- **Hemostatic:** Topical application of *Hua Rui Shi* powder was more effective than a placebo in reducing bleeding time in mice with external bleeding.[1]

CLINICAL STUDIES AND RESEARCH

- **Bleeding disorders:** Oral administration of 4 to 8 grams of *Hua Rui Shi* powder three times daily was approximately 70% effective in treating various bleeding disorders, including gastric ulcers, duodenal ulcers, and hemoptysis due to pulmonary tuberculosis. Patients with gastrointestinal bleeding were most responsive to the treatment with a 98.1% rate of effectiveness.[2] In another study, patients with hematemesis, epistaxis and profuse uterine bleeding were treated with *Hua Rui Shi* powder with marked hemostatic results. *Hua Rui Shi* powder was calcined with vinegar. Patients were also given *Ba Zhen Tang* (Eight-Treasure Decoction) after bleeding stopped.[3]

Wan Nian Song (Herba Selaginellae)

萬年松　万年松

Pinyin Name: *Wan Nian Song*
Alternate Chinese Names: *Juan Bo, Wan Sui, Sui Fu Rong, Huai Hun Cao*
English Name: selaginella
Botanical Name: *Selaginella tamariscina* (Beauv.) Spring
Pharmaceutical Name: Herba Selaginellae
Properties: acrid, neutral
Channels Entered: Lung, Large Intestine

Wan Nian Song (Herba Selaginellae)

CHINESE THERAPEUTIC ACTIONS

1. Stops Bleeding and Disperses Wind

Various bleeding: *Wan Nian Song* (Herba Selaginellae) treats various patterns of bleeding such as hemoptysis, rectal bleeding, intestinal bleeding, hemorrhoidal bleeding and hematuria.

- Hemoptysis: use *Wan Nian Song* with *Ce Bai Ye* (Cacumen Platycladi), *Sha Shen* (Radix Glehniae seu Adenophorae), *Wu Tian* (Radix et Folium Viticis Quinatae), *Bai He* (Bulbus Lilii), *Pi Pa Ye* (Folium Eriobotryae), *Ou Jie* (Nodus Nelumbinis Rhizomatis), *Mu Xiang* (Radix Aucklandiae), *Gua Lou Shi* (Fructus Trichosanthis) and *Gan Cao* (Radix Glycyrrhizae).
- Rectal bleeding, intestinal bleeding or hemorrhoidal bleeding: combine this herb with *Huai Hua* (Flos Sophorae) and *Di Yu* (Radix Sanguisorbae).
- Hematuria: use it with *Bai Mao Gen* (Rhizoma Imperatae), *Da Ji* (Herba seu Radix Cirsii Japonici) and *Xiao Ji* (Herba Cirisii).

2. Invigorates Blood Circulation and Expands the Chest to Regulate Lung Qi

Post-traumatic cough: *Wan Nian Song* is excellent to treat coughing that occurs after traumatic injuries to the chest area. Because this herb also invigorates blood circulation, it can be used to treat back sprain and strain.

- Post-traumatic cough: use this herb with *Wan Dian Jin* (Radix Ilicis Asprellae) or *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).
- Sprain and strain of the back: use it with *Chun Gen* (Radix Ailanthi).

DOSAGE

3 to 12 grams

CAUTIONS / CONTRAINDICATIONS

- Use *Wan Nian Song* with caution in patients with cold and deficiency.

Xiao Jin Ying (Fructus Rosae Cymosae)

小金櫻 小金樱

Pinyin Name: *Xiao Jin Ying*
Literal Name: "little golden cherry"
English Name: rosa cymosa, small fruit rose
Botanical Name: *Rosa cymosa* Tratt.
Pharmaceutical Name: Fructus Rosae Cymosae
Properties: bitter, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Disperses Stagnation, Stops Bleeding

Xiao Jin Ying (Fructus Rosae Cymosae) stops bleeding that is accompanied by blood clots. Clinical applications include irregular menstruation, bleeding disorders, and traumatic injuries. It also clears heat and eliminates toxins, for topical treatment of sores and lesions.

DOSAGE

15 to 60 grams

Lian Fang (Receptaculum Nelumbinis)

蓮房 莲房

Pinyin Name: *Lian Fang*
Literal Name: "lotus mansion"
Alternate Chinese Names: *Lian Peng Ke*
Original Source: *Shi Liao Ben Cao* (Materia Medica of Diet Therapy) by Meng Shan in the seventh century
English Name: lotus receptacle
Botanical Name: *Nelumbo nucifera* Gaertn. (*Lian*)
Pharmaceutical Name: Receptaculum Nelumbinis
Properties: bitter, astringent, warm
Channels Entered: Liver, Spleen, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Disperses Blood Stasis, Stops Bleeding

Lian Fang (Receptaculum Nelumbinis) treats a variety of bleeding disorders, and is most commonly used for profuse menstrual bleeding and hematuria. It is often used in cases of hemorrhoidal bleeding or rectal prolapse. *Lian Fang* is often charred to ashes to enhance its hemostatic effect.

- Profuse menstrual bleeding and hematuria: use *Lian Fang* with *Yi Mu Cao* (Herba Leonuri).

2. Dispels Dampness

Lian Fang is useful to address diarrhea in children, when it is caused by summer-heat and dampness. It also treats rash and eczema due to dampness.

DOSAGE

5 to 10 grams. The charred herb has stronger hemostatic action than the fresh herb.

CHEMICAL COMPOSITION

Roemerine, nornuciferine, meratin, hyperoside, vitamins.[1]

AUTHORS' COMMENTS

There are eight parts of the lotus plant that are used as medicines. Please refer to the monograph on *Lian Zi* (Semen Nelumbinis) for a complete description.

References

1. *An Hui Zhong Yi Xue Yuan Xue Bao* (Journal of Anhui University School of Medicine)

Zhu Fan Hua Tou (Rhizoma Mirabilidis)

煮飯花頭
煮饭花头

Pinyin Name: *Zhu Fan Hua Tou*
Alternate Chinese Names: *Zi Mo Li, Su Xiang, Yan Zhi Hua, Wan Xiang Hua*
English Name: mirabilis
Botanical Name: *Mirabilis jalapa* Linn.
Pharmaceutical Name: Rhizoma Mirabilidis
Properties: sweet, bitter, astringent
Channels Entered: Lung, Stomach, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Invigorates Blood and Disperses Stasis

Zhu Fan Hua Tou (Rhizoma Mirabilidis) effectively treats disorders of the digestive system, such as peptic ulcer and bleeding ulcer.

- Peptic ulcer: use *Zhu Fan Hua Tou* with *Bai Ji* (Rhizoma Bletillae), *Wu Bei Zi* (Galla Chinensis), *Huang Lian* (Rhizoma Coptidis) and *Hai Piao Xiao* (Endoconcha Sepiae).
- Gastric bleeding: combine this herb with *Hua Rui Shi* (Ophicalcitum), *Chi Shi Zhi* (Halloysitum Rubrum) and *Wu Bei Zi* (Galla Chinensis).
- Hemorrhoids: add it to *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life).
- Carbuncles and cellulitis: apply this herb topically.
- Tonsillitis and inflammation: use it with *Da Qing Ye* (Folium Isatidis), *Ban Lan Gen* (Radix Isatidis) and *Zao Jiao Ci* (Spina Gleditsiae).

2. Sedates Heat and Promotes Urination

- Turbid urine: use *Zhu Fan Hua Tou* with *Da Huang* (Radix et Rhizoma Rhei), *Hua Shi* (Talcum), *Gan Cao* (Radix Glycyrrhizae), *Bian Xu* (Herba Polygoni Avicularis), *Qu Mai* (Herba Dianthi), *Che Qian Zi* (Semen Plantaginis) and *Ze Xie* (Rhizoma Alismatis).
- Leukorrhea: combine it with *Ji Guan Hua* (Flos Celosiae Cristatae) and *Ya She Huang* (Herba Lippiae).

DOSAGE

3 to 9 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Zhu Fan Hua Tou* is contraindicated during pregnancy.

AUTHORS' COMMENTS

Zhu Fan Hua Tou is excellent for treatment of gastric disorders such as peptic ulcers or gastritis. When *Zhu Fan Hua Tou* is combined with blood-invigorating herbs, a much better effect can be achieved.

Ai Ye (Folium Artemisiae Argyi)

艾葉 艾叶

Pinyin Name: *Ai Ye*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: artemisia argyi, argy wormwood leaf
Botanical Name: *Artemisia argyi* Levl. et Vant. (*Ai*)
Pharmaceutical Name: Folium Artemisiae Argyi
Properties: bitter, acrid, warm
Channels Entered: Spleen, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Warms the Channels, Stops Bleeding

Ai Ye (Folium Artemisiae Argyi) warms the channels and collaterals and treats a variety of bleeding disorders. It is especially effective to stop gynecological bleeding caused by deficiency and cold. Clinical applications include profuse menstrual bleeding, vaginal bleeding in unstable pregnancy, epistaxis, and hemoptysis.

- Profuse menstrual bleeding from deficiency and cold: combine *Ai Ye* with *Gan Jiang* (Rhizoma Zingiberis) and *E Jiao* (Colla Corii Asini).
- Excessive loss of blood and profuse bleeding because of deficiency and cold: use this herb with *E Jiao* (Colla Corii Asini), *Bai Shao* (Radix Paeoniae Alba), *Dang Gui* (Radicis Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Unstable pregnancy with vaginal bleeding caused by deficiency and cold: use it with *E Jiao* (Colla Corii Asini), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Sheng Di Huang* (Radix Rehmanniae), *Gan Cao* (Radix Glycyrrhizae) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Epistaxis, hemoptysis and hematemesis: combine *Ai Ye* with *Sheng Di Huang* (Radix Rehmanniae), *Ce Bai Ye* (Cacumen Platycladi) and *He Ye* (Folium Nelumbinis).

2. Dispels Cold, Relieves Pain

Ai Ye warms the Liver, Spleen and Stomach channels to dispel cold and relieve pain. It is commonly used to treat deficiency and cold of the middle and lower *jiao*s manifesting in lower abdominal coldness and pain, irregular menses, dysmenorrhea, infertility, and profuse clear menstrual discharge.

- Deficiency and cold of the middle *jiao* with epigastric and abdominal cold and pain: add *Gan Jiang* (Rhizoma Zingiberis).
- Deficiency and cold of the lower *jiao* with abdominal cold and pain, and irregular menstruation with pain: use *Ai Ye* with *Xiang Fu* (Rhizoma Cyperi), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Dang Gui* (Radicis Angelicae Sinensis), and *Bai Shao* (Radix Paeoniae Alba). If there is severe deficiency and cold, also add *Wu Zhu Yu* (Fructus Evodiae), *Rou Gui* (Cortex Cinnamomi), *Huang Qi* (Radix Astragali) and *Xu Duan* (Radix Dipsaci).
- Lower abdominal coldness and pain: dry fry *Ai Ye* and apply it warm to the umbilicus. This treatment is also effective for postpartum women with abdominal coldness and pain.

3. Dispels Dampness, Relieves Itching

Ai Ye may be used topically to treat various dermatological disorders. As an herbal wash, it is commonly used to treat eczema and itching.

- Eczema: use it with *Di Fu Zi* (Fructus Kochiae) and *Bai Xian Pi* (Cortex Dictamni).

4. Dispels Phlegm, Stops Cough, Relieves Wheezing

Essential oil of *Ai Ye* has good properties for treatment of respiratory disorders such as cough and wheezing with phlegm.

DOSAGE

3 to 10 grams as herbal decoction. *Ai Ye* is also ingested orally as essential oil, 0.1 ml of per dose three times daily. It is commonly used topically as an herbal wash or as moxa. The unprocessed herb functions more effectively to dispel cold and dry dampness. Vinegar-processed *Ai Ye* has

Ai Ye (Folium Artemisiae Argyi)

a potent action to dispel cold and relieve pain. The charred herb has a stronger characteristic to stop bleeding. Processing this herb will reduce irritation to the stomach.

CAUTIONS / CONTRAINDICATIONS

- Warm and drying, *Ai Ye* should be used with caution for patients with yin deficiency or heat in the blood.
- Topical application of this herb's essential oil may irritate the skin and cause local redness and warmth.
- Oral administration of the essential oil of *Ai Ye* may stimulate the gastrointestinal tract and lead to increase in both appetite and consumption of food.

OVERDOSAGE

Adverse reactions to *Ai Ye* can be divided into acute and chronic types:

- **Acute** reaction is caused by overdose and may begin to develop within 1 to 4 hours following ingestion of the herb. Clinical presentation will include dry mouth and throat, thirst, nausea, vomiting, dizziness, and tinnitus, followed by abdominal pain, diarrhea, tremor, generalized spasms and convulsions for 20 to 30 minutes, and altered consciousness. If the overdose is not treated properly, it may lead to jaundice and possibly liver damage.
- **Chronic** reaction occurs because of prolonged exposure to the herb at large dosages. Clinical presentation includes hypersensitivity reactions, numbness of the extremities, neuritis, hallucination, and muscle spasms and cramps. Even with treatment and recovery, forgetfulness is noted as a lingering effect in some patients.[1]

The normal dose of *Ai Ye* is 3 to 10 grams. Adverse reactions may be noted at doses of 20 to 30 grams, and fatality may occur at doses above 100 grams. There has been one fatality associated with overdose of *Ai Ye*, in which a 32-year-old female ingested 500 ml of unknown concentration of *Ai Ye*.

TREATMENT OF OVERDOSAGE

Early stage *Ai Ye* overdose can be treated via emesis within 4 hours of ingestion of the herb. Following vomiting of the offending agent, the patient should be given 250 ml of milk or 6 egg whites to protect the stomach and neutralize any remaining toxin.

If the response to overdose of *Ai Ye* is characterized by seizures and convulsions, 0.6 gram of *Niu Huang* (Calculus Bovis) should be given, to clear heat, eliminate toxins, and stop seizure and epilepsy.

If overdose of *Ai Ye* is characterized by jaundice, yellow urine, a bitter taste in the mouth, and a wiry pulse, herbs should be prescribed to relieve jaundice and hepatitis. An herbal decoction used with good success consists of *Hu Zhang* (Rhizoma Polygoni Cuspidati) 15g, *Yin Chen Hao* (Herba Artemisiae Scopariae) 15g, *Sheng Ma* (Rhizoma Cimicifugae) 15g, *Huang Bai* (Cortex Phellodendri) 12g, *Che Qian Zi* (Semen Plantaginis) 15g, and *She Xiang* (Moschus) 0.06g [60mg]. The formula is taken in decoction twice daily, in the morning and at night.

Hepatitis associated with overdose of *Ai Ye* has been treated with a formula that includes *Yin Chen Hao* (Herba Artemisiae Scopariae) 30g, *Ban Lan Gen* (Radix Isatidis) 30g, *Zhi Zi* (Fructus Gardeniae) 9g, *Long Dan Cao* (Radix Gentianae) 9g, *Gan Cao* (Radix Glycyrrhizae) 9g, and *Che Qian Zi* (Semen Plantaginis) 15g.

Dermatological reactions caused by direct contact with the herb can be relieved by a topical solution of herbs made from 60 grams each of *Hu Zhang* (Rhizoma Polygoni Cuspidati) and *Lei Gong Teng* (Radix Tripterygii Wilfordii). Soak a towel in the decoction and apply to the affected area.

CHEMICAL COMPOSITION

D-α-phellandrene, α-cadinene, 1,8-cineole, camphene, trans-carveol, borneol acetate, elemol, isoborneol, α-terpineol, carvone.[2]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Both fresh and charred forms of *Ai Ye* have demonstrated marked effectiveness to stop bleeding. The charred form was found to be more effective than the fresh herb.[3]
- **Antibiotic:** It has an inhibitory effect against *Bacillus anthracis,* α-hemolytic streptococcus, β-hemolytic streptococcus, *Corynebacterium diphtheriae, Diplococcus pneumoniae, Staphylococcus aureus, Staphylococcus citreus, Staphylococcus albus,* and *Bacillus subtilis.*[4]
- **Antiasthmatic:** Essential oil of *Ai Ye* has demonstrated antiasthmatic effects in animal studies.[5]
- **Antitussive and expectorant:** Intraperitoneal or oral administration of essential oil of *Ai Ye* has demonstrated marked antitussive and expectorant effects in cats, dogs and guinea pigs.[6]
- **Cholagogic:** Administration of a 2% solution of *Ai Ye* has marked effectiveness to increase the production and excretion of bile.[7]

CLINICAL STUDIES AND RESEARCH

- **Unstable pregnancy:** According to one report, 45 pregnant women experiencing profuse uterine bleeding were treated with an herbal decoction with marked effectiveness in 26 patients, moderate results in 16 patients, and no response in 3 patients. The herbal formula contained *Ai Ye* 6g, *Sha Ren* (Fructus Amomi) 6g, *E Jiao* (Colla Corii Asini) 15g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, *Huang Qin*

Ai Ye (Folium Artemisiae Argyi)

(Radix Scutellariae) 12g, *Su Geng* (Caulis Perillae) 12g, *Sang Ji Sheng* (Herba Taxilli) 24g, *Du Zhong* (Cortex Eucommiae) 24g, and others as deemed necessary.[8]

- **Chronic tracheitis:** Essential oil of *Ai Ye* administered daily for 10 days per course of treatment, for two courses, was 86.4 to 96.7% effective in 544 patients with chronic tracheitis; and 82% effective in 319 patients when given via oral inhalation. It has antiasthmatic effect, onset of action, and duration of action similar to isoproterenol.[9]
- **Allergy:** In one study, 0.15 ml of essential oil of *Ai Ye* administered orally three times daily was 77.3% effective in treating patients with various allergies, including bronchial asthma, allergic dermatitis (treated with both oral and topical application of *Ai Ye*), eczema, allergic rhinitis, chemical allergies, and drug allergies.[10]
- **Liver disorders:** Intramuscular injection of *Ai Ye* one time daily for 1 to 2 months was 92% effective in 100 patients with chronic hepatitis or liver cirrhosis. The study noted that *Ai Ye* was much more effective for chronic hepatitis than liver cirrhosis.[11]
- **Burns:** Application of moxa (*Ai Ye* used as the main ingredient of moxa) to burns in children is associated with a reduction of secretions from the burned area, decreased risk of infection, and shortened healing time.[12]
- **Bacterial dysentery:** One study reported that 40 ml of 20% *Ai Ye* decoction given four times daily was very effective in treating 21 patients with acute bacterial dysentery.[13]
- **Malaria:** Administration of 15 to 30 grams of *Ai Ye* as herbal decoction 2 hours before the onset of malarial symptoms for 2 days was 56.2% effective in treating 53 patients with malaria.[14]
- **Skin ulcer:** Twelve patients with skin ulcers were treated topically with an herbal wash three times daily with a 100% success rate. The herbal wash was prepared by cooking 15 grams each of *Ai Ye*, *Lu Cha* (Folium Camellia Sinensis), *Nu Zhen Zi* (Fructus Ligustri Lucidi) and *Zao Jiao* (Fructus Gleditsiae) in 250 ml of water to yield 100 to 150 ml of the final solution.[15]

TOXICOLOGY

The LD_{50} in mice for the essential oil of *Ai Ye* is 2.47 ml/kg via oral routes, and 1.12 mg/kg via intraperitoneal routes. The LD_{50} in mice for the decoction of *Ai Ye* is 23 g/kg via intraperitoneal injection.[16]

AUTHORS' COMMENTS

Ai Ye is the main ingredient compressed into moxa sticks. When burned, the heat penetrates into the muscles, tendons and bones to activate qi and blood circulation, and warms peripheral channels and collaterals.

Fu Long Gan (Terra Flava Usta)

伏龍干 伏龙干

Pinyin Name: *Fu Long Gan*
Literal Name: "hidden dragon liver"
Alternate Chinese Names: *Zao Xin Tu*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: soot and ash from an enclosed fire pit
Pharmaceutical Name: Terra Flava Usta
Properties: acrid, warm
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Warms the Middle *Jiao*, Stops Bleeding

Fu Long Gan (Terra Flava Usta) treats various bleeding disorders characterized by deficiency and cold of the Spleen, and its inability to hold blood within the vessels. Clinical applications include hematemesis, epistaxis, hematochezia, and profuse, dark menstrual bleeding. The other signs and symptoms of Spleen deficiency and cold include sallow facial appearance, cold extremities, pale tongue, and a thready pulse.

- General bleeding: use *Fu Long Gan* as a single-herb remedy.
- Hematemesis or epistaxis: mix it with honey.
- Hematochezia with cold in the lower *jiao*: combine this substance with *Gan Jiang* (Rhizoma Zingiberis), *E Jiao* (Colla Corii Asini), and *Huang Qin* (Radix Scutellariae).
- Bloody dysentery with abdominal pain, irritability, and dry mouth: use it with *Huang Lian* (Rhizoma Coptidis), *E Jiao* (Colla Corii Asini) and *Ai Ye* (Folium Artemisiae Argyi).
- Profuse menstrual bleeding: combine it with *E Jiao* (Colla Corii Asini) and *Jiang Can* (Bombyx Batryticatus), and take with grain-based liquor.
- Bloody leukorrhea: combine it with *Zong Lu Pi* (Fibra Stipulae Trachycarpi) and *She Xiang* (Moschus), and take with warm alcohol or vinegar.
- Hematochezia, hematemesis, epistaxis, and profuse menstrual bleeding caused by deficiency of Spleen qi: use this substance with *E Jiao* (Colla Corii Asini), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Shu Di Huang* (Radix Rehmanniae Preparata).

2. Relieves Nausea

Fu Long Gan warms the middle *jiao*, redirects rebellious qi, and relieves nausea.

- Nausea and vomiting: take this substance as powder with rice water.
- Nausea and vomiting from Stomach deficiency: use it with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Sha Ren* (Fructus Amomi), and *Chen Pi* (Pericarpium Citri Reticulatae).
- Nausea and vomiting during pregnancy: use *Fu Long Gan* individually, or with *Su Geng* (Caulis Perillae), *Sha Ren* (Fructus Amomi), and *Zhu Ru* (Caulis Bambusae in Taenia).

3. Stops Diarrhea

Fu Long Gan warms the middle *jiao*, strengthens the Spleen, and stops diarrhea.

- Chronic diarrhea caused by Spleen deficiency: combine it with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gan Jiang* (Rhizoma Zingiberis), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Postpartum diarrhea: mix it with *Shan Zha* (Fructus Crataegi) and sugar.

4. Treats Skin Disorders

Topical application of *Fu Long Gan* treats sores, swelling, erysipelas, ulcers, and other skin disorders characterized by dampness. It should always be combined with herbs that clear heat and eliminate toxins, for optimal effect.

DOSAGE

15 to 30 grams of *Fu Long Gan* should be wrapped in cheesecloth and pre-decocted for herbal decoction. Powder of this substance is used both internally and topically.

The 'suspension' of *Fu Long Gan* is sometimes used in place of water to cook herbs. The suspension is made by mixing 60 to 120 grams of this substance with water and

Fu Long Gan (Terra Flava Usta)

pouring out the top portion before sedimentation occurs. The purpose of preparing the suspension is to obtain only the finest particles of *Fu Long Gan* that suspend in water. The herbs are then added to the suspension, cooked, and the final decoction is then ingested.

CAUTIONS / CONTRAINDICATIONS

- Warm in nature, *Fu Long Gan* should be used with caution in cases of bleeding arising from yin deficiency, or in nausea and vomiting caused by heat.
- To treat sores and skin ulcers, combine it with herbs that clear heat and eliminate toxins.

CHEMICAL COMPOSITION

Silicic acid, aluminum oxide, ferric oxide.[1]

PHARMACOLOGICAL EFFECTS

- **Antiemetic:** Intravenous or oral administration of *Fu Long Gan* in pigeons was effective in treating nausea and vomiting induced by digitalis tincture. However, it was ineffective in suppressing apomorphine-induced vomiting in dogs.[2]

CLINICAL STUDIES AND RESEARCH

- **Bleeding disorders:** Bleeding problems characterized by deficiency and cold were treated with an herbal decoction. Of 108 patients, there was marked improvement in 81 patients, moderate improvement in 24 patients and no improvement in 3 patients. The herbal formula was cooked in a suspension of *Fu Long Gan* instead of water. It contained *E Jiao* (Colla Corii Asini) 15g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 12g, *Sheng Di Huang* (Radix Rehmanniae) 12g, *Huang Qin* (Radix Scutellariae) 10g, and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) 10g. Modifications were made if necessary by adding *Dang Shen* (Radix Codonopsis) 15g in cases of qi deficiency, and *Hai Piao Xiao* (Endoconcha Sepiae) 12g and *Qian Cao* (Radix Rubiae) 12g if bleeding was profuse. The formula was cooked in a suspension of *Fu Long Gan* instead of water. The suspension was made by mixing 300 grams of *Fu Long Gan* in water, with the top portion of the water poured out prior to sedimentation to obtain the fine particles of *Fu Long Gan*.[3]
- **Bacterial dysentery:** In one study, 90 children with bacterial dysentery were treated with 30 to 60 ml of an herbal decoction one time daily with marked effectiveness in 17 patients after 1 dose, in 34 patients after 2 doses, in 19 patients after 3 doses, in 8 patients after 5 doses, and with no response in 7 patients. Reports for the last 5 patients were unavailable. The formula contained 100 grams of *Huang Lian* (Rhizoma Coptidis), 200 grams of *Da Huang* (Radix et Rhizoma Rhei), 200 grams of *Bai Shao* (Radix Paeoniae Alba), 250 grams of *Huang Qin* (Radix Scutellariae), 150 grams of *Chuan Lian Zi* (Fructus Toosendan), 150 grams of charred *Jing Jie* (Herba Schizonepetae), and 50 grams of *Yan Hu Suo* (Rhizoma Corydalis). The herbs were cooked in the suspension of *Fu Long Gan*, which was made by mixing 500 grams of *Fu Long Gan* in 5,000 ml of water, with the top portion of the water poured out prior to sedimentation to obtain the fine particles of *Fu Long Gan*.[4]

Chapter 11 summary

— Stop-Bleeding Herbs

Name	Similarities	Differences
Da Ji (Herba seu Radix Cirsii Japonici)	Cool blood to stop bleeding	Stops bleeding, removes blood stasis, reduces swelling
Xiao Ji (Herba Cirisii)		Stops bleeding, alleviates dysuria
Di Yu (Radix Sanguisorbae)		Stops lower *jiao* bleeding
Bai Mao Gen (Rhizoma Imperatae)		Clears heat in the Lung and Stomach, promotes urination
Huai Hua (Flos Sophorae)		Clears Liver heat, lowers blood pressure
Ce Bai Ye (Cacumen Platycladi)		Dispels phlegm and relieves cough
Zi Zhu (Folium Callicarpae)	Stabilize and bind to consolidate blood and stop bleeding	Stops bleeding and eliminates toxins to treat sores, carbuncles and burns
Xian He Cao (Herba Agrimoniae)		Kills parasites
Bai Ji (Rhizoma Bletillae)		Stops bleeding of the Lung and Stomach; used externally, reduces swelling and promotes generation of flesh
Zong Lu Pi (Fibra Stipulae Trachycarpi)		Stops bleeding, especially metrorrhagia
Ou Jie (Nodus Nelumbinis Rhizomatis)		Removes blood stasis when used in unprocessed form
Xue Yu Tan (Crinis Carbonisatus)	Activate blood circulation, remove blood stasis, stop bleeding	Promotes urination, treats bloody dysuria
San Qi (Radix Notoginseng)		Strongly stops bleeding and relieves pain
Qian Cao (Radix Rubiae)		Invigorates blood and promotes normal menstruation
Pu Huang (Pollen Typhae)		Promotes urination, removes abdominal blood stasis
Hua Rui Shi (Ophicalcitum)		Consolidates leakage of blood
Wan Nian Song (Herba Selaginellae)		Regulates Lung qi and relieves cough
Xiao Jin Ying (Fructus Rosae Cymosae)		Disperses stagnation and stops bleeding
Lian Fang (Receptaculum Nelumbinis)		Treats abnormal menstrual bleeding and hematuria
Zhu Fan Hua Tou (Rhizoma Mirabilidis)		Sedates heat and promotes urination
Ai Ye (Folium Artemisiae Argyi)	Warm the body to stop bleeding	Warms the channels to stop bleeding, disperses cold and relieves pain
Fu Long Gan (Terra Flava Usta)		Warms the Spleen to stop bleeding, relieves nausea and vomiting

General Characteristics of Stop-Bleeding Herbs:

Taste: varies
Thermal property: varies
Channels entered: Heart, Spleen, Liver
Therapeutic actions: stop bleeding

These herbs stop internal and external bleeding, and are administered orally or topically. Stop-bleeding herbs have four primary therapeutic effects:

To cool blood to stop bleeding
To stabilize and bind to consolidate blood and stop bleeding
To remove blood stasis to stop bleeding
To warm the body to stop bleeding

Chapter 11 summary

Herbs that cool blood to stop bleeding include ***Da Ji*** (Herba seu Radix Cirsii Japonici), ***Xiao Ji*** (Herba Cirisii), ***Di Yu*** (Radix Sanguisorbae), ***Bai Mao Gen*** (Rhizoma Imperatae), ***Huai Hua*** (Flos Sophorae), and ***Ce Bai Ye*** (Cacumen Platycladi). They are the herbs of choice when treating bleeding due to heat in the blood.

Da Ji invigorates blood circulation, removes blood stasis, eliminates toxins, reduces swelling and lowers blood pressure.

Xiao Ji has essentially the same functions as *Da Ji*, except that *Xiao Ji* treats dysuria or hematuria, but does not invigorate blood or remove stasis.

Di Yu sedates fire, eliminates toxins, treats sores, and stops bleeding of the lower *jiao* such as hematochezia, hemorrhoidal bleeding, metrorrhagia and bloody dysentery.

Bai Mao Gen clears heat, promotes urination and is the most effective herb for heat in the Lung and Stomach.

Huai Hua treats bleeding from the lower *jiao* and lowers blood pressure.

Ce Bai Ye dispels phlegm and stops cough.

Herbs that stabilize and bind to consolidate blood and stop bleeding include ***Zi Zhu*** (Folium Callicarpae), ***Xian He Cao*** (Herba Agrimoniae), ***Bai Ji*** (Rhizoma Bletillae), ***Zong Lu Pi*** (Fibra Stipulae Trachycarpi), and ***Ou Jie*** (Nodus Nelumbinis Rhizomatis). They are most suitable for bleeding that does not involve blood stasis.

Zi Zhu eliminates toxins and treats sores.

Xian He Cao stops diarrhea and dysentery, kills parasites, and treats malaria and over-exhaustion.

Bai Ji more effectively stops bleeding, promotes generation of flesh, and reduces swelling.

Zong Lu Pi stops bleeding.

Ou Jie, when used fresh, stops bleeding and removes blood stasis. When charred, it consolidates blood and stops bleeding.

Herbs that invigorate blood, remove blood stasis and stop bleeding include ***Xue Yu Tan*** (Crinis Carbonisatus), ***San Qi*** (Radix Notoginseng), ***Qian Cao*** (Radix Rubiae), ***Pu Huang*** (Pollen Typhae), ***Hua Rui Shi*** (Ophicalcitum), ***Wan Nian Song*** (Herba Selaginellae), ***Xiao Jin Ying*** (Fructus Rosae Cymosae), ***Lian Fang*** (Receptaculum Nelumbinis), and ***Zhu Fan Hua Tou*** (Rhizoma Mirabilidis). They are most effective to stop bleeding involving blood stagnation.

Xue Yu Tan tonifies yin and promotes urination.

San Qi strongly invigorates the blood and relieves pain.

Qian Cao cools the blood and stops bleeding.

Pu Huang stops bleeding and simultaneously invigorates blood circulation.

Hua Rui Shi stabilizes and binds to stop bleeding.

Wan Nian Song invigorates blood circulation to treat sprains and strains, and treats rectal bleeding, hemoptysis, and hematuria.

Xiao Jin Ying and *Lian Fang* both disperse blood stagnation and stop bleeding.

Zhu Fan Hua Tou invigorates blood circulation, clears heat, and stops bleeding.

Herbs that warm the body to stop bleeding include ***Ai Ye*** (Folium Artemisiae Argyi) and ***Fu Long Gan*** (Terra Flava Usta).

Ai Ye warms the channels to stop bleeding, and disperses cold to relieve pain. Charred *Ai Ye* should be used when there is bleeding.

Fu Long Gan warms the middle *jiao* and stops bleeding caused by cold and deficiency.

Chapter 12

— Blood-Invigorating and Stasis-Removing Herbs

Definition: Herbs that invigorate blood circulation and eliminate blood stasis function to open blood vessels, activate blood circulation, disperse blood stagnation, and break blood stasis.

Blood-invigorating and stasis-removing herbs are mostly ***acrid, bitter*** and ***warm.*** The ***acrid*** taste promotes movement of blood and disperses stagnation, the ***bitter*** taste descends and drains stagnation, and the ***warm*** property helps to invigorate and facilitate the movement of blood. All of these herbs are 'moving' by nature, and function to activate blood circulation, disperse stasis, regulate menstruation, and open channels and collaterals, as well as help to heal wounds, relieve *bi zheng* (painful obstruction syndrome), and reduce swelling and pain. Clinical manifestations of blood stagnation include: stabbing pain in a fixed location or all over the body, numbness of the limbs and extremities, lumps found on the skin or internal palpable masses, swelling caused by traumatic injuries or internal bleeding, internal bleeding with visible blotches of bruises, purpura of the skin, and purple spots on the tongue.

The complex causes and complications of blood stagnation make it imperative that treatment incorporate herbs to address the overall condition of the patient.

SUBCATEGORIES OF ACTION

Although blood-invigorating herbs are generally not broken into subcategories, they do form a range of potencies and indications. These herbs may exert

- mild action to *invigorate blood circulation,*
- moderate action to *eliminate blood stagnation,* or
- potent action to *break blood stasis.*

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Blood stagnation often involves a wide range of potential causes and complications. Many of these causes and complications are opposites, such as deficiency and excess, cold and hot, and interior and exterior. Due to the complex array of causes and complications of blood stagnation, it is imperative that the treatment plan incorporate herbs to address the overall condition of the patient, in addition to using herbs that eliminate blood stagnation.

Potential causes of blood stagnation include:

- *wei* (defensive) *qi* deficiency with exterior invasion of wind-cold or wind-damp
- *bi zheng* (painful obstruction syndrome) with obstruction of channels and collaterals
- febrile disorders
- excess heat consuming *ying* (nutritive) and *xue* (blood)
- stagnation of phlegm and dampness
- traumatic injuries leading to obstructed qi and blood circulation

Potential complications of blood stagnation are:

- amenorrhea
- postpartum abdominal pain
- cardiovascular disorders including (but not limited to) angina
- hypochondriac pain
- paralysis
- ulcers
- swellings

Dan Shen (Radix Salviae Miltiorrhizae)
Ben Cao Gang Mu (Materia Medica),
by Li Shi-Zhen, 1578 A.D.

Chapter 12 – Blood-Invigorating and Stasis-Removing Herbs

CAUTIONS/CONTRAINDICATIONS

- Blood-invigorating herbs should be used with extreme caution for women with hypermenorrhea.
- During pregnancy, mild to moderate herbs that invigorate blood circulation may be used *only* if necessary; while herbs that eliminate and break up blood stasis are ***contraindicated***.

PHARMACOLOGICAL EFFECTS

- **Cardiovascular**: Many of these herbs exert profound influence on the cardiovascular system. They dilate blood vessels, increase blood perfusion to smaller blood vessels, inhibit platelet aggregation, delay coagulation, and treat angina and ischemia.

Blood-moving herbs offer great therapeutic value as they exert profound influence on the cardiovascular system.

Herbs that dilate coronary arteries include *Hong Hua* (Flos Carthami), *Dan Shen* (Radix Salviae Miltiorrhizae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *San Qi* (Radix Notoginseng), *Yan Hu Suo* (Rhizoma Corydalis), *Chi Shao* (Radix Paeoniae Rubrae), and *Ji Xue Teng* (Caulis Spatholobi).

Herbs that dilate veins include *Chi Shao* (Radix Paeoniae Rubrae), *Tao Ren* (Semen Persicae), and *Dan Shen* (Radix Salviae Miltiorrhizae).

Herbs that dilate arteries include *Chuan Shan Jia* (Squama Manis), *Shui Zhi* (Hirudo), *E Zhu* (Rhizoma Curcumae), *Tao Ren* (Semen Persicae), and *Yi Mu Cao* (Herba Leonuri).

Herbs that improve micro-circulation include *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Dan Shen* (Radix Salviae Miltiorrhizae), *Pu Huang* (Pollen Typhae), *Jiang Huang* (Rhizoma Curcumae Longae), *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis) and *Yi Mu Cao* (Herba Leonuri).

- **Hematological**: Many herbs have anticoagulant and antiplatelet effects. Blood clots form in the veins mainly due to coagulation, while blood clots form in the arteries mainly due to aggregation of platelets. Therefore, anticoagulant substances are prescribed to stop formation of clots in veins, and antiplatelet medicines are prescribed to stop formation of clots in arteries. Many herbs have excellent inhibitory influence on thrombus formation, and are used in treatment of angina, stroke and embolism.

These herbs may have antiplatelet, anticoagulant, and thrombolytic effects.

Herbs with anticoagulant properties include *Dan Shen* (Radix Salviae Miltiorrhizae) and *Chi Shao* (Radix Paeoniae Rubrae).

Herbs exerting antiplatelet activity include *Dan Shen* (Radix Salviae Miltiorrhizae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Hong Hua* (Flos Carthami).

Herbs with thrombolytic effects include *Chi Shao* (Radix Paeoniae Rubrae), *Dan Shen* (Radix Salviae Miltiorrhizae), *Yi Mu Cao* (Herba Leonuri), *Dang Gui* (Radicis Angelicae Sinensis), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Hong Hua* (Flos Carthami).

- **Metabolic**: Some blood-invigorating herbs lower plasma cholesterol levels to various degrees. Examples are *Yu Jin* (Radix Curcumae), *Hong Hua* (Flos Carthami), *Jiang Huang* (Rhizoma Curcumae Longae), *Dan Shen* (Radix Salviae Miltiorrhizae) and *Pu Huang* (Pollen Typhae).
- **Immunologic**: Blood-moving herbs act on the immune system in a number of ways. Some inhibit the immune system to treat allergy or hyperactivity of the immune system, such as *Yi Mu Cao* (Herba Leonuri), *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). Others enhance the immune system to treat patients who have compromised immune systems, such as *Dan Shen* (Radix Salviae Miltiorrhizae), *Chi Shao* (Radix Paeoniae Rubrae), *Tao Ren* (Semen Persicae), *San Leng* (Rhizoma Sparganii), and *E Zhu* (Rhizoma Curcumae).
- **Antineoplastic**: Herbs that address blood stagnation have shown promise in inhibiting the growth of cancer cells *in vitro*, such as *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *E Zhu* (Rhizoma Curcumae), *Hong Hua* (Flos Carthami), *Yu Jin* (Radix Curcumae), *Yan Hu Suo* (Rhizoma Corydalis), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *San Leng* (Rhizoma Sparganii).
- **Analgesic and anti-inflammatory**: Many blood-moving substances have an analgesic action via their effect on the central nervous system, including *Dan Shen* (Radix Salviae Miltiorrhizae), *Dang Gui* (Radicis Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubrae), *Ru Xiang* (Gummi

Chapter 12 –Blood-Invigorating and Stasis-Removing Herbs

Olibanum), *Mo Yao* (Myrrha), *Yan Hu Suo* (Rhizoma Corydalis), *Yu Jin* (Radix Curcumae) and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).

Others reduce inflammation by reducing the permeability of the capillaries.

- **Antibiotic**: Many herbs inhibit the growth of bacteria, such as *Chi Shao* (Radix Paeoniae Rubrae), *Mu Dan Pi* (Cortex Moutan), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).

POTENTIAL HERB-DRUG INTERACTIONS

- **Antihypertensives**: Herbs that dilate the blood vessels may potentiate the effect of antihypertensive drugs and cause hypotension.
- **Antiplatelets and anticoagulants**: Herbs that treat blood stasis may enhance the actions of antiplatelet and anticoagulant medications, and prolong bleeding or increase bruising.
- **Analgesics**: Herbs with analgesic effects may cause drowsiness, therefore accentuating the sedative effect of many drugs and of alcohol.

As described above, herbs that invigorate blood circulation and eliminate blood stasis have a wide variety of pharmacological effects. This also implies possibilities for theoretical or actual clinical herb-drug interactions. Additional information on possible interactions is given in individual herb monographs.

Note: Blood-invigorating and stasis-removing herbs are tremendously important and effective substances in the Chinese materia medica. Practitioners ought not to shy away from using them for fear of their potency or of herb-drug interactions. Instead, being well-informed about the nature of each of these substances and aware of the pharmaceuticals each patient is taking will allow practitioners the confident exercise of superior herbal care.

Chuan Xiong (Rhizoma Ligustici Chuanxiong)

川芎 川芎

Pinyin Name: *Chuan Xiong*
Alternate Chinese Names: *Xiong Xiong, Fu Xiong, Jing Xiong, Shan Ju Xiong*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cnidium, Sichuan lovage rhizome, Szechwan lovage rhizome
Botanical Name: *Ligusticum chuanxiong* Hort. (*Chuan Xiong*)
Pharmaceutical Name: Rhizoma Ligustici Chuanxiong
Properties: acrid, warm
Channels Entered: Liver, Gallbladder, Pericardium

CHINESE THERAPEUTIC ACTIONS

1. Activates Qi and Blood Circulation

Acrid and warm, *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) is one of the most effective and commonly used herbs to activate qi and blood circulation. It has excellent ascending, descending and dispersing functions and reaches every part of the body. *Chuan Xiong* is one of the best herbs to treat gynecological disorders. It is also added to blood-tonic herbs to prevent any stagnating side effects.

Obstetric/gynecological disorders: *Chuan Xiong* has an excellent function to regulate blood circulation and is commonly used to treat gynecological disorders such as irregular menstruation, amenorrhea, dysmenorrhea, difficult labor, and postpartum abdominal pain caused by residual blood stagnation. Menstruation is closely related to the *chong* (thoroughfare) channel, which is the point from which all twelve channels emerge and is thus considered the "sea of blood." *Chuan Xiong*, with its descending influence, enters the *chong* channel to regulate qi and blood circulation and normalize menstruation.

Irregular Menstruation:

- Irregular menstruation, with either early or delayed onset: use *Chuan Xiong* with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Chong Wei Zi* (Semen Leonuri), and *Yi Mu Cao* (Herba Leonuri).
- Irregular menstruation with heat in the blood, usually seen as shortened periods between cycles: use this herb with *Mu Dan Pi* (Cortex Moutan) and *Sheng Di Huang* (Radix Rehmanniae).
- Irregular menstruation with cold in the blood, usually seen as prolonged periods between cycles: use it with *Rou Gui* (Cortex Cinnamomi).
- Epistaxis during menstruation: combine *Chuan Xiong* with *Niu Xi* (Radix Cyathulae seu Achyranthis) and *Bai Mao Gen* (Rhizoma Imperatae).

Amenorrhea:

- Amenorrhea: use *Chuan Xiong* with *Hong Hua* (Flos Carthami) and *Ze Lan* (Herba Lycopi).
- Amenorrhea due to accumulation of phlegm and dampness, in cases of obesity: combine it with *Dang Gui* (Radicis Angelicae Sinensis), *Xiang Fu* (Rhizoma Cyperi), *Cang Zhu* (Rhizoma Atractylodis), *Ban Xia* (Rhizoma Pinelliae), *Ju Hong* (Exocarpium Citri Rubrum), *Chi Fu Ling* (Poria Rubrae), *Tian Nan Xing* (Rhizoma Arisaematis), *Zhi Shi* (Fructus Aurantii Immaturus), *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

Dysmenorrhea:

- Dysmenorrhea caused by blood stasis, with dark, purplish clots: use *Chuan Xiong* with *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit).
- Dysmenorrhea with a scanty flow of blood and cold sensations in the abdomen caused by deficiency and cold in the *ren* (conception) and *chong* (thoroughfare) channels: use this herb with *Gui Zhi* (Ramulus Cinnamomi), *Wu Zhu Yu* (Fructus Evodiae), *Mu Dan Pi* (Cortex Moutan), and *Dang Gui* (Radicis Angelicae Sinensis).

Childbirth-related disorders:

- Difficult labor: combine *Chuan Xiong* with *Dang Gui* (Radicis Angelicae Sinensis), *Niu Xi* (Radix Cyathulae

Chuan Xiong (Rhizoma Ligustici Chuanxiong)

seu Achyranthis), and *Gui Ban* (Plastrum Testudinis).

- Continuous postpartum bleeding caused by blood stasis with blood deficiency and cold: use this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Tao Ren* (Semen Persicae), *Pao Jiang* (Rhizoma Zingiberis Preparatum), and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata). **Exemplar Formula:** *Sheng Hua Tang* (Generation and Transformation Decoction).

Pain due to blood and qi stagnation: *Chuan Xiong* has an excellent function to regulate qi and blood circulation to alleviate pain. Clinical manifestations include hypochondriac and chest pain, numbness of the limbs and extremities, paralysis, and pain from traumatic injuries.

- Hypochondriac pain with chest and epigastric distention from Liver qi stagnation: use *Chuan Xiong* with *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi), *Bai Shao* (Radix Paeoniae Alba) and *Zhi Ke* (Fructus Aurantii). **Exemplar Formula:** *Chai Hu Shu Gan Tang* (Bupleurum Powder to Spread the Liver).
- Sharp, stabbing pain in the chest and hypochondriac area due to blood stagnation: add this herb to *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis), and *Chai Hu* (Radix Bupleuri). **Exemplar Formula:** *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).
- Numbness of the extremities and paralysis: use this herb with *Huang Qi* (Radix Astragali), *Dang Gui* (Radicis Angelicae Sinensis), *Hong Hua* (Flos Carthami), and *Di Long* (Pheretima). **Exemplar Formula:** *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction).
- Pain due to traumatic injuries: combine it with *Dang Gui* (Radicis Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubrae) and *Hong Hua* (Flos Carthami).
- Chronic non-healing sores, with or without pus, in deficient patients: add *Chuan Xiong* to *Huang Qi* (Radix Astragali), *Dang Gui* (Radicis Angelicae Sinensis), and *Zao Jiao Ci* (Spina Gleditsiae). **Exemplar Formula:** *Tuo Li Xiao Du Yin* (Drain the Interior and Detoxify Decoction).

2. Dispels Wind and Relieves Pain

Acrid and aromatic, ascending and dispersing, *Chuan Xiong* dispels wind and relieves pain. *Chuan Xiong* is an essential herb in relieving all kinds of aches and pains, when combined with other herbs.

Headaches:

- Headache caused by wind-cold: use *Chuan Xiong* with *Bai Zhi* (Radix Angelicae Dahuricae), *Fang Feng* (Radix Saposhnikoviae), and *Xi Xin* (Herba Asari). **Exemplar Formula:** *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea).
- Headache from wind-heat: combine this herb with *Ju Hua* (Flos Chrysanthemi), *Shi Gao* (Gypsum Fibrosum), and *Jiang Can* (Bombyx Batryticatus).
- Headache caused by wind and dampness: use it with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Gao Ben* (Rhizoma Ligustici), and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness).
- Headache from blood stasis: use this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami). **Exemplar Formula:** *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).
- Headache from blood deficiency: use it with *Dang Gui* (Radicis Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Preparata), and *Bai Shao* (Radix Paeoniae Alba).
- Severe headache without interior fire: combine this herb with *Gao Ben* (Rhizoma Ligustici).

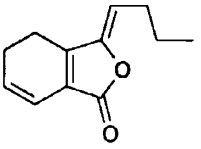
***Bi zheng* (painful obstruction syndrome):**

- Musculoskeletal and joint pain caused by the accumulation of wind, cold and dampness: add *Chuan Xiong* to *Dang Gui* (Radicis Angelicae Sinensis), *Du Huo* (Radix Angelicae Pubescentis) and *Hai Feng Teng* (Caulis Piperis Kadsurae). **Exemplar Formula:** *Juan Bi Tang* (Remove Painful Obstruction Decoction).

DOSAGE

3 to 10 grams in herbal decoction, 1.0 to 1.5 grams as powder. Frying *Chuan Xiong* with grain-based liquor enhances its potency to activate qi and blood circulation, dispel wind, and relieve pain.

CAUTIONS / CONTRAINDICATIONS



- Acrid, warm and dispersing in nature, *Chuan Xiong* should not be used in cases of yin-deficient fire, red tongue, and dry mouth.
- *Chuan Xiong* should be used with caution in cases of hypermenorrhea due to its strong function to activate qi and blood circulation.

CHEMICAL COMPOSITION

Alkaloids (chuanxiongzine, tetramethylprazine, L-isoleucine-L-valine anhydride, L-valine-L-valine anhydride, trimethylamine, choline, perlolyrine, cnidiumlactone, chuanxingol, 4-hydroxy-3-butyl-phathalide, ligustilide, neocnidilide); organic acids (ferulic acid, sedanonic acid, folic acid, vanillic, caffeic acid, protocatechuic acid, palmitic acid, linolenic acid, chrysophanol, methyl phenylacetate, sedanoic acid lactone, methyl pentadecanoate); essential oils (ethyl pentadecanoate, ethyl

Chuan Xiong (Rhizoma Ligustici Chuanxiong)

palmitate, ethyl heptadecanoate, ethyl isoheptadecanoate, ethyl octadecanoate, ethyl isoctadecanoate, methyl palmitate, methyl linolenate).[1,2]

Ligustilide

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** *Chuan Xiong* dilates blood vessels to lower blood pressure, increases blood perfusion to coronary arteries, and decreases oxygen consumption by the cardiac muscle. The effect of *Chuan Xiong* on the cardiovascular system varies depending on the dosage given, as demonstrated in frog studies. At 20 to 30 g/kg via oral route, there is a positive inotropic and negative chronotropic effect on the heart; at 40 g/kg, the heart may exert little or no contraction.[3]
- **Antiplatelet and anticoagulant:** Administration of *Chuan Xiong* has demonstrated marked antiplatelet and anticoagulant effects in various animal studies.[4]
- **Circulatory:** Administration of *Chuan Xiong* is associated with increased blood perfusion to and reduced swelling of the brain, and is commonly used to treat disorders such as cerebral ischemia, Alzheimer's disease, and migraine headache.[5]
- **Sedative:** Oral administration of *Chuan Xiong* decoction to mice and rats has a sedative effect on the central nervous system, as it decreases motor activities, prolongs phenobarbital-induced sleeping time, and counteracts the stimulating effects produced by caffeine.[6]
- **Effects on the smooth muscle:** Administration of *Chuan Xiong* has marked influences on the smooth muscle of the uterus and intestines. At small dosages, it leads to mild contraction and/or spasms of the smooth muscle. At large dosages, it causes numbness and inhibits contraction of smooth muscle. Subcutaneous administration of a 20% *Chuan Xiong* injection at the dosage of 4 ml/100g may cause fatality of the fetus in pregnant mice or rabbits, presumably due to severe contraction of the muscles shutting off blood circulation.[7]
- **Protective effect against radiation:** Intramuscular, oral and intraperitoneal administration of *Chuan Xiong* have all been associated with a protective effect against radiation in dogs, mice and rats.[8]

CLINICAL STUDIES AND RESEARCH

- **Headache:** In one study, 50 patients with headaches were treated with herbal formulas with great success. The base formula contained *Chuan Xiong*, *Shi Gao* (Gypsum Fibrosum), *Xi Xin* (Herba Asari) and *Ju Hua* (Flos Chrysanthemi). Modifications were made if necessary, depending on the differential diagnosis. For wind-cold headache, larger dosages of *Chuan Xiong*, *Bai Zhi* (Radix Angelicae Dahuricae) *Xi Xin* (Herba Asari), and regular dosages of *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Fang Feng* (Radix Saposhnikoviae) were used. For wind-heat headache, larger dosages of *Ju Hua* (Flos Chrysanthemi), and *Shi Gao* (Gypsum Fibrosum), and regular dosages of *Bo He* (Herba Menthae) and *Lian Qiao* (Fructus Forsythiae) were used. For wind-damp headache, larger dosages of *Xi Xin* (Herba Asari), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Bai Zhi* (Radix Angelicae Dahuricae), and regular dosages of *Qiang Huo* (Rhizoma et Radix Notopterygii), *Cang Zhu* (Rhizoma Atractylodis) and *Gao Ben* (Rhizoma Ligustici) were used. For headaches caused by blood stasis, large dosage of *Chuan Xiong* and regular dosages of *She Xiang* (Moschus), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami) and *Dang Gui* (Radicis Angelicae Sinensis) were used.[9]
- **Angina:** Eight patients with angina were treated with 20 mg of ferulic acid in 250 ml of D5W, administered via intravenous infusion once daily, for 10 days. The study reported an overall improvement of chest pain, ECG evaluation, and reduction of cholesterol levels.[10] In another study, preparation of a *Chuan Xiong* injectable was used to treat 30 angina patients, with relief of pain observed in 92.5% of patients and improvement of ECG seen in 40% of patients.[11]
- **Hypertrophic myelitis and bone spurs of the heels:** Patients with these conditions were treated with *Chuan Xiong* powder placed in a small cloth bag and taped directly onto the affected area. A fresh batch of herbs was placed in the cloth bag on a weekly basis. The study reported moderate to significant reduction of pain within 5 to 10 days. The patients were treated with the same method if the condition recurred in 2 or 3 months.[12]
- **Cerebral thrombosis:** An herbal injectable was used to treat 400 cerebral thrombosis patients, with an overall 94.5% rate of effectiveness, based on both subjective and objective evaluations. The herbal injectable contained *Chuan Xiong*, *Chi Shao* (Radix Paeoniae Rubrae), *Dan Shen* (Radix Salviae Miltiorrhizae) and *Dang Gui* (Radicis Angelicae Sinensis).[13]
- **Cerebral embolism:** In one report, 50 patients with acute cerebral embolisms were treated with a preparation of *Chuan Xiong* injectable for 14 days, with an overall effective rate of 90%. Most patients showed significant improvement in motor functions, with up to 66% regaining the ability to walk. There was a 6% mortality rate.[14]
- **Trigeminal nerve pain:** Twenty-one patients were treated

Chuan Xiong (Rhizoma Ligustici Chuanxiong)

with an herbal decoction daily for 1 month with a 90.6% rate of effectiveness. The herbal formula contained 30 grams of *Chuan Xiong*, and 9 grams each of *Dang Gui* (Radicis Angelicae Sinensis), *Dan Shen* (Radix Salviae Miltiorrhizae), *Bai Shao* (Radix Paeoniae Alba), *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), *Bai Zhi* (Radix Angelicae Dahuricae), *Quan Xie* (Scorpio), *Chan Tui* (Periostracum Cicadae) and *Di Long* (Pheretima).[15]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Chuan Xiong* should be used with caution in patients receiving anticoagulant or antiplatelet medications, as combining these substances may have additive or synergistic effects. Though this potential interaction has not been documented, the use of *Chuan Xiong* may potentiate the effect of such drugs as warfarin.[16] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

No abnormalities of liver, kidney and blood exams were observed in mice following continuous oral administration of chuanxingzine at 5 to 10 mg/kg, for 4 weeks. The LD_{50} for a *Chuan Xiong* preparation in mice was 65.86 g/kg with intraperitoneal injection and 66.42 g/kg with intravenous injection.[17]

AUTHORS' COMMENTS

Chuan Xiong (Rhizoma Ligustici Chuanxiong), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Bai Zhi* (Radix Angelicae Dahuricae), *Chai Hu* (Radix Bupleuri) and *Gao Ben* (Rhizoma Ligustici) all treat headaches. According to Dr. Li Shou-Shan, the differences between these herbs are as follows:

- *Chuan Xiong* is most effective for headaches related to menstruation.
- *Qiang Huo* is more specific to occipital headaches.
- *Bai Zhi* focuses on frontal headaches.
- *Chai Hu* treats temporal headaches.
- *Gao Ben* is best for vertex headaches.

According to Dr. Liu Feng-Wu, the following sets of herbs are listed in order of their potency to invigorate blood:

- For slow blood flow with no actual stasis: *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Yi Mu Cao* (Herba Leonuri).
- For blood clots that are not very apparent, or are moderate in severity: *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Liu Ji Nu* (Herba Artemisiae Anomalae), *Pu Huang* (Pollen Typhae), and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).
- For blood clots that are palpable or causing obstruction: *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Dan Shen* (Radix Salviae Miltiorrhizae), *Xue Jie* (Sanguis Draconis), and *Su Mu* (Lignum Sappan).
- For severe blood stasis: *Shui Zhi* (Hirudo), *Meng Chong* (Tabanus), and *Da Huang* (Radix et Rhizoma Rhei).

Yan Hu Suo (Rhizoma Corydalis)

延胡索

Pinyin Name: *Yan Hu Suo*
Alternate Chinese Names: *Yan Hu, Yuan Hu, Xuan Hu, Xuan Hu Suo*
Original Source: *Ben Cao Shi Yi* (Omissions From the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: corydalis
Botanical Name: *Corydalis turtschaninovii* Bess. f. yanhusuo Y.H. Chou et C.C. Hsu (*Yan Hu Suo*)
Pharmaceutical Name: Rhizoma Corydalis
Properties: acrid, bitter, warm
Channels Entered: Heart, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

Activates Qi and Blood Circulation to Relieve Pain

Pain in the chest, abdomen and limbs: In traditional Chinese medicine, pain is a manifestation of qi stagnation, blood stagnation, or both. It is often said that where there is pain, there is stagnation; where there is stagnation, there is pain. *Yan Hu Suo* (Rhizoma Corydalis) is one of the most commonly used and the most effective herbs to relieve pain because it has an excellent ability to activate qi in the *qi* (energy) level and invigorate blood circulation in the *xue* (blood) level. It is used to treat pain from a variety of causes in all parts of the body.

Chest pain:

- Severe epigastric and chest pain: use *Yan Hu Suo* individually.
- Angina, coronary artery disease, chest pain: combine it with *Dan Shen* (Radix Salviae Miltiorrhizae), *Hong Hua* (Flos Carthami), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Chest and hypochondriac pain: add this herb to *Gua Lou Shi* (Fructus Trichosanthis), *Xie Bai* (Bulbus Allii Macrostemonis), and *Yu Jin* (Radix Curcumae).
- Arrhythmia: use it with *Shan Zha* (Fructus Crataegi), *Yu Zhu* (Rhizoma Polygonati Odorati), and *Dan Shen* (Radix Salviae Miltiorrhizae).

Epigastric and abdominal pain:

- Epigastric and abdominal pain caused by qi and blood stagnation: add *Yan Hu Suo* to *Chuan Lian Zi* (Fructus Toosendan).
- Abdominal pain caused by cold and blood stagnation: combine it with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Pao Jiang* (Rhizoma Zingiberis Preparatum), *Xiang Fu* (Rhizoma Cyperi), and *Sha Ren* (Fructus Amomi).
- Abdominal fullness and pain from qi stagnation: use it with *Mu Xiang* (Radix Aucklandiae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Sha Ren* (Fructus Amomi) and *Yu Jin* (Radix Curcumae).
- Hernial pain: add it to *Xiao Hui Xiang* (Fructus Foeniculi) and *Wu Yao* (Radix Linderae).

Gynecological pain:

- Amenorrhea or menstrual pain caused by qi and blood stagnation: use *Yan Hu Suo* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Bai Shao* (Radix Paeoniae Alba), and *Xiang Fu* (Rhizoma Cyperi).
- Amenorrhea and menstrual pain because of cold and blood stagnation: combine this herb with *Gan Jiang* (Rhizoma Zingiberis), *Rou Gui* (Cortex Cinnamomi), *Dang Gui* (Radicis Angelicae Sinensis), *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), *Pu Huang* (Pollen Typhae) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).

Pain in the extremities:

- Pain of the upper extremities: use *Yan Hu Suo* with *Dang Gui* (Radicis Angelicae Sinensis), *Gui Zhi* (Ramulus Cinnamomi), and *Chi Shao* (Radix Paeoniae Rubrae).
- Pain in the lower extremities: combine this herb with *Sang Ji Sheng* (Herba Taxilli), *Chuan Niu Xi* (Radix Cyathulae), *Xu Duan* (Radix Dipsaci) and *Du Huo* (Radix Angelicae Pubescentis).
- Traumatic injuries and pain: use it with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha).

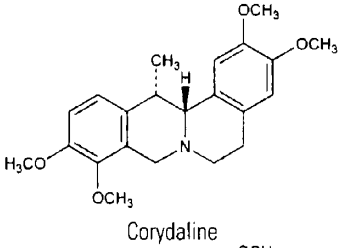
Yan Hu Suo (Rhizoma Corydalis)

Masses:

Prolonged stagnation of qi and blood in the abdomen can result in palpable masses, which may be fixed and varied in size depending on the severity of the condition. The masses may be present one day but not another, and more palpable and painful when there is a flare-up of disease. *Yan Hu Suo* enters the *xue* (blood) level to invigorate circulation, dispel stagnation and reduce masses.

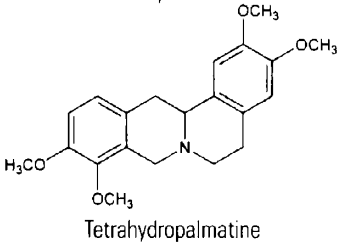
- Palpable masses in the abdomen: combine *Yan Hu Suo* with *Dang Gui* (Radicis Angelicae Sinensis), *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae), *Chuan Niu Xi* (Radix Cyathulae), *Ze Lan* (Herba Lycopi), *Chuan Shan Jia* (Squama Manis), *E Zhu* (Rhizoma Curcumae), *San Leng* (Rhizoma Sparganii), *Da Huang* (Radix et Rhizoma Rhei), *Wu Yao* (Radix Linderae) and *Qing Pi* (Pericarpium Citri Reticulatae Viride).

DOSAGE



Use 3 to 10 grams in decoction, with maximum dosage of 20 grams. Use 1 to 1.5 grams of *Yan Hu Suo* powder, served with warm water. Frying this herb with grain-based liquor enhances its blood-activating function. Frying it with vinegar enhances the analgesic function.

CAUTIONS / CONTRAINDICATIONS



- *Yan Hu Suo* is contraindicated in pregnant women, because of its strong function to move qi and blood.
- *Yan Hu Suo* should be used with caution in patients who have pain with an underlying deficiency, as the herb may consume qi and blood.

CHEMICAL COMPOSITION

D-corydaline, dl-tetrahydropalmatine, corydalis L, protopine, l-tetrahydrocoptisine, l-tetrahydrocolumbamine, corydalis H, corydalis I, corybulbine, B-homochelidonine, coptisine, dehydrocorydaline, corydalmine, dehydrocorydalmine, and columbamine.[1,2,3,4]

Corydaline

Tetrahydropalmatine

PHARMACOLOGICAL EFFECTS

- **Analgesic:** *Yan Hu Suo* has demonstrated a strong analgesic effect, with dl-tetrahydropalmatine and corydalis I as the strongest components. When compared to morphine, *Yan Hu Suo* has shown a slower onset and weaker analgesic effect when given by injection. Evaluation of analgesic effect based on weight showed *Yan Hu Suo* to be approximately 100:1 in effect by comparison to morphine. *Yan Hu Suo*, however, has not been associated with any signs or symptoms related to dependence. In addition, development of tolerance occurs approximately 100% faster with morphine than with *Yan Hu Suo*.[5]
- **Analgesic:** It was demonstrated in a research study that, combined with *Yan Hu Suo*, the analgesic effect of electroacupuncture increased significantly, when compared to a control group that received electro-acupuncture only.[6]
- **Sedative and tranquilizing:** *Yan Hu Suo* has demonstrated sedative and tranquilizing effects in rabbits, mice, dogs and monkeys.[7]
- **Effects on the central nervous system:** Tetrahydropalmatine has demonstrated marked analgesic, sedative, tranquilizing and hypnotic actions on the central nervous system.[8]
- **Anti-inflammatory:** Extract of *Yan Hu Suo* has demonstrated marked anti-inflammatory effect by inhibiting histamine release and formation of edema in arthritic rats. The extract was found to be effective in both acute and chronic phases of inflammation.[9]
- **Antiulcer:** *Yan Hu Suo* suppresses the secretion of gastric acid when given at the dosage of 80 mg/kg in rabbits and mice.[10]
- **Cardiovascular:** *Yan Hu Suo* has been shown to decrease resistance of blood flow and increase blood perfusion to coronary arteries in cats. It decreases oxygen consumption of the cardiac muscle and increases contractility of the heart.[11]
- **Adrenocortical:** *Yan Hu Suo* has been shown to increase hormone secretion from adrenal glands when given via injection to mice at a dosage of 70 mg/kg.[12]
- **Muscle relaxant:** *Yan Hu Suo* has demonstrated a muscle-relaxant effect in rabbits and mice.[13]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disorder:** In one clinical trial, *Yan Hu Suo* extract was used for treatment of coronary artery disorder in 575 patients (424 diagnosed with angina and 148 with myocardial infarction). For 424 patients with angina, improvement was reported in both symptomatic evaluation and EKG monitoring. For symptomatic evaluation, the study stated that there was significant symptomatic improvement in 44.4% and moderate improvement in 38.8% of the patients. For EKG monitoring,

Yan Hu Suo (Rhizoma Corydalis)

there was significant improvement in 26.8% and moderate improvement in 26.1% of the patients. For 148 patients with myocardial infarction, the fatality rate was 14.1% for patients treated with *Yan Hu Suo*, and 32.3% for patients who did not receive any treatment.[14]

- **Local anesthetic:** Local injection of a *Yan Hu Suo* preparation demonstrated satisfactory anesthetic effects in 98 out of 105 patients (93.4%) who underwent surgery. Only 6 patients (5.7%) experienced mild pain.[15]
- **Arrhythmia:** In one report, 48 patients with arrhythmia and 27 patients with pre-ventricular arrhythmia were treated with 5 to 10 grams of *Yan Hu Suo* three times daily, with good results.[16]

TOXICOLOGY

The LD_{50} for oral administration of *Yan Hu Suo* in mice is 100 +/- 4.53 g/kg. Side effects included lowered blood pressure, decreased heart rate, mild respiratory depression, sedation, and tremor.[17]

AUTHORS' COMMENTS

According to Dr. Ding Guang-Di, *Yan Hu Suo* and *Chuan Lian Zi* (Fructus Toosendan) are better for left-sided hypochondriac pain. *Xuan Fu Hua* (Flos Inulae) and *Xiang Fu* (Rhizoma Cyperi) are more effective to address right-sided hypochondriac pain.

According to Dr. Chen Ke-Fen, *Yan Hu Suo* and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) are an effective pair to relieve angina and *xiong bi* (painful obstruction of the chest).

Yan Hu Suo, Ru Xiang (Gummi Olibanum), *Mo Yao* (Myrrha) and *Fen Fang Ji* (Radix Stephaniae Tetandrae) all have marked pain-relief action.

- *Yan Hu Suo* has the strongest analgesic effect, and is used for all kinds of pain in the chest, abdomen and limbs caused by qi and blood stagnation.
- *Ru Xiang* and *Mo Yao* are commonly used together to treat pain related to traumatic injuries and external injuries.
- *Fen Fang Ji* is most effective for *bi zheng* (painful obstruction syndrome) in the extremities.

Yu Jin (Radix Curcumae)

鬱金　郁金

Pinyin Name: *Yu Jin*
Literal Name: "constrained metal"
Alternate Chinese Names: *Chuan Yu Jin, Guang Yu Jin*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: curcuma, aromatic turmeric tuber, aromatic kwangsi turmeric tuber, zedoary turmeric tuber
Botanical Name: *Curcuma aromatica* Salisb. (*Yu Jin*); *Curcuma kwangsiensis* S. Lee et C. F. Liang. (*Guang Xi E Zhu*); *Curcuma longa* L. (*Jiang Huang*); *Curcuma zedoaria* (Berg.) Rosc. (*E Zhu*)
Pharmaceutical Name: Radix Curcumae
Properties: acrid, bitter, cold
Channels Entered: Heart, Liver, Gallbladder

CHINESE THERAPEUTIC ACTIONS

1. Activates Qi and Blood Circulation, Relieves Pain

Hypochondriac pain, irregular menstruation, masses caused by blood stagnation: *Yu Jin* (Radix Curcumae) is most effective for treating pain due to qi and blood stagnation. It resolves Liver qi stagnation and regulates qi in the *xue* (blood) level. Hypochondriac pain is the chief manifestation of Liver qi stagnation. The Liver stores blood, therefore, irregular menstruation denotes stagnation in the Liver and irregularity of the *ren* (conception) and *chong* (thoroughfare) channels. Accompanying symptoms may include bloating and dysmenorrhea during menstruation. Masses due to blood stagnation can appear anywhere in the abdomen. *Yu Jin* is best for masses in the hypochondriac region. It treats disorders such as liver cirrhosis, or enlargement of the liver or spleen.

- Hypochondriac pain due to Liver qi stagnation: use *Yu Jin* with *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi), *Bai Shao* (Radix Paeoniae Alba), and *Dan Shen* (Radix Salviae Miltiorrhizae).
- Irregular menstruation with pain and cramps caused by stagnation of qi and blood and disharmony of *chong* (thoroughfare) and *ren* (conception) channels: use this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba) and *Xiang Fu* (Rhizoma Cyperi).
- Pain due to masses in the hypochondriac area: combine it with *Bie Jia* (Carapax Trionycis), *Dan Shen* (Radix Salviae Miltiorrhizae) and *Ze Lan* (Herba Lycopi).

2. Clears Heat and Cools Blood

Bleeding: *Yu Jin* treats various bleeding disorders caused by heat in the blood. Clinical applications include hematemesis, epistaxis, hematuria, and epistaxis during menstruation.

- Bleeding due to heat in the blood: combine *Yu Jin* with *Sheng Di Huang* (Radix Rehmanniae), *Mu Dan Pi* (Cortex Moutan), *Zhi Zi* (Fructus Gardeniae) and *Niu Xi* (Radix Cyathulae seu Achyranthis).

3. Clears the Heart, Opens Orifices and Promotes Consciousness

Disorientation, epilepsy, mania and other disorders with disturbed *shen* (spirit): *Yu Jin* strongly clears heat from the Heart and mildly promotes consciousness. It is commonly used to treat cases of heat, dampness and phlegm covering the Heart leading to anxiety, irritability, disorientation, seizures, convulsions, and in severe cases, epilepsy, mania, and semi-consciousness or unconsciousness.

- Psychological disorders with feelings of oppression in the chest due to accumulation of dampness: use *Yu Jin* with *Shi Chang Pu* (Rhizoma Acori), *Zhu Li* (Succus Bambusae), *Huang Lian* (Rhizoma Coptidis), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Niu Huang* (Calculus Bovis) and *Zhi Zi* (Fructus Gardeniae).
- Mania and delirium due to phlegm covering the Heart: use this herb with *Ming Fan* (Alumen).
- Schizophrenia and other psychological disorders with insomnia and alternating spells of laughter and anger: use *Yu Jin* with *Xiang Fu* (Rhizoma Cyperi), *Bai Shao* (Radix Paeoniae Alba), *Dai Zhe Shi* (Haematitum), *Zhen Zhu Mu* (Concha Margaritaferae), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Dan Nan Xing* (Arisaema cum Bile), *Yuan Zhi* (Radix Polygalae), *Shi Chang Pu* (Rhizoma Acori), *Ban Xia* (Rhizoma Pinelliae), *Fu Ling* (Poria), *Huang Lian* (Rhizoma Coptidis), *Sheng Tie Luo* (Frusta Ferri) and *Da Huang* (Radix et Rhizoma Rhei).

Yu Jin (Radix Curcumae)

4. Treats Jaundice

Yu Jin clears damp-heat from the Gallbladder to treat jaundice.

- Damp-heat jaundice: combine *Yu Jin* with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae), and *Zhi Ke* (Fructus Aurantii).
- Gallstones: use it with *Hai Jin Sha* (Herba Lygodii), *Yin Chen Hao* (Herba Artemisiae Scopariae), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

DOSAGE

6 to 12 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Yu Jin* counteracts *Ding Xiang* (Flos Caryophylli).
- *Yu Jin* should be used with caution during pregnancy.
- *Yu Jin* is contraindicated in patients without qi and blood stagnation, or those with underlying yin deficiency and bleeding.

CHEMICAL COMPOSITION

Essential oils, d-camphene, d-camphor, l-α-curcumene, l-β-curcumene, curcumin, demethoxycurcumin, bis-demethoxycurcumin, turmerone, starch, lipids, carvone.[1]

PHARMACOLOGICAL EFFECTS

- **Hepatoprotective:** Compared with a placebo group, administration of *Yu Jin* was associated with a 10% greater reduction of SGOT and SGPT in mice and rats with carbon tetrachloride-induced liver damage. In addition, essential oil of *Yu Jin* has shown promising effects in treatment of viral hepatitis, by altering the immune system.[2]
- **Antihyperlipidemic:** Administration of a *Yu Jin* preparation in animals once daily for 40 days has demonstrated a marked reduction in both plasma and liver content of cholesterol and triglycerides.[3]
- **Gastrointestinal:** According to an animal study, oral administration of *Yu Jin* decoction increases the secretion of gastric acid, lowers the pH in the stomach and duodenum, and promotes the production and excretion of bile.[4]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease:** Administration of an herbal formula containing *Yu Jin*, *San Qi* (Radix Notoginseng) and *Chi Shao* (Radix Paeoniae Rubrae) demonstrated marked antiplatelet effect in 40 patients with coronary artery disease.[5]
- **Gastric bleeding:** Twenty patients with bleeding ulcers were treated with an herbal decoction with marked effectiveness, especially in patients who were otherwise healthy. The chief complaints among the patients before treatment were hematemesis and hematochezia. The herbal formula contained *Yu Jin*, *San Qi* (Radix Notoginseng), *Da Huang* (Radix et Rhizoma Rhei), *Niu Xi* (Radix Cyathulae seu Achyranthis), and other herbs depending on the individual condition of the patient.[6] [*Da Huang* should be cooked to minimize gastrointestinal irritation and prevent diarrhea.]
- **Pre-ventricular contraction (PVC):** Patients with PVCs were treated with *Yu Jin* powder daily for 3 months, with approximately 75% effectiveness. Patients began taking 5 to 10 grams of *Yu Jin* powder three times daily for 3 days, with the dosage increased to 10 to 15 grams three times daily if no side effects were reported. Out of 52 patients, 14 had complete recovery, 11 showed significant improvement, 9 showed moderate improvement, and 18 showed no response. None of these patients received drug treatment during the entire 3 month period.[7]

HERB-DRUG INTERACTION

Anticoagulant or antiplatelet drugs: *Yu Jin* has antiplatelet effects, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[8] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

In an acute toxicology study in rats, oral administration of *Yu Jin* did not demonstrate any significant changes in body weight, blood exam, or functioning of the internal organs.[9]

Jiang Huang (Rhizoma Curcumae Longae)

薑黃 姜黃

Pinyin Name: *Jiang Huang*
Literal Name: "ginger yellow"
Alternate Chinese Names: *Pian Zi Jiang Huang*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: turmeric
Botanical Name: *Curcuma longa* L. (*Jiang Huang*)
Pharmaceutical Name: Rhizoma Curcumae Longae
Properties: acrid, bitter, warm
Channels Entered: Spleen, Liver

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Eliminates Blood Stasis

Pain due to blood stasis: *Jiang Huang* (Rhizoma Curcumae Longae) is commonly said to "break" blood stasis to activate qi and blood circulation. It has been described to invigorate circulation and eliminate stasis for qi and blood in both *qi* (energy) and *xue* (blood) levels.

- Hypochondriac pain due to Liver qi stagnation, amenorrhea or abdominal pain due to blood stagnation in the Liver channel: use *Jiang Huang* with *Bai Shao* (Radix Paeoniae Alba), *Dang Gui* (Radicis Angelicae Sinensis), *Yan Hu Suo* (Rhizoma Corydalis) and *Hong Hua* (Flos Carthami).
- Chest and hypochondriac pain: combine this herb with *Zhi Ke* (Fructus Aurantii), *Su Geng* (Caulis Perillae), *Jie Geng* (Radix Platycodonis), *Chuan Lian Zi* (Fructus Toosendan), *Xiang Fu* (Rhizoma Cyperi) and *Yan Hu Suo* (Rhizoma Corydalis).
- Epigastric pain: use it with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Xiang Fu* (Rhizoma Cyperi), *Sha Ren* (Fructus Amomi), *Mu Xiang* (Radix Aucklandiae), *Gan Jiang* (Rhizoma Zingiberis), *Wu Yao* (Radix Linderae) and *Yan Hu Suo* (Rhizoma Corydalis).
- Dysmenorrhea: add *Jiang Huang* to *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), *Xiang Fu* (Rhizoma Cyperi), and *Bai Shao* (Radix Paeoniae Alba).
- Hepatitis with hypochondriac pain: use it with *Zhi Ke* (Fructus Aurantii), *Bai Ji Li* (Fructus Tribuli) and *Chuan Lian Zi* (Fructus Toosendan).

2. Opens Channels and Collaterals to Relieve Pain

***Bi zheng* (painful obstruction syndrome):** *Jiang Huang* is commonly used to treat *bi zheng* caused by wind, cold or dampness. It is better for the upper limbs.

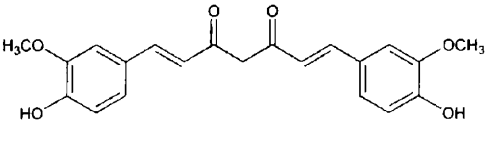
- *Bi zheng*: use this herb with *Hai Tong Pi* (Cortex Erythrinae), *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Dang Gui* (Radicis Angelicae Sinensis).

3. Reduces Swelling

In addition to activating qi and blood circulation, *Jiang Huang* treats swelling and pain from sores and lesions caused by toxic heat accumulation with blood and qi stagnation.

- Sores and lesions: combine *Jiang Huang* with *Da Huang* (Radix et Rhizoma Rhei), *Bai Zhi* (Radix Angelicae Dahuricae) and *Tian Hua Fen* (Radix Trichosanthis).

DOSAGE



3 to 10 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use *Jiang Huang* with caution in deficiency patients, or those who have no symptoms of blood stagnation.
- *Jiang Huang* is contraindicated during pregnancy.

CHEMICAL COMPOSITION

Curcumin, demethoxycurcumin, bisdemethoxycurcumin, curcuminoids, turmerone, zingiberene, phellandrene, cineole, sabinene, borneo, arturmerone, caryophyllene.[1,2]

Curcumin

Jiang Huang (Rhizoma Curcumae Longae)

PHARMACOLOGICAL EFFECTS

- **Antihyperlipidemic:** Administration of *Jiang Huang* lowers both cholesterol and triglyceride levels in rats and rabbits.[3]
- **Anti-inflammatory:** Administration of 30 mg/kg of curcumin or 60 mg/kg of *Jiang Huang* decoction has a marked anti-inflammatory effect in rats. It effect is similar to phenylbutazone.[4]
- **Antiplatelet:** Administration of curcumin at various doses (20, 40, 60, and 80 mg/kg/day) has shown marked action to inhibit aggregation of platelets. The maximum antiplatelet effect was reached at 40 mg/kg/day, with no significant increase in potency linked to the higher doses. Its effect to inhibit platelet aggregation is mediated by preferential inhibition of PAF- and AA-induced aggregation. In addition, it also inhibited the formation of thromboxane A2 (TXA2) by platelets (IC50; 70 microM). It is suggested that the curcumin-mediated preferential inhibition of PAF- and AA-induced platelet aggregation involves inhibitory action on TXA2 synthesis and Ca2+ signaling, but without the involvement of PKC.[5,6]
- **Cholagogic:** Many components of *Jiang Huang*, including, but not limited to, curcumin and the essential oils, have demonstrated marked effectiveness to increase the production and excretion of bile.[7]
- **Uterine stimulant:** Administration of *Jiang Huang* decoction via intraperitoneal or subcutaneous routes at the dosage of 10 g/kg terminated pregnancy in 90 to 100% of mice between 6 and 18 days of pregnancy. The dosage of 5 g/kg did not terminate pregnancy. The proposed mechanism of action is stimulation and contraction of the uterus.[8]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Jiang Huang* has antiplatelet effects, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[9] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

Consumption of *Jiang Huang* is relatively safe. There are very few reports of adverse reactions. Administration of 40 to 100 grams of herb daily for 3 days did not lead to any fatalities in mice. Furthermore, administration of *Jiang Huang* to rats at dosages up to 50 times the normal dosage range for humans for 30 days did not demonstrate any significant change in body weight, dietary habits, physical activities, or functioning of internal organs.[10]

Lu Lu Tong (Fructus Liquidambaris)

路路通

Pinyin Name: *Lu Lu Tong*
Literal Name: "all roads open"
English Name: liquidambar, beautiful sweetgum fruit
Botanical Name: *Liquidambar taiwaniana* Hance.
Pharmaceutical Name: Fructus Liquidambaris
Properties: bitter, neutral
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Activates Qi and Blood Circulation, Opens Channels

Lu Lu Tong (Fructus Liquidambaris) treats various kinds of pain characterized by stagnation of qi and blood in the peripheral channels and collaterals. It is especially effective for pain in the lower back and extremities.

- Joint pain: combine *Lu Lu Tong* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis) and *Ji Xue Teng* (Caulis Spatholobi).
- External or traumatic injuries: use this herb with *Chi Shao* (Radix Paeoniae Rubrae) and *Dan Shen* (Radix Salviae Miltiorrhizae).

2. Promotes Urination

Lu Lu Tong treats dysuria and edema by draining water downwards.

- Edema: add it to *Fu Ling Pi* (Cortex Poria) and *Sang Bai Pi* (Cortex Mori).
- Angioneurotic edema: combine it with *Wu Pi Yin* (Five-Peel Decoction).

3. Treats Allergy

Lu Lu Tong treats both skin and nasal allergies, such as itching, urticaria, and allergic rhinitis.

- Itching and urticaria: use this herb with *Fang Feng* (Radix Saposhnikoviae) and *Chan Tui* (Periostracum Cicadae).
- Allergic rhinitis: combine *Lu Lu Tong* with *Cang Er Zi* (Fructus Xanthii), *Bai Zhi* (Radix Angelicae Dahuricae), and *Xin Yi Hua* (Flos Magnoliae).

DOSAGE

3 to 9 grams in herbal decoction.

CAUTIONS / CONTRAINDICATIONS

Lu Lu Tong is contraindicated during pregnancy and in cases of hypermenorrhea.

CHEMICAL COMPOSITION

Bornyl cinnamate, styracin epoxide, isostyracin epoxide, betulonic acid, liquidambaronic acid, caryophyllene oxide, styracin, cinnamyl cinnamate, liquidambaric acid.[1]

PHARMACOLOGICAL EFFECTS

- **Hepatoprotective:** Betulonic acid and liquidambaronic acid have demonstrated marked hepatoprotective effects in rats, especially against carbon tetrachloride-induced liver toxicity.[2]
- **Others:** *Lu Lu Tong* has been observed to have anti-inflammatory, diuretic, and antibiotic effects.

AUTHORS' COMMENTS

According to Dr. Gan Zhu-Wang, *Lu Lu Tong* and *Shi Chang Pu* (Rhizoma Acori) treat nasal obstruction with loss of smell.

According to Dr. Wang Zi-Yu, *Lu Lu Tong* opens fallopian tube blockage caused by dampness, chronic or acute pelvic inflammatory disease, endometriosis or post-surgical adhesions.

References

Ru Xiang (Gummi Olibanum)

乳香

Pinyin Name: *Ru Xiang*
Literal Name: "fragrant breast," "fragrant milk"
Alternate Chinese Names: *Xun Lu Xiang, Ta Xiang, Tian Ze Xiang, Di Ru Xiang*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: mastic, frankincense, olibanum
Botanical Name: *Boswellia carterii* Birdw. (*Ru Xiang Shu*)
Pharmaceutical Name: Gummi Olibanum
Properties: acrid, bitter, warm
Channels Entered: Heart, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation and Relieves Pain

Pain: *Ru Xiang* (Gummi Olibanum) has an excellent effect to relieve aches and pain caused by stagnation of qi and blood circulation. Clinical manifestations may include dysmenorrhea, amenorrhea, epigastric pain, *bi zheng* (painful obstruction syndrome), and traumatic injuries.

- Amenorrhea and dysmenorrhea: combine *Ru Xiang* with *Dang Gui* (Radicis Angelicae Sinensis), *Hong Hua* (Flos Carthami) and *Tao Ren* (Semen Persicae).
- Stomach and epigastric pain from qi and blood stagnation: use this herb with *Chuan Lian Zi* (Fructus Toosendan), *Xiang Fu* (Rhizoma Cyperi) and *Mu Xiang* (Radix Aucklandiae).
- Chest and abdominal pain: use it with *Yan Hu Suo* (Rhizoma Corydalis).
- *Bi zheng* (painful obstruction syndrome) due to wind and dampness: combine it with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Qin Jiao* (Radix Gentianae Macrophyllae), *Dang Gui* (Radicis Angelicae Sinensis) and *Hai Feng Teng* (Caulis Piperis Kadsurae). **Exemplar Formula:** *Juan Bi Tang* (Remove Painful Obstruction Decoction).
- Traumatic injuries with severe pain and bruising: use it with *Mo Yao* (Myrrha), *Hong Hua* (Flos Carthami), *She Xiang* (Moschus), *Bing Pian* (Borneolum Syntheticum), *Xue Jie* (Sanguis Draconis) and *Tao Ren* (Semen Persicae). **Exemplar Formula:** *Qi Li San* (Seven-Thousandths of a Tael Powder).

2. Reduces Swelling and Promotes Generation of Flesh

Skin lesions and ulcerations: *Ru Xiang* has an excellent ability to reduce swelling, relieve pain, promote generation of flesh, and enhance healing of skin lesions and ulcerations. Heat-clearing and blood-cooling herbs are usually added to reduce inflammation.

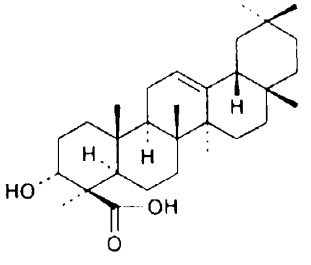
- Initial stages of abscess or sores with redness, swelling and pain: use *Ru Xiang* with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Chi Shao* (Radix Paeoniae Rubrae), *Hong Hua* (Flos Carthami), *Tian Hua Fen* (Radix Trichosanthis), *Zao Jiao Ci* (Spina Gleditsiae), *Chuan Shan Jia* (Squama Manis), *Bai Zhi* (Radix Angelicae Dahuricae) and *Fang Feng* (Radix Saposhnikoviae).
- If the sore has ulcerated, use the herbs listed above but remove *Zao Jiao Ci* (Spina Gleditsiae) and *Chuan Shan Jia* (Squama Manis).
- If pus has been completely cleared, apply the powders of *Ru Xiang, Mo Yao* (Myrrha), *Bing Pian* (Borneolum Syntheticum), *Long Gu* (Os Draconis), *Xue Jie* (Sanguis Draconis) and *Er Cha* (Catechu) topically.
- Sores that are flat without redness or pain: add this herb to *Dang Gui* (Radicis Angelicae Sinensis), *Huang Qi* (Radix Astragali), *Lian Qiao* (Fructus Forsythiae), *Mu Xiang* (Radix Aucklandiae), *Mo Yao* (Myrrha), *Gui Xin* (Cortex Rasus Cinnamomi), *Jie Geng* (Radix Platycodonis), *Dang Shen* (Radix Codonopsis) and *Gan Cao* (Radix Glycyrrhizae).
- Skin lesions and ulcerations: apply *Ru Xiang* and *Mo Yao* (Myrrha) as powder topically.

Intestinal abscess: *Ru Xiang* treats intestinal abscess that results from the accumulation of blood stagnation with heat and toxicity.

- Intestinal abscess: use *Ru Xiang* with *Zi Hua Di Ding* (Herba Violae), *Hong Teng* (Caulis Sargentodoxae), *Lian Qiao* (Fructus Forsythiae), *Yi Yi Ren* (Semen Coicis) and *Mu Dan Pi* (Cortex Moutan).

Ru Xiang (Gummi Olibanum)

DOSAGE



3 to 10 grams in decoction. Unprocessed *Ru Xiang* has a pungent smell, and is often irritating to the stomach. Dry-frying or frying it with vinegar minimizes both the odor and side effects such as nausea and vomiting. In addition, both methods of preparation facilitate the crushing and extraction of active components. Lastly, frying *Ru Xiang* with vinegar will enhance its potency to activate blood circulation, relieve pain, and promote generation of flesh.

CAUTIONS / CONTRAINDICATIONS

- Patients with a sensitive stomach should take *Ru Xiang* with caution as the bitter taste may cause nausea and vomiting.
- *Ru Xiang* is contraindicated during pregnancy, and for individuals who do not have blood stagnation.

CHEMICAL COMPOSITION

α-boswellic acid, β-boswellic acid, olibanoresene, arabic acid, bassorin, pinene, dipentene, α-phellandrene, β-phellandrene.[1,2]

α-Boswellic Acid

PHARMACOLOGICAL EFFECTS

- **Analgesic:** *Ru Xiang* has demonstrated a marked analgesic effect in humans and in laboratory animals.[3]

CLINICAL STUDIES AND RESEARCH

- **Hypochondriac pain in hepatitis patients:** According to one report, 32 patients with hypochondriac pain were treated topically with herbs with marked success. The treatment protocol was to soak a towel in the herbal decoction, place the towel on the affected area and cover with paraffin on top of the towel to keep the temperature between 15° and 55° C. The body should also be covered with a blanket, and the herbs kept in place for half an hour. Out of 32 patients, 21 showed marked improvement, 6 showed moderate improvement, 3 showed slight improvement, and 2 showed no response. The herbs used in the herbal formulation included *Ru Xiang*, *Mo Yao* (Myrrha), *Bie Jia* (Carapax Trionycis) and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).[4]
- **Pain:** The combination of *Ru Xiang* and *Mo Yao* (Myrrha) has demonstrated analgesic action in treating chest pain, and colicky or sharp pain.[5]
- **External injury:** Topical application of *Ru Xiang* and *Mo Yao* (Myrrha) one to two times daily for 3 to 5 days showed satisfactory results in patients suffering from acute sprain of the lower back and legs.[6]

AUTHORS' COMMENTS

Ru Xiang and *Mo Yao* (Myrrha) have very similar functions and are commonly used together to enhance their effects. *Ru Xiang* is stronger in activating blood circulation and relaxing the tendons. It is more commonly used to treat musculoskeletal aches and pains, and *bi zheng* (painful obstruction syndrome) caused by wind and dampness. On the other hand, *Mo Yao* is stronger in dispersing blood and eliminating blood stasis. It is more commonly used to treat epigastric pain with qi stagnation and blood stasis.

Mo Yao (Myrrha)

没藥 没药

Pinyin Name: *Mo Yao*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: myrrh
Botanical Name: *Commiphora myrrha* Engl. (*Mo Yao Shu*); *Balsamodendron ehrenbergianum* Berg. (*Mo Yao Shu*)
Pharmaceutical Name: Myrrha
Properties: bitter, neutral
Channels Entered: Heart, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation and Relieves Pain

Pain: *Mo Yao* (Myrrha) activates blood circulation and relieves pain. Clinically, it is commonly combined with *Ru Xiang* (Gummi Olibanum) to treat a wide variety of aches and pains, such as amenorrhea, menstrual pain and cramps, stomach and epigastric pain, musculoskeletal pain from wind and dampness, traumatic injuries with pain and bruising, and intestinal abscesses.

- Traumatic injuries with bruising: use *Mo Yao* with *Ru Xiang* (Gummi Olibanum), *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Niu Xi* (Radix Cyathulae seu Achyranthis), and *Hong Hua* (Flos Carthami).
- Abdominal masses with pain and dysmenorrhea: combine this herb with *Ru Xiang* (Gummi Olibanum), *Dang Gui* (Radicis Angelicae Sinensis), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Yan Hu Suo* (Rhizoma Corydalis), *Shui Zhi* (Hirudo), *Meng Chong* (Tabanus) and *Da Huang* (Radix et Rhizoma Rhei).
- Postpartum abdominal pain with spotting: add *Mo Yao* to *Dang Gui* (Radicis Angelicae Sinensis), *Hong Hua* (Flos Carthami), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Yan Hu Suo* (Rhizoma Corydalis), *Pao Jiang* (Rhizoma Zingiberis Preparatum) and *Yi Mu Cao* (Herba Leonuri).
- *Bi zheng* (painful obstruction syndrome): use it with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), *Fang Feng* (Radix Saposhnikoviae), *Sang Ji Sheng* (Herba Taxilli), *Wei Ling Xian* (Radix Clematidis), *Xi Xin* (Herba Asari), *Chi Shao* (Radix Paeoniae Rubrae) and *Hong Hua* (Flos Carthami).

2. Reduces Swelling and Promotes Generation of Flesh

When used externally, *Mo Yao* has excellent functions to reduce swelling, relieve pain, promote generation of flesh, and enhance healing of skin lesions and ulcerations. It is also used for chronic sores and ulcerations that do not heal.

- Skin lesions and ulcerations: use *Mo Yao* and *Ru Xiang* (Gummi Olibanum) as herbal powder topically.
- Redness and swelling of sores: combine it with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Chi Shao* (Radix Paeoniae Rubrae), *Hong Hua* (Flos Carthami), *Fang Feng* (Radix Saposhnikoviae), *Bai Zhi* (Radix Angelicae Dahuricae), *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), *Chuan Shan Jia* (Squama Manis) and *Zao Jiao Ci* (Spina Gleditsiae).

DOSAGE

3 to 10 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Mo Yao* should be used with caution in patients who have sensitive stomachs because the bitter taste may induce nausea and vomiting.
- The dosage of *Mo Yao* should be lowered if it is combined with *Ru Xiang* (Gummi Olibanum).
- Use of *Mo Yao* is contraindicated in pregnant women.

CHEMICAL COMPOSITION

Heerabomyrrholic acid, commiphoric acid, commiphorinic acid, heerabomyrrhol, heeraborescene, commiferin, ergenol, m-cresol, cumin aldehyde, pinene, dipentene, limonene, cinnamic aldehyde, heerabolene.[1]

Mo Yao (Myrrha)

PHARMACOLOGICAL EFFECTS

- **Antihyperlipidemic:** *Mo Yao* has demonstrated a marked effect in reducing blood cholesterol in humans and rabbits.[2]

CLINICAL STUDIES AND RESEARCH

- **Hyperlipidemia:** Concentrated extract of *Mo Yao*, given in two to three 0.1 mg capsules three times daily for 2 months, resulted in reduction of cholesterol at a 65.7% rate of effectiveness. [3]
- **Pain:** The combination of *Mo Yao* and *Ru Xiang* (Gummi Olibanum) has demonstrated analgesic properties in treating chest pain, and colicky or sharp pain.[4]
- **External injury:** Topical application of *Mo Yao* and *Ru Xiang* (Gummi Olibanum) one to two times daily for 3 to 5 days showed satisfactory results in patients suffering from acute sprain of the lower back and legs. The topical herbal paste was made by mixing equal portions of *Mo Yao* and *Ru Xiang* with 30% rubbing alcohol.[5]

AUTHORS' COMMENTS

Mo Yao and *Ru Xiang* (Gummi Olibanum) have very similar functions and are commonly used together for their synergistic strength, especially in treating pain associated with blood stagnation. *Mo Yao*, stronger in dispersing blood stagnation and eliminating blood stasis, is more commonly used to treat epigastric pain from qi and blood stasis. *Ru Xiang*, stronger in activating blood circulation and relaxing the tendons, is more commonly used to treat musculoskeletal aches and pain, and *bi zheng* (painful obstruction syndrome) due to wind and dampness.

Hu Zhang (Rhizoma Polygoni Cuspidati)

虎杖 虎杖

Pinyin Name: *Hu Zhang*
Literal Name: "tiger's cane"
Alternate Chinese Names: *Ban Zhang*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: polygonum cuspidatum
Botanical Name: *Polygonum cuspidatum* Sieb. et. Zucc. (*Hu Zhang*)
Pharmaceutical Name: Rhizoma Polygoni Cuspidati
Properties: bitter, cold
Channels Entered: Liver, Gallbladder, Lung

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Stops Pain

Pain: *Hu Zhang* (Rhizoma Polygoni Cuspidati) has an excellent ability to relieve pain, such as menstrual pain, abdominal pain with amenorrhea, *bi zheng* (painful obstruction syndrome), and sports and traumatic injuries.

- Menstrual pain from blood stasis: combine *Hu Zhang* with *Yi Mu Cao* (Herba Leonuri) and *Dan Shen* (Radix Salviae Miltiorrhizae).
- *Bi zheng* (painful obstruction syndrome) due to wind and dampness: add it to *Ji Xue Teng* (Caulis Spatholobi).
- Sports and traumatic injuries: use this herb with *Ru*

Hu Zhang (Rhizoma Polygoni Cuspidati)

Xiang (Gummi Olibanum), *Mo Yao* (Myrrha), and *Hong Hua* (Flos Carthami).

2. Clears Damp-Heat

Damp-heat in the Liver: Clinical manifestations include jaundice, gallstones, and foul-smelling leukorrhea.

- Damp-heat jaundice: use *Hu Zhang* with *Yin Chen Hao* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae), and *Da Huang* (Radix et Rhizoma Rhei).
- Gallstones: use this herb with *Yu Jin* (Radix Curcumae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Hai Jin Sha* (Herba Lygodii), *Jin Qian Cao* (Herba Lysimachiae), *Chuan Lian Zi* (Fructus Toosendan), and *Yan Hu Suo* (Rhizoma Corydalis).
- Foul-smelling leukorrhea: combine it with *Yi Yi Ren* (Semen Coicis) and *Bi Xie* (Rhizoma Dioscoreae Hypoglaucae).

3. Clears Heat and Eliminates Toxins

Abscesses, swellings caused by heat toxins, snake bites: *Hu Zhang* treats both internal and external heat toxins, and can be used both internally and topically.

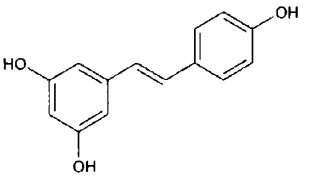
- Abscess of internal organs: use *Hu Zhang* with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), and *Pu Gong Ying* (Herba Taraxaci).
- Snake bites: apply herbal paste topically by combining *Hu Zhang* with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae) and *Pu Gong Ying* (Herba Taraxaci).
- Burns: mix fresh *Hu Zhang* with sesame oil and apply topically.

4. Dissolves Phlegm, Stops Cough

Hu Zhang treats coughing by eliminating phlegm and clearing heat.

- Cough with yellow phlegm: use *Hu Zhang* with *Pi Pa Ye* (Folium Eriobotryae), *Huang Qin* (Radix Scutellariae), and *Jin Yin Hua* (Flos Lonicerae).

DOSAGE



10 to 30 grams in decoction. *Hu Zhang* is used both internally and topically.

CAUTIONS / CONTRAINDICATIONS

- *Hu Zhang* is contraindicated in pregnancy.

CHEMICAL COMPOSITION

Resveratrol, emodin, physide, chrysophanol, physcion-8-D-glucoside, polydatin.[1,2]

Resveratrol

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Intravenous injection of *Hu Zhang* lowers the heart rate and blood pressure in rabbits. *Hu Zhang* also increases blood perfusion to the cardiac muscle, although this effect is negated by propranolol.[3,4]
- **Antibiotic:** *Hu Zhang* exhibits inhibitory action against *Staphylococcus aureus*, *Staphylococcus albus*, β-hemolytic streptococcus, *Neisseria catarrhalis*, *E. coli*, *Bacillus proteus*, some viruses, and leptospira.[5]
- **Respiratory:** According to one report, a 7.5% *Hu Zhang* decoction demonstrated marked antitussive and antiasthmatic effects in guinea pigs. The antiasthmatic effect is weaker than aminophyllin, and the decoction is ineffective in reversing bronchospasm induced by acetylcholine.[6]
- **Analgesic and anti-inflammatory:** Extract of *Hu Zhang* has been shown to have antipyretic, analgesic and anti-inflammatory effects.[7]
- **Antidiabetic:** Intravenous administration of *Hu Zhang* lowers blood glucose, and at large doses, may cause hypoglycemic shock. Oral administration has demonstrated promising effects in treatment of diabetes mellitus.[8]
- **Antihyperlipidemic:** Administration of resveratrol at the dosage of 200 mg/kg for 7 days lowered the plasma level of total cholesterol in rats. Herbal decoction of *Hu Zhang*, however, did not demonstrate significant changes. Lack of effectiveness of the herbal decoction is attributed to the low concentration of resveratrol present in *Hu Zhang*.[9]
- **Hemostatic:** Oral administration of *Hu Zhang* has marked effectiveness to stop upper gastrointestinal bleeding and external bleeding.[10]
- **Hepatoprotective:** Resveratrol has demonstrated a hepatoprotective effect by lowering the liver enzymes SGOT and SGPT.[11]
- **Antineoplastic:** Components of *Hu Zhang* have shown antineoplastic effects by inhibiting the synthesis of DNA and RNA.[12]

CLINICAL STUDIES AND RESEARCH

- **Bile duct infection:** In one study, 113 patients with infection of the bile duct were treated with an herbal formula

Hu Zhang (Rhizoma Polygoni Cuspidati)

with an 88.14% rate of effectiveness. The formula contained *Hu Zhang*, *Yin Chen Hao* (Herba Artemisiae Scopariae) and *Da Huang* (Radix et Rhizoma Rhei).[13]

- **Psoriasis:** According to one report, 25 patients with psoriasis refractory to aminopterin or other drug remedies were treated with an herbal formula containing *Hu Zhang*, *Jin Yin Hua* (Flos Lonicerae), *Dan Shen* (Radix Salviae Miltiorrhizae), and others. Out of 25 patients, 8 were treated successfully, 8 showed moderate improvement, and 9 showed slight improvement.[14]
- **Infectious icteric jaundice:** Administration of an herbal formula one time each day for 10 to 15 days in 115 patients with acute infectious icteric jaundice showed excellent results. Improvements included stabilization of liver function and the absence of adverse clinical signs or symptoms. The herbal formula included 30 grams of fresh *Hu Zhang*, 15 grams of fresh *Liu Ye* (Folium Salicis Babylonicae) and 60 grams of fresh *Di Jin Cao* (Herba Euphorbiae Humifusae).[15]
- **Chronic hepatitis:** In one study, 27 patients with chronic hepatitis were treated daily with an herbal decoction for 50 days. Most patients reported marked improvement, with increased appetite, increased energy levels, diminished pain in the hypochondriac region, relief of diarrhea and abdominal fullness, and increased body weight. The herbal decoction included 30 grams of *Hu Zhang* and 30 grams of *Da Zao* (Fructus Jujubae).[16]
- **Chronic hepatitis:** In another study, 32 patients with chronic hepatitis and positive HBsAg were treated daily with an herbal formula with 90.63% effectiveness, based on symptomatic evaluation. Most patients reported an improvement in energy levels and appetite, and a reduction in abdominal fullness and hypochondriac pain.[17]

HERB-DRUG INTERACTION

- **Antidiabetics:** It is prudent to use *Hu Zhang* with caution with insulin, sulfonylureas, and other antidiabetic medications as the combination may have a synergistic effect, leading to hypoglycemia.[18] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]

TOXICOLOGY

Oral administration in mice of a *Hu Zhang* preparation at the dosage of 9 g/kg was determined to be safe with no fatality reported. The LD_{50} of polygonin in mice is 1363.9 +/- 199.4 mg/kg, and of polydatin is 1,000 +/- 57.3 mg/kg, via intraperitoneal injection.[19]

Wu Ling Zhi (Excrementum Trogopteri seu Pteromi)

五靈脂 五灵脂

Pinyin Name: *Wu Ling Zhi*
Literal Name: "fat of the five spirits"
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: pteropus feces, trogopterus dung
Zoological Name: *Trogopterus xanthipes* Milne-Edwards; *Pteromys volans* L.
Pharmaceutical Name: Excrementum Trogopteri seu Pteromi
Properties: bitter, sweet, warm
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Relieves Pain

Wu Ling Zhi (Excrementum Trogopteri seu Pteromi) treats various internal disorders characterized by blood stasis and pain. It enters the *xue* (blood) level and eliminates blood stasis to relieve menstrual pain, amenorrhea and postpartum abdominal pain. It is also effective for chest and epigastric pain arising from blood stasis.

- Menstrual pain, amenorrhea and postpartum abdominal pain: combine *Wu Ling Zhi* with *Pu Huang* (Pollen Typhae) to dispel blood stasis and relieve pain. **Exemplar Formula:** *Shi Xiao San* (Sudden Smile Powder).
- Chest and epigastric pain due to blood stasis: add this herb to *Yan Hu Suo* (Rhizoma Corydalis), *Mo Yao* (Myrrha) and *Ru Xiang* (Gummi Olibanum).
- Chest and epigastric pain due to blood and qi stagnation: combine it with *Xiang Fu* (Rhizoma Cyperi) and *Yan Hu Suo* (Rhizoma Corydalis).
- Abdominal pain: use it with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Gui Zhi* (Ramulus Cinnamomi).
- Lower abdominal pain: use it with *Xiao Hui Xiang* (Fructus Foeniculi) and *Chuan Lian Zi* (Fructus Toosendan).
- Hypochondriac pain: combine it with *Chai Hu* (Radix Bupleuri), *Zhi Ke* (Fructus Aurantii), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Bai Ji Li* (Fructus Tribuli), *Jiang Huang* (Rhizoma Curcumae Longae), *Chi Shao* (Radix Paeoniae Rubrae) and *Xiang Fu* (Rhizoma Cyperi).

2. Dispels Blood Stasis, Stops Bleeding

Uterine bleeding: *Wu Ling Zhi* treats bleeding disorders characterized by the presence of blood stasis blocking the normal flow of blood and forcing it outwards. In patients with uterine bleeding of this kind, the blood will be dark purple with clots. Patients would also experience needling or stabbing pain. The treatment principle in this case is to move the blood. Once the clots are resolved, uterine bleeding will stop. Charred *Wu Ling Zhi* is usually used for this purpose, as it can activate blood circulation and stop bleeding concurrently.

- Profuse uterine bleeding with dark purplish blood, clots, and sharp abdominal pain: use *Wu Ling Zhi* with *San Qi* (Radix Notoginseng), *Sheng Di Huang* (Radix Rehmanniae) and *Mu Dan Pi* (Cortex Moutan).

3. Eliminates Toxins

Wu Ling Zhi is used internally or topically to treat various snake and insect bites.

DOSAGE

3 to 10 grams in decoction or pills. *Wu Ling Zhi* should be wrapped in cheesecloth prior to cooking in decoctions. It is used both internally and topically. Unprocessed *Wu Ling Zhi* has a distinct odor that may decrease patient compliance. The odor may be eliminated by frying this substance with vinegar or grain-based liquor. Vinegar-fried *Wu Ling Zhi* has a stronger function to disperse stagnation. Liquor-fried (with grain-based liquor) *Wu Ling Zhi* has a stronger function to move the blood and open the channels. Charred *Wu Ling Zhi* stops bleeding.

CAUTIONS / CONTRAINDICATIONS

- *Wu Ling Zhi* is contraindicated during pregnancy, or for patients with blood deficiency or no blood stasis.
- *Wu Ling Zhi* antagonizes *Ren Shen* (Radix Ginseng).

Wu Ling Zhi (Excrementum Trogopteri seu Pteromi)

CHEMICAL COMPOSITION

Urea, uric acid, vitamin A.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Wu Ling Zhi* has an inhibitory effect against *Mycobacterium tuberculosis* and dermatophytes.[2]
- **Antispasmodic:** It has a marked effect to relieve spasms and cramps of the smooth muscle.[3]

CLINICAL STUDIES AND RESEARCH

- **Viral hepatitis:** In one study, 200 patients with viral hepatitis (139 with acute hepatitis, 61 with chronic hepatitis) were treated with an herbal preparation with significant improvement in 140 patients, moderate improvement in 50 patients, and no change in 10 patients. The herbal formula contained *Wu Ling Zhi*, *Yin Chen Hao* (Herba Artemisiae Scopariae), *Pu Huang* (Pollen Typhae), and others as needed.[4]
- **Infertility:** Patients with infertility due to endometrial hyperplasia were treated with modified *Shi Xiao San* (Sudden Smile Powder) with marked effectiveness.[5]

AUTHORS' COMMENTS

According to Dr. Liu Hong-Xiang, *Wu Ling Zhi*, *Pu Huang* (Pollen Typhae), *Dang Gui* (Radicis Angelicae Sinensis), *Shan Zha* (Fructus Crataegi), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) are used together to treat dysfunctional uterine bleeding or bleeding and abdominal pain following miscarriage or delivery.

Jiang Xiang (Lignum Dalbergiae Odoriferae)

降香

Pinyin Name: *Jiang Xiang*
Literal Name: "descending fragrance"
Alternate Chinese Names: *Jiang Zhen Xiang*
Original Source: *Hai Yao Ben Cao* (Materia Medica of Herbs from [Across the] Seas) by Li Xun in 907-960 A.D.
English Name: dalbergia, rosewood
Botanical Name: *Dalbergia odorifera* T. Chen (*Jiang Xiang Tan*)
Pharmaceutical Name: Lignum Dalbergiae Odoriferae
Properties: acrid, warm
Channels Entered: Liver, Spleen, Heart

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Dispels Stasis, Stops Bleeding, Relieves Pain

Chest pain, trauma-related pain, bleeding from cuts: *Jiang Xiang* (Lignum Dalbergiae Odoriferae) has a unique function to both move the blood and stop bleeding. It is commonly used for pain characterized by the presence of bleeding with blood stasis, such as chest and hypochondriac pain, sports or traumatic injuries, and external injuries. It may be used both internally and topically.

- Chest or hypochondriac pain from blood and qi stasis: combine *Jiang Xiang* with *Yu Jin* (Radix Curcumae), *Tao Ren* (Semen Persicae), and *Gua Lou Shi* (Fructus Trichosanthis).

Jiang Xiang (Lignum Dalbergiae Odoriferae)

- Sports or traumatic injuries: use this herb with *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Bleeding from cuts: apply *Jiang Xiang* as powder, topically.

2. Harmonizes the Middle *Jiao*, Relieves Nausea

Nausea, vomiting and abdominal pain: *Jiang Xiang* clears accumulation of dampness and turbidity in the middle *jiao*.

- Nausea and vomiting: use it with *Huo Xiang* (Herba Agastache) and *Mu Xiang* (Radix Aucklandiae).

DOSAGE

3 to 6 grams in decoction, 1 to 2 grams in powder. *Jiang Xiang* is used both internally and topically.

CAUTIONS / CONTRAINDICATIONS

- Acrid and warm in nature, *Jiang Xiang* should not be used in cases of bleeding caused by heat in the blood.
- Similarly, *Jiang Xiang* should not be used in cases of yin deficiency with excess fire.

CHEMICAL COMPOSITION

β-bisalolene, β-farnesen, nerolidol, dalbergin, nordalbergin, isodalbergin, o-methydalbergin, dalbergenone, dalbergichromene.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Oral administration of *Jiang Xiang* lengthened thrombin time.[2]
- **Anti-inflammatory:** Oral administration of *Jiang Xiang* has demonstrated an anti-inflammatory effect.[3]

CLINICAL STUDIES AND RESEARCH

- **Traumatic injuries:** An herbal formula containing *Jiang Xiang*, *San Qi* (Radix Notoginseng), *Su Mu* (Lignum Sappan), *Zi Ran Tong* (Pyritum), *Hong Hua* (Flos Carthami), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and others showed marked effectiveness in treatment of acute pain and inflammation of traumatic injuries. In four patients with acute pain, marked analgesic effect was observed 1 to 2 hours after administration.[4]

Zi Ran Tong (Pyritum)

自然銅 自然铜

Pinyin Name: *Zi Ran Tong*
Literal Name: "natural copper"
Original Source: *Lei Gong Pao Zhi Lun* (Grandfather Lei's Discussions of Herb Preparation) by Lei Xiao in 470 A.D.
English Name: pyrite
Pharmaceutical Name: Pyritum
Properties: acrid, neutral
Channels Entered: Liver

Zi Ran Tong (Pyritum)

CHINESE THERAPEUTIC ACTIONS

Disperses Blood Stasis, Relieves Pain, Connects Bones and Facilitates Healing

Fractured bones, traumatic injuries with swelling and pain: *Zi Ran Tong* (Pyritum) is used for the treatment of external and traumatic injuries with swelling, pain, inflammation and bruises. Clinical applications include sprains, strains, contusions, and bone fractures. This is one of the most important substances in the trauma departments of hospitals in China.

