian Xu* treats jaundice caused by the accumulation of damp-heat in the Liver and Gallbladder.

- Jaundice: use this herb with *Da Huang* (Radix et Rhizoma Rhei), *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae).

2. Kills Parasites

Parasites: *Bian Xu* kills parasites, especially roundworm and hookworm.

- Parasites: use the vinegar-fried form of *Bian Xu* with *Shi Jun Zi* (Fructus Quisqualis), *Wu Mei* (Fructus Mume) and *Hua Jiao* (Pericarpium Zanthoxyli).
- Anal itching caused by parasites: use *Bian Xu* decoction as a topical wash.
- Genital itching: use it with *Di Fu Zi* (Fructus Kochiae) and *Ku Shen Gen* (Radix Sophorae Flavescentis) topically as a powder or wash.
- Eczema: combine it with *Cang Zhu* (Rhizoma Atractylodis), *Huang Bai* (Cortex Phellodendri), *Bai Xian Pi* (Cortex Dictamni) and *Ku Shen Gen* (Radix Sophorae Flavescentis).

Dermatological disorders: *Bian Xu* treats tinea, oozing sores and damp skin lesions. It can either be taken internally or applied topically.

3. Dispels Damp-Heat

Bian Xu treats jaundice caused by damp-heat.

- Jaundice: use it with *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae).

DOSAGE

10 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- Over-consumption of *Bian Xu* may cause depletion of *jing* (essence) and qi.

CHEMICAL COMPOSITION

Avicularin, quercitrin, d-catechol, gallic acid, caffeic acid, oxalic acid, silicic acid, cholorogenic acid, p-coumaric acid.[1]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Decoction of *Bian Xu* at 20 g/kg increased the excretion of water, sodium and potassium in rats.[2]
- **Antibiotic:** Decoction of *Bian Xu* has an inhibitory influence on *Bacillus dysenteriae*, *Staphylococcus aureus*, and *Pseudomonas aeruginosa*.[3]
- **Antihypertensive:** Intravenous injection of water or alcohol extracts of *Bian Xu* lowered blood pressure in dogs, rabbits, and cats. The antihypertensive effect is attributed to increased urine output.[4]

CLINICAL STUDIES AND RESEARCH

- **Acute bacterial dysentery:** An herbal syrup of *Bian Xu* containing 1 g/ml of the herb was used to treat patients with acute bacterial dysentery; 50 ml of the syrup was administered two to three times daily. Out of 108 patients, there was complete recovery in 104 cases and moderate improvement in 4 cases. The average was one day for reduction of body temperature, four days for relief of abdominal pain, and five days for return of normal bowel movement. No adverse reaction was reported during the treatment period. In a follow-up evaluation of 36 patients between 1 and 12 months after treatment, there were only 2 cases of recurrence.[5]
- **Toothache:** A decoction of 50 to 100 grams of *Bian Xu* given in two equally-divided doses effectively treated toothache. Of 81 patients, 80 reported relief of pain within 2 to 3 days after the treatment.[6]

HERB-DRUG INTERACTION

- **Diuretics:** *Bian Xu* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[7] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

Bian Xu may cause dermatitis or gastrointestinal disturbance when used as food for horses and sheep.[8]

Qu Mai (Herba Dianthi)

瞿麥 瞿麦

Pinyin Name: *Qu Mai*
Alternate Chinese Names: *Ju Mai*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: dianthus, lilac pink, Chinese pink, rainbow pink
Botanical Name: *Dianthus superbus* L. (*Qu Mai*); *Dianthus chinensis* L. (*Shi Zhu*)
Pharmaceutical Name: Herba Dianthi
Properties: bitter, cold
Channels Entered: Urinary Bladder, Heart, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Promotes Diuresis

***Lin zheng* (dysuria syndrome):** *Qu Mai* (Herba Dianthi) regulates water circulation and is one of the most commonly used herbs to treat *shi-re lin* (damp-heat dysuria). The tip of *Qu Mai* has the strongest diuretic action compared to the stem and body.

- *Re lin* (heat dysuria) with burning and pain during urination: use *Qu Mai* with *Che Qian Zi* (Semen Plantaginis) and *Hua Shi* (Talcum). **Exemplar Formula:** *Ba Zheng San* (Eight-Herb Powder for Rectification).
- *Xue lin* (bloody dysuria) with hematuria: combine this herb with *Xiao Ji* (Herba Cirisii), *Pu Huang* (Pollen Typhae) and *Bai Mao Gen* (Rhizoma Imperatae).
- *Shi lin* (stone dysuria): add *Jin Qian Cao* (Herba Lysimachiae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Hai Jin Sha* (Herba Lygodii).

2. Invigorates Blood Circulation and Regulates Menstruation

Amenorrhea: *Qu Mai* enters the *xue* (blood) level to clear heat. It helps amenorrhea, or menstrual cramps due to blood clots.

- Amenorrhea: use it with *Dan Shen* (Radix Salviae Miltiorrhizae), *Chi Shao* (Radix Paeoniae Rubrae) and *Yi Mu Cao* (Herba Leonuri).
- Blood clots: combine it with *Tao Ren* (Semen Persicae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Hong Hua* (Flos Carthami) and *Niu Xi* (Radix Cyathulae seu Achyranthis).

Difficult Labor: *Qu Mai* invigorates blood circulation and is used to induce or further the progress of labor.

DOSAGE

5 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Qu Mai* is contraindicated in pregnant women, as it stimulates contraction of the uterus.

CHEMICAL COMPOSITION

Eugenol, phenyethylalcohol, methylsalicylate, homorientin, dianthus saponin, gyposgenin.[1]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Water decoction of *Qu Mai* at 2 g/kg increased the excretion of water and chloride in rabbits.[2]
- **Uterine stimulant:** Alcohol extract of *Qu Mai* has a stimulating effect on the uterus in anesthetized rabbits, leading to uterine contraction.[3]
- **Others:** It also has a stimulating effect on the gastrointestinal system and an inhibitory effect on the cardiovascular system.[4]

CLINICAL STUDIES AND RESEARCH

- **Edema:** An herbal tea prepared by soaking 100 grams of *Qu Mai* in a sealed bottle of hot water for 60 minutes was used to treat patients with edema. The study reported satisfactory results in over 100 cases.[5]

HERB-DRUG INTERACTION

- **Diuretics:** *Qu Mai* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[6] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

Qu Mai (Herba Dianthi)

Bai Long Chuan Hua Tou (Radix Clerodendron Paniculatum)

白龍船花頭
白龙船花头

Pinyin Name: *Bai Long Chuan Hua Tou*
Alternate Chinese Names: *Long Chuan Hua, Bai Long Chuan Tou, Bai Long Chuan Gen*
Original Source: *Tai Wan Min Jian Yao* (Folk Medicine of Taiwan) by Gao Mu-Chun in 1985
English Name: clerodendron, scarlet glory bower
Botanical Name: *Clerodendron paniculatum* L. (*Bai Long Chuan*)
Pharmaceutical Name: Radix Clerodendron Paniculatum
Properties: slightly bitter, warm
Channels Entered: Lung, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Regulates Menstruation and Resolves Vaginal Discharge

Bai Long Chuan Hua Tou (Radix Clerodendron Paniculatum) treats gynecological disorders by regulating menstruation.

- White vaginal discharge: use this herb with *Ma Chi Xian* (Herba Portulacae), *Ji Guan Hua* (Flos Celosiae Cristatae) and *Long Yan Hua* (Flos Longan).
- Yellow vaginal discharge, with or without blood: combine it with *Huang Bai* (Cortex Phellodendri) and *Long Dan Cao* (Radix Gentianae).
- Irregular menstruation caused by blood stagnation and water retention: add *Rou Dou Gen* (Radix Myristicae) and *Yi Mu Cao* (Herba Leonuri) to *Bai Long Chuan Hua Tou*.

2. Dispels Wind and Dampness

- *Bi zheng* (painful obstruction syndrome) caused by wind-dampness: use *Bai Long Chuan Hua Tou* with *Gui Zhi* (Ramulus Cinnamomi), *Huang Qin* (Radix Scutellariae), *Huang Bai* (Cortex Phellodendri), *Chi Fu Ling* (Poria Rubrae) and *Cang Zhu* (Rhizoma Atractylodis).

3. Regulates Qi and Promotes Urination

Bai Long Chuan Hua Tou controls frequent urination in patients with diabetes mellitus.

- Diabetes with polyuria caused by Kidney yin deficiency: add this herb to the formula *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).
- Diabetes with polyuria from Kidney yang deficiency: combine it with the classic formula *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).

DOSAGE

3 to 12 grams in decoction.

Ding Shu Xiu (Herba Elephantopus Scaber)

丁豎朽 丁竖朽

Pinyin Name: *Ding Shu Xiu*
Alternate Chinese Names: *Xi Ben Deng Shu Xiu, Hong Shu Xiu, Tian Jie Cai, Ku Di Dan*
English Name: elephantopi
Botanical Name: *Elephantopus scaber* L.
Pharmaceutical Name: Herba Elephantopus Scaber
Properties: sweet, bitter, cold
Channels Entered: Liver, Kidney, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Promotes Urination and Reduces Swelling

Water accumulation: *Ding Shu Xiu* (Herba Elephantopus Scaber) is often used for generalized edema, edema of the face and limbs, leg *qi*, and swelling as seen in patients with nephritis and hydronephrosis.

- Nephritis: use *Ding Shu Xiu* with *Shui Ding Xiang* (Herba Ludwigiae Prostratae), *Bian Xu* (Herba Polygoni Avicularis), *Qu Mai* (Herba Dianthi), *Hua Shi* (Talcum), *Gan Cao* (Radix Glycyrrhizae), *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Yu Mi Xu* (Stigma Maydis).
- Edema: combine it with *Mo Gu Xiao* (Caulis Hyptis Capitatae), *Bian Xu* (Herba Polygoni Avicularis), *Qu Mai* (Herba Dianthi), *Yi Yi Ren* (Semen Coicis), *Huang Qi* (Radix Astragali), *Fen Fang Ji* (Radix Stephaniae Tetandrae) and *Yu Mi Xu* (Stigma Maydis).
- Gout: use it with *Wan Dian Jin* (Radix Ilicis Asprellae), *Shui Ding Xiang* (Herba Ludwigiae Prostratae) and *Shan Pu Tao* (Radix Vitis Amurensis).

2. Clears Heat and Eliminates Toxins

Ding Shu Xiu addresses various kinds of painful swelling, *chang feng* (intestinal wind) with bleeding from the rectum during or before a bowel movement, and hemorrhoidal bleeding.

- Bleeding hemorrhoids: use this herb with *Feng Wei Cao* (Herba Pteris).

3. Relieves Pain

- Headache or migraine headache: use *Ding Shu Xiu* with *Ma Bian Cao* (Herba Verbenae), *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Bai Zhi* (Radix Angelicae Dahuricae), *Chai Hu* (Radix Bupleuri) and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE

6 to 15 grams in decoction.

Shui Ding Xiang (Herba Ludwigiae Prostratae)

水丁香

Pinyin Name: *Shui Ding Xiang*
Literal Name: "water clove"
Alternate Chinese Names: *Shui Xiang Liao, Shui Deng Xiang*
English Name: ludwigia, climbing seed box
Botanical Name: *Ludwigia prostrata* Roxb.
Pharmaceutical Name: Herba Ludwigiae Prostratae
Properties: sweet, bland, very cold
Channels Entered: Kidney, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Reduces Inflammation and Swelling

Shui Ding Xiang (Herba Ludwigiae Prostratae) treats sore throat, dysentery and toothache by clearing heat and reducing inflammation.

- Sore throat: use *Shui Ding Xiang* with *Yi Zhi Xiang* (Herba Vernoniae Cinereae), *Shu Wei Huang* (Herba Rostellulariae), *Ban Lan Gen* (Radix Isatidis), *Jin Yin Hua* (Flos Lonicerae), and *Da Qing Ye* (Folium Isatidis).
- Dysentery: combine it with *Feng Wei Cao* (Herba Pteris), *Ge Gen* (Radix Puerariae), *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Mu Xiang* (Radix Aucklandiae), *Bing Lang* (Semen Arecae) and *Bai Shao* (Radix Paeoniae Alba).
- Toothache: use *Shui Ding Xiang* with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae) and *Xi Xin* (Herba Asari). The herbs may be taken orally as a decoction, or applied as a topical paste to the affected area.

2. Promotes Urination

Shui Ding Xiang treats disorders characterized by accumulation of water and heat. Clinical applications include infection of the genitourinary system, and hypertension.

- Chronic nephritis, cystitis and urinary tract infection: use it with *Ze Xie* (Rhizoma Alismatis), *Pao Zai Cao* (Herba Physalis Angulatae) and *Ya She Huang* (Herba Lippiae).
- *Lin zheng* (dysuria syndrome), hematuria, or hematochezia: combine it with *Tong Cao* (Medulla Tetrapanacis), *Bian Xu* (Herba Polygoni Avicularis) and *Da Ji* (Herba seu Radix Cirsii Japonici).
- Itching of the skin with redness and swelling: use *Shui Ding Xiang* topically or internally with *Hu Yao Huang* (Herba Leucas Mollissimae), *Shu Wei Huang* (Herba Rostellulariae) and *Xian Feng Cao* (Herba Bidentis).
- Hypertension: combine this herb with *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Cha Chi Huang* (Herba Stellariae Aquaticae) and *Shan Pu Tao* (Radix Vitis Amurensis).

DOSAGE

6 to 18 grams in decoction

CAUTIONS / CONTRAINDICATIONS

- Use *Shui Ding Xiang* with caution in patients who have deficiency and cold of Spleen and Stomach.
- Use *Shui Ding Xiang* with caution in patients experiencing yin deficiency.

Mo Gu Xiao (Caulis Hyptis Capitatae)

布骨消 布骨消

Pinyin Name: *Mo Gu Xiao*
Alternate Chinese Names: *Mo Gu Xiao Gen, Qi Ye Gen, Mo Gu Gen, Mo Gu Shao*
English Name: hyptis
Botanical Name: *Hyptis capitata; Sambucus formosana* Nakai
Pharmaceutical Name: Caulis Hyptis Capitatae
Properties: bland, cold
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Promotes Diuresis, Clears Heat, Reduces Swelling and Inflammation

- Edema resulting from nephritis: use *Mo Gu Xiao* (Caulis Hyptis Capitatae) with *Shui Ding Xiang* (Herba Ludwigiae Prostratae), and *Ding Shu Xiu* (Herba Elephantopus Scaber). If the patient is deficient and cold, use this herb with the formula *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).
- Renal hypertension: combine it with *Cha Chi Huang* (Herba Stellariae Aquaticae), *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Du Zhong* (Cortex Eucommiae) and *Sang Ji Sheng* (Herba Taxilli).

2. Unblocks Stagnation and Relieves Pain

- *Bi zheng* (painful obstruction syndrome), arthritis, neuralgia, sciatica: add *Huang Jin Gui* (Caulis Vanieriae), *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae) and *Yi Tiao Gen* (Radix Moghaniae).

3. Drains Abscesses and Promotes Healing and Generation of New Flesh

- Skin lesions and ulceration: apply *Mo Gu Xiao* topically.
- Swelling and abscesses from unknown causes: combine it with *Da Qing Ye* (Folium Isatidis), *Ren Dong Teng* (Caulis Lonicerae), *Xian Feng Cao* (Herba Bidentis) and *Zao Jiao Ci* (Spina Gleditsiae).
- Foot odor: use *Mo Gu Xiao* topically.

DOSAGE

5 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Mo Gu Xiao* carefully for patients with deficiency and cold of the Spleen and Stomach.

AUTHORS' COMMENTS

According to Dr. Chang Wei-Yen, *Mo Gu Xiao* should be used with *Huang Jin Gui* (Caulis Vanieriae) and *Liu Zhi Huang* (Herba Solidaginis) to treat arthritis, neuritis, sciatica and pain along the spine.

Xian Feng Cao (Herba Bidentis)

咸豐草 咸丰草

Pinyin Name: *Xian Feng Cao*
Alternate Chinese Names: *Tong Zhi Cao, Bai Hua Puo Puo Zeng, Fu Yin Tou, Han Feng Cao, Nan Feng Cao, Chia Za Bo*
English Name: bidens
Botanical Name: *Bidens pilosa* L. var. *minor* (Bl.) Sherff.
Pharmaceutical Name: Herba Bidentis
Properties: bland, cold
Channels Entered: Kidney, Small Intestine, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Reduces Inflammation, Clears Heat and Promotes Urination

- Appendicitis: combine *Xian Feng Cao* (Herba Bidentis) with *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction).
- Nephritis: use it with *Ding Shu Xiu* (Herba Elephantopus Scaber), *Bian Xu* (Herba Polygoni Avicularis), *Qu Mai* (Herba Dianthi), *Bi Zi Cao* (Herba Pogonantheri Criniti) and *Shui Ding Xiang* (Herba Ludwigiae Prostratae).
- Dysentery: combine it with *Feng Wei Cao* (Herba Pteris), *Ji Xue Cao* (Herba Centellae), *Ge Gen* (Radix Puerariae), *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis).
- Urinary tract infection or cystitis: use *Xian Feng Cao* with *Yu Xing Cao* (Herba Houttuyniae), *Pao Zai Cao* (Herba Physalis Angulatae), *Ya She Huang* (Herba Lippiae), *Huang Bai* (Cortex Phellodendri), *Che Qian Zi* (Semen Plantaginis) and *Bai Mao Gen* (Rhizoma Imperatae).
- Hepatitis: use this herb with *Bai Jiang Cao* (Herba cum Radice Patriniae), *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Bai Hua She She Cao* (Herba Oldenlandia), *Huang Shui Qie* (Herba Solani), *Ban Lan Gen* (Radix Isatidis) and *Hua Shi Cao* (Herba Orthosiphon Aristatus).
- Diabetes: use *Xian Feng Cao* with *Yu Mi Xu* (Stigma Maydis).

2. Reduces Swelling, Drains Pus and Promotes Generation of Tissues

- Hemorrhoids: use *Xian Feng Cao* with *Zao Jiao Ci* (Spina Gleditsiae). It can also be added to formulas such as *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life), *Shao Yao Tang* (Peony Decoction), or *Yi Zi Tang* (Yi Word Decoction).
- Toxic swellings: apply *Xian Feng Cao* externally.

DOSAGE

6 to 15 grams in decoction

CAUTIONS / CONTRAINDICATIONS

- Administer *Xian Feng Cao* carefully for patients with deficiency and cold of the Spleen and Stomach.

AUTHORS' COMMENTS

Xian Feng Cao can be used as an iced beverage or tea in summertime to relieve summer-heat.

Bi Zi Cao (Herba Pogonantheri Criniti)

筆仔草 笔仔草

Pinyin Name: *Bi Zi Cao*
Alternate Chinese Names: *Jin Si Cao, Wen Bi Cao, Hong Mao Cao*
English Name: crinite pogonatherum
Botanical Name: *Pogonantherum crinitum* (Thunb.) Kunth
Pharmaceutical Name: Herba Pogonantheri Criniti
Properties: sweet, cool
Channels Entered: Kidney, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

Clears Heat and Dispels Water

Because of its sweet and cool nature, and entrance to the Kidney and Urinary Bladder channels, *Bi Zi Cao* (Herba Pogonantheri Criniti) treats a wide variety of disorders caused by heat and water retention, such as diabetes, leukorrhea, spermatorrhea, urinary tract infection, cystitis, and nephritis.

- Diabetes with polyuria: use *Bi Zi Cao* with *Bai Guo* (Semen Ginkgo) and *Yu Mi Xu* (Stigma Maydis).
- White leukorrhea: combine it with *Bai Guo* (Semen Ginkgo) and *Ji Guan Hua* (Flos Celosiae Cristatae).
- Turbid urine due to dampness or Kidney yang deficiency: use it with *Hai Jin Sha* (Herba Lygodii), or add it to *Sang Piao Xiao San* (Mantis Egg-Case Powder).
- Urinary tract infection, cystitis, nephritis: use this herb with *Che Qian Cao* (Herba Plantaginis), *Bai Mao Gen* (Rhizoma Imperatae), *Bian Xu* (Herba Polygoni Avicularis) and *Shui Ding Xiang* (Herba Ludwigiae Prostratae).

DOSAGE

5 to 12 grams in decoction.

Dong Gua Zi (Semen Benincasae)

冬瓜子

Pinyin Name: *Dong Gua Zi*
Literal Name: "winter melon seed"
Alternate Chinese Names: *Bai Gua Zi, Dong Gua Ren, Gua Ban, Bai Dong Gua Zi, Gua Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: benincasa, Chinese wax gourd seed
Botanical Name: *Benincasa hispida* (Thunb.) Cogn. (*Dong Gua*)
Pharmaceutical Name: Semen Benincasae
Properties: sweet, cool
Channels Entered: Lung, Stomach, Small Intestine, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Dissolves Phlegm, and Eliminates Pus

Dong Gua Zi (Semen Benincasae), by virtue of its sweet, cold nature, and access to the Lung, Stomach and Large and Small Intestines, is useful in treating lung and intestinal abscesses. Other applications include cough, edema, phlegm, and bronchitis.

- Lung abscess with foul-smelling sputum: use *Dong Gua Zi* with *Jie Geng* (Radix Platycodonis), *Yu Xing Cao* (Herba Houttuyniae), *Lian Qiao* (Fructus Forsythiae), *Yi Yi Ren* (Semen Coicis), *Jin Yin Hua* (Flos Lonicerae) and *Da Qing Ye* (Folium Isatidis).
- Bronchitis with cough, yellow sputum and sore throat: use it with *Bo He* (Herba Menthae), *Xing Ren* (Semen Armeniacae Amarum), *Qian Hu* (Radix Peucedani), *Niu Bang Zi* (Fructus Arctii) and *She Gan* (Rhizoma Belamcandae).
- Bronchitis with dry cough and possibly scanty blood-streaked sputum: combine it with *Xing Ren* (Semen Armeniacae Amarum), *Ban Xia* (Rhizoma Pinelliae), *Sheng Di Huang* (Radix Rehmanniae), *Nan Sha Shen* (Radix Adenophorae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Ce Bai Ye* (Cacumen Platycladi) and *Qian Cao* (Radix Rubiae).
- Intestinal abscess: use this herb with *Da Huang* (Radix et Rhizoma Rhei) and *Mu Dan Pi* (Cortex Moutan). **Exemplar Formula:** *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction).

2. Promotes Diuresis

Edema: *Dong Gua Zi* is a relatively mild herb that treats edema caused by nephritis and dysuria. It should be combined with other herbs to enhance its effectiveness.

- Edema: use this herb with *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis) and *Zhu Ling* (Polyporus).
- Lower body edema with burning sensations and swelling: use it with *Niu Xi* (Radix Cyathulae seu Achyranthis), *Mu Gua* (Fructus Chaenomelis), *Fen Fang Ji* (Radix Stephaniae Tetandrae) and *Yi Yi Ren* (Semen Coicis).
- Summer damp-heat: combine *Dong Gua Zi* with *Pei Lan* (Herba Eupatorii), *Huo Xiang* (Herba Agastache) and *Hua Shi* (Talcum).
- Dysuria: use it with *Hua Shi* (Talcum), *Zhu Ling* (Polyporus) and *Che Qian Zi* (Semen Plantaginis).

DOSAGE

10 to 15 grams. Unprocessed *Dong Gua Zi* has a stronger effect to dissolve phlegm, dispel pus and abscesses, regulate water circulation, and treat edema. Dry-fried *Dong Gua Zi* functions better to warm the Spleen and Stomach, and eliminate dampness. In addition, dry-frying this herb facilitates the extraction of its active components.

CAUTIONS / CONTRAINDICATIONS

- Use *Dong Gua Zi* carefully for patients with diarrhea caused by deficiency and cold of the Spleen and Stomach.

AUTHORS' COMMENTS

According to Dr. Yin Hui-He, when treating patients with Large Intestine disorders that manifest in pus or blood in the stools, accompanied by feelings of incomplete evacuation after defecation, the practitioner can combine *Dong Gua Zi* (Semen Benincasae) with *Yi Yi Ren* (Semen Coicis), *Tao Ren* (Semen Persicae), and *Huang Qin* (Radix Scutellariae). This combination enters the Lung, the paired organ of the Large Intestine, and drains dampness. This principle, of treating the Lung to influence the Large Intestine, can also be applied when treating inflammatory bowel disorders.

Shan Pu Tao (Radix Vitis Amurensis)

山葡萄 山葡萄

Pinyin Name: *Shan Pu Tao*
Literal Name: "mountain grape"
Alternate Chinese Names: *Xiao Pu Tao, Xiao Ben Shan Pu Tao, Shan Teng Teng Yang*
English Name: viticis
Botanical Name: *Vitis amurensis, Vitis adstricta*
Pharmaceutical Name: Radix Vitis Amurensis
Properties: sweet, cold
Channels Entered: Lung, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Promotes Diuresis

Edema: *Shan Pu Tao* (Radix Vitis Amurensis) dispels accumulations of water to treat edema.

- Edema arising from deficiency: use *Shan Pu Tao* with *Fen Fang Ji* (Radix Stephaniae Tetandrae), *Huang Qi* (Radix Astragali), *Fu Ling* (Poria), *Gui Zhi* (Ramulus Cinnamomi), *Ze Xie* (Rhizoma Alismatis) and *Zhu Ling* (Polyporus).
- Edema due to excess: combine it with *Shui Ding Xiang* (Herba Ludwigiae Prostratae), *Ding Shu Xiu* (Herba Elephantopus Scaber), *Zhu Ling* (Polyporus), *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Fu Ling* (Poria).

2. Tonifies the Kidney, Brightens the Eyes and Benefits the Liver

- Cataracts: use the fresh juice of *Shan Pu Tao* as eye drops.
- Eye disorders (conjunctivitis or others) caused by excess conditions: add *Gou Qi Gen* (Radix Lycii), *Qian Li Guang* (Herba Senecionis Scandens), *Qing Xiang Zi* (Semen Celosiae), *Shu Wei Huang* (Herba Rostellulariae) and *Niao Bu Su* (Ramus Kalopanax Pictus).
- Blood deficiency in children with malnutrition or delayed growth: use *Shan Pu Tao* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Gan Cao* (Radix Glycyrrhizae), *Fu Ling* (Poria), *Dang Gui* (Radicis Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Preparata), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Bai Shao* (Radix Paeoniae Alba).

3. Disperses Swelling, Eliminates Toxins

- Initial stages of fibrocystic breast disorders with swelling and pain, aversion to cold and fever: use *Shan Pu Tao* with *Wang Bu Liu Xing* (Semen Vaccariae), *Pu Gong Ying* (Herba Taraxaci), *Lu Feng Fang* (Nidus Vespae) and *Chuan Shan Jia* (Squama Manis).
- Red or white vaginal discharge: combine this herb with *Bai Long Chuan Hua Tou* (Radix Clerodendron Paniculatum) and *Ji Guan Hua* (Flos Celosiae Cristatae).

DOSAGE

6 to 18 grams in decoction.

Ma Ti Jin (Herba Dichondrae Repentis)

馬蹄金　马蹄金

Pinyin Name: *Ma Ti Jin*
Alternate Chinese Names: *He Bao Cao, Jin Suo Chi, Ma Cha Jin, Xiao Ying Feng Cao*
English Name: dichondra
Botanical Name: *Dichondra repens* Forst.
Pharmaceutical Name: Herba Dichondrae Repentis
Properties: bitter, acrid, cool
Channels Entered: Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Eliminates Toxins

Toxic heat: *Ma Ti Jin* (Herba Dichondrae Repentis) treats various disorders such as jaundice, dysentery, fetal toxicosis and infectious hepatitis.

- Jaundice: use *Ma Ti Jin* with *Zhi Zi* (Fructus Gardeniae), *Da Huang* (Radix et Rhizoma Rhei) and *Yin Chen Hao* (Herba Artemisiae Scopariae).
- Dysentery: combine it with *Feng Wei Cao* (Herba Pteris) and *Chuan Xin Lian* (Herba Andrographis).
- Infectious hepatitis: add *Huang Shui Qie* (Herba Solani), *Hua Shi Cao* (Herba Orthosiphon Aristatus) and *Hu Zhang* (Rhizoma Polygoni Cuspidati).

2. Invigorates Blood Circulation and Dispels Water

- Urinary stones: use *Ma Ti Jin* with *Wang Bu Liu Xing* (Semen Vaccariae), *Jin Qian Cao* (Herba Lysimachiae) and *Hai Jin Sha* (Herba Lygodii).
- Edema due to nephritis: use this herb with *Wan Dian Jin* (Radix Ilicis Asprellae), *Shan Pu Tao* (Radix Vitis Amurensis) and *Shui Ding Xiang* (Herba Ludwigiae Prostratae).

DOSAGE

3 to 12 grams

CAUTIONS / CONTRAINDICATIONS

- Use of *Ma Ti Jin* with salt is not recommended as the combination will cause water retention.

Jin Qian Cao (Herba Lysimachiae)

金錢草 金钱草

Pinyin Name: *Jin Qian Cao*
Literal Name: "gold money herb," "golden coin grass"
Alternate Chinese Names: *Da Jin Qian Cao, Si Chuan Da Jin Qian Cao, Jiang Su Jin Qian Cao, Lian Qian Cao, Pian Di Xiang, Ru Xiang Teng, Jiu Li Xiang, Ban Chi Lian, Pian Di Jin Lian*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: lysimachia, loose strife herb
Botanical Name: *Lysimachia christinae* Hance (*Si Chuan Da Jin Qian Cao*); *Glechoma longituba* (*Nakai*) Kupr. (*Lian Qian Cao*); *Desmodium styracifolium* (Osb.) Merr. (*Guan Jin Qian Cao*); *Hydrocotyle sibthorpioides* Lam. var. *batrachium* (Hance) Hand. – Mazz. (*Jiang Xi Jin Qian Cao*); *Dichondra repens* Forst. (*Si Chuan Xiao Jin Qian Cao*); *Glechoma hederacea* (*Jiang Su Jin Qian Cao*).
Pharmaceutical Name: Herba Lysimachiae
Properties: sweet, salty, cool
Channels Entered: Urinary Bladder, Gallbladder, Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Clears Damp-Heat and Treats Dysuria

***Shi lin* (stone dysuria):** *Jin Qian Cao* (Herba Lysimachiae) clears damp-heat and is commonly used to treat various *lin zheng* (dysuria syndromes). It is most effective for treating *shi lin* (stone dysuria) and *re lin* (heat dysuria). This is an indispensable herb for treatment of urinary stones.

- Kidney or urinary stones: use *Jin Qian Cao* with *Hai Jin Sha* (Herba Lygodii), *Shi Wei* (Folium Pyrrosiae), *Che Qian Zi* (Semen Plantaginis) and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- Kidney or urinary stones formed because of Kidney deficiency, along with low back pain and soreness of the knees: use this herb with *Sang Ji Sheng* (Herba Taxilli), *Xu Duan* (Radix Dipsaci) and *Gou Qi Zi* (Fructus Lycii).

2. Clears Damp-Heat from the Liver and Gallbladder

Gallstones: *Jin Qian Cao* is an excellent herb to treat gallstones. In addition, it addresses various disorders characterized by damp-heat in the Liver and Gallbladder such as jaundice and hepatitis.

- Gallstones: use *Jin Qian Cao* with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Huang Qin* (Radix Scutellariae), *Da Huang* (Radix et Rhizoma Rhei), *Chai Hu* (Radix Bupleuri), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Chuan Lian Zi* (Fructus Toosendan) and *Yu Jin* (Radix Curcumae).
- Gallstones from Liver qi stagnation with hypochondriac pain, distention, chest fullness, emotional instability, and frequent sighing: use this herb with *Xiang Fu* (Rhizoma Cyperi), *Chuan Lian Zi* (Fructus Toosendan), *Mu Xiang* (Radix Aucklandiae) and *Yu Jin* (Radix Curcumae).
- Gallstones caused by blood stagnation, with fixed colicky pain and petechiae on the tongue: combine it with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), *Pu Huang* (Pollen Typhae), *Yan Hu Suo* (Rhizoma Corydalis), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Jaundice: use it with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae) and *Da Huang* (Radix et Rhizoma Rhei).

3. Clears Heat and Eliminates Toxins

Jin Qian Cao clears heat and toxins from the skin, as found in sores, lesions and snake bites. The fresh form of this herb can be mashed and applied topically, or juiced for internal use.

- Sores and lesions: use this herb with *Ye Ju Hua* (Flos Chrysanthemi Indici) and *Pu Gong Ying* (Herba Taraxaci), internally or topically.

DOSAGE

15 to 30 grams. The maximum dosage for *Jin Qian Cao* is 60 grams.

Jin Qian Cao (Herba Lysimachiae)

CAUTIONS / CONTRAINDICATIONS

- Prescribe *Jin Qian Cao* cautiously for patients who have diarrhea due to Spleen deficiency.

CHEMICAL COMPOSITION

Quercetin, quercetin-3-glucoside, kaempferol, kaempferol-3-O-galactoside.[1]

PHARMACOLOGICAL EFFECTS

- **Cholagogic:** Administration of *Jin Qian Cao* is associated with a marked increase in the production and excretion of bile acid in rats. It has also shown marked effectiveness in treating dogs for severe pain from jaundice and gallstones. In addition, it has a preventative influence on the formation of new gallstones in rabbits.[2]
- **Urinary stones:** The decoction of *Jin Qian Cao* is effective in preventing and treating urinary stones, with better action against kidney stones than bladder stones. Furthermore, different species of this herb serve to markedly increase the excretion of bladder and kidney stones. *Jiang Su Jin Qian Cao* (Herba Glechoma Hederacea) has a marked diuretic action in rabbits; and *Guang Jin Qian Cao* (Herba Desmodii Styracifolii) and *Si Chuan Xiao Jin Qian Cao* (Herba Dichondra Repens) increase the excretion of urine and sodium in rats.[3]
- **Cardiovascular:** An intravenous injection of water-extracted *Guang Jin Qian Cao* (Herba Desmodii Styracifolii) in anesthetized dogs increased blood perfusion to the heart and the kidneys by 197.4%.[4]
- **Antibiotic:** Both water and alcohol extracts of *Jiang Su Jin Qian Cao* (Herba Glechoma Hederacea) inhibit the growth of *Corynebacterium diphtheriae*, *Staphylococcus aureus*, *Bacillus subtilis*, and *E. coli*. Alcohol extract of *Guang Jin Qian Cao* (Herba Desmodii Styracifolii), but not the water extract, has an inhibitory effect against *Candida albicans*.[5]

CLINICAL STUDIES AND RESEARCH

- **Cholelithiasis:** Four cases of cholelithiasis were successfully treated with a preparation of *Jin Qian Cao*.[6]
- **Infection of the bile duct:** Decoction of *Jin Qian Cao* given once daily, for 30 days per course of treatment, for a total of 2 to 3 months, was 76.9% effective in treating 52 patients with non-bacterial infection of the bile duct. Those with low-grade fevers received 30 grams of herb per day, others received 10 to 20 grams per day.[7]
- **Hemorrhoids:** A decoction of *Jin Qian Cao* was used to effectively treat 30 patients with hemorrhoids. Most patients responded within 1 to 3 doses. The dosage used was 100 grams for the fresh herb, and 50 grams for the dried herb.[8]

HERB-DRUG INTERACTION

- **Diuretics:** *Jin Qian Cao* has a diuretic effect. Though there are no documented instances of this potential interaction, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes. [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).][9]

TOXICOLOGY

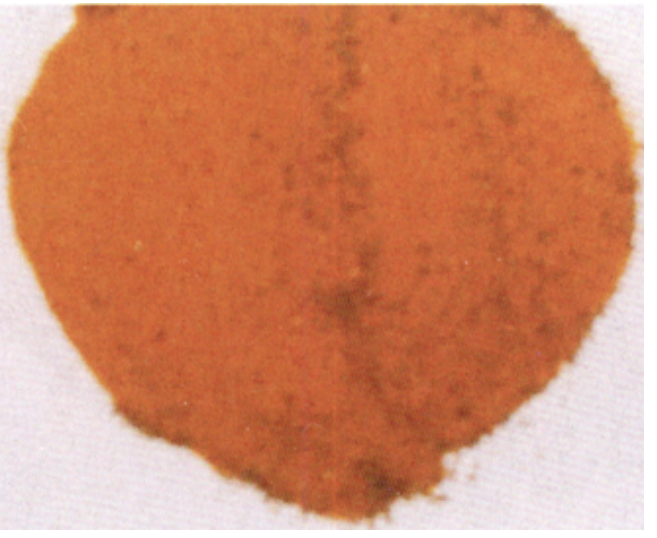
No abnormalities were observed in dogs or mice following oral administration of decoction of *Jin Qian Cao* at 200 times the normal adult dose. No fatalities were reported following oral administration of *Jiang Su Jin Qian Cao* (Herba Glechoma Hederacea) at 20 g/kg/day for 6 days in rats. An oral bolus dose of *Jiang Su Jin Qian Cao* at 100 grams increased respiratory rates, but did not change blood pressure levels in dogs.[10]

SUPPLEMENT

Various species of this herb have been used as the medicinal herb in China. The following list includes the three most commonly used forms and their special applications:

- 四川大金錢草 / 四川大金钱草 *Si Chuan Da Jin Qian Cao* (Herba Lysimachia Christinae) clears heat and eliminates toxins, and is best for gallstones.
- 連錢草 / 连钱草 *Lian Qian Cao* (Herba Glechomae) clears heat and eliminates toxins, and is best for kidney stones.
- 廣金錢草 / 广金钱草 *Guang Jin Qian Cao* (Herba Desmodii Styracifolii) is best for kidney stones.

AUTHORS' COMMENTS



According to Dr. Liu Du-Zhou, the combination of *Jin Qian Cao* and *Chui Pen Cao* (Herba Sedi) serves to reduce elevated liver enzyme levels.

Hai Jin Sha (Herba Lygodii)

海金砂

Pinyin Name: *Hai Jin Sha*
Literal Name: "golden sand of the sea"
Original Source: *Jia You Ben Cao* (Materia Medica of the Jia You Era) by Zhang Yu-Xi and Su Song in 1057-1060
English Name: lygodium spores
Botanical Name: *Lygodium japonicum* (Thunb.) Sw. (*Hai Jin Sha*)
Pharmaceutical Name: Herba Lygodii
Properties: sweet, bland, cold
Channels Entered: Urinary Bladder, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Promotes Diuresis, Dispels Stones

Urinary stones and *lin zheng* (dysuria syndrome): *Hai Jin Sha* (Herba Lygodii) promotes urination and dispels urinary stones. It can be used for dysuria with burning sensations, hematuria, turbid, cloudy urine or urinary stones.

- Damp-heat in the Urinary Bladder: use *Hai Jin Sha* with *Huang Bai* (Cortex Phellodendri), *Zhi Zi* (Fructus Gardeniae) and *Che Qian Zi* (Semen Plantaginis).
- *Xue lin* (bloody dysuria): combine this herb with *Sheng Di Huang* (Radix Rehmanniae) and *Pu Huang* (Pollen Typhae).
- *Shi lin* (stone dysuria): use it with *Jin Qian Cao* (Herba Lysimachiae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Shi Wei* (Folium Pyrrosiae).
- *Shi lin* (stone dysuria) with back pain from deficiency: combine *Hai Jin Sha* with *Sang Ji Sheng* (Herba Taxilli), *Xu Duan* (Radix Dipsaci), *Gou Ji* (Rhizoma Cibotii), *Du Zhong* (Cortex Eucommiae), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- *Gao lin* (cloudy dysuria): add this herb to *Hua Shi* (Talcum) and *Gan Cao* (Radix Glycyrrhizae).

Gallstones: With its ability to dispel stones, *Hai Jin Sha* is commonly used to treat gallstones.

- Gallstones: use it with *Yu Jin* (Radix Curcumae), *Jin Qian Cao* (Herba Lysimachiae), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

2. Eliminates Water Accumulation and Reduces Swelling

Dampness accumulation: *Hai Jin Sha* can treat distention and fullness in the abdomen when it is caused by damp in the middle *jiao* blocking the Spleen's ability to dispel dampness. Clinical manifestations include severe abdominal fullness with bloating, dyspnea with inability to lie flat, generalized edema and swelling.

- Dampness accumulation: use *Hai Jin Sha* with *Qian Niu Zi* (Semen Pharbitidis) and *Gan Sui* (Radix Euphorbiae Kansui).

DOSAGE

6 to 15 grams. *Hai Jin Sha* should be wrapped in cheesecloth to maximize saturation when cooking in decoctions.

CAUTIONS / CONTRAINDICATIONS

- Do not prescribe *Hai Jin Sha* for patients experiencing deficiency but having no accumulation of damp-heat.

CHEMICAL COMPOSITION

Trans-p-coumaric acid, caffeic acid, lygodin.[1]

PHARMACOLOGICAL EFFECTS

- **Genitourinary:** In anesthetized dogs, injection of *Hai Jin Sha* is associated with increased pressure and motility of the urinary tract.[2]
- **Others:** *Hai Jin Sha* also has cholagogic and antibiotic effects.

CLINICAL STUDIES AND RESEARCH

- **Urinary stones:** Seven patients with stones in the urinary tract were treated with an herbal formula containing *Hai Jin Sha*, *Jin Qian Cao* (Herba Lysimachiae), *Qu Mai* (Herba Dianthi), *Hua Shi* (Talcum), *Che Qian Zi* (Semen Plantaginis), *Chuan Mu Tong* (Caulis Clematidis Armandii), *Chuan Niu Xi* (Radix Cyathulae), and *Zhi Gan Cao* (Radix Glycyrrhizae Praeparata). After 10 days of herbal treatment, stones were eliminated in all patients.[3]

Hai Jin Sha (Herba Lygodii)

TOXICOLOGY

It was reported in one case that accidental ingestion of 150 grams of *Hai Jin Sha* (which is ten times the largest recommended dosage) caused side effects such as numbness of the tongue, nausea, headache, aversion to cold, and frequent urination. The patient returned to normal after symptomatic treatment.[4]

Hua Shi Cao (Herba Orthosiphon Aristatus)

化石草 化石草

Pinyin Name: *Hua Shi Cao*
Literal Name: "dissolve stone herb"
Alternate Chinese Names: *Mao Xu Cao, Shen Cha, Yao Zi Cao, Nan Yang Cao*
English Name: orthosiphon, cat's whiskers
Botanical Name: *Orthosiphon aristatus; Orthosiphon grandiflorus*
Pharmaceutical Name: Herba Orthosiphon Aristatus
Properties: bitter, cold
Channels Entered: Liver, Kidney, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Promotes Urination, Reduces Inflammation and Dissolves Stones

Nephritis, edema and urinary stones, gallstones, and hepatitis: *Hua Shi Cao* (Herba Orthosiphon Aristatus) enters the Kidney and Urinary Bladder to clear heat and promote diuresis. It also treats gallstones and hepatitis.

- Nephritis with edema: use this herb with *Wan Dian Jin* (Radix Ilicis Asprellae) and *Shan Pu Tao* (Radix Vitis Amurensis).
- Urinary stones: combine it with *Jin Qian Cao* (Herba Lysimachiae), *Hai Jin Sha* (Herba Lygodii), *Shi Wei* (Folium Pyrrosiae) or with the combination *Ba Zheng San* (Eight-Herb Powder for Rectification).
- Gallstones: use *Hua Shi Cao* with *Yu Jin* (Radix Curcumae), *Hai Jin Sha* (Herba Lygodii) and *Jin Qian Cao* (Herba Lysimachiae).
- Hepatitis: use it with *Bai Jiang Cao* (Herba cum Radice Patriniae), *Huang Shui Qie* (Herba Solani) and *Hu Zhang* (Rhizoma Polygoni Cuspidati).

2. Lowers Blood Pressure

- Hypertension: use *Hua Shi Cao* with *Shui Ding Xiang* (Herba Ludwigiae Prostratae) and *Ji Xue Cao* (Herba Centellae).

DOSAGE

6 to 18 grams in decoction

CAUTIONS / CONTRAINDICATIONS

- *Hua Shi Cao* should be used with caution for individuals who have Spleen and Stomach deficiencies.

CHEMICAL COMPOSITION

Potassium, sodium.

Shi Wei (Folium Pyrrosiae)

石韋　石韦

Pinyin Name: *Shi Wei*
Literal Name: "stone reed"
Alternate Chinese Names: *Shi Lan, Shi Pi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: pyrrosia, shearer's pyrrosia leaf, Japanese felt fern
Botanical Name: *Pyrrosia sheareri* (Bak.) Ching (*Lu Shan Shi Wei*); *Pyrrosia petiolosa* (Christ) Ching (*Bing Shi Wei*); *Pyrrosia lingua* (Thunb.) Farw. (*Shi Wei*)
Pharmaceutical Name: Folium Pyrrosiae
Properties: bitter, sweet, cool
Channels Entered: Urinary Bladder, Lung

CHINESE THERAPEUTIC ACTIONS

1. Promotes Diuresis

***Lin zheng* (dysuria syndrome) and edema:** *Shi Wei* (Folium Pyrrosiae) dispels damp-heat and promotes urination. It is commonly used to treat various kinds of *lin zheng*. In addition, it regulates water circulation and treats edema.

- *Re lin* (heat dysuria): use *Shi Wei* with *Che Qian Zi* (Semen Plantaginis) and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- *Shi lin* (stone dysuria): combine it with *Jin Qian Cao* (Herba Lysimachiae), *Hai Jin Sha* (Herba Lygodii) and *Hua Shi* (Talcum).
- *Xue lin* (bloody dysuria): use it with *Bai Mao Gen* (Rhizoma Imperatae), *Zhi Zi* (Fructus Gardeniae) and *Pu Huang* (Pollen Typhae).
- Edema: add *Che Qian Zi* (Semen Plantaginis), *Ze Xie* (Rhizoma Alismatis), and *Fu Ling* (Poria).

2. Dissolves Phlegm and Relieves Cough

Cough: *Shi Wei* treats cough with profuse sputum. It sedates heat in the *qi* (energy) level and also in the Lung channel. The decocted form of this herb is best for treatment of chronic bronchitis with cough and phlegm.

- Cough: use powdered *Shi Wei* and *Bing Lang* (Semen Arecae), served with *Sheng Jiang* (Rhizoma Zingiberis Recens) juice.
- Cough with yin deficiency: combine it with *Zhi Mu* (Radix Anemarrhenae).

3. Stops Bleeding

Bleeding: *Shi Wei* has a hemostatic effect and is commonly used to treat epistaxis, hematemesis, hypermenorrhea, and bleeding from trauma.

- Bleeding: use *Shi Wei* alone.

DOSAGE

5 to 10 grams, up to 15 to 30 grams of *Shi Wei* in severe cases.

CHEMICAL COMPOSITION

Isomangiferin, kaempferol, quercetin, isoquercitrin, trifolin, β-sitosterol, diploloptene, chlorogenic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Expectorant:** The water decoction of *Shi Wei* decreased the secretion of mucus in the respiratory tract. However, it showed only minimal expectorant effect at 15 g/kg via intraperitoneal injection or 50 g/kg via oral ingestion.[2]
- **Antitussive:** Oral administration of isomangiferin has marked antitussive action in mice, but is not as potent when compared to codeine.[3]
- **Antiviral:** Preparations of *Shi Wei* have shown marked inhibitory effectiveness against herpes simplex virus I.[4]

CLINICAL STUDIES AND RESEARCH

- **Chronic tracheitis:** *Shi Wei* was used individually or in an herbal combination for treatment of 552 patients with chronic tracheitis. Of those who received only *Shi Wei* for 20 days, 22% of patients showed improvement. Of those who received *Shi Wei* in an herbal combination, 56.6% showed significant improvement. The study reported that most patients began to benefit from the treatment within 1 to 2 days, characterized by a decrease in the amount and viscosity of the sputum.[5]

Shi Wei (Folium Pyrrosiae)

TOXICOLOGY

The LD_{50} for extract of *Shi Wei* varies between 17 and 90 g/kg for mice. The LD_{50} for isomangiferin is 4.65 g/kg in mice.[6,7]

AUTHORS' COMMENTS

Recent research has shown *Shi Wei* to be effective in treating cancer patients who have low white blood cell counts after receiving chemotherapy or radiation. It helps to increase the white blood cell count.

Yin Chen Hao (Herba Artemisiae Scopariae)

茵陳蒿 茵陈蒿

Pinyin Name: *Yin Chen Hao*
Literal Name: "mattress old wormwood"
Alternate Chinese Names: *Yin Chen, Mian Yin Chen*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: artemisia scoparia, virgate wormwood, capillary wormwood
Botanical Name: *Artemisia scoparia* Waldst. et Kit. (*Bin Hao*); *Artemisia capillaris* Thunb. (*Yin Chen Hao*)
Pharmaceutical Name: Herba Artemisiae Scopariae
Properties: bitter, cool
Channels Entered: Liver, Spleen, Gallbladder, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dispels Damp-Heat to Treat Jaundice

Jaundice: *Yin Chen Hao* (Herba Artemisiae Scopariae) is one of the most commonly used and most effective herbs for treating jaundice. It is most suitable for the yang-type jaundice in which the skin appears to be bright orange-yellow. *Yin Chen Hao*, when combined properly with other herbs, also addresses yin-type jaundice in which the skin appears dull, lusterless and yellow.

- Jaundice due to damp-heat with fever, bright yellow discoloration of the skin, dark, scanty urine: use *Yin Chen Hao* with *Zhi Zi* (Fructus Gardeniae) and *Da Huang* (Radix et Rhizoma Rhei). **Exemplar Formula:** *Yin Chen Hao Tang* (Artemisia Scoparia Decoction).
- Jaundice caused more by dampness with dysuria: use it with *Wu Ling San* (Five-Ingredient Powder with Poria) **Exemplar Formula:** *Yin Chen Wu Ling San* (Artemisia Scoparia and Five-Ingredient Powder with Poria).
- Jaundice from damp-cold with dark yellow discoloration of the skin, aversion to cold, and abdominal distention: use this herb with *Gan Jiang* (Rhizoma Zingiberis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).

Damp-heat in the Liver: Manifestations include cholecystitis, infectious hepatitis and liver cirrhosis. With its cooling thermal property, *Yin Chen Hao* dispels damp-heat from the Liver and Gallbladder with or without manifestations of jaundice. It helps in the secretion of bile and aids in the generation of liver cells.

- Cholecystitis or cholelithiasis: use *Yin Chen Hao* with *Chai Hu* (Radix Bupleuri), *Jin Qian Cao* (Herba Lysimachiae), *Yu Jin* (Radix Curcumae) and *Da Huang*

Yin Chen Hao (Herba Artemisiae Scopariae)

(Radix et Rhizoma Rhei).

- Hepatitis: combine it with *Huang Qin* (Radix Scutellariae), *Jin Qian Cao* (Herba Lysimachiae), *Bai Hua She She Cao* (Herba Oldenlandia) and *Chai Hu* (Radix Bupleuri).
- Liver cirrhosis: add *Bai Hua She She Cao* (Herba Oldenlandia) and *Hu Zhang* (Rhizoma Polygoni Cuspidati).

2. Treats Damp-Heat Febrile Disorders

Damp-heat febrile disorders: *Yin Chen Hao* dispels damp-heat in febrile disorders characterized by fever, muscle aches and pain, feelings of oppression in the chest, abdominal distention, yellow urine and constipation.

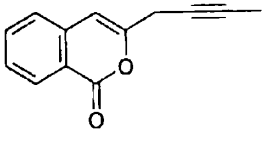
- Febrile disorders with damp-heat: use this herb with *Hua Shi* (Talcum), *Huang Qin* (Radix Scutellariae), and *Bai Dou Kou* (Fructus Amomi Rotundus). **Exemplar Formula:** *Gan Lu Xiao Du Dan* (Sweet Dew Special Pill to Eliminate Toxin).

3. Dispels Damp-Heat from the Exterior

Dermatological disorders: *Yin Chen Hao* dispels damp-heat from the exterior and treats various dermatological disorders, including urticaria, eczema, rashes, oozing sores, and more.

- Dermatological disorders due to damp-heat: use *Yin Chen Hao* with *Bai Xian Pi* (Cortex Dictamni), *Di Fu Zi* (Fructus Kochiae) and *Ku Shen Gen* (Radix Sophorae Flavescentis), either internally or topically.

DOSAGE



10 to 30 grams.

CAUTIONS / CONTRAINDICATIONS

- *Yin Chen Hao* is contraindicated if there is no damp-heat present.

CHEMICAL COMPOSITION

Capillanol, capillarin, capillarisin, capillartemisin A, B; capillene, chlorogenic acid, caffeic acid, phydroxya cetophenone, 6,7-dimethoxycoumarin.[1,2]

Capillarin

PHARMACOLOGICAL EFFECTS

- **Cholagogic:** A stimulating effect on gallbladder function was observed in dogs following administration of *Yin Chen Hao* in various preparation forms, including but not limited to water extract, alcohol extract, and essential oil.[3]
- **Hepatoprotective:** In one laboratory study, subcutaneous injection of a decoction of *Yin Chen Hao* showed a marked protective effect against carbon chloride-induced liver damage. In another study, oral administration of decoction of *Yin Chen Hao* stimulated the activity of cytochrome P-450 and increased the weight of the liver in mice. Lastly, *Yin Chen Hao Tang* (Artemisia Scoparia Decoction) was effective in reducing SGPT and SGOT levels.[4]
- **Antihypertensive:** Both water and alcohol extracts of *Yin Chen Hao* lowered blood pressure in anesthetized rats, cats and rabbits. While its effect was not negated by atropine, *Yin Chen Hao* did not lower blood pressure elevated by adrenalin. The duration of antihypertensive action following intravenous injection is approximately 120 to 160 minutes.[5]
- **Antihyperlipidemic:** Administration of a decoction of *Yin Chen Hao* at 3 g/kg/day for 2 to 3 weeks lowered both plasma cholesterols and β-lipoproteins in rabbits.[6]
- **Antibiotic:** Decoction of *Yin Chen Hao* has varying degrees of inhibitory effectiveness against such pathogens as *Mycobacterium tuberculosis*, *Corynebacterium diphtheriae*, *Bacillus anthracis*, *Salmonella typhi*, *Pseudomonas aeruginosa*, *E. coli*, *Bacillus dysenteriae*, *Bacillus subtilis*, *Staphylococcus aureus*, *Diplococcus meningitidis*, and influenza virus. The essential oil of the herb is effective against dermatophytes.[7,8]
- **Antipyretic:** Intraperitoneal injection of *Yin Chen Hao* effectively lowered body temperature for approximately 3 to 4 hours in rats with artificially-induced fever.[9,10]
- *Yin Chen Hao* also demonstrated mild diuretic and antiparasitic effects.[11]

CLINICAL STUDIES AND RESEARCH

- **Hepatitis:** Decoction of 30 to 45 grams of *Yin Chen Hao* given three times daily was prescribed for treatment of 32 cases of acute infectious hepatitis. The study reported excellent treatment results, with marked reduction of fever, jaundice, and of the size of the liver. The duration of treatment ranged from 3 to 15 days, with an average of 7 days.[12]
- **Parasitic infestation of the bile duct:** According to one study, 50 patients with parasitic infestation of the bile duct were treated with an herbal decoction with good success. The formula contained 30 to 60 grams of *Yin Chen Hao*. Also, *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Pu Gong Ying* (Herba Taraxaci) and others were added if infection was present.[13]
- **Hypercholesterolemia:** Daily consumption of 15 grams of *Yin Chen Hao* as a tea for one month per course of treatment was effective in reducing serum cholesterol levels. Of 82 patients, the study reported an average reduction of 42.4 mg/dL, or a 14.3% decrease, per person.[14]
- **Topical fungal infection:** Topical application of essential oil of *Yin Chen Hao* twice daily for four weeks was effec-

Yin Chen Hao (Herba Artemisiae Scopariae)

tive for skin and foot fungal infections.[15]

TOXICOLOGY

Overdose of capillarin is characterized by lethargy and salivation. The LD_{50} for capillarin in mice is 262.5 mg/kg via intraperitoneal injection.[16,17]

SUPPLEMENT

- 铃茵陳 / 铃茵陈 *Ling Yin Chen* (Herba Siphonostegia Chinensis), an herb with a similar pinyin name as *Yin Chen Hao*, is sometimes used as a substitute. However, these are two completely different herbs and should not be used interchangeably.

Bi Xie (Rhizoma Dioscoreae Hypoglaucae)

萆薢

Pinyin Name: *Bi Xie*
Alternate Chinese Names: *Zhu Mu, Chi Jie, Fen Bie Xie*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: tokoro
Botanical Name: *Dioscorea hypoglauca* palibin (*Fen Bi Xie*); *Dioscorea septemloba* Thunb. (*Mian Bi Xie*); *Dioscorea futschauensis* Uline (*Fu Zhou Shu Yu*)
Pharmaceutical Name: Rhizoma Dioscoreae Hypoglaucae
Properties: bitter, neutral
Channels Entered: Urinary Bladder, Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Separates Clear from Turbid

***Gao lin* (cloudy dysuria)**: *Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) dispels dampness and treats disorders characterized by cloudy, turbid, milky urine with white patches or bloody streaks. Burning sensations and pain during urination, and a red tongue with yellow tongue coating are all manifestations of damp-heat in the lower *jiao*. Other manifestations may include: frequent urge to urinate, urinary incontinence, cystitis, and acute inflammation of the urethra. Cloudy and turbid urine, urinary frequency and *lack* of burning sensation and pain are manifestations of yang deficiency.

- Cloudy urine from damp-heat: use *Bi Xie* with *Che Qian*

Bi Xie (Rhizoma Dioscoreae Hypoglaucae)

Zi (Semen Plantaginis), *Huang Bai* (Cortex Phellodendri) and *Hua Shi* (Talcum).

- Cloudy urine caused by yang deficiency: combine it with *Wu Yao* (Radix Linderae), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) and *Shi Chang Pu* (Rhizoma Acori). **Exemplar Formula:** *Bi Xie Fen Qing Yin* (Dioscorea Hypoglauca Decoction to Separate the Clear).

Leukorrhea: Accumulation of dampness in the lower *jiao* results in turbid, white vaginal discharge.

- Leukorrhea from dampness: use *Bi Xie* with *Fu Ling* (Poria) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

2. Dispels Wind and Dampness

***Bi zheng* (painful obstruction syndrome):** *Bi Xie* treats excess or deficient *bi zheng*, such as those characterized by cold and dampness (that worsen in cold and rainy weather), heat and dampness (worse in hot weather), or Kidney deficiency (weakness and soreness of the joints, especially the lower back and knees).

- *Bi zheng*: use *Bi Xie* with *Du Huo* (Radix Angelicae Pubescentis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Wei Ling Xian* (Radix Clematidis).
- *Bi zheng* due to cold and dampness: combine it with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gui Zhi* (Ramulus Cinnamomi).
- *Bi zheng* from heat and dampness: add *Qin Jiao* (Radix Gentianae Macrophyllae), *Yi Yi Ren* (Semen Coicis) and *Fen Fang Ji* (Radix Stephaniae Tetandrae).
- Low back pain and weak knees caused by Kidney deficiency: use this herb with *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci) and *Niu Xi* (Radix Cyathulae seu Achyranthis).

DOSAGE

10 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- Use *Bi Xie* with caution in patients with Kidney yin deficiency.

CHEMICAL COMPOSITION

Dioscin, gracillin, dioscoreasapotoxin A, B; tokoronin, yononin, diosgenin, tokorogenin, yamoogenin, yonogenin, kogagenin, igagenin.[1]

CLINICAL STUDIES AND RESEARCH

- **Nephritis:** A study reported good results in 14 patients with nephritis who took 24 to 36 grams of an herbal formula with hot water, two to three times daily, before meals. No contraindications were listed for this formula. The herbal formula contained 500g each of *Bi Xie*, *Huang Bai* (Cortex Phellodendri), *Zhi Mu* (Rhizoma Anemarrhenae Asphodeloidis), *Ze Xie* (Rhizoma Alismatis), *Fu Ling* (Poria), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), and *Mu Dan Pi* (Cortex Moutan), ground into fine powder, mixed, and made into pills.[2]
- **Urinary tract infection:** In another study, 32 patients with urinary tract infections were treated with an herbal decoction containing *Bi Xie*, with complete recovery in 18 cases, marked improvement in 13 cases, and no response in 1 case. The overall effective rate was 97.6%. The treatment protocol was: one dose of the decoction daily for 3 days per course of treatment. The herbal decoction contained *Bi Xie* 20g, *Fu Ling* (Poria) 30g, *Hua Shi* (Talcum) 30g, *Cang Zhu* (Rhizoma Atractylodis) 15g, *Huang Bai* (Cortex Phellodendri) 15g, *Che Qian Zi* (Semen Plantaginis) 15g, *Qu Mai* (Herba Dianthi) 15g, *Chuan Mu Tong* (Caulis Clematidis Armandii) 10g, *Bian Xu* (Herba Polygoni Avicularis) 10g, *Zhi Zi* (Fructus Gardeniae) 10g, *Da Huang* (Radix et Rhizoma Rhei) 10g, *Gan Cao* (Radix Glycyrrhizae) 3g, and other herbs as deemed necessary.[3]

Dong Gua Pi (Exocarpium Benincasae)

冬瓜皮

Pinyin Name: *Dong Gua Pi*
Literal Name: "wintermelon peel"
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: benincasa peel
Botanical Name: *Benincasa hispida* (Thunb.) Cogn. (*Dong Gua*)
Pharmaceutical Name: Exocarpium Benincasae
Properties: sweet, bland, cool
Channels Entered: Lung, Small Intestine

CHINESE THERAPEUTIC ACTIONS

Promotes Diuresis and Reduces Edema

Edema: *Dong Gua Pi* (Exocarpium Benincasae) dispels the accumulation of water and clears heat simultaneously. It is mainly used for edema caused by damp-heat, and is relatively mild when used alone. Therefore, it is often used in combination with other diuretic herbs to enhance its effect.

- Edema: use *Dong Gua Pi* with *Fu Ling* (Poria), *Chi Xiao Dou* (Semen Phaseoli), and *Bai Mao Gen* (Rhizoma Imperatae).

DOSAGE

15 to 30 grams in decoction.

Chi Xiao Dou (Semen Phaseoli)

赤小豆

Pinyin Name: *Chi Xiao Dou*
Literal Name: "red little bean," "dark red little bean"
Alternate Chinese Names: *Hong Dou*, *Ci Dou*, *Zhu Xiao Dou*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: phaseolus, rice bean, adsuki bean
Botanical Name: *Phaseolus calcaratus* Roxb. (*Chi Xiao Dou*); *Phaseolus angularis* Wight (*Chi Dou*)
Pharmaceutical Name: Semen Phaseoli
Properties: sweet, sour, neutral
Channels Entered: Heart, Small Intestine

Chi Xiao Dou (Semen Phaseoli)

CHINESE THERAPEUTIC ACTIONS

1. Promotes Diuresis and Reduces Swelling

Chi Xiao Dou (Semen Phaseoli) regulates water circulation and treats disorders characterized by the accumulation of water, such as edema, ascites, and leg *qi*. *Chi Xiao Dou* can be used as a single-herb remedy, or combined with other diuretic herbs.

- Generalized edema with constipation: use *Chi Xiao Dou* with *Sang Bai Pi* (Cortex Mori) and *Zi Su Ye* (Folium Perillae), or take alone as food, instead of rice.
- Edema caused by nephritis or malnutrition, and ascites from liver cirrhosis: cook this herb with carp and take it as food on a daily basis.
- Leg *qi* with edema: use *Chi Xiao Dou* alone internally, and externally as a soak.

2. Clears Damp-Heat, Relieves Jaundice

Jaundice: *Chi Xiao Dou* has a mild action for treatment of jaundice caused by the accumulation of damp-heat.

3. Eliminates Toxins and Drains Pus

Erysipelas or toxic swellings and carbuncles: *Chi Xiao Dou* eliminates heat and toxins from the skin to treat dermatological disorders such as sores, erysipelas, lesions and carbuncles. This herb drains pus, reduces swelling, and enhances recovery.

- Swellings and abscesses that have not ulcerated: mix *Chi Xiao Dou* with egg whites, honey or vinegar, and apply topically. Re-apply as it dries.
- External injuries with bruises and sprains: apply the herb topically.

DOSAGE

10 to 30 grams. *Chi Xiao Dou* can be used in decoctions, pills, or as a powder. It can be taken internally or applied topically. It is also consumed as a food (congee or porridge).

CAUTIONS / CONTRAINDICATIONS

- *Chi Xiao Dou* is contraindicated for yin-deficient patients or those without dampness.

CHEMICAL COMPOSITION

α-globulin, β-globulin, carbohydrates, fatty acid, saponin, vitamin A, B_1, B_2.[1]

CLINICAL STUDIES AND RESEARCH

- **Mumps:** Seven patients with mumps were treated by topical application of *Chi Xiao Dou*, with positive results. The topical application was prepared by grinding 50 to 70 pieces of *Chi Xiao Dou* and mixing the powder with water, egg white, or honey.[2]
- **Sprain or strain with bruises:** Fifty-two patients with swelling and bruises due to sprain or strain were treated with a topical application of *Chi Xiao Dou*, with good results within 1 or 2 doses. The treatment protocol was to apply the herbal paste, leave it on, and remove it after 24 hours. The herbal paste was prepared by mixing the finely-powdered herb with cold water.[3]
- **Insufficient lactation:** Twenty patients experiencing insufficient production of breast milk were treated with a decoction of 240 grams of *Chi Xiao Dou* twice daily for 3 to 5 days, with good results.[4]

SUPPLEMENT

- 相思子 *Xiang Si Zi* (Semen Abrus Precatoris), *Abrus precatoris* L., is sometimes used in error as *Chi Xiao Dou* because of their similar appearances. *Chi Xiao Dou* is dark red in color, while *Xiang Si Zi* is half-red, half-black. These herbs should not be used interchangeably since *Xiang Si Zi* is toxic, and responsible for some reported instances of accidental poisoning.[5]

Yu Mi Xu (Stigma Maydis)

玉米鬚 玉米须

Pinyin Name: *Yu Mi Xu*
Literal Name: "corn silk," "jade rice whiskers"
Alternate Chinese Names: *Bao Mi Xu, Bang Zi Mao, Yu Mi Xin, Yu Mi Rui*
Original Source: *Zhen Nan Ben Cao* (Materia Medica of South Yunnan) by Lan Mao in Qing Dynasty
English Name: corn silk, corn stigma
Botanical Name: *Zea mays* L. (*Yu Shu Shu*)
Pharmaceutical Name: Stigma Maydis
Properties: sweet, bland, neutral
Channels Entered: Urinary Bladder, Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Promotes Diuresis, Treats Edema and Dysuria

Edema and dysuria: *Yu Mi Xu* (Stigma Maydis) regulates water circulation and reduces swelling. It is effective in addressing edema and dysuria arising from nephritis.

- Edema: use 6 grams of *Yu Mi Xu* alone.
- Nephritis with edema: use a large dosage of *Yu Mi Xu* alone, or in combination with *Ze Xie* (Rhizoma Alismatis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Dysuria with stones: combine this herb with *Che Qian Zi* (Semen Plantaginis) and *Hai Jin Sha* (Herba Lygodii).
- Diabetes mellitus: use 30 grams of *Yu Mi Xu* in decoction.
- Hypertension: use it with *Xi Gua Pi* (Pericarpium Citrulli).

2. Clears Damp-Heat from the Liver and Gallbladder

Yu Mi Xu dispels damp-heat from the Liver and Gallbladder to treat infectious hepatitis, cholecystitis, cholelithiasis and hypertension.

- Hepatitis, cholecystitis, and cholelithiasis caused by damp-heat: use *Yu Mi Xu* with *Jin Qian Cao* (Herba Lysimachiae), *Yin Chen Hao* (Herba Artemisiae Scopariae), *Yu Jin* (Radix Curcumae) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).
- Hypertension: use *Yu Mi Xu* alone or with *Tian Ma* (Rhizoma Gastrodiae) and *Gou Teng* (Ramulus Uncariae cum Uncis).

DOSAGE

15 to 30 grams, up to 45 to 60 grams of *Yu Mi Xu* in severe cases.

CHEMICAL COMPOSITION

Crytoxanthin, resin, saponins, alkaloids, ascorbic acid, vitamin K, sitosterol, stigmasterol, malic acid, palmitic acid, tartaric acid, oxalic acid, pantothenic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Administration of *Yu Mi Xu* has been associated with an increase in excretion of urine and chloride in humans and rabbits.[2]
- **Antihypertensive:** Intravenous injection of a preparation of *Yu Mi Xu* in dogs has been associated with reduction of blood pressure. Continuous administration for 3 weeks, however, showed no permanent change of the animals' blood pressure.[3]
- **Cholagogic:** *Yu Mi Xu* stimulates production and excretion of bile acid. It also decreases the viscosity of bile.[4,5]
- **Others:** *Yu Mi Xu* has antidiabetic and hemostatic effects.[6]

CLINICAL STUDIES AND RESEARCH

- **Chronic nephritis:** In one clinical study, patients with chronic nephritis were treated with long-term therapy of *Yu Mi Xu*. The treatment protocol was to cook 50 grams of the herb in 600 ml of water for 20 to 30 minutes, to yield 300 to 400 ml of decoction. All 300 to 400 ml of the decoction were to be consumed at once, or as several doses daily. After 15 days to 6 months of continuous treatment in 9 patients with chronic nephritis, 3 showed complete recovery, 2 showed some improvement, 4 showed no change. Positive improvements were reduction of edema, improvement of kidney function and remission of proteinuria. No significant side effects were reported.[7]

HERB-DRUG INTERACTION

- **Warfarin (Coumadin):** *Yu Mi Xu* contains vitamin K,

Yu Mí Xu (Stigma Maydis)

which may reduce the anticoagulant effect of warfarin. Therefore, concurrent use of the herb and the drug should be monitored carefully to avoid the formation of blood clots.[8]

- **Diuretics:** *Yu Mi Xu* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes. [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).][9]

TOXICOLOGY

Yu Mi Xu is very well-tolerated. The lethal dose in rabbits is 250 mg/kg via intravenous injection. The effective dose for diuretic action, however, is only 1.5 mg/kg. No toxic injury to the heart, lungs, or other vital organs was observed at 1.5 mg/kg.[10]

Ze Qí (Herba Euphorbiae Helioscopiae)

澤漆 泽漆

Pinyin Name: *Ze Qi*
Literal Name: "marsh lacquer"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: euphorbia
Botanical Name: *Euphorbia helioscopia* L. (*Ze Qi*)
Pharmaceutical Name: Herba Euphorbiae Helioscopiae
Properties: sweet, bitter, acrid, cool
Channels Entered: Large Intestine, Small Intestine, Lung
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Promotes Circulation of Water, Reduces Edema

Edema or ascites: *Ze Qi* (Herba Euphorbiae Helioscopiae) strongly promotes water circulation and eliminates water stagnation.

- Water stagnation: use *Ze Qi* with *Ze Xie* (Rhizoma Alismatis), *Chi Fu Ling* (Poria Rubrae), and *Sang Bai Pi* (Cortex Mori).

2. Dissolves Phlegm, Stops Cough

Ze Qi treats cough and wheezing accompanied by profuse sputum. It is also beneficial in treatment of chronic tracheitis.

- Cough and wheezing with sputum: use it with *Ban Xia* (Rhizoma Pinelliae), *Bai Qian* (Rhizoma Cynanchi Stauntonii), *Huang Qin* (Radix Scutellariae), and *Gan Cao* (Radix Glycyrrhizae).

3. Dissolves Phlegm, Disperses Nodules

Ze Qi dissolves nodules and hardnesses characterized by accumulation and hardening of phlegm. It may be used individually or in an herbal combination; internally or topically.

DOSAGE

5 to 10 grams. For external use, cook *Ze Qi* until it turns into a thick paste, and apply topically.

Ze Qi (Herba Euphorbiae Helioscopiae)

CAUTIONS / CONTRAINDICATIONS

- Do not use *Ze Qi* in cases of qi and blood deficiencies.
- Direct contact of *Ze Qi* to skin or mucous membranes may cause irritation, redness, and discomfort.