- Traumatic injuries and external injuries: use *Zi Ran Tong* with *Su Mu* (Lignum Sappan), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *Xue Jie* (Sanguis Draconis).
- Bone fractures with severe pain and swelling: use this substance with *Dang Gui* (Radicis Angelicae Sinensis), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Gu Sui Bu* (Rhizoma Drynariae) and *Ru Xiang* (Gummi Olibanum).

DOSAGE

10 to 15 grams in decoction, 0.3 grams in powder or pills. *Zi Ran Tong* is used both internally and topically. *Zi Ran Tong* is calcined to facilitate crushing and extraction of active constituents. The calcined form also has a stronger effect to disperse stagnation and relieve pain.

CAUTIONS / CONTRAINDICATIONS

- *Zi Ran Tong* is contraindicated in blood deficiency or when there is no blood stasis.

CHEMICAL COMPOSITION

Ferrous disulfide (FeS_2), copper, nickel, arsenic.[1]

CLINICAL STUDIES AND RESEARCH

- **Bone fracture:** In one study, 106 patients with fractured bones were treated with an herbal preparation with marked improvement in 79 patients, moderate improvement in 15 patients, and minimal improvement in 9 patients. Three patients discontinued treatment prior to the end of the study. The herbal preparation included *Zi Ran Tong, Gu Sui Bu* (Rhizoma Drynariae), *Jiang Huang* (Rhizoma Curcumae Longae), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Zhi* (Radix Angelicae Dahuricae), *Ban Xia* (Rhizoma Pinelliae), *Shi Gao* (Gypsum Fibrosum), *Da Huang* (Radix et Rhizoma Rhei) and other herbs as needed.[2]

AUTHORS' COMMENTS

Zi Ran Tong is commonly used to treat external and traumatic injuries. Not only does it have excellent effects to reduce swelling and relieve pain, it also facilitates and speeds recovery from broken bones.

Niao Bu Su (Ramus Kalopanax Pictus)

鳥不蓿 鸟不蓿

Pinyin Name: *Niao Bu Su*
Alternate Chinese Names: *Yan Jiao, Shuang Mian Ci, Hu Gen, Xing Ke Chi*
English Name: kalopanacis
Botanical Name: *Kalopanax septemlobus (pictus)* (Thunb.) Koidz.
Pharmaceutical Name: Ramus Kalopanax Pictus
Properties: acrid, bitter, warm
Channels Entered: Liver, Kidney
Safety Index: slightly toxic

Niao Bu Su (Ramus Kalopanax Pictus)

CHINESE THERAPEUTIC ACTIONS

Eliminates Toxins, Invigorates Blood and Relieves Pain

Niao Bu Su (Ramus Kalopanax Pictus) promotes the normal circulation of blood to relieve pain throughout the body.

- *Bi zheng* (painful obstruction syndrome): combine *Niao Bu Su* with *Wang Bu Liu Xing* (Semen Vaccariae), *Yi Wu Gen* (Radix Elaeagni) and *Xi Xian Cao* (Herba Siegesbeckiae).
- Involuntary spasms, or tremors or hemiplegia: add this herb to *Yi Wu Gen* (Radix Elaeagni), *San Qi* (Radix Notoginseng), *Gui Zhi* (Ramulus Cinnamomi), *Hong Gu She* (Radix Kadsura Japonicae), *Da Feng Teng* (Caulis Sinomenii) and *Yi Tiao Gen* (Radix Moghaniae).
- Sexually-transmitted diseases (STDs): use *Niao Bu Su* with *Mo Gu Xiao* (Caulis Hyptis Capitatae), *Ren Dong Teng* (Caulis Lonicerae), *Tu Fu Ling* (Rhizoma Smilacis Glabrae), *Fu Rong* (Radix Hibisci) and *Jin Yin Hua* (Flos Lonicerae).
- Toothache: use it with *Shui Ding Xiang* (Herba Ludwigiae Prostratae), *Hong Gu She* (Radix Kadsura Japonicae), *Shu Wei Huang* (Herba Rostellulariae) and *Yi Zhi Xiang* (Herba Vernoniae Cinereae).
- Metroendometritis, inflammation of the ovaries: combine this herb with *Yi Zhi Xiang* (Herba Vernoniae Cinereae), *Xiang Si Cao* (Herba Eupatorii Formosani), *Ma Bian Cao* (Herba Verbenae), *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Dang Gui* (Radicis Angelicae Sinensis), *Xiang Fu* (Rhizoma Cyperi), *Feng Wei Cao* (Herba Pteris) and *Ya She Huang* (Herba Lippiae).

DOSAGE

9 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- Overdose of *Niao Bu Su* may cause side effects such as dizziness, blurred vision and vomiting.
- *Niao Bu Su* should be used with caution during pregnancy.

CHEMICAL COMPOSITION

Akeboside, kalopanax-genin.[1]

Dan Shen (Radix Salviae Miltiorrhizae)

丹參 丹参

Pinyin Name: *Dan Shen*
Literal Name: "red ginseng"
Alternate Chinese Names: *Chi Shen, Zi Dan Shen*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: salvia root
Botanical Name: *Salvia miltiorrhiza* Bge. (*Dan Shen*)
Pharmaceutical Name: Radix Salviae Miltiorrhizae
Properties: bitter, cool
Channels Entered: Heart, Pericardium, Liver

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Dispels Blood Stasis

Dan Shen (Radix Salviae Miltiorrhizae) regulates blood circulation and addresses various disorders caused by blood stagnation, including gynecological or cardiovascular disorders, and the formation of nodules of blood stagnation.

Dan Shen (Radix Salviae Miltiorrhizae)

Gynecology: *Dan Shen* is an excellent herb to treat various gynecological disorders caused by blood stagnation, such as irregular menstruation, amenorrhea and postpartum abdominal pain.

- Abdominal pain with irregular menstruation because of blood stasis or during the postpartum period: use this herb with *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae) and *Yi Mu Cao* (Herba Leonuri).
- Abdominal pain with blood stasis due to cold: combine it with *Wu Zhu Yu* (Fructus Evodiae) and *Rou Gui* (Cortex Cinnamomi).

Chest, epigastric and abdominal pain: *Dan Shen* treats pain and stifling sensations in the chest and epigastric areas caused by qi and blood stagnation.

- Chest pain: use *Dan Shen* with *Gua Lou Pi* (Pericarpium Trichosanthis) and *Ban Xia* (Rhizoma Pinelliae).
- Epigastric and abdominal pain due to qi and blood stagnation: use it with *Tan Xiang* (Lignum Santali Albi) and *Sha Ren* (Fructus Amomi).

Palpable masses and accumulations due to blood stagnation: *Dan Shen* has a strong dispersing action that can be used with other blood- and qi-invigorating herbs to treat masses in the abdomen.

- Palpable masses: use this herb with *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Ze Lan* (Herba Lycopi) and *Bie Jia* (Carapax Trionycis).
- Hepatomegaly or splenomegaly: combine this herb with *Bie Jia* (Carapax Trionycis), *Mu Li* (Concha Ostreae), *Zhi Ke* (Fructus Aurantii), *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Xiang Fu* (Rhizoma Cyperi).

Traumatic injuries and *bi zheng* (painful obstruction syndrome): *Dan Shen* invigorates blood circulation in the channels and collaterals to treat arthritis or traumatic injury.

- External or traumatic injuries with pain and bruising: use this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Hong Hua* (Flos Carthami), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Redness, swelling and pain due to heat-type *bi zheng* (painful obstruction syndrome): combine *Dan Shen* with *Ren Dong Teng* (Caulis Lonicerae), *Chi Shao* (Radix Paeoniae Rubrae), *Qin Jiao* (Radix Gentianae Macrophyllae), and *Sang Zhi* (Ramulus Mori).

2. Cools the Blood, Reduces Swelling of Sores and Abscesses

Heat in the *ying* (nutritive) and *xue* (blood) levels: Manifestations include delirium, high fever, unconsciousness, irritability, insomnia, purpura or subcutaneous bleeding, with a dark, purplish-red tongue. *Dan Shen* cools the blood to treat febrile disorders or the presence of heat in the *ying* or *xue* levels.

- Heat in the *ying* or *xue* levels: use *Dan Shen* with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), and *Zhu Ye* (Herba Phyllostachys).

Sores and abscesses: *Dan Shen* has potent action to reduce swelling in toxic sores and breast abscesses.

- Initial stage of breast abscess: use this herb with *Jin Yin Hua* (Flos Lonicerae) and *Lian Qiao* (Fructus Forsythiae).
- Erysipelas: use it with *Mu Dan Pi* (Cortex Moutan), *Chi Shao* (Radix Paeoniae Rubrae), *Tian Hua Fen* (Radix Trichosanthis), *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), and *Pu Gong Ying* (Herba Taraxaci).

3. Nourishes Blood, Calms the *Shen* (Spirit)

Palpitations and insomnia related to heat in the blood or Heart blood deficiency: Cool in nature, *Dan Shen* dispels heat from the Heart and nourishes blood, to treat insomnia and palpitations.

- Palpitations and insomnia due to heat: use it with *Xuan Shen* (Radix Scrophulariae), *Lian Qiao* (Fructus Forsythiae) and *Jin Yin Hua* (Flos Lonicerae). **Exemplar Formula:** *Qing Ying Tang* (Clear the Nutrition Level Decoction).
- Palpitations and insomnia from Heart blood deficiency: combine this herb with *Sheng Di Huang* (Radix Rehmanniae), *Bai Zi Ren* (Semen Platycladi), and *Suan Zao Ren* (Semen Zizyphi Spinosae). **Exemplar Formula:** *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart).

DOSAGE

5 to 10 grams in decoction, up to a maximum of 30 grams. Liquor-fried *Dan Shen* (with grain-based liquor) has a stronger function to activate blood circulation, remove blood stasis, and relieve pain.

CAUTIONS / CONTRAINDICATIONS

- *Dan Shen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).
- Patients with hypermenorrhea, hemoptysis or hematuria should use *Dan Shen* with caution.

CHEMICAL COMPOSITION

Tanshinone I, II_A, II_B; hydroxytanshionone, methyltanshinonate, methylenetanshinquinone, przewatanshin-

Dan Shen (Radix Salviae Miltiorrhizae)

quinone A, miltirone, dihydrotanshinone I, tanshinol A, tanshinol B, tanshinol C, nortanshinone, 1,2,15,16-tetrahydrotanshiquinone, isotanshinone I, II; isocryptotanshinone, tanshiquinone A, B, C.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Dan Shen* in various laboratory animals is associated with negative chronotropic and inotropic effects, and reduction of blood pressure.[2] *Dan Shen* dilates and increases blood perfusion to the coronary arteries to reduce the damage of cardiac ischemia and prevent or diminish death of cardiac muscle.[3]
- **Antiplatelet:** Injection of *Dan Shen* is associated with antiplatelet effects in healthy rabbits, rats and mice. The antiplatelet effect reaches its peak 30 minutes after intravenous injection, and lasted for approximately 2 hours.
- **Anticoagulant and thrombolytic:** Administration of *Dan Shen* is also associated with anticoagulant and thrombolytic effects.[4,5]
- **Antibiotic:** It has an inhibitory influence on *Staphylococcus aureus*.[6]
- **Hepatoprotective:** Administration of *Dan Shen* is associated with a marked hepatoprotective effect by lowering liver enzyme levels in mice exposed to carbon tetrachloride. It is also beneficial in treating mice with liver cirrhosis. The hepatoprotective function of *Dan Shen* is due in part to its effect at improving blood circulation and promoting regeneration of liver cells.[7,8,9]
- **Antineoplastic:** In mice with lung cancer, intraperitoneal injection of a *Dan Shen* preparation at the dosage of 9.0 g/kg showed marked inhibitory action on the growth of cancer cells with $p<0.05$ to 0.02. In mice with ascites carcinoma, intraperitoneal injection of a *Dan Shen* preparation was effective in inhibiting the growth and spread of tumor cells.[10,11]
- **CNS suppressant:** Administration of *Dan Shen* has a marked sedative effect, as it prolongs the hypnotic influence of phenobarbital and negates the stimulating effects of caffeine.[12]

CLINICAL STUDIES AND RESEARCH

- **Acute viral hepatitis:** One report covered 104 patients who were treated with intravenous injection of a *Dan Shen* preparation with an effective rate of 97%. The effectiveness is attributed to the ability of *Dan Shen* to promote regeneration of liver cells.[13]
- **Chronic nephritis:** According to another report, 48 patients were treated with an intravenous infusion of 16 to 20 ml of a *Dan Shen* preparation in 500 ml of D5W (2 ml of injectable contain 3 grams of dried herb) for 14 days per treatment course. Depending on the severity of illness, the effective rate ranged from 62.5 to 80%. Patients with hematuria were treated with extreme caution, as *Dan Shen* has both antiplatelet and anticoagulant effects.[14]
- **Oral leukoplakia:** Presence in the oral cavity of abnormal growths with white discoloration and distinct borders was diagnosed as oral leukoplakia and treated with *Dan Shen* injectable. After application of anesthetic to the affected area, 2 to 4 ml of the preparation were injected at the base of the abnormal growth every other day for a total of 7 injections per treatment course. The study reported good patient response with shrinkage and disappearance of the abnormal white growth.[15]
- **Chronic hepatitis:** According to one report, 22 patients with chronic active hepatitis (characterized as blood stasis) were divided into two groups. Patients in group one received 4 ml of *Dan Shen* via intramuscular injection. Patients in group two received 100 ml of individually-customized herbal decoctions twice daily plus 250mg of glucurolactone three times daily. The study reported normal liver function in 11 out of 11 patients in the *Dan Shen* injectable group after just 2 months, and in only 6 out of 11 patients in the herbal decoction group after 3 months.[16]
- **Cervical erosion:** In one study, 11 patients with cervical erosion were treated topically with a *Dan Shen* preparation, with up to a 57.66% success rate. Additional benefits included good patient compliance and lack of toxicity, adverse effects and/or allergic reactions.[17]
- **Epidemic hemorrhagic fever:** Oral or intravenous administration of *Dan Shen* showed marked effectiveness in treatment of epidemic hemorrhagic fever by reducing the length of illness, decreasing the duration of oliguria, and minimizing the amount of blood lost.[18]
- **Whooping cough:** In one study, 28 patients with whooping cough were treated with 2 ml of an intravenous infusion of *Dan Shen* (2 ml of injectable contained 2 grams of dried herb) one or two times daily. Marked improvement was reported in 21 out of 28 patients.[19]
- **Schistosomal hepatomegaly:** Administration of a 30 to 50% *Dan Shen* decoction (equivalent to 18 to 45 grams of dried herb daily) for 30 to 42 days showed a reduction in size of the liver in 44.4% of the patients, softening of the liver in 55.5%, a reduction in size of the spleen in 48.8%, and softening of the spleen in 53.6%.[20]
- **Coronary artery disease:** In one study, 323 patients with coronary artery disease were treated with oral administration of a *Dan Shen* preparation given three times daily (equivalent to daily dose of 60 grams of dried herbs). The study reported improvement based on symptomatic evaluation in 80.9% of the patients, and improvement based on ECG reading in 57.3% of the patients. That study noted that patients without previous incidence of myocardial infarction were most responsive to the treatment.

Dan Shen (Radix Salviae Miltiorrhizae)

Furthermore, a reduction of total cholesterol levels was reported in many patients. [21] In another study, 108 patients with angina were treated with an injectable of a *Dan Shen* preparation with improvement in 86% of the patients based on symptomatic evaluation, and in 54.7% of the patients based on an ECG evaluation.[22]

- **Shock:** Two patients with cardiogenic shock and sudden arrest of heartbeat were successfully rescued by intravenous injection of a *Dan Shen* preparation. The therapeutic effect was described as being similar to that of phentolamine or dobutamine.[23]
- **Scleroderma:** Sixteen patients with scleroderma were treated by intravenous infusion of a *Dan Shen* preparation for an average of 43.3 days. The study reported marked improvement in 37.6%, slight improvement in 31.2%, and no improvement in 31.2%.[24]
- **Ischemic stroke:** Intravenous administration of *Dan Shen* was 83.42% effective in treating 43 patients with stroke due to cerebral ischemia. The group that received Chinese herbs responded better than the group that received drugs.[25]
- **Cerebral thrombosis:** Intravenous administration of *Dan Shen* was 93.5% effective in treating 46 patients with cerebral thrombosis.[26]
- **Insomnia:** Injection of *Dan Shen* into *Zusanli* (ST 36) bilaterally was 61% effective in treating 100 patients diagnosed with insomnia.[27]
- **Allergic rhinitis:** Bilaterally injection of *Dan Shen* into inferior nasal concha of the nose was 86% effective in treating 50 patients diagnosed with allergic rhinitis.[28]
- **Glaucoma:** Intramuscular injection of *Dan Shen* in 94 patients for treatment of mid- to late-stage glaucoma showed good overall results. Out of 116 affected eyes, the study reported vision improvement in 58 eyes, no change in 49 eyes, and deterioration in 9 eyes.[29]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Dan Shen* has a significant impact on the pharmacodynamics and pharmacokinetics of warfarin, according to studies conducted in rats. After a single dose of warfarin, use of *Dan Shen* orally for three days increased the absorption rate constant, plasma concentration, prothrombin time, steady-state plasma level, area under plasma-concentration-time curves, maximum concentrations and elimination half-lives of warfarin. However, there was a decrease of clearances and apparent volume of distribution of warfarin. The researchers concluded that this herb-drug interaction explains the exaggerated warfarin effect when herbs such as *Dan Shen* and *Dang Gui* (Radicis Angelicae Sinensis) were administered concurrently.[30] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]
- **Digoxin:** In an *in vitro* study, it was demonstrated that *Dan Shen* has digoxin-like immunoreactivity. Concurrent use of both digoxin and *Dan Shen* may result in falsely elevated serum digoxin concentrations (positive interference) as measured by the fluorescence polarization immunoassay, and a falsely lowered level (negative interference) when measured by the microparticle enzyme immunoassay. A more reliable assay can be obtained by monitoring the free digoxin concentration.[31]

TOXICOLOGY

No fatalities were reported following bolus intraperitoneal injection of *Dan Shen* decoction at 43 g/kg in mice. No abnormalities were observed following daily intraperitoneal injection of a *Dan Shen* preparation at 2.4 g/kg for 14 days.[32,33]

AUTHORS' COMMENTS

Of all blood-invigorating and stasis-removing herbs, *Dan Shen* is one of the most commonly used. It markedly lowers the viscosity of blood and improves perfusion of blood to various vital organs of the body, including, but not limited to, the brain, the heart, and the kidneys. Because it dilates coronary arteries and improves blood perfusion to the heart, *Dan Shen* is one of the most important herbs in the treatment of cardiac ischemia and angina.

Some traditional texts consider using the single herb *Dan Shen* to be equivalent to the function of the formula *Si Wu Tang* (Four-Substance Decoction). But this herb is cool and is mainly used to dispel blood stagnation. Although it can calm the *shen* (spirit) to treat palpitations and insomnia, this is not its primary function. Some believe that with only a minor function to tonify blood, the effect of using *Dan Shen* will be significantly lower than that of using blood-tonic herbs. Therefore the theory of *Dan Shen* being equivalent to *Si Wu Tang* does not meet with unanimous agreement among scholars and clinicians.

Dan Shen, *Dang Gui* (Radicis Angelicae Sinensis) and *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis) all invigorate and tonify the blood. The differences are as follows:

- *Dan Shen* is cool and has a stronger function to dispel blood stagnation.
- *Dang Gui* is warm and functions more effectively to tonify blood.
- *Dang Gui Wei* is warm, and is used primarily to invigorate blood circulation.

Dan Shen (Radix Salviae Miltiorrhizae)

Hong Hua (Flos Carthami)

紅花 红花

Pinyin Name: *Hong Hua*
Literal Name: "red flower"
Alternate Chinese Names: *Hong Lan Hua*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: carthamus, safflower
Botanical Name: *Carthamus tinctorius* L. (*Hong Hua*)
Pharmaceutical Name: Flos Carthami
Properties: acrid, warm
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

Activates Blood Circulation, Eliminates Blood Stasis, Opens Channels, Regulates Menstruation

Hong Hua (Flos Carthami) functions extremely well to activate blood circulation and eliminate blood stasis. It has a broad range of clinical applications including menstrual pain, amenorrhea, postpartum abdominal pain, external and sports injuries, joint pain, and macular skin eruptions.

Hong Hua (Flos Carthami)

Obstetric/gynecological disorders: *Hong Hua* is one of the most commonly-used herbs in the obstetric and gynecologic departments in China. When used in small dosages, it activates and nourishes blood. When used in large dosages, it breaks blood stagnation.

- Menstrual pain or amenorrhea: combine *Hong Hua* with *Tao Ren* (Semen Persicae), *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Chi Shao* (Radix Paeoniae Rubrae). **Exemplar Formula:** *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit).
- Postpartum dizziness or abdominal pain from blood stasis: add this herb to *He Ye* (Folium Nelumbinis), *Pu Huang* (Pollen Typhae), *Dang Gui* (Radicis Angelicae Sinensis), and *Mu Dan Pi* (Cortex Moutan).
- Stillbirth or difficult labor: use it with *Niu Xi* (Radix Cyathulae seu Achyranthis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Dang Gui* (Radicis Angelicae Sinensis).

Abdominal masses or accumulations: Clinical manifestations may include palpable masses, abdominal pain or enlarged spleen or liver. These are usually chronic cases, and the tongue is often dark with purple spots.

- Abdominal masses due to blood stasis: use *Hong Hua* with *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- Epigastric or abdominal pain: use it with *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Xiang Fu* (Rhizoma Cyperi), *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), *Pu Huang* (Pollen Typhae) and *Sha Ren* (Fructus Amomi).
- Abdominal pain: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Yan Hu Suo* (Rhizoma Corydalis), and *Mu Xiang* (Radix Aucklandiae).
- Hepatomegaly: add *Hong Hua* to *Chai Hu* (Radix Bupleuri), *Zao Jiao Ci* (Spina Gleditsiae), *Bai Ji Li* (Fructus Tribuli), *Chuan Lian Zi* (Fructus Toosendan), *Bing Lang* (Semen Arecae), *E Zhu* (Rhizoma Curcumae), *Chuan Shan Jia* (Squama Manis), *Mu Li* (Concha Ostreae) and *Jiang Huang* (Rhizoma Curcumae Longae).

Joint pain: *Hong Hua* invigorates the circulation of blood in the channels and collaterals. Clinical manifestations include *bi zheng* (painful obstruction syndrome), hemiplegia or paralysis.

- *Bi zheng*: use it with *Di Long* (Pheretima) and *Di Bie Chong* (Eupolyphaga).
- Hemiplegia: combine this herb with *Sang Zhi* (Ramulus Mori), *Di Long* (Pheretima), *Chuan Shan Jia* (Squama Manis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Chi Shao* (Radix Paeoniae Rubrae), *Niu Xi* (Radix Cyathulae seu Achyranthis) and *Huang Qi* (Radix Astragali).

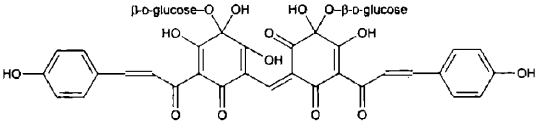
Dermatological disorders: Macular eruptions are usually caused by heat in the blood forcing it out of the vessels. The eruptive patch is usually dark purplish.

- Macular eruption: use *Hong Hua* with *Dang Gui* (Radicis Angelicae Sinensis), *Zi Cao Gen* (Radix Lithospermi) and *Da Qing Ye* (Folium Isatidis).

Chest pain: *Hong Hua* enters the Lung to activate qi and blood circulation to relieve pain.

- Chest pain, angina: use this herb with *Tan Xiang* (Lignum Santali Albi), *Gua Lou Shi* (Fructus Trichosanthis), *Xie Bai* (Bulbus Allii Macrostemonis), *Gui Zhi* (Ramulus Cinnamomi), and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).

DOSAGE



3 to 10 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use of *Hong Hua* is contraindicated during pregnancy.
- Do not exceed the recommended dose of *Hong Hua*: doing so may cause incessant bleeding.

CHEMICAL COMPOSITION

Carthamin, neocarthamin, carthamone, carthamidin, neocarthamin.[1,2]

Carthamin

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** A small dose of *Hong Hua* decoction has positive inotropic effects as it stimulates the heart; however, a large dose has negative inotropic and chronotropic effects as it inhibits the heart and decreases overall cardiac output.[3]
- **Antiplatelet:** *Hong Hua* has demonstrated marked effectiveness to inhibit the aggregation of platelets and formation of thrombi. It was reported in one study that *Hong Hua* is 73.4% effective in preventing the formation of thrombi in rats.
- **CNS suppressant:** Intraperitoneal administration of *Hong Hua* has a sedative effect on the central nervous system, as demonstrated in mice. It also has a preventative effect against drug-induced seizures.[4]
- **Adaptogenic:** Intraperitoneal administration of *Hong Hua* at the dosage of 1,100 mg/kg increased the total

Hong Hua (Flos Carthami)

swimming time of mice by up to 117%.[5]

- **Uterine stimulant:** Decoction of *Hong Hua* has a stimulating effect on the smooth muscle of the uterus to increase muscle contraction, as demonstrated in various animal studies.[6]

CLINICAL STUDIES AND RESEARCH

- **Cerebral thrombosis:** Intravenous infusion of 15 ml of a 50% *Hong Hua* solution (equivalent to 75 grams of dried herb) in 500 ml of D10W once daily for 15 days was 94.7% effective in treating 137 patients with cerebral thrombosis. Side effects reported include skin allergy, hypermenorrhea, and fatigue.[7]
- **Coronary artery disease:** In one study, 100 patients treated with intravenous injection or infusion of 50% *Hong Hua* solution showed chest pain relief in 80.8% of the study group, marked ECG improvement in 26%, and moderate ECG improvement in 40%. Most patients also reported reduction of headaches, dizziness, and palpitations.[8]
- **Duodenal ulcer:** Twelve patients with duodenal ulcers were treated with an herbal decoction once daily for 20 days with a 100% success rate. The herbal decoction was prepared by cooking 60 grams of *Hong Hua* and 12 pieces of *Da Zao* (Fructus Jujubae) in 300 ml of water to yield 150 ml of the final decoction. The decoction was mixed with 60 grams of honey. The patients were instructed to drink 150 ml of the decoction and ingest the *Da Zao* on an empty stomach one time daily.[9]
- **Flat warts:** According to one report, 36 patients with flat warts were treated with 9 grams of *Hong Hua* soaked in hot water and taken by mouth several times daily for 10 days per treatment course. Out of 36 patients, 2 patients were successfully treated after 1 course of treatment, 18 patients after 2 courses, 12 patients after 3 courses, 1 patient after 4 courses, and 3 patients showed no response. The overall rate of effectiveness was 91.6%.[10]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Hong Hua* should be used with caution in patients receiving anticoagulant or antiplatelet medications, as the combination may lead to additive or synergistic effects. Though this potential interaction has not been documented, the use of *Hong Hua* may potentiate the effect of such drugs as warfarin.[11] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

The maximum safe dosage for oral administration of *Hong Hua* is 8 g/kg, as determined by animal studies. The LD_{50} for carthamin via intravenous injection is 2.35 +/- 0.14 g/kg. Daily administration of *Hong Hua* at the dosage up to 1.5 g/kg for 3 months showed no abnormality in liver, kidney, heart, stomach or intestinal functions in rats.[12]

SUPPLEMENT

- 藏紅花 / 藏红花 *Zhang Hong Hua* (Flos Crocus Sativus), first cited in the *Yin Shan Zheng Yao* (Correct Guide to Eating and Drinking), is grown and harvested in Tibet, India and some European countries. It is sweet and cold, and enters the Heart and Liver. In comparison with *Hong Hua*, *Zhang Hong Hua* has a similar but much stronger overall ability to invigorate blood circulation, eliminate blood stasis, cool blood and eliminate heat toxins. It is commonly used when heat is attacking the *ying* (nutritive) and *xue* (blood) stages, leading to symptoms such as macula and high fever. As *Zhang Hong Hua* is an expensive herb, it is seldom used. The dosage for *Zhang Hong Hua* is 1.5 to 3.0 grams.

AUTHORS' COMMENTS

Hong Hua and *Tao Ren* (Semen Persicae) are commonly used together for their synergistic actions. *Hong Hua* is better at dispersing blood stagnation to open the channels and collaterals. It is also used to treat pain in the extremities. *Tao Ren* is better for treatment of abdominal blood stagnation. It is also effective to treat lung and intestinal abscesses.

Tao Ren (Semen Persicae)

桃仁

Pinyin Name: *Tao Ren*
Literal Name: "persica seed," "peach pit"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: persica, peach seed
Botanical Name: *Prunus persica* (Linn) Batsch. (*Tao*); *Prunus davidana* (Carr.) Franch. (*Shan Tao*)
Pharmaceutical Name: Semen Persicae
Properties: bitter, neutral
Channels Entered: Heart, Large Intestine, Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Removes Blood Stasis

Obstetric/gynecological disorders: *Tao Ren* (Semen Persicae) has a potent function to activate blood circulation and eliminate blood stasis that makes it useful for a broad range of clinical applications. It is commonly used to treat menstrual pain, amenorrhea and postpartum abdominal pain.

- Postpartum abdominal pain with profuse uterine bleeding: combine *Tao Ren* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Pao Jiang* (Rhizoma Zingiberis Preparatum) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Sheng Hua Tang* (Generation and Transformation Decoction).
- Menstrual pain, amenorrhea, or irregular menstruation caused by blood stasis: add it to *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Chi Shao* (Radix Paeoniae Rubrae). **Exemplar Formula:** *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit).

External and sports injuries: Entering and invigorating blood in the channels and collaterals, *Tao Ren* treats traumatic injuries and related symptoms caused by blood stagnation.

- External and sports injuries with bruising and pain: add this herb to *Hong Hua* (Flos Carthami), *Da Huang* (Radix et Rhizoma Rhei), and *Chuan Shan Jia* (Squama Manis). **Exemplar Formula:** *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction).
- Blood stasis in the abdomen from traumatic injuries: combine *Tao Ren* with *Meng Chong* (Tabanus), *Pu Huang* (Pollen Typhae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Da Huang* (Radix et Rhizoma Rhei), and *Gui Zhi* (Ramulus Cinnamomi).

2. Drains Abscesses

Lung and intestinal abscesses:

- Lung abscess: add *Tao Ren* to *Lu Gen* (Rhizoma Phragmitis), *Dong Gua Zi* (Semen Benincasae), and *Yi Yi Ren* (Semen Coicis).
- Intestinal abscess: combine it with *Da Huang* (Radix et Rhizoma Rhei), *Mu Dan Pi* (Cortex Moutan) and *Mang Xiao* (Natrii Sulfas). **Exemplar Formula:** *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction).
- Sores and abscesses: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Chi Shao* (Radix Paeoniae Rubrae), *Tian Hua Fen* (Radix Trichosanthis), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

3. Moistens the Intestines, Relieves Constipation

Chronic constipation: *Tao Ren* is commonly used with other seeds to moisten the intestines and relieve constipation caused by dryness from chronic illness, yin deficiency, or blood deficiency.

- Constipation: use this herb with *Huo Ma Ren* (Fructus Cannabis), *Xing Ren* (Semen Armeniacae Amarum), and *Yu Li Ren* (Semen Pruni).

DOSAGE

6 to 10 grams in decoction. *Tao Ren* seeds should be crushed prior to decoction. The unprocessed herb has a strong effect to move the blood and eliminate blood stasis. The dry-fried herb has a strong effect to moisten dryness and treat constipation.

Tao Ren (Semen Persicae)

CAUTIONS / CONTRAINDICATIONS

- *Tao Ren* is contraindicated in cases of blood deficiency.
- *Tao Ren* is contraindicated during pregnancy, due to its emmenagogic and abortifacient effects.[1]

CHEMICAL COMPOSITION

Emulsin, allantoinase, lipids, essential oils (gibberellin A_5, A_{33}); vitamin B_1.[2]

PHARMACOLOGICAL EFFECTS

- **Hematological:** Intravenous injection of *Tao Ren* showed marked effectiveness to prevent formation of, and facilitate dissolution of, thrombi.[3]
- **Anti-inflammatory:** Intravenous administration of *Tao Ren* showed marked anti-inflammatory influence in treatment of otitis media in mice.[4]
- **Others:** *Tao Ren* has also demonstrated antiallergic, antitussive, and antiparasitic effects in various animal studies.[5]

CLINICAL STUDIES AND RESEARCH

- **Schistosomal cirrhosis:** Intravenous infusion of *Tao Ren* in D5W once every other day for 90 days produced marked improvement based on symptom assessment and hematological evaluation.[6]
- **Angiitis:** In one study, 50 patients with angiitis were treated with an herbal injectable with good results. The herbal injectable contained *Tao Ren*, *Hong Hua* (Flos Carthami) and *Dan Shen* (Radix Salviae Miltiorrhizae).[7]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Tao Ren* should be used with caution in patients receiving anticoagulant or antiplatelet medications as the combination may lead to additive or synergistic effects. Though this interaction has not been documented, the use of *Tao Ren* may potentiate the effect of drugs such as warfarin.[8] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

In toxicology studies in mice, intramuscular injection of a water extract of *Tao Ren* at 3.5 g/kg leads to reactions such as flaccid muscles, irregular muscle movement, and constriction of the skin pores. The LD_{50} via injection in mice is approximately 222 g/kg.[9]

Yi Mu Cao (Herba Leonuri)

益母草 益母草

Pinyin Name: *Yi Mu Cao*
Literal Name: "mother's herb," "good for mother herb," "benefit mother herb"
Alternate Chinese Names: *Cong Wei, Yi Ming*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: leonurus, motherwort herb
Botanical Name: *Leonurus heterophyllus* Sweet (*Yi Mu Cao*)
Pharmaceutical Name: Herba Leonuri
Properties: acrid, bitter, cool
Channels Entered: Heart, Liver, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Dispels Blood Stasis

Irregular menstruation, amenorrhea, postpartum abdominal pain: *Yi Mu Cao* (Herba Leonuri) is one of the best and most-commonly used herbs for treatment of various gynecological disorders caused by blood stagnation. It is essential in regulating blood circulation in the *chong* (thoroughfare) channel without damaging qi or blood. It regenerates blood without causing stagnation. In postpartum women with spotting, *Yi Mu Cao* helps to contract the uterus to expel residual stagnation.

- Abdominal pain because of irregular menstruation or amenorrhea: use *Yi Mu Cao* with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Dan Shen* (Radix Salviae Miltiorrhizae).
- Severe postpartum abdominal pain and uterine bleeding: use *Yi Mu Cao* as a single herb remedy.

2. Promotes Urination, Reduces Swelling and Edema

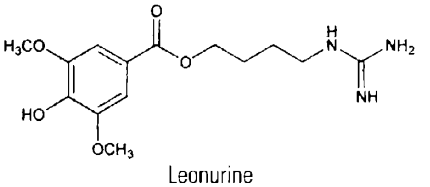
Edema and dysuria: In cases of Kidney qi deficiency, *Yi Mu Cao* treats symptoms of dysuria, scanty urine, chronic edema, heavy sensations of the back and legs, abdominal distention and fullness after meals, sallow complexion, movement difficulties, fatigue and listlessness. This herb can also treat edema due to chronic nephritis.

- Edema and dysuria: add *Bai Mao Gen* (Rhizoma Imperatae).

3. Clears Heat and Eliminates Toxins

Dermatological disorders: *Yi Mu Cao* clears heat and eliminates toxins from both the interior and the exterior. Clinical applications include eczema, sores, lesions, and ulcers. It may be used internally and topically.

DOSAGE



10 to 15 grams, with a maximum of 30 grams, in herbal decoction. *Yi Mu Cao* is commonly used internally and topically.

CAUTIONS / CONTRAINDICATIONS

- *Yi Mu Cao* is contraindicated in cases of yin deficiency, blood deficiency, or yang deficiency with prolapse.
- *Yi Mu Cao* must be used with extreme caution during pregnancy because of its stimulating effect on the uterus.

CHEMICAL COMPOSITION

Leonurine, stachydrine, leonuridien, leonurinine, lauric acid, linolenic acid, sterol, prehispanolone, 4-guanidino-1-butanol, vitamin A.[1,2]

Leonurine

PHARMACOLOGICAL EFFECTS

- **Uterine stimulant:** Administration of water or alcohol extracts of *Yi Mu Cao* has demonstrated a stimulating effect on the uterus of rabbits, cats, dogs, and guinea pigs. The onset of action is approximately 15 to 20 minutes following oral administration of the decoction. The stimulating effect is observed whether or not animals are pregnant, and in both early and late pregnancy. In regard to the medicinal parts of the plant, the leaf has the strongest stimulating effect, the root has milder influence, and the stem has none.[3]
- **Cardiovascular:** A small dose of *Yi Mu Cao* has a stimulating effect on cardiac contraction, while a large dose has an inhibiting effect. Intravenous injection of *Yi Mu Cao*

Yi Mu Cao (Herba Leonuri)

preparation at the dosage of 2 mg/kg exerts a hypotensive effect with a duration of only a few minutes.[4]

- **Antiplatelet:** Alcohol extract of *Yi Mu Cao* administered via injection demonstrated a marked effect to inhibit the aggregation of platelets.[5]
- **Respiratory:** A small dose of *Yi Mu Cao* stimulates the respiratory system to increase the frequency and depth of respiration. A large dose inhibits the respiratory system to weaken the strength and disrupt the rhythm of respiration.[6]
- **Renal:** In one study, 20 ml of an *Yi Mu Cao* preparation (equivalent to 60 grams of bulk herb) administered via intravenous injection showed marked effectiveness in treatment of acute renal failure in dogs, using such evaluating criteria as BUN, FE_{Na} and renal blood flow.[7]

CLINICAL STUDIES AND RESEARCH

- **Acute nephritis:** Herbal decoction of *Yi Mu Cao* administered three times daily had marked effectiveness in reducing edema in patients with acute nephritis. The herbal decoction was prepared by cooking 90 to 120 grams of dried *Yi Mu Cao* in 700 ml of water to yield 300 ml of final decoction. Fresh *Yi Mu Cao* at double the dosage was shown to be more effective than the dried herb.[8]
- **Coronary artery disease (CAD):** Patients with CAD were treated with an intravenous drip of an *Yi Mu Cao* preparation. Of 100 patients, the study reported an 84% effective rate based on symptom evaluation, and a 61% effective rate based on ECG evaluation.[9]
- **Hypertension:** According to one report, 56 patients with elevated blood pressure were treated with an herbal pill that contained *Yi Mu Cao*, *Chou Wu Tong* (Folium Clerodendri Trichotomi), *Xi Xian Cao* (Herba Siegesbeckiae), and *Xia Ku Cao* (Spica Prunellae). The herbs started to lower blood pressure on day one, and reached maximum impact on day ten.[10]
- **Irregular menstruation:** Herbal decoction or extract of *Yi Mu Cao* at 15 to 20 grams per dose, given three times daily, was effective in the treatment of irregular menstruation, hypermenorrhea, and postpartum bleeding. After ingestion, uterine contraction was observed in 16.4% of patients after one hour, and 25% of patients after two hours. The strength of contraction did not depend on the dose of the herbs.[11]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Yi Mu Cao* has antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[12] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

The LD_{50} for intravenous administration of an *Yi Mu Cao* preparation was 30 to 60 g/kg in mice.[13]

SUPPLEMENT

- 茺蔚子 / 茺蔚子 *Chong Wei Zi* (Semen Leonuri), first cited in *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is derived from the seed of the same plant as *Yi Mu Cao*. *Chong Wei Zi* is sweet and cool. It activates blood circulation, regulates menstruation, clears the Liver and brightens the eyes. Clinical manifestations include irregular menstruation, dysmenorrhea, amenorrhea, postpartum abdominal pain, headache, and red, swollen or painful eyes due to Liver heat. Recommended dosage of *Chong Wei Zi* is 6 to 15 grams in decoction.

AUTHORS' COMMENTS

Yi Mu Cao was used in the Tang dynasty by the famous Tai-Ping princess as a body wash, to retain beautiful, soft skin.

According to Dr. Shu Run-San, the combination of *Yi Mu Cao*, *Zhi Ke* (Fructus Aurantii), and *Pu Huang* (Pollen Typhae) has a stimulating effect to induce uterine contraction. These three herbs are commonly used to dispel blood stasis in postpartum patients with retention of lochia, or the pain associated with endometriosis.

According to Dr. Zhu Lang-Chun, when using *Yi Mu Cao* for diuretic purposes, the dosage for adults must be as high as 60-120 grams (lower dosages for children). High dosages are especially necessary in cases involving blood stasis and edema.

Ze Lan (Herba Lycopi)

澤蘭 泽兰

Pinyin Name: *Ze Lan*
Literal Name: "marsh orchid"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: lycopus, hirsute shiny bugleweed
Botanical Name: *Lycopus lucidus* Turcz. (*Di Gua Er Miao*); *Lycopus lucidus* Turcz. var. *hirtus* Regel. (*Mao Ye Di Gua Er Miao*)
Pharmaceutical Name: Herba Lycopi
Properties: bitter, acrid, slightly warm
Channels Entered: Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Dispels Blood Stasis

Gynecological disorders: *Ze Lan* (Herba Lycopi) activates blood circulation by warming the channels. It is a mild herb, regulates menstruation and treats various gynecological disorders characterized by qi and blood stagnation. Clinical applications include menstrual pain, irregular menstruation, and postpartum abdominal pain.

- Menstrual pain, irregular menstruation, and postpartum abdominal pain: combine *Ze Lan* with *Dang Gui* (Radicis Angelicae Sinensis), *Dan Shen* (Radix Salviae Miltiorrhizae), and *Bai Shao* (Radix Paeoniae Alba).
- Amenorrhea caused by blood deficiency with fire: add this herb to *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba) and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata).

Pain and bruises due to external and sports injuries, and chest and hypochondriac pain:

- Pain and bruises: combine *Ze Lan* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Hong Hua* (Flos Carthami) and *Tao Ren* (Semen Persicae).
- Sores and swellings on the skin: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Gan Cao* (Radix Glycyrrhizae) and *Dang Gui* (Radicis Angelicae Sinensis).
- Chest and hypochondriac pain from qi and blood stagnation: use this herb with *Dan Shen* (Radix Salviae Miltiorrhizae) and *Yu Jin* (Radix Curcumae).
- Back pain due to blood stagnation from traumatic injuries: add *Chuan Niu Xi* (Radix Cyathulae).

2. Regulates Water Circulation, Reduces Swelling

Dysuria, edema: *Ze Lan* has a very mild function to regulate water circulation, and is used with diuretic herbs to treat edema.

- Edema: add *Fen Fang Ji* (Radix Stephaniae Tetandrae).

DOSAGE

10 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Ze Lan* should be used with caution in patients with blood deficiency, and in the absence of blood stasis.

CHEMICAL COMPOSITION

Glycosides, flavones, saponins, lycopose, raffinose, stachyose, guaianolides, eurecuivin.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiotonic:** *Ze Lan* has been shown to have a cardiotonic effect.[2]

CLINICAL STUDIES AND RESEARCH

- **Disseminated intravascular coagulation (DIC):** Administration of a *Ze Lan* preparation via intravenous injection was effective in prevention of DIC.[3]

HERB-DRUG INTERACTION

- **Diuretics:** *Ze Lan* has diuretic action. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[4] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

Chuan Niu Xi (Radix Cyathulae)

川牛膝

Pinyin Name: *Chuan Niu Xi*
Literal Name: "ox knee from Sichuan," "cow's knee from Sichuan"
Alternate Chinese Names: *Niu Xi, Ma Niu Xi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cyathula, medicinal cyathula root
Botanical Name: *Cyathula officinalis* Kuan. (*Chuan Niu Xi*); *Cyathula capitata* (Wall.) Moq. (*Ma Niu Xi*)
Pharmaceutical Name: Radix Cyathulae
Properties: bitter, sour, neutral
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Dispels Blood Stasis

Gynecological disorders: *Chuan Niu Xi* (Radix Cyathulae) is one of the stronger blood-activating herbs for treatment of disorders characterized by blood stasis, such as menstrual pain, irregular menstruation, amenorrhea, and postpartum abdominal pain.

- Gynecological disorders: *Chuan Niu Xi* is often combined with *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis) and *Tao Ren* (Semen Persicae).
- Difficult labor: use this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Gui Ban* (Plastrum Testudinis).

Musculoskeletal pain due to external and sports injuries: *Chuan Niu Xi* dispels stasis and is commonly used for musculoskeletal pain.

- Musculoskeletal pain: use this herb with *Hong Hua* (Flos Carthami), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

2. Promotes Urination, Treats Dysuria

Hematuria, dysuria: *Chuan Niu Xi* dispels damp-heat and eliminates blood stasis in the lower *jiao* to treat burning sensations and pain on urination.

- Hematuria with burning sensations and pain during urination: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Qu Mai* (Herba Dianthi), and *Hua Shi* (Talcum).

3. Directs Fire and Blood Downwards

Abnormal bleeding caused by fire flaring upwards: Clinical applications include hematemesis, epistaxis, toothache, ulceration of the mouth and tongue, headache and dizziness. Furthermore, *Chuan Niu Xi* tonifies the Liver and Kidney yin to help anchor Liver yang and prevent Liver wind from rising upwards.

- Hematemesis and epistaxis: add this herb to *Xiao Ji* (Herba Cirisii), *Bai Mao Gen* (Rhizoma Imperatae), and *Zhi Zi* (Fructus Gardeniae).
- Toothache or ulcerations of the tongue and mouth from yin-deficient fire: use *Chuan Niu Xi* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Zhi Mu* (Radix Anemarrhenae) and *Shi Gao* (Gypsum Fibrosum).

Chuan Niu Xi (Radix Cyathulae)

Exemplar Formula: *Yu Nu Jian* (Jade Woman Decoction).

- Liver yang and Liver wind rising: use it with *Dai Zhe Shi* (Haematitum), *Mu Li* (Concha Ostreae) and *Gui Ban* (Plastrum Testudinis). **Exemplar Formula:** *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction).

4. Tonifies the Liver and Kidney, Strengthens Tendons and Bones

Lower back and knee soreness, weakness and pain: Tendons and bones are tissues controlled by the Liver and the Kidney, respectively. *Chuan Niu Xi* treats soreness and pain in the muscles and joints by tonifying both Liver and Kidney and strengthening their respective tissues. It is one of the most important and effective herbs for chronic pain in the lower body, such as lumbago and weak knees.

- Weakness of the low back and knees: combine *Chuan Niu Xi* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Gui Ban* (Plastrum Testudinis), *Du Zhong* (Cortex Eucommiae) and *Suo Yang* (Herba Cynomorii).
- Redness, swelling and pain in lower body joints because of damp-heat: use this herb with *Cang Zhu* (Rhizoma Atractylodis), *Huang Bai* (Cortex Phellodendri) and *Yi Yi Ren* (Semen Coicis). **Exemplar Formula:** *Er Miao San* (Two-Marvel Powder).
- Joint pain in the lower body from wind and dampness: use it with *Mu Gua* (Fructus Chaenomelis), *Fen Fang Ji* (Radix Stephaniae Tetandrae), and *Bi Xie* (Rhizoma Dioscoreae Hypoglaucae).

DOSAGE

10 to 15 grams in herbal decoction.

CAUTIONS / CONTRAINDICATIONS

- *Chuan Niu Xi* is contraindicated during pregnancy and in cases of profuse menstrual bleeding.

CHEMICAL COMPOSITION

Cyasterone, isocyasterone, 5-epicyasterone, sengosterone, amerasterone A, amerasterone B, capitasterone, poststerone, ecdysterone, crustecdysone, and precyasterone.[1]

PHARMACOLOGICAL EFFECTS

- **Effect on pregnancy:** Administration of *Chuan Niu Xi* in mice at the dosage of 250 to 500 mg/kg for up to 20 days is associated with a decreased percentage of fertilization and an increased risk of miscarriage.[2]

CLINICAL STUDIES AND RESEARCH

- **Uterine bleeding:** According to one report, 23 patients with profuse uterine bleeding were treated with a decoction of *Chuan Niu Xi* at a dosage of 30 to 45 grams. Bleeding stopped in most patients after 2 to 4 days. Patients continued to take the herbs at a lower dose for 5 to 10 more days as maintenance.[3]
- **Acute epistaxis:** Acute nosebleeds in 110 patients were treated with an herbal preparation for up to 10 doses with 100% effectiveness. The herbal preparation contained *Niu Xi* (Radix Cyathulae seu Achyranthis), *Dai Zhe Shi* (Haematitum), and *Xian He Cao* (Herba Agrimoniae).[4]

SUPPLEMENT

- 牛膝 / 牛膝 *Niu Xi* (Radix Cyathulae seu Achyranthis) is the collective name that refers to *Chuan Niu Xi* (Radix Cyathulae) and *Huai Niu Xi* (Radix Achyranthis Bidentatae), since many classic texts did not make any specific differentiation of these two herbs.

AUTHORS' COMMENTS

Chuan Niu Xi (Radix Cyathulae) and *Huai Niu Xi* (Radix Achyranthis Bidentatae) have very similar functions and indications. *Chuan Niu Xi* is stronger in activating blood circulation, eliminating blood stasis, promoting urination, and draining heat downwards. Therefore, *Chuan Niu Xi* is commonly used to treat pain disorders characterized by blood stasis, gynecological disorders, dysuria, and various bleeding disorders caused by heat and fire. *Huai Niu Xi*, on the other hand, is stronger in tonifying the Liver and Kidney and strengthening the tendons and bones. Therefore, *Huai Niu Xi* is commonly used to treat pain disorders of the lower body characterized by weakness and deficiency, especially of the lower back and knees.

As stated above, many classic texts use the term "*Niu Xi*" without specifying either *Chuan Niu Xi* (Radix Cyathulae) or *Huai Niu Xi* (Radix Achyranthis Bidentatae). Thus, although the two herbs are presented in separate monographs in this text, some generic information on "*Niu Xi*" is duplicated in both monographs. The distinction between the two is to be found in the relative potencies of their individual therapeutic actions, which are listed from most potent to least, in each case.

According to Dr. Zhang Liang-Lin, *Chuan Niu Xi* and *Fen Fang Ji* (Radix Stephaniae Tetandrae) treat the lower back soreness and pain associated with dysmenorrhea.

Huai Niu Xi (Radix Achyranthis Bidentatae)

淮牛膝 淮牛膝

Pinyin Name: *Huai Niu Xi*
Literal Name: "ox knee from Huai," "cow's knee from Huai"
Alternate Chinese Names: *Niu Xi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: achyranthes root
Botanical Name: *Achyranthes bidentata* Blume (*Huai Niu Xi*)
Pharmaceutical Name: Radix Achyranthis Bidentatae
Properties: bitter, sour, neutral
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney, Strengthens Tendons and Bones

Lower back and knee soreness, weakness and pain: The tendons and bones are tissues controlled by the Liver and the Kidney, respectively. *Huai Niu Xi* (Radix Achyranthis Bidentatae) treats soreness and pain in the muscles and joints by tonifying both the Liver and Kidney and strengthening their respective tissues. It is one of the most important and effective herbs for chronic pain in the lower body, such as lumbago and weak knees.

- Weakness of the low back and knees: use *Huai Niu Xi* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Gui Ban* (Plastrum Testudinis), *Du Zhong* (Cortex Eucommiae) and *Suo Yang* (Herba Cynomorii).
- Redness, swelling and pain of lower body joints caused by damp-heat: combine this herb with *Cang Zhu* (Rhizoma Atractylodis), *Huang Bai* (Cortex Phellodendri) and *Yi Yi Ren* (Semen Coicis). **Exemplar Formula:** *Er Miao San* (Two-Marvel Powder).
- Joint pain in lower body due to wind and dampness: add *Mu Gua* (Fructus Chaenomelis), *Fen Fang Ji* (Radix Stephaniae Tetandrae), and *Bi Xie* (Rhizoma Dioscoreae Hypoglaucae).

2. Activates Blood Circulation, Dispels Blood Stasis

Gynecological disorders: *Huai Niu Xi* is one of the stronger blood-activating herbs, treating various disorders characterized by blood stasis, such as menstrual pain, irregular menstruation, amenorrhea and postpartum abdominal pain.

- Gynecological disorders such as menstrual pain, irregular menstruation, amenorrhea, and postpartum abdominal pain: use *Huai Niu Xi* with *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis) and *Tao Ren* (Semen Persicae).

Difficult labor: combine *Huai Niu Xi* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Gui Ban* (Plastrum Testudinis).

Musculoskeletal pain due to external and sports injuries: *Huai Niu Xi* dispels stasis and is commonly used for musculoskeletal pain.

- Musculoskeletal pain due to external and sports injuries: use this herb with *Hong Hua* (Flos Carthami), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

3. Promotes Urination, Treats Dysuria

Hematuria, dysuria: *Huai Niu Xi* dispels damp-heat and eliminates blood stasis in the lower *jiao*, to treat burning sensations and pain on urination.

- Hematuria with burning sensations and pain during urination: use *Huai Niu Xi* with *Dang Gui* (Radicis Angelicae Sinensis), *Qu Mai* (Herba Dianthi), and *Hua Shi* (Talcum).

4. Directs Fire and Blood Downwards

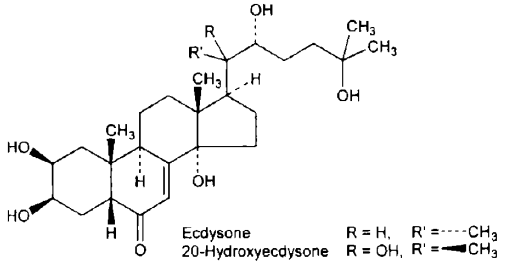
Abnormal bleeding because of fire flaring upwards: Clinical applications include hematemesis, epistaxis, toothache, ulcerations of the mouth and tongue, headache and dizziness. Furthermore, *Huai Niu Xi* tonifies Liver and Kidney yin help to anchor Liver yang and prevent Liver wind from rising upwards.

- Hematemesis and epistaxis: use this herb with *Xiao Ji* (Herba Cirisii), *Bai Mao Gen* (Rhizoma Imperatae), and *Zhi Zi* (Fructus Gardeniae).

Huai Niu Xi (Radix Achyranthis Bidentatae)

- Toothache or ulcerations of the tongue and mouth from yin-deficient fire: combine *Huai Niu Xi* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Zhi Mu* (Radix Anemarrhenae) and *Shi Gao* (Gypsum Fibrosum). **Exemplar Formula:** *Yu Nu Jian* (Jade Woman Decoction).
- Liver yang and Liver wind rising: use it with *Dai Zhe Shi* (Haematitum), *Mu Li* (Concha Ostreae) and *Gui Ban* (Plastrum Testudinis) to nourish yin and anchor yang. **Exemplar Formula:** *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction).

DOSAGE



10 to 15 grams in herbal decoction. Frying *Huai Niu Xi* with grain-based liquor enhances its effectiveness to invigorate blood circulation and open the channels and collaterals. Frying the herb with salt enables it to more readily enter the Kidney, and increases its potency to strengthen bones and tendons.

CAUTIONS / CONTRAINDICATIONS

- *Huai Niu Xi* is contraindicated during pregnancy, and in cases of profuse menstrual bleeding.

CHEMICAL COMPOSITION

Ecdysterone, inoteosterone, inokosterone, α-aminobutyric acid, betaine.[1,2]

Ecdysteroids

PHARMACOLOGICAL EFFECTS

- **Analgesic and anti-inflammatory:** Administration of *Huai Niu Xi* via intravenous, intraperitoneal, subcutaneous and oral routes have all demonstrated marked analgesic and anti-inflammatory effects in laboratory animals.[3]
- **Cardiovascular:** Decoction of *Huai Niu Xi* is associated with a mild hypotensive effect with a short duration of action.[4]
- **Uterine stimulant:** It has a stimulating effect on smooth muscle and leads to uterine contraction in rats and rabbits.[5]
- **Effect on pregnancy:** Administration of *Huai Niu Xi* in mice at the dosage of 250 to 500 mg/kg for up to 20 days is associated with a decreased percentage of fertilization and an increased risk of miscarriage.[6]

CLINICAL STUDIES AND RESEARCH

- **Dilation of cervical os:** Use of *Huai Niu Xi* was associated with marked dilation of the cervical os in 78 women who had abortions.[7]
- **Galacturia:** According to one report, 21 patients with galacturia were treated with a *Huai Niu Xi* preparation two to three times daily for 6 doses with marked improvement in 14, moderate improvement in 4, and no response in 3 patients. After the initial treatment, patients were placed on general tonic formulas for maintenance.[8]

TOXICOLOGY

The LD_{50} via intraperitoneal injection in mice is 6.4 g/kg for ecdysterone and 7.8 g/kg for inoteosterone. The LD_{50} in mice via oral administration for the combination of ecdysterone and inoteosterone is 9 g/kg. Oral administration of *Huai Niu Xi* decoction at the dosage of 60 g/kg/day for 30 days did not result in any abnormalities on examination of the blood, or of the liver, kidney, or other internal organs.[9,10]

SUPPLEMENT

- 土牛膝 / 土牛膝 *Tu Niu Xi* (Radix Achyranthes Longifolia), first cited in *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061, is bitter, sour and neutral. The botanical names for this herb are *Achyranthes longifolia* Mak. or *Achyranthes aspera* L. It activates blood circulation, dispels blood stasis, clears heat, eliminates toxins and promotes urination. Common applications include amenorrhea, arthritis, throat swelling and pain, diphtheria, edema of the lower extremities, hematuria and trauma-related pain. The dosage for *Tu Niu Xi* is 10 to 15 grams.

AUTHORS' COMMENTS

Please refer to *Chuan Niu Xi* (Radix Cyathulae) for a description of similarities and differences between *Huai Niu Xi* (Radix Achyranthis Bidentatae).

Ma Bian Cao (Herba Verbenae)

馬鞭草 马鞭草

Pinyin Name: *Ma Bian Cao*
Literal Name: "horse whip herb"
Alternate Chinese Names: *Long Ya Cao, Feng Jing Cao, Zi Ding Long Ya*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: verbena, European verbena
Botanical Name: *Verbena officinalis* L. (*Ma Bian Cao*)
Pharmaceutical Name: Herba Verbenae
Properties: bitter, cool
Channels Entered: Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Disperses Blood Stagnation

Blood stagnation: *Ma Bian Cao* (Herba Verbenae) enters *xue* (blood) level to treat amenorrhea, dysmenorrhea, abdominal masses, joint soreness and pain, pain from traumatic injuries, mass accumulation, and other disorders involving blood stagnation.

- Amenorrhea and dysmenorrhea: use this herb with *Xiang Fu* (Rhizoma Cyperi) and *Yi Mu Cao* (Herba Leonuri).
- Abdominal masses: combine it with *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- Joint pain and traumatic injuries: add it to *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Hong Hua* (Flos Carthami) and *Yan Hu Suo* (Rhizoma Corydalis).

2. Clears Heat and Eliminates Toxins

Toxic heat: *Ma Bian Cao* treats various presentations of toxic heat, such as sores and carbuncles, swollen and painful gums, sore throat, and diarrhea due to damp-heat. Fresh *Ma Bian Cao* is often used topically for this purpose.

- Carbuncles and sores: use *Ma Bian Cao* with *Pu Gong Ying* (Herba Taraxaci), *Zi Hua Di Ding* (Herba Violae) and *Ye Ju Hua* (Flos Chrysanthemi Indici).
- Swollen and painful gums: combine it with *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Sore throat: use with *She Gan* (Rhizoma Belamcandae), *Shan Dou Gen* (Radix Sophorae Tonkinensis) and *Ma Bo* (Lasiosphaera seu Calvatia).
- Diarrhea or dysentery: add this herb to *Bai Tou Weng* (Radix Pulsatillae) and *Qin Pi* (Cortex Fraxini).

3. Treats Malaria

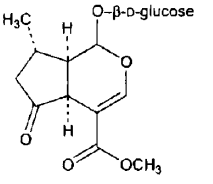
Use 30 grams of *Ma Bian Cao* 2 to 4 hours before the onset of malaria symptoms.

4. Promotes Diuresis and Reduces Edema

Ma Bian Cao is also used for treatment of edema, ascites and water accumulation during the late stages of parasitic infections.

- Edema and leg *qi*: use this herb with *Mu Gua* (Fructus Chaenomelis) and *Niu Xi* (Radix Cyathulae seu Achyranthis).
- Ascites: combine it with *Liu Ji Nu* (Herba Artemisiae Anomalae) and *Ban Bian Lian* (Herba Lobeliae Chinensis).

DOSAGE



15 to 30 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Ma Bian Cao* should be used with caution during pregnancy.

CHEMICAL COMPOSITION

Verbenalin, cornin, verbenol, stachyose, adenosine.[1,2]

Verbenalin

References

Jin Bu Huan (Herba Lycopodii Serrati)

金不換　金不換

Pinyin Name: *Jin Bu Huan*
Literal Name: "will not exchange for gold"
Alternate Chinese Names: *Qian Ceng Ta, Qi Chun Jin*
English Name: lycopodium
Botanical Name: *Lycopodium serratum* Thunb.
Pharmaceutical Name: Herba Lycopodii Serrati
Properties: acrid, sweet, neutral
Channels Entered: Lung, Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Disperses Blood Stagnation, Invigorates Blood Circulation and Stops Bleeding

Blood stagnation: *Jin Bu Huan* (Herba Lycopodii Serrati) treats blood-stagnation disorders including traumatic injuries, tendon pain and irregular menstruation due to blood stagnation.

- Traumatic injuries: use *Jin Bu Huan* with *Hong Hua* (Flos Carthami), *Ze Lan* (Herba Lycopi), *Dang Gui* (Radicis Angelicae Sinensis), *San Qi* (Radix Notoginseng), *Xiang Fu* (Rhizoma Cyperi), *Su Mu* (Lignum Sappan), *Yu Jin* (Radix Curcumae), *Yan Hu Suo* (Rhizoma Corydalis), and *Bai Shao* (Radix Paeoniae Alba).
- Tendon and bone pain: combine *Jin Bu Huan* with *Tao Ren* (Semen Persicae), *Sheng Di Huang* (Radix Rehmanniae), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Zhi* (Radix Angelicae Dahuricae), *Shen Jin Cao* (Herba Lycopodii) and *Hong Hua* (Flos Carthami).
- Irregular menstruation: add this herb to *Ma Bian Cao* (Herba Verbenae), *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae), *Chi Shao* (Radix Paeoniae Rubrae), *Dang Gui* (Radicis Angelicae Sinensis) and *Xiang Fu* (Rhizoma Cyperi).

2. Regulates Qi, Relieves Pain and Reduces Swelling and Abscess

- Lung abscess: use *Jin Bu Huan* with *Yu Xing Cao* (Herba Houttuyniae), *Yi Yi Ren* (Semen Coicis), *Lu Gen* (Rhizoma Phragmitis), *Da Qing Ye* (Folium Isatidis), *Yi Zhi Xiang* (Herba Vernoniae Cinereae) and *Bai Ji* (Rhizoma Bletillae).
- Hemorrhoids or hemorrhoidal bleeding: use this herb with *Huai Hua* (Flos Sophorae) and *Zao Jiao Ci* (Spina Gleditsiae).

DOSAGE

3 to 9 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use of *Jin Bu Huan* at a large dose may cause dizziness.

AUTHORS' COMMENTS

Jin Bu Huan literally means "will not exchange for gold," implying that the substance is so valuable that it is worth even more than gold. Because it has such a positive image and connotation, this name has been used for both the single herb and a patent product with multiple ingredients. Therefore, it is sometimes necessary to clarify whether the name "*Jin Bu Huan*" is used in reference to the single herb or the patent product.

Ye Ming Sha (Excrementum Vespertilionis Murini)

夜明砂

Pinyin Name: *Ye Ming Sha*
Literal Name: "night brightness sand"
Alternate Chinese Names: *Hei Sha Xing*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: bat droppings, bat dung
Zoological Name: *Vesperlitis superans* Thomas (*Bian Fu*)
Pharmaceutical Name: Excrementum Vespertilionis Murini
Properties: acrid, cold
Channels Entered: Liver

HINESE THERAPEUTIC ACTIONS

. Disperses Bruises and Resolves Stasis

Traumatic injuries: *Ye Ming Sha* (Excrementum Vespertilionis Murini) disperse bruises and removes stasis. It is commonly combined with qi- and blood-activating herbs to treat musculoskeletal injuries.

. Clears Liver Heat and Benefits the Eyes

Redness, pain and blood suffusion in the eyes: *Ye Ming Sha* treats eye disorders characterized by Liver heat and blood stasis. Clinical applications include redness and pain in the eyes, night blindness, visual obstruction and cataracts.

Eye disorders characterized by Liver heat and blood stasis: use 1.5 grams of *Ye Ming Sha* two times per day. It can also be used with other herbs that clear the Liver and benefit the eyes.

Blurred vision: use this herb with *Shi Jue Ming* (Concha Haliotidis) and *Gou Qi Zi* (Fructus Lycii).

Redness and pain in the eyes: add *Jue Ming Zi* (Semen Cassiae).

DOSAGE

3 to 10 grams in decoction, 1 to 2 grams in powder. *Ye Ming Sha* should be wrapped in cheesecloth before decoction.

CAUTIONS / CONTRAINDICATIONS

- *Ye Ming Sha* should be used with caution in patients who have eye disorders but no blood stasis.

CHEMICAL COMPOSITION

Urea, uric acid, cholesterol.[1]

CLINICAL STUDIES AND RESEARCH

- **Ocular blood suffusion:** Oral ingestion of 1.5 grams of *Ye Ming Sha* powder one to two times daily with warm water showed effectiveness in treating patients with ocular blood suffusion. It is especially effective in patients with recurrent conditions that do not respond to standard treatment.[2]

Chuan Shan Jia (Squama Manis)

穿山甲

Pinyin Name: *Chuan Shan Jia*
Literal Name: "penetrate mountain scale"
Alternate Chinese Names: *Lin Li*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: pangolin scales, anteater scales
Zoological Name: *Manis pentadactyia* L. (*Lin Li*)
Pharmaceutical Name: Squama Manis
Properties: salty, cool
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Opens Channels

Blood Stasis: *Chuan Shan Jia* (Squama Manis) has excellent penetrating and dispersing functions as its effects reach every organ and open every channel and collateral. Clinical applications include amenorrhea, abdominal masses, and *bi zheng* (painful obstruction syndrome).

- Amenorrhea due to blood stasis: *Chuan Shan Jia* is commonly used with *Dang Gui* (Radicis Angelicae Sinensis), *Hong Hua* (Flos Carthami) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Abdominal masses: use it with *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- *Bi zheng* (painful obstruction syndrome): combine this substance with *Dang Gui* (Radicis Angelicae Sinensis), *Du Huo* (Radix Angelicae Pubescentis) and *Qiang Huo* (Rhizoma et Radix Notopterygii).

2. Promotes Lactation

Insufficient lactation: *Chuan Shan Jia* aids lactation in cases in which blood stagnation is causing insufficient flow.

- Lack of or insufficient lactation: use this herb with *Wang Bu Liu Xing* (Semen Vaccariae).

3. Reduces Swelling, Drains Pus

Sores, scrofula, goiter: *Chuan Shan Jia* is commonly used to treat various types of sores, nodules, swellings, and hardness. It is effective for sores and nodules with or without pus formation. Sores with pus are treated with herbs that drain pus and eliminate toxins. Sores without pus are treated with herbs that clear heat and eliminate toxins. Ulcerated sores with pus should not be treated with this herb. Scrofula and goiter are treated with this and other herbs that eliminate stagnation of qi and blood.

- Sores with pus: combine *Chuan Shan Jia* with *Huang Qi* (Radix Astragali), *Zao Jiao Ci* (Spina Gleditsiae) and *Dang Gui* (Radicis Angelicae Sinensis).
- Sores without pus: use this substance with *Bai Zhi* (Radix Angelicae Dahuricae), *Pu Gong Ying* (Herba Taraxaci), and *Zi Hua Di Ding* (Herba Violae).
- Scrofula or goiter due to stagnation of phlegm and qi: use it with *Xuan Shen* (Radix Scrophulariae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Xia Ku Cao* (Spica Prunellae).

DOSAGE

3 to 10 grams in decoction, 1.0 to 1.5 grams in powder. The unprocessed form of *Chuan Shan Jia* is not suitable for decoction, as it is a hard substance and has a distinct odor. Dry-frying or vinegar-frying will eliminate the odor and facilitate the extraction of active constituents. In addition, frying the scales with vinegar facilitates the effect of dispersing stasis and relieving pain.

PHARMACOLOGICAL EFFECTS

- **Immunostimulant:** *Chuan Shan Jia* has been shown to increase the number of white blood cells.[1]
- **Hematological:** Oral administration of *Chuan Shan Jia* as decoction for 3 days significantly prolonged bleeding time in mice.[2]
- **Anti-inflammatory:** Oral administration of *Chuan Shan Jia* as decoction for one week showed significant reduction of ear inflammation in mice.[3]

CLINICAL STUDIES AND RESEARCH

- **Ovarian cancer:** Eight patients with ovarian cancer were treated with an herbal formula with satisfactory results. The formula contained herbs such as dry-fried *Chuan*

Chuan Shan Jia (Squama Manis)

Shan Jia, vinegar-fried *E Zhu* (Rhizoma Curcumae), vinegar-fried *San Leng* (Rhizoma Sparganii), vinegar-fried *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), vinegar-processed *Da Huang* (Radix et Rhizoma Rhei), *She Xiang* (Moschus), and others as needed. Individuals with larger-than-average ovarian cancer with constipation and dysuria also received purgative and cathartic herbs to promote bowel movement and urination.[4]

- **Hematuria:** One patient with hematuria treated one time daily with 1.5 grams of *Chuan Shan Jia* at bedtime, for 3 days, showed complete recovery. No recurrence was noted for over 1 year on follow-up.[5]

TOXICOLOGY

Abdominal fullness, lack of appetite, and yellow discoloration of the eyes and body, with normal liver function, was reported in one person after ingestion of 15 to 20 grams of *Chuan Shan Jia*. The patient promptly returned to normal after symptomatic treatment with Chinese herbs.[6]

Wang Bu Liu Xing (Semen Vaccariae)

王不留行

Pinyin Name: *Wang Bu Liu Xing*
Literal Name: "king who does not stay but departs"
Alternate Chinese Names: *Liu Xing Zi, Wang Bu Liu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: vaccaria seed, cow-herb seed, cow-fat seed, cow soapwort seed
Botanical Name: *Vaccaria segetalis* (neck.) Garcke (*Mai Lan Cai*)
Pharmaceutical Name: Semen Vaccariae
Properties: bitter, neutral
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Opens Channels

Dysmenorrhea, amenorrhea: *Wang Bu Liu Xing* (Semen Vaccariae) has a dispersing action that treats menstrual disorders with pain and swelling caused by blood stasis and obstruction of the channels.

- Irregular menstruation, menstrual pain, and amenorrhea arising from blood stasis: use *Wang Bu Liu Xing* with *Dang Gui* (Radicis Angelicae Sinensis), *Xiang Fu* (Rhizoma Cyperi), *Hong Hua* (Flos Carthami) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).

***Bi zheng* (painful obstruction syndrome):** *Wang Bu Liu Xing* also promotes blood circulation to open blockages in the channels and collaterals, to relieve arthritis.

- *Bi zheng*: use this herb with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), *Fang Feng* (Radix Saposhnikoviae), *Gui Zhi* (Ramulus Cinnamomi), *Hong Hua* (Flos Carthami), *Wei*

Wang Bu Liu Xing (Semen Vaccariae)

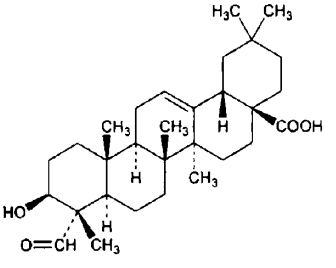
Ling Xian (Radix Clematidis), *Chi Shao* (Radix Paeoniae Rubrae) and *Ji Xue Teng* (Caulis Spatholobi).

2. Promotes Lactation, Drains Abscesses

Insufficient lactation, breast abscess: *Wang Bu Liu Xing* is commonly used to treat breast disorders. It has a dispersing function to promote lactation, and a draining action to treat abscesses and swelling of the breasts.

- Absence of lactation: use this herb with *Chuan Shan Jia* (Squama Manis).
- Insufficient lactation caused by emotional disturbances: use it with *Chuan Shan Jia* (Squama Manis), *Long Gu* (Os Draconis), *Qu Mai* (Herba Dianthi), and *Mai Men Dong* (Radix Ophiopogonis).
- Insufficient lactation from qi and blood deficiency: combine *Wang Bu Liu Xing* with *Huang Qi* (Radix Astragali) and *Dang Gui* (Radicis Angelicae Sinensis).
- Swelling and abscess of the breast: use it with *Pu Gong Ying* (Herba Taraxaci), *Lian Qiao* (Fructus Forsythiae), *Xia Ku Cao* (Spica Prunellae) and *Gua Lou Shi* (Fructus Trichosanthis).

DOSAGE



6 to 10 grams in herbal decoction. *Wang Bu Liu Xing* should be dry-fried and crushed to facilitate extraction of active constituents.

CAUTIONS / CONTRAINDICATIONS

- *Wang Bu Liu Xing* is contraindicated in pregnancy, as it stimulates contraction of the uterus.

CHEMICAL COMPOSITION

Vacsegoside, gypsogenin, vaccaroside, isosaponarin, saponaretin, vitexin, glucoronic acid, glucose, arabinose, xylose, fructose, rhamnose.[1,2]

Gypsogenin

PHARMACOLOGICAL EFFECTS

- **Uterine stimulant:** Administration of *Wang Bu Liu Xing* has a stimulating effect on the uterus, as demonstrated in animal studies. The alcohol extract of the herb had a stronger effect than the water extract.[3]

CLINICAL STUDIES AND RESEARCH

- **Induction of labor:** Decoction of large dosages of *Wang Bu Liu Xing* and *Ji Xing Zi* (Semen Impatientis) was used to induce labor in 4 women with varying degrees of success. Once the desired effect was achieved, ingestion of the decoction was immediately stopped, to prevent overstimulation of the uterus and thus minimize the possibility of adverse effects.[4]
- **Stones in the urinary tract:** In one study, 95 patients with stones in various parts of the urinary tract (from the kidneys to the bladder) were treated with an herbal decoction for an average of 89 doses, with an 88.4% rate of effectiveness. The herbal formula contained *Wang Bu Liu Xing*, *Ji Xing Zi* (Semen Impatientis), *Chuan Niu Xi* (Radix Cyathulae), *Zhi Ke* (Fructus Aurantii), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Shi Wei* (Folium Pyrrosiae), and *Bian Xu* (Herba Polygoni Avicularis).

TOXICOLOGY

Administration of *Wang Bu Liu Xing* was associated with one incident of increased photosensitivity in which the patient reported dermatitis, and swelling and edema and of the skin after prolonged exposure to the sun.[5]

Liu Ji Nu (Herba Artemisiae Anomalae)

劉寄奴 刘寄奴

Pinyin Name: *Liu Ji Nu*
Literal Name: "Liu's resident slave"
Alternate Chinese Names: *Hua Shi Dan, Nan Liu Ji Nu*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: artemisiae anomalae
Botanical Name: *Artemisia anomala* S. Moore (*Qi Hao*)
Pharmaceutical Name: Herba Artemisiae Anomalae
Properties: bitter, warm
Channels Entered: Heart, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Breaks Up Blood Stasis, Opens Channels

Amenorrhea, postpartum abdominal pain: *Liu Ji Nu* (Herba Artemisiae Anomalae) treats severe cases of blood stasis. Clinical applications include amenorrhea and abdominal pain.

- Amenorrhea or postpartum abdominal pain: use *Liu Ji Nu* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Chi Shao* (Radix Paeoniae Rubrae) and *Hong Hua* (Flos Carthami).

2. Disperses Blood Stagnation and Relieves Pain

Liu Ji Nu treats blood stagnation both externally and internally.

- External and traumatic injuries: use *Liu Ji Nu* with *Dang Gui* (Radicis Angelicae Sinensis), *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami).
- External or traumatic injuries with severe pain and blood stasis: use this herb with *Yan Hu Suo* (Rhizoma Corydalis) and *Gu Sui Bu* (Rhizoma Drynariae).
- Bleeding due to cuts: apply powdered *Liu Ji Nu* topically.
- Hepatomegaly or hepatitis: use it with *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), *Zao Jiao Ci* (Spina Gleditsiae), *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Bai Ji Li* (Fructus Tribuli), *Hong Hua* (Flos Carthami), *Ze Xie* (Rhizoma Alismatis), *Bing Lang* (Semen Arecae) and *Qian Cao* (Radix Rubiae).

3. Promotes Digestion, Eliminates Food Stagnation

Abdominal pain due to food stagnation: Aromatic in nature, *Liu Ji Nu* awakens the Spleen and Stomach to promote digestion and eliminate food stagnation. It treats the epigastric and abdominal distention and pain of indigestion.

- Indigestion: use *Liu Ji Nu* individually.
- Indigestion with food stasis: use this herb with *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis).

DOSAGE

3 to 10 grams in herbal decoction.

CAUTIONS / CONTRAINDICATIONS

- *Liu Ji Nu* is contraindicated during pregnancy.

CHEMICAL COMPOSITION

Essential oils 0.45%.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Liu Ji Nu* has an inhibitory effect against *Bacillus dysenteriae*.[2]

CLINICAL STUDIES AND RESEARCH

- **Heat stroke:** Decoction of *Liu Ji Nu* at the dosage of 50 to 100 grams was successful in treating 16 patients with mild, moderate or severe heat stroke.[3]
- **Bacterial dysentery:** Administration of *Liu Ji Nu* as pills four times daily for 5 days was effective in treating 34 patients with bacterial dysentery. The pills were made from water extract of the herb, with each dose containing 6 grams of dried herb. There was no recurrence of symptoms after one to three months of follow up.[4]

Su Mu (Lignum Sappan)

蘇木　苏木

Pinyin Name: *Su Mu*
Alternate Chinese Names: *Su Fang Mu*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: sappan wood
Botanical Name: *Caesalpinia sappan* L. (*Su Mu*)
Pharmaceutical Name: Lignum Sappan
Properties: sweet, salty, slightly acrid, neutral
Channels Entered: Heart, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Dispels Blood Stasis, Opens Channels and Relieves Pain

Amenorrhea, postpartum abdominal pain: *Su Mu* (Lignum Sappan) treats various disorders characterized by blood stasis and pain. It enters the *xue* (blood) level and eliminates blood stasis to relieve amenorrhea and postpartum abdominal pain.

- Amenorrhea and postpartum abdominal pain: use *Su Mu* with *Hong Hua* (Flos Carthami), *Dang Gui* (Radicis Angelicae Sinensis) and *Chi Shao* (Radix Paeoniae Rubrae).

Traumatic injuries, paralysis, chest and abdominal pain: *Su Mu* opens the peripheral channels and collaterals to relieve pain associated with paralysis, and with external or traumatic injuries.

- External or traumatic injuries: combine it with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), and *Xue Jie* (Sanguis Draconis).
- Paralysis, hemiplegia: use this herb with *Fang Feng* (Radix Saposhnikoviae), *Sang Zhi* (Ramulus Mori), *Hong Hua* (Flos Carthami), *Chi Shao* (Radix Paeoniae Rubrae), *Di Long* (Pheretima), *Jiang Huang* (Rhizoma Curcumae Longae), and *Dan Nan Xing* (Arisaema cum Bile).
- Chest and abdominal pain: use it with *Gua Lou Shi* (Fructus Trichosanthis), *Xie Bai* (Bulbus Allii Macrostemonis), *Tan Xiang* (Lignum Santali Albi), *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), *Hong Hua* (Flos Carthami), *Pu Huang* (Pollen Typhae), *Yuan Zhi* (Radix Polygalae) and *Bing Lang* (Semen Arecae).

DOSAGE

3 to 10 grams in decoction. The maximum dose of *Su Mu* is 15 grams.

CAUTIONS / CONTRAINDICATIONS

- *Su Mu* is contraindicated during pregnancy.

CHEMICAL COMPOSITION

Brazilin, brasilein, sappanin, a-1-phellandrene, ocimene.[1]

Su Mu (Lignum Sappan)

PHARMACOLOGICAL EFFECTS

- **Anti-inflammatory:** Brazilin has an anti-inflammatory effect, as demonstrated in animal studies.[2]
- **Cardiovascular:** Decoction of *Su Mu* has a positive inotropic effect on frog heart specimens.[3]
- **CNS suppressant:** *Su Mu* has sedative and hypnotic effects when administered via oral routes to mice, rabbits and guinea pigs. It counteracts seizures induced by strychnine.[4]
- **Antineoplastic:** Extract of *Su Mu* has demonstrated marked effectiveness in killing cancer cells in mice and prolonging life expectancy of those with cancer by 185%.[5]
- **Antibiotic:** It has inhibitory effect against *Corynebacterium diphtheriae*, *Salmonella typhi*, *Staphylococcus aureus*, β-hemolytic streptococcus, and *Diplococcus pneumoniae*.[6]

TOXICOLOGY

The LD_{50} for water extract of *Su Mu* in mice via intraperitoneal injection is 18.9 ml/kg.[7]

Gan Qi (Resina Toxicodendri)

干漆

Pinyin Name: *Gan Qi*
Literal Name: "dried lacquer"
Alternate Chinese Names: *Gan Qi Tan*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: dried lacquer
Botanical Name: *Toxicodendron vernicifluum* (Stokes) F.A. Barkl. (*Qi Shu*)
Pharmaceutical Name: Resina Toxicodendri
Properties: acrid, bitter, warm
Channels Entered: Liver, Stomach
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Breaks Blood Stagnation, Eliminates Blood Stasis, and Opens Channels

Blood stasis: Acrid, bitter, and dispersing, *Gan Qi* (Resina Toxicodendri) has a potent function to break down and eliminate blood stasis to treat severe cases of hardness, mass accumulation, and amenorrhea.

- For amenorrhea caused by blood stasis: use *Gan Qi* with *Da Huang* (Radix et Rhizoma Rhei), *Shui Zhi* (Hirudo), and *Tao Ren* (Semen Persicae).

2. Kills Parasites

Gan Qi has antiparasitic action and treats parasitic infestation accompanied by abdominal pain. However, it is rarely used for this now, as there are other more effective herbs.

DOSAGE

Gan Qi should be used only in pill or powder form, with a maximum of 0.06 to 0.1 gram [60 to 100mg] per dose. It should not be used in herbal decoctions. The unprocessed herb is slightly toxic and may damage *ying* (nutritive) and

Gan Qi (Resina Toxicodendri)

xue (blood) levels, and injure the Spleen and Stomach. Charring will reduce the toxicity of the herb.

CAUTIONS / CONTRAINDICATIONS

- *Gan Qi* is contraindicated in cases of pregnancy, and in the absence of blood stasis.
- *Gan Qi* is not recommended for use in cases of Stomach deficiency.

CHEMICAL COMPOSITION

Laccase.[1]

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 178

Mao Dong Qing (Radix Ilicis Pubescentis)

毛冬青

Pinyin Name: *Mao Dong Qing*
Original Source: *Guangxi Zhong Yao Zhi* (Guangxi Journal of Chinese Herbal Medicines)
English Name: ilex pubescentis
Botanical Name: *Ilex pubescens* Hook. et Arn. (*Mao Dong Qing*)
Pharmaceutical Name: Radix Ilicis Pubescentis
Properties: bitter, astringent, neutral
Channels Entered: Heart

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Opens Channels

***Xiong bi* (painful obstruction of the chest), paralysis:** *Mao Dong Qing* (Radix Ilicis Pubescentis) enters the *xue* (blood) level and disperses blood stagnation secondary to stroke or heart disorders.

- *Xiong bi*, paralysis: combine *Mao Dong Qing* with *Dan Shen* (Radix Salviae Miltiorrhizae), *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).

2. Clears Heat and Eliminates Toxins

Mao Dong Qing treats coughing and sore and swollen throat caused by Lung heat. When applied topically in powder form, this herb also treats burns.

- Cough: use this herb with *Huang Qin* (Radix Scutellariae) and *Gua Lou Shi* (Fructus Trichosanthis).
- Sore and swollen throat: use it with *Ma Bo* (Lasiosphaera seu Calvatia) and *She Gan* (Rhizoma Belamcandae).

DOSAGE

30 to 60 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use of *Mao Dong Qing* is not recommended for deficiency patients.

CHEMICAL COMPOSITION

Ilexolide A, ilexsaponin A.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Preparations of *Mao Dong Qing* have shown marked effectiveness to dilate blood vessels and increase blood perfusion to the coronary arteries. It has positive inotropic and antiarrhythmic effects in rabbits. It also has anticoagulant effects.[2]

Mao Dong Qing (Radix Ilicis Pubescentis)

- **Others:** *Mao Dong Qing* has antitussive, expectorant, antiasthmatic and antibiotic effects.[3]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease:** In one study, 274 patients with coronary artery disease were treated with a preparation of *Mao Dong Qing*. After the treatment, the study reported significant relief of chest pain in 60.7% of the patients, and moderate relief in 28.6%. The overall rate of effectiveness was 89.3%. No abnormalities were noted in liver and kidney function or shown by blood tests.[4]
- **Ischemic stroke:** A preparation of *Mao Dong Qing* was used to treat 20 patients with ischemic stroke, with a 95% rate of effectiveness.[5]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Mao Dong Qing* has a mild anticoagulant effect, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[6] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

Ding Jing Cao (Herba Linderniae)

定經草 定经草

Pinyin Name: *Ding Jing Cao*
Literal Name: "settle the menses herb"
Alternate Chinese Names: *Ya She Huang, Jia She Huang, Long Jiao Cao*
English Name: lindernia
Botanical Name: *Lindernia anagallis* (Burm.f.) Pennell
Pharmaceutical Name: Herba Linderniae
Properties: sweet, slightly bitter, neutral
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Invigorates Blood Circulation, Nourishes Blood and Regulates Menses

Irregular menstruation: *Ding Jing Cao* (Herba Linderniae) treats irregular menstruation that arises from blood stagnation secondary to blood deficiency. Lack of nourishment of blood, and stagnation in the *ren* (conception) and *chong* (thoroughfare) channels, will manifest in irregular menstruation with pale blood and clots.

- Irregular menstruation: use *Ding Jing Cao* with *Xiang Fu* (Rhizoma Cyperi), *Tao Ren* (Semen Persicae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) and *Dang Gui* (Radicis Angelicae Sinensis).

2. Tonifies the Kidney

White vaginal discharge: *Ding Jing Cao* treats Kidney qi deficiency manifesting in clear or white vaginal discharge.

- White vaginal discharge: use this herb with *Bai Long Chuan Hua Tou* (Radix Clerodendron Paniculatum).

DOSAGE

5 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- Use of *Ding Jing Cao* is contraindicated during pregnancy.

Ji Xue Teng (Caulis Spatholobi)

雞血藤　鸡血藤

Pinyin Name: *Ji Xue Teng*
Literal Name: "chicken blood vine"
Alternate Chinese Names: *Shan Ji Xue Teng*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: spatholobus, sub-erect spatholobus stem
Botanical Name: *Spatholobus suberectus* Dunn. (*San Ye Ji Xue Teng*). *Milletia dielsiana* Harms. (*Shan Ji Xue Teng*) and *Millettia reticulata* Benth. (*Kun Ming Ji Xue Teng*) are sometimes used as substitutes.
Pharmaceutical Name: Caulis Spatholobi
Properties: bitter, slightly sweet, warm
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Activates Blood Circulation, Tonifies Blood

Menstrual disorders: *Ji Xue Teng* (Caulis Spatholobi) treats gynecological disorders such as irregular menstruation, menstrual pain, cramps, and amenorrhea from either blood stagnation or deficiency.

- Menstrual disorders: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Bai Shao* (Radix Paeoniae Alba).

2. Relaxes the Tendons, Opens the Channels and Collaterals

***Bi zheng* (painful obstruction syndrome):** *Ji Xue Teng* treats musculoskeletal pain by unblocking stagnation in peripheral channels and collaterals. Usually the cause of this stagnation is either blood stagnation or blood deficiency.

- *Bi zheng* arising from blood deficiency: add *Ji Xue Teng* to *Niu Xi* (Radix Cyathulae seu Achyranthis), *Sang Ji Sheng* (Herba Taxilli) and *Du Huo* (Radix Angelicae Pubescentis).
- *Bi zheng* caused by blood stasis: use it with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Wei Ling Xian* (Radix Clematidis), *Luo Shi Teng* (Caulis Trachelospermi), and *Dang Gui* (Radicis Angelicae Sinensis).

DOSAGE

10 to 15 grams. The maximum dose of *Ji Xue Teng* is 30 grams.

CAUTIONS / CONTRAINDICATIONS

- Use *Ji Xue Teng* with caution in cases of hypermenorrhea. *Ji Xue Teng* is contraindicated during pregnancy because of its stimulating effect on the uterus.

CHEMICAL COMPOSITION

Formononetin, ononin, prunetin, afromosin, cajinin, licochalcone A, isoliquiritigenin, 2,4-tetrahydroxychalcone, procatechuic acid, (-) epicatechin, 3,7-dihydroxy-6-methoxyflavanonol, daucosterol, 7-carbonyl-β-sitosterol.[1]

PHARMACOLOGICAL EFFECTS

- **Sedative and hypnotic:** Intraperitoneal injections of *Ji Xue Teng* have demonstrated both sedative and hypnotic influences in rats.[2]
- **Cardiovascular:** Administration of herbal decoction at the dosage of 0.5 g/kg in rabbits or 0.3 g/kg in dogs lowered blood pressure.[3]
- **Uterine stimulant:** Administration of *Ji Xue Teng* decoction has a stimulating effect on the uterus in both pregnant and non-pregnant laboratory animals.[4]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease:** In one double-blind study, 38 patients with coronary artery disease were randomly divided into two groups. Group one received 2 weeks of dipyridamole followed by 2 weeks of an herbal remedy containing *Ji Xue Teng* and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). Group two received the same herbal and dipyridamole treatments, but in reversed order. Both groups showed improvement based on symptomatic and ECG evaluations, with no statistically-significant difference between them.[5]
- **Neutropenia:** In one clinical study, administration of *Ji Xue Teng* in syrup or pills three times daily for 3 to 5 days showed a marked increase in neutrophils and some increase in red blood cells starting on the third day.[6]

Ji Xue Teng (Caulis Spatholobi)

SUPPLEMENT

- 紅藤 / 红藤 *Hong Teng* (Caulis Sargentodoxae), *Sargentodoxa cuneata* (Oliv) Rehd. et. Wils., is sometimes used interchangeably as *Ji Xue Teng* in some parts of China. Both herbs activate blood circulation, open the channels and collaterals, and relieve pain. The difference, however, is that *Hong Teng* treats intestinal abscess while *Ji Xue Teng* tonifies blood. These two herbs have some similarities yet significantly distinct functions, and should not be confused, or substituted for each other.

San Leng (Rhizoma Sparganii)

三稜　三棱

Pinyin Name: *San Leng*
Literal Name: "three edges"
Alternate Chinese Names: *Jing San Leng*, *Hei San Leng*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: sparganium, common bur-reed rhizome
Botanical Name: *Sparganium stoloniferum* Buch.-Ham. (*Hei San Leng*); *Scirpus flaviatilis* (*Jing San Leng*) is sometimes used as a substitute in Northern China.
Pharmaceutical Name: Rhizoma Sparganii
Properties: bitter, neutral
Channels Entered: Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Breaks and Dispels Blood Stasis

Amenorrhea, abdominal pain, masses: *San Leng* (Rhizoma Sparganii) breaks up severe blood stasis, a condition characterized by palpable masses and severe pain. This is one of the strongest blood-moving herbs and is often reserved for the most serious conditions. It enters the *xue* (blood) level and strongly invigorates circulation to break open any stagnation.

- Abdominal pain, amenorrhea or abdominal masses due to blood stasis: use *San Leng* with *E Zhu* (Rhizoma Curcumae), *Niu Xi* (Radix Cyathulae seu Achyranthis) and *Yan Hu Suo* (Rhizoma Corydalis).

2. Activates Qi Circulation and Relieves Pain

Epigastric and abdominal distention and pain: In addition to breaking up blood stasis, *San Leng* disperses qi and relieves pain. Clinical applications include epigastric and abdominal distention and pain due to qi stagnation and indigestion.

- Epigastric and abdominal distention and pain due to qi stagnation and indigestion: use *San Leng* with *E Zhu* (Rhizoma Curcumae), *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Shan Zha* (Fructus Crataegi).
- Epigastric and abdominal pain from Spleen deficiency: use this herb with *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Splenomegaly or hepatomegaly: add *San Leng* to *E Zhu* (Rhizoma Curcumae), *Mu Li* (Concha Ostreae), *Bie Jia* (Carapax Trionycis), *Chuan Shan Jia* (Squama Manis), *Hong Hua* (Flos Carthami) and *Tao Ren* (Semen Persicae).

San Leng (Rhizoma Sparganii)

DOSAGE

3 to 10 grams in herbal decoction. Frying *San Leng* with vinegar enhances its effect to invigorate blood circulation, eliminate blood stasis, and relieve pain.

CAUTIONS / CONTRAINDICATIONS

- *San Leng* is contraindicated during pregnancy or in cases of hypermenorrhea.

CHEMICAL COMPOSITION

Essential oils, starch.[1]

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** *San Leng* has demonstrated an inhibitory effect on cancer cells.[2]
- **Gastrointestinal:** Decoction of *San Leng* has repeatedly demonstrated a stimulating effect on the smooth muscle of the intestines, leading to muscle contractions. This effect is negated by atropine.[3]
- **Hematological:** In one report, 10 grams of *San Leng* administered via herbal decoction demonstrated marked effectiveness to inhibit aggregation of platelets and prolong thrombin time.[4]

CLINICAL STUDIES AND RESEARCH

- **Ectopic pregnancy:** According to one report, 25 patients with ectopic pregnancies were treated with up to 92% effectiveness using an herbal formula containing *San Leng*, *E Zhu* (Rhizoma Curcumae), *Shui Zhi* (Hirudo), *Mu Li* (Concha Ostreae), *Dan Shen* (Radix Salviae Miltiorrhizae) and other herbs as deemed necessary.[5]
- **Hepatic carcinoma:** Patients with hepatic carcinoma were treated with both herbal injection and powder with a 43.3% rate of effectiveness. Out of 30 patients, the study reported marked improvement in 3 patients, slight improvement in 10 patients, and no response in 17 patients. The herbal injection contained *San Leng* and *E Zhu* (Rhizoma Curcumae); the herbal powder contained *San Leng*, *E Zhu*, *Shui Zhi* (Hirudo), *Wa Leng Zi* (Concha Arcae), *Su Mu* (Lignum Sappan), *Hong Hua* (Flos Carthami), *Yan Hu Suo* (Rhizoma Corydalis), *Xiang Fu* (Rhizoma Cyperi), *Mu Xiang* (Radix Aucklandiae), *Sha Ren* (Fructus Amomi), *Chen Pi* (Pericarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae), *Hou Po* (Cortex Magnoliae Officinalis), *Zhi Shi* (Fructus Aurantii Immaturus), *Da Huang* (Radix et Rhizoma Rhei) and *Chuan Mu Tong* (Caulis Clematidis Armandii). No significant side effects were reported.[6]
- **Malignant tumor:** In one study, 31 patients at terminal stages of malignant cancers were treated with an herbal formula, including *San Leng*, with marked improvement in 5 patients, slight improvement in 19 patients, and no response in 7 patients. The types of cancer treated included stomach, liver, esophageal, cervical, breast, rectal, lung, and lymphatic.[7]

HERB-DRUG INTERACTION

Anticoagulant or antiplatelet drugs: *San Leng* should be used with caution in patients receiving anticoagulant or antiplatelet medications as the combination may lead to additive or synergistic effects. Though this potential interaction has not been documented, the use of *San Leng* may potentiate the effect of drugs such as warfarin.[8] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

The LD_{50} for oral administration of *San Leng* in mice is 233.9 +/- 9.9 g/kg. At the lethal level, there were seizures, convulsions and respiratory suppression prior to fatality.[9]

AUTHORS' COMMENTS

It is important to remember the basic concept that "it takes qi to move qi, and it takes blood to move blood." Therefore, when herbs are prescribed to move the blood and break up blood stasis, it is important to ensure that the fundamental constitution of the patient is strong enough to tolerate such aggressive treatment. *San Leng* and *E Zhu* (Rhizoma Curcumae) are two of the strongest herbs and are commonly used synergistically to break open stagnation. *San Leng* has a stronger function to break blood stasis while *E Zhu* is stronger in breaking qi stagnation. In patients with deficient conditions, these two should be used with tonic herbs to strengthen the Spleen, to ensure that the herbs do not damage the body.

E Zhu (Rhizoma Curcumae)

莪术 莪朮

Pinyin Name: *E Zhu*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: curcuma zedoaria
Botanical Name: *Curcuma zedoaria* (Berg.) Rosc. (*E Zhu*); *Curcuma aromatica* Salisb. (*Yu Yin*); *Curcuma kwangsiensis* S. Lee et. C.F. Liang. (*Guang Xi E Zhu*)
Pharmaceutical Name: Rhizoma Curcumae
Properties: bitter, acrid, warm
Channels Entered: Spleen, Liver

CHINESE THERAPEUTIC ACTIONS

1. Invigorates Blood Circulation and Breaks Up Blood Stasis

Amenorrhea, abdominal pain: *E Zhu* (Rhizoma Curcumae) strongly works to break up chronic or severe blood stasis. It is usually used in cases where all other blood-invigorating herbs have failed to show satisfactory results. Most commonly, this herb treats blood stagnation in the *chong* (thoroughfare) channel that has resulted in amenorrhea and/or lower abdominal pain, a condition often characterized by palpable masses and severe pain.

- Amenorrhea due to blood stasis: use *E Zhu* with *San Leng* (Rhizoma Sparganii), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Niu Xi* (Radix Cyathulae seu Achyranthis).

Palpable masses: *E Zhu* is used when a prolonged period of blood stagnation results in palpable abdominal masses.

- Palpable masses in the abdomen due to blood stasis: combine *E Zhu* with *Bie Jia* (Carapax Trionycis), *Dan Shen* (Radix Salviae Miltiorrhizae) and *San Leng* (Rhizoma Sparganii).
- Epigastric distention and hardness: use this herb with *Shen Qu* (Massa Fermentata), *Mai Ya* (Fructus Hordei Germinatus), *Lai Fu Zi* (Semen Raphani), *Ban Xia* (Rhizoma Pinelliae), *Huang Lian* (Rhizoma Coptidis) and *Zhi Shi* (Fructus Aurantii Immaturus).
- Hypochondriac distention and hardness of the right rib cage: use *E Zhu* with *Chai Hu* (Radix Bupleuri), *Zhi Ke* (Fructus Aurantii), *Mu Li* (Concha Ostreae) and *Jiang Huang* (Rhizoma Curcumae Longae).
- Hypochondriac distention and hardness of the left rib cage: use it with *Chai Hu* (Radix Bupleuri), *Bie Jia* (Carapax Trionycis) and *She Gan* (Rhizoma Belamcandae).
- Periumbilical or lower abdominal masses: combine it with *Xiang Fu* (Rhizoma Cyperi), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Dan Shen* (Radix Salviae Miltiorrhizae) and *Yu Jin* (Radix Curcumae).
- Palpable masses in the abdomen: add this herb to *Yan Hu Suo* (Rhizoma Corydalis), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Ze Lan* (Herba Lycopi), *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) and *Meng Chong* (Tabanus).

2. Activates Qi Circulation and Relieves Pain

Epigastric and abdominal fullness, distention and pain: *E Zhu* treats abdominal distention and pain secondary to indigestion, and qi stagnation due to deficiency of the Spleen and Stomach. It is often used to promote digestion by increasing the circulation of qi and blood.

- Abdominal pain due to qi stagnation and indigestion: use *E Zhu* with *San Leng* (Rhizoma Sparganii), *Mu Xiang* (Radix Aucklandiae), and *Zhi Shi* (Fructus Aurantii Immaturus).
- Abdominal fullness and pain due to Spleen deficiency: combine this herb with *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

DOSAGE

3 to 10 grams in herbal decoction. Frying *E Zhu* with vinegar enhances its potency to disperse stasis and relieve pain.

CAUTIONS / CONTRAINDICATIONS

- *E Zhu* is contraindicated in deficiency patients, or those with hypermenorrhea.
- *E Zhu* is contraindicated during pregnancy.

CHEMICAL COMPOSITION

Zederone, zedoarone, furanodine, curzerene, furano-

E Zhu (Rhizoma Curcumae)

dienone, isofuranodienone, curzerenone, epicurzerenone, curdione, curcolone, curcumenol, procurcumenol, isocurmenol, curcumol, curcumadiol, curcumin.[1,2,3]

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** Intraperitoneal injection of a 100% *E Zhu* solution showed satisfactory results in treatment of sarcoma and cervical carcinoma in mice.[4]
- **Antibiotic:** It has an inhibitory effect on *Staphylococcus aureus*, β-hemolytic streptococcus, *E. coli*, *Salmonella typhi*, and *Vibrio cholerae*.[5]
- **Hematological:** The essential oil of *E Zhu* prolongs the aggregation of platelets and prevents the formation of thrombi.[6]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease (CAD):** Patients with CAD were treated with intramuscular injection of an herbal preparation twice daily for 14 days per treatment course for a total of two courses. Each dose of the herbal injectable contained 2 grams each of *E Zhu*, *San Leng* (Rhizoma Sparganii), *An Ye* (Folium Eucalypti Globuli), *Xiang Fu* (Rhizoma Cyperi) and *Jiang Xiang* (Lignum Dalbergiae Odoriferae). Out of 35 patients, the study reported 82.8% effectiveness based on symptom evaluation, and 66.7% effectiveness based on ECG evaluation.[7]
- **Chronic obstructive pulmonary disease (COPD):** In one study, 37 patients with COPD were treated with herbal formulas, with significant improvement in 16 patients, moderate improvement in 16 patients, and no response in 5 patients. The herbal formula contained *E Zhu*, *Fen Fang Ji* (Radix Stephaniae Tetandrae), and *Ma Bian Cao* (Herba Verbenae), with modifications to treat qi deficiency, yang deficiency, and *wei* (defensive) *qi* deficiency.[8]
- **Malignant cancer:** Patients with malignant cancers, including stomach, lung, liver, and esophageal cancers, were treated with intravenous infusion of an herbal solution daily. The herbal injection was prepared by mixing 60 to 100 ml of 150% *E Zhu* solution with 500 ml of D5W. Out of 19 patients, the study reported complete recovery in 1 case, marked effectiveness in 4 cases, slight improvement in 3 case, and no response in 11 cases.[9]
- **Neurodermatitis:** Intramuscular injection of an herbal solution to acupuncture points was used to treat patients with neurodermatitis. The herbal injectable contained *E Zhu* and *San Leng* (Rhizoma Sparganii). The acupuncture points selected included *Quchi* (LI 11) and *Xuehai* (SP 10). Out of 48 patients, the study reported marked improvement in 21 patients, moderate improvement in 9 patients, slight improvement in 9 patients, and no response in 9 patients.[10]
- **Psychiatric disorders with blood stasis:** In one report, 71 patients with schizophrenia or mania, characterized by excess yang and blood stagnation, were treated with 6 to 8 pills of an herbal formula three times daily for 30 days, with a 59.1% rate of effectiveness. Most patients responded within 2 to 4 weeks of therapy. Each pill of the herbal formula was equivalent to 8 grams of bulk herbs, with a 10:3:3 ratio of *E Zhu*, *Chi Shao* (Radix Paeoniae Rubrae), and *Da Huang* (Radix et Rhizoma Rhei), respectively.[11]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *E Zhu* should be used with caution in patients receiving anticoagulant or antiplatelet medications, as the combination may lead to additive or synergistic effect. Though this potential interaction has not been documented, the use of *E Zhu* may potentiate the effect of drugs such as warfarin.[12] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

The LD_{50} of *E Zhu* extract in mice is 147.0 g/kg via oral ingestion and 55 g/kg via intramuscular injection.[13]

AUTHORS' COMMENTS

Traditionally, *E Zhu* has been used as one of the stronger herbs to break blood stagnation. It is used today to break masses in cases of tumors or cancer. From animal testing and actual case reports, this herb seems to be most effective against cervical cancer.

E Zhu and *San Leng* (Rhizoma Sparganii) are often used together synergistically to break blood stagnation. *E Zhu* enters *qi* (energy) level and is stronger in breaking qi stagnation. *San Leng* enters *xue* (blood) level and has a stronger function to break blood stasis.

According to Dr. Lu Zhi-Zheng, the combination of *E Zhu* and *Jiang Can* (Bombyx Batryticatus) can treat intestinal polyps.

Shui Zhi (Hirudo)

水蛭

Pinyin Name: *Shui Zhi*
Literal Name: "leech"
Alternate Chinese Names: *Ma Huang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: medicinal leech
Zoological Name: *Hirudo nipponica* Whitman (*Shui Zhi*); *Whitmania pigra* Whitman (*Ma Huang*); *Whitmania acranulata* Whitman. (*Liu Ye Ma Huang*)
Pharmaceutical Name: Hirudo
Properties: salty, bitter, neutral
Channels Entered: Liver
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

Breaks Up and Eliminates Blood Stasis

Amenorrhea, palpable masses, traumatic injuries: *Shui Zhi* (Hirudo) is one of the strongest medicinal substances to treat disorders characterized by severe blood stasis. Clinical applications include amenorrhea, immobile abdominal masses, and external and traumatic injuries. *Shui Zhi* is not suitable for amenorrhea caused by deficiency and other cases of deficiency, as its action may damage the patient's constitution.

- Amenorrhea and immobile abdominal masses due to blood stasis: use *Shui Zhi* with *Tao Ren* (Semen Persicae), *Da Huang* (Radix et Rhizoma Rhei) and *Meng Chong* (Tabanus).
- Amenorrhea due to blood stasis in deficiency: combine it with *Ren Shen* (Radix Ginseng) and *Shu Di Huang* (Radix Rehmanniae Preparata) to prevent injury to *zheng* (upright) *qi*.
- External and traumatic injuries with severe pain, bruises, chest and abdominal pain, anuria and constipation: use it with *Da Huang* (Radix et Rhizoma Rhei) and *Qian Niu Zi* (Semen Pharbitidis).
- Abdominal pain and hardness with black, tarry stool: add *Shui Zhi* to *Meng Chong* (Tabanus) and *Tao Ren* (Semen Persicae).

DOSAGE

3 to 6 grams in decoction, 0.3 to 0.6 grams in powder. Dry-frying *Shui Zhi* minimizes its toxicity, reduces odor, and facilitates extraction of active components.

CAUTIONS / CONTRAINDICATIONS

- *Shui Zhi* is contraindicated during pregnancy, and for those who do not have blood stagnation.

CHEMICAL COMPOSITION

Hirudin.[1]

PHARMACOLOGICAL EFFECTS

- **Anticoagulant:** Hirudin is generally considered to be

Shui Zhi (Hirudo)

one of the most effective anticoagulant substances. It interferes with the effect of thrombin to prevent fibrinogen formation and therefore, prevents coagulation.[2]

- **Antihyperlipidemic:** Administration of *Shui Zhi* powder is associated with a marked reduction of total cholesterol and triglyceride levels.[3]
- **Effect on pregnancy:** Administration of a 40% *Shui Zhi* preparation terminated pregnancy in a positive dose-effect relationship in mice. This effect is observed in the first, second and third trimesters of pregnancy.[4]

CLINICAL STUDIES AND RESEARCH

- **Cor pulmonale:** According to one report, 130 patients with cor pulmonale were divided into two groups, with 63 patients receiving 1 gram of *Shui Zhi* powder three times daily and 67 patients receiving a placebo. Patients in both groups were of similar age and presentation of "blood stasis." After 2 weeks, the treatment group showed 90.5% improvement while the placebo group showed 77.6% improvement. Patients in the treatment group also showed more improvement than the placebo group in symptoms such as chest oppression and dyspnea.[5]
- **Thrombotic phlebitis:** Twenty patients with thrombotic phlebitis in the lower extremities or trunk were treated with an herbal formula for 25 to 33 doses with a 100% success rate; with no recurrence during the 6 month follow-up. The herbal formula contained *Shui Zhi*, *Dang Gui* (Radicis Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubrae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Hong Hua* (Flos Carthami), *Chuan Niu Xi* (Radix Cyathulae), and *Huang Qi* (Radix Astragali). Herbal paste was used topically to reduce swelling and relieve pain.[6]
- **Thrombocytosis:** An herbal decoction was used to treat 18 patients with thrombocytosis 5 to 8 days post-splenectomy, with marked effectiveness. The herbal decoction contained *Shui Zhi*, *Meng Chong* (Tabanus), *Di Bie Chong* (Eupolyphaga), *Tao Ren* (Semen Persicae), *Mu Dan Pi* (Cortex Moutan), *Chi Shao* (Radix Paeoniae Rubrae), *Sheng Di Huang* (Radix Rehmanniae), *Pu Huang* (Pollen Typhae), and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).[7]
- **Hypercholesterolemia:** In one study, 25 patients with high cholesterol levels were treated with 3 to 5 grams of *Shui Zhi* powder once daily at bedtime for 30 days. The study reported an average reduction of 23.24 mg/dL in cholesterol and 144.52 mg/dL in triglycerides. No adverse reactions were observed in regards to liver function, red blood cells, or coagulation time. The rate of effectiveness was 91%.[8]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Shui Zhi* should be used with caution for patients receiving anticoagulant or antiplatelet medications, as the combination may lead to additive or synergistic effect. Though this potential interaction has not been documented, the use of *Shui Zhi* may potentiate the effect of drugs such as warfarin.[9] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

No significant side effects have been associated with intravenous or subcutaneous injection of hirudin. Administration of hirudin in mice at the dosage of 1 mg/kg for four weeks did not show any adverse effect to liver or kidney functions. The LD_{50} in mice for subcutaneous injection of decoction of *Shui Zhi* is 15.24 +/- 2.04 g/kg.[10]

AUTHORS' COMMENTS

The use of *Shui Zhi* as a medicinal substance is well-documented in many countries and many cultures. Hirudin, a natural substance present in *Shui Zhi*, is one of the components responsible for its anticoagulant effect. The therapeutic effect of hirudin is also the foundation for approval of a new pharmaceutical drug, lepirudin (Refludan). Structurally, lepirudin is identical to hirudin except for a few minor chemical changes. In 1998, lepirudin was patented and approved by the Food and Drug Administration as an anticoagulant medication for the treatment of thromboembolic disease.[11]

Meng Chong (Tabanus), *Di Bie Chong* (Eupolyphaga) and *Shui Zhi* (Hirudo) are all very strong substances to break open severe blood stasis. They can easily injure qi if not used properly. When necessary, tonic herbs should be added to prevent damage. Of the three substances, *Meng Chong* is the strongest, followed by *Shui Zhi*, and then *Di Bie Chong*. Practitioners should select these substances in accordance with the patient's constitution and condition.

Meng Chong (Tabanus)

蛀蟲 蛀虫

Pinyin Name: *Meng Chong*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: tabanus, gadfly
Zoological Name: *Tabanus bivttatus* Matsumura (*Fu Dai Mang*)
Pharmaceutical Name: Tabanus
Properties: bitter, cool
Channels Entered: Liver
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

Breaks Up and Eliminates Blood Stasis

Amenorrhea, palpable masses, traumatic injuries: *Meng Chong* (Tabanus) enters the *xue* (blood) level in the Liver channel. It has a potent effect to treat disorders characterized by severe blood stasis. Clinical applications include amenorrhea, irregular menstruation, traumatic injuries and external injuries.

- Amenorrhea due to blood stagnation, palpable masses: use *Meng Chong* with *Shui Zhi* (Hirudo), *Di Bie Chong* (Eupolyphaga) and *Da Huang* (Radix et Rhizoma Rhei).
- Irregular menstruation or postpartum bleeding and pain: use this herb with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shui Zhi* (Hirudo) and *Tao Ren* (Semen Persicae).
- Pain from traumatic injuries: combine *Meng Chong* with *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

DOSAGE

1 to 1.5 grams in decoction, 0.3 gram in powder.

CAUTIONS / CONTRAINDICATIONS

- *Meng Chong* is contraindicated during pregnancy.

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Meng Chong* is associated with increased resistance to hypoxia in mice. In rabbits, it has a positive inotropic effect, and increased blood perfusion to peripheral parts of the body.[1]

CLINICAL STUDIES AND RESEARCH

- **Angina:** In a clinical study, 18 patients with angina were treated with an herbal formula containing *Meng Chong* and *Chen Pi* (Pericarpium Citri Reticulatae). The treatment protocol was daily administration of herbs for 30 consecutive days. Out of 18 patients, the study reported marked improvement in 12 and mild improvement in 6 patients. ECG was improved in 72.2% of patients. No significant changes were reported with plasma cholesterol levels.[2]

AUTHORS' COMMENTS

Meng Chong, *Di Bie Chong* (Eupolyphaga) and *Shui Zhi* (Hirudo) are all very strong substances to break open severe blood stasis. They can easily injure qi if not used properly. When necessary, tonic herbs should be added to prevent damage. Of the three substances, *Meng Chong* is the strongest, followed by *Shui Zhi*, and then *Di Bie Chong*. Practitioners should select these substances in accordance with the patient's constitution and condition.

Channels Entered: Liver
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Breaks and Eliminates Blood Stasis

Amenorrhea, postpartum abdominal pain, palpable masses in the abdomen: *Di Bie Chong* (Eupolyphaga) treats various disorders characterized by severe blood stasis, such as amenorrhea, immobile abdominal masses, dry skin, afternoon fevers, traumatic injuries, and external injuries. It is a strong and indispensable herb for breaking masses due to blood stagnation.

- Amenorrhea caused by blood stasis: combine *Di Bie Chong* with *Da Huang* (Radix et Rhizoma Rhei), *Shui Zhi* (Hirudo) and *Meng Chong* (Tabanus).
- Menstrual pain or postpartum abdominal pain from blood stasis: use this herb with *Da Huang* (Radix et Rhizoma Rhei) and *Tao Ren* (Semen Persicae).
- Immobile abdominal masses due to blood stasis: add it to *Bie Jia* (Carapax Trionycis), *San Leng* (Rhizoma Sparganii) and *Mu Dan Pi* (Cortex Moutan).

2. Connects Tendons, Fuses Bones

Traumatic injuries, bone fractures: *Di Bie Chong* treats traumatic injuries and external injuries, including torn tendons and ligaments, and bone fractures.

- Injuries to tendons, ligaments and bones: use *Di Bie Chong* with *Zi Ran Tong* (Pyritum), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- External or traumatic injuries with bruises and pain: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).

DOSAGE

3 to 10 grams in decoction, 1.0 to 1.5 grams in powder.

CAUTIONS / CONTRAINDICATIONS

- *Di Bie Chong* is contraindicated during pregnancy.
- *Di Bie Chong* should be used with caution in the absence of blood stasis.

PHARMACOLOGICAL EFFECTS

- **Antiplatelet:** Water extract of *Di Bie Chong* has an inhibiting effect on the aggregation of platelets in rats.[1]

CLINICAL STUDIES AND RESEARCH

- **Placental remnants:** Administration of *Di Bie Chong* at the dosage of 30 to 45 grams was extremely effective in treating amenorrhea or menstrual pain caused by placental remnants following abortion, miscarriage or delivery. Other herbs commonly used with *Di Bie Chong* to enhance its effectiveness included *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Yi Mu Cao* (Herba Leonuri) and *Pao Jiang* (Rhizoma Zingiberis Preparatum). Complete elimination of placental remnants was achieved within 3 to 4 days. No significant side effects were observed.[2]
- **Coronary artery disease:** In one study, 127 patients with coronary artery disease were divided into three groups. The first group of 47 patients received *Di Bie Chong, Dan Shen* (Radix Salviae Miltiorrhizae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Hong Hua* (Flos Carthami), *Chi Shao* (Radix Paeoniae Rubrae), *Jiang Xiang* (Lignum Dalbergiae Odoriferae), *Ge Gen* (Radix Puerariae), *Gua Lou Shi* (Fructus Trichosanthis) and others. The second group of 18 patients received *Di Bie Chong*. The third group of 52 patients received 50 mg of dipyridamole three times daily. Based on ECG evaluation, the first group showed a 71.08% rate of effectiveness, the second group showed 50% effectiveness, and the third group showed 43.44%.[3]

Di Bie Chong (Eupolyphaga)

- **Hepatitis:** Thirty patients with active chronic hepatitis B were treated with an herbal preparation containing *Di Bie Chong, Da Huang* (Radix et Rhizoma Rhei) and alcohol extract of *Wu Wei Zi* (Fructus Schisandrae Chinensis) with satisfactory results.[4]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Di Bie Chong* has an antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[5] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of *Di Bie Chong* in mice is 136.45 +/- 7.98 mg/kg. Fatality occurred within 10 to 20 minutes.[6]

AUTHORS' COMMENTS

According to Dr. Jiao Shu-De, *Di Bie Chong* treats one-sided stiffness, swelling, hardening and pain of the tongue caused by extreme accumulation of heat toxins in cases of erysipelas and scarlet fever. Secondary symptoms include involuntary salivation, and difficulty swallowing. Use 6 grams of *Di Bie Chong* with 3 grams of salt to make a decoction. The instruction is to gargle first before swallowing, and repeat twice daily.

Meng Chong (Tabanus), *Di Bie Chong* (Eupolyphaga) and *Shui Zhi* (Hirudo) are all very strong substances to break open severe blood stasis. They can easily injure qi if not used properly. When necessary, tonic herbs should be added to prevent damage. Of the three substances, *Meng Chong* is the strongest, followed by *Shui Zhi*, and then *Di Bie Chong*. Practitioners should select these substances in accordance with the patient's constitution and condition.

Chapter 12 summary

— Blood-Invigorating and Stasis-Removing Herbs

Name	Similarities	Differences
Chuan Xiong (Rhizoma Ligustici Chuanxiong)	Activate qi and blood circulation	Actives blood circulation, dispels wind, relieves pain
Yan Hu Suo (Rhizoma Corydalis)		Strongly activates qi and blood circulation, effectively relieves pain throughout the entire body
Yu Jin (Radix Curcumae)		Soothes the Liver, regulates the Gallbladder, dissolves phlegm, cools blood
Jiang Huang (Rhizoma Curcumae Longae)		Breaks up blood stasis, eliminates blood stasis
Lu Lu Tong (Fructus Liquidambaris)		Promotes normal urination, relieves pain
Ru Xiang (Gummi Olibanum)	Activate blood circulation, relieve pain	Treats traumatic injuries with qi stagnation
Mo Yao (Myrrha)		Treats traumatic injuries with blood stagnation
Hu Zhang (Rhizoma Polygoni Cuspidati)		Eliminates blood stasis, clears heat and toxins, dispels damp-heat
Wu Ling Zhi (Excrementum Trogopteri seu Pteromi)		Eliminates blood stasis, relieves pain due to blood stasis, treats obstetric and gynecologic disorders
Jiang Xiang (Lignum Dalbergiae Odoriferae)		Disperses turbid obstruction, relieves abdominal pain and vomiting
Zi Ran Tong (Pyritum)		Eliminates blood stasis, treats trauma-related pain
Niao Bu Su (Ramus Kalopanax Pictus)		Eliminates toxins and relieves pain
Dan Shen (Radix Salviae Miltiorrhizae)	Activate blood circulation, eliminate blood stasis	Treats cardiovascular disorders, gynecological disorders, masses and accumulations, traumatic injuries, disturbed *shen* (spirit)
Hong Hua (Flos Carthami)		Treats gynecological disorders, masses or accumulations, joint pain, and dermatological disorders
Tao Ren (Semen Persicae)		Treats gynecological disorders, external and sports injuries, Lung and intestinal abscesses, and chronic constipation
Yi Mu Cao (Herba Leonuri)		Promotes diuresis, treats gynecological disorders
Ze Lan (Herba Lycopi)		Promotes diuresis
Chuan Niu Xi (Radix Cyathulae)		Moves blood and sedates heat
Huai Niu Xi (Radix Achyranthis Bidentatae)		Tonifies Kidney
Ma Bian Cao (Herba Verbenae)		Clears heat, eliminates toxins, treats malaria, promotes diuresis, reduces swelling
Jin Bu Huan (Herba Lycopodii Serrati)		Reduces swelling and inflammation, relieves pain
Ye Ming Sha (Excrementum Vespertilionis Murini)		Clears the Liver, brightens the eyes
Chuan Shan Jia (Squama Manis)	Activate blood circulation, open channels and collaterals	Promotes lactation, treats dermatological disorders
Wang Bu Liu Xing (Semen Vaccariae)		Promotes lactation
Liu Ji Nu (Herba Artemisiae Anomalae)		Regulates menstruation
Su Mu (Lignum Sappan)		Treats gynecological disorders, addresses trauma-related disorders
Gan Qi (Resina Toxicodendri)		Opens channels, kills parasites
Mao Dong Qing (Radix Ilicis Pubescentis)		Clears heat and toxins, treats cough or sore throat due to heat, relieves pain
Ding Jing Cao (Herba Linderniae)		Nourishes the blood, regulates menses
Ji Xue Teng (Caulis Spatholobi)		Activates blood circulation and tonifies blood, treats *bi zheng* (painful obstruction syndrome)

Chapter 12 summary

Name	Similarities	Differences
San Leng (Rhizoma Sparganii)	Break up blood stasis, eliminate blood stasis	Breaks blood stagnation better
E Zhu (Rhizoma Curcumae)		Breaks qi stagnation better
Shui Zhi (Hirudo)		Strongly breaks up blood stasis
Meng Chong (Tabanus)		Breaks up blood stasis
Di Bie Chong (Eupolyphaga)		Treats chronic traumatic injuries

General Characteristics of Blood-Invigorating and Stasis-Removing Herbs:

Taste: acrid, bitter

Thermal property: warm

Channels entered: varies

Therapeutic actions: invigorate blood circulation, remove blood stasis, break blood stasis.

Blood-invigorating and stasis-removing herbs function to treat abnormal circulation of blood, and related complications such as qi stagnation, obstruction of the channels and collaterals, and pain. Clinical applications of these herbs include stabbing pain in a fixed location, numbness and pain of the limbs and extremities, lumps found on the skin or internal palpable masses, traumatic injuries, internal bleeding, purpura of the skin, and purple spots on the tongue.

Chuan Xiong (Rhizoma Ligustici Chuanxiong), ***Yan Hu Suo*** (Rhizoma Corydalis), ***Yu Jin*** (Radix Curcumae), ***Jiang Huang*** (Rhizoma Curcumae Longae), and ***Lu Lu Tong*** (Fructus Liquidambaris) all have dual effects to activate qi and blood circulation.

Chuan Xiong is one of the most commonly used herbs to invigorate qi and blood circulation. It treats headaches and regulates menstruation.

Yan Hu Suo is one of the most potent herbs to relieve pain. It alleviates both traumatic and/or visceral pain.

Yu Jin disperses Liver qi stagnation and cools blood to clear heat in the Heart.

Jiang Huang strongly breaks up stagnation, regulates qi, and is best for *bi zheng* (painful obstruction syndrome) of the upper limbs.

Lu Lu Tong, in addition to activating qi and blood circulation, also promotes normal urination and relieves allergies.

Ru Xiang (Gummi Olibanum), ***Mo Yao*** (Myrrha), ***Hu Zhang*** (Rhizoma Polygoni Cuspidati), ***Wu Ling Zhi*** (Excrementum Trogopteri seu Pteromi), ***Jiang Xiang*** (Lignum Dalbergiae Odoriferae), ***Zi Ran Tong*** (Pyritum) and ***Niao Bu Su*** (Ramus Kalopanax Pictus) have similar functions to activate qi and blood circulation to relieve pain.

Ru Xiang and *Mo Yao* have excellent effects to relieve pain and disperse blood stagnation caused by traumatic injuries. When used externally, this pair has the effect to reduce swelling and generate flesh.

Hu Zhang opens channels and collaterals, clears heat, drains dampness, eliminates toxins, dispels phlegm and relieves cough. It is also effective to detoxify the Liver for treatment of hepatitis.

Wu Ling Zhi has a strong analgesic function, removes stasis and stops bleeding simultaneously.

Jiang Xiang treats pain in the chest and hypochondriac area caused by traumatic injuries. It also separates the clear from the turbid to harmonize the middle *jiao* and relieve nausea.

Zi Ran Tong promotes healing of bones and sinews in cases of fracture.

Niao Bu Su activates qi and blood circulation, eliminates toxins, and effectively treats infection and inflammations.

Dan Shen (Radix Salviae Miltiorrhizae), ***Hong Hua*** (Flos Carthami) and ***Tao Ren*** (Semen Persicae) invigorate blood circulation, remove stasis and are used on a wide variety of disorders due to blood stagnation.

Dan Shen is cool in thermal property and thus cools blood, reduces abscesses, nourishes blood and calms the *shen* (spirit).

Chapter 12 summary

Hong Hua disperses blood stagnation to open the channels and collaterals and relieves pain in the extremities.

Tao Ren (Semen Persicae) disperses blood stagnation in the body to treat lung and intestinal abscesses. In addition, it is rich in oil and lubricates the Large Intestine to relieve constipation.

Yi Mu Cao (Herba Leonuri) and ***Ze Lan*** (Herba Lycopi) invigorate blood and remove stasis, especially in gynecological disorders. In addition, they have diuretic functions.

Chuan Niu Xi (Radix Cyathulae) and ***Huai Niu Xi*** (Radix Achyranthis Bidentatae) have descending characteristics and direct the effect of a formula downwards. Used fresh, they lead heat or blood downwards to treat disorders of the lower body, such as irregular menstruation or knee pain. Used in processed form, they tonify the Kidney and Liver to strengthen tendons and bones.

Chuan Niu Xi more strongly moves blood and sedates heat.

Huai Niu Xi more effectively tonifies the Liver and Kidney.

Ma Bian Cao (Herba Verbenae) invigorates blood, removes masses, and clears heat and toxins. It is most commonly used to promote diuresis, reduce swelling, and treat dysentery and malaria.

Jin Bu Huan (Herba Lycopodii Serrati) invigorates qi and blood circulation, removes stasis, stops bleeding, and relieves pain.

Ye Ming Sha (Excrementum Vespertilionis Murini) treats traumatic injuries to disperse bruising and remove stasis. It also clears the Liver and brightens the eyes.

Chuan Shan Jia (Squama Manis), ***Wang Bu Liu Xing*** (Semen Vaccariae), ***Liu Ji Nu*** (Herba Artemisiae Anomalae), ***Su Mu*** (Lignum Sappan), ***Gan Qi*** (Resina Toxicodendri), ***Mao Dong Qing*** (Radix Ilicis Pubescentis), ***Ding Jing Cao*** (Herba Linderniae) and ***Ji Xue Teng*** (Caulis Spatholobi) all invigorate blood circulation and open channels and collaterals.

Chuan Shan Jia and *Wang Bu Liu Xing* have very similar effects to invigorate blood, open channels and promote lactation. They are commonly used for irregular menstruation, amenorrhea or insufficient milk production in nursing women.

Liu Ji Nu regulates menstruation, dispels stasis, relieves pain and relieves food stagnation.

Su Mu relieves pain in gynecological disorders or cases of trauma.

Gan Qi strongly breaks blood stagnation, reduces accumulations and masses, and kills parasites.

Mao Dong Qing mainly treats cardiovascular disorders involving blood stagnation.

Ding Jing Cao treats menstrual disorders by invigorating blood circulation and nourishing the blood.

Ji Xue Teng effectively treats *bi zheng* (painful obstruction syndrome), activates blood circulation, eliminates blood stasis, and opens the channels and collaterals. It is excellent for blood-deficient patients who also need blood-invigorating effects.

San Leng (Rhizoma Sparganii), ***E Zhu*** (Rhizoma Curcumae), ***Shui Zhi*** (Hirudo), ***Meng Chong*** (Tabanus), and ***Di Bie Chong*** (Eupolyphaga) have the most potent influence on the blood to break up and eliminate blood stasis.

San Leng and *E Zhu* break up blood stagnation and activate qi to reduce masses or accumulations.

Shui Zhi and *Meng Chong* break up blood stagnation in patients experiencing an excess condition, who have not yet been weakened by the disease.

Di Bie Chong has a purgative function and also attacks toxins and treats convulsions.

Chapter 12 summary

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH BLOOD-INVIGORATING AND STASIS-REMOVING FUNCTIONS

Name	Functional Category
Chi Shao (Radix Paeoniae Rubrae)	Heat-Clearing Herbs (Chapter 2)
Da Huang (Radix et Rhizoma Rhei)	Downward Draining Herbs (Chapter 3)
Dang Gui (Radicis Angelicae Sinensis)	Tonic Herbs (Chapter 17)

Chapter 13

— Phlegm-Resolving and Coughing- and Wheezing- Relieving Herbs

Definition: Herbs in this category, as the name implies, function to resolve phlegm, arrest coughing, and relieve wheezing and dyspnea. In other words, they have expectorant, antitussive, and antiasthmatic functions.

The pathological factor ***phlegm*** forms as a result of poor water metabolism. After ingestion of food or liquids, if water is not properly absorbed and metabolized, it begins to accumulate and stagnate, leading to the formation of dampness and phlegm. This inability to absorb and metabolize water often results from Spleen qi and Spleen yang deficiencies. Phlegm can be present in the respiratory or gastrointestinal systems, or in the channels, collaterals and muscles. But most often, it is present in the Lung. Therefore, it is commonly noted that the Spleen is the organ that *produces* phlegm, and the Lung is the organ that *stores* phlegm.

In TCM, the Spleen *produces* phlegm, the Lung *stores* phlegm.

Phlegm, ***cough*** and ***dyspnea*** are closely related pathological conditions. Poor circulation of qi, such as found in cough or dyspnea, creates stagnation and allows the consequent formation of phlegm. Obstruction by phlegm, on the other hand, may irritate the respiratory tract and cause more coughing or dyspnea. Together, they create a vicious cycle for the patient, with the presence of one contributing to the formation of the other. For that reason, herbs that dissolve phlegm, stop coughing, and relieve wheezing are classified and used together. In general, herbs in this category treat the type of phlegm associated with common colds or chronic respiratory disorders. Other applications include sores, carbuncles, masses, nodules, epilepsy, seizures, convulsions and phlegm-related stroke.

SUBCATEGORIES OF ACTION

1. ***Warm herbs that dispel cold phlegm*** warm the Lung, dispel cold, dry dampness, and dissolve phlegm. They are most useful for clear or white phlegm caused by cold attacking the Lung. Accompanying symptoms may include chest tightness, aversion to cold, weak limbs, and dyspnea. Other symptoms of cold phlegm include sore limbs, yin sores, and palpable masses. In these cases, treatment should include specific herbs with interior-warming, Spleen-strengthening or dampness-drying functions.
2. ***Cold herbs that clear hot phlegm*** clear heat and eliminate phlegm. They are most useful to address yellow, sticky phlegm caused by heat. These herbs treat epilepsy, convulsions, seizures and nodules. In addition, since heat may consume yin and body fluids, heat-clearing herbs and yin-tonic herbs are often combined to simultaneously clear heat and moisten dryness.
3. ***Herbs that stop coughing and relieve wheezing*** ventilate the lungs to dispel phlegm, moisten the lungs to stop coughing, and redirect rebellious qi to relieve cough and wheezing.

Zhong Ru Shi (Stalactitum)
Ben Cao Gang Mu (Materia Medica),
by Li Shi-Zhen, 1578 A.D.

Chapter 13

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Phlegm is a component or cause of many diseases. During the Yuan Dynasty, Dr. Wang Gui-Cheng stated: "Phlegm is the mother of hundreds of disorders." Thus, differential diagnosis of causes and complications in phlegm-related illness is extremely important for optimal treatment. The following is a list of imbalances caused or complicated by the presence of phlegm:

- Coughing with profuse phlegm caused by wind-cold or wind-heat must be treated with herbs that dispel exterior wind.
- Cases of phlegm with interior heat must be addressed with addition of heat-clearing herbs, and conditions of phlegm with interior cold must be treated with concomitant use of interior-warming herbs.
- Chronic cough and wheezing must be treated with concurrent use of herbs to resolve phlegm and tonify underlying deficiency.
- Seizures or convulsions must be treated with herbs that extinguish Liver wind.
- Nodules or palpable masses require herbs that soften hardness and dissipate nodules.
- Yin sores with oozing fluids are addressed by the addition of yang-tonic herbs.
- Dyspnea with phlegm requires addition of qi-regulating herbs with phlegm-resolving herbs.

Differential diagnosis is extremely important, as phlegm is considered to be the "mother of hundreds of disorders."

Wheezing and dyspnea are *symptoms* that affect the lungs. However, the *causes* of these lung disorders may be imbalance of the Lung and/or Kidney. ***Reversal of Lung qi*** results in coughing, wheezing and dyspnea. ***Deficiency of Kidney qi*** leaves the Kidney unable to pull Lung qi downwards, leading to shortness of breath and shallow inhalation (compared to exhalation).

CAUTIONS/CONTRAINDICATIONS

- Substances from this category should not be used for treatment of coughing or phlegm during the initial stages of rashes or measles. Instead, use herbs that release the exterior.
- In order to prevent trapping pathogenic factors (phlegm, excess heat or cold) in the Lung, herbs such as *Bai Guo* (Semen Ginkgo), *Kuan Dong Hua* (Flos Farfarae), *Zi Wan* (Radix Asteris) and *Wu Wei Zi* (Fructus Schisandrae Chinensis), that exert astringent or restraining influences, should not be used.
- Stimulating herbs such as *Bai Fu Zi* (Rhizoma Typhonii) and *Bai Jie Zi* (Semen Sinapis) should not be used for treatment of patients who are coughing blood, as they may aggravate bleeding.
- Finally, herbs in this category should not be used for prolonged periods of time, as they consume qi.

PROCESSING

Some of these herbs are toxic, such as *Ban Xia* (Rhizoma Pinelliae) and *Tian Nan Xing* (Rhizoma Arisaematis), and must be processed accordingly to remove toxins and insure safe use.

PHARMACOLOGICAL EFFECTS

- **Expectorant**: Most phlegm-resolving herbs have a marked expectorant effect. The mechanism of action includes increased production of mucus by the respiratory tract, and increased ciliary action to push phlegm out of the lungs.
- **Antitussive**: Many herbs exert a suppressant effect on the cough reflex in the brain. Herbs with marked antitussive action include *Ban Xia* (Rhizoma Pinelliae), *Jie Geng* (Radix Platycodonis), *Kuan Dong Hua* (Flos Farfarae), and *Xing Ren* (Semen Armeniacae Amarum). Of these herbs, *Ban Xia* has a longer duration of influence, with antitussive action observed for up to 5 hours after ingestion.

Herbs in this category have marked expectorant, antitussive, and antiasthmatic effects.

- **Antiasthmatic**: Many of these herbs dilate the smooth muscle of the bronchi, relieve spasms and cramps of the bronchial muscle, and relieve wheezing and dyspnea. Herbs with marked antiasthmatic effect include *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Kuan Dong Hua* (Flos Farfarae). The effect of *Zhe Bei Mu* is similar to atropine, as demonstrated in rabbits and cats. The antiasthmatic effect of *Kuan Dong Hua* is dose-related, with small doses dilating the lungs and large doses constricting them.

Chapter 13

- **Antiepileptics**: Some herbs in this category exert marked effectiveness in the treatment of convulsions, seizures, and epilepsy. Water-based decoction of *Tian Nan Xing* (Rhizoma Arisaematis) has been shown to effectively treat drug-induced seizures and epilepsy. *Bai Fu Zi* (Rhizoma Typhonii) has shown excellent preventative and treatment action against tetanus and muscle contractions. The mechanisms of action of both herbs have been attributed to their effect on the central nervous system.
- **Others**: *Ban Xia* (Rhizoma Pinelliae) has an antiemetic effect. *Ting Li Zi* (Semen Descurainiae seu Lepidii) has a cardiotonic effect, and can be used to treat cardiovascular disorders. *Yin Guo Ye* (Folium Ginkgo) and *Gua Lou Shi* (Fructus Trichosanthis) increase blood perfusion to the coronary arteries and reduce the consumption of oxygen by cardiac muscles. *Tian Nan Xing* (Rhizoma Arisaematis), *Gua Lou Shi* (Fructus Trichosanthis) and *Zi Wan* (Radix Asteris) have antineoplastic activity. *Hai Zao* (Sargassum) and *Kun Bu* (Thallus Laminariae seu Eckloniae) are rich in iodine, and are beneficial in treatment of thyroid disorders. *Gua Lou Shi* (Fructus Trichosanthis), *Zao Jiao* (Fructus Gleditsiae), *Zi Wan* (Radix Asteris) and *Bai Bu* (Radix Stemonae) have antibiotic effects, and treat respiratory tract infections.

POTENTIAL HERB-DRUG INTERACTIONS

Herbs that transform phlegm, stop cough and relieve wheezing are used for their expectorant, antitussive, and antiasthmatic effects. Though these herbs are used commonly and frequently, there are no reported or documented cases of herb-drug interactions involving this group of herbs.

Section 1

— Phlegm-Resolving Herbs

Ban Xia (Rhizoma Pinelliae)

半夏

Pinyin Name: *Ban Xia*
Literal Name: "middle summer," "half summer"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: pinellia, pinellia tuber
Botanical Name: *Pinellia ternata* (Thunb.) Breit. (*Ban Xia*)
Pharmaceutical Name: Rhizoma Pinelliae
Properties: acrid, warm
Channels Entered: Spleen, Stomach, Lung
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Dries Dampness, Dissolves Phlegm

Accumulation of damp and phlegm: According to theories of traditional Chinese medicine, the Spleen produces phlegm and the Lung stores phlegm. When the Spleen does not properly dissolve dampness, symptoms such as cough, profuse sputum and Lung qi reversal will occur. Acrid, warm and drying, *Ban Xia* (Rhizoma Pinelliae) enters the Spleen and Lung to eliminate phlegm both from its source and from wherever it has accumulated. *Ban Xia* is commonly used to treat various phlegm accumulations and complications.

- Profuse sputum, cough and dyspnea from accumulation of phlegm in the lungs: use *Ban Xia* with *Chen Pi* (Pericarpium Citri Reticulatae) and *Fu Ling* (Poria). **Exemplar Formula:** *Er Chen Tang* (Two-Cured Decoction).
- Watery sputum with nausea and vomiting from accumulation of cold phlegm: use this herb with *Xi Xin* (Herba Asari) and *Gan Jiang* (Rhizoma Zingiberis) to warm the Lung and dissolve phlegm.
- Copious yellow sputum indicating an accumulation of hot phlegm: combine it with *Huang Qin* (Radix Scutellariae), *Zhi Mu* (Radix Anemarrhenae) and *Gua Lou Shi* (Fructus Trichosanthis) to clear heat and dissolve phlegm.
- Liver wind rising with phlegm stagnation leading to headache, dizziness, vertigo, feelings of congestion and oppression in the chest, a white greasy tongue coat, and a wiry, slippery pulse: add this herb to *Tian Ma* (Rhizoma Gastrodiae), *Fu Ling* (Poria) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to calm Liver wind, strengthen the Spleen, and dispel phlegm and dampness. **Exemplar Formula:** *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction).
- *Xiong bi* (painful obstruction of the chest) with yang deficiency and accumulated cold and phlegm leading to shortness of breath and chest pain: use *Ban Xia* with *Gua Lou Shi* (Fructus Trichosanthis) and *Xie Bai* (Bulbus Allii Macrostemonis) to dissolve phlegm and relieve pain. **Exemplar Formula:** *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction).

Ban Xia (Rhizoma Pinelliae)

2. Redirects Abnormally Rising Stomach Qi, Relieves Nausea and Vomiting

Nausea and vomiting: *Ban Xia* relieves nausea and vomiting caused by phlegm obstruction, Stomach deficiency, Stomach heat, or pregnancy. The normal direction of Stomach qi is downward. When it is obstructed by phlegm, the blockage and upward reversal of Stomach qi results in nausea and vomiting. *Ban Xia* has an excellent effect to treat nausea and vomiting: it dries dampness, dissolves phlegm, harmonizes the Stomach and redirects abnormal qi flow.

- Nausea and vomiting due to cold and phlegm: combine *Ban Xia* and *Sheng Jiang* (Rhizoma Zingiberis Recens) to dry dampness, dissolve phlegm, warm the middle *jiao*, and stop vomiting.
- Nausea and vomiting with generalized deficiency: use this herb with *Ren Shen* (Radix Ginseng) to tonify qi.
- Nausea and vomiting with excess cold in the interior: combine it with *Gan Jiang* (Rhizoma Zingiberis) and *Wu Zhu Yu* (Fructus Evodiae).
- Nausea and vomiting due to Stomach heat: add *Ban Xia* to *Huang Lian* (Rhizoma Coptidis) and *Zhu Ru* (Caulis Bambusae in Taenia), to clear heat.
- Nausea and vomiting caused by heat and cold: add this herb to *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Gan Jiang* (Rhizoma Zingiberis) and *Ren Shen* (Radix Ginseng). **Exemplar Formula:** *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium).
- Nausea and vomiting during pregnancy: use it with *Su Geng* (Caulis Perillae) and *Sha Ren* (Fructus Amomi) to regulate qi and calm the fetus.
- Chronic neurogenic vomiting: combine it with *Dai Zhe Shi* (Haematitum), *Xuan Fu Hua* (Flos Inulae), *Da Huang* (Radix et Rhizoma Rhei), *Gan Cao* (Radix Glycyrrhizae), *Gua Lou Shi* (Fructus Trichosanthis), *Bing Lang* (Semen Arecae) and *Tao Ren* (Semen Persicae).

3. Dissipates Nodules and Disperses Stagnation

Phlegm accumulation: Acrid and warm, *Ban Xia* dissolves phlegm and dissipates nodules to treat swelling, plum pit (globus hystericus) syndrome, goiter, scrofula, chest and epigastric congestion or obstruction that worsens with pressure.

- Accumulation of hot phlegm with feelings of chest congestion and oppression, tenderness upon palpation, copious yellow sputum, greasy yellow tongue coat, and slippery, rapid pulse: use *Ban Xia* with *Gua Lou Shi* (Fructus Trichosanthis) and *Huang Lian* (Rhizoma Coptidis) to clear heat and dissolve phlegm. **Exemplar Formula:** *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction).
- Plum pit syndrome: use this herb with *Hou Po* (Cortex Magnoliae Officinalis), *Zi Su Ye* (Folium Perillae) and *Fu Ling* (Poria). **Exemplar Formula:** *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction).
- Scrofula or thyroid nodules: combine *Ban Xia* with *Kun Bu* (Thallus Laminariae seu Eckloniae), *Hai Zao* (Sargassum) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) to soften hardness and dissipate nodules.

4. Treats Sores, Skin Ulcerations and Carbuncles

Topical application of *Ban Xia* powder treats sores, ulcerations, and carbuncles on the skin. When combined with egg white, the mixture can be used to reduce breast abscesses. To alleviate a swollen tongue, cook *Ban Xia* with vinegar and gargle with the herbal decoction.

DOSAGE

5 to 10 grams in decoction. According to some scholars, the maximum dosage for *Ban Xia* is 60 grams in special circumstances. *Ban Xia* is often used in decoction to maximize therapeutic effect and minimize potential side effects. The component of *Ban Xia* responsible for antitussive and antiemetic effects has high water solubility, and the component responsible for the toxicity has a low water solubility. Furthermore, *Ban Xia* is processed with ginger and alumen to deactivate the constituents responsible for adverse reactions. Thus, processed *Ban Xia* will have greater effectiveness and fewer side effects.[1]

Ban Xia is available in many different forms:

- "*Sheng Ban Xia*," in its original form without any processing, is toxic and therefore generally used externally for treatment of sores, ulcerations and carbuncles.
- "*Qing Ban Xia*," soaked in water and cooked with alumen to reduce its acrid and drying nature, is more suitable for infants, the elderly, and weak patients who have accumulations of dampness and phlegm.
- "*Fa Ban Xia*," processed in water, alumen, calcium oxide, and *Gan Cao* (Radix Glycyrrhizae), is the standard dosage form of *Ban Xia* and is commonly used to treat accumulations of phlegm and dampness in the Spleen and Stomach.
- "*Zhu Li Ban Xia*," processed with *Zhu Li* (Succus Bambusae) to greatly reduce its warm and drying nature, is most suitable for nausea caused by Stomach heat, cough with yellow copious sputum from Lung heat, or post-stroke conditions with hot phlegm.
- "*Jiang Ban Xia*," processed with ginger juice, has a stronger function than the others to warm the Stomach and relieve nausea and vomiting.

While there are many who strongly stress the importance of processing *Ban Xia* to remove its toxicity, it is also important to keep in mind that over-processing the

Ban Xia (Rhizoma Pinelliae)

herb destroys its clinical effectiveness. For decoction, cooking fresh *Ban Xia* in hot water with *Sheng Jiang* (Rhizoma Zingiberis Recens) for 30 minutes will be sufficient to remove any toxicity.[2]

CAUTIONS / CONTRAINDICATIONS

- Warm and drying in nature, *Ban Xia* should be avoided, or used with extreme caution, for patients who have dry coughing from yin deficiency, sore throat caused by heat and fire, and for those experiencing bleeding or who have hot phlegm.
- *Ban Xia* is incompatible with *Wu Tou* (Radix Aconiti).
- Fresh or unprocessed *Ban Xia* is toxic, and its use should be reserved for topical applications only. For internal use, it should be processed to minimize toxicity.
- Allergic reactions have been reported following the use of *Ban Xia*. Symptoms include redness and an excruciating itch throughout the entire body.

OVERDOSAGE

Overdose of *Ban Xia* is characterized by numbness, swelling and pain of the tongue and throat, dry mouth, upper abdominal discomfort, involuntary salivation, slowed respiration, hoarse voice, slurred speech, difficulty swallowing, nausea, vomiting, abdominal pain, diarrhea, dizziness, headache, palpitations, perspiration, pale face, weak and forceless pulse, irregular breathing, and in severe cases, respiratory depression.

TREATMENT OF OVERDOSAGE

Treatment of overdose includes immediate ingestion of egg whites, diluted vinegar, tea, fresh ginger juice or other supportive methods. If fresh ginger is not available, dried ginger can be used as a substitute. Grind 250 grams of *Sheng Jiang* (Rhizoma Zingiberis Recens) and mix with 250 ml of hot water to make tea. Administer 20 to 25 ml of tea every 3 to 4 hours, until the symptoms are resolved.

Two herbal formulas are also beneficial for overdose management. Formula one includes *Fang Feng* (Radix Saposhnikoviae) 60g, *Lu Dou* (Semen Phaseoli Radiati) 30g, and *Gan Cao* (Radix Glycyrrhizae) 15g. Formula two includes *Lu Dou* (Semen Phaseoli Radiati) 15g, *Jin Yin Hua* (Flos Lonicerae) 30g, *Lian Qiao* (Fructus Forsythiae) 30g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 15g, and *Gan Cao* (Radix Glycyrrhizae) 9g. The formulas are taken in decoction until the patient stabilizes.[3]

CHEMICAL COMPOSITION

Homogentisic acid, homogentisic acid glucoside, 3,4-dihydroxybenzaldehyde, 3,4-dihydroyxybenzaldehyde diglucoside, choline.[4]

PHARMACOLOGICAL EFFECTS

- **Antitussive:** Oral or intravenous administration of *Ban Xia* has marked and prolonged antitussive effects in cats. The duration of action is approximately 5 hours.[5]
- **Antiemetic:** Administration of *Ban Xia* processed with ginger or alumen has demonstrated marked antiemetic effects. Such preparations were especially effective in relieving nausea and vomiting induced by chemicals. Though the exact mechanism of action is unclear, it is probably due to the effect of the herb on the central nervous system.[6]
- **Antineoplastic:** Administration of *Ban Xia* in rats is associated with an inhibitory effect on the growth of cancer cells in the liver.[7]

CLINICAL STUDIES AND RESEARCH

- **Cervical carcinoma:** In one study, 247 cervical cancer patients at various stages were treated with oral and vaginal applications of a *Ban Xia* preparation, with complete recovery in 63 cases, marked improvement in 84 cases, and slight improvement in 44 cases. The dosage for the oral preparation is equivalent to 60 grams of the herb given daily in three equally-divided doses. The dosage for the topical preparation is equivalent to 50 grams of the herb, applied into and around the cervix.[8]
- **Nausea and vomiting during pregnancy:** Eighteen women in their third month of pregnancy who experienced severe nausea and vomiting, feelings of chest discomfort and oppression, heavy sensations of the head, and vertigo were given 1 dose of an herbal decoction daily with great success. The formula was prepared by cooking 30 grams of "*Qing Ban Xia*" for 45 minutes, filtering out *Ban Xia* residues, adding in 30 grams of powdered *Shan Yao* (Rhizoma Dioscoreae), then adding white sugar prior to serving.[9]
- **Cervical erosion:** Topical application of *Ban Xia* was used to treat 1,347 patients with cervical erosion, with a 97.18% effective rate and a 44.77% recovery rate. The treatment protocol was to grind the herb into a fine powder, and apply it to the affected area with a cotton ball, leaving it in place for 24 hours. This application was carried out one to two times per week, for 8 applications per course of treatment.[10]
- **Chronic lymphadenitis:** According to one report, 30 patients with chronic lymphadenitis were treated with topical application of *Ban Xia*, with satisfactory results. The herb was prepared by roasting 50 grams of the herb and grinding it into a powder. Vinegar and hot water were added to 3 parts of the herb and 1 part flour to make an herbal paste. The treatment protocol was to apply the paste to the affected area at night, and remove it in the morning, for 5 to 7 applications per course of treatment.[11]

TOXICOLOGY

For unprocessed *Ban Xia*, the LD_{50} in mice is 325 mg/kg

Ban Xia (Rhizoma Pinelliae)

via intraperitoneal injection and 42.7 g/kg via oral ingestion. For processed *Ban Xia*, oral administration of 16 g/kg every 3 hours for 5 doses showed no toxicity. In another toxicology study, administration of unprocessed *Ban Xia* in mice at $^1/_5$ to $^1/_{20th}$ the lethal dose for three weeks resulted in a significant decrease in body weight, compromised liver and kidney functions, and some fatalities. By comparison, the group of mice that received processed *Ban Xia* at the same dose showed no signs or symptoms of toxicity.[12,13,14]

AUTHORS' COMMENTS

Classic texts advised that unprocessed *Ban Xia* should only be used externally, due to its toxicity. More recent studies, however, indicate that if unprocessed *Ban Xia* is cooked for an extended period of time, or if *Sheng Jiang* (Rhizoma Zingiberis Recens) is incorporated into an herbal formula with unprocessed *Ban Xia*, the toxicity is minimized. Therefore, when the benefits of usage outweigh the risks, most authorities agree that the use of unprocessed *Ban Xia* internally is not contraindicated.

Shi Ba Fan (Eighteen Incompatibles) stated that *Wu Tou* (Radix Aconiti) is incompatible with *Ban Xia*. However, the combination of these two have not demonstrated an increase in toxicity or adverse reactions in recent studies. Thus, the validity of this incompatibility is currently under more challenge and investigation.

One classic text mentions that *Ban Xia* may cause miscarriage; however, this concern has been invalidated since many doctors commonly incorporate *Ban Xia* to treat nausea and vomiting during pregnancy. Furthermore, according to *Ming Yi Bie Lun* (*Theories of Famous Doctors*), this herb can be used safely, specifically to treat nausea and vomiting during pregnancy.

Tian Nan Xing (Rhizoma Arisaematis)

天南星

Pinyin Name: *Tian Nan Xing*
Literal Name: "sky's southern star," "star of the southern heavens"
Alternate Chinese Names: *She Liu Gu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: arisaema, jack-in-the-pulpit tuber
Botanical Name: *Arisaema consanguineum* Schott. (*Tian Nan Xing*); *Arisaema heterophyllum* Bl. (*Yi Ye Tian Nan Xing*); *Arisaema amurense* Maxim. (*Dong Bei Tian Nan Xing*)
Pharmaceutical Name: Rhizoma Arisaematis
Properties: bitter, acrid, warm
Channels Entered: Liver, Lung, Spleen
Safety Index: toxic

Tian Nan Xing (Rhizoma Arisaematis)

CHINESE THERAPEUTIC ACTIONS

1. Dries Dampness, Dissolves Phlegm

Accumulation of hot phlegm: Bitter, warm and acrid, *Tian Nan Xing* (Rhizoma Arisaematis) is extremely potent in its function to dry dampness and dissolve phlegm. It is commonly used to treat various types of phlegm accumulation and complications. When combined with the proper heat-clearing herbs, it can also be used to treat coughing caused by hot phlegm.

- Accumulation of dampness and phlegm leading to cough, profuse white sputum, feelings of coldness on the back, chest oppression, and a greasy tongue coat: use *Tian Nan Xing* with *Chen Pi* (Pericarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae), *Fu Ling* (Poria) and *Zhi Shi* (Fructus Aurantii Immaturus) to regulate qi and dissolve phlegm.
- Cough with copious yellow sputum from Lung heat: combine this herb with *Huang Qin* (Radix Scutellariae) and *Gua Lou Shi* (Fructus Trichosanthis).

2. Dispels Wind to Relieve Convulsions

Liver wind rising, with phlegm stagnation: Clinical manifestations include dizziness, vertigo, facial paralysis, seizures, convulsions, tetanus, epilepsy, opisthotonos and stroke. *Tian Nan Xing* dispels wind and phlegm from the channels and collaterals to relieve muscle spasms and cramps. Other manifestations of Liver wind rising and phlegm stagnation include chest congestion, nausea, poor appetite and a preference for sleep.

- Dizziness and vertigo because of phlegm obstruction: use *Tian Nan Xing* with *Ban Xia* (Rhizoma Pinelliae) and *Tian Ma* (Rhizoma Gastrodiae).
- Numbness of the hands and feet, hemiplegia, or deviation of the eyes and mouth caused by phlegm obstruction in the channels and collaterals: combine this herb with *Ban Xia* (Rhizoma Pinelliae), *Bai Fu Zi* (Rhizoma Typhonii) and *Chuan Wu* (Radix Aconiti Preparata).
- For hot phlegm and blockage of qi: add it to *Ling Yang Jiao* (Cornu Saigae Tataricae), *Long Dan Cao* (Radix Gentianae), and *Zhu Li* (Succus Bambusae).
- Seizures and convulsions: use *Tian Nan Xing* with *Ban Xia* (Rhizoma Pinelliae) and *Shi Chang Pu* (Rhizoma Acori).
- Tetany, clenched fist and jaws, opisthotonos: incorporate this herb with *Fang Feng* (Radix Saposhnikoviae), *Bai Zhi* (Radix Angelicae Dahuricae), *Wu Gong* (Scolopendra), *Bai Fu Zi* (Rhizoma Typhonii) and *Tian Ma* (Rhizoma Gastrodiae).
- Epilepsy: use it with *Ban Xia* (Rhizoma Pinelliae), *Shi Chang Pu* (Rhizoma Acori), *Quan Xie* (Scorpio), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Yuan Zhi* (Radix Polygalae) and *Jiang Can* (Bombyx Batryticatus).

3. Dissipates Nodules, Relieves Pain

Topical use of *Tian Nan Xing* reduces swelling and dissipates nodules. It treats various traumatic and sports injuries, muscle and joint pain, and nodules caused by phlegm accumulation.

- Joint pain and swelling: add this herb to *Gan Jiang* (Rhizoma Zingiberis) and *Shi Chang Pu* (Rhizoma Acori), and apply topically.
- Nodules caused by phlegm accumulation: mix *Tian Nan Xing* powder with vinegar, and apply topically.
- Cervical or uterine cancer: use a larger dose of *Tian Nan Xing* orally or topically (as powder or suppository).
- Facial paralysis: crush *Tian Nan Xing* and *Sheng Jiang* (Rhizoma Zingiberis Recens) into a paste, and apply topically.

DOSAGE

5 to 10 grams for general application. The unprocessed form of *Tian Nan Xing* is toxic and not suitable for internal use: it must always be pre-processed, usually with ginger, to make it safe for internal consumption. For treatment of tumors, processed *Tian Nan Xing* is used internally at dosage of up to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- Bitter, acrid, warm and toxic, *Tian Nan Xing* must be used with caution for patients with dry cough from yin deficiency, and rising of Liver wind caused by excess fire or blood deficiency. Use of this herb is contraindicated in treating dry phlegm caused by yin deficiency.
- *Tian Nan Xing* should be used with extreme caution in pregnant women.
- Unprocessed *Tian Nan Xing* is toxic and is not suitable for internal use.
- Allergic reaction may occur when the skin comes in direct contact with *Tian Nan Xing*. Swelling, itching, and pain are the main symptoms, and may be alleviated by topical washing with vinegar.
- Use of *Tian Nan Xing* may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

OVERDOSAGE

The entire plant of *Tian Nan Xing*, from leaves to the root, is toxic. Overdose and adverse reactions associated with ingestion of this plant include numbness of the tongue and mouth, itching, burning sensations, swelling, involuntary salivation, loss of the sense of taste, difficulty opening the mouth, swelling and pain in the tongue and oral cavity, headache, dizziness, palpitations, nausea, vomiting, slurred speech, and hoarse voice. In severe

Tian Nan Xing (Rhizoma Arisaematis)

cases, there may be muscle spasms and convulsions of the extremities, dyspnea and respiratory depression. Adverse reactions may occur at dosages as low as 10 grams, and may last between 15 minutes and several hours.

TREATMENT OF OVERDOSAGE

Overdose of *Tian Nan Xing* can be treated with an herbal decoction of 30 grams of *Sheng Jiang* (Rhizoma Zingiberis Recens), 60 grams of *Fang Feng* (Radix Saposhnikoviae), and 15 grams of *Gan Cao* (Radix Glycyrrhizae). However, if the herbs are not available, administration of 30 to 60 ml of vinegar and a small quantity of fresh ginger juice is also helpful. In both cases, the treatment is most effective if the patient holds the solution in his/her mouth prior to swallowing it.[1] [Note: Holding the solution in the mouth facilitates the sublingual absorption of the herbs, to speed up the treatment].

CHEMICAL COMPOSITION

γ-aminobutyric acid, ornithine, citrulline, arginine, glutamic acid, aspartic acid, leucine, saponins, starch, alkaloids.[2,3]

PHARMACOLOGICAL EFFECTS

- **Antiseizure and anticonvulsant:** Intraperitoneal injection of water extract of *Tian Nan Xing* in mice has preventative effects against seizures and convulsions induced by strychnine and caffeine. Other studies indicated that while *Tian Nan Xing* had questionable antiseizure action, it did effectively control tremor.[4,5]
- **Sedative:** Intraperitoneal injection of water extract of *Tian Nan Xing* is associated with marked sedative effects in mice. Clinical effects included a decrease in spontaneous physical activities, delayed reflexes, and prolonged sleeping time induced by barbiturates.[6]
- **Antineoplastic:** Water extract of unprocessed *Tian Nan Xing* has an inhibitory effect on the growth of cancer cells in mice with sarcoma.[7]

CLINICAL STUDIES AND RESEARCH

- **Cervical cancer:** In one study, 105 patients with cervical cancer were treated with a 78% rate of effectiveness using both oral and topical applications of *Tian Nan Xing*. The treatment protocol was to use a decoction of the herb, starting with 15 g/day and gradually increasing to 45 g/day. In addition to oral administration, local application was given, utilizing various dosage forms such as powder, suppository, and local injection.[8]
- **Parotitis:** Six patients with parotitis were treated with topical application of *Tian Nan Xing*, with satisfactory results. The topical form was prepared by soaking powdered *Tian Nan Xing* in vinegar for 5 days. The herbal paste was applied topically three to four times daily, for 3 to 4 days. The fever usually subsided within the first day, while decrease in swelling required up to 4 days.[9]

HERB-DRUG INTERACTION

- **Sedatives:** *Tian Nan Xing* is associated with marked sedative and analgesic effects. It also potentiates the sedative effect of barbiturates.[10] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

Decoction of processed *Tian Nan Xing* given orally at 150 g/kg showed no significant toxicity in mice. The LD_{50} for intraperitoneal injection in mice is 13.5 g/kg.[11,12]

AUTHORS' COMMENTS

Tian Nan Xing and *Ban Xia* (Rhizoma Pinelliae), both belonging to the araceae family, have similar functions and levels of toxicity. *Tian Nan Xing* mainly treats wind and phlegm. It reduces swelling, relieves pain and enters the peripheral channels and collaterals to treat musculoskeletal disorders. *Ban Xia* mainly treats dampness and phlegm. It enters the Spleen and Stomach to relieve nausea and vomiting.

Tian Nan Xing and *Dan Nan Xing* (Arisaema cum Bile) also share similarities but differ slightly in function. *Tian Nan Xing* is bitter, warm and dry. It more strongly dries dampness, dissolves phlegm, and subdues wind. *Dan Nan Xing* is bitter, cool and moistening. It more effectively clears hot phlegm and relieves convulsions.

Dan Nan Xing (Arisaema cum Bile)

膽南星 胆南星

Pinyin Name: *Dan Nan Xing*
Literal Name: "gallbladder southern star"
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: arisaema pulvis
Botanical Name: *Arisaema consanguineum* Schott. (*Tian Nan Xing*); *Arisaema heterophyllum* Bl. (*Yi Ye Tian Nan Xing*); *Arisaema amurense* Maxim. (*Dong Bei Tian Nan Xing*)
Pharmaceutical Name: Arisaema cum Bile
Properties: bitter, cool
Channels Entered: Liver, Lung, Spleen
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Dissolves Phlegm, Calms Wind, Stops Convulsions

Dan Nan Xing (Arisaema cum Bile) dispels wind and phlegm obstruction from the channels and collaterals to relieve muscle spasms and cramps. Clinical applications include infantile convulsions, seizures, facial paralysis, tetanus, and stroke.

- Seizures and convulsions in infants: combine *Dan Nan Xing* with *Niu Huang* (Calculus Bovis), *Huang Lian* (Rhizoma Coptidis), *Tian Ma* (Rhizoma Gastrodiae), and *Quan Xie* (Scorpio) to clear heat and calm wind.

DOSAGE

2 to 5 grams. *Dan Nan Xing* is made from the powder of *Tian Nan Xing* (Rhizoma Arisaematis) mixed with bovine bile. Processing with bovine bile (or, in some regions, pig or goat bile) reduces the drying nature of the herb and makes it more suitable for patients with underlying yin deficiency.

CAUTIONS / CONTRAINDICATIONS

- *Dan Nan Xing* must be used with caution for patients who have dry cough due to rising Liver wind from excess fire or blood deficiency.
- *Dan Nan Xing* should be used with extreme caution in pregnant women.
- Allergic reaction may occur when the skin comes in direct contact with *Dan Nan Xing*. Swelling and itching are the main symptoms, and may be alleviated by topical washing with vinegar.

OVERDOSAGE

Dan Nan Xing is slightly toxic. Adverse reactions and potential side effects include numbness of the tongue and mouth, itching, burning sensations, swelling, involuntary salivation, nausea, vomiting, slurred speech, and hoarseness. In severe cases, reactions include muscle spasms and convulsions of the four limbs, and dyspnea.

TREATMENT OF OVERDOSAGE

Overdose of *Dan Nan Xing* can be treated by one or more of the following methods:

- Administration of 30 to 60 ml vinegar and a small amount of ginger juice.
- Administration of an herbal decoction containing 30 grams of *Sheng Jiang* (Rhizoma Zingiberis Recens), 60 grams of *Fang Feng* (Radix Saposhnikoviae), and 15 grams of *Gan Cao* (Radix Glycyrrhizae).

AUTHORS' COMMENTS

Please refer to *Tian Nan Xing* (Rhizoma Arisaematis).

Bai Fu Zi (Rhizoma Typhonii)

白附子

Pinyin Name: *Bai Fu Zi*
Literal Name: "white appendage"
Alternate Chinese Names: *Yu Bai Fu, Guan Bai Fu, Niu Nai Bai Fu, Ji Xin Bai Fu*
Original Source: *Zhong Guo Zhi Wu Zi* (Chinese Journal of Botany)
English Name: typhonium, giant typhonium rhizome
Botanical Name: *Typhonium giganteum* Engl. (*Yu Bai Fu*); *Aconitum coreanum* (Levl.) Raipaics. (*Guan Bai Fu*)
Pharmaceutical Name: Rhizoma Typhonii
Properties: acrid, sweet, warm
Channels Entered: Spleen, Stomach
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Dries Dampness, Dissolves Phlegm, Dispels Wind, Stops Convulsions

Accumulation of wind-phlegm: Acrid and warm, *Bai Fu Zi* (Rhizoma Typhonii) dispels wind and phlegm obstruction from the channels and collaterals to relieve muscle spasms and cramps. It is one of the most commonly used herbs to treat convulsions, tremors, paralysis and deviation of the mouth and eyes. Clinical applications include infantile convulsions, seizures, facial paralysis, tetanus, and stroke.

- Post-stroke deviation of the eyes and mouth: combine *Bai Fu Zi* with *Jiang Can* (Bombyx Batryticatus) and *Quan Xie* (Scorpio). **Exemplar Formula:** *Qian Zheng San* (Lead to Symmetry Powder).
- Tetanus, muscle spasms and stiffness of the neck, opisthotonos, clenched jaws: use this herb with *Tian Nan Xing* (Rhizoma Arisaematis), *Tian Ma* (Rhizoma Gastrodiae), and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Yu Zhen San* (True Jade Powder).
- Facial paralysis: incorporate *Bai Fu Zi* for internal use with *Jiang Can* (Bombyx Batryticatus), *Quan Xie* (Scorpio), *Bai Zhi* (Radix Angelicae Dahuricae), *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Hong Hua* (Flos Carthami), *Tian Nan Xing* (Rhizoma Arisaematis), *Bai Jie Zi* (Semen Sinapis), *Zao Jiao Ci* (Spina Gleditsiae), *Tao Ren* (Semen Persicae) and *Su Mu* (Lignum Sappan). This same formula can be used topically by applying a towel saturated with the warm decoction to the affected area.

Headache and migraine: Acrid, warm and dispersing, *Bai Fu Zi* enters the *yangming* channel to treat headache and migraine characterized by cold-damp and wind-phlegm. This type of headache and migraine usually has an abrupt onset and the pain is very severe either on one or both sides of the head. The patient usually feels heavy and the tongue coating is white and greasy.

- Headache and migraine: use *Bai Fu Zi* with *Bai Zhi* (Radix Angelicae Dahuricae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Man Jing Zi* (Fructus Viticis) and *Ju Hua* (Flos Chrysanthemi). If the patient is deficient in qi and blood, tonics should be added accordingly.

2. Eliminates Toxins and Dissipates Nodules

Scrofula, phlegm masses, toxic snake bites: *Bai Fu Zi* softens hardness and dissipates nodules to treat scrofula and thyroid nodules. It can be used internally and topically. This herb also treats snake bites by clearing toxicity and reducing swelling.

- Scrofula or thyroid nodules: crush fresh *Bai Fu Zi* and use topically as a paste.
- Snake bite: use this herb with *Bai Zhi* (Radix Angelicae Dahuricae), *Jin Yin Hua* (Flos Lonicerae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and apply topically.
- Fungal skin diseases (such as tinea versicolor): mix this herb with *Xiong Huang* (Realgar) and water or grain-based alcohol, and apply topically.

3. Dries Dampness, Relieves Pain, Stops Itching

***Bi zheng* (painful obstruction syndrome):** *Bai Fu Zi* treats *bi zheng* characterized by muscle and joint aches and pains, that worsen with rainy or cold weather. It also treats difficulty with flexion and extension.

- *Bi zheng*: combine it with *Wei Ling Xian* (Radix Clematidis) and *Du Huo* (Radix Angelicae Pubescentis).

Bai Fu Zi (Rhizoma Typhonii)

Eczema: *Bai Fu Zi* also relieves itching and can be used topically and internally.

- Itching and eczema of the scrotum: use this herb with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Bai Ji Li* (Fructus Tribuli), and *Huang Qi* (Radix Astragali) in powder form. These herbs can be used internally and/or topically.

DOSAGE

3 to 5 grams. *Bai Fu Zi* is commonly used internally and topically. Dosage can be up to 9 grams for severe cases. Oral administration of the unprocessed herb should be avoided because of its toxicity. *Bai Fu Zi* may be treated by cooking with *Sheng Jiang* (Rhizoma Zingiberis Recens) to reduce toxicity.

CAUTIONS / CONTRAINDICATIONS

- Fresh or unprocessed *Bai Fu Zi* is toxic and should only be used topically.
- Since *Bai Fu Zi* is toxic, do not exceed appropriate dosage of the herb or give it for an extended period of time.
- *Bai Fu Zi* is contraindicated during pregnancy.
- *Bai Fu Zi* is also contraindicated in cases of wind-stroke from Liver fire.

CHEMICAL COMPOSITION

Saponin, alkaloid, β-sitosterol, lectin.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Injection of *Bai Fu Zi* was effective in treatment of guinea pigs infected with tuberculosis.[2]
- **Antiarrhythmic:** A preparation of *Bai Fu Zi* has been shown to have an antiarrhythmic effect.[3]

CLINICAL STUDIES AND RESEARCH

- **Numbness of facial nerves:** In one clinical study, 418 patients with numbness of the face were treated by injection of an herbal formula into acupuncture points, with 90% reporting complete recovery. The herbal formula was modified from *Qian Zheng San* (Lead to Symmetry Powder), and contained *Bai Fu Zi* 60g, *Dang Gui* (Radicis Angelicae Sinensis) 60g, *Quan Xie* (Scorpio) 60g, *Jiang Can* (Bombyx Batryticatus) 60g and *Wu Gong* (Scolopendra) 40 pieces. Acupuncture points selected included *Dicang* (ST 4), *Jiache* (ST 6), *Yangbai* (GB 14), *Taiyang* (Extra), and *Hegu* (LI 4).[4]

SUPPLEMENT

Bai Fu Zi (Rhizoma Typhonii) is derived from two sources: *Yu Bai Fu* (Rhizoma Typhonium Giganteum) and *Guan Bai Fu* (Rhizoma Aconitum Coreanum). Both herbs dispel wind and phlegm.

- 禹白附 *Yu Bai Fu* (Rhizoma Typhonium Giganteum) is the standard source of *Bai Fu Zi*. It is more effective to clear toxins and disperse stagnation. It is better to treat arthritis and relieve pain.
- 關白附 / 关白附 *Guan Bai Fu* (Rhizoma Aconitum Coreanum) is sometimes used as a substitute for *Bai Fu Zi*.

AUTHORS' COMMENTS

Bai Fu Zi (Rhizoma Typhonii) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) have a similar physical appearance, and thus share a similar name. These two herbs, however, have completely different natures and functions, and should not be confused or used interchangeably. *Bai Fu Zi* is used primarily to eliminate wind-phlegm and cold. *Fu Zi* (Radix Aconiti Lateralis Praeparata) warms both the interior and Kidney yang.

Bai Jie Zi (Semen Sinapis)

白芥子 白芥子

Pinyin Name: *Bai Jie Zi*
Literal Name: "white mustard seed"
Alternate Chinese Names: *Huang Jie Zi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: mustard seed, white mustard seed
Botanical Name: *Sinapis alba* (L.) Boiss. (*Bai Jie Zi*); *Brassica juncea* (L.) Czern. et Coss. (*Huang Jie Zi*)
Pharmaceutical Name: Semen Sinapis
Properties: acrid, warm
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Warms the Lung, Dispels Phlegm

Phlegm stagnation: Acrid, warm and dispersing in nature, *Bai Jie Zi* (Semen Sinapis) warms the Lung, ventilates Lung qi and dispels phlegm. Cold phlegm obstruction in the Lung causes cough, wheezing and dyspnea, while obstruction of phlegm at the diaphragm causes sudden sharp pain in the thorax and neck, profuse clear or white sputum, greasy tongue coat and wiry, slippery pulse.

- Cough, wheezing and chest pain due to accumulation of phlegm and water in the chest and diaphragm: combine *Bai Jie Zi* with *Su Zi* (Fructus Perillae) and *Lai Fu Zi* (Semen Raphani). **Exemplar Formula:** *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents).
- Obstruction of phlegm above and below the diaphragm with sharp pain in the thorax and neck (an excess condition): use *Bai Jie Zi* with *Gan Sui* (Radix Euphorbiae Kansui) and *Da Ji* (Radix Euphorbiae seu Knoxiae).

Lung qi reversal caused by phlegm stagnation: *Bai Jie Zi* is commonly used to treat accumulation of dampness and phlegm in the Lung that causes profuse, clear sputum, cough, dyspnea, and wheezing.

- Wheezing and dyspnea due to cold phlegm: combine *Bai Jie Zi* with *Su Zi* (Fructus Perillae) and *Lai Fu Zi* (Semen Raphani) to warm the Lung and dispel phlegm.

2. Regulates Qi, Dissipates Nodules, Opens Channels and Collaterals, Relieves Pain

Phlegm obstruction of the channels and collaterals: Phlegm obstruction in the peripheral channels and collaterals causes severe numbness and pain, especially around the waist and back.

- Phlegm obstruction in the peripheral channels and collaterals: add *Bai Jie Zi* to *Mo Yao* (Myrrha), *Gui Zhi* (Ramulus Cinnamomi) and *Mu Xiang* (Radix Aucklandiae), for use as herbal powder. Serve with grain-based liquor.

Scrofula, phlegm masses: These masses are caused when phlegm obstruction hardens into masses or nodules. Treatment involves mixing *Bai Jie Zi* powder with vinegar and applying topically.

Yin sores: This type of cellulitis or sore is caused by phlegm obstruction of the channels and collaterals. Treatment requires warming the yang, dissolving phlegm and dispersing nodules.

- Yin sores: use *Bai Jie Zi* with *Lu Jiao Jiao* (Gelatinum Cornu Cervi), *Rou Gui* (Cortex Cinnamomi), *Pao Jiang* (Rhizoma Zingiberis Preparatum) and *Shu Di Huang* (Radix Rehmanniae Preparata). **Exemplar Formula:** *Yang He Tang* (Yang-Heartening Decoction).

DOSAGE

3 to 10 grams as herbal decoction. Mix *Bai Jie Zi* powder with vinegar for topical application. Use of unprocessed *Bai Jie Zi*, which is acrid and warm, is sometimes associated with excessive consumption of qi and yin in the body. To minimize this side effect, the herb should be dry-fried. In addition, dry-frying facilitates the extraction of active components. *Bai Jie Zi* should be decocted towards the end or at the close of cooking, to avoid deactivation of its active constituents.

CAUTIONS / CONTRAINDICATIONS

- Acrid and dispersing, *Bai Jie Zi* is contraindicated in patients with chronic coughing from Lung deficiency,

Bai Jie Zi (Semen Sinapis)

yin-deficient fire, or excess Stomach fire.

- Overdose of *Bai Jie Zi* may cause diarrhea. When this herb comes in contact with water, hydrogen sulfide is produced, which can stimulate increased peristalsis, resulting in diarrhea.
- Topical application of *Bai Jie Zi* is irritating to the skin and may cause allergic reactions or blisters. It should be kept away from the eyes and used with caution for patients with sensitive skin.

CHEMICAL COMPOSITION

Sinalbin, sinapine, myrosin, lipids, protein.[1]

PHARMACOLOGICAL EFFECTS

- **Expectorant:** Administration of *Bai Jie Zi* is associated with an expectorant effect.[2]
- **Dermatological:** Direct contact with *Bai Jie Zi* has a stimulating effect on the skin, causing redness, swelling, and formation of blisters. When used as a topical application, it should not be left on the skin for more than 15 to 30 minutes.[3]
- **Antibiotic:** Water extract of *Bai Jie Zi* has an inhibitory influence against some pathogenic fungi and dermatophytes.[4]

CLINICAL STUDIES AND RESEARCH

- **Tracheitis in children:** According to one study, 50 children with acute or chronic tracheitis were treated with topical application of *Bai Jie Zi*, with good results. The herb paste was prepared by mixing 33 grams of *Bai Jie Zi* and 90 grams of flour with water. The paste was applied on the upper back at bedtime, removed in the morning, for a total of 2 or 3 treatments.[5]
- **Pneumonia in children:** Topical application of *Bai Jie Zi* on the chest had a beneficial effect in treating 100 children with pneumonia.[6]
- **Numbness in the facial region:** In one clinical study, patients with numbness of the face were treated with topical application of *Bai Jie Zi*. The paste was prepared by mixing 5 to 10 grams of *Bai Jie Zi* powder with water, and was applied topically to the affected area between *Dicang* (ST 4), *Xiguan* (LR 7) and *Jiache* (ST 6). After application, the herbal paste was covered with gauze, and removed 3 to 12 hours later. The same treatment was repeated in 10 to 14 days if necessary. Out of 1,052 patients, 137 dropped out of the study. Of the 915 patients who stayed throughout the study, there was a 97.7% rate of effectiveness.[7]

AUTHORS' COMMENTS

Chronic asthma can be treated with topical application of an herbal paste to acupuncture points *Feishu* (BL 13), *Xinshu* (BL 15) and *Geshu* (BL 17). The herbal paste is made by mixing fresh ginger juice with powdered *Bai Jie Zi*, *Gan Sui* (Radix Euphorbiae Kansui), *Yan Hu Suo* (Rhizoma Corydalis) and *Xi Xin* (Herba Asari).

Bai Jie Zi, *Zi Su Zi* (Fructus Perillae), and *Lai Fu Zi* (Semen Raphani) are commonly used together to treat wheezing and dyspnea with phlegm, such as in *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents).

- *Bai Jie Zi* warms and dispels the accumulation of phlegm in the Lung.
- *Zi Su Zi* descends qi and dissolves phlegm.
- *Lai Fu Zi* regulates Spleen qi to stop the production of phlegm.

Zao Jiao (Fructus Gleditsiae)

皂角 皂角

Pinyin Name: *Zao Jiao*
Literal Name: "soap thorn"
Alternate Chinese Names: *Zao Jia*, *Zhu Ya Zao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: gleditsia fruit, Chinese honey locust
Botanical Name: *Gleditsia sinensis* Lam. (*Zao Jiao*)
Pharmaceutical Name: Fructus Gleditsiae
Properties: acrid, warm
Channels Entered: Large Intestine, Lung
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Dispels Phlegm

Acrid and dispersing, *Zao Jiao* (Fructus Gleditsiae) strongly breaks up and dispels phlegm. It treats chronic and stubborn accumulations of phlegm in the Lung that lead to chest congestion, cough, dyspnea, and sputum that is difficult to expectorate.

- Phlegm accumulation in the chest, with cough: use *Zao Jiao* to dispel the phlegm and *Da Zao* (Fructus Jujubae) to protect the Stomach.
- Chronic pulmonary infection with cough, wheezing, chest congestion, and copious, difficult-to-expectorate sputum: use this herb with *Ma Huang* (Herba Ephedrae) and pig bile.
- Consumptive lung disorders, lung abscesses with cough: combine *Zao Jiao* with *Da Zao* (Fructus Jujubae) and honey.

2. Opens Sensory Orifices

Zao Jiao opens the sensory orifices to resuscitate patients who are unconscious, with foaming of the mouth, locked jaw, difficulty breathing, and a pale face. This herb is most suitable for symptoms of excess-type *bi zheng* (closed disorder).

- Sudden loss of consciousness: blow powdered *Zao Jiao* and *Xi Xin* (Herba Asari) into the nostrils to induce sneezing and restore consciousness.
- Stroke with clenched jaw: mix *Zao Jiao* with warm water and *Ming Fan* (Alumen) to induce vomiting.

3. Reduces Swelling and Abscesses

Zao Jiao reduces swelling and drains abscesses that have not ulcerated. It treats initial stages of boils, clumping, and abscesses.

- Abscesses and boils: cook *Zao Jiao* with vinegar and apply topically as a paste.

4. Relieves Constipation

Zao Jiao stimulates peristalsis and induces bowel movement.

- Constipation: mix *Zao Jiao*, *Xi Xin* (Herba Asari) and honey to make suppositories and insert rectally. For oral ingestion, combine *Zao Jiao* with *Tao Ren* (Semen Persicae) and *Gua Lou Shi* (Fructus Trichosanthis).

DOSAGE

1.5 to 5 grams in decoction. *Zao Jiao* powder may be used in dosages of 0.6 to 1.5 grams daily for internal use.

CAUTIONS / CONTRAINDICATIONS

- Use of *Zao Jiao* is contraindicated for patients who are coughing blood, or for those with deficiencies of qi and yin.
- *Zao Jiao* is contraindicated during pregnancy.
- Ingestion of a large dose of *Zao Jiao* may cause nausea or diarrhea.

OVERDOSAGE

Overdose of *Zao Jiao* may cause nausea, vomiting, diarrhea, irritability, weak extremities, and fullness in the epigastric region. It stimulates, then inhibits, the central nervous system. In severe cases, respiratory depression may occur. In rare cases, hemolytic anemia has been associated with gross overdose of *Zao Jiao* (dosages in excess of 30 grams).

TREATMENT OF OVERDOSAGE

Early-stage overdose can be treated with emetic methods, followed by ingestion of egg whites or milk.

Zao Jiao (Fructus Gleditsiae)

Purgative methods can also be employed if necessary. Mild systemic reactions characterized by burning sensations and pain of the throat, palpitations, and dizziness can be treated with an herbal decoction of *Xuan Shen* (Radix Scrophulariae) 30g, *Gan Cao* (Radix Glycyrrhizae) 15g, and honey 60g. Decoction of 9 grams each of *Gan Cao* (Radix Glycyrrhizae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) is also beneficial.[1]

Hemolytic anemia, a rare adverse reaction associated with gross overdose of over 30 grams of *Zao Jiao*, has been noted. This condition can be treated with an herbal decoction of *Hei Dou* (Semen Glycine Max) 30g, *Huang Qi* (Radix Astragali) 30g, *Dang Gui* (Radicis Angelicae Sinensis) 15g, *E Jiao* (Colla Corii Asini) 15g, *Yin Chen Hao* (Herba Artemisiae Scopariae) 15g, and *San Qi* (Radix Notoginseng) 3g.[2]

CHEMICAL COMPOSITION

Gledinin, gledigenin, gleditschiasaponin, gleditschiasapogenin, arabinose, ceryl alcohol, nonacosane, stigmasterol, sitosterol.[3]

PHARMACOLOGICAL EFFECTS

- **Expectorant:** The expectorant action of *Zao Jiao* is associated with stimulation and increased secretion of the respiratory tract.[4]
- **Gastrointestinal:** *Zao Jiao* has a stimulating effect on the stomach and intestines and may cause nausea, vomiting or diarrhea. Nausea and vomiting usually occur within 10 minutes of ingestion.[5]
- **Antibiotic:** It has an inhibitory effect against *E. coli*, *Bacillus dysenteriae*, *Pseudomonas aeruginosa*, *Vibrio cholerae*, and some dermatophytes.[6]

CLINICAL STUDIES AND RESEARCH

- **Expectorant:** *Zao Jiao* was used successfully in treating 103 patients with various respiratory disorders characterized by accumulation of sputum. The herbal formula was prepared by mixing *Zao Jiao* powder with honey to make pills. The dosage was 0.4 to 0.6 gram of the herb, three times daily. The average duration of treatment was 16.5 days. This treatment was contraindicated for individuals with deficiencies or at risk of bleeding.[7]
- **Acute postpartum mastitis:** In one study, 36 patients with acute postpartum mastitis were treated with intranasal administration of *Zao Jiao* with good success. The treatment protocol was to grind the herb into powder, mix it with 75% alcohol, wrap the paste in a piece of cloth, and insert it into the nostril on the same side as the mastitis. The nasal insert was retained for 12 hours.[8]
- **Anorexia:** A *Zao Jiao* preparation was used with 94.5% effectiveness in treating 110 children with anorexia. The herb was calcined, dry-fried, and then ground into powder. Children were given 1 gram of the herb mixed with sugar twice daily, for 3 to 10 days. Most children responded within 5 days.[9]

HERB-DRUG INTERACTION

- **Absorption:** According to Dr. Zhang Xiao-Ping, *Zao Jiao* has a "detergent" effect which enables it to bind to other substances to form a large and insoluble complex that cannot be absorbed. Though this potential interaction with pharmaceuticals has not been documented, it is wise to instruct the patient not to take *Zao Jiao* and drugs concurrently, as there may be a decrease in absorption and blood concentration of the drug.

AUTHORS' COMMENTS

Zao Jiao (Fructus Gleditsiae) and *Zao Jiao Ci* (Spina Gleditsiae) have similar functions. *Zao Jiao* more strongly dispels phlegm. *Zao Jiao Ci* more effectively activates blood circulation and disperses stagnation, and is used for sores and carbuncles that have not yet ulcerated.

According to Dr. Zhang Xiao-Ping, both *Zao Jiao* (Fructus Gleditsiae) and *Zao Jiao Ci* (Spina Gleditsiae) can be used for treatment of obesity, elevated cholesterol level, and lipoma. Both of these herbs have a "detergent" effects with both lipophilic and hydrophilic properties, enabling the flushing of fatty substances from the body. The recommended dose for this application is 3 to 5 grams in decoction.

Zao Jiao Ci (Spina Gleditsiae)

皂角刺 皂角刺

Pinyin Name: *Zao Jiao Ci*
Literal Name: "soap thorn spine"
Alternate Chinese Names: *Zao Jiao Zhen*
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: gleditsia spine, Chinese honey locust spine
Botanical Name: *Gleditsia sinensis* Lam. (*Zao Jiao*)
Pharmaceutical Name: Spina Gleditsiae
Properties: acrid, warm
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

Eliminates Toxicity, Drains Pus, Activates Blood Circulation, Reduces Swelling

Sores, carbuncles, masses with pus, that have not suppurated: Acrid and warm, *Zao Jiao Ci* (Spina Gleditsiae) reduces swelling and drains sores with accumulated heat and toxins. It is commonly used in the early stages of sores to encourage suppuration, or to induce the drainage of sores with pus.

- Acute mastitis: take 30 grams of herbal powder (1:10 ratio of *Zao Jiao Ci* to *Hai Ge Fen* (Concha Meretricis seu Cyclinae)) followed by warm grain-based liquor.
- Scrofula, sores: mix *Zao Jiao Ci* and *Bai Ji* (Rhizoma Bletillae) and apply topically.
- Tonsillitis: use this herb individually.

DOSAGE

3 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- *Zao Jiao Ci* is contraindicated during pregnancy.
- It is also contraindicated if the sores have already ruptured.

CHEMICAL COMPOSITION

Flavonoids, phenols, amino acids.[1]

CLINICAL STUDIES AND RESEARCH

- **Tonsillitis:** In one study, 9 out of 10 patients with tonsillitis showed complete recovery following treatment with *Zao Jiao Ci*. The treatment protocol was to cook 9 grams of the herb in water, and drink the decoction in 2 equally-divided doses daily for 2 to 6 days. Therapeutic benefits included reduced swelling, pain relief, reduced fever, and normal white blood cell count.[2]

HERB-DRUG INTERACTION

- **Absorption:** According to Dr. Zhang Xiao-Ping, *Zao Jiao Ci* has a "detergent" effect that enables it to bind to other substances to form a large and insoluble complex that cannot be absorbed. Though this potential interaction with pharmaceuticals has not been documented, it is wise to instruct the patient not to take *Zao Jiao Ci* and drugs concurrently, as there may be a decrease in absorption and blood concentration of the drug.

AUTHORS' COMMENTS

According to Dr. Long Pang-Chi, *Zao Jiao Ci* reduces swelling and dispels pus. It is excellent for treatment of obstruction or adhesions of the fallopian tubes secondary to pelvic inflammatory disease. *Zao Jiao Ci* is commonly combined with *Tao Ren* (Semen Persicae) and *Bai Jiang Cao* (Herba cum Radice Patriniae) for maximum effectiveness in this action.

Jie Geng (Radix Platycodonis)

桔梗

Pinyin Name: *Jie Geng*
Literal Name: "solid and straight root"
Alternate Chinese Names: *Ku Jie Geng, Bai Jie Geng, Yu Jie Geng*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: platycodon, platycodon root, balloon-flower root
Botanical Name: *Platycodon grandiflorum* (Jacq.) A. DC. (*Jie Geng*)
Pharmaceutical Name: Radix Platycodonis
Properties: bitter, acrid, neutral
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Ventilates the Lung, Dispels Phlegm, and Benefits the Throat

Cough with profuse phlegm, sore throat with hoarse voice: Acrid, bitter and dispersing in nature, *Jie Geng* (Radix Platycodonis) enters the Lung to ventilate Lung qi, dispel phlegm, and benefit the throat. It is one of the most essential herbs for treatment of Lung disorders. *Jie Geng* can be used for phlegm caused by wind-heat or wind-cold invasions. Common clinical manifestations include cough with profuse sputum, sore throat and hoarse voice.

- Cough, stuffy nose, sputum, aversion to cold, and headache caused by wind-cold: combine *Jie Geng* with *Zi Su Ye* (Folium Perillae), *Xing Ren* (Semen Armeniacae Amarum) and *Chen Pi* (Pericarpium Citri Reticulatae). **Exemplar Formula:** *Xing Su San* (Apricot Kernel and Perilla Leaf Powder).
- Cough, fever, thirst, stuffy nose and headache from wind-heat or febrile disorders: use this herb with *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi), and *Xing Ren* (Semen Armeniacae Amarum). **Exemplar Formula:** *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction).
- Sore throat and hoarse voice: add *Jie Geng* to *Gan Cao* (Radix Glycyrrhizae).
- Severe sore throat and loss of voice: use it with *Gan Cao* (Radix Glycyrrhizae), *Huang Qin* (Radix Scutellariae) and *Gu Zhi Hua* (Semen Oroxyli).
- Sore throat and loss of voice due to wind-heat: add this herb to *Bo He* (Herba Menthae), *Niu Bang Zi* (Fructus Arctii) and *Chan Tui* (Periostracum Cicadae).
- Chest congestion and discomfort with phlegm stagnation: use it with *Zhi Ke* (Fructus Aurantii) and *Gua Lou Pi* (Pericarpium Trichosanthis).

2. Dispels Pus

Lung abscess: *Jie Geng* is one of the strongest herbs to dispel phlegm and pus. It clears heat and eliminates toxins to treat formation of pus and abscesses. Secondary symptoms include chest pain, fever, cough with blood and pus, and thick, yellow sputum with a putrid stench.

- Lung abscess with chest pain, fever, cough with foul-smelling, yellow, sticky sputum: combine this herb with *Gan Cao* (Radix Glycyrrhizae) and *Yi Yi Ren* (Semen Coicis).
- Lung abscess with profuse phlegm and pus accumulation: use *Jie Geng* with *Bei Mu* (Bulbus Fritillaria), *Yi Yi Ren* (Semen Coicis) and *Ba Dou* (Fructus Crotonis).
- Lobar pneumonia and bronchitis caused by heat and toxins: use this herb with *Yu Xing Cao* (Herba Houttuyniae), *Yi Yi Ren* (Semen Coicis) and *Dong Gua Zi* (Semen Benincasae).
- Formation of pus and abscesses: use it with *Bai Shao* (Radix Paeoniae Alba) and *Zhi Shi* (Fructus Aurantii Immaturus). **Exemplar Formula:** *Pai Nong San* (Drain the Pus Powder).

3. Raises Qi

Jie Geng raises the qi of the Lung and Large Intestine, two organs connected by their *zang fu* relationship. It is commonly used to lift sunken qi, for treatment of diarrhea, rectal tenesmus, anuria, and edema.

DOSAGE

3 to 9 grams. Honey-baked *Jie Geng* is stronger for moistening the Lung and dispelling phlegm.

Jie Geng (Radix Platycodonis)

CAUTIONS / CONTRAINDICATIONS

- Bitter, dispersing and draining, *Jie Geng* should be used with caution for patients experiencing chronic cough from yin deficiency, or cough with blood-streaked sputum.

CHEMICAL COMPOSITION

Platycodigenin, polygalacic acid, platycogenic acid A, B, C; glucose, amino acids.[1]

PHARMACOLOGICAL EFFECTS

- **Expectorant and antitussive:** Decoction of *Jie Geng* at 1 g/kg has a marked expectorant effect in anesthetized dogs and cats. Intraperitoneal injection of *Jie Geng* was effective in suppressing cough in guinea pigs.[2]
- **Cardiovascular:** Intravenous injection of a *Jie Geng* preparation was associated with a decrease in blood pressure, heart rate, and respiratory rate in rats. It also dilated blood vessels and increased blood perfusion to peripheral parts of the body.[3]
- **Anti-inflammatory:** Administration of *Jie Geng* is associated with a suppressed sensitivity for allergic reaction and decreased capillary permeability.[4]
- **Gastrointestinal:** Administration of *Jie Geng* is beneficial in treatment of stomach and duodenal ulcers. At 1/5th the LD_{50}, *Jie Geng* exerts close to 100% inhibition of the secretion of gastric acid in mice.[5]
- **Antidiabetic:** Oral administration of water or alcohol extract of *Jie Geng* in rabbits may lower plasma glucose levels and prevent sharp increases in levels following meals. The alcohol extract was more effective than the water extract.[6]
- **Others:** It has analgesic, antihyperlipidemic, sedative, and antipyretic effects.[7]

CLINICAL STUDIES AND RESEARCH

- **Pulmonary abscess:** Ten patients with pulmonary abscesses were treated with an herbal decoction with satisfactory results. The initial treatment used 60 grams of *Jie Geng* and 30 grams of *Gan Cao* (Radix Glycyrrhizae). The dosage of both herbs was reduced by two-thirds after the condition improved.[8]

TOXICOLOGY

The LD_{50} for decoction of *Jie Geng* is 24 g/kg in mice. No fatalities were reported in rabbits that received the decoction at 20 g/kg. However, at 40 g/kg, there was a 100% fatality in 5 out of 5 rabbits within 24 hours of administration.[9,10]

SUPPLEMENT

- 疏花沙参 / 疏花沙参 *Shu Hua Sha Shen* (Radix Adenophora Remotiflora) was mentioned in some classic texts as a substitute for *Jie Geng*. However, they are two separate entities and should not be used interchangeably.

AUTHORS' COMMENTS

Jie Geng and *Xing Ren* (Semen Armeniacae Amarum) are commonly used to treat improperly rising Lung qi. *Jie Geng* is neutral, and can be used in patients with Lung disorders caused by either cold or heat. It causes Lung qi to descend, expands the chest and dispels phlegm and pus. *Xing Ren* directs Lung qi downward, and is effective to treat cough, wheezing and dyspnea. It also dissolves turbidity and phlegm.

Xuan Fu Hua (Flos Inulae)

旋覆花 旋覆花

Pinyin Name: *Xuan Fu Hua*
Literal Name: "revolved, upturned flower"
Alternate Chinese Names: *Jin Fei Hua, Jin Fei Cao, Xuan Fu Geng*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: inula flowers
Botanical Name: *Inula japonica* Thunb. (*Xuan Fu Hua*); *Inula britannica* L. (*Ou Ya Xuan Fu Hua*)
Pharmaceutical Name: Flos Inulae
Properties: bitter, acrid, salty, slightly warm
Channels Entered: Large Intestine, Lung, Stomach, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Phlegm, Regulates Water Circulation

Excess phlegm accumulation in the Lung: *Xuan Fu Hua* (Flos Inulae) dissolves phlegm, regulates qi, and activates water circulation. The salty nature of these flowers softens hardness and treats stubborn phlegm. The slightly warm property unblocks stagnation caused by cold and facilitates water circulation. *Xuan Fu Hua* treats accumulation of phlegm and fluids in the Lung.

- Accumulation of cold phlegm in the Lung with cough, wheezing, and white or clear sputum: combine *Xuan Fu Hua* with *Ban Xia* (Rhizoma Pinelliae) and *Xing Ren* (Semen Armeniacae Amarum).
- Accumulation of hot phlegm in the Lung with cough, wheezing, and yellow sputum: use this herb with *Jie Geng* (Radix Platycodonis), *Sang Bai Pi* (Cortex Mori), *Huang Qin* (Radix Scutellariae) and *Da Huang* (Radix et Rhizoma Rhei).
- Accumulation of phlegm with exterior conditions: add it to *Sheng Jiang* (Rhizoma Zingiberis Recens), *Ban Xia* (Rhizoma Pinelliae) and *Ma Huang* (Herba Ephedrae). **Exemplar Formula:** *Jin Fei Cao San* (Inula Powder).
- Accumulation of phlegm with Stomach qi deficiency: combine it with *Dai Zhe Shi* (Haematitum), *Ban Xia* (Rhizoma Pinelliae) and *Ren Shen* (Radix Ginseng). **Exemplar Formula:** *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction).

2. Descends Qi and Stops Vomiting

Stomach qi reversal: *Xuan Fu Hua* has an excellent function to redirect abnormally-rising qi downward, to relieve nausea, vomiting, and hiccups. When the Spleen and Stomach are deficient, phlegm accumulates in the middle *jiao* and causes Stomach qi to rise.

- Nausea and vomiting caused by phlegm accumulation and Stomach deficiency: *Xuan Fu Hua* is combined with *Ren Shen* (Radix Ginseng), *Ban Xia* (Rhizoma Pinelliae), *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Dai Zhe Shi* (Haematitum).
- Nausea and vomiting because of Stomach heat: use this herb with *Huang Lian* (Rhizoma Coptidis) and *Zhu Ru* (Caulis Bambusae in Taenia).
- Indigestion with feelings of congestion and oppression in the abdomen and epigastrium: combine it with *Mu Xiang* (Radix Aucklandiae), *Shen Qu* (Massa Fermentata) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

DOSAGE

3 to 10 grams as decoction. *Xuan Fu Hua* should be wrapped in cheesecloth prior to decoction to avoid irritation to the throat or digestive tract by the fuzz on the flowers. The unprocessed herb more strongly lowers qi, dissolves phlegm, and stops nausea. The honey-fried herb more effectively moistens the Lung, dispels phlegm, and relieves cough and wheezing.

CAUTIONS / CONTRAINDICATIONS

- Bitter, warm and dispersing in nature, *Xuan Fu Hua* should be used with caution for patients experiencing dry cough due to yin deficiency, or loose stools because of Spleen deficiency.
- Allergic dermatitis and diarrhea have been reported following the use of *Xuan Fu Hua*.[1,2,3]

CHEMICAL COMPOSITION

Quercetin, isoquercetin, caffeic acid, chlorogenic acid, taraxasterol, britannin, inulicin.[4]

Xuan Fu Hua (Flos Inulae)

PHARMACOLOGICAL EFFECTS

- **Antiasthmatic and antitussive:** Intraperitoneal injection of water extract of *Xuan Fu Hua* is associated with marked antiasthmatic and antitussive effects. It has been proposed that *Xuan Fu Hua* relieves wheezing and asthma by relaxing the bronchioli. No expectorant effect was observed.[5]
- **Diuretic:** It has a mild diuretic effect.[6]
- **Antibiotic:** Decoction of *Xuan Fu Hua* has an inhibitory effect against *Staphylococcus aureus*, *Bacillus anthracis*, and *Bacillus dysenteriae*.[7]

HERB-DRUG INTERACTION

- **Diuretics:** *Xuan Fu Hua* has a mild diuretic action. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[8] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of a 15% *Xuan Fu Hua* decoction is 22.5 g/kg in mice. Adverse reactions due to overdose included increased respiration rate, excitation, tremor, and convulsions.[9]

SUPPLEMENT

- 金沸草 / 金沸草 *Jin Fei Cao* (Herba Inulae), first cited in the *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is derived from the aerial parts of the same plant as *Xuan Fu Hua*. Salty, slightly bitter and warm, *Jin Fei Cao* has actions similar to *Xuan Fu Hua* in dissolving phlegm, stopping cough and raising qi. Toxic swellings and sores can be treated with topical application of fresh *Jin Fei Cao*. The dosage for *Jin Fei Cao* is 8 to 12 grams.

AUTHORS' COMMENTS

According to Dr. Ding Guang-Di, *Xuan Fu Hua* and *Xiang Fu* (Rhizoma Cyperi) are more effective to address right-sided hypochondriac pain, while *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis) are better for left-sided hypochondriac pain.

Qian Hu (Radix Peucedani)

前胡

Pinyin Name: *Qian Hu*
Literal Name: "before barbarians"
Alternate Chinese Names: *Yan Feng*, *Xin Qian Hu*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: peucedanum, white-flowered hog-fennel root, common hog-fennel root
Botanical Name: *Peucedanum praeruptorum* Dunn. (*Bai Hua Qian Hu*); *Peucedanum decursivum* Maxim. (*Zi Hua Qian Hu*)
Pharmaceutical Name: Radix Peucedani
Properties: bitter, acrid, cool
Channels Entered: Lung

Qian Hu (Radix Peucedani)

CHINESE THERAPEUTIC ACTIONS

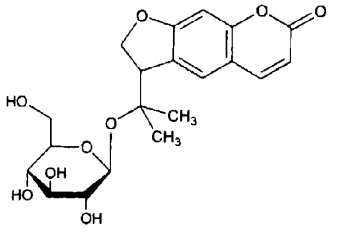
1. Redirects Qi Downward and Dispels Phlegm

Excess accumulation of phlegm in the Lung causing cough and dyspnea: *Qian Hu* (Radix Peucedani) has dispersing and draining properties to redirect rebellious Lung qi and dispel phlegm. Clinical applications of *Qian Hu* include accumulation of phlegm in the Lung, abnormally rising Lung qi, copious, difficult-to-expectorate sputum, cough, wheezing and chest oppression. This herb is often combined with other herbs with descending properties to relieve cough and dispel phlegm.

- Accumulation of heat and phlegm in the chest: combine *Qian Hu* with *Sang Bai Pi* (Cortex Mori), *Bei Mu* (Bulbus Fritillaria) and *Xing Ren* (Semen Armeniacae Amarum).

2. Disperses and Dispels Wind-Heat

Qian Hu dispels wind-heat from the exterior. It is commonly used to treat wind-heat syndrome with headache, cough, and/or Lung heat.



- Wind-heat: use this herb with *Bo He* (Herba Menthae), *Niu Bang Zi* (Fructus Arctii), and *Jie Geng* (Radix Platycodonis).

DOSAGE

6 to 10 grams in decoction. Honey-frying *Qian Hu* neutralizes its cold thermal property and enhances its moistening effect on the Lung. Honey-fried *Qian Hu* is more suitable for treating chronic cough caused by Lung deficiency or dry cough with little sputum.

CHEMICAL COMPOSITION

Nodakenin and nodakenetin.[1,2]

Nodakenin

PHARMACOLOGICAL EFFECTS

- **Expectorant:** Decoction of *Qian Hu* at 1 g/kg showed marked expectorant effects in anesthetized cats. It also had a long duration of action.[3]
- **Antiplatelet:** Nodakenin and nodakenetin have marked inhibitory effects on platelet aggregation *in vivo*.[4]
- **Antibiotic:** *Qian Hu* has an inhibitory effect against some influenza viruses and dermatophytes.[5]
- **Cardiovascular:** Administration of a preparation of *Qian Hu* is associated with increased blood perfusion to the coronary artery and increased resistance to hypoxia. It has no effect on the rhythm and contractility of the heart.[6,7]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Qian Hu* has antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[8] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

AUTHORS' COMMENTS

Qian Hu (Radix Peucedani) and *Chai Hu* (Radix Bupleuri) are often known as "*Er Hu*," meaning "two *Hu*." *Qian Hu* enters the Lung to descend qi and dispel phlegm while *Chai Hu* enters the Liver to lift qi and harmonize pathogenic factors in the *shaoyang* level. Together, they can treat *shaoyang* disorders that reside between disease stages (half exterior, half interior). Chief manifestations include alternating chills and fever, and chest congestion with coughing.

Bai Qian (Rhizoma Cynanchi Stauntonii)

白前

Pinyin Name: *Bai Qian*
Literal Name: "white before"
Alternate Chinese Names: *E Guan Bai Qian*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: cynanchum rhizome, willow leaf swallow wort rhizome, glaucescent swallow wort rhizome
Botanical Name: *Cynanchum stauntoni* (Decne.) Schltr. ex Levl. (*Liu Ye Bai Qian*); *Cynanchum glaucescens* (Decne.) (*Yuan Hua Ye Bai Qian*)
Pharmaceutical Name: Rhizoma Cynanchi Stauntonii
Properties: acrid, sweet, neutral
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

Descends Qi, Dispels Phlegm, Stops Cough

Excess condition of the Lung, cough with profuse sputum, wind-cold invasion: Acrid and warm, yet not drying, *Bai Qian* (Rhizoma Cynanchi Stauntonii) is an excellent herb to treat cough and wheezing secondary to the accumulation of phlegm in the Lung. It is a key herb used to treat any respiratory disorders manifesting in cough and dyspnea. When combined with appropriate herbs, *Bai Qian* can treat cough, wheezing and sputum caused by either hot or cold phlegm.

- Cough and dyspnea due to cold phlegm: combine *Bai Qian* with *Zi Wan* (Radix Asteris) and *Ban Xia* (Rhizoma Pinelliae).
- Cough and dyspnea due to hot phlegm: use it with *Sang Bai Pi* (Cortex Mori) and *Di Gu Pi* (Cortex Lycii).

Exterior wind-cold syndrome: *Bai Qian* dispels wind-cold and is commonly used in combination with appropriate herbs to treat cough caused by externally-contracted wind-cold syndrome.

- Cough due to wind-cold: use *Bai Qian* with *Jie Geng* (Radix Platycodonis), *Jing Jie* (Herba Schizonepetae), and *Chen Pi* (Pericarpium Citri Reticulatae). **Exemplar Formula:** *Zhi Sou San* (Stop Coughing Powder).

DOSAGE

3 to 10 grams in decoction. Unprocessed *Bai Qian* may irritate the stomach, leading to nausea and vomiting. Frying the herb with honey will minimize this irritation. In addition, honey-frying enhances the moistening effect of this herb and makes it more suitable for patients with dry cough and dyspnea from Lung yin deficiency.

CAUTIONS / CONTRAINDICATIONS

- Acrid and warm, *Bai Qian* should be used with caution for patients having dry cough from Lung yin deficiency.
- *Bai Qian* should be used with caution in patients with peptic ulcers or bleeding ulcers, because of the irritating effect it has on the gastrointestinal system.

Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)

川貝母 川贝母

Pinyin Name: *Chuan Bei Mu*
Literal Name: "shell mother from Sichuan"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: fritillaria cirrhosae, fritillary bulb from several species: tendril-leaf, unibract, przewalsk, and delavay
Botanical Name: *Fritillaria cirrhosa* D. Don. (*Chuan Bei Mu*); *Fritillaria unibracteata* Hsiao et K.C. Hsia. (*An Zi Bei Mu*); *Fritillaria przewalskii* Maxim. (*Gan Su Bei Mu*); *Fritillaria delavayi* Franch. (*Leng Sha Bei Mu*)
Pharmaceutical Name: Bulbus Fritillariae Cirrhosae
Properties: bitter, sweet, cool
Channels Entered: Heart, Lung

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Phlegm and Stops Cough

Chuan Bei Mu (Bulbus Fritillariae Cirrhosae) is cool and sweet, moistens the Lung and dissolves phlegm. It is mostly used for chronic dry cough with scanty, difficult-to-expectorate sputum, either with or without blood.

- Chronic cough with Lung deficiency, dry cough with little sputum, or cough with blood-streaked sputum: use *Chuan Bei Mu* with *Xing Ren* (Semen Armeniacae Amarum), *Zi Wan* (Radix Asteris), and *Kuan Dong Hua* (Flos Farfarae).
- Cough with phlegm and dryness in the Lung: use this herb with *Gua Lou Ren* (Semen Trichosanthis) and *Tian Hua Fen* (Radix Trichosanthis). **Exemplar Formula:** *Bei Mu Gua Lou San* (Fritillaria and Trichosanthes Fruit Powder).
- Cough with excess phlegm and heat: use it with snake bile.
- Cough due to exterior wind-cold attacking the body: use *Chuan Bei Mu* with *Bo He* (Herba Menthae), *Xing Ren* (Semen Armeniacae Amarum), *Su Zi* (Fructus Perillae), and *Jie Geng* (Radix Platycodonis). **Exemplar Formula:** *Ning Sou Wan* (Quiet the Cough Pills).

2. Clears Heat and Disperses Nodules

Bitter and cold in nature, *Chuan Bei Mu* clears heat and disperses nodules and hardness. It is commonly used to treat sores, nodules, scrofula, goiter, and lung or breast abscesses.

- Scrofula: combine *Chuan Bei Mu* and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).

DOSAGE

3 to 10 grams in decoction, 1.0 to 1.5 grams in powder.

CAUTIONS / CONTRAINDICATIONS

- *Chuan Bei Mu* is not suitable if phlegm is characterized by cold or dampness.
- *Chuan Bei Mu* is incompatible with *Wu Tou* (Radix Aconiti).

CHEMICAL COMPOSITION

Chinpeimine, fritiminine, beilupeimine, sonpeimine, sipeimine, minpeimine, minpeiminine, verticine, verticinine, fritillarine, fritimine.[1]

PHARMACOLOGICAL EFFECTS

- **Antitussive:** *Chuan Bei Mu* has a marked antitussive effect in rats. The maximum effect was reached 30 minutes after oral administration of herbs, and the effect lasted up to 2 hours.[2]
- **Expectorant:** *Chuan Bei Mu* has a marked expectorant effect in mice. The maximum effect was reached 60 minutes after oral administration of herbs, and lasted up to 2 hours.[3]
- **Others:** It has mild antihypertensive, spasmolytic, and muscle-relaxant effects.[4]

CLINICAL STUDIES AND RESEARCH

- **Whooping cough:** Equal portions of *Chuan Bei Mu*, *Bai Ji* (Rhizoma Bletillae) and *Kuan Dong Hua* (Flos Farfarae) were ground into powder and given to children for treatment of whooping cough. The dosage was 1 gram per day for infants under 1 year of age, and adjusted accordingly for children over 1 year of age. Out of 56 cases, 51 showed complete recovery, 4 showed moderate improvement, and 1 had no response.[5]
- **Chapped nipples:** Good results were reported for

Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)

treatment of chapped nipples using topical application of an herbal paste containing 10 grams of *Chuan Bei Mu*, 20 grams of white sesame seeds and 20 grams of black sesame seeds.[6]

TOXICOLOGY

No fatalities were reported following an oral bolus dose of *Chuan Bei Mu* (at the dosage of 8.0 g/kg in mice). No abnormalities were noted in a follow-up examination one week later.[7]

SUPPLEMENT

- 貝母 / 贝母 *Bei Mu* (Bulbus Fritillaria) is the generic name that refers to both *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii). Many classic texts do not distinguish between *Chuan Bei Mu* and *Zhe Bei Mu* as these two herbs have similar functions, and have been used interchangeably.

AUTHORS' COMMENTS

Chuan Bei Mu (Bulbus Fritillariae Cirrhosae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) both clear the Lung, dissolve phlegm and arrest cough. They are commonly used to treat cough with yellow sputum caused by heat in the Lung.

Chuan Bei Mu and *Mai Men Dong* (Radix Ophiopogonis) both moisten the Lung and arrest cough. However, *Chuan Bei Mu* is best used to disperse stagnation in the Lung that manifests in cough with sputum. *Mai Men Dong* more strongly nourishes Lung yin and clears heat.

Zhe Bei Mu (Bulbus Fritillariae Thunbergii)

浙貝母 浙贝母

Pinyin Name: *Zhe Bei Mu*
Literal Name: "shell mother from Zhejiang"
Alternate Chinese Names: *Xiang Bei Mu*, *Da Bei Mu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: fritillaria thunbergii, thunbergy fritillary bulb
Botanical Name: *Fritillaria verticillata* Willd. var. *thunbergii* Bak. (*Zhe Bei Mu*)
Pharmaceutical Name: Bulbus Fritillariae Thunbergii
Properties: bitter, cold
Channels Entered: Heart, Lung

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Phlegm and Stops Cough

Zhe Bei Mu (Bulbus Fritillariae Thunbergii) is one of the most effective herbs for stopping coughing caused by either exterior pathogenic factors or interior disharmony. *Zhe Bei Mu* is cold and bitter and has a strong sedating function that is most suitable for beginning stages of coughing caused by excess conditions such as Lung heat or wind-heat.

Zhe Bei Mu (Bulbus Fritillariae Thunbergii)

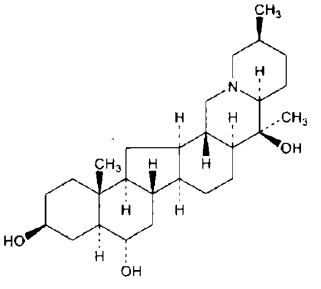
- Cough caused by wind-heat or accumulation of phlegm and heat: use *Zhe Bei Mu* with *Sang Ye* (Folium Mori), *Niu Bang Zi* (Fructus Arctii), *Qian Hu* (Radix Peucedani) and *Xing Ren* (Semen Armeniacae Amarum).
- Dry cough arising from Lung yin deficiency: use this herb with *Xing Ren* (Semen Armeniacae Amarum), *Zi Wan* (Radix Asteris), *Kuan Dong Hua* (Flos Farfarae) and *Mai Men Dong* (Radix Ophiopogonis).

2. Clears Heat and Disperses Nodules

Scrofula, sores, carbuncles, goiter, breast and lung abscesses: *Zhe Bei Mu* disperses stagnation and clears heat. For sores and abscess that have not ulcerated, *Zhe Bei Mu* is often used with herbs that clear heat, cool blood, and eliminate toxins.

- Nodules without abscesses: combine *Zhe Bei Mu* with *Xuan Shen* (Radix Scrophulariae) and *Mu Li* (Concha Ostreae).
- Thyroid nodules, goiter, tumor: use this herb with *Hai Zao* (Sargassum), *Kun Bu* (Thallus Laminariae seu Eckloniae), *Xia Ku Cao* (Spica Prunellae), and *E Zhu* (Rhizoma Curcumae). **Exemplar Formula:** *Hai Zao Yu Hu Tang* (Sargassum Decoction for the Jade Flask).
- Cough with pus or blood: add *Zhe Bei Mu* to *Jie Geng* (Radix Platycodonis) and *Zi Wan* (Radix Asteris).
- Lung abscess with copious pus, sputum and blood: use this herb with *Yu Xing Cao* (Herba Houttuyniae), *Lu Gen* (Rhizoma Phragmitis), and *Yi Yi Ren* (Semen Coicis).
- Carbuncles, abscesses and breast lumps: combine it with *Pu Gong Ying* (Herba Taraxaci), *Tian Hua Fen* (Radix Trichosanthis) and *Lian Qiao* (Fructus Forsythiae).

DOSAGE



3 to 10 grams in decoction, 1.0 to 1.5 grams in powder.

CAUTIONS / CONTRAINDICATIONS

- *Zhe Bei Mu* is not suitable if the phlegm is characterized by cold or dampness.
- *Zhe Bei Mu* is incompatible with *Wu Tou* (Radix Aconiti).

CHEMICAL COMPOSITION

Peimine, peiminine, peimidine, peimiphine, peimisine, peimitidine, peiminoside, and propeimine.[1,2]

Peimine

PHARMACOLOGICAL EFFECTS

- **Antitussive:** Peimine and peiminine have marked antitussive effects in rats.[3]
- **Effects on smooth muscle:** In laboratory studies, a low concentration of *Zhe Bei Mu* has been associated with relaxation of bronchial muscles, while a high concentration is associated with contraction.[4]

CLINICAL STUDIES AND RESEARCH

- **Upper respiratory tract infection and cough from chronic bronchitis:** Extract of the flowers of *Zhe Bei Mu* was made into liquid and pills for treatment of respiratory disorders. For the 245 patients in the clinical trial, the rate of effectiveness was 76.5% for treatment of upper respiratory tract infection and 68.2% for cough from chronic bronchitis.[5]

TOXICOLOGY

The LD_{50} for intravenous injection of peiminine is 10 to 12 mg/kg in rabbits and 8 to 10 mg/kg in cats. Adverse reaction caused by overdose included respiratory depression, dilation of pupils, tremor, muscle spasms, incontinence, and in severe cases, fatality.[6]

SUPPLEMENT

- 土貝母/土贝母 *Tu Bei Mu* (Bulbus Bolbostemma Paniculatum) clears heat, disperses stagnation and reduces sores and swelling. It is mainly used externally. It is <u>not</u> the same as *Zhe Bei Mu* or *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and should not be confused or substituted for them.

AUTHORS' COMMENTS

Zhe Bei Mu (Bulbus Fritillariae Thunbergii) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) share many similarities, and some small differences. *Zhe Bei Mu* is bitter and cold. It has greater effectiveness to clear heat, and treats cough arising from Lung heat or heat and phlegm. *Zhe Bei Mu* more strongly disperses and softens nodules to treat abscesses, scrofula, and thyroid nodules. *Chuan Bei Mu* is bitter, sweet and cool. It acts to moisten the Lung, dissolve phlegm, and treat chronic or deficient coughing.

Gua Lou Shi (Fructus Trichosanthis)

瓜蔞實 瓜蒌实

Pinyin Name: *Gua Lou Shi*
Alternate Chinese Names: *Gua Lou, Yao Gua*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: trichosanthes fruit, snake gourd fruit
Botanical Name: *Trichosanthes kirilowii* Maxim. (*Gua Lou*); *Trichosanthes rosthornii* Harms. (*Xuan Bian Gua Lou*)
Pharmaceutical Name: Fructus Trichosanthis
Properties: sweet, cold
Channels Entered: Large Intestine, Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears the Lungs, Dissolves Phlegm

Sweet and cold, *Gua Lou Shi* (Fructus Trichosanthis) moistens dryness, clears the Lung, and dissolves phlegm. It is commonly used to treat Lung heat with cough and copious, difficult-to-expectorate sputum.

- In infants, wheezing caused by phlegm: use *Gua Lou Shi* as a single-herb remedy.
- Productive cough with yellow, sticky phlegm, chest congestion and hard stools because of heat in the Lung and Large Intestine: combine this herb with *Ban Xia* (Rhizoma Pinelliae), *Huang Qin* (Radix Scutellariae), *Zhi Shi* (Fructus Aurantii Immaturus) and *Dan Nan Xing* (Arisaema cum Bile). **Exemplar Formula:** *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill).
- Productive cough with phlegm due to Lung heat: use *Gua Lou Shi* with *Zhi Mu* (Radix Anemarrhenae) and *Bei Mu* (Bulbus Fritillaria).

2. Regulates Qi and Expands the Chest

***Xiong bi* (painful obstruction of the chest):** In addition to clearing the Lung and dissolving phlegm, *Gua Lou Shi* regulates qi circulation in the chest to relieve feelings of chest oppression and pain. Clinically, it treats *xiong bi* caused by accumulation of heat and phlegm beneath the Heart leading to congestion and oppression in the chest, increased pain upon pressure, and yellow, copious, sticky sputum. *Xiong bi* may also be caused by stagnation of cold with yang deficiency manifesting in severe pain with an inability to lie down, as well as in wheezing, dyspnea, and cough.

- *Xiong bi* due to accumulation of heat and phlegm beneath the Heart: use *Gua Lou Shi* with *Ban Xia* (Rhizoma Pinelliae) and *Huang Lian* (Rhizoma Coptidis) to clear heat, dissolve phlegm and regulate qi in the chest. **Exemplar Formula:** *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction).
- *Xiong bi* due to stagnation of cold with yang deficiency: combine this herb with *Xie Bai* (Bulbus Allii Macrostemonis) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction).

3. Dissipates Nodules and Eliminates Pus

Abscess: *Gua Lou Shi* dissipates nodules and eliminates pus to treat abscesses of the lungs, intestines or breasts.

- Productive cough with sputum and blood, with chest congestion: use *Gua Lou Shi* with *Gan Cao* (Radix Glycyrrhizae), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Intestinal abscess with deficiency of qi and blood: combine this herb with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Dang Gui* (Radicis Angelicae Sinensis), and *Huang Qi* (Radix Astragali).

DOSAGE

10 to 20 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Gua Lou Shi* should be used with caution for patients with deficiency and weakness of the Spleen and Stomach.
- *Gua Lou Shi* is incompatible with *Wu Tou* (Radix Aconiti).

CHEMICAL COMPOSITION

Trichosanic acid, fatty oil, organic acids.[1]

Gua Lou Shi (Fructus Trichosanthis)

PHARMACOLOGICAL EFFECTS

- **Expectorant:** Trichosanic acid has demonstrated marked expectorant influence in animal studies.[2]
- **Antibiotic:** Water or alcohol extracts of the herb have an inhibiting influence *in vitro* against *E. coli, Staphylococcus aureus, Diplococcus pneumoniae,* α-hemolytic streptococcus, and *Bacillus dysenteriae.*[3]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease:** A study of 413 patients treated by *Gua Lou Shi* injection reports 78.1% showed symptomatic improvement and 56% had improvement in ECG.[4]

TOXICOLOGY

The LD_{50} for *Gua Lou Shi* in mice was 363 g/kg via intraperitoneal injection and 306 g/kg via intravenous injection. In anesthetized dogs, a bolus dose of 100 g/kg (approximately 100 times the therapeutic human dose) led to a small decrease in blood pressure, but no significant adverse reactions.[5]

AUTHORS' COMMENTS

In the earlier history of traditional Chinese medicine, *Gua Lou* (Trichosanthes) was always used as a whole fruit. As more experiential information became available, the use became more sophisticated, as different uses were found for different parts of the plant. The differences are as follows:

- *Gua Lou Pi* (Pericarpium Trichosanthis), the peel, strongly clears Lung heat, dissolves phlegm, regulates qi and expands the chest. Clinical applications include cough and phlegm caused by Lung heat, and *xiong bi* (painful obstruction of the chest).
- *Gua Lou Ren* (Semen Trichosanthis), the seeds, are used mainly to moisten the intestines and promote bowel movement.
- *Gua Lou Shi* (Fructus Trichosanthis), the entire fruit, shares the functions of both the peel and seeds.

Gua Lou Ren (Semen Trichosanthis)

瓜蒌仁 瓜蒌仁

Pinyin Name: *Gua Lou Ren*
English Name: trichosanthes seed, snake gourd seed
Botanical Name: *Trichosanthes kirilowii* Maxim. (*Gua Lou*); *Trichosanthes rosthornii* Harms. (*Xuan Bian Gua Lou*)
Pharmaceutical Name: Semen Trichosanthis
Properties: sweet, cold
Channels Entered: Large Intestine, Lung, Stomach

Gua Lou Ren (Semen Trichosanthis)

CHINESE THERAPEUTIC ACTIONS

1. Moistens the Lungs, Dissolves Phlegm

Dry cough with scanty sputum that is difficult to expectorate: Sweet and cold, *Gua Lou Ren* (Fructus Trichosanthis) moistens dryness, clears Lung heat, and dissolves phlegm. It is commonly used to treat Lung heat with cough and copious, difficult-to-expectorate sputum.

- Accumulation of heat and phlegm with copious yellow sputum, chest oppression, and constipation: use *Gua Lou Ren* with *Huang Qin* (Radix Scutellariae), *Zhi Shi* (Fructus Aurantii Immaturus) and *Dan Nan Xing* (Arisaema cum Bile). **Exemplar Formula:** *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill).

2. Lubricates the Intestines to Promote Bowel Movement

Dry stools, constipation: *Gua Lou Ren*, rich in oil, is both moistening and lubricating. It is commonly used to treat constipation caused by dryness and heat in the Stomach and Large Intestine.

- Constipation: combine *Gua Lou Ren* with *Huo Ma Ren* (Fructus Cannabis), *Yu Li Ren* (Semen Pruni) and *Zhi Ke* (Fructus Aurantii).

3. Dissipates Nodules and Eliminates Pus

Breast and intestinal abscesses, sores and carbuncles: *Gua Lou Ren* dissipates nodules and eliminates pus to treat lung, intestinal, and breast abscesses.

- Productive cough with sputum and blood, accompanied by feelings of congestion and oppression in the chest: use *Gua Lou Ren* with *Gan Cao* (Radix Glycyrrhizae), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Intestinal abscess with deficiency of qi and blood: use this herb with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Dang Gui* (Radicis Angelicae Sinensis), and *Huang Qi* (Radix Astragali).

DOSAGE

10 to 15 grams. *Gua Lou Ren* should be crushed to increase available surface area and facilitate extraction of active ingredients. Unprocessed *Gua Lou Ren* is cold, and can sometimes cause nausea. Dry-frying the herb increases its warmth, reduces the frequency of nausea, and facilitates the extraction of active constituents.

CAUTIONS / CONTRAINDICATIONS

- *Gua Lou Ren* should be used with caution in patients experiencing deficiency and weakness of the Spleen and Stomach.
- *Gua Lou Ren* is incompatible with *Wu Tou* (Radix Aconiti).

CHEMICAL COMPOSITION

Trichosanic acid, karounidiol, 7-oxodihydrokarounidiol, bryonolic acid, fatty oil, organic acids.[1,2]

PHARMACOLOGICAL EFFECTS

- **Laxative:** Various parts of this plant have laxative actions, with *Gua Lou Ren* being the strongest and *Gua Lou Pi* (Pericarpium Trichosanthis) being the weakest.[3]

AUTHORS' COMMENTS

Please refer to *Gua Lou Shi* (Fructus Trichosanthis) for comparative information on *Gua Lou Pi* (Pericarpium Trichosanthis), *Gua Lou Ren* (Semen Trichosanthis) and *Gua Lou Shi* (Fructus Trichosanthis).