CHEMICAL COMPOSITION

Quercetin, quercetin-5,3-di-D-galactoside, heliosin, quercetin-3-o-digalactoside, hyperoside, dihydrofucosterol, phasin, helioscopiol, euphorbin, calcium maltale.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** A preparation of *Ze Qi* at high concentration (50:1) has an inhibitory effect against *Mycobacterium tuberculosis*.[2]
- **Others:** It has expectorant, antitussive, and antipyretic effects.[3]

CLINICAL STUDIES AND RESEARCH

- **Chronic tracheitis:** In one report, extract of *Ze Qi* was used to treat 232 patients with chronic tracheitis two to four times daily for 10 days. The study reported marked improvement in 36% of the cases, and moderate improvement in 52% of the cases. Therapeutic benefits included decreased amounts of both sputum and coughing. Side effects such as stomach discomfort and upper abdominal pain were reported in 16 cases. Seven patients dropped out of the study as a result of gastrointestinal disturbances.[4]

TOXICOLOGY

No fatalities were reported following oral ingestion of *Ze Qi* by mice at 125 g/kg.[5]

Dong Kui Zi (Semen Malvae)

冬葵子 冬葵子

Pinyin Name: *Dong Kui Zi*
Alternate Chinese Names: *Dong Kui Guo, Kui Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: malva
Botanical Name: *Malva verticillata* L. (*Dong Kui Zi*)
Pharmaceutical Name: Semen Malvae
Properties: sweet, cold
Channels Entered: Urinary Bladder, Large Intestine, Small Intestine

CHINESE THERAPEUTIC ACTIONS

1. Regulates Water Circulation

***Lin zheng* (dysuria syndrome) and edema:** *Dong Kui Zi* (Semen Malvae) regulates water circulation to promote normal urination.

- Generalized dysuria: use *Dong Kui Zi* as a single-herb remedy.
- Dysuria due to accumulation of heat in the Urinary Bladder: combine this herb with *Che Qian Zi* (Semen Plantaginis), *Chuan Mu Tong* (Caulis Clematidis

Dong Kui Zi (Semen Malvae)

Armandii) and *Huang Bai* (Cortex Phellodendri).

- Edema, sensations of heaviness, dysuria during pregnancy: use it with *Fu Ling* (Poria).
- Urinary stones: combine it with *Hai Jin Sha* (Herba Lygodii), *Jin Qian Cao* (Herba Lysimachiae), *Ze Xie* (Rhizoma Alismatis), *Ze Lan* (Herba Lycopi) and *Niu Xi* (Radix Cyathulae seu Achyranthis).

2. Promotes Lactation

Blocked lactation: *Dong Kui Zi* promotes lactation in postpartum women who have breast distention and pain due to stagnation in the channels and collaterals.

- Insufficient lactation with breast pain and swelling: use *Dong Kui Zi* with *Wang Bu Liu Xing* (Semen Vaccariae) and *Chuan Shan Jia* (Squama Manis); or, take *Dong Kui Zi* and *Sha Ren* (Fructus Amomi) as powder, chased by warm grain-based liquor.
- Fibrocystic breast disorder: use this herb with *Bai Zhi* (Radix Angelicae Dahuricae), *Gua Lou Shi* (Fructus Trichosanthis), *Lou Lu* (Radix Rhapontici), *Lu Feng Fang* (Nidus Vespae) and *Chi Shao* (Radix Paeoniae Rubrae).

3. Moistens the Intestines, Relieves Constipation

Constipation: *Dong Kui Zi* treats constipation due to insufficient fluids in the Large Intestine. It is best for patients experiencing both frequent urination and constipation. It is commonly combined with other herbs in the purgative or moist laxative categories to maximize its effectiveness.

DOSAGE

10 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- Use *Dong Kui Zi* carefully in pregnant women, or in patients who have deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Lipids, protein, sugars, starch.[1]

TOXICOLOGY

There has been one case report of an adverse reaction associated with the use of *Dong Kui Zi*. After taking two doses of a decoction containing the herb, the patient reported diplopia, visual disturbance, excitation, and delirium. Administration of the herbs was immediately discontinued and the patient was treated symptomatically. All adverse reactions resolved within 24 hours.[2]

SUPPLEMENT

- 苘麻子 *Qing Ma Zi* (Semen Abutili): In the past, malva and albutilon were both used as the botanical source for "*Dong Kui Zi.*" Today, however, these plants are separately identified as having distinct and different functions that are not interchangeable in clinical usage. Efforts are being made to separate these two sources, to avoid confusion. The more updated and accurate terminologies are *Dong Kui Zi* (Semen Malvae) and *Qing Ma Zi* (Semen Abutili). *Dong Kui Zi* is derived from *Malva verticillata,* while *Qing Ma Zi* is derived from *Abutilon theophrastii* or *Abutilon avicennae.* Clinically, *Dong Kui Zi* (Semen Malvae) is commonly used to treat dysuria and constipation, and *Qing Ma Zi* (Semen Abutili) treats dysuria and dysentery.[3]

Chapter 6 summary

— Water-Regulating and Damp-Resolving Herbs

Name	Similarities	Differences
Fu Ling (Poria)	Promote diuresis, treat edema and *lin zheng* (dysuria syndrome)	Strengthens the Spleen, calms the *shen* (spirit)
Zhu Ling (Polyporus)		Exerts a stronger diuretic function than the others
Ze Xie (Rhizoma Alismatis)		Strongly promotes diuresis, treats vertigo and dizziness caused by accumulation of dampness
Yi Yi Ren (Semen Coicis)		Strengthens the Spleen, treats *bi zheng* (painful obstruction syndrome) due to dampness, and clears heat to expel pus
Che Qian Zi (Semen Plantaginis)	Clear heat, promote diuresis, treat *shi-re lin* (damp-heat dysuria)	Clears heat from the Liver and Lung
Hua Shi (Talcum)		Clears summer-heat, clears heat and promotes healing of damp sores when used externally
Chuan Mu Tong (Caulis Clematidis Armandii)		Sedates Heart fire, promotes lactation
Tong Cao (Medulla Tetrapanacis)		Promotes lactation, weaker in clearing heat
Deng Xin Cao (Medulla Junci)		Clears Heart fire
Di Fu Zi (Fructus Kochiae)		Treats damp sores and relieves itching
Bian Xu (Herba Polygoni Avicularis)		Kills parasites and relieves itching
Qu Mai (Herba Dianthi)		Invigorates blood circulation, opens channels and collaterals, treats amenorrhea
Bai Long Chuan Hua Tou (Radix Clerodendron Paniculatum)		Regulates menstruation and treats abnormal vaginal discharge
Ding Shu Xiu (Herba Elephantopus Scaber)		Reduces swelling
Shui Ding Xiang (Herba Ludwigiae Prostratae)		Cools blood
Mo Gu Xiao (Caulis Hyptis Capitatae)		Unblocks stagnation to relieve pain
Xian Feng Cao (Herba Bidentis)		Reduces swelling and inflammation
Bi Zi Cao (Herba Pogonantheri Criniti)		Promotes normal urination
Dong Gua Zi (Semen Benincasae)		Clears heat, dissolves phlegm, and eliminates pus
Shan Pu Tao (Radix Vitis Amurensis)		Tonifies the Kidney and benefits the eyes
Ma Ti Jin (Herba Dichondrae Repentis)		Invigorates blood circulation
Jin Qian Cao (Herba Lysimachiae)	Dispel dampness, treat *re lin* (heat dysuria) and *shi lin* (stone dysuria)	Dispels gallstones and urinary stones, reduces jaundice
Hai Jin Sha (Herba Lygodii)		Treats *lin zheng* (dysuria syndrome)
Hua Shi Cao (Herba Orthosiphon Aristatus)		Lowers blood pressure
Shi Wei (Folium Pyrrosiae)		Dissolves phlegm and relieves cough
Yin Chen Hao (Herba Artemisiae Scopariae)	Regulate water, promote diuresis, reduce edema	Treats jaundice
Bi Xie (Rhizoma Dioscoreae Hypoglaucae)		Dispels dampness and treats cloudy urine, treats arthritis
Dong Gua Pi (Exocarpium Benincasae)		Reduces edema
Chi Xiao Dou (Semen Phaseoli)		Treats jaundice, clears toxins, treats abscesses and swellings
Yu Mi Xu (Stigma Maydis)		Treats dysuria and damp-heat in the Liver and Gallbladder
Ze Qi (Herba Euphorbiae Helioscopiae)		Dispels phlegm to relieve cough and disperse nodules
Dong Kui Zi (Semen Malvae)		Promotes lactation and treats constipation

Chapter 6 summary

General Characteristics of Water-Regulating and Damp-Resolving Herbs:

Taste: sweet, bland or bitter

Thermal property: neutral to cold

Channels entered: Kidney, Urinary Bladder

Therapeutic actions: promote diuresis, reduce swelling, treat *lin zheng* (dysuria syndrome)

These herbs regulate water and resolve dampness to treat dysuria, leukorrhea, edema, phlegm or damp accumulation, jaundice, damp sores, damp-heat disorders, and *bi zheng* (painful obstruction syndrome).

Fu Ling (Poria), *Zhu Ling* (Polyporus), ***Ze Xie*** (Rhizoma Alismatis) and ***Yi Yi Ren*** (Semen Coicis) promote diuresis to treat edema, dysuria, edema, and water accumulation.

Fu Ling strengthens the Spleen, addressing Spleen deficiency with accumulation of dampness by dispelling dampness and reducing swelling. Its ability to treat the symptoms and the cause of the disease makes it one of the most commonly prescribed herbs for these imbalances.

Zhu Ling and *Ze Xie* both have stronger diuretic action but do not strengthen the Spleen.

Ze Xie treats dizziness and vertigo caused by phlegm accumulation.

Yi Yi Ren strengthens the Spleen and is most suited for use in patients with Spleen deficiency and damp accumulation. It clears heat and dispels pus, thus is useful in treating lung and/or intestinal abscesses. It also treats *bi zheng* (painful obstruction syndrome).

Che Qian Zi (Semen Plantaginis) and ***Hua Shi*** (Talcum) commonly address *shi-re lin* (damp-heat dysuria) and *re lin* (heat dysuria). Both are sweet and cold, clear heat, dispel dampness, and consolidate loose stools by promoting urination of excess water.

Che Qian Zi, stronger in clearing heat, clears Liver fire and brightens the eyes, clears Lung heat and dissolves phlegm. The entire plant clears heat, promotes diuresis and is especially good at clearing heat to eliminate toxins.

Hua Shi clears summer-heat and dampness, and is used in the summer for febrile disorders resulting from heat and dampness. As a topical, *Hua Shi* clears heat to treat eczema, damp sores, rashes and other dermatological disorders.

Chuan Mu Tong (Caulis Clematidis Armandii), bitter and cold, strongly promotes diuresis, promotes lactation, and clears Heart fire. It also opens the channels and treats *bi zheng* (painful obstruction syndrome).

Tong Cao (Medulla Tetrapanacis) and ***Deng Xin Cao*** (Medulla Junci) are sweet, bland and cool.

Tong Cao has a milder heat-clearing effect to treat *shi-re lin* (damp-heat dysuria).

Deng Xin Cao dispels dampness and treats *shi-re lin* (damp-heat dysuria) and *shi lin* (stone dysuria).

Di Fu Zi (Fructus Kochiae) and ***Bian Xu*** (Herba Polygoni Avicularis) dispel dampness, relieve itching and treat sores, furuncles and other dermatological disorders.

Di Fu Zi relieves itching, eczema, and urticaria.

Bian Xu kills parasites, particularly roundworm and hookworm.

Qu Mai (Herba Dianthi) treats various types of *lin zheng* (dysuria syndrome). It also invigorates blood circulation to regulate menstruation.

Bai Long Chuan Hua Tou (Radix Clerodendron Paniculatum), ***Ding Shu Xiu*** (Herba Elephantopus Scaber) and ***Shui Ding Xiang*** (Herba Ludwigiae Prostratae) promote diuresis to treat water accumulation, and dispel wind and damp to relieve pain.

Bai Long Chuan Hua Tou dispels wind and damp to relieve pain.

Ding Shu Xiu relieves headache and migraine.

Shui Ding Xiang clears heat, reduces swelling and inflammation.

Chapter 6 summary

Mo Gu Xiao (Caulis Hyptis Capitatae) and ***Xian Feng Cao*** (Herba Bidentis) promote generation of new flesh.

Mo Gu Xiao unblocks stagnation to promote generation of flesh.

Xian Feng Cao reduces swelling and inflammation to promote generation of flesh.

Bi Zi Cao (Herba Pogonantheri Criniti) treats dysuria caused by a wide variety of disorders, as in urinary tract infection, cystitis, and nephritis.

Dong Gua Zi (Semen Benincasae) clears the Lung to dispel phlegm and abscesses, and treats cough or lung abscesses caused by Lung heat, or by intestinal abscesses.

Shan Pu Tao (Radix Vitis Amurensis) tonifies the Liver and the Kidney to brighten the eyes.

Ma Ti Jin (Herba Dichondrae Repentis) invigorates blood circulation to enhance its effectiveness in regulating water.

Jin Qian Cao (Herba Lysimachiae), ***Hai Jin Sha*** (Herba Lygodii), ***Hua Shi Cao*** (Herba Orthosiphon Aristatus) and ***Shi Wei*** (Folium Pyrrosiae) display excellent abilities to resolve dampness, promote urination, dispel damp-heat, and treat *shi lin* (stone dysuria). These herbs are often used together to dissolve and dispel stones.

Jin Qian Cao is the most effective herb for dissolving both gallstones and kidney stones.

Hai Jin Sha is effective to treat both kinds of stones, but also clears heat and eliminates toxins.

Hua Shi Cao addresses both gallstones and kidney stones, as well as hepatitis and nephritis.

Shi Wei reduces edema, and is used for kidney stones but not for gallstones. It also resolves phlegm.

Yin Chen Hao (Herba Artemisiae Scopariae) is essential in treatment of both yin- and yang-type jaundice. It treats gallstones and cholecystitis (with or without jaundice), clears heat, dispels dampness and treats various dermatological disorders caused by damp-heat.

Chi Xiao Dou (Semen Phaseoli) promotes diuresis, reduces swelling and treats jaundice. Externally, it eliminates toxins, expels pus and reduces swelling and carbuncles.

Yu Mi Xu (Stigma Maydis) clears damp-heat from the Liver and Gallbladder, treating hepatitis, cholecystitis and gallstones caused by damp-heat.

Bi Xie (Rhizoma Dioscoreae Hypoglaucae) is an essential herb to separate clear urine from turbid urine. Clinically, it treats nephritis and urinary tract infections, and dispels wind and dampness in *bi zheng* (painful obstruction syndrome).

Dong Gua Pi (Exocarpium Benincasae) is used strictly to regulate water and relieve edema.

Ze Qi (Herba Euphorbiae Helioscopiae) treats cough with phlegm and sputum, or nodules of phlegm stagnation.

Dong Kui Zi (Semen Malvae) promotes lactation and relieves constipation.

Chapter 6 summary

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH WATER-REGULATING AND DAMP-RESOLVING FUNCTIONS

Name	Functional Category
Bai Mao Gen (Rhizoma Imperatae)	Stop-Bleeding Herbs (Chapter 11)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)	Tonic Herbs (Chapter 17)
Ban Bian Lian (Herba Lobeliae Chinensis)	Heat-Clearing Herbs (Chapter 2)
Fen Fang Ji (Radix Stephaniae Tetandrae)	Wind-Damp Dispelling Herbs (Chapter 4)
Fu Ping (Herba Spirodelae)	Exterior-Releasing Herbs (Chapter 1)
Huang Qi (Radix Astragali)	Tonic Herbs (Chapter 17)
Ma Huang (Herba Ephedrae)	Exterior-Releasing Herbs (Chapter 1)
Qian Niu Zi (Semen Pharbitidis)	Downward Draining Herbs (Chapter 3)
Shang Lu (Radix Phytolaccae)	Downward Draining Herbs (Chapter 3)
Ting Li Zi (Semen Descurainiae seu Lepidii)	Phlegm-Resolving and Coughing- and Wheezing-Relieving Herbs (Chapter 13)
Xiang Ru (Herba Elsholtziae seu Moslae)	Exterior-Releasing Herbs (Chapter 1)
Yi Mu Cao (Herba Leonuri)	Blood-Invigorating and Stasis-Removing Herbs (Chapter 12)
Ze Lan (Herba Lycopi)	Blood-Invigorating and Stasis-Removing Herbs (Chapter 12)

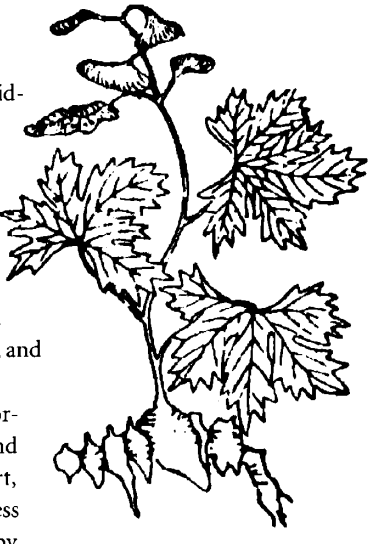
Mang Cao (Fructus Illicium Lanceolatum) 468

Chapter 7

— Interior-Warming Herbs

Definition: Herbs that warm the interior, as the name implies, warm the interior of the body and dispel cold.

Cold disorders may affect the exterior or interior of the body. When cold attacks the exterior, acrid and warm herbs dispel cold and release the exterior. When cold affects the interior, acrid and hot herbs dispel cold and restore internal warmth. Interior-warming herbs are acrid, bitter and warm. They dispel interior cold and fortify yang to treat excess cold attacking the interior, or yang deficiency leading to invasion of cold. Herbs that warm the interior may serve one or more of the following functions:



Interior-warming herbs restore normal functioning of the internal organs.

- dispel cold to relieve epigastric and abdominal pain
- warm the ***Spleen*** and ***Stomach*** to treat nausea, vomiting, diarrhea and dysentery
- strengthen yang to relieve aversion to cold, cold extremities, pale face, clear urine, pale tongue with white coat, and deep, thready pulse
- restore yang in individuals experiencing yang collapse, with extreme coldness of the extremities, polyuria with clear urine, profuse perspiration, and failing pulse.

SUBCATEGORIES OF ACTION

Herbs that warm the interior are not divided into subcategories, but they do individually enter different organs and treat different patterns of illness. It is important to keep in mind that each herb has distinct properties and indications for use. Some are extremely potent and restore collapsed yang, while others are mild to moderate in potency and gradually dispel cold and warm yang.

Though **interior-warming** herbs and **yang-tonifying** herbs are identified in separate categories, they share many similarities amid their differences. Interior-warming herbs primarily warm Heart and Spleen yang to drive out excess cold, while yang-tonifying herbs mainly replenish Kidney yang, blood, and *jing* (essence), and strengthen tendons and bones.

Fu Zi (Radix Aconiti Lateralis Praeparata)
Ben Cao Gang Mu (Materia Medica),
by Li Shi-Zhen, 1578 A.D.

- Interior-warming herbs are usually acrid, warm or hot, and drying. Some interior-warming herbs are sweet, salty and moistening in nature to help tonify the yang and benefit the *jing* (essence), blood, bones and tendons. These herbs enter the Heart, Spleen and Kidney to warm the organs and dispel internal cold. This treats excess cold, Heart and Kidney yang deficiencies, invasion of cold, and yang qi trapped by excess invasion of cold.
- Yang-tonifying herbs are mostly sweet, salty, and warm, and they enter the Kidney channel to treat Kidney yang deficiency and related symptoms. The salty taste signifies that the herbs enter the Kidney channel and the sweet taste denotes the tonic nature of the herbs.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Correct differential diagnosis requires assessment of the affected location, the severity of cold excess and yang deficiency, and awareness of whether the illness is acute, chronic, or an acute flare-up of a chronic condition.

Location: Assessment of the location of cold excess requires discerning whether the pathogen is at the exterior or has penetrated to the interior. External cold requires the use of exterior-releasing herbs, while internal cold requires the use of interior-warming herbs.

Chapter 7 — Interior-Warming Herbs

Severity: Assessment of the location and severity of yang deficiency refers to determining which organ is affected, and whether yang is merely deficient, or on the verge of collapse. The ***Spleen, Stomach*** and ***Kidney*** are the organs most vulnerable to yang deficiency. In addition to herbs that warm the interior, herbs that tonify yang should be added as well.

Acute or **chronic**: Acute conditions often involve the collapse of yang, characterized by symptoms such as extreme coldness of the extremities, profuse perspiration, and a failing pulse. Such conditions require immediate and aggressive treatment to revive the patient. Chronic conditions often involve simultaneous cold excess and yang deficiency. Symptoms that indicate internal cold and yang deficiency include epigastric and abdominal pain, vomiting, hiccups, poor appetite, diarrhea or loose stools, intolerance to cold, coldness of the extremities, pale complexion, clear polyuria, pale tongue with a thin, white coating, and a deep, thready pulse. Exact symptoms vary depending on the organs affected. Therefore, optimal treatment requires continuous and gentle therapy to dispel cold and to warm yang.

Interior-warming herbs primarily warm Heart and Spleen yang. ***Yang-tonifying*** herbs mainly replenish Kidney yang, blood, and *jing* (essence).

CAUTIONS/CONTRAINDICATIONS

- Acrid, warm and drying, interior-warming herbs are contraindicated in cases of excess heat and in yin deficiency. They must be used with caution for patients with deficiencies of body fluids or blood, patients who are bleeding, or who have true heat masked by false cold.
- Some of these herbs should be used with caution during pregnancy.
- Do not prescribe at larger than appropriate dosage or use these herbs for an extended period of time.

Note: Patients experiencing conditions of extreme cold may vomit after drinking the interior-warming decoction. To avoid this, either add some heat-clearing herbs to the formula or have the patient drink the decoction when it has cooled to room temperature.

PROCESSING

Some herbs that warm the interior are toxic and must be processed separately before decocting, to minimize the risk of side effects and adverse reactions. Examples of interior-warming herbs that require processing include *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Chuan Wu* (Radix Aconiti Preparata) and *Cao Wu* (Radix Aconiti Kusnezoffii).

PHARMACOLOGICAL EFFECTS

- **Analgesic and anesthetic:** Varying degrees of analgesic strength are represented in herbs such as *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), *Wu Zhu Yu* (Fructus Evodiae), *Xi Xin* (Herba Asari), *Hua Jiao* (Pericarpium Zanthoxyli) and *Ding Xiang* (Flos Caryophylli).
- **Cardiovascular:** Interior-warming herbs have positive inotropic and chronotropic actions to increase cardiac contractility, dilate blood vessels, and increase cardiac output. *Fu Zi* (Radix Aconiti Lateralis Praeparata) is one of the strongest herbs to increase heart rate and contractile force. In addition, both *Fu Zi* and *Rou Gui* (Cortex Cinnamomi) dilate the coronary arteries, increase blood perfusion to cardiac muscle, and increase cardiac output. Other herbs with cardiotonic effects include *Gan Jiang* (Rhizoma Zingiberis), *Hu Jiao* (Fructus Piper), and *Wu Zhu Yu* (Fructus Evodiae).
- **Gastrointestinal:** Many interior-warming herbs stimulate the gastrointestinal system to increase the production and secretion of saliva and gastric acid, improve digestion and absorption, and increase peristalsis of the intestines.

  Substances that increase the release of saliva and gastric acid include *Gan Jiang* (Rhizoma Zingiberis), *Ding Xiang* (Flos Caryophylli), and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).

  Herbs that increase peristalsis of the intestines include *Gan Jiang* (Rhizoma Zingiberis), *Ding Xiang* (Flos Caryophylli), *Wu Zhu Yu* (Fructus Evodiae), and *Hu Jiao* (Fructus Piper).

Chapter 7 — Interior-Warming Herbs

Interior-warming herbs that exert antiulcer actions include *Gan Jiang* (Rhizoma Zingiberis), *Rou Gui* (Cortex Cinnamomi), *Wu Zhu Yu* (Fructus Evodiae), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Hua Jiao* (Pericarpium Zanthoxyli), *Xiao Hui Xiang* (Fructus Foeniculi) and *Ding Xiang* (Flos Caryophylli).

- **Antibiotic:** Some inhibit the activity of dermatophytes, such as *Rou Gui* (Cortex Cinnamomi), *Gan Jiang* (Rhizoma Zingiberis), *Ding Xiang* (Flos Caryophylli), and *Xiao Hui Xiang* (Fructus Foeniculi).

POTENTIAL HERB-DRUG INTERACTIONS

- **Analgesics**: While the analgesic effect is not completely understood, it is clear that these herbs do not cause drowsiness, and therefore will not accentuate sedation when combined with drugs having sedative and/or hypnotic properties.
- **Cardiovascular agents**: Interior-warming herbs have marked positive inotropic and chronotropic effects, with one example being *Fu Zi* (Radix Aconiti Lateralis Praeparata).[1] Thus, they should be used with caution in patients having certain cardiovascular disorders (such as arrhythmia) or who are on certain medications (such as digoxin or thyroid supplements).
- **Antiulcers**: Lastly, many herbs in this category stimulate the gastrointestinal system to increase production of gastric acid, such as *Ding Xiang* (Flos Caryophylli). Therefore, some of these herbs may counter the effects of certain drugs such as histamine-2 receptor antagonists (such as ranitidine or famotidine) or proton-pump inhibitors (such as omeprazole or lansoprazole).

Fu Zi (Radix Aconiti Lateralis Praeparata)

附子

Pinyin Name: *Fu Zi*
Literal Name: "appendage"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: aconite, prepared daughter root of common monks' hood
Botanical Name: *Aconitum carmichaeli* Debx. (*Wu Tou*)
Pharmaceutical Name: Radix Aconiti Lateralis Praeparata
Properties: acrid, hot
Channels Entered: Heart, Kidney, Spleen
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Restores Depleted Yang

Yang failure: Acrid and hot, *Fu Zi* (Radix Aconiti Lateralis Praeparata) is used in emergency situations in which there is a complete void of yang energy in the body. This critical condition is characterized by profuse perspiration with clear and cold sweats, intolerance of cold, faint respiration, icy extremities, diarrhea containing undigested food, and faint or imperceptible pulse. *Fu Zi* restores depleted yang by tonifying Heart yang, thus opening channels and collaterals, and by tonifying Kidney yang to augment fire.

- Intolerance of cold, icy extremities, and diarrhea with undigested food because of depleted yang: use *Fu Zi* with *Gan Jiang* (Rhizoma Zingiberis) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Si Ni Tang* (Frigid Extremities Decoction).
- Profuse perspiration with shortness of breath and increased respiration due to depletion of yang with qi escaping the body: add *Ren Shen* (Radix Ginseng).
- Shock or heart failure: *Fu Zi* is used as an injectable substance in China for this application.
- Lower body edema, dysuria: combine *Fu Zi* with *Fu Ling* (Poria).

2. Tonifies Yang, Augments Fire

Fu Zi treats any type of yang deficiency, as it warms all of the organs and opens all of the channels and collaterals. The organs that are most susceptible to yang deficiency are Kidney, Spleen and Heart.

Kidney yang deficiency: Kidney yang deficiency, the most severe of yang deficiencies, is characterized by cold extremities (especially the lower extremities), intolerance to cold, weakness, coldness and soreness of the low back and knees, impotence, frequent urination (especially during the night), clear polyuria, pale complexion, cough, and wheezing. Secondary symptoms may include impotence or spermatorrhea, profuse and clear leukorrhea, diarrhea (especially during the early morning), edema and infertility.

- Kidney yang deficiency: use *Fu Zi* with *Rou Gui* (Cortex Cinnamomi) and *Shu Di Huang* (Radix Rehmanniae Preparata). **Exemplar Formula:** *You Gui Wan* (Restore the Right [Kidney] Pill), or *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).
- Infertility: use this herb with *Lu Jiao* (Cornu Cervi), *Shu Di Huang* (Radix Rehmanniae Preparata), *Rou Gui* (Cortex Cinnamomi), *Tu Si Zi* (Semen Cuscutae), *Yang Qi Shi* (Actinolitum), *Ba Ji Tian* (Radix Morindae Officinalis), *Dang Gui* (Radicis Angelicae Sinensis) and *Gou Qi Zi* (Fructus Lycii).
- Impotence: combine it with *Tu Si Zi* (Semen Cuscutae), *Yin Yang Huo* (Herba Epimedii) and *Rou Gui* (Cortex Cinnamomi).

Spleen yang deficiency: Spleen yang deficiency is more severe than Spleen qi deficiency. Patients suffering from this disorder manifest all signs of Spleen qi deficiency, plus abdominal fullness, coldness and dull pain, decreased intake of food, loose stools or diarrhea, edema, profuse watery leukorrhea, cold limbs and a preference for pressure and warmth applied to the abdomen.

- Spleen yang deficiency: use *Fu Zi* with *Ren Shen* (Radix Ginseng), *Gan Jiang* (Rhizoma Zingiberis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). **Exemplar Formula:** *Fu Zi Li Zhong Tang* (Prepared Aconite Pill to Regulate the Middle).

Fu Zi (Radix Aconiti Lateralis Praeparata)

- Spleen and Kidney yang deficiency with edema: use it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria). **Exemplar Formula:** *Zhen Wu Tang* (True Warrior Decoction).

Heart yang deficiency: Clinical manifestations include palpitations, shortness of breath, chest pain, dull purplish complexion, cold extremities, a flabby, pale or dark purple tongue, and a deep, weak pulse. In the range of Heart conditions, Heart qi deficiency is least serious, followed by Heart yang deficiency, and then Heart yang collapse being most serious.

- Heart yang deficiency: use *Fu Zi* with *Ren Shen* (Radix Ginseng) and *Gui Zhi* (Ramulus Cinnamomi).
- Heart yang collapse with vomiting, fading pulse, icy extremities and profuse perspiration: combine this herb with *Gan Jiang* (Rhizoma Zingiberis), *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) and *Ren Shen* (Radix Ginseng).
- Shock: use it with *Ren Shen* (Radix Ginseng), *Mai Men Dong* (Radix Ophiopogonis), and *Wu Wei Zi* (Fructus Schisandrae Chinensis) as a decoction, administered through the nose.
- Yang deficiency with exterior wind-cold: use this herb with *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Herba Asari).

3. Warms Channels, Disperses Cold and Dampness, Relieves Pain

***Bi zheng* (painful obstruction syndrome) due to cold:** *Fu Zi* dispels cold and dampness from the peripheral channels and collaterals to treat *bi zheng*.

- *Bi zheng* caused by cold and dampness: use *Fu Zi* with *Gui Zhi* (Ramulus Cinnamomi), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Gan Cao* (Radix Glycyrrhizae).
- Joint and muscle pain, numbness and difficulty of movement: use it with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), *Wei Ling Xian* (Radix Clematidis), and *Sang Ji Sheng* (Herba Taxilli).

Menstrual Pain: *Fu Zi* can be used with *Dang Gui* (Radicis Angelicae Sinensis), *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), and *Yan Hu Suo* (Rhizoma Corydalis) for menstrual pain caused by cold.

Yin sores: *Fu Zi* disperses cold and opens collaterals to facilitate the healing of yin sores that do not ulcerate, or ulcerate but do not heal.

- Yin sores: use *Fu Zi* with *Ren Shen* (Radix Ginseng) and *Huang Qi* (Radix Astragali).

DOSAGE

The normal dosage is 3 to 15 grams. *Fu Zi* must be pre-decocted for 30 to 60 minutes.

There are two major schools of thought regarding appropriate dosages of *Fu Zi*. Some scholars have proposed dosages of up to 100 grams for severe cases. Others proposed small dosages only.

When prescribing this herb, the condition of the individual must be taken into consideration. An individual with a weak constitution will react to the toxicity of *Fu Zi* even when it is prescribed at a low dose. Another individual with a stronger constitution and thus higher tolerance may not experience adverse effects even at a large dose. This difference in response depends on the individual constitution as well as geographic, weather and lifestyle differences. In some areas of China, *Fu Zi* is commonly used with other vegetables to make stew. Naturally, these people will have higher tolerance for the toxicity of *Fu Zi*. In short, the dosage should be selected cautiously according to the condition of each patient.

Fu Zi is generally sold in the processed form only, as the unprocessed form is quite toxic. Though there are multiple ways to process this herb, the most common way is for the manufacturer to cook the herb at boiling temperature for 4 to 6 hours before drying and distribution. Prior to use, the patient should again pre-decocted *Fu Zi* for 30 to 60 minutes before the addition of other herbs.

Use of unprocessed *Fu Zi*, or overdose of the herb, are responsible for the majority of possible adverse reactions. Proper processing reduces the toxicity of *Fu Zi* to between 1/2000 and 1/4000th of the toxicity of the unprocessed herb.[1]

CAUTIONS / CONTRAINDICATIONS

- *Fu Zi* is contraindicated during pregnancy.
- *Fu Zi* is contraindicated in patients with yang excess and yin deficiency (also referred to as false cold and true heat).
- Some classic texts have suggested that *Fu Zi* is incompatible with *Bei Mu* (Bulbus Fritillaria), *Ban Xia* (Rhizoma Pinelliae), *Gua Lou Shi* (Fructus Trichosanthis), *Bai Ji* (Rhizoma Bletillae), and *Bai Lian* (Radix Ampelopsis).
- Consumption of alcohol is contraindicated with *Fu Zi*, as absorption of the toxic elements will be greatly enhanced.
- Side effects and adverse reactions are usually due to overdose, to improper processing, or to inappropriate combination with other herbs, and/or inaccurate diagnosis.

OVERDOSAGE

Signs and symptoms of *Fu Zi* overdose include involuntary salivation, nausea, vomiting, diarrhea, dizziness,

Fu Zi (Radix Aconiti Lateralis Praeparata)

blurred vision, dry mouth, vertigo, numbness of the body and extremities, slowed pulse, difficulty breathing, twitching limbs, convulsions, disorientation, urinary and fecal incontinence, decreased blood pressure and body temperature, arrhythmia, tachyarrhythmia, bradycardia, and possible death.[2]

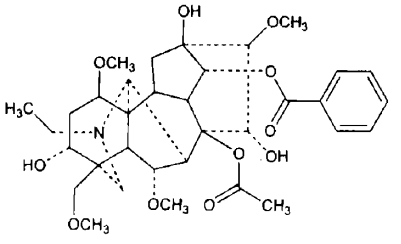
One text divided *Fu Zi* overdose into acute and chronic cases. Symptoms in acute cases are described as numbness, tremor, irregularity, and deterioration. Numbness is characterized by numbness starting at the lips, tongue, and mouth, and gradually spreading to the body and extremities. Tremor is characterized by involuntary movement and tremor of the tongue and extremities, which will impair normal speech and movement. Irregularity describes the heart rate and rhythm, which may be fast, slow, knotted, or unpredictable. Lastly, deterioration refers to compromise in all aspects of physical functioning, with altered consciousness, weak respiration, extremely weak pulse, hypotension, and extreme coldness of the extremities. Chronic cases of overdose are characterized by numbness of the legs, dysuria, painful urination, and blurred vision.[3]

A hospital-based study in Hong Kong reported that up to 61% of all serious poisonings attributed to herbal medicines were associated with the use of various types of aconite root. The study, however, did not clearly describe whether the toxic reactions were due to overdosage, incorrect use, accidental ingestion, or other causes.[4]

TREATMENT OF OVERDOSAGE

Rou Gui (Cortex Cinnamomi) is usually used to reverse early-stage overdose within 4 to 6 hours of the ingestion of *Fu Zi*. According to one report, acute *Fu Zi* poisoning in 14 patients was treated by oral ingestion of *Rou Gui* tea that was prepared by soaking 5 to 10 grams of the herb in hot water. The tea should induce vomiting of the toxin within 5 to 15 minutes, and relieve overall symptoms within 15 to 30 minutes. If toxic symptoms persist, repeat the process by using 3 to 5 grams of *Rou Gui* in tea. Resolution of poisoning is characterized by warmth at the extremities, increased contractility of the heart, and gradual sensory recovery from numbness of the mouth, lips, and extremities.[5]

Overdose of *Fu Zi* can also be treated with a decoction containing *Sheng Jiang* (Rhizoma Zingiberis Recens), *Gan Cao* (Radix Glycyrrhizae), *Gan Jiang* (Rhizoma Zingiberis), *Lu Dou* (Semen Phaseoli Radiati), *Hei Dou* (Semen Glycine Max), *Huang Lian* (Rhizoma Coptidis), *Ren Shen* (Radix Ginseng) and *Huang Qi* (Radix Astragali). The dosage of each of the herbs will vary depending on the specific condition of the patient.



Overdose characterized by irregular heartbeat can be treated with a decoction of 20 grams of *Ku Shen Gen* (Radix Sophorae Flavescentis) and 10 grams of *Gan Cao* (Radix Glycyrrhizae).

Overdose characterized by extreme coldness of the extremities, extremely weak pulse, and shortness of breath, can be treated with a decoction of *Ren Shen* (Radix Ginseng), *Gan Cao* (Radix Glycyrrhizae), and *Gan Jiang* (Rhizoma Zingiberis).

[Note: Gross overdose of *Fu Zi* is potentially life-threatening. Therefore, treatment of overdose should be performed carefully, and only by qualified health-care professionals.]

CHEMICAL COMPOSITION

Aconitine, mesaconitine, hypaconitine, isodelphinine, benzoylmesaconitine, coryneine, atisines, aminophenols, neoline, 15-α-hydroxyneoline, higenamine, dl-demethyl coclaurine, salsolinol.[6,7]

Aconitine

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Fu Zi* is associated with positive inotropic and chronotropic effects. In animal experiments, intravenous injection of *Fu Zi* increased cardiac contractility, dilated blood vessels, and increased cardiac output. It also increases heart rate and treats patients with bradycardia or bradyarrhythmia. Experiments in cats and rats have also shown *Fu Zi* to be beneficial in the treatment of shock, as it increases blood pressure and cardiac contraction.[8]
- **Anti-inflammatory:** Oral administration of a 20% *Fu Zi* decoction at the dosage of 2.5 ml/100g in rats has demonstrated marked effectiveness to reduce inflammation and swelling in the joints. The exact mechanism of action is unclear. Some studies show that it stimulates secretions by the adrenal cortex, leading to anti-inflammatory activity. Other studies, however, show that *Fu Zi* has anti-inflammatory influence even in animals whose adrenal glands have been removed.[9]
- **Analgesic:** Intraperitoneal injection of *Fu Zi* significantly increased pain tolerance in mice and rats.[10]

CLINICAL STUDIES AND RESEARCH

- **Abdominal coldness and pain during pregnancy:** A

Fu Zi (Radix Aconiti Lateralis Praeparata)

classic text reported that *Fu Zi* was used to treat 4 women who were 4 months pregnant with coldness in the lower abdominal region, abdominal distention and pain, and aversion to cold. All 4 women had previous history of early deliveries. The diagnosis according to traditional Chinese medicine was coldness in the internal organs requiring the use of warm herbs. After herbal treatment, the symptoms improved and all delivered after full-term pregnancies.[11] [Note: The use of *Fu Zi* is generally considered contraindicated during pregnancy. This is a rare report that discussed the use of *Fu Zi* during pregnancy. This should not be attempted unless the benefit clearly outweighs the risks.]

- **Deficiency syndrome:** According to one report, 13 patients with generalized deficiency were treated with injections of *Fu Zi* one time daily at night for 2 weeks per course of treatment, with a total of 1 to 2 courses. The study reported an overall improvement of symptoms, and was especially effective in patients characterized by yang deficiency.[12]

HERB-DRUG INTERACTION

- **Antiarrhythmics:** Patients who have a past history of cardiovascular disorders or are taking antiarrhythmic medications should take *Fu Zi* with extreme caution.[13] [Note: Examples of antiarrhythmics include quinidine, procainamide (Pronestyl), disopyramide (Norpace), flecainide (Tambocor), propafenone (Rythmol), and amiodarone (Cordarone).]

TOXICOLOGY

The LD_{50} for unprocessed *Fu Zi* in mice is 5.49 g/kg via oral administration and 0.49 g/kg via intravenous injection. The LD_{50} for processed *Fu Zi* is 161 g/kg via oral administration and 3.516 g/kg via intravenous injection. The LD_{50} for water extract of *Fu Zi* in mice is 26.30 g/kg.[14,15]

AUTHORS' COMMENTS

Fu Zi is an extremely important herb to tonify yang, and there is no other herb in the entire pharmacopoeia with equivalent functions that can be used as a substitute. However, it should also be used with great caution, as it has a relatively narrow range of safety.

There is a saying: "*Fu Zi* is not hot without *Gan Jiang* (Rhizoma Zingiberis)." When used together, the two herbs have a synergistic interaction that enhances the warming influence of the formula, compared to when either is used alone. *Gan Jiang* also decreases the toxicity of *Fu Zi*.

Fu Zi is generally used in combination with other herbs that increase the therapeutic effect and minimize potential side effects. For example, the use of *Fu Zi* as a single herb treatment for its cardiotonic effect is not appropriate, as it only has moderate potency, short duration and numerous side effects. However, when combined with *Gan Cao* (Radix Glycyrrhizae) or *Gan Jiang* (Rhizoma Zingiberis), the combination has more potent cardiotonic effect and prolonged duration of action. Furthermore, the addition of these two herbs will decrease the potential for side effects of *Fu Zi* by just over fourfold.

Fu Zi, extremely acrid and hot, is highly effective in restoring yang and warming the body. It is an important herb for treating yang deficiency with excess accumulation of cold. In cases of yang collapse, this herb is indispensable in restoring life, or the vital yang, to the body. However, because of the powerful effect this herb exerts, accurate diagnosis is essential. Essential indications for the use of *Fu Zi* include: a flabby, pale tongue with a white or greasy coating, a thready, weak pulse or deep and slow pulse, a bland taste in the mouth with no desire to drink, cold limbs, intolerance to cold, soreness, coldness and weakness of the lower back and knees; and clear polyuria.

Fu Zi can be used in patients with mixed yin and yang symptoms. *Fu Zi* is often combined with warm herbs such as *Rou Gui* (Cortex Cinnamomi), *Gan Jiang* (Rhizoma Zingiberis), *Gan Cao* (Radix Glycyrrhizae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Ren Shen* (Radix Ginseng), *Huang Qi* (Radix Astragali) and other qi-tonic or interior-warming herbs. However, it is also used with cold herbs such as *Da Huang* (Radix et Rhizoma Rhei) to treat cold-type constipation. It is combined with *Huang Lian* (Rhizoma Coptidis) to treat epigastric fullness due to yang deficiency. The combination of *Fu Zi* and *Yin Chen Hao* (Herba Artemisiae Scopariae) treats yin-type jaundice caused by cold and dampness. With *Long Dan Cao* (Radix Gentianae), it treats damp-heat in the Liver and Gallbladder affecting a yang-deficient Spleen. To nourish blood or stop bleeding due to yang deficiency, *Fu Zi* can be combined with *Sheng Di Huang* (Radix Rehmanniae). Also, interestingly, it can also be used in Heart yang deficiency patients who have febrile disorders.

Chuan Wu (Radix Aconiti Preparata)

川烏 川乌

Pinyin Name: *Chuan Wu*
Literal Name: "crow's head from Sichuan"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: aconite wutou, Sichuan aconite, mother root of common monks' hood
Botanical Name: *Aconitum carmichaeli* Debx. (*Chuan Wu*)
Pharmaceutical Name: Radix Aconiti Preparata
Properties: acrid, bitter, hot
Channels Entered: Heart, Liver, Spleen
Safety Index: extremely toxic

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind, Disperses Cold, and Relieves Pain

***Bi zheng* (painful obstruction syndrome):** *Chuan Wu* (Radix Aconiti Preparata) is acrid and hot and has excellent properties to dispel wind, disperse cold, and relieve pain. It treats pain characterized by wind and dampness, such as headache, abdominal and musculoskeletal pain. *Chuan Wu* is often combined with blood-activating herbs to enable it to treat various kinds of pain.

- Aching and pain in the joints and muscles: apply *Chuan Wu* topically as a plaster or analgesic ointment with *Cao Wu* (Radix Aconiti Kusnezoffii) and *Ma Qian Zi* (Semen Strychni).
- Joint pain with difficulty in extension and flexion: use it with *Ma Huang* (Herba Ephedrae), *Bai Shao* (Radix Paeoniae Alba) and *Huang Qi* (Radix Astragali).
- Muscle spasms and pain with difficulty in movement, because of damp-cold or blood stagnation: use it with *Cao Wu* (Radix Aconiti Kusnezoffii), *Di Long* (Pheretima), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Coldness and pain in the low back and legs: mix powdered *Chuan Wu* with vinegar and ingest internally or apply topically.
- Headache: use this herb with *Dan Nan Xing* (Arisaema cum Bile), *Sheng Jiang* (Rhizoma Zingiberis Recens) and plums, as a decoction.
- Headache: mix and crush *Chuan Wu*, *Dan Nan Xing* (Arisaema cum Bile) and *Cong Bai* (Bulbus Allii Fistulosi), and apply topically on the acupuncture point *Taiyang*.
- Angina, severe pain in the chest radiating to the back: use this herb with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Hua Jiao* (Pericarpium Zanthoxyli), *Gan Jiang* (Rhizoma Zingiberis) and *Chi Shi Zhi* (Halloysitum Rubrum).
- Hernia due to cold: use *Chuan Wu* with *Xiao Hui Xiang* (Fructus Foeniculi) and *Feng Mi* (Mel).

2. Reduces Swellings and Treats Abscesses and Lesions

Yin sores: Acrid, dispersing and warm in nature, *Chuan Wu* is commonly used topically for chronic cases of abscesses and lesions. It helps to reduce swellings, and promotes healing of ulcerated sores. It is most suitable for stubborn sores that do not ulcerate or those that have ulcerated but do not heal.

Chuan Wu (Radix Aconiti Preparata)

- Abscess and ulceration: use *Chuan Wu* with *Tian Nan Xing* (Rhizoma Arisaematis), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Tian Hua Fen* (Radix Trichosanthis), and *Fu Rong* (Radix Hibisci). Mix with vinegar and apply topically.

3. Treats Unconsciousness Caused by Phlegm Stagnation

According to *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era), unprocessed *Chuan Wu*, unprocessed *Fu Zi* (Radix Aconiti Lateralis), unprocessed *Tian Nan Xing* (Rhizoma Arisaematis), and *Mu Xiang* (Radix Aucklandiae) can be used to treat cases of unconsciousness, deviation of the eyes and mouth, and a roaring sound of phlegm in the throat. [Note: This is an extremely **rare** exception for which one would use the unprocessed forms of *Chuan Wu*, *Fu Zi* and *Tian Nan Xing*. The unprocessed forms of these three herbs are all very toxic.]

DOSAGE

1.5 to 4.5 grams. To reduce toxicity prior to oral administration, *Chuan Wu* is cooked by the manufacturer at boiling temperature for 4 to 6 hours, before drying and distribution. It must again be pre-decocted by the patient for 30 to 60 minutes before the addition of other herbs. Properly prepared, this herb should not have a bitter taste or numbing effect when placed in the mouth.

CAUTIONS / CONTRAINDICATIONS

- *Chuan Wu* is contraindicated in pregnancy.
- *Chuan Wu* is incompatible with *Bei Mu* (Bulbus Fritillaria), *Gua Lou Shi* (Fructus Trichosanthis), *Ban Xia* (Rhizoma Pinelliae), *Bai Ji* (Rhizoma Bletillae) and *Bai Lian* (Radix Ampelopsis).
- Use of the fresh or unprocessed form of aconite should be strictly prohibited because of toxicity. Herbs of the aconite family must be processed to reduce toxicity, which can be lowered to 1/2000 to 1/4000th of that of the unprocessed herb. Concurrent use of alcohol must also be prohibited to avoid increased absorption of toxic components.[1]
- Even with appropriate indications and dosage, *Chuan Wu* should be used with other herbs, such as *Gan Cao* (Radix Glycyrrhizae), *Sheng Jiang* (Rhizoma Zingiberis Recens) or honey, to minimize toxicity,.

OVERDOSAGE

Overdose of *Chuan Wu* is associated with cardiovascular side effects, such as arrhythmia, ventricular tachycardia, ventricular fibrillation and cardiac arrest.[2] Adverse reactions associated with *Chuan Wu* are usually divided into three types: mild, moderate and severe.

- **Mild** reactions are characterized by feelings of numbness, warmth and swelling of the mouth, lips, and fingers, nausea, salivation, abdominal pain, vomiting, hurried respiration, and feelings of oppression in the chest. Reactions often occur within 15 to 30 minutes after ingestion of the herbs, with the patient remaining conscious the entire time.
- **Moderate** reactions are characterized by irritability, perspiration, spasms and cramps of the extremities, speech impairment, dyspnea, hypotension, low body temperature, pale face, cold skin and extremities, and slow and irregular pulse.
- **Severe** reactions are characterized by altered consciousness, purple discoloration of the lips and mouth, extremely weak pulse, urinary and bowel incontinence, and irregular heartbeat.

The toxicity of *Chuan Wu* is usually attributed to aconitine, which has a marked stimulating action followed by an inhibiting effect on the central nervous system and cardiovascular system. Aconitine is absorbed through the gastrointestinal tract and eliminated by the kidneys.[3]

A hospital-based study in Hong Kong reported that up to 61% of all serious poisonings due to herbal medicines were associated with the use of various types of aconite root. The study, however, did not clearly describe whether the toxic reactions were due to overdosage, incorrect use, accidental ingestion, or other causes.[4]

TREATMENT OF OVERDOSAGE

Mild cases of adverse reaction can be relieved by ingestion of 120 grams of honey dissolved in water. Other herbs that have been documented to relieve the toxicity of *Chuan Wu* include *Huang Lian* (Rhizoma Coptidis), *Jin Yin Hua* (Flos Lonicerae), *Hei Dou* (Semen Glycine Max), *Lu Dou* (Semen Phaseoli Radiati), *Gan Cao* (Radix Glycyrrhizae), and *Sheng Jiang* (Rhizoma Zingiberis Recens). Irregular heartbeat caused by *Chuan Wu* can be treated with 30 grams of *Ku Shen* (Radix Sophorae Flavescentis) in decoction.

Please refer to *Fu Zi* (Radix Aconiti Lateralis Praeparata) for additional information on treatment of aconite overdose.

[Note: Gross overdose of *Chuan Wu* is potentially a life-threatening situation. Therefore, treatment of overdose should be performed carefully, and only by qualified healthcare professionals.]

CHEMICAL COMPOSITION

Aconitine, hypaconitine, mesaconitine, talatigamine, carmichaeline, 14-acetyltateizamine, isotalatizidine, karakoline, neoline, lipoaconitine, lipohpaconitine, lipomesaconitine, lipodeoxyaconitine.[5]

Chuan Wu (Radix Aconiti Preparata)

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Chuan Wu* has a profound and direct effect on the contractile force and rhythm of the heart. Use of unprocessed *Chuan Wu* is often associated with increased heart rate, irregular heart rate, and in severe cases, cardiac arrest. Use of the processed herb (prolonged cooking at high temperature) is associated with increased contractile force of the heart.[6]
- **Analgesic and anti-inflammatory**: *Chuan Wu* has demonstrated marked analgesic and anti-inflammatory effects. In laboratory experiments in mice, the use of aconitine was associated with significant reduction of pain and inflammation. The analgesic effect of aconitine is related to its effect on the central nervous system. The anti-inflammatory effect of aconitine is stronger than aspirin, and its mechanism of action is unrelated to the production of steroids from the adrenal glands.[7]

CLINICAL STUDIES AND RESEARCH

- **Arthritis:** In one study, 150 patients with arthritis caused by wind and dampness were treated with an herbal preparation with a 92.4% overall rate of effectiveness. The formula was given three times daily, and contained *Chuan Wu*, *Cao Wu* (Radix Aconiti Kusnezoffii), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Niu Xi* (Radix Cyathulae), *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi), *Wu Gong* (Scolopendra), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Ma Qian Zi* (Semen Strychni).[8]
- **Inflammation of the shoulder:** According to one report, 10 out of 11 patients with shoulder inflammation experienced complete recovery using an herbal formula that contained 10 grams of *Chuan Wu* (Radix Aconiti Preparata). The formula was given in decoction, twice daily, in the morning and at night, for 6 to 15 days.[9]

HERB-DRUG INTERACTION

- **Antiarrhythmics:** Patients who have a past history of cardiovascular disorders or are taking antiarrhythmic medications should take *Chuan Wu* with extreme caution.[10] [Note: Examples of antiarrhythmics include quinidine, procainamide (Pronestyl), disopyramide (Norpace), flecainide (Tambocor), propafenone (Rythmol), and amiodarone (Cordarone).]

TOXICOLOGY

See *Fu Zi* (Radix Aconiti Lateralis Praeparata).

SUPPLEMENT

- 烏頭 / 乌头 *Wu Tou* (Radix Aconiti) is the inclusive name for *Chuan Wu* (Radix Aconiti Preparata) and *Cao Wu* (Radix Aconiti Kusnezoffii). In the original documentation of this herb in *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, no distinction was made between *Chuan Wu* and *Cao Wu*. Later in history, the aconites from the Sichuan province were given the name *Chuan Wu*, and the rest, grown in other regions or wild became known as *Cao Wu*. Interestingly, in the original text, it was stated that *Wu Tou* can be used in hunting. The juice of *Wu Tou* applied to the tip of an arrow will induce paralysis when the arrow penetrates the prey.

AUTHORS' COMMENTS

Chuan Wu is an extremely valuable herb to dispel cold and relieve pain. However, it should also be used with great caution, as it has a relatively narrow range of safety.

Cao Wu (Radix Aconiti Kusnezoffii)

草烏 草乌

Pinyin Name: *Cao Wu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: aconite tsaowu, Kusnezoff monks' hood root
Botanical Name: *Aconitum kusnezoffii* Reichb. (*Cao Wu*)
Pharmaceutical Name: Radix Aconiti Kusnezoffii
Properties: acrid, bitter, hot
Channels Entered: Heart, Liver, Spleen
Safety Index: extremely toxic

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind, Disperses Cold, and Relieves Pain

***Bi zheng* (painful obstruction syndrome):** Acrid and hot, *Cao Wu* (Radix Aconiti Kusnezoffii) is an excellent herb to dispel wind, disperse cold, and relieve pain. It treats pain characterized by wind and dampness, such as headache, abdominal pain, and musculoskeletal pain. Herbs in the blood-activating category are often combined with this herb to further enable it to treat various kinds of pain.

- Muscle spasms and pain with difficulty in movement because of cold-damp or blood stagnation: use *Cao Wu* with *Chuan Wu* (Radix Aconiti Preparata), *Di Long* (Pheretima), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Atrophy due to wind and dampness: use this herb with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).
- Shortness of breath, coldness and pain in the chest and abdomen due to excess cold: use this herb with *Chi Shi Zhi* (Halloysitum Rubrum).
- Angina, severe pain in the chest radiating to the back: combine it with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Hua Jiao* (Pericarpium Zanthoxyli), *Gan Jiang* (Rhizoma Zingiberis) and *Chi Shi Zhi* (Halloysitum Rubrum).
- Hernia due to cold: use *Cao Wu* with honey.
- *Bi zheng* (painful obstruction syndrome): combine *Cao Wu* with *Chuan Wu* (Radix Aconiti Preparata) and *Ma Qian Zi* (Semen Strychni), and use topically in plasters or analgesic ointments.

2. Reduces Swellings and Treats Abscesses and Lesions

Yin sores: Acrid, dispersing and warm in nature, *Cao Wu* is commonly used topically for chronic cases of abscesses and lesions. It helps to reduce swelling and promote healing of ulcerated sores. It is most suitable for stubborn sores that do not ulcerate or ulcerated lesions with an inability to heal.

- Cellulitis with hard swelling: mix the powder of *Cao Wu* with *Dan Nan Xing* (Arisaema cum Bile), *Ban Xia* (Rhizoma Pinelliae) and *Lang Du* (Radix Euphorbiae Fischerianae). If mixed with the appropriate heat-clearing, toxin-eliminating herbs, this topical application can treat all types of toxic sores and swellings.
- Abscess and ulceration: use it with *Tian Nan Xing* (Rhizoma Arisaematis), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Tian Hua Fen* (Radix Trichosanthis), and *Fu Rong* (Radix Hibisci). Mix with vinegar and apply topically three times daily.

DOSAGE

1.5 to 3.0 grams. To reduce toxicity prior to oral administration, *Cao Wu* is cooked by the manufacturer at boiling temperature for 4 to 6 hours, before drying and distribution. It must again be pre-decocted by the patient for 30 to 60 minutes before the addition of other herbs. Properly prepared, this herb should not have a bitter taste or numbing effect when placed in the mouth.

CAUTIONS / CONTRAINDICATIONS

- *Cao Wu* is contraindicated in pregnancy.
- *Cao Wu* is incompatible with *Bei Mu* (Bulbus Fritillaria), *Gua Lou Shi* (Fructus Trichosanthis), *Ban Xia* (Rhizoma

Cao Wu (Radix Aconiti Kusnezoffii)

Pinelliae), *Bai Ji* (Rhizoma Bletillae), and *Bai Lian* (Radix Ampelopsis).

- Use of the fresh or unprocessed form of aconite should be strictly prohibited because of toxicity. Herbs of the aconite family must be processed to reduce toxicity, which can be lowered to 1/2000 to 1/4000th of the toxicity of the unprocessed herb. Concurrent use of alcohol must also be prohibited to avoid increased absorption of toxic components.[1]
- Even with appropriate indication and dosage, *Cao Wu* should be used with other herbs to minimize toxicity, such as *Gan Cao* (Radix Glycyrrhizae), *Sheng Jiang* (Rhizoma Zingiberis Recens) or honey.

OVERDOSAGE

Adverse reactions to overdose of *Cao Wu* generally start 10 minutes to 3 hours after ingestion. Symptoms include numbness and burning sensations of the tongue and oral cavity, dry mouth, nausea, vomiting, dizziness, blurred vision, numbness of the body and extremities, decreased heart rate, difficulty breathing, and muscle spasms of the arms and legs.

Overdose of *Cao Wu* and *Chuan Wu* (Radix Aconiti Carmichaeli Preparata) is associated with cardiovascular side effects, such as arrhythmia, ventricular tachycardia, ventricular fibrillation and cardiac arrest.[2]

A hospital-based study in Hong Kong reported that up to 61% of all serious poisonings attributed to herbal medicines were associated with the use of various types of aconite root. The study, however, did not clearly describe whether the toxic reactions were due to overdosage, incorrect use, accidental ingestion, or other causes.[3]

TREATMENT OF OVERDOSAGE

Please refer to *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Chuan Wu* (Radix Aconiti Preparata) for information on treatment of aconite overdose.

[Note: Gross overdose of *Cao Wu* is potentially a life-threatening situation. Therefore, treatment of overdose should be performed carefully, and only by qualified healthcare professionals.]

CHEMICAL COMPOSITION

Aconitine, hypaconitine, mesaconitine, talatigamine, beiwutine, 14-acetyltateizamine, isotalatizidine, karakoline, neoline, lipoaconitine, lipohpaconitine, lipomesaconitine, lipodeoxyaconitine.[4]

HERB-DRUG INTERACTION

- **Antiarrhythmics:** Patients who have a past history of cardiovascular disorders or are taking antiarrhythmic medications should take *Cao Wu* with extreme caution. [Note: Examples of antiarrhythmics include quinidine, procainamide (Pronestyl), disopyramide (Norpace), flecainide (Tambocor), propafenone (Rythmol), and amiodarone (Cordarone).][5]

TOXICOLOGY

The LD_{50} of unprocessed *Cao Wu* in mice is 0.19 g/kg for intraperitoneal injection, and 0.16 g/kg for intravenous injection. The LD_{50} of the processed herb (cooked for 6 hours) in mice is 41.59 g/kg via intraperitoneal injection.[6]

AUTHORS' COMMENTS

In their unprocessed form, the three aconites, *Cao Wu* (Radix Aconiti Kusnezoffii), *Chuan Wu* (Radix Aconiti Preparata) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) are all toxic when ingested by humans. Properly processed, prepared, combined with other herbs and prescribed, these herbs are among the life-saving substances of Chinese medicine. Although unprocessed *Cao Wu* is the most toxic of the three, this does not mean it is less valuable clinically.

Cao Wu is an extremely valuable herb to dispel cold and relieve pain. However, it should also be used with great caution as it has a relatively narrow range of safety.

Rou Gui (Cortex Cinnamomi)

肉桂

Pinyin Name: *Rou Gui*
Alternate Chinese Names: *Gui Pi*, *Guan Gui*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cinnamon bark, cassia bark
Botanical Name: *Cinnamomum cassia* Presl. (*Rou Gui*)
Pharmaceutical Name: Cortex Cinnamomi
Properties: acrid, sweet, hot
Channels Entered: Heart, Kidney, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Kidney Yang, Augments *Ming Men* (Life Gate) Fire

Declining *ming men* (life gate) fire: *Rou Gui* (Cortex Cinnamomi) treats a wide variety of disorders characterized by Kidney yang deficiency and insufficient *ming men* fire. This condition is characterized by intolerance to cold, cold extremities, weakness, soreness and coldness of the low back and knees, impotence, lack of libido, polyuria and loose stools. In addition, Kidney deficiency affects the Lung. Kidney deficiency and its inability to grasp qi downwards causes symptoms such as wheezing, dyspnea, profuse phlegm and cold extremities. Cold in the lower *jiao* may manifest as false yang rising, with symptoms of dizziness, flushed face, sore throat and coldness of the lower extremities. Fortifying in nature, *Rou Gui* is not dispersing and is one of the best herbs to warm the yang of the lower *jiao*.

- Kidney yang deficiency: use *Rou Gui* with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Shan Zhu Yu* (Fructus Corni). **Exemplar Formula:** *You Gui Wan* (Restore the Right [Kidney] Pill), or *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).
- Asthma or wheezing: use it with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Liu Huang* (Sulfur).
- Impotence: combine it with *Lu Rong* (Cornu Cervi Pantotrichum), *Shu Di Huang* (Radix Rehmanniae Preparata), *Tu Si Zi* (Semen Cuscutae), *Shan Zhu Yu* (Fructus Corni), *Yin Yang Huo* (Herba Epimedii), *Rou Cong Rong* (Herba Cistanches) and *Ba Ji Tian* (Radix Morindae Officinalis).
- Lack of libido: use this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Shao* (Radix Paeoniae Alba), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Xiang Fu* (Rhizoma Cyperi), *Ai Ye* (Folium Artemisiae Argyi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Zi Shi Ying* (Fluoritum), *Wu Zhu Yu* (Fructus Evodiae) and *Wu Yao* (Radix Linderae).
- Edema due to Kidney yang deficiency: use *Rou Gui* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Fu Ling* (Poria), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Ze Xie* (Rhizoma Alismatis) and *Che Qian Zi* (Semen Plantaginis). **Exemplar Formula:** *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living).

2. Dispels Cold, Warms the Spleen and Relieves Pain

Epigastric and abdominal coldness and pain, vomiting or diarrhea: *Rou Gui* warms the middle *jiao* and treats digestive disorders that are cold in nature. The volatile oils in this herb have a mild stimulating effect to promote digestion, dispel gas and relieve spasmodic pain in the stomach and intestines.

- Epigastric and abdominal coldness and pain: use *Rou Gui* individually as powder or in pills.
- Deficiency and cold of the Spleen and Stomach with abdominal pain and diarrhea: use this herb with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Bi Ba* (Fructus Piperis Longi) and *Pao Jiang* (Rhizoma Zingiberis Preparatum).
- Chronic diarrhea: add *Gan Jiang* (Rhizoma Zingiberis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Chen Pi* (Pericarpium Citri Reticulatae).
- Chronic dysentery or enteritis: use this herb with *Huang Lian* (Rhizoma Coptidis).

Rou Gui (Cortex Cinnamomi)

Hernial Pain: With its analgesic and warming effect, *Rou Gui* treats hernial pain caused by cold.

- Cold hernial disorder with abdominal pain: use *Rou Gui* with *Wu Zhu Yu* (Fructus Evodiae) and *Xiao Hui Xiang* (Fructus Foeniculi).

3. Dispels Cold, Relieves Pain, Opens Channels and Vessels

Coldness in the channels: When cold invades the *xue* (blood) level, the channels and collaterals constrict. This results in blood stagnation, causing symptoms of irregular menstruation, amenorrhea, dysmenorrhea and postpartum pain. *Rou Gui* infuses warmth to the peripheral channels and collaterals to move qi and blood circulation. It treats pain characterized by cold in the blood, such as gynecological disorders, external or traumatic injuries, or obstruction of cold and dampness in the channels and collaterals. This herb dilates the central and peripheral vessels and increases blood circulation.

- Irregular menstruation, amenorrhea, and postpartum abdominal pain: use *Rou Gui* with *Dang Gui* (Radicis Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Hypochondriac pain due to Liver qi stagnation: use it with *Yu Jin* (Radix Curcumae) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- External or traumatic injury with blood stasis, feelings of oppression and pain in the abdomen: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Hong Hua* (Flos Carthami), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- *Bi zheng* (painful obstruction syndrome) due to cold and dampness in the channels and collaterals: use *Rou Gui* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis) and *Dang Gui* (Radicis Angelicae Sinensis).

Yin sores: *Rou Gui* warms the channels and collaterals to treat deep-rooted sores. It promotes the generation of flesh and enhances recovery.

- Yin sores: use *Rou Gui* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Lu Jiao Jiao* (Gelatinum Cornu Cervi), *Ma Huang* (Herba Ephedrae) and *Bai Jie Zi* (Semen Sinapis).
- Sores with pus but no ulceration: use this herb with *Huang Qi* (Radix Astragali) and *Dang Gui* (Radicis Angelicae Sinensis).

4. Encourages Production of Qi and Blood

A small quantity of *Rou Gui* is often added to qi and blood tonics to enhance the movement of yang qi in the body and encourage the production of blood and qi. **Exemplar Formula:** *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi) and *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction).

DOSAGE

2 to 5 grams in herbal decoction, 1 to 2 grams in herbal powder. *Rou Gui* should be added in the last 5 to 10 minutes of the cooking process, to avoid loss of active constituents from over-exposure to heat.

CAUTIONS / CONTRAINDICATIONS

- Use of *Rou Gui* is contraindicated during pregnancy, or in cases of excess heat, yin-deficient fire, or bleeding caused by heat in the blood.
- *Rou Gui* is counteracted by *Chi Shi Zhi* (Halloysitum Rubrum).
- *Rou Gui* is hot, and generally considered to be an herb with pure yang energy. When used improperly for patients affected by pathogenic heat, or prescribed in excessive amounts, it can induce rising of fire, resulting in a flushed face, red eyes, dry mouth and tongue and, in severe cases, bleeding.

OVERDOSAGE

Overdose of *Rou Gui* is characterized by disturbances to the gastrointestinal and urinary tract systems. Clinical manifestations include nausea, vomiting, abdominal pain, dysuria, anuria, burning sensations on urination, proteinuria, flushed face, dizziness, blurred vision, and numbness of the tongue.[1]

CHEMICAL COMPOSITION

Cinnamic aldehyde, cinnamic acid, cinnamyl acetate, phenylpropyl acetate, cinncassiol-A, -B, -C1, -C2, -C3; cinnzeylanine, cinnzeylanol.[2]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Intravenous administration of *Rou Gui* is associated with a marked reduction in blood pressure, a decrease in heart rate, peripheral vasodilation, and decreased vessel resistance, within 3 to 5 minutes after injection. The cardiovascular system returned to normal after 15 minutes.[3]
- **Sedative and analgesic:** Essential oil of *Rou Gui* demonstrates marked analgesic and sedative actions in rats.[4]
- **Gastrointestinal:** Essential oil of *Rou Gui* has a mild stimulating effect on the gastrointestinal system. It increases the secretion of saliva and gastric acid, enhances digestive functioning, and relieves intestinal spasms and pain.[5]

Rou Gui (Cortex Cinnamomi)

- **Immunostimulant:** Subcutaneous injection of a *Rou Gui* preparation for 5 days increased the white blood cell count by 150 to 200% in dogs.[6]
- **Antibiotic:** *Rou Gui* has an inhibitory effect on dermatophytes, pathogenic fungi, and many gram-positive bacteria.[7]

CLINICAL STUDIES AND RESEARCH

- **Low back pain:** According to one report, 102 patients with low back pain characterized by Kidney yang deficiency were treated with 5 grams of *Rou Gui* powder twice daily for 3 weeks, with a 98% rate of effectiveness. Dry mouth and constipation were the most common side effects.[8]
- **Psoriasis:** Nineteen patients were treated with a *Rou Gui* preparation three times daily for 4 to 8 weeks, with significant improvement in 7 patients, marked improvement in 2 patients, slight improvement in 7 patients, and no response in 2 patients. Overall, the preparation had a 91.2% effective rate.[9]

TOXICOLOGY

The LD_{50} for intravenous injection of *Rou Gui* decoction in mice is 18.48 +/- 1.80 g/kg.[10]

SUPPLEMENT

- 桂心 *Gui Xin* (Cortex Rasus Cinnamomi) is the thin layer of tree cortex that remains after the outer layer of bark has been removed. *Gui Xin* is not drying in nature and is best used for Heart and Kidney yang deficiencies.
- 土肉桂 *Tu Rou Gui* (Cortex Cinnamomum Burmannii), derived from the plant *Cinnamomum burmannii* (Nees) Bl. (*Tian Zhu Gui*), is the type of cinnamon used for cooking to add flavor. It is acrid and warm and warms the Spleen and Stomach. However, it is mild in nature and cannot be used therapeutically to warm the body. *Rou Gui*, derived from the plant *Cinnamomum cassia* Presl., is much stronger and has the therapeutic potency to warm the body and dispel cold.

AUTHORS' COMMENTS

Rou Gui (Cortex Cinnamomi) and *Gui Zhi* (Ramulus Cinnamomi) are derived from different parts of the same plant. *Rou Gui* is the bark of the tree trunk. *Gui Zhi* is the tips of the branches. Both function to disperse coldness, warm the channels and assist the yang. However, *Rou Gui* is acrid, hot and descending in nature to warm the Kidney. *Gui Zhi* is acrid, warm and ascending in nature to disperse wind-cold and open the channels and collaterals in the four limbs.

Rou Gui and *Fu Zi* (Radix Aconiti Lateralis Praeparata) are two of the most important interior-warming herbs. *Rou Gui* has a slower onset than *Fu Zi* but has pure yang energy. It is more tonifying in nature and is suitable for long-term use with other tonic herbs to revitalize the body. *Fu Zi* is strong and fast-acting in nature, and is most suitable in cases where yang qi has collapsed and treatment needs to be initiated immediately to revive the patient.

Rou Gui and *Gan Jiang* (Rhizoma Zingiberis) are both interior-warming herbs, but have different functions and applications. *Rou Gui* enters the lower *jiao* to tonify Kidney yang. *Gan Jiang* warms the middle *jiao* and disperses cold from the Spleen and Stomach.

Rou Gui is often added to formulas to treat yin sores. Yin sores are often the results of yang deficiency that has caused stagnation of phlegm, and coldness. Over a long period of time, this stagnation becomes toxic and obstructs the channels, tendons and joints. *Rou Gui* is acrid, dispersing and warming in nature, and can open the channels by dispersing coldness. It enters both the *qi* (energy) and *xue* (blood) levels to strengthen the body's yang qi and thus break open stagnation.

Gan Jiang (Rhizoma Zingiberis)

乾薑 干姜

Pinyin Name: *Gan Jiang*
Literal Name: "dry ginger"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: dried ginger
Botanical Name: *Zingiber officinale* Rosc. (*Jiang*)
Pharmaceutical Name: Rhizoma Zingiberis
Properties: acrid, hot
Channels Entered: Heart, Lung, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Warms the Middle *Jiao*

Spleen and Stomach cold syndrome: *Gan Jiang* (Rhizoma Zingiberis) warms the Spleen and Stomach to dispel cold from the middle *jiao*. The cause of this cold may be an invasion of cold from the exterior, or yang deficiency of the Spleen. Common manifestations include epigastric and abdominal coldness and pain, nausea, vomiting, and diarrhea.