Gua Lou Pí (Pericarpium Trichosanthis)

瓜蒌皮 瓜蒌皮

Pinyin Name: *Gua Lou Pi*
Alternate Chinese Names: *Yao Gua*
English Name: trichosanthes peel, snake gourd peel
Botanical Name: *Trichosanthes kirilowii* Maxim. (*Gua Lou*); *Trichosanthes rosthornii* Harms. (*Xuan Bian Gua Lou*)
Pharmaceutical Name: Pericarpium Trichosanthis
Properties: sweet, cold
Channels Entered: Large Intestine, Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

Clears the Lungs, Dissolves Phlegm, Regulates Qi and Expands the Chest

Cough due to Lung heat, chest congestion: Sweet and cold, *Gua Lou Pi* (Pericarpium Trichosanthis) clears Lung heat and helps with difficult-to-expectorate sputum. Other manifestations may include cough, dyspnea, chest congestion, chest pain that worsens with pressure, yellow sputum and wheezing.

- Cough with phlegm due to Lung qi stagnation: use *Gua Lou Pi* with *Bei Mu* (Bulbus Fritillaria), *Jie Geng* (Radix Platycodonis), and *Xing Ren* (Semen Armeniacae Amarum).

***Xiong bi* (painful obstruction of the chest):** *Gua Lou Pi* clears Lung and Stomach heat to dissolve phlegm and also regulates upper *jiao* qi to relieve chest pain.

- *Xiong bi* with cough and yellow sputum: use *Gua Lou Pi* with *Huang Lian* (Rhizoma Coptidis) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction).
- *Xiong bi* due to cold and damp accumulation in the upper *jiao*: use this herb with *Xie Bai* (Bulbus Allii Macrostemonis) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction).

DOSAGE

6 to 12 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Gua Lou Pi* should be used with caution in patients experiencing deficiency and weakness of the Spleen and Stomach
- *Gua Lou Pi* is incompatible with *Wu Tou* (Radix Aconiti).

CHEMICAL COMPOSITION

Fatty oil, organic acids.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** According to laboratory studies, the extract of *Gua Lou Shi* (Fructus Trichosanthis) dilates the coronary arteries, increases blood perfusion, and reduces the oxygen requirement of cardiac muscle. Upon more detailed study, it was determined that *Gua Lou Pi* (Pericarpium Trichosanthis) has the strongest effect on the cardiovascular system, followed by *Gua Lou Ren* (Semen Trichosanthis), and then *Gua Lou Shi* (Fructus Trichosanthis).[2]

AUTHORS' COMMENTS

Please refer to *Gua Lou Shi* (Fructus Trichosanthis) for comparative information on *Gua Lou Pi* (Pericarpium Trichosanthis), *Gua Lou Ren* (Semen Trichosanthis) and *Gua Lou Shi* (Fructus Trichosanthis).

Tian Zhu Huang (Concretio Silicea Bambusae)

天竺黄 天竺黄

Pinyin Name: *Tian Zhu Huang*
Literal Name: "heavenly bamboo yellow"
Alternate Chinese Names: *Zhu Gao*
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: bamboo silicea, tabasheer
Botanical Name: *Bambusa textilis* Mc-Clure (*Qing Pi Zhu*); *Schizostachyum chinense* Rendle (*Hua Si Lao Zhu*)
Pharmaceutical Name: Concretio Silicea Bambusae
Properties: sweet, cold
Channels Entered: Gallbladder, Heart, Liver

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Dissolves Phlegm, Cools the Heart and Stops Convulsions

Convulsions due to heat, stroke from phlegm accumulation, infantile convulsions: *Tian Zhu Huang* (Concretio Silicea Bambusae) is commonly used to treat convulsions secondary to heat and phlegm obstructing the Heart *shen* (spirit). Clinically, symptoms are fever, red face, labored breathing and profuse sputum. In severe cases, patients may exhibit spasms, epilepsy, convulsions, and loss of consciousness.

- Infantile seizure and convulsions: use *Tian Zhu Huang* with *Zhi Zi* (Fructus Gardeniae), *Jiang Can* (Bombyx Batryticatus) and *Yu Jin* (Radix Curcumae).
- Stroke due to phlegm stagnation: combine this herb with *Dan Nan Xing* (Arisaema cum Bile), *Shi Chang Pu* (Rhizoma Acori), *Tian Ma* (Rhizoma Gastrodiae), and *Quan Xie* (Scorpio).

DOSAGE

3 to 6 grams in decoction, 0.6 to 1.0 gram as powder.

CHEMICAL COMPOSITION

Silica, potassium hydroxide.[1]

PHARMACOLOGICAL EFFECTS

- **Analgesic:** Administration of *Tian Zhu Huang* at 2 to 3 g/kg has an analgesic effect in mice.[2]
- **Cardiovascular:** *Tian Zhu Huang* has negative inotropic and chronotropic effects in frog heart specimens. It dilates blood vessels in anesthetized rabbits.[3]

AUTHORS' COMMENTS

Tian Zhu Huang (Concretio Silicea Bambusae), *Chuan Mu Tong* (Caulis Clematidis Armandii), *Mai Men Dong* (Radix Ophiopogonis), and *Huang Lian* (Rhizoma Coptidis) all clear the Heart and eliminate irritability.

- *Tian Zhu Huang* dissolves hot phlegm and is most effective for irritability with spasms and convulsions.
- *Chuan Mu Tong* is a diuretic that clears damp-heat to relieve irritability accompanied by oral ulcers and yellow urine.
- *Mai Men Dong* is a tonic used to relieve deficient Heart yin and heat that manifests as irritability and insomnia.
- *Huang Lian* treats febrile disease with excess fire in the Heart that is disturbing the *shen* (spirit), and manifesting in irritability and insomnia.

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 968
2. *Zhong Yao Tong Bao* (Journal of Chinese Herbology), 1982; 7(5):31

Zhu Ru (Caulis Bambusae in Taenia)

竹茹 竹茹

Pinyin Name: *Zhu Ru*

Alternate Chinese Names: *Zhu Er Qing, Dan Zhu Ru, Zhu Jing, Er Qing*

Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.

English Name: bamboo shavings

Botanical Name: *Bambusa breviflora* Munro (*Qing Gan Zhu*); *Phyllostachys nigra* (Lodd.) Munro var. *henonis* (Mitf.) Stapf ex Rendl (*Dan Zhu*)

Pharmaceutical Name: Caulis Bambusae in Taenia

Properties: sweet, cool

Channels Entered: Lung, Stomach, Gallbladder

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Dissolves Phlegm

Cough due to Lung heat: Cool and moistening, *Zhu Ru* (Caulis Bambusae in Taenia) clears heat and dissolves thick yellow phlegm to treat various disorders characterized by Lung heat. The fresh form of this herb is the strongest in sedating Lung heat and relieving irritability.

- Cough with yellow copious sputum from Lung heat: combine *Zhu Ru* with *Huang Qin* (Radix Scutellariae) and *Gua Lou Shi* (Fructus Trichosanthis), or use a large dosage of fresh *Zhu Ru*.

Gallbladder fire with phlegm: When Gallbladder fire invades the Stomach and causes disharmony of the middle *jiao*, in addition to phlegm fire there may be symptoms of irritability, insomnia, nausea, chest congestion, hypochondriac distention, and a bitter taste in the mouth with profuse phlegm. If the patient vomits, the vomitus will appear sticky, much like the texture of phlegm.

- Gallbladder fire with phlegm: add *Zhu Ru* to *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae), *Zhi Shi* (Fructus Aurantii Immaturus) and *Fu Ling* (Poria). **Exemplar Formula:** *Wen Dan Tang* (Warm the Gallbladder Decoction).

2. Relieves Nausea and Irritability

Vomiting due to Stomach heat, morning sickness: *Zhu Ru* is an excellent herb to treat nausea and vomiting. It clears excess heat, deficiency heat, or hot phlegm from the Stomach to relieve nausea, vomiting and acid regurgitation.

- Nausea, vomiting, thirst and epigastric discomfort with yellow greasy tongue coating due to hot phlegm in the Stomach: use *Zhu Ru* with *Chen Pi* (Pericarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae), and *Huang Lian* (Rhizoma Coptidis).
- Nausea and vomiting because of deficiency heat in the Stomach: combine this herb with *Ren Shen* (Radix Ginseng), *Chen Pi* (Pericarpium Citri Reticulatae), and *Sheng Jiang* (Rhizoma Zingiberis Recens). **Exemplar Formula:** *Ju Pi Zhu Ru Tang* (Tangerine Peel and Bamboo Shaving Decoction).
- Nausea and vomiting during pregnancy: process *Zhu Ru* with *Sheng Jiang* (Rhizoma Zingiberis Recens), and use it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Su Geng* (Caulis Perillae). *Sheng Jiang* neutralizes the cold nature of *Zhu Ru* and makes it more suitable for use during pregnancy.

DOSAGE

6 to 10 grams in decoction. Fresh or unprocessed *Zhu Ru* is colder in nature and functions more effectively to clear heat, and is commonly used to treat Lung heat with coughing and thick sputum, or accumulation of hot phlegm causing irritability, mania and disorientation. The ginger-processed herb is warmer, and is more effective to relieve nausea and vomiting.

CHEMICAL COMPOSITION

2,5-dimethoxy-p-benzoguinone, p-hydroxy benzaldehyde, syringa-aldehyde.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Zhu Ru* has an inhibitory effect against *Staphylococcus albus, Bacillus subtilis, E. coli,* and *Salmonella typhi.*[2]

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 869

Zhu Li (Succus Bambusae)

竹瀝 竹沥

Pinyin Name: *Zhu Li*
Alternate Chinese Names: *Dan Zhu Li, Zhu Yiu*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: dried bamboo sap
Botanical Name: *Bambusa breviflora* Munro (*Qing Gan Zhu*); *Phyllostachys nigra* (Lodd.) Munro var. *henonis* (Mitf.) Stapf ex Rendl (*Dan Zhu*)
Pharmaceutical Name: Succus Bambusae
Properties: sweet, cold
Channels Entered: Heart, Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

Clears Heat, Dissolves Phlegm

Lung heat with phlegm, stroke caused by phlegm, epilepsy due to phlegm and fire: *Zhu Li* (Succus Bambusae) is commonly used to eliminate phlegm accumulations in the body. It is described in classic texts as being able to reach everywhere, including the head, internal organs, interior and exterior aspects of the body. It is often considered the king of phlegm-dispelling herbs. For that reason, it can treat various disorders such as stroke, aphasia, paralysis, sudden unconsciousness, clenched jaws, difficulty with speech and *bi zheng* (closed disorder).

- Yellow copious sputum, cough, and chest congestion due to Lung heat: combine *Zhu Li* with *Gua Lou Shi* (Fructus Trichosanthis) and *Pi Pa Ye* (Folium Eriobotryae).
- Stroke patients with excessive sputum and a throttling sound in the throat: use the fresh juice of *Zhu Li* and *Sheng Jiang* (Rhizoma Zingiberis Recens). Force feed these juices through the nose if necessary.
- Infantile convulsions, with rolling of the eyes and foaming of the mouth: use 3 to 6 grams *Zhu Li* twice daily.
- Epilepsy and *bi zheng* (closed disorder) caused by phlegm: use it with heat-clearing and other resuscitating herbs.
- Meningitis or epidemic cerebrospinal meningitis with high fever, nausea, and vomiting: use *Zhu Li* with 0.6 to 1.2 grams of *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone).
- Hemiplegia due to cerebral embolism: use this substance with *Sheng Jiang* (Rhizoma Zingiberis Recens), *Sang Zhi* (Ramulus Mori), *Hong Hua* (Flos Carthami), *Chi Shao* (Radix Paeoniae Rubrae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), *Tao Ren* (Semen Persicae), *Chuan Shan Jia* (Squama Manis), *Di Long* (Pheretima), *Dan Nan Xing* (Arisaema cum Bile), *Gou Teng* (Ramulus Uncariae cum Uncis), *Gua Lou Shi* (Fructus Trichosanthis) and *Ban Xia* (Rhizoma Pinelliae).
- Liver qi stagnation with heat manifesting in disorientation, shouting or aggressive behavior, crying and laughing spells, unusual behavior, and talking to oneself: add *Zhu Li* to *Yu Jin* (Radix Curcumae), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Shi Chang Pu* (Rhizoma Acori), *Yuan Zhi* (Radix Polygalae), *Xiang Fu* (Rhizoma Cyperi), *Dai Zhe Shi* (Haematitum), *Meng Shi* (Lapis Micae seu Chloriti), *Dan Nan Xing* (Arisaema cum Bile), *Sheng Tie Luo* (Frusta Ferri), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae) and *Da Huang* (Radix et Rhizoma Rhei).

DOSAGE

30 to 50 grams. Do not decoct *Zhu Li* with other herbs. Instead, it is to be dissolved in the decoction immediately prior to ingestion.

CAUTIONS / CONTRAINDICATIONS

- Cold in nature, *Zhu Li* is contraindicated in cases of cough due to cold, or with loose stools from Spleen deficiency.

CHEMICAL COMPOSITION

Asparagine, methionine, salicylic acid, leucine, amino acids, sugars.[1]

CLINICAL STUDIES AND RESEARCH

- **Cough:** Administration of *Zhu Li* showed marked antitussive and expectorant effects in 125 patients. The overall rate of effectiveness was 88.8%.[2]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 983

Fu Hai Shi (Pumice)

浮海石

Pinyin Name: *Fu Hai Shi*
Literal Name: "float on the sea stone"
Alternate Chinese Names: *Hai Fu Shi, Sui Hua*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: pumice
Zoological Name: *Costazia aculeata* Canu et. Bassler (*Ji Tu Tai Chong*)
Pharmaceutical Name: Pumice
Properties: salty, cold
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears the Lung, Dissolves Phlegm

Phlegm stagnation in the Lung: *Fu Hai Shi* (Pumice) is most effective for treating chronic and stubborn phlegm stagnation, usually found in lumps that are difficult to expectorate or swallow. Blood-streaked sputum is often seen in chronic respiratory disorders caused by Lung yin deficiency.

- Chronic and stubborn phlegm stagnation: use *Fu Hai Shi* with *Dan Nan Xing* (Arisaema cum Bile), *Bei Mu* (Bulbus Fritillaria) and *Bai Jie Zi* (Semen Sinapis).
- Chronic cough with blood-streaked sputum from Lung heat: combine this substance with *Hai Ge Fen* (Concha Meretricis seu Cyclinae), *Gua Lou Shi* (Fructus Trichosanthis), and *Zhi Zi* (Fructus Gardeniae).

2. Softens Hardness and Dissipates Nodules

Scrofula and thyroid nodules: In addition to clearing heat and dissolving phlegm, *Fu Hai Shi* softens hardness and dissipates nodules.

- Scrofula or nodules: use it with *Mu Li* (Concha Ostreae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Kun Bu* (Thallus Laminariae seu Eckloniae) and *Hai Zao* (Sargassum).

3. Regulates Water Circulation to Treat Dysuria

***Lin zheng* (dysuria syndrome):** *Fu Hai Shi* regulates water circulation, promotes urination, and treats dysuria, hematuria or stones.

- *Xue lin* (bloody dysuria): combine *Fu Hai Shi* with *Chuan Mu Tong* (Caulis Clematidis Armandii), *Hua Shi* (Talcum) and *Che Qian Zi* (Semen Plantaginis).
- *Shi lin* (stone dysuria): use this substance with *Gan Cao* (Radix Glycyrrhizae), *Hai Jin Sha* (Herba Lygodii), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), and *Jin Qian Cao* (Herba Lysimachiae).

DOSAGE

6 to 10 grams in decoction. Crush *Fu Hai Shi* into a powder and use in decoction, pills, or powder.

CAUTIONS / CONTRAINDICATIONS

- *Fu Hai Shi* should be used with caution in cases of cough caused by deficiency and cold.

CHEMICAL COMPOSITION

Silicon dioxide, aluminum, potassium, calcium, sodium, iron.[1,2]

References

1. *Zhong Yao Xue* (Chinese Herbology), 1998; 626-627
2. *Chang Yong Zhong Yao Xian Dai Yan Jiu Yu Lin Chuan* (Recent Study & Clinical Application of Common Traditional Chinese Medicine), 1995; 458-459

Hai Ge Fen (Concha Meretricis seu Cyclinae)

海蛤粉

Pinyin Name: *Hai Ge Fen*
Alternate Chinese Names: *Hai Ge Ke*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: clam shell
Zoological Name: *Meretrix meretrix* L. (*Wen Ge*); *Cyclina sinensis* Gmelin (*Qing Ge*)
Pharmaceutical Name: Concha Meretricis seu Cyclinae
Properties: bitter, salty, cold
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears the Lung, Dissolves Phlegm

Hai Ge Fen (Concha Meretricis seu Cyclinae) clears Lung heat and dissolves sticky, copious phlegm. It treats accumulation of hot phlegm in the chest that has led to feelings of oppression in the chest, wheezing, dyspnea, cough and copious, yellow sputum. It also treats accumulation of phlegm and fire that has caused chest and hypochondriac pain, cough and wheezing.

- Accumulation of hot phlegm in the chest: use *Hai Ge Fen* with *Huang Qin* (Radix Scutellariae), *Gua Lou Ren* (Semen Trichosanthis) and *Jie Geng* (Radix Platycodonis).
- Accumulation of phlegm and fire in the chest: combine this substance with *Gua Lou Shi* (Fructus Trichosanthis), *Zhi Zi* (Fructus Gardeniae) and *Qing Dai* (Indigo Naturalis).
- Productive cough and dyspnea from Lung heat: add it to *Fu Hai Shi* (Pumice), *Bai Qian* (Rhizoma Cynanchi Stauntonii) and *Sang Bai Pi* (Cortex Mori).

2. Softens Hardness and Dissipates Nodules

Bitter and salty in nature, *Hai Ge Fen* softens hardness and dissipates nodules. Clinical applications include treatment of scrofula and thyroid nodules.

- Scrofula or thyroid nodules: use *Hai Ge Fen* with *Hai Zao* (Sargassum), *Kun Bu* (Thallus Laminariae seu Eckloniae) and *Wa Leng Zi* (Concha Arcae).

3. Neutralizes Gastric Acid to Relieve Pain

Hai Ge Fen neutralizes gastric acid to treat stomach pain, acid reflux, and gastric and duodenal ulcers.

- Gastric and duodenal ulcers: combine it with *Hai Piao Xiao* (Endoconcha Sepiae), *Gan Cao* (Radix Glycyrrhizae) and *Yan Hu Suo* (Rhizoma Corydalis).

4. Promotes Urination

Hai Ge Fen has a mild action to promote urination to treat edema and dysuria.

- Edema and dysuria: add it to *Fu Ling* (Poria), *Zhu Ling* (Polyporus) and *Hua Shi* (Talcum).

5. Topical Uses

When applied topically, *Hai Ge Fen* aids healing of wounds, burns and eczema. Mix the calcined form of *Hai Ge Fen* with oil for topical application.

DOSAGE

10 to 15 grams in decoction. *Hai Ge Fen* should be wrapped in cheesecloth prior to decocting. It is used primarily in powder or pill form. The fresh form functions more effectively to clear heat and dissolve phlegm, while the calcined form has a stronger astringent function to heal wounds.

CAUTIONS / CONTRAINDICATIONS

- *Hai Ge Fen* is contraindicated in patients who have middle *jiao* yang deficiency, or deficiency and cold of the Lung.

CHEMICAL COMPOSITION

Calcium carbonate, chitin.[1]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 970

Meng Shi (Lapis Micae seu Chloriti)

礞石 礞石

Pinyin Name: *Meng Shi*
Alternate Chinese Names: *Qing Meng Shi, Jin Meng Shi*
Original Source: *Jia You Ben Cao* (Materia Medica of the Jia You Era) by Zhang Yu-Xi and Su Song in 1057-1060
Mineral Name: Lapis Micae (*Jin Meng Shi*), Lapis Choriti (*Qing Meng Shi*)
Pharmaceutical Name: Lapis Micae seu Chloriti
Properties: salty, sweet, neutral
Channels Entered: Lung, Liver

CHINESE THERAPEUTIC ACTIONS

1. Redirects Qi Downwards and Dissolves Phlegm

Stubborn phlegm with cough and dyspnea: *Meng Shi* (Lapis Micae seu Chloriti) is strong and heavy in nature. It has a descending property that directs qi downwards to treat abnormally-rising Lung and Liver qi. It treats stubborn, difficult-to-expel phlegm in the Lung. It is also good for excess-type cough and dyspnea caused by phlegm stagnation in the upper and middle *jiaos*.

- Chronic cough with phlegm: use *Meng Shi* with *Da Huang* (Radix et Rhizoma Rhei), *Huang Qin* (Radix Scutellariae) and *Chen Xiang* (Lignum Aquilariae Resinatum).

2. Anchors the Liver and Stops Seizures

Seizures: *Meng Shi* treats seizures and convulsions caused by hot phlegm in the Liver and misting the orifices. Clinical presentations include high fever, delirium, unconsciousness, palpitations, seizures and convulsions.

- Seizures and convulsions with constipation: use *Meng Shi* powder and mix it with *Bo He* (Herba Menthae) juice and honey.

DOSAGE

6 to 10 grams in decoction, 1.5 to 3 grams in the powdered form.

CAUTIONS / CONTRAINDICATIONS

- Use of *Meng Shi* is contraindicated in children, pregnant women, or patients who have qi deficiency or weak digestive systems.

CHEMICAL COMPOSITION

Potassium, iron, aluminum, magnesium, silicon, silicic acid.[1]

CLINICAL STUDIES AND RESEARCH

- **Epilepsy:** In one study, 139 patients with seizure disorders were treated with an herbal formula, with 93 cases of complete recovery, 34 cases of marked improvement, and 12 cases showing no effect. The rate of effectiveness was 91.4%. The herbal formula contained processed *Meng Shi*, ginger-processed *Ban Xia* (Rhizoma Pinelliae), *Tian Nan Xing* (Rhizoma Arisaematis), *Fu Hai Shi* (Pumice), *Chen Xiang* (Lignum Aquilariae Resinatum), fresh *Qian Niu Zi* (Semen Pharbitidis), cooked *Qian Niu Zi* (Semen Pharbitidis), dry-fried *Shen Qu* (Massa Fermentata) and others, based on the condition of the patient.[2]

References

1. *Zhong Yao Xue* (Chinese Herbology), 1998; 628-629

Hai Zao (Sargassum)

海藻 海藻

Pinyin Name: *Hai Zao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: sargassum, seaweed
Botanical Name: *Sargassum pallidum* (Turn.) C. Ag. (*Hai Hao Zi*); *Sargassum fusiforme* (Harv.) Setch. (*Yang Qi Cai*)
Pharmaceutical Name: Sargassum
Properties: bitter, salty, cold
Channels Entered: Liver, Stomach, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Phlegm, Softens Hardnesses

Scrofula, goiters, nodules: Scrofula is characterized by Liver fire drying body fluids and phlegm and transforming them into a solid obstruction. Goiter is caused by accumulation of phlegm secondary to blood and qi stagnation of the Liver and Gallbladder. *Hai Zao* (Sargassum) is commonly used to soften hardness, dissipate nodules, and treat scrofula and goiter. This herb has been recently used to treat thyroid enlargement, thyroiditis, lymphadenitis, hernia and enlargement of the scrotum.

- Scrofula: use *Hai Zao* with *Xia Ku Cao* (Spica Prunellae), *Lian Qiao* (Fructus Forsythiae), and *Xuan Shen* (Radix Scrophulariae).
- Goiter: use this substance with *Kun Bu* (Thallus Laminariae seu Eckloniae), *Bei Mu* (Bulbus Fritillaria) and *Qing Pi* (Pericarpium Citri Reticulatae Viride). **Exemplar Formula:** *Hai Zao Yu Hu Tang* (Sargassum Decoction for the Jade Flask).
- Hyperthyroidism: use large doses of *Hai Zao* and *Kun Bu* (Thallus Laminariae seu Eckloniae) for only a short period of time.
- Hypothyroidism: use the normal doses of *Hai Zao* and *Kun Bu* (Thallus Laminariae seu Eckloniae) for long-term treatment.

2. Regulates Water Circulation and Reduces Swelling

Leg *qi*, edema: *Hai Zao* regulates water circulation to treat edema, beriberi, and dysuria. It is rather mild and must be combined with other diuretic herbs, such as *Ze Xie* (Rhizoma Alismatis), *Zhu Ling* (Polyporus), and *Che Qian Zi* (Semen Plantaginis).

DOSAGE

10 to 15 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Hai Zao* is incompatible with *Gan Cao* (Radix Glycyrrhizae).
- *Hai Zao* should be used cautiously for patients having Spleen and Stomach qi deficiency.

CHEMICAL COMPOSITION

Alginic acid, mannitol, potassium, iodine, laminine, sargassan, fucosterol, protein, lipids, vitamin C.[1,2]

PHARMACOLOGICAL EFFECTS

- **Effects on the thyroid gland:** *Hai Zao* has a high iodine content and may be used to treat thyroid disorders.[3]
- **Immunostimulant:** Intraperitoneal injection of a *Hai Zao* preparation increased phagocytic activities in mice.[4]

CLINICAL STUDIES AND RESEARCH

- **Ischemic cerebral vascular accident:** PSS, a substance isolated from *Hai Zao*, has marked effectiveness to reduce blood viscosity, slow coagulation, and lower cholesterol levels in blood. It has been reported to be 92% effective in treating 288 patients with cerebral thrombosis and 92% effective in treating 251 patients with cerebral emboli.[5]

AUTHORS' COMMENTS

The use of *Hai Zao* and *Kun Bu* (Thallus Laminariae seu Eckloniae) is beneficial in treating both hyperthyroid and hypothyroid conditions. In hyperthyroid conditions, administration of these two herbs is associated with a negative feedback inhibition effect on the endocrine system to stop the release of additional thyroid hormone.

Hai Zao (Sargassum)

This approach is beneficial to temporarily counter the sympathetic excess associated with the hyperthyroid state. This effect can be achieved with large dosages of these two herbs, but must be used for only a short period of time. In hypothyroid conditions, administration of these two herbs supply iodine, a necessary building block for the production of thyroid hormone. These two herbs are especially beneficial in cases of hypothyroidism due to lack of iodine in the diet. For this application, they are used at normal dosages for a prolonged period of time.

Kun Bu (Thallus Laminariae seu Eckloniae)

昆布 昆布

Pinyin Name: *Kun Bu*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: laminaria, kelp, tangle
Botanical Name: *Laminaria japonica* Aresch. (*Hai Dai*); *Ecklonia kurome* Okam. (*Kun Bu*)
Pharmaceutical Name: Thallus Laminariae seu Eckloniae
Properties: salty, cold
Channels Entered: Liver, Stomach, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Phlegm, Softens Hardness

Scrofula, goiters, nodules: *Kun Bu* (Thallus Laminariae seu Eckloniae) dissolves phlegm, softens hardness, and dissipates nodules. It treats enlargement of the thyroid gland, goiter due to iodine deficiency, hyperthyroidism, palpable abdominal masses such as liver and spleen enlargement, and swelling and pain in the scrotum.

- Scrofula, goiter, and other nodules: use *Kun Bu* with *Hai Zao* (Sargassum), *Xia Ku Cao* (Spica Prunellae), *Bei Mu* (Bulbus Fritillaria), *Xuan Shen* (Radix Scrophulariae) and *Hai Ge Fen* (Concha Meretricis seu Cyclinae).
- Palpable abdominal masses, splenomegaly, hepatomegaly: *Kun Bu* is combined with *Bie Jia* (Carapax Trionycis), *Mu Li* (Concha Ostreae), *Xiang Fu* (Rhizoma Cyperi), *Hong Hua* (Flos Carthami), *Chuan Shan Jia* (Squama Manis), *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- Hyperthyroidism: use large doses of *Kun Bu* and *Hai Zao* (Sargassum) for only a short period of time.
- Hypothyroidism: use normal doses of *Kun Bu* and *Hai Zao* (Sargassum) for long-term treatment.

2. Regulates Water Circulation

Leg *qi*, edema: *Kun Bu* regulates water circulation and reduces accumulation of water to treat edema and dysuria. This function, however, is rather mild and *Kun Bu* must be combined with other diuretic herbs for maximum effectiveness.

DOSAGE

10 to 15 grams in decoction.

Kun Bu (Thallus Laminariae seu Eckloniae)

CAUTIONS / CONTRAINDICATIONS

- Use *Kun Bu* with caution for patients who have deficiency and cold of the Spleen and Stomach.
- *Kun Bu* should be used with caution in patients with phlegm due to cold.

CHEMICAL COMPOSITION

Laminine, laminarin, alginic acid, algin, potassium, iodine, iron, calcium.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** According to *in vitro* studies, administration of laminine is associated with reduction in blood pressure.[2]
- **Hypoglycemic:** Administration of laminarin is associated with reduction of blood glucose levels in mice with normal or elevated levels.[3]
- **Metabolic:** Continuous administration of a *Kun Bu* preparation inhibits the elevation of serum cholesterol and triglyceride levels.[4]

CLINICAL STUDIES AND RESEARCH

- **Hypertension:** According to one study, *Kun Bu* powder was 76.4% effective in treating 110 patients with hypertension.[5]

HERB-DRUG INTERACTION

- **Antidiabetics:** Herbs that lower plasma glucose levels, such as *Kun Bu,* should be used with caution with insulin, sulfonylureas, and other antidiabetic medications, as the combination may have a synergistic effect, leading to hypoglycemia. [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).][6]

SUPPLEMENT

- 海帶 / 海带 *Hai Dai* (Thallus Laminariae) is commonly used as another source for *Kun Bu.* They can be used interchangeably, as they have essentially the same taste, properties, functions, indications, and chemical composition.

AUTHORS' COMMENTS

According to Dr. Jiao Shu-De, use of *Kun Bu* and *Hai Zao* (Sargassum) is effective for treatment of obesity, arteriosclerosis and hyperlipidemia.

Hai Zao (Sargassum), *Kun Bu* (Thallus Laminariae seu Eckloniae) and *Hai Dai* (Thallus Laminariae) are all from the ocean and have similar composition and functions. Generally speaking, *Kun Bu* has the strongest potency, followed by *Hai Zao*, and then *Hai Dai.* Please refer to *Hai Zao* for more discussion on treatment of thyroid disorders using these herbs.

Huang Yao Zi (Herba Dioscoreae Bulbiferae)

黃藥子 黃药子

Pinyin Name: *Huang Yao Zi*
Literal Name: "yellow medicine seed"
Alternate Chinese Names: *Huang Yao Zhi, Jin Qian Diao Ha Ma, Ling Xu Shu*
Original Source: *Kai Bao Ben Cao* (Materia Medica of the Kai Bao Era) by Ma Zhi in 973-974 A.D.
English Name: dioscorea bulbifera root, airpotato yam rhizome
Botanical Name: *Dioscorea bulbifera* L. (*Huang Du*)
Pharmaceutical Name: Herba Dioscoreae Bulbiferae
Properties: bitter, cold
Channels Entered: Lung, Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Disperses Stagnation and Reduces Masses

Masses, nodules and goiters: *Huang Yao Zi* (Herba Dioscoreae Bulbiferae) strongly dissolves phlegm and disperses palpable nodules.

- Goiter: use *Huang Yao Zi* alone as medicinal tincture, or use with *Hai Zao* (Sargassum), *Mu Li* (Concha Ostreae) and *Kun Bu* (Thallus Laminariae seu Eckloniae).

2. Clears Heat and Toxins

Ulcers, toxic swellings with redness, sore throat, snake bites, tumors and cancer: *Huang Yao Zi* has an excellent function to clear heat and toxins. It is often used with other heat-clearing, toxin-eliminating herbs to enhance the overall effect.

- Snake bite: use the fresh form of *Huang Yao Zi* topically as a paste. Because there are various kinds of snake venom, combine with other herbs according to the patient's immediate symptoms.
- Sore throat: use the herb with *Shan Dou Gen* (Radix Sophorae Tonkinensis), *She Gan* (Rhizoma Belamcandae) and *Ban Lan Gen* (Radix Isatidis).
- Cancer of the esophagus, stomach, liver, colon or thyroid: add this herb to *Bai Hua She She Cao* (Herba Oldenlandia), *Ban Zhi Lian* (Herba Scutellariae Barbatae), *Yi Yi Ren* (Semen Coicis), *Hai Zao* (Sargassum) and *Shan Ci Gu* (Pseudobulbus Cremastrae).

3. Cools Blood and Stops Bleeding

Epistaxis, hematemesis, hemoptysis: *Huang Yao Zi* is cold in thermal property and treats bleeding caused by heat in the blood.

- Bleeding: use it with charred *Pu Huang* (Pollen Typhae), charred *Zong Lu Pi* (Fibra Stipulae Trachycarpi) and charred *Qian Cao* (Radix Rubiae).

In addition, *Huang Yao Zi* stops cough and relieves dyspnea. It is suitable for acute and chronic bronchitis, asthma and whooping cough. It may be used as a single-herb remedy for this application.

DOSAGE

10 to 15 grams. The fresh form of *Huang Yao Zi* can be crushed into a paste and applied topically.

CAUTIONS / CONTRAINDICATIONS

- Long-term use of *Huang Yao Zi* may cause vomiting, diarrhea, abdominal pain and other gastrointestinal discomforts.
- Though rare, the use of *Huang Yao Zi* has been associated with potential liver damage. Therefore, liver functions must be monitored when prescribing *Huang Yao Zi*.
- *Huang Yao Zi* is contraindicated in patients with pre-existing liver disorders, such as hepatitis and cirrhosis.

OVERDOSAGE

Overdose reactions associated with the use of this herb often occur 1 to 2 hours after ingestion, with a very gradual onset and progression. Early reaction is characterized by burning sensations of the mouth, tongue and throat, followed by dizziness, headache, nausea, vomiting, salivation, diarrhea and constricted pupils. Six to seven days after ingestion, the patient may experience fatigue, lack of appetite, upper abdominal discomfort, yellow discoloration of the eyes and skin, itching skin, and possibly liver damage.[1]

Huang Yao Zi (Herba Dioscoreae Bulbiferae)

TREATMENT OF OVERDOSAGE

Early overdose can be treated with emetic methods, followed by ingestion of 5 to 6 egg whites, or 250 grams of *Lu Dou* (Semen Phaseoli Radiati) in decoction. Another proposed antidote contains fresh *Sheng Jiang* (Rhizoma Zingiberis Recens) juices (squeezed from 30g of herb), 60 ml of white vinegar, and 9 grams of *Gan Cao* (Radix Glycyrrhizae). The patients are instructed to first gargle with, and then swallow the decoction.

Huang Yao Zi must be discontinued immediately if symptoms and signs of liver damage are noted, such as yellow discoloration of the eyes and skin and elevated liver enzymes.

CHEMICAL COMPOSITION

Disgenin, yamogenin, diosbulbins A, B, C, D; iodine.[2]

PHARMACOLOGICAL EFFECTS

- **Effect on the thyroid gland:** In rats with normal thyroid glands, oral administration of *Huang Yao Zi* did not affect body weight, basal metabolic rate, or weight of the thyroid gland. In subjects with hypertrophy of the thyroid gland caused by a small amount of potassium thiocyanate or by lack of iodine in diet, *Huang Yao Zi* had a marked therapeutic effect to reduce the enlargement and increase the content of serum protein-bound iodine.[3,4]
- **Cardiovascular:** Water and alcohol preparations of *Huang Yao Zi* show an inhibitory action on frog heart specimens.[5]
- **Effects on smooth muscle:** Water and alcohol preparations of *Huang Yao Zi* inhibit the smooth muscle of the intestines in rabbits, but stimulate the smooth muscle of the uterus in rabbits and rats. The alcohol preparation has a faster onset of action and a more potent effect.[6]
- **Antibiotic:** A preparation of *Huang Yao Zi* had an inhibitory action on various pathogenic fungi.[7]

CLINICAL STUDIES AND RESEARCH

- **Thyroid tumor:** Daily administration of *Huang Yao Zi* in decoction for 5 to 8 weeks had an 80% overall rate of effectiveness for 25 patients with thyroid tumors.[8]
- **Enlargement of the thyroid gland:** Decoction or powder of *Huang Yao Zi* was used to treat 127 patients with enlargement of the thyroid gland, with good results.[9]
- **Thyroid adenoma:** In one study, 37 out of 42 patients experienced complete recovery using an herbal formula containing *Huang Yao Zi* 6g, *Mu Li* (Concha Ostreae) 30g, *Hai Zao* (Sargassum) 30g, *Kun Bu* (Thallus Laminariae seu Eckloniae) 30g, *Shan Ci Gu* (Pseudobulbus Cremastrae) 10g, *Xia Ku Cao* (Spica Prunellae) 10g, *Yu Jin* (Radix Curcumae) 10g, *Chuan Shan Jia* (Squama Manis) 10g, *Jiang Can* (Bombyx Batryticatus) 10g, *Tian Hua Fen* (Radix Trichosanthis) 12g, and *Xuan Shen* (Radix Scrophulariae) 15g. The herbal decoction was given once daily.[10]

TOXICOLOGY

With regard to the dosage form, decoction of *Huang Yao Zi* is sometimes associated with dry mouth, and tincture of this herb is sometimes associated with severe nausea and gastrointestinal discomfort. In addition, a large dose or prolonged use may damage the liver and cause jaundice.[11]

AUTHORS' COMMENTS

According to Dr. Zhang Xiao-Ping, *Huang Yao Zi* is one of the most effective herbs for treatment of hyperthyroidism and goiter. However, it is generally used as the last alternative in patients who do not respond to other herbs, and do not wish to have surgery or radioactive iodine treatment. Though it is effective, use of this herb should be monitored closely, as it has been linked with rare cases of liver toxicity.

Pang Da Hai (Semen Sterculiae Lychnophorae)

胖大海

Pinyin Name: *Pang Da Hai*
Literal Name: "fat big ocean," "fat big sea"
Alternate Chinese Names: *An Nan Zi, Da Dong Guo, Hu Da Fa*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: sterculia, boat-fruited sterculia seed
Botanical Name: *Sterculia lychnophora* Hance.; *Sterculia scaphigera* Wall.
Pharmaceutical Name: Semen Sterculiae Lychnophorae
Properties: sweet, cold
Channels Entered: Lung, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears and Ventilates Lung Qi

Cough due to hot phlegm: *Pang Da Hai* (Semen Sterculiae Lychnophorae) is commonly used to treat accumulations of phlegm and heat in the Lung, characterized by a throttling sound in the throat, profuse yellow sticky sputum, a bitter taste in the mouth, and dry throat. In addition, it can also be used when Lung heat is damaging Lung qi, leading to hoarseness and loss of voice. This herb is mild and can be used daily as a tea. It is often combined with other herbs in this category to expel phlegm.

- Phlegm and heat in the Lung: combine *Pang Da Hai* with *Jie Geng* (Radix Platycodonis), *Chan Tui* (Periostracum Cicadae) and *Bei Mu* (Bulbus Fritillaria).

Hoarse voice due to Lung heat or yin deficiency: *Pang Da Hai* is good for hoarse voice caused by influenza or from excessive talking, singing or shouting.

- Hoarseness and loss of voice: use *Pang Da Hai* with *Sha Shen* (Radix Glehniae seu Adenophorae), *Sheng Di Huang* (Radix Rehmanniae), *Gan Cao* (Radix Glycyrrhizae) and *Gu Zhi Hua* (Semen Oroxyli).

2. Lubricates the Bowels to Relieve Constipation

Constipation due to heat: Cold and moist in nature, *Pang Da Hai* lubricates the bowels and purges heat in the intestines to relieve constipation or dry stools.

- Mild constipation: combine this herb with *Huo Ma Ren* (Fructus Cannabis) and *Yu Li Ren* (Semen Pruni).
- Severe constipation: use it with purgative herbs.

DOSAGE

3 to 5 seeds in decoction. Halve the dosage of *Pang Da Hai* when serving it as powder. *Pang Da Hai* is also taken as tea as needed.

CHEMICAL COMPOSITION

Bassorin, arabinose, galactose.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Oral administration of *Pang Da Hai* is associated with an increase in water content of the intestines, thereby simulating peristalsis and promoting bowel movement. This effect is negated by atropine.[2]
- **Antihypertensive:** Oral or intramuscular administration of *Pang Da Hai* is associated with a reduction of blood pressure in anesthetized dogs and cats. The exact mechanism of action is unclear, but is thought to be related to its effect on the central nervous system.[3]

CLINICAL STUDIES AND RESEARCH

- **Acute tonsillitis:** In one study, 100 patients with acute tonsillitis were treated with *Pang Da Hai* tea with complete recovery in 68 patients, marked improvement in 21 patients, and no response in 11 patients. The tea was prepared by soaking 4 to 8 seeds in hot water for 30 minutes prior to consumption. Patients were advised to drink one dose of tea every 4 hours for 2 to 3 days. The same herbs may be re-used up to three to four times to make tea.[4]

TOXICOLOGY

The LD_{50} for oral administration of *Pang Da Hai* in mice is 12.96 g/kg. Adverse reactions due to overdose included poor balance and respiratory depression.[5]

AUTHORS' COMMENTS

Pang Da Hai and *Gu Zhi Hua* (Semen Oroxyli) are two of

Pang Da Hai (Semen Sterculiae Lychnophorae)

the best herbs to restore loss of voice. They can be taken as tea throughout the day for those who need to speak or sing for a prolonged period of time.

Luo Han Guo (Fructus Momordicae)

羅漢果 罗汉果

Pinyin Name: *Luo Han Guo*
Literal Name: "big fellow's fruit," "arhat fruit"
Alternate Chinese Names: *La Han Guo, Jia Ku Gua*
Original Source: *Ling Nan Cai Yao Lu* (Records of Picking Herbs in Guangdong)
English Name: momordica fruit, grosvenor momordica fruit
Botanical Name: *Momordica grosvenori* Swingle (*Luo Han Guo*)
Pharmaceutical Name: Fructus Momordicae
Properties: sweet, cool
Channels Entered: Lung, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Moistens the Lung and Stops Cough

Coughing due to Lung heat or dryness: Chronic dry cough with or without sputum that may be scanty, blood-streaked and/or difficult to expectorate. Other symptoms may include dryness of the throat and tongue. *Luo Han Guo* (Fructus Momordicae), nourishing in nature, is most suitable for weak patients with chronic respiratory disorders.

- Dry cough: combine *Luo Han Guo* with *Bei Sha Shen* (Radix Glehniae), *Mai Men Dong* (Radix Ophiopogonis) and *Bai He* (Bulbus Lilii).
- Acute or chronic tonsillitis, pharyngitis, bronchitis and pertussis: use *Luo Han Guo* as tea twice daily.

2. Generates Body Fluids and Relieves Thirst

Summer-heat injuring the body fluids: *Luo Han Guo* is excellent to relieve thirst during the summer. It is usually used as a daily beverage to cool the body.

- Summer-time thirst: decoct it alone and serve as tea.

Recently, *Luo Han Guo* has been used to address acute gastritis and constipation.

DOSAGE

15 to 30 grams, or 1 to 2 pieces of the entire fruit, in decoction. The fruit should be crushed to enhance the extraction of active constituents.

CHEMICAL COMPOSITION

Mogroside V, VI.[1]

PHARMACOLOGICAL EFFECTS

- **Antitussive:** Preparations of *Luo Han Guo* have shown mild antitussive effects.[2]

Luo Han Guo (Fructus Momordicae)

TOXICOLOGY

Luo Han Guo has shown very little toxicity when consumed as tea over a period of time.[3]

SUPPLEMENT

- 羅漢果葉 / 罗汉果叶 *Luo Han Guo Ye* (Folium Momordicae) is derived from the leaves of the same plant. Both herbs have similar properties. *Luo Han Guo Ye* is used for chronic throat disorders.

AUTHORS' COMMENTS

Because mogroside VI is approximately 256 to 344 times sweeter than cane sugar, it is commonly used as a sweetening agent in drinks. It is also used as a sugar substitute by obese individuals or those with diabetes mellitus.[4]

Section 2

— Coughing- and Wheezing-Relieving Herbs

Xing Ren (Semen Armeniacae Amarum)

杏仁

Pinyin Name: *Xing Ren*
Literal Name: "apricot seed"
Alternate Chinese Names: *Ku Xing Ren, Tian Xing Ren, Guang Xing Ren, Bei Xing Ren*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: apricot seed, sweet apricot seed, bitter apricot kernel
Botanical Name: *Prunus armeniaca* L. (*Xing*); *Prunus armeniaca* L. var. *ansu* Maxim. (*Shan Xing*); *Prunus sibirica* L. (*Xi Bo Li Ya Xing*); *Prunus mandshurica* (Maxim.) Koehne (*Dong Bei Xing*)
Pharmaceutical Name: Semen Armeniacae Amarum
Properties: bitter, slightly warm
Channels Entered: Lung, Large Intestine
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Arrests Cough and Relieves Wheezing

Cough due to wind-heat, wind-cold, dryness or Lung heat: *Xing Ren* (Semen Armeniacae Amarum) is bitter, draining and lubricating in nature. It enters the *qi* (energy) level of the Lung to redirect adverse rising qi in the form of coughing, dyspnea and wheezing. It is one of the most essential herbs in treating coughing, as it can treat the initial, acute and chronic stages of cough, depending on the prescription.

- Cough due to wind-cold: use *Xing Ren* with *Zi Su Ye* (Folium Perillae), *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria). **Exemplar Formula:** *Xing Su San* (Apricot Kernel and Perilla Leaf Powder).
- Cough due to wind-heat: combine this herb with *Sang Ye* (Folium Mori) and *Ju Hua* (Flos Chrysanthemi). **Exemplar Formula:** *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction).
- Cough with profuse sputum, nasal obstruction, and hoarse voice: add it to *Ma Huang* (Herba Ephedrae) and *Gan Cao* (Radix Glycyrrhizae).
- Cough due to heat and dryness consuming Lung yin: use it with *Sang Ye* (Folium Mori), *Bei Mu* (Bulbus Fritillaria), and *Sha Shen* (Radix Glehniae seu Adenophorae). **Exemplar Formula:** *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction).
- Cough, wheezing and thirst due to Lung heat: combine this herb with *Ma Huang* (Herba Ephedrae) and *Shi Gao* (Gypsum Fibrosum). **Exemplar Formula:** *Ma Xing Gan Shi Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).

Xing Ren (Semen Armeniacae Amarum)

2. Lubricates the Bowels and Promotes Bowel Movements

Constipation, dry stools: *Xing Ren*, lubricating, moistening and descending in nature, is commonly used to treat constipation secondary to dryness and heat in the Large Intestine and Stomach. It may also be used for elderly or deficient patients who have constipation caused by deficiency of qi, blood, and/or body fluids.

- Constipation due to deficiency of qi, blood, and/or body fluids: use *Xing Ren* with *Huo Ma Ren* (Fructus Cannabis), *Da Huang* (Radix et Rhizoma Rhei), and *Zhi Ke* (Fructus Aurantii). **Exemplar Formula:** *Ma Zi Ren Wan* (Hemp Seed Pill).
- Constipation due to dryness: combine this herb with *Tao Ren* (Semen Persicae), *Bai Zi Ren* (Semen Platycladi) and *Yu Li Ren* (Semen Pruni).

DOSAGE

3 to 10 grams in decoction. *Xing Ren* is usually added last or towards the end of cooking, in decoctions. The dry-fried form of *Xing Ren* is gentler on the Spleen and Stomach and is more suitable for patients with cough and wheezing because of constitutional deficiency.

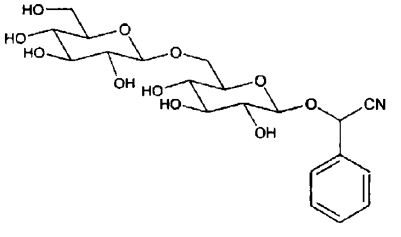
CAUTIONS / CONTRAINDICATIONS

- Bitter, warm and draining, *Xing Ren* is not suitable for patients with cough from qi or yin deficiencies.
- *Xing Ren* should be used with caution for infants or patients with loose stools.
- *Xing Ren* is slightly toxic. However, the toxicity can be reduced by cooking, removing the outer coating, and mixing the seed with sugar.

OVERDOSAGE

Xing Ren is slightly toxic. Adverse reactions have been reported following the consumption of 40 to 60 kernels by adults, and 10 to 20 kernels by children.

Symptoms of overdose of *Xing Ren* usually occur within 30 minutes to 5 hours after excessive ingestion. Moderate overdose of *Xing Ren* causes dizziness, weakness, nausea, vomiting, abdominal pain, burning sensations in the upper abdominal region, increased blood pressure and increased respiration. Severe overdose of *Xing Ren* causes slow, shallow respiration, coma, convulsions, pupil dilation, decreased blood pressure, and possibly respiratory or cardiovascular collapse. Adverse reactions are summarized by disturbances of the respiratory system (dyspnea, itchy throat, soreness and burning sensations in the throat, excessive salivation, increased or irregular respiration, chest congestion and pain), gastrointestinal system (nausea, vomiting, diarrhea, and burning sensations in the stomach), and central nervous system (dizziness, headache, fatigue, tachycardia, increased blood pressure, and semiconsciousness). In severe cases, there may be urinary and bowel incontinence, dilated pupils, muscle convulsions, locked jaw, increased body temperature, hepatomegaly, labored breath, cold extremities, unconsciousness, shock, and respiratory depression.[1]



TREATMENT OF OVERDOSAGE

Overdose of *Xing Ren* can be treated with emetic methods within the first four (4) hours following ingestion of *Xing Ren*. Once systemic reactions occur, it must be treated accordingly. There are two published methods for treatment of overdose of *Xing Ren:*

1. Herbal decoction of *Xing Ren Shu Pi* (Cortex Pruni Armeniacae). The standard protocol is to cook 60 grams of this tree bark in 300 ml of water for 20 minutes, and have the affected individual drink the decoction. Their condition should improve within approximately two (2) hours.[2]
2. Herbal decoction with *Gui Zhi* (Ramulus Cinnamomi) 9g, *Wu Yao* (Radix Linderae) 9g, *Chi Shao* (Radix Paeoniae Rubrae) 9g, *Hong Hua* (Flos Carthami) 15g, and *Tao Ren* (Semen Persicae) 15g. This formula is taken as a decoction twice daily.[3] [Note: The original formula also contained 1.5 gm of *Zhu Sha* (Cinnabaris) added to the decoction immediately prior to ingestion. However, use of *Zhu Sha* is no longer recommended.]

CHEMICAL COMPOSITION

Amygdalin, emulsin, hydroxynitrile lyase, amygdalase, punnase, cholesterol, estrone, α-estradiol.[4,5]

Amygdalin

PHARMACOLOGICAL EFFECTS

- **Antihypertensive:** Intravenous injection of 20% water extract of *Xing Ren* has a marked and sustained antihypertensive effect.[6]
- **Antitussive and antiasthmatic:** After ingestion, amygdalin and emulsin are metabolized in the presence of gastric acid to hydrocyanic acid. In small doses, hydrocyanic acid has a mild inhibitory effect on the respiratory center in the brain, thereby exerting its antitussive and antiasthmatic effects.[7]
- **Antineoplastic:** Oral administration of a *Xing Ren*

Xing Ren (Semen Armeniacae Amarum)

preparation has a marked inhibitory effect on liver cancer cells in mice.[8]

CLINICAL STUDIES AND RESEARCH

- **Chronic tracheitis:** An herbal preparation containing equal portions of *Xing Ren* (with outer shell intact) and rock sugar was given for treatment of chronic tracheitis. The treatment protocol was to administer 9.375 grams of the preparation twice daily for 10 days per course of treatment. Out of 124 patients, 23 reported complete recovery, 66 reported marked effectiveness, 31 experienced some improvement, and 4 had no response. The rate of effectiveness was 96.8%. This treatment was reported to be effective in relieving cough, wheezing and sputum. Most patients began to notice improvement after 3 to 4 days of treatment.[9]

TOXICOLOGY

After oral ingestion in humans, amygdalin and emulsin are metabolized in the presence of gastric acid to hydrocyanic acid and banzaldehyde. Amygdalin is a component of *Xing Ren*, and hydrocyanic acid is a derivative of amygdalin. One gram of *Xing Ren* yields approximately 0.03g [30 mg] of amygdalin and 2.5 mg of hydrocyanic acid. Hydrocyanic acid is a toxic substance, and can be lethal at 0.05g [50 mg]. The LD_{50} for amygdalin in rats is 25 g/kg via intravenous injection, 8 g/kg via intraperitoneal injection and 0.6 g/kg via oral administration. Because hydrocyanic acid is produced from amygdalin in the presence of gastric acid, the toxicity is higher when given via oral administration. The lethal dose of *Xing Ren* has been reported to be as low as 60 grams, or 50 to 60 kernels, in adults. However, small doses of the herb are unlikely to cause toxicity as there will be a gradual and continuous metabolism and excretion of the herb.[10,11,12]

SUPPLEMENT

- 杏仁樹皮 / 杏仁树皮 *Xing Ren Shu Pi* (Cortex Pruni Armeniacae), the bark of the same tree from which *Xing Ren* is harvested, treats overdose of *Xing Ren* (Semen Armeniacae Amarum). Cook 60 grams of *Xing Ren Shu Pi* in 300 ml of water for 20 minutes, and administer the decoction to the affected individual. Improvement should be observed within approximately two (2) hours.[13]

Bai Bu (Radix Stemonae)

百部

Pinyin Name: *Bai Bu*
Literal Name: "hundred parts"
Alternate Chinese Names: *Fei Bai Bu, Zhi Bai Bu, Zheng Bai Bu*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: stemona, sessile stemona root, Japanese stemona root, tuber stemona root
Botanical Name: *Stemona sessilifolia* (Miq.) Franch. et. Sav. (*Zhi Li Bai Bu*); *Stemona japonica* (*Bl.*) Miq.; *Stemona tuberosa* Lour. (*Man Sheng Bai Bu*)
Pharmaceutical Name: Radix Stemonae
Properties: sweet, bitter, neutral
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Moistens the Lung and Stops Cough

Cough: Sweet, bitter and moistening, *Bai Bu* (Radix Stemonae) enters the Lung to relieve cough. Traditionally, it is one of the most essential herbs used in treating tuberculosis. Today, it treats a wide range of cough disorders, including acute or chronic, cold or hot, and excess or deficient conditions. When used alone, this herb is most suitable for the feeble cough associated with chronic respiratory disorders.

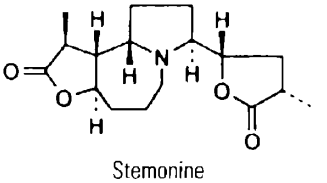
- Cough due to wind: use *Bai Bu* with *Jing Jie* (Herba Schizonepetae), *Jie Geng* (Radix Platycodonis), and *Zi Wan* (Radix Asteris). **Exemplar Formula:** *Zhi Sou San* (Stop Coughing Powder).
- Whooping cough, spasmodic cough in children: use this herb with *Sha Shen* (Radix Glehniae seu Adenophorae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Ma Huang* (Herba Ephedrae), *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Bai Qian* (Rhizoma Cynanchi Stauntonii).
- Cough in tuberculosis, possibly with blood-streaked sputum: combine *Bai Bu* with *Mai Men Dong* (Radix Ophiopogonis), *Sheng Di Huang* (Radix Rehmanniae), *Bai Ji* (Rhizoma Bletillae), and *San Qi* (Radix Notoginseng).
- Tuberculosis with afternoon fever, night sweats, flushed cheeks, *wu xin re* (five-center heat): use this herb with *Bie Jia* (Carapax Trionycis), *Mu Dan Pi* (Cortex Moutan), *Di Gu Pi* (Cortex Lycii), *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae) and *Qin Jiao* (Radix Gentianae Macrophyllae).

2. Kills Parasites

Parasites: *Bai Bu* has antiparasitic action and is commonly used internally or topically to treat pinworm, head or body lice, and other itching dermatological disorders.

- Pinworms: 30 grams of *Bai Bu* is cooked to obtain 30 ml of herbal solution, then used as a rectal enema each night for 5 nights.
- Intestinal parasites: combine this herb with *Wu Mei* (Fructus Mume), *Bing Lang* (Semen Arecae), and *Shi Jun Zi* (Fructus Quisqualis).
- Vaginal trichomonas: use it as a topical wash.
- Head and body lice: apply 50% *Bai Bu* solution topically.

DOSAGE



5 to 10 grams in decoction. Unprocessed *Bai Bu* is irritating to the gastrointestinal tract and may cause stomach discomfort and diarrhea. Frying it with honey enhances the moistening influence and makes it more suitable for treatment of cough due to deficiency, dryness, or weakness. Steaming the herb will prolong the overall therapeutic function, but weaken the initial peak effect.

CAUTIONS / CONTRAINDICATIONS

- *Bai Bu* is contraindicated in patients with loose stools or Spleen deficiency.

CHEMICAL COMPOSITION

Stemonine, stemonidine, isostemonidine, protostemonine, paipunine, sinostemonine.[1,2]

Stemonine

Bai Bu (Radix Stemonae)

PHARMACOLOGICAL EFFECTS

- **Respiratory:** According to *in vitro* studies, the alkaloids of *Bai Bu* demonstrated a mild inhibitory influence on the respiratory center of the brain to suppress cough.[3]
- **Antibiotic:** *Bai Bu* shows inhibitory activity against *Staphylococcus aureus*, *Mycobacterium tuberculosis hominis*, *Diplococcus pneumoniae*, *Bacillus dysenteriae*, *Salmonella typhi*, *Pseudomonas aeruginosa*, *E. coli*, and some influenza viruses and dermatophytes.[4]
- **Others:** Water and alcohol extracts of *Bai Bu* are both effective in killing lice, and bedbugs. The alcohol extract was stronger than the water extract for this purpose.[5]

CLINICAL STUDIES AND RESEARCH

- **Pulmonary tuberculosis:** Chinese herbal formulas were used successfully in treating 93 patients with pulmonary tuberculosis. The herbal formula contained *Bai Bu* 18g, *Huang Qin* (Radix Scutellariae) 9g, *Dan Shen* (Radix Salviae Miltiorrhizae) 9g, and *Tao Ren* (Semen Persicae) 9g, cooked in water to yield 60 ml of decoction. The herbal formula was modified as necessary to best treat each patient. The treatment protocol was to administer the decoction once daily for 3 months.[6]
- **Whooping cough:** According to one report, 10 to 15 ml of *Bai Bu* syrup given three times daily was 85.2% effective in treating 95 patients with whooping cough. Each ml of syrup contained 1.5g of the herb.[7]
- **Chronic tracheitis:** An herbal preparation was used with an 87.2% rate of effectiveness in treating 110 patients with chronic tracheitis. Response was better for those with uncomplicated tracheitis, as compared with those with wheezing and dyspnea. The herbal preparation was made by cooking 20 grams of *Bai Bu* in water twice to yield 60 ml of the final decoction. The dosage was 60 ml of decoction twice daily. If necessary, a small amount of sugar or honey was added to improve taste and compliance.[8]
- **Rosacea:** Topical application of a *Bai Bu* preparation was 92% effective in treating 13 patients with rosacea. The topical preparation was made by soaking *Bai Bu* in 95% alcohol for 5 to 7 days, then diluting it to make a 50% tincture. The tincture was applied to the affected area two or three times daily for 1 month per course of treatment.[9]

TOXICOLOGY

Gross overdose of alkaloids of *Bai Bu* may cause respiratory depression by blocking the stimulation of the respiratory center in the brain.[10]

Zi Wan (Radix Asteris)

紫菀 紫菀

Pinyin Name: *Zi Wan*
Literal Name: "purple-soft roots"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: aster, tatarian aster root
Botanical Name: *Aster tataricus* L. f. (*Zi Wan*)
Pharmaceutical Name: Radix Asteris
Properties: bitter, sweet, slightly warm
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

Dissolves Phlegm and Stops Cough

Cough due to wind-cold, wind-heat or Lung deficiency: *Zi Wan* (Radix Asteris) is warm but not hot, moistening, not drying. Mild in nature, it treats coughing caused by numerous factors, including exterior invasion, interior imbalance, and excess or deficient conditions. *Zi Wan* has a wide range of clinical applications, as it can be combined with various herbs to treat different patterns of coughing.

- Cough due to wind-cold: use fresh *Zi Wan*.
- Cough caused by profuse phlegm and sputum: use this herb with *Jie Geng* (Radix Platycodonis), *Jing Jie* (Herba Schizonepetae), *Bai Bu* (Radix Stemonae) and *Bai Qian* (Rhizoma Cynanchi Stauntonii). **Exemplar Formula:** *Zhi Sou San* (Stop Coughing Powder).
- Cough due to Lung heat with copious yellow sputum: combine it with *Huang Qin* (Radix Scutellariae) and *Bei Mu* (Bulbus Fritillaria).
- Chronic cough due to Lung heat and yin deficiency: use *Zi Wan* with *Jie Geng* (Radix Platycodonis), *Zhi Mu* (Radix Anemarrhenae), *E Jiao* (Colla Corii Asini), and *Bei Mu* (Bulbus Fritillaria). **Exemplar Formula:** *Zi Wan Tang* (Aster Decoction).
- Chronic cough with blood-streaked sputum from Lung deficiency: add this herb to *Zhi Mu* (Radix Anemarrhenae), *Bei Mu* (Bulbus Fritillaria) and *E Jiao* (Colla Corii Asini).
- Chronic cough due to Lung deficiency: use with *Ren Shen* (Radix Ginseng), *Huang Qi* (Radix Astragali), and *Wu Wei Zi* (Fructus Schisandrae Chinensis). **Exemplar Formula:** *Bu Fei Tang* (Tonify the Lungs Decoction).
- Tuberculosis or late-stage lung abscess: use it with *Zhi Mu* (Radix Anemarrhenae), *Bei Mu* (Bulbus Fritillaria), *E Jiao* (Colla Corii Asini), *Ren Shen* (Radix Ginseng), *Fu Ling* (Poria), *Gan Cao* (Radix Glycyrrhizae), *Jie Geng* (Radix Platycodonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

DOSAGE

5 to 10 grams in decoction. Frying *Zi Wan* with honey enhances the moistening influence and makes it more suitable for treatment of chronic dry or feeble coughing due to Lung deficiency.

CAUTIONS / CONTRAINDICATIONS

- *Zi Wan* is not suitable for cough due to excess heat or yin-deficient fire as a single-herb remedy.

CHEMICAL COMPOSITION

Astersaponin, shionone, quercetin, friedelin, epifriedelinol, shionoside A, B, astersaponins A, B, C, D, E, F; phytosterol glucosides, lachnophyllol, lachnophyllol acetate, anethole, butyl-D-ribuloside, cyclopeptide.[1]

PHARMACOLOGICAL EFFECTS

- **Respiratory:** Oral administration of *Zi Wan* in rabbits was associated with a marked expectorant effect that lasted for approximately 4 hours. It did not, however, show significant antitussive or antiasthmatic effects.[2]
- **Antibiotic:** *Zi Wan* has an inhibitory influence against *E. coli*, *Bacillus dysenteriae*, *Bacillus proteus*, *Salmonella typhi*, *Bacillus paratyphosus*, *Pseudomonas aeruginosa*, *Vibrio cholerae*, and some dermatophytes and influenza viruses.[3]
- **Antineoplastic:** *Zi Wan* has shown preliminary inhibitory effects on the growth of cancer cells in mice.[4]

Kuan Dong Hua (Flos Farfarae)

款冬花 款冬花

Pinyin Name: *Kuan Dong Hua*
Literal Name: "welcome winter flower"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: tussilago
Botanical Name: *Tussilago farfara* L. (*Kuan Dong*)
Pharmaceutical Name: Flos Farfarae
Properties: acrid, warm
Channels Entered: Lung, Heart

CHINESE THERAPEUTIC ACTIONS

Moistens the Lung, Descends Qi, Dissolves Phlegm, Stops Cough

Cough due to Lung cold, Lung heat or Lung yin deficiency: Dispersing yet not draining, warm yet not drying, *Kuan Dong Hua* (Flos Farfarae) moistens the Lung, dissolves phlegm and relieves cough. It is most effective for treating cough due to cold attacking the Lung, or chronic cough with blood-streaked sputum. However, when combined with appropriate herbs, *Kuan Dong Hua* treats upper respiratory infection, influenza and a wide range of coughing disorders, including cold or hot, exterior or interior, and excess or deficient conditions.

- Chronic cough with blood-streaked sputum from Lung yin deficiency: use *Kuan Dong Hua* with *Bai He* (Bulbus Lilii) and take it as powder.
- Cough caused by wind and Lung heat: use this herb with *Zhi Mu* (Radix Anemarrhenae), *Sang Ye* (Folium Mori), *Bei Mu* (Bulbus Fritillaria) and *Xing Ren* (Semen Armeniacae Amarum).
- Cough and wheezing due to phlegm obstruction: combine it with *Xing Ren* (Semen Armeniacae Amarum).
- Cough and wheezing due to water accumulation: add *Kuan Dong Hua* to *Ban Xia* (Rhizoma Pinelliae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- Cough due to qi and phlegm obstruction: combine it with *Bai Qian* (Rhizoma Cynanchi Stauntonii).

DOSAGE

5 to 10 grams. Frying *Kuan Dong Hua* with honey enhances the moistening action and makes it more suitable for treatment of chronic cough from Lung deficiency.

CAUTIONS / CONTRAINDICATIONS

- Acrid and warm, *Kuan Dong Hua* should be used with caution for patients who have coughing caused by heat.
- *Kuan Dong Hua* should be used with caution for patients with lung abscesses, or pus and blood in the sputum.

Kuan Dong Hua (Flos Farfarae)

OVERDOSAGE

Overdose of *Kuan Dong Hua* may cause restlessness, excitation, irritability, and increased respiration.[1]

CHEMICAL COMPOSITION

Faradiol, arnidiol, taraxanthin, phytosterine, senkirkine, rutin, hyperin, essential oils, farfaratin, tussilagin, tussilagone. Pyrrolidizine alkaloids are present in the plant *Tussilago farfara*, but their presence in the flower has not been confirmed.[2]

PHARMACOLOGICAL EFFECTS

- **Respiratory:** Administration of *Kuan Dong Hua* has a marked effect on the respiratory tract to suppress cough, eliminate sputum and relieve wheezing. One study showed that decoction of the herb has a marked antitussive effect in dogs. Another showed that alcohol extract of the herb has marked expectorant and antiasthmatic effects in rabbits and guinea pigs. It was also noted that while a small dose may dilate the bronchioli, a large dose may actually constrict them.[3]
- **Cardiovascular:** In cats, rabbits, dogs and rats, intravenous injection of water or alcohol extract of *Kuan Dong Hua* is associated with an initial decline, followed by a prolonged rise, of blood pressure. The rise in blood pressure is attributed to the rise in sympathetic tone and constriction of blood vessels.[4]
- **CNS stimulant:** Administration of *Kuan Dong Hua* has a stimulating effect on the central nervous system (CNS).[5]

CLINICAL STUDIES AND RESEARCH

- **Asthma:** Extract of *Kuan Dong Hua* (equivalent to 6 grams of herb) given three times daily provided marked relief in treating 36 asthma patients. The preparation, however, was ineffective for treating the acute and severe onset of an asthma attack.[6]

TOXICOLOGY

The LD_{50} for *Kuan Dong Hua* preparations in mice is 124 g/kg via oral ingestion for decoction, 112 g/kg via intraperitoneal injection for alcohol extract, and 43 g/kg via intraperitoneal injection for ether extract. Adverse reactions due to overdose included restlessness, excitation, mania, increased respiration, muscle stiffness, tremor, and muscle spasms.[7]

Su Zi (Fructus Perillae)

蘇子 苏子

Pinyin Name: *Su Zi*
Literal Name: "perilla seed"
Alternate Chinese Names: *Zi Su Zi, Hei Su Zi, Du Su Zi*
English Name: perilla fruit
Botanical Name: *Perilla frutescens* (L.) Britt. var. *acuta* (Thunb.) Kudo (*Zi Su*)
Pharmaceutical Name: Fructus Perillae
Properties: acrid, warm
Channels Entered: Lung, Large Intestine

Su Zi (Fructus Perillae)

CHINESE THERAPEUTIC ACTIONS

1. Stops Cough, Relieves Wheezing

Cough, dyspnea and wheezing due to excess accumulation of phlegm: Acrid and warm but not drying, *Su Zi* (Fructus Perillae) directs qi downward and benefits the diaphragm to relieve cough and wheezing. It treats cough and wheezing accompanied by profuse sputum, and feelings of fullness and oppression in the chest and diaphragm regions.

- Cough and wheezing due to phlegm obstruction and food stagnation: use *Su Zi* with *Bai Jie Zi* (Semen Sinapis) and *Lai Fu Zi* (Semen Raphani). **Exemplar Formula:** *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents).
- Cough, wheezing and shortness of breath due to cold phlegm obstruction and Lung qi stagnation: combine this herb with *Ban Xia* (Rhizoma Pinelliae), *Hou Po* (Cortex Magnoliae Officinalis) and *Qian Hu* (Radix Peucedani). **Exemplar Formula:** *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward).

2. Lubricates the Intestines to Promote Bowel Movement

Constipation with dry stools: *Su Zi* has moistening and lubricating effects to treat constipation caused by dryness in the intestines.

- Constipation: use *Su Zi* with *Huo Ma Ren* (Fructus Cannabis), *Gua Lou Ren* (Semen Trichosanthis) and *Xing Ren* (Semen Armeniacae Amarum).

DOSAGE

5 to 10 grams in decoction. Unprocessed *Su Zi* functions more effectively to lower qi downwards and relieve coughing and wheezing. Dry-frying the herb moderates the overall effect, but increases the extraction of active constituents. Honey-baked, the herb has a better effect to moisten the Lung and relieve dry coughing.

CAUTIONS / CONTRAINDICATIONS

- *Su Zi* is contraindicated for patients with loose stools or Spleen qi deficiency.

CHEMICAL COMPOSITION

Fatty oil 45.3%, linoleic acid 14.1%, flavonoids, β-sitosterol, stigmasterol, tannins, vitamin B_1.[1]

CLINICAL STUDIES AND RESEARCH

- **Cough:** An extract of *Su Zi, Bai Jie Zi* (Semen Sinapis) and *Lai Fu Zi* (Semen Raphani) was given twice daily for 7 days per course of treatment, and was effective for treatment of chronic and stubborn coughs. Out of 40 patients, the study reported marked improvement in 62.5%, and moderate improvement in 37.5%.[2]
- **Ascariasis:** According to one report, 92 out of 100 patients with ascariasis were treated successfully with ingestion of fresh *Su Zi* on an empty stomach two to three times daily for 3 days (or more if necessary). The dosage was 50 to 70 grams for adults, and 20 to 50 grams for children between 4 and 10 years of age.[3]

AUTHORS' COMMENTS

Su Zi (Fructus Perillae), *Zi Su Ye* (Folium Perillae), and *Su Geng* (Caulis Perillae) are different parts of the same plant, but they each have different functions:

- *Su Zi* is used for its effect to redirect rebellious qi to relieve coughing and wheezing.
- *Zi Su Ye* is used primarily for its ability to release the exterior.
- *Su Geng* regulates qi and expands the chest.

Zhong Ru Shi (Stalactitum)

鐘乳石 钟乳石

Pinyin Name: *Zhong Ru Shi*
Literal Name: "breast rocks"
Alternate Chinese Names: *Shi Zhong Ru, Di Ru Shi, E Guan Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: stalactitum
Pharmaceutical Name: Stalactitum
Properties: sweet, warm
Channels Entered: Lung, Kidney, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Warms the Lung to Relieve Wheezing

Sweet and warm, *Zhong Ru Shi* (Stalactitum) warms the Lung and dispels cold. Clinically, it is commonly used for respiratory disorders characterized by cold, such as cough or wheezing with white phlegm.

- Cough and wheezing caused by Lung cold: use *Zhong Ru Shi* with *Ma Huang* (Herba Ephedrae) and *Xing Ren* (Semen Armeniacae Amarum).
- Wheezing and shortness of breath due to deficiency: use this substance with *Shan Yao* (Rhizoma Dioscoreae) and *Yi Yi Ren* (Semen Coicis).

2. Tonifies Kidney Yang to Relieve Wheezing

Zhong Ru Shi tonifies Kidney yang to relieve wheezing characterized by the inability of the Kidney to grasp Lung qi downwards, which leads to labored inhalation. In addition, *Zhong Ru Shi* is also effective for treatment of impotence, spermatorrhea, and coldness and pain in the feet.

- Wheezing with labored inhalation: use *Zhong Ru Shi* with *Hu Tao Ren* (Semen Juglandis), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Ge Jie* (Gecko).
- Impotence and spermatorrhea due to Kidney yang deficiency: combine this substance with *Rou Cong Rong* (Herba Cistanches), *Ba Ji Tian* (Radix Morindae Officinalis), *Bu Gu Zhi* (Fructus Psoraleae) and *Dong Chong Xia Cao* (Cordyceps).

3. Promotes Lactation

Zhong Ru Shi tonifies the Stomach to promote lactation and milk production.

- Difficult lactation due to stagnation: use *Zhong Ru Shi* with *Lou Lu* (Radix Rhapontici), *Tong Cao* (Medulla Tetrapanacis), and *Tian Hua Fen* (Radix Trichosanthis).
- Insufficient milk production due to deficiency of qi and blood: add it to *Huang Qi* (Radix Astragali) and *Dang Gui* (Radicis Angelicae Sinensis).

Zhong Ru Shi is also used as calcium supplement for pregnant women with hypocalcemia.

DOSAGE

9 to 15 grams. *Zhong Ru Shi* is sometimes calcined first to warm the herb and improve its function to treat respiratory tract disorders.

CAUTIONS / CONTRAINDICATIONS

- *Zhong Ru Shi* should be used with caution for patients with interior heat, such as fever, hemoptysis or hematemesis.

CHEMICAL COMPOSITION

Calcium carbonate, magnesium, iron, aluminum, and other minerals.[1]

Ma Dou Ling (Fructus Aristolochiae)

馬兜鈴　马兜铃

Pinyin Name: *Ma Dou Ling*
Literal Name: "bell of a horse's hat"
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: aristolochia fruit, dutchman's pipe fruit
Botanical Name: *Aristolochia contorta* Bge. (*Bei Ma Dou Ling*); *Aristolochia debilis* S. et. Z. (*Ma Dou Ling*)
Pharmaceutical Name: Fructus Aristolochiae
Properties: bitter, slightly acrid, cold
Channels Entered: Lung, Large Intestine
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Clears the Lung, Dissolves Phlegm, Stops Cough and Wheezing

Coughing and wheezing caused by accumulation of phlegm or Lung heat: All types of cough and dyspnea due to Lung heat can be treated with *Ma Dou Ling* (Fructus Aristolochiae). Clinical manifestations include labored respiration, profuse yellow phlegm and cough.

- Coughing and wheezing due to accumulation of phlegm or Lung heat: use *Ma Dou Ling* with *Sang Bai Pi* (Cortex Mori), *Huang Qin* (Radix Scutellariae) and *Xing Ren* (Semen Armeniacae Amarum).

Chronic cough: *Ma Dou Ling* treats chronic cough from Lung deficiency characterized by scanty or blood-streaked sputum, and dry mouth and throat.

- Chronic cough due to Lung deficiency: combine this herb with *E Jiao* (Colla Corii Asini), *Xing Ren* (Semen Armeniacae Amarum), and *Niu Bang Zi* (Fructus Arctii).

2. Clears Heat from the Large Intestine and Treats Hemorrhoids

Hemorrhoidal pain: The Lung and Large Intestine are paired organs. By sedating Lung heat, Large Intestine fire can also be cleared. *Ma Dou Ling* treats excess accumulation of fire in the Large Intestine that is causing hemorrhoids, swelling and bleeding.

- Hemorrhoids: use this herb with *Zao Jiao Ci* (Spina Gleditsiae), *Shao Yao Tang* (Peony Decoction) or *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life).

3. Lowers Blood Pressure

Hypertension: *Ma Dou Ling* has shown marked and prolonged antihypertensive effects. It is commonly used for early-stage primary hypertension, characterized by Liver yang rising with dizziness and a red face.

- Hypertension: use this herb with *Xia Ku Cao* (Spica Prunellae), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Huang Qin* (Radix Scutellariae).

DOSAGE

3 to 10 grams in decoction. Because it is bitter, cold and slightly toxic, use of unprocessed *Ma Dou Ling* may cause numerous side effects. This herb should be fried with honey to neutralize the bitter taste, cold property, and toxic component. In addition, frying it with honey enhances the moistening effect and makes it more suitable for treatment of cough and wheezing caused by Lung deficiency and heat. Frying with honey minimizes the frequency of nausea and vomiting associated with this herb.

CAUTIONS / CONTRAINDICATIONS

- Large dosages of *Ma Dou Ling* may cause nausea and vomiting.
- Bitter and cold, *Ma Dou Ling* should not be used if the coughing and/or wheezing is caused by deficiency or cold, or if the patient has loose stools due to Spleen deficiency.

OVERDOSAGE

Gross overdose of 30 grams *Ma Dou Ling* in decoction may cause side effects such as nausea, vomiting, irritability, dizziness, shortness of breath and hematemesis.[1]

CHEMICAL COMPOSITION

Magnoflorine, aristolochic acid, aristolochinic acid, allantoin, diblic acid.[2]

Ma Dou Ling (Fructus Aristolochiae)

PHARMACOLOGICAL EFFECTS

- **Expectorant:** Decoction of *Ma Dou Ling* has a mild expectorant effect in anesthetized rabbits. The effect is much weaker than *Zi Wan* (Radix Asteris) and *Tian Nan Xing* (Rhizoma Arisaematis).[3]
- **Antibiotic:** It has an inhibiting influence against *Diplococcus pneumoniae* and some pathogenic fungi.[4]
- **Antihypertensive:** Administration of *Ma Dou Ling* is associated with a mild and prolonged effect to lower blood pressure. However, some subjects reported side effects such as nausea, diarrhea, and loss of appetite.[5]

CLINICAL STUDIES AND RESEARCH

- **Chronic tracheitis:** The combination of *Ma Dou Ling* and *Gan Cao* (Radix Glycyrrhizae) was found to be effective in a clinical study with 94 patients with chronic tracheitis.[6]
- **Infection:** Intramuscular injection of a *Ma Dou Ling* preparation one to two times daily was 88.8% effective in 1,202 patients with various infectious diseases, such as pneumonia, tracheitis, gastroenteritis, bacterial dysentery, and upper respiratory infection.[7]

TOXICOLOGY

The LD_{50} for alcohol extract of *Ma Dou Ling* in mice via oral ingestion is 22.02 g/kg.[8]

The alkaloids of *Ma Dou Ling* have been associated with nephritis when given as injection in rabbits at 7.5 mg/kg. When the dose was increased to 20 mg/kg, anuria, hematuria, numbness of the extremities, respiratory depression and fatality were reported in rabbits.[9]

Ma Dou Ling contains a trace amount of aristolochic acid. For more information on the toxicology of this compound, please refer to *Guang Fang Ji* (Radix Aristolochiae Fangchi) or *Guan Mu Tong* (Caulis Aristolochiae Manshuriensis).

Pí Pa Ye (Folium Eriobotryae)

枇杷葉　枇杷叶

Pinyin Name: *Pi Pa Ye*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: eriobotrya, loquat leaf
Botanical Name: *Eriobotrya japonica* (Thunb.) Lindl. (*Pi Pa*)
Pharmaceutical Name: Folium Eriobotryae
Properties: bitter, cool
Channels Entered: Lung, Stomach

Pí Pa Ye (Folium Eriobotryae)

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Phlegm, Stops Cough

Cough due to Lung heat: Bitter and cool, *Pi Pa Ye* (Folium Eriobotryae) sedates Lung heat, dissolves phlegm and stops cough. It is commonly used to treat coughing with copious yellow sputum, bitter taste, and dry mouth from Lung heat.

- Cough with copious yellow phlegm due to Lung heat: combine *Pi Pa Ye* with *Huang Lian* (Rhizoma Coptidis), *Zhi Zi* (Fructus Gardeniae), and *Sang Bai Pi* (Cortex Mori).

Cough caused by dryness and heat: This is characterized by a dry cough, or coughing with a feeling that phlegm remains in the chest after expectoration, along with dry mouth and red tongue. This herb is commonly served with honey.

- Cough due to dryness and heat: use *Pi Pa Ye* with *Sang Bai Pi* (Cortex Mori), *Jie Geng* (Radix Platycodonis) and *Bai Bu* (Radix Stemonae).

2. Harmonizes the Stomach, Directs Qi Downwards

Stomach qi reversal: *Pi Pa Ye* relieves nausea and vomiting by clearing Stomach heat and directing the abnormal rising qi downwards. Secondary symptoms may include vomitus with sour smell, acid regurgitation and thirst.

- Nausea and vomiting: use this herb with *Mai Men Dong* (Radix Ophiopogonis), *Zhu Ru* (Caulis Bambusae in Taenia) and *Lu Gen* (Rhizoma Phragmitis).

DOSAGE

10 to 15 grams of dried herb, 15 to 30 grams of fresh herb, in decoction. *Pi Pa Ye* should be wrapped in cheesecloth prior to decoction to prevent the hair-like components from irritating the throat during ingestion. *Pi Pa Ye* fried with honey enhances the moistening effect and makes it more suitable for treatment of coughing or wheezing caused by heat and dryness. The unprocessed herb treats nausea and vomiting, while honey-fried *Pi Pa Ye* dissolves phlegm and relieves cough.

CAUTIONS / CONTRAINDICATIONS

- *Pi Pa Ye* is not suitable for treatment of cough due to cold, or for nausea and vomiting due to Stomach cold.
- *Pi Pa Ye* leaves have fine hair-like components that may irritate the throat if ingested. To prevent this irritation, the leaves should be scrubbed clean, or wrapped in cheesecloth, prior to decoction.

CHEMICAL COMPOSITION

Neiolidol, farnesol, amygdalin, ursolic acid, oleanolic acid, trans-nerolidol, trans-farnesol.[1,2]

PHARMACOLOGICAL EFFECTS

- **Antitussive:** Administration of *Pi Pa Ye* is associated with good antitussive, but poor expectorant effects.[3]
- **Antibiotic:** Decoction of *Pi Pa Ye* has an inhibitory effect *in vitro* against *Staphylococcus aureus*.[4]

CLINICAL STUDIES AND RESEARCH

- **Chronic tracheitis:** In one study, 167 patients with chronic tracheitis were treated with an herbal preparation with 42 showing significant improvement, 60 showing moderate improvement, 35 showing slight improvement, and 30 showing none. The herbal formula was prepared by cooking 90 grams of *Pi Pa Ye* and 150 grams of *Su Geng* (Caulis Perillae) in water to yield a final decoction of 2,000 ml. To make the final preparation, 240 ml of syrup was added to the decoction. The treatment protocol was to administer 10 ml of the preparation, three times daily, for 20 days per course of treatment. It was noted that the preparation had strong antitussive, but mild expectorant effects.[5]
- **Pinworm:** An herbal preparation was used to treat 122 children with pinworm infestations with a 78.85% success rate. The herbal preparation was made by cooking 100 grams of *Pi Pa Ye* at boiling temperature for 1 hour to yield 200 ml of the decoction. The treatment protocol was to administer 100 ml of decoction on an empty stomach twice daily in the morning and at night for 15 days.[6]

Gu Zhi Hua (Semen Oroxyli)

故紙花 故纸花

Pinyin Name: *Gu Zhi Hua*
Alternate Chinese Names: *Mu Hu Die, Yu Hu Die*
English Name: oroxylum
Botanical Name: *Oroxylum indicum* (L.) Ventenat
Pharmaceutical Name: Semen Oroxyli
Properties: sweet, bland, cool
Channels Entered: Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Moistens the Lung, Relieves Cough, Restores Voice

Gu Zhi Hua (Semen Oroxyli) moistens the Lung and relieves dryness. It is commonly used to treat cough and loss of voice caused by heat and dryness.

- Loss of voice: combine *Gu Zhi Hua* with *Pang Da Hai* (Semen Sterculiae Lychnophorae) and *Chan Tui* (Periostracum Cicadae).

2. Eliminates Heat and Dampness from the Skin

Gu Zhi Hua is used topically to promote healing of ulcerated suppurative sores characterized by damp-heat.

DOSAGE

3 to 6 grams.

CAUTIONS / CONTRAINDICATIONS

- *Gu Zhi Hua* should be used with caution in patients with loss of voice caused by wind-cold.

CHEMICAL COMPOSITION

Baicalein, tetuin, oroxin A, B; chrysin, baicalein-7-O-β-gentiobioside, oroxindin.[1]

AUTHORS' COMMENTS

Gu Zhi Hua and *Pang Da Hai* (Semen Sterculiae Lychnophorae) are two of the best herbs to restore loss of voice. They can be taken as tea throughout the day for those who need to speak or sing for a prolonged period of time.

Bai Guo (Semen Ginkgo)

白果

Pinyin Name: *Bai Guo*
Literal Name: "white fruit seed"
Alternate Chinese Names: *Bai Guo Ren, Yin Xing, Yin Guo*
Original Source: *Yin Shan Zheng Yao* (Correct Guide to Eating and Drinking)
English Name: ginkgo nut, ginkgo seed
Botanical Name: *Ginkgo biloba* L. (*Yin Xing*)
Pharmaceutical Name: Semen Ginkgo
Properties: sweet, bitter, astringent, neutral
Channels Entered: Lung
Safety Index: slightly toxic

CHINESE THERAPEUTIC ACTIONS

1. Arrests Wheezing and Dispels Phlegm

Asthma due to phlegm, heat or Lung deficiency: Astringent and restraining in property, *Bai Guo* (Semen Ginkgo) treats dyspnea, wheezing, asthma, chronic cough, and loss of voice characterized by Lung qi deficiency. Most texts state that this herb is used in chronic respiratory disorders no longer involving any external pathogenic factor or internal excess accumulation. However, it can also be combined with herbs in the heat-clearing and phlegm-eliminating categories to treat excess conditions.

- Asthma, dyspnea or cough: use *Bai Guo* with *Ma Huang* (Herba Ephedrae), *Su Zi* (Fructus Perillae), *Kuan Dong Hua* (Flos Farfarae), *Ban Xia* (Rhizoma Pinelliae), *Sang Bai Pi* (Cortex Mori) and *Xing Ren* (Semen Armeniacae Amarum).
- Chronic cough with loss of voice: combine this herb with *Sang Bai Pi* (Cortex Mori), *Chan Tui* (Periostracum Cicadae) and *Mai Men Dong* (Radix Ophiopogonis).
- Chronic wheezing due to Kidney and Lung qi deficiencies: add *Ge Jie* (Gecko).
- Accelerated respiration with yellow phlegm: use *Bai Guo* with *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori). **Exemplar Formula:** *Ding Chuan Tang* (Arrest Wheezing Decoction).
- Feeble, dry cough: combine this herb with *E Jiao* (Colla Corii Asini), *Sha Shen* (Radix Glehniae seu Adenophorae) and *Dang Shen* (Radix Codonopsis).
- Chronic loss of voice and dryness: add it to *Chan Tui* (Periostracum Cicadae), *Mai Men Dong* (Radix Ophiopogonis), *Sang Bai Pi* (Cortex Mori) and *Xuan Shen* (Radix Scrophulariae).

2. Restrains the Leakage of Fluids from the Lower *Jiao*

Leakage of body fluids: *Bai Guo* dispels dampness and restrains the leakage of body fluids to treat spermatorrhea, clear or yellow leukorrhea and other disorders characterized by leakage of fluid from the lower *jiao*.

- Spermatorrhea: combine it with *Shan Yao* (Rhizoma Dioscoreae).
- Clear and watery vaginal discharge due to Spleen deficiency: *Bai Guo* is combined with *Shan Yao* (Rhizoma Dioscoreae) and *Qian Shi* (Semen Euryales).
- Yellow vaginal discharge with foul odor due to damp-heat: add it to *Huang Bai* (Cortex Phellodendri) and *Che Qian Zi* (Semen Plantaginis).
- White vaginal discharge due to Kidney deficiency: use this herb with *Bai Ji Guan Hua* (Flos Celosiae Cristatae).

Cloudy urine: When combined with other diuretic herbs, *Bai Guo* can dispel dampness to treat cloudy urine and polyuria.

- Cloudy urine or frequent urination: use this herb with *Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) and *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae).
- Frequent urination or enuresis: use it with *Wu Yao* (Radix Linderae), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), *Fu Pen Zi* (Fructus Rubi), *Shan Yao* (Rhizoma Dioscoreae) and *Shan Zhu Yu* (Fructus Corni).

DOSAGE

1.5 to 9 grams in decoction. Unprocessed *Bai Guo* is sometimes used to dispel phlegm. However, the unprocessed herb is slightly toxic, and is generally not used, even though it has a stronger effect to eliminate phlegm. Most commercial forms of *Bai Guo* have been

Bai Guo (Semen Ginkgo)

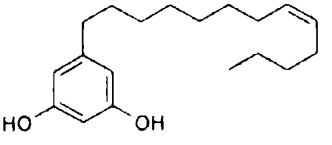
dry-fried with heat to reduce the toxicity. The dry-fried form increases warmth, relieves asthma, and treats leukorrhea and incontinence. Dry-fried *Bai Guo* is stronger for tonifying the Lung and arresting wheezing. Lastly, to prevent adverse reactions to *Bai Guo*, the seeds should be cooked with the shells and thin lining intact as these components have good influence to neutralize the toxicity of the seeds.

CAUTIONS / CONTRAINDICATIONS

- *Bai Guo* is contraindicated in excess conditions or exterior patterns, during the initial stages of a cough, and in Lung yin deficiency with sticky, copious phlegm.
- *Bai Guo* is slightly toxic and should not be used in large quantities or on a long-term basis.
- *Bai Guo* should be used with caution during pregnancy, as it stimulates contraction of the uterus.

OVERDOSAGE

Overdose of or side effects from use of *Bai Guo* generally occur within 2 to 3 hours after ingestion of excessive amounts of the offending agent. However, reactions have been observed within 1 hour, or delayed by up to 14 hours. The reactions are characterized by headache, vomiting (usually without nausea), dyspnea, spasms, tremor, fever (38° to 39° C), irrational fear, muscle stiffness, and pupil dilation. Many patients experiencing overdose also exhibit increased sensitivity to outside stimuli such as light and sound, with continued stimulation leading to convulsions. In severe cases, there may be altered consciousness, foaming at the mouth, dyspnea, accelerated respiration, purple lips, and respiratory depression.



One study reported that overdose of *Bai Guo* may occur following ingestion of 7 to 150 seeds in children and 40 to 300 seeds in adults. Adverse reactions included nausea, vomiting, sedation, stupor, abdominal pain, diarrhea, irritability, restlessness, dyspnea, seizures, convulsions and other symptoms related to disturbance of the central nervous system. An increase in white blood cells has been reported in some cases. Muscle weakness, paralysis, and loss of feeling in the lower extremities have also been reported in a small number of patients. In severe cases, fatalities have been reported following gross overdose and lack of emergency treatment. Use of *Bai Guo* preparations is also associated with dermatitis and increased risk of bleeding, as ginnol has a hemolytic effect.[1]

TREATMENT OF OVERDOSAGE

Acute overdose of *Bai Guo* may be treated initially by gastric lavage or purgative methods. Ingestion of activated charcoal or egg whites will decrease absorption of the toxin. A decoction of 30 grams of *Gan Cao* (Radix Glycyrrhizae) is also helpful in treating overdose. Those who exhibit dyspnea, seizures and convulsions require immediate emergency treatment.[2]

CHEMICAL COMPOSITION

Ginnol, bilobol, ginkgolic acid, hydroginkgolic acid, ginkgolinic acid, ginkgol, anacardic acid, protein, lipids, carbohydrates.[3,4]

Bilobol

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Preparations of *Bai Guo* have an inhibitory influence against gram-positive and gram-negative bacteria, and various pathogenic fungi.[5]
- **Respiratory:** Intraperitoneal injection of a *Bai Guo* preparation showed expectorant and bronchodilating effects.[6]
- **Cardiovascular:** According to one report, 500 mg/kg of bilobol lowered blood pressure in rabbits, rats, and guinea pigs. It increases vascular permeability, and may cause edema.[7]
- **Uterine stimulant:** Administration of bilobol is associated with contraction of the uterus in rabbits.[8]

CLINICAL STUDIES AND RESEARCH

- **Meniere's syndrome:** One case report describes a patient who had Meniere's syndrome for over 10 years but was treated successfully with an herbal formula containing 30 grams of *Bai Guo*, with 6 grams of *Gan Jiang* (Rhizoma Zingiberis) added if there was nausea. The herbal formula was crushed into fine powder, divided into four doses and administered twice daily over 2 days. A five-year follow-up showed no recurrence since the initial treatment.[9]
- **Headache:** Ten patients with headaches caused by tension or stress were treated with an herbal decoction twice daily with complete recovery within 3 days. The herbal decoction was prepared by cooking 60 grams of *Bai Guo* in 500 ml of water to yield 300 ml of the final solution.[10]

TOXICOLOGY

In mice, gross overdose of *Bai Guo* for 60 days was associated with poor appetite, weight loss, various degrees of liver damage, glomerulonephritis, and in severe cases, fatality. Intravenous injection of a *Bai Guo* preparation led to an initial increase of blood pressure, followed by a decrease, then dyspnea, seizures and death.[11,12]

Bai Guo (Semen Ginkgo)

AUTHORS' COMMENTS

Bai Guo is often used with herbs such as *Jie Geng* (Radix Platycodonis) and *Ma Huang* (Herba Ephedrae) that can open the Lung qi so that lingering pathogenic factors can be dispelled and not further trapped.

This herb is not the same as the ginkgo product that is commonly sold over the counter for memory enhancement. The ginkgo product for memory enhancement uses the leaves, *Yin Guo Ye* (Folium Ginkgo), not the nut, *Bai Guo* (Semen Ginkgo). These two herbs are not to be used interchangeably as they have different therapeutic effects and safety profiles.

Yin Guo Ye (Folium Ginkgo)

銀果葉 银果叶

Pinyin Name: *Yin Guo Ye*
Literal Name: "silver fruit leaf"
Alternate Chinese Names: *Yin Xing Ye*, *Bai Guo Ye*
Original Source: *Ben Cao Pin Hui Jing Yao* (Essentials of Materia Medica) by Liu Wen-Tai in 1505
English Name: ginkgo leaf
Botanical Name: *Ginkgo biloba* L. (*Yin Xing*)
Pharmaceutical Name: Folium Ginkgo
Properties: sweet, bitter, astringent, neutral
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

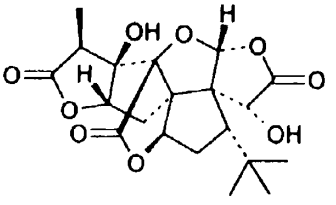
1. Astringes the Lung, Calms Wheezing and Stops Pain

Yin Guo Ye (Folium Ginkgo) relieves wheezing, and alleviates the shortness of breath and dyspnea characteristic of Lung deficiency.

2. Relieves Chest Oppression and Pain

Yin Guo Ye improves circulation in the chest to relieve feelings of chest oppression and pain. Current applications of this herb include coronary artery disease, angina, hypertension and hyperlipidemia.

DOSAGE



3 to 6 grams.

CHEMICAL COMPOSITION

Ginkgetin, isoginkegetin, bilobetin, isorhamnetin,

Yin Guo Ye (Folium Ginkgo)

kaempferol, quercetin, rutin, ginkgolide A, B, C; bilobalide A, shikimic acid, D-glucaric acid, anacardic acids, ginkgolic acid, girmol, ginnone.[1,2]

Ginkgolide A

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Intravenous injection of *Yin Guo Ye* in rabbits and rats was associated with vasodilation, decreased blood pressure and increased perfusion of blood to peripheral parts of the body.[3]
- **Metabolic:** Administration of water extract of *Yin Guo Ye* has been associated with a mild decrease in plasma cholesterol levels.[4]
- **Respiratory:** Administration of alcohol extract of *Yin Guo Ye* has been associated with an antispasmodic effect on the respiratory tract in mice and guinea pigs.[5]

CLINICAL STUDIES AND RESEARCH

- **Dementia:** *Yin Guo Ye* has been used in China and Europe for treatment of dementia. In a placebo-controlled, double-blind, randomized clinical trial with 309 patients over 52 weeks, *Yin Guo Ye* was concluded to be "safe" and capable of "improving the cognitive performance and the social functioning of demented patients for 6 months to 1 year."[6]

HERB-DRUG INTERACTION

- **Anticoagulant drugs:** *Yin Guo Ye* may alter bleeding time and should be used with caution for patients also taking anticoagulant and antiplatelet medications, such as warfarin. Actual reports of problematic interactions between *Yin Guo Ye* and warfarin remain rare, but this possibility should be monitored in all patients who receive these substances. [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox)][7]
- **Antiplatelet drugs:** It was suggested in one animal study that the use of *Yin Guo Ye* extract may potentiate the antiplatelet and antithrombotic effects of ticlopidine. [Note: Examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).][8]
- **Surgery:** It has been recommended that the use of *Yin Guo Ye* should be discontinued for two to three weeks prior to surgery, to avoid potential interaction with anesthetics and/or increased risk of bleeding.[9]

TOXICOLOGY

Side effects such as salivation, nausea, vomiting, poor appetite and diarrhea were reported in a toxicology study in dogs who received intravenous injections of alcohol extract of *Yin Guo Ye* in dogs at 40 times the normal human dose, one injection daily for 7 days.[10]

AUTHORS' COMMENTS

Yin Guo Ye (Folium Ginkgo) is the same as the ginkgo product that is commonly sold over the counter for memory enhancement. While ginkgo leaf is quite popular among the general public, it is not frequently used in traditional Chinese medicine.

Sang Bai Pi (Cortex Mori)

桑白皮

Pinyin Name: *Sang Bai Pi*
Literal Name: "mulberry white bark"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: mulberry bark, white mulberry root bark
Botanical Name: *Morus alba* L. (*Sang Shu*)
Pharmaceutical Name: Cortex Mori
Properties: sweet, cold
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Sedates Lung Heat, Relieves Wheezing

Cough and dyspnea caused by Lung heat: Sweet, cold and downward-moving in nature, *Sang Bai Pi* (Cortex Mori) is the best herb to sedate Lung heat and the accompanying misdirection of Lung qi. Clinically, *Sang Bai Pi* treats coughing and wheezing with yellow copious sputum caused by excess heat in the Lung.

- Cough due to Lung heat: combine *Sang Bai Pi* with *Di Gu Pi* (Cortex Lycii) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Xie Bai San* (Drain the White Powder).

2. Promotes Urination, Reduces Swelling

Edema: *Sang Bai Pi* regulates water circulation to treat excess types of facial or generalized edema, dysuria, and dyspnea with fullness of the chest. It promotes normal urination and reduces swelling.

- Edema: combine this herb with *Da Fu Pi* (Pericarpium Arecae) and *Fu Ling Pi* (Cortex Poria). **Exemplar Formula:** *Wu Pi Yin* (Five-Peel Decoction).

3. Reduces Blood Pressure

Sang Bai Pi treats hypertension characterized by Liver yang rising.

- Hypertension due to Liver yang rising: use *Sang Bai Pi* with *Huang Qin* (Radix Scutellariae), *Jue Ming Zi* (Semen Cassiae) and *Xia Ku Cao* (Spica Prunellae).

DOSAGE

10 to 15 grams in decoction. Unprocessed *Sang Bai Pi* is cold, and more strongly sedates the Lung and regulates water circulation. The honey-fried herb is warmer, and more effectively moistens the Lung and relieves dry cough and wheezing.

CAUTIONS / CONTRAINDICATIONS

- *Sang Bai Pi* is contraindicated for patients who are coughing due to cold in the Lung.

CHEMICAL COMPOSITION

Morusin, mulberrin, mulberrochromene, cyclomulberrin, cyclomuberrochromene, mulberrofuran A, kuwanon, sanggenon, moracenin, betulinic acid, α-amyrin, β-amyrin.[1]

PHARMACOLOGICAL EFFECTS

- **Diuretic:** Water and alcohol extracts of *Sang Bai Pi* given via oral or intraperitoneal administration had a marked diuretic effect by increasing the excretion of water, sodium, chloride and potassium.[2]
- **Cardiovascular:** Water and alcohol extracts of *Sang Bai Pi* have moderate and prolonged antihypertensive effects in dogs, rabbits, and rats. The antihypertensive effect was negated by administration of atropine.[3]
- **Gastrointestinal:** Intravenous injection of alcohol extract of *Sang Bai Pi* in dogs stimulated intestinal smooth muscle to increase peristalsis. Water extract did not have the same effect.[4]
- **Analgesic:** Water extract of *Sang Bai Pi* has an analgesic effect in mice. At 2 g/kg, *Sang Bai Pi* is comparable in effect to 0.5 g/kg of aspirin.[5]
- **Antibiotic:** *Sang Bai Pi* has an inhibitory effect against *Staphylococcus aureus*, *Salmonella typhi*, and *Bacillus dysenteriae*.[6]
- **Others:** *Sang Bai Pi* has antitussive, sedative, hypnotic, and antipyretic effects.[7]

CLINICAL STUDIES AND RESEARCH

- **Esophageal and stomach cancers:** According to one

Sang Bai Pi (Cortex Mori)

report, 4 out of 5 cancer patients (3 with esophageal cancer and 2 with stomach cancer) were treated with good symptomatic relief using a preparation of *Sang Bai Pi*. The preparation was made by cooking 30 grams of the herb with 90 ml of vinegar for one hour. The decoction may be taken all at once, or in smaller portions over a short period of time. Sugar may be added to improve taste and patient compliance.[8]

TOXICOLOGY

Few adverse reactions were observed following bolus or continuous administration of *Sang Bai Pi* in mice. The LD_{50} for water or alcohol extract of *Sang Bai Pi* in mice is 10 g/kg via oral ingestion, and 5 g/kg via intravenous injection.[9]

Ting Li Zi (Semen Descurainiae seu Lepidii)

葶藶子 葶苈子

Pinyin Name: *Ting Li Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: descurainia, lepidium
Botanical Name: *Descurainia sophia* (L.) Schur. (*Bo Niang Hao*); *Lepidium apetalum* Willd. (*Du Xing Cai*)
Pharmaceutical Name: Semen Descurainiae seu Lepidii
Properties: acrid, bitter, very cold
Channels Entered: Lung, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Sedates the Lung, Relieves Wheezing

Wheezing, dyspnea and cough due to profuse phlegm accumulation: *Ting Li Zi* (Semen Descurainiae seu Lepidii) sedates the Lung, dissolves phlegm and relieves wheezing. It is most effective for excess-type coughing and wheezing, gurgling sounds in the throat, and chest fullness and congestion with discomfort when lying down, caused by accumulation of phlegm in the lungs. *Ting Li Zi* has recently been used to treat pleurisy and water retention in the thoracic cavity.

- Accumulation of phlegm in the lungs: combine *Ting Li Zi* with *Da Zao* (Fructus Jujubae). **Exemplar Formula:** *Ting Li Da Zao Xie Fei Tang* (Descurainia and Jujube Decoction to Drain the Lungs).
- Lung abscess: add this herb to *Yi Yi Ren* (Semen Coicis), *Dong Gua Zi* (Semen Benincasae), *Tao Ren* (Semen Persicae), *Jin Yin Hua* (Flos Lonicerae), and *Lu Gen* (Rhizoma Phragmitis).

Ting Li Zi (Semen Descurainiae seu Lepidii)

2. Reduces Swelling, Promotes Diuresis

Edema and water retention in the chest and abdomen: The Lung is the organ in the upper *jiao* that regulates water circulation. When there is qi stagnation obstructing water passages, edema and water retention will result. *Ting Li Zi* treats edema, dysuria, and water accumulation caused by the inability of Lung qi to disperse water to peripheral parts of the body.

- Dysuria: use *Ting Li Zi* with *Fen Fang Ji* (Radix Stephaniae Tetandrae), *Jiao Mu* (Semen Zanthoxyli Bungeani), and *Da Huang* (Radix et Rhizoma Rhei).
- Congestion in the chest with hardness, fullness and pain: combine it with *Xing Ren* (Semen Armeniacae Amarum), *Da Huang* (Radix et Rhizoma Rhei), and *Mang Xiao* (Natrii Sulfas). **Exemplar Formula:** *Da Xian Xiong Tang* (Major Sinking into the Chest Decoction).
- Congestive heart failure with edema, or pulmonary heart disease, dyspnea, generalized swelling, or cardiac failure: use *Ting Li Zi* with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Huang Qi* (Radix Astragali).

DOSAGE

3 to 10 grams in decoction. *Ting Li Zi* can be used at 1 to 2 grams per dose, as powder, three times daily. Bitter, cold and downward-moving, unprocessed seeds are sometimes associated with consumption of Lung qi. Therefore, *Ting Li Zi* is dry-fried to increase its warmth and to minimize the frequency and severity of side effects.

CAUTIONS / CONTRAINDICATIONS

- Strong in its sedating function, *Ting Li Zi* should be reserved for use in cases of accumulation of phlegm or water characterized by excess conditions. It should not be used in deficient conditions.
- *Ting Li Zi* should be used with caution for patients with constitutional deficiency or weakness. If *Ting Li Zi* must be used, it should be taken in combination with Spleen-tonic or qi-tonic herbs to neutralize its cold and sedating properties.
- Use of *Ting Li Zi* is contraindicated during pregnancy.

CHEMICAL COMPOSITION

Strophanthidine, evomonoside, helveticoside, evobioside, erysimoside, benzylisothiocyanate, allyl isothiocyanate, allyl disulfide, linolenic acid, linoleic acid, oleic acid, erucic acid, palmitic acid, stearic acid, sitosterol, sinapic acid, 3-butenyl isothiocyanate, 2-phenylethyl isothiocyanate, 4-methylthiobutyl isothiocyanate, epithiobutane derivatives.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiotonic:** Administration of *Ting Li Zi* is associated with positive inotropic and negative chronotropic effects in frogs, rabbits and cats.[2]
- **Diuretic:** *Ting Li Zi* has a mild diuretic effect.[3]

CLINICAL STUDIES AND RESEARCH

- **Chronic congestive heart failure:** Administration of 1 to 2 grams of *Bei Ting Li Zi* (Semen Lepidii) in powder three times daily after meals had a good therapeutic effect in 10 cases of congestive heart failure.[4]
- **Respiratory disorders:** Thirty children with cough and dyspnea from bronchitis were treated with a preparation of *Ting Li Zi* (6 to 15 grams) with a 96.7% success rate.[5]

HERB-DRUG INTERACTION

- **Diuretics:** *Ting Li Zi* has a mild diuretic effect. Though not documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes. [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).][6]

SUPPLEMENT

- 南葶藶子 / 南葶苈子 *Nan Ting Li Zi* (Semen Descurainiae), derived from *Descurainia sophia* (L.) Schur., is also known as the "sweet *Ting Li Zi*." Bland and milder in potency than Lepidium, it is used primarily to sedate the Lung and relieve wheezing.
- 北葶藶子 / 北葶苈子 *Bei Ting Li Zi* (Semen Lepidii), derived from *Lepidium apetalum* Willd., is known as the "bitter *Ting Li Zi*." It is used primarily to reduce swelling and promote diuresis. Because of its potency, *Bei Ting Li Zi* is more likely to injure the Stomach. Therefore, *Da Zao* (Fructus Jujubae) should be added to minimize potential side effects, and use of the herbs discontinued immediately when the desired effect is achieved.

AUTHORS' COMMENTS

The use of *Ting Li Zi* is generally reserved for disorders found in excess conditions because of its acrid, bitter, cold and draining properties. One of its recent clinical applications is for congestive heart failure with dyspnea and edema, a condition characterized by Lung and Spleen deficiencies. The use of *Ting Li Zi* here is appropriate only because it has a strong cardiotonic function, and tonic herbs should be added to prevent side effects.

According to Dr. Chen Yuan-Da, *Ting Li Zi* is one of the best and most effective herbs for treatment of acute asthma. *Ting Li Zi* has an excellent and immediate action to eliminate visible phlegm (the sputum in the lungs) and invisible phlegm (the inflammation and the swelling in the lungs).

Ting Li Zi (Semen Descurainiae seu Lepidii)

Chapter 13 summary — Phlegm-Resolving and Coughing- and Wheezing- Relieving Herbs

SECTION 1: PHLEGM-RESOLVING HERBS

Name	Similarities	Differences
Ban Xia (Rhizoma Pinelliae)	Dry dampness, resolve phlegm	Relieves nausea and vomiting
Tian Nan Xing (Rhizoma Arisaematis)		Dispels wind and relieves spasms
Dan Nan Xing (Arisaema cum Bile)		Dispels wind and relieves spasms, cool in thermal property
Bai Fu Zi (Rhizoma Typhonii)		Eliminates toxins and disperses nodules
Bai Jie Zi (Semen Sinapis)		Warms the Lung to dispel phlegm, disperses qi, opens channels to relieve pain
Zao Jiao (Fructus Gleditsiae)		Opens orifices, disperses nodules and masses
Zao Jiao Ci (Spina Gleditsiae)		Eliminates toxins, dispels pus, invigorates blood circulation, reduces swelling
Jie Geng (Radix Platycodonis)	Dissolve phlegm, arrest cough	Ventilates the Lung, benefits the throat, dispels pus
Xuan Fu Hua (Flos Inulae)		Descends Lung and Stomach qi
Qian Hu (Radix Peucedani)		Disperses wind-heat
Bai Qian (Rhizoma Cynanchi Stauntonii)		Sedates the Lung, disperses wind-cold
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)		Arrests chronic cough, moistens the Lung
Zhe Bei Mu (Bulbus Fritillariae Thunbergii)		Clears heat, eliminates toxins, disperses stagnation
Gua Lou Shi (Fructus Trichosanthis)	Clear heat, dissolve phlegm	Regulates Lung qi, expands the chest, lubricates the bowels
Gua Lou Ren (Semen Trichosanthis)		Lubricates the bowels
Gua Lou Pi (Pericarpium Trichosanthis)		Regulates Lung qi, expands the chest
Tian Zhu Huang (Concretio Silicea Bambusae)		Stops convulsions
Zhu Ru (Caulis Bambusae in Taenia)		Clears heat and phlegm from the Lung and Stomach
Zhu Li (Succus Bambusae)		Clears heat and phlegm from the Heart, Lung, and Stomach
Fu Hai Shi (Pumice)		Softens hardness, dissipates nodules
Hai Ge Fen (Concha Meretricis seu Cyclinae)		Softens hardness, neutralizes stomach acid
Meng Shi (Lapis Micae seu Chloriti)		Dispels stubborn phlegm, anchors the Liver, stops tremors
Hai Zao (Sargassum)		Softens hardness and masses
Kun Bu (Thallus Laminariae seu Eckloniae)		Softens hardness and masses
Huang Yao Zi (Herba Dioscoreae Bulbiferae)		Disperses stagnation, treats goiter, clears heat, reduces swelling, cools blood to stop bleeding
Pang Da Hai (Semen Sterculiae Lychnophorae)	Benefit the Lung	Clears and ventilates the Lung, lubricates the bowels, restores voice
Luo Han Guo (Fructus Momordicae)		Moistens the Lung, arrests cough, generates body fluids, relieves thirst

General Characteristics of Phlegm-Resolving Herbs:

Taste: bitter
Thermal property: warm or cold
Channels entered: Spleen, Lung
Therapeutic actions: resolve phlegm, treat phlegm-related disorders

Chapter 13 summary

The main functions of phlegm-resolving herbs are to dispel phlegm and relieve phlegm-related disorders, such as cough, dyspnea, mania, epilepsy, convulsions, spasms, scrofula, nodules, goiters and other masses.

Ban Xia (Rhizoma Pinelliae), ***Tian Nan Xing*** (Rhizoma Arisaematis) and ***Dan Nan Xing*** (Arisaema cum Bile), warm and drying, are essential herbs in drying dampness and phlegm.

Ban Xia most effectively dispels dampness in the middle *jiao* with symptoms of cough, nausea and vomiting, especially when characterized by reversed flow of Stomach qi. *Ban Xia* is one of the best, most effective, herbs to treat dampness and phlegm.

Tian Nan Xing, warmer and drier than *Ban Xia*, more directly dispels wind and phlegm in the channels to relieve spasms, vertigo, dizziness, stroke, convulsions, tetany and other symptoms created by wind and phlegm.

Dan Nan Xing, cool and bitter, exerts a stronger influence to clear heat, dissolve phlegm, arrest wind and relieve convulsions.

Bai Fu Zi (Rhizoma Typhonii), toxic, warm and drying, dispels abundant accumulation of wind and phlegm causing symptoms of stroke, facial paralysis and tetany.

Bai Jie Zi (Semen Sinapis), warm and acrid, warms the Lung to dissolve phlegm, benefit qi and disperse stagnation in cold-type coughing with white sputum, chest congestion and fullness, and soreness of the limbs and joints, pus, and yin-type swellings or nodules caused by cold.