- Spleen and Stomach cold syndromes: use *Gan Jiang* with *Ren Shen* (Radix Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). **Exemplar Formula:** *Li Zhong Tang* (Regulate the Middle Decoction).
- Continuous diarrhea due to Spleen and Kidney yang deficiencies: use it with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Bu Gu Zhi* (Fructus Psoraleae).
- Chronic diarrhea damaging yin, with pus and blood in the stools, and other mixed hot and cold signs: use this herb with *Huang Lian* (Rhizoma Coptidis) and *E Jiao* (Colla Corii Asini).
- Dry heaves or vomiting of saliva because of accumulation of cold in the Stomach: combine it with *Ban Xia* (Rhizoma Pinelliae).

2. Restores Depleted Yang

Yang collapse: *Gan Jiang* tonifies yang and expels cold. When combined with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gan Jiang* enhances the overall effect of *Fu Zi* to restore depleted yang, and minimizes its toxicity. These two herbs are often paired together for their synergistic action. Classic texts stated that "*Fu Zi* is not warm without *Gan Jiang*."

3. Warms the Lung, Dissolves Phlegm

Cough and dyspnea due to cold accumulation: *Gan Jiang* warms the Spleen to stop the production of damp, and warms the Lung to eliminate the accumulation of phlegm. It is commonly used to treat accumulation of cold and fluids in the Lung characterized by cough and wheezing, aversion to cold, and profuse watery sputum.

- Accumulation of cold and fluids in the Lung: use *Gan Jiang* with *Ma Huang* (Herba Ephedrae), *Xi Xin* (Herba Asari) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). **Exemplar Formula:** *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction).
- Coughing due to rebellious qi rising upwards: combine this herb with *Zao Jiao* (Fructus Gleditsiae) and *Gui Zhi* (Ramulus Cinnamomi).

4. Warms the Channels, Stops Bleeding

Bleeding due to deficiency and cold: *Gan Jiang* treats various kinds of bleeding caused by deficiency and cold: hematemesis, hematochezia, hypermenorrhea or abnormal menstrual bleeding. This type of bleeding is characterized by the presence of blood that is dark in color, and thin in consistency. These patients usually have cold extremities, a pale tongue, and a thready pulse.

- Bleeding due to deficiency and cold: use *Gan Jiang* with *Ren Shen* (Radix Ginseng), *Ai Ye* (Folium Artemisiae Argyi) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Hematemesis because of deficiency and cold: use charred *Gan Jiang* as a single-herb treatment. Some records have shown good results when this herb is mixed with children's urine to stop hematemesis.
- Hematochezia and profuse menstrual bleeding: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

Gan Jiang (Rhizoma Zingiberis)

5. Dispels Cold and Dampness

Gan Jiang treats the sensation of heaviness, coldness and pain in the back and lower body, characterized by cold and dampness.

- Accumulation of cold and damp in the lower body: use *Gan Jiang* with *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE

3 to 10 grams in herbal decoction.

CAUTIONS / CONTRAINDICATIONS

- *Gan Jiang* is contraindicated in cases of interior heat with yin deficiency, or heat in the blood.
- Use *Gan Jiang* with caution during pregnancy as large quantities may have an abortifacient effect.[1]

CHEMICAL COMPOSITION

Essential oils 1.2-2.8% (zingberol, zingiberene, bisabolene, α-curcumene, α-farnesene, β-farnesene, linalool, cineole, β-sesouiphellandrene), gingerol, shogaol, zingerone, dihydroginerol, hexyhydrocurcumin, L-pipecolic acid.[2]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Gan Jiang* has a mild stimulating effect on the gastrointestinal system to increase peristalsis.[3] Furthermore, oral administration of a 10% decoction of *Gan Jiang* in mice has demonstrated a protective effect on the gastrointestinal system, by stimulating the production of stomach mucous membranes. It also increased stomach acid secretion and intestinal activity.[4]
- **Antiemetic:** According to one report, 30 ml of 10 to 50% *Gan Jiang* solution has a marked effect to relieve artificially-induced nausea and vomiting in dogs.[5]
- **Stimulant:** Alcohol extract of *Gan Jiang* has a stimulating effect on the central nervous system, cardiovascular system, and respiratory system in dogs.[6]
- **Effect on temperature regulation:** Administration of *Gan Jiang* was ineffective in prolonging the survival time in mice kept in an environment of under 18° to 20° C.[7]

CLINICAL STUDIES AND RESEARCH

- **Cold syndrome:** In one report, 34 patients with a complex syndrome (characterized by coldness, according to traditional Chinese medicine) were treated by an herbal decoction. The clinical presentation of symptoms included epigastric pain, acid regurgitation, epigastric and abdominal fullness, borborygmus, diarrhea, chest pain, dizziness, cough, wheezing, abdominal coldness and pain with menstruation, slow pulse, pale tongue, white tongue coat, aversion to cold, no thirst, and no fever. The herbal formula contained 9 to 15 grams each of *Gan Jiang* and *Gan Cao* (Radix Glycyrrhizae). Patients with mild to moderate conditions responded within 1 to 2 doses, while those with more severe conditions required 3 to 5 doses.[8]

TOXICOLOGY

The LD_{50} for oral ingestion of *Gan Jiang* decoction in mice is 250 g/kg.[9]

SUPPLEMENT

- 炮薑 / 炮姜 *Pao Jiang* (Rhizoma Zingiberis Preparatum), processed ginger, is bitter and astringent. It is the herb of choice to warm channels and stop bleeding. It is often used in patients experiencing bleeding from deficiency and cold.

AUTHORS' COMMENTS

Gan Jiang (Rhizoma Zingiberis), *Pao Jiang* (Rhizoma Zingiberis Preparatum), and *Sheng Jiang* (Rhizoma Zingiberis Recens) have similar yet different functions.

- *Gan Jiang* is acrid and hot, and it warms the middle *jiao* to restore normal digestive functions. It treats interior cold.
- *Pao Jiang* is bitter and astringent, and it warms channels and stops bleeding. It treats deficiency and cold.
- *Sheng Jiang* is acrid and warm, and it warms the middle *jiao* to relieve nausea and vomiting. It treats exterior wind-cold.

Wu Zhu Yu (Fructus Evodiae)

吳茱萸 吴茱萸

Pinyin Name: *Wu Zhu Yu*
Literal Name: "Wu-Zhu's fruit," "evodia of Wu"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: evodia, medicinal evodia fruit
Botanical Name: *Evodia rutaecarpa* (Juss.) Benth. (*Wu Zhu Yu*); *Evodia rutaecarpa* (Juss.) Benth. var. *officinalis* (Dode) Huang (*Shi Hu*); *Evodia rutaecarpa* (Juss.) Benth. var. *bodinieri* (Dode) Huang (*Shu Mao Wu Zhu Yu*)
Pharmaceutical Name: Fructus Evodiae
Properties: acrid, bitter, hot
Channels Entered: Liver, Spleen, Stomach
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Dispels Cold, Dries Dampness, Activates Qi Circulation, Relieves Pain

Epigastric and abdominal pain, and *jueyin* headache: *Wu Zhu Yu* (Fructus Evodiae) treats pain characterized by stagnation of cold, damp and qi. It dispels cold to relieve epigastric and abdominal pain. It warms and dispels cold in the *jueyin* Liver channel and relieves hernial pain, dysmenorrhea, leg *qi* and vertex headache. This is the best herb for migraine or vertex headaches with nausea and vomiting, as it warms the deficient middle *jiao* and dispels cold in the Liver and Stomach channels.

- Epigastric and abdominal pain due to cold and dampness: use *Wu Zhu Yu* with *Gan Jiang* (Rhizoma Zingiberis) and *Gui Zhi* (Ramulus Cinnamomi).
- Cold hernial pain or abdominal pain: use it with *Xiao Hui Xiang* (Fructus Foeniculi) and *Wu Yao* (Radix Linderae).
- Menstrual pain due to cold in the womb: combine it with *Ai Ye* (Folium Artemisiae Argyi), *Gui Zhi* (Ramulus Cinnamomi), *Dang Gui* (Radicis Angelicae Sinensis), *Xiang Fu* (Rhizoma Cyperi), *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) and *Yan Hu Suo* (Rhizoma Corydalis).
- Leg *qi* caused by accumulation of cold and dampness: use this herb with *Mu Gua* (Fructus Chaenomelis) and *Bing Lang* (Semen Arecae).
- Vertex or migraine headaches: combine it with *Ren Shen* (Radix Ginseng) and *Sheng Jiang* (Rhizoma Zingiberis Recens). **Exemplar Formula:** *Wu Zhu Yu Tang* (Evodia Decoction).
- Hernial pain: use *Wu Zhu Yu* with *Wu Yao* (Radix Linderae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Ju He* (Semen Citri Rubrum), *Xiao Hui Xiang* (Fructus Foeniculi), and *Li Zhi He* (Semen Litchi).

2. Spreads the Liver, Descends Qi

Acid reflux, vomiting: *Wu Zhu Yu* is one of the most effective herbs to treat vomiting and acid reflux caused by Liver overacting on the Stomach. Other symptoms may include hypochondriac pain, stomach pain and nausea.

- Acid reflux after meals due to deficiency and cold of the Stomach: use *Wu Zhu Yu* individually, or with *Gan Jiang* (Rhizoma Zingiberis).
- Nausea, vomiting, stomach pain with acid regurgitation due to deficiency and cold of the Stomach: use this herb with *Sheng Jiang* (Rhizoma Zingiberis Recens), *Ban Xia* (Rhizoma Pinelliae), *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Huo Xiang* (Herba Agastache) and *Sha Ren* (Fructus Amomi).
- Acid reflux, stomach pain, hypochondriac pain with foul breath due to Liver heat overacting on the Stomach: use *Wu Zhu Yu* with *Huang Lian* (Rhizoma Coptidis). The dose of *Huang Lian* should be five times greater than that of *Wu Zhu Yu*. **Exemplar Formula:** *Zuo Jin Wan* (Left Metal Pill).

3. Warms Middle *Jiao*, Relieves Diarrhea

Diarrhea or dysentery due to cold and dampness: *Wu Zhu Yu* treats chronic diarrhea from accumulation of cold and dampness, or from deficiency and cold of the Spleen and Kidney. Patients with accumulation of cold and dampness have diarrhea throughout the day, while patients with deficiency and cold of the Spleen and Kidney experience diarrhea in the early morning hours.

Wu Zhu Yu (Fructus Evodiae)

- Chronic diarrhea from deficiency and cold of the Spleen and Kidney: combine *Wu Zhu Yu* with *Rou Dou Kou* (Semen Myristicae), *Bu Gu Zhi* (Fructus Psoraleae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). **Exemplar Formula:** *Si Shen Wan* (Four-Miracle Pill).
- Chronic dysentery because of the accumulation of cold and dampness affecting the Spleen: use this herb with *Huang Lian* (Rhizoma Coptidis) and *Bai Shao* (Radix Paeoniae Alba).

4. Directs Fire Downwards

Hypertension, oral ulcers: *Wu Zhu Yu* treats heat conditions, such as ulceration of the tongue and mouth, and hypertension, by directing heat downwards.

- Oral ulcers and hypertension: mix powdered *Wu Zhu Yu* with vinegar and place it on the center of the soles of the feet.
- Eczema or sores on the scalp: apply *Wu Zhu Yu* in liquid form topically, or mix the powder of the herb with water and apply topically.

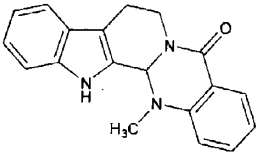
DOSAGE

1.5 to 5 grams. Unprocessed *Wu Zhu Yu* is often used topically, while the processed herb is often used internally. Processing is done by cooking the herb with *Gan Cao* (Radix Glycyrrhizae) to eliminate its drying effect and toxicity.

CAUTIONS / CONTRAINDICATIONS

- *Wu Zhu Yu* is contraindicated in cases of yin deficiency with heat.
- *Wu Zhu Yu* is not recommended for long-term use, or for use in large doses, due to toxicity.

OVERDOSAGE



Overdose of *Wu Zhu Yu* is characterized by severe abdominal pain, diarrhea, visual disturbance, hair loss, chest oppression, headache, dizziness and rashes.

TREATMENT OF OVERDOSAGE

General overdose of *Wu Zhu Yu* can be treated with 15 grams of *Huang Lian* (Rhizoma Coptidis) in decoction. For visual disturbance or hair loss, use a decoction taken twice daily, consisting of *Shi Hu* (Herba Dendrobii) 15g, *Huang Qin* (Radix Scutellariae) 9g, *Gu Jing Cao* (Flos Eriocauli) 15g, *Ju Hua* (Flos Chrysanthemi) 12g, *Gou Qi Zi* (Fructus Lycii) 15g, *Sheng Di Huang* (Radix Rehmanniae) 9g and *Gan Cao* (Radix Glycyrrhizae) 6g.[1]

CHEMICAL COMPOSITION

Evodiamine, rutaecarpine, evocarpine, hydroxyevodiomine, wuchuyine, dihydrorutaecarpine, 14-formyldihydrorutaecarpine, quinolone, N,N-dimethyl-5-methoxytryptamine, N-methylanthranylamide, dl-synephrine, evodene, ocimene, evodin, evodol, goshuynic acid, evodinone, evogin, evodine, jangomolide.[2,3]

Evodiamine

PHARMACOLOGICAL EFFECTS

- **Antiulcer:** According to various animal studies, administration of *Wu Zhu Yu* is associated with marked effectiveness in preventing and treating stomach ulcers by reducing gastric acid secretion.[4]
- **Antiemetic:** Decoction of *Wu Zhu Yu* has an antiemetic effect on pigeons, although the effect was not statistically significant.[5]
- **Antidiarrheal:** Decoction of *Wu Zhu Yu* at dosages of 10 to 20 g/kg has a slow onset but a prolonged duration of action for treatment of diarrhea in mice.[6]
- **Analgesic:** Several components of *Wu Zhu Yu* have demonstrated analgesic effects.[7]
- **Cardiovascular:** According to various animal studies, injection of a *Wu Zhu Yu* preparation is associated with a positive inotropic effect, a negative chronotropic effect and a marked decrease in blood pressure. The herb has a rapid onset and a prolonged duration of action on the cardiovascular system. The preparation contained *Wu Zhu Yu*, *Ren Shen* (Radix Ginseng) and *Da Zao* (Fructus Jujubae).[8]
- **Effects on the uterus:** *Wu Zhu Yu* has a mixed effect on the uterus. Some constituents induce contraction while others induce relaxation.[9]
- **Antibiotic:** Decoction of *Wu Zhu Yu* has an inhibitory effect on *Pseudomonas aeruginosa*, *Staphylococcus aureus*, and some dermatophytes.[10]

CLINICAL STUDIES AND RESEARCH

- **Ulceration of the mouth:** In one study, 256 patients with oral ulcerations were treated by topical application of *Wu Zhu Yu* with 96.48% effectiveness. The herbal preparation was made by mixing the powdered herb with vinegar to form a paste. The treatment protocol was to place the herbal paste on *Yongquan* (KI 1) bilaterally for 24 hours.[11]
- **Eczema:** Over 1,100 eczema patients were treated by topical application of an herbal powder containing 30 grams of *Wu Zhu Yu*, 21 grams of *Hai Piao Xiao* (Endoconcha Sepiae), and 6 grams of *Liu Huang* (Sulfur). The treatment protocol was to sprinkle the herbal powder on the

Wu Zhu Yu (Fructus Evodiae)

affected area and cover it with gauze, every other day. The study reported over 95% success in treatment.[12]

AUTHORS' COMMENTS

Wu Zhu Yu and *Gan Jiang* (Rhizoma Zingiberis) are both interior-warming herbs, but focus on different parts of the body. *Wu Zhu Yu*, acrid, bitter, hot, dispersing and descending in nature, enters the Liver and Stomach to primarily treat middle and lower *jiao* disorders such as epigastric and abdominal coldness and pain, hernia and dysmenorrhea. *Gan Jiang*, acrid, hot and dry, enters the Spleen, Stomach, Heart and Lung. Its main effects are focused on the upper and middle *jiaos* to disperse coldness, warm the interior and dispel phlegm to treat dyspnea, phlegm, wheezing and yang collapse symptoms.

Wu Zhu Yu and *Gao Ben* (Rhizoma Ligustici) are both acrid and hot, and treat vertex headaches. *Wu Zhu Yu* enters the *jueyin* Liver channel and is best at dispelling cold, relieving pain and regulating Liver qi circulation. It is best for vertex headache with vomiting or nausea because of coldness and phlegm accumulation. *Gao Ben* enters the *taiyang* Urinary Bladder channel and is best at dispelling wind, cold, and damp and relieving pain. It is for vertex headaches associated with wind-cold invasion.

Optimal treatment of headache requires the use of channel-guiding herbs to deliver the therapeutic effect of the herbs to the affected area. The following is a list of commonly used channel-guiding herbs:

- *Taiyang* channels: *Qiang Huo* (Rhizoma et Radix Notopterygii)
- *Shaoyang* channels: *Chai Hu* (Radix Bupleuri)
- *Yangming* channels: *Bai Zhi* (Radix Angelicae Dahuricae)
- *Taiyin* channels: *Cang Zhu* (Rhizoma Atractylodis)
- *Shaoyin* channels: *Xi Xin* (Herba Asari)
- *Jueyin* channels: *Wu Zhu Yu* (Fructus Evodiae)

Xi Xin (Herba Asari)

細辛 细辛

Pinyin Name: *Xi Xin*
Literal Name: "thin-acrid," "fine-pungent"
Alternate Chinese Names: *Xiao Xin*, *Shao Xin*, *Bei Xi Xin*, *Liao Xi Xin*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: asarum, Chinese wild ginger, Manchurian wild ginger, Seoul wild ginger, Siebold wild ginger
Botanical Name: *Asarum heteropoides* Fr. var. *mandshuricum* (Maxim.) Kitag. (*Bei Xi Xin*); *Asarum sieboldii* Miq. (*Hua Xi Xin*)
Pharmaceutical Name: Herba Asari
Properties: acrid, warm
Channels Entered: Lung, Heart, Kidney
Safety Index: slightly toxic

Xi Xin (Herba Asari)

CHINESE THERAPEUTIC ACTIONS

1. Dispels Wind, Disperses Cold and Relieves Pain

Pain (headache, arthritis or abdominal pain): Extremely acrid and warm, *Xi Xin* (Herba Asari) dispels wind and cold from the exterior. It is commonly used to treat headache, *bi zheng* (painful obstruction syndrome), abdominal pain, and various aches and pains caused by wind, cold, and/or dampness. *Xi Xin* enters the Kidney channel and dispels cold from the *shaoyin* channel to relieve lower-abdominal pain and coldness of the lower extremities, a bland taste in the mouth, and no desire to drink.

- Headache due to wind: use *Xi Xin* with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), and *Qiang Huo* (Rhizoma et Radix Notopterygii). **Exemplar Formula:** *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea).
- *Bi zheng* (painful obstruction syndrome) with wind, cold and/or dampness obstructing the channels and collaterals: use this herb with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Fang Feng* (Radix Saposhnikoviae).
- Chronic low back and knee pain with Kidney and Liver deficiencies: use *Xi Xin* with *Du Zhong* (Cortex Eucommiae) and *Sang Ji Sheng* (Herba Taxilli). **Exemplar Formula:** *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction).
- Abdominal pain, coldness of the lower extremities, pale tongue, no thirst: combine this herb with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi).
- Chest pain due to cold and qi stagnation: use it with *Xie Bai* (Bulbus Allii Macrostemonis), *Gui Zhi* (Ramulus Cinnamomi) and *Dan Shen* (Radix Salviae Miltiorrhizae).

2. Dispels Wind-Cold from the Exterior

Exterior wind-cold syndrome: *Xi Xin* releases the exterior and dispels wind and cold. It is most effective for exterior cold syndromes with headache, severe muscle aches and pain.

- Exterior wind-cold conditions with headache and body aches: use *Xi Xin* with *Fang Feng* (Radix Saposhnikoviae), *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) to dispel wind-cold. **Exemplar Formula:** *Jiu Wei Qiang Huo Tang* (Nine-Herb Decoction with Notopterygium).
- Exterior wind-cold syndrome with underlying yang deficiency: use this herb with *Ma Huang* (Herba Ephedrae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) to dispel wind-cold and tonify yang. Common signs and symptoms associated with this condition include aversion to cold, fever, desire to assume the fetal position, and deep pulse. **Exemplar Formula:** *Ma Huang Fu Zi Xi Xin Tang* (Ephedra, Asarum, and Prepared Aconite Decoction).

3. Warms the Lung and Resolves Phlegm

Coldness and phlegm accumulation in the Lung: Clinical presentation includes cough, dyspnea, wheezing, stifling sensations in the chest, and profuse white or clear sputum. Patients who show this pattern usually have chronic water metabolism problems with congested phlegm in the Lung, and a weak Spleen. When exposed to wind-cold, the Lung's ability to facilitate water passage is impaired. This results in congested fluids in the Lung, which manifest in symptoms of dyspnea, wheezing, cough, stifling sensations in the chest and profuse white or clear sputum. *Xi Xin*, with its strong acrid and warm properties, is one of the most commonly-used herbs to dispel dampness and cold in the Lung to restore normal functioning of respiration and transportation of fluids.

- Exterior wind-cold or Lung cold: use *Xi Xin* with *Ma Huang* (Herba Ephedrae), *Gan Jiang* (Rhizoma Zingiberis), and *Wu Wei Zi* (Fructus Schisandrae Chinensis) to dispel wind-cold and disperse Lung cold. **Exemplar Formula:** *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction).

4. Opens Sensory Orifices

Nasal obstruction or unconsciousness due to stroke: This condition involves blockage of two sensory pathways, the nose and the *shen* (spirit). *Xi Xin* has a strong dispersing function to penetrate blockages to relieve nasal congestion or restore consciousness.

- Nasal obstruction: apply *Xi Xin* topically to the nostrils.
- Nasal obstruction with a clear nasal discharge: use this herb with *Xin Yi Hua* (Flos Magnoliae) and *Bai Zhi* (Radix Angelicae Dahuricae).
- Unconsciousness: blow *Xi Xin* powder into the nostrils to restore consciousness.

5. Promotes Healing of Oral Ulceration

- Oral lesions or ulcerations: use *Xi Xin* alone, or in combination with *Huang Lian* (Rhizoma Coptidis).

6. Relieves Toothache

- Toothache due to cold: use *Xi Xin* with *Bai Zhi* (Radix Angelicae Dahuricae) to make a gargle, or apply the powder of these two herbs topically.
- Toothache due to heat, with swollen and red gums associated with rising Stomach fire: use this herb with *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae).

DOSAGE

1 to 3 grams in decoction, 0.5 to 2.0 grams in powder. *Xi*

Xí Xin (Herba Asari)

Xin should never be prescribed in excess of the recommended dosage. Classic texts specifically state that the dose of *Xi Xin* in decoction should never exceed one *qian* (3.125 grams). *Xi Xin* should be applied sparingly when used topically.

Xi Xin is extremely dangerous when used in larger quantities than suggested, or if used in powder form. The safrole in the essential oil of *Xi Xin* is responsible for the toxicity of this herb, which can be reduced or removed by cooking.[1]

CAUTIONS / CONTRAINDICATIONS

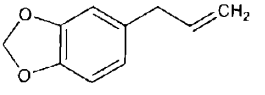
- *Xi Xin* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).
- *Xi Xin* is contraindicated in patients with febrile disorders, yin deficiency, yang excess, cough or wheezing due to yin deficiency, headache due to blood deficiency or wind-heat, and perspiration from qi deficiency.

OVERDOSAGE

Adverse reaction associated with overdose of *Xi Xin* is generally observed 1 to 2 hours after ingestion, but may occur within 30 minutes. Early symptoms include headache, increased pressure sensations in the head, nausea, vomiting, perspiration, thirst, red face, restlessness, anxiety, stiff neck, dilated pupils, hurried respiration rate (up to 53 times per minute), elevated body temperature (up to 45° C), elevated blood pressure (up to 150-170/110-130 mmHg), tachycardia (up to 123 beats per minute), and forceful rapid pulse. As the reaction progresses, patients may also exhibit general tremors, muscle stiffness, clenched jaw, mania, jaundice, and in severe cases, anuria, unconsciousness, and respiratory depression.[2]

TREATMENT OF OVERDOSAGE

Early-stage overdose can be treated with emetic methods, followed by ingestion of milk, egg whites or activated charcoal.



Overdose of *Xi Xin* can be differentiated into different types and treated accordingly. Overdose characterized by headache with increased pressure, perspiration, red face, dilated pupils, increased heart rate, and a forceful, rapid pulse should be treated with herbs that clear heat and eliminate toxins, such as 250 grams of *Lu Dou* (Semen Phaseoli Radiati), with a small amount of salt.

Overdose characterized by yellow discoloration of the skin, yellow urine, and a red tongue with a yellow tongue coating should be treated with herbs that clear heat and relieve jaundice, such as an herbal decoction with *Jin Yin Hua* (Flos Lonicerae) 15g, *Sheng Ma* (Rhizoma Cimicifugae) 15g, *San Qi* (Radix Notoginseng) 3g, *Mu Dan Pi* (Cortex Moutan) 12g, *Yin Chen Hao* (Herba Artemisiae Scopariae) 15g, *Che Qian Zi* (Semen Plantaginis) 15g, and *Hu Zhang* (Rhizoma Polygoni Cuspidati) 15g.

Overdose characterized by delirium, muscle stiffness and convulsions, rapid respiration, and a red tongue with a yellow tongue coating should be treated by clearing heat and toxins from the *ying* (nutritive) and *xue* (blood) levels, such as with an herbal decoction that contains *Xi Yang Shen* (Radix Panacis Quinquefolii) 3g, *Wu Wei Zi* (Fructus Schisandrae Chinensis) 3g, *Mai Men Dong* (Radix Ophiopogonis) 9g, *Shi Gao* (Gypsum Fibrosum) 24g, *Gan Cao* (Radix Glycyrrhizae) 30g, and *Ling Yang Jiao* (Cornu Saigae Tataricae) 3g.

CHEMICAL COMPOSITION

Essential oils 2.39-3.80% (methyl eugenol, safrole, asaricin, eucarvone), higenamine, aristolochic acid.[3,4]

Safrole

PHARMACOLOGICAL EFFECTS

- **Respiratory:** Many constituents of *Xi Xin* stimulate the respiratory system. Intravenous injection of alcohol extract of *Xi Xin* effectively reversed morphine-induced respiratory depression in rabbits. *Xi Xin* may also increase lung capacity for 15 to 30 minutes. Methyleugenol has a bronchodilating effect in mice.[5]
- **Cardiovascular:** Administration of an alcohol extract of *Xi Xin* is associated with increased heart rate and increased cardiac output in laboratory experiments.[6]
- **Antibiotic:** *Xi Xin* has an inhibitory effect against *Streptococcus* spp., *Shigella* spp., and *Salmonella typhi*.[7]
- **Anti-inflammatory:** Essential oil of *Xi Xin* has a marked effect to reduce inflammation associated with increased vascular permeability caused by PGE2. In laboratory experiments, intraperitoneal injection of essential oil of *Xi Xin* at 0.24 ml/kg effectively reduced swelling in the legs of rats.[8]
- **Anesthetic:** Essential oil of *Xi Xin* produces a local anesthetic effect in rabbits when injected locally. The anesthetic effect of *Xi Xin* is comparable to that of 1% novacaine.[9]

CLINICAL STUDIES AND RESEARCH

- **Aphthous ulcers:** *Xi Xin* in the form of topical paste was used in one study to treat 106 patients with aphthous ulcers. The herbal paste was made from 9 to 15 grams of powder mixed with water and glycerin, and placed on the navel for at least three days. The rate of effectiveness was 93.4%.[10]
- **Angina:** In one study, 281 patients with coronary artery disease and angina were treated with an herbal sublingual

Xí Xìn (Herba Asari)

spray with pain relief achieved within 5 minutes in 64.8% of the cases. The therapeutic effect was concluded to be similar to that of nitroglycerin. The herbal spray contained 50 ml of essential oil of *Xi Xin,* and 16 grams of *Bing Pian* (Borneolum Syntheticum), dissolved in 600 ml of 95% alcohol.[11]

TOXICOLOGY

In animal experiments, the LD_{50} for essential oil of *Xi Xin* in mice is 1.2 ml/kg via intraperitoneal injection. Respiratory paralysis was associated with overdose.[12]

Xi Xin belongs in the Aristolochiaceae family, and has been found to contain trace amounts of aristolochic acid. For more information on the toxicology of this compound, please refer to the monographs on *Guang Fang Ji* (Radix Aristolochiae Fangchi) or *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis).

SUPPLEMENT

- 土細辛 / 土细辛 *Tu Xi Xin* (Herba Asarum Forbgesii), derived from the same genus as *Xi Xin*, has actions that are similar to this herb but weaker.

AUTHORS' COMMENTS

Xi Xin has potent effect to dispel wind-cold from the exterior and warm the interior. Depending on the reference, it has been classified as either an exterior-releasing herb or an interior-warming herb.

Xi Xin and *Ma Huang* (Herba Ephedrae) both function to warm the body and dispel wind-cold.

- *Xi Xin* is penetrating in nature and more strongly warms the body while mainly relieving pain of headaches, body-wide muscle aches, and pain caused by wind-cold.
- *Ma Huang* is dispersing in nature and more effectively disperses wind and releases exterior conditions. It is the strongest herb for treating wheezing and dyspnea in wind-cold invasions where there is no perspiration.

Optimal treatment of headache requires use of channel-guiding herbs to deliver the therapeutic effect of the herbs to the affected area. The following is a list of commonly used channel-guiding herbs:

- *Taiyang* channels: *Qiang Huo* (Rhizoma et Radix Notopterygii)
- *Shaoyang* channels: *Chai Hu* (Radix Bupleuri)
- *Yangming* channels: *Bai Zhi* (Radix Angelicae Dahuricae)
- *Taiyin* channels: *Cang Zhu* (Rhizoma Atractylodis)
- *Shaoyin* channels: *Xi Xin* (Herba Asari)
- *Jueyin* channels: *Wu Zhu Yu* (Fructus Evodiae)

Hua Jiao (Pericarpium Zanthoxyli)

花椒　花椒

Pinyin Name: *Hua Jiao*
Literal Name: "flower pepper"
Alternate Chinese Names: *Qin Jiao, Shu Jiao, Chuan Jiao, Ba Jiao, Hong Jiao, Da Hong Pao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: zanthoxylum, prickly ash pepper tree peel, bunge prickly ash peel
Botanical Name: *Zanthoxylum bungeanum* Maxim. (*Hua Jiao*); *Zanthoxylum schinifolium* Sieb. et Zucc. (*Qing Jiao*); Various other species that are used interchangeably include *Zanthoxylum simulans* Hance. (*Ye Hua Jiao*), *Zanthoxylum planispinum* Sieb. et Zucc. (*Zhu Ye Jiao*); *Zanthoxylum avicennae* (Lam.) DC. (*Lei Dang*); and *Zanthoxylum simulans* Hance var. *podocarpum* (Hemsl.) Huang (*Bing Guo Hua Jiao*).
Pharmaceutical Name: Pericarpium Zanthoxyli
Properties: acrid, hot
Channels Entered: Kidney, Spleen, Stomach
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Warms the Middle *Jiao*, Stops Pain and Relieves Diarrhea

Epigastric and abdominal coldness and pain, toothache, diarrhea: *Hua Jiao* (Pericarpium Zanthoxyli) warms the Spleen and Stomach to treat excess accumulation of cold in the middle *jiao*.

- Coldness and pain in the chest with vomiting and inability to eat: use *Hua Jiao* with *Gan Jiang* (Rhizoma Zingiberis), *Ren Shen* (Radix Ginseng) and *Yi Tang* (Saccharum Granorum). **Exemplar Formula:** *Da Jian Zhong Tang* (Major Construct the Middle Decoction).
- Coldness and pain in the epigastric and abdominal regions: dry fry *Hua Jiao* and apply it to the affected area to disperse cold.
- Diarrhea due more to cold than to dampness: use this herb with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis).
- Diarrhea due more to dampness than to cold: combine it with *Cang Zhu* (Rhizoma Atractylodis) and *Hou Po* (Cortex Magnoliae Officinalis).
- Toothache: apply *Hua Jiao* topically to the affected tooth and gums.

2. Kills Parasites

Parasites and itching of the skin: *Hua Jiao* treats parasitic infestations in the intestines that are causing vomiting and abdominal pain. It also treats parasitic infection of the skin manifesting in pruritus and eczema.

- Vomiting and abdominal pain due to roundworms: use *Hua Jiao* individually, or combine it with *Wu Mei* (Fructus Mume) and *Huang Lian* (Rhizoma Coptidis).
- Intestinal obstruction by parasites: fry *Hua Jiao* with cooking oil and use it daily with meals.
- Pruritis, genital itching and eczema: use it with *Ku Shen Gen* (Radix Sophorae Flavescentis) and *Di Fu Zi* (Fructus Kochiae).

DOSAGE

2 to 5 grams in herbal decoction. *Hua Jiao* may be used both internally and topically.

CAUTIONS / CONTRAINDICATIONS

- *Hua Jiao* is contraindicated in the presence of excess fire, or of yin deficiency.
- Use *Hua Jiao* with caution during pregnancy.

CHEMICAL COMPOSITION

Essential oils (limonene, 1,8-cineol, myrcene), skimmianine, kokusaginine, haplopine, herniarin, xanthoxylin.[1]

Hua Jiao (Pericarpium Zanthoxyli)

PHARMACOLOGICAL EFFECTS

- **Anesthetic and analgesic:** Water extract of *Hua Jiao* has local anesthetic and analgesic effects as demonstrated in mice. Prolonged use is associated with tolerance.[2]
- **Antiulcer:** Water extract of *Hua Jiao* at 5 to 10 g/kg acts to prevent and treat stomach ulcers in mice. However, it only achieved 22% effectiveness.[3]
- **Antidiarrheal:** Water extract of *Hua Jiao* at 5 to 10 g/kg has an antidiarrheal effect. In mice, *Hua Jiao* effectively delays the onset and shortens the duration of diarrhea, when diarrhea is induced by ingestion of *Fan Xie Ye* (Folium Sennae).[4]
- **Antibiotic:** It has an inhibitory effect against β-hemolytic streptococcus, *Staphylococcus aureus*, *Diplococcus pneumoniae*, *Bacillus dysenteriae*, *Salmonella typhi*, and some dermatophytes.[5]

CLINICAL STUDIES AND RESEARCH

- **Intestinal obstruction:** Eight children with intestinal obstructions caused by roundworms were treated with *Hua Jiao*, with satisfactory results. Pain relief was achieved within 15 to 30 minutes, followed by defecation of stool with roundworms.[6]
- **Inhibition of lactation:** According to one report, 163 women who wanted to stop lactation immediately after labor were treated with one 400 mg capsule of *Hua Jiao* three times daily for 3 to 4 days, with a 93.9% rate of effectiveness. The herbal capsule was prepared by grinding the herb into powder and placing it in capsules.[7]

TOXICOLOGY

The LD_{50} for skimmianine is 150 to 250 mg/kg in mice.[8]

SUPPLEMENT

- 椒目 *Jiao Mu* (Semen Zanthoxyli Bungeani), first cited in the *Ben Cao Jing Ji Zhu* (Collection of Commentaries on the Classic of the Materia Medica) by Tao Hong-Jing in 480-498 A.D., is bitter, cold, toxic, and enters the Spleen and Urinary Bladder. It regulates water circulation to relieve edema, and eliminates water accumulation in the Lung to facilitate breathing. Clinically, it treats dysuria and edema with its mild diuretic effect. It is also used to treat accumulation of water in the Lung with symptoms such as wheezing, dyspnea, edema, drum-like distention of the abdomen, and phlegm invading the Lung causing dyspnea and wheezing with an inability to lie down. It was demonstrated in one clinical study of 958 patients with wheezing and dyspnea that a preparation of *Jiao Mu* given three times daily for 7 to 10 days per course of treatment was effective in 78.5% of patients. The herbal preparation was described as having a rapid onset of action, good therapeutic effect, few side effects, and a wide range of clinical applications. The regular dose for *Jiao Mu* is 2 to 5 grams.[9]

AUTHORS' COMMENTS

Hua Jiao (Pericarpium Zanthoxyli) and *Hu Jiao* (Fructus Piper) have similar pinyin names. However, they should not be confused, as they are two different herbs with differing characteristics and actions.

Gao Liang Jiang (Rhizoma Alpiniae Officinarum)

高良薑 高良姜

Pinyin Name: *Gao Liang Jiang*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: alpinia, galanga, lesser galangal rhizome
Botanical Name: *Alpinia officinarum* Hance. (*Gao Liang Jiang*)
Pharmaceutical Name: Rhizoma Alpiniae Officinarum
Properties: acrid, hot
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

Warms the Spleen and Stomach

The major strength of *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) is in dispelling cold from the middle *jiao* to treat epigastric and abdominal pain, nausea, vomiting, food stagnation, intestinal cramps and diarrhea. It can be used alone, or with other interior-warming herbs to enhance the overall effect.

- Coldness and pain in the epigastric and abdominal region: use *Gao Liang Jiang* with *Pao Jiang* (Rhizoma Zingiberis Preparatum) and *Wu Zhu Yu* (Fructus Evodiae).
- Sharp, stabbing pain in the chest and abdomen: use it with *Rou Gui* (Cortex Cinnamomi) and *Dang Gui* (Radicis Angelicae Sinensis).
- Intestinal cramps: combine it with *Hou Po* (Cortex Magnoliae Officinalis), *Dang Gui* (Radicis Angelicae Sinensis), *Rou Gui* (Cortex Cinnamomi) and *Sheng Jiang* (Rhizoma Zingiberis Recens). **Exemplar Formula:** *Liang Fu Wan* (Galangal and Cyperus Pill).
- Accumulation of cold with Liver qi stagnation: use this herb with *Xiang Fu* (Rhizoma Cyperi).
- Nausea and vomiting due to cold: use it with *Gan Jiang* (Rhizoma Zingiberis), *Ban Xia* (Rhizoma Pinelliae), *Su Zi* (Fructus Perillae), *Ding Xiang* (Flos Caryophylli), *Rou Gui* (Cortex Cinnamomi) and *Wu Zhu Yu* (Fructus Evodiae).
- Abdominal hernial pain: add *Xiao Hui Xiang* (Fructus Foeniculi).
- Acute diarrhea from Spleen and Kidney yang deficiencies: use *Gao Liang Jiang* with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi).
- Chronic diarrhea from deficiency and cold: combine it with *Bu Gu Zhi* (Fructus Psoraleae) and *Li Zhong Tang* (Regulate the Middle Decoction).

DOSAGE

3 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- *Gao Liang Jiang* is contraindicated in cases of interior heat with yin deficiency.

CHEMICAL COMPOSITION

Essential oils 0.5 to 1.5% (cineol, methy cinnamate, eugenol, pinene, cadinene, galangol), flavonoids (galangin, kampferide, kaempferol, quercetin, isorhamnetin).[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Gao Liang Jiang* has various effects on the gastrointestinal system. Both water and alcohol extracts of the herb have demonstrated marked analgesic and cholagogic effects. In addition, both have shown marked preventative and treatment effects on peptic ulcers and diarrhea. The water extract of the herb also has an inhibitory effect on the gastrointestinal system, as it decreases intestinal peristalsis.[2]
- **Analgesic:** *Gao Liang Jiang* may be used to treat angina, as it has a rapid onset of analgesic effect.[3]
- **Antibiotic:** It has an inhibitory effect on *Bacillus anthracis*, *Corynebacterium diphtheriae*, *Diplococcus pneumoniae*, *Salmonella typhi*, *Staphylococcus aureus*, β-hemolytic streptococcus, and *Mycobacterium tuberculosis hominis*.[4]

TOXICOLOGY

Water extract of *Gao Liang Jiang* administered orally at the dosage of 120 g/kg for 7 days did not contribute to any fatalities in mice. The LD_{50} for alcohol extract of the herb via the oral route was 4.2 +/- 0.4 ml/kg in mice.[5]

Gao Liang Jiang (Rhizoma Alpiniae Officinarum)

SUPPLEMENT

- 紅豆蔻 / 红豆蔻 *Hong Dou Kou* (Fructus Alphiniae Galangae), first cited in the *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D., is derived from the fruit of the same plant as *Gao Liang Jiang*. *Hong Dou Kou* is acrid and warm, enters the Spleen and Stomach and warms the Lung, dispels coldness, awakens the Spleen, dries dampness, aids digestion, stops pain and eliminates alcohol toxins. Common applications include epigastric and abdominal coldness and pain, vomiting, diarrhea, and no desire to drink or eat. *Hong Dou Kou* can also be used topically to treat toothache caused by wind and cold. The recommended dosage of *Hong Dou Kou* is 3 to 6 grams. It is contraindicated in patients with yin-deficient heat.

AUTHORS' COMMENTS

Gao Liang Jiang and *Gan Jiang* (Rhizoma Zingiberis) both warm the middle *jiao* and dispel cold. *Gao Liang Jiang* is stronger in warming the Stomach, dispersing cold and relieving pain. It is most suitable for cold directly attacking the middle, injuring the Stomach, and resulting in epigastric and abdominal fullness and pain. *Gan Jiang* is stronger in warming the Spleen to stop diarrhea. It is suitable for deficiency and cold of the middle *jiao* with epigastric and abdominal coldness and pain, loose stools and decreased food intake.

Ding Xiang (Flos Caryophylli)

丁香

Pinyin Name: *Ding Xiang*
Literal Name: "t-shaped aroma," "spike fragrance"
Alternate Chinese Names: *Gong Ding Xiang, Xiong Ding Xiang*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: clove
Botanical Name: *Eugenia caryophyllata* Thunb. (*Ding Xiang*)
Pharmaceutical Name: Flos Caryophylli
Properties: acrid, warm
Channels Entered: Kidney, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Warms the Middle *Jiao*, Relieves Pain and Reverses Rising Stomach Qi

Epigastric and abdominal coldness and pain, vomiting, hiccups: *Ding Xiang* (Flos Caryophylli) is the key herb for treating abnormal rising of Stomach qi caused by coldness that is manifesting in vomiting, nausea and hiccups. Other clinical applications include epigastric and abdominal coldness and pain, abdominal fullness and distention that occurs when the individual is exposed to cold.

- Coldness and pain in the epigastric and abdominal regions: use *Ding Xiang* with *Rou Gui* (Cortex Cinnamomi) and *Gan Jiang* (Rhizoma Zingiberis).
- Nausea and vomiting due to Stomach cold: use it with *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

Ding Xiang (Flos Caryophylli)

- Hiccups due to Stomach cold: add *Shi Di* (Calyx Kaki).
- Hiccups due to deficiency and cold: use *Ding Xiang* with *Ren Shen* (Radix Ginseng) or *Dang Shen* (Radix Codonopsis).
- Morning sickness in pregnant women: combine it with *Ren Shen* (Radix Ginseng) and *Huo Xiang* (Herba Agastache).
- Diarrhea due to deficiency or cold: use this herb with *Gan Jiang* (Rhizoma Zingiberis), *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Rou Dou Kou* (Semen Myristicae).

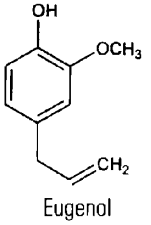
2. Tonifies Kidney Yang

Ding Xiang treats impotence, cold body and extremities, and weakness and soreness of the back and knees caused by Kidney yang deficiency.

- Kidney yang deficiency: use *Ding Xiang* with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi) and *Ba Ji Tian* (Radix Morindae Officinalis).

Ding Xiang, soaked in rubbing alcohol and applied topically, has been used to treat various fungal infections.

DOSAGE



2 to 5 grams.

CAUTIONS / CONTRAINDICATIONS

- *Ding Xiang* is contraindicated in cases of febrile disorders, or in interior heat with yin deficiency.
- *Ding Xiang* is counteracted by *Yu Jin* (Radix Curcumae).
- Potential side effects of *Ding Xiang* include dizziness, palpitations, chest oppression, headache, perspiration, decreased blood pressure, and skin rash.[1]

CHEMICAL COMPOSITION

Essential oils 16–19% (eugenol, caryophyllene, acetyl-eugenol), α-caryophyllene, chavicol.[2,3]

Eugenol

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Ding Xiang* promotes digestion by increasing bile and gastric acid secretions.[4]
- **Antibiotic:** *Ding Xiang* has an inhibiting effect against *Vibrio cholerae*, *Bacillus anthracis*, *Salmonella typhi*, *Corynebacterium diphtheriae*, *Bacillus dysenteriae*, *E. coli*, *Bacillus subtilis*, and *Staphylococcus aureus*.[5]
- **Analgesic:** Essential oil of *Ding Xiang* applied topically has an analgesic effect to relieve toothache.[6]
- **Antitoxin:** Potassium cyanide and sodium nitrate poisoning can be treated by administration of *Ding Xiang*. According to animal studies, intraperitoneal injection of *Ding Xiang* was beneficial in prolonging the survival time in mice that were given 4 mg/kg of potassium cyanide via intravenous injection. Similar beneficial effects were observed in mice poisoned with 800 mg/kg of sodium nitrate.[7]
- **Antiasthmatic:** Essential oil of *Ding Xiang* has a marked antiasthmatic effect, with a duration of action of approximately 6 hours.[8]

CLINICAL STUDIES AND RESEARCH

- **Fungal infection:** According to one report, 31 patients who had fungal infection for two years or more were treated topically with an herbal tincture applied to the affected area three times daily for 2 to 5 days, with excellent results. Most patients began to notice improvement after 2 to 3 days, with complete recovery achieved within 3 to 5 days. The incidence of recurrence was approximately 20%. The herbal tincture was prepared by soaking 15 grams of *Ding Xiang* in 100 ml of 70% alcohol for 48 hours.[9]

SUPPLEMENT

- 母丁香 *Mu Ding Xiang* (Fructus Caryophylli), first cited in *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D., is derived from the fruit of the same plant as *Ding Xiang*. Both herbs have the same taste, functions and indications. *Mu Ding Xiang* has a weaker but longer-lasting therapeutic effect. The recommended dosage of *Mu Ding Xiang* is 2 to 5 grams.
- 丁香皮 *Ding Xiang Pi* (Cortex Caryophylli), the bark from the same plant as *Ding Xiang*, is used to dispel cold and relieve pain.

Hu Jiao (Fructus Piper)

胡椒

Pinyin Name: *Hu Jiao*
Literal Name: "barbarian pepper"
Alternate Chinese Names: *Bai Chuan, Hei Chuan*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: pepper, black pepper
Botanical Name: *Piper nigrum* L. (*Hu Jiao*)
Pharmaceutical Name: Fructus Piper
Properties: acrid, hot
Channels Entered: Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

Warms the Middle and Relieves Pain

Hu Jiao (Fructus Piper) disperses cold in the gastrointestinal system and relieves vomiting, nausea, epigastric and abdominal cold and pain, poor appetite and diarrhea.

- Gastrointestinal symptoms due to cold: use *Hu Jiao* with *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- Vomiting and nausea: use it with *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

The powder of *Hu Jiao* can be applied to the umbilicus to warm the middle *jiao*, or applied topically for toothache.

DOSAGE

2 to 3 grams in decoction, 0.5 to 1 gram in powder.

CAUTIONS / CONTRAINDICATIONS

- *Hu Jiao* is contraindicated in patients with yin deficiency or heat.
- *Hu Jiao* should be used with caution during pregnancy, due to its abortifacient effect.[1]

CHEMICAL COMPOSITION

Piperonal, dihydrocarveol, caryo-phyllene oxide, cryptone, transpinocarrol, piperine, piperyline, piperoleine A, B, C; piperanine.[2]

CLINICAL STUDIES AND RESEARCH

- **Diarrhea:** In a clinical study, 209 infants with diarrhea were treated with topical application of *Hu Jiao*, with a 81.3% rate of effectiveness. The treatment protocol was to grind 1 to 2 pieces of *Hu Jiao* and apply the powder to the umbilicus, cover with gauze, and change the application every 24 hours. The treatment may be repeated two to three times if necessary.[3]

AUTHORS' COMMENTS

Hu Jiao (Fructus Piper) and *Hua Jiao* (Pericarpium Zanthoxyli) have similar pinyin names. However, they should not be confused, as they are two different herbs, with differing characteristics and actions.

Bi Ba (Fructus Piperis Longi)

華茇　荜茇

Pinyin Name: *Bi Ba*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: long pepper
Botanical Name: *Piper longum* L. (*Bi Ba*)
Pharmaceutical Name: Fructus Piperis Longi
Properties: acrid, hot
Channels Entered: Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

Warms Middle *Jiao*, Relieves Pain

Bi Ba (Fructus Piperis Longi), hot and acrid, dispels cold in the middle *jiao*. It is often cooked with porridge to dispel cold from the Spleen and Stomach to relieve epigastric and abdominal pain, nausea, vomiting, poor appetite, diarrhea and dysentery.

- Cold in the Spleen and Stomach: use *Bi Ba* with *Rou Gui* (Cortex Cinnamomi), *Pao Jiang* (Rhizoma Zingiberis Preparatum) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- Deficiency of the Spleen and Stomach: use this herb with *Ren Shen* (Radix Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Nausea and vomiting arising from cold phlegm in the Stomach: use it with *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Epigastric and abdominal fullness and distention: use this herb with *Mu Xiang* (Radix Aucklandiae) and *Hou Po* (Cortex Magnoliae Officinalis).
- Toothache: use it with *Hu Jiao* (Fructus Piper) and apply topically as powder.

DOSAGE

2 to 5 grams. *Bi Ba* is used both internally and topically.

CAUTIONS / CONTRAINDICATIONS

- *Bi Ba* is contraindicated in cases of yin-deficient heat or excess heat.

CHEMICAL COMPOSITION

Piperine, piperlongumine, piplartin, sesamine.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Bi Ba* has an inhibitory influence on *Staphylococcus aureus*, *Bacillus subtilis*, *Mycobacterium tuberculosis*, *Bacillus dysenteriae*, *Salmonella typhi*, and *Bacillus cereus*.[2]
- **Anticonvulsant:** Intraperitoneal injection of *Bi Ba* has marked effectiveness to prevent seizures and convulsions in rats, with potency similar to phenytoin and trimethadione.[3]
- **Cardiovascular:** *Bi Ba* dilates blood vessels and causes feelings of warmth in the body and the extremities. Essential oil of the herb is associated with increased resistance of the cardiac muscle to hypoxia.[4] Lastly, piperlongumine and piplartin at 0.1 mg/kg have a marked effect to lower blood pressure in rabbits and rats.[5]

TOXICOLOGY

Long-term administration of *Bi Ba* at therapeutic dosage for 9 months showed no abnormality in the liver, kidneys, lungs, or other internal organs. The LD_{50} for piperine via intraperitoneal injection in rats is 348.6 mg/kg.[6]

Bi Cheng Qie (Fructus Litseae)

華澄茄 荜澄茄

Pinyin Name: *Bi Cheng Qie*
Alternate Chinese Names: *Cheng Qie*
Original Source: *Hai Yao Ben Cao* (Materia Medica of Herbs from [Across the] Seas) by Li Xun in 907-960 A.D.
English Name: litsea
Botanical Name: *Litsea cubeba* (Lour.) Pers. (*Shan Ji Jiao*); *Piper cubeba* L. (*Bi Cheng Qie*)
Pharmaceutical Name: Fructus Litseae
Properties: acrid, warm
Channels Entered: Spleen, Stomach, Kidney, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Warms the Middle *Jiao* and Relieves Pain

Epigastric and abdominal pain and coldness, vomiting, diarrhea: *Bi Cheng Qie* (Fructus Litseae) warms the middle *jiao*, stops pain, promotes digestion and treats cold-related gastrointestinal disorders.

- Hiccups, poor appetite: use *Bi Cheng Qie* with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Shen Qu* (Massa Fermentata).
- Vomiting and nausea: use it with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) and *Bai Dou Kou* (Fructus Amomi Rotundus).
- Hernial pain: combine it with *Wu Zhu Yu* (Fructus Evodiae) and *Xiang Fu* (Rhizoma Cyperi).

2. Dispels Cold in the Urinary Bladder

Dysuria or turbid urine: *Bi Cheng Qie* dispels cold in the Kidney and Urinary Bladder. It is excellent for deficiency and cold of the lower *jiao* that manifest in symptoms of dysuria and turbid urine.

Bi Cheng Qie is used to relieve toothache, when applied topically as powder.

DOSAGE

2 to 5 grams.

CAUTIONS / CONTRAINDICATIONS

- *Bi Cheng Qie* is contraindicated in cases of yin deficiency and heat.

CHEMICAL COMPOSITION

Essential oils 2-6% (citral, limonene, citronellal, camphene, methylheptenone, α-pinene, methylheptylketone), cubebaol.[1]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 617-618

Xiao Hui Xiang (Fructus Foeniculi)

小茴香 小茴香

Pinyin Name: *Xiao Hui Xiang*
Alternate Chinese Names: *Gu Hui Xiang*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: fennel seed, fennel fruit
Botanical Name: *Foeniculum vulgare* Mill. (*Hui Xiang*)
Pharmaceutical Name: Fructus Foeniculi
Properties: acrid, warm
Channels Entered: Liver, Kidney, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Disperses Cold, Warms the Liver and Kidney, Relieves Pain

Abdominal pain, hernial pain: *Xiao Hui Xiang* (Fructus Foeniculi) treats hernial disorders by dispelling cold from the Liver and Kidney channels. Clinical applications include abdominal pain, prolapse sensations in the abdomen, and testicular swelling and pain.

- Hernia: use *Xiao Hui Xiang* with *Li Zhi He* (Semen Litchi), *Chuan Lian Zi* (Fructus Toosendan), and *Wu Yao* (Radix Linderae).
- Cold hernial disorders: use it with *Wu Zhu Yu* (Fructus Evodiae), *Rou Gui* (Cortex Cinnamomi) and *Chen Xiang* (Lignum Aquilariae Resinatum). *Xiao Hui Xiang* can also be heated and applied topically to the scrotum and abdomen.
- Heat-related hernial disorders with heat symptoms and burning pain: use this herb with *Chuan Lian Zi* (Fructus Toosendan), *Zhi Zi* (Fructus Gardeniae) and *Huang Qin* (Radix Scutellariae).
- Swelling and hardness of the scrotum: combine it with *Li Zhi He* (Semen Litchi) and *Chen Pi* (Pericarpium Citri Reticulatae).

2. Warms the Kidney, Relieves Pain

Low back pain caused by Kidney deficiency: The lower back houses the Kidney; when Kidney energy is deficient, patients will feel soreness, weakness and pain. *Xiao Hui Xiang* warms the Kidney and relieves pain.

- Low back pain: use this herb with *Du Zhong* (Cortex Eucommiae), *Hu Lu Ba* (Semen Trigonellae), and *Bu Gu Zhi* (Fructus Psoraleae).

3. Regulates Qi, Improves Appetite

Epigastric, hypochondriac, abdominal and intercostal pain, vomiting and decreased intake of food: *Xiao Hui Xiang* treats qi stagnation in the middle *jiao*, characterized by bloating pain in different parts of the abdomen, lack of appetite, nausea, abdominal fullness after meals, indigestion and vomiting.

- Qi stagnation in the middle *jiao*: use *Xiao Hui Xiang* with *Gan Jiang* (Rhizoma Zingiberis) and *Mu Xiang* (Radix Aucklandiae).
- Indigestion and fullness after meals: combine it with *Shen Qu* (Massa Fermentata), *Sha Ren* (Fructus Amomi) and *Mai Ya* (Fructus Hordei Germinatus).

DOSAGE

3 to 8 grams. Unprocessed *Xiao Hui Xiang* has the strongest function to regulate qi. Salt-fried *Xiao Hui Xiang* has moderate acrid and dispersing effects. Frying with salt also increases its effect to warm the Kidney and Liver, to treat disorders of the lower *jiao*, such as hernial pain.

CAUTIONS / CONTRAINDICATIONS

- Use *Xiao Hui Xiang* with caution in cases of yin deficiency with fire.
- Use *Xiao Hui Xiang* with caution during pregnancy because of its emmenagogic effect.[1]

CHEMICAL COMPOSITION

Essential oil 3-6% (trans-anethole, limonene, fenchone, estragole, γ-terpinene, α-pinene, mycene, β-pinene, camphor, camphene, methoxyphenyl acetone, sabinene, α-phellandrene, p-cymene, cineole, 4-terpineol, transfenchol acetate, anethole, anisaldenyde), petroselinic acid.[2]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Xiao Hui Xiang* has various effects on

Xiao Hui Xiang (Fructus Foeniculi)

the gastrointestinal system. It stimulates smooth muscle to increase peristalsis. It also exerts an inhibitory effect on the secretion of gastric acid.[3]

- **Effect on the liver:** It was found in one study that continuous administration of essential oil of *Xiao Hui Xiang* for 10 days increases the weight of the liver. It has been proposed that the herb may promote the regeneration of liver cells.[4]

CLINICAL STUDIES AND RESEARCH

- **Incarcerated hernia:** In one study, 7 children and 8 adult patients diagnosed with incarcerated hernia were treated with *Xiao Hui Xiang* with marked effectiveness. The treatment protocol was to soak the herb in hot water prior to ingestion. The dosage was 15 grams for adults, and 7.5 grams for children. Relief was achieved within 1 to 2 doses in 13 out of 15 patients. Those who did not report relief 15 minutes after the first dose were given the second dose. Those who did not report relief 30 minutes after the second dose were treated with surgical intervention.[5]
- **Hydrocele of tunica vaginalis:** Patients with hydrocele of tunica vaginalis were treated with an herbal remedy with good results. The herbal treatment was to dry fry 15 grams of *Xiao Hui Xiang*, 4.5 grams of salt, and 2 duck eggs into a pancake and take daily at bedtime with warm rice wine for 4 days per course of treatment, followed by 2 days of rest in between each course. Multiple courses of treatment may be necessary depending on the condition of each patient. Most patients reported a mild sore sensation and a gradual decrease in the size of the scrotum. Of 64 patients, 59 had complete recovery, 1 showed improvement, and 4 had no response.[6]

HERB-DRUG INTERACTION

- **Ciprofloxacin:** It has been suggested that the absorption and disposition of ciprofloxacin in rats may be affected when given concurrently with *Xiao Hui Xiang*. In one study, rats were divided into two groups with one receiving ciprofloxacin only and the other receiving both ciprofloxacin and *Xiao Hui Xiang*. Blood and urine samples were collected after 6 and 24 hours and analyzed by HPLC. Compared with the control group, the study found that there was a decrease of maximum plasma concentration by 83%, of area under the curve by 48%, and of urinary recovery by 43% in the treatment group. Furthermore, the apparent volume of distribution and terminal half-life were both increased. The mechanism of the herb-drug interaction was attributed to the high content of metal cations present in the herb. The researchers concluded that if the two agents are to be used concurrently, an adequate dosing interval is required to ensure efficacy of ciprofloxacin.[7]

SUPPLEMENT

- 莳蘿 / 莳萝 *Shi Luo* (Fructus Anethum Graveolens), first cited in the *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is aromatic, has a similar physical appearance, and is sometimes substituted for *Xiao Hui Xiang*. Despite similar appearance and past history of interchangeable use, they are not identical herbs and should not be confused as such. *Shi Luo* is smaller and rounder, while *Xiao Hui Xiang* is longer, with a stronger fragrance.

Da Hui Xiang (Fructus Anisi Stellati)

大茴香 大茴香

Pinyin Name: *Da Hui Xiang*
Alternate Chinese Names: *Ba Jiao Hui Xiang, Ba Jiao, Da Ba Jiao*
Original Source: *Ben Cao Pin Hui Jing Yao* (Essentials of Materia Medica) by Liu Wen-Tai in 1505
English Name: star anise
Botanical Name: *Illicium verum* Hook. F. (*Ba Jiao Hui Xiang*)
Pharmaceutical Name: Fructus Anisi Stellati
Properties: acrid, sweet, warm
Channels Entered: Liver, Kidney, Spleen

THERAPEUTIC ACTIONS

1. Disperses Cold, Warms the Liver and Kidney, Relieves Pain

Da Hui Xiang (Fructus Anisi Stellati) treats abdominal pain, hernial pain, prolapse, swelling and pain in the scrotum.

- Hernia: use *Da Hui Xiang* with *Ru Xiang* (Gummi Olibanum), *Li Zhi He* (Semen Litchi), *Chuan Lian Zi* (Fructus Toosendan), *Wu Yao* (Radix Linderae), *Wu Zhu Yu* (Fructus Evodiae) and *Rou Gui* (Cortex Cinnamomi).

2. Warms the Kidney, Relieves Pain

Da Hui Xiang is especially good for prickly pain in the low back from Kidney deficiency. To ensure maximum effectiveness, *Da Hui Xiang* is usually fried with salt to facilitate entry to the Kidney.

- Low back pain: use salt-fried *Da Hui Xiang* with *Du Zhong* (Cortex Eucommiae) and *Mu Xiang* (Radix Aucklandiae) and serve with grain-based liquor.

3. Regulates Qi, Improves Appetite

Da Hui Xiang treats qi stagnation in the middle *jiao* characterized by bloating pain, lack of appetite, vomiting and nausea.

- Gastrointestinal disorders: use it with *Mu Xiang* (Radix Aucklandiae), *Sha Ren* (Fructus Amomi) and *Gan Jiang* (Rhizoma Zingiberis).

DOSAGE

3 to 8 grams.

CAUTIONS / CONTRAINDICATIONS

- Use *Da Hui Xiang* cautiously in the presence of yin deficiency with fire.

CHEMICAL COMPOSITION

Trans-anethole, anisaldehyde, cineole, eslragole, aniseketone, carene, feniculine, α-pinene, p-cymene.[1]

SUPPLEMENT

- 莽草 / 莽草 *Mang Cao* (Fructus Illicium Lanceolatum), having a similar appearance to *Da Hui Xiang*, is sometimes incorrectly used as a substitute. *Mang Cao* is toxic, and its use has been linked with adverse reactions such as dizziness, nausea, vomiting, twitching and convulsions. These two herbs can be identified by careful examination. *Mang Cao* has ten to thirteen parts with sharp curving tips, is thin, lusterless, bland in taste, and numbs the tongue after being in the mouth for a period of time. *Da Hui Xiang* has only eight parts with dull tips, is thick, lustrous and sweet. When placed side-by-side, *Mang Cao* appears to be smaller than *Da Hui Xiang*.

AUTHORS' COMMENTS

Da Hui Xiang (Fructus Anisi Stellati) has similar functions to those of *Xiao Hui Xiang* (Fructus Foeniculi). In fact, these two herbs are commonly used together for treatment of hernial disorders.

Da Hui Xiang is often used as a cooking spice. The essential oil of this herb is also used in toothpaste, soaps and cosmetics.

Chapter 7 summary

— Interior-Warming Herbs

Herb	Similarities	Differences
Fu Zi (Radix Aconiti Lateralis Praeparata)	Disperse cold, relieve pain	Warms body yang, restores *ming men* (life gate) fire, treats yang collapse
Chuan Wu (Radix Aconiti Preparata)		Strongly relieves pain
Cao Wu (Radix Aconiti Kusnezoffii)		Strongly relieves pain
Rou Gui (Cortex Cinnamomi)		Warms Kidney yang, disperses cold in the *xue* (blood) level
Gan Jiang (Rhizoma Zingiberis)		Warms Spleen and Lung yang, stops bleeding.
Wu Zhu Yu (Fructus Evodiae)	Disperse cold and relieve pain, warm the middle *jiao*	Relieves acid regurgitation, *jueyin* headache
Xi Xin (Herba Asari)		Dispels wind-cold, dissolves phlegm and opens orifices
Hua Jiao (Pericarpium Zanthoxyli)		Stops vomiting and hiccups, relieves toothache
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)		Stops diarrhea
Ding Xiang (Flos Caryophylli)		Relieves hiccups
Hu Jiao (Fructus Piper)		Stops diarrhea, kills parasites
Bi Ba (Fructus Piperis Longi)		Stops diarrhea
Bi Cheng Qie (Fructus Litseae)		Dispels cold from the Urinary Bladder
Xiao Hui Xiang (Fructus Foeniculi)		Treats hernia
Da Hui Xiang (Fructus Anisi Stellati)		Treats hernia

General Characteristics of Interior-Warming Herbs:

Taste: acrid
Thermal property: warm to hot
Channels entered: Heart, Spleen, Stomach, Kidney
Therapeutic actions: warm the interior and the organs

Interior-warming herbs warm the interior and relieve pain, warm the Spleen and Stomach to relieve gastrointestinal disorders, warm the middle *jiao* to relieve abdominal discomfort, warm the Liver and the Kidney to relieve hernia and back pain, reverse qi rebellion and assist in restoring the yang. Clinical presentations of cold in the interior include aversion to cold, cold extremities, pale face, clear urine, pale tongue with white coat, and deep, thready pulse.

Fu Zi (Radix Aconiti Lateralis Praeparata), ***Chuan Wu*** (Radix Aconiti Preparata), ***Cao Wu*** (Radix Aconiti Kusnezoffii), ***Rou Gui*** (Cortex Cinnamomi), and ***Gan Jiang*** (Rhizoma Zingiberis) all have strong interior-warming, pain-relieving and cold-dispersing functions. Except for *Chuan Wu* and *Cao Wu*, all of them assist in restoring yang in the body.

Fu Zi (Radix Aconiti Lateralis Praeparata), ***Chuan Wu*** (Radix Aconiti Preparata) and ***Cao Wu*** (Radix Aconiti Kusnezoffii) are three aconite herbs with potent interior-warming properties.

Fu Zi restores yang in severe cases such as collapse of yang with icy extremities, fading pulse, profuse sweating and pale or cyanotic complexion. It treats coldness caused by yang deficiency or invasion of excess cold. It is especially effective for Kidney, Spleen and Heart yang deficiencies. It also dispels cold and dampness from the limbs to treat *bi zheng* (painful obstruction syndrome).

Chapter 7 summary

Chuan Wu and *Cao Wu* are stronger than *Fu Zi* in dispelling wind and cold and relieving pain. They are most suitable for *bi zheng* (painful obstruction syndrome), headache and abdominal pain. They can also be used topically to treat yin sores.

All three herbs are toxic, with *Cao Wu* being the most toxic, followed by *Chuan Wu* and *Fu Zi*. All should be pre-decocted for at least an hour to reduce toxicity. They should never be prescribed or administered in unprocessed form.

Rou Gui (Cortex Cinnamomi) is important in warming the *ming men* (life gate) fire. It is often used with *Fu Zi* (Radix Aconiti Lateralis Praeparata) to supplement Kidney yang and fading *ming men* fire. Clinical applications of this herb include abdominal coldness and pain, amenorrhea, dysmenorrhea or postpartum abdominal pain. *Rou Gui* is often added to tonic formulas to enhance production of qi and blood. Used topically, *Rou Gui* treats yin sores. While *Fu Zi* needs prolonged decoction to remove toxicity, prolonged decoction for *Rou Gui* is not advised, as this will reduce the effectiveness of the herb as volatile oils evaporate.

Gan Jiang (Rhizoma Zingiberis), the main herb for dispelling cold in the middle *jiao*, treats vomiting, nausea, diarrhea, abdominal coldness and pain caused by cold and deficiency in the Spleen and Stomach. *Gan Jiang* is often used with *Fu Zi* (Radix Aconiti Lateralis Praeparata) for synergistic effect. Furthermore, *Gan Jiang* helps to decrease the toxicity of *Fu Zi*, making the combination an ideal pair, maximizing the therapeutic effect while minimizing side effects. *Gan Jiang* warms the Lung to treat cough and dyspnea from cold and phlegm accumulation.

In summary, *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi) and *Gan Jiang* (Rhizoma Zingiberis) all assist yang in the body.

Fu Zi warms the whole body.

Rou Gui more strongly warms Kidney yang.

Gan Jiang more effectively warms the Spleen and Stomach.

Wu Zhu Yu (Fructus Evodiae) and ***Xi Xin*** (Herba Asari) disperse cold and relieve pain.

Wu Zhu Yu is hot, dry and enters the Liver channel, and is used mainly for *jueyin* headache, hernial pain, dysmenorrhea and pain from leg *qi* caused by cold invasion of the Liver channel. *Wu Zhu Yu* directs rebellious qi downwards to treat acid regurgitation and vomiting. It treats diarrhea when mixed with vinegar and applied to the soles of the feet. *Wu Zhu Yu* also treats hypertension and oral sores. By comparison to *Xi Xin*, *Wu Zhu Yu* more strongly sends qi downwards.

Xi Xin has strong analgesic properties and dispels wind, treating *bi zheng* (painful obstruction syndrome), wind-cold headache and toothache. *Xi Xin* also warms the Lung to treat dyspnea and wheezing involving phlegm caused by cold in the Lung. By comparison to *Wu Zhu Yu*, *Xi Xin* more effectively disperses stagnation.

Hua Jiao (Pericarpium Zanthoxyli), ***Gao Liang Jiang*** (Rhizoma Alpiniae Officinarum) and ***Ding Xiang*** (Flos Caryophylli) warm the middle *jiao* and relieve pain, treating epigastric and abdominal coldness and pain, vomiting and diarrhea.

Hua Jiao warms the Spleen and Stomach to stop vomiting and hiccups.

Gao Liang Jiang warms the Spleen and Stomach to treat coldness of the abdomen accompanied by vomiting and diarrhea.

Ding Xiang warms the Stomach to treat hiccups, vomiting and nausea, and it warms Kidney yang.

Hu Jiao (Fructus Piper), ***Bi Ba*** (Fructus Piperis Longi) and ***Bi Cheng Qie*** (Fructus Litseae) have similar functions to warm the middle *jiao*, dispel cold and relieve pain in the abdomen, and treat vomiting, diarrhea and toothache.

Chapter 7 summary

Xiao Hui Xiang (Fructus Foeniculi) and ***Da Hui Xiang*** (Fructus Anisi Stellati) disperse coldness in the lower *jiao* via the Liver and Kidney channels. They are essential herbs to treat hernia and scrotal prolapse, warm the low back, dispel cold, and relieve soreness and pain.

Chapter 8

— Qi-Regulating Herbs

Definition: Herbs that regulate qi function to promote normal circulation of qi, correct reversed flow of qi, and eliminate qi stagnation.

The proper, natural circulation of qi is essential to health. Qi brings energy to all parts of the body, and leads the circulation of blood. Without proper flow of qi, appropriate blood circulation is not possible. When normal qi circulation is disrupted, the flow of qi becomes impaired or reversed, and the resultant qi stagnation may cause illness. Without appropriate qi flow, the body's organs are not able to carry out their normal ascending, descending or dispersing functions. In addition, disruption of normal qi flow interferes with delivery of energy and nutrients to various parts of the body.

SUBCATEGORIES OF ACTION

Acrid, bitter and warm, herbs that regulate qi tend to disperse and move. Most herbs enter the Lung, Liver, and Spleen/Stomach to treat related disorders. The major functions of herbs that regulate qi are to promote the normal circulation of qi, correct reversed flow of qi, expand the chest, arrest wheezing, and relieve pain.

1. ***Herbs that regulate Lung qi***: The Lung is responsible for acquiring qi from nature via breathing. The main manifestations of Lung qi stagnation include stifling sensations in the chest, coughing, dyspnea and wheezing.
2. ***Herbs that regulate Liver qi***: The responsibility of the Liver is to promote smooth flow of qi. The chief negative emotion associated with the Liver is anger. The primary clinical manifestations of Liver qi stagnation include emotional disturbances, stress, irritability, anger, hypochondriac distention or pain, hernial pain, breast distention and tenderness (with or without palpable masses), irregular menstruation and loss of appetite.
3. ***Herbs that regulate Spleen and Stomach qi***: The Spleen is responsible for transformation of food into qi, while the Stomach is responsible for receiving and digesting this food. When qi is impaired in these organs, the following symptoms may occur: nausea, vomiting, hiccups, epigastric and abdominal bloating, fullness and pain, acid regurgitation, belching, poor appetite and irregular bowel movements.

Mu Xiang (Radix Aucklandiae)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

Clinical Presentations of Abnormal Flow of Qi:

Organ Affected:	Clinical Presentation
Lung	cough, wheezing, dyspnea, shortness of breath
Liver	hypochondriac distention and pain, feelings of oppression in the chest, hernial pain, breast distention and pain, formation of nodules and cysts, irregular menstruation, and painful menstruation
Spleen and ***Stomach***	fullness and distention of the epigastrium and abdomen, acid reflux, nausea, vomiting, reduced food intake, and irregular bowel movements

Qi-regulating herbs enter the Lung, Liver, and Spleen/Stomach to disperse and move qi.

Chapter 8 — Qi-Regulating Herbs

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Disorders of qi may be assessed based on the location of the imbalance and the characteristics of the qi. Qi disorders are found in the organs most susceptible to qi stagnation and qi reversal, namely the Lung, Liver and Spleen/Stomach. Assessment of its characteristics determines whether the disorder is stagnation of qi or reversed flow of qi. The location of the imbalance is revealed by differing clinical presentations. It is also important to be aware of other complications that may occur as a result of qi stagnation.

The main characteristics of qi disorders include qi stagnation and reversed flow of qi.

- ***Qi stagnation*** may be caused by constrained emotions, disharmony of cold and heat, accumulated dampness and phlegm, blood stagnation and improper dietary intake. Most qi-stagnation sufferers manifest symptoms of bloating, pain, distention and stifling sensations. The hallmark symptoms of qi stagnation are fullness, distention and pain. Qi stagnation interrupts the smooth flow of qi and can cause it to move in the opposite direction from its appropriate flow.
- ***Reversed flow of qi*** is characterized by nausea, vomiting, hiccups, wheezing, coughing, and dyspnea. Assessment of location determines which organ is affected.

~

Stagnation of qi is characterized by fullness, distention and pain. _Reversed flow of qi_ is characterized by nausea, vomiting, hiccups, wheezing, coughing, and dyspnea.

~

There are many complications that occur as a result of, or in addition to, stagnation of qi or reversed flow of qi.

- *Attack of wind-cold,* in addition to affecting the exterior, may also constrict the Lung, resulting in dyspnea, cough or wheezing, and production of white phlegm. Optimal treatment requires use of herbs to dispel wind-cold and regulate qi.
- *Attack of wind-heat,* in addition to affecting the exterior, may invade the Lung, resulting in dyspnea, cough or wheezing and production of yellow phlegm. Optimal treatment requires use of herbs to dispel wind-heat, clear Lung heat, and regulate qi.
- Patients with chronic asthma often have a *deficiency of Kidney qi*, that leads to the inability of Kidney qi to grasp Lung qi and pull it downward. Classic symptoms of this condition include feeble respiration characterized by comparatively longer exhalations and shorter inhalations. Optimal treatment requires the use of herbs that tonify Kidney qi in addition to herbs to move and/or redirect qi downward.
- *Accumulation of dampness in the middle jiao* is characterized by poor appetite, indigestion, and fullness in the abdomen. Optimal treatment requires concurrent use of aromatic herbs to dry dampness, with herbs that regulate qi.
- Stagnation of qi often occurs simultaneously with *stagnation of blood*, as proper flow of the one cannot occur without the other. Therefore, herbs that regulate qi are commonly used with herbs that regulate blood.
- *Food stagnation and indigestion* lead to qi stagnation. Optimal treatment requires concurrent use of digestive herbs and qi-regulating herbs.
- *Qi deficiency* is generally treated with both qi-tonic and qi-regulating herbs to ensure the maximum tonic effect without accumulation of dampness.
- *Hernia due to stagnation of cold and qi* is treated with herbs that warm the channels, regulate qi, and relieve pain.

CAUTIONS/CONTRAINDICATIONS

- Qi-regulating herbs are drying in nature, and should be used with caution for patients who have qi and/or yin deficiencies, or those who suffer from yin deficiency caused by febrile disorders.

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal**: Herbs that regulate qi have various effects on the gastrointestinal system.

  Inhibiting: Herbs that inhibit the gastrointestinal tract relax the smooth muscles and slow intestinal peristalsis. Clinical applications include treatment of nausea, vomiting, diarrhea, borborygmus, intestinal spasms and cramps, and other conditions characterized by hyperactivity of

Chapter 8 — Qi-Regulating Herbs

the gastrointestinal system. Herbs that inhibit the gastrointestinal system include *Chen Pi* (Pericarpium Citri Reticulatae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Zhi Shi* (Fructus Aurantii Immaturus), *Zhi Ke* (Fructus Aurantii), *Wu Yao* (Radix Linderae), *Mu Xiang* (Radix Aucklandiae), *Xiang Fu* (Rhizoma Cyperi) and *Chen Xiang* (Lignum Aquilariae Resinatum).

Stimulating: Herbs that stimulate the gastrointestinal tract increase intestinal peristalsis and contractile force. Clinical applications include treatment of fullness and distention of the abdomen, and indigestion, constipation and other disorders characterized by lack of activity of the gastrointestinal system. These herbs include *Zhi Shi* (Fructus Aurantii Immaturus), *Zhi Ke* (Fructus Aurantii), and *Chuan Lian Zi* (Fructus Toosendan).

Regulating: Some herbs have both inhibiting and stimulating actions to regulate the gastrointestinal tract, such as *Zhi Shi* (Fructus Aurantii Immaturus) and *Zhi Ke* (Fructus Aurantii).

Generating gastric acid: Some herbs stimulate and increase the production of gastric acid, as do *Zhi Shi* (Fructus Aurantii Immaturus), *Xiang Fu* (Rhizoma Cyperi), *Fo Shou* (Fructus Citri Sarcodactylis), *Mu Xiang* (Radix Aucklandiae), *Wu Yao* (Radix Linderae) and *Chen Xiang* (Lignum Aquilariae Resinatum).

Generating bile acid: Among the herbs that increase the production and release of bile are *Chen Xiang* (Lignum Aquilariae Resinatum), *Chen Pi* (Pericarpium Citri Reticulatae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Xiang Fu* (Rhizoma Cyperi).

- **Respiratory**: Some herbs dilate the bronchi to relieve wheezing and dyspnea, including *Chen Pi* (Pericarpium Citri Reticulatae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Fo Shou* (Fructus Citri Sarcodactylis), *Mu Xiang* (Radix Aucklandiae), *Wu Yao* (Radix Linderae) and *Chen Xiang* (Lignum Aquilariae Resinatum). Others, like *Xiang Fu* (Rhizoma Cyperi), stimulate the lungs to increase the rate of respiration.
- **Cardiovascular**: Herbs that regulate qi have various effects on the cardiovascular system.

  Some increase contractility of the heart and lower blood cholesterol levels, as do *Chen Pi* (Pericarpium Citri Reticulatae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Mu Xiang* (Radix Aucklandiae).

  Among those that restore normal rhythms of the heart to treat arrhythmia are *Tan Xiang* (Lignum Santali Albi) and *Gan Song* (Radix seu Rhizoma Nardostachys).

  Some increase blood perfusion to the coronary arteries, including *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Zhi Shi* (Fructus Aurantii Immaturus).

  Some dilate the peripheral blood vessels to decrease blood pressure, such as *Fo Shou* (Fructus Citri Sarcodactylis) and *Mu Xiang* (Radix Aucklandiae).
- **Central nervous system**: Some herbs exert sedative and analgesic effects, such as *Xiang Fu* (Rhizoma Cyperi) and *Gan Song* (Radix seu Rhizoma Nardostachys).
- **Effect on the uterus**: Herbs that regulate qi may stimulate or inhibit the smooth muscle of the uterus. *Zhi Shi* (Fructus Aurantii Immaturus) stimulates the uterus to increase contractions. *Xiang Fu* (Rhizoma Cyperi) inhibits it to relieve spasms and pain.
- **Antibiotic**: Many of these herbs inhibit the growth of bacteria, viruses and dermatophytes, including *Mu Xiang* (Radix Aucklandiae), *Chen Xiang* (Lignum Aquilariae Resinatum), *Wu Yao* (Radix Linderae), *Chuan Lian Zi* (Fructus Toosendan), and *Xiang Fu* (Rhizoma Cyperi).
- **Metabolic**: Some herbs, such as *Li Zhi He* (Semen Litchi), lower blood glucose levels.

POTENTIAL HERB-DRUG INTERACTIONS

- **Antiulcer drugs**: Some qi-regulating herbs that stimulate the gastrointestinal system, increasing the production of gastric acid, may counter the effects of certain drugs such as histamine-2 receptor antagonists (such as ranitidine or famotidine) or proton-pump inhibitors (such as omeprazole or lansoprazole).
- **Sympathomimetics**: Some herbs that move qi may exert stimulant influence. For example, *Chen Pi* (Pericarpium Citri Reticulatae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Zhi Shi* (Fructus Aurantii Immaturus) and *Zhi Ke* (Fructus Aurantii) all contain components that stimulate the sympathetic nervous system. Therefore, such herbs should be used with caution in

Chapter 8 — Qi-Regulating Herbs

patients who take medications for pre-existing conditions such as hypertension, diabetes mellitus, hyperthyroidism, and seizures.[1,2]

- **Cardiovascular agents:** Some qi-regulating herbs stimulate the cardiovascular system and increase blood pressure, while others dilate the blood vessels to decrease blood pressure. Therefore, these herbs should be used with caution in patients taking cardiovascular medications.

Chen Pi (Pericarpium Citri Reticulatae)

陳皮 陈皮

Pinyin Name: *Chen Pi*
Literal Name: "aged peel"
Alternate Chinese Names: *Ju Pi, Guang Chen Pi, Xin Hui Pi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: citrus peel, orange peel, tangerine peel
Botanical Name: *Citrus reticulata* Blanco. (*Ju*)
Pharmaceutical Name: Pericarpium Citri Reticulatae
Properties: acrid, bitter, warm
Channels Entered: Lung, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi, Adjusts the Middle *Jiao*

Qi stagnation of the Spleen and Stomach: Qi stagnation creates an upwards reversal of qi, leading to nausea and vomiting. *Chen Pi* (Pericarpium Citri Reticulatae) has moving and descending properties to treat disharmony of the middle *jiao* that manifests in abdominal fullness and distention, belching, nausea, and vomiting. One aspect of disharmony of the middle *jiao* is characterized by the Liver over-acting on the Spleen, resulting in abdominal pain and diarrhea.

- Qi stagnation of the Spleen and Stomach: use *Chen Pi* with *Zhi Shi* (Fructus Aurantii Immaturus) and *Mu Xiang* (Radix Aucklandiae).
- Nausea and vomiting due to rising Stomach qi: use it with *Sheng Jiang* (Rhizoma Zingiberis Recens), *Zhu Ru* (Caulis Bambusae in Taenia), and *Ban Xia* (Rhizoma Pinelliae).
- Abdominal pain with diarrhea caused by the Liver over-acting on the Spleen: combine it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Bai Shao* (Radix Paeoniae Alba) and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea).
- Nausea, vomiting, and epigastric fullness and distention arising from Stomach heat: use this herb with *Huang Lian* (Rhizoma Coptidis) and *Chuan Lian Zi* (Fructus Toosendan).
- Nausea, vomiting, and epigastric fullness and distention caused by Stomach cold: use it with *Wu Yao* (Radix Linderae) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- Thick, white tongue coating with no desire to drink: combine *Chen Pi* with *Cang Zhu* (Rhizoma Atractylodis) and *Fu Ling* (Poria).

2. Regulates Spleen and Stomach Qi

Indigestion from Spleen and Stomach deficiencies: *Chen Pi* regulates qi circulation of the Spleen and Stomach and treats indigestion with bloating, and distention or poor appetite.

- Indigestion: use *Chen Pi* with *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shen Qu* (Massa Fermentata), *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus) and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata).
- Diarrhea due to Spleen and Stomach deficiencies: use it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Bai Shao* (Radix Paeoniae Alba) to relieve pain and stop diarrhea.

3. Dries Dampness, Dissolves Phlegm

Damp accumulation in the middle *jiao*: *Chen Pi* warms yang in the middle *jiao* to eliminate the accumulation of dampness and phlegm, a condition characterized by feelings of oppression in the chest, abdominal fullness, loss of appetite, fatigue, loose stools, and a thick, greasy tongue coat. *Chen Pi* is also added to various tonic formulas to aid in their digestion and prevent stagnation.

- Accumulation of dampness in the middle *jiao*: use *Chen Pi* with *Cang Zhu* (Rhizoma Atractylodis) and *Hou Po* (Cortex Magnoliae Officinalis). **Exemplar Formula:** *Ping Wei San* (Calm the Stomach Powder).
- Accumulation of phlegm in the middle *jiao*: combined this herb with *Ban Xia* (Rhizoma Pinelliae).

4. Relieves Cough

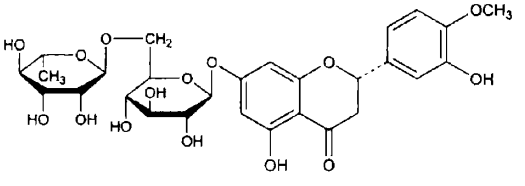
Cough with phlegm: Damp obstruction of the middle *jiao* arising from inadequate functioning of the Spleen leads to accumulation of phlegm in the Lung. The qi and

Chen Pi (Pericarpium Citri Reticulatae)

phlegm stagnation in the Lung leads to failure of Lung qi to descend, causing cough, dyspnea or wheezing, stifling sensations in the chest, and profuse sputum. *Chen Pi* dries dampness, dissolves phlegm, and indirectly relieves cough.

- Cough caused by accumulation of dampness and phlegm: use *Chen Pi* with *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria). **Exemplar Formula:** *Er Chen Tang* (Two-Cured Decoction).

DOSAGE



3 to 9 grams. *Chen Pi* is usually used as decoction or in pills.

CAUTIONS / CONTRAINDICATIONS

- Acrid, bitter, warm, and drying, *Chen Pi* should be used with caution in patients with fluid deficiencies, excess heat in the interior, and/or cough caused by qi or yin deficiencies.
- It should be used with extreme caution in hematemesis.
- Long-term use of *Chen Pi* may consume *yuan* (source) *qi.*

CHEMICAL COMPOSITION

Hesperidin, nobiletin, limonene, α-pinene, β-pinene, β-phellandrene, tangeretin.[1,2,3]

Hesperidin

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Injection of *Chen Pi* has been shown to stimulate contraction of smooth muscle and to increase intestinal peristalsis.[4]
- **Antiasthmatic:** Herbal decoction of *Chen Pi* has been shown to dilate the bronchi in rabbits.[5]
- **Anti-inflammatory:** Intraperitoneal administration of *Chen Pi* has shown ability to decrease permeability of the blood vessels and reduce inflammation in mice with inflammation or allergy.[6]
- **Cardiovascular:** Intravenous injection of *Chen Pi* increases the contractility and cardiac output of the heart without significant changes to the heart rate. It also dilates the coronary artery. At larger doses, however, there is a decrease in heart rate and contractility. In other studies, injection of *Chen Pi* demonstrated an increase in blood pressure in rats. However, the duration of effectiveness was rather short, as blood pressure returned to normal after 3 minutes. Repeated injection is associated with repeated increase in blood pressure.[7,8]

CLINICAL STUDIES AND RESEARCH

- **Acute mastitis:** An herbal decoction with 30 grams of *Chen Pi* and 6 grams of *Gan Cao* (Radix Glycyrrhizae) successfully treated 85 out of 88 patients with acute mastitis.[9]
- **Chronic bronchitis:** Patients with chronic bronchitis characterized by severe coughing at night were treated with an herbal decoction with good success. Out of 33 patients, 17 showed marked improvement, 14 experienced moderate improvement, and 2 showed no response. The herbal formula contained *Chen Pi* 6g, *Ban Xia* (Rhizoma Pinelliae) 6g, *Fu Ling* (Poria) 10g, *Dang Gui* (Radicis Angelicae Sinensis) 20g, *Gan Cao* (Radix Glycyrrhizae) 6g, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 3 pieces.[10]
- **Cholelithiasis:** A preparation of *Chen Pi* has demonstrated effectiveness in dissolving gallstones in 134 patients with cholelithiasis.[11]
- **Burns:** Topical application of *Chen Pi* paste several times daily showed marked effectiveness in patients with first- and second-degree burns. The proposed mechanisms of action include analgesic, anti-inflammatory, and astringent functions.[12]

TOXICOLOGY

No significant adverse reaction was reported following administration of a 50% *Chen Pi* herbal decoction at the dosage of 3 ml/kg in dogs. The LD_{50} for mice is approximately 850 mg/kg following intravenous injection of hesperidin, and 780 mg/kg following intravenous injection of tangeretin.[13]

SUPPLEMENT

- 橘紅 / 橘红 *Ju Hong* (Exocarpium Citri Rubrum), also known as *Yun Pi* and *Yun Hong*, was first cited in *Yi Xue Qi Yuan* (Origins of the Medicine) by Zhang Yuan-Su in Yuan Dynasty. *Ju Hong* is derived from the outermost peel of oranges. It is bitter, acrid, warm, and enters the Lung and Stomach. It functions to regulate qi, open the middle *jiao*, and dry dampness. It treats cough with profuse sputum or food stagnation with no heat symptoms. In comparison to *Chen Pi*, *Ju Hong* has a stronger drying and aromatic effect. Recommended dosage of *Ju Hong* is 3 to 10 grams.
- 橘絡 / 橘络 *Ju Luo* (Fibra Citri Rubrum), also known as *Ju Si* and *Ju Jin*, was first cited in *Yi Xue Qi Yuan* (Origins of the Medicine) by Zhang Yuan-Su in Yuan Dynasty. *Ju Luo* is the inside of the orange peel and is white and vein-like in appearance. It is sweet, bitter and neutral. Its primary functions are to open the channels and collaterals, regulate qi and dissolve phlegm. It is most suitable to address phlegm obstruction in the channels and collaterals, or cough with chest and hypochondriac pain. The

Chen Pí (Pericarpium Citri Reticulatae)

recommended dosage of *Ju Luo* is 3 to 5 grams.

- 橘葉 / 橘叶 *Ju Ye* (Folium Citri Rubrum), first cited in *Zhen Nan Ben Cao* (Materia Medica of South Yunnan) by Lan Mao in Qing Dynasty, is orange tree leaves. It is acrid, bitter and neutral. It regulates Liver qi, reduces swelling, and disperses stagnation. Clinical applications include hypochondriac pain, breast abscesses and palpable masses and/or tumors. The recommended dosage of *Ju Ye* is 6 to 10 grams.
- 橘核 *Ju He* (Semen Citri Rubrum), also known as *Ju Zi He, Ju Zi Ren* and *Ju Ren*, was first cited in *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D. *Ju He* is orange seed. It is bitter and neutral. It disperses nodules, activates qi circulation, and relieves pain. It is often used to treat Liver qi stagnation with phlegm obstruction, such as hernia, pain and swelling of the testes, mastitis, and nodules of the breast. *Ju He* may be used internally as decoction or powder, or topically as cream or ointment. Frying it with salt directs its functions to the Kidney, and enhances its effect to treat hernia, and testicular swelling and pain. The dosage of *Ju He* is 3 to 10 grams.
- 化橘紅 / 化橘红 *Hua Ju Hong* (Exocarpium Citri Grandis), also known as *Hua Zhou Ju Hong, Hua Pi*, and *You Pi Ju Hong*, was first cited in *Ben Cao Gang Mu Shi Yi* (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765. *Hua Ju Hong*, derived from *Citri grandis* 'Tomentosa' or *Citri grandis* (L.) Osbeck, is the dried outermost rind of pummelo. It is bitter, warm, acrid, and enters the Lung, Spleen and Stomach. It regulates qi, opens the middle *jiao*, dries dampness, dissolves phlegm, and relieves food stagnation. It is used for cough with profuse sputum with no heat signs. The recommended dosage of *Hua Ju Hong* is 3 to 10 grams. *Hua Ju Hong* should be used with caution in patients with qi and yin deficiencies. *Hua Ju Hong* is also known as *Hua Ju Pi*.

AUTHORS' COMMENTS

Chen Pi, literally "aged peel," implies that the longer it is stored and aged, the stronger its functions. *Chen Pi* is also known as *Ju Pi*, literally "orange peel." *Guang Chen Pi*, the herb grown in Guangzhou province, is often considered to be the best type of *Chen Pi*.

Chen Pi primarily treats Lung and Spleen imbalances by regulating qi and drying dampness. However, it can be used to enhance the function of other herbs. According to *Ben Cao Gang Mu* (Materia Medica), *Chen Pi* "tonifies when combined with tonics, purges when combined with purgatives, moves upwards when added to herbs with ascending effects, and downwards if added to herbs with descending effects."

Qing Pi (Pericarpium Citri Reticulatae Viride)

青皮

Pinyin Name: *Qing Pi*
Literal Name: "blue-green peel," "green peel"
Alternate Chinese Names: *Qing Ju Pi, Xiao Qing Pi*
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: citrus viride, immature orange peel, green tangerine peel
Botanical Name: *Citrus reticulata* Blanco. (*Ju*)
Pharmaceutical Name: Pericarpium Citri Reticulatae Viride
Properties: bitter, acrid, warm
Channels Entered: Liver, Gallbladder, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Spreads Liver Qi, Breaks Up Qi Stagnation

Liver qi stagnation: Clinical symptoms include hypochondriac distention and pain, breast distention and pain, breast nodules, and hernia. There may also be emotional distress, frequent sighing, irritability, irregular menstruation and pre-menstrual syndrome, abdominal bloating or pain, poor appetite, and reversal of Stomach qi causing hiccups, belching, nausea or vomiting. Patients with Liver qi stagnation often become agitated easily. *Qing Pi* (Pericarpium Citri Reticulatae Viride) enters the Liver and Gallbladder channels to spread Liver qi and break up qi stagnation. *Qing Pi* is relatively strong, suitable for patients with strong constitutions or acute conditions.

- Hypochondriac pain: use *Qing Pi* with *Chai Hu* (Radix Bupleuri) and *Yu Jin* (Radix Curcumae).
- Breast distention and pain, or breast nodules: use it with *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi) and *Wang Bu Liu Xing* (Semen Vaccariae).
- Cold-type hernia and abdominal pain: combine it with *Wu Yao* (Radix Linderae), *Xiao Hui Xiang* (Fructus Foeniculi), and *Mu Xiang* (Radix Aucklandiae).
- Intestinal prolapse, feeling of genital prolapse or testicular swelling due to chronic orchitis: use this herb with *Wu Yao* (Radix Linderae), *Chuan Lian Zi* (Fructus Toosendan), *Xiao Hui Xiang* (Fructus Foeniculi), *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae).

2. Disperses Nodules, Resolves Stagnation

Food stagnation: This manifests as indigestion, epigastric or abdominal fullness, distention and pain, belching marked by a sour or rotten smell, acid regurgitation, constipation or diarrhea with foul or rotten smell. *Qing Pi* effectively eliminates food stagnation.

- Food stagnation and indigestion: combine *Qing Pi* with *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus) and *Shen Qu* (Massa Fermentata).

Mass formation due to qi or blood stasis: *Qing Pi* is often used with qi- and blood-invigorating herbs to enhance the overall function of breaking stagnation that manifestes as masses, nodules or tumors.

- Nodules caused by qi or blood stasis: use this herb with *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Yu Jin* (Radix Curcumae).

DOSAGE

3 to 10 grams in decoction. *Qing Pi* may also be used in pills or powder. The unprocessed herb has a strong, drastic action to move qi and break up qi stagnation. Vinegar-processing moderates the strong effect and minimizes possible side effects.

CAUTIONS / CONTRAINDICATIONS

- Use *Qing Pi* with caution for patients with qi deficiency, as the strong dispersing quality may consume qi.
- Long-term use or large doses of *Qing Pi* are not recommended.

CHEMICAL COMPOSITION

Hesperidin, nobiletin, limonene, α-pinene, β-pinene, β-phellandrene.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Injection of *Qing Pi* relieves spasms and cramps by inhibiting the contraction of smooth muscles of the stomach, intestines, and gallbladder.[2]
- **Respiratory:** *Qing Pi* has demonstrated marked antitussive,

Qing Pi (Pericarpium Citri Reticulatae Viride)

expectorant, and antiasthmatic properties in animals. Intravenous injection of *Qing Pi* dilates the bronchi and prevents bronchial constriction for up to one hour.[3]

- **Sympathomimetic:** *Qing Pi* stimulates both the central nervous system and the cardiovascular system. In one study, *Qing Pi* administered via intravenous injection increased both blood pressure and respiration rate, while oral administration showed little effect. Furthermore, repeated injection within a short period of time may contribute to tolerance. Clinically, *Qing Pi* injection (equivalent bulk herb dose of 1 g/kg) has an effect similar to but more prolonged than that of 10 mcg/kg of epinephrine.[4]

CLINICAL STUDIES AND RESEARCH

- **Shock:** Patients in shock due to infection, allergy or cardiovascular conditions were treated with intravenous infusion of *Qing Pi* in D5W. Out of 22 patients, 17 showed marked improvement and 5 showed moderate improvement. All patients responded with significant increases in blood pressure, without adverse reactions.[5]
- **Supraventricular tachycardia:** Patients with supraventricular tachycardia were treated with intravenous infusion of 4 ml of *Qing Pi* injectable (equivalent to 4 grams of bulk herb) in 40 ml of D5W. Out of 49 patients, 42 regained normal sinus rhythm within a short period of time. No adverse reactions were reported.[6]

AUTHORS' COMMENTS

Qing Pi (Pericarpium Citri Reticulatae Viride) and *Chen Pi* (Pericarpium Citri Reticulatae) both are warm, regulate qi and resolve stagnation of food, qi and phlegm. Both can be used for epigastric and abdominal fullness, distention, pain, vomiting, diarrhea or poor appetite. The two herbs are commonly used together to address symptoms of disharmony of the Liver, Spleen and Stomach. However, there are other important similarities and differences. The qi-regulating function of *Qing Pi* is strong and descending in nature to treat stagnation of the Liver and Gallbladder channels. Clinical manifestations of this stagnation include hypochondriac, breast and hernial distention and pain. *Qing Pi* can be used to break up palpable masses and nodules. *Chen Pi* is weaker in strength than *Qing Pi*, but regulates qi as well as causing it to descend. It is mainly used for Spleen and Lung qi stagnation. It regulates qi, harmonizes the middle *jiao*, dries dampness and resolves phlegm. It is used for cough with profuse sputum, chest congestion or poor appetite, and diarrhea due to Spleen qi deficiency with qi stagnation.

Zhi Shi (Fructus Aurantii Immaturus)

枳實　枳实

Pinyin Name: *Zhi Shi*
Alternate Chinese Names: *Jiang Zhi Shi, Chao Zhi Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: aurantium immaturus, immature bitter orange, immature sweet orange
Botanical Name: *Citrus aurantium* L. (*Suan Cheng*); *Citrus wilsonii* Tanaka. (*Xiang Yuan*); *Poncirus trifoliata* (L.) Raf. (*Gou Ju*)
Pharmaceutical Name: Fructus Aurantii Immaturus
Properties: bitter, acrid, cool
Channels Entered: Large Intestine, Spleen, Stomach

Zhi Shi (Fructus Aurantii Immaturus)

CHINESE THERAPEUTIC ACTIONS

1. Breaks Up Stagnant Qi, Resolves Accumulation

Gastrointestinal disorders: Gastrointestinal disorders caused by stagnant qi in the middle *jiao* is characterized by indigestion, epigastric and abdominal fullness, distention, belching, and foul breath. *Zhi Shi* (Fructus Aurantii Immaturus) is one of the most potent qi-regulating herbs. It breaks up stagnant qi to treat food accumulation, abdominal hardness, distention and pain, constipation, dysentery and rectal tenesmus.

- Food accumulation: use *Zhi Shi* with *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus) and *Shen Qu* (Massa Fermentata).
- Constipation with abdominal fullness and pain: combine it with *Hou Po* (Cortex Magnoliae Officinalis) and *Da Huang* (Radix et Rhizoma Rhei). **Exemplar Formula:** *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction).
- Diarrhea, feeling of incomplete evacuation after defecation, and rectal tenesmus caused by damp-heat: use this herb with *Da Huang* (Radix et Rhizoma Rhei), *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).

Spleen and Stomach deficiencies: Qi stagnation may occur in patients who have an underlying deficiency. In cases of Spleen and Stomach deficiencies with compromised transformation and transportation functions, epigastric and abdominal fullness and distention will often develop after meals. If the underlying cause is deficiency and cold of the Spleen, the patient will express fatigue with preference for warm drinks and food.

- Epigastric and abdominal fullness and distention secondary to Spleen and Stomach deficiencies: use *Zhi Shi* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Su Geng* (Caulis Perillae).

2. Dissolves Phlegm, Relieves Distention

Phlegm obstruction with chest and epigastric distention: *Zhi Shi* activates qi circulation, dissolves phlegm, and relieves distention. It treats *xiong bi* (painful obstruction of the chest), coronary heart disorders or angina caused by Heart yang deficiency and accumulation of cold phlegm. Symptoms include stifling sensations and pain in the chest and epigastric area, poor appetite, shortness of breath, fatigue and weakness.

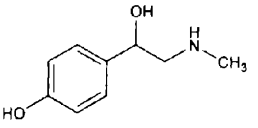
- *Xiong bi* (painful obstruction of the chest) caused by phlegm accumulation and Heart yang deficiency: use *Zhi Shi* with *Xie Bai* (Bulbus Allii Macrostemonis), *Gui Zhi* (Ramulus Cinnamomi) and *Gua Lou Ren* (Semen Trichosanthis). **Exemplar Formula:** *Zhi Shi Xie Bai Gui Zhi Tang* (Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction).
- Epigastric fullness and distention, lack of appetite, and fatigue: combine this herb with *Hou Po* (Cortex Magnoliae Officinalis), *Ban Xia* (Rhizoma Pinelliae), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- For patients recovering from chronic illness, with epigastric fullness and distention: add *Hou Po* (Cortex Magnoliae Officinalis).
- Feelings of heat in the body: use it with *Zhi Zi* (Fructus Gardeniae) and *Dan Dou Chi* (Semen Sojae Praeparatum).
- Abdominal fullness, pain, gas, and irregular bowel movements: combine it with *Mu Xiang* (Radix Aucklandiae), *Bing Lang* (Semen Arecae) and *Shen Qu* (Massa Fermentata).

Cholecystitis: *Zhi Shi* is one of the best herbs to relieve distention and hardness of the epigastric area caused by cholecystitis.

- Cholecystitis: combine *Zhi Shi* with *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).

DOSAGE

3 to 10 grams in decoction. The maximum dosage of *Zhi Shi* is 15 grams. Apply as powder for topical use. Unprocessed *Zhi Shi* has a potent ability to break up stagnant qi and resolve accumulation. However, such impact is often associated with consumption of qi and irritation of the Spleen and Stomach. Dry-frying increases the warmth and moderates the harsh nature of *Zhi Shi*, therefore minimizing potential side effects.



CAUTIONS / CONTRAINDICATIONS

- Use *Zhi Shi* with caution during pregnancy.
- *Zhi Shi* should not be used as a single remedy when treating patients with Spleen and Stomach deficiencies, since its qi-regulating potency may disperse and consume qi. Patients with Spleen and Stomach deficiencies should be treated with both qi-tonics and qi-regulating herbs.
- *Zhi Shi* should be used with caution in patients who have gastric or duodenal peptic ulcers, because the acidity of the herb may irritate the gastrointestinal tract.[1]

CHEMICAL COMPOSITION

Synephrine, N-methyltyramine, hesperidin, neohesperidin, nobiletin, desmethyl nobiletin, quinoline, narcotine, noradrenaline, quinoline, tryptamine, tyramine, naringin, rhoifolin, tengeretin, and lonicerin.[2,3]

Zhi Shi (Fructus Aurantii Immaturus)

Synephrine

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Oral administration of *Zhi Shi* decoction in dogs and rabbits stimulates the heart to increase contractility, blood pressure, and cardiac output. Intravenous injection of *Zhi Shi* solution at dosage of 1.5 g/kg is similar to 0.1 mg/kg of epinephrine in its effect to raise blood pressure. *Zhi Shi*, however, has a prolonged influence on raising blood pressure and does not affect heart rate or respiration.[4]
- **Circulatory:** Intravenous injection of *Zhi Shi* decreases peripheral vascular resistance and enhances microcirculation to the heart, brain and kidneys. Studies in dogs have demonstrated an increase of 82.6 +/- 20.56 ml/100g of blood to the brain, and 64.5 +/- 9.4 ml/100g of blood to the kidneys.[5]
- **Diuretic:** Intravenous injection of *Zhi Shi* has shown marked diuretic effect in dogs.[6]
- **Gastrointestinal:** Oral administration of *Zhi Shi* decoction in dogs stimulates smooth muscle and increases intestinal peristalsis.[7]
- **Effects on the uterus:** Oral administration of *Zhi Shi* decoction has a marked stimulating effect on the uterus of rabbits, but it has an inhibitory effect in rats.[8]

CLINICAL STUDIES AND RESEARCH

- **Shock:** Seventy-five patients experiencing a state of shock were treated with intravenous administration of *Zhi Shi*, with 96% efficacy.[9]
- **Cardiac failure:** Intravenous infusion of *Zhi Shi* injection with D10W demonstrated marked cardiotonic and diuretic effects in 20 patients.[10]
- **Uterine prolapse:** In one study, 924 patients with uterine prolapse were given an herbal decoction of 15 grams of *Zhi Shi* and 15 grams of *Chong Wei Zi* (Semen Leonuri) once daily for 30 days with an 83.87% rate of effectiveness.[11]

HERB-DRUG INTERACTION

- **Diuretics:** *Zhi Shi* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[12] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

Zhi Shi has minimal toxicity. In anesthetized dogs, no significant adverse reactions were observed following intravenous injections at 2 g/kg. The only side effects noted were abdominal distention and salivation. In mice, the LD_{50} is 71.8 g/kg via intravenous injection.[13]

AUTHORS' COMMENTS

Zhi Shi is one of the best herbs to treat gastrointestinal disorders characterized by stagnation and accumulation. Diagnostic keys are as follows:

- If *dampness* is pronounced, there may be abdominal fullness with no desire to eat or drink.
- If *damp-heat* is the cause, there may be nausea, thirst with no desire to drink, a thick, and yellow tongue coating. The individual may also experience feelings of incomplete defecation after bowel movement.
- If *food stagnation* is severe, there may be a foul stench to the stool and acid regurgitation with a rotten, sour, undigested smell.

Zhi Ke (Fructus Aurantii)

枳殼　枳壳

Pinyin Name: *Zhi Ke*
Original Source: *Lei Gong Pao Zhi Lun* (Grandfather Lei's Discussions of Herb Preparation) by Lei Xiao in 470 A.D.
English Name: aurantium fruit, bitter orange
Botanical Name: *Citrus aurantium* L. (*Suan Cheng*); *Citrus wilsonii* Tanaka. (*Xiang Yuan*); *Poncirus trifoliata* (L.) Raf. (*Gou Ju*)
Pharmaceutical Name: Fructus Aurantii
Properties: bitter, acrid, cool
Channels Entered: Spleen, Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Relieves Distention

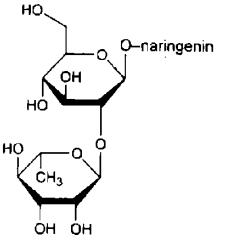
Zhi Ke (Fructus Aurantii) activates qi circulation to relieve abdominal distention and pressure. The qi-regulating function of *Zhi Ke* is mild, and is most helpful for patients who are weak or deficient.

2. Breaks Up Stagnant Qi, Resolves Accumulation

Although *Zhi Ke* is mild in action, it breaks up stagnant qi in mild-to-moderate cases of stagnation and accumulation, and expands the chest to relieve congestion.

- Chest congestion: use *Zhi Ke* with *Jie Geng* (Radix Platycodonis).
- Itching of the skin: combine this herb with *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Hong Hua* (Flos Carthami) and *Chi Shao* (Radix Paeoniae Rubrae).

DOSAGE



3 to 10 grams. Dry-frying *Zhi Ke* reduces its drying tendencies.

CAUTIONS / CONTRAINDICATIONS

- *Zhi Ke* should be used with caution during pregnancy.
- *Zhi Ke* should be used with caution in cases of Spleen and Stomach deficiencies.
- *Zhi Ke* should be used with caution in patients who have gastric or duodenal ulcers, because the acidity of this herb may irritate the gastrointestinal tract.[1]

CHEMICAL COMPOSITION

Synephrine, N-methyltyramine, hesperidin, neohesperidin, nobiletin, desmethyl nobiletin, quinoline, narcotine, noradrenaline, quinoline, narcotine, tryptamine, tyramine, synephrine, N-methyltyramine, naringin, rhoifolin, and lonicerin.[2,3]

Naringin

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Zhi Ke* via intravenous injection showed a marked ability to increase blood pressure, lower the oxygen requirement of cardiac muscle, and promote diuresis.[4]
- **Respiratory:** Synephrine demonstrated a moderate effect to relax and dilate the airways.[5]
- **Antiplatelet:** *Zhi Ke* has antiplatelet action, and inhibits thrombus formation in rats.[6]
- **Antineoplastic:** Nobiletin has demonstrated antineoplastic action in nose and throat cancer with ED_{50} of 3 to 28 μg/ml.[7]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Zhi Ke* has antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin. [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin

Zhi Ke (Fructus Aurantii)

(Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).][8]

AUTHORS' COMMENTS

Zhi Ke (Fructus Aurantii) and *Zhi Shi* (Fructus Aurantii Immaturus) have similar functions, but they are not interchangeable. While *Zhi Ke* relieves distention, it is gentle in resolving stagnation and accumulation or chest congestion. *Zhi Shi* is more potent and breaks up stagnation and masses. In cases of severe accumulation or constipation, *Zhi Shi* is more suitable since it is more potent.

Xiang Yuan (Fructus Citri)

香橼　香橼

Pinyin Name: *Xiang Yuan*
Alternate Chinese Names: *Chen Xiang Yuan, Xiang Yuan Pi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: citrus fruit, citron fruit
Botanical Name: *Citrus medica* L. (*Gou Yuan*); *Citrus wilsonii* Tanaka (*Xiang Yuan*)
Pharmaceutical Name: Fructus Citri
Properties: acrid, slightly bitter, sour, warm
Channels Entered: Liver, Spleen, Lung

CHINESE THERAPEUTIC ACTIONS

Spreads Liver Qi, Regulates Qi, Harmonizes the Middle and Dissolves Phlegm

Qi stagnation of the Liver, Spleen and Stomach: Common manifestations of this type of qi stagnation include chest congestion, hypochondriac pain, belching, decreased food intake and vomiting. *Xiang Yuan* (Fructus Citri) is acrid and has a dispersing influence. The bitter taste of the herb helps to properly redirect the rising Stomach qi that manifests in belching or vomiting. *Xiang Yuan* is relatively mild and should be combined with other qi-regulating herbs for maximum effectiveness.

- Chest congestion, hypochondriac pain: use *Xiang Yuan* with *Gua Lou Pi* (Pericarpium Trichosanthis), *Yu Jin* (Radix Curcumae), and *Xiang Fu* (Rhizoma Cyperi).
- Epigastric pain and abdominal distention: add *Mu Xiang* (Radix Aucklandiae), *Chuan Lian Zi* (Fructus Toosendan) and *Wu Zhu Yu* (Fructus Evodiae).
- A bitter taste in the mouth or acid regurgitation: combine *Xiang Yuan* with *Huang Lian* (Rhizoma Coptidis).

Phlegm and damp accumulation, cough with profuse sputum: *Xiang Yuan* has similar potency to *Chen Pi* (Pericarpium Citri Reticulatae) in relieving cough and dissolving phlegm. Other manifestations of phlegm and damp accumulation may include chest congestion and dyspnea.

- Cough with profuse sputum: use this herb with *Ban Xia* (Rhizoma Pinelliae), *Fu Ling* (Poria), *Gua Lou Shi* (Fructus Trichosanthis), *Su Zi* (Fructus Perillae) and *Lai Fu Zi* (Semen Raphani).

DOSAGE

3 to 10 grams in decoction or in pills.

CAUTIONS / CONTRAINDICATIONS

- Use *Xiang Yuan* with caution during pregnancy, or in patients with yin or blood deficiencies.

Xiang Yuan (Fructus Citri)

CHEMICAL COMPOSITION

Citrusin, essential oils.[1]

AUTHORS' COMMENTS

Both *Xiang Yuan* and *Fo Shou* (Fructus Citri Sarcodactylis) share similar traits in resolving phlegm and relieving chest congestion, hypochondriac pain, epigastric and abdominal fullness and pain, belching, poor appetite, and vomiting. *Xiang Yuan* regulates Lung and Spleen qi and more effectively relieves cough and resolves phlegm. *Fo Shou* enters the Stomach and has a stronger function to treat nausea and vomiting.

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 1434-1435

Fo Shou (Fructus Citri Sarcodactylis)

佛手

Pinyin Name: *Fo Shou*
Literal Name: "Buddha's hand"
Alternate Chinese Names: *Fo Shou Ju*, *Fo Shou Xiang Yuan*, *Fo Shou Pian*
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: citrus sarcodactylus, finger citron
Botanical Name: *Citrus medica* L. var. *sarcodactylis* Swingle (*Fo Shou*)
Pharmaceutical Name: Fructus Citri Sarcodactylis
Properties: acrid, bitter, warm
Channels Entered: Liver, Lung, Stomach, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Spreads Liver Qi and Regulates Qi

Liver qi stagnation: Clinical manifestations of Liver qi stagnation include hypochondriac and abdominal distention and fullness, belching, hiccups and vomiting. *Fo Shou* (Fructus Citri Sarcodactylis), acrid yet not drying in action, is an excellent herb to promote circulation of qi and relieve Liver qi stagnation. Overall, it effectively activates and regulates qi circulation without drying or consuming yin. However, it only has a mild function to relieve pain.

- Liver qi stagnation: use *Fo Shou* with *Xiang Fu* (Rhizoma Cyperi) and *Yu Jin* (Radix Curcumae).
- Epigastric pain from Liver qi stagnation: combine it with *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Chuan Lian Zi* (Fructus Toosendan).

Spleen and Stomach qi stagnation: This condition is characterized by poor appetite, epigastric and abdominal fullness and distention, belching, and vomiting. This pattern of symptoms usually reveals the Wood element (Liver) overacting on the Earth element (Spleen/Stomach).

- Spleen and Stomach qi stagnation: use *Fo Shou* with *Xiang Yuan* (Fructus Citri), *Xiang Fu* (Rhizoma Cyperi), *Mu Xiang* (Radix Aucklandiae) and *Zhi Ke* (Fructus Aurantii).
- Vomiting and nausea: combine it with *Sheng Jiang* (Rhizoma Zingiberis Recens), *Chen Xiang* (Lignum Aquilariae Resinatum) and *Jiang Xiang* (Lignum Dalbergiae Odoriferae).
- Nausea and vomiting in pregnant women: use it with *Zhu Ru* (Caulis Bambusae in Taenia), *Zi Su Ye* (Folium Perillae) and *Huang Qin* (Radix Scutellariae).

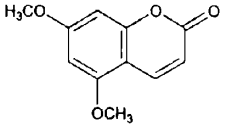
Fo Shou (Fructus Citri Sarcodactylis)

2. Harmonizes the Middle *Jiao*, Dissolves Phlegm and Relieves Cough

Cough with profuse sputum: *Fo Shou* serves to mildly dissolve phlegm. It is commonly used to treat chronic and persistent cough with profuse sputum and chest pain. It is not, however, suitable for the initial stage of cough characteristic of an exterior condition.

- Persistent cough with profuse sputum and chest pain: use *Fo Shou* with *Si Gua Luo* (Retinervus Luffae Fructus), *Yu Jin* (Radix Curcumae) and *Pi Pa Ye* (Folium Eriobotryae).

DOSAGE



3 to 10 grams in decoction. *Fo Shou* is commonly used as an herbal decoction or tea.

CAUTIONS / CONTRAINDICATIONS

Use *Fo Shou* with caution for patients who have yin-deficient fire, or do not have qi stagnation.

CHEMICAL COMPOSITION

Bergapten, limettin, diosmin, hesperidin.[1,2]

Limettin

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Fo Shou* increases blood perfusion to the coronary arteries, reduces the risk of cardiac ischemia, prevents arrhythmia, and lowers blood pressure.[3]
- **Antiasthmatic:** Administration of *Fo Shou* via intravenous injection inhibits constriction of bronchi and facilitates breathing.[4]
- **Gastrointestinal:** Administration of *Fo Shou* in rats, cats and rabbits via intravenous injection has demonstrated a marked inhibitory effect on the smooth muscles of the gastrointestinal system. It inhibits contractions, relaxes muscle, and prevents spasms and cramps.[5]
- **CNS suppressant:** Administration of *Fo Shou* in mice via intraperitoneal injection has demonstrated a sedative influence on the central nervous system (CNS) for up to two hours. Furthermore, it exerts a protective effect against metrazol- or caffeine-induced seizures.[6]

CLINICAL STUDIES AND RESEARCH

- **Infectious hepatitis in children:** According to one study, 64 children of various ages were given *Fo Shou* and *Bai Jiang Cao* (Herba cum Radice Patriniae) for treatment of infectious hepatitis and jaundice. All children received the herbs on a daily basis for 7 to 10 days per course of treatment. The daily dosage of *Fo Shou* was 10 to 15 grams for children between 1 and 3 years of age, 15 to 20 grams for those between 3 and 5 years, 20 to 25 grams for those between 5 and 7 years, and 30 grams for those between 7 and 10 years. The daily dosage of *Bai Jiang Cao* was 1 gram per day for children under 10 years of age, with 1 additional gram for every 2 years over 10 years of age. Most children reported an increase in energy and appetite, and resolution of jaundice within 4 to 5 days.[7]

TOXICOLOGY

The LD_{50} for limettin in mice is 10.0 g/kg via oral administration, and 4 g/kg via intraperitoneal injection.[8]

SUPPLEMENT

- 佛手花 *Fo Shou Hua* (Flos Citri Sarcodactylis) is derived from the flower of the same plant as *Fo Shou*. The function of *Fo Shou* is more focused on the middle *jiao* in relieving nausea, vomiting and epigastric pain. *Fo Shou Hua* has a similar but weaker function, and is better at relieving qi stagnation in the chest, that manifests in congestion and pain. The recommended dosage of *Fo Shou Hua* is 3 to 6 grams in decoction.

AUTHORS' COMMENTS

Fo Shou is relatively mild in nature and is most suitable for minor cases of qi stagnation. It is also useful in patients who have concurrent qi stagnation and qi deficiency, and cannot tolerate the use of strong qi-regulating herbs. However, because its effect is rather mild, *Fo Shou* must be combined with other qi-regulating herbs to achieve maximum effectiveness in cases of severe qi stagnation.

While *Fo Shou* has pain-relieving characteristics, it is weaker in potency than *Chuan Lian Zi* (Fructus Toosendan), *Zhi Shi* (Fructus Aurantii Immaturus) or *Qing Pi* (Pericarpium Citri Reticulatae Viride).

Po Bu Zi Ye (Folium Cordia Dichotoma)

破布子葉
破布子叶

Pinyin Name: *Po Bu Zi Ye*
Literal Name: "leaves from broken fabric"
Alternate Chinese Names: *Qing Tong Tsui Mu*
English Name: sebastan plum cordia
Botanical Name: *Cordia dichotoma* Forst. F.
Pharmaceutical Name: Folium Cordia Dichotoma
Properties: bitter, slightly astringent, cool
Channels Entered: Liver, Kidney, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi, Relieves Pain

Bone spurs: *Po Bu Zi Ye* (Folium Cordia Dichotoma) relieves pain by regulating qi and blood circulation in the body. It is best to treat the pain associated with bone spurs.

- Bone spurs: use *Po Bu Zi Ye* with *Huang Jin Gui* (Caulis Vanieriae), *Mo Gu Xiao* (Caulis Hyptis Capitatae) and *Liu Zhi Huang* (Herba Solidaginis).

Epigastric pain: Unlike most qi-regulating herbs that may irritate the stomach, *Po Bu Zi Ye* benefits the stomach and relieves pain.

- Epigastric pain: combine it with *Yan Hu Suo* (Rhizoma Corydalis) and *Mu Xiang* (Radix Aucklandiae).

2. Dispels Phlegm and Relieves Coughing

Cough: Though this herb can relieve cough, it is not commonly used for this function.

- Cough with yellow phlegm: add *Chen Pi* (Pericarpium Citri Reticulatae).

DOSAGE

5 to 20 grams in decoction.

AUTHORS' COMMENTS

According to Dr. Chang Wei-Yen, use of *Po Bu Zi Ye* is most effective to relieve pain associated with bone spurs. While some patients may experience immediate relief, others may require approximately half a year of treatment to achieve relief of the pain. Furthermore, use of *Po Bu Zi Ye* usually has an all-or-none response when treating bone spurs. Approximately 20 to 30% of patients experience long-term resolution of pain, but others may only notice symptomatic reduction of pain and inflammation.

Da Fu Pí (Pericarpium Arecae)

大腹皮

Pinyin Name: *Da Fu Pi*
Literal Name: "big abdomen peel"
Alternate Chinese Names: *Bing Lang Pi, Da Fu Mao, Bing Lang Yi*
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: areca husk, areca peel, betel nut peel
Botanical Name: *Areca catechu* L. (*Bing Lang*)
Pharmaceutical Name: Pericarpium Arecae
Properties: acrid, slightly warm
Channels Entered: Large Intestine, Small Intestine, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Directs Qi Downward, Expands the Middle *Jiao*

Da Fu Pi (Pericarpium Arecae) regulates qi and expands the middle *jiao* to treat sensations of oppression, distention and fullness in the abdomen and epigastrium, and feelings of incomplete evacuation after defecation.

- Accumulation of dampness and qi stagnation: use *Da Fu Pi* with *Hou Po* (Cortex Magnoliae Officinalis) and *Chen Pi* (Pericarpium Citri Reticulatae).

2. Promotes Diuresis, Relieves Edema

Da Fu Pi helps to reduce accumulation of water to treat edema and leg *qi*.

- Edema or leg *qi*: combine this herb with *Fu Ling Pi* (Cortex Poria) and *Sheng Jiang Pi* (Pericarpium Zingiberis Recens).

DOSAGE

3 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- Use *Da Fu Pi* with caution during pregnancy, because of its teratogenic and fetotoxic effects, as shown in mice.[1]

CHEMICAL COMPOSITION

α-catechin, tannoids.[2]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Administration of *Da Fu Pi* via herbal decoction increased intestinal contraction and tension. This effect is reversed by atropine.[3]

HERB-DRUG INTERACTION

- **Antipsychotics:** It has been suggested that an exacerbation of extrapyramidal effects may occur with concurrent use of neuroleptic drugs and betel nuts. Two cases of severe extrapyramidal symptoms were reported, when patients with chronic schizophrenic disorders treated with depot neuroleptics also consumed a heavy dose of betel nuts for a long period of time. [Note: Examples of antipsychotics include chlorpromazine (Thorazine), fluphenazine (Prolixin), thioridazine (Mellaril), and haloperidol (Haldol).][4,5]

TOXICOLOGY

One instance of anaphylactic shock was reported in a 16-year-old patient following the ingestion of a Chinese herbal decoction containing 12 grams of *Da Fu Pi* and other herbs. Ten minutes after ingestion, the patient reported chest congestion and tightness, nausea, palpitations, itching, irritability, pale face and lips, cold sweats, and cold extremities. She had a thready, rapid and weak pulse, a heart rate of 122 beats/minute, and blood pressure of 74/50 mmHg. The patient was treated for anaphylactic shock and recovered shortly thereafter. She had no prior history of allergy to drugs or to other herbs in the decoction.[6] [Note: Anaphylactic shock is the most severe type of allergic reaction. Unfortunately, it is very difficult, if not impossible, to predict when patients will have such serious reactions. Despite this one reported case, use of *Da Fu Pi* does not necessarily have a higher risk of allergy than other herbs.]

AUTHORS' COMMENTS

Da Fu Pi (Pericarpium Arecae) and *Bing Lang* (Semen Arecae) are derived from the same plant, commonly known as betel nuts. They both treat accumulations of water such as edema and leg *qi*. *Da Fu Pi* treats qi stagnation with no visible or palpable masses present. It

Da Fu Pí (Pericarpium Arecae)

reduces swelling and is also a diuretic. *Bing Lang* is stronger and treats masses or cysts that are hard or palpable. It directs qi downwards and can dispel phlegm.

Wan Dian Jin (Radix Ilicis Asprellae)

萬點金 万点金

Pinyin Name: *Wan Dian Jin*
Literal Name: "ten thousand golds"
Alternate Chinese Names: *Ding Ping Gen, Ding Ping Zi Tou, Bai Gan Cao, Gang Mei Gen*
English Name: ilex
Botanical Name: *Ilex asprella* (Hook. et Am.) Champ.
Pharmaceutical Name: Radix Ilicis Asprellae
Properties: bland, cool
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Regulates and Tonifies Lung Qi

Chest congestion from traumatic injuries: *Wan Dian Jin* (Radix Ilicis Asprellae) treats chest obstruction and labored respiration caused by blood and qi stagnation in the chest.

- Chest congestion: use *Wan Dian Jin* with *Zheng Gu Zi Jin Dan* (Purple and Gold Pill for Righteous Bones) or *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).

Feelings of chest congestion from Lung qi deficiency: *Wan Dian Jin* also benefits Lung qi and treats chest congestion arising from Lung qi deficiency. Symptoms may include feeble cough, low voice and fatigue.

- Feeble cough: use this herb with *Ren Shen* (Radix Ginseng), *Huang Qi* (Radix Astragali), *Zi Wan* (Radix Asteris), *Kuan Dong Hua* (Flos Farfarae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Jie Geng* (Radix Platycodonis).
- *Zhong* (central) *qi* deficiency with difficult respiration: combine it with *Ren Shen* (Radix Ginseng), *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), *Chai Hu* (Radix Bupleuri) and *Sheng Ma* (Rhizoma Cimicifugae).

2. Clears Heat and Eliminates Toxins

Wan Dian Jin can be used to clear heat, eliminate toxins, and promote the generation of body fluids. Clinical applications include lung infection and breast abscess.

- Pneumonia: add *Da Qing Ye* (Folium Isatidis), *Yi Zhi Xiang* (Herba Vernoniae Cinereae) and *Mai Men Dong* (Radix Ophiopogonis).
- Lung abscess: use *Wan Dian Jin* with *Lu Gen* (Rhizoma Phragmitis), *Bai Ji* (Rhizoma Bletillae), *Yu Xing Cao* (Herba Houttuyniae), *Dong Gua Zi* (Semen Benincasae), *Yi Yi Ren* (Semen Coicis), *Zi Hua Di Ding* (Herba Violae) and *Jin Yin Hua* (Flos Lonicerae).
- Breast abscess: use this herb with *Chuan Shan Jia* (Squama Manis), *Wang Bu Liu Xing* (Semen Vaccariae), *Ji Xue Cao* (Herba Centella) and *Pu Gong Ying* (Herba Taraxaci).

3. Regulates Qi and Promotes Diuresis

Gout, edema: combine *Wan Dian Jin* with *Shan Pu Tao* (Radix Vitis Amurensis), *Shui Ding Xiang* (Herba Ludwigiae Prostratae) and *Ding Shu Xiu* (Herba Elephantopus Scaber).

DOSAGE

3 to 15 grams in decoction.

Mu Xiang (Radix Aucklandiae)

木香

Pinyin Name: *Mu Xiang*
Literal Name: "fragrant wood," "wood aroma," "wood fragrance"
Alternate Chinese Names: *Guang Mu Xiang, Yun Mu Xiang, Wei Mu Xiang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: saussurea, aucklandia, costus root
Botanical Name: *Aucklandiae Lappa* Decne. (*Saussurea lappa* Clarke) (*Yun Mu Xiang*); *Vladimiria souliei* (Franch.) Ling. (*Chuan Mu Xiang*)
Pharmaceutical Name: Radix Aucklandiae
Properties: acrid, bitter, warm
Channels Entered: Gallbladder, Large Intestine, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Unblocks Qi Stagnation, Regulates the Middle *Jiao* and Relieves Pain

Qi stagnation of the Spleen and Stomach: This condition is characterized by poor appetite, indigestion, food stagnation, epigastric and abdominal fullness, bloating, distention and pain, diarrhea and/or rectal tenesmus. The warm, acrid, bitter properties of *Mu Xiang* (Radix Aucklandiae) help to move and clear stagnation, restore appropriate functioning of the middle *jiao*, and relieve pain.

- Epigastric and abdominal fullness and pain: combine *Mu Xiang* with *Zhi Ke* (Fructus Aurantii), *Chuan Lian Zi* (Fructus Toosendan), *Lai Fu Zi* (Semen Raphani) and *Yan Hu Suo* (Rhizoma Corydalis).
- Damp-heat diarrhea: use it with *Huang Lian* (Rhizoma Coptidis) and *Huo Xiang* (Herba Agastache).
- Diarrhea with profuse pus and blood: use *Mu Xiang* with a large dose of *Bai Shao* (Radix Paeoniae Alba).
- Dysentery and rectal tenesmus due to damp-heat: add *Huang Lian* (Rhizoma Coptidis).
- Dysentery with severe heat: use this herb with *Huang Bai* (Cortex Phellodendri), *Bai Tou Weng* (Radix Pulsatillae), and *Ma Chi Xian* (Herba Portulacae).
- Dysentery with severe dampness: add *Yi Yi Ren* (Semen Coicis), *Fu Ling* (Poria), *Cang Zhu* (Rhizoma Atractylodis) and *Che Qian Zi* (Semen Plantaginis).
- Food stagnation, qi stagnation, diarrhea and rectal tenesmus because of damp-heat: combine it with *Bing Lang* (Semen Arecae), *Zhi Ke* (Fructus Aurantii), *Ge Gen* (Radix Puerariae), *Da Huang* (Radix et Rhizoma Rhei) and *Huang Lian* (Rhizoma Coptidis). **Exemplar Formula:** *Mu Xiang Bing Lang Wan* (Aucklandia and Betel Nut Pill).
- Lower abdominal coldness and pain: add *Wu Yao* (Radix Linderae).

2. Dispels Damp-Heat, Harmonizes the Liver and Spleen

Liver qi stagnation: Disharmony between the Liver and Spleen interferes with the normal transformation and transportation functions of the Spleen. When the flow of water becomes stagnant, damp-heat begins to accumulate, leading to distention and pain in the hypochondriac region, a bitter taste in the mouth, a yellow tongue coat, and possibly jaundice.

- Disharmony of Liver and Spleen: use *Mu Xiang* with *Chai Hu* (Radix Bupleuri), *Yu Jin* (Radix Curcumae), and *Zhi Ke* (Fructus Aurantii).
- Damp-heat accumulation: use it with *Da Huang* (Radix et Rhizoma Rhei), *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Jin Qian Cao* (Herba Lysimachiae).

3. Regulates Qi Circulation, Prevents Stagnation

Spleen qi deficiency: The chief manifestations of Spleen qi deficiency include epigastric and abdominal fullness, distention, bloating, pain, poor appetite, vomiting, diarrhea, preference for warmth and pressure applied to the abdomen, and white, greasy, tongue coating. *Mu Xiang* also activates and regulates qi circulation to prevent stagnation and the bloating sensations associated with the use of herbs that tonify qi. Qi-activating herbs are commonly

Mu Xiang (Radix Aucklandiae)

used with qi-tonic herbs to treat symptoms and signs that accompany Spleen and Stomach deficiencies.

- Spleen and Stomach deficiencies: use *Mu Xiang* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Sha Ren* (Fructus Amomi). **Exemplar Formula:** *Xiang Sha Liu Jun Zi Tang* (Six-Gentleman Decoction with Aucklandia and Amomum).

DOSAGE

3 to 10 grams. *Mu Xiang* may be used in herbal decoction, powder or pill forms. The unprocessed herb is better for treating qi stagnation. The roasted herb more effectively treats diarrhea and rectal tenesmus.

CAUTIONS / CONTRAINDICATIONS

- Acrid, warm and drying, *Mu Xiang* should be used with caution for patients experiencing yin deficiency, fluid deficiency, or excess fire.

CHEMICAL COMPOSITION

Saussurine, costus lactone, dihydrocostus lactone, dehydrocostus lactone, costunolide, dihydrocostunolide, 12-methoxydihydro-costunolide, α-costol, α-costic acid, saussurea lactone, α-costene, β-costene.[1]

PHARMACOLOGICAL EFFECTS

- **Respiratory:** Administration of *Mu Xiang* has demonstrated ability to relax spasms of the trachea and bronchi.[2]
- **Effects on smooth muscles:** Components of *Mu Xiang* have various effects on the smooth muscle of the intestines: some stimulate the intestines and increase peristalsis, some relax intestinal spasms, and some have an inhibitory action.[3]
- **Cardiovascular:** Laboratory studies of frogs, dogs and rats have demonstrated that administration of *Mu Xiang* has different effects on the cardiovascular system depending on the dosage. At a small dosage, there is a stimulating effect on the heart, and dilation of blood vessels. At a large dosage, there is an inhibiting effect on the heart, and constriction of blood vessels.[4]
- **Antibiotic:** The essential oil of *Mu Xiang* has an inhibitory effect on streptococcus, staphylococcus, *E. coli*, and *Corynebacterium diphtheriae*.[5]

CLINICAL STUDIES AND RESEARCH

- **Flatulence:** Intramuscular injection of 100% *Mu Xiang* solution twice daily was 93% effective in treating 29 patients with flatulence caused by indigestion, acute gastroenteritis, gastric nervosa, and post-surgical complications.[6]
- **Gallbladder pain:** *Mu Xiang* demonstrated promising effects in 8 patients with pain related to gallbladder disorders.[7]
- **Peptic ulcer disease:** Two formulas with herbs such as *Mu Xiang*, *Wu Yao* (Radix Linderae), *Hong Teng* (Caulis Sargentodoxae), *Gan Jiang* (Rhizoma Zingiberis), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Chen Pi* (Pericarpium Citri Reticulatae) were combined to treat 217 patients with gastric or duodenal ulcers. The treatment protocol was to administer the herbs in decoction twice daily for 20 days. The study reported that 90.3% of patients had complete recovery, with 15.8% recurrence in follow-up visits.[8]

TOXICOLOGY

Oral administration of *Mu Xiang* at a dosage of 1.77 mg/kg in male rats and 2.17 mg/kg in female rats over a 90-day period did not reveal any adverse effects. Examination showed that blood, urine, and the function of internal organs all remained normal throughout the entire study. The LD_{50} for costuslactone in rats via intraperitoneal administration is 300 mg/kg.[9]

AUTHORS' COMMENTS

Mu Xiang is acrid, bitter, dispersing, descending, warming and drying. It can raise qi or cause it to descend, to open all three *jiaos*. The strongest function of this herb is its ability to relieve qi stagnation of the gastrointestinal tract. The chief manifestations of this stagnation are bloating, gas, fullness, distention and pain. Secondary disorders that are also treated with *Mu Xiang* include diarrhea, dysentery with rectal tenesmus, food accumulation and poor appetite. It is one of the strongest, most essential and effective herbs in regulating abdominal qi and relieving pain.

Xiang Fu (Rhizoma Cyperi)

香附

Pinyin Name: *Xiang Fu*
Literal Name: "aromatic appendage"
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: cyperus, nutgrass rhizome
Botanical Name: *Cyperus rotundus* L. (*Sha Cao*)
Pharmaceutical Name: Rhizoma Cyperi
Properties: acrid, slightly bitter, slightly sweet, neutral
Channels Entered: Liver, *San Jiao*

CHINESE THERAPEUTIC ACTIONS

1. Spreads the Liver, Regulates Qi

Liver qi stagnation: Clinically, *Xiang Fu* (Rhizoma Cyperi) is commonly used to treat Liver qi stagnation characterized by hypochondriac pain and epigastric and abdominal fullness and pain. Secondary symptoms include emotional disturbances and poor appetite, chest congestion and frequent sighing. This herb is also excellent in relieving stomach pain caused by stress, as is seen in patients with peptic or duodenal ulcers.

- Hypochondriac pain: use *Xiang Fu* with *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba) and *Zhi Ke* (Fructus Aurantii).
- Liver and Stomach disharmony with poor appetite: use it with *Mu Xiang* (Radix Aucklandiae), *Fo Shou* (Fructus Citri Sarcodactylis), *Sha Ren* (Fructus Amomi) and *Shen Qu* (Massa Fermentata).
- Epigastric and abdominal pain caused by cold: combine it with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- Stress and emotional disturbances: add it to *Bai Shao* (Radix Paeoniae Alba), *Yu Jin* (Radix Curcumae), *Chai Hu* (Radix Bupleuri), *Mu Xiang* (Radix Aucklandiae) and *Hou Po* (Cortex Magnoliae Officinalis).
- Stomach pain caused by stress: use this herb with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Mu Xiang* (Radix Aucklandiae), *Chuan Lian Zi* (Fructus Toosendan), *Yan Hu Suo* (Rhizoma Corydalis) and *Bai Shao* (Radix Paeoniae Alba).
- Abdominal pain that worsens with cold: combine *Xiang Fu* with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- Epigastric pain due to alternating cold and heat: add *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Bai He* (Bulbus Lilii), *Wu Yao* (Radix Linderae), *Dan Shen* (Radix Salviae Miltiorrhizae), *Tan Xiang* (Lignum Santali Albi) and *Sha Ren* (Fructus Amomi).
- Acid regurgitation: use *Xiang Fu* with *Wa Leng Zi* (Concha Arcae), *Hai Piao Xiao* (Endoconcha Sepiae) and *Bei Mu* (Bulbus Fritillaria).

Hernial pain: *Xiang Fu* can also be used to treat cold stagnation along the Liver channel that manifests in abdominal and hernial pain.

- Hernial pain due to cold: use *Xiang Fu* with *Xiao Hui Xiang* (Fructus Foeniculi) and *Wu Yao* (Radix Linderae).

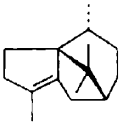
2. Regulates Menstruation, Relieves Pain

Irregular menstruation, dysmenorrhea and breast distention: *Xiang Fu* is commonly used to treat menstrual disorders or pre-menstrual syndrome arising from Liver qi stagnation. This is an herb that regulates qi in the *xue* (blood) level and can also lead blood to the *qi* (energy) level to help generate blood. Because of this unique trait, it is often used in pregnant and postpartum women who are blood-deficient. *Xiang Fu* is considered one of the most important herbs for treatment of obstetric/gynecologic disorders.

- Irregular menstruation with breast distention and abdominal pain: use *Xiang Fu* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Bai Shao* (Radix Paeoniae Alba) and *Chai Hu* (Radix Bupleuri).
- Breast distention or breast nodules: add *Chai Hu* (Radix Bupleuri), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Wang Bu Liu Xing* (Semen Vaccariae) and *Gua Lou Shi* (Fructus Trichosanthis).
- Dysmenorrhea: combine *Xiang Fu* with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), *Pu Huang* (Pollen Typhae) and *Yan Hu Suo* (Rhizoma Corydalis).

Xiang Fu (Rhizoma Cyperi)

DOSAGE



6 to 12 grams. *Xiang Fu* can be used as herbal decoction, powder, or pills. Frying the herb with vinegar enhances its function to reduce accumulations and relieve pain. Frying the herb with grain-based liquor increases its function to open channels and collaterals. Frying the herb with ginger potentiates its action to dissolve phlegm stagnation and unblock Liver qi stagnation.

CAUTIONS / CONTRAINDICATIONS

- Use *Xiang Fu* with caution for patients experiencing qi deficiency in the absence of stagnation, or yin deficiency with heat in the blood.

CHEMICAL COMPOSITION

Cyperene, α-cyperone, β-cyperone, β-selinene, patchoulenone, limonene, limonene, β-pinene, p-cymene, camphene, cyperol, isocyperol, cyperolone, cyperotundone, sugenolacetate, α-rotunol, β-rotunol.[1,2]

Cyperene

PHARMACOLOGICAL EFFECTS

- **Sedative:** Intraperitoneal administration of the essential oils of *Xiang Fu* in mice at a dose of 0.10 ml/kg demonstrated a sedative effect similar to that of pentobarbital sodium solution with $p<0.01$. The sedative effect was also observed when the essential oil was given to rabbits via intravenous administration.[3]
- **Uterine relaxant:** Oral administration of a 5% solution of *Xiang Fu* showed an inhibitory effect on the uterus in rats, rabbits, dogs and cats.[4]
- **Analgesic:** Administration of a 20% *Xiang Fu* injection in mice showed marked analgesic effects.[5]
- **Antipyretic:** The antipyretic effect of *Xiang Fu* is approximately 6 times stronger than sodium salicylate in experiments conducted in rats.[6]
- **Cardiovascular:** Administration of *Xiang Fu* via subcutaneous injection has demonstrated positive inotropic and negative chronotropic effects in frogs, rabbits and cats. Administration of *Xiang Fu* at a dosage of 0.1 ml/kg via intravenous injection lowered blood pressure in cats and dogs for a duration of 5 to 8 minutes.[7]
- **Antibiotic:** *Xiang Fu* has demonstrated an inhibitory effect against *Staphylococcus aureus*, but with little or no effect against other pathogens.[8]

CLINICAL STUDIES AND RESEARCH

- **Gastrointestinal disorders:** Thirty patients with stomach cramps and pain characterized by cold and qi stagnation were treated with an herbal preparation, with an 80% rate of effectiveness. The herbal preparation was made by grounding into powder 120 grams of *Xiang Fu* and 90 grams of *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum). The treatment protocol was to administer 2 grams of powder twice daily.[9]
- **Flat warts:** For 15 patients with flat warts, 4 ml of *Xiang Fu* (equivalent to 12 grams of bulk herb), administered via intramuscular injection for 10 to 15 doses per treatment course, was 85.7% effective.[10] Furthermore, oral administration of *Xiang Fu* (10 grams of powder stir fried with one egg), was 85.7% effective in 14 patients with flat warts when given every 2 to 4 days for a total of 5 to 8 doses.[11]

TOXICOLOGY

Xiang Fu is well-tolerated by animals. No significant adverse reactions were observed in rats when *Xiang Fu* was incorporated to supply up to 25% of their daily diet. The LD_{50} in mice for cyperone via intraperitoneal administration is approximately 1500 mg/kg; and the LD_{50} for the essential oil of *Xiang Fu* via intraperitoneal administration is 0.297 +/- 0.019 ml/kg.[12]

AUTHORS' COMMENTS

Xiang Fu is one of the most commonly used qi-regulating herbs. Some records state that this herb enters all twelve channels, and relieves stagnation of all six factors (qi, blood, phlegm, food, fire, and dampness).

Both *Xiang Fu* and *Chai Hu* (Radix Bupleuri) smooth Liver qi, and enter the Liver to regulate Liver qi and menstruation. Both are excellent for hypochondriac pain, irregular menstruation, breast distention and dysmenorrhea. However, there are some important differences. *Xiang Fu* is neutral and aromatic, and is mainly used to relieve qi stagnation and pain, primarily epigastric or abdominal distention and pain caused by Liver qi stagnation. *Chai Hu* is cool and most effective for Liver qi stagnation, in addition to clearing heat and resolving *shaoyang* disorders. It also raises the yang and treats symptoms of prolapse, when combined with other Spleen tonics.

According to Dr. Ding Guang-Di, *Xiang Fu* and *Xuan Fu Hua* (Flos Inulae) most effectively address right-sided hypochondriac pain, while *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis) are better for left-sided hypochondriac pain.