Zao Jiao (Fructus Gleditsiae) and ***Zao Jiao Ci*** (Spina Gleditsiae) are derived from the same plant and have similar functions.

Zao Jiao dispels phlegm, opens orifices, and effectively resuscitates unconscious patients who are foaming at the mouth, have locked jaw, epilepsy or convulsions due to profuse phlegm obstruction.

Zao Jiao Ci functions better to eliminate toxins, invigorate blood circulation and reduce swelling.

Jie Geng (Radix Platycodonis) has ascending and descending functions. It ventilates the Lung to relieve cough, dissolves sputum, benefits the throat, and dispels pus and abscesses.

Xuan Fu Hua (Flos Inulae) dispels phlegm, moves water and treats cough involving profuse sputum. It redirects abnormally-rising Stomach qi to relieve nausea, vomiting and hiccups caused by phlegm accumulation.

Qian Hu (Radix Peucedani) and ***Bai Qian*** (Rhizoma Cynanchi Stauntonii) dispel phlegm and descend qi.

Qian Hu is used more in wind-heat conditions because it is stronger in its ventilating and dispersing effects.

Bai Qian descends qi and relieves coughing characterized by excess heat or phlegm conditions in the Lung.

There are two varieties of ***Bei Mu*** (Bulbus Fritillaria): ***Chuan Bei Mu*** (Bulbus Fritillariae Cirrhosae) and ***Zhe Bei Mu*** (Bulbus Fritillariae Thunbergii).

Chuan Bei Mu, sweet and cool, moistens the Lung, relieves dry cough, and treats yin-deficient chronic cough with scanty sputum and dry throat.

Zhe Bei Mu, bitter and cold, more strongly sedates the Lung in excess conditions and thus treats wind-heat or phlegm-heat in the Lung.

Chapter 13 summary

Gua Lou Pi (Pericarpium Trichosanthis), ***Gua Lou Ren*** (Semen Trichosanthis), and ***Gua Lou Shi*** (Fructus Trichosanthis) are derived from the same plant and have similar functions.

Gua Lou Pi strongly clears the Lung, dissolves phlegm and expands the chest.

Gua Lou Ren moistens the Lung, dissolves phlegm and moistens the Large Intestine to promote bowel movement.

Gua Lou Shi has all of the above functions.

Tian Zhu Huang (Concretio Silicea Bambusae), ***Zhu Ru*** (Caulis Bambusae in Taenia) and ***Zhu Li*** (Succus Bambusae) are all from the bamboo plant, but have different functions.

Tian Zhu Huang clears the Heart, dissolves phlegm, and treats phlegm obstructing the Heart (epilepsy, convulsions, or unconsciousness).

Zhu Ru clears Lung and Stomach heat, and treats cough due to Lung heat, or vomiting and nausea due to Stomach heat and phlegm.

Zhu Li, sweet and cold, treats stroke, epilepsy and mania caused by heat and phlegm.

Fu Hai Shi (Pumice) and ***Hai Ge Fen*** (Concha Meretricis seu Cyclinae) are salty and cold, clear the Lung, dissolve phlegm, soften hardness and disperse stagnation.

Fu Hai Shi also promotes urination.

Hai Ge Fen reduces swelling via diuresis, and neutralizes gastric acid to relieve pain.

Meng Shi (Lapis Micae seu Chloriti) descends qi, anchors the Liver and treats excess conditions involving chronic, difficult-to-expectorate phlegm.

Hai Zao (Sargassum) and ***Kun Bu*** (Thallus Laminariae seu Eckloniae) dispel phlegm, soften hardness and are essential to disperse and soften masses, nodules, scrofula and goiter. These herbs are taken steadily over a long period of time to gain results.

Huang Yao Zi (Herba Dioscoreae Bulbiferae) clears heat, eliminates toxins, cools the blood, reduces swelling, and dissipates nodules, goiter and masses. *Huang Yao Zi* may be toxic to the liver, and must only be used with caution.

Pang Da Hai (Semen Sterculiae Lychnophorae) and ***Luo Han Guo*** (Fructus Momordicae) address Lung disorders characterized by yin deficiency and dryness.

Pang Da Hai is sweet and cold, and treats hoarseness or loss of voice from Lung heat.

Luo Han Guo moistens the Lung and treats symptoms associated with Lung yin deficiency.

Chapter 13 summary

SECTION 2: COUGHING- AND WHEEZING-RELIEVING HERBS

Name	Similarities	Differences
Xing Ren (Semen Armeniacae Amarum)	Arrest cough	Relieves wheezing, moistens the Lung, lubricates the bowels
Bai Bu (Radix Stemonae)		Kills parasites
Zi Wan (Radix Asteris)		Moistens dryness, dissolves phlegm
Kuan Dong Hua (Flos Farfarae)		Moistens dryness, dissolves phlegm
Su Zi (Fructus Perillae)		Descends qi, dissolves phlegm, relieves dyspnea
Zhong Ru Shi (Stalactitum)		Warms the Lung and Kidney to relieve wheezing, promotes lactation
Ma Dou Ling (Fructus Aristolochiae)		Clears the Lung, dissolves phlegm
Pi Pa Ye (Folium Eriobotryae)		Dissolves phlegm, descends Stomach qi
Gu Zhi Hua (Semen Oroxyli)		Restores voice
Bai Guo (Semen Ginkgo)		Relieves wheezing, consolidates *jing* (essence)
Yin Guo Ye (Folium Ginkgo)		Relieves chest oppression and pain, improves cognitive functions
Sang Bai Pi (Cortex Mori)	Sedate the Lung, arrest dyspnea, promote urination and reduce swelling	Clears the Lung more strongly
Ting Li Zi (Semen Descurainiae seu Lepidii)		Sedates water in the Lung more effectively

General Characteristics of Coughing- and Wheezing-Relieving Herbs:

Taste: sweet, bitter
Thermal property: warm or cold
Channels entered: Lung
Therapeutic actions: arrest cough, relieve wheezing and dyspnea

Herbs in this category ventilate the Lung to dispel phlegm, moisten the Lung to stop coughing, and redirect rebellious qi downwards to relieve cough, wheezing and dyspnea.

Xing Ren (Semen Armeniacae Amarum), bitter and descending in nature, drains downwards and is essential to stop cough and relieve wheezing. Used with other herbs, it treats all types of cough and dyspnea. *Xing Ren* also lubricates the intestines and treats dry stools or constipation.

Bai Bu (Radix Stemonae) moistens the Lung and arrests both acute and chronic coughing.

Zi Wan (Radix Asteris) and ***Kuan Dong Hua*** (Flos Farfarae), commonly used together, are both warm and moistening. They are most suitable for cold-type cough involving profuse sputum or chronic cough with blood-streaked sputum.

Zi Wan more strongly dissolves phlegm.
Kuan Dong Hua more strongly relieves cough.

Su Zi (Fructus Perillae) descends qi and dissolves phlegm, for profuse phlegm accumulation in the chest with Lung qi reversal.

Zhong Ru Shi (Stalactitum) warms the Lung and Kidney to relieve coughing and wheezing, and promotes lactation.

Ma Dou Ling (Fructus Aristolochiae), bitter and cold, clears the Lung to dissolve phlegm in cough due to heat with profuse phlegm and accelerated respiration. *Ma Dou Ling* also sedates Large Intestine heat to treat hemorrhoids with swelling, bleeding and pain.

Chapter 13 summary

Pi Pa Ye (Folium Eriobotryae) moistens the Lung, dissolves phlegm, relieves cough, harmonizes the Stomach, and reverses rising Stomach qi caused by heat. It is one of the best herbs for sticky, difficult-to-expectorate sputum.

Gu Zhi Hua (Semen Oroxyli) moistens the Lung, relieves cough, restores voice, and releases damp-heat from the skin.

Bai Guo (Semen Ginkgo) and ***Yin Guo Ye*** (Folium Ginkgo) are derived from the same plant with similar functions to relieve coughing and wheezing.

Bai Guo is sweet, astringent and moves downwards. It stabilizes and binds the Lung to relieve wheezing, stops leukorrhea and retains urine.

Yin Guo Ye relieves chest oppression disorders such as coronary artery disease, angina, hypertension, and hyperlipidemia. It also increases blood perfusion to the brain to treat dementia and Alzheimer's disease.

Sang Bai Pi (Cortex Mori) and ***Ting Li Zi*** (Semen Descurainiae seu Lepidii) are excellent in sedating the Lung to regulate the water passages in the body. They treat phlegm accumulation in the Lung with Lung qi reversal manifesting as cough and dyspnea.

Sang Bai Pi is sweet and cold, and mild in potency to clear Lung heat.

Ting Li Zi is bitter and cold, and strong in potency to sedate the Lung to dispel phlegm and water.

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH PHLEGM-RESOLVING AND COUGHING- AND WHEEZING-RELIEVING FUNCTIONS

Name	Functional Category
Chen Pi (Pericarpium Citri Reticulatae)	Qi-Regulating Herbs (Chapter 8)
Gan Cao (Radix Glycyrrhizae)	Tonic Herbs (Chapter 17)
Gan Jiang (Rhizoma Zingiberis)	Interior-Warming Herbs (Chapter 7)

Chapter 14

— Shen-Calming Herbs

Definition: When dealing with imbalances of *shen* (spirit) and emotions, the medicinal substances that tranquilize and calm the mind and emotions are said to calm the *shen*.

Shen (spirit) disturbance is an emotional disorder that interferes with the proper health and functioning of the mind. In traditional Chinese medicine, the Heart controls *shen* and the Liver controls emotions. Characteristic clinical presentations of *shen* disturbance are signs and symptoms such as restlessness, anxiety, irritability, and insomnia.

SUBCATEGORIES OF ACTION

Shen-calming herbs are divided into two types: sedative herbs that treat excess-type *shen* disturbance, and nourishing herbs that calm deficient-type *shen* disturbance.

1. ***Sedative herbs that calm the shen***: Most of these are minerals and shells whose heavy nature is said to sedate and calm the *shen*. Thus, they are more suitable for excess-type *shen* disturbances.
2. ***Nourishing herbs that calm the shen***: Most of these are plant parts with nourishing and tonifying properties, and are most effective for deficient-type *shen* disturbances.

Yuan Zhi (Radix Polygalae)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Shen disturbances are usually classified as being either deficient or excess in nature:

- ***Excess-type** shen* disturbances are characterized by irritability, anxiety, restlessness, irritability, insomnia, headache, chest congestion, red eyes, a bitter taste in the mouth, yellow tongue coating, and a slippery, rapid pulse. Liver qi stagnation, Liver fire rising, food stagnation, and phlegm accumulation are ***excess*** conditions in this disease pattern.
- ***Deficient-type** shen* disturbances are characterized by dizziness, light-headedness, palpitations, restlessness, fearfulness, forgetfulness, night sweats, a pale tongue, and thready pulse. The Heart, Spleen, Liver, Kidney, yin and blood may be ***deficient***.

In traditional Chinese medicine, the Heart controls *shen* and the Liver controls emotions. Thus, most herbs that treat disturbances of *shen* and emotion enter the ***Heart*** and ***Liver.*** However, many other factors may contribute to or complicate *shen* disturbance disorders:

- Liver Qi stagnation with emotional disturbances
- Disharmony of the Heart and Spleen, in which the deficient Spleen fails to produce blood to nourish the Heart
- Heart yin deficiency characterized by deficient fire
- Disharmony of the Heart and Kidney, in which Kidney yin deficiency allows heat to rise upwards and disturb the Heart
- Heat and phlegm interfering with the free flow of *shen* and emotions

~

Shen (spirit) disturbance is an emotional disorder that interferes with the proper health and functioning of the mind.

~

CAUTIONS/CONTRAINDICATIONS

Herbs that calm the *shen* (spirit) are used for symptomatic treatment. They should be used only as needed, and are not to be used for prolonged periods of time. Optimal treatment requires assessment of the cause and severity of the disturbance, and should address both the cause and the symptoms.

Chapter 14 — Shen-Calming Herbs

- Mineral substances used individually consume qi and damage the Stomach. Therefore, they should be used with herbs that nourish and protect the Stomach.
- Some *shen*-calming herbs are toxic, and must be used only when necessary, with extreme caution.

Shen-calming herbs are used in symptomatic treatment. Optimal treatment should address both the cause and the symptoms of *shen* disturbance.

PHARMACOLOGICAL EFFECTS

- **Effects on the central nervous system**: The pharmacological effects of herbs on the central nervous system include sedative, hypnotic, analgesic and antiepileptic effects.

  Herbs that decrease spontaneous physical activity include *Suan Zao Ren* (Semen Zizyphi Spinosae), *Ling Zhi* (Ganoderma), *Xie Cao* (Radix et Rhizoma Valerianae) and *He Huan Hua* (Flos Albiziae).

  Herbs that potentiate the effect of hypnotics by prolonging sleeping time include *Suan Zao Ren* (Semen Zizyphi Spinosae), *Xie Cao* (Radix et Rhizoma Valerianae), *Yuan Zhi* (Radix Polygalae) and *Ling Zhi* (Ganoderma).

  Herbs that diminish reactivity to external stimuli include *Suan Zao Ren* (Semen Zizyphi Spinosae) and *Xie Cao* (Radix et Rhizoma Valerianae).

  Herbs that prevent and/or treat seizures and epilepsy by inhibiting the central nervous system include *Ling Zhi* (Ganoderma) and *Xie Cao* (Radix et Rhizoma Valerianae).
- **Immunostimulant**: *Ling Zhi* (Ganoderma) and *Suan Zao Ren* (Semen Zizyphi Spinosae) stimulate the immune system by increasing the phagocytic activities of the macrophages.
- **Others**: *Yuan Zhi* (Radix Polygalae) has expectorant properties. *Ye Jiao Teng* (Caulis Polygoni Multiflori) has an antihyperlipidemic effect. *Xie Cao* (Radix et Rhizoma Valerianae) and *Ling Zhi* (Ganoderma) are hepatoprotective. *Bai Zi Ren* (Semen Platycladi) has a mild laxative effect, and *Long Gu* (Os Draconis) acts as a hemostatic.

POTENTIAL HERB-DRUG INTERACTIONS

- **Sedatives**: Herbs that calm the *shen* (spirit) have marked sedative and tranquilizing effects. Therefore, they should be used with caution when prescribed for a patient also taking other agents that may cause drowsiness, such as alcohol, antihistamines, benzodiazepines, opioid analgesics, and barbiturates. Individuals who take such herbs and/or drugs should exercise caution if driving or operating heavy machinery.

Section 1

— Sedative Herbs that Calm the Shen (Spirit)

Zhu Sha (Cinnabaris)

硃砂　朱砂

Pinyin Name: *Zhu Sha*
Literal Name: "dull red sand," "vermillion sand"
Alternate Chinese Names: *Jing Mian Sha, Dou Bian Sha, Zhu Bao Sha, Chen Sha*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cinnabar
Pharmaceutical Name: Cinnabaris
Properties: sweet, cold
Channels Entered: Heart
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Sedates the Heart and Calms the *Shen* (Spirit)

Sinking, heavy and cold in nature, *Zhu Sha* (Cinnabaris) enters the Heart channel to sedate Heart fire, arrest fright, and calm the *shen*. It is one of the most essential medicinal substances when treating excess fire conditions associated with the Heart. The Heart houses the *shen*: when fire accumulates, symptoms of restlessness, irritability, and insomnia occur. In more severe cases of phlegm and heat misting the Heart, epilepsy, delirium, convulsions, mania, schizophrenia and seizures may occur.

Restless *shen*: Disturbed *shen* can be caused either by excess or deficient conditions. In excess conditions, usually fire attacking the Heart, typical manifestations are restlessness, irritability, insomnia, anger, constipation and a scarlet tongue. In cases involving deficiency, usually blood deficiency unable to nourish the Heart, manifestations include palpitations, dream-disturbed sleep, a sallow complexion, sadness, a desire to cry, and fearfulness. *Zhu Sha*, when combined with heat-clearing herbs, treats excess conditions, and in combination with blood-tonic herbs, treats deficiency. Depending on the other herbs combined with it, *Zhu Sha* can address *shen* disturbances caused by excess fire, yin-deficient fire, blood deficiency and hot phlegm.

- Restlessness, irritability, insomnia: add *Zhu Sha* to *Huang Lian* (Rhizoma Coptidis) and *Ci Shi* (Magnetitum).
- Heart blood deficiency with irritability, palpitations, fright, dizziness and vertigo: combine this substance with *Dang Gui* (Radicis Angelicae Sinensis), *Sheng Di Huang* (Radix Rehmanniae) and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata). **Exemplar Formula:** *Zhu Sha An Shen Wan* (Cinnabar Pills to Tranquilize the Spirit).
- Patients who are weak and easily frightened: combine this substance with *Ci Shi* (Magnetitum) to calm the *shen*, and with *Shen Qu* (Massa Fermentata) to protect the stomach from the harsh effects of the mineral substances.
- Epilepsy in children: combine it with *Xiong Huang* (Realgar) and *Zhen Zhu* (Margarita) as powder.
- Febrile disorders with hot phlegm or *bi zheng* (closed

Zhu Sha (Cinnabaris)

disorder) with high fever, delirium and incoherent speech: use *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone) or *Niu Huang Qing Xin Dan* (Cattle Gallstone Pill to Clear the Heart), both of which contain *Zhu Sha*.

- Schizophrenia: combine *Zhu Sha* with *Xiang Fu* (Rhizoma Cyperi), *Bai Shao* (Radix Paeoniae Alba), *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Shi Chang Pu* (Rhizoma Acori), *Yuan Zhi* (Radix Polygalae), *Yu Jin* (Radix Curcumae), *Dai Zhe Shi* (Haematitum), *Mu Li* (Concha Ostreae) and *Sheng Tie Luo* (Frusta Ferri).

2. Clears Heat and Toxins

Sores, swellings, carbuncles: Whether taken internally or applied topically, *Zhu Sha* clears heat and toxins. It treats sores, carbuncles, toxic swellings, infectious epidemic diseases like malaria, unconsciousness, intake of toxic substances, and abdominal pain with diarrhea.

- Sores, swellings and carbuncles: mix it with *Xiong Huang* (Realgar) and *Shan Ci Gu* (Pseudobulbus Cremastrae) as powder for topical use.

Soreness and swelling of the throat, oral ulcers: When applied topically, *Zhu Sha* relieves pain and reduces swelling of the throat associated with acute tonsillitis.

- Soreness and swelling of the throat, and oral ulcers: add *Zhu Sha* to *Bing Pian* (Borneolum Syntheticum) and *Peng Sha* (Borax). Apply the powder to the affected area.

DOSAGE

0.3 to 1.0 gram. Internally, *Zhu Sha* is taken in pill form ***only***. The toxicity of *Zhu Sha* increases significantly when processed with heat (such as in decoction).

CAUTIONS / CONTRAINDICATIONS

- To prevent cumulative toxicity, *Zhu Sha* should not be used at a large dosage or for a long period of time.
- *Zhu Sha* should be used with extreme caution for those with compromised liver and kidney functions.
- Do not process *Zhu Sha* with heat, as this increases the risk of mercury poisoning.

OVERDOSAGE

Acute overdose of *Zhu Sha* is characterized by disturbance of the central nervous system, with nervousness, a metallic taste in the mouth, swollen gums, poor appetite, abdominal pain, diarrhea, tremor, sexual dysfunction, and liver and kidney damage.

TREATMENT OF OVERDOSAGE

Toxicity of *Zhu Sha* may be treated by gastric lavage with warm water or sodium bicarbonate, ingestion of milk, egg whites, or *Lu Dou* (Semen Phaseoli Radiati) soup. *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity) plus *Jin Yin Hua* (Flos Lonicerae) and *Tu Fu Ling* (Rhizoma Smilacis Glabrae) may also be used for detoxification.

Chronic overdose due to long-term consumption can be treated with the following two methods:

1. Ingestion of 10 to 15 grams of tea (green, oolong or black) one or two times daily. Tea clears heat, promotes urination, and facilitates the elimination of mercury.
2. Ingestion of one dose of an herbal decoction at room temperature containing 250 grams of *Tu Fu Ling* (Rhizoma Smilacis Glabrae), for 10 days (this process can be repeated after 3 to 4 days of rest).

Lastly, adverse reactions characterized by nausea, vomiting, salivation, moist tongue coat, and slow pulse can be treated with 15 grams of *Hua Jiao* (Pericarpium Zanthoxyli) and 30 grams of *Yi Tang* (Saccharum Granorum).[1]

CHEMICAL COMPOSITION

Mercuric sulfide.[2]

TOXICOLOGY

According to an acute toxicology study, the LD_{50} for *Zhu Sha* in mice is 12.10 g/kg.[3]

AUTHORS' COMMENTS

Zhu Sha is sometimes used to coat tablets and pills. It has tranquilizing functions to calm the *shen* (spirit). It also seals the pills against moisture to prolong shelf life.

Zhu Sha should be used with caution, as mineral substances may injure the Spleen and Stomach. To minimize side effects and adverse reactions, *Shen Qu* (Massa Fermentata), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and other digestive herbs may be added for protection of the middle *jiao*.

Fu Ling (Poria), *Mai Men Dong* (Radix Ophiopogonis) and *Deng Xin Cao* (Medulla Junci) can be added to *Zhu Sha* to enhance tranquilizing functions.

Zhu Sha is rarely used as a medicinal substance now. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance. Interestingly, western culture also used mercury in the past, for treatment of syphilis.

Ci Shi (Magnetitum)

磁石

Pinyin Name: *Ci Shi*
Literal Name: "magnetic stone"
Alternate Chinese Names: *Sheng Ci Shi, Ling Ci Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: lodestone, magnetite
Pharmaceutical Name: Magnetitum
Properties: acrid, salty, cold
Channels Entered: Liver, Kidney, Heart

CHINESE THERAPEUTIC ACTIONS

1. Anchors Liver Yang and Calms the *Shen* (Spirit)

Ci Shi (Magnetitum) is salty and heavy, to anchor rising Liver yang, protect the yin, and nourish the *shen*. Tinnitus, impaired hearing, deafness, dizziness, blurred vision, palpitations, forgetfulness, irritability, insomnia, epilepsy, infantile convulsions, restlessness, visual disturbances, vertigo and headaches are signs of Liver yang rising and disturbing the Heart, secondary to Liver yin and Kidney *jing* (essence) deficiencies.

- Blurred vision due to cataracts, disorders of the retina or optic nerves: add this substance to *Shu Di Huang* (Radix Rehmanniae Preparata), *Gou Qi Zi* (Fructus Lycii), *Chan Tui* (Periostracum Cicadae), *Ye Ming Sha* (Excrementum Vespertilionis Murini), *Qing Xiang Zi* (Semen Celosiae), *Shi Hu* (Herba Dendrobii) or *Ju Hua* (Flos Chrysanthemi).
- Heart *shen* disturbance with irritability, palpitations, insomnia or epilepsy: *Ci Shi* has historically been combined with *Zhu Sha* (Cinnabaris) for this purpose.
- Anemia, palpitations, insomnia, anxiety and neurasthenia: use it with *Shu Di Huang* (Radix Rehmanniae Preparata), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba) and *Suan Zao Ren* (Semen Zizyphi Spinosae).

2. Improves Hearing and Brightens Eyes

The Liver opens to the eyes and the Kidney opens to the ears. If there is yin deficiency of either, deficiency fire will flare and manifest in symptoms of tinnitus, hearing loss, dizziness and blurred vision. *Ci Shi* can nourish Liver and Kidney yin and cool deficient fire.

- Tinnitus, hearing loss: combine *Ci Shi* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni) and *Shan Yao* (Rhizoma Dioscoreae). **Exemplar Formula:** *Er Long Zuo Ci Wan* (Pill for Deafness that Is Kind to the Left [Kidney]).
- Cataracts and disorders of the retina: use it with *Shu Di Huang* (Radix Rehmanniae Preparata), *Gou Qi Zi* (Fructus Lycii) and *Ju Hua* (Flos Chrysanthemi).

3. Stops Wheezing and Helps Kidney in Grasping Lung Qi

Respiratory difficulties: Chronic coughing or wheezing is the result of Kidney qi deficiency associated with constitutional weakness. Accompanying symptoms include shortness of breath that grows worse with exertion, difficulty with inhalation as compared to exhalation, shallow respiration, a dark, lusterless complexion, and a weak Kidney pulse.

- Respiratory difficulties: use *Ci Shi* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Xing Ren* (Semen Armeniacae Amarum), *Chen Xiang* (Lignum Aquilariae Resinatum) and *Hu Tao Ren* (Semen Juglandis).

DOSAGE

10 to 30 grams in decoction, 1 to 3 grams of *Ci Shi* when taken as powder or pills. Crush and pre-decoct it to maximize the extraction of active components. The calcined form prepared by fire and vinegar is preferred, as it is easier to extract the active constituents from this than from the unprocessed form.

CAUTIONS / CONTRAINDICATIONS

- Because *Ci Shi* is difficult to digest when taken as powder or pills, excessive or prolonged intake in these forms is contraindicated.

Ci Shi (Magnetitum)

CHEMICAL COMPOSITION

Tri-iron tetroxide (Fe_3O_4).

CLINICAL STUDIES AND RESEARCH

- **Cataracts:** According to one study, 41 patients (72 affected eyes) with cataracts were treated with an herbal formula containing *Ci Shi*, *Zhu Sha* (Cinnabaris) and *Shen Qu* (Massa Fermentata). The study reported improvement in vision in 55.6% of patients.[1]

AUTHORS' COMMENTS

Ci Shi and *Zhu Sha* (Cinnabaris) both are heavy and commonly used to pacify the Heart and calm the *shen* (spirit). However, the main organ *Ci Shi* enters is the Liver: it anchors rising Liver yang that is causing emotional, ocular or aural disorders. It tonifies the Kidney and helps grasp Lung qi to treat asthma. *Zhu Sha*, mainly entering the Heart channel, is strongest in pacifying Heart fire that manifests in symptoms of restless *shen*, palpitations, anxiety and insomnia.

Ci Shi and other mineral substances should be used with caution as they may injure the Spleen and Stomach. To minimize side effects and adverse reactions, *Shen Qu* (Massa Fermentata), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and other digestive herbs may be added for protection of the middle *jiao*.

Long Gu (Os Draconis)

龍骨　龙骨

Pinyin Name: *Long Gu*
Literal Name: "dragon bone"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: dragon bone (fossil), fossilized animal bones
Pharmaceutical Name: Os Draconis
Properties: sweet, astringent, cool
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Calms the Liver and Anchors Rising Yang

Liver yin deficiency with rising yang or Liver wind: *Long Gu* (Os Draconis) treats symptoms such as dizziness, vertigo, irritability, short temper, muscular rigidity, facial paralysis, and deviation of the mouth and eyes. Use the unprocessed form of this herb for this purpose.

- Dizziness, vertigo, irritability and short temper: use *Long Gu* with *Dai Zhe Shi* (Haematitum), *Mu Li* (Concha Ostreae), *Bai Shao* (Radix Paeoniae Alba) and *Bai Ji Li* (Fructus Tribuli). **Exemplar Formula:** *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction).

2. Calms the *Shen* (Spirit)

Restless *shen* from external agitation: Signs of this disorder include insomnia, restlessness, forgetfulness, anxiety, palpitations, and mania. The unprocessed form of *Long Gu* is best for this application.

- Restless *shen*: use this substance with *Shi Chang Pu* (Rhizoma Acori) and *Yuan Zhi* (Radix Polygalae).
- *Shen* disturbance: combine *Long Gu* with *Mu Li* (Concha Ostreae). **Exemplar Formula:** *Chai Hu Jia Long*

Long Gu (Os Draconis)

Mu Tang (Bupleurum plus Dragon Bone and Oyster Shell Decoction).

- Schizophrenia: combine it with *Zhi Gan Cao* (Radix Glycyrrhizae Preparata), *Xiao Mai* (Fructus Tritici), and *Da Zao* (Fructus Jujubae).

Restless *shen* (spirit) from Heart deficiency. Signs include palpitations, insomnia, easily becoming frightened or awakened by dreams, dizziness and forgetfulness.

- Restless *shen* due to Heart deficiency: add *Long Gu* to *Suan Zao Ren* (Semen Zizyphi Spinosae), *Bai Zi Ren* (Semen Platycladi), *Fu Shen* (Poria Paradicis) and *Zhen Zhu Mu* (Concha Margaritaferae).

3. Prevents and Consolidates Leakage of Fluids

Leakage of body fluids due to deficiency: Clinical manifestations include spermatorrhea, vaginal discharge, spontaneous sweating, night sweating, uterine bleeding, epistaxis, enuresis, chronic diarrhea or dysentery, hematemesis and hematochezia. Secondary symptoms include soreness and weakness of the back and knees, and tinnitus. The calcined form of *Long Gu* is best for addressing these symptoms.

- Spermatorrhea, low back pain or tinnitus: combine *Long Gu* with *Mu Li* (Concha Ostreae), *Sha Yuan Zi* (Semen Astragali Complanati) and *Qian Shi* (Semen Euryales). **Exemplar Formula:** *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence).
- Spermatorrhea with Kidney yin deficiency: add *Long Gu* and *Mu Li* (Concha Ostreae) to *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).
- Hypermenorrhea or uterine bleeding: use this substance with *Mu Li* (Concha Ostreae), charred *Xu Duan* (Radix Dipsaci), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *E Jiao* (Colla Corii Asini).
- White vaginal discharge: use it with *Cang Zhu* (Rhizoma Atractylodis), *Yi Yi Ren* (Semen Coicis) and *Fu Ling* (Poria).
- Enuresis: add it to *Sang Piao Xiao* (Ootheca Mantidis), *Fu Pen Zi* (Fructus Rubi), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), *Wu Yao* (Radix Linderae) and *Shan Zhu Yu* (Fructus Corni).
- Chronic diarrhea or dysentery: use *Long Gu* with *Chi Shi Zhi* (Halloysitum Rubrum), *Mu Xiang* (Radix Aucklandiae) and *Wu Mei* (Fructus Mume).
- Spontaneous or night sweating: combine it with *Huang Qi* (Radix Astragali), *Mu Li* (Concha Ostreae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- Profuse sweating with icy cold extremities and feeble pulse due to yang collapse: use it with *Ren Shen* (Radix Ginseng), *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Mu Li* (Concha Ostreae).

4. Promotes Healing of Sores and Helps Generate Flesh

The calcined form of *Long Gu* is most effective to promote the generation of flesh and healing of wounds.

- Non-healing ulcerations or sores, eczema or rashes: apply it topically as powder.

DOSAGE

15 to 30 grams for unprocessed *Long Gu*; 9 to 15 grams for the calcined form. Crush and pre-decoct this substance to enhance the extraction of active components. Calcine processing enhances its binding effect to prevent the loss of body fluids, as in treatment of spermatorrhea, diarrhea, and excessive vaginal discharge. Use unprocessed *Long Gu* for all the other functions.

CAUTIONS / CONTRAINDICATIONS

- Use of *Long Gu* is contraindicated in nocturnal emissions caused by fire.
- It is contraindicated for those who have damp-heat or externally-contracted disorders. Inappropriate use of *Long Gu* may lead to burning dysuria.

CHEMICAL COMPOSITION

Calcium carbonate, calcium phosphate, oxides of silicone, iron, aluminum, manganese, calcium, magnesium, titanium, phosphorus, sodium, potassium, zinc.[1]

CLINICAL STUDIES AND RESEARCH

- **Schizophrenia:** In one clinical study, 79 schizophrenic patients were treated with an herbal decoction containing *Long Gu* 30g, *Mu Li* (Concha Ostreae) 30g, *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) 10g, *Xiao Mai* (Fructus Tritici) 30g, *Da Zao* (Fructus Jujubae) 5 pieces, and other herbs, according to the condition of each patient. Out of 79 patients, the study reported significant improvement in 5 cases, moderate improvement in 23 cases, slight improvement in 34 cases, and no response in 17 cases. The rate of effectiveness was 78.5%.[2]

SUPPLEMENT

- 龍齒 / 龙齿 *Long Chi* (Dens Draconis), sweet, astringent and cool, is fossilized animal teeth. Use of *Long Chi* was first cited in the *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century. It has functions similar to those of *Long Gu* but is stronger in calming the *shen* (spirit), and is often used to treat palpitations, anxiety, insomnia, dream-disturbed sleep and mania. For restlessness or crying in babies or children during the night, this substance can be used with *Bai Shao* (Radix Paeoniae Alba), *Mai Men Dong* (Radix Ophiopogonis), *Da Huang* (Radix et

Long Gu (Os Draconis)

Rhizoma Rhei) and *Sheng Ma* (Rhizoma Cimicifugae). Unprocessed *Long Chi* is preferred for this application.

AUTHORS' COMMENTS

Derived from the same source, *Long Gu* (Os Draconis) is fossilized animal bones and *Long Chi* (Dens Draconis) is fossilized animal teeth. Both pacify restless *shen* (spirit), and have common application such as restlessness, palpitations, insomnia, anxiety, and seizures or mania in severe cases. *Long Gu* is used as an astringent to stop spermatorrhea, vaginal discharge, uterine bleeding or sweating. In addition, calcined forms of *Long Gu* treat non-healing ulcers and sores. *Long Chi* is sweet, astringent and cool. It is used mainly to pacify the *shen* and treat psychological disorders.

Hu Po (Succinum)

琥珀 琥珀

Pinyin Name: *Hu Po*
Alternate Chinese Names: *Xue Hu Po*, *Hong Hu Po*, *Hu Po Xie*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: amber
Pharmaceutical Name: Succinum
Properties: sweet, neutral
Channels Entered: Heart, Liver, Urinary Bladder

CHINESE THERAPEUTIC ACTIONS

1. Arrests Tremors and Calms the *Shen* (Spirit)

***Shen* disturbance causing restlessness, insomnia, palpitations, forgetfulness, tremors, seizures, infantile convulsions:** Depending on the other herbs with which it is combined, *Hu Po* (Succinum) treats a variety of *shen* disturbance problems caused by fire or hot phlegm misting the Heart.

- Restlessness, insomnia, palpitations: use *Hu Po* with *Ren Shen* (Radix Ginseng), *Fu Shen* (Poria Paradicis), *Yuan Zhi* (Radix Polygalae) and *Shi Chang Pu* (Rhizoma Acori).
- Infantile convulsions: combine it with *Tian Zhu Huang* (Concretio Silicea Bambusae), *Fu Ling* (Poria) and *Dan Nan Xing* (Arisaema cum Bile).
- Epilepsy or trance: use this substance with *Zhu Sha* (Cinnabaris), *Niu Huang* (Calculus Bovis), *Quan Xie* (Scorpio), *Tian Zhu Huang* (Concretio Silicea Bambusae) and *Dan Nan Xing* (Arisaema cum Bile).

2. Invigorates Blood Circulation and Dissipates Stasis

Menstrual disorders, amenorrhea: Blood and qi stagnation in the lower *jiao* results in menstrual disorders such as amenorrhea. Other symptoms of blood and qi stagnation may include palpable masses in the abdomen.

- Palpable masses and pain: use *Hu Po* with *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Yan Hu Suo* (Rhizoma Corydalis).
- Amenorrhea or postpartum bleeding due to qi and blood stagnation: combine this substance with *Bie Jia*

Hu Po (Succinum)

(Carapax Trionycis), *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae) and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).

Coronary heart disorders:

- Blood stagnation causing angina: use *Hu Po* with *San Qi* (Radix Notoginseng) as powder for internal use.

Hematoma of the scrotum:

- Blood stagnation in the lower *jiao*: use *Hu Po* alone as a powder. Administer 0.9 grams of powder, taken internally twice daily with water, for 9 to 10 days.
- Traumatic injury to the scrotum: use *Hu Po* with *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

3. Promotes Urination

***Lin zheng* (dysuria syndrome):** Urinary dysfunction such as hematuria, burning dysuria, urinary retention and urinary stones can be treated with *Hu Po*.

- Hematuria: use it with *Deng Xin Cao* (Medulla Junci) and *Da Ji* (Herba seu Radix Cirsii Japonici).
- Urinary stone: add it to *Hai Jin Sha* (Herba Lygodii), *Jin Qian Cao* (Herba Lysimachiae), *Pu Huang* (Pollen Typhae), *Mo Yao* (Myrrha) and *Tong Cao* (Medulla Tetrapanacis).
- Kidney stones with hematuria: use *Hu Po* alone in powder form.
- Burning dysuria: combine it with *Chuan Mu Tong* (Caulis Clematidis Armandii), *Bian Xu* (Herba Polygoni Avicularis) and *Ze Xie* (Rhizoma Alismatis).

4. Reduces Swelling and Promotes Healing

Non-healing ulcerated sores: use *Hu Po* topically with *Zhen Zhu* (Margarita), *Xue Jie* (Sanguis Draconis) and *Chi Shi Zhi* (Halloysitum Rubrum).

DOSAGE

1.5 to 3 grams in powder form. *Hu Po* is usually taken as powder or pills. It is not to be processed with fire and heat, as processing at high temperature decreases its effectiveness.

CAUTIONS / CONTRAINDICATIONS

- *Hu Po* is contraindicated for patients with yin-deficient heat and/or frequent urination.
- Use of this herb may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Diabietinolic acid, succinic acid, succoxyabietic acid, succinoabietinolic acid, succinosilvic acid, succinoresinol, succinoabietol, succinic acid, benzine, resin, essential oils, trace amounts of Mg, Ca, Fe, Al, Pb, Zn, Ni, Sn, Ti, Mn, Sr.[1,2]

PHARMACOLOGICAL EFFECTS

- **CNS suppressant:** Administration of *Hu Po* in mice reduced spontaneous movement and prolonged sleeping time induced by barbiturates.[3]

CLINICAL STUDIES AND RESEARCH

- **Scrotal hematoma:** Oral ingestion of 0.9 grams of powdered *Hu Po* twice daily (1.8 grams daily dose) for 8 to 10 days showed marked effectiveness in 3 patients with scrotal hematoma.[4]

HERB-DRUG INTERACTION

- **Sedatives:** *Hu Po* potentiates the sedative effect of barbiturates. [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.][5]

Section 2

— Nourishing Herbs that Calm the Shen (Spirit)

Suan Zao Ren (Semen Zizyphi Spinosae)

酸棗仁 酸枣仁

Pinyin Name: *Suan Zao Ren*
Literal Name: "sour date seed"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: zizyphus, spiny date seed
Botanical Name: *Ziziphus jujuba* Mill. var. *spinosa* (Bunge) Hu ex H.F. Chou (*Suan Zao*)
Pharmaceutical Name: Semen Zizyphi Spinosae
Properties: sweet, neutral
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the Heart and Calms the *Shen* (Spirit)

***Shen* disturbance due to Spleen and Heart deficiencies:** The Heart dominates blood and the Spleen produces blood. Insomnia or difficulty falling or staying asleep, palpitations, excessive dreaming, shallow sleep with a tendency to wake easily, fatigue, poor appetite, forgetfulness, and sallow complexion are all symptoms of a deficient Spleen not producing sufficient blood to nourish the Heart and *shen*.

- *Shen* disturbance due to Spleen and Heart deficiencies: use *Suan Zao Ren* with *Ren Shen* (Radix Ginseng), *Huang Qi* (Radix Astragali), *Dang Gui* (Radicis Angelicae Sinensis) and *Long Yan Rou* (Arillus Longan). **Exemplar Formula:** *Gui Pi Tang* (Restore the Spleen Decoction).

***Shen* disturbance due to Liver yin deficiency:** The Liver stores the blood necessary to nourish the *shen* of the Heart. When Liver yin is deficient, the patient may experience irritability, bad temper, insomnia, palpitations, dizziness, tinnitus and vertigo, night sweating, thirst, dry mouth and a wiry, thready pulse.

- *Shen* disturbance due to Liver yin deficiency: combine *Suan Zao Ren* with *Bai Shao* (Radix Paeoniae Alba), *Ye Jiao Teng* (Caulis Polygoni Multiflori), *Shi Jue Ming* (Concha Haliotidis), *Sheng Di Huang* (Radix Rehmanniae), *Fu Shen* (Poria Paradicis), *Mu Li* (Concha Ostreae) and *Long Chi* (Dens Draconis). **Exemplar Formula:** *Suan Zao Ren Tang* (Sour Jujube Decoction).

***Shen* disturbance due to Heart and Kidney deficiencies:** This condition is characterized by insomnia, palpitations, thirst with dry mouth and throat due to Kidney yin deficiency, with inability to nourish the Heart. Other symptoms may include nocturnal emissions in men, forgetfulness, dry stools, ulcers on the tongue, a red tongue with scanty coating, and a thready, rapid pulse.

- *Shen* disturbance due to Heart and Kidney deficiencies: use *Suan Zao Ren* with *Sheng Di Huang* (Radix Rehmanniae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Dang Gui* (Radicis Angelicae Sinensis) and

Suan Zao Ren (Semen Zizyphi Spinosae)

Bai Zi Ren (Semen Platycladi). **Exemplar Formula:** *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart).

Neurasthenia is often associated with blood deficiency and lack of nourishment to the *shen*.

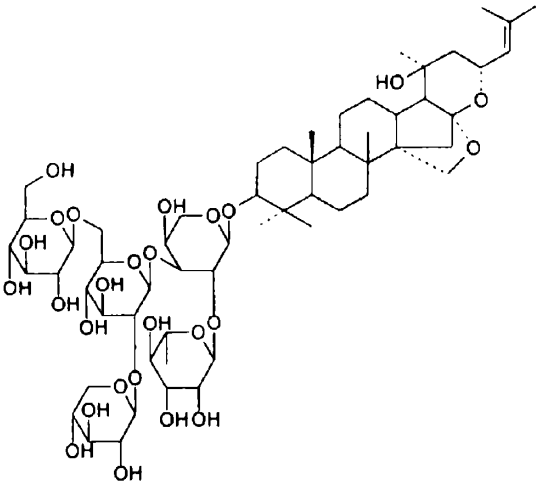
- Neurasthenia: use *Suan Zao Ren* alone as powder and ingest before bedtime.

2. Prevents Sweating

Spontaneous or night sweating due to qi deficiency or yin deficiency: *Suan Zao Ren* is used as symptomatic treatment to stop sweating.

- Spontaneous sweating: combine *Suan Zao Ren* with *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- Night sweating: use this herb with *Shan Zhu Yu* (Fructus Corni), *Mu Li* (Concha Ostreae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

DOSAGE



10 to 18 grams in decoction. The maximum dose for *Suan Zao Ren* is 30 grams. Crush before decocting to increase the surface area and enhance the extraction of active constituents. As a powder, take 1.5 to 3 grams before bedtime. Unprepared *Suan Zao Ren* is cooler and better for insomnia with heat signs. The dry-fried form is warmer, and better for Heart and Spleen deficiencies with palpitations, poor appetite and spontaneous sweating. The dry-fried form has a more potent effect to calm the *shen* and relieve insomnia. Dry frying is done by cooking the herb at a low temperature until the seeds turn dark in color, expand in size, or burst. The dry-fried herb should also be crushed prior to decoction. Once dry fried, it should be used as quickly as possible to prevent loss of efficacy.

CAUTIONS / CONTRAINDICATIONS

- *Suan Zao Ren* is contraindicated in patients with insomnia caused by excess heat or by hot phlegm accumulation.
- Use it with caution for patients who have diarrhea or an exterior condition.
- Use of this herb may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.
- *Suan Zao Ren* should be used with caution during pregnancy, as it stimulates contraction of the uterus.

CHEMICAL COMPOSITION

Jujuboside, betulin, betulinic acid, jujubogenin, ebetinlaetone, zivulgarin, spinosin, swertisin, ceanothic acid, alphitolic acid.[1,2]

Jujuboside A

PHARMACOLOGICAL EFFECTS

- **Sedative and hypnotic:** Administration of *Suan Zao Ren* is associated with a sedative and hypnotic effect in mice, rats, cats, rabbits, dogs, and guinea pigs. It reduces spontaneous activities in a dose-dependent fashion, prolongs sleeping time induced by barbiturates, reverses excitation caused by caffeine, and inhibits hyperactivity induced by morphine. Both fresh and fried forms of the herb have demonstrated sedative and hypnotic effects with no statistically-significant differences between the two. Jujuboside is considered by many to be the main component responsible for the sedative and hypnotic effects.[3]
- **Cardiovascular:** Decoction of *Suan Zao Ren* has negative chronotropic, positive inotropic and positive cardiotonic effects in frog heart specimens. Clinically, it treats arrhythmia caused by aconitine, chloroform, and barium chloride.[4,5]
- **Uterine stimulant:** Water extract of *Suan Zao Ren* has a stimulating effect on smooth muscle and causes contraction of the uterus.[6]
- **Analgesic:** Decoction of *Suan Zao Ren* at 5 g/kg has a marked analgesic effect in mice.[7]
- **Antipyretic:** A reduction in body temperature has been observed following oral ingestion of decoction of *Suan Zao Ren* at 40 g/kg in cats or 2.5 to 5.0 g/kg via intraperitoneal injection in rats.[8]

CLINICAL STUDIES AND RESEARCH

- **Insomnia:** According to one report, 30 patients with insomnia were treated with *Suan Zao Ren*, with significant improvement in 9 cases, moderate improvement in 19 cases, and no response in 2 cases. The treatment protocol was to incorporate *Suan Zao Ren* as ear seeds, applied to ear points such as *Shenmen*, Endocrine, Heart, Kidney, and Brain, using 1 to 2 points per treatment. Ear

Suan Zao Ren (Semen Zizyphi Spinosae)

seeds and points were changed every 5 days, with a total of 4 sessions per course of treatment. Prior to application, *Suan Zao Ren* was first soaked in hot water, then the skin was removed and the seeds split in halves. The flat side of the seed was placed on the ear. Patients were instructed to stimulate the ear points for 3 to 5 minutes prior to bedtime. [9]

In another study, patients with insomnia were allowed to drink 15 grams of green tea at 8:00 a.m., with no other stimulants throughout the day, and 10 grams of *Suan Zao Ren* powder at night. Out of 39 patients, complete recovery was reported in 34 patients within 3 to 10 days. Patients who had hypertension, increased heart rate, habitual constipation, or were pregnant, were treated with caution.[10]

- **Neurasthenia:** Administration of *Suan Zao Ren Tang* (Sour Jujube Decoction) showed satisfactory effects in treating 129 patients with neurasthenia characterized by insomnia, irritability, and fidgeting.[11]
- **Altitude stress:** In one clinical study, 76 people traveling to Tibet were divided into two groups, with one group receiving *Suan Zao Ren* and the other group receiving a placebo. All patients were instructed to take the herbs for 11 days, starting 3 days prior to departure, and continue for 3 days after arrival in Tibet. At the end of the study, it was concluded that the patients who received *Suan Zao Ren* experienced significantly less altitude sickness, including symptoms such as headache, dizziness, palpitations, nausea, dyspnea, and poor appetite. The incidence of vomiting was approximately the same between both groups.[12]

HERB-DRUG INTERACTION

- **Sedatives:** *Suan Zao Ren* has sedative and hypnotic effects. It potentiates the sedative effect of barbiturates, and reverses the stimulating effect of caffeine. Jujuboside is considered by many to be the main component responsible for the sedative and hypnotic effects.[13] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

Suan Zao Ren is a very safe herb. Up to 70 grams may be used in clinical application without toxic reactions. In animal toxicology studies, decoction of *Suan Zao Ren* at 150 g/kg did not show any toxicity. The LD_{50} for intraperitoneal injection of *Suan Zao Ren* is 14.3 g/kg in mice.[14]

AUTHORS' COMMENTS

Suan Zao Ren and *Bai Zi Ren* (Semen Platycladi) are both used for treating irritability, insomnia, anxiety and palpitations arising from deficient blood reserves failing to nourish the Heart. *Suan Zao Ren* is stronger to calm the *shen* (spirit) and also has an astringent action to stop spontaneous or night sweating. *Bai Zi Ren* is rich in oil and functions to lubricate the intestines.

Bai Zi Ren (Semen Platycladi)

柏子仁

Pinyin Name: *Bai Zi Ren*
Literal Name: "lateral cypress kernel," "oriental arborvitae seed"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: platycladus seed, biota seed, Chinese arborvitae seed, Oriental arborvitae seed
Botanical Name: *Platycladus orientalis* (L.) Franco; [also known as *Biota orientalis* (L.) Endl.]
Pharmaceutical Name: Semen Platycladi
Properties: sweet, neutral
Channels Entered: Heart, Kidney, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the Heart and Calms the *Shen* (Spirit)

Insomnia due to Heart blood deficiency: *Bai Zi Ren* (Semen Platycladi) is rich in oil and is best for blood-deficient insomnia with dry stools or constipation. It is most suitable for feelings of insecurity, insomnia, palpitations, night sweats, anxiety, and forgetfulness caused by excessive worrying damaging the Spleen and Heart.

- Insomnia, palpitations, dizziness and forgetfulness: combine *Bai Zi Ren* with *Ren Shen* (Radix Ginseng), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Fu Shen* (Poria Paradicis), *Suan Zao Ren* (Semen Zizyphi Spinosae) and *Dang Gui* (Radicis Angelicae Sinensis).

2. Moistens the Intestines and Unblocks the Bowels

Constipation or dry stools in elderly, anemic or postpartum patients, due to yin or blood deficiencies.

- Dry stools or constipation: combine *Bai Zi Ren* with *Tao Ren* (Semen Persicae), *Xing Ren* (Semen Armeniacae Amarum), *Dang Gui* (Radicis Angelicae Sinensis), *Huo Ma Ren* (Fructus Cannabis) and *Gua Lou Ren* (Semen Trichosanthis).

DOSAGE

10 to 18 grams. Crush *Bai Zi Ren* seeds before decocting, to facilitate the extraction of active constituents.

CAUTIONS / CONTRAINDICATIONS

- *Bai Zi Ren* should be used with caution for patients with loose stools or excess phlegm.

CHEMICAL COMPOSITION

Saponins, lipids, essential oils.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Bai Zi Ren* has mild effect to lubricate the bowel and relieve constipation.[2]

AUTHORS' COMMENTS

Bai Zi Ren and *Suan Zao Ren* (Semen Zizyphi Spinosae) are both used for treating irritability, insomnia, anxiety, palpitations, and other symptoms caused by inability of blood to nourish the Heart. The herbs differ in that *Bai Zi Ren* is rich in oil and functions to lubricate the intestines, while *Suan Zao Ren* is stronger to calm the *shen* and also has an astringent function to stop spontaneous or night sweating.

Yuan Zhi (Radix Polygalae)

遠志 远志

Pinyin Name: *Yuan Zhi*
Literal Name: "profound will," "long determination"
Alternate Chinese Names: *Yuan Zhi Tong, Yuan Zhi Rou, Guan Yuan Zhi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: polygala, thin-leaf milkwort root, Siberian milkwort root
Botanical Name: *Polygala tenuifolia* Willd. (*Yuan Zhi*), *Polygala sibirica* L. (*Ruan Ye Yuan Zhi*)
Pharmaceutical Name: Radix Polygalae
Properties: acrid, bitter, slightly warm
Channels Entered: Lung, Heart

CHINESE THERAPEUTIC ACTIONS

1. Pacifies the Heart and Calms the *Shen* (Spirit)

Disturbed *shen* with insomnia, Heart and Kidney deficiencies: *Yuan Zhi* (Radix Polygalae) strengthens Heart qi, and disperses stagnation in the Heart. It is mostly used for restlessness, palpitations, insomnia, or weakness of the Kidney and Heart that result in symptoms of nocturnal emissions, spermatorrhea and forgetfulness. Honey-fried *Yuan Zhi* more strongly nourishes the Heart and calms the *shen*.

- Insomnia, palpitations with anxiety, restlessness and disorientation, nocturnal emissions and spermatorrhea: combine *Yuan Zhi* with *Fu Shen* (Poria Paradicis), *Long Chi* (Dens Draconis) or *Zhu Sha* (Cinnabaris).
- Forgetfulness, memory loss or inability to concentrate: use this herb with *Ren Shen* (Radix Ginseng), *Fu Ling* (Poria), *Yin Guo Ye* (Folium Ginkgo) and *Shi Chang Pu* (Rhizoma Acori).
- Insomnia, excessive dreaming: use honey-fried *Yuan Zhi* as a single-herb remedy.

2. Expels Phlegm and Clears the Orifices

Phlegm obstructing the Heart and orifices, seizures: *Yuan Zhi* has an excellent ability to dispel phlegm in the Heart that manifests in mental or emotional disorientation, seizures, or hearing loss from phlegm blocking the orifices.

- Disorientation, seizures: combine it with *Shi Chang Pu* (Rhizoma Acori), *Yu Jin* (Radix Curcumae), *Tian Zhu Huang* (Concretio Silicea Bambusae) and *Dan Nan Xing* (Arisaema cum Bile).

3. Expels Phlegm from the Lung

Phlegm stagnation in the Lung: *Yuan Zhi* dispels phlegm in the Lung to treat cough with white sputum. Clinical applications include bronchitis, pneumonia and other respiratory disorders.

- Cough with white sputum arising from cold: add this herb to *Xing Ren* (Semen Armeniacae Amarum), *Jie Geng* (Radix Platycodonis) and *Gan Cao* (Radix Glycyrrhizae).

4. Reduces Abscesses and Dissipates Swellings

This herb is commonly used to treat boils, abscesses, sores, or swollen and painful breasts caused by phlegm obstructing the channels and collaterals. *Yuan Zhi* can be taken internally as powder with liquor, or made into a paste to be applied topically.

DOSAGE

3 to 9 grams. Fresh *Yuan Zhi* more strongly dispels phlegm and opens orifices, while honey-processed *Yuan Zhi* more effectively calms the *shen* (spirit) and tranquilizes the mind. However, fresh or unprocessed *Yuan Zhi* is sometimes irritating to the throat. This irritation can be eliminated by dry frying *Yuan Zhi*, or by boiling it with *Gan Cao* (Radix Glycyrrhizae) in hot water.

To enhance its effect to eliminate phlegm and stop coughing, the herb may be processed with honey.

CAUTIONS / CONTRAINDICATIONS

- Because *Yuan Zhi* is drying in nature, use it with caution in patients experiencing heat symptoms or hot phlegm.
- Use *Yuan Zhi* with caution in patients who have gastritis, peptic or duodenal ulcers. *Gan Cao* (Radix Glycyrrhizae) can be added to ease the irritating effect *Yuan Zhi* has on the stomach and to prevent nausea and vomiting.

Yuan Zhi (Radix Polygalae)

- *Yuan Zhi* should be used with caution during pregnancy, as it stimulates uterine contraction.

CHEMICAL COMPOSITION

Onjisaponin A, B, C, D, E, F, G; tenuigenin A, B; tenuifolin, presenegenin, tenuidine, polygalitol, xanthones, 3,4,5-trimethoxycinnamic acid, 6-hydroxy-1,2,3,7-tetramethoxyxanthone.[1]

PHARMACOLOGICAL EFFECTS

- **Expectorant:** *Yuan Zhi* has demonstrated a marked expectorant effect in mice and dogs. Its potency is similar to that of *Jie Geng* (Radix Platycodonis).[2]
- **CNS suppressant:** The root, bark and entire plant of *Polygala tenuifolia* have all demonstrated sedative effects in mice. It may also prevent seizures and convulsions.[3]
- **Diuretic:** A 50% alcohol extract of *Yuan Zhi* has demonstrated marked diuretic effects in treating edema.[4]
- **Antibiotic:** Water extract of *Yuan Zhi* has an inhibitory effect against *Diplococcus pneumoniae.* Alcohol extract has an inhibitory effect against *Bacillus dysenteriae, Salmonella typhi,* and *Mycobacterium tuberculosis hominis.*[5]
- **Uterine stimulant:** Administration of both water and alcohol extracts of *Yuan Zhi* has a stimulating effect on the uterus in both pregnant and non-pregnant laboratory animals such as rabbits, cats, and dogs.[6]

CLINICAL STUDIES AND RESEARCH

- **Acute mastitis:** In one study, 62 patients with acute mastitis were treated with satisfactory results using *Yuan Zhi.* The herbal decoction was prepared by soaking 12 grams of the herb in 15 ml of grain-based liquor, then cooking it with a bowl of water for 15 to 20 minutes. In another study, patients with acute mastitis were treated with topical applications of an herbal paste. The paste was prepared by cooking 500 grams of *Yuan Zhi* in 1,500 ml of water for 5 to 6 hours to yield a paste-like preparation. It is most effective during early-stage acute mastitis without pus formation.[7,8]
- **Trichomonal vaginitis:** According to one report, 36 out of 37 patients with trichomonal vaginitis reported complete recovery following herbal treatment with vaginal suppository. The herbal suppository contained 1 part *Yuan Zhi,* 2 parts *Bu Gu Zhi* (Fructus Psoraleae) and 2 parts *Da Huang* (Radix et Rhizoma Rhei).[9]

HERB-DRUG INTERACTION

- **Ethanol:** In an *in vitro* study, a traditional Chinese medicinal preparation (composed of *Yuan Zhi, Ren Shen* (Radix Ginseng), *Shi Chang Pu* (Rhizoma Acori) and *Fu Ling* (Poria)) reduced the ethanol-induced impairment of memory registration. It also ameliorated the scopolamine-induced memory registration deficit. These results suggest that the herbal preparation ameliorates the impairment effect of ethanol on learning and memory processes.[10]
- **Diuretics:** *Yuan Zhi* has a diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[11] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

AUTHORS' COMMENTS

Yuan Zhi and *Shi Chang Pu* (Rhizoma Acori) both dissolve phlegm, open the orifices, and calm the *shen.* They both treat delirium, mania, stupor, insomnia, forgetfulness or restless *shen* caused by the accumulation of turbid phlegm in the Heart. *Yuan Zhi* is mainly used to dissolve phlegm and stop coughing. It is used for patients with cough and profuse sputum that is difficult to expectorate. *Yuan Zhi* also disperses nodules or abscesses and relieves pain. *Shi Chang Pu* dissolves dampness and is stronger in harmonizing the Stomach to treat feelings of congestion or pain in the chest and abdomen.

He Huan Pí (Cortex Albiziae)

合歡皮 合欢皮

Pinyin Name: *He Huan Pi*
Literal Name: "collective happiness bark"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: albizia bark, silk tree albizia bark
Botanical Name: *Albizia julibrissin* Durazz. (*He Huan*); *Albizia kalkora* (Roxb) (*Shan He Huan*)
Pharmaceutical Name: Cortex Albiziae
Properties: sweet, neutral
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Calms the *Shen* (Spirit) and Relieves Constraint

Emotional constraint due to Liver qi stagnation: *He Huan Pi* (Cortex Albiziae) treats short temper, depression, insomnia, irritability, pre-menstrual syndrome and forgetfulness. *He Huan Pi* is mild and is usually used as an adjunct to other tranquilizing herbs.

- Emotional disturbance: combine *He Huan Pi* with *Suan Zao Ren* (Semen Zizyphi Spinosae), *Bai Zi Ren* (Semen Platycladi), *Long Chi* (Dens Draconis) and *Hu Po* (Succinum).

2. Invigorates the Blood and Reduces Swelling

Pain and swelling due to traumatic injury, including bone fractures: *He Huan Pi* invigorates blood circulation, reduces swelling, promotes generation of flesh, and facilitates healing of bone fractures. It is one of the most important herbs for treatment of external trauma and injuries.

- Pain and swelling: combine *He Huan Pi* with *Dang Gui* (Radicis Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubrae), *Tao Ren* (Semen Persicae) and *Su Mu* (Lignum Sappan).

He Huan Pi is also effective to treat vomiting of sputum and blood.

- Lung abscesses with chest pain and coughing of sputum and blood: use this herb with *Yu Xing Cao* (Herba Houttuyniae), *Dong Gua Zi* (Semen Benincasae), *Tao Ren* (Semen Persicae) and *Lu Gen* (Rhizoma Phragmitis).
- Abscess and swellings: use *He Huan Pi* with *Pu Gong Ying* (Herba Taraxaci Mongolici cum Radice), *Zi Hua Di Ding* (Herba Violae) and *Ye Ju Hua* (Flos Chrysanthemi Indici).

DOSAGE

10 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- *He Huan Pi* should be used with caution during pregnancy, as it stimulates contraction of the uterus.

CHEMICAL COMPOSITION

Albitocin, β-sitosterol, α-amyrin, 3,4,7-trihydroxyflavone, α-spinasterylglucoside, machaerinic acid lactone, machaerinic acid, methyl ester, acacic acid lactone.[1]

PHARMACOLOGICAL EFFECTS

- **CNS suppressant:** *He Huan Pi* has sedative and hypnotic actions. Administration of *He Huan Pi* in mice is associated with a reduction of spontaneous movement.[2]
- **Uterine stimulant:** It has a stimulating effect on smooth muscle and causes contraction of the uterus.[3]

TOXICOLOGY

Gross overdose of albitocin is linked with fatality in mice between 12 hours and 7 days following ingestion. The exact reason of fatality is unknown, but is attributed to necrosis of liver and kidney cells.[4]

SUPPLEMENT

- 合歡花 / 合欢花 *He Huan Hua* (Flos Albiziae), first cited in *Ben Cao Yan Yi* (Extension of the Materia Medica) by Kou Zong-Shi in 1116, is derived from the flower of the same plant as *He Huan Pi*. It is also known as *Ye He Hua* or *Ye He Mi*. It calms the *shen*, relieves Liver constraint, regulates qi and harmonizes the Stomach. *He Huan Hua* is primarily used for chest and epigastric fullness and

pain with irritability, restlessness, forgetfulness and insomnia from deficiency. Its effect is mild, thus, it should be used with other herbs for maximum effectiveness.

AUTHORS' COMMENTS

He Huan Hua (Flos Albiziae), *Ye Jiao Teng* (Caulis Polygoni Multiflori) and *Bai Zi Ren* (Semen Platycladi) all treat insomnia. *He Huan Hua* is best for insomnia due to Liver qi stagnation. *Ye Jiao Teng* is for insomnia due to general blood deficiency and *Bai Zi Ren* is for insomnia due to Heart deficiency.

Ye Jiao Teng (Caulis Polygoni Multiflori)

夜交藤　夜交藤

Pinyin Name: *Ye Jiao Teng*
Literal Name: "vine of the night," "vine to pass through the night"
Alternate Chinese Names: *Jiao Teng, Shou Wu Teng*
English Name: polygonum vine
Botanical Name: *Polygonum multiflorum* Thunb.
Pharmaceutical Name: Caulis Polygoni Multiflori
Properties: sweet, slightly bitter, neutral
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the Heart and Calms the *Shen* (Spirit)

Heart blood deficiency: *Ye Jiao Teng* (Caulis Polygoni Multiflori) treats the lack of nourishment to the Heart that causes sleep disorders such as insomnia, difficulty falling asleep or staying asleep, and excessive dreams.

- Insomnia: use *Ye Jiao Teng* with *Suan Zao Ren* (Semen Zizyphi Spinosae), *He Huan Hua* (Flos Albiziae), and *Bai Zi Ren* (Semen Platycladi).

2. Opens the Channels and Collaterals and Dispels Wind

- Soreness and pain in the limbs from blood deficiency: add this herb to *Ren Dong Teng* (Caulis Lonicerae) and *Wu Jia Pi* (Cortex Acanthopanacis).
- Eczema, rash and itching of the skin: use 15 to 30 grams of *Ye Jiao Teng* externally as a wash.
- *Bi zheng* (painful obstruction syndrome) due to yin or blood deficiencies: add this herb to *Wei Ling Xian* (Radix Clematidis), *Du Huo* (Radix Angelicae Pubescentis), and *Qiang Huo* (Rhizoma et Radix Notopterygii).

DOSAGE

15 to 30 grams in decoction. *Ye Jiao Teng* is also used as an external herbal paste, to relieve itching.

CHEMICAL COMPOSITION

Emodin, physcion, β-sitosterol, emodin-8-O-β-D-monoglucoside.[1]

Ye Jiao Teng (Caulis Polygoni Multiflori)

AUTHORS' COMMENTS

Ye Jiao Teng, He Huan Hua (Flos Albiziae) and *Bai Zi Ren* (Semen Platycladi) all treat insomnia. The difference is that *Ye Jiao Teng* corrects insomnia due to general blood deficiency, *He Huan Hua* is best for insomnia caused by Liver qi stagnation, and *Bai Zi Ren* addresses insomnia from Heart deficiency.

Ling Zhi (Ganoderma)

靈芝 灵芝

Pinyin Name: *Ling Zhi*
Literal Name: "spiritual mushroom"
Alternate Chinese Names: *Mu Ling Zhi, Zi Ling Zhi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ganoderma, lucid ganoderma, reishi mushroom
Botanical Name: *Ganoderma lucidum* (Leyss. Ex. Fr.) Karst. (*Chi Zhi*); *Ganoderma japonicum* (Fr.) Lloyd. (*Zi Zhi*)
Pharmaceutical Name: Ganoderma
Properties: sweet, neutral
Channels Entered: Heart, Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the Heart and Calms the *Shen* (Spirit)

Restless *shen*: *Ling Zhi* (Ganoderma) nourishes the Heart and strengthens qi and blood to treat Heart and Spleen deficiencies that manifest in insomnia, forgetfulness, fatigue, listlessness and poor appetite.

- Insomnia: combine *Ling Zhi* with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Suan Zao Ren* (Semen Zizyphi Spinosae) and *Long Yan Rou* (Arillus Longan).

2. Stops Coughing and Arrests Wheezing

Cough and asthma: *Ling Zhi* dispels phlegm, stops cough and arrests wheezing. Symptoms include coughing caused by cold, coughing with profuse sputum, accelerated respiration, chronic asthma and difficulty sleeping due to dyspnea.

- Asthma and coughing: add it to *Dang Shen* (Radix Codonopsis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Gan Jiang* (Rhizoma Zingiberis) and *Ban Xia* (Rhizoma Pinelliae).

3. Tonifies Qi and Nourishes Blood

Qi and blood deficiencies, weak digestion: *Ling Zhi* has traditionally been used to strengthen the body and tonify qi. It treats qi and blood deficiencies with weak digestion, poor appetite, listlessness, loose stools, fatigue, dizziness and soreness of the lower back.

- Qi and blood deficiencies: use *Ling Zhi* alone.

DOSAGE

3 to 15 grams in decoction, 1.5 to 3 grams in powder.

CHEMICAL COMPOSITION

Ganoderic acid, lucidenic acid, ganoderma acid, ganodosterone oleic acid.[1]

Ling Zhi (Ganoderma)

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** *Ling Zhi* has been shown to have antineoplastic activity due to its immune-enhancing properties. The specific effects of *Ling Zhi* include an increase in monocytes, macrophages and T-lymphocytes. In addition, there is also an increased production of cytokine, interleukin, tumor-necrosis-factor and interferon.[2]
- **Cardiovascular:** *Ling Zhi* has been shown to increase cardiac contractility, lower blood pressure, and increase resistance to hypoxia in the cardiac muscles.
- **Antibiotic:** *Ling Zhi* has a broad spectrum of antibacterial activity, and inhibits the growth of *E. coli, B. dysenteriae, Pseudomonas* spp., pneumococci, streptococci (type A), staphylococci, and others.[3]
- **Others:** *Ling Zhi* exerts hepatoprotective, antidiabetic, antitussive, expectorant, sedative, analgesic, and antiasthmatic effects.

CLINICAL STUDIES AND RESEARCH

- **Neurasthenia:** Administration of *Ling Zhi* (3 grams three times daily for 10 to 60 days) showed 83.5 to 86.3% effectiveness in treating 225 patients with neurasthenia. The therapeutic effects of *Ling Zhi* include sedation, hypnosis, regulation of the nervous system, and enhancement of the immune system.[4]
- **Hyperlipidemia:** In one study, 120 patients with high cholesterol levels were treated with 4 to 6 ml of *Ling Zhi* syrup two to three times daily for 1 to 3 months with 86% rate of effectiveness.[5]
- **Leukopenia:** Administration of *Ganoderma japonicum* was associated with a rise in leukocyte counts in 72.57% of 175 patients with leukopenia.[6]
- **Chronic hepatic diseases:** In one study, 367 patients with chronic hepatic diseases, such as chronic hepatitis, and chronic infectious hepatitis, and liver cirrhosis, were treated with *Ling Zhi* extract as tea, with good results. Most patients reported subjective symptomatic improvement. In addition, the study reported a reduction in liver enzymes in 67.7% of patients.[7]
- **Dermatological disorders:** Concurrent administration of *Ling Zhi* via intramuscular injection and oral tablets was 79.1% effective in treating 173 patients with scleroderma, 95% effective in 40 patients with dermatomyositis, 90% effective in 84 patients with lupus erythematosus, and 78.88% effective in 232 patients with alopecia areata.[8]
- **Frostbite:** According to one report, 428 patients with frostbite were treated with *Ling Zhi* topically with a 89.5% rate of effectiveness after 3 or 4 days.[9]

AUTHORS' COMMENTS

Because wild-crafted *Ling Zhi* is rare and difficult to collect, the cultivated mushroom is generally used commercially.

Ling Zhi has recently been used to treat angina pectoris, hepatitis, high cholesterol, hypertension and leukopenia.

Xie Cao (Radix et Rhizoma Valerianae)

缬草 缬草

Pinyin Name: *Xie Cao*
Alternate Chinese Names: *Guang Ye Ba Di Ma, Jie Cao*
English Name: valerian root, valerian
Botanical Name: *Valeriana officinalis; Valeriana fauriei* Briquet
Pharmaceutical Name: Radix et Rhizoma Valerianae
Properties: bitter, sweet, neutral
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Tranquilizes the *Shen* (Spirit)

***Shen* disturbance:** Clinical applications of *Xie Cao* (Radix et Rhizoma Valerianae) include insomnia, emotional stress and excessive worrying.

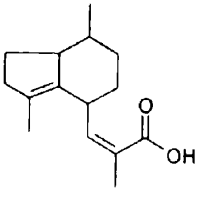
- Neurasthenia: use *Xie Cao* with *Wu Wei Zi* (Fructus Schisandrae Chinensis) in decoction or as herbal tincture.

2. Relieves Spasms and Pain

Liver qi stagnation: Clinical manifestations include muscle tightness and spasms, stomach cramps, dysmenorrhea and pre-menstrual syndrome.

- Muscle aches and pains: use this herb with *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE



2 to 5 grams.

CAUTIONS / CONTRAINDICATIONS

Use of *Xie Cao* may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Essential oils 0.5-2.0% (bornyl isovalerate, borneol, l-camphene, α-pinene, d-terpineol, l-limonene); flavonoids (quercetin, diosmelin, acacetin, apigenie); alkaloids (β-valerine, chatinine, alkaloid A, B, actinidine, valeriamine); terpenoids (valepotriate, isovaleroxy-hydroxy-dihydrovaltrate, valechlorine, 7-epideacetyl-isovaltrate, valeridine, valerosidatum, acevaltrate); and organic acids (valerenic acid, valerenolic acid, behenic acid, hesperitinic acid, β-bisabolene, curcurmene, ledol, maaliol).[1,2]

Valerenic acid

PHARMACOLOGICAL EFFECTS

- **Sedative:** Essential oil of *Xie Cao* administered orally at 2 ml/kg effectively prolonged the sleeping time induced by barbiturates.[3]
- **Antispasmodic and analgesic:** Administration of *Xie Cao* is associated with an antispasmodic effect, and valerenic acid is associated with an analgesic effect.[4,5]
- **Cardiovascular:** Administration of *Xie Cao* is associated with a decrease in blood pressure, dilation of blood vessels, and increased blood perfusion to the cardiac muscle. Following studies on dogs, cats, and rabbits, it was proposed that the antihypertensive effect of *Xie Cao* is due in part to its inhibitory effect on the sympathetic nervous system. It was also noted that following injection of a *Xie Cao* preparation, there is an immediate and prolonged dilation of blood vessels, which, in turn, significantly increases blood perfusion to peripheral parts of the body. Specifically for the heart, there is a 5.7 time increase in blood perfusion to the cardiac muscles. Lastly, intravenous injection of *Xie Cao* has a preventative effect against arrhythmia induced by adrenalin, aconitine and other chemicals.[6,7,8]

CLINICAL STUDIES AND RESEARCH

- **Insomnia:** In a randomized, placebo-controlled, multi-center study, 121 patients were divided into either an

Xie Cao (Radix et Rhizoma Valerianae)

herb group or a placebo group. Both groups received pills one hour before bedtime for 28 consecutive days. The subjects in the herb group received 600 mg of 70% alcohol extract of *Xie Cao* standardized to 0.4 to 0.6% valerenic acid. At the end of the trial, the study reported good or very good results in 66% of subjects in the herb group, compared to only 29% in the placebo group.[9]

HERB-DRUG INTERACTION

- **Sedatives:** *Xie Cao* potentiates the sedative effect of barbiturates.[10] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

The LD_{50} for essential oil of *Xie Cao* in mice is 2,950 mg/kg for intravenous injection, 4,760 mg/kg via intraperitoneal injection, and 7.14 ml/kg via oral administration.[11]

Xiao Mai (Fructus Tritici)

小麥 小麦

Pinyin Name: *Xiao Mai*
Literal Name: "little wheat"
Alternate Chinese Names: *Huai Xiao Mai, Jing Xiao Mai*
English Name: wheat
Botanical Name: *Triticum aestivum* L. (*Xiao Mai*)
Pharmaceutical Name: Fructus Tritici
Properties: sweet, cool
Channels Entered: Heart

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the Heart and Relieves Irritability

***Zang zao* (dry organ) disorder:** *Xiao Mai* (Fructus Tritici) treats patients who suffer from *zang zao* disorder with symptoms such as excessive worrying, anxiety, pensiveness, disorientation, frequent melancholy and crying spells, dream-disturbed sleep and depression. The cause of this disorder is Liver qi stagnation along with qi and blood deficiencies.

- *Zang zao* disorder: use *Xiao Mai* with *Da Zao* (Fructus Jujubae) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction).
- Severe emotional disturbance: combine this herb with *Chai*

Xiao Mai (Fructus Tritici)

Hu (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi), *Bai Shao* (Radix Paeoniae Alba), *Yuan Zhi* (Radix Polygalae), *Fu Shen* (Poria Paradicis), *Zhen Zhu Mu* (Concha Margaritaferae) and *Long Chi* (Dens Draconis). **Exemplar Formula:** *Chai Hu Jia Long Mu Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction).

2. Promotes Urination

Dysuria: *Xiao Mai* treats difficult, painful urination due to heat accumulation in the Urinary Bladder.

- Dysuria: use *Xiao Mai* with *Tong Cao* (Medulla Tetrapanacis) and *Che Qian Cao* (Herba Plantaginis).

DOSAGE

15 to 30 grams in decoction.

CHEMICAL COMPOSITION

Starch, proteins, carbohydrates, lipids, fiber, enzymes, vitamins.[1]

AUTHORS' COMMENTS

Xiao Mai (Fructus Tritici) and *Fu Xiao Mai* (Semen Tritici Aestivi Levis) are derived from the same plant, but have different characteristics and functions. When *Xiao Mai* and *Fu Xiao Mai* are both placed in water, *Xiao Mai* sinks and *Fu Xiao Mai* floats. *Xiao Mai* can nourish the Heart and calm *shen* (spirit), while *Fu Xiao Mai* has astringent functions to stop sweating.

Chapter 14 summary

— Shen-Calming Herbs

SECTION 1: SEDATIVE HERBS THAT CALM THE *SHEN* (SPIRIT)

Name	Similarities	Differences
Zhu Sha (Cinnabaris)	Sedate the Heart, calm the *shen*	Treats sores and abscesses when used externally, toxic when taken internally
Ci Shi (Magnetitum)		Anchors Liver yang, stops wheezing
Long Gu (Os Draconis)		Anchors Liver yang, prevents leakage of fluids
Hu Po (Succinum)		Treats seizures and convulsions due to hot phlegm obstructing the Heart, activates blood circulation, treats dysuria

General Characteristics of Sedative Herbs that Calm the *Shen* (Spirit):

Taste: sweet
Thermal property: neutral, cold
Channels entered: Heart, Liver
Therapeutic actions: sedate the Heart, calm the *shen*

These are usually mineral or shell substances that anchor the *shen* of the Heart, relieving insomnia, palpitations, anger, irritability, restlessness, and in severe cases, mania and epilepsy.

Zhu Sha (Cinnabaris), ***Ci Shi*** (Magnetitum), ***Long Gu*** (Os Draconis) and ***Hu Po*** (Succinum) all tranquilize the *shen*.

Zhu Sha clears Heart fire disturbing the *shen*. It is rarely used today because of its toxicity.

Ci Shi clears rising yang secondary to yin deficiency.

Long Gu anchors Liver yang to calm the *shen*. It has astringent effects to stop leakage of body fluids, such as spontaneous sweating, night sweating, leukorrhea, and chronic dysentery.

Hu Po dispels hot phlegm to calm the *shen*. It also invigorates blood circulation, disperses stasis, promotes urination, and treats *lin zheng* (dysuria syndrome).

SECTION 2: NOURISHING HERBS THAT CALM THE *SHEN* (SPIRIT)

Name	Similarities	Differences
Suan Zao Ren (Semen Zizyphi Spinosae)	Nourish the Heart, calm the *shen*	Nourishes Spleen, Liver, and Kidney to calm deficiency-type *shen* disturbances, stops perspiration
Bai Zi Ren (Semen Platycladi)		Eases excessive worrying that has caused Heart blood deficiency, relieves constipation
Yuan Zhi (Radix Polygalae)		Eliminates phlegm obstructing the Heart
He Huan Pi (Cortex Albiziae)		Soothes Liver qi stagnation, activates blood circulation and reduces swelling
Ye Jiao Teng (Caulis Polygoni Multiflori)		Opens channels and collaterals, dispels wind
Ling Zhi (Ganoderma)		Arrests cough, tonifies qi and blood
Xie Cao (Radix et Rhizoma Valerianae)		Soothes Liver to relieve spasms and pain
Xiao Mai (Fructus Tritici)		Relieves irritability, promotes urination

Chapter 14 summary

General Characteristics of Nourishing Herbs that Calm the *Shen* (Spirit):

Taste: sweet
Thermal property: neutral
Channels entered: Heart, Spleen, Liver
Therapeutic actions: nourish the Heart, calm the *shen*

Nourishing herbs that calm the *shen* are plant substances used for *shen*-disturbance characterized by deficiency, with such signs and symptoms as palpitations, insomnia, excessive dreaming and memory loss.

Suan Zao Ren (Semen Zizyphi Spinosae) and ***Bai Zi Ren*** (Semen Platycladi) are the most frequently used herbs in this category.

Suan Zao Ren tonifies the Liver, tranquilizes the *shen* and is essential in treatment of insomnia caused by deficiency heat.

Bai Zi Ren nourishes the Heart and calms the *shen* and is used for insomnia and palpitations from blood deficiency. It also lubricates the Large Intestine and treats dry stools or constipation.

Yuan Zhi (Radix Polygalae) tranquilizes the Heart, dispels phlegm and reduces abscesses. It disperses phlegm that is misting the Heart, thus relieves palpitations, insomnia and manic behaviors. *Yuan Zhi* treats insomnia and excessive dreaming arising from disharmony between the Heart and Kidney.

He Huan Pi (Cortex Albiziae) and ***Ye Jiao Teng*** (Caulis Polygoni Multiflori) tranquilize the *shen* and relieve insomnia.

He Huan Pi is best for insomnia caused by Liver qi stagnation.

Ye Jiao Teng corrects insomnia due to general blood deficiency.

Ling Zhi (Ganoderma) calms the *shen* and nourishes and strengthens the constitution. It also stops coughing.

Xie Cao (Radix et Rhizoma Valerianae) has excellent effects to calm the *shen* and relieve Liver qi stagnation.

Xiao Mai (Fructus Tritici) nourishes the Heart, relieves irritability, promotes normal urination, and treats *zang zao* (dry organ) disorder caused by Heart yin deficiency.

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH *SHEN*-CALMING FUNCTIONS

Name	Functional Category
Bai He (Bulbus Lilii)	Tonic Herbs (Chapter 17)
Da Zao (Fructus Jujubae)	Tonic Herbs (Chapter 17)

Chapter 15

— Liver-Calming and Wind-Extinguishing Herbs

Definition: Substances said to calm Liver wind and sedate Liver yang address a complex range of disorders involving the need to regulate or sedate mild-to-severe spontaneous movement or seizures, heat and mood disturbances, and problems in the head, face and eyes.

Gou Teng (Ramulus Uncariae Uncis)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

Wind disorders may attack via both exterior and interior routes. As discussed in chapter 1, **external** wind is dispelled by herbs that release the exterior. **Internal** wind, though, must be addressed by incorporating substances that calm the Liver and extinguish pathogenic wind.

SUBCATEGORIES OF ACTION

Substances that calm Liver wind and sedate Liver yang are not generally divided into subcategories, although,

- some *calm Liver wind*,
- some *sedate Liver yang*, and
- some *purge Liver fire.*

Most of these herbs are cool to cold in temperature, and enter the Liver channel. Many substances in this section are animal medicinals.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Liver disorders may arise from either deficient or excess conditions.

- ***Deficiency conditions*** develop from Liver yin deficiency.
- ***Excess conditions*** involve the presence of Liver wind, Liver yang rising, or Liver fire. All three excess conditions have the same origin, but have different presentations and implications.

Differential Diagnosis of Liver Excess

Diagnosis	Characteristics	Symptoms
Liver wind	movement, mobile in nature	dizziness, vertigo, headache, seizures, tremors, convulsions, sudden unconsciousness, deviation of the eyes and mouth, and hemiplegia
Liver yang	internal heat surging upwards	dizziness, vertigo, restlessness, irritability, anger, insomnia, and excessive dreaming
Liver fire	internal fire surging upwards	pain, redness and swelling of the eyes, and numerous other eye disorders

Optimal treatment depends heavily on correct differential diagnosis and treatment. Liver-based disorders may be primarily deficient, primarily excess, or a combination of both. Dysfunction arising from *Liver yin deficiency* requires treatment with yin-tonifying herbs (see Chapter 17 for herbs appropriate for treatment of Liver yin deficiency). Patients with excess conditions, such as *Liver wind, Liver yang rising* or *Liver fire*, must be treated, respectively, with herbs that calm Liver wind, sedate Liver yang, and purge Liver fire. If complications include phlegm, herbs that dissolve and dispel phlegm must be prescribed. If there are excessive dreams and emotional disturbance, herbs that calm the *shen* (spirit) must be included.

Chapter 15 – Liver-Calming and Wind-Extinguishing Herbs

CAUTIONS/CONTRAINDICATIONS

Herbs that are *cold* should be used with caution in cases of deficiency and cold of the Spleen and Stomach. Herbs that are *hot* should be used with caution in cases of yin or blood deficiency.

PROCESSING

Where indicated, requirements for pre-processing individual herbs should be followed carefully.

PHARMACOLOGICAL EFFECTS

For effective treatment, one must distinguish between external wind and internal wind.

- **Antiseizure and antiepileptic**: Many of these herbs are excellent for prevention and treatment of seizures and epilepsy. In clinical studies, single-herb treatment has been less than satisfactory. Combination therapy is needed in most cases to effectively control seizures and epilepsy. In animal studies, many herbs exert an inhibitory influence on the central nervous system to decrease spontaneous physical activity, prolong sleeping time induced by barbiturates, and prevent drug-induced seizures. Examples of herbs with antiseizure and antiepileptic actions include *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Ling Yang Jiao* (Cornu Saigae Tataricae), *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra), *Di Long* (Pheretima), and *Bai Jiang Cao* (Herba cum Radice Patriniae).
- **Antihypertensive**: Liver-calming and wind-extinguishing herbs can have moderate and sustained influence to lower blood pressure, as demonstrated by *Gou Teng* (Ramulus Uncariae cum Uncis), *Di Long* (Pheretima), *Ling Yang Jiao* (Cornu Saigae Tataricae), *Jue Ming Zi* (Semen Cassiae) and *Tian Ma* (Rhizoma Gastrodiae). In addition, many of them effectively treat hypertension-related symptoms. For example, *Tian Ma* (Rhizoma Gastrodiae) and *Jue Ming Zi* (Semen Cassiae) relieve the headache and dizziness that often accompany hypertension.
- **Antipyretic**: Some herbs, including *Ling Yang Jiao* (Cornu Saigae Tataricae), and *Di Long* (Pheretima), lower body temperature in animals with artificially-induced fevers.
- **Analgesic**: There are strong pain relievers in this category, including *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Ling Yang Jiao* (Cornu Saigae Tataricae), and *Jiang Can* (Bombyx Batryticatus).

POTENTIAL HERB-DRUG INTERACTIONS

- **Sedatives**: Herbs with antiseizure and antiepileptic action may induce drowsiness, and should be used with caution by patients concurrently taking drugs that also have sedative properties, such as alcohol, benzodiazepines, opioid analgesics, and barbiturates.
- **Antihypertensives**: Herbs with antihypertensive action may lower blood pressure. To avoid inducing hypotension, they should not be used aggressively by patients already taking antihypertensive medications.

Ling Yang Jiao (Cornu Saigae Tataricae)

羚羊角 羚羊角

Pinyin Name: *Ling Yang Jiao*
Literal Name: "antelope horn"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: antelope horn
Zoological Name: *Saiga tatarica* L. (*Ling Yang*)
Pharmaceutical Name: Cornu Saigae Tataricae
Properties: salty, cold
Channels Entered: Liver, Heart

CHINESE THERAPEUTIC ACTIONS

1. Calms the Liver and Extinguishes Wind

Liver wind: Clinical manifestations of this condition include convulsions in adults and children, spasms, tremors, epilepsy and seizures. *Ling Yang Jiao* (Cornu Saigae Tataricae) clears heat and extinguishes wind simultaneously. It is most suitable for patients who suffer from Liver wind disorders that have arisen with or following high fever caused by Liver yang rising.

- Dizziness, vertigo: incorporate *Ling Yang Jiao* with *Sheng Di Huang* (Radix Rehmanniae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Bai Shao* (Radix Paeoniae Alba) and *Ju Hua* (Flos Chrysanthemi).
- Epilepsy: use this substance with *Fang Feng* (Radix Saposhnikoviae), *Du Huo* (Radix Angelicae Pubescentis) and *Fu Shen* (Poria Paradicis).
- Epilepsy, palpitations and fear: combine it with *Gou Teng* (Ramulus Uncariae cum Uncis), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Yu Jin* (Radix Curcumae) and *Zhu Sha* (Cinnabaris).

2. Calms the Liver and Anchors Liver Yang

Rising Liver yang: Hypertension, red eyes, dizziness, vertigo, irritability, insomnia, a bitter taste in the mouth, short temper, nightmares, and sensations of burning and pain in the hypochondrium, are all symptoms associated with Liver yang rising.

- Hypertension and associated symptoms: use *Ling Yang Jiao* with *Shi Jue Ming* (Concha Haliotidis), *Ju Hua* (Flos Chrysanthemi) and *Huang Qin* (Radix Scutellariae).

3. Clears the Liver and Brightens the Eyes

Eye disorders caused by Liver fire: Red, swollen and painful eyes, headache, photophobia, feelings of pressure and pain in the eyeballs, and blurred vision. The Liver is said to open to the eyes; thus heat rising in the Liver channel results in eye disorders.

- Eye disorders: add *Ling Yang Jiao* to *Jue Ming Zi* (Semen Cassiae), *Long Dan Cao* (Radix Gentianae), *Ju Hua* (Flos Chrysanthemi) and *Huang Qin* (Radix Scutellariae).

4. Clears Heat and Eliminates Toxins

Febrile disorders or heat in the Pericardium: *Ling Yang Jiao* treats high fever, dizziness, delirium, manic behavior, tremors and loss of consciousness.

- High fever, delirium, convulsions: combine this substance with *Shi Gao* (Gypsum Fibrosum), *Han Shui Shi* (Mirabilite), and *She Xiang* (Moschus).
- High fever, delirium and subcutaneous bleeding: use it with *Bai Hu Tang* (White Tiger Decoction).
- End stage of exanthema variolosum with residual toxic heat: add *Ling Yang Jiao* to *Huang Qi* (Radix Astragali) and *Jin Yin Hua* (Flos Lonicerae).

DOSAGE

The dosage of *Ling Yang Jiao* is 1 to 3 grams in decoction, and 0.3 to 0.5 gram when taken in powder or pill form. For decoction, *Ling Yang Jiao* is cooked separately from the rest of the ingredients, then combined with the separate decoction, before ingestion.

CAUTIONS / CONTRAINDICATIONS

- *Ling Yang Jiao* is contraindicated in patients with Spleen deficiency.

CHEMICAL COMPOSITION

Calcium phosphate, protein, cholesterol, keratin.[1]

Líng Yáng Jiáo (Cornu Saigae Tataricae)

PHARMACOLOGICAL EFFECTS

- **Sedative:** Both oral and intraperitoneal administration of *Ling Yang Jiao* decreased spontaneous physical activities and increased drug-induced sleeping time in mice.[2]
- **Antiseizure:** Administration of *Ling Yang Jiao* in mice had a marked preventative effect against morphine- and caffeine-induced seizures, but was not effective against strychnine-induced seizures.[3]
- **Antipyretic:** Both oral and injectable administration of *Ling Yang Jiao* have demonstrated marked antipyretic action. In rabbits with artificially-induced fever, oral administration at 4 g/kg lowered temperatures within the first two hours; normal temperatures were observed after 6 hours.[4]
- **Cardiovascular:** Intravenous injection of a 50% *Ling Yang Jiao* solution at 2 ml/kg in anesthetized cats significantly lowered blood pressure.[5]

CLINICAL STUDIES AND RESEARCH

- **Fever:** Patients with fevers of various etiologies were treated with intramuscular injection of *Ling Yang Jiao* two to three times daily. Out of 100 patients, there was significant reduction of temperature in 41 cases, moderate reduction in 45 cases, and no change in 14 patients. The rate of effectiveness was 86%.[6]

TOXICOLOGY

No abnormalities were observed following an intravenous bolus dose of 4% *Ling Yang Jiao* preparation at 8 ml/kg (equivalent to 100 times the therapeutic dose in human) in mice. In another study, mice were given a 10% solution at 2 g/kg/day continuously for 7 days. Other than slight weight gain, no abnormalities were observed.[7]

SUPPLEMENT

- 山羊角/山羊角 *Shan Yang Jiao* (Cornu Naemorhedis), the horn of mountain goats, has functions similar to those of *Ling Yang Jiao* (Cornu Saigae Tataricae). However, the effect of *Shan Yang Jiao* is milder and the dosage needs to be larger to achieve the same result. It is cold, salty and enters the Liver channel. It pacifies the Liver and treats Liver yang or Liver fire rising with dizziness, vertigo or convulsions, spasms, and redness, pain and swelling of the eyes. It is combined with *Gou Teng* (Ramulus Uncariae cum Uncis), *Tian Ma* (Rhizoma Gastrodiae), *Shi Jue Ming* (Concha Haliotidis) and *Zao Xiu* (Rhizoma Paridis) for Liver yang rising. It is used with *Long Dan Cao* (Radix Gentianae) and *Huang Lian* (Rhizoma Coptidis) for high fever with tremors and convulsions. Lastly, it is combined with *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi) and *Xia Ku Cao* (Spica Prunellae) for redness and pain of the eyes caused by Liver yang rising. The dosage of *Shan Yang Jiao* is 10 to 15 grams.
- 黄羊角/黄羊角 *Huang Yang Jiao* (Cornu Procapra Gutturosa), the horn of yellow goats, is also used as a substitute for *Ling Yang Jiao*. It is used mainly to treat fever by lowering body temperature.

Gou Teng (Ramulus Uncariae cum Uncis)

鉤藤　钩藤

Pinyin Name: *Gou Teng*
Literal Name: "hook vine," "hooky branches"
Alternate Chinese Names: *Shuang Gou Teng, Nen Gou Teng, Shuang Gou Gou*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: gambir
Botanical Name: *Uncaria rhynchophylla* (Miq.) Jacks. (*Gou Teng*); *Uncaria macrophylla* Wall. (*Da Ye Gou Teng*); *Uncaria hirsuta* Havil. (*Mao Gou Teng*); *Uncaria sinensis* (Oliv.) Havil. (*Hua Gou Teng*); *Uncaria sessifructus* Roxb. (*Wu Bing Ye Gou Teng*)
Pharmaceutical Name: Ramulus Uncariae cum Uncis
Properties: sweet, cool
Channels Entered: Liver, Pericardium

CHINESE THERAPEUTIC ACTIONS

1. Extinguishes Wind and Alleviates Spasms

Liver wind: *Gou Teng* (Ramulus Uncariae cum Uncis) is essential in extinguishing wind and sedating fire. It is commonly used to treat presentations of Liver wind, such as convulsions, tremors, infantile convulsions, high fever, spasms, seizures, eclampsia, clenching of teeth, rolling of eyes, tetany, irritability and restlessness.

- Childhood convulsions, clenching of jaws, tremors: use *Gou Teng* with *Tian Ma* (Rhizoma Gastrodiae) and *Quan Xie* (Scorpio).
- Liver wind: combine this herb with *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Ju Hua* (Flos Chrysanthemi) and *Dan Nan Xing* (Arisaema cum Bile).
- High fever in Liver yang rising: use *Gou Teng* with *Ling Yang Jiao* (Cornu Saigae Tataricae), *Long Dan Cao* (Radix Gentianae), and *Ju Hua* (Flos Chrysanthemi).
- Headache, red and painful eyes, or incomplete eruption of rashes caused by wind-heat: add this herb to *Bo He* (Herba Menthae), *Chan Tui* (Periostracum Cicadae) and *Jing Jie* (Herba Schizonepetae).

Stroke: Liver wind in combination with phlegm may result in sudden stroke, fainting, facial paralysis, hemiplegia or loss of the ability to speak.

- Stroke: combine *Gou Teng* with *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae), *Bai Ji Li* (Fructus Tribuli), *Chi Shao* (Radix Paeoniae Rubrae), *Di Long* (Pheretima) and *Chuan Shan Jia* (Squama Manis).

2. Clears Heat and Pacifies Liver Yang

Rising Liver yang: Headache, feelings of distention in the head, dizziness, vertigo and hypertension, tinnitus, insomnia, heavy-headed sensations, and involuntary muscle twitching.

- Hypertension with headache, feelings of distention in the head: use *Gou Teng* with *Xia Ku Cao* (Spica Prunellae) and *Huang Qin* (Radix Scutellariae).
- Dizziness and vertigo: add it to *Ju Hua* (Flos Chrysanthemi) and *Shi Jue Ming* (Concha Haliotidis).
- Hypertension: use it with *Tian Ma* (Rhizoma Gastrodiae) and *Bai Ji Li* (Fructus Tribuli).

DOSAGE

10 to 15 grams. The maximum dosage of *Gou Teng* is 30 grams. Post-decoction for no more than ten minutes is recommended. The antihypertensive effect of *Gou Teng* is greatly reduced if cooked for more than 20 minutes.[1]

CHEMICAL COMPOSITION

Rhynchophylline, isorhynchophylline, corynoxeine, isocorynoxeine, corynantheine, dihydrocorynatheine, hirsutine, hirsuteine, hyperin, trifolin.[2]

PHARMACOLOGICAL EFFECTS

- **Antihypertensive:** Administration of *Gou Teng* is associated with moderate and prolonged antihypertensive effects. The decrease in blood pressure is attributed to decreased heart rate and a reduced peripheral vascular resistance. This is observed with normal or anesthetized animals, normotensive or hypertensive animals, and via intravenous or oral routes.[3] Another study characterized *Gou Teng* as a potent and long-lasting vasodilator that relaxes the aorta and thereby reduces blood pressure. *Gou Teng* has demonstrated an effect similar to verapamil in

Gou Teng (Ramulus Uncariae cum Uncis)

blocking the calcium channel.[4] More specifically, the vasodilative effects of *Gou Teng* were attributed to its α-adrenoceptor blocking and calcium channel blocking activities.[5,6] Clinically, administration of *Gou Teng* reduces both systolic and diastolic blood pressure as well as slowing the heart rate.[7,8]

- **CNS suppressant:** Both water and alcohol extracts of *Gou Teng* decrease spontaneous physical activities in mice for 3 to 4 hours. They reverse the stimulating effect of caffeine, but do not prolong sleeping time induced by barbiturates.[9]
- **Antiseizure:** Alcohol extract of *Gou Teng* has a preventative effect in management of seizures. The duration of action was approximately three days following subcutaneous injection in guinea pigs.[10] In addition, it has been indicated that the combination of *Tian Ma* (Rhizoma Gastrodiae) and *Gou Teng* has synergistic anticonvulsive and free-radical scavenging actions, as demonstrated in laboratory studies in rats.[11]
- **Uterine suppressant:** *Gou Teng* inhibits uterine contraction in rats.[12]

CLINICAL STUDIES AND RESEARCH

- **Hypertension:** In one study, 245 patients with hypertension were treated with a preparation of *Gou Teng*, with marked effectiveness in 38.2%, and an overall rate of effectiveness of 77.2%. Effectiveness was defined as significant and prolonged reduction of blood pressure. Patients with hypertension characterized by yin deficiency and yang excess were most responsive to the treatments. Some mild side effects were observed.[13]
- **Infantile night crying:** An herbal decoction was effective in treating 17 out of 18 infants exhibiting constant crying at night. The formula contains *Gou Teng* 3g, *Chan Tui* (Periostracum Cicadae) 3g, and *Bo He* (Herba Menthae) 1g. The decoction was given one time each day for 2 to 3 doses.[14]

HERB-DRUG INTERACTION

- **Caffeine:** *Gou Teng* reverses the stimulating effect of caffeine, but does not potentiate the sedative effect of barbiturates.[15]

TOXICOLOGY

No abnormalities were observed in rabbits following injection of a *Gou Teng* preparation at 5 g/kg twice daily for 10 days. The LD_{50} for intraperitoneal injection of *Gou Teng* decoction was 29.05 g/kg.[16]

AUTHORS' COMMENTS

Gou Teng has a sedative function but not a tranquilizing one. It helps to calm the *shen* (spirit) but does not treat insomnia.

Gou Teng and *Ren Dong Teng* (Caulis Lonicerae) both treat wind. *Gou Teng* is stronger in treating twitching and spasms caused by Liver wind and Liver heat. *Ren Dong Teng* relieves pain due to wind-heat in the channels and collaterals.

Gou Teng and *Tian Ma* (Rhizoma Gastrodiae) both pacify the Liver, extinguish wind and treat twitching, spasms, convulsions, dizziness and headaches caused by Liver wind. These herbs are frequently used together in clinical settings.

- *Gou Teng* is cold and has a stronger effect to extinguish Liver wind by clearing rising Liver yang. It is often used for Liver wind secondary to rising Liver yang in cases such as convulsions with high fever.
- *Tian Ma* is neutral and rich in oil. It does not clear heat as strongly as *Gou Teng*, but is stronger in relieving pain, as the oil moistens dryness and helps to extinguish wind. It is more commonly used to stop pain associated with headache, vertigo, twitching and spasms caused by Liver wind.

Tian Ma (Rhizoma Gastrodiae)

天麻

Pinyin Name: *Tian Ma*
Literal Name: "heavenly hemp," "sky hemp"
Alternate Chinese Names: *Ming Tian Ma, Chi Jian, Ding Feng Cao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: gastrodia, tall gastrodia tuber
Botanical Name: *Gastrodia elata* Bl. (*Tian Ma*)
Pharmaceutical Name: Rhizoma Gastrodiae
Properties: sweet, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Extinguishes Wind and Stops Spasms and Tremors

Convulsions, tremors, spasms, tetany: *Tian Ma* (Rhizoma Gastrodiae), rich in oil, is unique in that it extinguishes Liver wind and fire, and dispels phlegm, without drying yin. It is useful in both excess and deficient conditions. *Tian Ma* has excellent therapeutic functions to dispel Liver wind with an underlying deficiency, presenting tremors, spasms, tonic-clonic convulsions, opisthotonos, tetany, high fever, infantile and childhood seizures, and epilepsy.

- Acute infantile or childhood convulsions: combine *Tian Ma* with *Gou Teng* (Ramulus Uncariae cum Uncis) and *Quan Xie* (Scorpio).
- Chronic infantile convulsions: add this herb to *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Quan Xie* (Scorpio).
- Tetany with spasms, twitching and opisthotonos: use it with *Dan Nan Xing* (Arisaema cum Bile), *Fang Feng* (Radix Saposhnikoviae) and *Bai Fu Zi* (Rhizoma Typhonii). **Exemplar Formula:** *Yu Zhen San* (True Jade Powder).
- Stroke with facial paralysis and drooling of saliva: incorporate this herb with *Quan Xie* (Scorpio), *Bai Fu Zi* (Rhizoma Typhonii), *Jiang Can* (Bombyx Batryticatus), *Ban Xia* (Rhizoma Pinelliae), *Bai Zhi* (Radix Angelicae Dahuricae), *Jing Jie* (Herba Schizonepetae) and *Dan Nan Xing* (Arisaema cum Bile).
- Stroke with hemiplegia, numbness and slurred speech: use *Tian Ma* with *Dan Nan Xing* (Arisaema cum Bile), *Bai Ji Li* (Fructus Tribuli), *Gou Teng* (Ramulus Uncariae cum Uncis), *Ji Xue Teng* (Caulis Spatholobi), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Chi Shao* (Radix Paeoniae Rubrae) and *Di Long* (Pheretima).

2. Pacifies the Liver and Anchors Yang

Rising Liver yang with headache, vertigo, dizziness: *Tian Ma* is used for hypertension caused by either excess or deficient conditions.

- Headache, dizziness, hypertension: use *Tian Ma* with *Gou Teng* (Ramulus Uncariae cum Uncis), *Huang Qin* (Radix Scutellariae) and *Niu Xi* (Radix Cyathulae seu Achyranthis). **Exemplar Formula:** *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction).
- Migraine headache, blurred vision: combine this herb with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Bai Ji Li* (Fructus Tribuli) and *Jing Jie* (Herba Schizonepetae).
- Heavy feeling, congested headache: use *Tian Ma* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria). **Exemplar Formula:** *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction).
- Migraine, temporal or frontal headache: add this herb to *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Bai Ji Li* (Fructus Tribuli), *Bai Zhi* (Radix Angelicae Dahuricae) and *Jing Jie* (Herba Schizonepetae).

3. Relieves *Bi Zheng* (Painful Obstruction Syndrome) and Alleviates Pain

***Bi zheng* due to wind-damp:** *Tian Ma* treats joint pain, numbness of muscles and limbs, arthritic pain, and decreased agility.

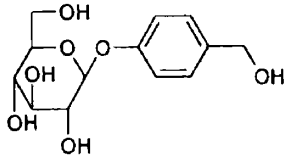
- *Bi zheng*: use *Tian Ma* with *Cao Wu* (Radix Aconiti Kusnezoffii) and *Ma Huang* (Herba Ephedrae).

DOSAGE

3 to 10 grams of *Tian Ma* in decoction, 1 to 1.5 grams in powder.

Tian Ma (Rhizoma Gastrodiae)

CAUTIONS / CONTRAINDICATIONS



- *Tian Ma* is relatively non-toxic. However, some side effects and adverse reactions have been reported, including rash, eczema, and hair loss. Side effects have been reported in response to dosages as low as 10 grams in decoction.[1]
- Use of *Tian Ma* may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

OVERDOSAGE

Overdose of *Tian Ma* is characterized by headache, nausea, vomiting, chest oppression, facial flushing, drowsiness, and delayed response to light.[2]

CHEMICAL COMPOSITION

Gastrodin, 4-hydroxybenzyl alcohol, daucosterol, succinic acid, vanillin, vanillyl alcohol, β-sitosterol.[3,4]

Gastrodin

PHARMACOLOGICAL EFFECTS

- **Sedative:** Decoction of *Tian Ma* significantly reduced the amount of spontaneous physical activity in mice. It also prolonged sleeping time induced by barbiturates.[5,6]
- **Antiseizure and anticonvulsant:** Intraperitoneal or intravenous injection of *Tian Ma* decoction has marked effectiveness in treating seizures and convulsions.[7] Studies have shown *Tian Ma* to have a positive effect in treatment of seizures, cranial-cerebral injury, cervical spondylosis and cerebrovascular diseases.[8,9] Lastly, it has been shown that the combination of *Tian Ma* and *Gou Teng* (Ramulus Uncariae cum Uncis) has a synergistic anticonvulsive and free-radical scavenging action, as demonstrated in laboratory studies in rats.[10]
- **Cardiovascular:** Multiple studies reveal that *Tian Ma* has positive cardiovascular effects.[11] It increases the volume of blood flow to the cardiac muscle and increases resistance to hypoxia. Additionally, by increasing blood flow to the cardiac muscle, *Tian Ma* decreases the risks of myocardial ischemia and myocardial infarct. It was demonstrated that *Tian Ma* reduced the size of myocardial ischemia and myocardial infarct by 23.5% and 34.5%, respectively.[12] In another study, injection of *Tian Ma* increased resistance to hypoxia in mice.[13]

CLINICAL STUDIES AND RESEARCH

- **Headache:** Gastrodin has demonstrated good results in treatment of 156 patients with neurasthenic headache and 72 patients with vascular headache.[14]
- **Seizures:** Administration of vanillin three times daily for 3 to 6 months was 73.9% effective in treating 291 patients with seizures.[15]
- **Nerve pain:** Intramuscular injection of *Tian Ma* was 91 to 95% effective in treating 162 patients with vascular headache, 130 patients with trigeminal pain, 148 patients with sciatica, and 20 patients with toxic polyneuritis. The treatment protocol was 2 to 4 ml of a *Tian Ma* preparation two to three times daily for 20 days per course of treatment, for a total of 1 to 2 courses.[16]

HERB-DRUG INTERACTION

- **Sedatives:** *Tian Ma* potentiates the sedative effect of barbiturates.[17] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

The LD_{50} for gastrodin in mice is 337 mg/kg via intravenous injection, and 1,000 mg/kg via oral ingestion. With gross overdose, adverse reactions and fatalities were observed in rabbits following intraperitoneal injection at 12 g/kg. Adverse reactions included lethargy, reduced deep-tendon reflexes, loss of appetite, and tachycardia up to 300 beats per minutes. Most rabbit fatalities occurred within 48 hours.[18,19]

AUTHORS' COMMENTS

Most herbs that extinguish Liver wind and purge Liver fire are bitter and cold, and have the potential to injure yin by being too drying. *Tian Ma* is the herb of choice to treat Liver yang imbalance and Liver wind conditions because it treats excess without creating deficiency.

Tian Ma is also known as "*Ding Feng Cao*," literally meaning "settle the wind herb." This name marks it as one of the most essential herbs for treatment of Liver wind conditions.

Quan Xie (Scorpio)

全蠍　全蝎

Pinyin Name: *Quan Xie*
Literal Name: "whole scorpion"
Alternate Chinese Names: *Quan Cong, Xie Wei*
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: scorpion
Zoological Name: *Buthus martensi* Karsch. (*Dong Ya Qian Xie*)
Pharmaceutical Name: Scorpio
Properties: acrid, neutral
Channels Entered: Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Extinguishes Wind and Stops Tremors and Convulsions

Liver wind: Applicable conditions include acute or chronic convulsions, childhood convulsions, facial paralysis, stroke, involuntary twitching of facial muscles, tetanus, spasms, cramps, opisthotonos, slurred speech, tightness of the tongue, tics and seizures. Penetrating in nature, *Quan Xie* (Scorpio) is a key component to extinguish wind and relieve spasms.

- Facial paralysis, involuntary facial twitching due to wind and phlegm: combine *Quan Xie* with *Bai Fu Zi* (Rhizoma Typhonii) and *Jiang Can* (Bombyx Batryticatus). **Exemplar Formula:** *Qian Zheng San* (Lead to Symmetry Powder).
- Stroke: use this substance with *Chuan Shan Jia* (Squama Manis) and *Di Long* (Pheretima).
- Childhood convulsions, high fever: use it with *Ling Yang Jiao* (Cornu Saigae Tataricae), *Da Qing Ye* (Folium Isatidis), and *Gou Teng* (Ramulus Uncariae cum Uncis).
- Chronic childhood convulsions with Spleen deficiency (convulsions after vomiting and diarrhea): add it to *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Tian Ma* (Rhizoma Gastrodiae).
- Seizure and epilepsy: use this substance with *Jiang Can* (Bombyx Batryticatus), *Tian Ma* (Rhizoma Gastrodiae), *Hu Po* (Succinum), and *Deng Xin Cao* (Medulla Junci). **Exemplar Formula:** *Ding Xian Wan* (Arrest Seizures Pill).
- Tetany, opisthotonos, spasms and cramps: combine it

Quan Xie (Scorpio)

with *Gou Teng* (Ramulus Uncariae cum Uncis), *Wu Gong* (Scolopendra) and *Zhu Sha* (Cinnabaris).

- Tetanus: use *Quan Xie* with *Tian Nan Xing* (Rhizoma Arisaematis), *Chan Tui* (Periostracum Cicadae), *Jiang Can* (Bombyx Batryticatus) and *Tian Ma* (Rhizoma Gastrodiae).

2. Eliminates Toxins and Disperses Toxic Fire Nodules

Toxic heat accumulations, painful swellings, nodules and masses: *Quan Xie* is used topically to treat toxic sores, mastitis, mumps, swellings and scrofula. It is often made into an ointment with sesame oil and beeswax. Traditionally, when all else fails, one of the last strategies to be tried is "use toxins to attack toxins."

- Toxic sores, swellings: cook *Quan Xie* with sesame oil and *Zhi Zi* (Fructus Gardeniae), and mix with beeswax to make an ointment. Apply topically.
- Scrofula and fibrocystic breast disorders: use this substance with *Ma Qian Zi* (Semen Strychni), *Ban Xia* (Rhizoma Pinelliae) and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) as powders.
- Mastitis: apply powdered *Quan Xie* topically.
- Mumps in children: deep fry two scorpions and eat as food.

3. Opens Channels and Stops Pain

Headache: *Quan Xie* treats frontal, temporal and migraine headaches due to heat in the Liver channel with internal wind.

- Headache: use *Quan Xie* with *Tian Ma* (Rhizoma Gastrodiae), *Wu Gong* (Scolopendra), *Gou Teng* (Ramulus Uncariae cum Uncis) and *Jiang Can* (Bombyx Batryticatus). Serve as powder.

***Bi zheng* (painful obstruction syndrome) due to wind-damp:** *Quan Xie* effectively opens the channels and collaterals to relieve pain. It is primarily used for severe pain, numbness and decreased joint mobility.

- Arthritis: use it with *She Xiang* (Moschus), and serve with grain-based liquor.

DOSAGE

2 to 5 grams in decoction, 0.6 to 1.0 grams as powder. When treating chronic childhood convulsions, use 0.06 to 0.09 grams [60 to 90 mg] of *Quan Xie* as powder for children under two years of age. The tail segment is believed to be the strongest, approximately 2.5 to 3 times more potent than the body. However, the tail is no longer sold separately. The whole scorpion is the most commonly available form.

CAUTIONS / CONTRAINDICATIONS

- Use of *Quan Xie* is contraindicated during pregnancy, and in blood-deficient patients with internal wind.
- This substance is toxic and should never be prescribed at a high dose. No apparent side effects or toxicity occurs when it is used at normal dosages.