Wu Yao (Radix Linderae)

烏藥　乌药

Pinyin Name: *Wu Yao*
Literal Name: "black medicine"
Alternate Chinese Names: *Tai Wu Yao*
Original Source: *Ben Cao Gang Mu Shi Yi* (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765
English Name: lindera root
Botanical Name: *Lindera strychnifolia* (Sieb. et Zucc.) Villar (*Wu Yao*)
Pharmaceutical Name: Radix Linderae
Properties: acrid, warm
Channels Entered: Urinary Bladder, Kidney, Lung, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi and Relieves Pain

Qi stagnation and cold accumulation: *Wu Yao* (Radix Linderae) activates qi circulation, disperses cold, and relieves pain in the chest, abdomen, hypochondriac and epigastric areas.

- Hypochondriac pain with feelings of oppression in the chest: use *Wu Yao* with *Xie Bai* (Bulbus Allii Macrostemonis), *Gua Lou Pi* (Pericarpium Trichosanthis), *Yu Jin* (Radix Curcumae), and *Yan Hu Suo* (Rhizoma Corydalis).
- Epigastric and abdominal fullness and pain: combine it with *Mu Xiang* (Radix Aucklandiae), *Wu Zhu Yu* (Fructus Evodiae) and *Zhi Ke* (Fructus Aurantii).
- Lower abdominal pain, hernial pain, and testicular pain caused by cold: use it with *Xiao Hui Xiang* (Fructus Foeniculi), *Mu Xiang* (Radix Aucklandiae), and *Qing Pi* (Pericarpium Citri Reticulatae Viride).
- Menstrual pain: add *Xiang Fu* (Rhizoma Cyperi), *Dang Gui* (Radicis Angelicae Sinensis) and *Mu Xiang* (Radix Aucklandiae).
- Stroke caused by wind-cold attacking the channels and collaterals: combine it with *Chen Pi* (Pericarpium Citri Reticulatae), *Jiang Can* (Bombyx Batryticatus), *Ma Huang* (Herba Ephedrae) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). **Exemplar Formula**: *Wu Yao Shun Qi San* (Lindera Powder to Smooth the Flow of Qi).

2. Warms the Kidney, Disperses Cold

Enuresis caused by Kidney yang deficiency, or by deficiency and cold of the Urinary Bladder: With deficiency of the Kidney and Urinary Bladder, the bladder cannot

Wu Yao (Radix Linderae)

retain urine, resulting in enuresis. There may be accompanying soreness, coldness and weakness of the low back and knees, pale complexion, frequent urination during the night, fatigue, spermatorrhea in men, and profuse, clear, vaginal discharge in women.

- Frequent urination and enuresis: use *Wu Yao* with *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) and *Shan Yao* (Rhizoma Dioscoreae). **Exemplar Formula:** *Suo Quan Wan* (Shut the Sluice Pill).

DOSAGE

3 to 10 grams. *Wu Yao* may be used in herbal decoction or pills.

CAUTIONS / CONTRAINDICATIONS

- The use of this acrid, warm and drying herb may consume qi and blood. Thus, *Wu Yao* is not recommended in cases of qi and blood deficiencies or in patients who have interior heat.

CHEMICAL COMPOSITION

Lindeneol, lindenene, linderoxide, isolinderoxide, isofuranogermacrene, lindestrene, lindestrenolide, linderalactone, isolinderalactone, linderane, neolinderalactone, laurolitsine, linderol, linderic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** It has been reported that *Wu Yao* increases the secretion of gastric acid. Furthermore, it has a dual effect on the intestines; it may cause either contraction or relaxation of smooth muscle. Contraction increases intestinal peristalsis and expulsion of gas, and relaxation relieves spasms and cramps.[2]
- **Metabolic:** Long-term use of *Wu Yao* as food led to an increase in body weight in rats.[3]
- **Hemostatic:** The powder of *Wu Yao* shortens coagulation time in rabbits and may be used to stop bleeding.[4]

SUPPLEMENT

- 烏藤 / 乌藤 *Wu Teng* (Ramulus Linderae) is derived from the branches and leaves of the same plant as *Wu Yao*. It harmonizes the middle *jiao*, benefits qi, and treats frequent urination.

AUTHORS' COMMENTS

Wu Yao, *Mu Xiang* (Radix Aucklandiae) and *Xiang Fu* (Rhizoma Cyperi) all regulate qi and relieve pain.

- *Wu Yao* enters the Kidney to treat hernial pain.
- *Mu Xiang* is best for qi stagnation of the Spleen and Stomach to treat bloating, distention, and abdominal pain. It is one of the strongest herbs to relieve the pain associated with qi stagnation.
- *Xiang Fu* is neutral and dispersing in nature. It is one of the best herbs for treating hypochondriac pain and gynecological disorders such as pre-menstrual syndrome, irregular menstruation, dysmenorrhea, bloating and breast distention.

Xie Bai (Bulbus Allii Macrostemonis)

薤白 薤白

Pinyin Name: *Xie Bai*
Alternate Chinese Names: *Xie Gen*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: bakeri, long-stamen onion bulb
Botanical Name: *Allium macrostemon* Bge. (*Xiao Gen Suan*); *Allium chinense* G. Don. (*Xie*)
Pharmaceutical Name: Bulbus Allii Macrostemonis
Properties: acrid, bitter, warm
Channels Entered: Large Intestine, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Opens Yang Qi, Disperses Stagnation due to Cold Phlegm

Chest pain: *Xiong bi* (painful obstruction of the chest), or angina, often occurs as a result of cold phlegm in the chest obstructing the flow and smooth circulation of yang qi. Clinically, *xiong bi* is characterized by feelings of oppression and pain in the chest, shortness of breath, coughing and wheezing. *Xie Bai* (Bulbus Allii Macrostemonis) is one of the best herbs to treat *xiong bi* as it opens yang qi and disperses stagnation.

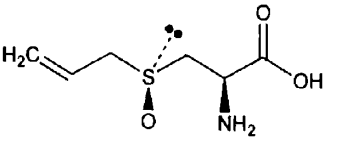
- *Xiong bi* (painful obstruction of the chest) with profuse phlegm: use *Xie Bai* with *Gua Lou Shi* (Fructus Trichosanthis).
- *Xiong bi* (painful obstruction of the chest) with stabbing pain from blood stagnation: combine it with *Dan Shen* (Radix Salviae Miltiorrhizae), *Hong Hua* (Flos Carthami), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Chi Shao* (Radix Paeoniae Rubrae).

2. Moves Qi and Eliminates Stagnation

Diarrhea or dysentery with rectal tenesmus: Rectal tenesmus is usually caused by qi stagnation. Comparatively speaking, if there is more qi stagnation than heat, the prominent signs would be diarrhea with gas, and bloating and pain that are relieved by defecation. If damp-heat is more prominent than qi stagnation, there would be burning sensations of the anus, along with a feeling of incomplete evacuation.

- Diarrhea and dysentery with rectal tenesmus because of Liver and Stomach qi stagnation: use *Xie Bai* with *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba) and *Zhi Shi* (Fructus Aurantii Immaturus).
- Diarrhea and dysentery with rectal tenesmus from damp-heat: add *Huang Bai* (Cortex Phellodendri) and *Qin Pi* (Cortex Fraxini).

DOSAGE



5 to 10 grams in decoction, powder, or pills. *Xie Bai* may be used either internally or topically.

CAUTIONS / CONTRAINDICATIONS

- Use of *Xie Bai* is not recommended in cases where there is qi deficiency but no stagnation, or for patients with poor appetite.
- Those who are hypersensitive to *Xie Bai* should avoid using it.

CHEMICAL COMPOSITION

Alliin, scorodoes, diallyl sulfide, diallyl disulfide, methyl allyl trisulfide (MATS), A_1(PGA_1), B_1(PGB_1).[1]

Alliin

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Xie Bai* has demonstrated inhibitory effects against *Bacillus dysenteriae, Staphylococcus aureus,* and *pneumococci.*[2]
- **Cardiovascular:** PGA_1 lowers blood pressure and induces diuresis while PGB_1 constricts blood vessels.[3]
- **Antiplatelet:** Essential oil of *Xie Bai* markedly inhibits the aggregation of platelets and prolongs clotting time.[4]
- **Antihyperlipidemic:** *Xie Bai* has shown marked effectiveness to lower plasma cholesterol and triglyceride levels.[5]

Xie Bai (Bulbus Allii Macrostemonis)

CLINICAL STUDIES AND RESEARCH

- **Wheezing and dyspnea:** Administration of 20 to 30 grams of *Xie Bai* decoction showed marked effectiveness in 21.4 to 45% of patients experiencing difficulty breathing. The onset of effect is rapid. This herb is most effective when there is loud wheezing.[6]
- **Atherosclerosis:** Extract of *Xie Bai* (equivalent to 12.2 grams of bulk herb) given three times daily for 4 weeks demonstrated marked usefulness to lower plasma cholesterol levels and inhibit platelet aggregation.[7]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Xie Bai* has an antiplatelet effect, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin. [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).][8]

Tan Xiang (Lignum Santali Albi)

檀香 檀香

Pinyin Name: *Tan Xiang*
Alternate Chinese Names: *Bai Tan Xiang, Huang Tan Xiang*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: santalum, sandalwood
Botanical Name: *Santalum album* L. (*Mu Tan Xiang*)
Pharmaceutical Name: Lignum Santali Albi
Properties: acrid, warm, aromatic
Channels Entered: Spleen, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi, Harmonizes the Middle *Jiao*

Abdominal pain due to cold and qi stagnation: Acrid and dispersing, *Tan Xiang* (Lignum Santali Albi) regulates qi in the diaphragm and aromatically wakes up the Spleen to treat epigastric or abdominal coldness and pain, and vomiting of clear fluids. Secondary symptoms may include poor appetite and hiccups.

- Abdominal pain with vomiting of clear fluids: use *Tan Xiang* with *Sha Ren* (Fructus Amomi), *Bai Dou Kou* (Fructus Amomi Rotundus), *Ding Xiang* (Flos Caryophylli) and *Wu Yao* (Radix Linderae).
- Hiccups: combine it with *Ren Shen* (Radix Ginseng) and *Ju Hong* (Exocarpium Citri Rubrum).
- Epigastric distention and bloating: use this herb with *Dan Shen* (Radix Salviae Miltiorrhizae), *Sha Ren* (Fructus Amomi), *Wu Yao* (Radix Linderae) and *Bai He* (Bulbus Lilii).

Tan Xiang (Lignum Santali Albi)

- Poor appetite: combine it with *Chen Pi* (Pericarpium Citri Reticulatae), *Mai Ya* (Fructus Hordei Germinatus), *Sha Shen* (Radix Glehniae seu Adenophorae) and *Mai Men Dong* (Radix Ophiopogonis).

2. Disperses Cold and Relieves Pain

Chest pain from cold and qi stagnation: Cold and qi stagnation constrict the chest and manifest in symptoms of angina, dyspnea and feelings of oppression in the chest. *Tan Xiang* disperses cold, and relieves chest constriction, oppression and pain.

- Chest pain: use *Tan Xiang* with *Yan Hu Suo* (Rhizoma Corydalis), *Bi Ba* (Fructus Piperis Longi), *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) and *Bing Pian* (Borneolum Syntheticum).

DOSAGE

1 to 3 grams in decoction. *Tan Xiang* is also taken in pill form.

CAUTIONS / CONTRAINDICATIONS

- *Tan Xiang* should be used with caution for patients who have yin-deficient heat or are vomiting because of heat.
- Use *Tan Xiang* with caution during pregnancy, due to its abortifacient effect.[1]

CHEMICAL COMPOSITION

α-santalol, β-santalol, santene, α-santalene, β-santalene, santenone, santenone alcohol, santalic acid, teresantalic acid, santal aldehyde.[2]

AUTHORS' COMMENTS

Tan Xiang and *Mu Xiang* (Radix Aucklandiae) have similar qi-regulating functions. *Tan Xiang* is stronger in relieving chest pain arising from cold and qi stagnation in the chest. *Mu Xiang* is more effective for relieving abdominal pain caused by cold and qi stagnation in the Stomach and Spleen.

Chen Xiang (Lignum Aquilariae Resinatum)

沉香

Pinyin Name: *Chen Xiang*
Literal Name: "sinking aroma," "sinking fragrance"
Alternate Chinese Names: *Chen Sui Xiang*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: aquilaria, Chinese eaglewood
Botanical Name: *Aquilaria agallocha* Roxb. (*Chen Xiang*); *Aquilaria sinensis* (Lour.) Gilg. (*Bai Mu Xiang*)
Pharmaceutical Name: Lignum Aquilariae Resinatum
Properties: acrid, bitter, warm, aromatic
Channels Entered: Kidney, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Moves Qi, Relieves Pain

Qi stagnation and cold accumulation with chest and abdominal distention and pain: *Chen Xiang* (Lignum Aquilariae Resinatum) warms the body, dispels cold, and moves qi to relieve pain in the chest and abdominal

Chen Xiang (Lignum Aquilariae Resinatum)

regions. It is commonly used to treat pain characterized by cold and stagnation.

- Chest and abdominal distention and pain caused by accumulation of cold and stagnation of qi: use *Chen Xiang* with *Wu Yao* (Radix Linderae), *Bing Lang* (Semen Arecae), and *Mu Xiang* (Radix Aucklandiae).
- Epigastric, hypochondriac, and/or abdominal fullness and pain accompanied by deficiency and cold of the Spleen and Stomach: add *Rou Gui* (Cortex Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis).
- Extreme coldness of the hands and feet, pain in the abdomen and umbilical area due to lack of fire in the *ming men* (life gate): incorporate *Chen Xiang* with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Ding Xiang* (Flos Caryophylli), and *She Xiang* (Moschus).

2. Warms the Middle *Jiao*, Relieves Vomiting

Stomach qi reversal due to cold: *Chen Xiang* warms and harmonizes the middle *jiao* to treat chronic nausea, hiccups and vomiting from deficiency and cold of the Spleen and Stomach.

- Nausea and vomiting: combine *Chen Xiang* with *Ding Xiang* (Flos Caryophylli), *Bai Dou Kou* (Fructus Amomi Rotundus), *Zi Su Ye* (Folium Perillae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

3. Warms the Kidney, Grasps Qi Downwards

Kidney yang deficiency with inability to grasp qi downwards: The chief clinical manifestations of this deficiency include wheezing and dyspnea with more difficulty in inhalation than exhalation. Other symptoms may include coldness, soreness and weakness of the lower back and knees, weak Kidney pulse, and spermatorrhea in men.

- Difficult inhalation because of deficiency and cold of the Kidney: use *Chen Xiang* with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), *Bu Gu Zhi* (Fructus Psoraleae), *Ge Jie* (Gecko) and *Bai Guo* (Semen Ginkgo).
- Cough with profuse phlegm accompanied by Kidney deficiency, a syndrome also known as "upper excess and lower deficiency:" combine this herb with *Su Zi* (Fructus Perillae), *Qian Hu* (Radix Peucedani), *Hou Po* (Cortex Magnoliae Officinalis), *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward).
- Premature ejaculation: use it with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Yang Qi Shi* (Actinolitum) and *Bu Gu Zhi* (Fructus Psoraleae).

DOSAGE

1.0 to 1.5 grams. *Chen Xiang* should be post-decocted to ensure its effectiveness. It is also taken in powder concurrently with a decoction, or made into pills.

CAUTIONS / CONTRAINDICATIONS

- Use *Chen Xiang* with caution in the presence of yin-deficient fire, or organ prolapse due to qi deficiency.

CHEMICAL COMPOSITION

Baimuxinic acid, baimuxinal, agarospirol, baimuxinol, dehydrobaimuxinol, isobaimuxinol, benzylacetone, p-methoxybenzylacetone, anisic acid, β-agarofuran, sinenofuranal, sinenofuranol, dihydrokaranone, β-agarofuran.[1]

PHARMACOLOGICAL EFFECTS

- **Smooth muscle relaxant:** Administration of *Chen Xiang* via intraperitoneal injection relaxes the smooth muscle of the intestines and decreases intestinal peristalsis.[2]

CLINICAL STUDIES AND RESEARCH

- **Respiratory disorders:** Administration of an herbal formula containing 1.5 grams of *Chen Xiang* and 3 grams of *Ce Bai Ye* (Cacumen Platycladi) in powder form showed marked effectiveness for treatment of bronchial wheezing and dyspnea. The herbal formula was given once daily, before bedtime.[3]

AUTHORS' COMMENTS

Chen Xiang, *Jiang Xiang* (Lignum Dalbergiae Odoriferae) and *Tan Xiang* (Lignum Santali Albi) are all aromatic herbs that move qi.

- *Chen Xiang* enters the Spleen and Kidney. With its downward-moving tendency, it works to help the Kidney pull qi downwards to treat dyspnea and asthma due to Kidney deficiency, with or without the accumulation of phlegm in the Lung.
- *Tan Xiang* enters the Lung, Spleen and Stomach. It is best for regulating qi stagnation in the upper and middle *jiao*s that manifests in symptoms of angina, hiccups, and chest and epigastric pain.
- *Jiang Xiang* enters the Liver, Spleen and Heart. It regulates qi in the chest and hypochondrium to relieve pain, and redirects rebellious qi downwards to relieve nausea and vomiting.

Chuan Lian Zi (Fructus Toosendan)

川楝子 川栋子

Pinyin Name: *Chuan Lian Zi*
Alternate Chinese Names: *Jin Ling Zi, Lian Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: melia, Sichuan chinaberry fruit
Botanical Name: *Melia toosendan* Sieb. et. Zucc. (*Chuan Lian*)
Pharmaceutical Name: Fructus Toosendan
Properties: bitter, cold
Channels Entered: Liver, Small Intestine, Stomach, Urinary Bladder
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Moves Qi and Relieves Pain

Liver qi stagnation: With bitter taste and cold thermal property, *Chuan Lian Zi* (Fructus Toosendan) regulates Liver qi and relieves stagnation to treat hypochondriac distention and pain, and abdominal pain with heat signs of irritability, insomnia, red face and eyes, and short temper.

- Hypochondriac and abdominal pain: use *Chuan Lian Zi* with *Yan Hu Suo* (Rhizoma Corydalis) and *Xiang Fu* (Rhizoma Cyperi).

Disharmony of Liver and Stomach: When Wood overacts on Earth, the Spleen and Stomach are affected. Typical symptoms include poor appetite, bloating, distention and pain.

- Bloating: use *Chuan Lian Zi* with *Mu Xiang* (Radix Aucklandiae) and *Xiang Fu* (Rhizoma Cyperi).

Hernial pain with lower abdominal coldness and distention:

- Hernial disorders with hypochondriac, epigastric, or abdominal pain caused by Liver qi stagnation with heat: use this herb with *Yan Hu Suo* (Rhizoma Corydalis).
- Hernial disorders with lower abdominal distention and pain caused by cold: use it with *Xiao Hui Xiang* (Fructus Foeniculi), *Wu Zhu Yu* (Fructus Evodiae) and *Mu Xiang* (Radix Aucklandiae). **Exemplar Formula:** *Dao Qi Tang* (Conduct the Qi Decoction).

2. Kills Parasites

Chuan Lian Zi kills intestinal parasites and relieves pain. It is most effective for roundworms and hookworms.

- Parasitic infection: use *Chuan Lian Zi* with *Bing Lang* (Semen Arecae) and *Shi Jun Zi* (Fructus Quisqualis).

3. Kills Fungus

Chuan Lian Zi kills fungi, and is used topically as an herbal paste to treat fungal infections of the scalp. The herbal paste is prepared by roasting the herb, grinding it to powder, and mixing the powder with sesame oil. The affected area should be cleaned with salt water prior to application of the herbal paste.

DOSAGE

3 to 10 grams. *Chuan Lian Zi* is commonly used in herbal decoctions, pills, and topical creams/ointments. Bitter and cold, the unprocessed herb is slightly toxic. Dry-frying increases its warmth, minimizes toxicity, and reduces irritation to the Spleen and Stomach. Dry-frying with salt enhances its ability to enter the Kidney, and this form is commonly used to relieve pain in the lower *jiao*, such as hernial pain.

CAUTIONS / CONTRAINDICATIONS

- Use *Chuan Lian Zi* with caution in cases of deficiency and cold of the Spleen and Stomach.
- Large dosages of *Chuan Lian Zi* are not recommended as it is slightly toxic.

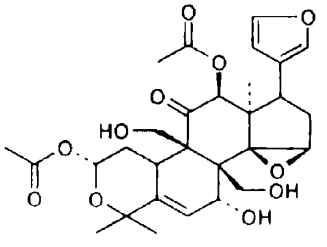
OVERDOSAGE

The entire melia plant is toxic, with the fruit being the most toxic part and the leaves the least. Eating 6 to 8 fresh *Chuan Lian Zi* fruits can cause dizziness, vomiting, diarrhea, respiratory difficulties, palpitations, tremors, spasms, and in severe cases, numbness and unconsciousness.

Adverse reactions to *Chuan Lian Zi* usually occur 4 to 6 hours after ingestion, but may begin as rapidly as 30 minutes. Early, mild symptoms of toxicity include dizziness,

Chuan Lian Zi (Fructus Toosendan)

blurred vision, nausea, vomiting, abdominal pain, diarrhea, spontaneous and profuse perspiration, weakness and numbness of the extremities, hurried respiration, palpitations, feelings of chest oppression, and slow and weak pulse. Severe cases of toxicity are characterized by tremor, spasms and cramps of the muscles, convulsions, altered consciousness, arrhythmia, and respiratory distress. Some patients also show hepatotoxicity, with yellow urine, yellow discoloration of the skin, and elevated liver enzymes. Adverse reactions to *Chuan Lian Zi* are usually attributed to its stimulating (irritating) effect on the gastrointestinal system, stimulating effect on the central nervous system, and toxic effect of toosendanin on the liver.



TREATMENT OF OVERDOSAGE

The early stage of overdose (4 to 5 hours after ingestion) may be treated with emetic methods followed by intake of 4 to 5 egg whites. The egg whites minimize irritation and damage caused by the herb. If overdose of the herb occurred 5 hours prior to treatment, the patient should be treated with a purgative method by dissolving 10 grams of *Mang Xiao* (Natrii Sulfas) in warm water as a drink to induce diarrhea and minimize absorption of the toxins.[1]

Acute liver damage with such symptoms as yellow urination, yellow discoloration of the skin and eyes, yellow and greasy tongue coat, and slippery pulse can be treated with an herbal formula in decoction that contains *Hu Zhang* (Rhizoma Polygoni Cuspidati) 12g, *Sheng Ma* (Rhizoma Cimicifugae) 12g, *Yin Chen Hao* (Herba Artemisiae Scopariae) 15g, *Hou Po* (Cortex Magnoliae Officinalis) 15g, *Che Qian Cao* (Herba Plantaginis) 15g, *Chui Peng Cao* 18g, and *Dan Shen* (Radix Salviae Miltiorrhizae) 15g.[2]

CHEMICAL COMPOSITION

Toosendanin, mergsine, melianone, melianol, melianediol, melialactone, azadirachtin, 21-o-acetyltoosendatriol, lipomelianol.[3,4]

Toosendanin

PHARMACOLOGICAL EFFECTS

- **Antiparasitic:** *Chuan Lian Zi* has demonstrated marked effectiveness against intestinal parasites. It has been proposed that toosendanin causes constant muscle contraction in the parasites, leading to muscle fatigue, inability to adhere to the intestines, and eventual expulsion of the parasites. The expulsion of parasites generally occurs 24 to 48 hours after administration of *Chuan Lian Zi*. When compared to santonin, *Chuan Lian Zi* has slower onset but more prolonged duration of effect.[5]
- **Respiratory:** Administration of *Chuan Lian Zi* in rats via intravenous or intramuscular injection leads to dyspnea, a reaction attributed to its inhibiting influence on the central nervous system. Dyspnea may be reversed with administration of nicotine.[6]
- **Antitoxin**: The survival rate is over 80% in rats when toosendanin is administered within 6 hours of exposure to botulism, and approximately 50% in monkeys when administered within 24 hours.[7]

CLINICAL STUDIES AND RESEARCH

- **Acute mastitis:** In one study, 43 patients with acute mastitis were treated with an herbal formula one to two times daily for 2 to 5 days. The herbal formula was composed of 9 grams of *Chuan Lian Zi*, 30 grams of brown sugar, and 100 to 200 ml of grain-based liquor or boiling water. Patients without suppuration (34 out of 43) reported complete recovery, after 2 to 4 doses within 3 days. Patients with suppuration (9 out of 43), after removal or draining of pus, reported complete recovery after 6 to 12 doses within 4 to 8 days.[8]

TOXICOLOGY

The LD_{50} for toosendanin in mice is 13.8 +/- 1.2 mg/kg via intraperitoneal injection, 14.6 +/- 0.9 mg/kg via intravenous injection, 14.3 +/- 1.5 mg/kg via subcutaneous injection, and 244.2 +/- 44.0 mg/kg via oral administration. Adverse reactions included an elevated SGPT and muscle fatigue.[9]

SUPPLEMENT

- 苦楝子 / 苦栋子 *Ku Lian Zi* (Fructus Meliae), derived from *Melia azedarach L.*, is sometimes used inappropriately in place of *Chuan Lian Zi* (Fructus Toosendan). In some other regions in China, *Ku Lian Zi* is used as a substitute when *Chuan Lian Zi* is unavailable. In others, such as Xian and Jinan, *Ku Lian Zi* is used interchangeably as *Chuan Lian Zi*. *Ku Lian Zi* is bitter and more toxic than *Chuan Lian Zi*. Overdose of *Ku Lian Zi* can result from the ingestion of approximately 10 to 70 pieces, and can cause toxic side effects within 4 to 8 hours. Signs of toxicity include vomiting, nausea, diarrhea, difficulty breathing, numbness of limbs, paroxysmal convulsions and elevated blood pressure. Therefore, extreme caution should be exercised when *Ku Lian Zi* is used.

Chuan Lian Zi (Fructus Toosendan)

AUTHORS' COMMENTS

Chuan Lian Zi and *Wu Yao* (Radix Linderae) both have excellent abilities to regulate qi and relieve hernial pain. *Chuan Lian Zi* is bitter, cold, has a descending nature, and slightly toxic. It enters the Liver, Stomach, Small Intestine and Urinary Bladder. It sedates Liver heat and damp-heat found in hernial pain and redness and swelling of the testicles. *Wu Yao* is warm, dispersing, and enters the Lung, Spleen, Kidney and Urinary Bladder. It warms the Kidney and is more suitable for hernial pain arising from cold.

According to Dr. Ding Guang-Di, *Chuan Lian Zi* and *Yan Hu Suo* (Rhizoma Corydalis) are specific for left-sided hypochondriac pain. *Xuan Fu Hua* (Flos Inulae) and *Xiang Fu* (Rhizoma Cyperi) effectively address right-sided hypochondriac pain.

According to Jang Meng-Chau, *Chuan Lian Zi* increases duct peristalsis and facilitates the passage of stones. Thus, it is an essential herb for treatment of gall-stones and kidney stones.

Qing Mu Xiang (Radix Aristolochiae)

青木香

Pinyin Name: *Qing Mu Xiang*
Alternate Chinese Names: *Bei Ma Dou Ling, Ma Dou Ling Gen, Tu Qing Mu Xiang*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: aristolochia root, slender Dutchman's pipe root
Botanical Name: *Aristolochia debilis* Sieb. et Zucc. (*Ma Dou Ling*); *Aristolochia contorta* Bge. (*Bei Ma Dou Ling*)
Pharmaceutical Name: Radix Aristolochiae
Properties: acrid, bitter, cool
Channels Entered: Liver, Stomach
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi and Relieves Pain

Liver and Stomach qi stagnation: *Qing Mu Xiang* (Radix Aristolochiae) treats Liver and Stomach qi stagnation, a condition characterized by distention and pain of the chest, hypochondriac, epigastric and abdominal regions.

- Liver and Stomach qi stagnation: use this herb with *Xiang Fu* (Rhizoma Cyperi) and *Chuan Lian Zi* (Fructus Toosendan).

2. Eliminates Toxins and Reduces Swelling

Qing Mu Xiang treats abdominal pain and diarrhea caused by food poisoning or improper food intake.

- Diarrhea and abdominal pain: use it with *Huang Lian* (Rhizoma Coptidis) and *Bing Lang* (Semen Arecae).

Snake bites: *Qing Mu Xiang*, used topically, relieves swelling and pain caused by snake bites.

- Snake bites: use this herb with *Bai Zhi* (Radix Angelicae Dahuricae) and apply topically or take internally.

Qing Mu Xiang (Radix Aristolochiae)

DOSAGE

3 to 10 grams in decoction, 1.5 to 2 grams as powder.

CAUTIONS / CONTRAINDICATIONS

- Because *Qing Mu Xiang* is toxic, high doses are contraindicated. Potential side effects include nausea and vomiting.
- *Qing Mu Xiang* should be used with caution in patients experiencing deficiency and cold conditions.

CHEMICAL COMPOSITION

Aristolochic acid A, B, C; aristolochia lactan, debilic acid, allantoin, magnoflorine, cyclanoline, aristolone, debilone, aristolenone, isoaristolone, aristolin, α-pinene, β-pinene.[1]

TOXICOLOGY

Qing Mu Xiang contains a trace amount of aristolochic acid. For more information on the toxicology of this compound, please refer to *Guang Fang Ji* (Radix Aristolochiae Fangchi) or *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis).

No fatalities were reported following oral ingestion of 20 to 40 grams of *Qing Mu Xiang* in cats weighing 2 kg. The LD_{50} for aristolochic acid in mice was 48.7 mg/kg via oral ingestion and 22.4 mg/kg via intravenous injection.[2]

AUTHORS' COMMENTS

Qing Mu Xiang (Radix Aristolochiae) is also known as "*Ma Dou Ling Gen*." Like *Ma Dou Ling* (Fructus Aristolochiae), *Qing Mu Xiang* is toxic and should be used with extreme caution.

Mu Xiang (Radix Aucklandiae) and *Qing Mu Xiang* (Radix Aristolochiae) have similar names, but have completely different functions and safety profiles. They should never be confused, or used interchangeably.

References

Li Zhi He (Semen Litchi)

荔枝核 荔枝核

Pinyin Name: *Li Zhi He*
Literal Name: "litchi seed"
Alternate Chinese Names: *Da Li He*, *Li Ren*
Original Source: *Ben Cao Yan Yi* (Extension of the Materia Medica) by Kou Zong-Shi in 1116
English Name: litchi seed, lychee seed
Botanical Name: *Litchi chinensis* Sonn. (*Li Zhi Shu*)
Pharmaceutical Name: Semen Litchi
Properties: sweet, astringent, warm
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Moves Qi, Relieves Pain, Disperses Cold

Hernial pain: *Li Zhi He* (Semen Litchi) is an excellent herb to treat cold hernial disorders with testicular swelling and pain.

- Hernial disorders with swelling and pain in the testicles caused by cold stagnation in the Liver channel: use *Li Zhi He* with *Xiao Hui Xiang* (Fructus Foeniculi), *Wu Zhu Yu* (Fructus Evodiae) and *Ju He* (Semen Citri Rubrum).
- Redness, swelling and pain in the testicles due to damp-

Li Zhi He (Semen Litchi)

heat and fire in the Liver channel: use this herb with *Long Dan Cao* (Radix Gentianae), *Zhi Zi* (Fructus Gardeniae), *Da Huang* (Radix et Rhizoma Rhei) and *Chuan Lian Zi* (Fructus Toosendan).

***Ben tun* (running piglet) sensation:** This is an upward shooting sensation of qi from the lower abdomen to the epigastric or chest region, causing pain.

- *Ben tun* sensation: use *Li Zhi He* with *Mu Xiang* (Radix Aucklandiae), *Wu Zhu Yu* (Fructus Evodiae) and *Rou Gui* (Cortex Cinnamomi). Use *Rou Gui* only if there are signs of cold.

2. Regulates Liver Qi

Chronic epigastric pain: *Li Zhi He* regulates Liver qi, dispels cold, and relieves chronic epigastric pain.

- Chronic epigastric pain from Liver qi stagnation: use *Li Zhi He* with *Mu Xiang* (Radix Aucklandiae), *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Lian Zi* (Fructus Toosendan).

Pre-menstrual or postpartum abdominal pain because of qi and blood stagnation.

- Abdominal pain: add *Xiang Fu* (Rhizoma Cyperi).

DOSAGE

10 to 15 grams. *Li Zhi He* may be used in decoction or pills. Frying with salt directs the function of the herb downwards to the lower *jiao* and potentiates its ability to treat hernia and pain.

CAUTIONS / CONTRAINDICATIONS

- *Li Zhi He* is contraindicated in patients who do not exhibit cold and damp accumulation.

CHEMICAL COMPOSITION

3-acetoin, 2,3-butanediol, copaene, cis-caryophyllene, alloaromadendrene, humulene, 6-cadinene, α-curcumene, calamenene, ledol, quaiazulene, xanthorrhizol, palmatic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antidiabetic:** Administration of *Li Zhi He* to mice via subcutaneous injection lowered blood glucose levels.[2]

HERB-DRUG INTERACTION

- **Antidiabetics:** Herbs that lower the plasma glucose levels, such as *Li Zhi He*, should be used with caution with insulin, sulfonylureas, and other antidiabetic medications, as the combination may have a synergistic effect, leading to hypoglycemia.[3] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]

TOXICOLOGY

Li Zhi He is very well-tolerated. There are no fatalities following administration of 20 g/kg in mice via oral ingestion.[4]

AUTHORS' COMMENTS

According to Jang Meng-Chau, *Li Zhi He* and *Ju He* (Semen Citri Rubrum) guide other herbs through the channels to the testicles and ovaries. They are indispensable herbs when treating hernias, infertility, ovarian cysts, polycystic ovaries and other disorders specific to those regions.

Suo Luo Zi (Semen Aesculi)

娑羅子　娑罗子

Pinyin Name: *Suo Luo Zi*
Alternate Chinese Names: *Kai Xin Guo*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: aesculus seed, Chinese buckeye seed, Wilson buckeye seed
Botanical Name: *Aesculus chinensis* Bge. (*Chi Ye Shu*); *Aesculus wilsonii* Rehd. (*Tian Shi Li*)
Pharmaceutical Name: Semen Aesculi
Properties: sweet, warm
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

Regulates Liver Qi, Expands the Middle *Jiao* and Harmonizes the Stomach

Liver and Stomach qi stagnation: *Suo Luo Zi* (Semen Aesculi) relieves Liver qi stagnation and treats epigastric, abdominal and hypochondriac distention, bloating and pain. It also treats breast distention that occurs prior to menstruation.

- Epigastric, abdominal and hypochondriac distention and pain: use *Suo Luo Zi* with *Ba Yue Zha* (Fructus Akebiae) and *Fo Shou* (Fructus Citri Sarcodactylis).
- Breast distention: use it with *Lu Lu Tong* (Fructus Liquidambaris), *Xiang Fu* (Rhizoma Cyperi) and *Yu Jin* (Radix Curcumae).

DOSAGE

3 to 10 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Suo Luo Zi* is contraindicated in cases of qi or yin deficiency.

CHEMICAL COMPOSITION

Aescin, eslin.[1]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 670

Ba Yue Zha (Fructus Akebiae)

八月札

Pinyin Name: *Ba Yue Zha*
Alternate Chinese Names: *San Ye Mu Tong, Bai Mu Tong, Mu Tong Zi*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: akebia fruit
Botanical Name: *Akebia quinata* (Thunb.) Decne. (*Mu Tong*); *Akebia trifoliata* (Thunb.) Koidz. (*San Ye Mu Tong*); *Akebia trifoliata* (Thunb.) Koidz. var. *australis* (Diels) Rehd. (*Bai Mu Tong*)
Pharmaceutical Name: Fructus Akebiae
Properties: bitter, neutral
Channels Entered: Liver, Stomach

Ba Yue Zha (Fructus Akebiae)

CHINESE THERAPEUTIC ACTIONS

1. Spreads Liver Qi

Liver qi stagnation: *Ba Yue Zha* (Fructus Akebiae) treats Liver qi stagnation manifesting in chest, hypochondriac, epigastric and hernial pain.

- Pain caused by Liver qi stagnation: use *Ba Yue Zha* with *Xiang Fu* (Rhizoma Cyperi), *Zhi Ke* (Fructus Aurantii), *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis).

2. Disperses Masses

Nodules and tumors: Masses, nodules and tumors represent the result of qi stagnation and phlegm accumulation.

- Fibrocystic breast disorder: use *Ba Yue Zha* with *Lu Feng Fang* (Nidus Vespae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Wang Bu Liu Xing* (Semen Vaccariae).

DOSAGE

6 to 12 grams in decoction.

CHEMICAL COMPOSITION

Sugars, saponins. [1]

1. *Zhong Yao Xue* (Chinese Herbology), 1998; 426-427

Gan Song (Radix seu Rhizoma Nardostachys)

甘松

Pinyin Name: *Gan Song*
Literal Name: "sweet pine"
Alternate Chinese Names: *Gan Song Xiang, Kuan Ye Gan Song, Xiang Song*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: nardostachys, Chinese nardostachys rhizome, spoon-leaf nardostachys rhizome
Botanical Name: *Nardostachys chinensis* Batal. (*Gan Song Xiang*); *Nardostachys jatamanse* DC. (*Kuan Ye Gan Song*)
Pharmaceutical Name: Radix seu Rhizoma Nardostachys
Properties: acrid, sweet, warm
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

Regulates Qi, Relieves Pain, Opens Stagnation and Awakens the Spleen

Qi stagnation in the chest and abdomen: *Gan Song* (Radix seu Rhizoma Nardostachys), warm but not hot, sweet but not stagnating, and acrid yet not drying, regulates qi in the chest and abdomen and awakens the Spleen. It is mainly used to treat patients who have damaged their Spleen by excessive worrying, which manifests as a feeling of oppression in the chest, with epigastric and abdominal distention and pain, and poor appetite.

- Qi stagnation in the chest and abdomen: use *Gan Song* with *Mu Xiang* (Radix Aucklandiae), and *Xiang Yuan* (Fructus Citri).
- Qi stagnation with yang deficiency and coldness: use this herb with *Sha Ren* (Fructus Amomi), *Ding Xiang* (Flos Caryophylli) and *Rou Gui* (Cortex Cinnamomi).

DOSAGE

3 to 6 grams in decoction.

Gan Song (Radix seu Rhizoma Nardostachys)

CAUTIONS / CONTRAINDICATIONS

- *Gan Song* is contraindicated in patients with qi deficiency or heat in the blood.

CHEMICAL COMPOSITION

Nardosinone, valeranone, aristolene, maaliol, β-maaliene, nardostachone, dibelon.[1]

PHARMACOLOGICAL EFFECTS

- **Antiarrhythmic:** Intravenous injection of alcohol extract of *Gan Song* was effective in treating chemically-induced arrhythmia in mice and rats. Though the mechanism is unclear, it has been suggested that *Gan Song* acts directly on the cardiac muscle to exert its antiarrhythmic effect.[2]

CLINICAL STUDIES AND RESEARCH

- **Arrhythmia:** In one study, 55 patients with various arrhythmia disorders were treated with an herbal formula with an 83.6% rate of effectiveness. The herbal formula included *Gan Song*, *Da Qing Ye* (Folium Isatidis), *Dang Shen* (Radix Codonopsis), *Ren Shen* (Radix Ginseng), *Gui Zhi* (Ramulus Cinnamomi), *Gan Cao* (Radix Glycyrrhizae) and *Zhi Ke* (Fructus Aurantii).[3]

AUTHORS' COMMENTS

Gan Song treats leg *qi* when combined with *Gao Ben* (Rhizoma Ligustici) and *He Ye* (Folium Nelumbinis) as an external wash or soak. It also serves as a gargle to treat toothache caused by Kidney deficiency.

References

Jiu Ceng Ta (Herba Ocimi Basilici)

九層塔　九层塔

Pinyin Name: *Jiu Ceng Ta*
Literal Name: "nine-layered temple"
Alternate Chinese Names: *Lou Le, Xiang Cai, Lan Xiang, Shen Zi Cao, Guang Ming Zi*
English Name: basil
Botanical Name: *Ocimum basilicum* L.
Pharmaceutical Name: Herba Ocimi Basilici
Properties: acrid, pungent, warm
Channels Entered: Stomach, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Regulates the Middle *Jiao*, Promotes Digestion

Stomach cramps, poor appetite in children: *Jiu Ceng Ta* (Herba Ocimi Basilici) treats Stomach cold with qi stagnation. This type of pain may be relieved or lessened by warmth, and aggravated by cold drinks, cold food or pressure.

- Stomach cramps: use *Jiu Ceng Ta* with *Chuan Lian Zi* (Fructus Toosendan), *Yan Hu Suo* (Rhizoma Corydalis), *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix Glycyrrhizae).
- Poor appetite in children: use this herb with *Shen Qu* (Massa Fermentata) and *Mai Ya* (Fructus Hordei Germinatus).

Jiu Ceng Ta (Herba Ocimi Basilici)

2. Invigorates Blood Circulation, Dispels Water

Irregular menstruation, postpartum blood stagnation: *Jiu Ceng Ta* treats obstetric/gynecological disorders arising from blood and qi stagnation.

- Irregular menstruation and postpartum blood stagnation: use this herb with *Dan Shen* (Radix Salviae Miltiorrhizae) and *Yi Mu Cao* (Herba Leonuri).

3. Opens Channels and Collaterals

Soreness and pain in the tendons and bones: The aromatic property of *Jiu Ceng Ta* disperses stagnation in the channels and collaterals to relieve pain.

- Soreness and pain in the tendons and bones: combine it with *Ji Xiang Teng* (Caulis Paederiae), *Yi Tiao Gen* (Radix Moghaniae) and *Chuan Shan Long* (Rhizoma Dioscoreae Nipponicae).

4. Eliminates Toxins and Disperses Wind

Toothache, eye swelling and pain: *Jiu Ceng Ta* treats toothache and eye disorders when combined with herbs with heat-clearing and toxin-eliminating functions.

- Toothache: use it with *Shui Ding Xiang* (Herba Ludwigiae Prostratae) and *Shi Gao* (Gypsum Fibrosum).
- Redness, pain and swelling of the eyes: combine it with *Ye Ju Hua* (Flos Chrysanthemi Indici), *Xia Ku Cao* (Spica Prunellae) and *Qian Li Guang* (Herba Senecionis Scandens).
- Superficial visual obstruction: use this herb with *Chan Tui* (Periostracum Cicadae) and *Qian Li Guang* (Herba Senecionis Scandens).

DOSAGE

5 to 12 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Jiu Ceng Ta* is contraindicated during pregnancy.

AUTHORS' COMMENTS

Jiu Ceng Ta has functions similar to those of *Ze Lan* (Herba Lycopi) to invigorate blood circulation and dispel water.

Tian Xian Teng (Herba Aristolochiae)

天仙藤　天仙藤

Pinyin Name: *Tian Xian Teng*
Literal Name: "heavenly vine from the sky"
Alternate Chinese Names: *Ma Dou Ling Teng, Xiang Teng, Tian Xian Gen, Qing Mu Xiang*
English Name: aristolochia herb, Dutchman's pipe herb
Botanical Name: *Aristolochia debilis* Sieb. et Zucc.; *Aristolochia contorta* Bge.; *Aristolochia shimadi* Hay
Pharmaceutical Name: Herba Aristolochiae
Properties: bitter, warm
Channels Entered: Heart, Lung, Spleen, Kidney
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Regulates Qi, Invigorates Blood and Relieves Pain

Pain due to qi and blood stagnation: *Tian Xian Teng* (Herba Aristolochiae) treats various kinds of pain, including hernial pain, chest and abdominal pain, and neuralgia.

- Hernial pain: use *Tian Xian Teng* with *Wu Yao* (Radix Linderae) and *Xiao Hui Xiang* (Fructus Foeniculi).

Tian Xian Teng (Herba Aristolochiae)

- Chest and abdominal pain: use this herb with *Xi Xin* (Herba Asari) and *Pao Zai Cao* (Herba Physalis Angulatae).
- Neuralgia: combine it with *Huang Jin Gui* (Caulis Vanieriae), *Mo Gu Xiao* (Caulis Hyptis Capitatae) and *Huang Teng* (Caulis Fibraurea).

2. Clears Heat, Eliminates Toxins, Promotes Urination

Toxic heat: *Tian Xian Teng* treats toxic heat infections, including snake bites, sexually-transmitted diseases and liver cancer.

- Toxic snake bite: use *Tian Xian Teng* with *Ku Shen Gen* (Radix Sophorae Flavescentis), *Da Huang* (Radix et Rhizoma Rhei), *Mu Xiang* (Radix Aucklandiae), *Ban Xia* (Rhizoma Pinelliae), *Tong Cao* (Medulla Tetrapanacis), *Bai Bu* (Radix Stemonae), *Du Huo* (Radix Angelicae Pubescentis) and *Shu Wei Huang* (Herba Rostellulariae).
- Sexually-transmitted diseases: use *Tian Xian Teng* with *Tu Fu Ling* (Rhizoma Smilacis Glabrae), *Xian Feng Cao* (Herba Bidentis), *Shan Pu Tao* (Radix Vitis Amurensis) and *Che Qian Zi* (Semen Plantaginis).
- Liver cancer: combine this herb with *Huang Shui Qie* (Herba Solani), *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction) and *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi).

DOSAGE

5 to 20 grams.

CAUTIONS / CONTRAINDICATIONS

Tian Xian Teng is contraindicated during pregnancy.

CHEMICAL COMPOSITION

Aristolochic acid.

TOXICOLOGY

Tian Xian Teng contains a trace amount of aristolochic acid. For more information on the toxicology of this compound, please refer to *Guang Fang Ji* (Radix Aristolochiae Fangchi) or *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis).

Dao Dou (Semen Canavaliae)

刀豆

Pinyin Name: *Dao Dou*
Literal Name: "knife bean"
Alternate Chinese Names: *Jia Jian Dou, Dao Dou Zi*
Original Source: *Jiu Huang Ben Cao* (Materia Medica to Rescue Emergencies)
English Name: canavalia, jack bean, sword bean
Botanical Name: *Canavalia gladiata* (Jacq.) DC. (*Dao Dou*)
Pharmaceutical Name: Semen Canavaliae
Properties: sweet, warm
Channels Entered: Stomach, Kidney

CHINESE THERAPEUTIC ACTIONS

Descends Qi and Relieves Hiccups

Hiccups and vomiting resulting from Stomach cold and deficiency: In the case of Stomach cold and deficiency, the sound of the hiccups is weak, and low in tone and volume. Excessive reversal or rebellion of qi will often cause these patients to have respiratory difficulties. Other symptoms may include poor appetite, pale complexion, fatigue and cold extremities. *Dao Dou* (Semen Canavaliae) is mild and must be combined with other herbs for maximum effectiveness.

- Hiccups and vomiting: use *Dao Dou* with *Ding Xiang* (Flos Caryophylli) and *Shi Di* (Calyx Kaki).

Dao Dou has a mild effect to tonify Kidney to warm yang. It is combined with other herbs to treat low back pain caused by Kidney yang deficiency.

Dao Dou (Semen Canavaliae)

DOSAGE

10 to 15 grams in decoction. *Dao Dou* can also be used in powder form.

CAUTIONS / CONTRAINDICATIONS

- *Dao Dou* is contraindicated when the hiccups are caused by Stomach heat.

CHEMICAL COMPOSITION

Urease, hemogglutinin, canavanine, arginase, concanavalin A, stachyose, spermidine, spermine, putrescine.[1]

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 123-124

Shi Di (Calyx Kaki)

柿蒂 柿蒂

Pinyin Name: *Shi Di*
Alternate Chinese Names: *Shi Qian, Shi Zi Ba, Shi Ding*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: kaki calyx, persimmon calyx and receptacle
Botanical Name: *Diospyros kaki* L. f. (*Shi Shu*)
Pharmaceutical Name: Calyx Kaki
Properties: bitter, neutral
Channels Entered: Stomach

CHINESE THERAPEUTIC ACTIONS

Descends Qi, Stops Hiccups

Hiccups are caused when disharmony of the Stomach leads qi that would otherwise descend to rise in an abnormal manner. *Shi Di* (Calyx Kaki) is a neutral herb that addresses this problem in both hot or cold conditions.

- Hiccups due to cold in the Stomach: use *Shi Di* with *Ding Xiang* (Flos Caryophylli) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Hiccups because of heat in the Stomach: use it with *Lu Gen* (Rhizoma Phragmitis) and *Zhu Ru* (Caulis Bambusae in Taenia).
- Hiccups due to deficiency or in the elderly: combine it with *Dang Shen* (Radix Codonopsis), *Ren Shen* (Radix Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

DOSAGE

3 to 12 grams. *Shi Di* may be used as herbal decoction or pills.

CHEMICAL COMPOSITION

Oleanolic acid, ursolic acid, trifolin, β-sitosteryl-β-D-glucoside, stearic acid, palmitic acid, succinic acid, syringic acid, vanillin acid, gallic acid, kaempferol, frifolin, hyperin, hydroxytripterpenic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antiarrhythmic:** Administration of 0.5% *Shi Di* in mice at the dosage of 50 mg/kg has demonstrated a marked effect against chlorine- or aconitine-induced arrhythmia.[2]
- **Antifertility:** Administration of *Shi Di* is 79.6% successful as an antifertility agent in rabbits.[3]

Chapter 8 summary

— Qi-Regulating Herbs

Herb	Similarities	Differences
Chen Pi (Pericarpium Citri Reticulatae)	Regulate qi, dissolve phlegm	Regulates Spleen and Stomach qi, dries dampness and dissolves phlegm
Qing Pi (Pericarpium Citri Reticulatae Viride)		Regulates Liver qi, breaks up qi stagnation and accumulation
Zhi Shi (Fructus Aurantii Immaturus)		Breaks qi stagnation and accumulation, dissolves phlegm and relieves distention
Zhi Ke (Fructus Aurantii)		Regulates qi and spreads the middle *jiao*
Xiang Yuan (Fructus Citri)		Regulates Spleen, Stomach and Liver qi
Fo Shou (Fructus Citri Sarcodactylis)		Relieves Liver qi stagnation and cough with profuse phlegm
Po Bu Zi Ye (Folium Cordia Dichotoma)		Dispels phlegm and relieves coughing
Da Fu Pi (Pericarpium Arecae)		Promotes diuresis and relieves edema
Wan Dian Jin (Radix Ilicis Asprellae)		Redirects Lung qi to treat cough, chest congestion, and lung abscess
Mu Xiang (Radix Aucklandiae)	Regulate qi, relieve pain	Regulates Spleen, Stomach and Large Intestine qi
Xiang Fu (Rhizoma Cyperi)		Regulates Liver qi, regulates menstruation; used mainly for obstetric/gynecologic disorders
Wu Yao (Radix Linderae)		Enters the lower *jiao;* used for lower abdominal pain and frequent urination
Xie Bai (Bulbus Allii Macrostemonis)		Redirects qi, opens yang qi and treats *xiong bi* (painful obstruction of the chest) syndrome
Tan Xiang (Lignum Santali Albi)		Alleviates chest pain caused by cold
Chen Xiang (Lignum Aquilariae Resinatum)		Redirects qi to relieve nausea, cough, dyspnea and vomiting
Chuan Lian Zi (Fructus Toosendan)		Regulates Liver qi, more for pain from heat, kills parasites
Qing Mu Xiang (Radix Aristolochiae)		Eliminates toxins, reduces swelling
Li Zhi He (Semen Litchi)		Alleviates hernial or abdominal pain caused by cold
Suo Luo Zi (Semen Aesculi)		Harmonizes the Liver and Stomach
Ba Yue Zha (Fructus Akebiae)		Relieves hypochondriac and hernial pain, disperses stagnation to treat nodules
Gan Song (Radix seu Rhizoma Nardostachys)		Relieves Liver qi stagnation and awakens the Spleen
Jiu Ceng Ta (Herba Ocimi Basilici)		Regulates qi in the middle *jiao*, promotes digestion
Tian Xian Teng (Herba Aristolochiae)		Clears heat and eliminates toxins
Dao Dou (Semen Canavaliae)	Re-direct Stomach qi to relieve vomiting and nausea	Treats nausea and vomiting in deficient, cold individuals
Shi Di (Calyx Kaki)		Stops hiccups

Chapter 8 summary

General Characteristics of Qi-Regulating Herbs:

Taste: acrid, bitter
Thermal property: warm and drying
Channels entered: Lung, Liver, Spleen/Stomach
Therapeutic actions: invigorates qi circulation, relieves qi stagnation, relieves pain

Qi-regulating herbs regulate qi, promote the normal circulation of qi, correct reversed flow of qi, and relieve qi stagnation. These herbs are usually acrid, warm and drying, and may consume yin and body fluids. Therefore, they should be used with caution for patients who have qi and yin deficiencies. Clinical presentation varies depending on the organ affected.

Spleen and Stomach: nausea, vomiting, hiccups, epigastric and abdominal bloating, fullness and pain, acid regurgitation, belching, poor appetite and irregular bowel movement.

Lung: stifling sensations in the chest, cough, dyspnea and wheezing.

Liver: emotional disturbances, stress, irritability, anger, hypochondriac distention or pain, hernial pain, breast distention and tenderness (with or without palpable masses), irregular menstruation and loss of appetite.

Chen Pi (Pericarpium Citri Reticulatae) and ***Qing Pi*** (Pericarpium Citri Reticulatae Viride) are from the same fruit. *Chen Pi* is the peel of ripe oranges, and *Qing Pi* is the peel of green or unripe oranges. Both are warm and regulate qi and dissolve stagnation, treating food and phlegm stagnation that cause epigastric and abdominal fullness, distention and pain.

Chen Pi more specifically influences the upper and middle *jiaos* to relieve qi stagnation of the Lung, Spleen and Stomach. This herb helps to dry dampness, dissolve phlegm, regulate qi, and harmonize the middle *jiao*. Chief applications of *Chen Pi* include cough with profuse sputum, stifling sensations of the chest, and diarrhea with abdominal pain and gas due to the Liver overacting on the Spleen.

Qing Pi is more potent in its effect to regulate qi and break up qi stagnation. *Qing Pi* enters the Liver and Gallbladder and has a descending nature. It is commonly used to treat Liver qi stagnation affecting upper, middle and lower *jiaos*. Clinical indications include palpable masses in the breast, chest and hypochondriac fullness, distention and pain; hernial pain or any palpable masses due to phlegm and qi stagnation.

Chen Pi and *Qing Pi* are often used together to treat disharmony of Wood (Liver) and Earth (Spleen/Stomach).

Zhi Shi (Fructus Aurantii Immaturus) and ***Zhi Ke*** (Fructus Aurantii) have been used interchangeably since ancient times. The smaller, immature fruits are designated as *Zhi Shi*, and the larger, mature fruits are designated *Zhi Ke*. Both are cool and have similar functions.

Zhi Shi and *Zhi Ke* are used together in conjunction with tonic herbs that have yang raising functions to treat organ prolapse.

Zhi Shi is bitter, has descending tendencies, and strongly functions to break qi stagnation, dissolve phlegm and relieve fullness. It is often used in acute cases of food stagnation, abdominal pain, constipation, rectal tenesmus, feelings of stagnation or stifling sensations in the epigastric and chest areas.

Zhi Ke, milder in potency, is more suitable for deficient patients or chronic cases of qi stagnation. It regulates qi, opens the middle *jiao*, relieves distention, and is often used in less severe cases of chest and epigastric fullness and distention.

Zhi Shi (Fructus Aurantii Immaturus) and ***Qing Pi*** (Pericarpium Citri Reticulatae Viride) are potent herbs to regulate qi.

Zhi Shi more strongly opens the chest and diaphragm to relieve stagnation associated with the Stomach and intestines.

Qing Pi, warming and descending in nature, breaks qi stagnation and treats hypochondriac pain.

Chapter 8 summary

Xiang Yuan (Fructus Citri) and ***Fo Shou*** (Fructus Citri Sarcodactylis), acrid, aromatic, bitter and warm, regulate Liver qi, harmonize the middle *jiao* and dissolve phlegm. Since both are relatively mild in nature, they are often combined with other herbs to treat chest and hypochondriac pain and distention, epigastric fullness and poor appetite, belching, and vomiting and cough with profuse sputum.

Xiang Yuan more strongly regulates Spleen and Lung qi to relieve cough.

Fo Shou regulates Liver qi and more effectively relieves pain.

Po Bu Zi Ye (Folium Cordia Dichotoma) regulates qi, relieves pain, dispels phlegm, and eases cough. It has shown promise in treatment of bone spurs.

Da Fu Pi (Pericarpium Arecae) promotes movement of qi, dissipates stagnation, promotes diuresis, and treats edema.

Wan Dian Jin (Radix Ilicis Asprellae) regulates qi and treats Lung disorders, such as cough, chest congestion, pneumonia, and lung abscess.

Mu Xiang (Radix Aucklandiae), ***Xiang Fu*** (Rhizoma Cyperi) and ***Wu Yao*** (Radix Linderae), acrid and aromatic, regulate qi and relieve pain.

Mu Xiang is acrid, aromatic, warm and drying, and is commonly said to open all three *jiaos*. In addition, since it promotes digestion and strengthens the Spleen, it is one of the best herbs to relieve qi stagnation of Spleen and Stomach involving food accumulation. Common clinical manifestations include epigastric and abdominal distention, pain, rectal tenesmus and poor appetite. *Mu Xiang* also helps in treatment of jaundice caused by damp-heat, gallstones and other hepatic or gallbladder disorders secondary to impairment of the Spleen's function in transportation and transformation.

Xiang Fu is aromatic and penetrating in nature. It is mild, and is often used to regulate Liver qi and relieve irritability, regulate menstrual cycles and relieve pain to treat irregular menstruation and dysmenorrhea. It also treats chest, hypochondriac, epigastric and abdominal distention and pain, breast tenderness and hernial pain.

Wu Yao is acrid, warm and less aromatic than the other two herbs. It is milder in nature and enters the Spleen, Lung, Kidney and Urinary Bladder. It effectively regulates qi, disperses cold, and relieves pain. It is often used to treat chest, hypochondriac, epigastric, abdominal, hernial and menstrual pain caused by cold. It also warms the Urinary Bladder and Kidney to treat polyuria and enuresis caused by deficiency and cold.

Xiang Fu (Rhizoma Cyperi) and ***Qing Pi*** (Pericarpium Citri Reticulatae Viride) are potent qi-regulating herbs.

Xiang Fu invigorates qi circulation in all twelve channels, and regulates menstruation and blood.

Qing Pi enters the Liver and strongly breaks up qi stagnation and relieves hernial pain.

Xie Bai (Bulbus Allii Macrostemonis) is warm and enters the upper *jiao* to open the yang and disperse stagnation. It is essential for treatment of *xiong bi* (painful obstruction of the chest) caused by cardiovascular disorders, such as angina and coronary artery disorder. *Xie Bai* also enters the lower *jiao* to relieve rectal tenesmus caused by qi stagnation.

Tan Xiang (Lignum Santali Albi) and ***Chen Xiang*** (Lignum Aquilariae Resinatum) are aromatic, acrid and warm. They regulate qi, disperse cold and relieve pain, and treat cold stagnation in the body.

Tan Xiang more strongly regulates Spleen and Lung qi. It opens the chest and the diaphragm to regulate the middle *jiao* to relieve chest and abdominal pain, angina, and hiccups caused by cold and qi stagnation.

Chapter 8 summary

Chen Xiang is bitter and dense, and descending in nature. It brings down abnormal qi reversal of the Stomach to treat hiccups and vomiting caused by deficiency and cold. It warms the Kidney to help grasp the qi downward to treat asthma characterized by short inhalation and long exhalation. *Chen Xiang* is warm but not drying, moving yet does not cause qi loss. It is one of the best qi-regulating herbs.

Chuan Lian Zi (Fructus Toosendan), cold and bitter, is essential for treatment of Liver-related disorders, such as the pain of Liver qi stagnation, or disharmony of Liver and Spleen involving heat. It also kills parasites and sedates Liver fire. Clinical applications include parasites with abdominal pain, Liver yang rising, dizziness, blurred vision and dermatological disorders of the head. *Chuan Lian Zi* is slightly toxic and should not be prescribed at high dosages.

Qing Mu Xiang (Radix Aristolochiae), cold in nature, regulates qi, relieves pain, eliminates toxins, reduces swelling and lowers blood pressure. It treats Liver and Stomach qi stagnation with heat, abdominal pain, and fever, or heat sensations from toxic snake bite, or high blood pressure. Large dosages of this herb are not recommended, as nausea and vomiting may occur.

Li Zhi He (Semen Litchi) is warm, regulates qi, relieves pain, dispels cold and stagnation. It is essential for treatment of hernial pain, swelling and testicular pain. It treats abdominal pain caused by the Liver overacting on the Spleen and Stomach, and dysmenorrhea or postpartum pain due to blood stagnation.

Suo Luo Zi (Semen Aesculi) and ***Ba Yue Zha*** (Fructus Akebiae) regulate qi and harmonize the middle *jiao* to relieve various kinds of pain caused by qi stagnation of the Stomach, Liver, or both.

Suo Luo Zi more strongly regulates qi and harmonizes the middle *jiao*, and is often used to treat disharmony of Wood and Earth elements.

Ba Yue Zha disperses stagnation, promotes diuresis, and treats scrofulae, urinary stones and dysuria.

Gan Song (Radix seu Rhizoma Nardostachys) is warm but not hot, tonifying but not cloying, aromatic yet not drying. It is a good herb to remedy Spleen and Stomach disharmony with qi stagnation of the chest.

Jiu Ceng Ta (Herba Ocimi Basilici) regulates the middle *jiao*, promotes digestion, invigorates blood circulation, and opens channels and collaterals.

Tian Xian Teng (Herba Aristolochiae) regulates qi and blood circulation to relieve pain, and dispels heat and toxins to promote normal urination.

Dao Dou (Semen Canavaliae) and ***Shi Di*** (Calyx Kaki) are excellent for treatment of hiccups and vomiting, as they lower abnormally rising qi of the Stomach.

Dao Dou warms and tonifies the Kidney yang, and is suitable for deficiency and cold-related cases of hiccups and vomiting.

Shi Di is neutral in thermal property, and appropriate for both heat- and cold-related cases of hiccups and vomiting.

Chapter 9

— Digestive Herbs

Definition: Herbs that promote digestion function to strengthen the Spleen, enhance the appetite, promote digestion, and relieve food stagnation.

Digestive herbs promote digestion, disperse stagnation, relieve abdominal fullness, harmonize the digestive system, and strengthen the Spleen and Stomach. Signs and symptoms of digestive disorders include epigastric and abdominal fullness and distention, belching, acid regurgitation, irregular bowel movement, indigestion and weak digestion.

Shan Zha (Fructus Crataegi)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

SUBCATEGORIES OF ACTION

Herbs that promote digestion are usually sweet, and neutral or warm. They enter the Spleen and Stomach channels to strengthen the organs, harmonize the middle *jiao*, promote digestion, and eliminate food stagnation. While some herbs have a general influence to promote digestion, and others more specifically facilitate the breakdown of certain foods, they are not usually separated into subcategories beyond the designation of 'digestive.'

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Treatment of digestive problems must always include assessment of the Spleen and Stomach. However, these disorders are often accompanied by complications. While diagnosis of a digestive disorder is relatively simple, maximum treatment effectiveness will not be achieved unless one recognizes and treats the complicating factors.

- With *food stagnation* in the middle *jiao*, qi-regulating herbs should be added for maximum effectiveness.
- For *heat* secondary to food stagnation, incorporate heat-clearing herbs.
- For *damp* accumulation secondary to food stagnation, add aromatic herbs to dissolve dampness and awaken the Spleen.
- If there is accumulation of *coldness*, include interior-warming herbs.
- If Spleen or Stomach *deficiency* is causing indigestion, combine digestive herbs with qi tonics.
- In *severe cases of food stagnation*, purgative herbs can be added.

Maximum effectiveness in treatment of digestive disorders requires simultaneous treatment of complicating factors.

CAUTIONS/CONTRAINDICATIONS

Most digestive herbs are mild in nature. However, some could exhaust qi with their strong moving influence. Therefore, those herbs should be used with caution in cases of qi deficiency, weakness of the middle *jiao*, accumulation of dampness, and in the absence of food stagnation.

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal**: Herbs in this category promote digestion, stimulate the production of gastric acid, increase intestinal peristalsis, and stop the formation of gas to relieve bloating. *Shan Zha* (Fructus Crataegi) contains lipase, that promotes digestion of fat. *Mai Ya* (Fructus Hordei Germinatus), *Gu Ya* (Fructus Setariae Germinatus) and *Shen Qu* (Massa Fermentata) contain amylase, that promotes digestion of carbohydrates. *Shen Qu* also contains pancreatin, protease, yeast and vitamin B, all of which help with digestion and promote a healthier appetite. *Shen Qu* helps digest food and minimizes production of gas. *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) increases the production of gastric acid by approximately 30 to 70%. Even though *Ji Nei Jin* has a delayed onset (approximately 2 to 3 hours after ingestion), it has a prolonged duration of

Chapter 9 — Digestive Herbs

action. Administration of *Ji Nei Jin* is also associated with increased intestinal peristalsis.

- **Cardiovascular**: Some digestives have a significant impact on the cardiovascular system. *Shan Zha* (Fructus Crataegi) dilates blood vessels, increases blood perfusion to the coronary arteries, controls arrhythmia, and reduces blood cholesterol and blood pressure. Sublingual administration of *Shan Zha* extract is sometimes used to treat mild to moderate cases of angina.
- **Antibiotic**: Many of these herbs, like *Shan Zha* (Fructus Crataegi) and *Lai Fu Zi* (Semen Raphani), inhibit the activities of bacteria and dermatophytes.

POTENTIAL HERB-DRUG INTERACTIONS

- **Antiulcer agents:** Many digestive herbs stimulate the gastrointestinal system to increase the production of gastric acid. Therefore, these herbs may counter the effect of certain drugs, specifically histamine-2 receptor antagonists (such as ranitidine or famotidine) and proton-pump inhibitors (such as omeprazole or lansoprazole).

Shan Zha (Fructus Crataegi)

山楂

Pinyin Name: *Shan Zha*
Literal Name: "mountain hawthorn"
Alternate Chinese Names: *Jiao Shan Zha*, *Shan Zha Tan*
Original Source: *Ben Cao Jing Ji Zhu* (Collection of Commentaries on the Classic of the Materia Medica) by Tao Hong-Jing in 480-498 A.D.
English Name: crataegus, hawthorn berry, hawthorn fruit
Botanical Name: *Crataegus cuneata* Sieb. et Zucc. (*Ye Shan Zha*); *Crataegus pinnatifida* Bge. var. *major* N. E. Br. (*Shan Zha*)
Pharmaceutical Name: Fructus Crataegi
Properties: sweet, sour, slightly warm
Channels Entered: Liver, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Promotes Digestion, Eliminates Stagnation

Food stagnation: Sweet and sour, *Shan Zha* (Fructus Crataegi) stimulates the Spleen and Stomach to promote digestion and eliminate food stagnation, and is particularly useful against manifestations of epigastric and abdominal fullness, distention, pain and diarrhea. It is especially effective to promote digestion of red meat or oily, greasy, and fatty foods.

- Difficulty digesting meat products: use *Shan Zha* individually.
- General indigestion and food stagnation: use it with *Shen Qu* (Massa Fermentata). **Exemplar Formula:** *Bao He Wan* (Preserve Harmony Pill from the Precious Mirror).
- Indigestion with abdominal distention and pain: combine it with *Mu Xiang* (Radix Aucklandiae) and *Zhi Ke* (Fructus Aurantii).
- Indigestion with abdominal pain and diarrhea: use 10 grams of charred *Shan Zha* as herbal powder.
- Phlegm and food stagnation with palpable masses in the abdomen: add *Zhi Shi* (Fructus Aurantii Immaturus), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Shen Qu* (Massa Fermentata) and *Hong Hua* (Flos Carthami).

2. Activates Blood Circulation, Disperses Blood Stagnation

Shan Zha enters the *xue* (blood) level to activate blood circulation, reduce swelling and disperse blood stagnation. It is commonly used to treat spotting or severe abdominal pain associated with amenorrhea, and postpartum abdominal pain. It also effectively treats pain associated with hernial disorders.

- Abdominal pain associated with postpartum sequelae or amenorrhea: use *Shan Zha* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Yi Mu Cao* (Herba Leonuri).
- Pain associated with hernial disorders: use this herb with *Xiao Hui Xiang* (Fructus Foeniculi) and *Ju He* (Semen Citri Rubrum).

3. Treats Cardiovascular Disorders

In combination with herbs that activate blood circulation and remove blood stagnation, *Shan Zha* has been used recently to treat hypertension, coronary artery disorders, angina, and hypercholesterolemia.

- Hypertension: use *Shan Zha* with *Tian Ma* (Rhizoma Gastrodiae) and *Ge Gen* (Radix Puerariae).
- Coronary artery disorder: use this herb with *Dan Shen* (Radix Salviae Miltiorrhizae), and *Mao Dong Qing* (Radix Ilicis Pubescentis).
- Angina: combine this herb with *Dan Shen* (Radix Salviae Miltiorrhizae), *San Qi* (Radix Notoginseng), and *Yan Hu Suo* (Rhizoma Corydalis).
- Hypercholesterolemia: use it with *Jue Ming Zi* (Semen Cassiae) and *Jiao Gu Lan* (Rhizoma seu Herba Gynostemmatis).

DOSAGE

10 to 15 grams in decoction. The maximum dosage of *Shan Zha* is 30 grams. The unprocessed herb dissolves food stagnation and activates blood circulation. Dry-frying the herb reduces the sour taste and astringent property of the herb, thereby harmonizing the overall effect. Blackening the herb increases the bitter taste, which potentiates its effect to reduce abdominal distention and relieve diarrhea. Charring, that is, burning the herb to ash, enhances its influence to stop bleeding.

Shan Zha (Fructus Crataegi)

CAUTIONS / CONTRAINDICATIONS

- *Shan Zha* should be used with caution in patients with Spleen and Stomach deficiencies.
- Because *Shan Zha* may stimulate the production and secretion of gastric acid, it should be used with caution in patients who have gastritis or peptic ulcers.
- Prolonged intake of *Shan Zha* is not recommended as it will eventually interrupt the normal flow of Spleen and Stomach qi.