OVERDOSAGE

Overdose may occur with intake of 30 to 60 grams of *Quan Xie*. Signs and symptoms of overdose include dizziness, fever, spontaneous perspiration, increased sensitivity to light, tearing, runny nose, salivation, nausea, vomiting, stiff tongue, decreased body temperature, convulsions, dyspnea, and bleeding from the gastrointestinal tract, nose or lungs. In severe cases, there may be increased or decreased heart rate, weak pulse, hypertension or hypotension, seizures, unconsciousness, dyspnea, cyanosis, pulmonary edema, and respiratory depression. The presence of blood, protein and glucose in the urine have also been reported following overdose.[1]

TREATMENT OF OVERDOSAGE

Overdose of *Quan Xie* may be treated with one or more of the following approaches:

- Ingestion of 20 grams of *Yuan Ming Fen* (Natrii Sulfas Praeparata) to facilitate the elimination of toxins through defecation.
- A decoction containing *Jin Yin Hua* (Flos Lonicerae) 30g, *Ban Bian Lian* (Herba Lobeliae Chinensis) 10g, *Tu Fu Ling* (Rhizoma Smilacis Glabrae) 15g, *Lu Dou* (Semen Phaseoli Radiati) 15g, and *Gan Cao* (Radix Glycyrrhizae) 10g.
- A decoction of *Da Huang* (Radix et Rhizoma Rhei) 15g and *Mang Xiao* (Natrii Sulfas) 6g, taken in three equally-divided doses.
- A decoction of *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) 10g, *Pu Huang* (Pollen Typhae) 9g, and *Xiong Huang* (Realgar) 3g, mixed and ground into powder and taken in three equally-divided doses with vinegar every 4 hours.
- A decoction of *Jin Yin Hua* (Flos Lonicerae) 30g, *Ban Bian Lian* (Herba Lobeliae Chinensis) 9g, *Tu Fu Ling* (Rhizoma Smilacis Glabrae) 15g, *Lu Dou* (Semen Phaseoli Radiati) 15g, and *Gan Cao* (Radix Glycyrrhizae) 9g, taken as herbal decoction twice daily.[2]

CHEMICAL COMPOSITION

Buthatoxin, trimethylamine, taurine, betaine.[3]

PHARMACOLOGICAL EFFECTS

- **Antiseizure:** Administration of *Quan Xie* in mice showed marked effectiveness in treating seizures artificially induced by caffeine and megimide.[4]

Quan Xie (Scorpio)

- **Antiepileptic:** In rats with artificially-induced epilepsy, intravenous injection of *Quan Xie* was effective in reducing the severity and duration of epileptic episodes, and preventing recurrent incidences.[5]
- **Cardiovascular:** Administration of *Quan Xie* is associated with a positive inotropic effect and negative chronotropic effect. It also has a prolonged effect to reduce blood pressure.[6]
- **Antineoplastic:** *Quan Xie* has demonstrated preliminary preventative and treatment effectiveness against sarcoma in mice.[7]

CLINICAL STUDIES AND RESEARCH

- **Mastitis:** In one study, 308 patients having mastitis for 1 to 7 days were treated with two *Quan Xie* daily, with a 99.9% rate of effectiveness.[8] In another study, 10 patients with acute mastitis were treated with 3 grams of *Quan Xie* daily with good results.[9]
- **Whooping cough:** According to one report, 74 patients with whooping cough were treated with *Quan Xie* twice daily, with complete recovery reported in all patients. The treatment protocol was to cook and ingest one *Quan Xie* (from head to tail) with one egg, twice daily for 4 to 7 days. The average duration of treatment was 5 days.[10]
- **Cerebral embolism:** Patients with first episodes of cerebral embolism were treated with intravenous infusion of *Quan Xie*, *Bai Hua She* (Bungarus Parvus) and *Wu Gong* (Scolopendra) one time each day. Out of 47 patients, 24 showed complete recovery, 17 showed some improvement, and 6 showed no response. The average duration of treatment was 14 days, with a range of 10 to 30 days.[11]
- **Migraine:** An herbal preparation was used to treat 26 patients with migraine. Most patients reported significant pain relief within the first 12 hours and complete recovery in 48 hours. The herbal preparation contained equal portions of *Quan Xie*, *Gou Teng* (Ramulus Uncariae cum Uncis), and *Zi He Che* (Placenta Hominis). The patients were instructed to take 0.9 grams of the powder three times daily.[12]
- **Epilepsy:** In one study, 104 patients with epilepsy were treated with a *Quan Xie* preparation for 6 months to 1 year, with marked improvement in 78 cases, moderate improvement in 17 cases, and no response in 9 cases. The overall rate of effectiveness was 95%.[13]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of *Quan Xie* in mice is 2.4 mg/kg.[14]

AUTHORS' COMMENTS

Traditionally, the tail of *Quan Xie* is considered to be the most potent, but also the most toxic part of the scorpion. Dosage when prescribing only the tail should be ***one-third*** of the regular recommended dosage. Historically, the tail was used for tetany, convulsions and high fever, while the whole body was used for paralysis and hemiplegia. However, the tail is no longer sold separately. The whole body is the most commonly available form.

Quan Xie, *Wu Gong* (Scolopendra) and *Jiang Can* (Bombyx Batryticatus) are commonly used to treat wind. *Quan Xie* and *Wu Gong* are much stronger than *Jiang Can* to extinguish wind. When treating convulsions, *Jiang Can* is selected only in less severe cases or for those patients who also have phlegm accumulation.

Wu Gong (Scolopendra)

蜈蚣　蜈蚣

Pinyin Name: *Wu Gong*
Literal Name: "centipede"
Alternate Chinese Names: *Tian Long, Chi Zu Wu Gong, Chuan Zu, Bai Zu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: centipede
Zoological Name: *Scolopendra mutilans* L. Koch.
Pharmaceutical Name: Scolopendra
Properties: acrid, warm
Channels Entered: Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Extinguishes Wind, Stops Tremors and Convulsions

Liver wind: Clinical manifestations of Liver wind include acute or chronic convulsions, childhood convulsions, stroke, tetanus, spasms, cramps, opisthotonos, epilepsy, and seizures. *Wu Gong* (Scolopendra) has strong penetrating functions, and is effective to extinguish wind and stop tremors. It is an essential substance when treating symptoms associated with Liver wind.

- Twitching, tetany and opisthotonos: use *Wu Gong* with *Quan Xie* (Scorpio).
- Stroke: use it with *Chuan Shan Jia* (Squama Manis) and *Di Long* (Pheretima).
- Childhood convulsions, high fever: combine this substance with *Ling Yang Jiao* (Cornu Saigae Tataricae), *Da Qing Ye* (Folium Isatidis), and *Gou Teng* (Ramulus Uncariae cum Uncis).
- Epilepsy: use it with *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Quan Xie* (Scorpio), *Tian Zhu Huang* (Concretio Silicea Bambusae) and *Shi Chang Pu* (Rhizoma Acori).
- Tetanus: add it to *Tian Nan Xing* (Rhizoma Arisaematis), *Quan Xie* (Scorpio), *Bai Fu Zi* (Rhizoma Typhonii), *Jiang Can* (Bombyx Batryticatus), and *Gou Teng* (Ramulus Uncariae cum Uncis).
- Delirium associated with high fever, spasms, convulsions or clenched teeth: use *Wu Gong* with *Tian Zhu Huang* (Concretio Silicea Bambusae), *Ling Yang Jiao* (Cornu Saigae Tataricae), *Quan Xie* (Scorpio), *Jiang Can* (Bombyx Batryticatus), *Gou Teng* (Ramulus Uncariae cum Uncis), *Fang Feng* (Radix Saposhnikoviae) and *Bai Ji Li* (Fructus Tribuli).

2. Eliminates Toxins and Disperses Toxic Fire Nodules

Toxic nodules: *Wu Gong* is used internally or externally to relieve toxicity. Clinical applications include sores, carbuncles, neck lumps, snake bites, ulcerated sores and scrofula.

- Toxic nodules: mix it with *Xiong Huang* (Realgar) and tea leaves as powder. Apply topically.
- Tuberculosis of the bone: combine *Wu Gong* with *Quan Xie* (Scorpio) and *Di Bie Chong* (Eupolyphaga) as powder for internal use.
- Snake bite with dizziness, blurred vision, spasms: *Wu Gong* is given with *Huang Lian* (Rhizoma Coptidis), *Da Huang* (Radix et Rhizoma Rhei) and *Gan Cao* (Radix Glycyrrhizae).
- Submandibular lymphadenitis: use *Wu Gong* topically.

3. Opens Channels and Stops Pain

***Bi zheng* (painful obstruction syndrome):** *Wu Gong* treats *bi zheng* caused by wind, a condition characterized by pain that travels from one joint to another.

- *Bi zheng*: use this substance with *Fang Feng* (Radix Saposhnikoviae), *Du Huo* (Radix Angelicae Pubescentis) and *Wei Ling Xian* (Radix Clematidis).

Chronic headache with severe intolerable pain

- Chronic stubborn headache: add *Wu Gong* to *Tian Ma* (Rhizoma Gastrodiae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Jiang Can* (Bombyx Batryticatus) and *Dang Gui* (Radicis Angelicae Sinensis).

DOSAGE

1 to 3 grams in decoction, 0.6 to 1.0 gram in powder. Mix *Wu Gong* powder with sesame oil for external applications.

Wu Gong (Scolopendra)

CAUTIONS / CONTRAINDICATIONS

- Use of *Wu Gong* is contraindicated during pregnancy, for patients with blood deficiency, or in cases of chronic childhood convulsion.
- *Wu Gong* is toxic and should be used with extreme caution. It should not be administered at higher than recommended dosages.

OVERDOSAGE

Overdose of *Wu Gong* may result in symptoms of nausea, vomiting, abdominal pain, diarrhea, lethargy, slow heartbeat, palpitations, dyspnea, a sudden drop in body temperature and blood pressure, and unconsciousness. Oral ingestion of *Wu Gong* has a dose-dependant effect. At small doses, it stimulates the cardiac tissue. At large doses, it paralyzes the cardiac muscle and inhibits respiration. Lastly, use of *Wu Gong* is also associated with rare cases of allergic shock. [1]

TREATMENT OF OVERDOSAGE

Overdose of *Wu Gong* may be treated by one or more of the following methods:

- For general overdose of *Wu Gong*, use *Feng Wei Cao* (Herba Pteris) 100g, *Jin Yin Hua* (Flos Lonicerae) 100g, and *Gan Cao* (Radix Glycyrrhizae) 20g. Serve decoction twice daily, separating the doses by 4 hours.
- For slow pulse with dyspnea, use *Ren Shen* (Radix Ginseng) 10g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 10g, *Wu Wei Zi* (Fructus Schisandrae Chinensis) 10g, and *Gan Cao* (Radix Glycyrrhizae) 10g. Serve decoction twice daily, separating the doses by 4 hours.
- For centipede bites, grind fresh *Ban Bian Lian* (Herba Lobeliae Chinensis) and *Bai Hua She She Cao* (Herba Oldenlandia) into paste and apply topically. This can also be treated internally with an herbal decoction of *Feng Wei Cao* (Herba Pteris) 120g, *Jin Yin Hua* (Flos Lonicerae) 90g, and *Gan Cao* (Radix Glycyrrhizae) 60g, taken twice daily.
- For severe allergic reaction, use corticosteroids.[2]

CHEMICAL COMPOSITION

235-hydroxylysine, taurine, hydroxylysine, chitin, chitosan, glucosamine.[3]

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** *Wu Gong* has demonstrated antineoplastic effects *in vitro*.[4]
- **Antibiotic:** It has an inhibitory effect against *Staphylococcus aureus*, *Pseudomonas aeruginosa*, *Candida albicans*, and dermatophytes.[5]
- **Antiseizure:** It has marked preventative and treatment actions against seizures induced by various drugs. The effect of *Wu Gong* is slightly stronger than that of *Quan Xie* (Scorpio).[6]

CLINICAL STUDIES AND RESEARCH

- **Dermatological use:** Topical application of herbs was used to successfully treat 600 patients with various skin disorders characterized by sores, swelling, ulceration and pus. The herbal tincture was prepared by soaking 2 pieces of *Wu Gong* and 5 grams of *Hong Hua* (Flos Carthami) in 500 ml of 75% alcohol for 7 days.[7]
- **Submandibular lymphadenitis:** In one study, 226 adults with submandibular lymphadenitis were treated with 3 to 9 grams of *Wu Gong* in decoction, with good results. *Wu Gong* was roasted until it turned yellow/brown in color, then decocted. The dosage for children was adjusted appropriately.[8]
- **Tuberculosis of the bone:** Ten patients with tuberculosis of the bone were treated with an herbal formula, with complete recovery in 8 cases and moderate improvement in 1 case (information was not available on one patient). The herbal formula is prepared by grinding 40 grams of *Wu Gong*, 40 grams of *Quan Xie* (Scorpio), and 50 grams of *Di Bie Chong* (Eupolyphaga) into fine powder and divided equally into 40 doses. The patients were instructed to cook 1 dose of the formula with one egg. Take the herb and the egg twice daily for 20 days per course of treatment, for a total of 3 to 6 courses.[9]

AUTHORS' COMMENTS

Some texts suggest that the head and tail of *Wu Gong* must be removed, as they are toxic. Some other records suggest that the head and tail have the strongest functions. Clinical findings, however, have revealed that *Wu Gong* is at its strongest when used as a whole. Thus, there is no need to remove the head or the tail.

Wu Gong and *Quan Xie* (Scorpio) both extinguish wind and arrest tremors. *Wu Gong* has stronger functions to extinguish wind and relieve spasms, disperse stagnation, and dissipate toxic nodules. *Quan Xie* is neutral, and is more suitable for twitching and tremors. *Wu Gong* is more often used topically, while *Quan Xie* is more frequently used internally.

Dr. Li Shou-Shan states that 2 to 3 pieces of *Wu Gong* (Scolopendra) added to *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Dang Gui* (Radicis Angelicae Sinensis) and *Xi Xin* (Herba Asari) enhance the effectiveness of treating chronic headache caused by blood stasis. It is best to use *Wu Gong* in powder form, added to the decoction prior to serving. This combination is commonly used for trigeminal neuralgia, angioneurotic headaches, and migraines.

Wu Gong (Scolopendra)

Jiang Can (Bombyx Batryticatus)

僵蠶 僵蚕

Pinyin Name: *Jiang Can*
Literal Name: "stiff silkworm"
Alternate Chinese Names: *Bai Jiang Can, Tian Cong*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: sick silkworm, silkworm with batrytis
Zoological Name: *Bombyx mori* Linnaeus (*Jia Can*) infected with *Beauveria bassiana* (Bals.) Vuillant
Pharmaceutical Name: Bombyx Batryticatus
Properties: salty, acrid, neutral
Channels Entered: Liver, Lung

CHINESE THERAPEUTIC ACTIONS

1. Extinguishes Wind, Dispels Phlegm, Stops Tremors and Convulsions

Liver wind with phlegm accumulation: *Jiang Can* (Bombyx Batryticatus) is most suitable for Liver wind with phlegm heat stagnation, causing high fever, convulsions, chronic childhood convulsions, facial paralysis, and involuntary twitching of facial muscles.

- High fever, convulsions and muscle twitching: combine *Jiang Can* with *Chan Tui* (Periostracum Cicadae), *Gou Teng* (Ramulus Uncariae cum Uncis) and *Ju Hua* (Flos Chrysanthemi).
- Convulsions with phlegm and fire: use this substance with *Quan Xie* (Scorpio), *Tian Ma* (Rhizoma Gastrodiae) and *Dan Nan Xing* (Arisaema cum Bile).
- Childhood convulsions with night crying and fear: add it to *Fang Feng* (Radix Saposhnikoviae), *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra), *Dan Nan Xing* (Arisaema cum Bile), *Tian Zhu Huang* (Concretio Silicea Bambusae) and *Chan Tui* (Periostracum Cicadae).
- Chronic childhood convulsions after chronic diarrhea and Spleen deficiency: use with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Shen* (Radix Codonopsis) and *Tian Ma* (Rhizoma Gastrodiae).
- Paralysis, involuntary facial twitching or facial paralysis: combine *Jiang Can* with *Quan Xie* (Scorpio), *Bai Zhi* (Radix Angelicae Dahuricae) and *Bai Fu Zi* (Rhizoma Typhonii). **Exemplar Formula:** *Qian Zheng San* (Lead to Symmetry Powder).
- Headache due to Liver yang rising: use it with *Tian Ma* (Rhizoma Gastrodiae), *Ju Hua* (Flos Chrysanthemi), *Gou Teng* (Ramulus Uncariae cum Uncis), *Bai Ji Li* (Fructus Tribuli) and *Bai Shao* (Radix Paeoniae Alba).

2. Dispels Wind and Stops Pain

Headache, red eyes, sore and swollen throat, toothache:

Jiang Can (Bombyx Batryticatus)

These symptoms are caused by wind-heat attacking the head. Secondary symptoms may include excessive tearing and hoarse voice.

- Headache, red eyes and excessive tearing: use *Jiang Can* with *Sang Ye* (Folium Mori), *Mu Zei* (Herba Equiseti Hiemalis) and *Jing Jie* (Herba Schizonepetae).
- Sore throat, hoarse voice: use it with *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Jie Geng* (Radix Platycodonis), *Xuan Shen* (Radix Scrophulariae), *Pang Da Hai* (Semen Sterculiae Lychnophorae), *Gu Zhi Hua* (Semen Oroxyli) and *Ban Lan Gen* (Radix Isatidis).

3. Eliminates Toxins and Dissipates Nodules

Toxic phlegm heat nodules: *Jiang Can* treats scrofula, toxic sores, swellings, erysipelas, mastitis and parotitis caused by phlegm.

- Toxic nodules: use it with *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Xia Ku Cao* (Spica Prunellae), *Lian Qiao* (Fructus Forsythiae), *Jin Yin Hua* (Flos Lonicerae), *Jie Geng* (Radix Platycodonis), *Gan Cao* (Radix Glycyrrhizae), *Ma Bo* (Lasiosphaera seu Calvatia), *Qing Dai* (Indigo Naturalis), *Bei Mu* (Bulbus Fritillaria), and *Xuan Shen* (Radix Scrophulariae).

4. Dispels Wind and Relieves Itching

In addition to extinguishing internal Liver wind, *Jiang Can* expels external wind to relieve rashes and itching.

- **Eczema or rash due to wind:** combine it with *Chan Tui* (Periostracum Cicadae) and *Bo He* (Herba Menthae).

DOSAGE

3 to 10 grams in decoction, 1 to 1.5 grams in powder. Unprocessed *Jiang Can* is sometimes used to treat rashes. However, the unprocessed form has a distinct odor that may significantly reduce patient compliance. Therefore, the standard preparation is to dry fry *Jiang Can* to reduce its odor.

CHEMICAL COMPOSITION

Protein, lipids, ammonium oxalate.[1]

PHARMACOLOGICAL EFFECTS

- **Antiseizure:** Administration of a 10% *Jiang Can* decoction at the dose of 2 g/kg has marked effectiveness in treating mice with drug-induced seizures.[2]
- **Sedative:** Alcohol extract of *Jiang Can* potentiates the sedative effect of phenobarbital in mice.[3]
- **Antibiotic:** *Jiang Can* has a mild inhibitory action against *Staphylococcus aureus, E. coli, Pseudomonas aeruginosa.*[4]

CLINICAL STUDIES AND RESEARCH

- **Epilepsy:** According to one report, 100 patients with epileptic disorders were treated with a preparation of *Jiang Can* for 2 months to 2 years. Patients were given 0.9 to 1.5 grams of *Jiang Can* powder per dose three times daily. Dosage for children was adjusted accordingly. Based on reduced frequency of epilepsy, the study reported an overall effective rate of 77%.[5]
- **High fever with seizure:** Significant improvement was reported in 30 of 32 patients with high fevers and seizures after herbal treatment. The formula was prepared by soaking 6 grams of *Jiang Can* in a fresh cow gallbladder for one month. *Jiang Can* is then removed, mixed with *Huang Lian* (Rhizoma Coptidis), and ground into fine powder. *Huang Qin* (Radix Scutellariae) may be used in place of *Huang Lian* if necessary.[6]

TOXICOLOGY

Administration of *Jiang Can* at 35 g/kg caused death in 1 out of 10 mouse subjects.[7]

AUTHORS' COMMENTS

Dr. Li Shou-Shan stated that the combination of *Jiang Can*, *Shi Gao* (Gypsum Fibrosum) and *Wu Gong* (Scolopendra) treats stubborn, pounding headaches that resemble a hammer striking the head. Administer this combination in powder form.

Di Long (Pheretima)

地龍 地龙

Pinyin Name: *Di Long*
Literal Name: "earth dragon"
Alternate Chinese Names: *Chiu Jin, Chu Tan, Zhuo Jin, Guang Di Long, Gan Di Long*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: earthworm
Zoological Name: *Pheretima aspergillum* (Eperrier) (*Guang Di Long*); *Allalobophora caliginosa* (Savigny) *trapezoides* (Ant. Duges) (*Tu Di Long*)
Pharmaceutical Name: Pheretima
Properties: salty, cold
Channels Entered: Liver, Spleen, Urinary Bladder, Lung

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat and Extinguishes Wind

Febrile disorders: *Di Long* (Pheretima) is penetrating in nature and extinguishes wind and heat to treat high fever, mania, convulsions, seizures, and epilepsy. It is used alone or in combination with other herbs.

- High fever, epilepsy: use this substance alone with salt water.
- Convulsions: pair *Di Long* with *Zhu Sha* (Cinnabaris). Grind both into powder and serve as pills.
- Seizures, twitching, spasms or meningitis with unremitting fever, unconsciousness: use it with *Gou Teng* (Ramulus Uncariae cum Uncis), *Shi Gao* (Gypsum Fibrosum), *Quan Xie* (Scorpio) and *Zao Xiu* (Rhizoma Paridis).
- Schizophrenia or mania with high fever: wash fresh *Di Long* and serve with white sugar and water.

2. Arrests Wheezing

Asthma, bronchial wheezing, whooping cough in children and respiratory disorders due to heat: *Di Long* dilates the bronchial muscles and arrests wheezing. It has been used recently as an injectable to treat asthma.

- Lung heat with dyspnea and cough: use this substance with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae) and *Xing Ren* (Semen Armeniacae Amarum).
- Whopping cough or bronchial spasms with phlegm: use *Di Long* alone.

3. Opens the Channels

***Bi zheng* (painful obstruction syndrome):** *Di Long* unblocks channels, relieves pain and treats various disorders related to blockage in the channels and collaterals.

- *Bi zheng* caused by heat with red and swollen joints that are hot to the touch, and pain that worsens with exposure to heat: use *Di Long* with *Sang Zhi* (Ramulus Mori), *Ren Dong Teng* (Caulis Lonicerae), *Luo Shi Teng* (Caulis Trachelospermi) and *Chi Shao* (Radix Paeoniae Rubrae).
- *Bi zheng* caused by cold, with coldness in the joints, reduced mobility, and pain that worsens with exposure to cold: combine this substance with *Cao Wu* (Radix Aconiti Kusnezoffii), *Chuan Wu* (Radix Aconiti Preparata), *Tian Nan Xing* (Rhizoma Arisaematis) and *Ru Xiang* (Gummi Olibanum). **Exemplar Formula:** *Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill).
- Post-stroke hemiplegia, paralysis with qi and blood stagnation: use it with *Huang Qi* (Radix Astragali), *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Hong Hua* (Flos Carthami). **Exemplar Formula:** *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction).
- Bone fractures with swelling and pain: combine this substance with *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), *Su Mu* (Lignum Sappan), *Tao Ren* (Semen Persicae) and *Xue Jie* (Sanguis Draconis).

4. Promotes Urination

Heat in the Urinary Bladder: *Di Long* is salty and enters the Kidney to clear heat and promote diuresis. It is best for urinary difficulties with dysuria, urinary stones or the inability to urinate. It is used alone or in combination with other herbs.

- Dysuria: use *Di Long* with *Che Qian Zi* (Semen Plantaginis), *Chuan Mu Tong* (Caulis Clematidis Armandii), *Dong Kui Zi* (Semen Malvae).
- Urinary stones: combine it with *Jin Qian Cao* (Herba Lysimachiae) and *Hai Jin Sha* (Herba Lygodii).

Di Long (Pheretima)

Dampness accumulation in the lower limbs: Edema of the lower extremities, with itching between the toes, and numb, weak feet.

- Edema of the lower extremities: use *Di Long* with *Mu Gua* (Fructus Chaenomelis), *Fen Fang Ji* (Radix Stephaniae Tetandrae), and *Bing Lang* (Semen Arecae).

5. Anchors Liver Yang and Lowers Blood Pressure

Rising Liver yang: *Di Long* has a mild but lasting effect to lower blood pressure. It effectively treats hypertension caused by Liver yang rising with red eyes, headache, dizziness or a bitter taste in the mouth.

- Hypertension: add *Di Long* to *Tian Ma* (Rhizoma Gastrodiae), *Shi Jue Ming* (Concha Haliotidis) and *Xia Ku Cao* (Spica Prunellae).

6. Used Topically to Promote Healing

Di Long is also effective for treatment of acute parotitis, chronic ulcers of the lower limbs, burns, boils or carbuncles. It should be crushed into powder, mixed with sugar, and applied topically.

DOSAGE

5 to 15 grams in decoction, 1 to 2 grams in powder. When using fresh *Di Long* in decoction, the dosage is 10 to 20 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Di Long* is contraindicated in patients with Spleen and Stomach deficiencies, or those who do not show excess heat symptoms.
- *Di Long* should be used with caution during pregnancy, as it stimulates contraction of the uterus.

CHEMICAL COMPOSITION

Lumbrofebrine, lumbritin, terrestrolumbrolysin, adenine, hypoxanthine, choline, guanine, guanidine, arachidonic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antiasthmatic:** Alcohol extract of *Di Long* has significant impact to dilate the bronchi and relieve asthma in rats and rabbits.[2]
- **Cardiovascular:** Both water and alcohol extracts of *Di Long* in mice have a marked effect to lower blood pressure, with the peak effect observed 90 minutes after ingestion and duration of action lasting 2 to 3 hours. The exact mechanism of action is unclear, but is thought to be related to the central nervous system. Probanthine reverses the hypotensive effect of *Di Long*, but atropine does not.[3]
- **Uterine stimulant:** Injection of a *Di Long* preparation has a strong stimulating effect on the smooth muscle of the uterus, leading to contraction and spasms in rabbits and rats.[4]
- **Antiseizure:** Intraperitoneal injection of alcohol extract of *Di Long* at 20 g/kg to treat seizures in mice has an effect comparable to that of 20 mg/kg of phenobarbital.[5]
- **Antipyretic:** It reduces body temperature in rabbits with artificially-induced fever. Its antipyretic effect is slightly weaker than that of aspirin.[6]
- **Hematological:** Administration of *Di Long* via oral or intravenous injection inhibits the formation of thrombi and facilitates their dissolution.[7]

CLINICAL STUDIES AND RESEARCH

- **Hypertension:** According to one report, 34 patients with hypertension were treated with a preparation of *Di Long* three times daily for 6 to 64 days with good results. The average duration of treatment was 27.9 days.[8]
- **Epilepsy:** An herbal treatment of epilepsy was effective for 16 out of 20 patients. The treatment protocol was to administer 3 to 6 grams of *Di Long* as decoction for 2 to 12 months. The average duration of treatment was 5.5 months.[9]
- **Schizophrenia:** In one clinical study, 110 patients with schizophrenia were divided into three groups for treatment: group one received decoction of *Di Long* with antipsychotic medications, group two received injection of *Di Long* with antipsychotic medications, and group three received only decoction of *Di Long*. Patients in all three groups reported improvement, with groups one and two being most noticeable. In addition, those with schizophrenia characterized by blood stagnation showed the most improvement.[10]
- **Asthma:** A preparation of *Di Long* given three times daily was effective in treating asthma in 37 out of 44 patients.[11]

TOXICOLOGY

Allergic reactions have been reported following the injection of *Di Long*. The frequency and severity of allergic reactions are unavailable at the time of publication.[12]

Shi Jue Ming (Concha Haliotidis)

石决明 石决明

Pinyin Name: *Shi Jue Ming*
Literal Name: "stone sense brightness"
Alternate Chinese Names: *Jiu Kong Shi Jue*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: haliotis, sea-ear shell, abalone shell
Zoological Name: *Haliotis diversicolor* Reeve. (*She Bao*); *Haliotis gigantea discus* Reeve (*Pan Da Bao*); *Haliotis discus hannai* Ino (*Zhou Wen Pan Bao*); *Haliotis ovina* Gmelin (*Yang Bao*); *Haliotis ruler* (Leach) (*Ao Zhou Bao*); *Haliotis asinina* L. (*Er Bao*); *Haliotis laevigata* (Donovan) (*Bai Bao*)
Pharmaceutical Name: Concha Haliotidis
Properties: salty, cold
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Pacifies the Liver and Anchors Yang

Liver yang rising (excess) or Liver yang rising with yin deficiency (excess with deficiency): The sinking nature of *Shi Jue Ming* (Concha Haliotidis) anchors the rising yang of the Liver. Chief manifestations include hypertension with dizziness, vertigo, tinnitus, headache or migraine, flushed face, a bitter taste in the mouth, dry mouth, irritability, short temper, insomnia, tidal fever, palpitations, forgetfulness, sore and weak lower back and knees, constipation and dark, yellow urine. Patients may also feel spells of heat in the body. *Shi Jue Ming* nourishes Liver yin and is suitable to treat yang rising with deficient signs such as dizziness, and weakness of the back. The unprocessed form is stronger for this function.

- Liver yang rising without yin deficiency: combine *Shi Jue Ming* with *Xia Ku Cao* (Spica Prunellae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Tian Ma* (Rhizoma Gastrodiae) and *Ju Hua* (Flos Chrysanthemi).
- Liver yang rising with Kidney and Liver yin deficiencies: use this substance with *Sheng Di Huang* (Radix Rehmanniae), *Bai Shao* (Radix Paeoniae Alba) and *Mu Li* (Concha Ostreae).
- Neurasthenia: add it to *Dai Zhe Shi* (Haematitum), *Sheng Di Huang* (Radix Rehmanniae), *Bai Shao* (Radix Paeoniae Alba), *Xiang Fu* (Rhizoma Cyperi), *Huang Qin* (Radix Scutellariae), *Bai Ji Li* (Fructus Tribuli), *Ju Hua* (Flos Chrysanthemi), *Yuan Zhi* (Radix Polygalae) and *Ye Jiao Teng* (Caulis Polygoni Multiflori).

2. Clears the Liver and Brightens the Eyes

Eye disorders: The Liver opens to the eyes. Heat in the Liver channel results in symptoms of red, swollen and painful eyes, photophobia, glaucoma, cataract, headache, dizziness, vertigo and a bitter taste in the mouth. *Shi Jue Ming* is one of the most essential substances in treating eye disorders caused by Liver yang rising, Liver fire or Liver yin deficiency with heat. The unprocessed form is

Shi Jue Ming (Concha Haliotidis)

stronger for this function.

- Eye disorders caused by Liver yang rising: use *Shi Jue Ming* with *Bai Ji Li* (Fructus Tribuli), *Long Dan Cao* (Radix Gentianae), *Huang Lian* (Rhizoma Coptidis), and *Ye Ming Sha* (Excrementum Vespertilionis Murini).
- Red eyes, superficial visual obstruction because of Liver yang rising and wind-heat invasion: use it with *Mi Meng Hua* (Flos Buddlejae), *Jue Ming Zi* (Semen Cassiae) and *Ju Hua* (Flos Chrysanthemi).
- Dry eyes, blurred vision, and diminished visual acuity caused by Liver blood deficiency: combine this substance with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shi Hu* (Herba Dendrobii), *Shan Yao* (Rhizoma Dioscoreae), *Gou Qi Zi* (Fructus Lycii) and pig or goat liver.

3. Clears Stomach Fire, Stops Pain and Bleeding

Stomach fire: *Shi Jue Ming* neutralizes acid and treats acid reflux, heartburn, bleeding ulcers and stomach pain. The calcined form is stronger.

- Stomach fire: combine *Shi Jue Ming* with *Hai Piao Xiao* (Endoconcha Sepiae), *Huang Lian* (Rhizoma Coptidis) and *Wu Zhu Yu* (Fructus Evodiae).

Shi Jue Ming can be applied as powder topically to treat trauma and cuts or bleeding resulting from injury.

DOSAGE

15 to 30 grams. Crush and pre-decoct *Shi Jue Ming* to maximize extraction of active components. The unprocessed form is stronger to anchor the yang and clear heat. The calcined form is not as cold, and stronger in its astringent function.

CAUTIONS / CONTRAINDICATIONS

Shi Jue Ming is salty and cold and can easily injure the Spleen and Stomach. *Shi Jue Ming* is contraindicated for patients with deficiency and cold of the Spleen and Stomach, or those with poor appetite and loose stools.

CHEMICAL COMPOSITION

Calcium carbonate, small amounts of magnesium, iron, silica, phosphate, and 17 different amino acids.[1]

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 685-686

Mu Li (Concha Ostreae)

牡蠣　牡蛎

Pinyin Name: *Mu Li*
Alternate Chinese Names: *Mu Li Ke, Zuo Mu Li*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: oyster shell
Zoological Name: *Ostrea gigas* Thunb. (*Chang Mu Li*); *Ostrea talienwhanensis* Crosse. (*Da Lian Wan Mu Li*); *Ostrea rivularis* Gould. (*Jin Jiang Mu Li*)
Pharmaceutical Name: Concha Ostreae
Properties: salty, astringent, cool
Channels Entered: Liver, Kidney

Mu Li (Concha Ostreae)

CHINESE THERAPEUTIC ACTIONS

1. Calms the Liver and Anchors Rising Yang

Liver yang rising due to Liver yin deficiency: Signs and symptoms of this condition include dizziness, vertigo, palpitations, insomnia, irritability, short temper, restlessness and tinnitus. The unprocessed form of *Mu Li* (Concha Ostreae) is best for this function.

- Liver yang rising: use *Mu Li* with *Long Gu* (Os Draconis), *Gui Ban* (Plastrum Testudinis) and *Bai Shao* (Radix Paeoniae Alba).
- Insomnia: pair it with *Ye Jiao Teng* (Caulis Polygoni Multiflori).

Liver wind caused by post-febrile disorder injuring the yin: *Mu Li* treats convulsions and muscle twitches.

- Liver wind: use it with *Gui Ban* (Plastrum Testudinis), *Bie Jia* (Carapax Trionycis), and *Bai Shao* (Radix Paeoniae Alba).

2. Softens Hardness and Dissipates Nodules

Hardness and nodules: The vinegar-processed form of *Mu Li* is often used to treat hot phlegm with lumps or palpable masses such as scrofula, goiter, lymphogranuloma, splenomegaly and hepatomegaly.

- Scrofula, goiter and lymphogranuloma: use *Mu Li* with *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Xuan Shen* (Radix Scrophulariae).
- Splenomegaly, hepatomegaly: add it to *Dan Shen* (Radix Salviae Miltiorrhizae), *Bie Jia* (Carapax Trionycis), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Yu Jin* (Radix Curcumae), *Chai Hu* (Radix Bupleuri) and *Ze Lan* (Herba Lycopi).

3. Prevents Leakage of Fluids

Leakage of body fluids due to deficiency: Clinical manifestations include spermatorrhea, vaginal discharge, spontaneous sweating, night sweating, uterine bleeding and enuresis. For maximum effectiveness, use the calcined form of *Mu Li* to enhance the restraining function.

- Spontaneous or night sweating: use *Mu Li* with *Huang Qi* (Radix Astragali), *Ma Huang Gen* (Radix Ephedrae) and *Fu Xiao Mai* (Semen Tritici Aestivi Levis).
- Spermatorrhea, sore lower back and extremities: combine it with *Qian Shi* (Semen Euryales), *Lian Xu* (Stamen Nelumbinis) and *Sha Yuan Zi* (Semen Astragali Complanati).
- Uterine bleeding and vaginal discharge: use it with *Long Gu* (Os Draconis), *Hai Piao Xiao* (Endoconcha Sepiae) and *Shan Yao* (Rhizoma Dioscoreae).
- Enuresis: add it to *Fu Pen Zi* (Fructus Rubi) and *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae).

4. Neutralizes Acid and Relieves Stomach Pain

Stomach fire with acid regurgitation, heartburn, stomach pain: *Mu Li* is alkaline and neutralizes acid and stops bleeding. The calcined form, powdered, is usually used for this purpose.

- Duodenal or peptic ulcer: use *Mu Li* with *Hai Piao Xiao* (Endoconcha Sepiae), *Bai Ji* (Rhizoma Bletillae), *Yan Hu Suo* (Rhizoma Corydalis), *Pu Gong Ying* (Herba Taraxaci) and *Bai Hua She She Cao* (Herba Oldenlandia).
- Acid reflux: use it with *Wu Zhu Yu* (Fructus Evodiae), *Huang Lian* (Rhizoma Coptidis) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).

DOSAGE

15 to 30 grams in unprocessed form. Crush and predecoct *Mu Li* to maximize extraction of active constituents. The recommended dosage for the calcined form is slightly lower, due to increased rate of extraction. The unprocessed form more strongly calms Liver wind and anchors Liver yang. The calcined form more effectively neutralizes stomach acid and relieves pain.

CAUTIONS / CONTRAINDICATIONS

- Due to its restraining property, *Mu Li* is contraindicated in patients with damp-heat or excess conditions.
- Overdose of *Mu Li* may cause indigestion or constipation.

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** *Mu Li* is commonly used to treat gastric and duodenal ulcers.[1]

CLINICAL STUDIES AND RESEARCH

- **Perspiration associated with pulmonary tuberculosis:** A reduction of perspiration was reported in 7 out of 10 patients who received a decoction containing *Mu Li*. The decoction was prepared by cooking 15 grams of *Mu Li* in 500 ml of water to yield 200 ml of the final decoction. The patients were instructed to drink the decoction in two equally-divided doses (100 ml per dose) twice daily. The herbal treatment continued for 2 to 3 days after perspiration stopped.[2]
- **Gastric and duodenal ulcer:** According to one study, two patients with gastric ulcers and 18 patients with duodenal ulcers were treated with a decoction, with complete recovery in 6 cases, marked improvement in 5 cases, slight improvement in 6 cases, and no effect in 3 cases. The decoction contained 30 to 50 grams each of *Long Gu* (Os Draconis) and *Mu Li*. Furthermore, 10 grams of *Yan Hu Suo* (Rhizoma Corydalis) were added for severe pain, and 15 grams of *Ye Jiao Teng* (Caulis Polygoni Multiflori) were added for insomnia. The patients were instructed to take

Mu Li (Concha Ostreae)

the decoction twice daily for 10 to 20 days per course of treatment.[3]

AUTHORS' COMMENTS

Mu Li and *Shi Jue Ming* (Concha Haliotidis) both anchor Liver yang and treat hypertension. *Mu Li* also disperses stagnation, softens hardness and consolidates body fluids. *Shi Jue Ming* treats eye disorders caused by heat in the Liver channel.

Mu Li and *Long Gu* (Os Draconis) both anchor Liver yang, calm the *shen* (spirit), and stop loss of bodily fluids. *Mu Li* enters the Liver, and more strongly anchors Liver yang, clears heat, and nourishes yin. *Long Gu* enters the Heart, and more effectively calms the *shen* and astringes body fluids.

According to Dr. Wang Shi-Xiang, *Mu Li*, *Bai Ji Li* (Fructus Tribuli), and *Xia Ku Cao* (Spica Prunellae) should be combined for hyperthyroid patients who have bulging eyes. The three herbs function to soften hardness, clear toxins and bring down Liver fire.

Dai Zhe Shi (Haematitum)

代赭石

Pinyin Name: *Dai Zhe Shi*
Literal Name: "red stone from Dai county"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: hematite
Pharmaceutical Name: Haematitum
Properties: bitter, cold
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Calms the Liver and Anchors Rising Yang

Liver yang rising with yin deficiency: Heavy and sinking in nature, *Dai Zhe Shi* (Haematitum) anchors rising Liver yang that manifests in symptoms such as dizziness, vertigo, headache and distention, tinnitus, short temper, irritability, insomnia, increased pressure in the eyes, high blood pressure, palpitations and constipation. The unprocessed form should be used for maximum effectiveness.

- Dizziness, vertigo, headache and distention: use *Dai Zhe Shi* with *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).
- Hypertension with irritability, dizziness, and constipation: combine it with *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), *Bai Shao* (Radix Paeoniae Alba) and *Chuan Niu Xi* (Radix Cyathulae).
- Anger, irritability, headache, insomnia: use it with *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Dan Nan Xing* (Arisaema cum Bile), *Xiang Fu* (Rhizoma Cyperi) and *Mu Li* (Concha Ostreae).

2. Redirects Rebellious Qi Downwards

Hiccups, vomiting and nausea: *Dai Zhe Shi* reverses the ascending Stomach qi to relieve hiccups, vomiting and nausea. Ascending qi is often caused by Stomach qi deficiency or damp accumulating in the middle *jiao*, leading

Dai Zhe Shi (Haematitum)

to the Stomach's inability to direct the qi downwards. Use the unprocessed form of *Dai Zhe Shi* for this function.

- Hiccups, vomiting and nausea due to Stomach qi deficiency: combine *Dai Zhe Shi* with *Dang Shen* (Radix Codonopsis), *Xuan Fu Hua* (Flos Inulae) and *Ban Xia* (Rhizoma Pinelliae).
- Nausea due to cold: use it with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi) and *Dao Dou* (Semen Canavaliae).

Asthma: *Dai Zhe Shi* directs Lung qi downwards, treating asthma, wheezing, dyspnea, and cough.

- Asthma due to deficiency of the Kidney and Lung: use this mineral with *Dang Shen* (Radix Codonopsis) and *Shan Zhu Yu* (Fructus Corni) to tonify the Kidney and Lung.
- Cough and dyspnea with fever and yellow sputum from Lung heat: use *Dai Zhe Shi* with *Sang Bai Pi* (Cortex Mori), *Su Zi* (Fructus Perillae) and *Xuan Fu Hua* (Flos Inulae).

3. Cools the Blood and Stops Bleeding

Bleeding due to heat in the blood: *Dai Zhe Shi* treats bleeding caused by heat forcing blood out of the vessels. Clinical applications of this substance include hematemesis, epistaxis, blood-streaked sputum, and profuse uterine bleeding. Use a small dose of the calcined *Dai Zhe Shi* for this function.

- Hematemesis, epistaxis: use it with *Bai Shao* (Radix Paeoniae Alba) and *Sheng Di Huang* (Radix Rehmanniae).
- Cough with blood or bloody sputum: combine it with *Zi Wan* (Radix Asteris), *Kuan Dong Hua* (Flos Farfarae) and *Pi Pa Ye* (Folium Eriobotryae).
- Chronic uterine bleeding and dizziness: add it to *Chi Shi Zhi* (Halloysitum Rubrum) and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi).
- Hematochezia: combine calcined *Dai Zhe Shi* with charred *Huai Hua* (Flos Sophorae) and charred *Di Yu* (Radix Sanguisorbae).

DOSAGE

10 to 30 grams of the unprocessed form, 6 to 15 grams of the calcined form, in decoction. In severe cases, the highest dose for the unprocessed form is 60 to 90 grams. Crush and pre-decoct *Dai Zhe Shi* to maximize extraction of active constituents. The unprocessed form anchors rising Liver yang. The calcined form stops bleeding.

CAUTIONS / CONTRAINDICATIONS

- Because *Dai Zhe Shi* is cold, heavy and descending in nature, it should be used with caution during pregnancy and in patients with cold conditions.
- Do not use a large dose of *Dai Zhe Shi* or for a prolonged period of time, as this substance contains a trace amount of arsenic.

CHEMICAL COMPOSITION

Aluminum, silicon, magnesium, tin, calcium, diferric trioxide, and arsenic.[1]

PHARMACOLOGICAL EFFECTS

- **Smooth muscle stimulant:** Injection of *Dai Zhe Shi* has a stimulating effect on the smooth muscle of the intestines to increase peristalsis.[2]

CLINICAL STUDIES AND RESEARCH

- **Auditory vertigo:** In one study, 86 patients with vertigo were treated with 95.3% effectiveness using an herbal formula as decoction once daily. The formula contained *Dai Zhe Shi* 45g, *Ban Xia* (Rhizoma Pinelliae) 18g, *Che Qian Cao* (Herba Plantaginis) 18g, and *Xia Ku Cao* (Spica Prunellae) 18g.[3]

AUTHORS' COMMENTS

Dai Zhe Shi and *Chi Shi Zhi* (Halloysitum Rubrum) both treat bleeding. *Dai Zhe Shi* is bitter and cold, and treats upper and lower *jiao* bleeding such as epistaxis and uterine bleeding. *Chi Shi Zhi* is warm and is used mainly for lower *jiao* bleeding such as hematochezia, bleeding dysentery, or uterine bleeding.

Bai Ji Li (Fructus Tribuli)

白蒺藜 白蒺藜

Pinyin Name: *Bai Ji Li*
Alternate Chinese Names: *Ci Ji Li, Ji Li*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: tribulus, puncture vine caltrop fruit
Botanical Name: *Tribulus terrestris* L. (*Ji Li*)
Pharmaceutical Name: Fructus Tribuli
Properties: bitter, acrid, neutral
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Pacifies the Liver and Anchors Yang

Liver yang rising: *Bai Ji Li* (Fructus Tribuli) enters the Liver channel to treat disorders of the head caused by rising Liver yang. Symptoms may include blurred vision, a bitter taste in the mouth, headache, dizziness, vertigo or hypertension.

- Dizziness, blurred vision: use *Bai Ji Li* with *Ju Hua* (Flos Chrysanthemi) and *Bai Shao* (Radix Paeoniae Alba).
- Hypertension with vertigo: add it to *Gou Teng* (Ramulus Uncariae cum Uncis), *Mu Li* (Concha Ostreae), *Tian Ma* (Rhizoma Gastrodiae) and *Niu Xi* (Radix Cyathulae seu Achyranthis).

2. Facilitates the Flow of Liver Qi and Disperses Stagnation

Liver qi stagnation: Liver qi stagnation may result in symptoms of chest and hypochondriac fullness, distention and pain, irregular menstruation, and breast nodules and insufficient milk in women, caused by obstruction of the Liver channel.

- Chest and hypochondriac pain: combine *Bai Ji Li* with *Chai Hu* (Radix Bupleuri), *Zhi Ke* (Fructus Aurantii), *Xiang Fu* (Rhizoma Cyperi), *Yu Jin* (Radix Curcumae), *Chuan Lian Zi* (Fructus Toosendan), and *Yan Hu Suo* (Rhizoma Corydalis).
- Hypochondriac pain related to hepatitis: use it with *Zao Jiao Ci* (Spina Gleditsiae), *Jiang Huang* (Rhizoma Curcumae Longae) and *Bai Hua She She Cao* (Herba Oldenlandia).
- Palpable masses associated with Liver qi stagnation: use it with *Bie Jia* (Carapax Trionycis), *Dan Shen* (Radix Salviae Miltiorrhizae), *Mu Li* (Concha Ostreae), *Zao Jiao Ci* (Spina Gleditsiae), *Hong Hua* (Flos Carthami) and *Tao Ren* (Semen Persicae).

3. Dispels Wind and Brightens the Eyes

Eye disorders: *Bai Ji Li* is commonly used to treat eye disorders caused by heat in the Liver channel, with such symptoms as redness, itching, swelling, pain, superficial visual obstruction, increased tears and photophobia.

- Red and painful eyes, increased tears, photophobia: use *Bai Ji Li* with *Jue Ming Zi* (Semen Cassiae), *Zhi Zi* (Fructus Gardeniae), *Mu Zei* (Herba Equiseti Hiemalis), *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi), *Shi Jue Ming* (Concha Haliotidis) and *Mi Meng Hua* (Flos Buddlejae).
- Superficial visual obstruction: add it to *Ju Hua* (Flos Chrysanthemi), *Man Jing Zi* (Fructus Viticis), *Jue Ming Zi* (Semen Cassiae) and *Lian Qiao* (Fructus Forsythiae).

4. Dispels Wind and Stops Itching

Eczema, skin lesions with significant itching, vitiligo, or neurodermatitis arising from wind with blood deficiency.

- Skin lesions, chronic eczema or neurodermatitis: use *Bai Ji Li* with *Dang Gui* (Radicis Angelicae Sinensis), *He Shou Wu* (Radix Polygoni Multiflori), and *Fen Fang Ji* (Radix Stephaniae Tetandrae).
- Vitiligo: use 15 grams of *Bai Ji Li* alone in decoction, twice daily.
- Eczema with itching: use this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Jing Jie* (Herba Schizonepetae) and *Chan Tui* (Periostracum Cicadae).

DOSAGE

6 to 10 grams. Dry-frying increases the warmth of *Bai Ji Li* and facilitates extraction of the active components. Dry-frying with salt facilitates its entry to the Kidney and Liver channels, and treatment of related disorders.

Bai Ji Li (Fructus Tribuli)

CAUTIONS / CONTRAINDICATIONS

- Use *Bai Ji Li* with caution in patients with blood deficiency.
- *Bai Ji Li* is contraindicated during pregnancy, as it may induce miscarriage.
- Topical application of *Bai Ji Li* is sometimes associated with rash and itching.

CHEMICAL COMPOSITION

Kaempferol, kaempferol-3-glucoside, kaempferol-3-rutinoside, tribuloside, furostanol bisglycoside, harmane, harmine.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Both water and alcohol extracts of *Bai Ji Li* have an inhibitory influence on the heart, as they decrease blood pressure in anesthetized animals.[2]
- **Diuretic:** *Bai Ji Li* has a mild diuretic effect in rats.[3]

CLINICAL STUDIES AND RESEARCH

- **Warts:** In one study, 123 patients with warts were treated with a success rate close to 100% using topical application of tribulus. The treatment protocol was to grind the fresh herb into paste, and rub it on the affected area until the patients feel a slight burning sensation and pain. The herbal paste should not be wiped off immediately. This process is performed one time each day or every other day, for a total of 1 to 4 treatments. [4]
- **Vitiligo:** One report describes that 27 patients with vitiligo were treated with an 87% rate of effectiveness using 15 grams of *Bai Ji Li* in tea twice daily.[5]

HERB-DRUG INTERACTION

- **Diuretics:** *Bai Ji Li* has a mild diuretic effect. Though this potential interaction has not been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[6] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

One case of anaphylactic reaction was reported following ingestion of *Bai Ji Li*.[7] [Note: Anaphylactic shock is the most severe type of allergic reaction. Unfortunately, it is very difficult, if not impossible, to predict when patients will have such serious reactions. Though there is one case of anaphylactic reaction reported, use of *Bai Ji Li* does not necessarily have a higher risk of allergy than other herbs.]

AUTHORS' COMMENTS

Bai Ji Li (Fructus Tribuli) is sometime confused with *Sha Yuan Ji Li*, the alternate name for *Sha Yuan Zi* (Semen Astragali Complanati). Although they both treat disorders of the eyes, they have very different functions.

- *Bai Ji Li* anchors Liver yang and relieves Liver qi stagnation, calming the Liver and dispelling wind-heat to brighten the eyes. It is used for red eyes with tears or pain.
- *Sha Yuan Zi* tonifies the Liver and Kidney (specifically Kidney yang), secures *jing* (essence) and improves vision by nourishing the Liver. It is used more for blurred vision or diminished visual acuity.

Jue Ming Zi (Semen Cassiae)

决明子 决明子

Pinyin Name: *Jue Ming Zi*
Literal Name: "seed of brightness"
Alternate Chinese Names: *Cao Jue Ming, Ma Ti Jue Ming*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cassia seed
Botanical Name: *Cassia obtusifolia* L. (*Jue Ming*), *Cassia tora* L. (*Xiao Jue Ming*)
Pharmaceutical Name: Semen Cassiae
Properties: sweet, bitter, cool
Channels Entered: Liver, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Clears Liver Heat and Benefits the Eyes

Liver heat or wind-heat in the Liver channel: *Jue Ming Zi* (Semen Cassiae) treats eye disorders such as redness, dryness, swelling and pain in the eyes, photophobia, cataracts and night blindness.

- Redness, swelling and pain of the eyes caused by Liver heat: use *Jue Ming Zi* with *Long Dan Cao* (Radix Gentianae), *Huang Qin* (Radix Scutellariae) and *Xia Ku Cao* (Spica Prunellae).
- Redness, swelling and pain of the eyes arising from wind-heat attacking the Liver channel: combine this herb with *Ju Hua* (Flos Chrysanthemi), *Man Jing Zi* (Fructus Viticis) and *Mu Zei* (Herba Equiseti Hiemalis).
- Cataract, optic atrophy, dryness and diminished vision caused by Liver and Kidney deficiencies: add *Jue Ming Zi* to *Sheng Di Huang* (Radix Rehmanniae), *Ju Hua* (Flos Chrysanthemi), *Shan Yao* (Rhizoma Dioscoreae), and *Xuan Shen* (Radix Scrophulariae).
- Night blindness and optic nerve degeneration: use *Jue Ming Zi* alone.

2. Calms the Liver and Anchors Liver Yang

Liver yang rising: Characteristic symptoms include headache, dizziness, vertigo, red face, red eyes, and irritability. Many patients with Liver yang rising also have hypertension. Bitter and cold, *Jue Ming Zi* clears Liver heat and calms Liver yang.

- Hypertension caused by rising Liver yang: use *Jue Ming Zi* with *Gou Teng* (Ramulus Uncariae cum Uncis), *Mu Li* (Concha Ostreae), and *Ju Hua* (Flos Chrysanthemi).

3. Clears Heat and Moistens Bowels

Constipation from dryness or heat: *Jue Ming Zi* treats dry stools and acute or chronic constipation arising from heat or dryness.

- Constipation: use it with *Hei Zhi Ma* (Semen Sesami Nigrum), *Sheng Di Huang* (Radix Rehmanniae) and *Dang Gui* (Radicis Angelicae Sinensis) to clear heat and lubricate the bowels.
- Mild constipation: use the herb individually as tea.

4. Cardiovascular Effect

Jue Ming Zi has excellent functions to reduce high cholesterol and treat atherosclerosis, used individually or in combination with other herbs.

- Cholesterol: use 30 grams of *Jue Ming Zi* with *Jiao Gu Lan* (Rhizoma seu Herba Gynostemmatis), *Da Huang* (Radix et Rhizoma Rhei), *Shan Zha* (Fructus Crataegi) and *Ze Xie* (Rhizoma Alismatis).
- Atherosclerosis: pair it with *Dan Shen* (Radix Salviae Miltiorrhizae).

DOSAGE

10 to 15 grams in decoction. Use 30 grams of *Jue Ming Zi* to lower cholesterol levels. *Jue Ming Zi* should be crushed prior to cooking in herbal decoction. The dosage range is 3 to 6 grams for use as powder.

The unprocessed herb is colder in nature than other forms, and has a stronger function to clear Liver fire and wind-heat attacking the Liver channel. It is usually used to treat acute eye disorders. Because of its cold nature, the unprocessed herb is sometimes associated with diarrhea. The dry-fried form is not as cold, and less likely to cause diarrhea. However, it is also less effective to clear Liver Heat.

CAUTIONS / CONTRAINDICATIONS

- Cold and sedating in nature, *Jue Ming Zi* is

Jue Ming Zi (Semen Cassiae)

contraindicated in patients with deficiency and cold of the Spleen and Stomach.

- *Jue Ming Zi* is contraindicated in patients with hypotension.
- *Jue Ming Zi* should be used with caution during pregnancy, as it stimulates contraction of the uterus.

CHEMICAL COMPOSITION

Chrysophanol, emodin, aloe-emodin, rhein, emodin-b-monoglucoside, emodinan, physcion, obtusin, aurantio-obtusin, torachrysone, rubrofusarin, nor-rubrofusarin, toratactone.[1]

PHARMACOLOGICAL EFFECTS

- **Antihypertensive:** Both water and alcohol extracts of *Jue Ming Zi* have demonstrated marked diuretic and antihypertensive effects.[2]
- **Antibiotic:** *Jue Ming Zi* has demonstrated inhibitory influence against *Staphylococcus aureus, Corynebacterium diphtheriae, E. coli,* and various species of bacillus and dermatophytes.[3]
- **Antihyperlipidemic:** *Jue Ming Zi* has been shown to lower blood cholesterol levels in both animal and human studies. In one study, administration of 10 grams of *Jue Ming Zi* per day lowered blood cholesterol levels in rabbits. In another study, incorporation of *Jue Ming Zi* as 7% of the diet in mice increased the blood HDL level.[4,5]
- **Purgative:** Oral administration of *Jue Ming Zi* in mice is associated with a purgative effect that peaks 3 to 5 hours after ingestion.[6]
- **Uterine stimulant:** Administration of *Jue Ming Zi* is associated with increased contraction of the uterus.[7]

CLINICAL STUDIES AND RESEARCH

- **Hyperlipidemia:** *Jue Ming Zi* in three separate dosage forms was used to treat 100 patients with high cholesterol levels. The first group received an herbal decoction (the decoction contains 50 grams of herb, and was taken in 2 equally-divided doses daily); the second group received herbal syrup (100 ml of the syrup contains 75 grams of herb, and 20 ml of syrup was given three times daily); and the third group received pills (each pill contains 3 grams of herb, 5 pills were given three times daily). The duration of treatment was six weeks, with evaluation taken at baseline and every 2 weeks until the completion of the study. The cholesterol levels of the subjects ranged between 210 and 484 mg/dL prior to treatment, and 110 and 208 mg/dL at the conclusion of the study. The mean decrease was 93.1 mg/dL. The patients demonstrated a progressive decline in cholesterol levels. Prior to the herbal treatment, all patients had cholesterol levels exceeding the normal level. The study reported that after 2 weeks, 86% were within normal ranges; after 4 weeks, 96%; and after 6 weeks, 98% were within normal levels.[8]
- **Hyperlipidemia:** According to one report, 48 patients were treated with 20 ml of *Jue Ming Zi* syrup (100 ml of the syrup contains 75 grams of herb) three times daily for 2 months. The study reported reduction in blood cholesterol in 95.8% of the patients, reduction in triglycerides in 86.7%, and reduction of β-lipoprotein in 89.5%.[9]
- **Vaginitis:** In one study, 22 patients were treated with *Jue Ming Zi* herbal solution used as a topical wash for one 15 to 20 minute application daily for 10 days, with good results.[10]

HERB-DRUG INTERACTION

- **Diuretics:** *Jue Ming Zi* has a diuretic effect. Though no instances of this potential interaction have been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[11] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

The addition of *Jue Ming Zi* as 16 to 32% of the daily diet of rats for 8 days was associated with reduction of sperm count, reduction of red blood cells, and increased white blood cells and lymphocytes.[12]

AUTHORS' COMMENTS

Jue Ming Zi and *Shi Jue Ming* (Concha Haliotidis) both anchor rising Liver yang and treat dizziness, headache, vertigo, and redness, swelling and pain in the eyes. *Jue Ming Zi* is bitter and cold, and more effectively treats eye disorders caused by heat and wind in the Liver channel. It can also be used to resolve constipation. *Shi Jue Ming* is salty, sinking and stronger in anchoring rising Liver yang, and nourishes Liver yin.

Gou Qi Gen (Radix Lycii)

枸杞根

Pinyin Name: *Gou Qi Gen*
Alternate Chinese Names: *Qi Gen, Gou Qi Tou*
English Name: lycium root
Botanical Name: *Lycium chinense* Miller
Pharmaceutical Name: Radix Lycii
Properties: sweet, cold
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

Clears the Liver and Brightens the Eyes

Liver fire: *Gou Qi Gen* (Radix Lycii) treats Liver fire that manifests in redness, pain, excessive tearing, swelling of the eyes, hepatitis and tendonitis. It is also used for visual disorders associated with deficiency, that manifest in blurry or diminished vision.

- Conjunctivitis: use *Gou Qi Gen* with *Shu Wei Huang* (Herba Rostellulariae) and *Qian Li Guang* (Herba Senecionis Scandens).
- Blurred and diminished vision: combine it with white *Ju Hua* (Flos Chrysanthemi), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Huang Jing* (Rhizoma Polygonati).
- Tendonitis: add it to *Shan Pu Tao* (Radix Vitis Amurensis) and *Shu Wei Huang* (Herba Rostellulariae).
- Hepatitis: pair *Gou Qi Gen* with *Huang Shui Qie* (Herba Solani).

DOSAGE

5 to 15 grams

CAUTIONS / CONTRAINDICATIONS

- Because of its cold thermal property, *Gou Qi Gen* should be used with caution in patients with Spleen deficiency.

Zhen Zhu (Margarita)

珍珠

Pinyin Name: *Zhen Zhu*
Literal Name: "precious ball"
Alternate Chinese Names: *Zhen Zhen Zhu, Lian Zhu*
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: pearl
Zoological Name: *Pteria martensii* (Dunker) (*Zhen Zhu Bei*); *Hyriopsis cumingii* (Lea) (*San Jiao Fang Bang*); *Cristaria plicata* (Leach) (*Zhou Wen Guan Bang*); *Anodonta woodiana* (Lea) (*Bei Jiao Wu Chi Bang*)
Pharmaceutical Name: Margarita
Properties: sweet, salty, cold
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Pacifies the Heart and Settles Tremors and Palpitations

***Shen* (spirit) disturbance:** *Zhen Zhu* (Margarita) treats both excess and deficient *shen* disturbances. **Excess** *shen* disturbance is characterized by Liver wind, with palpitations, seizures, tremors and childhood convulsions. **Deficient** *shen* disturbance is characterized by lack of nourishment to the Heart, with such symptoms as neurasthenia, being easily frightened, insomnia and palpitations.

- Excess *shen* disturbance: use *Zhen Zhu* with *Niu Huang* (Calculus Bovis), *Hu Po* (Succinum), *Dan Nan Xing* (Arisaema cum Bile) and *Tian Zhu Huang* (Concretio Silicea Bambusae).
- Deficient *shen* disturbance: combine it with *Fu Shen* (Poria Paradicis), *Suan Zao Ren* (Semen Zizyphi Spinosae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). Serve with honey.

2. Clears the Liver and Removes Superficial Visual Obstructions

Pterygium, blurred vision, painful eyes caused by Liver heat or Liver deficiency: *Zhen Zhu* is commonly used to treat eye disorders. It is usually used with other herbs topically as eye drops. It is rarely used internally for this function.

- Pterygium, eye pain: use *Zhen Zhu* with *Qing Xiang Zi* (Semen Celosiae), *Huang Qin* (Radix Scutellariae), *Ju Hua* (Flos Chrysanthemi), and *Shi Jue Ming* (Concha Haliotidis). Cook the herbs, and carefully direct the steam to the eyes as treatment.
- Red, painful eyes with superficial visual obstruction: pair this herb with *Bing Pian* (Borneolum Syntheticum) as an eye drop solution.

3. Promotes Healing and Helps Generate Flesh

Non-healing ulcers, sore throat with ulceration of the gums, eczema: *Zhen Zhu* treats toxic heat accumulation that is manifesting in ulcers or other dermatological disorders. It is usually used topically on non-healing ulcers to help generate flesh.

- Non-healing ulcers or macerated areas: combine *Zhen Zhu* with *Bing Pian* (Borneolum Syntheticum) and *Ru Xiang* (Gummi Olibanum) topically.
- Sores of the throat or ulcerated gums: use powdered *Zhen Zhu*, *Niu Huang* (Calculus Bovis) and *Qing Dai* (Indigo Naturalis) together, and apply topically.
- Burns and eczema: use *Zhen Zhu* alone as powder.

DOSAGE

0.3 to 1 gram. Generally used in powder or pill form. If used in decoction, crush *Zhen Zhu* into smaller pieces to facilitate the extraction of active constituents.

CHEMICAL COMPOSITION

Calcium carbonate (over 90%), magnesium, copper, iron, leucine, methionine, alanine, glycine, glutamic acid, aspartic acid, amino acids.[1]

PHARMACOLOGICAL EFFECTS

- **Smooth muscle relaxant:** Preparations of *Zhen Zhu* had an inhibitory effect on the smooth muscle of the intestines in rabbits.[2]

CLINICAL STUDIES AND RESEARCH

- **Stomatitis:** In one study, 319 patients with stomatitis from various causes were treated with a topical preparation with a rate of effectiveness of up to 92.79%. The preparation contained powdered *Zhen Zhu*, *Qing Dai*

Zhen Zhu (Margarita)

(Indigo Naturalis), *Bing Pian* (Borneolum Syntheticum), *Niu Huang* (Calculus Bovis), *Hua Shi* (Talcum), and other ingredients.[3]

AUTHORS' COMMENTS

Zhen Zhu (Margarita) and *Zhen Zhu Mu* (Concha Margaritaferae) both clear Liver fire, anchor rising yang, and pacify the Heart. *Zhen Zhu* more strongly sedates the Heart and calms the *shen* (spirit). *Zhen Zhu Mu* more effectively calms the Liver and brightens the eyes.

Zhen Zhu Mu (Concha Margaritaferae)

珍珠母

Pinyin Name: *Zhen Zhu Mu*
Literal Name: "mother of pearl"
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061 A.D.
English Name: mother of pearl, nacre
Zoological Name: *Hyriopsis cumingii* (Lea) (*San Jiao Fang Bang*); *Cristaria plicata* (Leach) (*Zhou Wen Guan Bang*); *Pteria martensii* (Dunker) (*Ma Si Zhen Zhu Mu*)
Pharmaceutical Name: Concha Margaritaferae
Properties: salty, cold
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. Calms the Liver and Anchors Yang

Liver yang rising with Liver yin deficiency: *Zhen Zhu Mu* (Concha Margaritaferae) has a sinking nature and anchors rising Liver yang to treat symptoms such as dizziness, headache, tinnitus, irritability, frequent dreams, insomnia, palpitations and mania.

- Liver yang rising: use *Zhen Zhu Mu* with *Bai Shao* (Radix Paeoniae Alba), *Sheng Di Huang* (Radix Rehmanniae) and *Long Chi* (Dens Draconis).
- Neurasthenia: combine it with *Bai Shao* (Radix Paeoniae Alba), *Sheng Di Huang* (Radix Rehmanniae), *Bai Ji Li* (Fructus Tribuli), *Yuan Zhi* (Radix Polygalae), *Xiang Fu* (Rhizoma Cyperi), *Gou Teng* (Ramulus Uncariae cum Uncis) and *Dai Zhe Shi* (Haematitum).

2. Clears the Liver and Brightens Vision

Visual impairment due to Liver yin deficiency and Liver yang rising: Symptoms include dizziness, blurred vision, night blindness, photophobia, redness, swelling, burning and pain in the eyes.

- Dizziness, blurred vision, night blindness due to Liver deficiency: use *Zhen Zhu Mu* with *Cang Zhu* (Rhizoma Atractylodis), and pig or duck liver.
- Photophobia, redness, swelling and pain in the eyes: use it with *Ju Hua* (Flos Chrysanthemi), *Jue Ming Zi* (Semen Cassiae) and *Che Qian Zi* (Semen Plantaginis).

3. Pacifies Heart Fire

Secondary to Liver yang rising and phlegm misting the Pericardium, patients with Heart fire will show delirious speech, tremor, seizures or mania.

Zhen Zhu Mu (Concha Margaritaferae)

- Heart fire: combine *Zhen Zhu Mu* with *Yu Jin* (Radix Curcumae), *Huang Lian* (Rhizoma Coptidis), *Tian Zhu Huang* (Concretio Silicea Bambusae), *Dan Nan Xing* (Arisaema cum Bile), *Shi Chang Pu* (Rhizoma Acori), *Gou Teng* (Ramulus Uncariae cum Uncis) and *Quan Xie* (Scorpio).

4. Promotes Healing and Reduces Itching of the Skin

Eczema and itching can be treated with topical application of *Zhen Zhu Mu* alone, as powder.

5. Neutralizes Stomach Acid and Relieves Pain

Peptic ulcers with pain and acid regurgitation can be treated with *Zhen Zhu Mu*, which neutralizes stomach acid, stops acid regurgitation and relieves stomach pain.

DOSAGE

15 to 30 grams. Crush and pre-decoct *Zhen Zhu Mu* to maximize the extraction of active components.

CAUTIONS / CONTRAINDICATIONS

- *Zhen Zhu Mu* is contraindicated in cases of coldness and water accumulation in the Heart channel.

CHEMICAL COMPOSITION

$CaCO_3$, SiO_2, Al_2O_3, SO_2, K_2O, NaCl. The content of calcium is over 97%, among inorganic components.[1]

CLINICAL STUDIES AND RESEARCH

- **Immunologic:** Continuous administration of *Zhen Zhu Mu* powder at 1.5 to 3.0 grams per day for 2 months resulted in an improvement in memory, energy, concentration and cellular immunity in 146 geriatric patients.[2]

TOXICOLOGY

Zhen Zhu Mu is generally considered to be safe. The LD_{50} for oral ingestion is greater than 5000 mg/kg in rats.[3]

Chapter 15 summary

— Liver-Calming and Wind-Extinguishing Herbs

Name	Similarities	Differences
Ling Yang Jiao (Cornu Saigae Tataricae)	Calm Liver wind, clear Liver heat, relieve spasms	Strongly extinguishes Liver wind, brightens the eyes
Gou Teng (Ramulus Uncariae cum Uncis)		Calms Liver yang
Tian Ma (Rhizoma Gastrodiae)		Calms Liver wind, stops spasms, opens channels and collaterals
Quan Xie (Scorpio)	Calm Liver wind, stop tonic-clonic spasms and convulsions	Opens channels and collaterals to relieve pain, eliminates toxicity, disperses nodules, relieves twitching, treats tremor
Wu Gong (Scolopendra)		Opens channels and collaterals to relieve pain, eliminates toxicity and disperses nodules, treats tonic-clonic convulsions
Jiang Can (Bombyx Batryticatus)		Eliminates phlegm, dispels wind-heat
Di Long (Pheretima)		Clears heat, opens channels and collaterals, relieves wheezing, promotes urination
Shi Jue Ming (Concha Haliotidis)	Calm the Liver, sedate yang	Brightens the eyes
Mu Li (Concha Ostreae)		Softens hardness, reduces nodules, consolidates *jing* (essence)
Dai Zhe Shi (Haematitum)		Cools blood, stops bleeding, reverses rebellious Stomach qi
Bai Ji Li (Fructus Tribuli)		Disperses Liver qi stagnation, dispels wind to brighten the eyes and relieve itching
Jue Ming Zi (Semen Cassiae)		Brightens the eyes, relieves headache
Gou Qi Gen (Radix Lycii)		Clears the Liver and brightens the eyes
Zhen Zhu (Margarita)	Calm Liver yang, pacify the *shen* (spirit)	Generates tissue and heals skin when used externally
Zhen Zhu Mu (Concha Margaritaferae)		Clears Liver heat and brightens the eyes

General Characteristics of Liver-Calming and Wind-Extinguishing Herbs:

Taste: salty
Thermal property: cool, cold
Channels entered: Liver
Therapeutic actions: calm Liver wind, clear Liver heat, anchor Liver yang

These herbs address Liver wind, Liver heat and Liver yang disorders:

Liver wind is characterized by movement and by the mobile nature of the illness, with symptoms such as dizziness, vertigo, headache, seizures, convulsions, and stroke.

Liver yang rising is typified by internal heat surging upwards, with symptoms such as restlessness, irritability, anger, high blood pressure, and insomnia.

Liver fire is displayed by internal fire surging upwards, with symptoms such as flushed face, pain, redness, and swelling and pain of the eyes.

Ling Yang Jiao (Cornu Saigae Tataricae) is cold, with excellent functions to extinguish wind, and relieve spasms, in cases of endogenous wind secondary to excess heat. *Ling Yang Jiao* is one of the most important herbs for treating tremors, convulsions and seizures. In addition, it also sedates heat and eliminates toxins from the Liver. There is an old saying: "*Ling Yang Jiao* is a must when treating Liver disorders."

Chapter 15 summary

Gou Teng (Ramulus Uncariae cum Uncis) and ***Tian Ma*** (Rhizoma Gastrodiae) are often paired to treat the spasms and tremors of Liver wind.

Gou Teng more effectively clears wind secondary to heat in the Heart and Liver, and is best for childhood convulsions with high fever.

Tian Ma treats headache, dizziness and vertigo caused by excess or deficiency.

Quan Xie (Scorpio), ***Wu Gong*** (Scolopendra) and ***Jiang Can*** (Bombyx Batryticatus) are used clinically to strongly extinguish wind and relieve spasms.

Quan Xie and *Wu Gong* have essentially the same functions, with only minor differences. They are often used together to eliminate toxins, disperse stagnation to treat nodules, toxic swellings and masses. *Quan Xie* is more effective for twitching and tremors, while *Wu Gong* is more effective to relieve tonic-clonic convulsions. *Wu Gong* is warmer and drier than *Quan Xie.*

Jiang Can is the weakest of these three substances in extinguishing wind. However, it relieves pain and itching, dissolves phlegm and disperses stagnation.

Di Long (Pheretima), salty and cold, has descending and sedating characteristics. It relieves spasms, opens collaterals, relieves dyspnea, promotes urination and clears heat. *Di Long* stops tremor and spasms, treats hemiplegia, relieves cough due to Lung heat, and treats *re lin* (heat dysuria).

Shi Jue Ming (Concha Haliotidis) and ***Mu Li*** (Concha Ostreae) are important herbs to anchor the yang. They are most suitable in cases of underlying yin deficiency in which rising Liver yang manifests as dizziness, palpitations, vertigo and insomnia.

Shi Jue Ming clears the Liver and brightens the eyes to treat visual disorders.

Mu Li softens hardness, disperses stagnation and treat nodules and masses. Calcined *Mu Li* consolidates *jing* (essence) to treat spermatorrhea, leukorrhea and profuse sweating. It also neutralizes stomach acid to relieve gastric ulcer pains.

Dai Zhe Shi (Haematitum) anchors Liver yang, clears Liver fire, reverses rising Stomach qi to relieve nausea, vomiting and hiccups. It also cools the blood and stops bleeding.

Bai Ji Li (Fructus Tribuli) and ***Jue Ming Zi*** (Semen Cassiae) pacify the Liver, dispel wind and brighten the eyes.

Bai Ji Li more strongly disperses Liver qi stagnation.

Jue Ming Zi more effectively lubricates the intestines to treat constipation or dry stools.

Gou Qi Gen (Radix Lycii) clears the Liver to treat visual disorders.

Zhen Zhu (Margarita) and ***Zhen Zhu Mu*** (Concha Margaritaferae) clear Liver fire, anchor rising yang, and pacify the *shen* (spirit).

Zhen Zhu more strongly sedates the Heart and calms the *shen.* It is also used topically to promote healing and generation of tissue.

Zhen Zhu Mu more effectively calms the Liver and brightens the eyes. It is also used more frequently because it is more accessible and affordable than *Zhen Zhu.*

Chapter 16

— Orifice-Opening Herbs

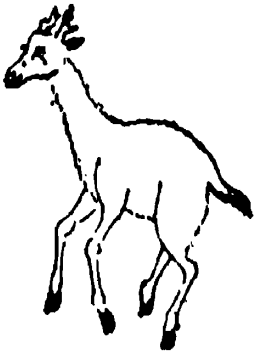
Definition: Herbs that are said to "open the orifices" act to dispel any pathogenic blockages in order to restore sensory function and induce consciousness.

Obstruction of the sensory orifices leads to altered consciousness. Acrid and aromatic in nature, herbs that open orifices disperse and dispel any obstructing substances, restore the five senses, and induce consciousness.



Orifice-opening herbs disperse and dispel obstructions, restore the five senses, and induce consciousness. These herbs ... relieve symptoms, but do not correct underlying causes of the symptoms.

Traditional Chinese medicine looks to the ***Heart*** in the presence of sensory or consciousness disorders, while allopathic medicine assesses the brain and central nervous system. Clinically speaking, loss of consciousness is a severe, acute symptom that is usually the result of circulatory or respiratory impairment. Therefore, herbs that open orifices also have a resuscitating function, acting in ways similar to cardiac stimulants. Clinical research has proven that some herbs in this category stimulate the central nervous system, excite respiratory and cardiac functions and increase blood pressure.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Loss of consciousness is a serious medical condition requiring immediate treatment. Possible causes of unconsciousness include ***febrile disorders***, ***heat trapped in the Pericardium***, and ***phlegm obstructing the sensory orifices.*** Viewed from allopathic medicine perspectives, these disorders include seizures, epilepsy, and stroke.

When using herbs that open orifices in traditional Chinese medicine, the *Ba Gang Bian Zheng* (Eight Principle Differentiation) diagnostic approach must be incorporated. One must discern whether the loss of consciousness is caused by deficiency or excess, and by cold or heat, factors that provide critical information for effective treatment/resuscitation. Based on this differentiation, the practitioner then combines substances that open the orifices with appropriate herbs from other categories to address the particular patterns accompanying the primary disorder.

She Xiang (Moschus)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

1. Accurate differential diagnoses of *tuo zheng* (abandoned syndrome) and *bi zheng* (closed disorder) are of vital importance. The two are treated with radically different strategies, and selecting inappropriate treatment will delay or complicate recovery.

- ***Tuo zheng* (abandoned syndrome):** Unconsciousness due to ***deficiency*** is described as *tuo zheng* (abandoned syndrome), wherein the patient exhibits lax or 'open' symptomology with 'abandoned body functions:' open mouth, open hands, faint pulse, closed eyes, urinary incontinence, and perspiration. This condition should be treated with herbs that tonify qi and restore yang. Moxibustion below the umbilicus is also beneficial. Unconsciousness due to deficiency, or *tuo zheng*, should not be treated with herbs that open orifices, as this will further accentuate the weakness and deficiency the individual is already experiencing. (It may be helpful to think of the herbs that open orifices as being substances that open all of one's 'doors and windows': a person experiencing unconsciousness characterized by *tuo zheng* is already too 'wide open' and needs to have the orifices closed, or at least protected from further loss of vital qi or substances.)

Chapter 16 — Orifice-Opening Herbs

- ***Bi zheng* (closed disorder):** Unconsciousness due to ***excess*** is referred to as *bi zheng* (closed disorder), wherein the patient exhibits 'closed' symptomology with clenched jaws, closed mouth, tight fists and a forceful pulse. This condition is most appropriately treated with herbs that open the sensory orifices and restore consciousness. Resuscitating herbs are only applicable to *bi zheng* (closed disorder) or excess types. There are both warm and cold herbs in this category, used to treat *bi zheng* (closed disorder) arising from cold or heat, respectively. (Again, if one uses the analogy of doors and windows, a closed-type unconsciousness is one in which the individual is 'closed off' from receiving input, thus needing the assistance of herbs that open him or her up again to receive nourishment, oxygen, and sensory stimuli.)

  Note: The pinyin names are exactly the same for 痹证 *bi zheng* (painful obstruction syndrome) and 闭证 *bi zheng* (closed disorder), though the Chinese characters are different. These two disorders have different symptomology, diagnoses, and treatments, and should not be incorrectly identified. Therefore, to avoid confusion, the term *bi zheng* (closed disorder) will be displayed with its translation throughout the entire text, without abbreviation.

2. In addition to differentiating between deficient and excess patterns of unconsciousness, one must also discern whether the disorder is cold or hot in nature.

- ***Loss of consciousness due to cold*** is characterized by a blue or greenish facial complexion, a cold body, pale face, and slow pulse. Such conditions should be treated with warm herbs that open the orifices and restore consciousness. In allopathic terminology, unconsciousness due to cold is usually caused by cerebrovascular accidents and poisoning.
- ***Loss of consciousness due to heat*** is characterized by a red face, warm body, yellow tongue coat, and rapid pulse. These conditions should be treated with cold herbs that open the orifices and restore consciousness. In the terminology of allopathic medicine, unconsciousness due to heat is often related to infectious diseases, meningitis, severe pneumonia, septicemia, heat stroke, liver disease, or toxic uremia.

Last, one must also consider any accompanying complications when treating these conditions. **Cold** conditions must be treated with herbs that dispel cold and warm the interior, **heat** conditions should be treated with herbs that clear heat and eliminate toxins, **seizures** and **convulsions** must be treated with herbs that calm Liver wind, and **pain** must be treated with herbs that activate qi and blood circulation.

CAUTIONS/CONTRAINDICATIONS

- Acrid and aromatic, herbs that open orifices consume qi and should be reserved for acute situations only. While they restore consciousness and relieve symptoms, they do not correct the underlying condition that causes the symptoms. Therefore, they must be combined with other herbs to successfully treat patients to the point of recovery and restored balance.
- The necessary dosage of orifice-opening herbs is usually low, and these substances should only be used for a short period of time, for symptomatic treatment *only*. These herbs are to be discontinued when the desired effect is achieved.

PROCESSING

All of the herbs in this category are acrid, travel in the organs and channels, and are able to disperse pathogenic elements (moving them outward from the body). Because the substances are aromatic, the preferred form of intake is either in pills or powder. They are seldom added to decoctions, as their effectiveness will be greatly compromised by cooking.

Chapter 16 — Orifice-Opening Herbs

PHARMACOLOGICAL EFFECTS

- **Effects on the central nervous system**: Some herbs in this category stimulate or inhibit the central nervous system (CNS), or exert *both* effects. *Bing Pian* (Borneolum Syntheticum) and *Zhang Nao* (Camphora) stimulate the CNS to increase heart rate, blood pressure, and respiration. The essential oil of *Shi Chang Pu* (Rhizoma Acori) is noted for its inhibitory effect on the central nervous system, which explains its use to treat seizures, epilepsy and convulsions. *She Xiang* (Moschus) has a regulating effect on the CNS, with a stimulating effect at low doses and an inhibiting effect when given in high doses.
- **Resuscitation**: Some orifice-opening herbs are used in formulations for emergency treatment of angina and myocardial infarction. These herbs have clearly demonstrated effectiveness in relieving pain, increasing resistance to hypoxia, and restoring normal blood perfusion to affected areas.

POTENTIAL HERB-DRUG INTERACTIONS

By the nature of disorders of sensory functioning, orifice-opening herbs are not used frequently or extensively. At the time of publication, there are no reported or documented interactions between these herbs and pharmaceuticals.

She Xiang (Moschus)

麝香

Pinyin Name: *She Xiang*
Alternate Chinese Names: *Dang Mei Zi, Yuan Cun Xiang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: musk, navel gland secretions of the musk deer
Zoological Name: *Moschus berezovskii* Flerov (*Lin She*); *Moschus sifanicus* Przewalski (*Ma She*), *Moschus moschiferus* L. (*Yuan She*)
Pharmaceutical Name: Moschus
Properties: acrid, warm
Channels Entered: Heart, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Opens Orifices, Awakes the *Shen* (Spirit) and Unblocks *Bi Zheng* (Closed Disorder)

***Bi zheng* (closed disorder):** *She Xiang* (Moschus) is one of the strongest substances in reviving the *shen* (spirit). It is the key, indispensable ingredient when treating diseases accompanied by impaired consciousness. Although it is warm, it treats both hot and cold types of *bi zheng* (closed disorder), when combined with other appropriate herbs.

***Bi zheng* (closed disorder) due to phlegm and heat:** *Bi zheng* (closed disorders) caused by phlegm and/or heat misting the Pericardium may present the following symptoms: impaired consciousness, unconsciousness, seizures, epilepsy, stroke, convulsions, stupor, fainting due to heatstroke or extreme emotional stimulation, and tetanus.

- Impaired consciousness caused by heat and phlegm, stroke, convulsions, and/or heat stroke: use *She Xiang* with *Niu Huang* (Calculus Bovis), *Bing Pian* (Borneolum Syntheticum) and *Zhu Sha* (Cinnabaris). **Exemplar Formula:** *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone).
- Infantile convulsions: combine it with *Niu Huang* (Calculus Bovis), *Tian Zhu Huang* (Concretio Silicea Bambusae) and *Zhu Sha* (Cinnabaris). **Exemplar Formula:** *Xiao Er Hui Chun Dan* (Return of Spring Special Pill (Pediatric)).
- Tremors and convulsions: use this substance with *Ling Yang Jiao* (Cornu Saigae Tataricae) and *Zhu Sha* (Cinnabaris).

***Bi zheng* (closed disorder) due to cold and phlegm:** Fainting from heatstroke, or extreme anger, that occurs at the end of summer and in the beginning of autumn, caused by infection, marked by fever, chest stuffiness, abdominal distention or vomiting and diarrhea.

- Impaired consciousness due to cold and phlegm: combine *She Xiang* with *Su He Xiang* (Styrax), *Tan Xiang* (Lignum Santali Albi) and *She Xiang* (Moschus). **Exemplar Formula:** *Su He Xiang Wan* (Liquid Styrax Pill).

2. Invigorates Blood Circulation, Opens Channels and Collaterals, Dissipates Clumps and Reduces Swelling

Carbuncles, sores, or hot swellings: *She Xiang* is usually applied topically when there is not yet an open lesion on the skin. This substance is aromatic and penetrating in nature and is most suitable to disperse stagnation in the *xue* (blood) level. It reduces swelling, invigorates blood, disperses stagnation and relieves pain. It is often combined with heat-clearing, toxin-eliminating and blood-invigorating herbs to relieve carbuncles and sores.

- Carbuncles, sores and hot swellings: use *She Xiang* with *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Sore throat: use it with *Niu Huang* (Calculus Bovis).
- Immobile palpable masses or organomegaly: use this substance alone, or with *Chi Shao* (Radix Paeoniae Rubrae), *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).

Amenorrhea: *She Xiang* (Moschus) enters the *xue* (blood) level and strongly invigorates the blood to open the channels.

- Amenorrhea: use *She Xiang* with *Dan Shen* (Radix Salviae Miltiorrhizae), *Chi Shao* (Radix Paeoniae Rubrae), *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami).

3. Relieves Pain

Traumatic injuries with blood stagnation: *She Xiang* is used frequently in the trauma departments of hospitals in China to relieve pain due to trauma, sprain, strain and bone fractures. This substance is used internally or topically to help the regeneration of tissues and bones, and to relieve pain and swelling. It also treats aches and pain of muscles and joints.

- Pain caused by traumatic injuries: use *She Xiang* with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha) and *Yan Hu Suo* (Rhizoma Corydalis). **Exemplar Formula:** *Qi Li San* (Seven-Thousandths of a Tael Powder).

She Xiang (Moschus)

- Angina pectoris, arteriosclerosis due to blood stagnation in the Heart: use this substance with *Mu Xiang* (Radix Aucklandiae) and *Tao Ren* (Semen Persicae).

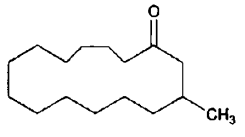
4. Induces Labor in Stillbirth

Stillbirth: With its strong penetrating properties, *She Xiang* expels a dead fetus or a placenta that fails to descend. It is not used to induce labor in a viable pregnancy, as it is too strong and thus may hurt the fetus.

- Stillbirth: use *She Xiang* with *Rou Gui* (Cortex Cinnamomi).

She Xiang also treats paralysis of the intestines, infantile paralysis, or toxic snake bites.

DOSAGE



0.06 to 0.10 gram [60 to 100 mg] as powder or pills. The maximum dose of *She Xiang* is 1.0 (one) gram. This substance should not be decocted because of its strong aromatic property. Traditionally, it was mixed with water or vinegar prior to ingestion. Today, it is mostly used in the powder or pill forms, internally. It is also given sublingually for treatment of angina, with effects comparable to nitroglycerin.

CAUTIONS / CONTRAINDICATIONS

- Use of *She Xiang* is contraindicated in pregnancy. It has been proposed, though not confirmed, that topical treatment may cause miscarriage like internal use is known to do.
- Deficient patients, especially those with yin deficiency, should use *She Xiang* with caution, as it is strong and may easily damage the constitution.
- According to some classic texts, ingestion of garlic is contraindicated while taking *She Xiang*.

CHEMICAL COMPOSITION

Muscone, normuscone, muscopyridine, allantoin, androsterone, olein.[1,2]

Muscone

PHARMACOLOGICAL EFFECTS

- **Effects on the central nervous system:** Small doses of *She Xiang* and muscone have a stimulating effect on the central nervous system, while large doses have an inhibiting effect. The effect of *She Xiang* to open the sensory orifices is associated with its function to reduce cerebral edema, increase blood perfusion to the brain, and increase resistance of the central nervous system to hypoxia.[3]
- **Cardiovascular:** The use of *She Xiang* is associated with a positive inotropic effect, a positive cardiotonic effect, and an increase in cardiac output in frog heart specimens. With intravenous injection, it significantly lowered blood pressure. *Muscone*, on the other hand, has demonstrated mixed effects on the cardiovascular system in various animal species.[4]
- **Antibiotic:** *Muscone* has an inhibitory effect against *Staphylococcus aureus* and *E. coli*.[5]
- **Uterine stimulant:** *She Xiang* and muscone both have a stimulating effect on the smooth muscles, leading to contraction of the uterus. Pregnant uteri are more strongly influenced by this than non-pregnant ones.[6]
- **Antineoplastic:** *She Xiang* and muscone have demonstrated preliminary effectiveness against ascites and carcinoma in mice.[7] In humans, it has been used to treat cancers of the esophagus, gastric glands, colon, and urinary bladder.[8]

CLINICAL STUDIES AND RESEARCH

- **Angina:** Sublingual administration of *She Xiang* has shown effectiveness in treating 367 patients with angina and coronary artery disease.[9] In another study of 287 patients, an herbal paste that incorporated *She Xiang* as the main ingredient showed marked effectiveness when placed on *Xinshu* (UB 15). The dressing was changed once every 24 hours.[10]
- **Hepatitis and cirrhosis:** Bilateral injection of 2 ml of 5% *She Xiang* (equivalent to 100mg) at *Zhangmen* (LR 13), alternating with *Qimen* (LR 14), one time per week for 4 weeks per course of treatment, showed satisfactory results in 32 patients with chronic hepatitis or early-stage liver cirrhosis.[11]
- **Low back pain:** According to one report, 21 patients with low back pain due to trauma were treated with satisfactory results using an injection of 2 to 4 ml of 0.2% *She Xiang* to *ah shi* points one time per week for 2 weeks.[12]
- **Vitiligo:** Subcutaneous injection of 0.4% *She Xiang* had 83.33% effectiveness in treating 78 patients with varying degrees of vitiligo. Injections were given twice a week, for 3 months per course of treatment, for a total of 2 to 3 courses of treatments.[13]
- **Cancer:** Injection of *She Xiang* has shown beneficial effects in treating 96 patients with various cancers, including esophagus, stomach, liver, colon, and rectal cancers. Beneficial results include increased appetite, reduced swelling, and improvement of other symptoms.[14]

TOXICOLOGY

Overdose of *She Xiang* in mice is associated with symptoms such as tremor, closed eyes, and respiratory depression. In one study, the LD_{50} of *She Xiang* via intraperitoneal

She Xiang (Moschus)

injection was 331.1 mg/kg. In another study, the LD_{50} of *She Xiang* via intravenous injection was 6 g/kg.[15,16,17]

AUTHORS' COMMENTS

She Xiang is considered the most potent of all aromatic substances, as it opens channels and collaterals to treat unconsciousness, carbuncles, immobile masses and amenorrhea. Its dispersing property treats pain in the chest or abdomen, or pain due to trauma or wind-damp obstruction. Because of its potent and broad dispersing effects, some classic texts state that *She Xiang* enters all twelve channels to treat stagnation.

She Xiang and *Su He Xiang* (Styrax) have similar effects in opening the orifices and awakening the *shen* (spirit).

- *She Xiang* is stronger in opening the orifices and is suitable for both cold and hot types of *bi zheng* (closed disorder). It invigorates the blood, dispels stagnation and stops pain.
- *Su He Xiang* is weaker than *She Xiang* and is primarily used for cold type *bi zheng* (closed disorder) caused by phlegm. It dispels dampness and treats pain and stifling sensations in the chest and abdomen.

Bing Pian (Borneolum Syntheticum)

冰片

Pinyin Name: *Bing Pian*
Literal Name: "ice slice"
Alternate Chinese Names: *Nao Xiang, Mei Pian, Long Nao Xiang, Pian Nao, Mei Hua Niao, Mei Pian*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: borneol
Botanical Name: *Dryobalanops aromatica* Gaertn. f. (*Long Nao Xiang*)
Pharmaceutical Name: Borneolum Syntheticum
Properties: acrid, bitter, cool
Channels Entered: Heart, Spleen, Lung

Bing Pian (Borneolum Syntheticum)

CHINESE THERAPEUTIC ACTIONS

1. Opens the Orifices, Resuscitates and Revives the *Shen* (Spirit)

Fainting, unconsciousness, convulsions or childhood convulsions: *Bing Pian* (Borneolum Syntheticum) is commonly used to treat emergency cases of fainting and unconsciousness. Compared with *She Xiang* (Moschus), *Bing Pian* is milder but has similar effects.

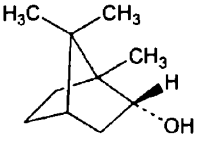
- Convulsions due to heat: use *Bing Pian* with *Niu Huang* (Calculus Bovis), *Quan Xie* (Scorpio) and *She Xiang* (Moschus). **Exemplar Formula:** *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone).
- Convulsions due to cold: use this substance with *Su He Xiang* (Styrax) and *She Xiang* (Moschus). **Exemplar Formula:** *Su He Xiang Wan* (Liquid Styrax Pill).

2. Clears Heat, Relieves Pain, Stops Itching

Toxic heat affecting the eyes, throat and skin: Common symptoms of toxic heat include sore throat, ulcers in the oral cavity, painful swollen gums, swelling, redness and pain in the eyes. This substance is not harmful to the skin or mucous membranes and thus can be applied topically to the throat and gums without adverse reactions. In addition to clearing heat and relieving pain, it also prevents decay and relieves itching. This is one of the best substances for topical use to reduce swelling, clear heat, eliminate toxins and help to regenerate flesh.

- Swollen and painful gums and throat, hoarse voice: mix *Bing Pian* with the powder of *Peng Sha* (Borax), *Yuan Ming Fen* (Matrii Sulfas Exsiccatus) and *Zhu Sha* (Cinnabaris), and apply topically.
- Thrush, white mouth or mycotic stomatitis: mix this substance with the powder of *Xiong Huang* (Realgar), *Peng Sha* (Borax) and *Gan Cao* (Radix Glycyrrhizae), and apply topically.
- Redness, swelling and painful eyes: use *Bing Pian* alone. This substance is often found in eye drops for relief of swelling.
- Ulceration with pain and swelling of the skin, ears or nose: apply it topically with the powder of *Niu Huang* (Calculus Bovis) and *Zhen Zhu* (Margarita).
- Toothache: apply this substance topically with *Zhu Sha* (Cinnabaris) powder.
- Suppuration with ulceration: combine it with *Chi Shi Zhi* (Halloysitum Rubrum), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Qing Fen* (Calomelas), *Peng Sha* (Borax) and *Long Gu* (Os Draconis) to generate flesh.
- Redness, swelling and pain of the eyes, visual disturbance: use *Bing Pian* topically as a single remedy to clear heat and reduce swelling.

DOSAGE



0.15 to 0.30 gram in pill or powder form. *Bing Pian* is not used in decoctions.

CAUTIONS / CONTRAINDICATIONS

- Use of *Bing Pian* is contraindicated in pregnancy.
- Do not expose *Bing Pian* to fire or heat. Do not cook it in decoction.

CHEMICAL COMPOSITION

Borneol, isoborneol, camphor, humulene, β-elemene, caryophyllene, asiatic acid, erythrodid.[1,2]

Borneol

PHARMACOLOGICAL EFFECTS

- **Antibiotic**: *Bing Pian* has an inhibitory effect against *Staphylococcus aureus, Diplococcus pneumoniae, E. coli* and some dermatophytes.[3]
- **Effect on pregnancy**: Administration of *Bing Pian* during the second and third trimester induces labor in mice.[4]

CLINICAL STUDIES AND RESEARCH

- **Dizziness**: Topical application of *Bing Pian* on ear points was 97% effective in treating 77 patients with dizziness. The size of *Bing Pian* used was similar to a grain of rice. The points selected included *Shenmen*, Brain, Pituitary, Heart, and others. Two to three points were selected for each treatment, with seeds changed every three days. The total duration of treatment was 12 to 24 days.[5]
- **Dermatological use**: Topical application of *Bing Pian* and *Da Huang* (Radix et Rhizoma Rhei) at a 1:10 ratio was extremely effective in treating 230 patients with various abscesses and swellings. Herbal powder was applied to the affected area, with a dressing change every 2 to 3 days. Most patients reported complete recovery within three treatments.[6]
- **Otitis media**: In one study, 324 patients with acute or chronic suppurative otitis media were treated with topical application of an herbal formula, with complete recovery in 64.7% cases, and an overall rate of effectiveness of 93.4%. The treatment protocol was to apply the herbal powder sparingly to the affected area. The herbal formula contained *Bing Pian* 2.5g, *She Xiang* (Moschus) 0.5g, *Zhang Nao* (Camphora) 10g, *Long Gu* (Os Draconis) 15g, *Huang Lian* (Rhizoma Coptidis) 10g, and *Mu Li* (Concha Ostreae) 10g.[7]

Bing Pian (Borneolum Syntheticum)

- **Herpes zoster:** Topical application of *Bing Pian* was used to treat 30 patients with herpes zoster, with satisfactory results. The treatment protocol was to mix 10 to 30 grams of *Bing Pian* with rice water to make a 40% herbal paste, which was then placed on the affected area three to four times daily for 3 to 5 days.[8]

TOXICOLOGY

The LD_{50} for oral ingestion of *Bing Pian* is 2,269 to 2,879 mg/kg in mice.[9]

AUTHORS' COMMENTS

"*Bing Pian*" is available in both synthetic and natural forms. The synthetic form, *Bing Pian* (Borneolum Syntheticum), is the most commonly-used form, as it has similarly potent effects and is much less expensive than the natural form.

Su He Xiang (Styrax)

蘇合香 苏合香

Pinyin Name: *Su He Xiang*
Literal Name: "revive and join fragrance"
Alternate Chinese Names: *Su He*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: styrax, storesin
Botanical Name: *Liquidambar orientalis* Mill. (*Su He Xiang Shu*)
Pharmaceutical Name: Styrax
Properties: acrid, warm
Channels Entered: Heart, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Opens Orifices and Disperses Turbidity

Stroke caused by phlegm, convulsions: *Su He Xiang* (Styrax) is aromatic and is best at warming channels, opening orifices, dispersing turbidity and relieving stagnation. It is effective for all stroke patients who experience sudden unconsciousness. It is most suitable for cold-type *bi zheng* (closed disorder).

- Sudden unconsciousness or cold-type *bi zheng* (closed disorder): use *Su He Xiang* with *She Xiang* (Moschus), *Bing Pian* (Borneolum Syntheticum) and *Zhu Sha* (Cinnabaris). **Exemplar Formula:** *Su He Xiang Wan* (Liquid Styrax Pill).

2. Relieves Pain

Chest and abdominal coldness and pain: *Su He Xiang* is excellent for chest or abdominal coldness and pain caused by qi, blood, cold or phlegm stagnation. The primary function of this substance is to dispel stagnation. *Su He Xiang* has been made into pills primarily for angina pectoris and coronary artery disorders.

- Chest and abdominal pain: use *Su He Xiang* with *Chen Xiang* (Lignum Aquilariae Resinatum), *Tan Xiang* (Lignum Santali Albi), *Xiang Fu* (Rhizoma Cyperi) and *Ding Xiang* (Flos Caryophylli).
- Angina: use this substance with *Bing Pian* (Borneolum Syntheticum), *Tan Xiang* (Lignum

Su He Xiang (Styrax)

Santali Albi), *Ru Xiang* (*Gummi* Olibanum) and *Qing Mu Xiang* (Radix Aristolochiae).

DOSAGE

0.3 to 1.0 gram in pill form. *Su He Xiang* is not suitable for decoction. For external use, it can be mixed with alcohol.

CAUTIONS / CONTRAINDICATIONS

- *Su He Xiang* is contraindicated in *bi zheng* (closed disorder) caused by heat or deficiency.

CHEMICAL COMPOSITION

Oleanonic acid, 3-epi-oleanonic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Hematological:** *Su He Xiang* has antiplatelet action and prolongs clotting time.[2]
- **Cardiovascular:** *Su He Xiang* is commonly used to treat coronary artery disease. It benefits cardiac muscle by increasing blood perfusion, decreasing heart rate, decreasing oxygen consumption, and increasing muscle resistance to hypoxia.[3]
- **Others:** It has demonstrated mild antibiotic and anti-inflammatory effects.[4]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease (CAD):** *Su He Xiang* has been incorporated into various herbal formulations for the treatment of CAD, with good success. In one study, 146 patients with CAD were treated with a 91.5% rate of effectiveness using an herbal formula containing *Su He Xiang*, *Bing Pian* (Borneolum Syntheticum), *Mu Xiang* (Radix Aucklandiae), *Zhu Sha* (Cinnabaris) and *Tan Xiang* (Lignum Santali Albi). In another study, 301 patients with CAD were treated with an 83.4% rate of effectiveness using an herbal formula containing *Su He Xiang* and *Bing Pian*.[5]
- **Biliary tract ascariasis:** One report states that 8 out of 9 patients with biliary tract ascariasis responded favorably to a preparation of *Su He Xiang* given two to three times daily with warm water.[6]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Su He Xiang* has antiplatelet action, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this substance may potentiate the effect of drugs such as warfarin.[7] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

AUTHORS' COMMENTS

Su He Xiang and *She Xiang* (Moschus) are similar in their action to open the orifices and awaken the *shen* (spirit).

- *Su He Xiang* is weaker than *She Xiang*, and is primarily used for cold-type *bi zheng* (closed disorder), such as stroke or convulsion caused by phlegm. Furthermore, it dispels dampness and treats pain and stifling sensations in the chest and abdomen.
- *She Xiang* is stronger in opening the orifices and is suitable for both cold and hot-type *bi zheng* (closed disorders). It also invigorates the blood, dispels stagnation and stops pain.

Shi Chang Pu (Rhizoma Acori)

石菖蒲 石菖蒲

Pinyin Name: *Shi Chang Pu*
Alternate Chinese Names: *Chang Pu, Sui Chang Pu, Bai Chang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: acorus, grass-leaf sweet-flag rhizome
Botanical Name: *Acorus tatarinowii* Schott; *Acorus gramineus* Soland.
Pharmaceutical Name: Rhizoma Acori
Properties: acrid, warm
Channels Entered: Heart, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Opens Orifices, Vaporizes Turbid Phlegm

Obstruction caused by phlegm: *Shi Chang Pu* (Rhizoma Acori) is one of the best and the most potent substances at opening sensory orifices. It treats phlegm obstructing the sensory orifices causing coma, unconsciousness, manic behavior, delirium, high fever, seizures and epilepsy.

- High fever with coma or unconsciousness caused by hot phlegm: use it with *Yu Jin* (Radix Curcumae), *Lian Qiao* (Fructus Forsythiae), *Zhu Ye* (Herba Phyllostachys) and *Tian Zhu Huang* (Concretio Silicea Bambusae).
- Manic behavior with greasy tongue coat and slippery pulse: add it to *Yuan Zhi* (Radix Polygalae), *Dan Nan Xing* (Arisaema cum Bile), *Fu Shen* (Poria Paradicis) and *Sheng Tie Luo* (Frusta Ferri).
- Manic behavior with constipation: use this substance with *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas), *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus).
- Epilepsy: use *Shi Chang Pu* alone, or with *Yu Jin* (Radix Curcumae), *Ming Fan* (Alumen) and *Zhu Sha* (Cinnabaris).

2. Opens Orifices, Pacifies *Shen* (Spirit)

Obstruction caused by phlegm: *Shi Chang Pu* effectively opens sensory orifices and pacifies *shen*, and improves sensory and cognitive functions. It treats forgetfulness, tinnitus, deafness, dizziness, and dulled sensorium.

- Forgetfulness or insomnia: combine *Shi Chang Pu* with *Ren Shen* (Radix Ginseng), *Fu Shen* (Poria Paradicis) or *Yuan Zhi* (Radix Polygalae).
- Tinnitus or deafness due to Kidney deficiency: pair this herb with *Ci Shi* (Magnetitum) or *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).

3. Transforms Turbid Dampness, Harmonizes the Middle *Jiao*

Dampness accumulation in the middle *jiao*: Damp obstruction of the middle *jiao* results in impairment of the Spleen's transportation and transformation functions. Chief symptoms of this condition include chest and abdominal fullness, distention and pain, poor appetite, and a feeling of thick, copious saliva in the mouth.

- Dampness accumulation in the middle *jiao*: use *Shi Chang Pu* with *Huo Xiang* (Herba Agastache), *Cang Zhu* (Rhizoma Atractylodis), *Chen Pi* (Pericarpium Citri Reticulatae), *Fu Ling* (Poria) and *Hou Po* (Cortex Magnoliae Officinalis).
- Damp-heat diarrhea: use it with *Shi Lian Zi* (Herba Sinocrassulae Indicae), *Huang Lian* (Rhizoma Coptidis), *Chen Pi* (Pericarpium Citri Reticulatae) and *He Ye* (Folium Nelumbinis).
- Diarrhea with Spleen deficiency: add it to *Dang Shen* (Radix Codonopsis), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Diarrhea accompanied by exterior conditions: use this herb with *Shi Lian Zi* (Herba Sinocrassulae Indicae), *Ge Gen* (Radix Puerariae), *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).

4. Benefits the Throat

Hoarse voice: *Shi Chang Pu* benefits the throat to treat hoarse voice due to laryngitis or inflammation of the vocal cords.

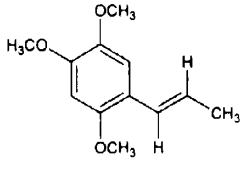
- Hoarse voice and dry mouth: use *Shi Chang Pu* with *Pang Da Hai* (Semen Sterculiae Lychnophorae), *Gu Zhi Hua* (Semen Oroxyli), *Shi Hu* (Herba Dendrobii) and *Mai Men Dong* (Radix Ophiopogonis).

Shi Chang Pu (Rhizoma Acori)

5. Others

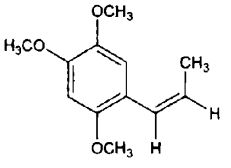
Shi Chang Pu treats eczema, carbuncles, boils and pain caused by trauma, or *bi zheng* (painful obstruction syndrome) characterized by wind-damp obstruction. *Shi Chang Pu* may be used internally or topically.

DOSAGE



5 to 10 grams for dried *Shi Chang Pu*, 10 to 20 grams for the fresh herb. *Shi Chang Pu* is often used in decoctions or pills. Grind it into powder or use as a decoction for an external wash, if applying this substance topically.

CAUTIONS / CONTRAINDICATIONS



- Use of *Shi Chang Pu* is not suitable for patients with spermatorrhea, sweating, or yin and blood deficiencies.

CHEMICAL COMPOSITION

α-asarone, β-asarone, caryophyllene, α-humulene, sekishone, asaronaldehyde.[1,2]

α-asarone

β-asarone

PHARMACOLOGICAL EFFECTS

- **CNS suppressant:** Hypnotic influence is observed with use of essential oil of *Shi Chang Pu*, antiseizure action is observed with the water extract, and sedative effects are observed with both.[3]
- **Effect on memory**: Administration of *Shi Chang Pu* is associated with an improvement in memory. In a laboratory study, 55 mice were divided into three groups, with group one receiving normal saline, group two receiving 0.1 g/kg of *Shi Chang Pu* and group three receiving 0.2 g/kg. The mice were then placed in a maze to test the time required to exit the maze and the number of mistakes committed. The same exercise was repeated daily for 6 days. At the end of the study, it was concluded that *Shi Chang Pu* has a dose-dependent effect in mice in reducing the time required and mistakes made to exit the maze.[4]
- **Gastrointestinal:** Decoction of *Shi Chang Pu* stimulates the secretion of gastric acid.[5]

CLINICAL STUDIES AND RESEARCH

- **Seizures and convulsions**: In one study, 50 mg of α-asarone given three times daily for 30 days per course of treatment was approximately 83.3% effective in controlling seizures and convulsions in 90 patients.[6]
- **Chronic obstructive pulmonary disease (COPD)**: According to one report, 148 patients with COPD were treated with an 85.5% rate of effectiveness using 60 mg of α-asarone three times daily for 14 to 21 days.[7]
- **Mental retardation:** Use of an herbal treatment was associated with mild to moderate improvement in classroom performance in 30 children with low intelligence quotients (IQ). The herbal formula contained *Ren Shen* (Radix Ginseng), *Yuan Zhi* (Radix Polygalae), *Bu Gu Zhi* (Fructus Psoraleae), *Bai Dou Kou* (Fructus Amomi Rotundus), milk powder, cocoa, and sugar. Children were given 10 to 15 grams of the formula twice daily for 2 weeks per course of treatment, for a total of three months of treatment.[8]

HERB-DRUG INTERACTION

- **Ethanol:** In an *in vitro* study, a traditional Chinese medicinal preparation containing *Shi Chang Pu, Ren Shen* (Radix Ginseng), *Yuan Zhi* (Radix Polygalae), and *Fu Ling* (Poria) was found to reduce ethanol-induced impairment of memory registration. It also ameliorated scopolamine-induced memory registration deficit. These results suggest that this herbal preparation ameliorates the impairment effect of ethanol on learning and memory processes.[9]

TOXICOLOGY

The LD_{50} for water extract of *Shi Chang Pu* via intraperitoneal injection is 53 g/kg in mice. The LD_{50} for α-asarone via intraperitoneal injection is 338.5 mg/kg. Toxic effects include seizures, convulsion, slowed respiration rate, and death within 16 to 24 hours.[10]

SUPPLEMENT

- 九節菖蒲 / 九节菖蒲 *Jiu Jie Chang Pu* (Rhizoma Anemones Altaicae) is acrid and warm. The primary functions of *Jiu Jie Chang Pu* are to open sensory orifices, eliminate phlegm, and pacify the *shen* (spirit). It treats unconsciousness due to febrile diseases or phlegm obstruction, seizure, tinnitus, deafness, and chest and abdominal distention and pain. Compared to *Shi Chang Pu, Jiu Jie Chang Pu* does not contain essential oil, and is slightly toxic. Therefore, they should not be used interchangeably. The dosage for *Jiu Jie Chang Pu* is 3 to 5 grams.
- 水菖蒲 / 石菖蒲 *Shui Chang Pu* (Rhizoma Acori Calami) is acrid, bitter, warm, and enters the Heart, Spleen and Large Intestine. *Shui Chang Pu* dispels phlegm, opens sensory orifices, strengthens the Spleen, dissolves dampness, and kills parasites. *Shui Chang Pu* and *Shi Chang Pu* (Rhizoma Acori) are derived from the same genus and have similar functions, and are sometimes substituted for each other. Pharmacologically, *Shui Chang Pu* has an antibiotic effect against MRSA, and

Shi Chang Pu (Rhizoma Acori)

potentiates the antibiotic effect of chloramphenicol.[11] The dosage for *Shui Chang Pu* is 3 to 6 grams.

AUTHORS' COMMENTS

Shi Chang Pu and *Yuan Zhi* (Radix Polygalae) both improve memory and cognitive performance. *Shi Chang Pu* works by opening sensory orifices and improving alertness. *Yuan Zhi* works by calming the *shen* (spirit) and relieving hyperactivity and poor concentration.

According to Dr. Gan Zhu-Wang, *Shi Chang Pu* treats otitis media associated with frequent flying or changes of pressure within the ears.

Chapter 16 summary

— Orifice-Opening Herbs

Name	Similarities	Differences
She Xiang (Moschus)	Open the orifices	Invigorates blood circulation and disperses blood stagnation
Bing Pian (Borneolum Syntheticum)	and awaken	Clears heat and stops pain when used externally
Su He Xiang (Styrax)	the *shen* (spirit)	Warms the channels and disperses cold *bi zheng* (closed disorder)
Shi Chang Pu (Rhizoma Acori)		Dissolves dampness and harmonizes the middle *jiao*

General Characteristics of Orifice-Opening Herbs:

Taste: acrid
Thermal property: aromatic and warm
Channels entered: Heart
Therapeutic actions: open sensory orifices, awaken *shen* (spirit)

These herbs open the sensory orifices, awaken the *shen*, and restore normal sensory perceptions. They are taken internally or applied topically. Clinical applications include fire in the Heart or phlegm misting the Heart, manifesting in symptoms of tremor, spasms, stroke and convulsions.

She Xiang (Moschus), ***Bing Pian*** (Borneolum Syntheticum) and ***Su He Xiang*** (Styrax) are aromatic, extremely penetrating in nature, and treat a variety of disorders with excellent results, such as angina pectoris in coronary heart disease. In addition, they may be used to treat masses, accumulations, and *bi zheng* (closed disorder).

She Xiang (Moschus) and ***Bing Pian*** (Borneolum Syntheticum), are also used topically to treat toxic swellings, scrofulae, sores and furuncles. In addition, *She Xiang* treats traumatic injuries, amenorrhea, dysmenorrhea, difficult labor, eye disorders, sore throat and childhood convulsions.

Shi Chang Pu (Rhizoma Acori) treats mania, stupor and mental disorientation, forgetfulness and insomnia.

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH ORIFICE-OPENING FUNCTIONS

Name	Functional Category
Chan Su (Venenum Bufonis)	Substances for Topical Application (Chapter 20)

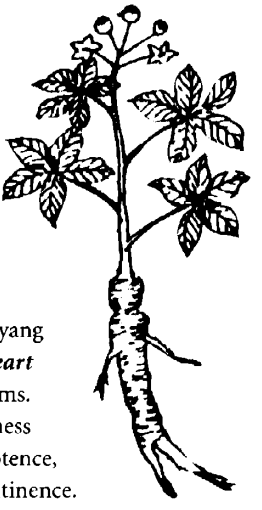
Bie Jia Jiao (Gelatinum Carapax Trionycis) 968
Hei Zhi Ma (Semen Sesami Nigrum) 969
Bai Mu Er (Fructificatio Tremellae Fuciformis) 970
Zhi Ju Zi (Fructus Hoveniae) 971

Chapter 17

— Tonic Herbs



Definition: To 'tonify' is to strengthen qi, tonify blood, nourish yin, and build yang. Tonic herbs improve functioning of internal organs, strengthen bodily constitution, boost immunity, and improve overall health.

Qi, yang, blood, and *yin* are fundamental elements in the body. Deficiencies of *qi* or *yang* represent a decline in physical function, while deficiencies of *blood* or *yin* represent shortages of bodily substance.