CHEMICAL COMPOSITION

Crataegolic acid, maslinic acid, chlorogenic acid, vitexin, hyperin, epicatechin, amygdalin, quercetin, ursolic acid, tartaric acid, caffeic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiotonic:** *Shan Zha* increased the contractile force of the heart by approximately 20 to 30% in studies of laboratory animals.[2]
- **Vasodilating:** Extract of *Shan Zha* has shown marked influence in dilating the coronary artery, decreasing oxygen consumption by the cardiac muscle, and reversing cardiac ischemia.[3]
- **Antihypertensive:** Injection of *Shan Zha* has been shown to decrease blood pressure by 20 to 25% in rabbits and cats, with a duration of effect of over three hours.[4]
- **Antihyperlipidemic:** *Shan Zha* has marked effectiveness for reduction of plasma cholesterol levels in laboratory animals. A preparation containing a 15% extract of *Shan Zha* reduced the plasma cholesterol levels by 18.06% with $p<0.01$, while 30% extract reduced plasma cholesterol levels by 30.80% with $p<0.005$. Its mechanism of action included enhancement of LDL-receptor activity, increased hepatic breakdown and decreased synthesis of cholesterol.[5,6]
- **Gastrointestinal:** *Shan Zha* given as herbal decoction and intramuscular injection showed marked stimulating effects on gastric acid in rats. By comparison, subjects who received the herbal decoction produced 2.9 times more gastric acid than those who received intramuscular injection.[7]
- **Antibiotic:** *Shan Zha* has demonstrated an inhibitory effect against *Staphylococcus aureus*, *Staphylococcus albus*, *Salmonella typhi*, *Pseudomonas aeruginosa*, *E. coli*, and hemolytic streptococcus.[8]

CLINICAL STUDIES AND RESEARCH

- **Angina:** Patients with angina related to coronary artery disease were treated with a preparation of *Shan Zha* three times daily, for 4 weeks per treatment course. Out of 219 patients, the study reported an overall effective rate of 92.2%, with 47.1% showing improvement based on ECG evaluation.[9]
- **Hyperlipidemia:** In one study, 127 patients were treated with powdered extract of *Shan Zha* and *Mai Ya* (Fructus Hordei Germinatus) (equivalent to 30 grams of bulk herb) twice daily for 2 weeks per treatment course. The study reported that 92% of the participants experienced a reduction of their cholesterol levels.[10] In another study, 130 patients with hyperlipidemia were treated with an herbal formulation of *Shan Zha* and other herbs, and the serum cholesterol and triglyceride levels were lowered in 87% and 80.8% of the patients, respectively.[11]
- **Acute bacterial enteritis:** Administration of *Shan Zha* once daily showed satisfactory results in treating 100 patients with acute bacterial enteritis. The herbal remedy was prepared by stir-frying 60 grams of *Shan Zha* with 30 ml of grain-based liquor, cooking the herbs for 15 minutes in 200 ml of boiling water, and adding 30 grams of brown sugar to the decoction prior to consumption.[12]
- **Infantile diarrhea:** In one report, 5 to 10 ml of *Shan Zha* syrup was given three times daily for treatment of infantile diarrhea. Out of 212 patients, 176 recovered within 2 to 3 days.[13]
- **Nephritis:** Patients with acute and chronic nephritis were treated with an herbal decoction containing 90 grams of *Shan Zha*, with 14 days per treatment course. The study reported a 91.1% rate of effectiveness in 45 patients with acute nephritis, and a 88.3% rate of effectiveness in 60 patients with chronic nephritis.[14]
- **Nausea:** Chronic nausea in 85 patients was treated with 15 ml of fresh *Shan Zha* juice three times daily. There were excellent results in most patients within one day.[15]
- **Polyps of the vocal cords:** Ten patients were treated with an herbal decoction of *Shan Zha*, with marked success. The herbal decoction was prepared by cooking 24 to 30 grams of *Shan Zha* twice, to yield 1500 ml of decoction, which was taken slowly after it cooled to room temperature.[16]

HERB-DRUG INTERACTION

- **Digoxin (Lanoxin):** Both *Shan Zha* and digoxin have marked cardiotonic effects. Therefore, concurrent use of *Shan Zha* and digoxin (Lanoxin) should be monitored carefully to avoid possible side effects.[17]

TOXICOLOGY

The LD_{50} for mice is 1.042 ml/kg, based on intravenous injectables of 100% *Shan Zha* preparation.[18]

AUTHORS' COMMENTS

Jiao San Xian (Three Charred Miracles) is the shorthand name for the combination of *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Mai Ya* (Fructus Hordei Germinatus), all charred. When charred *Bing Lang* (Semen Arecae) is added, the combination is

Shan Zha (Fructus Crataegi)

called *Jiao Si Xian* (Four Charred Miracles). These herbs are often used together because they have excellent synergy to promote digestion and eliminate food stagnation.

According to Dr. Liu Hong-Xiang, *Shan Zha*, when used in high doses for postpartum pain, constricts the uterus and helps to dispel residual blood clots that cause continued bleeding.

According to Dr. Zhang Xiao-Ping, *Shan Zha* effectively lowers cholesterol, but is not suitable for individuals who have stomach ulcers. *Shan Zha, Zi Su Ye* (Folium Perillae), *Shi Chang Pu* (Rhizoma Acori), and *Ze Xie* (Rhizoma Alismatis) taken as tea on a daily basis are effective to reduce body weight and lower cholesterol. For patients who have stomach ulcers or gastric hyperacidity with high cholesterol, the practitioner should opt for other cholesterol-reducing herbs that are not sour, such as *Jue Ming Zi* (Semen Cassiae).

Shan Zha and *Lai Fu Zi* (Semen Raphani) share similar actions to promote digestion and eliminate stagnation. *Shan Zha* more effectively promotes the digestion of meat. It also invigorates blood circulation and eliminates blood stasis. *Lai Fu Zi* treats abdominal fullness and distention caused by food stagnation and accumulation. It also eliminates phlegm and directs abnormally rising qi downwards.

Shan Zha, Mai Ya (Fructus Hordei Germinatus) and *Shen Qu* (Massa Fermentata) have similar yet different functions to promote digestion. Clinically, they are commonly charred and used together to treat food stagnation and indigestion.

- *Shan Zha* is best for food stagnation due to excess intake of meat. It is also good for palpable masses and blood stagnation in the abdomen.
- *Mai Ya* is best for food stagnation caused by inability to digest starch.
- *Shen Qu* is the most strategic choice to counter hard-to-digest foods.

Shen Qu (Massa Fermentata)

神麴 神曲

Pinyin Name: *Shen Qu*
Alternate Chinese Names: *Liu Shen Qu, Jiao Shen Qu*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: massa fermentata, medicated leaven
Pharmaceutical Name: Massa Fermentata
Properties: sweet, acrid, warm
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

Dissolves Food Stagnation, Promotes Digestion and Harmonizes the Stomach

Shen Qu (Massa Fermentata) treats poor digestion, food stagnation, poor appetite, borborygmus, diarrhea, abdominal fullness and distention. It is useful when trying to dissolve hard-to-digest food.

- Indigestion: use *Shen Qu* with *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus).
- Food stagnation and diarrhea due to Spleen deficiency: add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Dang Shen* (Radix Codonopsis).
- Food stagnation with abdominal pain: combine it with *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi).
- Chronic food stagnation with palpable masses: use it with *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Mu Li* (Concha Ostreae) and *Bie Jia* (Carapax Trionycis).

DOSAGE

6 to 15 grams. *Shen Qu* is used in herbal decoctions, pills, and powder. Unprocessed, it treats food stagnation. Dry-fried, it strengthens the Spleen and Stomach and promotes digestion. Dry-fried *Shen Qu* is the preferred form of this herb.

CAUTIONS / CONTRAINDICATIONS

- *Shen Qu* should be used with caution during pregnancy.

CHEMICAL COMPOSITION

Yeast, amylase, vitamin B, ergosterol, protein.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Shen Qu* contains many different enzymes to facilitate digestion of starches and carbohydrates.[2]

CLINICAL STUDIES AND RESEARCH

- **Infantile indigestion:** In one study, 129 infants with indigestion were treated with a 50% *Shen Qu* decoction. The decoction was given in two equally-divided portions, with the daily dosage of 5 to 10 ml for infants over one year of age, 10 to 20 ml for children between 2 and 3 years old, and other dosages adjusted accordingly for those over three years of age. The study reported an overall rate of effectiveness of 91.5%, which was better than the results for the group receiving pharmaceuticals.[3]

SUPPLEMENT

- 建神麴 / 建神曲 *Jian Shen Qu* (Massa Fermentata Preparata) is a combination of over 40 herbs fermented together, including *Zi Su Ye* (Folium Perillae), *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Hou Po* (Cortex Magnoliae Officinalis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Mu Xiang* (Radix Aucklandiae), *Zhi Shi* (Fructus Aurantii Immaturus) and others. Quite different from *Shen Qu*, *Jian Shen Qu* is bitter and warm, and functions to dissolve food stagnation, expel wind-cold, regulate qi, dissolve dampness and strengthen the Spleen. It is often used for patients with food stagnation, with or without the presence of wind-cold. The recommended dosage of *Jian Shen Qu* is 6 to 15 grams.

AUTHORS' COMMENTS

Shen Qu has a unique function to protect the stomach and promote digestion of hard-to-digest substances. It is commonly added to herbal formulas that contain hard-to-digest minerals such as *Ci Shi* (Magnetitum) and *Dai*

Shen Qu (Massa Fermentata)

Zhe Shi (Haematitum). It is helpful for patients who take drugs that are harsh to the stomach, such as non-steroidal-anti-inflammatory drugs (NSAIDS).

Shen Qu (Massa Fermentata), *Mai Ya* (Fructus Hordei Germinatus) and *Gu Ya* (Fructus Setariae Germinatus) all aid in the digestion of food.

- *Shen Qu* is specifically good for stagnation of dietary starches and is commonly used for epigastric and abdominal distention and pain, poor appetite and diarrhea. It can also help with the digestion of mineral medicinal substances.
- *Mai Ya* is best for digesting starch and fruits. It strengthens the Spleen to build the appetite. It treats indigestion, poor appetite and deficiencies of the Spleen and Stomach. It inhibits lactation and relieves Liver qi stagnation.
- *Gu Ya* has functions similar to *Mai Ya* but is milder in nature. It is more suitable to help deficiency patients with food stagnation.

Hong Qu (Monascus)

紅麴 红曲

Pinyin Name: *Hong Qu*
Alternate Chinese Names: *Hong Mi, Chi Qu*
Original Source: *Yin Shan Zheng Yao* (Correct Guide to Eating and Drinking)
English Name: red yeast rice
Botanical Name: *Monascus purpureus* Went.
Pharmaceutical Name: Monascus
Properties: sweet, acrid, warm
Channels Entered: Spleen, Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen and Stomach, Promotes Digestion

Indigestion: *Hong Qu* (Monascus) strengthens the Spleen and Stomach and promotes digestion to treat indigestion in which there is undigested food in the stool.

- Indigestion: use *Hong Qu* with *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus).
- Food stagnation due to Spleen deficiency: add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Dang Shen* (Radix Codonopsis).

2. Invigorates Blood Circulation, Eliminates Blood Stasis

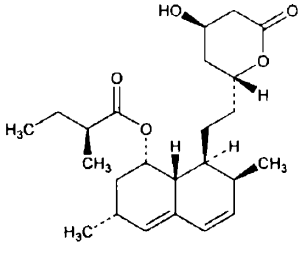
Blood stasis: *Hong Qu* activates blood circulation to treat blood stasis in postpartum women, individuals with traumatic injuries, external injuries, and abdominal pain caused by blood stasis.

- Blood stasis in the upper body: use this herb with *Jiang Xiang* (Lignum Dalbergiae Odoriferae), *Tong Cao* (Medulla Tetrapanacis), and *Mo Yao* (Myrrha).
- Pain due to trauma and injuries: combine it with *Yan Hu Suo* (Rhizoma Corydalis), *Dang Gui* (Radicis Angelicae Sinensis), *Hong Hua* (Flos Carthami), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Mo Yao* (Myrrha) and *Ru Xiang* (Gummi Olibanum).
- Abdominal pain or postpartum blood stasis: incorporate *Hong Qu* with *Ze Lan* (Herba Lycopi), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Sheng Di Huang* (Radix Rehmanniae), *Xu Duan* (Radix Dipsaci), *Pu Huang*

Hong Qu (Monascus)

(Pollen Typhae), and *Chi Shao* (Radix Paeoniae Rubrae).

DOSAGE



6 to 12 grams in decoction. *Hong Qu* is also used in powder and pill forms. It is ground into powder for topical application.

CAUTIONS / CONTRAINDICATIONS

- Use *Hong Qu* with caution in cases of Spleen and Stomach deficiency, or individuals who do not have any food stagnation or blood stasis.
- *Hong Qu* is contraindicated in individuals with active liver disease.

CHEMICAL COMPOSITION

Monascidin, monascolin I (lovastatin, mevinolin), monascolin II (β-hydroxy acid), monascin, starch, fatty acids, phytosterols, isoflavones.[1,2]

Lovastatin

PHARMACOLOGICAL EFFECTS

- **Antihyperlipidemic:** Following ingestion, monascolin I (lovastatin) is converted in the body to β-hydroxy acid, which is an HMG-CoA reductase inhibitor. This compound then inhibits cholesterol biosynthesis, leading to reduced levels of plasma total cholesterol, low-density lipoprotein cholesterol (LDL-C), very-low-density lipoprotein cholesterol (VLDL-C), and triglycerides. In addition, it may produce a slight increase in high-density lipoprotein (HDL-C).[3]

CLINICAL STUDIES AND RESEARCH

- **Hyperlipidemia:** In one multi-center, randomized, single-blind trial, 502 patients with hyperlipidemia were treated with 600 mg of *Hong Qu* twice daily (1200 mg total per day). After four weeks of treatment, the study reported 17% reduction in total cholesterol levels, 24.6% reduction in LDL-cholesterol, 19.8% decrease in triglycerides, and a 12.8% increase in HDL-cholesterol. After 8 weeks of treatment, the study reported 22.7% reduction in total cholesterol levels, 30.9% reduction in LDL-cholesterol, 34.1% decrease in triglycerides, and a 19.9% increase in HDL-cholesterol.[4]

HERB-DRUG INTERACTION

Listed below are interactions that have been documented between pharmaceuticals and lovastatin, a constituent of *Hong Qu*.[5]

- **Liver metabolism:** Lovastatin is metabolized primarily by CYP3A4, and may interact with CYP3A4 inhibitors.
- **Azole antifungals:** Concurrent use of itraconazole and ketoconazole increased lovastatin levels twenty fold in health volunteers, as well as increased the risk of myopathy.
- **Bile acid sequestrants:** Co-administration of cholestyramine decreases the bioavailability of lovastatin. To avoid this interaction, lovastatin should be taken 1 hour before or 4 hours after bile acid sequestrants.
- **Fibric acid derivatives:** Avoid concurrent use of gemfibrozil and lovastatin, as severe myopathy and rhabdomyolysis have been reported.
- **Isradipine:** Isradipine increases hepatic blood flow, and may increase the clearance of lovastatin and its metabolites.
- **Warfarin:** Bleeding and increased prothrombin time have been reported with concomitant use of lovastatin and warfarin.

AUTHORS' COMMENTS

Hong Qu is rice that has been fermented with yeast *Monascus purpureus*. The fermentation process changes the color of rice from white to red, thereby giving it the name "red yeast rice." For centuries, *Hong Qu* has been used in China as both food and herbal medicine. It has also been used as a coloring agent to prepare fish, fish sauce, fish paste, rice wine, and red soybean curd. In the late 1990s, it was introduced and used in the US as a dietary supplement to promote healthy cholesterol levels.

Most medical journals attribute the hypolipidemic effect of *Hong Qu* to one single component, lovastatin. This explanation, however, is not sufficient nor entirely accurate. The therapeutic dose of *Hong Qu* delivers approximately 7.2 mg of lovastatin, while the synthetic drug lovastatin (Mevacor) contains from 10 to 40 mg of lovastatin. Yet, despite the lower dose of the supposed active component, the hypolipidemic effects of *Hong Qu* are much greater than the synthetic drug lovastatin. Thus, it is clear that lovastatin is not the only active component, and more research needs to be done on *Hong Qu* as an herbal medicine, not just on lovastatin as a single compound.

Mai Ya (Fructus Hordei Germinatus)

麥芽　麦芽

Pinyin Name: *Mai Ya*
Alternate Chinese Names: *Sheng Mai Ya, Chao Mai Ya, Jiao Mai Ya*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: barley sprouts
Botanical Name: *Hordeum vulgare* L. (*Da Mai*)
Pharmaceutical Name: Fructus Hordei Germinatus
Properties: sweet, neutral
Channels Entered: Liver, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Food Stagnation, Promotes Digestion and Strengthens the Middle *Jiao*

Mai Ya (Fructus Hordei Germinatus) strengthens the Spleen and Stomach to enhance their functions of transformation and transportation. It is especially effective to promote digestion of starches, such as rice, noodles, wheat, yams and potatoes.

- Indigestion and food stagnation: use *Mai Ya* with *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

2. Inhibits Lactation

Mai Ya has a definite effect on lactation. Large dosages of *Mai Ya* inhibit lactation, while a small dosage may promote it.

- To inhibit or cease lactation: use 30 to 60 grams each of fresh *Mai Ya* and dry-fried *Mai Ya* on a daily basis.

3. Regulates Liver Qi

Liver qi stagnation: *Mai Ya* enters the Liver to promote the smooth flow of Liver qi and relieve qi stagnation. It treats the condition of the Liver overacting on the Spleen and Stomach, which causes feelings of distention and oppression in the hypochondriac and epigastric regions, breast distention, belching, and loss of appetite.

DOSAGE

10 to 15 grams. Up to 30 to 120 grams may be used. *Mai Ya* is commonly used in herbal decoctions, pills or powder. Use larger dosages to stop lactation.

CAUTIONS / CONTRAINDICATIONS

- Use *Mai Ya* cautiously for patients who do not have food stagnation. Prolonged usage of it may injure qi.
- For nursing mothers who desire to continue nursing their infants, large dosages of this herb are contraindicated because production of milk may be terminated.

CHEMICAL COMPOSITION

Amylase, invertase, esterase, proteinase, oxidase, catalyticase, cellobiosase, gentiobiosase, lichenase, emulsin, peroxidisomerase, hordenine, maltoxin.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Mai Ya* contains many different enzymes to facilitate digestion of starches and carbohydrates.[2]
- **Antidiabetic:** Oral ingestion of *Mai Ya* lowers blood glucose levels in human and rabbits. Furthermore, 5% intravenous injection may lower blood glucose levels by 40% or more, for up to 7 hours, in rabbits.[3]

CLINICAL STUDIES AND RESEARCH

- **Chronic hepatitis:** In one study, 161 patients with hepatitis were treated with 10 ml *Mai Ya* syrup three times daily after meals, for 30 days per treatment course. Marked improvement was reported in 48 out of 56 patients with acute hepatitis, and 60 out of 105 patients with chronic hepatitis. The study reported an overall rate of effectiveness of 67.1%. Improvements included decreased hypochondriac pain, increased appetite, elevated energy levels, and reduced liver enzymes.[4]
- **Galactorrhea:** Patients with galactorrhea were treated with 100 to 200 grams of *Mai Ya* daily in decoction or pills. The study reported that 13 of 15 patients showed complete recovery or marked improvement, while 2 reported no change.[5]

Mai Ya (Fructus Hordei Germinatus)

HERB-DRUG INTERACTION

- **Antidiabetics:** Herbs that lower plasma glucose levels, such as *Mai Ya,* should be used with caution with insulin, sulfonylureas, and other antidiabetic medications, as the combination may have a synergistic effect, leading to hypoglycemia. [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).][6]

TOXICOLOGY

The incidence of adverse reactions associated with use of *Mai Ya* is extremely rare. However, mild side effects may occur if it is used in large amounts as a primary food source for animals.[7]

AUTHORS' COMMENTS

Mai Ya (Fructus Hordei Germinatus) and *Gu Ya* (Fructus Setariae Germinatus) have similar functions to promote digestion and strengthen the middle *jiao*. *Mai Ya* more effectively promotes digestion, while *Gu Ya* more strongly nourishes the Stomach.

Gu Ya (Fructus Setariae Germinatus)

谷芽 谷芽

Pinyin Name: *Gu Ya*

Alternate Chinese Names: *Sheng Gu Ya, Chao Gu Ya, Jiao Gu Ya*

Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.

English Name: sprouted setaria, sprouted oryza, sprouted millet

Botanical Name: *Setaria italica* (L.) Beauv.; *Oryza sativa* L.

Pharmaceutical Name: Fructus Setariae Germinatus

Properties: sweet, neutral

Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Food Stagnation, Promotes Digestion and Harmonizes the Middle *Jiao*

Gu Ya (Fructus Setariae Germinatus) has a mild digestive function. It does not damage the normal qi and thus is preferred for patients with indigestion and poor appetite caused by deficiency. Clinical manifestations of this weakened state include slow digestion, decreased dietary intake, and diarrhea.

- Poor digestion due to Spleen and Stomach deficiencies: use *Gu Ya* with *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Sha Ren* (Fructus Amomi), *Gan Cao* (Radix Glycyrrhizae) and *Chen Pi* (Pericarpium Citri Reticulatae).

Gu Ya (Fructus Setariae Germinatus)

2. Strengthens the Spleen and Encourages Appetite

Spleen deficiency with poor appetite: *Gu Ya* strengthens the middle *jiao* to enhance the functions of transformation and transportation.

- Poor digestion with decreased food intake and diarrhea from Spleen and Stomach deficiencies: combine this herb with *Shen Qu* (Massa Fermentata), *Shan Zha* (Fructus Crataegi), *Bian Dou* (Semen Lablab Album), *Ze Xie* (Rhizoma Alismatis), *Fu Ling* (Poria), and *Qian Shi* (Semen Euryales).

DOSAGE

10 to 15 grams. Use up to 30 grams of this herb for severe cases. Fresh *Gu Ya* strengthens the middle *jiao*; dry-fried *Gu Ya* promotes digestion; and charred *Gu Ya* eliminates stagnation.

CHEMICAL COMPOSITION

Amylase, maltose, adenine, choline, polyamine oxidase, B vitamins, and dipeptides containing D-alanine.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Gu Ya* contains many different enzymes to facilitate digestion of starches and carbohydrates.[2]

AUTHORS' COMMENTS

Gu Ya (Fructus Setariae Germinatus) and *Mai Ya* (Fructus Hordei Germinatus) have similar functions to promote digestion and strengthen the middle *jiao*. *Gu Ya* more strongly nourishes the Stomach, while *Mai Ya* more effectively promotes digestion.

Gu Ya, Dang Shen (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) all tonify and strengthen the middle *jiao*. *Gu Ya* promotes digestion, and indirectly strengthens the middle *jiao* by decreasing the burden on the Spleen and Stomach. *Dang Shen* and *Bai Zhu*, on the other hand, tonify the Spleen and Stomach to enhance digestive functions.

Lai Fu Zi (Semen Raphani)

萊菔子 莱菔子

Pinyin Name: *Lai Fu Zi*
Alternate Chinese Names: *Luo Bo Zi*
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: raphanus, radish seed
Botanical Name: *Raphanus sativus* L. (*Lai Fu*)
Pharmaceutical Name: Semen Raphani
Properties: acrid, sweet, neutral
Channels Entered: Spleen, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Food Stagnation, Promotes Digestion and Reduces Distention

Lai Fu Zi (Semen Raphani) promotes digestion by treating food stagnation and indigestion typified by epigastric and abdominal fullness and distention, belching, acid reflux, and diarrhea.

- Indigestion and food stagnation: use *Lai Fu Zi* with *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Chen Pi* (Pericarpium Citri Reticulatae).

Lai Fu Zi (Semen Raphani)

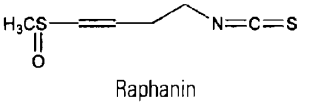
- Food stagnation with Spleen deficiency: use it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Abdominal distention: use *Lai Fu Zi* as a single remedy.

2. Descends Qi, Dissolves Phlegm

Lai Fu Zi treats coughing and wheezing resulting from phlegm stagnation and abnormal upward circulation of Lung qi. This herb is excellent for patients with profuse phlegm and food stagnation.

- Cough and wheezing due to phlegm stagnation: add *Su Zi* (Fructus Perillae) and *Bai Jie Zi* (Semen Sinapis). **Exemplar Formula:** *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents).

DOSAGE



6 to 10 grams. *Lai Fu Zi* is used in herbal decoctions, pills, or powder. Unprocessed, this herb has stronger ascending and dispersing actions, and is commonly used to eliminate phlegm. Dry-fried, the herb has a better function to counter adverse rising qi, dissolve phlegm, promote digestion, and reduce distention. In addition, dry-frying the herb enhances the extraction of active constituents.

CAUTIONS / CONTRAINDICATIONS

- *Lai Fu Zi* is contraindicated in patients with qi and blood deficiencies, or in those who do not have food stagnation.
- Use *Lai Fu Zi* with caution, as prolonged use or overdose may consume qi.
- Fresh *Lai Fu Zi* may cause nausea. This can be minimized by using it in an herbal decoction, or using the dry-fried form in pills or powder.
- *Lai Fu Zi* antagonizes the tonic effect of *Ren Shen* (Radix Ginseng); these two herbs should not be used together.

CHEMICAL COMPOSITION

Erucic acid, raphanin, β-sitosterol, oleic acid, linolenic acid, linoleic acid, glycerol sinapate.[1,2]

Raphanin

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** The minimum inhibiting concentration (MIC) of raphanin is 40 mcg/ml for *Staphylococcus aureus*, 125 mcg/ml for *Bacillus dysenteriae*, 125 mcg/ml for *Salmonella typhi*, and 200 mcg/ml for *E. coli*.[3]
- **Antihypertensive:** Intravenous injection of *Lai Fu Zi* extract has demonstrated a slow but prolonged antihypertensive effect in rabbits, cats and dogs.[4]

CLINICAL STUDIES AND RESEARCH

- **Habitual constipation:** In one report, 32 elderly patients over 60 years of age with chronic habitual constipation were treated with 30 to 40 grams of *Lai Fu Zi* powder, given with warm water two to three times daily. The herb was prepared by dry-frying it until it became golden yellow. Out of 32 patients, 20 had a bowel movement within 12 hours, 9 within 24 hours, and 3 had no bowel movement after 24 hours. The overall rate of effectiveness was 90.6%.[5]
- **Hypertension:** A study evaluating the effectiveness of *Lai Fu Zi* for treatment of hypertension in 467 patients reported reduction of blood pressure in 92% of all subjects, with 49.8% demonstrating marked effectiveness. The antihypertensive effect was attributed to either dilation of blood vessels and/or sedation of the central nervous system.[6]

TOXICOLOGY

The LD_{50} of *Lai Fu Zi* via intraperitoneal injection is 127.4 g/kg in mice, with fatality occurring within 1 hour.[7]

AUTHORS' COMMENTS

Lai Fu Zi strongly disperses qi. Thus, it antagonizes the effect of *Ren Shen* (Radix Ginseng) to build qi. These two herbs are generally not used together, as each will cancel the effect of the other. However, in cases of overdose of *Ren Shen*, use of *Lai Fu Zi* is actually beneficial, as it will alleviate many side effects and adverse reactions.

According to Dr. Wei Jia, *Lai Fu Zi* is an excellent herb to treat *bi zheng* (painful obstruction syndrome) and alleviate pain caused by excessive damp blocking the channels.

Ji Nei Jin (Endothelium Corneum Gigeriae Galli)

雞内金　鸡内金

Pinyin Name: *Ji Nei Jin*
Literal Name: "chicken inner gold"
Alternate Chinese Names: *Ji Su Zi, Ji Pi Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: gallus, chicken gizzard
Zoological Name: *Gallus gallus* domesticus Brisson. (*Ji*)
Pharmaceutical Name: Endothelium Corneum Gigeriae Galli
Properties: sweet, neutral
Channels Entered: Urinary Bladder, Small Intestine, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Promotes Digestion, Stimulates the Spleen

Indigestion, food stagnation, *gan ji* (infantile malnutrition): *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) stimulates the Spleen and Stomach, and strongly promotes digestion. It is effective for indigestion and food stagnation, including stagnation resulting from consuming meat, dairy, and starch. *Gan ji* is nutritional impairment in children, characterized by a sallow complexion, thin body appearance, abdominal distention, thinning hair, poor digestion, weakness and improper growth.

- Poor digestion, nausea and vomiting after food intake: use the dry-fried form of *Ji Nei Jin*.
- Severe indigestion and food stagnation: use this herb with *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus).
- Decreased food intake, diarrhea, and stools containing undigested food due to Spleen deficiency: use *Ji Nei Jin* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Da Zao* (Fructus Jujubae) and *Gan Jiang* (Rhizoma Zingiberis).
- *Gan ji* (infantile malnutrition): combine it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shan Yao* (Rhizoma Dioscoreae) and *Fu Ling* (Poria). These herbs can be made into pastries to improve patient compliance.

2. Consolidates *Jing* (Essence) and Prevents Leakage

Enuresis, spermatorrhea: *Ji Nei Jin* has a restraining property and is commonly used to treat leakage of body fluids, namely enuresis and spermatorrhea, caused by deficiency and cold of the Urinary Bladder.

- Enuresis or spermatorrhea caused by deficiency and cold of the Urinary Bladder: use *Ji Nei Jin* with *Sang Piao Xiao* (Ootheca Mantidis), *Tu Si Zi* (Semen Cuscutae), *Long Gu* (Os Draconis), and *Lu Rong* (Cornu Cervi Pantotrichum).
- Urinary incontinence, frequent urination, and cloudy urine from Urinary Bladder and Kidney deficiencies: use this herb with *Tu Si Zi* (Semen Cuscutae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- Spermatorrhea: use *Ji Nei Jin* individually with grain-based liquor, or in combination with *Lian Zi* (Semen Nelumbinis) and *Tu Si Zi* (Semen Cuscutae).

3. Softens Hardness, Dissolves Stones

Ji Nei Jin is commonly used to dissolve kidney or gallstones.

- Kidney stones or gallstones: add *Ji Nei Jin* to *Jin Qian Cao* (Herba Lysimachiae), *Yu Jin* (Radix Curcumae), *Hai Jin Sha* (Herba Lygodii) and *Shi Wei* (Folium Pyrrosiae).

DOSAGE

3 to 10 grams in decoction, 1.5 to 3.0 grams in powder. Powdered *Ji Nei Jin* is more effective than decoction. Dry-frying enhances its effect to strengthen the Spleen and promote digestion. Vinegar-frying does the same, and eliminates the odor.

CAUTIONS / CONTRAINDICATIONS

- Because *Ji Nei Jin* has a strong stimulant effect on the Spleen and Stomach, it should be used with caution in Spleen-deficient patients, or in those without food stagnation.

CHEMICAL COMPOSITION

Ventriculin, pepsin, protein, amylase, amino acids (lysine, arginine, threonine, glutamic acid, valine, leucine, isoleucine, and phenylalanine).[1]

PHARMACOLOGICAL EFFECTS

- **Effect on elimination of strontium:** Oral ingestion of *Ji*

Ji Nei Jin (Endothelium Corneum Gigeriae Galli)

Nei Jin in decoction increases the urinary excretion of strontium by two to three times over the average.[2]

CLINICAL STUDIES AND RESEARCH

- **Indigestion:** In healthy volunteers, 5 grams of *Ji Nei Jin* powder taken orally showed an increase in peristalsis, and gastric emptying time, and a 30 to 37% increase in gastric acid production after 45 to 60 minutes. Gastric acid levels returned to normal after 2 hours.[3]
- **Flat warts:** Ten patients were treated with a *Ji Nei Jin* solution applied topically five to six times daily for 10 days, with good results. The solution was prepared by soaking 20 grams of *Ji Nei Jin* in 200 ml of water for 2 to 3 days.[4]

AUTHORS' COMMENTS

Ji Nei Jin, *Shan Zha* (Fructus Crataegi), and *Lai Fu Zi* (Semen Raphani) all dissolve food stagnation and promote digestion.

- *Ji Nei Jin*, besides treating food stagnation, helps to dissolve urinary stones and gallstones.
- *Shan Zha* is strongest to assist digestion of meat, and oily or greasy foods. It also activates blood circulation and treats palpable masses in the abdomen. Recently, it has been used to lower cholesterol and treat cardiovascular disorders.
- *Lai Fu Zi* is stronger for relief of abdominal fullness and distention. It also dissolves phlegm and relieves cough and dyspnea.

Chapter 9 summary

— Digestive Herbs

Name	Similarities	Differences
Shan Zha (Fructus Crataegi)	Dissolve food, strengthen the Stomach	Digests meat, disperses blood stagnation
Shen Qu (Massa Fermentata)		Breaks down hard-to-digest foods, protects the Stomach
Hong Qu (Monascus)		Invigorates blood circulation, eliminates blood stasis
Mai Ya (Fructus Hordei Germinatus)		Digests starch, inhibits lactation
Gu Ya (Fructus Setariae Germinatus)		Digests starch, best for weak patients
Lai Fu Zi (Semen Raphani)		Relieves fullness and distention, lowers Lung qi and dispels phlegm
Ji Nei Jin (Endothelium Corneum Gigeriae Galli)		Strong digestive function, consolidates *jing* (essence), dissolves stones

General Characteristics of Digestive Herbs:

Taste: sweet
Thermal property: neutral or warm
Channels entered: Spleen, Stomach
Therapeutic actions: promote digestion, strengthen the middle *jiao*

Digestive herbs treat food stagnation and indigestion in cases of either excess or deficiency. Some have direct effect to digest food, others strengthen the Spleen and Stomach to indirectly promote digestion.

Sweet, sour and slightly warm, ***Shan Zha*** (Fructus Crataegi) strengthens the Spleen, improves appetite, promotes digestion of meat and breaks blood stagnation. It is used for postpartum pain and bleeding, hernial pain and food stagnation. It also has good effect to lower blood cholesterol levels and treat cardiovascular diseases.

Shen Qu (Massa Fermentata), ***Mai Ya*** (Fructus Hordei Germinatus) and ***Gu Ya*** (Fructus Setariae Germinatus) enter the Spleen and Stomach channels to dissolve food, harmonize the middle *jiao* and treat food stagnation. Generally speaking, unprocessed digestive herbs harmonize the middle *jiao*, dry-fried herbs facilitate digestion of food, and when charred, they resolve stagnation.

Shen Qu is best for food stagnation that is hard to digest. It is often used in formulas containing minerals, to facilitate digestion.

Mai Ya is weaker in action but focuses on digesting rice, starch and noodles. Interestingly, small doses of *Mai Ya* promote lactation while large doses inhibit it.

Gu Ya is the mildest and most suitable for Spleen and Stomach deficient patients.

Shen Qu (Massa Fermentata) and ***Hong Qu*** (Monascus) are both fermented herbs with similar functions to promote digestion.

Shen Qu promotes digestion to treat food stagnation. It also protects the stomach from hard-to-digest substances.

Hong Qu invigorates blood circulation to resolve blood stasis. It also is excellent to treat hyperlipidemia.

Lai Fu Zi (Semen Raphani) more effectively addresses epigastric and abdominal fullness and distention. It redirects Lung qi downwards to treat cough, dyspnea and profuse phlegm.

Chapter 9 summary

Ji Nei Jin (Endothelium Corneum Gigeriae Galli) is sweet and neutral. It strengthens the Spleen, dissolves food, and dissolves urinary stones and gallstones.

Chapter 10

— Antiparasitic Herbs

Definition: These herbs act to kill and expel parasites, relieve pain, and reduce stagnation. Applications for these herbs include treatment of internal and external parasites, such as roundworm, hookworm, tapeworm, and ringworm.

Causes of parasitic infestations include accumulation of damp-heat, and ingestion of parasites or parasite eggs. Clinical manifestations include poor appetite, frequent intake of food without satisfying hunger, emaciation, intermittent para-umbilical pain, vomiting of clear fluids, pale or cyanotic facial complexion, a peeled tongue, and an alternating forceful and weak pulse. When a parasitic condition goes untreated or is not treated properly, one sees sallow complexion, emaciation, and abdominal enlargement with obvious visible veins: expressions of the malnutrition that results from the infestation.

Lei Wan (Omphalia)
Ben Cao Gang Mu (Materia Medica),
by Li Shi-Zhen, 1578 A.D.

SUBCATEGORIES OF ACTION

Herbs that expel parasites usually enter the Spleen, Stomach, and Large Intestine channels. They should be administered on an empty stomach. In addition, patients must avoid oily or greasy food during treatments. Purgative herbs are often added to help with the expulsion of parasites. There are no subcategories of action in this instance, but optimal treatment of parasitic infestations requires awareness of specific indications, possible toxicity, and dosage adjustment for patients of different ages.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Different parasites may have different clinical presentations. Historically, diagnosis of parasitic infection was based primarily on presentation of signs and symptoms. Today, diagnosis can be additionally confirmed by stool examination for the presence of parasites or eggs.

Unique Symptomology of Parasitic Infestations

Parasite	Clinical Presentation
Roundworm	Red and white dots on the mucous membranes of the mouth; white flakes and segments appearing in the stools
Pinworm	Anal itching, often worse at night
Hookworm	Sallow facial appearance, cravings for unusual foods, a marked change in appetite, and uncharacteristic weakness and swelling

When using antiparasitic herbs, one should take into consideration the type of parasite, the patient's constitution, the severity of the disorder, and what other herbs are appropriate. Antiparasitic herbs are often combined with interior-warming herbs in cold conditions. For patients with fever or heat sensations, heat-clearing herbs should be used. If the patient has alternating chills and fever, both interior-warming and heat-clearing herbs should be used. If the condition is acute and severe, purgative herbs are added. If the condition is chronic, the addition of tonic herbs may be helpful.

When a parasitic condition goes untreated . . . malnutrition results.

Chapter 10 — Antiparasitic Herbs

CAUTIONS/CONTRAINDICATIONS

- Antiparasitic herbs should be used with caution during pregnancy, in elderly patients, or in individuals with Spleen and Stomach deficiencies.
- Many antiparasitic herbs have some degree of toxicity. They must be used with caution to avoid damaging the qi or causing toxic side effects.

PHARMACOLOGICAL EFFECTS

Antiparasitic herbs should be used with caution, as many have some degree of toxicity.

- **Antiparasitic**: These herbs have marked effectiveness to kill and expel intestinal parasites. Most exert their effect via paralyzing the muscles of the parasites, leading to the death or expulsion of the parasites (paralyzed muscle would mean the parasites cannot physically attach to the intestines to remain inside the host). Some herbs are also effective for topical parasitic infestations, such as ringworm. Individual herb monographs include details on the sensitivity of various parasites to the herbs.
- **Effects on smooth muscle**: Some herbs have a pronounced effect on the smooth muscle of the lungs or uterus. *Bing Lang* (Semen Arecae) increases peristalsis of the intestines, constricts bronchi, dilates blood vessels, and lowers blood pressure. *Fei Zi* (Semen Torreyae) and *Guan Zhong* (Rhizoma Dryopteridis) stimulate smooth muscle, leading to uterine contraction. Use of these herbs during pregnancy increases the risk of miscarriage.
- **Antibiotic**: Some herbs show excellent inhibitory effects against dermatophytes, such as *Shi Jun Zi* (Fructus Quisqualis), *Ku Lian Pi* (Cortex Meliae), *Bing Lang* (Semen Arecae) and *Wu Yi* (Fructus Ulmi Praeparatus).
- **Antineoplastic**: Some antiparasitics inhibit the growth of cancer cells, especially in uterine cancer.
- **Toxicity**: Many of these herbs have some degree of toxicity and may cause adverse reactions such as nausea, vomiting, edema, inflammation, abscess, ulceration, internal bleeding, sedation, diarrhea, visual disturbance, tremor, or seizures. Herbs that are to be used with caution include *Ku Lian Pi* (Cortex Meliae), *Bing Lang* (Semen Arecae), and *Guan Zhong* (Rhizoma Dryopteridis).

POTENTIAL HERB-DRUG INTERACTIONS

Herbs that expel parasites are generally used only if necessary, and only for a short period of time. Because of this relatively infrequent usage, there are no known or documented herb-drug interactions. However, because many antiparasitic herbs are toxic to both the parasite and the host (humans), those herbs should always be used with caution.

Shí Jun Zí (Fructus Quisqualis)

使君子

Pinyin Name: *Shi Jun Zi*
Literal Name: "envoy seeds"
Alternate Chinese Names: *Jun Zi*
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: quisqualis, rangoon creeper fruit
Botanical Name: *Quisqualis indica* L. (*Shi Jun Zi*)
Pharmaceutical Name: Fructus Quisqualis
Properties: sweet, warm
Channels Entered: Spleen, Stomach
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Kills Parasites

Roundworms: *Shi Jun Zi* (Fructus Quisqualis) is sweet, aromatic and moistening. It gently lubricates the intestines and kills parasites. It is mild in action and especially suitable for weaker patients or children, to dispel parasites and relieve abdominal pain.

- Roundworms: remove the shell and crush the contents into a fine powder. Mix it with rice water and serve on an empty stomach at 5 a.m. or in the early morning.

2. Strengthens the Spleen and Relieves Stagnation

***Gan ji* (infantile malnutrition):** *Shi Jun Zi* kills intestinal parasites, strengthens the middle *jiao,* and improves the overall health of children with malnutrition caused by parasitic infection.

- *Gan ji* with food stagnation: use *Shi Jun Zi* with *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Shen Qu* (Massa Fermentata).
- *Gan ji* accompanied by Spleen qi deficiency and weakness: use this herb with *Ren Shen* (Radix Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- *Gan ji* and abdominal bloating: use it with *Zhi Ke* (Fructus Aurantii) and *Bing Lang* (Semen Arecae).
- *Gan ji* with constipation: add *Da Huang* (Radix et Rhizoma Rhei).

DOSAGE

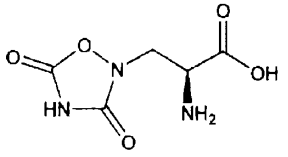
6 to 10 grams. Take *Shi Jun Zi* on an empty stomach for at least 2 to 3 days. Crush *Shi Jun Zi* before decocting, to enhance extraction of active constituents. Traditionally, the dosage used is one seed of *Shi Jun Zi* for a one-year-old, adding one seed for each additional year of age. However, do not exceed 20 seeds a day.

CAUTIONS / CONTRAINDICATIONS

- Use of *Shi Jun Zi* is contraindicated with all teas, including black tea, green tea, oolong tea and others. Serving this herb with hot tea will cause vomiting, nausea and diarrhea. Nausea, hiccups and vomiting can usually be resolved by stopping the intake of this herb. When necessary, one can chew *Ding Xiang* (Flos Caryophylli) or *Gan Cao* (Radix Glycyrrhizae) to clear those unwanted side effects.
- Allergic reactions are sometimes associated with the use of *Shi Jun Zi.* Characteristic symptoms include purple and red skin rashes, with or without itching and pain, ankle swelling and pain, lethargy, poor appetite, slight increase in body temperature, and possibly hematochezia.

OVERDOSAGE

Gross overdose of *Shi Jun Zi* is characterized by headache, dizziness, vertigo, nausea, vomiting, diarrhea, abdominal pain, perspiration, and cold extremities. In severe cases, there may be seizures, convulsions, dyspnea, and decreased blood pressure. To avoid overdose, keep dosages under 20 seeds per day.[1]



TREATMENT OF OVERDOSAGE

Overdose of *Shi Jun Zi* is treated with a decoction of *Ding Xiang* (Flos Caryophylli) and *Gan Cao* (Radix Glycyrrhizae).

Shi Jun Zi (Fructus Quisqualis)

CHEMICAL COMPOSITION

Quisqualic acid, potassium quisqualate, cyanidin monoglycoside, trigonelline.[2,3]

Quisqualic Acid

PHARMACOLOGICAL EFFECTS

- **Antiparasitic**: Administration of *Shi Jun Zi* showed a marked ability to paralyze, but not kill, roundworms in pigs. The water extract of the herb was effective, but alcohol extract or crude powder were not. Potassium quisqualate is generally considered to be the main active constituent. The powder of *Shi Jun Zi* is also effective against pinworm.[4,5]
- **Antibiotic:** *Shi Jun Zi* has an inhibitory effect *in vitro* against various pathogenic fungi and dermatophytes.[6]

CLINICAL STUDIES AND RESEARCH

- **Roundworm infestation:** In a clinical study, 194 patients with roundworms were divided into two groups and treated with separate preparations of *Shi Jun Zi*. The first group of 10 patients received the dry-fried form twice daily for 2 days. Roundworms were expelled in 100% of the patients. A second group of 184 patients received pills (prepared by mixing the crude powder with honey) twice daily for 3 days. Roundworms were expelled in 80.89% of the patients.[7]
- **Pinworm infestation:** Patients with pinworm infestations were successfully treated using a *Shi Jun Zi* preparation. The treatment protocol was to dry fry the herb until it turned yellowish. The patients were instructed to take the herb 30 minutes before meals, three times daily, for 15 days per course of treatment, followed by one month of rest, and continue for another course of treatment if necessary. Daily dosage of *Shi Jun Zi* used in this study was 15 to 30 seeds for adults, and 3 to 15 seeds for children. Patients were instructed to avoid tea before and after ingestion of herbs.[8]
- **Trichomoniasis:** According to one study, 7 patients with intestinal trichomoniasis were treated with dry-fried *Shi Jun Zi* with good results. The daily dosage was 3 grams in infants under 1 year of age, 1.5 grams for infants between 1 and 3 years old, and 15 grams for adults. The herbs were given in 1 or 2 equally-divided doses. The duration of treatment was 3 to 5 days, followed by 3 to 5 days of rest, for a total of 1 or 2 courses of treatments. The study reported complete recovery in all 3 adults after 1 course of treatment, and in all 4 infants after 2 to 3 courses of treatment.[9]

TOXICOLOGY

Shi Jun Zi has little toxicity when given orally in therapeutic doses. Toxicity, however, has been observed following overdose and in non-oral administrations. In one study, subcutaneous injection of water extract of *Shi Jun Zi* in mice was associated with convulsions, respiratory depression and fatality within several minutes. With overdose at 26.6 g/kg of crude powder in dogs, side effects such as nausea, vomiting, diarrhea and gastrointestinal disturbances were observed.[10]

AUTHORS' COMMENTS

There are numerous herbs with antiparasitic activities, such as *Bing Lang* (Semen Arecae), *Chuan Lian Zi* (Fructus Toosendan), *Lei Wan* (Omphalia), and *Wu Zhu Yu* (Fructus Evodiae). *Shi Jun Zi* is considered the strongest and most potent of the group.

Shi Jun Zi and *Ku Lian Pi* (Cortex Meliae) are both commonly used to kill parasites. *Shi Jun Zi* is sweet, less toxic, and tonifies the Spleen while killing parasites. For that reason, it is more suitable for children. *Ku Lian Pi* is stronger in killing parasites, especially the fresh form. However, it is more toxic and slight overdose may result in problems. See *Ku Lian Pi* monograph for additional information.

Ku Lian Pi (Cortex Meliae)

苦楝皮 苦楝皮

Pinyin Name: *Ku Lian Pi*
Literal Name: "bitter Chinaberry tree bark"
Alternate Chinese Names: *Ku Lian Gen Pi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: melia bark, Sichuan chinaberry bark, chinaberry tree bark
Botanical Name: *Melia toosendan* Sieb. et Zucc. (*Chuan Lian Shu*); *Melia azedarach* L.(*Lian Shu*)
Pharmaceutical Name: Cortex Meliae
Properties: bitter, cold
Channels Entered: Liver, Spleen, Stomach
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Kills Parasites

Ku Lian Pi (Cortex Meliae) exerts good antiparasitic action against infestations of hookworms, pinworms, and roundworms.

- Hookworm: use this herb with *Bing Lang* (Semen Arecae) and serve with honey before bedtime, on an empty stomach, for two days.
- Pinworm: use it with *Bai Bu* (Radix Stemonae) and *Wu Mei* (Fructus Mume) as an enema one time every night for two to four nights.
- Parasites: the combination of powdered *Ku Lian Pi*, *Ku Shen Gen* (Radix Sophorae Flavescentis), *She Chuang Zi* (Fructus Cnidii) and *Zao Jiao* (Fructus Gleditsiae) can be inserted into the rectum or vagina to kill parasites.

2. Trichomonas Infection

Ku Lian Pi is used as an external wash or douche to treat trichomonas infection.

3. Treats Tinea Infections and Sores

Ku Lian Pi is commonly used topically to treat various infections.

- Tinea and sores: use *Ku Lian Pi* alone as a powder and mix with vinegar or tea tree oil for topical applications. Use every other day for three to four applications, to relieve itching.

Toothache and painful gums can be treated with administration of *Ku Lian Pi* decoction as a mouthwash.

DOSAGE

6 to 15 grams, up to 60 grams when used alone. *Ku Lian Pi* can be used in decoction, pill or powder forms. The dose for the fresh herb is 15 to 30 grams. Dosage should be adjusted appropriately for children of different ages.

CAUTIONS / CONTRAINDICATIONS

- *Ku Lian Pi* is toxic and should not be administered in large dosages.
- Those with deficiency and cold of the Spleen and Stomach should only use *Ku Lian Pi* with caution.
- *Ku Lian Pi* should be used with extreme caution in patients with pre-existing cardiovascular disease, hepatic disease, or peptic ulcers.

OVERDOSAGE

Overdose of *Ku Lian Pi* is characterized by dizziness, headache, desire for sleep, nausea, vomiting, abdominal distention and pain, diarrhea, palpitations, tachycardia, perspiration, pale face, cyanotic lips, and a weak pulse. In severe cases, there may be gastrointestinal bleeding, jaundice, hepatomegaly, elevated liver enzymes, toxic hepatitis, disorientation, and visual impairment. *Ku Lian Pi* has a narrow range of safety index, as adverse reactions may occur at therapeutic doses.[1]

TREATMENT OF OVERDOSAGE

In cases of *Ku Lian Pi* overdose, immediately induce vomiting and perform gastrolavage. When necessary, administer a heavy dose of purgative herbs, egg whites, activated charcoal, or flour. Intravenous infusion of glucose or dextrose are also beneficial to replenish lost fluids.

Mild cases of overdose can be treated with an herbal formula with 120 grams of *Lu Dou* (Semen Phaseoli Radiati), 60 grams of *Long Yan Rou* (Arillus Longan), and 15 grams of *Gan Cao* (Radix Glycyrrhizae).

For cases of bleeding (hematochezia and hematuria),

Ku Lian Pi (Cortex Meliae)

use an herbal decoction to clear heat and cool blood with *Xue Yu Tan* (Crinis Carbonisatus) 6-9g, *San Qi* (Radix Notoginseng) 3-6g, *Sheng Di Huang* (Radix Rehmanniae) 30g, and *Mu Dan Pi* (Cortex Moutan) 15g.

If adverse reaction is characterized by spasms and convulsion, administer 1.5 grams of *Quan Xie* (Scorpio) and 2 pieces of *Wu Gong* (Scolopendra) by mixing the powders with water.

· Patients in shock can be treated with an herbal decoction of *Ren Shen* (Radix Ginseng) 9g, *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) 9g, *Shu Di Huang* (Radix Rehmanniae Preparata) 12g, *Long Gu* (Os Draconis) 15g, *Mu Li* (Concha Ostreae) 15g, and *Shan Zhu Yu* (Fructus Corni) 15g.

CHEMICAL COMPOSITION

Toosendanin.[2]

PHARMACOLOGICAL EFFECTS

- **Antiparasitic:** Toosendanin has a marked antiparasitic effect. At high concentrations, it effectively paralyzes the muscles of intestinal parasites, leading to their expulsion.[3]
- **Respiratory:** Toosendanin has an inhibiting influence on the respiratory system in animal studies. Following intramuscular injection, respiration slowed down in 60 minutes and stopped in 120 minutes. Following intravenous injection, respiration slowed down in 10 minutes and stopped in 30 minutes. The respiratory depression is attributed to the action of toosendanin on the central nervous system in the brain.[4]
- **Gastrointestinal:** Administration of toosendanin is associated with an increase in intestinal peristalsis and contraction. In large doses, it may lead to spasms and cramps.[5]

CLINICAL STUDIES AND RESEARCH

- **Roundworm infestation:** In a comprehensive study of the treatment of intestinal parasitic infestation, 4,757 patients with roundworm infestation were treated with two different preparations of *Ku Lian Pi* for 2 to 3 days with an overall rate of effectiveness of 93.6%. Patients received either decoction or pills. The decoction was prepared by cooking the herb to yield a 50% solution. Patients were instructed to take 40 to 60 ml of the decoction on an empty stomach before bedtime and in the morning. The pills were prepared from powdered extract with each pill containing 0.45 grams of herb. Patients were instructed to take 4 to 8 pills on an empty stomach before bedtime and in the morning. Though the treatment was effective, side effects were reported in 35.2% of the patients. Side effects included dizziness, headache, abdominal pain, diarrhea, nausea, vomiting, blurred vision, lethargy, and numbness of the extremities.[6]
- **Vaginal trichomoniasis:** Patients with vaginal trichomoniasis were treated with a topical application of *Ku Lian Pi* with great success. In the first study, 200 grams of the herb were cooked in 1,000 to 1,500 ml of water for 20 minutes. The treatment protocol was to first instill 5 ml of the solution into the vagina, followed by insertion into the vagina of a gauze ball soaked with the solution, that was removed the following day. Out of 27 patients, most reported improvement after 5 to 10 treatments.[7]

TOXICOLOGY

Overdose of toosendanin is associated with edema, ulceration, nausea, vomiting, elevated liver enzymes and liver damage in dogs, rabbits, mice and monkeys. With gross overdose, decreased blood pressure, internal bleeding, and fatality have been observed in animals. Sensitivity varies depending on the animals studied. The LD_{50} for oral ingestion of toosendanin is 244 mg/kg in mice, 120 mg/kg in rats, and 3 to 4 mg/kg in cats.[8]

AUTHORS' COMMENTS

Ku Lian Pi and *Shi Jun Zi* (Fructus Quisqualis) are both commonly used to kill parasites. The fresh form of *Ku Lian Pi* is markedly stronger in killing parasites. However, *Ku Lian Pi* is more toxic and must be used with extreme caution. Slight overdose of *Ku Lian Pi* may result in dizziness, headache, desire to sleep, nausea or abdominal pain. In severe cases, side effects may include internal bleeding, toxic hepatitis, disorientation, and visual impairment. *Shi Jun Zi* is sweet, less toxic than *Ku Lian Pi* and tonifies the Spleen while killing parasites. For that reason, *Shi Jun Zi* is more suitable for children.

Bing Lang (Semen Arecae)

檳榔　槟榔

Pinyin Name: *Bing Lang*
Alternate Chinese Names: *Jian Bing, Da Fu Zi, Hai Nan Zi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: areca seed, betel nut
Botanical Name: *Areca catechu* L. (*Bing Lang*)
Pharmaceutical Name: Semen Arecae
Properties: acrid, bitter, warm
Channels Entered: Large Intestine, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Kills Parasites

Bing Lang (Semen Arecae) treats various types of intestinal parasites, such as tapeworms, pinworms, fasciolopsis, roundworms and blood flukes. It is especially effective in treatment of tapeworms. *Bing Lang* is a very effective herb because it has both antiparasitic and purgative effects.

- Intestinal parasites: use *Bing Lang* with *Nan Gua Zi* (Semen Cucurbitae Moschatae), *Shi Jun Zi* (Fructus Quisqualis) and *Da Huang* (Radix et Rhizoma Rhei).
- Fasciolopsiasis: use it with *Wu Mei* (Fructus Mume) and *Gan Cao* (Radix Glycyrrhizae).
- Intestinal obstruction due to parasites: combine this herb with *Hu Jiao* (Fructus Piper), *Ku Lian Pi* (Cortex Meliae) and *Ming Fan* (Alumen).

2. Dissipates Stagnation and Promotes the Movement of Qi

Qi and food stagnation: Dampness accumulation secondary to qi and food stagnation may cause abdominal fullness and distention, constipation or diarrhea, rectal tenesmus, dysentery, chest congestion, fullness and stifling sensations, wheezing with phlegm, belching, organomegaly, benign masses, cysts, and muscle tension and ascites in severe cases. *Bing Lang* functions to send stagnant qi downward from the highest part of the body to the lowest. It is at its best when used to treat qi reversal or stagnation in the upper *jiao*.

- Chest congestion: use *Bing Lang* with *Zhi Ke* (Fructus Aurantii), *Su Geng* (Caulis Perillae), *Huo Xiang* (Herba Agastache) and *Hou Po* (Cortex Magnoliae Officinalis).
- Wheezing with phlegm: use it with *Ting Li Zi* (Semen Descurainiae seu Lepidii).
- Belching and nausea: combine it with *Dai Zhe Shi* (Haematitum) (pre-decoct), *Xuan Fu Hua* (Flos Inulae), *Su Zi* (Fructus Perillae), *Zhu Ru* (Caulis Bambusae in Taenia) and *Ban Xia* (Rhizoma Pinelliae).
- Abdominal distention with constipation: use this herb with *Hou Po* (Cortex Magnoliae Officinalis), *Zhi Shi* (Fructus Aurantii Immaturus) and *Da Huang* (Radix et Rhizoma Rhei).
- Rectal tenesmus: add *Mu Xiang* (Radix Aucklandiae) and *Hou Po* (Cortex Magnoliae Officinalis).
- Organomegaly, masses and cysts: use *Bing Lang* with *Mu Li* (Concha Ostreae), *Lai Fu Zi* (Semen Raphani), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae) and *Yu Jin* (Radix Curcumae).
- Ascites: use this herb with *Fu Ling* (Poria), *Zhu Ling* (Polyporus), *Ze Xie* (Rhizoma Alismatis) and *Dong Gua Pi* (Exocarpium Benincasae).
- Dysentery: use this herb with *Huang Lian* (Rhizoma Coptidis), *Mu Xiang* (Radix Aucklandiae) and *Chi Shao* (Radix Paeoniae Rubrae).

3. Promotes Urination

Bing Lang promotes normal urination to eliminate water stagnation. It treats edema and leg *qi*.

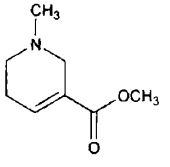
- Edema of the lower limbs, leg *qi*: use it with *Zi Su Ye* (Folium Perillae), *Chen Pi* (Pericarpium Citri Reticulatae), *Mu Gua* (Fructus Chaenomelis) and *Fen Fang Ji* (Radix Stephaniae Tetandrae).

4. Relieves Nausea

Bing Lang is often combined with *Chang Shan* (Radix Dichroae) for treatment of malaria. *Bing Lang* relieves nausea and vomiting to improve patient compliance in taking herbal medicines, and to enhance overall effectiveness. *Chang Shan* has antimalarial action, but may cause nausea and vomiting if administered alone.

Bing Lang (Semen Arecae)

DOSAGE



6 to 15 grams for general application, 60 to 120 grams for treatment of parasites. Soak the herb in water before decocting, for best results against parasites. *Bing Lang* is usually used in decoctions, pills or powder. The unprocessed herb has a better function to redirect qi downwards and reduce stagnation. The dry-fried form has a more moderate action, and is less likely to cause irritation to the Spleen and Stomach. The charred herb is better to stop bleeding and treat bloody dysentery. The antiparasitic effect of *Bing Lang* against roundworms becomes less effective when the herb is cooked in hot water.[1]

CAUTIONS / CONTRAINDICATIONS

- Use *Bing Lang* with caution for patients who have qi deficiency, loose stools, qi prolapse or those with a weak Spleen and Stomach.
- *Bing Lang* should be used with caution during pregnancy, due to its teratogenic and fetotoxic effects, as shown in mice.[2]

CHEMICAL COMPOSITION

Areca red, arecoline, arecaine, guracine, guvacoline, arecolidine, homoarecoline.[3,4]

Arecoline

PHARMACOLOGICAL EFFECTS

- **Antiparasitic:** Both water and alcohol extracts of *Bing Lang* have demonstrated marked impact in paralyzing liver flukes. Therapeutic effects vary depending on the concentration of the final solution. Concentrations of $1x10^{-2}$ and $1x10^{-3}$ were determined to be the most effective.[5]
- **Antiparasitic:** *Bing Lang* has a strong antiparasitic effect against various intestinal parasites, including but not limited to tapeworm, roundworm, and hookworm. According to one study, a 30% solution of *Bing Lang* can kill tapeworms in dogs within 40 minutes. In another study, a preparation of *Bing Lang* effectively paralyzed tapeworms in cows and pigs.[6,7]
- **Antihypertensive:** According to studies by Inokuchi, administration of Areca II-5-C acts as an angiotensin-converting enzyme (ACE) inhibitor that shows marked antihypertensive functions. Direct comparison between Areca II-5-C and captopril showed that both substances have comparable effects in reducing blood pressure.[8]
- **Gastrointestinal:** Arecoline increases production of gastric acid, increases intestinal peristalsis, and increases appetite. In one study, decoction of *Bing Lang* at 9.98 g/kg induced diarrhea within 65 minutes to expel parasites. In another study, a 20% injection of *Bing Lang* was associated with stimulation of and increased contractility of the gallbladder, in cats and dogs. When used with *Da Huang* (Radix et Rhizoma Rhei), the combination stimulated the expulsion of gallstones. Lastly, arecoline stimulated smooth muscle and led to uterine contraction in rabbits.[9,10,11]

CLINICAL STUDIES AND RESEARCH

- **Roundworm infestation:** Patients with roundworms were treated with an herbal formula containing 9 grams each of *Bing Lang* and *Lei Wan* (Omphalia). The herbs were cooked in 200 ml of water to yield 40 ml of the final solution. Patients were instructed to take the decoction in the morning on an empty stomach followed by breakfast two hours later. All patients received 3 days of treatment, followed by 5 to 7 days of rest, and concluded by 3 more days of treatment. The study reported successful expulsion of roundworms in 22 out of 36 patients.[12]
- **Blood flukes:** An herbal decoction was used effectively to treat 400 patients with blood flukes. The herbal formula contained 45 grams of *Bing Lang* and 45 grams of *Cang Er Cao* (Herba Xanthii), cooked to yield 60 ml of the final decoction. The patients were instructed to take the herbs twice daily for 20 days per course of treatment.[13]
- **Hookworm infestation:** In one study, 24 patients with hookworm were successfully treated with a formula consisting of 30 grams of *Bing Lang*, 15 grams of *Nan Gua Zi* (Semen Cucurbitae Moschatae), and 30 grams of brown sugar. The patients were instructed to take the herbal decoction in the morning on an empty stomach for 3 days, followed by 1 week of rest, and conclude with another 3 days of treatment.[14]
- **Fasciolopsiasis:** Treatment of 370 patients with an herbal formula resulted in an 87.03% rate of effectiveness. The herbal formula contained arecoline, pharbitin, and crude powder of *Bing Lang*.[15]

HERB-DRUG INTERACTION

- **Antipsychotics:** It has been suggested that an exacerbation of extrapyramidal effects may occur with concurrent use of neuroleptic drugs and betel nuts. Two cases of severe extrapyramidal symptoms were reported when patients with chronic schizophrenic disorders treated with depot neuroleptics also consumed a heavy dose of betel nuts for a long period of time.[16,17] [Note: Examples of antipsychotics include chlorpromazine (Thorazine), fluphenazine (Prolixin), thioridazine (Mellaril), and haloperidol (Haldol).]

Bing Lang (Semen Arecae)

TOXICOLOGY

Administration of *Bing Lang* in animals is associated with such side effects as salivation, diarrhea, increased respiration, restlessness and seizures. The LD_{50} for oral ingestion of *Bing Lang* decoction in mice is 120 g/kg.[18,19]

AUTHORS' COMMENTS

Bing Lang has both antiparasitic and purgative functions. Because it kills several kinds of parasites, it is one of the most commonly-used antiparasitic herbs. It also breaks up or moves qi to relieve stagnation. It has recently been used to treat post-surgical bloating and distention of the abdomen with good results.

Nan Gua Zi (Semen Cucurbitae Moschatae)

南瓜子

Pinyin Name: *Nan Gua Zi*
Literal Name: "southern fruit seed," "southern melon seeds"
Alternate Chinese Names: *Nan Gua Ren, Bai Gua Zi*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: pumpkin seed, cushaw seed
Botanical Name: *Cucurbita moschata* Duch. (*Nan Gua*)
Pharmaceutical Name: Semen Cucurbitae Moschatae
Properties: sweet, neutral
Channels Entered: Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Kills Parasites

Nan Gua Zi (Semen Cucurbitae Moschatae) has a proven, reliable antiparasitic effect, especially against tapeworms and roundworms. Furthermore, it is safe and has minimal side effects. It may be used individually or in combination with other herbs.

- Tapeworm (especially from beef): use *Nan Gua Zi* with *Bing Lang* (Semen Arecae). The treatment protocol is to first give 60 to 120 grams of *Nan Gua Zi* in powder with cold water, followed in 2 hours by 60 to 120 grams of *Bing Lang* in decoction, and finish with 15 grams of *Mang Xiao* (Natrii Sulfas) with hot water, to purge the parasites.
- Schistosomiasis: use 120 to 200 grams of *Nan Gua Zi* daily on a long-term basis.

Nan Gua Zi (Semen Cucurbitae Moschatae)

- Parasites in patients showing signs of malnutrition and sallow complexion: use this herb with peanuts and walnuts.

2. Promotes Lactation

Nan Gua Zi also promotes lactation in women who have difficulty nursing.

DOSAGE

60 to 120 grams. *Nan Gua Zi* is often taken in powder form with cold water. The outer shells of the seeds are often removed prior to crushing *Nan Gua Zi* into powder. This herb is generally taken with cold water because heat significantly decreases its effects.

CAUTIONS / CONTRAINDICATIONS

- Use of *Nan Gua Zi* is sometimes associated with mild gastrointestinal side effects, such as nausea, poor appetite, and diarrhea. These reactions are mild and self-limiting.

OVERDOSAGE

In one report, two rare cases of jaundice and hepatic coma were associated with overdose and prolonged use of *Nan Gua Zi* for treatment of schistosomiasis. Specific information on the dosage and the duration of treatment were unavailable.[1]

CHEMICAL COMPOSITION

Cucurbitine, m-carboxyphenylalanine, N-methylasparagine, minhychrin.[2]

PHARMACOLOGICAL EFFECTS

- **Antiparasitic:** According to *in vitro* studies, *Nan Gua Zi* paralyzed tapeworms in cattle and roundworms in pigs. *Nan Gua Zi* also inhibited and killed young schistosomes. Lastly, synergistic action was observed when *Nan Gua Zi* was combined with *Bing Lang* (Semen Arecae).[3]

CLINICAL STUDIES AND RESEARCH

- **Tapeworm:** In one study, 70 patients with tapeworm infestations were treated with a protocol that incorporated *Nan Gua Zi*, *Bing Lang* (Semen Arecae) and magnesium sulfate. Patients were given *Nan Gua Zi* in powder on an empty stomach in the morning, followed 2 hours later by a decoction of *Bing Lang*, and in another 30 minutes, a 50% magnesium sulfate solution. The dosage for *Nan Gua Zi* was 60 to 80 grams for adults, and 30 to 50 grams for children under 15 years of age; the dosage of *Bing Lang* was 60 to 80 grams for adults, and 30 to 60 grams for children under 15 years of age; and the dosage for magnesium sulfate was 60 ml for adults, and 20 to 40 ml for children under 15 years of age. Out of 70 patients, 68 who returned for follow-up showed a 97.06% rate of successful treatment. Two patients did not return for the follow-up exam.[4]
- **Nursing:** Nursing women with inadequate milk production were treated with 150 to 180 grams of *Nan Gua Zi* given in powder form twice daily on an empty stomach. Treatment lasted for 3 to 5 days, with patients showing marked improvement. The herb was prepared by removing the outer shells, and crushing the inside seeds into powder. *Nan Gua Zi* was ineffective if dry-fried or cooked.[5]

TOXICOLOGY

No significant side effects were observed in mice following oral administration of *Nan Gua Zi* at the dosage of 2 to 10 g/kg.[6]

Fei Zi (Semen Torreyae)

榧子

Pinyin Name: *Fei Zi*
Alternate Chinese Names: *Bi Zi, Xie Shi, Xiang Fei Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: torreya seeds, grand torreya seed, Chinese torreya seed, tall torreya seed
Botanical Name: *Torreya grandis* Fort. (*Fei Shu*)
Pharmaceutical Name: Semen Torreyae
Properties: sweet, neutral
Channels Entered: Lung, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Kills Parasites

Fei Zi (Semen Torreyae) is one of the most important herbs for treatment of parasites. It kills parasites, purges them from the intestines, and does not injure the stomach. Furthermore, it is sweet and encourages patient compliance. It may be used individually or in an herbal formula; it may either be used fresh or in decoction; and it is effective against a variety of intestinal parasites, including roundworm, tapeworm, hookworm and pinworm.

- Tapeworm proglottid: use *Fei Zi* as a single herb. Bake the herb and take seven seeds daily for seven days.
- Tapeworm: use it with *Bing Lang* (Semen Arecae) and *Wu Yi* (Fructus Ulmi Praeparatus). It is commonly recommended that the patient ingest beef before taking the herbs, to bait and kill the tapeworms.
- Hookworm: take 30 to 40 seeds of *Fei Zi* in the morning on an empty stomach, daily, until hookworms are expelled from the body.
- Parasitic infestation with roundworm, tapeworm, hookworm or pinworm: combine this herb with *Shi Jun Zi* (Fructus Quisqualis) and *Da Suan* (Bulbus Alli Sativi) as a decoction, three times daily on an empty stomach.

2. Moistens the Lung and Large Intestine, Stops Cough

Oily in nature, *Fei Zi* moistens the Lung and Large Intestine. Clinically, it treats dryness of the Lung characterized by dry, non-productive cough, or cough with thick, scanty sputum. It also promotes bowel movement and relieves constipation.

- Cough from Lung dryness: use *Fei Zi* with *Xuan Shen* (Radix Scrophulariae), *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Men Dong* (Radix Ophiopogonis), *E Jiao* (Colla Corii Asini) and *Sang Ye* (Folium Mori).
- Constipation due to dryness of the Large Intestine: combine it with *Huo Ma Ren* (Fructus Cannabis), *Hei Zhi Ma* (Semen Sesami Nigrum), *Yu Li Ren* (Semen Pruni) and *Dang Gui* (Radicis Angelicae Sinensis).

DOSAGE

30 to 50 grams. Dry fry *Fei Zi* and remove the shell to eat the fruit inside. *Fei Zi* should be crushed prior to cooking to increase surface area and facilitate the extraction of active constituents.

CAUTIONS / CONTRAINDICATIONS

- The outer peel of *Fei Zi* is incompatible with *Lu Dou* (Semen Phaseoli Radiati).
- *Fei Zi* is contraindicated during pregnancy as it may cause contraction of the uterus.[1]
- Overdose may cause diarrhea.

CHEMICAL COMPOSITION

Gliadin, sterol, palmitic acid, linoleic acid, stearic acid, oleic acid, oxalic acid, tannin.[2]

PHARMACOLOGICAL EFFECTS

- **Antiparasitic:** Extract of *Fei Zi* has demonstrated antiparasitic effects against tapeworm in cats and roundworm in pigs. The essential oil was effective against hookworm.[3]
- **Abortifacient:** Administration of *Fei Zi* is associated with uterine contractions. Overdose may lead to miscarriage.[4]

CLINICAL STUDIES AND RESEARCH

- **Hookworm:** Five patients with hookworm ingested 90 to 150 grams of dry-fried *Fei Zi* daily for 1 month, with a 100% success rate in eliminating the infestation.[5] No

Fei Zi (Semen Torreyae)

significant side effects were observed. In another study, a preparation of *Fei Zi* (essential oils) was given once daily for 3 to 4 days to 94 adults with hookworms, with good results.[6]

AUTHORS' COMMENTS

Both *Fei Zi* and *Shi Jun Zi* (Fructus Quisqualis) have excellent abilities to kill parasites without injuring the stomach. They are sweet and thus more tolerable for patients than bitter substances. Because they both promote defecation, there is no need to add purgative herbs to the formula. *Fei Zi* is more effective for tapeworm, hookworm, and pinworm and moistens the Lung to relieve dry cough; *Shi Jun Zi* is more effective for roundworm, and functions to strengthen the Spleen and Stomach.

He Shi (Fructus Carpesii)

鶴虱　鹤虱

Pinyin Name: *He Shi*
Literal Name: "crane's louse"
Alternate Chinese Names: *Gui Shi, Hu Shi*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: carpesium fruit, common carpesium fruit
Botanical Name: *Carpesium abrotanoides* L. (*Bei He Shi*); *Daucus carota* L. (*Nan He Shi*); *Torilis japonica* (Houtt.) DC. (*Hua Nan He Shi*); *Lappula echinata* Gilib. (*Dong Bei He Shi*)
Pharmaceutical Name: Fructus Carpesii
Properties: bitter, acrid, neutral
Channels Entered: Spleen, Stomach
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

Kills Parasites

He Shi (Fructus Carpesii) kills numerous intestinal parasites, such as roundworm, pinworm, hookworm, and tapeworm.

- Abdominal pain from intestinal parasites: use *He Shi* as a single remedy.
- Roundworm: use it with *Chuan Lian Zi* (Fructus Toosendan), *Bing Lang* (Semen Arecae), and *Ming Fan* (Alumen).
- Tapeworm: combine it with *Bing Lang* (Semen Arecae), *Nan Gua Zi* (Semen Cucurbitae Moschatae), and *Lei Wan* (Omphalia).

DOSAGE

5 to 15 grams in decoction, pill or powder form.

OVERDOSAGE

He Shi is slightly toxic. Reactions such as dizziness, nausea, tinnitus, and abdominal pain generally occur within the first few hours, or the next day, following oral ingestion. These reactions are self-limiting and will subside within a short period of time after discontinuation of the herb.

CHEMICAL COMPOSITION

Essential oils 0.25 to 0.65% (carabrone, carpe-sia-lactone).[1]

He Shi (Fructus Carpesii)

PHARMACOLOGICAL EFFECTS

- **Antiparasitic:** According to *in vitro* studies, preparations of *He Shi* were effective against roundworms and tapeworms.[2]

CLINICAL STUDIES AND RESEARCH

- **Hookworm:** In one study, 57 patients with hookworm were treated effectively using an herbal decoction. The treatment protocol was to wash and cook 90 grams of *He Shi* two times to yield 60 ml of final decoction. A small amount of sugar was added to the decoction. Patients were instructed to drink 30 ml at bedtime for 2 days. The dosage was adjusted appropriately for children and elderly patients. Stool exam for hookworms was negative in 45 out of 57 patients who returned for follow-up exams 15 days later. Some patients reported side effects, such as dizziness, nausea, tinnitus, and abdominal pain. The side effects were self-limiting and were relieved upon discontinuation of the herb.[3]

Wu Yi (Fructus Ulmi Praeparatus)

蕪荑 芜荑

Pinyin Name: *Wu Yi*
Alternate Chinese Names: *Bai Wu Yi, Chou Wu Yi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ulmus
Botanical Name: *Ulmus macroparpa* Hance. (*Da Guo Yu*)
Pharmaceutical Name: Fructus Ulmi Praeparatus
Properties: acrid, bitter, warm
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

Kills Parasites and Reduces Stagnation

Wu Yi (Fructus Ulmi Praeparatus) kills various intestinal parasites. It may be used individually, or in combination with other herbs. Clinical applications include treatment of roundworm, tapeworm, tinea infection, and malnutrition caused by parasitic infestation.

- General parasitic infestation: use *Wu Yi* with *Ku Lian Pi* (Cortex Meliae), *Shi Jun Zi* (Fructus Quisqualis), *Bing Lang* (Semen Arecae), *Lei Wan* (Omphalia) and *He Shi* (Fructus Carpesii).
- Intestinal parasitic infestation with pale/sallow facial appearance and abdominal pain when eating: use *Wu Yi* individually.
- Roundworm infestation with severe pain and vomiting of clear fluids or saliva: use it with *Lei Wan* (Omphalia) and *Gan Qi* (Resina Toxicodendri), as powder, with warm water.
- Parasitic infestation with prolapse of rectum: combine this herb with *Huang Lian* (Rhizoma Coptidis).
- Parasitic infestation with cold in the abdomen: use this herb with *Da Hui Xiang* (Fructus Anisi Stellati) and *Mu Xiang* (Radix Aucklandiae).
- Parasitic infestation with malnutrition, sallow facial appearance, or constant diarrhea: use *Wu Yi* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Mu Xiang* (Radix Aucklandiae) and *Shan Yao* (Rhizoma Dioscoreae).

DOSAGE

3 to 10 grams in pills.

CAUTIONS / CONTRAINDICATIONS

- *Wu Yi* is contraindicated for patients who have Spleen and Stomach deficiencies.

PHARMACOLOGICAL EFFECTS

- **Antiparasitic:** Extract of *Wu Yi* kills roundworms in pigs.[1]
- **Antifungal:** Extract of *Wu Yi* inhibits the growth of many pathogenic fungi.[2]

Lei Wan (Omphalia)

雷丸

Pinyin Name: *Lei Wan*
Literal Name: "thunder ball"
Alternate Chinese Names: *Lei Shi, Bai Lei Wan, Zhu Ling*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: omphalia, stone-like omphalia
Botanical Name: *Omphalia lapidescens* Schhroet. (*Zhen Jun Lei Wan*); *Polyporus mylittae* Cook. et Mass. (*Lei Wan Jun*)
Pharmaceutical Name: Omphalia
Properties: bitter, cold
Channels Entered: Stomach, Large Intestine
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

Kills Parasites

Lei Wan (Omphalia) effectively kills intestinal parasites, including tapeworm, hookworm, and roundworm. It may be used individually, or in combination with other herbs.

- Intestinal parasites: use *Lei Wan* with *Bing Lang* (Semen Arecae), *Qian Niu Zi* (Semen Pharbitidis), *Mu Xiang* (Radix Aucklandiae), and *Ku Lian Pi* (Cortex Meliae).
- Parasitic infestation with malnutrition: combine it with *Shi Jun Zi* (Fructus Quisqualis), *He Shi* (Fructus Carpesii), *Bing Lang* (Semen Arecae) and *Fei Zi* (Semen Torreyae), as powder, taken before meals with warm rice water.

DOSAGE

6 to 15 grams. It is best to use *Lei Wan* in pill or powder form, as heat may decrease the effectiveness of the herb. The recommended therapy is 12 to 18 grams with rice water, three times daily after meals, for 3 days.

CAUTIONS / CONTRAINDICATIONS

- *Lei Wan* should be used with caution for patients with deficiency and cold of the Spleen and Stomach. Side effects, such as nausea and abdominal discomfort, are generally self-limiting and do not require treatment.[1]
- Heat (greater than 60° C) and acidity deactivate *Lei Wan*. Therefore, it should not be cooked in decoctions. For enhanced effectiveness, it may be taken with an alkaline solution (such as rice water) to neutralize gastric acid.[2]

CHEMICAL COMPOSITION

Proteolytic enzyme, β-glucan.[3]

PHARMACOLOGICAL EFFECTS

- **Antiparasitic (tapeworm):** Tapeworms were placed into three environments at 37° C: 30% *Lei Wan* solution, normal saline, and distilled water. In the *Lei Wan* solution, all tapeworms died in between 2.5 and 9 hours. In normal saline, all tapeworms appeared normal after 9 hours, and continued to live for up to 62 hours. In distilled water, tapeworms lived for 24 to 30 hours. It was also noted that *Lei Wan* solution was most effective at pH 8, and was ineffective in an acidic environment.[4]
- **Antiparasitic (roundworm):** In *in vitro* studies, alcohol extract of *Lei Wan* showed a marked inhibitory influence against roundworms while the water extract was ineffective. The ineffectiveness of the water extract was attributed to destruction of the active constituents when the substance was cooked at high temperatures.[5]

CLINICAL STUDIES AND RESEARCH

- **Tapeworm infestation:** Patients with tapeworm infestations were effectively treated using 20 grams of *Lei Wan* powder with cool water, three times daily, for 3 days.[6]
- **Hookworm infestation:** In one study, 20 patients with hookworm infestations were treated with an 85% rate of effectiveness using 40 grams of *Lei Wan* powder each day for 3 days.[7] In another study, 188 patients were treated with 100% effectiveness with an herbal formula which contained 3.2 grams of *Lei Wan*, 11.2 grams of *Da Huang* (Radix et Rhizoma Rhei) and 11.2 grams of *Qian Niu Zi* (Semen Pharbitidis). The herbal formulas were given as powder daily in the morning, on an empty stomach with cold water. Hookworms were expelled by all patients within 1 to 2 doses.[8]

Lei Wan (Omphalia)

He Cao Ya (Gemma Agrimoniae)

鶴草芽 鹤草芽

Pinyin Name: *He Cao Ya*
Literal Name: "crane herb bud"
Alternate Chinese Names: *Lang Ya Cao Gen Ya, Xian He Cao Gen Ya*
English Name: agrimonia, hairy-vein agrimonia bud
Botanical Name: *Agrimonia pilosa* Ledeb. (*Xian He Cao; Long Ya Cao*)
Pharmaceutical Name: Gemma Agrimoniae
Properties: bitter, astringent, cool
Channels Entered: Liver, Small Intestine, Large Intestine

CHINESE THERAPEUTIC ACTIONS

Kills Parasites

He Cao Ya (Gemma Agrimoniae) kills parasites and promotes bowel movement. It is generally used in powder form against tapeworms. *He Cao Ya* is also used with other herbs to treat trichomonas vaginalis.

DOSAGE

30 to 50 grams in powder for adults. The dosage should be calculated carefully in children: use 0.7 to 0.8 gram of *He Cao Ya* per kilogram of body weight. According to classic texts, *He Cao Ya* should not be decocted.

CAUTIONS / CONTRAINDICATIONS

- In comparison with other antiparasitic herbs, *He Cao Ya* is a safe herb that has few or no toxic effects. However, mild gastrointestinal disturbances, such as nausea and vomiting, may still occur following oral ingestion.

CHEMICAL COMPOSITION

Phenolic compounds.[1]

TOXICOLOGY

The LD_{50} for oral ingestion of phenolic compounds of *He Cao Ya* in mice is 599.8 mg/kg.[2]

References

Guan Zhong (Rhizoma Dryopteridis)

貫眾 贯众

Pinyin Name: *Guan Zhong*
Literal Name: "link the multitude"
Alternate Chinese Names: *Guan Jie*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: dryopteris root
Botanical Name: *Dryopteris crassirhizoma* Nakai. (*Cu Jing Lin Mao Jue*). Other sources include *Lunathyrium acrostichoides* (Sw.) Ching (*E Mei Jue*); *Woodwardia unigemmata* (Makino) Nakai. (*Dan Ya Gou Ji*); and *Osmunda japonica* Thunb. (*Zi Ji*)
Pharmaceutical Name: Rhizoma Dryopteridis
Properties: bitter, cool
Channels Entered: Liver, Spleen
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Kills Parasites

Guan Zhong (Rhizoma Dryopteridis) effectively kills various intestinal parasites, such as hookworm, pinworm and ringworm. It is generally used in an herbal combination formula, and rarely by itself.

- Parasitic infestation: use *Guan Zhong* with *Lei Wan* (Omphalia), *Bing Lang* (Semen Arecae), *Wu Yi* (Fructus Ulmi Praeparatus), *He Shi* (Fructus Carpesii), and *Shi Jun Zi* (Fructus Quisqualis).

2. Clears Heat, Removes Toxins

Bitter and cold, *Guan Zhong* clears heat and eliminates toxins to treat and prevent viral and bacterial infections. Clinical applications include the common cold, influenza, measles, epidemic encephalitis, parotitis, and viral pneumonia.

- Prevention of common colds and influenza: use this herb with *Sang Ye* (Folium Mori).
- Treatment of viral infection, parotitis, infectious bronchitis: combine it with *Jin Yin Hua* (Flos Lonicerae), *Ban Lan Gen* (Radix Isatidis), *Da Qing Ye* (Folium Isatidis) and *Lian Qiao* (Fructus Forsythiae).

3. Stops Bleeding

Charred *Guan Zhong* clears heat and stops bleeding. It is commonly used to treat bleeding characterized by heat in the blood, such as hematemesis, epistaxis, hematochezia, and profuse uterine bleeding.

- Epistaxis: use *Guan Zhong* powder alone.
- Bleeding in postpartum women: ingest 6 grams of vinegar-processed *Guan Zhong* with rice water.
- Hematemesis: use powdered *Guan Zhong* with *Huang Lian* (Rhizoma Coptidis), serve with sticky rice.
- Severe and persistent hematemesis: combine it with *Xue Yu Tan* (Crinis Carbonisatus), the juice of fresh *Ce Bai Ye* (Cacumen Platycladi), *Tong Bian* (urine from children) and grain-based liquor.
- Hematochezia due to lower gastrointestinal bleeding: use this herb with *She Xiang* (Moschus).
- Uterine bleeding that is purple, with blood clots, abdominal pain and a deep pulse: use it with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).

DOSAGE

10 to 15 grams. Unprocessed *Guan Zhong* is used to clear heat, eliminate toxins, and kill parasites. The charred form stops bleeding.

CAUTIONS / CONTRAINDICATIONS

- *Guan Zhong* is not recommended for use in cases of yin-deficient heat, or in deficiency and cold of the Spleen and Stomach.
- Avoid concurrent ingestion of *Guan Zhong* with fatty or greasy food.
- *Guan Zhong* is slightly toxic, and its use is contraindicated in infants, and those who have weak constitutions, or ulceration of the gastrointestinal tract.
- *Guan Zhong* should be used with caution during pregnancy, as it is slightly toxic and also stimulates the contraction of uterus.

Guan Zhong (Rhizoma Dryopteridis)

OVERDOSAGE

Adverse reactions reported include nausea, vomiting, abdominal pain, diarrhea, hematochezia, headache, tremor, seizures, and miscarriage. Filmarone, one of the components of *Guan Zhong*, has a poor absorption rate and is responsible for gastrointestinal irritation. Ingestion of *Guan Zhong* with fatty or greasy food increases the absorption rate and may cause disturbance to the central nervous system.[1]

CHEMICAL COMPOSITION

Filmarone, dryocrassin, filic acids, flavaspidic acids, fibaspidins, aspidinol, filicinic acid, ferene, diploptene, diplopterol.[2]

PHARMACOLOGICAL EFFECTS

- **Antiparasitic:** Filmarone, one active component of *Guan Zhong*, has a marked antiparasitic effect against tapeworm. In *in vitro* studies, a preparation of *Guan Zhong* was effective against roundworms in pigs. Decoction of *Guan Zhong* was effective against liver flukes.[3]
- **Antibiotic:** *Guan Zhong* has a mild to moderate inhibitory action against *Bacillus dysenteriae*, *Salmonella typhi*, *E. coli*, *Pseudomonas aeruginosa*, *Diplococcus meningitidis*, and *Staphylococcus aureus*. It has a strong inhibiting influence on influenza virus, adenovirus, encephalitis B, and herpes simplex virus. It also has an antineoplastic effect.[4]
- **Uterine stimulant:** Decoction of *Guan Zhong* is associated with contraction of the uterus. It increases both the frequency and strength of uterine contractions in rabbits. Similar characteristics were observed in use of the alcohol extract.[5]

CLINICAL STUDIES AND RESEARCH

- **Common colds and influenza:** Through observation of over 1,000 cases, the decoction of *Guan Zhong* and *Sang Ye* (Folium Mori) given twice weekly was found effective in prevention of common colds and influenza.[6]
- **Cerebrospinal meningitis:** To prevent cerebrospinal meningitis during an epidemic, the powder of *Guan Zhong* was given once a week for 2 weeks as one course of treatment. The treatment protocol was to administer 2 grams of the herb to adults, 1 gram to children under 10 years of age, and 0.5 gram to infants under 1 year of age. Out of 28 cases, the study concluded that the preventative effect of *Guan Zhong* was similar to that of penicillin.[7] [Note: Penicillin was an effective antibiotic in China in the 1960s, when there was still little or no bacterial resistance.]
- **Hookworm:** In one study, 30 patients with hookworm infestations were treated with 8 to 15 grams of *Guan Zhong* powder twice daily for 5 to 7 days per course of treatment. Six months later, 26 patients who returned for follow-up tested negative for hookworm. Four patients did not return for follow-up tests.[8]
- **Intestinal parasitic infestation:** In one report, 262 patients with intestinal parasitic infestations, such as hookworm, roundworm and whipworm, were treated with a preparation of *Guan Zhong* (equivalent to 25 grams of herb) daily for 2 days, with marked effectiveness.[9]
- **Acute orchitis:** Decoctions of *Guan Zhong* were used with good results in treating 45 patients with acute orchitis. The treatment protocol was to cook 60 grams of the herb in water, and drink the decoction in two equally-divided doses daily. The duration of treatment was between 3 and 5 days.[10]
- **Uterine bleeding:** In one report, 15 women with profuse uterine bleeding after abortion or delivery were treated with 2 to 4 ml of intramuscular injection of *Guan Zhong* solution (each 2 ml contains 5 grams of dried herb). The study reported 100% effectiveness with contraction of the uterus, and diminished bleeding within 3 to 5 minutes.[11]

TOXICOLOGY

The LD_{50} for filmarone in mice via intraperitoneal injection is 34 ml/kg.[12]

Chapter 10 summary

— Antiparasitic Herbs

Name	Similarities				Differences
	Round-Worm	Tape-Worm	Hook-Worm	Others	
Shi Jun Zi (Fructus Quisqualis)	x			Pinworm, trichomonas	Lubricates the intestines
Ku Lian Pi (Cortex Meliae)	x		x	Pinworm, trichomonas	Kills tinea
Bing Lang (Semen Arecae)	x	x		Pinworm, fasciolopsis, blood flukes	Promotes movement of qi
Nan Gua Zi (Semen Cucurbitae Moschatae)	x	x		Schistomiasis	Promotes lactation
Fei Zi (Semen Torreyae)		x	x	Pinworm	Moistens the bowel
He Shi (Fructus Carpesii)	x	x	x	Pinworm	
Wu Yi (Fructus Ulmi Praeparatus)	x	x			Kills tinea
Lei Wan (Omphalia)	x	x	x		
He Cao Ya (Gemma Agrimoniae)		x		Trichomonas	
Guan Zhong (Rhizoma Dryopteridis)			x	Pinworm, ringworm	Clears heat and toxins, stops bleeding

General Characteristics of Antiparasitic Herbs:

Taste: varies
Thermal property: varies
Channels entered: Spleen, Stomach, Large Intestine
Therapeutic actions: kills internal and external parasites
Safety index: some are toxic

Herbs that expel parasites are mainly used to kill intestinal parasites, with some being effective for dermatological disorders such as tinea.

Shi Jun Zi (Fructus Quisqualis) is warm, and kills parasites, especially roundworms and tapeworms. It strengthens the middle *jiao* and reduces stagnation. Sweet and aromatic, this is the herb of choice for children with parasites or malnutrition, as the taste improves patient compliance. *Shi Jun Zi* is effective as a single-herb remedy because it has both antiparasitic and purgative effects. Serving the herb with hot tea or in large dosages are both contraindicated to avoid side effects such as nausea, dizziness, vomiting and diarrhea.

Ku Lian Pi (Cortex Meliae), cold and toxic, is stronger than *Shi Jun Zi* to kill internal and external parasites. It is contraindicated in patients with deficiency and cold of the Spleen and Stomach.

Bing Lang (Semen Arecae) is warm and most effective against tapeworm, but also treats roundworm, fasciolopsis, and blood flukes. Dispelling dampness, it reduces abdominal distention from food and qi stagnation, and relieves feelings of incomplete evacuation. *Bing Lang* is also used for edema and leg *qi*.

Nan Gua Zi (Semen Cucurbitae Moschatae), sweet and neutral, dispels parasites without injuring the body. It is most suitable for deficient patients. *Nan Gua Zi* should never be cooked or fried, as

Chapter 10 summary

heat significantly decreases its effectiveness. The combination of *Nan Gua Zi* and *Bing Lang* (Semen Arecae) is very effective to treat pinworms.

Fei Zi (Semen Torreyae), sweet and neutral, is not toxic. It is a safe herb, but has only mild potency to kill and dispel parasites. Because it is rich in oil, this herb also treats constipation.

He Shi (Fructus Carpesii), slightly toxic, relieves abdominal pain caused by parasites.

Wu Yi (Fructus Ulmi Praeparatus) is warm in thermal property, kills parasites and treats abdominal pain and diarrhea.

Lei Wan (Omphalia) and ***He Cao Ya*** (Gemma Agrimoniae) kill parasites, and have active components that are destroyed by heat, and thus should be taken in pill or powder form.

Lei Wan is slightly toxic, but has a broad spectrum of antiparasitic action against all kinds of intestinal parasites.

He Cao Ya is not toxic, and is most effective against tapeworms.

Guan Zhong (Rhizoma Dryopteridis), cool in thermal property, kills parasites and clears heat to eliminate toxins. It treats infectious diseases such as parasites, measles, flu and encephalitis. Charred to ash, this herb stops hematemesis, epistaxis, uterine bleeding and rectal bleeding.

Chapter 11

— Stop-Bleeding Herbs

Definition: These herbs stop bleeding, both internally and externally.

Bleeding occurs when normal blood flow in the vessels is interrupted by injury or leakage so that the blood leaves the vessels. Bleeding can occur in various parts of the body, including tissues, organs, channels and collaterals. Common instances of bleeding include epistaxis and hemoptysis in the upper *jiao*, hematemesis in the middle *jiao*, and hematochezia, hematuria, abnormal uterine bleeding, and bleeding hemorrhoids in the lower *jiao*. Subcutaneous bleeding results in purpura, while traumatic injury to musculoskeletal tissues causes bleeding and bruising.

SUBCATEGORIES OF ACTION

1. ***Cool the blood and stop bleeding***: Herbs in this category are cool or cold. They cool the blood, dispel heat, and stop bleeding, and are often combined with heat-clearing herbs for maximum effectiveness. Clinical manifestations of heat in the blood include bleeding of bright red blood, irritability, thirst, redness of the face, red tongue, and a slippery, rapid pulse.
2. ***Restrain blood and stop bleeding***: These herbs are bitter, astringent and neutral in thermal property. They have a restraining function and are most suitable for bleeding from deficiency, where there is continuous bleeding with fatigue, pale tongue and a weak pulse. This type of bleeding can be seen in patients who have recently suffered traumatic injuries with profuse bleeding. Deficiency bleeding usually involves the Spleen, the organ responsible for keeping blood circulating within the vessels, or the Liver, the organ responsible for storing blood. Herbs that restrain blood are often combined with tonic herbs for best results.
3. ***Invigorate blood and stop bleeding***: These herbs have a unique influence to invigorate blood circulation, eliminate blood stasis, and stop bleeding. In other words, they achieve homeostasis of the blood. These herbs are best for bleeding related to blood stagnation, in which blood cannot properly circulate within the vessels and channels. Bleeding in this case is usually dark with clots, with sharp pain in a fixed location. Qi- and blood-activating herbs are sometimes added to achieve maximum effectiveness.
4. ***Warm the body and stop bleeding***: These herbs warm the body and the channels, relieve pain, and stop bleeding. They are mostly used for patients suffering from bleeding due to deficiency and cold, characterized by chronic, pale bleeding that is light in texture. Clinical manifestations may include sallow facial complexion, a pale tongue, fatigue, cold extremities, intolerance to cold, and a thready, slow pulse. Interior-warming, qi-tonifying, Spleen-strengthening and blood-nourishing herbs are often added for best results. Note: These symptoms also would be present in an individual for whom excessive bleeding has caused deficiency and cold and has changed to chronic, light bleeding.

Bai Mao Gen (Rhizoma Imperatae)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

Differential Diagnosis of Bleeding

Subcategories	TCM Diagnosis	Key Symptoms
Cool the blood and stop bleeding	Heat in the blood	Bright red blood
Restrain blood and stop bleeding	Spleen qi or Liver deficiency	Continuous bleeding
Invigorate blood and stop bleeding	Blood stasis	Dark blood with clots, pain in a fixed location
Warm the body and stop bleeding	Deficiency and cold	Chronic, pale bleeding with light texture

Chapter 11 — Stop-Bleeding Herbs

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Bleeding is a *symptom* that represents an *underlying condition*. While it is important to treat symptomatically and stop the bleeding, it is equally important to identify the underlying cause and treat accordingly. ***Heat in the blood*** pushes it outwards, leading to a condition referred to as "reckless movement of blood" with bleeding from various openings of the body. Such conditions must be treated both with herbs that cool blood and herbs that stop bleeding.

Bleeding is a symptom. ...While it is important to stop the bleeding, it is equally important to identify and treat the underlying cause.

Deficiency of the Spleen or the Liver may also cause bleeding. Qi is considered to be the leader that guides the movement of blood. Therefore, ***deficiency of Spleen qi*** allows bleeding and "aimless movement of blood." The Liver stores blood; therefore, ***deficiency of the Liver*** compromises its ability to store blood, allowing blood to leak out of the body. Bleeding due to deficiency of the Spleen and Liver must be treated with herbs that stop bleeding and tonify these organs.

In addition to treating the symptoms and cause of a bleeding disorder, one must recognize that blood loss is often accompanied by complications. Bleeding due to trauma is often accompanied by ***qi and blood stagnation***. While the use of hemostatic herbs stops bleeding, it also causes more qi and blood stasis. Therefore, optimal treatment requires concurrent use of herbs that stop bleeding with herbs that activate qi and blood circulation. Prolonged or profuse bleeding may lead to ***deficiency and cold*** (as well as vice-versa, mentioned in #4, above), in which case qi tonic herbs are indicated to prevent qi collapse.

CAUTIONS/CONTRAINDICATIONS

- When using herbs that are cool or astringent in property, one should first rule out the possibility of blood stagnation to avoid making the situation worse.
- If blood stagnation is present, blood-activating herbs should be used to stop bleeding and remove stasis at the same time.
- If profuse bleeding occurs over a long period of time, instead of using only herbs from this category, qi tonics should also be added to prevent collapse.

PROCESSING

Many herbs are charred to ash to enhance their potency to stop bleeding.

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** These herbs shorten coagulation and clotting time to stop bleeding.

  Herbs that affect earlier steps of the clotting cascade to facilitate clotting include *San Qi* (Radix Notoginseng), *Pu Huang* (Pollen Typhae), *Bai Ji* (Rhizoma Bletillae), *Xian He Cao* (Herba Agrimoniae) and *Bai Mao Gen* (Rhizoma Imperatae).

  Herbs that affect later steps of the clotting cascade are *Bai Ji* (Rhizoma Bletillae), *Di Yu* (Radix Sanguisorbae), *Ai Ye* (Folium Artemisiae Argyi), *Da Ji* (Herba seu Radix Cirsii Japonici), *Xiao Ji* (Herba Cirisii) and *Fu Long Gan* (Terra Flava Usta).

  Herbs that increase the number of platelets include *Zi Zhu* (Folium Callicarpae).

Charring herbs to ash enhances potency to stop bleeding.

- **Hematological:** While most herbs that stop bleeding have a marked hemostatic effect, some have a more dynamic effect on the chemistry of blood. Herbs such as *San Qi* (Radix Notoginseng), *Pu Huang* (Pollen Typhae) and *Qian Cao* (Radix Rubiae) have the unique abilities to stop bleeding, dissolve blood clots and inhibit the aggregation of platelets. In other words, these herbs help to restore normal homeostasis of blood.
- **Cardiovascular:** Many of these herbs dilate blood vessels, increase blood perfusion to the coronary artery, and decrease oxygen consumption by the cardiac muscle, as exemplified by *San Qi* (Radix Notoginseng).
- **Antineoplastic:** Some inhibit the growth of cancer cells, as does *Xian He Cao* (Herba Agrimoniae).

Chapter 11 — Stop-Bleeding Herbs

- **Respiratory**: Some stop-bleeding herbs have expectorant and antiasthmatic effects, including *Ce Bai Ye* (Cacumen Platycladi) and *Ai Ye* (Folium Artemisiae Argyi).

POTENTIAL HERB-DRUG INTERACTIONS

- **Antiplatelets and anticoagulants**: Herbs that stop bleeding have inherent hemostatic effects. These herbs are generally used only when necessary to stop bleeding, and are to be discontinued when the bleeding stops. Because of their effect on the hemodynamics of circulation, these herbs should be used with caution in patients who have clotting disorders. The use of hemostatic herbs may increase the risk of clotting. Thus, these herbs should be prescribed with caution for patients taking antiplatelet or anticoagulant medications, as they may counteract the beneficial effect of such medications.

Da Ji (Herba seu Radix Cirsii Japonici)

大薊 大蓟

Pinyin Name: *Da Ji*
Literal Name: "big thistle"
Alternate Chinese Names: *Hu Ji, Ma Ji*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: cirsium, Japanese thistle
Botanical Name: *Cirsium japonicum* DC. (*Ji*)
Pharmaceutical Name: Herba seu Radix Cirsii Japonici
Properties: sweet, bitter, cool
Channels Entered: Liver, Heart

CHINESE THERAPEUTIC ACTIONS

1. Cools Blood, Stops Bleeding

Da Ji (Herba seu Radix Cirsii Japonici) treats various types of bleeding caused by heat in the blood, including hemoptysis, epistaxis, metrorrhagia, and hematuria. In this type of bleeding, the blood appears bright red in color, because of heat. Fresh *Da Ji* has the strongest action to cool blood and stop bleeding. Charred *Da Ji* has a stronger astringent and restraining property to enter the *xue* (blood) level in order to stop bleeding.

- Hematemesis, epistaxis, profuse menstrual bleeding: use the juice from the fresh form of this herb individually.
- Hematemesis: use it with *Sheng Di Huang* (Radix Rehmanniae), *Sheng Jiang* (Rhizoma Zingiberis Recens), and light-colored honey.
- Hematemesis and hemoptysis: use the charred forms of *Da Ji*, *Xiao Ji* (Herba Cirisii), *Ce Bai Ye* (Cacumen Platycladi), *Bai Mao Gen* (Rhizoma Imperatae), and *Qian Cao* (Radix Rubiae).

2. Disperses Blood Stasis, Reduces Swelling

Abscess and toxic swelling: *Da Ji* treats abscess, whether internally or on the skin. Swelling and abscess are caused by toxicity and blood stagnation. The fresh herb is preferred for stronger potency in this case. It can be used both internally and topically.

- Intestinal abscess: use the leaf of *Da Ji* in powder form, with grain-based liquor, and *Ren Zhong Bai* (Urinae Hominis Sedimen).
- Intestinal abscess and cellulitis: combine this herb with *Di Yu* (Radix Sanguisorbae), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Jin Yin Hua* (Flos Lonicerae) and warm grain-based liquor.
- Lung abscess: use *Da Ji* alone.
- Sores and carbuncles: mix fresh *Da Ji* with salt and apply topically.

3. Treats Jaundice

Da Ji treats jaundice arising from damp-heat in the Liver and Gallbladder.

- Jaundice: use this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Hu Zhang* (Rhizoma Polygoni Cuspidati).

4. Lowers Blood Pressure

Hypertension: *Da Ji* has been used recently to reduce blood pressure caused by Liver heat or Liver fire.

- Hypertension: use alone or with *Xia Ku Cao* (Spica Prunellae) and *Xi Xian Cao* (Herba Siegesbeckiae). The root of *Da Ji* is preferred for this function.

DOSAGE

10 to 15 grams, with a maximum of 30 grams, for dried *Da Ji*. Use up to 60 grams of the fresh form. The unprocessed herb is stronger to cool the blood, stop bleeding, and reduce swelling. The charred herb is stronger in retaining the blood and stopping bleeding. The aerial parts of the plant have stronger functions to drain abscesses, while the root has better attributes to lower blood pressure.

CAUTIONS / CONTRAINDICATIONS

- Because of its blood-invigorating function, *Da Ji* should be used with caution during pregnancy, or for patients who do not have signs or symptoms of blood stagnation.
- Bitter and cold in nature, *Da Ji* is contraindicated in deficiency and cold of the Spleen and Stomach.
- Oral administration of *Da Ji* has been associated with nausea, vomiting and other gastrointestinal disturbances.[1]

Da Ji (Herba seu Radix Cirsii Japonici)

CHEMICAL COMPOSITION

Cirsimarin, pectolinarin, luleclin-7-glucoside, acacetin rhamnoglucoside, vitamin K.[2]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Charred *Da Ji* has demonstrated hemostatic properties, and shortens bleeding time.[3]
- **Antibiotic:** An alcohol tincture of *Da Ji* at a concentration of 1:30,000 demonstrated an inhibitory effect on *Mycobacterium tuberculosis*, based on *in vitro* tests.[4]
- **Cardiovascular:** Administration of water or alcohol extract of *Da Ji* decreased heart rate and lowered blood pressure in experiments with dogs, cats and rabbits.[5]

CLINICAL STUDIES AND RESEARCH

- **Hematuria:** According to one report, 35 patients were treated with 15 to 20 grams of *Da Ji* powder given three times daily for 2 weeks with an overall effective rate of 74.3%. The hemostatic action was assessed as being more effective than that of vitamin K.[6]
- **Upper gastrointestinal bleeding:** In one study, 369 patients with gastric ulcers, duodenal ulcers, and various other upper-gastrointestinal bleeding problems were treated with an herbal preparation containing *Da Ji*, *Ji Mu Ye* (Folium Loropetali), and *Bai Ji* (Rhizoma Bletillae) as the main ingredients. The study reported an overall effective rate of 84.3%, with an average of 5 days to achieve hemostasis.[7]
- **Hypertension:** *Da Ji Gen* (Radix Cirsii Japonici) and *Da Ji Ye* (Folium Cirsii Japonici) were used to treat patients at various stages of hypertension. Out of 72 patients treated with *Da Ji Gen*, 17 showed marked response, 45 showed moderate effects, 10 showed no response, and the overall rate of effectiveness was 86.1%. Out of 30 patients treated with *Da Ji Ye*, 5 showed marked effects, 10 showed moderate effects, 15 showed no response, and the overall rate of effectiveness was 50%.[8]
- **Intramuscular nodules:** Fibrous nodules in 500 patients were treated with an herbal paste applied to the affected area for 6 to 8 hours, one to two times daily, for an average of 3 to 5 treatments. The herbal paste contained equal amounts of *Da Ji* and starch, mixed with hot water. The study reported satisfactory results in all patients in softening of the nodules and reduction of pain.[9]
- **Pulmonary tuberculosis:** In one study, 18 patients with pulmonary tuberculosis were treated with preparations of *Da Ji*, for 15 to 72 days. Evaluation based on chest x-ray showed 3 patients with significant improvement, 8 with slight improvement and 7 with no change. Symptomatic evaluation, such as cough, chest pain, fever and amount of sputum, also showed varying degrees of improvement.[10]
- **Nephritis:** Daily administration of 15 to 30 grams of *Da Ji* has been shown to reduce edema and the quantity of white blood cells present in the urine in patients with nephritis.[11]

HERB-DRUG INTERACTION

- **Anticoagulant drugs:** *Da Ji* contains vitamin K, which may reduce the anticoagulant effect of warfarin. While use of the herb is not contraindicated, it should be used with caution to prevent the formation of clots.[12]

SUPPLEMENT

Da Ji (Herba seu Radix Cirsii Japonici) is the collective name that includes both the root and the aerial parts of the plant, though the parts have slightly different functions.

- 大蓟葉 / 大蓟叶 *Da Ji Ye* (Herba Cirsii Japonici), the aerial part of the herb (primarily the leaf), drains abscesses.
- 大蓟根 / 大蓟根 *Da Ji Gen* (Radix Cirsii Japonici), the root, lowers blood pressure.

AUTHORS' COMMENTS

大蓟 / 大蓟 *Da Ji* (Herba seu Radix Cirsii Japonici) and 大戟 *Da Ji* (Radix Euphorbiae seu Knoxiae) have identical pinyin names, but are two distinct herbs with completely different functions. *Da Ji* (Herba seu Radix Cirsii Japonici) has hemostatic actions and stops bleeding. *Da Ji* (Radix Euphorbiae seu Knoxiae) has cathartic properties and treats excess conditions. To avoid errors and confusion, one must always specify which "*Da Ji*" is to be used, whether in written or verbal communication.

Xiao Ji (Herba Cirisii)

小薊 小蓟

Pinyin Name: *Xiao Ji*
Literal Name: "small thistle"
Alternate Chinese Names: *Mao Ji, Ci Ji Cai, Ci Er Cai, Qian Zhen Cao*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: cirsium, cephalano, common cephalanoplos, field thistle, setose cephalanoplos
Botanical Name: *Cirsium setosum* (Willd) MB; *Cephalanoplos setosum* (Willd.) Kitam. (*Ke Ye Ci Er Cai*) and *Cephalanoplos segetum* (Bge.) Kitam. (*Ci Er Cai*) are also listed.
Pharmaceutical Name: Herba Cirisii
Properties: sweet, cool
Channels Entered: Liver, Heart

CHINESE THERAPEUTIC ACTIONS

1. Cools Blood, Stops Bleeding

Bleeding caused by heat in the blood: *Xiao Ji* (Herba Cirisii) cools blood, promotes urination and treats *lin zheng* (dysuria syndrome). It also cools blood in the *ren* (conception) and *chong* (thoroughfare) channels to treat metrorrhagia or abnormal spotting between periods. It treats bleeding disorders caused by heat, with the blood appearing bright red. Clinical applications include hemoptysis, epistaxis, metrorrhagia, hematuria and hemorrhoidal bleeding.

- Hematemesis and hemoptysis: use charred *Xiao Ji, Da Ji* (Herba seu Radix Cirsii Japonici), *Ce Bai Ye* (Cacumen Platycladi), *Bai Mao Gen* (Rhizoma Imperatae), and *Qian Cao* (Radix Rubiae).
- Heart fire with hematemesis and thirst: use fresh juices of *Xiao Ji, Ou Jie* (Nodus Nelumbinis Rhizomatis), *Niu Bang Zi* (Fructus Arctii) and *Sheng Di Huang* (Radix Rehmanniae) with light-colored honey.
- Deficiency heat with blood in the sputum: use *Xiao Ji* with *Bai Mao Gen* (Rhizoma Imperatae) and the juice of *Ou Jie* (Nodus Nelumbinis Rhizomatis).
- Bleeding of the tongue related to Heart fire: use the juice of *Xiao Ji* individually.
- Hematuria with dysuria: use *Xiao Ji* individually, or with *Sheng Di Huang* (Radix Rehmanniae), *Hua Shi* (Talcum), *Zhi Zi* (Fructus Gardeniae) and *Dan Zhu Ye* (Herba Lophatheri). **Exemplar Formula:** *Xiao Ji Yin Zi* (Cephalanoplos Decoction).
- Metrorrhagia: combine *Xiao Ji* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and fresh juice of *Sheng Di Huang* (Radix Rehmanniae).
- Bleeding after abortion: use it with *Yi Mu Cao* (Herba Leonuri).
- Hemorrhoidal or rectal bleeding: drink the juice of *Xiao Ji*. Serve warm.
- Bleeding from knife wounds: crush young sprouts of *Xiao Ji* into a paste, and apply topically.

2. Disperses Blood Stasis, Reduces Swelling

Abscess and toxic swelling: *Xiao Ji* can be used internally or externally to relieve abscesses and swelling accompanied by toxicity and heat.

- Abscess and swelling: mix the powder of *Xiao Ji* leaves with water, and apply topically.
- Itch and rash: use *Xiao Ji* with *Ru Xiang* (Gummi Olibanum) and *Ming Fan* (Alumen). Serve with grain-based liquor.

3. Clears Damp-Heat from the Liver and Gallbladder

Damp-heat in the Liver and Gallbladder: *Xiao Ji* treats jaundice, hypertension, high cholesterol and hepatitis.

- Jaundice: use it with *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Hu Zhang* (Rhizoma Polygoni Cuspidati).

DOSAGE

10 to 30 grams for the dried herb, 30 to 60 grams for fresh. Fresh *Xiao Ji* is stronger to eliminate toxins and is often used topically to treat toxic swellings. Dried *Xiao Ji* is best for clearing heat and stopping bleeding. Charred *Xiao Ji* is used only to stop bleeding.

CAUTIONS / CONTRAINDICATIONS

- Use *Xiao Ji* with caution in patients with loose stools or deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Acacetin-7-rhamnogluioside, rutin, protocatechuic acid, caffeic acid, chlorogenic acid.[1]

SUPPLEMENT

- 大小薊 / 大小蓟 *Da Xiao Ji* is the collective name for the combination of *Da Ji* (Herba seu Radix Cirsii Japonici) and *Xiao Ji* (Herba Cirisii). These herbs are commonly used together because they have synergistic action to clear heat and stop bleeding.

Xiao Ji (Herba Cirisii)

AUTHORS' COMMENTS

Many practitioners use *Xiao Ji* (Herba Cirisii) and *Da Ji* (Herba seu Radix Cirsii Japonici) interchangeably. Both have a blood-cooling quality to stop bleeding, and both can be used for swelling and abscesses. *Xiao Ji* is stronger in treating hematuria and dysuria. It is best for acute urinary infection when used with other diuretic herbs to clear heat. *Da Ji* has a stronger effect to reduce swelling and disperse blood stagnation.

Di Yu (Radix Sanguisorbae)

地榆

Pinyin Name: *Di Yu*
Alternate Chinese Names: *Yu Chi, Suan Zhi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: sanguisorba, garden burnet root, long-leaf garden burnet root
Botanical Name: *Sanguisorba officinalis* L. (*Di Yu*); *Sanguisorba officinalis* var. *longifolia* (Bert.) *Yu et Li* (*Chang Ye Di Yu*)
Pharmaceutical Name: Radix Sanguisorbae
Properties: bitter, sour, cool
Channels Entered: Liver, Large Intestine, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Cools Blood and Stops Bleeding

Various patterns of bleeding caused by heat: *Di Yu* (Radix Sanguisorbae) treats hemoptysis, epistaxis, hematemesis, hematuria, hematochezia, hemorrhoidal bleeding, bleeding dysentery, metrorrhagia and abnormal uterine bleeding between periods. With its descending nature and its excellent action to cool the blood, clear heat, and retain blood inside the body, it is mostly used to treat bleeding in the lower *jiao* caused by heat in the blood or damp-heat. Bleeding due to heat is usually characterized by a profuse flow of bright, red blood.

Hematochezia, bleeding hemorrhoids: Toxic heat accumulation in the Large Intestine causes bleeding that appears either in the accompanying stool, or preceding the evacuation of stools.

- Bleeding hemorrhoids, hematochezia, or bleeding preceding the evacuation of stools, with bright red blood because of heat in the blood, or damp-heat in the lower *jiao*: use *Di Yu* with *Gan Cao* (Radix Glycyrrhizae) and *Sha Ren* (Fructus Amomi).
- Large amounts of blood in the stools and abdominal pain from heat in the *xue* (blood) level: use *Di Yu* with *Sheng Di Huang* (Radix Rehmanniae), *Bai Shao* (Radix Paeoniae Alba), *Huang Qin* (Radix Scutellariae) and *Huai Hua* (Flos Sophorae).
- Bleeding hemorrhoids: use it with *Huai Jiao* (Fructus Sophorae), *Fang Feng* (Radix Saposhnikoviae), *Huang Qin* (Radix Scutellariae), and *Zhi Ke* (Fructus Aurantii).
- Bleeding dysentery with rectal tenesmus, mucus, and lower abdominal pain: combine this herb with *Gan Cao* (Radix Glycyrrhizae).

Dysentery: Damp-heat in the intestines manifests as dysentery, abdominal pain, rectal tenesmus, or diarrhea with pus and blood.

- Chronic and non-healing bleeding dysentery: use *Di Yu*

Di Yu (Radix Sanguisorbae)

with *Huang Lian* (Rhizoma Coptidis), *Mu Xiang* (Radix Aucklandiae), *Wu Mei* (Fructus Mume), and *He Zi* (Fructus Chebulae).

- Hematemesis or metrorrhagia due to heat in the blood: cook *Di Yu* with rice vinegar.

Metrorrhagia or abnormal bleeding between periods:

- Profuse menstrual bleeding with bright red blood, and dry mouth and lips due to heat in the blood: use *Di Yu* with *Huang Qin* (Radix Scutellariae), *Sheng Di Huang* (Radix Rehmanniae), *Mu Dan Pi* (Cortex Moutan) and *Lian Xu* (Stamen Nelumbinis).
- Profuse bleeding and abdominal pain after miscarriage or abortion: combine this herb with *Ai Ye* (Folium Artemisiae Argyi), *E Jiao* (Colla Corii Asini), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Dang Gui* (Radicis Angelicae Sinensis).

2. Clears Toxic Heat and Generates Flesh

Di Yu addresses dermatological disorders characterized by heat and toxins, such as burns, sores, ulcers and eczema. In addition to clearing heat and eliminating toxins, it promotes healing with its restraining function to prevent spreading of the wound and the oozing of fluids. It also relieves pain and promotes generation of flesh.

- Burns: mix *Di Yu* powder with sesame oil and apply topically for burns (first- through fourth- degree). See Cautions below.
- Carbuncles and sores without pus: apply the juice of *Di Yu* topically.
- Eczema or ulcerations with itching, redness, swelling and discharge: the herbs are applied topically. For topical application as an herbal wash, cook *Di Yu* and *Ku Shen Gen* (Radix Sophorae Flavescentis). For topical application using powder, mix *Di Yu*, *Shi Gao* (Gypsum Fibrosum) and *Ming Fan* (Alumen).

DOSAGE

10 to 15 grams, with a maximum of 30 grams, in herbal decoctions; or 1.5 to 3.0 grams per dose of *Di Yu*, one to three times daily as an herbal powder or pills. *Di Yu* is commonly used both internally and topically. Bitter, sour and cold, the unprocessed herb has a stronger function to cool the blood and eliminate toxins. Bitter, sour and astringent, the charred herb functions more effectively to stop bleeding.

CAUTIONS / CONTRAINDICATIONS

- Cold, sour and restraining in nature, *Di Yu* should be used with caution in cases of bleeding caused by deficiency, cold, or blood stasis.
- External use of *Di Yu* is generally considered safe. However, topical application of *Di Yu* is not recommended for burns that have affected a large area of the skin surface. In this case, excessive absorption of the herb (water-soluble tannins) may lead to overdose and liver toxicity, such as toxic hepatitis.
- Do not use *Di Yu* as a single herb treatment in the early stages of dysentery caused by heat.

CHEMICAL COMPOSITION

Ziyuglycoside I, ziyuglycoside II, sanguisorbin, sanguisorbigenin tannins.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Oral administration of unprocessed *Di Yu* powder and charred *Di Yu* powder to mice, at the dosage of 5 g/kg, reduced bleeding time by 31.9% and 45.5%, respectively. Oral administration of unprocessed *Di Yu* powder and charred *Di Yu* powder to rabbits, at the dosage of 2 g/kg, reduced bleeding time by 25% in both groups.[2]
- **Effect on relief of burns:** Topical application of *Di Yu* powder in dogs and rabbits with second and third degree burns showed marked effectiveness in reducing swelling and inflammation by decreasing vascular permeability. Furthermore, it lowered the risk of infection, shortened recovery time, and minimized the risk of shock.[3]
- **Antibiotic:** Water extract of *Di Yu* exhibits an inhibitory influence on *Salmonella typhi*, *Diplococcus meningitidis*, β-hemolytic streptococcus, *Staphylococcus aureus*, and *Diplococcus pneumoniae*; and alcohol extract of *Di Yu* exerts an inhibitory effect on *E. coli* and *Bacillus subtilis*.[4]
- **Antiemetic:** Administration of *Di Yu* decoction, at the dosage of 3 g/kg given orally twice daily for 2 days, was effective in controlling vomiting in pigeons induced by digitalis tincture, but ineffective for vomiting in dogs induced by apomorphine. The antiemetic effect of *Di Yu* is similar to 0.25 mg/kg of intramuscular injection of chlorpromazine.[5]
- **Anti-inflammatory:** Both water and alcohol extracts of *Di Yu* have demonstrated marked anti-inflammatory effects.[6]

CLINICAL STUDIES AND RESEARCH

- **Upper gastrointestinal bleeding:** According to one report, 100 patients with upper-gastrointestinal bleeding were treated with an herbal formula containing equal portions of *Di Yu*, *Bai Ji* (Rhizoma Bletillae) and *Yun Nan Bai Yao*. All patients received 3 grams of the herbal formula three to four times daily; effectiveness was evaluated by the absence of blood in the stools. The study reported a 95% rate of effectiveness. Of 5 cases that did not respond, three had stomach cancer and two had duodenal ulcers.[7]
- **Hemostasis:** Bleeding following tooth extraction in 40 patients was treated topically with an herbal formula. The study reported that bleeding stopped 3 to 5 minutes

Di Yu (Radix Sanguisorbae)

after application of the herbs. The herbal formula contained the following: charred *Di Yu* 2g, *Xi Xin* (Herba Asari) 1g, *Xue Yu Tan* (Crinis Carbonisatus) 1g, and *Bing Pian* (Borneolum Syntheticum) 0.1g.[8]

- **Pulmonary tuberculosis:** An herbal formula based on *Di Yu* showed satisfactory results in relieving hemoptysis secondary to pulmonary tuberculosis. The herbal formula contained 12 grams of dry-fried *Di Yu*, 60 grams of *Bai Mao Gen* (Rhizoma Imperatae), 6 grams of *Gan Cao* (Radix Glycyrrhizae) and others.[9]
- **Profuse menstrual bleeding:** One patient with functional uterine bleeding refractory to western medical treatment was healed after taking an herbal formula once daily for 4 days. The herbal formula contained 45 grams of *Di Yu* cooked in equal parts of water and vinegar.[10]
- **Burns:** Topical treatment of 216 burn patients with an herbal gel resulted in tremendous improvement in speed of recovery and pain relief. The herbal gel dressing was changed every 6 to 7 days for burns without infection, and every 2 to 3 days for infected burns. The study reported growth of new skin after 3 applications, and complete recovery after 6 to 8 applications. The herbal gel contained *Di Yu* 30g, *Zi Cao Gen* (Radix Lithospermi) 30g, *Dang Gui* (Radicis Angelicae Sinensis) 30g, *Bing Pian* (Borneolum Syntheticum) 15g, and *Gan Cao* (Radix Glycyrrhizae) 6g. In another study, 55 patients with second or third degree burns treated topically with *Di Yu* gel recovered within 5 to 7 days.[11] The herbal gel was prepared by mixing equal amounts of *Di Yu* powder and sesame oil.[12]
- **Bacterial dysentery:** In one study, 91 patients with acute bacterial dysentery were treated with a preparation of *Di Yu* three times daily with 95.6% effectiveness.[13]
- **Cervical erosion:** In one report, 573 patients were treated every other day with an herbal formula as vaginal suppository. The herbal formula contained *Di Yu*, *Huai Hua* (Flos Sophorae), *Ming Fan* (Alumen), and *Long Gu* (Os Draconis). The treatment protocol was to first wash the genital region with 0.1% potassium permanganate, followed by insertion of two vaginal suppositories. This procedure is repeated every other day, with four applications per course of treatment. The total duration of treatment was 1 to 3 months, with 5 days of rest between each course of treatment. Patients were advised not to use herbs for the 5 days prior to menstruation. Out of 573 patients, 212 had complete recovery, 62 showed significant improvement, 191 made slight improvement, and 78 had no response.[14]
- **Dermatological disorders:** Various dermatological disorders in 109 patients were treated with 30% charred *Di Yu* in petroleum jelly, with good results. Of the 109 cases, 47 individuals experienced complete recovery, 50 showed improvement, and 12 had no response. The average time to resolution was 8.3 days. The dermatological disorders treated include a rash, eczema, and dermatitis.[15]

HERB-DRUG INTERACTION

- **Ciprofloxacin:** It has been suggested that the absorption and disposition of ciprofloxacin may be affected when given concurrently with *Di Yu*. In one study, rats were divided into two groups, with one receiving ciprofloxacin only, and the other receiving both ciprofloxacin and *Di Yu*. Blood and urine samples were collected after 6 and 24 hours and analyzed by HPLC. Compared with the control group, the group receiving *Di Yu* showed a decrease of maximum plasma concentration by 94%, area under the curve by 78%, and urinary recovery by 79%. Furthermore, the apparent volume of distribution and terminal half-life were both increased, by eight-fold and two-fold, respectively. The mechanism of the interaction was attributed to the high content of minerals present in the herb. To avoid drug-herb interaction and interference with the bioavailability of ciprofloxacin, the researchers concluded that an adequate time should be allowed between the intake of the drug and the herb to ensure efficacy of ciprofloxacin if the two agents were to be used concurrently.[16]

TOXICOLOGY

Continuous oral administration of *Di Yu* herbal extract solution (3:1 concentration) to rats, at the dosage of 20 ml/kg, for 10 days did not demonstrate any significant adverse reactions or toxicities. However, liver biopsy at 5 and 10 days after the initiation of administration of herbs showed an increase in the lipid content of liver cells.[17]

AUTHORS' COMMENTS

Di Yu is cold and has a downward-moving nature, and most effectively addresses various types of bleeding in the lower *jiao* that are caused by toxic heat or damp-heat accumulation. For hematochezia, the charred form is usually used. When using the fresh form of *Di Yu* in decoction for hematochezia, dosage should be increased to 15 to 30 grams.

Bai Mao Gen (Rhizoma Imperatae)

白茅根 白茅根

Pinyin Name: *Bai Mao Gen*
Alternate Chinese Names: *Mao Gen, Ru Gen, Mao Cao Gen*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: imperata, lalang grass rhizome
Botanical Name: *Imperata cylindrica* (L.) Beauv. var. *major* (Nees.) C.E. Hubb. (*Bai Mao*)
Pharmaceutical Name: Rhizoma Imperatae
Properties: sweet, cold
Channels Entered: Lung, Stomach, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Cools Blood and Stops Bleeding

Bleeding: Neither drying nor stagnating in nature, *Bai Mao Gen* (Rhizoma Imperatae) addresses various bleeding disorders caused by heat in the blood. Clinical applications include epistaxis, hemoptysis or hematemesis.

- Epistaxis, hemoptysis or hematemesis from Lung or Stomach heat: drink the juice of fresh *Bai Mao Gen*. It may be combined with *Ou Jie* (Nodus Nelumbinis Rhizomatis) and *Xiao Ji* (Herba Cirisii) for synergistic effect.
- Chronic presence of red blood cells in the urine, with back ache: pair *Bai Mao Gen* with either *Xu Duan* (Radix Dipsaci) or *Sang Ji Sheng* (Herba Taxilli).
- Edema and decreased volume of urine: use it individually.
- Dysuria: use it with *Shi Wei* (Folium Pyrrosiae), *Chuan Mu Tong* (Caulis Clematidis Armandii) and *Dong Kui Zi* (Semen Malvae).
- Damp-heat jaundice: combine this herb with *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae).

2. Clears Heat and Promotes Urination

Dysuria: *Bai Mao Gen* treats *re lin* (heat dysuria), edema, and damp-heat jaundice by draining heat through urination.

- Hematuria due to Urinary Bladder heat: use *Bai Mao Gen* individually.
- Hematuria with deficiency heat: combine it with *Ren Shen* (Radix Ginseng), *Sheng Di Huang* (Radix Rehmanniae) and *Fu Ling* (Poria).

3. Clears Heat from Lung and Stomach

Febrile disorders affecting the Lung and Stomach: Clinical manifestations include irritability, thirst, cough, wheezing, nausea and vomiting.

- Nausea and vomiting caused by Stomach heat: use *Bai Mao Gen* with *Lu Gen* (Rhizoma Phragmitis).
- Asthma and wheezing from Lung heat: combine it with *Sang Bai Pi* (Cortex Mori).

Bai Mao Gen (Rhizoma Imperatae)

DOSAGE

15 to 30 grams in herbal decoction. The dosage for fresh *Bai Mao Gen* is 30 to 60 grams, with a maximum of 250 to 500 grams. The fresh or the unprocessed herb has a stronger function to clear heat, cool blood, and promote urination. The charred herb functions more effectively to stop bleeding, but is unable to clear heat or cool blood.

CAUTIONS / CONTRAINDICATIONS

- Use *Bai Mao Gen* with caution in patients with deficiency and cold of the Spleen and Stomach.
- *Bai Mao Gen* is contraindicated in vomiting caused by cold in the middle *jiao*.

CHEMICAL COMPOSITION

Arundoin, cylindrin, ferneol, simiarenol, coixol.[1,2]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Topical application of *Bai Mao Gen* powder showed marked hemostatic action in rabbits.[3]
- **Diuretic:** Decoction of *Bai Mao Gen* has demonstrated a diuretic effect in rabbits, with maximum effectiveness evident 5 to 10 days after the initiation of treatment.[4]
- **Antibiotic:** It has a strong inhibitory influence *in vitro* against *Shigella flexneri* and *Shigella sonnei*.[5]

CLINICAL STUDIES AND RESEARCH

- **Epidemic hemorrhagic fever:** Of 60 hemorrhagic fever patients treated one to three times daily with an herbal decoction, 58 patients recovered completely, but 2 died. The herbal decoction contained *Bai Mao Gen* 50 to 100g, *Dan Shen* (Radix Salviae Miltiorrhizae) 20 to 30g, *Lu Gen* (Rhizoma Phragmitis) 30 to 40g, *Huang Bai* (Cortex Phellodendri) 10 to 15g, *Mu Dan Pi* (Cortex Moutan) 10 to 15g, *Pei Lan* (Herba Eupatorii) 15 to 30g, and other herbs according to the condition of each individual patient.[6]
- **Epistaxis:** An herbal decoction containing 18 grams of *Zhi Zi* (Fructus Gardeniae) and 120 grams of fresh *Bai Mao Gen* (or 36 grams of dried *Bai Mao Gen*) given after meals or before bedtime was effective in stopping epistaxis characterized by excess heat of the Lung and Stomach within 1 to 3 doses.[7]
- **Nephritis:** Children with acute nephritis were treated with 32 to 59 doses of an herbal decoction, with marked reduction in edema, lowered blood pressure, absence of protein and blood cells in the urine, and normalization of urine. Out of 11 patients, there was complete recovery in 9 patients and moderate improvement in 2 patients. The herbal decoction was prepared by cooking 250 grams of *Bai Mao Gen* in 500 ml of water to yield a final solution that was taken in 2 to 3 equally-divided doses.[8]

HERB-DRUG INTERACTION

- **Diuretics:** *Bai Mao Gen* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes. [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).][9]

TOXICOLOGY

Herbal decoction at the dosage of 25 g/kg decreased motor activity and increased respiration rate in rabbits 36 hours after administration. Intravenous injection at the dosage of 10 to 15 g/kg showed the same effect. Intravenous injection at the dosage of 25 g/kg induced fatality in one rabbit 6 hours after injection.[10]

SUPPLEMENT

- 白茅花 / 白茅花 *Bai Mao Hua* (Flos Imperatae), also known as *Guan Hua*, was first cited in the *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D. *Bai Mao Hua* is the flower of the same plant as *Bai Mao Gen*. Sweet and neutral, *Bai Mao Hua* is commonly used to stop bleeding. Clinical applications include treatment of internal and external bleeding, such as epistaxis, hemoptysis and hematemesis, and bleeding due to trauma. By comparison, *Bai Mao Hua* is more effective for bleeding in the upper *jiao*, as seen in hematemesis and epistaxis, while *Bai Mao Gen* is more effective for bleeding in the lower *jiao*, as in hematuria. The recommended dosage of *Bai Mao Hua* is 10 to 15 grams.

Huai Hua (Flos Sophorae)

槐花 槐花

Pinyin Name: *Huai Hua*
Literal Name: "pagoda flower"
Alternate Chinese Names: *Huai Mi, Huai Rui, Huai Hua Mi*
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: sophora, Japanese pagoda tree flower
Botanical Name: *Sophora japonica* L. (*Huai*)
Pharmaceutical Name: Flos Sophorae
Properties: bitter, cool
Channels Entered: Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Cools Blood and Stops Bleeding

Bleeding: *Huai Hua* (Flos Sophorae) treats various bleeding disorders characterized by heat in the blood. Because it enters the Liver and Large Intestine, *Huai Hua* is most effective and most commonly used to treat bleeding in the lower *jiao*, such as hematochezia, bleeding hemorrhoids, hematuria and profuse menstrual bleeding.

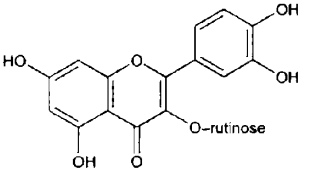
- Hematochezia with bright red blood, caused by damp-heat in the Large Intestine: add *Huai Hua* to *Ce Bai Ye* (Cacumen Platycladi), *Jing Jie* (Herba Schizonepetae), and *Zhi Ke* (Fructus Aurantii). **Exemplar Formula:** *Huai Hua San* (Sophora Japonica Flower Powder).
- Hematochezia with bright red blood, caused by excess heat and fire: use this herb with *Zhi Zi* (Fructus Gardeniae).
- Bleeding hemorrhoids: combine it with *Di Yu* (Radix Sanguisorbae), *Cang Zhu* (Rhizoma Atractylodis) and *Gan Cao* (Radix Glycyrrhizae).
- Hematuria caused by heat in the Urinary Bladder: use charred *Huai Hua* and *Yu Jin* (Radix Curcumae).
- Metrorrhagia or abnormal uterine bleeding: mix the powder of *Huai Hua* and *Gan Cao* (Radix Glycyrrhizae) with warm liquor.
- Persistent hematemesis: mix charred *Huai Hua* with a small amount of *She Xiang* (Moschus), and serve it with sticky rice soup.
- Persistent epistaxis: mix equal portions of *Huai Hua* and *Hai Piao Xiao* (Endoconcha Sepiae) powder and apply the powder directly into the nostrils.
- Bleeding of the tongue: apply *Huai Hua* powder topically.

2. Clears Liver Heat and Sedates Fire

Huai Hua treats red eyes, headache, dizziness and vertigo associated with Liver heat and fire.

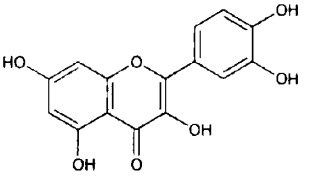
- Liver heat and fire: combine *Huai Hua* with *Ju Hua* (Flos Chrysanthemi) and *Xia Ku Cao* (Spica Prunellae), and serve as tea.

DOSAGE



10 to 15 grams for decoction, reduce the dosage for *Huai Hua* powder. The fresh herb has a stronger function to cool blood, purge fire, and lower blood pressure. The dry-fried form is warmer, and is less likely to cause irritation to the Spleen and Stomach. The charred herb is better to stop bleeding.

CAUTIONS / CONTRAINDICATIONS



- *Huai Hua* should be used with caution in deficiency and cold of the Spleen and Stomach.

CHEMICAL COMPOSITION

Rutin, betulin, sophoradiol, sophorin A, sophorin B, sophorin C, quercetin, and rutoside.[1,2,3]

Rutin

Quercetin

Huai Hua (Flos Sophorae)

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Both unprocessed and charred *Huai Hua* may shorten bleeding time. Charred *Huai Hua* is stronger than the unprocessed herb in this hemostatic function.[4]
- **Effect on blood vessels:** Rutin and quercetin have been shown to maintain the integrity of the capillaries by decreasing permeability and increasing flexibility.[5]
- **Cardiovascular:** Administration of rutin and quercetin to frogs has demonstrated positive inotropic and negative chronotropic effects, leading to increased cardiac output and decreased heart rate. These substances also improve blood perfusion to the cardiac muscle by dilating the coronary artery. Lastly, administration of water and alcohol extracts of *Huai Hua* have marked antihypertensive effects, as demonstrated in anesthetized dogs.[6]
- **Antihyperlipidemic:** Administration of quercetin has been associated with reduction of liver and plasma cholesterol levels. It has demonstrated promising protective and therapeutic effects for atherosclerosis treatment.[7]
- **Anti-inflammatory:** Administration of rutin and quercetin via the intraperitoneal route has demonstrated marked anti-inflammatory effects in mice and rats with arthritis.[8]
- **Antispasmodic and antiulcer:** Rutin and quercetin have been shown to reduce the contractility of the intestines and decrease the secretion of gastric acid. Quercetin is five times more potent than rutin in its antispasmodic effect.[9]
- **Protective effect against radiation:** Administration of rutin reduced the severity of adverse effects and the incidence of fatality in mice exposed to x-ray radiation.[10]
- **Preventative effect against frostbite:** Rutin has a protective effect against frostbite, and is most effective in treating cases of third-degree frostbite.[11]

CLINICAL STUDIES AND RESEARCH

- **Menstrual bleeding:** Patients with profuse menstrual bleeding were treated with an herbal decoction once or twice daily, for up to 7 days, with 83.6% effectiveness. The herbal decoction contained charred *Huai Hua* 30g, *Ji Cai* (Herba Capsellae Bursapastoris) 30g, *Ma Chi Xian* (Herba Portulacae) 30g, charred *Hai Piao Xiao* (Endoconcha Sepiae) 15g, charred *Qian Cao* (Radix Rubiae) 15g, charred *Di Yu* (Radix Sanguisorbae) 15g, *Ji Mu* (Radix Loropetali) 15g, charred *Pu Huang* (Pollen Typhae) 10g, *Gan Cao* (Radix Glycyrrhizae) 5g, and others (based on the condition of each patient). Patients were advised to take the herbs once daily, or twice daily if there was profuse bleeding. Out of 140 patients, 64 patients stopped bleeding within 1 to 3 days, 53 stopped within 4 to 6 days, and 23 continued to bleed after 7 days.[12]
- **Hemorrhoids:** In one study, 400 patients with hemorrhoids were treated with an herbal decoction once daily with good success. The study reported that 61% showed significant improvement, 31% showed moderate improvement and 8% experienced no improvement. The formula contained *Huai Hua* 15g, *Huai Jiao* (Fructus Sophorae) 15g, *Hua Shi* (Talcum) 15g, *Sheng Di Huang* (Radix Rehmanniae) 12g, *Jin Yin Hua* (Flos Lonicerae) 12g, *Dang Gui* (Radicis Angelicae Sinensis) 12g, *Huang Lian* (Rhizoma Coptidis) 12g, *Huang Bai* (Cortex Phellodendri) 10g, *Huang Qin* (Radix Scutellariae) 10g, *Sheng Ma* (Rhizoma Cimicifugae) 6g, *Chai Hu* (Radix Bupleuri) 6g, *Zhi Ke* (Fructus Aurantii) 6g, *Gan Cao* (Radix Glycyrrhizae) 3g, and others (based on the condition of each patient).[13]
- **Psoriasis:** Sufferers of psoriasis were treated with 3 grams of dry-fried *Huai Hua* in powder, taken twice daily with warm water after meals. Out of 53 patients, 6 showed significant improvement, 22 made moderate progress, 19 had slight improvement, and 6 showed no response. The herbal remedy was prepared by dry-frying *Huai Hua* until it turned yellow, grinding it to powder, and mixing it with honey to make pills.
- **Summer boil:** Application of a *Huai Hua* solution topically two to three times daily, followed by application of *Huai Hua* paste, showed marked effectiveness within 1 to 2 days. The herbal solution was prepared by cooking 30 to 60 grams of the herb in 1,500 ml of water.[14]

TOXICOLOGY

The LD_{50} for quercetin in mice is 160 mg/kg via oral ingestion.[15]

SUPPLEMENT

- 槐角 / 槐角 *Huai Jiao* (Fructus Sophorae), first cited in *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is derived from the fruit of the same plant as *Huai Hua* (Flos Sophorae). *Huai Jiao* is bitter, cold, and enters the Liver and Large Intestine. In comparison with *Huai Hua*, *Huai Jiao* has weaker action to stop bleeding, and stronger effect to sedate heat. It can also lubricate the intestines. For treatment of hemorrhoidal bleeding, hematochezia or bleeding caused by abscesses or swelling with pain, *Huai Jiao* is often combined with *Di Yu* (Radix Sanguisorbae), *Huang Qin* (Radix Scutellariae) and *Dang Gui* (Radicis Angelicae Sinensis). To sedate Liver fire to lower blood pressure and treat red eyes, headache and dizziness, *Huai Jiao* is commonly combined with *Huang Qin*, *Jue Ming Zi* (Semen Cassiae) and *Xia Ku Cao* (Spica Prunellae). *Huai Jiao* is contraindicated in pregnant women, or patients with deficiency and cold of the Spleen and Stomach. The recommended dosage of *Huai Jiao* is 10 to 15 grams in decoction.

Huai Hua (Flos Sophorae)

Ce Bai Ye (Cacumen Platycladi)

側柏葉 侧柏叶

Pinyin Name: *Ce Bai Ye*
Literal Name: "flat fir leaves"
Alternate Chinese Names: *Ce Bai, Bai Ye, Bian Bai*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: platycladus leaves, leafy twigs of Chinese arborvitae, leafy twigs of oriental arborvitae
Botanical Name: *Platycladus orientalis* (L.) Franco; *Biota orientalis* (L.) Endl.
Pharmaceutical Name: Cacumen Platycladi
Properties: bitter, astringent, cool
Channels Entered: Lung, Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Cools Blood and Stops Bleeding

Bleeding due to heat: *Ce Bai Ye* (Cacumen Platycladi) treats various bleeding disorders, including epistaxis, hematemesis, hemoptysis, profuse menstrual bleeding, hematochezia, hematuria and external bleeding caused by trauma. It can also treat bleeding from deficiency and cold, when combined with interior-warming herbs.

- Hematemesis or epistaxis with bright red blood: use *Ce Bai Ye* with *Da Ji* (Herba seu Radix Cirsii Japonici), *Xiao Ji* (Herba Cirisii) and *Bai Mao Gen* (Rhizoma Imperatae).
- Persistent hematemesis with sallow facial appearance, pale tongue, and a weak pulse from deficiency and cold: combine it with *Gan Jiang* (Rhizoma Zingiberis) and *Ai Ye* (Folium Artemisiae Argyi).
- Hematuria caused by heat in the Urinary Bladder: use it with *Da Ji* (Herba seu Radix Cirsii Japonici), *Xiao Ji* (Herba Cirisii), and *Bai Mao Gen* (Rhizoma Imperatae).
- Hematochezia: add *Huai Hua* (Flos Sophorae) and *Di Yu* (Radix Sanguisorbae) to this herb.
- Profuse menstrual bleeding: add *Bai Shao* (Radix Paeoniae Alba).
- Profuse menstrual bleeding with qi and blood deficiencies: use it with *Dang Shen* (Radix Codonopsis), *Dang Gui* (Radicis Angelicae Sinensis), *Sheng Di Huang* (Radix Rehmanniae) and *Xian He Cao* (Herba Agrimoniae).
- Burns: use *Ce Bai Ye* topically as herbal powder.
- External bleeding: use it topically as herbal paste.

2. Dispels Phlegm and Stops Cough

Cough with profuse sputum: *Ce Bai Ye* is most effective

Ce Bai Ye (Cacumen Platycladi)

for treating cough caused by accumulation of hot phlegm that is difficult to expectorate.
- Cough with hot phlegm: use this herb with *Ban Xia* (Rhizoma Pinelliae).

3. Treats Hair Loss

Hair loss and itchy scalp from oily hair:
- Hair loss: cook *Ce Bai Ye* with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and lard, and use the herbal decoction as herbal wash.
- Hair loss and/or itchy scalp: soak *Ce Bai Ye* in 60% alcohol for 7 days and apply the tincture to the scalp as herbal wash.

DOSAGE

10 to 15 grams, maximum 30 grams, in herbal decoction. *Ce Bai Ye* is commonly used as herbal decoction, herbal powder, and topically as herbal paste or wash. The unprocessed herb has a stronger function to cool the blood, while the charred form is better to stop bleeding.

CAUTIONS / CONTRAINDICATIONS

- Bitter and cold in nature, *Ce Bai Ye* should be prescribed with caution for patients experiencing deficiency and cold of the Spleen and Stomach, as it may cause diarrhea.
- Because of its cold and astringent nature, use *Ce Bai Ye* with caution in patients with bleeding and blood stasis, as the stasis may become more difficult to disperse.
- Overdose or prolonged use of *Ce Bai Ye* may cause dizziness, nausea, and decreased appetite.