SUBCATEGORIES OF ACTION

1. ***Qi-tonifying herbs*** strengthen the ***Spleen*** and ***Lung*** to improve the functionality of these two organs. The ***Spleen*** is responsible for transportation of fluids and transformation of food, and Spleen qi deficiency is characterized by lethargy, lack of energy, weakness of the extremities, poor appetite, abdominal fullness and distention, diarrhea, weight loss, edema, organ prolapse (mostly stomach, uterus or rectum), and bleeding. The ***Lung*** is responsible for respiration, and Lung qi deficiency is characterized by shortness of breath, lack of desire to speak, wheezing and dyspnea following minimal physical activity, and perspiration.
2. ***Yang-tonifying herbs*** build ***Kidney yang.*** Since Kidney yang is considered the source of yang for the entire body, tonifying Kidney yang will benefit patients with ***Spleen yang*** and ***Heart yang*** deficiencies. The Kidney is responsible for the reproductive and genitourinary systems. Kidney deficiency leads to disorders such as aversion to cold, lower back and knee weakness and pain, lower abdominal coldness and pain, infertility, premature ejaculation, impotence, leukorrhea with clear discharge, frequent nighttime urination, and urinary incontinence. Disorders characterized by yang deficiency may be effectively treated with Kidney yang tonic herbs.
3. ***Blood-tonifying herbs*** tonify blood. Blood deficiency has an impact on the ***Spleen, Liver*** and ***Heart***, or it can also arise from weakness or failure of these organs. The Spleen *controls* blood, the Liver *stores* blood, and the Heart *controls blood vessels.* Inadequate supplies of blood adversely influence the ability of each organ to carry out its functions. Deficiency of blood is characterized by sallow facial appearance, pale lips and nails, excessive worries, palpitations, forgetfulness, insomnia, excessive dreaming, being easily frightened, weight loss, edema, diminished menses, light-colored menstrual flow, delayed menstruation, or amenorrhea.
4. ***Yin-tonifying herbs*** nourish yin and promote generation of body fluids. Yin deficiency occurs as a result of febrile disorders, chronic illnesses or injurious lifestyles, and is usually related to or adversely affects the ***Kidney*** and ***Liver.*** Classic signs and symptoms of yin deficiency include emaciation, lower back and knee pain and soreness, muscle and bone weakness, decreased sperm production, dizziness, tinnitus, dry eyes, lightheadedness, and forgetfulness. Yin deficiency may be complicated by heat, due to the inability of yin to control yang. Yin-deficient heat is characterized by tidal fever, red cheeks, warm palms and soles, dry mouth and throat, spermatorrhea, night sweats, dry stools, red or cracked tongue, thin or absent tongue coating, and a thready, rapid pulse.

   In addition to the Liver and Kidney, yin deficiency also occurs in the ***Stomach*** and ***Lung.*** Stomach yin deficiency is characterized by dry mouth, thirst, dry red tongue, dry heaves, and dry stools or constipation. Lung yin deficiency is characterized by dry cough, scanty or

Ren Shen (Radix Ginseng)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

Deficiencies of qi or yang represent a decline in physical function, while deficiencies of blood or yin represent shortages of bodily substance.

Chapter 17 — Tonic Herbs

no sputum, cough with scanty phlegm streaked with blood, dry mouth and tongue, and is recognized also by the chronic nature of the illness. Yin deficiency may occur in various organs with or without complications, and must be treated accordingly.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Tonic herbs build, strengthen, nourish or increase qi, blood, yin and yang. While deficiency in each of the substances may occur singly, it is far more common for deficiencies to appear in combinations.

Deficiencies may occur singly, but more commonly appear in combination.

- ***Deficiency of qi and yang***, each of which represent elements of body functionality, often occur together. Severe cases of qi deficiency may lead to yang deficiency, while yang deficiency is *always* accompanied by qi deficiency.
- ***Deficiency of qi and blood*** occur together frequently, as formation of one is dependant on the supply of the other. In other words, the production of qi requires an adequate supply of blood, and production of blood requires an adequate supply of qi. Therefore, qi and blood tonics are often used together.
- ***Deficiency of qi and yin*** often occur together, as febrile disorders or chronic illness greatly consume both elements. Herbs that nourish yin and promote generation of body fluids facilitate recovery of physical function and rehabilitation of qi. Therefore, qi and yin tonics have synergistic action in treating qi and yin deficiencies.
- ***Deficiency of yin and blood*** also occur together, as what affects yin will also affect blood, and vice-versa. When yin and blood deficiency occur together, tonics for both are used simultaneously.
- ***Deficiency of yin and yang*** may occur together, as the formation of one is dependant on the other. In other words, chronic yin deficiency will lead to yang deficiency, and chronic yang deficiency will lead to yin deficiency. Therefore, herbs that nourish yin and tonify yang are commonly used together.

Deficiency of qi, blood, yin and/or yang weakens the physical constitution, and increases the vulnerability of the body to additional imbalances. Thus, conditions arising from deficiency often include complications.

- Yang deficiency is often accompanied by ***cold***, and requires treatment to tonify yang and dispel cold.
- Yin deficiency is often accompanied by ***deficiency heat*** that requires treatment to nourish yin and clear deficiency heat.
- Qi deficiency is often accompanied by ***qi stagnation***, requiring treatment to tonify qi and invigorate qi circulation.
- Blood deficiency may lead to ***forgetfulness*** and ***insomnia***, and requires herbs to tonify blood and calm the *shen* (spirit).
- Qi deficiency may be complicated by the presence of an ***exterior syndrome***, which requires simultaneous treatment using herbs that tonify qi and release the exterior.

CAUTIONS/CONTRAINDICATIONS

- Qi-tonic herbs are sweet, sometimes cloying, and in the presence of weakness or other imbalance, they may create dampness and stagnation in the middle *jiao*.
- Yang-tonic herbs are warm and drying, and if indiscriminately prescribed, may damage yin and increase heat.
- Blood- and yin-tonic herbs are sometimes heavy or greasy, and thus may create dampness and interfere with normal digestive functions.

Note: Patients who are extremely deficient may not benefit immediately from administration of tonic herbs, as their body may be too weak to digest and absorb the nutrients involved. Astringent herbs or mild tonics should be used for a long period of time to ensure successful and complete recovery. Proper treatment in such situations requires patience and persistence, as aggressive tonic treatment may, in fact, delay recovery.

Chapter 17 — Tonic Herbs

PROCESSING

Tonic herbs require prolonged cooking to ensure complete extraction of active constituents. To improve patient compliance for long-term use, these herbs should be given in pill form or in herbal tincture.

PHARMACOLOGICAL EFFECTS

- **Immunologic:** Many tonic herbs enhance the immune system by increasing white blood cell and lymphocyte counts, and by enhancing both cellular and humoral immunity.

  Herbs that increase white blood cell counts in patients with chemotherapy-induced bone marrow suppression include *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Nu Zhen Zi* (Fructus Ligustri Lucidi), *Bai Shao* (Radix Paeoniae Alba) and *Gou Qi Zi* (Fructus Lycii).

  Herbs that effectively increase lymphocyte counts in cancer patients include *Yin Yang Huo* (Herba Epimedii), *He Shou Wu* (Radix Polygoni Multiflori), and *Sha Shen* (Radix Glehniae seu Adenophorae).

  Herbs that increase phagocytic activities of macrophages include *Ren Shen* (Radix Ginseng), *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali) and *Yin Yang Huo* (Herba Epimedii).

  Among herbs that increase the activities of T-lymphocytes and natural killer cells is *Dong Chong Xia Cao* (Cordyceps).

  Ren Shen (Radix Ginseng) increases IgM count. *Huang Qi* (Radix Astragali) increases IgE count.
- **Adaptogenic:** Tonic herbs influence various systems to enhance the body's ability to adapt to stressful situations. Mechanisms of adaptogenic effects are attributed to regulation of the cardiovascular, nervous, and respiratory systems.

  Increased resistance to radiation can be achieved with *Ren Shen* (Radix Ginseng) and *Ci Wu Jia* (Radix et Caulis Acanthopanacis Senticosi).

  Increased resistance to hypoxia can be accomplished with *Ren Shen* (Radix Ginseng), *Ci Wu Jia* (Radix et Caulis Acanthopanacis Senticosi), *Yu Zhu* (Rhizoma Polygonati Odorati), and *Shu Di Huang* (Radix Rehmanniae Preparata).

  Drug-induced liver damage can be minimized by use of *Ren Shen* (Radix Ginseng), *Wu Wei* Zi (Fructus Schisandrae Chinensis), *Shu Di Huang* (Radix Rehmanniae Preparata), *Dang Gui* (Radicis Angelicae Sinensis), *Gou Qi* Zi (Fructus Lycii) and *Huang Qi* (Radix Astragali).

  Mental and physical fatigue can be reversed with *Ren Shen* (Radix Ginseng), *Ci Wu Jia* (Radix et Caulis Acanthopanacis Senticosi) and *Wu Wei* Zi (Fructus Schisandrae Chinensis).
- **Endocrinological**: Some tonic herbs stimulate the endocrine system to increase secretion of endogenous hormones, including ACTH, thyroid hormone, adrenocortical hormones, male and female hormones and others.

  Herbs that regulate the adrenal cortex include *Ren Shen* (Radix Ginseng), *Ci Wu Jia* (Radix et Caulis Acanthopanacis Senticosi), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Gan Cao* (Radix Glycyrrhizae).

  Herbs that stimulate the production of male hormones include *Lu Rong* (Cornu Cervi Pantotrichum), *Yin Yang Huo* (Herba Epimedii), and *Dong Chong Xia Cao* (Cordyceps).

  Herbs that stimulate the production of female hormones include *Bu Gu Zhi* (Fructus Psoraleae) and *She Chuang Zi* (Fructus Cnidii).

Deficiency increases bodily vulnerability to additional imbalances.

- **Metabolic**: Some substances lower plasma glucose and cholesterol levels, such as *Ren Shen* (Radix Ginseng), *Yu Zhu* (Rhizoma Polygonati Odorati), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Gou Qi Zi* (Fructus Lycii), *Huang Jing* (Rhizoma Polygonati) and *Yin Yang Huo* (Herba Epimedii). Herbs that lower plasma cholesterol levels include *Ren Shen*, *Nu Zhen Zi* (Fructus Ligustri Lucidi), *Dang Gui* (Radicis Angelicae Sinensis), *He Shou Wu* (Radix Polygoni Multiflori), *Gou Qi Zi*, *Huang Jing*, and *Yin Yang Huo*.
- **Cardiovascular**: Tonic herbs increase contractility of cardiac muscle, dilate blood vessels, decrease blood pressure, decrease oxygen requirement of cardiac muscles, treat arrhythmias, and increase blood perfusion to cardiac muscle.

Chapter 17 — Tonic Herbs

Herbs with cardiotonic properties include *Ren Shen* (Radix Ginseng), *Huang Qi* (Radix Astragali), *Ling Zhi* (Ganoderma), *Bai Shao* (Radix Paeoniae Alba), *Lu Rong* (Cornu Cervi Pantotrichum) and *Bu Gu Zhi* (Fructus Psoraleae).

Herbs with vasodilating effects include *Ren Shen* (Radix Ginseng), *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Lu Rong* (Cornu Cervi Pantotrichum), *Yin Yang Huo* (Herba Epimedii), *Bu Gu Zhi* (Fructus Psoraleae) and *Mai Men Dong* (Radix Ophiopogonis).

- **Others**: Tonic herbs strengthen the body, improve physical and cognitive performance, improve sleep, improve appetite, and increase body weight.

With organ transplants or autoimmune disorders, enhancing the immune system may be undesirable.

POTENTIAL HERB-DRUG INTERACTIONS

- **Immunosuppressants**: Many tonic herbs serve to enhance the immune system. Though this is desirable in most cases, there are situations that warrant caution: in particular, patients who have received organ transplants or suffer from autoimmune disorders. In these cases, enhancing the immune system may interfere with immunosuppressants and increase the risk of organ rejection, or interfere with substances for regulation of immune function.
- **Hormones**: Herbs that stimulate the endocrine system promote the release of hormones, and should be used with caution in patients who are already receiving hormone supplementation with insulin, steroids, and sex hormones. Though the herbs and drugs all aim to treat the same disorder, concurrent use may potentiate the overall effect and cause undesirable reactions.
- **Cardiovascular agents**: Some tonic herbs act on the cardiovascular system. Herbs with cardiotonic influence may increase blood pressure, while herbs with vasodilating effects may lower blood pressure. Consequently, any concurrent use of these herbs with cardiotonic pharmaceuticals must be carefully chosen and monitored to prevent adverse interactions.
- **Dexamethasone**: It has been shown that dexamethasone-induced osteoporosis in male rats can be prevented and treated by using Kidney tonic herbs to regulate the endocrine system.[1]

Section 1

— Qi-Tonifying Herbs

Ren Shen (Radix Ginseng)

人參 人参

Pinyin Name: *Ren Shen*
Literal Name: "man's plant," "man root"
Alternate Chinese Names: *Gui Gai, Yi Shan Shen, Chao Xian Shen, Ren Xian*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ginseng, ginseng root
Botanical Name: *Panax ginseng* C. A. Mey. (*Ren Shen*)
Pharmaceutical Name: Radix Ginseng
Properties: sweet, slightly bitter, slightly warm
Channels Entered: Lung, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Greatly Tonifies *Yuan* (Source) *Qi*

Qi deficiency or depletion, fading pulse: *Yuan* (source) *qi* is the basis of all qi in the body. *Ren Shen* (Radix Ginseng) is the best herb to strengthen the body and restore vitality. It tonifies deficiency and restores the collapse of *yuan qi*, that may have become depleted after profuse perspiration, after excessive loss of fluids in severe vomiting or diarrhea, with excessive loss of blood, or due to other chronic illnesses. Clinical manifestations of such conditions include shallow respiration, shortness of breath, cold extremities, and feeble or barely palpable pulse. In those conditions, this herb can be used alone to greatly tonify and revitalize the body. Qi deficiency is often accompanied by yang deficiency, and qi collapse is often accompanied by yang collapse. As such, when treating cases of deficiency or collapse, interior-warming or yang-tonic herbs are usually added to *Ren Shen*.

- Collapse of *yuan* (source) *qi*: use *Ren Shen* as a single-herb remedy.
- Qi and yang deficiencies with profuse perspiration and cold extremities: use it with *Fu Zi* (Radix Aconiti Lateralis Praeparata). **Exemplar Formula**: *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction).
- Qi and yin deficiencies: combine it with *Mai Men Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). **Exemplar Formula:** *Sheng Mai San* (Generate the Pulse Powder).
- Qi and blood deficiencies: pair *Ren Shen* with *Shu Di Huang* (Radix Rehmanniae Preparata).

2. Tonifies the Spleen

Spleen qi deficiency: *Ren Shen* tonifies the Spleen and enhances its functions of transformation and transportation. With middle *jiao* deficiency, food cannot be transformed into energy, and thus, fatigue, lack of energy, nausea, vomiting, poor appetite, sallow complexion, low voice, listlessness, diarrhea, stomach and rectal prolapse and other conditions characterized by qi deficiency of the Spleen and Stomach will manifest.

Ren Shen (Radix Ginseng)

- Qi deficiency of the Spleen and Stomach: use *Ren Shen* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Qi deficiency of the Spleen and Stomach with dampness: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Si Jun Zi Tang* (Four-Gentlemen Decoction).
- Qi deficiency of the Spleen and Stomach with loose stools or diarrhea: add *Ren Shen* to *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Shan Yao* (Rhizoma Dioscoreae), *Bian Dou* (Semen Lablab Album), *Sha Ren* (Fructus Amomi) and *Chen Pi* (Pericarpium Citri Reticulatae). **Exemplar Formula:** *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder).
- Organ prolapse due to qi and yang deficiencies: combine this herb with *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Sheng Ma* (Rhizoma Cimicifugae) and *Chai Hu* (Radix Bupleuri). **Exemplar Formula:** *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).

3. Tonifies the Lung

Lung deficiency: The Lung dominates the qi of the body and controls respiration. The Kidney dominates *yuan* (source) *qi*, consolidates *jing* (essence) and helps pull qi downwards from the Lung. When the Lung and Kidney are deficient, symptoms of shortness of breath, dyspnea, asthma, accelerated or feeble respiration with fatigue, spontaneous sweating and weak pulse, may appear. *Ren Shen* tonifies the Lung and enhances its respiratory effectiveness.

- Chronic cough due to Lung deficiency: use *Ren Shen* with *Kuan Dong Hua* (Flos Farfarae), *Zi Wan* (Radix Asteris), *Bai Bu* (Radix Stemonae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- Wheezing and shortness of breath due to Lung and Kidney deficiency: use this herb with *Ge Jie* (Gecko), *Hu Tao Ren* (Semen Juglandis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). **Exemplar Formula:** *Ren Shen Ge Jie San* (Ginseng and Gecko Powder).

4. Promotes Generation of Body Fluids and Relieves Thirst

***Xiao ke* (wasting and thirsting) syndrome, thirst from qi and yin deficiencies:** The production, distribution and elimination of body fluids require proper functioning of qi. Yin and qi deficiencies result in the thirst and related symptoms of *xiao ke* syndrome. *Ren Shen* tonifies qi, promotes generation of body fluids and relieves thirst. Should heat also be a factor contributing to thirst, additional symptoms may include heat sensations with thirst that cannot be quenched by water, excessive perspiration, and a big pulse that is revealed upon pressure to be weak.

- *Xiao ke* syndrome with thirst: combine *Ren Shen* with *Tian Hua Fen* (Radix Trichosanthis), *Mai Men Dong* (Radix Ophiopogonis) and *Zhi Mu* (Radix Anemarrhenae).
- Febrile disorders with heat damaging both qi and body fluids: use *Ren Shen* with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), *Gan Cao* (Radix Glycyrrhizae), and *Geng Mi* (Semen Oryzae). **Exemplar Formula:** *Bai Hu Jia Ren Shen Tang* (White Tiger plus Ginseng Decoction).

5. Calms the *Shen* (Spirit), Improves Mental Function

Lack of qi and blood nourishment to the Heart *shen*: Abundant *yuan* (source) *qi* nourishes Heart qi, calms the *shen*, and improves mental functions. *Ren Shen* tonifies qi, calms the *shen*, and improves cognitive functions. It is commonly used alone to treat insomnia, disturbed sleep with excessive dreams, fright, confusion and forgetfulness caused by qi deficiency. When taken for a prolonged period of time, this herb treats neurasthenia involving symptoms of fatigue, headache and insomnia.

- Poor cognitive functions due to Heart and Spleen weakness with qi and blood deficiencies, with chief complaints of fatigue, excessive worrying and insomnia: use *Ren Shen* with *Huang Qi* (Radix Astragali), *Long Yan Rou* (Arillus Longan), and *Suan Zao Ren* (Semen Zizyphi Spinosae). **Exemplar Formula:** *Gui Pi Tang* (Restore the Spleen Decoction).
- Poor cognitive functions due to Heart and Kidney weakness with yin and blood deficiencies: combine this herb with *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), *Dan Shen* (Radix Salviae Miltiorrhizae), and *Bai Zi Ren* (Semen Platycladi). **Exemplar Formula:** *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart).
- Confusion and forgetfulness: add *Ren Shen* to *Shi Chang Pu* (Rhizoma Acori), *Yuan Zhi* (Radix Polygalae), *Fu Shen* (Poria Paradicis) and *Fu Ling* (Poria).

6. Tonifies Qi and Blood

Blood deficiency: *Ren Shen* tonifies qi and enhances the production of blood. It is commonly used to treat patients with sallow complexion revealing both qi and blood deficiencies.

- Qi and blood deficiencies: use *Ren Shen* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Shao* (Radix Paeoniae Alba), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Fu Ling* (Poria). **Exemplar Formula:** *Ba Zhen Tang* (Eight-Treasure Decoction).

Ren Shen (Radix Ginseng)

7. Treats Impotence

This herb tonifies qi and yang and is commonly used with Kidney yang-tonic herbs to treat impotence. *Ren Shen* may be used singly as herbal tincture, or in combination with other herbs in an herbal formula.

- Impotence: use *Ren Shen* with *Lu Rong* (Cornu Cervi Pantotrichum), *Shu Di Huang* (Radix Rehmanniae Preparata), *Fu Zi* (Radix Aconiti Lateralis Praeparata), and *Bu Gu Zhi* (Fructus Psoraleae).

8. Tonifies Qi in Deficiency Patients with Exterior Conditions

Exterior disorder with interior deficiency: *Ren Shen* treats deficiency patients who have contracted external pathogenic factors. It boosts *wei* (defensive) *qi* to fight against external pathogenic factors.

- Exterior condition with interior deficiency: combine *Ren Shen* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Chai Hu* (Radix Bupleuri) and *Du Huo* (Radix Angelicae Pubescentis). **Exemplar Formula:** *Ren Shen Bai Du San* (Ginseng Powder to Overcome Pathogenic Influences).

DOSAGE

5 to 10 grams in decoction, 0.5 to 1.0 gram in powder. The dosage of *Ren Shen* may be increased to 15 to 30 grams to treat collapse of *yuan* (source) *qi*. The decoction should be taken in multiple small doses (instead of one large dose) when treating collapse. Due to the high cost of the herb, *Ren Shen* is usually decocted separately at relatively low temperatures to ensure complete extraction of active constituents.

CAUTIONS / CONTRAINDICATIONS

- Sweet and warm in nature, *Ren Shen* is contraindicated in cases of excess conditions, such as bleeding caused by heat in the blood, red eyes and dizziness due to Liver yang rising, wheezing and cough because of Lung heat, or phlegm accumulation, constipation, parasites, internal accumulation, heat or fire conditions.
- According to classic texts, *Ren Shen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri), antagonized by *Zao Jiao* (Fructus Gleditsiae), and counteracted by *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) and *Lai Fu Zi* (Semen Raphani Sativi).
- The effectiveness of *Ren Shen* may be reduced by concurrent consumption of turnips, daikon radishes, and tea.

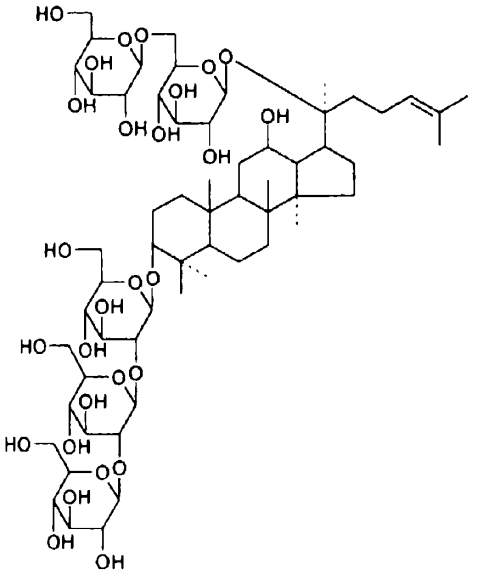
OVERDOSAGE

Mild overdose of *Ren Shen* may lead to side effects such as dry mouth and lips, excitation, fidgeting, irritability, tremor, palpitations, blurred vision, headache, insomnia, increased body temperature, increased blood pressure, edema, decreased appetite, increased sexual desire, dizziness, itching, eczema, early morning diarrhea, bleeding, and fatigue. Such patients are advised to discontinue the herb and seek symptomatic treatment if necessary. Gross overdose may lead to such adverse reactions as nausea, vomiting, irritability, restlessness, urinary and bowel incontinence, fever, increased blood pressure, increased respiration, decreased sensitivity and reaction to light, decreased heart rate, cyanotic facial complexion, red face, seizures, convulsions, and delirium. Though the toxicity of this herb is mild, intake of large dosages may cause toxic side effects of pityriasis rosea, itching, headache, dizziness, sudden rise in temperature, or bleeding. Bleeding is characteristic of acute overdose of *Ren Shen*.[1]

Allergic reactions to *Ren Shen* are characterized by burning sensations of the extremities, itching, excitation, insomnia, dizziness, chest congestion and discomfort, nausea, vomiting, pale face, perspiration, cold extremities, low voice, a deep and thready pulse, and urinary and bowel incontinence.

TREATMENT OF OVERDOSAGE

An herbal decoction of 120 grams of *Gan Cao* (Radix Glycyrrhizae) treats general overdose of *Ren Shen*. Specific symptomatic treatments are also available. *Lai Fu Zi* (Semen Raphani Sativi) treats feelings of distention, dyspnea, or oppression associated with overdose of *Ren Shen*. *Tian Men Dong* (Radix Asparagi) and *Sheng Di Huang* (Radix Rehmanniae) treat increased heat in the body associated with overdose of *Ren Shen*. *Chen Pi* (Pericarpium Citri Reticulatae), *Sha Ren* (Fructus Amomi) and *Shan Zha* (Fructus Crataegi) treat bloating, which sometimes occurs with use of *Ren Shen*.[2]



Acute cases of overdose can be treated by emetic methods. Ingestion of 1.2 to 1.5 grams of *Li Lu* (Radix et Rhizoma Veratri) with warm water will usually induce vomiting of the ingested *Ren Shen* within a few minutes. Chronic cases of overdose can be relieved by ingestion of daikon radish. The treatment is to either ingest 500 to 1,000 grams of fresh daikon radish, or to cook 250 to 500 grams of dried daikon radish and administer via decoction.[3]

Severe cases of overdose characterized by epistaxis with bright red blood, red tongue and rapid pulse should be treated with herbs that clear heat, cool blood and stop bleeding. Herbal treatment includes 6 grams of powdered *Da Huang* (Radix et Rhizoma Rhei), 3 grams of *San Qi* (Radix Notoginseng), 3 grams of *Xi Jiao* (Cornu Rhinoceri), and 400 ml of juice squeezed from fresh daikon radish. [Note: *Shui Niu Jiao* (Cornu Bubali) is used as a substitute because of the protected status of *Xi Jiao* (Cornu Rhinoceri).]

Ren Shen (Radix Ginseng)

CHEMICAL COMPOSITION

Triterpene saponins, aglycone (20S)-protopanaxadiol (ginsenoside Ra0, Ra1, Ra2, Ra3, Rb1, Rb2, Rb3; notoginsenoside R4, Rs1, Rs2, Rs3, Rs4; malonylginsenoside Rb1, Rc, Rd), aglycone (20S)-protopanaxytriol (ginsenoside Re, Rf, Rg1, notoginsenoside R1), aglycone oleanolic acid (ginsenoside Ro, chikusetsusasaponin-V Rb1, Rb2, Rc, Rd, Re, Rg1), water-soluble polysaccharides (panaxane A to U), polyynes (falcarinol, falcarintriol).[4,5]

Ginsenoside Ra0

PHARMACOLOGICAL EFFECTS

- **Effects on the central nervous system**: Many laboratory and clinical studies have shown that administration of *Ren Shen* has a significant impact on the central nervous system. It has a stimulating effect in low doses, but an inhibiting effect in large doses. It was found that intraperitoneal injection at the dosage of 50 mg/kg for 5 days has a stimulating effect, as it increases the amounts of dopamine and norepinephrine in the brain stem. On the other hand, oral ingestion of a 40% *Ren Shen* solution has a sedative effect as it greatly decreases the physical activities of rats. Because of its dual functions of stimulation and inhibition, *Ren Shen* provides an adaptogenic effect for the body under various environmental stress.[6,7]
- **Cognitive**: Administration of *Ren Shen* has demonstrated a marked effect in improving memory and learning ability. Using the herbal extract at the dosage of 20 mg/kg/day (equivalent to 100 mg/kg/day of dried herb) for 3 days, there was a significant increase in cognitive capacity in rats as the time necessary to exit a maze was substantially reduced compared to the control group that did not receive any herbs. However, when the dosage of the herbal extract was increased to 100 mg/kg/day (equivalent to 500 mg/kg/day of dried herb), there was an opposite effect, with impairment of memory and learning capacity.[8]
- **Endocrinological**: Administration of *Ren Shen* has a marked influence on the endocrine system. In animal studies, it stimulates the pituitary gland to increase the secretion of ACTH, which in turn stimulates the adrenal glands and their activities. This finding was confirmed in subsequent studies in which *Ren Shen* did not increase activities of the adrenal glands in subjects whose pituitary glands had been surgically removed.[9] In another study, mice that were given *Ren Shen* had an increase in ACH and ACTH, and subsequently better physical performance. Mice that were given one dose of the herb had a 132% increase in swimming time, and mice that were given the herb for 7 days had a 179% increase. Interestingly, overdose of the herb had an opposite effect as it decreased swimming time.[10]
- **Immunostimulant**: *Ren Shen* has immune-enhancing effects. It increases the function of the reticuloendothelial system and increases the total count of IgM.[11]
- **Cardiovascular**: Administration of *Ren Shen* has a positive inotropic effect on the hearts of dogs, rabbits, cats and other animals. It increases the contractility of the heart, slightly increases blood pressure, and constricts blood vessels. It has shown beneficial effects in treatment of shock, arrhythmia and burns. At larger doses, however, it has an opposite effect as it causes an inhibitory influence on the cardiovascular system leading to decreased contractility of the heart, dilation of blood vessels, and a decreased heart rate.[12]
- **Hypoglycemic**: Administration of *Ren Shen* was effective in lowering blood glucose in dogs with hyperglycemia.[13]
- **Antihyperlipidemic**: The saponins in *Ren Shen* lower blood cholesterol levels and reduce the risk of atherosclerosis.[14]
- **Hepatoprotective**: *Ren Shen* has a protective effect in treating various liver disorders. The extract of the herb effectively lowered the elevated levels of liver enzymes in mice induced by acute or chronic consumption of ethanol.[15]
- **Reproductive**: *Ren Shen* has a stimulating effect on the pituitary gland to increase the secretion of gonadotropin. In young mice, it speeds up the development of the reproductive organs. In adult mice, it stimulates the production of sperm in males, and lengthens the estrus period in females. However, it has not demonstrated any direct effect on the sex hormones.[16]

CLINICAL STUDIES AND RESEARCH

- **Shock**: Ten patients in shock due to profuse bleeding were treated with a decoction of 30 grams of *Ren Shen*

Ren Shen (Radix Ginseng)

along with electro-acupuncture on *Baihui* (GV 20) with satisfactory results. All patients were treated in remote areas of China where hospitalization was not available.[17]

- **Cardiac ischemia**: Intravenous or intramuscular injection of an herbal preparation containing *Ren Shen*, *Mai Men Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) was beneficial in treatment of cardiac ischemia and cardiogenic shock.[18]
- **Leukopenia**: *Ren Shen* demonstrated immune-enhancing effects in treatment of 52 cancer patients with leukopenia caused by chemotherapy. Administration of *Ren Shen* enabled the patients to complete the entire course of chemotherapy treatment.[19] According to another report, 38 patients with leukopenia were treated with 50 to 100 ml of a *Ren Shen* preparation given two to three times daily, with an 87% rate of effectiveness.[20]
- **Sexual dysfunction**: In one study, 27 patients with impotence were treated with 500 mg/day of *Ren Shen* extract with marked success. Out of 27 patients, 15 regained normal function, 9 had moderate improvement, and 3 showed no response. In another study, 24 patients with low sperm count were treated with a preparation of *Ren Shen* with an increase in sperm count noted in 70% of the patients, and an increase in sperm motility in 67% of the patients.[21]
- **Diabetes mellitus**: Administration of *Ren Shen* liquid extract at the dosage of 0.5 ml twice daily was beneficial for patients with diabetes mellitus. The average reduction of blood glucose was 40 to 50 mg/dL, and the therapeutic effect lasted for up to 2 weeks after discontinuation of herbal treatment. Patients with mild diabetes showed a marked reduction of blood glucose levels and an improvement in overall symptoms. Patients with moderate diabetes showed no significant change of blood glucose, but did show some improvement in signs and symptoms.[22]
- **Addison's disease**: In one study, 18 patients with Addison's disease were treated with a 20% ginseng preparation (made from leaves and branches) for an average of 121 days with good results. The initial dosage was 20 to 30 ml, taken three times daily, with a gradual increase to a daily dose of 150 to 300 ml. The study reported weight gain, increased blood pressure, increased grip strength, increased blood glucose levels, increased sodium content in the plasma, and increased levels of ACTH.[23]
- **Spleen deficiency**: Ten children diagnosed with Spleen deficiency according to traditional Chinese medicine were treated with decoction of *Ren Shen* twice daily for 7 to 14 days per course of treatment. Children under 3 years of age received 3 grams of *Ren Shen* cooked in 30 ml of water, and children over three years of age received 5 grams in 60 ml of water. After the herbal treatment, the children showed an increase in appetite, cessation of spontaneous perspiration, increase in body weight, and improvement in facial complexion.[24]
- **Hypertension and atherosclerosis**: Oral administration of 20 drops of a 20% *Ren Shen* preparation twice daily was beneficial in patients with hypertension, atherosclerosis, and chest pain. After herbal treatment, the patients reported overall symptomatic improvement, such as decreased chest pain, little or no headache, normal sleep, and relief of dyspnea. The improvement lasted for 6 to 9 months after discontinuation of the herbs.[25]
- **Hypercholesterolemia**: *Ren Shen* has a moderate effect in lowering blood cholesterol levels, but a significant effect in lowering triglycerides. Administration of *Ren Shen* in a group of elderly patients showed improvement in memory in 80%, improvement in sleep in 54%, relief of depression in 40%, and relief of headache in 75%.[26]
- **Coronary artery disease**: In one study, 31 patients with coronary artery disease were treated with intravenous infusion of *Ren Shen* once or twice daily with relief of pain in 93.54%, and improvement based on ECG evaluation in 76.66% of the patients. The *Ren Shen* injection was prepared by mixing 6 to 10 ml of herbal solution with 40 ml of D10W.[27]
- **Acute hepatitis**: Oral administration of *Ren Shen* was found to have beneficial effects in treatment of infectious hepatitis by reducing the duration of icteric jaundice and facilitating the recovery of liver functions.[28]

HERB-DRUG INTERACTION

- **Antidepressants:** It has been suggested, but not been documented, that induction of mania may occur in depressed patients who mix antidepressants and *Ren Shen*. In rare cases, the concurrent use of *Ren Shen* and phenelzine has led to manic-like symptoms.[29,30] [Note: Examples of similar antidepressants are as follows: monoamine oxidase inhibitors (MAOI) such as phenelzine (Nardil), tranylcypromine (Parnate), and isocarboxazid (Marplan).]
- **Ethanol:** In an *in vitro* study, an herbal preparation of *Ren Shen*, *Yuan Zhi* (Radix Polygalae), *Shi Chang Pu* (Rhizoma Acori) and *Fu Ling* (Poria) was found to reduce the ethanol-induced impairment of memory registration. It also ameliorated scopolamine-induced memory registration deficit. These results suggest that this herbal preparation ameliorates the impairment effect of ethanol on learning and memory processes.[31]
- **Antidiabetics:** The use of *Ren Shen* has been associated with reduction of fasting blood glucose levels. Therefore, it has been suggested that hypoglycemia may occur when *Ren Shen* is combined with drugs for treatment of diabetes mellitus.[32] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]

Ren Shen (Radix Ginseng)

TOXICOLOGY

In animal toxicology studies, no significant side effects were reported in mice who received continuous oral ingestion of *Ren Shen* for one month at dosages of 100, 250 and 500 mg/kg. The LD_{50} for oral ingestion of the herb in mice is 5 g/kg. The LD_{50} for subcutaneous injection of the herbal extract in mice is 16.5 ml/kg.[33]

In human toxicology reports, oral ingestion of 100 ml of a 3% tincture may lead to mild discomfort. Oral ingestion of 200 ml of a 3% tincture may lead to rashes, itching, headaches, dizziness, increase in body temperature, and bleeding.[34]

SUPPLEMENT

- 人參葉 / 人參叶 *Ren Shen Ye* (Folium Ginseng), first cited in the *Ben Cao Cong Xin* (Thoroughly Revised Materia Medica) by Wu Yi-Luo in 1751, is derived from the leaf of the same plant as *Ren Shen*. *Ren Shen Ye* is bitter, slightly sweet and cold. It relieves summer-heat, generates body fluids and clears deficiency heat. Suitable conditions for use of *Ren Shen Ye* include thirst, febrile disorders with body fluid loss, Stomach yin deficiency, and toothache due to deficiency fire. Recommended dosage of *Ren Shen Ye* is 5 to 10 grams.

  According to the *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578, the leaf has no function and is extremely bitter and cold, and can damage qi and blood. However, according to *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D., the leaf can tonify the body, generate body fluids, clear summer-heat, clear deficiency heat, benefit the head and extremities and help patients regain sobriety after alcohol intake. Modern research has shown that the stem, leaves, flower and fruit of this plant all contain higher percentages of ginsenosides than the root. The stem has been shown to have similar functions to those of the root and ginsenoside has been used clinically to treat coronary heart disorders, high cholesterol, diabetes and tumors.
- 三七葉 / 三七叶 *San Qi Ye* (Folium Notoginseng) has tastes and actions similar to those of *Ren Shen Ye*, and is commonly used as a substitute.

AUTHORS' COMMENTS

According to Dr. Liu Zhi-Tong, in cases of difficult labor, *Ren Shen* greatly tonifies the *yuan* (source) qi, replenishes fluids, and dilates the cervix to facilitate delivery.

Wild-crafted *Ren Shen* has the strongest function and is reserved for the most severe cases of qi deficiency or collapse. Wild-crafted *Ren Shen* is generally not used because it is extremely expensive. Cultivated *Ren Shen* is also potent, and is the most common form of the herb sold commercially. In most cases, cultivated *Ren Shen* is very effective and affordable. The root of cultivated *Ren Shen* should be at least three years old before harvesting, to obtain therapeutic potency.

Different types of ginseng have slightly different functions:

- *Sheng Sai Shen*, sun-dried ginseng, is more suitable for qi and yin deficiencies.
- *Hong Shen*, red or steamed ginseng, is warmer and is mostly used for qi and yang deficiencies.
- The "tails" of *Ren Shen* are believed to have a weaker tonic effect.
- The "head" of *Ren Shen* is believed to have some effect to induce vomiting.

[Note: It has been found that the "head" and the "body" of *Ren Shen* have essentially the same constituents. Furthermore, in a study of 1500 volunteers who ingested various amounts of ginseng "head," there were no reports of nausea and vomiting. Therefore, it is now accepted that ginseng "head" does not cause nausea and vomiting.[35]]

Ren Shen (Radix Ginseng)

Xi Yang Shen (Radix Panacis Quinquefolii)

西洋參 西洋参

Pinyin Name: *Xi Yang Shen*
Literal Name: "western seas root," "western seas ginseng," "western ginseng"
Alternate Chinese Names: *Hua Qi Shen, Xi Shen, Yang Shen, Guan Dong Ren Shen*
Original Source: *Ben Cao Cong Xin* (Thoroughly Revised Materia Medica) by Wu Yi-Luo in 1751
English Name: American ginseng
Botanical Name: *Panax quinquefolium* (*Xi Yang Shen*)
Pharmaceutical Name: Radix Panacis Quinquefolii
Properties: sweet, bitter, cold
Channels Entered: Kidney, Heart, Lung

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Qi and Nourishes Yin

Lung and Kidney yin deficiencies: *Xi Yang Shen* (Radix Panacis Quinquefolii) treats Lung and Kidney yin-deficient fire with cough, wheezing, scanty sputum that may or may not be streaked with blood, loss of voice, or hemoptysis. It is the best choice for tonifying and nourishing both the qi and yin of the Lung and Kidney.

- Qi and yin deficiencies due to chronic disorders: combine *Xi Yang Shen* with *Mai Men Dong* (Radix Ophiopogonis), *E Jiao* (Colla Corii Asini), *Zhi Mu* (Radix Anemarrhenae) and *Bei Mu* (Bulbus Fritillaria).

2. Clears Fire and Generates Body Fluids

Qi and body fluid deficiencies: Common symptoms include irritability, thirst and fatigue. *Xi Yang Shen* can sedate fire and generate body fluids at the same time. This herb has an excellent function in moistening the body to treat thirst, and dryness of the mouth and tongue. It is used both in cases where fire has damaged fluids, and in cases of yin-deficient heat.

- Yin and qi deficiencies: combine *Xi Yang Shen* with *Huang Qi* (Radix Astragali), *Shan Yao* (Rhizoma Dioscoreae) and *Tian Hua Fen* (Radix Trichosanthis).
- Yin deficiency with heat signs: combine this herb with *Sheng Di Huang* (Radix Rehmanniae), *Shi Hu* (Herba Dendrobii) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- Diabetes: add it to *Shan Yao* (Rhizoma Dioscoreae), *Sheng Di Huang* (Radix Rehmanniae), *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Dryness of throat or mouth: incorporate this herb with *Tian Men Dong* (Radix Asparagi), *Mai Men Dong* (Radix Ophiopogonis), *Zhi Mu* (Radix Anemarrhenae), and *Yu Zhu* (Rhizoma Polygonati Odorati).
- Thirst: add it to *Huang Qi* (Radix Astragali), *Shan Yao* (Rhizoma Dioscoreae) and *Tian Hua Fen* (Radix Trichosanthis).

Xi Yang Shen (Radix Panacis Quinquefolii)

3. Sedates Heat in the Intestines and Stops Bleeding

Heat in the Intestines with hematochezia due to yin deficiency: combine *Xi Yang Shen* with *Long Yan Rou* (Arillus Longan).

DOSAGE

3 to 6 grams. Due to the high cost of *Xi Yang Shen*, it is often decocted separately from other herbs to ensure complete extraction.

CAUTIONS / CONTRAINDICATIONS

- Use of *Xi Yang Shen* is contraindicated in cases of excess fire with stagnation, or in Stomach damp-cold.
- *Xi Yang Shen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).

CHEMICAL COMPOSITION

Quinquenoside R_1, ginsenoside Rb_1, Rb_2, Rb_3, Rc, Rd, Re, Rf_2, Rg_1, R_0; Rh_1, Rg_3; pseudo-ginsenoside F_{11}, quinquefolans A, B, C; essential oils, rutin.[1]

PHARMACOLOGICAL EFFECTS

- **CNS suppressant:** *Xi Yang Shen* has a sedative effect on the central nervous system (CNS). In mice, intraperitoneal injection of this herb leads to decreased spontaneous physical activities and increased sleeping time induced by phenobarbitals.[2]
- **General:** Administration of *Xi Yang Shen* is associated with marked antifatigue and antidiuretic effects, and an increased resistance to hypoxia.[3]

CLINICAL STUDIES AND RESEARCH

- **Supportive therapy with radiation:** In one study, 20 patients with cancer of the nasal cavity were treated daily with decoction of 3 grams of *Xi Yang Shen* one time each day, starting two weeks prior to the chemotherapy and radiation therapies. The study reported a significant reduction of side effects related to chemotherapy and radiation, such as dry mouth, nausea and vomiting.[4]

TOXICOLOGY

One intraperitoneal injection daily of *Xi Yang Shen* at 450 mg/kg for 7 days showed no significant toxicity nor fatalities in laboratory animals.[5]

AUTHORS' COMMENTS

Xi Yang Shen and *Ren Shen* (Radix Ginseng) both tonify qi and generate body fluids.

- *Xi Yang Shen* is cool in nature and is stronger in nourishing the yin and sedating fire, while its qi-tonic action is weaker than that of *Ren Shen*. As such, *Xi Yang Shen* is best used for patients with both qi and yin deficiencies, as is often seen in Lung yin-deficient fire.
- *Ren Shen* is warm and stronger in tonifying qi and is used for patients experiencing deficiency and cold. *Ren Shen* is especially effective for severe conditions where there is exhaustion of qi, in which case the patients often show Spleen and Stomach deficiencies, Lung qi deficiency, qi and blood deficiencies or possible qi collapse.

Dang Shen (Radix Codonopsis)

黨參 党参

Pinyin Name: *Dang Shen*
Literal Name: "group root"
Alternate Chinese Names: *Tai Dang, Fang Dang, Shi Tou Shen, Lu Dang*
Original Source: *Ben Jing Feng Yuan* (Journey to the Origin of the Classic of Materia Medica) by Zhang Lu in 1670
English Name: codonopsis, pilose Asia bell root
Botanical Name: *Codonopsis pilosula* (Franch.) Nannf. (*Dang Shen*)
Pharmaceutical Name: Radix Codonopsis
Properties: sweet, neutral
Channels Entered: Spleen, Lung

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Qi, Strengthens the Middle *Jiao Zhong* (central) *qi* deficiency:

Dang Shen (Radix Codonopsis) tonifies the Spleen and Stomach to enhance their transportation and transformation functions. It is commonly used to treat qi deficiency characterized by fatigue, lack of appetite, weak extremities, and diarrhea.

- Qi deficiency: use *Dang Shen* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Indigestion, epigastric fullness and distention, and decreased food intake due to Spleen and Stomach deficiencies: use it with *Zhi Shi* (Fructus Aurantii Immaturus), *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus) and *Chen Pi* (Pericarpium Citri Reticulatae).
- Prolapse of organs due to qi and yang deficiencies: add *Dang Shen* to *Huang Qi* (Radix Astragali), *Sheng Ma* (Rhizoma Cimicifugae), *Zhi Ke* (Fructus Aurantii) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Constipation with qi deficiency: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).

2. Tonifies the Lung

Lung qi deficiency: *Dang Shen* tonifies the Lung to treat coughing, wheezing, shortness of breath, and low voice from Lung deficiency. In true Lung deficiency, all of the above symptoms worsen with exertion. This herb tonifies the Lung and is not drying in nature.

- Disorders characterized by Lung qi deficiency: incorporate *Dang Shen* with *Huang Qi* (Radix Astragali), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Zi Wan* (Radix Asteris), and *Sang Bai Pi* (Cortex Mori).

3. Nourishes Blood, Promotes Generation of Body Fluids

Deficiency of qi, body fluids, and blood: *Dang Shen* has an excellent effect to tonify qi, that in turn enhances the production of blood and body fluids. It is commonly used to treat cases of chronic illness characterized by qi and yin deficiencies, or qi and blood deficiencies.

- Qi and yin deficiencies: use *Dang Shen* with *Mai Men Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- Blood deficiency: combine it with *Dang Gui* (Radicis Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Preparata) and *He Shou Wu* (Radix Polygoni Multiflori).
- Qi and blood deficiencies: use it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Gan Cao* (Radix Glycyrrhizae), *Dang Gui* (Radicis Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Ba Zhen Tang* (Eight-Treasure Decoction).

4. Restores Constitution and Expels Pathogenic Factors

Excess accumulation of pathogenic factors with interior deficiency: *Dang Shen* is often used for patients with exterior conditions or interior excess meeting constitutional deficiency. This herb is mild, generates body fluids, and nourishes blood to help the body fight pathogenic factors. The most common clinical manifestations include common cold and constipation. Contraindicated for use alone in these conditions, *Dang Shen* should always be combined with appropriate herbs to expel the pathogenic factors.

- Wind-cold with aversion to cold, fever, headache, nasal obstruction, cough and sputum, in a constitutionally deficient patient: use this herb with *Zi Su Ye* (Folium

Dang Shen (Radix Codonopsis)

Perillae), *Qian Hu* (Radix Peucedani), *Ban Xia* (Rhizoma Pinelliae) and *Jie Geng* (Radix Platycodonis).

- Constipation due to deficiency: use this herb with *Da Huang* (Radix et Rhizoma Rhei), *Dang Gui* (Radicis Angelicae Sinensis) and *Mang Xiao* (Natrii Sulfas).

DOSAGE

6 to 10 grams, with a maximum of 30 grams. *Dang Shen* is commonly used in both herbal decoction and pill forms. Dry-fried, it more effectively strengthens the Spleen and stops diarrhea. Honey-baked, it more strongly tonifies the middle *jiao* and benefits the qi.

CAUTIONS / CONTRAINDICATIONS

- Though *Dang Shen* is mild, it is still a tonic herb that is sweet and cloying, and may generate heat. Therefore, it should be used with caution in cases of excess heat or fire.
- *Dang Shen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).
- It has been reported that dosages of *Dang Shen* above 63 grams may cause arrhythmia or discomfort in the left pectoral area. However, side effects subside when the herb is discontinued.[1]

CHEMICAL COMPOSITION

Alkaloids (codonopsine, codonopsinine), glycosides (inulin, fructose, syringin, glucopyranoside, fructofuranoside, tangshenoside I, II, III, IV), flavonoids (luteolin-7-glucoside, apigenin, apigenin-7-glucoside, luteolin, aynaroside, luteotin-7-rotinoside, luteotin-7-galactoside), triterpenoids (oleanolic acid, echino cystic acid, albigenic acid, taraxeryl acetate, taraxerol, friedelin), essential oils (palmitic acid, hexanoic acid, heptanoic acid, octanoic acid, nonanoic acid, dodecanoic acid, tetradecanoic acid, pentadecanoic acid, hexadecanoic acid, octadecoic acid, octadecadienoic acid), α-spinasterol, stimasterol, amino acids.[2]

PHARMACOLOGICAL EFFECTS

- **Adaptogenic:** *Dang Shen* has both stimulating and inhibiting effects on the central nervous system to help animals adapt to various stressful environments. According to studies, intraperitoneal injection of the herb greatly enhances resistance to hypoxia in mice.[3]
- **Gastrointestinal:** Administration of *Dang Shen* has marked preventative and treatment effects on peptic ulcers. Decoction of *Dang Shen* at various dosages ranging from 50 to 250 mg/kg increases gastric emptying time, decreases severity of ulceration, and increases the amount of prostaglandins in the stomach. Furthermore, administration of *Dang Shen* also showed a marked protective effect in relieving peptic ulcers induced by over-consumption of aspirin and non-steroidal-anti-inflammatory drugs.[4,5]
- **Immunostimulant:** An increase in the number and activities of macrophages is associated with administration of *Dang Shen* in mice via intraperitoneal, intramuscular or intravenous injections.[6]
- **Hematological:** Administration of water and alcohol extracts of *Dang Shen* is associated with an increase in red blood cells and hemoglobin, but a decrease in white blood cells and lymphocytes.[7]
- **Cardiovascular:** Intravenous injection of water and alcohol extracts of *Dang Shen* has a temporary effect to lower blood pressure in anesthetized rabbits and dogs. In anesthetized cats, intravenous injection of the herb increases cardiac output and blood perfusion to the brain, lower extremities, and internal organs.[8]

CLINICAL STUDIES AND RESEARCH

- **Uterine bleeding:** In one study, 37 patients with uterine bleeding were treated with decoction of *Dang Shen* at dosages of 30 to 60 grams twice daily for 5 days. Out of 37 patients, 5 made complete recovery, 14 showed marked improvement, 10 reported some improvement, and 8 showed no response.[9]
- **Hypotension:** Patients with hypotension were treated with an herbal preparation one time each day 15 days per course of treatment, for 1 to 2 courses total. Good results were reported in 28 out of 30 patients. The herbal preparation contained *Dang Shen* 15g, *Huang Jing* (Rhizoma Polygonati) 12g, *Rou Gui* (Cortex Cinnamomi) 10g, *Da Zao* (Fructus Jujubae) 10 pieces, and *Gan Cao* (Radix Glycyrrhizae) 6g.[10]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of water extract of *Dang Shen* is 79.21 +/- 3.6 g/kg in mice. No fatalities or abnormal reactions were reported in mice following a bolus dose of 10 g/kg administered via oral ingestion.[11]

Tai Zi Shen (Radix Pseudostellariae)

太子參 太子参

Pinyin Name: *Tai Zi Shen*
Literal Name: "prince root," "prince ginseng"
Alternate Chinese Names: *Hai Er Shen, Tong Shen*
Original Source: *Zhong Guo Yao Yong Zhi Wu Zi* (Chinese Journal of Medicinal Botanicals)
English Name: pseudostellaria, heterophylly false starwort root
Botanical Name: *Pseudostellaria heterophylla* (Miq.) Pax ex Pax et Hoffm. (*Hai Er Shen*)
Pharmaceutical Name: Radix Pseudostellariae
Properties: sweet, slightly bitter, neutral
Channels Entered: Lung, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Qi

Spleen qi deficiency and Stomach yin deficiency: *Tai Zi Shen* (Radix Pseudostellariae) is a mild tonic especially useful in cases where patients are so deficient that they cannot fully benefit from strong tonics. It is also useful for patients recuperating from chronic illnesses. Clinical applications include fatigue, lack of energy, dry mouth, no appetite, and spontaneous perspiration. Compared to *Ren Shen* (Radix Ginseng), *Tai Zi Shen* has a similar, but weaker ability to tonify qi and promote generation of body fluids.

- Spleen and Stomach deficiencies: use *Tai Zi Shen* with *Shan Yao* (Rhizoma Dioscoreae) and *Bian Dou* (Semen Lablab Album).
- Poor appetite due to Spleen and Stomach deficiencies: combine it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gu Ya* (Fructus Setariae Germinatus).
- Deficiencies of qi and yin accompanied by spontaneous perspiration: add this herb to *Mai Men Dong* (Radix Ophiopogonis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Fu Xiao Mai* (Semen Tritici Aestivi Levis) and *Huang Qi* (Radix Astragali).

2. Tonifies the Lung

Lung deficiency: The Lung dominates respiration, prefers moisture, and dislikes dryness. It is most susceptible to the pathogenic factors of dryness and heat. *Tai Zi Shen* enters the Lung to tonify qi, promote generation of fluids and moisten dryness. It is commonly used to treat heat and dryness in the Lung that manifest in coughing with shortness of breath and scanty sputum.

- Dry cough due to heat drying the fluids in the Lung: use *Tai Zi Shen* with *Sha Shen* (Radix Glehniae seu Adenophorae), *Bai He* (Bulbus Lilii), *Mai Men Dong* (Radix Ophiopogonis), and *Bei Mu* (Bulbus Fritillaria).

3. Promotes Generation of Body Fluids and Treats Chronic Febrile Disorders

Qi and yin deficiencies with thirst, palpitations and insomnia: *Tai Zi Shen* is neutral to cool in thermal property. It tonifies the middle *jiao* and clears deficiency heat in patients with chronic febrile disorders that often lead to heat damaging the qi and drying yin. Clinical presentation of this condition is characterized by thirst, palpitations, insomnia, low-grade fever, thready pulse, and red tongue. *Tai Zi Shen* treats these conditions by promoting the generation of body fluids.

- Thirst due to qi and yin deficiencies with heat: add this herb to *Sheng Di Huang* (Radix Rehmanniae), *Zhi Mu* (Radix Anemarrhenae), *Mai Men Dong* (Radix Ophiopogonis), and *Zhu Ye* (Herba Phyllostachys).
- Insomnia and palpitations due to qi and yin deficiencies with heat: combine this herb with *Mai Men Dong* (Radix Ophiopogonis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Suan Zao Ren* (Semen Zizyphi Spinosae) and *Bai Zi Ren* (Semen Platycladi).
- Persistent unremitting fever due to qi and yin deficiencies with heat, or summer heatstroke in children: add it to *Sha Shen* (Radix Glehniae seu Adenophorae), *Shi Hu* (Herba Dendrobii), *Bai Wei* (Radix Cynanchi Atrati), and *Qing Hao* (Herba Artemisiae Annuae).
- Acute or chronic hepatitis: incorporate *Tai Zi Shen* with *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Yu Mi Xu* (Stigma Maydis).

DOSAGE

10 to 30 grams in decoction.

Tai Zi Shen (Radix Pseudostellariae)

CAUTIONS / CONTRAINDICATIONS

- *Tai Zi Shen* should be used with caution in patients with excess conditions. Though it is neutral in thermal property, it is still a tonic and may create dampness and stagnation in patients with excess conditions.
- *Tai Zi Shen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).

CHEMICAL COMPOSITION

Heterophyllin A, B; glycerol l-monolinolate, saponins, starch, sugars, β-sitosterol.[1]

CLINICAL STUDIES AND RESEARCH

- **Pediatric pneumonia:** Chronic pediatric pneumonia characterized by Lung and Spleen deficiencies was treated with an herbal preparation for 1 month with marked improvement. The herbal preparation contained *Tai Zi Shen*, *Huang Qi* (Radix Astragali), *Mai Men Dong* (Radix Ophiopogonis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), honey-processed *Zi Wan* (Radix Asteris) and honey-processed *Kuan Dong Hua* (Flos Farfarae).[2]
- **Hepatitis:** Long-term administration of *Tai Zi Shen* at 30 grams per dose is beneficial in patients with hepatitis or early liver cirrhosis accompanied by abnormal albumin and globulin levels.[3]

Dong Yang Shen (Radix Ginseng Japonica)

東洋參 东洋参

Pinyin Name: *Dong Yang Shen*
Literal Name: "eastern ginseng"
Alternate Chinese Names: *Yang Shen*
English Name: eastern ginseng, Japanese ginseng
Botanical Name: *Panax ginseng* C. A. Mey. (*Ren Shen*)
Pharmaceutical Name: Radix Ginseng Japonica
Properties: sweet, slightly bitter, cool
Channels Entered: Spleen, Lung

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Lung and Spleen, Nourishes the *Shen* (Spirit)

Spleen qi deficiency: *Dong Yang Shen* (Radix Ginseng Japonica) treats symptoms of fatigue, lassitude, poor appetite, loose stools, weak pulse, and a pale tongue with teeth marks.

- General Spleen qi deficiency: use *Dong Yang Shen* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Huang Qi* (Radix Astragali), and *Gan Cao* (Radix Glycyrrhizae).
- Loose stools: combine this herb with *Shan Yao* (Rhizoma Dioscoreae) and *Sha Ren* (Fructus Amomi).
- Poor appetite: use it with *Huo Xiang* (Herba Agastache) and *Mai Ya* (Fructus Hordei Germinatus).

Lung qi deficiency: Manifestations of this condition include feeble cough, shortened respiration, spontaneous

Dong Yang Shen (Radix Ginseng Japonica)

sweating, dyspnea and fatigue.
- Lung qi deficiency: add *Dong Yang Shen* to *Huang Qi* (Radix Astragali) and *Shan Yao* (Rhizoma Dioscoreae).
- Feeble cough: use it with *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Zi Wan* (Radix Asteris) and *Kuan Dong Hua* (Flos Farfarae).
- Spontaneous sweating: combine this herb with *Fang Feng* (Radix Saposhnikoviae), *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

Lack of nourishment to the *shen* (spirit): Manifestations of this imbalance include excessive dreams or dream-disturbed sleep.
- *Shen* disturbance: combine *Dong Yang Shen* with *Yuan Zhi* (Radix Polygalae) and *Suan Zao Ren* (Semen Zizyphi Spinosae).

2. Regulates the Middle *Jiao* and Improves Appetite

Spleen and Stomach qi deficiencies: *Dong Yang Shen* can tonify and regulate the middle *jiao* to treat nausea, vomiting and poor appetite.
- Spleen and Stomach qi deficiencies: combine this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

DOSAGE

3 to 9 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Dong Yang Shen* is contraindicated in excess conditions, as the tonic nature of the herb may create dampness and stagnation.

AUTHORS' COMMENTS

Dong Yang Shen and *Ren Shen* (Radix Ginseng) are the same plant cultivated in different geographic climates. *Dong Yang Shen* is cultivated in Japan while *Ren Shen* is cultivated in Northern China and Korea. However, these two herbs do not have identical therapeutic effects because their growing environments are quite different. The characteristics of *Dong Yang Shen* are similar to those of *Xi Yang Shen* (Radix Panacis Quinquefolii). Both tonify but do not cause the dry heat seen in other warm and dry tonics. *Dong Yang Shen* tonifies and regulates the middle *jiao*. *Xi Yang Shen* is stronger in tonifying action than *Dong Yang Shen*.

Huang Qi (Radix Astragali)

黄耆　黄芪

Pinyin Name: *Huang Qi*
Alternate Chinese Names: *Jin Huang Qi, Jian Qi, Kou Qi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: astragalus, Mongolian milkvetch root, membranous milkvetch root
Botanical Name: *Astragalus membranaceus* Bge. var. *mongholicus* (Dge.) Hsiao (*Meng Gu Huang Qi*); *Astragalus membranaceus* (Fisch.) Bge. (*Mo Jiao Huang Qi*)
Pharmaceutical Name: Radix Astragali
Properties: sweet, slightly warm
Channels Entered: Spleen, Lung

Huang Qi (Radix Astragali)

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Qi and Raises Yang

Spleen qi deficiency: *Huang Qi* (Radix Astragali) tonifies the Spleen to enhance its effectiveness in transformation and transportation. Clinical applications include pale or sallow facial appearance, fatigue, tired extremities, decreased food intake, diarrhea, and other conditions of Spleen deficiency.

- Fatigue and tired extremities due to Spleen deficiency: use *Huang Qi* individually, or combine it with *Dang Shen* (Radix Codonopsis) or *Ren Shen* (Radix Ginseng) for synergistic effect.
- Loose stools or diarrhea due to Spleen deficiency: add it to *Fu Ling* (Poria), *Shan Yao* (Rhizoma Dioscoreae), *Bian Dou* (Semen Lablab Album) and *Yi Yi Ren* (Semen Coicis).
- Spleen yang deficiency: use *Huang Qi* with yang tonics.

Inability of qi to control blood circulation: Proper flow and production of blood require an adequate supply of qi. In addition, Spleen qi controls the flow of blood and keeps it in the vessels. Deficiency of Spleen qi may lead to secondary blood deficiency and leakage of blood. Clinically, patients may exhibit fatigue, lethargy, shortness of breath, pale face, hematemesis, hematochezia, bruises, uterine bleeding, or other bleeding disorders. In short, patients with Spleen qi deficiency may bleed or bruise easily.

- Qi and blood deficiencies characterized by shortness of breath and pale face: combine *Huang Qi* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Gui* (Radicis Angelicae Sinensis) and *Suan Zao Ren* (Semen Zizyphi Spinosae). **Exemplar Formula:** *Gui Pi Tang* (Restore the Spleen Decoction).
- Hematemesis, hematochezia, and profuse menstrual bleeding caused by leakage of blood: use this herb with *Jing Jie* (Herba Schizonepetae), *Guan Zhong* (Rhizoma Dryopteridis), *San Qi* (Radix Notoginseng), *Hai Piao Xiao* (Endoconcha Sepiae) and *E Jiao* (Colla Corii Asini) in addition to *Gui Pi Tang* (Restore the Spleen Decoction).

Prolapse of organs: *Zhong* (central) *qi* deficiency results in prolapse of internal organs. *Huang Qi* tonifies qi and raises yang to treat prolapse of the stomach, rectum or other organs caused by the inability of qi and yang to hold the organs in the proper place.

- Prolapse of internal organs: use *Huang Qi* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Chai Hu* (Radix Bupleuri), and *Sheng Ma* (Rhizoma Cimicifugae). **Exemplar Formula:** *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction). A large amount of *Zhi Ke* (Fructus Aurantii) may be added to enhance the overall effectiveness of the formula.

Lung and Spleen qi deficiencies: Clinical manifestations of compromised respiratory and digestive functions include cough, wheezing, shortness of breath, profuse white and watery sputum, pale face, low voice, fatigue, abdominal fullness and diarrhea. *Huang Qi* enters both Lung and Spleen channels to tonify qi. It is the herb of choice for treating qi deficiency of these organs.

- Lung and Spleen qi deficiencies: combine *Huang Qi* with *Dang Shen* (Radix Codonopsis), *Fu Ling* (Poria), *Zi Wan* (Radix Asteris), and *Chen Pi* (Pericarpium Citri Reticulatae).

Qi and blood deficiencies: This imbalance is characterized by sallow facial appearance, dizziness, vertigo, lack of energy, no desire to speak, spontaneous perspiration, palpitations and insomnia. Since qi is the leader of blood, tonification of qi enhances the production of blood.

- Qi and blood deficiencies: pair *Huang Qi* with *Dang Gui* (Radicis Angelicae Sinensis). **Exemplar Formula:** *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood).

Qi deficiency with deficiency heat symptoms: Spleen qi deficiency prohibits clear yang from disseminating throughout the body. If yang qi is trapped in the muscle level for a prolonged period of time, symptoms of irritability with low-grade fever or unremitting high fever with fatigue, spontaneous sweating and frequent contraction of exterior conditions will occur. *Huang Qi* treats this deficiency heat condition even though it is warm in nature. **Exemplar Formula:** *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).

Cancer with qi deficiency caused by chemotherapy and radiation treatments: Patients with cancer often receive chemotherapy and radiation treatments that severely damage qi. Use of *Huang Qi* replenishes the qi and decreases the adverse side effects associated with such treatments.

- Qi deficiency due to chemotherapy and radiation: use *Huang Qi* with *Ling Zhi* (Ganoderma), *Nu Zhen Zi* (Fructus Ligustri Lucidi), *Dang Shen* (Radix Codonopsis), *Ren Shen* (Radix Ginseng), *Dong Chong Xia Cao* (Cordyceps) and *Shan Zhu Yu* (Fructus Corni).

Sudden qi collapse due to heavy blood loss: Qi and blood travel together in the vessels. When there is a sudden loss of blood, qi collapses as well. Symptoms include sudden facial pallor, profuse sweating, shortness of breath, and fading pulse. In severe cases, symptoms such as icy extremities, a sudden drop in blood pressure and body temperature, and sweating, may occur.

- Qi and blood collapse: use a large dose of *Huang Qi* (between 60 to 120 grams) with *Dang Gui* (Radicis

Huang Qi (Radix Astragali)

Angelicae Sinensis), *Ren Shen* (Radix Ginseng), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Mai Men Dong* (Radix Ophiopogonis), and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

2. Tonifies *Wei* (Defensive) *Qi*, Consolidates the Exterior

Deficiency of the *wei* (defensive) *qi* with spontaneous sweating: Deficiency of the exterior leads to leakage of body fluids, resulting in spontaneous perspiration. This often leads to a compromised immune system and frequent contraction of exterior pathogenic infections.

- Spontaneous perspiration because of exterior deficiency: use *Huang Qi* with *Mu Li* (Concha Ostreae), *Ma Huang Gen* (Radix Ephedrae), and *Fu Xiao Mai* (Semen Tritici Aestivi Levis).
- Spontaneous perspiration with aversion to wind, weak pulse, and frequent contraction of bacterial and viral infections: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Yu Ping Feng San* (Jade Windscreen Powder).
- Profuse perspiration and extreme fatigue due to yang deficiency: combine *Huang Qi* with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Night sweating due to qi and yin deficiencies: use it with *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Fu Xiao Mai* (Semen Tritici Aestivi Levis) and *Di Gu Pi* (Cortex Lycii).

3. Promotes the Discharge of Pus and Generates Flesh

Chronic non-healing ulcers and sores: *Huang Qi* treats chronic sores and ulcerations with underlying deficiencies of qi and blood. Use of *Huang Qi* facilitates the discharge of pus and abscess, and encourages healing through generation of new flesh.

- Chronic non-ulcerating sores with pus: combine *Huang Qi* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Chuan Shan Jia* (Squama Manis), and *Zao Jiao Ci* (Spina Gleditsiae).
- Chronic sores with underlying deficiency: use this herb with *Ren Shen* (Radix Ginseng), *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Bai Zhi* (Radix Angelicae Dahuricae) and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Qian Jin Nei Tuo San* (Drain the Interior Powder Worthy of A Thousand Gold).
- Flat, chronic sores and non-healing ulcers: use it with *Dang Gui* (Radicis Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Preparata), *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Rou Gui* (Cortex Cinnamomi). **Exemplar Formula:** *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction).
- Qi deficiency lesions in children: add *Huang Qi* to *Ren Shen* (Radix Ginseng), *Rou Gui* (Cortex Cinnamomi), and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata). **Exemplar Formula:** *Bao Yuan Tang* (Preserve the Basal Decoction).

4. Regulates Water Circulation, Reduces Edema

Edema due to qi deficiency: Spleen qi deficiency with an inability to carry out the transportation function results in retention of water in the body. *Huang Qi* tonifies qi and promotes normal circulation of water to treat conditions such as facial edema, superficial edema, sensations of heaviness in the body, spontaneous sweating and intolerance of wind. *Huang Qi* tonifies qi, and in turn facilitates the elimination of water. When used individually, the diuretic effect of *Huang Qi* is very mild and should be combined with diuretic herbs for stronger therapeutic results. However, this is the herb of choice when the patient presents deficiency along with water retention signs and symptoms. When using *Huang Qi* as a diuretic only, the recommended dosage is low, approximately 9 grams.

- Edema, heavy sensations of the body, spontaneous perspiration, and aversion to wind because of accumulation of water with an exterior wind condition: use *Huang Qi* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fen Fang Ji* (Radix Stephaniae Tetandrae), *Gan Cao* (Radix Glycyrrhizae) and *Sheng Jiang* (Rhizoma Zingiberis Recens). **Exemplar Formula:** *Fang Ji Huang Qi Tang* (Stephania and Astragalus Decoction).
- Superficial edema caused by yang deficiency: combine this herb with *Gui Zhi* (Ramulus Cinnamomi), *Fu Ling* (Poria) and *Fen Fang Ji* (Radix Stephaniae Tetandrae). **Exemplar Formula:** *Fang Ji Fu Ling Tang* (Stephania and Poria Decoction).
- Chronic nephritis with edema and proteinuria: use a high dose of *Huang Qi* (60 to 90 grams) with *Dang Shen* (Radix Codonopsis), *Shi Wei* (Folium Pyrrosiae), and *Shan Yao* (Rhizoma Dioscoreae) with *Fang Ji Huang Qi Tang* (Stephania and Astragalus Decoction) or *Fang Ji Fu Ling Tang* (Stephania and Poria Decoction).

5. Relieves Numbness and Pain

Numbness: Numbness of the muscles in this case is due to insufficient nourishment and circulation of qi and blood. *Huang Qi* has a strong effect to tonify qi, which, in turn, helps to generate blood and increase blood flow to the extremities. It tonifies and promotes normal circulation of qi to relieve skin and muscle numbness and pain.

Huang Qi (Radix Astragali)

- Skin and muscle numbness and pain caused by qi and blood deficiencies: use this herb with *Gui Zhi* (Ramulus Cinnamomi), *Bai Shao* (Radix Paeoniae Alba), *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae).
- Numbness and pain in the extremities due to deficiency at *ying* (nutritive) and *wei* (defense) levels and accumulation of wind and dampness: use *Huang Qi* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), *Jiang Huang* (Rhizoma Curcumae Longae), and *Dang Gui* (Radicis Angelicae Sinensis). **Exemplar Formula:** *Juan Bi Tang* (Remove Painful Obstruction Decoctions).

Stroke Sequelae: *Huang Qi* is commonly used to treat post-stroke complications, such as hemiplegia and deviation of the eyes and mouth, caused by qi deficiency and blood stagnation. It is important to note that *Huang Qi* is only suitable for post-stroke patients who are deficient in nature and the dosage used must be high. Use of *Huang Qi* is not recommended for those who are at risk of stroke due to Liver yang rising, such as in patients with hypertension.

- Post-stroke complications: use a high dose of *Huang Qi* with *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami) and *Di Long* (Pheretima). **Exemplar Formula:** *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction).

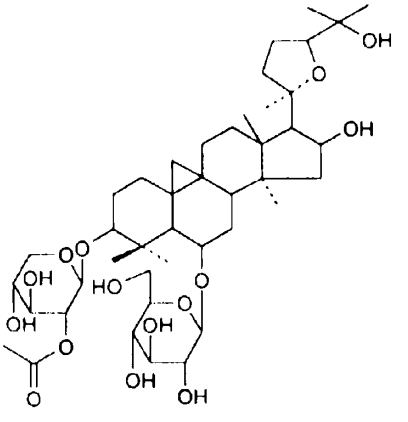
6. Treats *Xiao Ke* (Wasting and Thirsting) Syndrome

***Xiao ke* syndrome:** *Huang Qi* tonifies qi, promotes generation of body fluids, and treats *xiao ke* syndrome accompanied by symptoms of thirst and fatigue.

- *Xiao ke* syndrome without interior heat: use *Huang Qi* with *Sheng Di Huang* (Radix Rehmanniae), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae) and pig pancreas.
- *Xiao ke* syndrome with interior heat: combine this herb with *Zhi Mu* (Radix Anemarrhenae), *Ge Gen* (Radix Puerariae), *Tian Hua Fen* (Radix Trichosanthis) and *Shan Yao* (Rhizoma Dioscoreae).

DOSAGE

10 to 15 grams. The maximum dosage of *Huang Qi* is 120 grams. Unprocessed *Huang Qi* (fresh or dried) has qualities better suited to treat exterior disorders, as it tonifies *wei* (defensive) *qi*, stops perspiration, regulates circulation of water, reduces edema, and promotes generation of flesh. The honey-processed herb has an enhanced ability to treat imbalances of the interior, such as Spleen and Lung qi deficiencies and yang deficiency. It is also commonly used to treat chronic cases of fatigue, diarrhea, organ prolapse, and all cases of deficiency.



When preparing honey-fried *Huang Qi*, use 12.5 to 15 kg of honey with 50 kg of the dried herb. Mix and stir fry over low heat until the herb turns brown and is no longer sticky to the touch. [The amounts of honey and *Huang Qi* can be increased or decreased as long as they stay in the same proportion.]

CAUTIONS / CONTRAINDICATIONS

- Use of *Huang Qi* is contraindicated when pathogens are present at exterior levels of the body.
- It is contraindicated in cases characterized by an excess of qi, such as found in anger due to Liver qi stagnation.
- It is contraindicated in internal heat, excess fire, or deficiency and cold of the lower *jiao*.
- It is contraindicated with sores and lesions caused by heat in the blood.
- It is contraindicated in cases of stagnation.
- Pregnant women in the third trimester should use *Huang Qi* with caution. It has a diuretic effect and long-term use may decrease the quantity of amniotic fluid.[1]

CHEMICAL COMPOSITION

Acetylastragaloside I, astragaloside I-IV, isoastragaloside I-II, astramembrannin II, cycloastragenol, cyclosiversigenin, soyasaponin I, tragacantha, kumatakenin, fomononetin.[2,3]

Astragaloside I

PHARMACOLOGICAL EFFECTS

- **Immunostimulant:** Subcutaneous injection of *Huang Qi* increases white blood cells and multinuclear leukocytes in mice. In addition, administration of *Huang Qi* is associated with an enhanced production of IgM in mice.[4,5]
- **Hematopoietic:** *Huang Qi* has been shown to increase the production and maturity of blood cells from the bone marrow.[6]

Huang Qi (Radix Astragali)

- **Metabolic:** Decoction of *Huang Qi* has been shown to increase the basal metabolic rate and cAMP in mice.[7]
- **Effect on cAMP and cGMP:** Decoction of *Huang Qi* is associated with increased cAMP but decreased cGMP in plasma, increased cAMP and cGMP in the spleen, and increased cGMP in the liver.[8]
- **Renal:** Oral use of *Huang Qi* powder decreases the amount of protein present in the urine of mice.[9]
- **Antihypertensive:** Intravenous injection of *Huang Qi* decreases blood pressure in anesthetized rabbits, dogs and cats. The mechanism of this effect is attributed to dilation of peripheral blood vessels.[10]
- **Hepatoprotective:** *Huang Qi* is commonly used to treat various types of chronic hepatitis. Furthermore, *Huang Qi* has significant hepatoprotective effects, especially against carbon tetrachloride.[11,12]
- **Antibiotic:** *Huang Qi* has been shown to inhibit the activity of *Bacillus dysenteriae, Bacillus anthracis,* β-hemolytic streptococcus, *Corynebacterium diphtheriae, Diplococcus pneumoniae,* and *Staphylococcus aureus.*[13]
- **Sedative and analgesic:** Intravenous injection of astragaloside has been shown to have mild sedative and analgesic effects in mice.[14]

CLINICAL STUDIES AND RESEARCH

- **Prevention of common colds and influenza:** In one study, 540 patients with past histories of frequent common colds and influenza were divided into two groups and received preventative treatment with *Huang Qi.* One group received 5 grams of *Huang Qi* in pills three times daily, and the other group received 15 grams of *Huang Qi* in decoction every other day. All patients had two courses of 10 days treatment, with 5 days of rest in between courses. The study reported that patients in both groups had similar results. Both had 2.7 times lower risk of infection, and a shortened duration of infection.[15]
- **Prevention of pulmonary tract infection:** An herbal tea of 15 grams of *Huang Qi* and 10 grams of *Da Zao* (Fructus Jujubae), given twice daily, demonstrated marked effectiveness in prevention of pulmonary tract infection in 160 patients with past histories of chronic bronchitis, bronchial asthma, and allergic rhinitis.[16]
- **Prevention of upper respiratory tract infection in children:** One report described that 2 ml of *Huang Qi* solution (equivalent to 2 grams of dried herb) given daily, showed 94% effectiveness in prevention of respiratory tract infection in 100 children.[17]
- **Rhinitis:** Local injection of a *Huang Qi* preparation every third day for 10 treatments showed a 93.26% rate of effectiveness in 47 patients with rhinitis.[18]
- **Prevention of asthma and cough:** A *Huang Qi* preparation was injected (equivalent to 1 gram of dried herb) into *Zusanli* (ST 36) bilaterally twice weekly for three months per course of treatment, for a total of 3 to 4 courses of treatment, with 2 weeks of rest between each course. Out of 41 patients, there was significant improvement in 85.4% and moderate improvement in 56.1%. Furthermore, most patients noticed an increase in appetite and energy, improvement in quality of sleep, and fewer episodes of infection.[19]
- **Peptic ulcer disease:** According to one report, patients with gastric ulcers, duodenal ulcers, or both, were treated with intramuscular injections of 2 ml of a *Huang Qi* preparation (equivalent to 2 grams of dried herb) twice daily. Many patients showed symptomatic improvement after 1 week. Most patients showed complete healing or moderate improvement after approximately one month.[20] According to another report, an herbal decoction containing *Huang Qi* 12g, *Bai Shao* (Radix Paeoniae Alba) 12g, *Gan Cao* (Radix Glycyrrhizae) 5g, *Gui Zhi* (Ramulus Cinnamomi) 10g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 3g, *Da Zao* (Fructus Jujubae) 5 pieces, and *Yi Tang* (Saccharum Granorum) 30g, was given in two equally-divided doses twice daily for 25 to 53 days to treat patients with peptic ulcer disease. Out of 43 patients, 22 reported significant improvement, 17 reported moderate improvement, and 4 showed no improvement. The rate of effectiveness was 90.7%.[21]
- **Gastric prolapse:** Patients with gastric prolapse were treated with an herbal preparation of fresh *Huang Qi, Sheng Ma* (Rhizoma Cimicifugae), *Chai Hu* (Radix Bupleuri), and *Wu Wei Zi* (Fructus Schisandrae Chinensis). The treatment protocol was to inject the herbs (dosage equivalent to 1 gram of each herb) intramuscularly into *Zhongwan* (CV 12) and *Zusanli* (ST 36) every other day for 1 month. The rate of effectiveness was 84.9% among 42 patients who participated in the study.[22]
- **Rectal prolapse:** Daily administration of an herbal decoction containing 30 to 50 grams of fresh *Huang Qi,* 15 grams of *Dan Shen* (Radix Salviae Miltiorrhizae), 10 grams of *Shan Zha* (Fructus Crataegi), 3 grams of *Fang Feng* (Radix Saposhnikoviae), and 3 grams of *Sheng Ma* (Rhizoma Cimicifugae) showed marked effectiveness for treatment of rectal prolapse.[23]
- **Hepatitis:** In one study, 29 patients with chronic infectious hepatitis were treated with intramuscular injections of *Huang Qi* (equivalent to 4 grams of dried herb) for 1 to 3 months, with marked improvement.[24] Another report described 174 patients with positive HBsAg who were treated with an injection of a 100% *Huang Qi* preparation. The treatment protocol was to administer one injection every three days for a total of 2 months, alternating between two acupuncture points *Zusanli* (ST 36) and *Shenshu* (BL 23). Out of 174 patients, 131 (75.3%) became negative for HBsAg.[25]

Huang Qi (Radix Astragali)

- **Immune disorder:** According to one report, 14 patients with low white blood cell counts showed marked improvement with an herbal decoction of 30 grams of fresh *Huang Qi*, 15 grams of *Ren Shen* (Radix Ginseng), and 20 pieces of *Da Zao* (Fructus Jujubae).[26]
- **Reversal of immune suppression:** In an *in vivo* study, administration of *Huang Qi* was associated with reversal of cyclophosphamide-induced immune suppression.[27]
- **Leukopenia:** Administration of *Huang Qi* was associated with an obvious rise in white blood cell (WBC) counts in 115 patients with leukopenia.[28]
- **Immune restoration:** Administration of *Huang Qi* and *Nu Zhen Zi* (Fructus Ligustri Lucidi) was reported to act as a potent immune stimulant in 19 cancer patients.[29]
- **Nephritis:** Twenty patients with chronic nephritis were treated with 100g of *Huang Qi* in decoction, given in two equally-divided doses twice daily for 15 to 90 days. Out of 20 patients, 7 showed significant improvement, 9 showed marked improvement, and 4 showed no improvement. Most patients reported symptomatic improvement as well as a decrease of protein in the urine.[30]
- **Nephropathy:** *Huang Qi* in large doses has shown beneficial effects against nephropathy in mice and glomerulonephritis in rabbits. Furthermore, large doses of *Huang Qi* are commonly used to treat chronic nephritis in human clinical trials. It increases the volume of urine, and the excretion of chloride and ammonia.[31,32]
- **Glomerulonephritis:** In one study, 56 patients with chronic glomerulonephritis were treated with intramuscular injection of *Huang Qi* (equivalent to 3 grams of dried herb) for 1 month with marked reduction of protein in the urine (effective rate of 61.7%) and improved kidney function.[33]
- **Psoriasis:** Administration of *Huang Qi* (as powder, decoction, injection or topical cream) was used to treat patients with psoriasis with a 95.6% rate of effectiveness. Out of 204 patients, 42 reported marked improvement, 62 reported moderate improvement, 91 reported slight improvement, and 9 reported no improvement.[34]
- **Pulseless disease (Takayasu's disease):** In one study, 6 patients with this condition were treated with an herbal formula with significant improvement in 3 cases, moderate improvement in 2 cases, and slight improvement in 1 case. The herbal formula contained *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction) with 60 grams of *Huang Qi* and additional blood-activating and blood stasis-removing herbs.[35]
- **Prostatic hypertrophy:** In one report, 52 patients with prostatic hypertrophy were treated with an herbal decoction taken on an empty stomach. The formula contained 100 grams of fresh *Huang Qi* and 30 grams of *Hua Shi* (Talcum) cooked in decoction, with 3 grams of *Hu Po* (Succinum) added prior to administration. At the conclusion of the study, 38 patients reported complete remission of symptoms, 13 reported improvement in flow rate and reduction in size of the prostate, and 1 reported no improvement.[36]

HERB-DRUG INTERACTION

- **Aminoglycosides:** In one study, a compound injection of *Huang Qi* and *Lu Han Cao* (Herba Pyrolae) in guinea pigs was found to be effective in preventing ototoxicity and nephrotoxicity associated with use of aminoglycosides.[37] [Note: Examples of aminoglycosides include gentamicin, tobramycin, amikacin.]
- It has been demonstrated that *Huang Qi* has an inhibitory influence on copper-induced oxidative stress. According to studies, the effect of *Huang Qi* is similar to that of mannitol and of superoxide dismutase as free radical scavengers.[38]

TOXICOLOGY

Huang Qi has very low toxicity. Oral ingestion of *Huang Qi* decoction (7.5 g/kg) cannot be determined in rats. The LD_{50} in mice for intraperitoneal injection is approximately 40 g/kg.[39]

AUTHORS' COMMENTS

According to Dr. Zhang Xiao-Ping, the combination of *Huang Qi* and *Shan Yao* (Rhizoma Dioscoreae) has excellent effects to lower plasma glucose levels to treat diabetes mellitus patients. These two herbs are especially effective in individuals with diabetes characterized by qi and yin deficiencies.

Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)

絞股藍 绞股蓝

Pinyin Name: *Jiao Gu Lan*
Alternate Chinese Names: *Qi Dan Ye, Xiao Ke Yao, Jin Si Hua Gua Long, Long Xu Teng, Pian Di Sheng Gen, Wu Ye Shen*
English Name: gynostemma
Botanical Name: *Gynostemma pentaphyllum* (Thunb.) Makino.
Pharmaceutical Name: Rhizoma seu Herba Gynostemmatis
Properties: slightly bitter, cold
Channels Entered: Lung, Heart

CHINESE THERAPEUTIC ACTIONS

1. Moistens Lung, Promotes Generation of Body Fluids, Dispels Phlegm

Jiao Gu Lan has a general effect to nourish and strengthen the body. It is commonly used to treat chronic disorders, such as asthma, migraines, neuralgia, impaired function of the respiratory and gastrointestinal tracts, and syndromes characterized by deficiency. Clinical manifestations may include vomiting or nausea with drooling of saliva, shortness of breath and chest congestion.

- Chronic bronchitis: use *Jiao Gu Lan* with *Fu Rong* (Radix Hibisci).

2. Clears Heat, Eliminates Toxins, Reduces Inflammation

Toxic heat accumulation: *Jiao Gu Lan* (Rhizoma seu

Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)

Herba Gynostemmatis) clears heat and eliminates toxins from the body to reduce swelling, inflammation and pain. Clinically, it treats gastric ulcers, duodenal ulcers, hyperlipidemia, nodules, cystitis, herpes zoster and other conditions characterized by dampness, heat and toxins. *Jiao Gu Lan* has also been used to treat various kinds of cancer and to help inhibit the spread of tumors.

- Gastric and duodenal ulcer: combine *Jiao Gu Lan* with *Bai Hua She She Cao* (Herba Oldenlandia), *Hai Piao Xiao* (Endoconcha Sepiae) and *Bei Mu* (Bulbus Fritillaria).
- Nodules: use this herb with *Bie Jia* (Carapax Trionycis), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) or add it to *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life).
- Tumors: add this herb to *Bai Hua She She Cao* (Herba Oldenlandia), *Ban Zhi Lian* (Herba Scutellariae Barbatae), *Ling Zhi* (Ganoderma), and *Dong Chong Xia Cao* (Cordyceps).
- Cystitis: use it with *Shui Ding Xiang* (Herba Ludwigiae Prostratae), and *Ding Shu Xiu* (Herba Elephantopus Scaber).
- Herpes zoster: add it to *Long Dan Cao* (Radix Gentianae) or *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver). These herbs can be taken internally or applied topically.
- Liver spots: Mix *Jiao Gu Lan* powder with water, apply topically as paste.

3. Lowers Blood Pressure and Cholesterol

- Coronary sclerosis: combine *Jiao Gu Lan* with *Yu Jin* (Radix Curcumae), *Dan Shen* (Radix Salviae Miltiorrhizae), and *Shi Chang Pu* (Rhizoma Acori), or add it to *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction).
- Hypertension: add it to *Hu Zhang* (Rhizoma Polygoni Cuspidati) and *Cha Chi Huang* (Herba Stellariae Aquaticae).
- Hyperlipidemia: use this herb with *Jue Ming Zi* (Semen Cassiae), *Shan Zha* (Fructus Crataegi), and *Da Huang* (Radix et Rhizoma Rhei).

DOSAGE

5 to 12 grams in decoction, and 0.75 to 1.0 gram in powder form.

CAUTIONS / CONTRAINDICATIONS

- *Jiao Gu Lan* may cause mild stomach discomfort when taken as tea on an empty stomach.
- Use of *Jiao Gu Lan* has been associated with potential side effects such as fatigue, lack of energy, dizziness, chest congestion, mild fever, perspiration, sore throat, rash, increased heartbeat, and increased respiration rate.[1]
- *Jiao Gu Lan* may caused drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Gynoside, ginsenoside, rutin, ombuoside.[2]

PHARMACOLOGICAL EFFECTS

- **Immunostimulant:** *Jiao Gu Lan* has been shown in animal studies to increase the weight of the spleen, the phagocytic activity of macrophages, and the number of T-lymphocytes and NK cells.[3,4,5,6]
- **Cardiovascular:** Decoction of *Jiao Gu Lan* (20 to 40%) has demonstrated positive inotropic and negative chronotropic effects in rabbits. In anesthetized cats, injection of *Jiao Gu Lan* at 50 mg/kg has a reliable antihypertensive effect for up to 30 minutes.[7,8]
- **Antihyperlipidemic:** Water extract of *Jiao Gu Lan* has demonstrated a marked effect to lower cholesterol and triglycerides in rats.[9]
- **Antineoplastic:** According to laboratory studies, preparations of *Jiao Gu Lan* have demonstrated an inhibiting influence on various kinds of cancer cells, including cancers of the stomach, abdomen, uterus, liver, mouth, esophagus, pancreas, brain, lung, kidney, tongue, breast, and skin. There is also an increase in life expectancy in mice that received the herb, in comparison to the placebo group.[10]
- **Antiaging:** Administration of *Jiao Gu Lan* is associated with prolonged life expectancy and delayed aging in animals. In one study, a group of old mice were divided into two groups. After 4 months, all mice in the control group died, while only 50% of the mice died in the herb group.[11]
- **Antiplatelet:** *Jiao Gu Lan* inhibits platelet aggregation and thrombus formation in mice.[12]
- **Endocrine:** Administration of *Jiao Gu Lan* is associated with an increase in plasma ACTH levels in rats.[13]
- **CNS suppressant:** Extract of *Jiao Gu Lan* has demonstrated sedative, hypnotic and analgesic effects that last up to 7 hours in mice. It prolonged sleeping time induced by barbiturates and reversed the effects of mescaline. Lastly, *Jiao Gu Lan* at 100 to 150 mg/kg has a significant analgesic effect in mice.[14,15,16]

CLINICAL STUDIES AND RESEARCH

- **Hypercholesterolemia:** In one clinical trial, 129 patients were divided into two groups with one receiving *Jiao Gu Lan* and the other receiving a placebo. After 1 month, the patients in the herb group showed a statistically significant reduction in both total cholesterol and triglyceride levels in comparison with the placebo group. Side effects

Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)

of *Jiao Gu Lan* included dizziness in 2 cases, poor appetite in 1 case, abdominal distention in 4 cases, weight loss in 42 patients, and weight gain in 28 patients.[17] In another study, the combination of *Jiao Gu Lan* and *Shan Zha* (Fructus Crataegi) reduced both triglyceride and cholesterol levels.[18]

- **Antiaging:** Administration of *Jiao Gu Lan* three times daily for 2 months was beneficial for 106 patients in reducing general signs and symptoms of aging, such as fatigue, lack of energy, aversion to cold, diarrhea, poor memory, decreased balance, insomnia and excessive dreams.[19]
- **Headache:** In one study, 50 patients with headaches due to various causes were treated with 30 to 50 grams of *Jiao Gu Lan* daily as tea with 79.6% rate of effectiveness.[20]
- **Chronic tracheitis:** A preparation of *Jiao Gu Lan* was used to treat patients with chronic tracheitis in one clinical study. Out of 86 patients, the study reported complete recovery in 12 patients, moderate improvement in 23 patients, some improvement in 45 patients, and no change in 6 patients.[21]
- **Chronic atrophic gastritis:** In one clinical study, 151 patients were treated with 10 grams of *Jiao Gu Lan* three times daily for 3 months. According to endoscopy, 28 patients showed significant improvement, 57 showed moderate improvement, 58 showed no change, and 8 showed deterioration in their condition. The overall effective rate was 56.26%. No significant side effects were reported.[22]

HERB-DRUG INTERACTION

- **Sedatives:** *Jiao Gu Lan* has sedative, hypnotic and analgesic effects. It potentiates the sedative effect of barbiturates and reverses the effect of mescaline.[23,24,25] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

No abnormalities were reported via blood panel, or in the liver, kidney, heart, and testes when *Jiao Gu Lan* was given to mice at 4 g/kg/day for 90 days. In acute toxicology studies, the LD_{50} for oral ingestion of extract is 48.94 g/kg, and the LD_{50} for intraperitoneal injection is 2,862 mg/kg.[26]

Bai Zhu (Rhizoma Atractylodis Macrocephalae)

白术

Pinyin Name: *Bai Zhu*
Literal Name: "white atractylodes"
Alternate Chinese Names: *Yu Zhu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: white atractylodes, large-headed atractylodes rhizome
Botanical Name: *Atractylodes macrocephala* Koidz. (*Bai Zhu*)
Pharmaceutical Name: Rhizoma Atractylodis Macrocephalae
Properties: bitter, sweet, warm
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Qi, Strengthens Spleen

Spleen and Stomach qi deficiencies: *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) tonifies the middle *jiao* to enhance transformation and transportation functions. Clinically, it treats disorders characterized by qi deficiency of the Spleen and Stomach, such as shortness of breath, fatigue, sallow facial appearance, decreased food intake, loose stools, and diarrhea.

- Qi deficiency of the Spleen and Stomach: combine *Bai Zhu* with *Ren Shen* (Radix Ginseng), *Fu Ling* (Poria) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Si Jun Zi Tang* (Four-Gentleman Decoction).
- Qi deficiency of the Spleen and Stomach, with food accumulation and qi stagnation: use this herb with *Ren Shen* (Radix Ginseng), *Fu Ling* (Poria), *Gan Cao* (Radix Glycyrrhizae) and *Zhi Shi* (Fructus Aurantii Immaturus).
- Deficiency and cold of the Spleen and Stomach: use it with *Gan Jiang* (Rhizoma Zingiberis), *Ren Shen* (Radix Ginseng) and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata). **Exemplar Formula:** *Li Zhong Tang* (Regulate the Middle Decoction).

Spleen deficiency with accumulated dampness: Bitter and warm in nature, *Bai Zhu* has excellent functions to treat diarrhea by drying dampness and strengthening the Spleen.

- Diarrhea caused by summer-heat and dampness: use *Bai Zhu* with *Che Qian Zi* (Semen Plantaginis).
- Diarrhea due to deficiencies of the Spleen and Stomach, with accumulated dampness: use this herb with *Ren Shen* (Radix Ginseng), *Fu Ling* (Poria), *Yi Yi Ren* (Semen Coicis) and *Sha Ren* (Fructus Amomi). **Exemplar Formula:** *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder).
- Clear watery leukorrhea due to deficiency of the Spleen and accumulated dampness: add it to *Shan Yao* (Rhizoma Dioscoreae), *Cang Zhu* (Rhizoma Atractylodis) and *Che Qian Zi* (Semen Plantaginis). **Exemplar Formula:** *Wan Dai Tang* (End Discharge Decoction).

Blood deficiency: Blood deficiency may occur secondary to Spleen qi deficiency because the production of blood is dependent upon the availability of qi. *Bai Zhu* is used with other qi and blood tonics to tonify qi and enhance the production of blood.

- Blood deficiency: incorporate *Bai Zhu* with *Ren Shen* (Radix Ginseng), *Fu Ling* (Poria), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formulas:** *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi) or *Ba Zhen Tang* (Eight-Treasure Decoction).

2. Dries Dampness, Eliminates Water Accumulation

Edema due to accumulation of water and dampness: Deficiency of the Spleen impairs its normal function to transform and transport water, leading to edema and other conditions of water accumulation. *Bai Zhu* is most suitable for edema with Spleen qi deficiency.

- Edema with Spleen deficiency: use *Bai Zhu* with *Fu Ling* (Poria), *Zhu Ling* (Polyporus), and *Ze Xie* (Rhizoma Alismatis). **Exemplar Formula:** *Si Ling San* (Four-Ingredient Powder with Poria).
- Edema with Spleen yang deficiency: add this herb to *Fu Ling* (Poria), *Zhu Ling* (Polyporus), *Ze Xie* (Rhizoma Alismatis) and *Gui Zhi* (Ramulus Cinnamomi). **Exemplar Formula:**

Bai Zhu (Rhizoma Atractylodis Macrocephalae)

Wu Ling San (Five-Ingredient Powder with Poria).

- Edema with Kidney yang deficiency: use this herb with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Fu Ling* (Poria), and *Sheng Jiang* (Rhizoma Zingiberis Recens). **Exemplar Formula:** *Zhen Wu Tang* (True Warrior Decoction).

Accumulation of phlegm: Deficiency of the Spleen impairs its normal function of transforming and transporting water, leading to accumulation of water, dampness and phlegm. Characteristic symptoms of this include dizziness, vertigo, palpitations and cough with clear sputum.

- Accumulation of phlegm: add *Bai Zhu* to *Gui Zhi* (Ramulus Cinnamomi), *Fu Ling* (Poria) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction).
- Dizziness and vertigo due to accumulation of phlegm, with Liver wind: use this herb with *Ban Xia* (Rhizoma Pinelliae), *Tian Ma* (Rhizoma Gastrodiae), *Fu Ling* (Poria) and *Chen Pi* (Pericarpium Citri Reticulatae). **Exemplar Formula:** *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction).

3. Stops Spontaneous Perspiration

***Wei* (defensive) *qi* deficiency with spontaneous sweating:** *Bai Zhu* tonifies the Spleen, strengthens *wei qi*, and stops spontaneous perspiration. It may be used individually or in combination with other herbs. *Bai Zhu* is not generally used in patients with yin deficiency. However, if combined with appropriate herbs, it is effective for the treatment of night sweats caused by yin deficiency.

- Spontaneous perspiration: use *Bai Zhu* with *Huang Qi* (Radix Astragali), *Mu Li* (Concha Ostreae), *Ma Huang Gen* (Radix Ephedrae), and *Fu Xiao Mai* (Semen Tritici Aestivi Levis).
- Spontaneous perspiration and aversion to wind due to deficiency of *wei* (defensive) *qi*: add it to *Huang Qi* (Radix Astragali) and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Yu Ping Feng San* (Jade Windscreen Powder).
- Night sweats arising from yin deficiency: combine it with *Shi Hu* (Herba Dendrobii), *Mu Li* (Concha Ostreae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

4. Stabilizes Pregnancy

Restless fetus: Spleen qi deficiency in pregnant women can lead to malnutrition that causes restlessness in the fetus. *Bai Zhu* tonifies Spleen qi, then Spleen qi in turn nourishes the fetus and keeps it in place. *Bai Zhu* treats restless fetus and unstable pregnancy accompanied by Spleen qi deficiency.

- Unstable pregnancy with severe qi deficiency: use *Bai Zhu* with *Ren Shen* (Radix Ginseng), *Fu Ling* (Poria) and *Huang Qi* (Radix Astragali).
- Unstable pregnancy with qi deficiency and interior heat: use it with *Huang Qin* (Radix Scutellariae).
- Unstable pregnancy with Kidney deficiency: use this herb with *Sang Ji Sheng* (Herba Taxilli), *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci) and *E Jiao* (Colla Corii Asini).
- Unstable pregnancy with qi stagnation: combine it with *Su Geng* (Caulis Perillae), *Sha Ren* (Fructus Amomi) and *Chen Pi* (Pericarpium Citri Reticulatae).
- Unstable pregnancy with blood deficiency: add *Bai Zhu* to *Shu Di Huang* (Radix Rehmanniae Preparata), *Dang Gui* (Radicis Angelicae Sinensis), and *Bai Shao* (Radix Paeoniae Alba).
- Unstable pregnancy with uterine bleeding: use this herb with *E Jiao* (Colla Corii Asini) and charred *Ai Ye* (Folium Artemisiae Argyi).
- Miscarriage with bleeding: combine *Bai Zhu* with *E Jiao* (Colla Corii Asini) and charred *Ai Ye* (Folium Artemisiae Argyi).

DOSAGE

5 to 15 grams in decoction. Unprocessed *Bai Zhu* more strongly dries dampness and eliminates water accumulation. The dry-fried herb is stronger to tonify qi, strengthen the Spleen, stop perspiration and stabilize pregnancy. The charred form is stronger to strengthen the Spleen and stop diarrhea. The fresh herb is also used to treat constipation, at larger dosages of 60 to 120 grams.

CAUTIONS / CONTRAINDICATIONS

- *Bai Zhu* is not recommended for sole use in cases of yin deficiency, yin deficiency with heat, and fluid deficiency. It must be combined with appropriate herbs to prevent accentuating deficiency.
- Use of *Bai Zhu* is contraindicated in cases of qi stagnation characterized by feelings of distention and oppression.

CHEMICAL COMPOSITION

Atractylol, atractylon, junipercamphor, atractylolide, hydroxyactyldide, sesquiterpenelon, β-eudesmol, hinesol, 8-β-ethoxyatractylenolide, palmitic acid, anhydroatractylolide, fructose, synanthrin.[1]

PHARMACOLOGICAL EFFECTS

- **Adaptogenic:** Decoction of *Bai Zhu*, given to mice is associated with an increase in body weight, and increased swimming performance.[2]
- **Immunostimulant:** Decoction of *Bai Zhu* increases the activity of the macrophages and reticuloendothelial

Bai Zhu (Rhizoma Atractylodis Macrocephalae)

system. It also increases the number of white blood cells, lymphocytes, and IgG.[3,4]

- **Gastrointestinal:** *Bai Zhu* has a dual effect on the gastrointestinal tract. At low doses between 5 to 15 grams, it treats diarrhea. At high doses between 60 and 120 grams, it treats constipation.[5]
- **Antiplatelet:** *Bai Zhu* has a marked effect to inhibit the aggregation of platelets. In a clinical study of healthy volunteers, administration of 5% *Bai Zhu* decoction three times daily for 4 days significantly prolonged the prothrombin time. This effect may last for up to 10 days after discontinuation.[6]
- **Diuretic:** *Bai Zhu* has a marked and prolonged diuretic effect when administered to rats, rabbits, dogs and other animals. The proposed mechanism of action is inhibition of sodium re-absorption leading to increased diuresis.[7]
- **Antidiabetic:** Administration of *Bai Zhu* is associated with a slight decrease of blood glucose in rabbits and rats.[8]
- **Antineoplastic:** Essential oil of *Bai Zhu* has demonstrated marked inhibitory action against esophageal cancer in *in vitro* studies.[9]

CLINICAL STUDIES AND RESEARCH

- **Diarrhea:** According to one report, 320 infants with diarrhea were treated with 3 to 4 grams of an herbal powder three times daily before meals with good results. Foods that are raw, cold, oily or greasy were removed from the diet during the treatment period. The herbal powder contained *Bai Zhu* 200g, *Shan Yao* (Rhizoma Dioscoreae) 200g, *Zao Shu Pi* (Cortex Zizyphi Jujubae) 150g, and *Che Qian Zi* (Semen Plantaginis) 150g, all dry-fried.[10]
- **Hepatic disorders:** Various hepatic disorders characterized by deficiency of the Spleen with accumulation of dampness were treated with herbal formulas based on *Bai Zhu* with good results. The dosage of *Bai Zhu* was 30 to 60 grams for ascites due to liver cirrhosis, 15 to 30 grams in infectious hepatitis, and 60 to 100 grams in liver cancer.[11]
- **Excessive salivation:** Infants with excessive salivation were treated with marked effectiveness using the juice of 10 grams of fresh *Bai Zhu* mixed with small amounts of water and sugar.[12]
- **Chronic back and leg pain:** In one study, 24 patients with chronic pain in the back and legs characterized by cold and dampness were treated with an herbal decoction twice daily for 2 to 3 days with satisfactory results. The herbal decoction contained 30 grams of *Bai Zhu*, 6 grams of *Chuan Shan Jia* (Squama Manis), and 100 ml of grain-based liquor.[13]
- **Meniere's disease:** Dizziness and vertigo due to Meniere's disease have been successfully treated using an herbal formula containing 30 grams each of dry-fried *Bai Zhu*, *Ze Xie* (Rhizoma Alismatis) and dry-fried *Yi Yi Ren* (Semen Coicis).[14]
- **Constipation:** In one study, 50 women with post-surgical constipation were treated with an herbal decoction one time daily for 1 to 4 days, with satisfactory results. The herbal decoction contained 60 grams of fresh *Bai Zhu*, 30 grams of *Sheng Di Huang* (Radix Rehmanniae) and 3 grams of *Sheng Ma* (Rhizoma Cimicifugae).[15] Another report stated that fresh *Bai Zhu* may be used as the main herb for treating mild to severe constipation with dosages between 30 and 150 grams. For modification, *Sheng Di Huang* (Radix Rehmanniae) may be added if there are dry stools; *Sheng Ma* (Rhizoma Cimicifugae) may be added to ascend the clear and descend the turbid substances; and *Rou Gui* (Cortex Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Hou Po* (Cortex Magnoliae Officinalis) and *Gan Jiang* (Rhizoma Zingiberis) may be added if there are soft stools with difficulty in defecation, slippery and black/gray tongue coat, and thin, weak pulse.[16]

HERB-DRUG INTERACTION

- **Omeprazole:** It has been suggested that hinesol, one of the components of *Bai Zhu*, is a relatively specific inhibitor of H+, K+ -ATPase. Hinesol also enhanced the inhibitory effect of omeprazole on H+, K+ -ATPase, though the exact inhibitory sites are different.[17]
- **Anticoagulant or antiplatelet drugs:** *Bai Zhu* has antiplatelet effects, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though no instances of this potential interaction have been documented, this herb may potentiate the effect of drugs such as warfarin.[18] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]
- **Diuretics:** *Bai Zhu* has a diuretic effect. Though there is no actual report of instances of this potential interaction, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[19] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

The LD_{50} for decoction of *Bai Zhu* in mice via intraperitoneal injection is 13.3 g/kg. Following injection, most animals showed excitation followed by sedation.[20]

In another study, decoction of *Bai Zhu* at the dosage of 0.5 g/kg given one time daily for 14 days via oral ingestion showed a decrease in white blood cells, especially lymphocytes.[21]

Bai Zhu (Rhizoma Atractylodis Macrocephalae)

AUTHORS' COMMENTS

Historically, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Cang Zhu* (Rhizoma Atractylodis) have been used interchangeably. In *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, only "*Zhu*" was mentioned without stating whether it was *Cang Zhu* or *Bai Zhu*. They were used interchangeably until the Tang Dynasty. Starting from the Song dynasty, *Cang Zhu* and *Bai Zhu* began to be used separately. Though both belong to the Compositae family and both strengthen the Spleen to dispel dampness, *Bai Zhu* tonifies qi, stops perspiration, and stabilizes the fetus, while *Cang Zhu* more strongly dries dampness and induces perspiration to dispel external pathogenic factors. Today, *Bai Zhu* is used more with Spleen-deficient patients while *Cang Zhu* is used more for patients with dampness. But when both Spleen deficiency and dampness are prominent, both herbs can be combined.

Bai Zhu has an interesting ability to treat both diarrhea and constipation. Historically, it has been used within a normal dosage (5 to 15 grams) to strengthen the Spleen, improve digestive function, and treat diarrhea. More recently, it was found that a large dose (60 to 120 grams) of fresh *Bai Zhu* is also effective for treatment of constipation, presumably by strengthening the Spleen to push out the feces. *Bai Zhu* is used alone, or combined with *Sheng Di Huang* (Radix Rehmanniae) or *Sheng Ma* (Rhizoma Cimicifugae) for treatment of constipation.

There are four herbs that are commonly used to stabilize pregnancy:

- *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) treats restless fetus from Spleen qi deficiency.
- *Sha Ren* (Fructus Amomi) regulates qi and calms restless fetus in the presence of qi stagnation and middle *jiao* deficiency.
- *Du Zhong* (Cortex Eucommiae) is most suitable to treat restless fetus caused by deficiency of the Kidney and Liver.
- *Huang Qin* (Radix Scutellariae) calms restless fetus caused by heat.

Shan Yao (Rhizoma Dioscoreae)

山藥 山药

Pinyin Name: *Shan Yao*
Literal Name: "mountain medicine"
Alternate Chinese Names: *Huai Shan Yao, Huai Shan*
English Name: dioscorea, common yam rhizome
Botanical Name: *Dioscorea opposita* Thunb. (*Shu Yu*)
Pharmaceutical Name: Rhizoma Dioscoreae
Properties: sweet, neutral
Channels Entered: Kidney, Lung, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Qi and Nourishes Spleen and Stomach Yin

Spleen and Stomach deficiencies: *Shan Yao* (Rhizoma Dioscoreae) enhances the transportation and transformation functions of the Spleen and Stomach to treat fatigue, lack of energy, decreased food intake, loose stools, diarrhea and other conditions characterized by deficiency of the middle *jiao*. *Shan Yao* is often used in an herbal formula for synergistic effect with the other herbs, but it may be used individually at a large dosage, in powder, if necessary. Sweet-tasting *Shan Yao* tonifies both the qi and the yin of the Spleen. It is also slightly astringent, as it has an effect to relieve diarrhea or loose stools.

- Decreased food intake and lack of energy due to Spleen deficiency: use *Shan Yao* with *Ren Shen* (Radix Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Poor appetite, loose stools and diarrhea due to Spleen deficiency: use it with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Yi Yi Ren* (Semen Coicis). **Exemplar Formula:** *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder).
- Food stagnation due to deficiency of the Spleen and Stomach: combine this herb with *Yi Yi Ren* (Semen Coicis), *Shen Qu* (Massa Fermentata) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).
- Deficiency of the Spleen and Stomach with qi stagnation: add it to *Zhi Shi* (Fructus Aurantii Immaturus), *Chen Pi* (Pericarpium Citri Reticulatae), and *Sha Ren* (Fructus Amomi).
- Deficiency of the Spleen and Stomach with Stomach yin deficiency: use *Shan Yao* with *Mai Men Dong* (Radix Ophiopogonis), *Shi Hu* (Herba Dendrobii) and *Yu Zhu* (Rhizoma Polygonati Odorati).

Leukorrhea: Spleen deficiency causes accumulation of dampness and may lead to leukorrhea. Depending on the color and smell of the discharge, other herbs can be added accordingly.

- Red and white leukorrhea: combine *Shan Yao* with *Hai Piao Xiao* (Endoconcha Sepiae), *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae) and *Qian Cao* (Radix Rubiae). **Exemplar Formula:** *Qing Dai Tang* (Clear the Discharge Decoction).
- Yellow leukorrhea with foul odor, caused by deficiency of the Spleen and accumulation of damp-heat: use this herb with *Huang Bai* (Cortex Phellodendri), *Che Qian Zi* (Semen Plantaginis), *Zhi Shi* (Fructus Aurantii Immaturus) and *Bai Guo* (Semen Ginkgo). **Exemplar Formula:** *Yi Huang Tang* (Benefit the Yellow [Discharge] Decoction).
- Leukorrhea due to Spleen deficiency and Liver qi stagnation: use it with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Cang Zhu* (Rhizoma Atractylodis), *Ren Shen* (Radix Ginseng), *Chai Hu* (Radix Bupleuri) and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Wan Dai Tang* (End Discharge Decoction).
- Leukorrhea due to Spleen and Kidney deficiencies: use *Shan Yao* with *Shan Zhu Yu* (Fructus Corni) and *Tu Si Zi* (Semen Cuscutae).

2. Tonifies Qi and Nourishes Lung Yin

Lung deficiency: The Lung dominates qi, prefers a moist environment, and dislikes dryness. Both Lung yin deficiency and qi deficiency can lead to coughing, wheezing, shallow breathing, with an absence of sputum or scanty, sticky, difficult-to-expectorate sputum. *Shan Yao* tonifies

Shan Yao (Rhizoma Dioscoreae)

both the qi and the yin of the Lung and is ideal for the conditions described above.

- Lung yin and fluid deficiencies: use *Shan Yao* with *Xuan Shen* (Radix Scrophulariae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Niu Bang Zi* (Fructus Arctii).
- Lung yin and fluid deficiencies with heat: combine this herb with *Xuan Shen* (Radix Scrophulariae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Niu Bang Zi* (Fructus Arctii), and *Sheng Di Huang* (Radix Rehmanniae).
- Difficulty inhaling due to Kidney deficiency: use it with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Ge Jie* (Gecko), and *Dong Chong Xia Cao* (Cordyceps).

3. Treats *Xiao Ke* (Wasting and Thirsting) Syndrome

***Xiao ke* syndrome:** This condition is characterized by yin deficiency and heat, or by qi and yin deficiencies. Unlike many other qi-tonic herbs that are drying in nature, *Shan Yao* is an excellent herb to tonify qi, nourish yin, and treat *xiao ke* syndrome. It may be used alone at a large dosage, or in combination with other herbs. This herb can be taken daily when made into porridge.

- *Xiao ke* syndrome: combine *Shan Yao* with *Huang Qi* (Radix Astragali), *Zhi Mu* (Radix Anemarrhenae), and *Ge Gen* (Radix Puerariae).
- *Xiao ke* syndrome with internal heat: use this herb with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), *Mai Men Dong* (Radix Ophiopogonis) and *Tian Hua Fen* (Radix Trichosanthis).
- *Xiao ke* with more pronounced polyphagia and polydipsia: use it with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), *Ge Gen* (Radix Puerariae), *Huang Jing* (Rhizoma Polygonati), *Tian Hua Fen* (Radix Trichosanthis) and *Sheng Di Huang* (Radix Rehmanniae).
- *Xiao ke* with more pronounced polyuria: add this herb to *Sheng Di Huang* (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Ze Xie* (Rhizoma Alismatis), *Mu Dan Pi* (Cortex Moutan) and *Lian Xu* (Stamen Nelumbinis).