CHEMICAL COMPOSITION

Volatile oil, juniperic acid, sabinic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Herbal decoction of *Ce Bai Ye* has demonstrated marked influence to shorten bleeding time in mice and rabbits. Interestingly, the fresh herb was found to be slightly more effective than the charred herb.[2]
- **Antitussive:** Oral administration of water and alcohol extracts of *Ce Bai Ye* in mice at the dosage of 250 mg/kg demonstrated marked ability to relieve artificially-induced cough.[3]
- **Expectorant:** Extract of *Ce Bai Ye* demonstrated marked expectorant effects in mice.[4]
- **Respiratory:** Extract of *Ce Bai Ye* demonstrated marked potency to relax smooth muscle of the respiratory tract in mice and guinea pigs. It did not, however, exhibit significant protective effect against asthma in guinea pigs.[5]
- **Sedative:** Herbal decoction of *Ce Bai Ye* showed sedative action on the central nervous system as it prolonged phenobarbital-induced sleeping time, decreased motor activities, and prevented caffeine-induced seizures in mice.[6]
- **Antihypertensive:** Intravenous or oral administration of *Ce Bai Ye* lowered blood pressure in rabbits through vasodilation.[7]
- **Antibiotic:** *Ce Bai Ye* shows inhibitory activity against *Staphylococcus aureus, Neisseria catarrhalis, Salmonella typhi, Corynebacterium diphtheriae,* β-hemolytic streptococcus, and *Bacillus anthracis.*[8]

CLINICAL STUDIES AND RESEARCH

- **Bleeding ulcers:** In one study, 100 patients with bleeding ulcers were divided into two groups, with 50 patients receiving herbal treatment and 50 receiving a placebo substance. The treatment group received an herbal decoction with 15 grams of *Ce Bai Ye.* Negative hemoccult tests were reported in the treatment group after an average of 2.8 days, and in the placebo group after 4.5 days.[9]
- **Bleeding hemorrhoids:** Eight patients were treated with rectal instillation of 200 ml of herbal solution once daily, with satisfactory results. The herbal solution was prepared by mixing 30 grams of charred *Ce Bai Ye,* 15 grams of charred *Jing Jie* (Herba Schizonepetae), and 20 grams of charred *Da Huang* (Radix et Rhizoma Rhei) with warm water.[10]
- **Whooping cough:** Children with whooping cough were treated with a preparation of *Ce Bai Ye* for 4 to 10 days with good success. Children under two years of age received 15 to 25 ml of herbal decoction three times daily; and dosages for children over two years of age were adjusted accordingly. Out of 56 children, 41 made complete recovery, 9 showed moderate improvement, and 6 had no response.[11]
- **Pulmonary tuberculosis:** Daily administration of 120 grams of *Ce Bai Ye* via intravenous and oral routes for 3 to 5 months showed excellent results in 153 patients with pulmonary tuberculosis. There was marked improvement in coughing, sputum, night sweats, hemoptysis, fatigue and other symptoms.[12]
- **Hair loss:** In one study, 160 patients with hair loss were treated with a topical herbal preparation with a 77.5% rate of effectiveness. The herbal formula was prepared by soaking 25 to 35 grams of *Ce Bai Ye* in 100 ml of 60 to 75% rubbing alcohol for 7 days. The treatment protocol was to apply the herbal preparation three to four times daily.[13]
- **Parotitis:** Topical application of *Ce Bai Ye* paste was effective in reducing pain and swelling within 1 to 2 days in 48 out of 50 patients with parotitis. The herbal paste was prepared by grinding 200 to 300 grams of fresh *Ce Bai Ye,* and combining it with egg whites. The herbal paste was applied externally to the affected area seven to eight times daily.[14]

Ce Bai Ye (Cacumen Platycladi)

TOXICOLOGY

Oral administration of *Ce Bai Ye* decoction to mice at the dosage of 60 g/kg did not show any significant toxicity or cause any fatalities. There were no significant changes in the growth, liver function and blood panel of mice who received high dosages of the herb for 6 weeks. The LD_{50} for intraperitoneal administration of *Ce Bai Ye* injectable in mice is 15.2 g/kg.[15]

AUTHORS' COMMENTS

Platycladus orientalis is the standard name and official source for *Ce Bai Ye*.[16] The previous name, *Biota orientalis*, is no longer used.

Ce Bai Ye has a strong function to stop bleeding, and is one of the most commonly-used herbs for this purpose. Clinical applications vary depending on the herbal combination:

- For bleeding caused by heat, it is combined with *Da Ji* (Herba seu Radix Cirsii Japonici) or *Xiao Ji* (Herba Cirisii).
- For persistent bleeding, it is used with *Xian He Cao* (Herba Agrimoniae), *Ou Jie* (Nodus Nelumbinis Rhizomatis) and *Pu Huang* (Pollen Typhae).
- If bleeding is from deficiency and cold, this herb is added to charred *Ai Ye* (Folium Artemisiae Argyi) and charred *Pao Jiang* (Rhizoma Zingiberis Preparatum).

Zi Zhu (Folium Callicarpae)

紫珠

Pinyin Name: *Zi Zhu*

Literal Name: "purple beads," "purple pearl"

Alternate Chinese Names: *Zi Jing, Zhi Xue Cao, Zi Jing Cao*

Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.

English Name: callicarp leaf

Botanical Name: *Callicarpa pedunculata* R. Br. (*Du Hong Hua*); *Callicarpa macrophylla* Vahl. (*Da Ye Zi Zhu*); *Callicarpa nudiflora* Hook. et. Arn. (*Luo Hua Zi Zhu*); *Callicarpa dichotamoa* (Lour.) K. Koch (*Bai Tang Zi Shu*); *Callicarpa loureiri* Hook. et Arn (*Chang Ye Zi Zhu*); *Callicarpa arborea* Roxb. (*Da Ye Zi Zhu*); *Callicarpa kwangtungensis* Chun. (*Guang Dong Zi Zhu*); *Callicarpa rubella* Lindl. (*Hong Zi Zhu*); *Callicarpa cathayana* H. T. Chang (*Hua Zi Zhu*)

Pharmaceutical Name: Folium Callicarpae

Properties: bitter, astringent, cool

Channels Entered: Liver, Lung, Stomach

Zi Zhu (Folium Callicarpae)

CHINESE THERAPEUTIC ACTIONS

1. Retains Blood and Stops Bleeding

Gastrointestinal or respiratory bleeding: *Zi Zhu* (Folium Callicarpae) is one of the best herbs to stop bleeding, especially in the digestive and respiratory tracts. It may be used alone in powder form with cold or warm water. It can also be used as tea to treat gastrointestinal bleeding. This herb has been made into injectable form or topical gauze to stop bleeding. It is also used during surgery to stop bleeding. Clinical applications of *Zi Zhu* include hemoptysis, hematemesis, hematuria, hematochezia, uterine bleeding or bleeding from external injuries.

- Hemoptysis, epistaxis: mix the powder of *Zi Zhu* with egg whites.
- Bleeding caused by external injuries: crush fresh *Zi Zhu*, or use the powder, and apply the herb to the affected sites.
- Incessant bleeding from a tooth extraction: apply *Zi Zhu* powder to the affected area and cover it with sterilized cotton.
- Various types of bleeding: use it with *Xian He Cao* (Herba Agrimoniae), *Qian Cao* (Radix Rubiae) and *Han Lian Cao* (Herba Ecliptae).

2. Eliminates Toxins and Treats Toxic Sores

Toxic sores, abscesses, carbuncles, burns:

- Burns: apply *Zi Zhu* decoction topically. It can also be used topically with *Da Huang* (Radix et Rhizoma Rhei), *Huang Qin* (Radix Scutellariae) and *Huang Bai* (Cortex Phellodendri) to prevent infection for first- and second-degree burns with oozing fluids.
- Toxic sores, abscesses, carbuncles: use it with *Jin Yin Hua* (Flos Lonicerae) and *Pu Gong Ying* (Herba Taraxaci) as decoction. Apply topically as powder.
- Sore throat, redness and eye pain: use *Zi Zhu* alone as a decoction.

DOSAGE

As decoction, 10 to 15 grams for the dried herb, and 30 to 60 grams for the fresh herb. As a powder, 1.5 to 3 grams per dose.

CAUTIONS / CONTRAINDICATIONS

- Use *Zi Zhu* with caution in patients who are bleeding because of deficiency and cold.

CHEMICAL COMPOSITION

Calliterpenone, luteolin, apigenin, flavones, tannins, calcium, iron, magnesium.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** In both *in vitro* and *in vivo* studies, injection of *Zi Zhu* stops bleeding by increasing the number of platelets.[2]
- **Antibiotic:** *Zi Zhu* inhibits *Staphylococcus aureus*, *Staphylococcus albus*, *Pseudomonas aeruginosa*, *Salmonella typhi*, *Bacillus dysenteriae*, *E. coli*, *Diplococcus meningitidis*, and *Bacillus proteus*.[3]

CLINICAL STUDIES AND RESEARCH

- **Bleeding:** In one study, 500 patients who required invasive procedures for tooth extraction were treated with topical application of *Zi Zhu* to stop bleeding. In cases of moderate bleeding, topical application of *Zi Zhu* powder stopped bleeding within 2 to 3 minutes. In cases of severe bleeding, topical application of *Zi Zhu* powder under cotton with light pressure was effective to stop bleeding within 2 to 3 minutes. The study reported approximately a 99% rate of effectiveness.[4]
- **Bleeding during surgery:** Gauze soaked in a 10 to 15% *Zi Zhu* solution was used topically to stop bleeding during 53 surgical procedures, with good results. Upon application of the herb-soaked gauze, bleeding generally stopped within 1 to 2 minutes.[5]
- **Upper gastrointestinal bleeding:** In one clinical study, 12 patients with duodenal bleeding, 2 patients with gastric bleeding, and 1 patient with hematochezia and hematemesis caused by liver cirrhosis, were treated with two preparations of *Zi Zhu*. Preparation I was 30 to 60 grams of *Zi Zhu* as herbal decoction, taken once daily. Preparation II was 2 to 4 ml of a 2% *Zi Zhu* preparation, injected intramuscularly twice daily. Patients with severe bleeding were treated with both methods. The study reported that most patients stopped bleeding within 3 to 5 days.[6]
- **Epistaxis:** Four patients with nosebleeds were treated by topical instillation of 2% *Zi Zhu* drops with the immediate effect of stopping bleeding.[7]
- **Burns:** In one study, 21 burn patients were treated with external and internal administrations of *Zi Zhu*, with good results. The treatment protocol was to deliver *Zi Zhu* to the burnt area via vapor daily, and then cover with gauze. If necessary, intramuscular injection of 2% *Zi Zhu* or oral ingestion of 50% *Zi Zhu* were given three to four times daily. Complete recovery was reported in 20 out of 21 patients. The length of hospitalization was 5 to 35 days. The one patient who did not respond suffered from severe burns, that subsequently turned into septicemia, renal failure, and eventually fatality.[8]
- **Skin ulceration:** Patients with skin ulceration with abscesses and pus were treated with a topical wash of *Zi Zhu* solution, with excellent results. The average time to complete recovery was 9.87 days. The treatment protocol was to wash the affected area with normal saline, then

Zi Zhu (Folium Callicarpae)

wash with a solution of *Zi Zhu*, and cover with gauze. This protocol was repeated on a daily basis. Out of 232 patients, there was complete recovery in 228 cases and significant improvement in the remaining 4 cases.[9]

- **Gynecological uses:** Topical application of *Zi Zhu* was used to treat cervicitis and vaginitis from various causes. The treatment protocol was to first cleanse the affected area, then apply *Zi Zhu* as powder, suppository, or via cotton ball soaked with herbal solution. The patients were treated one time daily for 5 days. Out of 78 patients, there was complete recovery in 38 cases, and moderate improvement in 33 cases, with an overall rate of effectiveness of 91%.[10]

TOXICOLOGY

No toxic effect was observed following intraperitoneal injection of 10% *Zi Zhu* at 200 mg/kg in rabbits. The LD_{50} for mice is 237.5 mg/kg via intravenous injection.[11]

AUTHORS' COMMENTS

Zi Zhu was originally cited by Chen Cang-Qi, in *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica), 741 A.D. However, little information was provided. Most knowledge of *Zi Zhu* has been documented relatively recently, leading to increased use of this herb.

Xian He Cao (Herba Agrimoniae)

仙鶴草 仙鹤草

Pinyin Name: *Xian He Cao*
Literal Name: "red-crowned crane plant," "immortal crane herb"
Alternate Chinese Names: *Long Ya Cao, Jin Ding Long Ya, Tou Li Cao, Lang Ya Cao*
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: agrimony, hairy-vein agrimonia
Botanical Name: *Agrimonia pilosa* Ledeb. (*Long Ya Cao*)
Pharmaceutical Name: Herba Agrimoniae
Properties: bitter, astringent, neutral
Channels Entered: Lung, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Stops Bleeding

Bleeding due to damage of the Lung and Stomach channels: *Xian He Cao* (Herba Agrimoniae) has a good restraining function and is commonly used to treat bleeding, including epistaxis, hemoptysis, hematemesis, hematuria, hematochezia, and abnormal uterine bleeding.

- Hemoptysis and hematemesis from heat injuring the Lung or Stomach: use *Xian He Cao* individually.
- Epistaxis, hemoptysis or hematemesis due to yin deficiency with heat: combine it with *Ce Bai Ye* (Cacumen Platycladi), *Ou Jie* (Nodus Nelumbinis Rhizomatis), *Bai*

Xian He Cao (Herba Agrimoniae)

Mao Gen (Rhizoma Imperatae) and *Sheng Di Huang* (Radix Rehmanniae).

- Hematochezia: use it with *Pu Huang* (Pollen Typhae) and *Da Ji* (Herba seu Radix Cirsii Japonici).
- Profuse menstrual bleeding with sallow yellow appearance, pale tongue, thready and weak pulse: add this herb to *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Pao Jiang* (Rhizoma Zingiberis Preparatum).
- Thrombocytopenic purpura: use 30 to 60 grams of *Xian He Cao* with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Bai Shao* (Radix Paeoniae Alba), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Mao Gen* (Rhizoma Imperatae), *E Jiao* (Colla Corii Asini), charred *Qian Cao* (Radix Rubiae), and charred *Mu Dan Pi* (Cortex Moutan).

2. Relieves Diarrhea

Diarrhea and dysentery: *Xian He Cao* relieves diarrhea and dysentery with pus and/or blood. It is especially effective if the condition is accompanied by gastrointestinal bleeding or by white mucus.

- Chronic diarrhea or dysentery with mucus and blood: use *Xian He Cao* individually.
- Bloody diarrhea or dysentery: use it with *Di Yu* (Radix Sanguisorbae).

3. Kills Parasites

Xian He Cao treats various parasitic infections, including malaria, tapeworm, roundworm, and trichomonas vaginitis.

- Malaria: administer 9 grams of *Xian He Cao* in powder with warm grain-based liquor and a large quantity of water, one time per day for 3 days.
- Trichomonas vaginitis: use *Xian He Cao* topically.

4. Tonifies Qi and Blood

In patients with qi and blood deficiencies caused by overexertion, *Xian He Cao* prevents the further loss of qi and blood by its stabilizing and binding effects, thereby enhancing the overall tonic effect of other herbs in a formula.

- Fatigue and lack of energy with normal appetite: use 50 grams of *Xian He Cao* with 50 to 100 grams of *Da Zao* (Fructus Jujubae). Drink the decoction and eat the *Da Zao*.
- Qi and blood deficiencies with fatigue, dizziness, lightheadedness, weak knees and low back: combine it with *Long Yan Rou* (Arillus Longan), *Ren Shen* (Radix Ginseng), *Shu Di Huang* (Radix Rehmanniae Preparata), and *Gou Qi Zi* (Fructus Lycii).

5. Reduces Swelling, Eliminates Pus

Xian He Cao, used externally or internally, treats breast abscesses, swellings and ulcerations. Clinical manifestations include sores, swellings, hemorrhoids and breast nodules. The vine of this plant is usually used for this function.

DOSAGE

10 to 15 grams in decoction. The maximum dosage of *Xian He Cao* is 30 to 60 grams. It may be taken internally or applied topically. Topical application is commonly administered as an herbal wash or herbal paste.

CAUTIONS / CONTRAINDICATIONS

- Use of *Xian He Cao* may cause palpitations and flushing.
- *Xian He Cao* is astringent in nature, and should not be used in acute diarrhea or dysentery, as it may contribute to retention of pathogens.

CHEMICAL COMPOSITION

Agrimol, agrimonolide, agrimonine A, B, C, D, E; vanillic acid, ellagic acid, L-taxifoine, cosmosilin, vitamin K.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Administration of *Xian He Cao* in rabbits and dogs via intravenous injection, at a dosage of 2 mg/kg, demonstrated an increase in platelets and a reduction in bleeding time.[2]
- **Cardiovascular:** Administration of *Xian He Cao* has varying effects on the cardiovascular system in rabbits and frogs. Water extract of the herb decreases blood pressure and has an inhibiting effect on the heart; alcohol extract increases blood pressure and has a stimulating effect on the heart.[3]
- **Gastrointestinal:** Water extract of *Xian He Cao* has a direct effect on the smooth muscles of the gastrointestinal tract. At low dosages, it has a stimulating effect; at high dosages, it has an inhibiting effect.[4]
- **Antibiotic:** *Xian He Cao* has an inhibitory effect against *Staphylococcus aureus, E. coli, Pseudomonas aeruginosa, Salmonella typhi,* and *Mycobacterium tuberculosis.*[5]
- **Antiparasitic:** Administration of *Xian He Cao* at the dosage of 300 mg/kg has demonstrated marked effectiveness within for treatment of schistosomiasis 3 to 5 days.[6]
- **Antiparasitic:** Administration of *Xian He Cao* has demonstrated marked antiparasitic effect against roundworm, tapeworm and others.[7]
- **Spermicidal:** Sperm samples from both humans and animals were obtained and placed in containers: some were diluted and some were not. Extract of *Xian He Cao* was added to all sample containers, and killed all sperm in all samples within 1 to 5 minutes.[8]
- **Antineoplastic:** Extract of *Xian He Cao* has demonstrated preliminary effectiveness against tumor cells in mice.[9]

Xian He Cao (Herba Agrimoniae)

CLINICAL STUDIES AND RESEARCH

- **Upper gastrointestinal bleeding:** In one study, 100 patients with upper gastrointestinal bleeding were treated with ingestion of an herbal decoction [30 grams of *Xian He Cao* and 10 grams of *Da Zao* (Fructus Jujubae)] once daily and an herbal powder [6 grams of *Bai Ji* (Rhizoma Bletillae)] three times daily. *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) was also given if indicated. The study reported 70% effectiveness overall, with bleeding stopping in 70 of the 100 patients within 7 days.[10]
- **Menstrual bleeding:** Profuse menstrual bleeding in 147 patients was treated with an herbal decoction consisting of *Xian He Cao* 30g, *Han Lian Cao* (Herba Ecliptae) 20g, *Di Yu* (Radix Sanguisorbae) 20g, charred *Guan Zhong* (Rhizoma Dryopteridis) 15g, *Yi Mu Cao* (Herba Leonuri) 12g, *Zhi Ke* (Fructus Aurantii) 12g, *E Jiao* (Colla Corii Asini) 12g, charred *Xi Xian Cao* (Herba Siegesbeckiae) 10g, and others as needed. The treatment protocol was to administer the herbs in decoction one time daily (two times daily in severe cases), for 8 to 12 doses per treatment course. This process was repeated in the next menstrual cycle. The study reported recovery in most patients within two to three courses of treatment. The overall rate of effectiveness was 96.4%.[11]
- **Trichomonas vaginitis:** According to one report, 37 of 40 patients (92.5%) with trichomonas vaginitis reported complete recovery following topical treatment with *Xian He Cao*. The treatment protocol was to first use the herbal solution as a topical wash, followed by insertion of a cotton ball saturated with the herbal solution into the vagina, with the cotton ball retained for 3 to 4 hours. The procedure was performed once daily for 7 days per treatment course.[12]

HERB-DRUG INTERACTION

- **Anticoagulant drugs:** *Xian He Cao* contains vitamin K, which may reduce the anticoagulant effect of warfarin (Coumadin). While use of the herb is not contraindicated, it should be used with caution, in order to prevent formation of clots.[13]

TOXICOLOGY

The LD_{50} for *Xian He Cao* in mice via intraperitoneal injection is 90.7 +/- 4.9 mg/kg. Toxic reactions included increased movement, followed by a lack of activity, closed eyes, muscle stiffness, and in severe cases, fatality within 1 to 24 hours.[14]

Bai Ji (Rhizoma Bletillae)

白芨 白及

Pinyin Name: *Bai Ji*
Literal Name: "white orchid"
Alternate Chinese Names: *Bai Gen, Gan Gen, Lian Ji Cao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: bletilla, common bletilla tuber, hyacinth bletilla tuber
Botanical Name: *Bletilla striata* (Thunb.) Reichb. f. (*Bai Ji*)
Pharmaceutical Name: Rhizoma Bletillae
Properties: bitter, sweet, astringent, cool
Channels Entered: Lung, Stomach, Liver

CHINESE THERAPEUTIC ACTIONS

1. Restrains Leakage of Blood, Stops Bleeding

Hemoptysis and hematemesis, bleeding due to trauma, lung abscess: *Bai Ji* (Rhizoma Bletillae) cools heat, nourishes yin, and retains body fluids. It is most effective for bleeding from the lung and stomach, such as hemoptysis, hematemesis, and epistaxis. Cool in property, this herb is good to stop hemoptysis due to Lung heat or Lung yin deficiency. Topical application is effective to stop bleeding and treat wounds.

- Hemoptysis due to Lung heat damaging yin: use *Bai Ji* individually; or combine it with *Pi Pa Ye* (Folium Eriobotryae), *E Jiao* (Colla Corii Asini), *Ou Jie* (Nodus Nelumbinis Rhizomatis), and *Sheng Di Huang* (Radix Rehmanniae).
- Hemoptysis from pulmonary tuberculosis: use this herb with *Bai Bu* (Radix Stemonae) and *Chuan Xin Lian* (Herba Andrographis).
- Hematemesis because of Stomach heat damaging yin: use it with *Hai Piao Xiao* (Endoconcha Sepiae).
- Bleeding peptic or duodenal ulcers due to Stomach heat: combine this herb with *Hai Piao Xiao* (Endoconcha Sepiae), and *Bei Mu* (Bulbus Fritillaria).
- Hematemesis due to damp-heat: add *Yi Yi Ren* (Semen Coicis) and *Huang Lian* (Rhizoma Coptidis).
- External bleeding due to cuts: apply *Bai Ji* powder topically.
- Profuse external bleeding with deep cuts: use powdered *Bai Ji* with calcined *Shi Gao* (Gypsum Fibrosum) and calcined *Long Gu* (Os Draconis) in powder form.

2. Reduces Swelling, Promotes Generation of Flesh

Bai Ji is commonly used topically to treat sores and swellings with or without ulceration. It is especially effective for chronic, non-healing sores. This herb should be used in powder form, as its astringent property helps the closing of sores and wounds. It also promotes the generation of flesh.

- Sores with or without ulceration: apply *Bai Ji* powder topically.
- Erysipelas: use it with *Huang Bai* (Cortex Phellodendri) and *Cong Bai* (Bulbus Allii Fistulosi).
- Carbuncles, furuncles, sores and general dermatological disorders: combine this herb with *Fu Rong Ye* (Folium Hibisci), *Da Huang* (Radix et Rhizoma Rhei), *Huang Bai* (Cortex Phellodendri) and *Wu Bei Zi* (Galla Chinensis), and apply topically. Another source recommends mixing *Bai Ji, Jin Yin Hua* (Flos Lonicerae), *Zao Jiao* (Fructus Gleditsiae), *Ru Xiang* (Gummi Olibanum) and *Bei Mu* (Bulbus Fritillaria) with equal portions of water and rubbing alcohol, and applying it topically.
- Chronic non-healing wounds: use *Bai Ji* powder individually to promote healing.
- Chronic non-healing wounds with pus: use it with *Huang Lian* (Rhizoma Coptidis), *Bei Mu* (Bulbus Fritillaria), and *Wu Bei Zi* (Galla Chinensis).
- Chapped skin, fingers, toes, or anus, and burns: apply *Bai Ji* powder topically.

DOSAGE

3 to 10 grams in decoction, with a maximum dose of 30 grams. 1.5 to 3.0 grams of *Bai Ji* powder per dose, taken one to three times daily. *Bai Ji* is commonly used as herbal decoction, powder, and topical powder. When treating internal bleeding, this herb is not usually decocted with the others, as its sticky nature will easily burn on the sides and bottom of the pot. Therefore, the powdered herb is usually mixed with the strained decoction before administration.

Bai Ji (Rhizoma Bletillae)

CAUTIONS / CONTRAINDICATIONS

- Sticky and astringent in nature, *Bai Ji* should be used with caution in cases of hemoptysis caused by exterior infection, early-stage lung abscess or excessive bleeding from the Lung or Stomach caused by excess fire and toxins.
- *Bai Ji* is incompatible with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Wu Tou* (Radix Aconiti).
- Avoid using heat-clearing herbs with *Bai Ji* when the sores have already ulcerated.

CHEMICAL COMPOSITION

Acacia gum, tragacanth, bletilla mannan, bletilla-glucomannan, starch.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Intravenous injection of a 2% *Bai Ji* preparation at the dosage of 1.5 ml/kg demonstrated a significant reduction in both bleeding and thrombin time in rabbits. Furthermore, it showed excellent hemostatic action when applied topically.[2]
- **Antiulcer:** In anesthetized dogs with a perforation one millimeter in diameter in the stomach and duodenum, administration of 9 grams of *Bai Ji* powder closed the perforation in the stomach after 15 seconds, and in the duodenum after 40 seconds. However, *Bai Ji* had no effect when the stomach was full or if the perforation was larger. Unlike most antiulcer medications that inhibit or neutralize gastric acid, *Bai Ji* does not affect the production of gastric acid nor the acidity of the stomach. It has been proposed that *Bai Ji* stimulates the production of prostaglandin and the stomach lining to exert its antiulcer effect.[3,4]
- **Antibiotic:** *Bai Ji* has an inhibitory influence on *Mycobacterium tuberculosis, Microsporum audouini*, and gram-positive bacterium.[5]

CLINICAL STUDIES AND RESEARCH

- **Hemoptysis in pulmonary tuberculosis:** Administration of 9 grams of *Bai Ji* powder in three equally-divided doses demonstrated satisfactory effects within 1 to 3 days in stopping the coughing of blood.[6]
- **Hemoptysis due to bronchiectasis:** According to one report, 2 to 4 grams of *Bai Ji* powder given three times daily for 3 to 6 months showed marked effectiveness in 21 patients: decreasing the amount of sputum, reducing the frequency and severity of coughing, and relieving hemoptysis.[7]
- **Upper gastrointestinal bleeding:** Bleeding ulcers in 108 patients were treated with 2 grams each of powdered *Bai Ji* and *Hai Piao Xiao* (Endoconcha Sepiae) three to four times daily. Based on hemoccult examination, 20.6% tested negative for presence of blood in the stools within 3 days, and 76.4% after 7 days.[8]
- **Bleeding due to ruptured rectum:** Eleven patients were treated with powdered *Bai Ji* and *Shi Gao* (Gypsum Fibrosum) applied topically once daily for 10 to 15 days. All patients reported excellent results.[9]
- **Peptic ulcers:** Patients with acute perforating gastric or duodenal ulcers were treated first with gastric lavage to empty the stomach, followed by ingestion of 9 grams of *Bai Ji* powder with 90 ml or less of water, repeated again in one hour. The dosage of *Bai Ji* was then reduced to 3 grams, with the same procedure performed three times daily, starting on day two. Strict diet guidelines were implemented as follows: nothing given orally on day one, water and a small portion of liquid food given on day two, and moderate portions of liquid food on day three. The study reported complete recovery in 23 out of 29 patients.[10]
- **Pulmonary tuberculosis:** Patients with chronic pulmonary tuberculosis were treated with 6 grams of *Bai Ji* daily for 3 months. Out of 60 patients, the study reported excellent results in 42, marked improvement in 13, and no response in 2 cases. Reports from the last three patients were not available.[11]
- **Whooping cough:** Patients were treated with oral administration of *Bai Ji* powder with the dosages of 0.1 to 0.15 g/kg in infants under one year of age, and 0.2 to 0.25 g/kg in infants over one year of age. Out of 89 patients, 37 demonstrated marked improvement within 5 days, 15 demonstrated moderate improvement within 10 days, 6 showed no response, and 31 discontinued treatment.[12]
- **Silicosis:** According to one report, 44 patients were treated with 1.5 grams of *Bai Ji* three times daily for anywhere from three months to one year. Most patients reported a reduction in the frequency and severity of chest pain, shortness of breath, cough, black sputum, and hemoptysis. Overall, there was an improvement in pulmonary function and an increase in body weight. X-ray results, however, were inconclusive.[13]
- **Burns and cuts:** Patients with external injuries were treated topically with a paste of *Bai Ji*, with excellent results. Dressings were changed every 5 to 7 days in cases not showing infection, and daily when infection was present. Nine patients with burns (covering less than 8% of total body surface area) and 38 patients with cuts reported complete recovery after 1 to 3 treatments.[14]
- **Plasma substitute:** A 2% *Bai Ji* preparation was used as a plasma substitute in patients with profuse blood loss, such as in surgery, bleeding ulcers, and liver cirrhosis with bleeding, with satisfactory results. The volume of *Bai Ji* preparation used was between 250 and 500 ml.[15]
- **Chapped skin:** Thirteen patients with chapped hands and feet were treated topically with an herbal paste, three times daily. Complete recovery was reported within 2 to

Bai Ji (Rhizoma Bletillae)

3 days in mild cases, and 5 to 7 days for those with more severe chapping. The herbal paste was composed of 30 grams of *Bai Ji*, 50 grams of *Da Huang* (Radix et Rhizoma Rhei), 3 grams of *Bing Pian* (Borneolum Syntheticum), and a small amount of honey.[16]

TOXICOLOGY

According to the classic list of *Shi Ba Fan* (Eighteen Incompatibles), *Bai Ji* is incompatible with *Chuan Wu* (Radix Aconiti Preparata), *Cao Wu* (Radix Aconiti Kusnezoffii) and *Fu Zi* (Radix Aconiti Lateralis Praeparata). In one toxicology study, this hypothesis was tested by dividing frogs into two groups: one group received *Chuan Wu*, *Cao Wu* or *Fu Zi* with *Bai Ji*, and the other group received the same base group of herbs without *Bai Ji*. With identical dosage, preparation and administration, no significant difference in toxicity was observed between the two groups.[17]

AUTHORS' COMMENTS

According to Dr. Zhang Xiao-Ping, *Bai Ji* is one of the most effective herbs to stop gastrointestinal bleeding. *Bai Ji* has a strong binding effect. When ingested, this herb will attach itself to the ulcer to stop bleeding and promote healing. However, because of this strong binding effect, its use is sometimes associated with constipation.

Zong Lu Pi (Fibra Stipulae Trachycarpi)

棕櫚皮　棕榈皮

Pinyin Name: *Zong Lu Pi*
Literal Name: "palm stipule"
Alternate Chinese Names: *Zong Lu Tan, Zong Lu*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: trachycarpus stiple fiber
Botanical Name: *Trachycarpus fortunei* H. Wendl. (*Zong Lu Shu*)
Pharmaceutical Name: Fibra Stipulae Trachycarpi
Properties: bitter, sour, neutral
Channels Entered: Liver, Lung, Large Intestine

Zong Lu Pí (Fibra Stipulae Trachycarpi)

CHINESE THERAPEUTIC ACTIONS

Restrains Leakage and Stops Bleeding

Zong Lu Pi (Fibra Stipulae Trachycarpi) is a mild and essential herb in stopping bleeding such as epistaxis, hemoptysis, hematemesis, hematuria, uterine bleeding, hematochezia and hemorrhoidal bleeding. It has a strong astringent function and is best for bleeding in the absence of blood stagnation.

- Epistaxis: combine *Zong Lu Pi* with *Xiao Ji* (Herba Cirisii), *Long Gu* (Os Draconis) and *San Qi* (Radix Notoginseng), taken internally. For external use, apply the powder directly to the nostrils.
- Hemoptysis and hematemesis: use it with *Da Ji* (Herba seu Radix Cirsii Japonici), *Xiao Ji* (Herba Cirisii), *Ce Bai Ye* (Cacumen Platycladi), *Qian Cao* (Radix Rubiae) and *Bai Mao Gen* (Rhizoma Imperatae). **Exemplar Formula:** *Shi Hui San* (Ten Partially-charred Substance Powder).
- Uterine bleeding or excessive menstrual bleeding: use *Zong Lu Pi* alone internally. It can also be combined with *Fu Long Gan* (Terra Flava Usta) and *She Xiang* (Moschus).
- Excessive menstrual bleeding caused by heat in the blood: add *Ce Bai Ye* (Cacumen Platycladi).
- Excessive menstrual bleeding from blood stagnation: use *Zong Lu Pi* with *Pu Huang* (Pollen Typhae) and *San Qi* (Radix Notoginseng).
- Excessive menstrual bleeding from deficiency: combine it with *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shan Zhu Yu* (Fructus Corni) and *Qian Cao* (Radix Rubiae).
- Continuous light-colored uterine bleeding with no blood clots: use this herb with *Wu Mei* (Fructus Mume), *Pao Jiang* (Rhizoma Zingiberis Preparatum) and grain-based alcohol.
- Bleeding during pregnancy because of restless fetus: add *E Jiao* (Colla Corii Asini).
- Intestinal bleeding, hemorrhoidal bleeding: combine *Zong Lu Pi* with *Huai Jiao* (Fructus Sophorae) and *Ku Lian Pi* (Cortex Meliae).
- Intestinal bleeding due to cold: use it with *Ai Ye* (Folium Artemisiae Argyi), *Fu Zi* (Radix Aconiti Lateralis Praeparata) and egg yolk.
- *Chang feng* (intestinal wind) with hemorrhoids, excessive bleeding: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Fu Ling* (Poria) and *Di Yu* (Radix Sanguisorbae).
- Chronic bleeding hemorrhoids: use it with *Gan Jiang* (Rhizoma Zingiberis), *Wu Mei* (Fructus Mume) and *Gui Xin* (Cortex Rasus Cinnamomi).

DOSAGE

3 to 10 grams in decoction. *Zong Lu Pi* can also be made into pill or powder form (1.5 grams per dose, three times daily). The unprocessed herb does not stop bleeding. It must be charred to ashes to exert its ability to restrain the leakage of blood and stop bleeding.

CAUTIONS / CONTRAINDICATIONS

- Do not use *Zong Lu Pi* as a single-herb remedy in patients experiencing bleeding with blood stagnation. It must be combined with other herbs to invigorate blood and stop bleeding.
- It is contraindicated for patients who have intestinal bleeding and dysentery caused by damp-heat.

CHEMICAL COMPOSITION

Glucoluteolin, luteolin-7-O-rutinoside, dioscin, methyl protodioscin, tannins.[1,2]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Decoction of charred *Zong Lu Pi* is associated with marked action to stop bleeding in mice.[3] Decoction of fresh *Zong Lu Pi*, however, did not have any hemostatic effect.[4]

SUPPLEMENT

- 棕櫚子 / 棕榈子 *Zong Lu Zi* (Fructus Trachycarpi) is derived from the fruit of the same plant as *Zong Lu Pi*. Both herbs have very similar functions and indications. However, *Zong Lu Zi* is more effective in treating hypertension, insomnia, or excessive dreaming. The dosage of *Zong Lu Zi* is 6 to 30 grams.

Ou Jie (Nodus Nelumbinis Rhizomatis)

藕節 藕节

Pinyin Name: *Ou Jie*
Literal Name: "lotus joint"
Alternate Chinese Names: *Guang Ou Jie, Ou Jie Ba*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: lotus node, lotus rhizome node
Botanical Name: *Nelumbo nucifera* Gaertn. (*Lian*)
Pharmaceutical Name: Nodus Nelumbinis Rhizomatis
Properties: sweet, astringent, neutral
Channels Entered: Lung, Stomach, Liver

CHINESE THERAPEUTIC ACTIONS

Stops Bleeding

Ou Jie (Nodus Nelumbinis Rhizomatis) treats various bleeding disorders, but is especially effective for hemoptysis and hematemesis. It restrains leakage, stops bleeding, and disperses blood stasis. This herb is preferred for treatment of bleeding caused by blood stagnation. It has dual actions to both move the blood and stop bleeding.

- Hematemesis: drink the juice of fresh *Ou Jie*. It may also be used with *He Di* (Calyx Nelumbinis).
- Hemoptysis: combine *Ou Jie* with *E Jiao* (Colla Corii Asini), *Bai Ji* (Rhizoma Bletillae), and *Pi Pa Ye* (Folium Eriobotryae).
- Hemoptysis with bright red blood from Lung heat: use it with *Ce Bai Ye* (Cacumen Platycladi), *Bai Mao Gen* (Rhizoma Imperatae), and *E Jiao* (Colla Corii Asini).
- Epistaxis: instill the juice of *Ou Jie* into the nostrils.
- Hematuria, hematochezia because of heat in the lower *jiao*: use it with *Xiao Ji* (Herba Cirisii), *Tong Cao* (Medulla Tetrapanacis), *Hua Shi* (Talcum), and *Dan Zhu Ye* (Herba Lophatheri).
- Hematuria, hematochezia from deficiency: mix with *Ren Shen* (Radix Ginseng) and honey.

DOSAGE

10 to 15 grams, with a maximum of 30 grams, in herbal decoction. The dosage for fresh *Ou Jie* is 30 to 60 grams. It is commonly used as herbal decoction, herbal juice, or incorporated into pills and powders. The unprocessed herb clears heat and cools blood, and is most effective in treating bleeding caused by heat. The charred herb has a neutral or slightly warm property, and stops bleeding from deficiency and cold.

CHEMICAL COMPOSITION

Asparagine, tannins, vitamin C, starch.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Both fresh and charred *Ou Jie* have demonstrated hemostatic effects. The charred herb is stronger than the fresh form for this application.[2]

CLINICAL STUDIES AND RESEARCH

- **Bleeding hemorrhoids:** An herbal decoction containing 9 grams of *Ou Jie* and 15 grams of *Bai Guo* (Semen Ginkgo), taken twice daily, showed marked effectiveness in treatment of chronic bleeding hemorrhoids. After recovery, patients were advised to take *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) to tonify the constitution.[3]
- **Ocular bleeding:** Two patients with chronic bleeding and blood stasis in the anterior chamber of the eyes (refractory to western medical treatment) received an herbal decoction with 40 grams of *Ou Jie* twice daily, with significant improvement.[4]
- **Nasal polyps:** In one study, patients were treated with an herbal powder applied topically to the affected area once every hour for 5 days per course of treatment. Of 35 patients, the study reported complete recovery in 27 patients, marked improvement in 5 patients, and no response in 3 patients. The herbal powder contained *Ou Jie* 60g, *Wu Mei* (Fructus Mume) 30g, *Ming Fan* (Alumen) 15g, and *Bing Pian* (Borneolum Syntheticum) 3g.[5]

AUTHORS' COMMENTS

There are eight parts of the lotus plant that are used as medicines. Please refer to the monograph on *Lian Zi* (Semen Nelumbinis) for a complete description of each of them.

Ou Jie (Nodus Nelumbinis Rhizomatis)

Xue Yu Tan (Crinis Carbonisatus)

血餘炭　血余炭

Pinyin Name: *Xue Yu Tan*
Literal Name: "charred excess of the blood"
Alternate Chinese Names: *Luan Fa, Ren Tui, Du Xue Yu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: charred human hair
Zoological Name: *Homo sapiens* L. (*Ren Tou Fa*)
Pharmaceutical Name: Crinis Carbonisatus
Properties: bitter, neutral
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Stops Bleeding and Disperses Stagnation

Xue Yu Tan (Crinis Carbonisatus) treats bleeding disorders including epistaxis, hematemesis, hemoptysis, hematuria, hematochezia and uterine bleeding. It stops bleeding and yet does not have the side effect of creating stagnation, because it disperses obstruction. It can be used externally or internally to stop bleeding.

- Bleeding gums: apply *Xue Yu Tan* topically in powder form.
- Epistaxis: apply it topically in the nostrils, and drink the fresh juice of *Ou Jie* (Nodus Nelumbinis Rhizomatis).
- Hematemesis and hemoptysis: use this substance with *Hua Rui Shi* (Ophicalcitum) and *San Qi* (Radix Notoginseng).
- Hematuria: use it with vinegar.
- Burning dysuria with blood: add it to *Xiao Ji* (Herba Cirisii), *Bai Mao Gen* (Rhizoma Imperatae) and *Chuan Mu Tong* (Caulis Clematidis Armandii).
- Hematochezia: combine it with *Di Yu* (Radix Sanguisorbae) and *Huai Hua* (Flos Sophorae).
- Hematochezia with middle *jiao* deficiency and cold: use *Xue Yu Tan* with *Gan Jiang* (Rhizoma Zingiberis).
- Hemorrhoidal bleeding of bright red blood: use it with *Huai Jiao* (Fructus Sophorae) and *Ku Lian Pi* (Cortex Meliae).

2. Tonifies Yin and Promotes Urination

Dysuria: *Xue Yu Tan* enters the *xue* (blood) level in the lower *jiao* to stop bleeding.

- Dysuria in women: serve *Xue Yu Tan* with warm liquor.
- Burning sensations during urination: use this substance with *Hua Shi* (Talcum) and *Che Qian Zi* (Semen Plantaginis).
- Urinary stones: combine it with *Che Qian Cao* (Herba Plantaginis), *Hai Jin Sha* (Herba Lygodii), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Jin Qian Cao* (Herba Lysimachiae).

DOSAGE

6 to 10 grams in decoction. *Xue Yu Tan* is also given in powder form, 1.5 to 3 grams three times daily. *Xue Yu Tan* can be made into pills. *Xue Yu Tan* is ineffective to stop bleeding if not properly processed. It must be charred to ashes to stop bleeding and disperse stagnation.

Xue Yu Tan (Crinis Carbonisatus)

CAUTIONS / CONTRAINDICATIONS

- Use *Xue Yu Tan* with caution for patients with weak digestive systems, as nausea and vomiting may occur.

CHEMICAL COMPOSITION

Eukeratin, melanin.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** In animal studies, administration of water and alcohol extracts of *Xue Yu Tan* is associated with marked effectiveness to stop bleeding. Without charring, however, it has no effect on clotting.[2]
- **Antibiotic:** *Xue Yu Tan* has an inhibitory effect against *Staphylococcus aureus*, *Salmonella typhi*, and *Bacillus dysenteriae*.[3]

CLINICAL STUDIES AND RESEARCH

- **Peptic ulcer disease:** Gastric or duodenal ulcerations and bleeding in 34 patients were treated with an herbal formula, with marked success. The study reported stabilization in most patients within 3 to 5 days, and in all patients within 10 days. The herbal formula was given in powder form, and contained *Xue Yu Tan* 2 parts, *San Qi* (Radix Notoginseng) 2.5 parts, and *Bai Ji* (Rhizoma Bletillae) 3 parts.[4]
- **Upper gastrointestinal bleeding:** An herbal formula containing 3 to 9 grams of *Xue Yu Tan* added to 20 to 40 ml of fresh juice of *Ou Jie* (Nodus Nelumbinis Rhizomatis) was given three times daily for treatment of upper gastrointestinal bleeding. The study reported complete recovery in 23 of 25 patients.[5]
- **External bleeding:** In one clinical study, 61 patients who were bleeding because of various external and traumatic injuries were treated topically with an herbal formula, with marked effectiveness. The herbal formula was given in powder, and contained *Xue Yu Tan* 25g, charred *Zhu Zong Cao* (Herba Adianti) 25g, roasted *Chuan Shan Jia* (Squama Manis) 40g, charred *Bai Ji* (Rhizoma Bletillae) 20g, *Hai Piao Xiao* (Endoconcha Sepiae) 40g, *Ming Fan* (Alumen) 20g, *Bing Pian* (Borneolum Syntheticum) 10g, and *Lu Gan Shi* (Galamina) 20g.[6]

San Qi (Radix Notoginseng)

三七

Pinyin Name: *San Qi*
Literal Name: "three-seven"
Alternate Chinese Names: *Tian Qi, Shen San Qi, Shen Qi, Jin Bu Huan*
English Name: pseudoginseng, notoginseng
Botanical Name: *Panax notoginseng* (Burk.) F. H. Chen. (*San Qi*)
Pharmaceutical Name: Radix Notoginseng
Properties: sweet, slightly bitter, warm
Channels Entered: Liver, Stomach

San Qi (Radix Notoginseng)

CHINESE THERAPEUTIC ACTIONS

1. Disperses Blood Stasis, Stops Bleeding

Internal and external bleeding: *San Qi* (Radix Notoginseng) has a unique ability to stop bleeding without causing blood stasis, and can be taken internally or applied topically. Clinically, it treats hematemesis, hemoptysis, epistaxis, hematochezia, profuse menstrual bleeding, profuse postpartum bleeding, and external bleeding arising from trauma.

- Epistaxis or hematemesis: use *San Qi* individually.
- Epistaxis, hemoptysis, hematemesis, or hematuria: combine this herb with *Hua Rui Shi* (Ophicalcitum) and *Xue Yu Tan* (Crinis Carbonisatus).
- Qi deficiency caused by profuse hematemesis: use it with *Dang Shen* (Radix Codonopsis), *Shan Yao* (Rhizoma Dioscoreae), *Sheng Di Huang* (Radix Rehmanniae) and *Zhi Mu* (Radix Anemarrhenae).
- Hemoptysis with chest pain because of dryness and heat attacking the Lung: use this herb with *Bai Mao Gen* (Rhizoma Imperatae), *Da Huang* (Radix et Rhizoma Rhei), and *Long Gu* (Os Draconis).
- Chronic hemoptysis and hematemesis: combine it with *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae) and *Shan Zhu Yu* (Fructus Corni).
- Uterine bleeding: use *San Qi* alone internally.
- Hematochezia: mix it with a small portion of grain-based liquor.
- Profuse postpartum or menstrual bleeding: add it to *Si Wu Tang* (Four-Substance Decoction).
- External bleeding with pus and ulceration: use it alone topically as powder.
- External bleeding due to cuts: use it with *Long Gu* (Os Draconis), *Xue Jie* (Sanguis Draconis), *Mo Yao* (Myrrha), *Ru Xiang* (Gummi Olibanum) and *Jiang Xiang* (Lignum Dalbergiae Odoriferae).

2. Activates Blood Circulation, Relieves Pain

San Qi treats various external injuries such as bruises, swelling, inflammation and pain characterized by qi and blood stagnation. Clinical applications include falls, sprains, fractures, contusions, and other traumatic injuries.

- General bleeding: combine *San Qi* with other herbs.
- General external injuries: use *San Qi* as a single-herb remedy with grain-based liquor or hot water.
- External injuries with open cuts: apply the powdered herb topically.
- External injuries with bruising, swelling, inflammation and pain: use with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *She Xiang* (Moschus) and *Bing Pian* (Borneolum Syntheticum).
- Muscle and tendon injuries with pain: combine it with *Xiang Fu* (Rhizoma Cyperi) and *Gan Cao* (Radix Glycyrrhizae).
- External injuries with severe bruises and pain: use it with *Cao Wu* (Radix Aconiti Kusnezoffii), *Chi Shao* (Radix Paeoniae Rubrae) and *Hong Hua* (Flos Carthami).
- Angina: use it with *Dan Shen* (Radix Salviae Miltiorrhizae) and *Mao Dong Qing* (Radix Ilicis Pubescentis).

3. Reduces Swelling and Pain

External injuries are often accompanied by infection, suppuration and pus formation.

- Early-stage external injuries with no complications: use *San Qi* internally with grain-based liquor, or topically as powder.
- External injuries with suppuration: mix *San Qi* powder with vinegar and apply it topically.
- External injuries with open sores and suppuration: apply *San Qi* without vinegar
- External injuries with sores, lesions, and ulcerations: use it with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Xue Jie* (Sanguis Draconis) and *Er Cha* (Catechu).

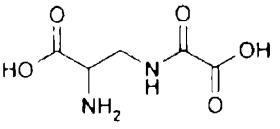
DOSAGE

3 to 10 grams as herbal decoction. 1.0 to 1.5 grams per dose as powder, one to three times daily. In severe cases of bleeding, the dosage of *San Qi* is increased to 3 to 6 grams of powder orally, two to three times daily. This herb is often used as powder or pills instead of decoction, because of its high cost.

CAUTIONS / CONTRAINDICATIONS

- Use *San Qi* with caution during pregnancy.
- Use of *San Qi* is sometimes associated with the following side effects: nausea, vomiting, loss of appetite, dizziness, headache, toothache, fatigue, and restlessness.

OVERDOSAGE



In rare cases, *San Qi* may cause bleeding, such as in epistaxis, bleeding gums, and increased menstrual bleeding. This occurs because *San Qi* has the dual effect to invigorate blood circulation and stop bleeding.

Allergic reactions associated with use of *San Qi* have also been reported. These adverse reactions are self-limiting, and generally subside with reduction of dosage or discontinuation of herbal therapy.[1]

CHEMICAL COMPOSITION

Saponins 3 to 12% (ginsenoside R_{b1}, R_d, R_e, R_{g1}, R_{g2}, R_{h2}; notoginsenoside R_1, R_2, R_3, R_4, R_6; 20-glucoginsenoside Rf, gypenoside XVII), dencichine, essential oils (α-copaene, β-cubebene, caryophyllene, guaiene, α-cedrene).[2,3,4]

San Qi (Radix Notoginseng)

Dencichine

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Administration of *San Qi* in powder or water extract is associated with marked effects to decrease prothrombin time and stop bleeding. This hemostatic function is attributed mainly to dencichine.[5]
- **Antiplatelet:** Saponins of *San Qi* has been shown to inhibit the aggregation of platelets. [6]
- **CNS stimulant and suppressant:** Administration of *San Qi* has demonstrated both stimulating and sedative effects on the central nervous system (CNS). Aerial parts of this plant are rich in ginsenoside Rb, and are characterized by sedative, tranquilizing and hypnotic effects. The roots are rich in ginsenoside Rg, and are characterized by stimulating and adaptogenic effects. [7]
- **Cardiovascular:** Administration of *San Qi* in dogs via intravenous injection decreases blood pressure, decreases heart rate, increases blood perfusion to the coronary artery, and decreases oxygen consumption by the cardiac muscle. It is commonly used to treat arrhythmia secondary to decreased cardiac output. [8]
- **Immunostimulant:** *San Qi* has an immune-enhancing effect similar to that of *Ren Shen* (Radix Ginseng), as both herbs have overlapping active compounds. Please refer to the monograph on *Ren Shen* for additional details.

CLINICAL STUDIES AND RESEARCH

- **Upper gastrointestinal bleeding:** Patients with upper gastrointestinal bleeding were treated once daily with an intravenous infusion of 8 to 16 ml of *San Qi* injectable (equivalent to 4 to 6 grams of dried herb) mixed with 500 ml of D5W. The study reported an absence of blood in the stools after an average of 5.98 days, with an average of 15.02 days of hospitalization. [9]
- **Stomach bleeding:** In one study, 1.5 grams of *San Qi* powder with warm water were given three times daily to patients with stomach bleeding. Oral ingestion of food was allowed, except for patients with hematemesis. Patients were instructed to continue taking the herbs for 2 days after a stool exam confirmed the absence of blood. The study reported that bleeding stopped in 58 of the 60 patients. [10]
- **Hemoptysis:** According to one report, administration of *San Qi* powder was used to treat 10 patients with coughing of blood due to bronchiectasis, pulmonary tuberculosis or pulmonary abscess. The treatment protocol was to administer 6 to 9 grams of *San Qi* powder per dose, two to three times daily. The study reported that bleeding stopped in 8 patients after 5 days, and 2 patients continued to have coughing of blood for 1 to 2 weeks.[11]
- **Hematuria:** According to one report, administration of 0.9 to 1.5 grams of *San Qi* powder every 4 to 8 hours was effective to stop hematuria after 3 days in 39 patients.[12]
- **Hyphema:** In one study, 21 patients were treated with a 2% *San Qi* ophthalmic solution six times daily with excellent results.[13]
- **Craniocerebral trauma:** Forty patients were treated with 3 grams of *San Qi* powder two to three times daily via oral administration if the patients were conscious, or intranasal administration if unconscious. The duration of treatment ranged from 3 to 10 days, with a maximum of 21 days. Patients with severe craniocerebral trauma were also treated with intravenous fluids, diuretics, antibiotics and sedatives. The study reported an overall rate of effectiveness of 75%, with marked success in mild to moderate conditions.[14]
- **Coronary artery disease:** In a multi-center study of 778 patients, administration of 0.6 to 1.2 grams of *San Qi* demonstrated a 70.2% effective rate in treatment of angina.[15]
- **Hypercholesterolemia:** Ten patients with hypercholesterolemia, atherosclerosis, and coronary artery disease were treated with 0.6 grams of *San Qi* powder three times daily. The average cholesterol level was reduced from 272.6 to 185 mg/dL after one month of continuous herbal therapy.[16]
- **Liver disorders:** One gram of *San Qi* powder given three times daily for 1 month was administered to patients with elevated liver enzyme levels from unknown causes. The study reported a reduction of these enzyme levels in 44 out of 45 patients.[17]
- **Chronic hepatitis:** According to one report, 65 patients with chronic hepatitis due to blood stasis were treated with a *San Qi* injectable one time each day for 3 to 4 months. Daily dosages varied between 2 to 6 ml of the injectable (equivalent to 1 to 3 grams of dried herb). Out of 65 patients, 47 reported marked improvement, 5 reported moderate improvement, and 13 reported no response. The overall rate of effectiveness was 80%.[18]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *San Qi* has an unique action to regulate the blood, with action to invigorate blood circulation and stop bleeding. Though this potential interaction has not been documented, use of this herb may interfere with anticoagulant or antiplatelet medications.[19] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

San Qi (Radix Notoginseng)

TOXICOLOGY

Oral administration of *San Qi* powder in mice at 15 g/kg did not cause any significant adverse reactions. Biopsy of the heart, liver, kidney, spleen and intestinal tissues did not reveal any abnormalities 2 weeks after termination of herbal therapy. The lethal dose of *San Qi* through intravenous injection is 2.5 to 3.0 g/kg for rabbits, 0.5 to 0.75 g/kg for rats, and 0.075 to 0.1 g/kg for mice.[20]

SUPPLEMENT

- 菊葉三七 / 菊叶三七 *Ju Ye San Qi* (Herba seu Radix Gynura Segetum), first cited in the *Zhen Nan Ben Cao* (Materia Medica of South Yunnan) by Lan Mao in the Qing Dynasty, is used for its functions to disperse blood stagnation, stop bleeding, eliminate toxins, and reduce swelling. Sweet, slightly bitter and neutral, *Ju Ye San Qi* is used both internally and topically. Clinical applications include epistaxis, hematemesis, traumatic injuries with bleeding and bruises, sores and swelling, and breast abscesses. The dosage of *Ju Ye San Qi* is 1.5 to 3.0 grams of powder, given one to three times daily. The powder is to be mixed with the decoction prior to ingestion. The fresh form can be applied topically as a paste. It is contraindicated during pregnancy.
- 景天三七 *Jing Tian San Qi* (Herba seu Radix Sedum Aizoom), first cited in the *Zhi Wu Ming Shi Tu Kao* (Illustrated Guide for Nomenclature and Identification of Botanical Products), stops bleeding, disperses stagnation, nourishes blood, and calms the *shen* (spirit). Sweet, sour and neutral, the clinical applications of *Jing Tian San Qi* include epistaxis, hemoptysis, hematemesis, hematuria, hematochezia, profuse menstrual bleeding, purpura, palpitations, insomnia, restlessness, and neurosis. It can also be used topically to treat external bleeding from trauma. *Jing Tian San Qi* incorporates the entire plant (both the aerial part and the root) as the medicinal herb. The dosage is 15 to 30 grams for the aerial part, and 6 to 10 grams for the root.

AUTHORS' COMMENTS

San Qi should be used with herbs that cool the blood, if bleeding is caused by heat in the blood. It should be used with yin tonics if bleeding is accompanied by dry mouth due to yin deficiency.

Qian Cao (Radix Rubiae)

茜草 茜草

Pinyin Name: *Qian Cao*
Alternate Chinese Names: *Qian Cao Gen, Qian Gen, Xue Jian Chou, Huo Xue Dan, Di Xue, Ru Lu, Ran Fei Cao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: madder, India madder root
Botanical Name: *Rubia cordifolia* L. (*Qian Cao*)
Pharmaceutical Name: Radix Rubiae
Properties: bitter, cold
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Cools the Blood, Stops Bleeding

Qian Cao (Radix Rubiae) cools blood, balances yin, sedates fire, and thus stops bleeding caused by heat in the blood. Manifestations of heat in the blood include epistaxis, hematemesis, profuse menstrual bleeding, and hematochezia.

- Epistaxis because of heat and fire rising upwards: combine *Qian Cao* with *Ai Ye* (Folium Artemisiae Argyi) and *Wu Mei* (Fructus Mume).
- Persistent hematemesis: use it with *Hei Dou* (Semen Glycine Max) and *Gan Cao* (Radix Glycyrrhizae).
- Profuse hematemesis: use it with *San Qi* (Radix Notoginseng) and *Ji Xue Teng* (Caulis Spatholobi).
- Hematemesis due to heat in the Lung and Stomach, with underlying deficiency and weakness: combine this herb with *Huang Qin* (Radix Scutellariae), *Ce Bai Ye* (Cacumen Platycladi), *Huang Qi* (Radix Astragali), and *Dang Gui* (Radicis Angelicae Sinensis).
- Hematemesis due to heat: use *Qian Cao* individually.
- Profuse uterine bleeding from qi deficiency: use this herb with *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shan Zhu Yu* (Fructus Corni) and *Long Gu* (Os Draconis).
- Hematochezia due to accumulation of damp-heat in the Large Intestine: combine it with *Huang Lian* (Rhizoma Coptidis), *Sheng Ma* (Rhizoma Cimicifugae), *Bai Shao* (Radix Paeoniae Alba) and *Di Yu* (Radix Sanguisorbae).

2. Activates Blood Circulation, Dispels Blood Stasis

Amenorrhea, traumatic injuries, musculoskeletal pain: In addition to stopping bleeding, *Qian Cao* has a unique function to move blood and dispel blood stasis. Clinically, it is commonly used to treat amenorrhea, traumatic injuries, sports injuries, and musculoskeletal pain caused by blood stasis.

- Amenorrhea caused by blood stasis: use *Qian Cao* with *Dang Gui* (Radicis Angelicae Sinensis), *Xiang Fu* (Rhizoma Cyperi) and *Chi Shao* (Radix Paeoniae Rubrae).
- Traumatic or sports injuries: combine it with *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Musculoskeletal or arthritic pain: use with *Ji Xue Teng* (Caulis Spatholobi), *Hai Feng Teng* (Caulis Piperis Kadsurae) and *Yan Hu Suo* (Rhizoma Corydalis), as a medicinal tincture.

DOSAGE

10 to 15 grams, with a maximum of 30 grams, for herbal decoction. *Qian Cao* is commonly used as both decoction and powder. The fresh herb has a stronger function to activate blood circulation and dispel blood stasis. The charred form more effectively stops bleeding.

CAUTIONS / CONTRAINDICATIONS

- Bitter, cold and draining in nature, *Qian Cao* should be used with caution in cases of weakness and deficiency of the Spleen and Stomach, deficiency of *jing* (essence) or blood, or yin-deficient fire.
- Because of its hemostatic effect, *Qian Cao* should be used with caution in the absence of blood stasis.

CHEMICAL COMPOSITION

Purpurin, purpuroxanthin, alizarin, munjistin, pseudopurpurin, physcion, quinizarin, rubian, rubimaillin.[1]

Qian Cao (Radix Rubiae)

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Administration of *Qian Cao* showed marked effectiveness in reducing bleeding time in rabbits. The duration of action was 2 to 48 hours when given orally, and 30 to 60 minutes when given via intraperitoneal injection. The charred herb was more effective than the fresh herb.[2]
- **Antibiotic:** *Qian Cao* has an inhibitory effect against *Staphylococcus aureus*, *Diplococcus pneumoniae*, and dermatophytes.[3]
- **Antitussive and expectorant:** A water extract of *Qian Cao*, administered orally to mice at the dosage of 75 g/kg, has demonstrated marked antitussive and expectorant effects. The alcohol extract had no such effect.[4]
- **Antispasmodic:** Water extract of *Qian Cao* administered orally to rabbits relaxes the smooth muscle of the intestines to treat intestinal spasms and cramps.[5]
- **Effect on kidney stones:** A diet regimen containing 20% *Qian Cao* showed promise in preventing or minimizing the formation of kidney stones in mice.[6]
- **Immunostimulant:** Administration of *Qian Cao* to mice and dogs is associated with a 151.9% rise in the white blood cell count, compared to a placebo.[7]

CLINICAL STUDIES AND RESEARCH

- **Bleeding:** In one report, 41 patients with profuse bleeding after tooth extraction were treated with topical application of powdered extract of *Qian Cao*. Bleeding stopped in all patients within 1 to 2 minutes.[8]
- **Chronic tracheitis:** According to one study, 123 patients with chronic tracheitis were treated with an herbal formula containing *Qian Cao* and *Chen Pi* (Pericarpium Citri Reticulatae) for 20 days. The rate of effectiveness was 69.1%.[9]

TOXICOLOGY

No significant toxicity or fatalities were reported when *Qian Cao* decoction was given at a dosage of 150 g/kg in mice. At 175 g/kg, 1 out of 5 mice died.[10]

AUTHORS' COMMENTS

According to Dr. Gan Zhu-Wang, *Qian Cao* (Radix Rubiae), *Zi Cao Gen* (Radix Lithospermi), and *Han Lian Cao* (Herba Ecliptae) cool blood and treat various dermatological disorders characterized by itching. The same combination relieves nasal itching associated with allergic rhinitis or sinusitis.

Pu Huang (Pollen Typhae)

蒲黄 蒲黄

Pinyin Name: *Pu Huang*
Literal Name: "cattail pollen"
Alternate Chinese Names: *Pu Li Hua Fen, Pu Peng Hua Fen, Pu Cao Huang, Pu Hua*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: bulrush, cattail pollen
Botanical Name: *Typha angustifolia* L. (*Shui Zu Xiang Pu*); *Typha orientalis* Presl. (*Dong Fang Xiang Pu*)
Pharmaceutical Name: Pollen Typhae
Properties: sweet, neutral
Channels Entered: Liver, Pericardium

CHINESE THERAPEUTIC ACTIONS

1. Retains Blood and Stops Bleeding

Pu Huang (Pollen Typhae) has a dual function to simultaneously move the blood and stop bleeding. It treats various types of bleeding without causing blood stagnation. Clinical applications include uterine bleeding, epistaxis, hemoptysis, hematemesis, hematuria, hematochezia, profuse menstrual bleeding, and excessive bleeding from traumatic injuries.

- Hemoptysis or hematemesis resulting from improperly ascending qi: use *Pu Huang* as a single remedy.
- Hemoptysis or hematemesis because of heat in the blood: combine it with *Da Ji* (Herba seu Radix Cirsii Japonici), *Xiao Ji* (Herba Cirisii), and *Bai Mao Gen* (Rhizoma Imperatae).
- Epistaxis due to Lung heat: add *Qing Dai* (Indigo Naturalis).
- External bleeding: use *Pu Huang* topically.

Abnormal uterine bleeding: Recent research has shown that *Pu Huang* promotes contraction of the uterus. It is best for stopping abnormal uterine bleeding.

- Chronic uterine bleeding from deficiency of the *ren* (conception) and *chong* (thoroughfare) channels: combine this herb with *Lu Rong* (Cornu Cervi Pantotrichum) and *Dang Gui* (Radicis Angelicae Sinensis).
- Profuse menstrual bleeding: use *Pu Huang* with *Long Gu* (Os Draconis), *Ai Ye* (Folium Artemisiae Argyi) and *Yi Mu Cao* (Herba Leonuri).

2. Activates Blood Circulation, Eliminates Stagnation

Pu Huang is commonly used to treat pain caused by blood stagnation.

- Severe abdominal pain due to blood stagnation during the postpartum period or accompanying irregular menstruation: use *Pu Huang* with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).
- Dysmenorrhea: use this herb with *Yan Hu Suo* (Rhizoma Corydalis) and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi). **Exemplar Formula:** *Shi Xiao San* (Sudden Smile Powder).
- Postpartum abdominal pain with blood deficiency, blood stagnation or cold: combine *Pu Huang* with *Rou Gui* (Cortex Cinnamomi), *Pao Jiang* (Rhizoma Zingiberis Preparatum), *Dang Gui* (Radicis Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Profuse postpartum bleeding with irritability, distention, pain and a feeling of oppression because of blood stagnation and heat: use this herb with *He Ye* (Folium Nelumbinis), *Mu Dan Pi* (Cortex Moutan), *Sheng Di Huang* (Radix Rehmanniae) and *Yan Hu Suo* (Rhizoma Corydalis).

3. Promotes Urination

Dysuria or hematuria: *Pu Huang* promotes urination and treats *xue lin* (bloody dysuria).

- Hematuria caused by heat in the Urinary Bladder: use it with *Yu Jin* (Radix Curcumae).
- Burning dysuria: combine this herb with *Sheng Di Huang* (Radix Rehmanniae) and *Dong Kui Zi* (Semen Malvae).

DOSAGE

3 to 10 grams in decoction. Wrap *Pu Huang* in cheesecloth during decoction. It may be used internally or topically. The unprocessed herb activates blood circulation, removes blood stasis, and relieves pain, while the charred herb stops bleeding.

Pu Huang (Pollen Typhae)

CAUTIONS / CONTRAINDICATIONS

- *Pu Huang* is contraindicated during pregnancy, as it may stimulate uterine contractions.
- *Pu Huang* is contraindicated in the absence of blood stagnation.

CHEMICAL COMPOSITION

Isorhamnetin, pentacosane, α-sitosterol, palmitic acid, α-typhasterol, quercetin, kaempferol 3-glucosires, hentriacontanol, nonacosanediol, arachidonic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Laboratory studies have shown that administration of water or alcohol extracts of *Pu Huang* in rabbits reduced bleeding time; subcutaneous injection in rabbits increased the number of platelets and reduced thrombin time; and topical application stopped bleeding. Furthermore, charred *Pu Huang* showed a hemostatic effect better than that of unprocessed *Pu Huang*. Conversely, administration of *Pu Huang* demonstrated antiplatelet effects in 31 patients with coronary artery disease and atherosclerosis. In fact, the antiplatelet effect of *Pu Huang* was comparable to 300 mg/day of aspirin.[2,3,4]
- **Cardiovascular:** Administration of *Pu Huang* is associated with increased contractility of the heart, increased blood perfusion to the coronary arteries, decreased blood pressure, and decreased peripheral vascular resistance.[5]
- **Antihypertensive:** Administration of water or alcohol extracts of *Pu Huang* via injection demonstrated a marked effectiveness in reduction of heart rate and blood pressure in cats, rabbits, and dogs. Oral intake of *Pu Huang*, however, showed little or no effect on blood pressure.[6]
- **Antihyperlipidemic:** Administration of *Pu Huang* has demonstrated a marked effect to elevate high density lipoprotein (HDL) and lower total cholesterol (TC) levels. The proposed mechanisms of action include a decrease in absorption and an increase in utilization of cholesterols.[7]
- **Effects on the uterus:** Administration of water or alcohol extract of *Pu Huang* has a stimulating effect on the uterus at small dosages. At larger dosages, however, overstimulation may lead to spasms and cramps. Injection of *Pu Huang* during the third trimester of pregnancy induces labor in mice and rats.[8]
- **Gastrointestinal:** Administration of *Pu Huang* extract in rabbits demonstrated increased intestinal peristalsis and relieved intestinal cramps. Water extract of *Pu Huang* was especially effective for treatment of peptic ulcer and enteritis.[9]
- **Anti-inflammatory:** Administration of *Pu Huang* decoction showed marked anti-inflammatory action, especially for treatment of burns and arthritis. The proposed mechanisms of action include improved circulation and decreased permeability of blood vessels.[10]
- **Immunologic:** Administration of *Pu Huang* may affect both cellular and humoral immunity. At small dosages, it has little or no effect; at moderate dosages, it inhibits the immune system; and at large dosages, it stimulates the immune system. Its immune-enhancing effect is associated with increased phagocytic activity by macrophages.[11]

CLINICAL STUDIES AND RESEARCH

- **Abnormal uterine bleeding in postpartum women:** Continuous bleeding with blood clots in 31 women was treated with 3 grams of *Pu Huang*, three times daily for 3 consecutive days. Most women reported satisfactory results, with a gradual decrease in bleeding and clots.[12]
- **Coronary artery disorder:** One report described 66 patients who were treated with *Pu Huang* for 2 months. According to this report, 89% of the patients reported symptomatic improvement, 89% reported a decrease in angina, 48% showed improvement based on echocardiogram, 58% had a decrease in blood pressure, 60% had a decrease in total cholesterol levels, and 94% had a reduction in triglycerides.[13]
- **Hypercholesterolemia:** In one study, 200 patients were treated with 30 grams of *Pu Huang* in three equally-divided doses daily, with marked reduction in total cholesterol and triglyceride levels.[14]
- **Angiocardiopathy:** In one clinical study, 400 patients with angiocardiopathy were treated with an herbal formula consisting of *Pu Huang*, *Dang Shen* (Radix Codonopsis), *Hong Hua* (Flos Carthami), *Jiang Huang* (Rhizoma Curcumae Longae), *E Zhu* (Rhizoma Curcumae) and *Jiang Xiang* (Lignum Dalbergiae Odoriferae). The effect of the formula was similar to that of *Pu Huang* alone in managing coronary artery disorder and reducing blood cholesterol levels. The herbal formula, however, was 90% effective in reducing blood pressure, especially in stage I and II hypertensive patients.[15]
- **Eczema:** Thirty eczema patients were treated by sprinkling *Pu Huang* powder on the affected area. All 30 patients reported complete recovery in between 6 and 15 days. In addition, 25 of 30 patients reported relief from itching on the same day.[16]
- **Colitis:** Patients suffering from varying degrees of colitis were given three doses of 1.5 grams of an enteric-coated *Pu Huang* preparation. In addition, a rectal instillation of 100 ml of a 5% *Pu Huang* solution was given daily. Out of 17 patients, 2 reported complete recovery, 4 reported satisfactory results, 10 reported slight improvement, and 1 had no response. The rate of effectiveness was 94.12%.[17]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Pu Huang* has a

Pu Huang (Pollen Typhae)

unique action to regulate the blood, with both hemostatic and antiplatelet effects. Though this potential interaction has not been documented, use of this herb may interfere with anticoagulant or antiplatelet medications.[18] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

Pu Huang is generally well-tolerated. The LD_{50} for mice via intraperitoneal administration is 35.57 g/kg. Allergic reactions have been observed in guinea pigs, and reduction of red and white blood cells has been observed in mice.[19]

Hua Rui Shi (Ophicalcitum)

花蕊石　花蕊石

Pinyin Name: *Hua Rui Shi*
Alternate Chinese Names: *Hua Ru Shi*
Original Source: *Jia You Ben Cao* (Materia Medica of the Jia You Era) by Zhang Yu-Xi and Su Song in 1057-1060
English Name: ophicalcite
Pharmaceutical Name: Ophicalcitum
Properties: sour, astringent, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Disperses Blood Stasis, Stops Bleeding

Hemoptysis and hematemesis: *Hua Rui Shi* (Ophicalcitum) treats bleeding problems that are complicated by internal blood stasis. Clinical applications include hemoptysis and hematemesis. The powder may be applied topically to stop trauma-related bleeding. When applied topically, *Hua Rui Shi* acts to dry oozing fluids and promote healing.

Hua Rui Shi (Ophicalcitum)

- Hematemesis with blood stasis: use charred *Hua Rui Shi* with alcohol or vinegar.
- Gastric or intestinal bleeding: combine this herb with *San Qi* (Radix Notoginseng) and *Xue Yu Tan* (Crinis Carbonisatus).
- Bleeding with bruises from traumatic injuries or animal bites: mix charred *Hua Rui Shi* and charred *Liu Huang* (Sulfur) and apply topically.
- Cuts: use *Hua Rui Shi* with *Mi Tuo Seng* (Lithargyrum), *Long Gu* (Os Draconis), *Ru Xiang* (Gummi Olibanum) and *Qing Fen* (Calomelas) topically to promote generation of flesh and facilitate recovery.

DOSAGE

10 to 15 grams in decoction, 1.0 to 1.5 grams in powder. *Hua Rui Shi* is commonly used both internally and topically. The fresh form is stronger in dispersing blood stasis and stopping internal bleeding. The charred form is stronger in restraining the leakage of blood and is used to stop external bleeding.

CAUTIONS / CONTRAINDICATIONS

- *Hua Rui Shi* should be used with extreme caution during pregnancy.

PHARMACOLOGICAL EFFECTS