4. Tonifies Kidney Yin

Nourishing in nature, *Shan Yao* tonifies Kidney yin to treat soreness and weakness of the knees and lower back, dizziness, light-headedness, tidal fever and night sweats. Astringent in nature, it consolidates the Kidney and treats leakage of fluids such as found in spermatorrhea, premature ejaculation, frequent urination and nocturnal enuresis. *Shan Yao* is relatively mild, and is often combined with other herbs for maximum effect.

- Kidney yin deficiency: add this herb to *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Mu Dan Pi* (Cortex Moutan), *Ze Xie* (Rhizoma Alismatis) and *Fu Ling* (Poria). **Exemplar Formula:** *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).
- Spermatorrhea, premature ejaculation or nocturnal emissions due to Kidney deficiency: combine *Shan Yao* with *Qian Shi* (Semen Euryales) and *Lian Zi* (Semen Nelumbinis). **Exemplar Formula:** *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence).
- Frequent urination and nocturnal urination: use this herb with *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) and *Wu Yao* (Radix Linderae). **Exemplar Formula:** *Suo Quan Wan* (Shut the Sluice Pill).

DOSAGE

10 to 30 grams, with a maximum of 250 grams, in decoction. *Shan Yao* is prescribed at 6 to 10 grams in powder form. It may be used internally or topically. The fresh herb is commonly used to tonify yin, while dried *Shan Yao* is more often used to strengthen the Spleen and Stomach. The dry-fried herb has a stronger function to tonify the Lung, Spleen and Stomach, and is commonly used to treat diarrhea and leukorrhea.

CAUTIONS / CONTRAINDICATIONS

- *Shan Yao* is contraindicated in cases of excess heat.
- *Shan Yao* should not be used as the sole herb in addressing cases of accumulated dampness.
- *Shan Yao* may sometimes cause abdominal fullness, distention or poor appetite. In cases of indigestion due to intake of this herb, add *Chen Pi* (Pericarpium Citri Reticulatae) to regulate qi and relieve these minor side effects.

CHEMICAL COMPOSITION

Choline, dopamine, batasine, abscisin, starch 16%, mannan, phytic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antidiabetic:** Administration of *Shan Yao* lowers blood glucose levels in mice. In one study, oral ingestion of the decoction at the dosage of 30 g/kg/day for 10 days lowered blood glucose levels in mice by approximately 10 to 30 mg/dL. In another study, oral ingestion of the decoction at the dosage of 30 g/kg effectively controlled the normally sharp increase of blood glucose following intraperitoneal injection of glucose at 2 g/kg.[2]
- **Gastrointestinal:** Decoction of *Shan Yao* stimulates the intestines and increases peristalsis in mice.[3]

CLINICAL STUDIES AND RESEARCH

- **Infantile diarrhea:** In one clinical study, 123 infants with diarrhea were divided into two groups: group one

Shan Yao (Rhizoma Dioscoreae)

received *Shan Yao* and group two received a placebo. The dosage of *Shan Yao* was as follows: 5 to 10 grams in children under one year old, 11 to 15 grams in children between one and two years old, and 16 to 20 grams in children between two to three years of age. The study concluded that improvement in the treatment group was significantly better than in the placebo group.[4] In another report, an herbal preparation given twice daily was effective in relieving infantile diarrhea within 3 days, as demonstrated in over 1,000 patients. The herbal formula was prepared by mixing 15 grams of *Shan Yao*, 10 grams of *Yi Yi Ren* (Semen Coicis) and one fresh chicken liver with a small portion of vinegar. The mixture was steamed until well-done before administration.[5]

- **Infantile indigestion:** Infants with indigestion were treated with an herbal decoction containing 10 grams of *Shan Yao* and 4 grams of *Che Qian Zi* (Semen Plantaginis) for approximately 6 months. Infants under 6 months of age received half the dosage, while infants over 2 years old received a 33% higher dosage. Infants with dehydration or other complications received slight modifications in herbal treatment, along with acupuncture. The study reported complete recovery in 96 out of 101 infants. [6]

HERB-DRUG INTERACTION

- **Antidiabetics:** It is prudent to use *Shan Yao* with caution when insulin, sulfonylureas, and other antidiabetic medications are present. Though no instances of this potential interaction have been documented, the combination of antidiabetic herbs and drugs may have a synergistic effect, leading to hypoglycemia.[7] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]

AUTHORS' COMMENTS

According to Dr. Zhang Xiao-Ping, the combination of *Shan Yao* and *Huang Qi* (Radix Astragali) has excellent effects to lower plasma glucose levels to treat diabetes mellitus patients. These two herbs are especially effective in individuals with diabetes characterized by qi and yin deficiencies.

Bian Dou (Semen Lablab Album)

扁豆

Pinyin Name: *Bian Dou*
Literal Name: "flat bean"
Alternate Chinese Names: *Bai Bian Dou*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: dolichos nut
Botanical Name: *Dolichos lablab* L. (*Bian Dou*)
Pharmaceutical Name: Semen Lablab Album
Properties: sweet, slightly warm
Channels Entered: Spleen, Stomach

Bian Dou (Semen Lablab Album)

CHINESE THERAPEUTIC ACTIONS

1. Strengthens Spleen

Spleen deficiency with dampness: Sweet and slightly warm, *Bian Dou* (Semen Lablab Album) enters and strengthens the Spleen and Stomach channels to treat disorders characterized by deficiency of the Spleen and Stomach with accumulated dampness. Moderate in its action, *Bian Dou* tonifies the Spleen without causing stagnation, and dissolves dampness without drying fluids. It is most suitable for weak, chronic or convalescing patients who cannot digest heavy tonics. It is usually the tonic herb of choice to use before administering stronger ones. Clinical applications include fatigue, lack of energy, decreased intake of food, loose stools, and diarrhea.

- Deficiency of the Spleen and Stomach with dampness: combine *Bian Dou* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Yi Yi Ren* (Semen Coicis). **Exemplar Formula:** *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder).
- Slight deficiency of the Spleen and Stomach: use this herb with *Tai Zi Shen* (Radix Pseudostellariae), *Shan Yao* (Rhizoma Dioscoreae), and *Gu Ya* (Fructus Setariae Germinatus).

Gynecological disorders: *Bian Dou* strengthens the Spleen to stop excessive vaginal discharge.

- Vaginal discharge with fatigue: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Qian Shi* (Semen Euryales) and *Hai Piao Xiao* (Endoconcha Sepiae).

2. Clears Summer-Heat and Dampness

Summer-heat and dampness: In Asia, summer is the season in which pathogenic dampness usually attacks the body, especially the middle *jiao*. *Bian Dou* is commonly used to treat nausea, vomiting and diarrhea associated with disharmony and stagnation of summer-heat and dampness in the middle *jiao*. The primary function of *Bian Dou* is to clear dampness, with the addition of other herbs needed help clear the summer-heat.

- Nausea and vomiting due to summer-heat and dampness: use *Bian Dou* with *Xiang Ru* (Herba Elsholtziae seu Moslae), *He Ye* (Folium Nelumbinis) and *Hou Po* (Cortex Magnoliae Officinalis). **Exemplar Formula:** *Xiang Ru Yin* (Elsholtzia Decoction).

3. Eliminates Toxins

Bian Dou is commonly used to treat food poisoning, alcohol intoxication, or ingestion of various types of toxins.

- Alcohol intoxication: use this herb with *Ge Hua* (Flos Puerariae), *Bai Dou Kou* (Fructus Amomi Rotundus) and *Sha Ren* (Fructus Amomi).
- Pufferfish poisoning: combine it with *Lu Gen* (Rhizoma Phragmitis), *Zi Su Ye* (Folium Perillae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Poultry poisoning: use *Bian Dou* individually.
- Arsenic poisoning: use this herb alone in powder form with water, or combine it with *Fang Feng* (Radix Saposhnikoviae), *Lu Dou* (Semen Phaseoli Radiati) and *Gan Cao* (Radix Glycyrrhizae).
- Calomel poisoning: use *Bian Dou* alone.

DOSAGE

10 to 30 grams in decoctions; 6 to 10 grams in powder. The maximum dosage of *Bian Dou* is 50 grams in decoction. The unprocessed herb is best to nourish the Stomach, dispel summer dampness and eliminate toxins. The dry-fried herb strengthens the Spleen and relieves diarrhea.

CAUTIONS / CONTRAINDICATIONS

- According to *Ben Cao Cong Xin* (Thoroughly Revised Materia Medica) by Wu Yi-Luo in 1751, dry-fried *Bian Dou* is the preferred form of this herb, as ingestion of an excessive amount of fresh *Bian Dou* (without cooking) is toxic. [Note: Fresh *Bian Dou* is considered toxic because it contains hemagglutinin A, the compound responsible for the adverse reactions. Heat-processed *Bian Dou* is not toxic, because hemagglutinin A is readily rendered inactive by heat.[1]]

CHEMICAL COMPOSITION

Protein 22.7%, lipids 1.8%, carbohydrates 57%, calcium 0.046%, phosphorus 0.052%, iron 1mg%, phytin 0.247%, stachyose, raffinose, L-pipecolic acid, hemagglutinin A, hemagglutinin B.[2]

TOXICOLOGY

Gross overdose of fresh *Bian Dou* (without cooking) is associated with growth inhibition and liver damage in mice.[3]

SUPPLEMENT

- 扁豆衣 *Bian Dou Yi* (Pericarpium Lablab Album), first cited in the Qing dynasty, is derived from the skin of the fruit of the same plant as *Bian Dou*. The taste, property and functions of *Bian Dou Yi* are the same as *Bian Dou*, but weaker. *Bian Dou Yi* does not clog the middle *jiao*. It is best for Spleen deficiency with dampness, or for summer-dampness nausea and vomiting, edema and leg *qi*. Recommended dosage of *Bian Dou Yi* is 5 to 10 grams in decoctions.
- 扁豆花 / 扁豆花 *Bian Dou Hua* (Flos Lablab Album), first cited in *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061, is the flower of this plant. It is harvested during July or August when the

Bian Dou (Semen Lablab Album)

flower has not fully blossomed. It is sweet and neutral, dispels summer-damp, and harmonizes the Stomach. It is mostly used to treat summer-damp with fever, diarrhea or dysentery. It can also be used to treat either red or white leukorrhea. The recommended dosage for *Bian Dou Yi* is 5 to 10 grams in decoction or in powder.

AUTHORS' COMMENTS

According to various sources, the thermal property of *Bian Dou* has been described as cool, neutral, and slightly warm. Presumably, the herb was described as cool because of its action to clear summer-heat and eliminate toxins. However, most texts now describe *Bian Dou* as a warm herb because its primary effect is to tonify the Spleen and strengthen the middle *jiao*.

Bian Dou can be white, black or dark red. *Bai Bian Dou*, literally "white flat bean," is generally used for medicinal purposes. *Hei Dou*, literally "black bean," is not used medicinally. *Hong Xue Dou*, literally "red blood bean," eliminates toxins from the Liver, reduces inflammation and treats superficial visual obstruction.

According to Dr. Zhu Shen-Yu, *Bian Dou* is one of the best herbs for the nausea and morning sickness associated with pregnancy. Other herbs that are beneficial include *Dao Dou* (Semen Canavaliae), *Sha Ren* (Fructus Amomi), *Huang Lian* (Rhizoma Coptidis), *Chen Pi* (Pericarpium Citri Reticulatae), *Zhu Ru* (Caulis Bambusae in Taenia) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)

刺五加

Pinyin Name: *Ci Wu Jia*
Literal Name: "prickly acanthopanax"
Alternate Chinese Names: *Wu Jia Shen*
English Name: acanthopanax root, many-prickle acanthopanax root, eleuthero
Botanical Name: *Acanthopanax senticosus* (Rupr. et Maxim.) Harm. [also referred to as *Eleutherococcus senticosus* Rupr. et Maxim.) Harm.]
Pharmaceutical Name: Radix et Caulis Acanthopanacis Senticosi
Properties: acrid, slightly bitter, warm
Channels Entered: Spleen, Kidney, Heart

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Qi, Strengthens the Spleen and Kidney

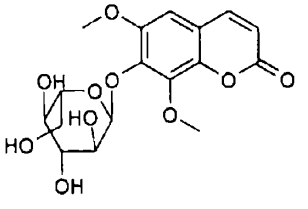
Spleen and Kidney yang deficiencies: *Ci Wu Jia* (Radix et Caulis Acanthopanacis Senticosi) commonly treats deficiency, characterized by fatigue, lack of energy, poor appetite, and soreness and pain of the lower back and knees. *Ci Wu Jia* is relatively mild and should be combined with other tonic herbs for maximum effectiveness.

- General fatigue, poor appetite: use *Ci Wu Jia* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Gan Cao* (Radix Glycyrrhizae).
- Lower back and knee pain from Kidney yang deficiency: combine this herb with *Du Zhong* (Cortex Eucommiae), *Sang Ji Sheng* (Herba Taxilli) and other Kidney yang tonics.

Cí Wu Jía (Radix et Caulis Acanthopanacis Senticosi)

2. Calms the *Shen* (Spirit)

Disturbed sleep: *Ci Wu Jia* calms the *shen* to relieve insomnia or dream-disturbed sleep. Because of lack of nourishment to the *shen* of the Heart, patients may have excessive dreaming, and difficulty falling asleep or staying asleep. This herb should be combined with *shen*-calming herbs for maximum effectiveness.



- Disturbed sleep from deficiency: add *Ci Wu Jia* to *Long Yan Rou* (Arillus Longan), *Suan Zao Ren* (Semen Zizyphi Spinosae), and *Bai Zi Ren* (Semen Platycladi).

DOSAGE

9 to 27 grams in decoction.

CHEMICAL COMPOSITION

Eleutheroside A,B,C,D,E; daucosterin, siringine, ethyl-α-D-galactoside, isofraxidin glucoside, protoprimulagenin A, PES-A,B; chlorogenic acid, β-sitosterol, betulinic acid, amygdalin, isofraxidin.[1,2]

Eleutheroside B_1

PHARMACOLOGICAL EFFECTS

- **Sedative:** *Ci Wu Jia* is associated with a sedative effect on the central nervous system. Alcohol extract of the herb at 10 to 20 g/kg, given via intraperitoneal injection in mice, significantly reduced spontaneous activity and prolonged sleeping time induced by barbiturates.[3]
- **Cardiovascular:** In anesthetized cats and rabbits, intravenous injection of alcohol extract of *Ci Wu Jia* at 2 to 4 g/kg lowered blood pressure, but only for a short period of time. In other studies, administration of *Ci Wu Jia* is associated with increased blood perfusion to the brain and coronary arteries.[4,5]
- **Adaptogenic:** Administration of *Ci Wu Jia* is associated with marked adaptogenic effects in various stressful environments. In mice, administration of the herb prolonged swimming time by approximately 25%, improved resistance to cold temperatures by 42 to 72%, and provided protection against irradiation by minimizing damage to the bone marrow.[6,7]
- **Immunostimulant:** Administration of *Ci Wu Jia* is associated with an improvement of the immune system in both healthy and immune-suppressed subjects. Guinea pigs who received the herb once daily for 15 days showed an increase in phagocytic activity of the macrophages. In addition, other studies in mice indicated that *Ci Wu Jia* increased production of white blood cells and interferon.[8,9,10]
- **Metabolic:** Daily administration of *Ci Wu Jia* in rabbits for 30 days was associated with an increase in glucose levels in the blood and in glycogen levels in the liver and muscle tissues.[11]
- **Endocrinological:** Administration of *Ci Wu Jia* has a regulatory effect on the endocrine system, specifically the adrenal glands, thyroid and pancreas. It has been used to treat subjects with adrenocortical insufficiency, enlarged thyroid, and hyperglycemia, with good results.[12,13]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease with hypercholesterolemia:** Administration of a *Ci Wu Jia* preparation three times daily for 1 to 3 months was 95.45% effective in treating 132 angina patients. The same preparation was also effective in lowering plasma cholesterol and triglyceride levels in 53 patients.[14]
- **Neurasthenia:** Oral administration of *Ci Wu Jia* was 90% effective in treating patients with neurasthenia, with symptoms such as fatigue, headache, insomnia, poor appetite, and increased body weight.[15]
- **Bone marrow suppression:** Administration of *Ci Wu Jia* was effective in increasing white blood cell counts in 84.2% of 43 cancer patients who had bone marrow suppression following chemotherapy and radiation treatments.[16]
- **Coronary artery disease:** Administration of a *Ci Wu Jia* preparation three times daily for 1 to 3 months was 95% effective for relief of angina, 88% effective for reducing plasma cholesterol levels, and 87% effective for reducing triglycerides.[17]
- **Hypercholesterolemia:** In a clinical study with 31 patients, administration of an herbal formula (3 parts *Ci Wu Jia* and 1 part *Xiang Ru* (Herba Elsholtziae seu Moslae)) at 30 ml/day for 10 days reduced β-lipoprotein by 32.6%, and increased HDL by 16.3%.[18]

HERB-DRUG INTERACTION

- **Digoxin:** An elevated serum digoxin level was documented in one patient taking both digoxin and *Ci Wu Jia*. When *Ci Wu Jia* was discontinued, the serum digoxin level returned to normal. When *Ci Wu Jia* was re-introduced, the serum digoxin level increased. The exact mechanism of this action is unclear. Proposed reasons included conversion of components in *Ci Wu Jia* to digoxin *in vivo*, interference with digoxin elimination, or false serum assay results.[19]
- **Barbiturates**: *Ci Wu Jia* increases the effect of hexobarbital, inhibiting its metabolic breakdown.[20]
- **Antibiotic**: *Ci Wu Jia* increases the efficacy of antibiotics, possibly increasing T-lymphocyte activity.[21]

Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)

- **Adrenalin:** *Ci Wu Jia* stimulates the production of adrenalin by the adrenal glands.[22]

TOXICOLOGY

No adverse reactions were observed following oral administration of alcohol extract of *Ci Wu Jia* at 350 g/kg in mice. In a long-term toxicology study, oral administration of *Ci Wu Jia* in rabbits at 30 g/kg (100 times the normal adult dose in human) for 15 days did not cause any damage to the vital organs, including heart, liver, spleen, lungs and kidneys.[23,24]

AUTHORS' COMMENTS

Siberian ginseng is a common, but technically inaccurate, name of *Ci Wu Jia* (Radix et Caulis Acanthopanacis Senticosi). Siberian ginseng is not a species of Panax, although they belong in the same family, Araliaceae. The designation 'Siberian ginseng' was an attempt to give an expensive name to a relatively inexpensive herb. Eleuthero is now the common name of this herb. [Note: *Acanthopanax senticosus* is also referred to as *Eleutherococcus senticosus.*]

Gan Cao (Radix Glycyrrhizae)

甘草 甘草

Pinyin Name: *Gan Cao*
Literal Name: "sweet herb," "sweet grass"
Alternate Chinese Names: *Guo Lao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: licorice root (British spelling: liquorice)
Botanical Name: *Glycyrrhiza uralensis* Fisch. (*Gan Cao*); *Glycyrrhiza inflata* Bat. (*Zhang Guo Gan Cao*); *Glycyrrhiza qlabra* L. (*Guang Guo Gan Cao*)
Pharmaceutical Name: Radix Glycyrrhizae
Properties: sweet, neutral
Channels Entered: Spleen, Stomach, Lung and Heart

Gan Cao (Radix Glycyrrhizae)

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Spleen, Benefits Qi

Spleen and Stomach deficiencies: *Gan Cao* (Radix Glycyrrhizae) tonifies the middle *jiao* to enhance the transformation and transportation functions of the Spleen and Stomach. Clinically, it treats disorders such as shortness of breath, fatigue, sallow facial appearance, decreased food intake, loose stools, and diarrhea. The honey-fried herb, *Zhi Gan Cao* (Radix Glycyrrhizae Preparata), is stronger than the unprocessed herb for tonification of qi.

- Deficiency of Spleen and Stomach qi: combine *Gan Cao* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria). **Exemplar Formula:** *Si Jun Zi Tang* (Four-Gentleman Decoction).

Palpitations, arrhythmia and intermittent pulse: These conditions may occur as a result of qi and blood deficiencies of the Heart. Clinically, *Gan Cao* treats patients with palpitations and irregular or intermittent pulse with deficiency and cold. Honey-fried *Gan Cao* is best used for this condition.

- Palpitations with irregular or intermittent pulse: use it with *Ren Shen* (Radix Ginseng), *Sheng Di Huang* (Radix Rehmanniae), *E Jiao* (Colla Corii Asini) and *Gui Zhi* (Ramulus Cinnamomi). **Exemplar Formula:** *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction).

***Zang zao* (dry organ) disorder:** This is a condition characterized by Heart deficiency and Liver qi stagnation with a wan appearance, disturbed sleep, and emotional instability. *Gan Cao* treats this condition by tonifying qi, nourishing the Heart and harmonizing the middle *jiao*.

- *Zang zao* disorder: use *Gan Cao* with *Da Zao* (Fructus Jujubae) and *Xiao Mai* (Fructus Tritici). **Exemplar Formula:** *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction).
- *Zang zao* disorder with *shen* (spirit) disturbance: combine this herb with *Da Zao* (Fructus Jujubae), *Xiao Mai* (Fructus Tritici), *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), *Suan Zao Ren* (Semen Zizyphi Spinosae) and *Bai Zi Ren* (Semen Platycladi).

2. Moistens the Lung, Stops Cough

Cough or dyspnea: *Gan Cao* moistens the Lung, nourishes qi, dispels phlegm and stops cough. Neutral in property and mild in action, it treats coughing and wheezing of various etiologies, including cold or heat, and deficiency or excess, with or without phlegm.

- *Wei* (atrophy) syndrome of the Lung with chronic cough: use *Gan Cao* alone.
- Cough and wheezing caused by wind-cold: use it with *Ma Huang* (Herba Ephedrae), *Xing Ren* (Semen Armeniacae Amarum) and *Sheng Jiang* (Rhizoma Zingiberis Recens). **Exemplar Formula:** *San Ao Tang* (Three-Unbinding Decoction).
- Cough and wheezing due to wind-heat: combine this herb with *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi), *Jie Geng* (Radix Platycodonis) and *Xing Ren* (Semen Armeniacae Amarum). **Exemplar Formula:** *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction).
- Cough and wheezing due to Lung heat: use this herb with *Shi Gao* (Gypsum Fibrosum), *Ma Huang* (Herba Ephedrae), and *Xing Ren* (Semen Armeniacae Amarum). **Exemplar Formula:** *Ma Xing Gan Shi Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- Cough and wheezing due to Lung cold, with sputum: add it to *Gan Jiang* (Rhizoma Zingiberis), *Xi Xin* (Herba Asari), and *Wu Wei Zi* (Fructus Schisandrae Chinensis). **Exemplar Formula:** *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction).
- Cough and wheezing because of dryness: use *Gan Cao* with *Bei Sha Shen* (Radix Glehniae), *Mai Men Dong* (Radix Ophiopogonis), *E Jiao* (Colla Corii Asini) and *Kuan Dong Hua* (Flos Farfarae).

3. Relieves Pain

Epigastric, abdominal, musculoskeletal and smooth muscle pain and cramps: The Spleen dominates muscles and the Liver controls tendons. Therefore, patients with Spleen deficiency and Liver excess often experience muscle cramps and pain, especially in epigastric and abdominal tissues. *Gan Cao* has excellent properties to relieve pain and cramps of smooth or skeletal muscles by tonifying the Spleen and replenishing qi.

- Pain and cramps of smooth or skeletal muscles: combine *Gan Cao* with *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction).
- Abdominal pain due to deficiency and cold of the middle *jiao*: use this herb with *Shan Yao* (Rhizoma Dioscoreae), *Yi Tang* (Saccharum Granorum), *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae).
- Diarrhea, dysentery and abdominal pain caused by damp-heat: combine *Gan Cao* with *Bai Shao* (Radix Paeoniae Alba), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Da Huang* (Radix et Rhizoma Rhei) and *Bing Lang* (Semen Arecae). **Exemplar Formula:** *Shao Yao Tang* (Peony Decoction).
- Hypochondriac pain due to Liver qi stagnation: use this herb with *Bai Shao* (Radix Paeoniae Alba), *Chai Hu* (Radix Bupleuri), *Dang Gui* (Radicis Angelicae Sinensis)

Gan Cao (Radix Glycyrrhizae)

and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). **Exemplar Formula:** *Xiao Yao San* (Rambling Powder).

- Epigastric pain caused by stomach ulcer: add this herb to *Hai Piao Xiao* (Endoconcha Sepiae), *Wa Leng Zi* (Concha Arcae), *Chen Pi* (Pericarpium Citri Reticulatae) and honey.
- Leg cramps due to blood deficiency: use it with *Bai Shao* (Radix Paeoniae Alba), *Mu Gua* (Fructus Chaenomelis) and *Ji Xue Teng* (Caulis Spatholobi).

4. Clears Heat, Eliminates Toxins

Sores, swellings and carbuncles: The fresh or unprocessed form of *Gan Cao* is used to clear heat and eliminate toxins. It may be used internally or topically to treat various sores and ulcers characterized by heat and toxins.

- Uncomplicated sores or lesions: use *Gan Cao* alone, topically or internally.
- Erysipelas: use it alone as decoction and apply topically.
- Red lesions with eczema and itching: apply decoction of *Gan Cao* topically.
- Yang sores with redness, swelling and pain: use it with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Zi Hua Di Ding* (Herba Violae) and *Pu Gong Ying* (Herba Taraxaci).
- Yin sores with dark-purplish appearance: add it to *Shu Di Huang* (Radix Rehmanniae Preparata), *Rou Gui* (Cortex Cinnamomi), *Lu Jiao Jiao* (Gelatinum Cornu Cervi) and *Bai Jie Zi* (Semen Sinapis). **Exemplar Formula:** *Yang He Tang* (Yang-Heartening Decoction).
- Burns: mix *Gan Cao* with honey for topical application. Frostbite: use it with an equal portion of *Yuan Hua* (Flos Genkwa) and apply topically as an herbal wash.

Sore throat: *Gan Cao* relieves soreness, swelling and pain in the throat, a condition characterized by the presence of heat and toxins. It may be used alone or in combination with other herbs. If heat is not severe and the throat is not extremely red, *Gan Cao* can be used alone.

- Sore throat: use it with *Jie Geng* (Radix Platycodonis). **Exemplar Formula:** *Jie Geng Tang* (Platycodon Decoction).
- Severe sore throat with redness, swelling, and pus: combine this herb with *Jie Geng* (Radix Platycodonis), *Shan Dou Gen* (Radix Sophorae Tonkinensis), *Xuan Shen* (Radix Scrophulariae), and *Niu Bang Zi* (Fructus Arctii).

5. Treats Poisoning

Poisoning: *Gan Cao* is useful as an antidote for various poisonings, including but not limited to food, herbs, herbicides, pesticides, drugs, and heavy metals.

- Food poisoning from beef: use *Gan Cao* alone as decoction.
- Drug poisoning: use *Gan Cao* with honey.
- Herbicide or pesticide poisoning: use 12 grams of *Gan Cao* and 15 grams of *Hua Shi* (Talcum) in herbal decoction, three times daily.
- Lead poisoning: use this herb with *Xing Ren* (Semen Armeniacae Amarum).
- Arsenic poisoning: use it with *Lu Dou* (Semen Phaseoli Radiati), *Hei Dou* (Semen Glycine Max) and *Jin Yin Hua* (Flos Lonicerae).

6. Harmonizes Other Herbs

Gan Cao harmonizes and moderates the harsh or adverse effects of other herbs, keeping them from damaging the middle *jiao.*

- It neutralizes the toxicity of *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- *Gan Cao* controls the warm property of *Gan Jiang* (Rhizoma Zingiberis) to prevent damage to the yin.
- It prevents the cold properties of *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae) from damaging the Stomach.
- This herb reduces the initial drastic and potent purgative effects of *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas), and prolongs the overall duration of effect.
- It reduces the initial peak in effect of *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Dang Gui* (Radicis Angelicae Sinensis) and prolongs the overall tonic effect.
- *Gan Cao* is used with both cold and hot herbs such as *Ban Xia* (Rhizoma Pinelliae), *Gan Jiang* (Rhizoma Zingiberis), *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae), to harmonize the effect of the overall combination.

DOSAGE

3 to 10 grams, with a maximum of 15 to 30 grams. *Gan Cao* is used in herbal decoction, powder, pills or syrup. It is commonly used both internally and topically. The unprocessed herb more strongly purges fire, eliminates toxins, moistens the Lung, and stops cough; therefore, it is commonly used to treat throat soreness and pain, various infections with formation of pus and abscess, cough with hot phlegm, and food or drug poisoning. Honey-processed *Gan Cao* has a sweeter taste and warmer nature; therefore, it tonifies the Spleen, benefits qi, moistens the Lung, and stops cough. The honey-fried herb is stronger than the unprocessed herb for tonification of qi.

CAUTIONS / CONTRAINDICATIONS

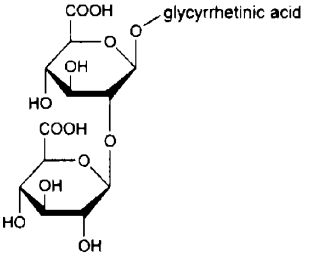
- Sweet in nature, *Gan Cao* can create dampness and is, therefore, contraindicated in cases of nausea, vomiting,

Gan Cao (Radix Glycyrrhizae)

chest and abdominal fullness and distention due to accumulation of dampness.

- *Gan Cao* is incompatible with *Gan Sui* (Radix Euphorbiae Kansui), *Da Ji* (Radix Euphorbiae seu Knoxiae), *Yuan Hua* (Flos Genkwa), and *Hai Zao* (Sargassum).
- Large dosages or chronic usage of *Gan Cao* are contraindicated in cases of edema, kidney disorders, hypokalemia, hypertension, and congestive heart failure.

OVERDOSAGE



Overdose or chronic use of *Gan Cao* may cause edema, elevated blood pressure, weak extremities, numbness, sodium retention, potassium loss, dizziness, and headache.

TREATMENT OF OVERDOSAGE

Ze Xie (Rhizoma Alismatis) and *Fu Ling* (Poria) should be combined with *Gan Cao* to prevent sodium and water retention, especially if *Gan Cao* is to be used in a large dose or on a long-term basis. Reduction of sodium intake and supplementation of potassium are also recommended. Discontinue *Gan Cao* should the patient report edema, elevated blood pressure, or other adverse reactions.

CHEMICAL COMPOSITION

Triterpenoids (glycyrrhizin, glycyrrhizic acid, glycyrrhetinic acid, glycyrrhetic acid), flavonoids (liguiritin, isoliquiritin, liquiritigenin, uralenol-3-methylether, uralene).[1,2]

Glycyrrhizic Acid

PHARMACOLOGICAL EFFECTS

- **Mineralocorticoid:** Extract of *Gan Cao* or its compounds (glycyrrhizin and glycyrrhetinic acid) have all demonstrated mineralocorticoid effects, leading to increased re-absorption of sodium and water and excretion of potassium. Overdose or long-term ingestion may cause an increase in edema and blood pressure.[3]
- **Glucocorticoid:** Administration of glycyrrhizin and glycyrrhetinic acid clearly enhances the overall duration of effect of cortisone, as demonstrated by various laboratory studies. The proposed mechanisms of action vary among experts. Some believe that the enhanced cortisone effect is due to decreased metabolism by the liver, or increased plasma concentration caused by decreased protein binding.[4]
- **Anti-inflammatory:** Glycyrrhizin and glycyrrhetinic acid have demonstrated marked anti-inflammatory effects. Clinical applications include inflammation, edema, formation of granuloma, arthritis, and others. The proposed mechanism of anti-inflammatory action includes decreased permeability of the blood vessels, antihistamine functions, and decreased sensitivity to stimuli. The anti-inflammatory influence of glycyrrhizin and glycyrrhetinic acid is approximately $1/10^{th}$ that of cortisone.[5]
- **Antiarrhythmic:** Extract of *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) has shown marked effectiveness in treating arrhythmia induced by aconitine in rabbits.[6]
- **Immunologic:** Administration of *Gan Cao* may stimulate or inhibit the phagocytic activity of macrophages in mice. Under a stressful environment (cold, heat or hunger), the herb stimulates the immune system and increases phagocytic activities. In a normal environment, *Gan Cao* inhibits the immune system.[7]
- **Gastrointestinal:** Many components of *Gan Cao* have proven to prevent and treat peptic ulcers. The mechanisms of this action include inhibition of gastric acid secretion, binding and deactivation of gastric acid, and promotion of recovery from ulceration.[8]
- **Antispasmodic:** Both water and alcohol extracts of *Gan Cao* exert inhibitory influences on smooth muscle to stop spasms and cramps of the intestines and uterus. The antispasmodic effect is enhanced when *Bai Shao* (Radix Paeoniae Alba) is added.[9]
- **Antitoxin:** Glycyrrhizin, generally considered to be one of the main constituents of *Gan Cao*, has a marked detoxifying effect to treat poisoning, including but not limited to drug poisoning (chloral hydrate, urethane, cocaine, picrotoxin, caffeine, pilocarpine, nicotine, barbiturates, mercury and lead), food poisoning (tetrodotoxin, snake and mushrooms), and others (enterotoxin, herbicides and pesticides). On the other hand, *Gan Cao* is not effective in treating poisoning caused by atropine, morphine, and sulfonmethane. It may increase the toxicity of ephedrine. The exact mechanism of this action is unclear, but is thought to be related to its regulatory effect on the endocrine or hepatic systems. Oral ingestion of *Gan Cao* reduces the absorption of toxins via direct binding, an effect similar to that of activated charcoal. *Gan Cao* significantly reduces the toxicity of *Fu Zi* (Radix Aconiti Lateralis Praeparata) when the two herbs are decocted together.[10,11]
- **Hepatoprotective:** Studies in mice have shown that *Gan Cao* increases the amount of cytochrome p-450 in the liver, which is responsible for the protective effect of the herb on the liver against chemical or tetrachloride-induced liver damage and liver cancer.[12]

Gan Cao (Radix Glycyrrhizae)

- **Antitussive and expectorant:** Administration of *Gan Cao* is associated with marked antitussive and expectorant effects in guinea pigs. The antitussive effect is thought to be related to its effect on the central nervous system.[13]
- **Analgesic:** *Gan Cao* has an analgesic effect as demonstrated by studies in mice. The analgesic effect of *Gan Cao* is enhanced by concurrent use of *Bai Shao* (Radix Paeoniae Alba).[14]
- **Antibiotic:** *Gan Cao* inhibits the growth of *Staphylococcus aureus, Mycobacterium tuberculosis, E. coli,* amoebae and *Trichomonas vaginalis.*[15]
- **Antihyperlipidemic:** While glycyrrhizin has been shown to lower plasma cholesterol levels, *Gan Cao* has not demonstrated any preventative or treatment effect on atherosclerosis.[16]

CLINICAL STUDIES AND RESEARCH

- **Endocrine:** In one study, 8 out of 9 patients with declining pituitary function were treated successfully by 2 to 3 months of taking the following herbal combination: 15 to 30 grams of fresh *Gan Cao* and 6 grams of *Ren Shen* (Radix Ginseng). Modifications to the herbal formula were made if deemed necessary. For severe aversion to cold, 10 grams of *Fu Zi* (Radix Aconiti Lateralis Praeparata) were added. The duration of treatment was increased to 2 to 6 months. If elevated blood pressure and edema were noted, the dosage of *Gan Cao* was reduced by 50% and 10 grams each of *Fu Ling* (Poria), *Du Zhong* (Cortex Eucommiae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) were added.[17]
- **Addison's disease:** Extract of *Gan Cao* given three times daily for 25 to 40 days showed marked effectiveness in treating patients with Addison's disease. Patients with mild to moderate conditions required only 3 to 5 ml of the herb per dose. Patients with more severe conditions required up to 8 to 10 ml of the herb per dose, and supplements of adrenocortical steroids if necessary.[18]
- **Peptic ulcer:** One hundred patients with gastric or duodenal ulcers were treated with 15 ml of *Gan Cao* extract, four times daily for 6 weeks, with 90% rate of effectiveness.[19]
- **Tuberculosis:** In one study, 55 patients with pulmonary tuberculosis were treated with an herbal decoction three times daily for 30 to 90 days. There was significant improvement in 23 patients and some improvement in 32 patients. The main ingredient of the herbal formula was 18 grams of fresh *Gan Cao*, cooked to yield 150 ml of the decoction. Other herbs effective in treating tuberculosis were added based on the condition of each patient.[20]
- **Hepatitis:** Hepatitis B in 330 patients was treated with glycyrrhizin, with 77% effectiveness. The study reported that glycyrrhizin reduced the damage to and death of liver cells, reduced inflammatory reaction, promoted regeneration of liver cells, and decreased the risk of liver cirrhosis and necrosis.[21]
- **Arrhythmia:** An herbal decoction administered twice daily for 3 to 12 doses had satisfactory results in treating 23 patients with arrhythmia. The study reported that the patients had no subjective complaints and ECGs appeared normal. The herbal formula contained 30 grams each of *Gan Cao, Zhi Gan Cao* (Radix Glycyrrhizae Preparata), and *Ze Xie* (Rhizoma Alismatis).[22]
- **Back and leg pain:** According to one report, 27 patients with severe pain of the back and legs were treated by local injection of a *Gan Cao* solution, with complete relief of pain in 20 patients and moderate relief in 7 patients. Patients with acute conditions received injections every other day for 4 to 7 treatments; those with chronic conditions received injections every other day, for 8 to 14 treatments.[23]
- **Purpura:** Eight patients with purpura caused by thrombocytopenia were treated with decoction of *Gan Cao* (25 to 30 grams), three times daily, with significant improvement in 3 patients, moderate improvement in 4 patients and some improvement in 1 patient. The study reported that bleeding stopped for most patients within 3 to 4 days.[24]
- **Intestinal spasms:** In one study, 241 out of 254 patients (94.8%) with intestinal spasms showed significant improvement after receiving 10 to 15 ml of extract of *Gan Cao* three times daily for 3 to 6 days.[25]
- **Food poisoning:** Administration of a decoction of *Gan Cao* was used to treat 454 patients with various kinds of food poisoning, with satisfactory results in most cases. The treatment protocol for mild cases of food poisoning was to use 9 to 15 grams of *Gan Cao* in herbal decoction, given in 3 to 4 equally-divided doses over 2 hours. In severe cases, 30 grams of the herb were cooked in water to yield 300 ml of herbal decoction, given in 3 equally-divided doses, every 3 to 4 hours.[26]
- **Mushroom poisoning**: Another report describes 20 out of 22 patients with mushroom poisoning who had complete recovery, after being treated with an herbal decoction of *Gan Cao*. Two patients required hospitalization because immediate herbal treatment was not available. The herbal decoction was prepared by using 94 grams of *Gan Cao* cooked twice to yield 200 ml of final decoction. Patients were given 100 ml of the decoction immediately, followed by another 100 ml 30 minutes later.[27]
- **Profuse urination:** Two patients with profuse urination were treated with 5 grams of powdered *Gan Cao* four times daily with good results.[28]
- **Tonsillitis:** In one study, 34 out of 38 patients reported complete recovery from chronic tonsillitis after being treated with *Gan Cao* tea for 1 to 5 months. The treatment protocol was to soak 10 grams of the herb in hot water and drink throughout the day as tea. Patients were advised to

Gan Cao (Radix Glycyrrhizae)

avoid fish and spicy or sweet foods. Patients with mild conditions required 1 to 2 months of treatment, while those with severe conditions required 3 to 5 months.[29]

- **Phlebitis:** Three patients with phlebitis were treated with marked effectiveness using 15 ml of extract or 50 grams of *Gan Cao* in decoction three times daily, before meals. The study reported relief of pain, edema and other symptoms after herbal treatment.[30]
- **Acute mastitis:** According to one report, 27 patients with acute mastitis (without suppuration) were treated with satisfactory results using an herbal decoction containing 30 grams each of *Gan Cao* and *Chi Shao* (Radix Paeoniae Rubrae), given one time daily for 1 to 3 days.[31]
- **Frostbite:** Complete recovery from frostbite was reported in 58 out of 76 patients after being treated with an herbal solution applied topically three times daily. The herbal solution was prepared by cooking 10 grams each of *Gan Cao* and *Yuan Hua* (Flos Genkwa), to yield 2,000 ml of the herbal solution.[32]

HERB-DRUG INTERACTION

- **Corticosteroids:** It has been suggested that the use of *Gan Cao* may alter the therapeutic effects of systemic corticosteroids. Glycyrrhizin, one of the components of *Gan Cao*, is a strong inhibitor of 11 β-hydroxysteroid dehydrogenase and may prolong the biological half-life of the systemic corticosteroids.[33] [Note: Examples of corticosteroids include cortisone, prednisone (Orasone), dexamethasone (Decadron), hydrocortisone (Cortef), methylprednisolone (Medrol).]
- **Digoxin:** *Gan Cao* should be used with caution with cardiac glycosides, such as digoxin (Lanoxin), as potassium loss may increase the toxicity of the drug.[34]
- **Drug overdose:** *Gan Cao* speeds the metabolism of drugs such as chloral hydrate, urethane, cocaine, picrotoxin, caffeine, pilocarpine, nicotine, and barbiturates, and treats overdose of these agents.[35]

TOXICOLOGY

Administration of decoction of *Gan Cao* in mice at the dosage of 2 g/kg for 6 weeks resulted in no fatalities or signs of edema. In another study, an increase in body weight and decrease in function of the adrenal glands were associated with continuous administration of *Gan Cao* extract for 40 days in rabbits and guinea pigs.[36,37]

Glycyrrhetinic acid is associated with a reduction of thyroid function and a decrease in the basal metabolic rate in guinea pigs.[38]

The LD_{50} for water extract of *Gan Cao* in mice is 1.9432 +/- 0.467 g/kg via intravenous injection, 6.8466 g/kg via intraperitoneal injection, and 7.8192 g/kg via subcutaneous injection.[39]

SUPPLEMENT

- 炙甘草 / 炙甘草 *Zhi Gan Cao* (Radix Glycyrrhizae Preparata), sweet and warm, is the honey-processed form of *Gan Cao*. *Zhi Gan Cao* has a stronger effect than *Gan Cao* to tonify Spleen, benefit qi, moisten the Lung, and stop cough.

AUTHORS' COMMENTS

According to traditional texts, *Gan Cao* is incompatible with *Hai Zao* (Sargassum). However, throughout the history of Chinese medicine, there have been several formulas that incorporate both herbs, such as *Hai Zao Yu Hu Tang* (Sargassum Decoction for the Jade Flask). According to Jiang Te-Xie's article "*Hai Zao* is not incompatible with *Gan Cao*," 10 grams of *Gan Cao* with 15 grams of *Hai Zao* (when cooked in a decoction and administered to patients) did not present any adverse reactions.[40]

According to Dr. Zhang Xue-Wen, *Gan Cao*, *Lu Dou* (Semen Phaseoli Radiati), and *Bai Mao Gen* (Rhizoma Imperatae) are effective to treat food poisoning. *Gan Cao* and *Lu Dou* clear heat and toxins, and are commonly used to eliminate toxicity from herbs, drugs and food. *Bai Mao Gen* clears heat and promotes diuresis to quickly dispel toxins from the body, prevent internal bleeding, and protect the kidneys.

Da Zao (Fructus Jujubae)

大棗 大枣

Pinyin Name: *Da Zao*
Literal Name: "big date"
Alternate Chinese Names: *Hong Da Zao, Hong Zao, Hei Da Zao, Hei Zao, Zao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: jujube, date
Botanical Name: *Ziziphus jujuba* Mill. var. *inermis* (Bge.) Rehd. (*Zao*)
Pharmaceutical Name: Fructus Jujubae
Properties: sweet, warm
Channels Entered: Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Spleen and Stomach, Benefits Qi

Middle *jiao* deficiency: *Da Zao* (Fructus Jujubae) tonifies the middle *jiao* to enhance the transformation and transportation functions of the Spleen and Stomach. Clinically, it treats disorders such as shortness of breath, fatigue, sallow facial appearance, decreased food intake, loose stools, and diarrhea. It may be used alone or in combination with other herbs. This herb is often made into porridge with rice and rock sugar. Because it is sweet, it is also made into cookies with digestive herbs for patients with weak digestive systems.

- Spleen and Stomach deficiencies: use *Da Zao* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).
- Diarrhea and decreased food intake because of accumulation of dampness and cold in the Spleen and Stomach: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Gan Jiang* (Rhizoma Zingiberis) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

2. Tonifies Blood

Blood deficiency: *Da Zao* tonifies blood and treats disorders characterized by blood deficiency, such as yellow or sallow facial appearance, pale lips, weight loss, dizziness, blurred vision, pale nails, pale scanty menstrual discharge, and in severe cases, amenorrhea. *Da Zao* tonifies

Da Zao (Fructus Jujubae)

both qi and blood and is ideal as an adjunct herb to strengthen the body.

- Blood deficiency: use *Da Zao* as a single-herb remedy.
- Severe blood deficiency with irritability and insomnia: use this substance with *Shu Di Huang* (Radix Rehmanniae Preparata), *Dang Gui* (Radicis Angelicae Sinensis), *E Jiao* (Colla Corii Asini) and *Huang Qi* (Radix Astragali).

3. Calms the *Shen* (Spirit)

***Zang zao* (dry organ) disorder:** *Da Zao* calms the *shen* and treats irritability, disturbed sleep and emotional instability in *zang zao*, a condition characterized by Heart deficiency combined with Liver qi stagnation.

- *Zang zao* disorder: combine this herb with *Gan Cao* (Radix Glycyrrhizae) and *Xiao Mai* (Fructus Tritici). **Exemplar Formula:** *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction).
- *Zang zao* disorder with *shen* disturbance: add this herb to *Gan Cao* (Radix Glycyrrhizae), *Xiao Mai* (Fructus Tritici), *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), *Suan Zao Ren* (Semen Zizyphi Spinosae) and *Bai Zi Ren* (Semen Platycladi).

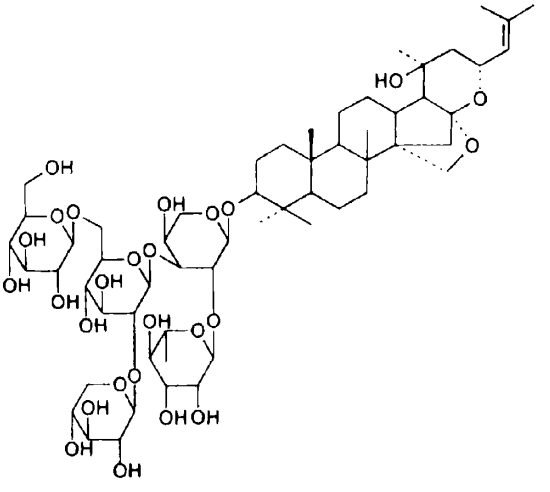
4. Harmonizes Other Herbs

Da Zao harmonizes the harsh and toxic effects of some other herbs and protects against damage to the internal organs.

- *Ting Li Zi* (Semen Descurainiae seu Lepidii): *Da Zao* is used with *Ting Li Zi* to prevent it from damaging Lung qi. The combination of these two herbs can be used to treat cough, wheezing and chest fullness caused by accumulation of phlegm in the chest.
- *Gan Sui* (Radix Euphorbiae Kansui), *Da Ji* (Radix Euphorbiae seu Knoxiae) and *Yuan Hua* (Flos Genkwa): *Da Zao* is used with these three herbs to prevent damage to Spleen and Stomach. The combination of these herbs treats ascites with severe accumulation of water and phlegm.
- *Sheng Jiang* (Rhizoma Zingiberis Recens): *Da Zao* is frequently combined with *Sheng Jiang* to treat exterior conditions. *Sheng Jiang* induces perspiration to release the exterior, while *Da Zao* promotes generation of body fluids to prevent the excessive loss of fluids that may occur with use of exterior-releasing herbs.

Lastly, spontaneous perspiration caused by deficiency can be treated by *Da Zao*, *Fu Xiao Mai* (Semen Tritici Aestivi Levis), *Wu Mei* (Fructus Mume) and *Sang Ye* (Folium Mori).

DOSAGE



3 to 12 fruits, or 10 to 30 grams. *Da Zao* should be cracked open when used in herbal decoction. Without breaking the fruit, only 1/7th of the active components can be extracted.[1]

CAUTIONS / CONTRAINDICATIONS

- Sweet in nature, *Da Zao* may create dampness, phlegm and heat. Therefore, it is contraindicated for use as a single remedy, or at a large dosage, in cases of excess dampness, excess heat, and hot phlegm.
- *Da Zao* is not recommended in cases of intestinal parasites.
- Excessive use of *Da Zao* may lead to tooth decay, due to the high sugar content of the herb.

CHEMICAL COMPOSITION

Betulinic acid, eanothic acid, oleanolic acid, crataegolic acid, alphitonic acid, zizyphus saponin I, II, III; jujuboside A, B; mashnic acid.[2,3,4]

HO
O
O
OH
OH
OH

Da Zao (Fructus Jujubae)

nervous system. It lowers blood pressure and reduces spontaneous motor activities.[7]

- **Hepatoprotective:** *Da Zao* has a protective effect on the liver. In one study, rabbits that received injections of *Da Zao* recovered much faster from carbon tetrachloride-induced liver damage than the control group.[8]

CLINICAL STUDIES AND RESEARCH

- **Allergic purpura:** Decoction of 10 pieces of *Da Zao* given three times daily successfully treated 5 patients with allergic purpura who did not respond to vitamin C, K, diphenhydramine, or other pharmaceutical treatments.[9]
- **Allergic purpura with normal platelets:** Gradual improvement and eventual recovery from allergic purpura was reported in 6 patients who ingested 10 pieces of *Da Zao* three times daily. One patient also took vitamin C and K supplements.[10]
- **Chronic diarrhea:** Eight patients with chronic diarrhea characterized by deficiency and cold of the Spleen and Stomach showed significant improvement after being treated with daily decoction of 50 grams each of red *Da Zao* and sugar.[11]

AUTHORS' COMMENTS

Da Zao is one of the best-tasting herbs. It is commonly used for cooking to enhance the flavor of food.

Da Zao is available in black and red colors. The properties and applications of these two are essentially the same. *Hong Da Zao*, red jujube, is slightly stronger in tonifying qi. *Hei Da Zao*, black jujube, is slightly stronger in tonifying blood.

Da Zao and *Sheng Jiang* (Rhizoma Zingiberis Recens) are frequently paired. From a TCM perspective, this pair harmonizes the herbal formula and protects and/or tonifies the middle *jiao*. From the pharmacologic perspective, they promote digestive function and increase the absorption of herbs.

Geng Mi (Semen Oryzae)

粳米

Pinyin Name: *Geng Mi*
Literal Name: "rice"
Alternate Chinese Names: *Da Mi*
English Name: rice
Botanical Name: *Oryza sativa* L. (*Dao*)
Pharmaceutical Name: Semen Oryzae
Properties: sweet, cool
Channels Entered: Spleen, Stomach

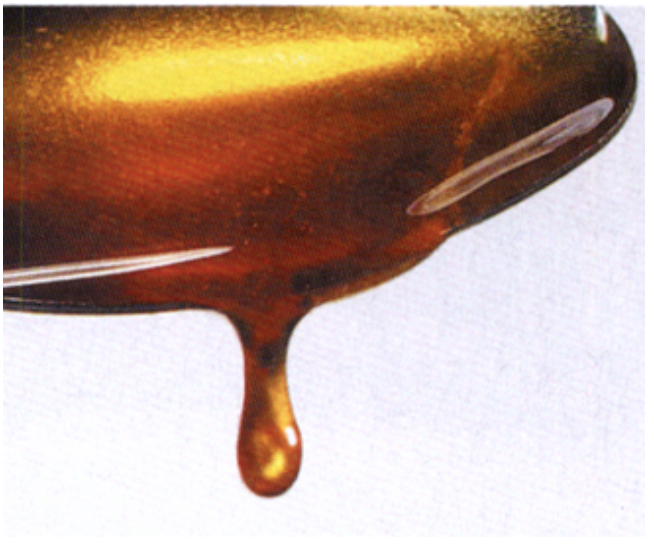
Geng Mi (Semen Oryzae)

CHINESE THERAPEUTIC ACTIONS

Tonifies the Lung, Spleen, and Intestines

Geng Mi (Semen Oryzae) tastes sweet, tonifies Lung qi, and strengthens the middle *jiao*. Clinically, it treats thirst, diarrhea, fatigue, and irritability. In addition, *Geng Mi* is sometimes used to strengthen the middle *jiao*, to prevent damage by cold and harsh herbs.

In addition, *Geng Mi* is often combined with *Shi Gao* (Gypsum Fibrosum) to prevent the cold property of the latter herb from damaging the middle *jiao*. **Exemplar Formula:** *Bai Hu Tang* (White Tiger Decoction).



DOSAGE

9 to 15 grams in decoction. This herb is commonly used as food.

Feng Mi (Mel)

蜂蜜

Pinyin Name: *Feng Mi*
Literal Name: "bee honey"
Alternate Chinese Names: *Bai Mi, Mi, Feng Tang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: honey
Zoological Name: *Apis cerana* Fabricius; *Apis mellifera* L.
Pharmaceutical Name: Mel
Properties: sweet, neutral
Channels Entered: Spleen, Lung, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Middle *Jiao*, Relieves Pain

Feng Mi (Mel) tonifies the Spleen and Stomach to relieve pain, increase energy, and improve appetite. It may be used individually or in combination in an herbal formula.

- Abdominal pain: use *Feng Mi* with *Bai Shao* (Radix Paeoniae Alba), *Gan Cao* (Radix Glycyrrhizae), *Gui Zhi* (Ramulus Cinnamomi) and *Gan Jiang* (Rhizoma Zingiberis).
- Hernial pain due to cold, with cold hands and feet: pair it with *Wu Tou* (Radix Aconiti).
- Deficiency of blood and body fluids: add this substance to *Sheng Di Huang* (Radix Rehmanniae), *Lu Jiao Jiao* (Gelatinum Cornu Cervi) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Postpartum thirst and weakness: combine *Feng Mi* with *Sheng Di Huang* (Radix Rehmanniae), *Lu Jiao Jiao* (Gelatinum Cornu Cervi) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

2. Moistens the Lung to Stop Cough

Feng Mi tonifies and moistens the Lung to treat chronic cases of Lung deficiency with cough.

- Chronic cough: use *Feng Mi* with juice of *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Chronic cough: combine it with *Su Zi* (Fructus Perillae), the juice of *Sheng Jiang* (Rhizoma Zingiberis Recens), the juice of *Sheng Di Huang* (Radix Rehmanniae), and *Xing Ren* (Semen Armeniacae Amarum).
- Chronic cough with blood-streaked sputum: use this substance with *Ren Shen* (Radix Ginseng), *Sheng Di Huang* (Radix Rehmanniae) and *Fu Ling* (Poria).

3. Lubricates the Bowels to Relieve Constipation

Feng Mi lubricates the bowels to relieve constipation caused by dryness and lack of fluids. It may be used alone, as a suppository, or orally in combination with other herbs.

Feng Mi (Mel)

- Constipation: use 30 to 60 grams of *Feng Mi* as a single remedy.
- Constipation with blood deficiency: use it with *Dang Gui* (Radicis Angelicae Sinensis), and *Hei Zhi Ma* (Semen Sesami Nigrum).
- Constipation with yin deficiency: add it to *Xuan Shen* (Radix Scrophulariae), *Zhi Mu* (Radix Anemarrhenae) and *Sheng Di Huang* (Radix Rehmanniae).
- Constipation with yang deficiency: combine this substance with *Suo Yang* (Herba Cynomorii) and *Rou Cong Rong* (Herba Cistanches).
- Constipation with interior heat: use it with *Jue Ming Zi* (Semen Cassiae), *Gua Lou Shi* (Fructus Trichosanthis), and *Da Huang* (Radix et Rhizoma Rhei).
- Constipation with qi stagnation: use *Feng Mi* with *Zhi Ke* (Fructus Aurantii), *Xing Ren* (Semen Armeniacae Amarum), and *Chen Xiang* (Lignum Aquilariae Resinatum).

4. Eliminates Toxins

Feng Mi can be used to eliminate toxins, either in the form of heat-toxins at the skin, or ingestion of poisonous substances.

- Oral ulcers: use it with *Da Qing Ye* (Folium Isatidis).
- Various sores and lesions: use *Feng Mi* individually topically.
- Poisoning by *Chuan Wu* (Radix Aconiti Preparata) and *Cao Wu* (Radix Aconiti Kusnezoffii): use a large dose (100 grams or more) of *Feng Mi*.

5. Use in Preparation of Herbs

Feng Mi is an ideal agent to add to single herbs or herbal formulas during preparation. The sweet taste improves patient compliance, and its fragrance hides the unpleasant smell of some herbs. Sticky in physical property, it combines well with powders to facilitate the process of making pills.

DOSAGE

15 to 30 grams orally. Use an adequate amount of *Feng Mi* for processing herbs, making pills, and for topical applications.

CAUTIONS / CONTRAINDICATIONS

- *Feng Mi* should be used with caution in cases of dampness, interior phlegm, or in patients with abdominal fullness and bloating.
- It should be used with caution in cases of loose stools or diarrhea.
- Allergic reaction is sometimes observed in children who ingest natural honey. Symptoms include urticaria and gastrointestinal disturbance.
- Ingestion of raw honey is not recommended for infants less than 12 months old because of infant botulism.

CHEMICAL COMPOSITION

Dextrose, fructose, sucrose, dextrin, malic and acetic acid.[1]

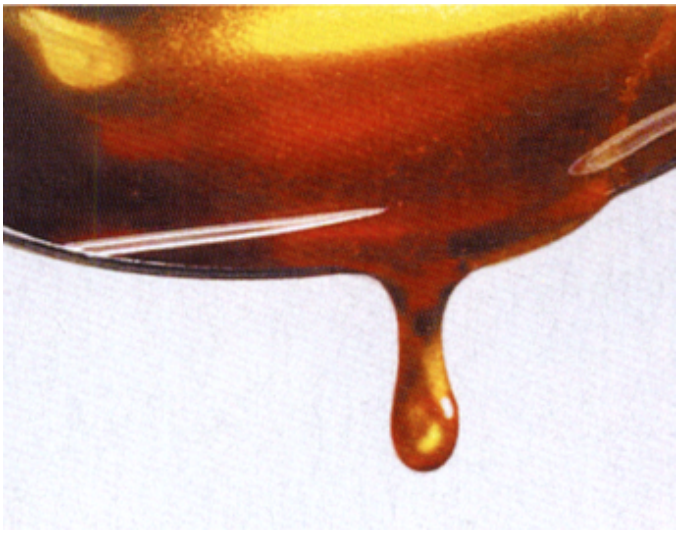
PHARMACOLOGICAL EFFECTS

- **Hepatoprotective:** Use of *Feng Mi* is associated with a hepatoprotective effect in rats treated with carbon tetrachloride.[2]
- **Antibiotic:** Raw *Feng Mi* has shown some antibiotic effects. However, most commercial products are devoid of such activity, possibly because the heat used during processing destroys these effects.[3]

CLINICAL STUDIES AND RESEARCH

- **Intestinal obstruction:** Patients with intestinal obstruction were treated with suppositories of *Feng Mi*. Out of 77 patients, 50 showed positive response within one dose. The suppositories were 3 to 6 cm long and were made by cooking *Feng Mi* until it turns solid.[4]
- **Overdose of *Wu Tou* (Radix Aconiti):** In one study, 11 cases of *Wu Tou* poisoning were treated with 50 to 100 grams of *Feng Mi*, taken with warm water. Most patients begin to show relief within 30 minutes, and all began to recover within 1 to 2 hours.[5]
- **Sinusitis and rhinitis:** Injection of a preparation containing 40% *Feng Mi* showed 94.6% effectiveness among 276 patients. The treatment protocol was to inject 2 to 4 ml of the preparation bilaterally into local areas surrounding the nose three times daily for 4 days per course of treatment. Patients with atrophic sinusitis or rhinitis were less responsive to the treatment.[6]
- **Burns:** Topical application of *Feng Mi* to the affected area four to five times daily showed marked effectiveness to relieve pain and facilitate recovery from the wounds.[7]

AUTHORS' COMMENTS



Feng Mi has two main functions when used to make herbal pills. It helps to bind the herbal powder together, and it acts as a reservoir to slowly release all the herbs into the gastrointestinal tract for extended absorption and therapeutic effect of the herbs. Use of *Feng Mi* in herbal pills improves patient compliance by reducing the frequency of dosing from three or four times daily to one or two doses daily.

Yi Tang (Saccharum Granorum)

飴糖　饴糖

Pinyin Name: *Yi Tang*
Alternate Chinese Names: *Jiao Yi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: maltose, barley malt sugar
Pharmaceutical Name: Saccharum Granorum
Properties: sweet, warm
Channels Entered: Spleen, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Spleen, Benefits Qi

Spleen and Stomach deficiencies: Sweet and warm, *Yi Tang* (Saccharum Granorum) treats fatigue, shortness of breath, and poor appetite caused by Spleen and Stomach deficiencies.

- Spleen and Stomach deficiencies: use *Yi Tang* with *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), *Zhi Gan Cao* (Radix Glycyrrhizae Preparata), and *Da Zao* (Fructus Jujubae).

2. Relieves Pain

Abdominal pain: *Yi Tang* nourishes the middle *jiao* to treat abdominal pain caused by deficiency and cold. Such conditions are often characterized by pain that is alleviated by warmth and pressure, and by aversion to cold, and loose stools.

- Abdominal pain due to deficiency and cold: use *Yi Tang* with *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens), *Bai Shao* (Radix Paeoniae Alba), *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) and *Da Zao* (Fructus Jujubae). **Exemplar Formula:** *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction).
- Abdominal pain from qi deficiency: use it with *Huang Qi* (Radix Astragali).
- Abdominal pain due to blood deficiency: combine this substance with *Dang Gui* (Radicis Angelicae Sinensis). **Exemplar Formula:** *Dang Gui Jian Zhong Tang* (Tangkuei Decoction to Construct the Middle).
- Chest and abdominal coldness and pain, cold limbs, nausea, and vomiting due to yang deficiency and cold stagnation: add *Yi Tang* to *Gan Jiang* (Rhizoma Zingiberis), *Hua Jiao* (Pericarpium Zanthoxyli), and *Ren Shen* (Radix Ginseng). **Exemplar Formula:** *Da Jian Zhong Tang* (Major Construct the Middle Decoction).

3. Moistens the Lung, Relieves Cough

Yi Tang treats cough caused by dryness in the Lung, or by qi deficiency, with or without sputum.

- Cough: use this substance with *Xing Ren* (Semen Armeniacae Amarum), *Bai Bu* (Radix Stemonae), and *Sha Shen* (Radix Glehniae seu Adenophorae).

4. Coats Foreign Objects

Yi Tang can be used to treat obstruction of the throat caused by fishbones or other objects. The patient should swallow small portions of the thick liquid slowly, so it can coat the obstructing substance and facilitate its passage.

DOSAGE

30 to 60 grams in decoction. *Yi Tang* is used in syrup or pill forms as well.

CAUTIONS / CONTRAINDICATIONS

- Use *Yi Tang* with caution in patients with middle *jiao* dampness, or those who are vomiting because of stagnation.
- Use of *Yi Tang* is contraindicated in patients with heat or phlegm.
- It is contraindicated in children with *gan ji* (infantile malnutrition) or cough caused by hot phlegm.

CHEMICAL COMPOSITION

Maltose, protein, lipid, vitamin B.[1]

AUTHORS' COMMENTS

Restless fetus and unstable pregnancy can be treated with the combination of *Yi Tang* and *Sha Ren* (Fructus Amomi).

Section 2

— Yang-Tonifying Herbs

Lu Rong (Cornu Cervi Pantotrichum)

鹿茸 鹿茸

Pinyin Name: *Lu Rong*
Literal Name: "deer antler"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: deer antler, hairy deer horn, hairy antler
Zoological Name: *Cervus nippon* Temmiinck (*Mei Hua Lu*); *Cervus elaphus* L. (*Ma Lu*)
Pharmaceutical Name: Cornu Cervi Pantotrichum
Properties: sweet, salty, warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Kidney Yang and Replenishes Kidney *Jing* (Essence)

Kidney yang deficiency with impotence: *Lu Rong* (Cornu Cervi Pantotrichum) treats Kidney yang and *jing* (essence) deficiencies with symptoms such as impotence, spermatorrhea, nocturnal emissions, soreness and weakness of the lower back and knees, weakness of sinews and joints, dizziness, lassitude and tinnitus.

- Impotence or spermatorrhea: combine *Lu Rong* with *Ren Shen* (Radix Ginseng), *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae), *Gou Qi Zi* (Fructus Lycii), and *Yin Yang Huo* (Herba Epimedii). This formula may be taken as powder, or soaked in grain-based liquor to make medicinal tincture.

Infertility, leukorrhea: Insufficient Kidney fire results in deficiencies of the *ren* (conception) and *chong* (thoroughfare) channels. Clinical manifestations include clear, watery leukorrhea, constant uterine bleeding, or infertility in women. This substance warms Kidney yang and the uterus, regulates menstruation and helps to contract the uterus to stop bleeding.

- Infertility caused by deficiencies of Kidney yang and the *ren* (conception) and *chong* (thoroughfare) channels: use *Lu Rong* individually in powder.
- Uterine bleeding, clear vaginal discharge: combine it with *Shu Di Huang* (Radix Rehmanniae Preparata), *Rou Cong Rong* (Herba Cistanches), and *Hai Piao Xiao* (Endoconcha Sepiae).

2. Nourishes Blood, *Ren* (Conception) and *Chong* (Thoroughfare) Channels

Severe anemia due to blood and Kidney *jing* (essence) deficiencies: Blood and *jing* arise from the same source. In cases of severe blood deficiency or loss, *jing* will be lost as well. *Lu Rong* tonifies blood and nourishes *jing* to promote production of red blood cells and reticulocytes. Therefore, *Lu Rong* is best for thin and weak patients with severe blood and *jing* deficiencies.

- Severe anemia: combine *Lu Rong* with *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), and *Dang Gui* (Radicis Angelicae Sinensis).

Lu Rong (Cornu Cervi Pantotrichum)

3. Strengthens Sinews and Bones

Weakness of sinews and bones: The Kidney stores *jing* (essence), which is vital to strong bones. The Liver stores blood and controls the sinews and tendons. When the Liver and Kidney are deficient, the bones, sinews and joints become weak. Deficiencies of Kidney yang and *jing* in children manifest in mental retardation, learning disabilities and delayed mental and physical growth. Deficiencies of Kidney yang and *jing* in elderly patients may lead to *wei* (atrophy) syndrome.

- Weakness of sinews and bones: use *Lu Rong* individually in powder form.
- Developmental delays in children: use *Lu Rong* individually in powder form.
- *Wei* (atrophy) syndrome: combine this substance with *Suo Yang* (Herba Cynomorii), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Shu Di Huang* (Radix Rehmanniae Preparata), *Xu Duan* (Radix Dipsaci) and *Ji Xue Teng* (Caulis Spatholobi).

Delayed healing of broken or fractured bones: *Lu Rong* is often used in the trauma departments of hospitals in China to promote healing of bones.

- Delayed healing of broken or fractured bones: combine this substance with *Huang Qi* (Radix Astragali), *Wu Jia Pi* (Cortex Acanthopanacis), *Gu Sui Bu* (Rhizoma Drynariae), and *Yin Yang Huo* (Herba Epimedii).

4. Heals Chronic Yin Sores and Boils

Chronic yin sores and boils that are concave, discharging a clear fluid, slow-healing in nature, with dark, dull skin surrounding the lesion: apply *Lu Rong* powder topically.

DOSAGE

1 to 2 grams. Because *Lu Rong* is quite expensive, this substance is usually not decocted with other herbs. In powder form, it is taken with the decoction. *Lu Rong* can be used as powder or soaked in grain-based liquor to enhance its warming effect.

CAUTIONS / CONTRAINDICATIONS

- Use of *Lu Rong* is contraindicated in patients with yin-deficient heat, phlegm-heat in the Lung, Stomach fire, and excess or stagnant conditions caused by heat.
- It should not be used if the patient is bleeding because of yin-deficient fire.

OVERDOSAGE

Acute overdose of *Lu Rong* is characterized by tremor, dyspnea, tearing, gastrointestinal disturbances, and dermal redness and itching.[1]

CHEMICAL COMPOSITION

Pantocrine, lysophosphatidyl choline, ganglioside, putrescine, spermindine, spermine, PGE_1, PGE_2, PGF, condroitin sulfate, androgen, estradiol, oestrone, ceramide, lecithin, cephalin, cholesterol, lipids, ganglioside, sphingomyeline, calcium phosphate, calcium carbonate.[2]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** As evaluated in various animal studies, the cardiovascular effect of *Lu Rong* varies according to dosage. At low doses, there is no significant change. At moderate doses, it displays positive chronotropic and inotropic effects, leading to increased cardiac output. At large doses, it has negative chronotropic and inotropic effects, leading to dilation of blood vessels and decreased blood pressure. Its clinical applications include treatment of arrhythmia and hypotension caused by profuse blood loss.[3]
- **Endocrine:** Plasma levels of testosterone were evaluated in mice who received oral administration of *Lu Rong* at the dosage of 100 to 200 mg/kg. Testosterone levels increased significantly in old and young mice, but no change was observed in normal adult mice.[4]
- **Gastrointestinal:** *Lu Rong* stimulates the production of PGE_2 and is commonly used for treatment of peptic ulcers.[5]
- **Effect on healing:** Pantocrine, one component of *Lu Rong*, has been shown to enhance healing of chronic wounds, ulcerations, and bone fractures.[6]
- **General strengthening:** Pantocrine, one component of *Lu Rong*, is a general tonic that has demonstrated marked effectiveness to increase work capacity, improve sleep, increase appetite, and decrease muscle fatigue. Long-term administration of *Lu Rong* is associated with an increase in body weight and red blood cell count.[7]

CLINICAL STUDIES AND RESEARCH

- **Hyperplasia of mammary glands:** An injectable preparation of *Lu Rong* showed 87.2% effectiveness in treating 86 women with hyperplasia of the mammary glands. The treatment protocol was to administer 2 ml via intramuscular injection, twice daily for 10 to 15 days prior to menstruation.[8]
- **Diarrhea:** Patients with diarrhea characterized by deficiency of Kidney yang were treated with one intramuscular injection of *Lu Rong* daily, or every other day, for a total of two doses. Out of 16 patients, 12 had complete recovery, 3 showed moderate improvement, and 1 showed no response.[9]
- **Impotence:** Intramuscular injection of *Lu Rong* given every other day and oral ingestion of herbs daily were used to treat 42 patients with impotence, with marked

Lu Rong (Cornu Cervi Pantotrichum)

effectiveness. The treatment protocol was to inject 0.5 ml of *Lu Rong* into the acupuncture points *Qihai* (CV 6), *Guanyuan* (CV 4), *Zhongji* (CV 3), *Qugu* (CV 2) and *Zusanli* (ST 36), and 1.0 ml into *Mingmen* (GV 4). The composition of the herbal formula varied depending on the presentation of each patient.[10]

- **Atrioventricular block:** In one study, 20 patients with atrioventricular block were treated with 2.0 ml intramuscular injection of *Lu Rong* for 25 to 30 days with an 85% effective rate.[11]

TOXICOLOGY

The LD_{50} of pantocrine in mice is 34.0 ml/kg via intravenous injection, 104 ml/kg via intraperitoneal injection, 114 ml/kg via subcutaneous injection, 97.8 ml/kg via intramuscular injection, and 117 ml/kg via oral ingestion.[12]

SUPPLEMENT

- 麋茸 / 麋茸 *Mi Rong* (Cornu Elapnurus Parvum), first cited in the *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D., is immature moose antler with hair. The taste, property, channels entered, functions, and contraindications are similar to those of *Lu Rong*.

AUTHORS' COMMENTS

According to the doctrine of similarity, it is believed that because animals are closer to human beings than plants or other substances, animal substances will be more beneficial than plants or minerals in tonifying the *jing* (essence) of the body.

According to *Ben Cao Gang Mu* (Materia Medica), deer are considered to be among the animals most helpful for tonifying yang and *jing* (essence). In addition to the horn and antler, many other deer parts tonify yang and replenish *jing*, such as deer blood, bone marrow, kidney and placenta.

English Name: deer horn
Zoological Name: *Cervus nippon* Temmiinck (*Mei Hua Lu*); *Cervus elaphus* L. (*Ma Lu*)
Pharmaceutical Name: Cornu Cervi
Properties: salty, warm
Channels Entered: Kidney, Liver

Lu Jiao (Cornu Cervi)

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Kidney Yang

Kidney yang deficiency: *Lu Jiao* (Cornu Cervi) is used as a less-expensive substitute for *Lu Rong* (Cornu Cervi Pantotrichum). However, *Lu Jiao* is much less potent than *Lu Rong*. *Lu Jiao* is applicable for patients who present with uterine bleeding, clear vaginal discharge, diarrhea and poor appetite caused by deficiencies of Spleen and Kidney yang and of the *ren* (conception) and *chong* (thoroughfare) channels.

- Back pain from yang deficiency: combine *Lu Jiao* with *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), *Bu Gu Zhi* (Fructus Psoraleae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).

2. Invigorates Blood Circulation and Disperses Blood Stasis

Lu Jiao treats low back and joint pain by tonifying the Kidney and regulating blood circulation.

- Pain in the back and joints: *Lu Jiao* can be taken individually, or with other herbs, to relieve pain.

3. Reduces Swelling

Lu Jiao treats toxic sores, breast abscesses and swellings caused by blood stagnation.

- Sores: apply *Lu Jiao* powder topically.

DOSAGE

5 to 10 grams. *Lu Jiao* can be cooked in decoctions, taken in powder internally, or applied topically.

CAUTIONS / CONTRAINDICATIONS

- *Lu Jiao* is contraindicated in patients with yin-deficient heat, phlegm-heat in the Lung, Stomach fire, or excess or stagnant conditions caused by heat. It should not be used if the patient is bleeding due to yin-deficient fire.

CHEMICAL COMPOSITION

Gelatin 25%, calcium phosphate 50-60%, calcium carbonate, amino acids.[1]

SUPPLEMENT

- 麋角 *Mi Jiao* (Cornu Elapnurus), first cited in *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D., is dried moose horn. Its taste, property, channels entered, and functions are similar to those of *Lu Jiao* (Cornu Cervi).

AUTHORS' COMMENTS

Lu Jiao is the horn of mature male deer. In comparison with *Lu Rong* (Cornu Cervi Pantotrichum), *Lu Jiao* more strongly reduces swelling and invigorates blood circulation, but has weaker action to tonify yang. *Lu Jiao* is less expensive, and is sometimes used as a substitute for *Lu Rong*.

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994, 16151.

Lu Jiao Jiao (Gelatinum Cornu Cervi)

鹿角膠　鹿角胶

Pinyin Name: *Lu Jiao Jiao*
Literal Name: "deer horn gelatin"
Alternate Chinese Names: *Bai Jiao*
English Name: deer horn gelatin
Zoological Name: *Cervus nippon* Temmiinck (*Mei Hua Lu*); *Cervus elaphus* L. (*Ma Lu*)
Pharmaceutical Name: Gelatinum Cornu Cervi
Properties: sweet, salty, warm
Channels Entered: Liver, Kidney

Lu Jiao Jiao (Gelatinum Cornu Cervi)

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney

Kidney yang and *jing* (essence) deficiencies: *Lu Jiao Jiao* (Gelatinum Cornu Cervi), though not as strong as *Lu Rong* (Cornu Cervi Pantotrichum) in tonifying the Kidney, is often used as a substitute because it is less expensive. It is best used when the patient has both Kidney yang deficiency and *jing* exhaustion. The applications include *wei* (atrophy) syndrome, weight loss, and various signs of bleeding such as abnormal uterine bleeding, epistaxis, urinary bleeding or hematemesis.

- Uterine bleeding, or clear, watery leukorrhea: combine *Lu Jiao Jiao* with *Pu Huang* (Pollen Typhae), and *Hai Piao Xiao* (Endoconcha Sepiae).
- Impotence: use this substance with *Du Zhong* (Cortex Eucommiae), *Rou Cong Rong* (Herba Cistanches) and *Yin Yang Huo* (Herba Epimedii).
- Malnutrition and delayed physical growth in children: use it with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae) and *Fu Ling* (Poria).

2. Yin Sores

Lu Jiao Jiao can be used internally or topically to treat various types of sores and skin lesions.

- Yin sores: use *Lu Jiao Jiao* with *Ma Huang* (Herba Ephedrae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Jie Zi* (Semen Sinapis) and *Rou Gui* (Cortex Cinnamomi).
- Chronic yin sores and boils that are concave, discharging clear fluid and are slow-healing in nature: apply *Lu Jiao Jiao* powder topically.

DOSAGE

5 to 10 grams. Dissolve *Lu Jiao Jiao* in hot water, or in heated grain-based liquor. It can also be made into pills, powder or paste.

CAUTIONS / CONTRAINDICATIONS

- *Lu Jiao Jiao* is contraindicated in cases of yin-deficient fire.
- It is contraindicated in patients without exhaustion of *jing* (essence) and blood.
- It is also contraindicated in cases in which there is no deficiency of *ming men* (life gate) fire.

CHEMICAL COMPOSITION

See *Lu Jiao* (Cornu Cervi).

AUTHORS' COMMENTS

Lu Jiao Jiao is used mainly to warm the lower *jiao* (primarily the Kidney) to tonify the yin within the yang, generate *jing* (essence) and blood, and stop uterine bleeding. It has effects similar to, but weaker than those of *Lu Rong* (Cornu Cervi Pantotrichum).

Lu Jiao Shuang (Cornu Cervi Degelatinatium)

鹿角霜 鹿角霜

Pinyin Name: *Lu Jiao Shuang*
Literal Name: "deer horn fragments"
Original Source: *Ben Cao Pin Hui Jing Yao* (Essentials of Materia Medica) by Liu Wen-Tai in 1505
English Name: deer horn fragments
Zoological Name: *Cervus nippon* Temmiinck (*Mei Hua Lu*); *Cervus elaphus* L. (*Ma Lu*)
Pharmaceutical Name: Cornu Cervi Degelatinatium
Properties: sweet, salty, slightly warm
Channels Entered: Kidney, Liver, Heart, Pericardium

Lu Jiao Shuang (Cornu Cervi Degelatinatium)

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Kidney Yang, Nourishes Blood in the *Ren* (Conception) and *Chong* (Thoroughfare) Channels

Spleen and Kidney yang deficiencies: *Lu Jiao Shuang* (Cornu Cervi Degelatinatium) is the sediment left after *Lu Jiao* (Cornu Cervi) is boiled and processed into *Lu Jiao Jiao* (Gelatinum Cornu Cervi). The yang-tonic function of this substance is weaker than that of *Lu Rong* (Cornu Cervi Pantotrichum), *Lu Jiao* and *Lu Jiao Jiao*. However, it is not cloying or greasy in nature, which makes it suitable for long-term use. It also has an astringent function that is best used for patients having diarrhea and poor appetite due to Spleen and Kidney yang deficiencies. Women with uterine bleeding and profuse, clear vaginal discharge due to Kidney yang deficiency may also use *Lu Jiao Shuang*.

2. Heals Ulcers and Stops Bleeding

- For slow-healing sores: apply *Lu Jiao Shuang* powder topically.
- Bleeding from knife cuts: use it topically.

DOSAGE

10 to 15 grams. The maximum dose of *Lu Jiao Shuang* is 25 to 30 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Lu Jiao Shuang* is contraindicated in patients with yin-deficient heat, phlegm-heat in the Lung, Stomach fire, and excess or stagnant conditions caused by heat.
- It should not be used if the patient is bleeding because of yin-deficient fire.

CLINICAL STUDIES AND RESEARCH

- **Stones in the urinary tract:** In one study, 12 patients with stones were treated with satisfactory results, using an herbal formula containing 30 grams of *Lu Jiao Shuang* as the main ingredient.[1]

Dong Chong Xia Cao (Cordyceps)

冬蟲夏草
冬虫夏草

Pinyin Name: *Dong Chong Xia Cao*
Literal Name: "winter bug summer herb"
Alternate Chinese Names: *Chong Cao, Dong Chong Cao, Xia Cao Dong Chong*
Original Source: *Ben Cao Cong Xin* (Thoroughly Revised Materia Medica) by Wu Yi-Luo in 1751
English Name: cordyceps, Chinese caterpillar fungus
Botanical Name: *Cordyceps sinensis* (Berk.) Sacc. (*Dong Chong Xia Cao*); It is usually combined with the larval remains of *Hepialus varians* Staudinger.
Pharmaceutical Name: Cordyceps
Properties: sweet, warm
Channels Entered: Lung, Kidney

Dong Chong Xia Cao (Cordyceps)

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Kidney Yang and Augments *Jing* (Essence)

Kidney yang and *jing* (essence) deficiencies: This condition is characterized by generalized soreness, lower back and knee weakness and pain, spermatorrhea, frequent urination, nocturnal emissions, impotence, premature ejaculation, tinnitus, forgetfulness, and poor memory. *Dong Chong Xia Cao* (Cordyceps) is also ideal for convalescing patients or those who are extremely weak, with spontaneous sweating.

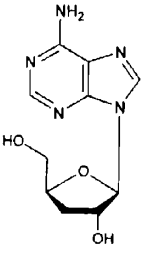
- Bone and joint disorders: combine *Dong Chong Xia Cao* with *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci).
- Impotence: combine this substance with *Lu Rong* (Cornu Cervi Pantotrichum) and *Yin Yang Huo* (Herba Epimedii).
- Tinnitus: combine it with *Gou Qi Zi* (Fructus Lycii) and *Shan Zhu Yu* (Fructus Corni).
- Spontaneous sweating during recovery from chronic illness: use it with *Huang Qi* (Radix Astragali) to tonify the *wei* (defensive) *qi*. The herbs are cooked as soup with beef, lamb or duck.

2. Tonifies the Lung, Stops Bleeding and Dissolves Phlegm

Chronic respiratory disorders, cough: *Dong Chong Xia Cao* treats chronic respiratory disorders with Lung and Kidney deficiencies manifesting in consumptive cough with blood-streaked sputum. It helps to arrest cough, dispel sputum and stop bleeding. Because *Dong Chong Xia Cao* is moderate in its nourishing effect, it is suitable for chronic cough caused by yin or qi deficiency.

- Chronic cough due to Kidney and Lung yin deficiencies manifesting in scanty, blood-streaked sputum: combine it with *Mai Men Dong* (Radix Ophiopogonis), *E Jiao* (Colla Corii Asini), *Bai He* (Bulbus Lilii), and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).
- Chronic cough due to Kidney and Lung qi deficiencies resulting in manifesting of feeble cough and weakness: add it to *Ge Jie* (Gecko), *Ren Shen* (Radix Ginseng), and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

DOSAGE



5 to 10 grams in decoction, pill or powder form.

CAUTIONS / CONTRAINDICATIONS

- Use *Dong Chong Xia Cao* with caution in exterior conditions.
- Side effects associated with the use of *Dong Chong Xia Cao* include headache, irritability, restlessness, edema and swelling of the face and extremities, epistaxis, decreased volume of urine, yellow, greasy tongue coat, and thready, rapid pulse.[1]

CHEMICAL COMPOSITION

Cordycepic acid 7 to 9%, cordycepin, 3-deoxyadenosine, amino acid approximately 25%.[2,3]

Cordycepin

PHARMACOLOGICAL EFFECTS

- **Adrenocortical:** *Dong Chong Xia Cao* has been shown to stimulate the secretion of adrenal gland hormones in mice.[4]
- **Immunostimulant:** *Dong Chong Xia Cao* has been shown to enhance the phagocytic activities of macrophages.[5]
- **Male reproductive:** Decoction of *Dong Chong Xia Cao* has been shown to increase sperm count and sperm motility in mice.[6]
- **Sedative and hypnotic:** Decoction of *Dong Chong Xia Cao* given to mice on a daily basis increases the duration and improves the quality of sleep.[7]
- **Cardiovascular:** Administration of *Dong Chong Xia Cao* is associated with a decrease in heart rate and blood pressure for over one hour. Furthermore, it decreases the oxygen requirement of the cardiac muscles in mice.[8]
- **Antiarrhythmic:** Administration of *Dong Chong Xia Cao* decreases the length and severity of aconite-induced cardiac arrhythmia in mice.[9]
- **Antihyperlipidemic:** Administration of *Dong Chong Xia Cao* lowers TG, TC, LDL and VLDL while increasing HDL in rats.[10]
- **Antibiotic:** *Dong Chong Xia Cao* has been shown to have antibiotic effect against *Staphylococcal* spp., *Streptococcal* spp., *Bacillus anthracis*, and some dermatophytes.[11]
- **Antineoplastic:** *Dong Chong Xia Cao* has demonstrated preliminary effectiveness against cancer cell activity in mice.[12]
- **Respiratory:** *Dong Chong Xia Cao* dilates and relaxes the bronchial muscles to relieve asthma. It, does not, however, have any antitussive or expectorant effects.[13]
- **Others:** Studies have demonstrated that *Dong Chong Xia Cao* increases colony-forming units (CFU) and platelets.[14,15]

CLINICAL STUDIES AND RESEARCH

- **Sexual dysfunction:** In one study, 197 patients with sexual disorders were treated with 1 gram of *Dong Chong Xia Cao* three times daily for 40 days. The rate of effectiveness

Dong Chong Xia Cao (Cordyceps)

was 64.15% in 159 patients who received cultivated *Dong Chong Xia Cao*, and 31.57% in 38 patients who received wild-crafted *Dong Chong Xia Cao*.[16]

- **Hyperlipidemia:** Administration of 1 gram of *Dong Chong Xia Cao* three times daily showed marked action to decrease LDL and TG and increase HDL in 273 patients with hyperlipidemia. Another study of 204 patients reported that *Dong Chong Xia Cao* decreases LDL but increases TG.[17,18]
- **Low platelet count:** Administration of *Dong Chong Xia Cao* is associated with an 83.3% success rate in raising platelet counts in 30 patients.[19]
- **Kidney impairment:** Compromised renal function in 117 patients was treated with 6 grams of *Dong Chong Xia Cao* three times daily, with good results.[20]
- **Tinnitus:** According to one report, 23 patients with tinnitus were treated with 6 grams of *Dong Chong Xia Cao* three times daily for up to 4 weeks, with good results.[21]
- **Arrhythmia:** An effective rate of 64.9% was reported in 57 patients with arrhythmia treated with 0.5 gram of *Dong Chong Xia Cao* three times daily for 2 weeks.[22]
- **Chronic tracheitis:** In one study, 656 patients with chronic tracheitis were treated with *Dong Chong Xia Cao* three times daily for 40 days, with good results.[23]
- **Allergic rhinitis:** Administration of 6 grams of *Dong Chong Xia Cao* three times daily for 4 weeks showed a 93% effective rate in treating 43 patients with allergic rhinitis.[24]
- **Cancer:** Malignant tumors in 30 patients were treated with 1.5 grams of *Dong Chong Xia Cao* three times daily for 2 months. The study reported improvement based on symptomatic assessment in 93% of patients.[25]

TOXICOLOGY

Dong Chong Xia Cao has an extremely low level of toxicity. Mice have been shown to tolerate up to 45 g/kg of *Dong Chong Xia Cao*, approximately 250 times the therapeutic dosage in humans. The LD_{50} in mice via intraperitoneal injection is 21.7 +/- 1.3 g/kg. Symptoms of overdose include generalized inhibition initially, followed by generalized excitation, spasms, convulsions, and respiratory depression.[26]

AUTHORS' COMMENTS

Dong Chong Xia Cao has been used recently to treat cancer, hyperlipidemia and hypertension. The cultivated herb is widely used today and the price is much lower, by comparison with the wild-crafted ones.

According to Dr. Cheng Jian-Hua, *Dong Chong Xia Cao*, *Mai Men Dong* (Radix Ophiopogonis), *Shi Hu* (Herba Dendrobii) and *Sheng Di Huang* (Radix Rehmanniae) served daily as a beverage is helpful in treating lung cancer.

Ge Jie (Gecko)

蛤蚧

Pinyin Name: *Ge Jie*
Alternate Chinese Names: *Xian Dan*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: gecko, tokay
Zoological Name: *Gekko gecko* L. (*Ge Jie*)
Pharmaceutical Name: Gecko
Properties: salty, neutral
Channels Entered: Lung, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Lung Qi and Relieves Cough and Dyspnea

Chronic cough, dyspnea and wheezing due to Lung and Kidney deficiencies: The Lung dominates qi and the Kidney is the root of qi. Chronic respiratory disorder is often characterized by both Lung and Kidney deficiencies. *Ge Jie* (Gecko) can be used to treat Lung and Kidney deficiencies with presentations of labored respiration, chronic coughing, consumptive cough with blood-streaked sputum, wheezing, low voice or inability to finish conversations (patient will need to pause to gasp for breath), shortened inhalation and prolonged exhalation, withered *shen* (spirit), spontaneous sweating, soreness, edema of the limbs, weakness of lower back and knees. The above symptoms will worsen with exertion.

- Chronic respiratory disorders with deficiency and cold signs: combine *Ge Jie* with *Ren Shen* (Radix Ginseng), *Bu Gu Zhi* (Fructus Psoraleae), *Hu Tao Ren* (Semen Juglandis). **Exemplar Formula:** *Ren Shen Ge Jie San* (Ginseng and Gecko Powder).
- Chronic respiratory disorders with yin-deficient signs of tidal fever, steaming bones sensations: combine this substance with *Xi Yang Shen* (Radix Panacis Quinquefolii), *Hu Huang Lian* (Rhizoma Picrorhizae), *Xuan Shen* (Radix Scrophulariae), and *Shu Di Huang* (Radix Rehmanniae Preparata).

2. Tonifies Kidney Yang, *Jing* (Essence) and Augments the Blood

Overindulgence in sexual activities injures the *jing* (essence) and blood. *Jing* deficiency eventually causes Kidney deficiency, and chronic blood deficiency results in Liver deficiency. Chronic deficiency of Kidney *jing* and Liver blood leads to lack of nourishment to the tendons and sinews, resulting in weakness and soreness especially of the lower back and knees.

- Impotence: combine *Ge Jie* with *Yin Yang Huo* (Herba Epimedii), *Lu Rong* (Cornu Cervi Pantotrichum) and *Shan Yao* (Rhizoma Dioscoreae). These four herbs can be soaked in grain-based liquor to make medicinal tincture.
- Weakness and soreness of bones and joints: combine this substance with *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci) and *Du Huo* (Radix Angelicae Pubescentis).
- Daybreak (early morning) diarrhea: add *Ge Jie* to *Bu Gu Zhi* (Fructus Psoraleae), *Rou Dou Kou* (Semen Myristicae), and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

DOSAGE

3 to 7 grams in decoctions, and 1 to 2 grams in powder form. *Ge Jie* is also used in tincture by soaking it in grain-based liquor. Liquor-fried (with grain-based liquor) *Ge Jie* has a stronger effect to tonify the Kidney. In addition, this processing facilitates the crushing and extraction of active components.

CAUTIONS / CONTRAINDICATIONS

Use of *Ge Jie* is contraindicated in cough caused by exterior conditions, or in cases of excess heat.

CHEMICAL COMPOSITION

Carnoside, carnitine, guanine, albumen, cholesterol, fatty acid, calcium, magnesium, iron, zinc, copper, sodium.[1]

PHARMACOLOGICAL EFFECTS

- **Reproductive:** In male mice, *Ge Jie* increased the weight of the testicles. In female mice, it prolonged estrus periods,

Ge Jie (Gecko)

increased the weight of the reproductive organs, and induced estrus in oophorectomized mice.[2]

- **Respiratory:** Alcohol extract of *Ge Jie* relaxes the bronchi and has marked antiasthmatic action. Water extract, on the other hand, has no significant effect.[3]
- **Immunostimulant:** Alcohol extract of the body and the tail of *Ge Jie* in mice increases the white blood cell count and phagocytic activities by the macrophages, and increases the weight of the spleen.[4]
- **Adrenocortical:** Administration of *Ge Jie* is associated with increased production of adrenocortical hormone.[5]

CLINICAL STUDIES AND RESEARCH

- **Male sexual disorder:** Patients with impotence and infertility were treated with an herbal formula containing *Ge Jie*, with satisfactory improvement within 3 treatments. The herbal formula was given with grain-based liquor two hours prior to sexual intercourse.[6]
- **Bronchitis:** In one study, 128 geriatric patients with chronic bronchitis were treated with an overall 85.9% rate of effectiveness using an herbal formula containing *Ge Jie* as the main ingredient.[7]

TOXICOLOGY

The LD_{50} in mice for oral ingestion is not available, as the dosage of 135 g/kg did not cause any fatalities. The LD_{50} in mice for water and alcohol extracts of *Ge Jie* via intraperitoneal injection is approximately 5.24 g/kg.[8]

AUTHORS' COMMENTS

The tail of *Ge Jie* has been proposed to be the most potent part. The validity of this concept, however, is currently under challenge. Studies have shown that both the tail and the body had similar active constituents and produced similar effects, when ethanol was used to extract the active components from both parts. As a result, most herbal pharmacies today will use both the body and the tail together.[9]

Hu Tao Ren (Semen Juglandis)

胡桃仁 胡桃仁

Pinyin Name: *Hu Tao Ren*
Literal Name: "barbarian peach pit"
Alternate Chinese Names: *He Tao Ren, He Tao, Qiang Tao, Hu Tao Rou*
Original Source: *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies)
English Name: walnut, English walnut, Persian walnut
Botanical Name: *Juglans regia* L. (*Hu Tao*)
Pharmaceutical Name: Semen Juglandis
Properties: sweet, warm
Channels Entered: Kidney, Lung, Large Intestine

Hu Tao Ren (Semen Juglandis)

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney and Replenishes the *Jing* (Essence)

Kidney yang and *jing* (essence) deficiencies: Clinical manifestations of this condition include weakness of tendons and bones, back pain, prematurely gray hair, and blurry vision. *Hu Tao Ren* (Semen Juglandis) is sweet and rich in oil to nourish Kidney *jing*. This is also an important herb to strengthen the bones.

- Prematurely gray hair: combine this herb with *He Shou Wu* (Radix Polygoni Multiflori), *Nu Zhen Zi* (Fructus Ligustri Lucidi), and *Dang Gui* (Radicis Angelicae Sinensis).
- Blurry vision: use it with *Gou Qi Zi* (Fructus Lycii).
- Soreness and weakness of lower back and knees: add this herb to *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci).
- Arthritis: combine it with *Yin Yang Huo* (Herba Epimedii).

2. Warms the Lung and Arrests Wheezing

Cough and dyspnea due to cold and deficiency of the Lung: Kidney deficiency is characterized by an inability to grasp qi downwards, leading to difficulty in inhalation. When both the Lung and Kidney are deficient, there is a chronic, weak cough that worsens with exertion. *Hu Tao Ren* is most suitable for this type of chronic cough because it tonifies both Lung and Kidney.

- Chronic cough and dyspnea: serve *Hu Tao Ren* with honey.

3. Moistens the Intestines and Unblocks the Bowels

Constipation: Lack of either *jing* (essence) or blood or both leads to dry stools or constipation. *Hu Tao Ren* is rich in oil, which moistens the walls of the intestines and is most suitable for constipation that follows chronic illnesses with injured yin, or dry, difficult stools in the elderly.

- Constipation: combine with *Rou Cong Rong* (Herba Cistanches), *E Jiao* (Colla Corii Asini), and *Dang Gui* (Radicis Angelicae Sinensis).

DOSAGE

10 to 30 grams.

CAUTIONS / CONTRAINDICATIONS

- *Hu Tao Ren* should be used with caution in patients with yin-deficient fire, cough with yellow phlegm or loose stools.

CHEMICAL COMPOSITION

Linoleic acid, linolenic acid, oleic acid, carotene, vitamin B, vitamin E, calcium, phosphorus, iron.[1]

PHARMACOLOGICAL EFFECTS

- **Hematological:** Injection of *Hu Tao Ren* is associated with mild anticoagulant and thrombolytic effects in dogs.[2]
- **Anti-inflammatory:** Intravenous administration of a *Hu Tao Ren* preparation inhibited the inflammation process in mice with acute otitis media.[3]

CLINICAL STUDIES AND RESEARCH

- **Urinary stones:** *Hu Tao Ren* was shown to have a beneficial effect in treating stones in the urinary tract in two separate clinical studies.[4,5]
- **Dermatological disorders:** In one study, 170 patients with eczema or dermatitis were treated topically with a *Hu Tao Ren* preparation with a 76.2% rate of effectiveness. The topical paste was 30% *Hu Tao Ren* oil, and was prepared by stir-frying the herb to extract the oil.[6]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Hu Tao Ren* has anticoagulant and thrombolytic effects, and should be used with caution in patients who take anticoagulant or antiplatelet medications. Though this potential interaction has not been documented, this herb may potentiate the effect of drugs such as warfarin.[7] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]

AUTHORS' COMMENTS

To arrest cough, use *Hu Tao Ren* with intact skin. To lubricate the intestines, peel and discard the skin.

Rou Cong Rong (Herba Cistanches)

肉蓯蓉 肉苁蓉

Pinyin Name: *Rou Cong Rong*
Alternate Chinese Names: *Dan Da Yun, Da Yun, Cong Rong, Chang Yang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cistanche, desert-living cistanche
Botanical Name: *Cistanche salsa* (C.A. Mey.) G. Beck (*Rou Cong Rong*); *Cistanche deserticola* Y.C. Ma. (*Rou Cong Rong*)
Pharmaceutical Name: Herba Cistanches
Properties: sweet, salty, warm
Channels Entered: Kidney, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Kidney Yang, *Jing* (Essence) and Blood

Impotence, infertility: *Rou Cong Rong* (Herba Cistanches) treats impotence in men and infertility in women caused by Kidney yang deficiency with lack of *jing* (essence) and blood. *Rou Cong Rong* is a mild herb. Therefore, to achieve therapeutic effect, it is usually used in a formula, at a larger dose, and on a long-term basis.

- Impotence, infertility, spermatorrhea: use a large dose of *Rou Cong Rong* with *Lu Rong* (Cornu Cervi Pantotrichum), *Shan Yao* (Rhizoma Dioscoreae) and *Fu Ling* (Poria).
- Decreased sexual desire: combine this herb with *Yin Yang Huo* (Herba Epimedii).
- Forgetfulness, loss of hearing: use it with *Lu Rong* (Cornu Cervi Pantotrichum), *Shan Yao* (Rhizoma Dioscoreae) and *Fu Ling* (Poria).

Rou Cong Rong treats Kidney yang deficiency with such symptoms as lower back and knee soreness and pain, weakness in the joints and sinews, tinnitus, dizziness, forgetfulness, loss of hearing, clear vaginal discharge, amenorrhea or scanty menstrual flow.

- Soreness and weakness of joints: combine *Rou Cong Rong* with *Xu Duan* (Radix Dipsaci) and *Lu Rong* (Cornu Cervi Pantotrichum).

2. Moistens the Large Intestine and Facilitates the Passage of Stools

Constipation due to dryness: Chronic constipation may arise from a variety of causes, such as sudden loss of a large amount of blood, excessive perspiration, overuse of diuretic products, or simply as a result of chronic illnesses. Though *Rou Cong Rong* is warm, it is not drying. In fact, it moistens the Large Intestine and promotes bowel movement. It is best for constipation caused by yang deficiency with fluid deficiency and dryness.

- Constipation: combine it with *Huo Ma Ren* (Fructus Cannabis) and *Hei Zhi Ma* (Semen Sesami Nigrum).

DOSAGE

10 to 20 grams. The recommended dosage for *Rou Cong Rong* is relatively high, as small dosages usually do not show any immediate effect. *Rou Cong Rong* is usually fried with salt or steamed with grain-based liquor to direct the herb to the Kidney and enhance its effect to treat impotence, low back pain, and infertility.

CAUTIONS / CONTRAINDICATIONS

- *Rou Cong Rong* is contraindicated in patients with diarrhea or constipation from excess heat.
- Use of this herb is contraindicated in Kidney yin-deficient patients, or those who are easily aroused sexually but experience premature ejaculation.

CHEMICAL COMPOSITION

β-sitosterol, succinic acid, caffeic acid, amino acids, potassium, sodium, calcium, magnesium, iron, and zinc.[1]

PHARMACOLOGICAL EFFECTS

- **Immunostimulant:** Administration of water extract of *Rou Cong Rong* at the dosage of 50 to 100 mg/kg is associated with an increase in weight of the spleen, and increased phagocytic activities by the macrophages.[2]
- **Endocrine:** *Rou Cong Rong* has a stimulating effect on the endocrine system to increase secretion by the hypothalamus, pituitary gland, and reproductive organs.[3]

Rou Cong Rong (Herba Cistanches)

- **Gastrointestinal:** It increases peristalsis of the intestines, decreases absorption of water in the large intestine, and relieves constipation.[4]

HERB-DRUG INTERACTION

- **General:** *Rou Cong Rong* increases the activities of neurotransmitters, such as norepinephrine, dopamine and serotonin in the hypothalamus, and may interact with drugs such as sympathomimetics, monoamine oxidase inhibitors, selective serotonin reuptake inhibitors, and tricyclic antidepressants.[5]

AUTHORS' COMMENTS

Rou Cong Rong is a good Kidney yang tonic as it does not have the stagnating properties seen in other tonics. A large dose of it is usually combined with lamb to treat various signs of Kidney yang deficiency.

Rou Cong Rong has an effect similar to that of *Suo Yang* (Herba Cynomorii). *Rou Cong Rong* nourishes yang, *jing* (essence), and blood. *Suo Yang* similarly provides these functions, but more strongly as a yang tonic, less so as a *jing* and blood tonic. These herbs serve as a complementary team to treat the signs and symptoms associated with Kidney yang deficiency with *jing* depletion.

Suo Yang (Herba Cynomorii)

鎖陽　锁阳

Pinyin Name: *Suo Yang*
Literal Name: "lock yang," "yang locker"
Original Source: *Ben Cao Gang Mu Shi Yi* (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765
English Name: cynomorium, songaria cynomorium
Botanical Name: *Cynomorium songaricum* Rupr. (*Suo Yang*)
Pharmaceutical Name: Herba Cynomorii
Properties: sweet, warm
Channels Entered: Liver, Kidney, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Kidney Yang

Impotence, infertility: Kidney *jing* (essence) deficiency, unable to support yang, causes impotence, amenorrhea and infertility. *Suo Yang* (Herba Cynomorii) nourishes Liver yin and warms Kidney yang. It more strongly assists yang and mildly nourishes *jing* and blood.

- Nocturnal emissions, impotence: use *Suo Yang* with *Rou Cong Rong* (Herba Cistanches), *Fu Ling* (Poria) and *Sang Piao Xiao* (Ootheca Mantidis) with honey.
- Soreness and weakness of the back and knees: combine it with *Shu Di Huang* (Radix Rehmanniae Preparata) and *Gui Ban* (Plastrum Testudinis). **Exemplar Formula:** *Hu Qian Wan* (Hidden Tiger Pill from the Analytic Collection).

Suo Yang (Herba Cynomorii)

2. Lubricates Intestines and Promotes Bowel Movement

Constipation due to dryness: Lack of nourishment to the intestines causes constipation or dry stools. *Suo Yang*, when used in large quantities over a prolonged period of time, moistens the intestines.

- Constipation: use *Suo Yang* with honey or with *Sang Shen Zi* (Fructus Mori).

DOSAGE

10 to 15 grams in decoction or pill form.

CAUTIONS / CONTRAINDICATIONS

- *Suo Yang* is contraindicated in patients with diarrhea caused by Spleen deficiency or constipation from excess heat.
- It is contraindicated in yin-deficient patients who are easily aroused sexually.

CHEMICAL COMPOSITION

Essential oils (ethylacetate, acetic acid, pyridine, n-hexanal, 2-furaldehyde, 2-furanacabinol, 2-heptanone, n-heptanal, 2,3,5-trimethyl-pyrazine, 2-ethyl-hexanol, tetramethyl-pyrazine, n-nonanol, methyl-n-nonanoate, ethyl-nonanoate, tetradecanoic acid, methyl hexadecanoate, methyl hexadecanoate, 2,6-diethyl-methyl-pyrarine, palmitic acid, 9-octadecenoic acid), β-sitosterol, ursolic acid, daucosterol, gallic acid, protocatechuic acid, catechin, and other inorganic components.[1,2]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Oral administration of water extract of *Suo Yang* at 12.5 g/kg regulated bowel movement in mice. The initial onset of action is 20 minutes after ingestion.[3]
- **Immunostimulant:** Oral administration of alcohol extract of *Suo Yang* at 0.5 g/kg/day for 7 days increased the phagocytic activity of the macrophages in mice.[4]

Ba Ji Tian (Radix Morindae Officinalis)

巴戟天

Pinyin Name: *Ba Ji Tian*
Alternate Chinese Names: *Ba Ji*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: morinda, medicinal Indian mulberry root
Botanical Name: *Morinda officinalis* How. (*Ba Ji Tian*)
Pharmaceutical Name: Radix Morindae Officinalis
Properties: acrid, sweet, slightly warm
Channels Entered: Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney and Assists the Yang

Impotence, infertility: In men, the chief manifestations of Kidney yang deficiency are impotence, spermatorrhea, premature ejaculation and urinary incontinence. In women, Kidney yang deficiency manifests in deficiency

Ba Ji Tian (Radix Morindae Officinalis)

and cold signs such as infertility, blood clots during menstruation, dull lower abdominal pain and coldness. *Ba Ji Tian* (Radix Morindae Officinalis) has a milder yang-tonic effect than other herbs in this category. However, it tonifies blood and *jing* (essence) at the same time.

- Urinary incontinence: combine *Ba Ji Tian* with *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), *Sang Piao Xiao* (Ootheca Mantidis), *Tu Si Zi* (Semen Cuscutae), and salt water.
- Irregular menstruation, clear vaginal discharge and infertility: use this herb with *Rou Gui* (Cortex Cinnamomi), *Wu Zhu Yu* (Fructus Evodiae), *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), salt, and warm, grain-based liquor.
- Impotence: combine this herb with *Ren Shen* (Radix Ginseng), *Lu Rong* (Cornu Cervi Pantotrichum), *Shan Yao* (Rhizoma Dioscoreae) and *Yin Yang Huo* (Herba Epimedii).

2. Strengthens Sinews and Bones, Treats *Bi Zheng* (Painful Obstruction Syndrome)

***Bi zheng* caused by wind-cold-damp:** Bodily deficiency allows the pathogenic factors wind-cold-damp to invade the channels and collaterals of the body and obstruct the flow of qi and blood. Clinical manifestations include muscle spasms and cramps, joint pain, difficulty flexing the joints, back pain, and muscle atrophy.

- *Bi zheng*: combine *Ba Ji Tian* with *Niu Xi* (Radix Cyathulae seu Achyranthis), *Wu Jia Pi* (Cortex Acanthopanacis), and *Gui Xin* (Cortex Rasus Cinnamomi).

DOSAGE

10 to 15 grams in decoction. *Ba Ji Tian* is also used in medicinal tincture, and in pill or powder forms. The unprocessed herb is commonly used to warm the yang of the Kidney, Spleen and Stomach. Frying it with salt increases its warmth, but not its drying influence; thus, it more strongly tonifies the Kidney and strengthens the muscles and tendons. Long-term use of the salt-fried herb is also effective for treating premature ejaculation and incontinence caused by yang deficiency.

CAUTIONS / CONTRAINDICATIONS

- *Ba Ji Tian* should not be used as a single-herb remedy for patients with yin-deficient fire. It should be combined with yin, *jing* (essence) or blood tonics.
- This herb is contraindicated in patients with damp-heat.

CHEMICAL COMPOSITION

Morindin, monotropein, asperuloside tertraacetate, β-sitosterol, vitamin C.[1]

PHARMACOLOGICAL EFFECTS

- **General:** Administration of *Ba Ji Tian* is associated with an increase in body weight and an improvement in physical performance in mice, as measured by swimming endurance.[2]
- **Endocrine:** Administration of *Ba Ji Tian* is associated with an increase in the plasma levels of corticosteroids. The mechanism of this action is attributed to its stimulating effect on the pituitary gland and the adrenal cortex.[3]

TOXICOLOGY

No fatalities were reported in animal studies following oral ingestion of *Ba Ji Tian* decoction at the dosage of 250 g/kg.[4]

AUTHORS' COMMENTS

The yang-tonifying function of *Ba Ji Tian* is not as strong as that of *Yin Yang Huo* (Herba Epimedii) or *Lu Rong* (Cornu Cervi Pantotrichum). However, it also has a nourishing function to tonify *jing* (essence) and blood, which prevents other herbs from creating deficient fire in the body.

Yin Yang Huo (Herba Epimedii)

淫羊藿

Pinyin Name: *Yin Yang Huo*
Literal Name: "horny goat herb," "horny goat weed"
Alternate Chinese Names: *Xian Ling Pi, San Zhi Jiu Ye Cao, Qi Zhang Cao, Qian Lian Jin*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: epimedium, short-horned epimedium, sagittate epimedium, pubescent epimedium, Korean epimedium
Botanical Name: *Epimedium grandiflorum* Morr. (*Yin Yang Huo*); *Epimedium sagittatum* (Sieb. et Zucc.) Maxim. (*Jian Ye Yin Yang Huo*); *Epimedium pubescens* Maxim. (*Rou Mao Yin Yang Huo*); *Epimedium brevicornum* Maxim. (*Xin Ye Yin Yang Huo*); *Epimedium koreanum* Nakai (*Chao Xian Yin Yang Huo*)
Pharmaceutical Name: Herba Epimedii
Properties: acrid, sweet, warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney, Strengthens Yang and Increases Libido

Kidney yang deficiency: *Yin Yang Huo* (Herba Epimedii) primarily treats Kidney yang deficiency that manifests in sexual disorders such as impotence, lack of sexual desire, incomplete erection, premature ejaculation, spermatorrhea, low sperm count, soreness and weakness of the lower back and knees, and infertility. It also treats infertility in women arising from cold and deficiency of the Kidney. Patients with Kidney yang deficiency may also have Kidney yin or *jing* (essence) deficiencies. Therefore, it is advised that herbs that tonify *jing*, yin or blood be added to the overall formulation to achieve balance, as a pure Kidney yang-tonic formula may cause rising Kidney fire.

- Impotence: soak *Yin Yang Huo* in grain-based liquor for three days and drink the tincture.
- Kidney yang deficiency: combine this herb with *Shu Di Huang* (Radix Rehmanniae Preparata), *Gui Ban Jiao* (Gelatinum Plastrum Testudinis), and *Zi He Che* (Placenta Hominis).

2. Dispels Wind-Damp-Cold and Alleviates *Bi Zheng* (Painful Obstruction Syndrome)

Bi zheng: *Yin Yang Huo* treats *bi zheng* caused by wind-damp-cold attacking the channels and blocking the circulation of qi and yang to the extremities. Symptoms include pain and coldness of the limbs, numbness, and spasms and cramps of the tendons and muscles. If blood stagnation is prominent secondary to yang deficiency, severe cramps, convulsions, hemiplegia or facial paralysis may occur. Acrid, warm and dispersing in nature, *Yin Yang Huo* dispels wind-damp-cold from the channels and collaterals and promotes normal circulation of qi and blood to the extremities. This herb is also used for post-stroke patients in whom stiffness, numbness or paralysis indicate yang deficiency with stagnation in the channels.

- Wind-cold-damp *bi zheng*: combine *Yin Yang Huo* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Du Huo* (Radix Angelicae Pubescentis), and *Wu Jia Pi* (Cortex Acanthopanacis).
- Chronic numbness and pain of the extremities: soak the herb in grain-based liquor for at least four months, and drink a small amount of the tincture daily.
- Post-stroke hemiplegia: use it with *Du Huo* (Radix Angelicae Pubescentis), *Fang Feng* (Radix Saposhnikoviae), and *Wu Jia Pi* (Cortex Acanthopanacis).
- Myelanalosis or myelitis with weakness of lower extremities or lower-body paralysis, with urinary and bowel incontinence: add this herb to *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae), *Fu Ling* (Poria), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), *Ba Ji Tian* (Radix Morindae Officinalis), *Rou Cong Rong* (Herba Cistanches), *Chuan Niu Xi*

Yin Yang Huo (Herba Epimedii)

(Radix Cyathulae), *Xu Duan* (Radix Dipsaci) and *Du Zhong* (Cortex Eucommiae).

DOSAGE

10 to 15 grams in decoction. *Yin Yang Huo* is commonly used as herbal tincture, paste or pills. The unprocessed herb more strongly dispels wind and dampness and relieves *bi zheng* (painful obstruction syndrome). Frying the herb in oil (sesame or lamb oil) enhances its effect to tonify Kidney yang, and to treat impotence, premature ejaculation, and other sexual disorders.

CAUTIONS / CONTRAINDICATIONS

- Use *Yin Yang Huo* with caution in patients with yin-deficient fire.

CHEMICAL COMPOSITION

Icariine, des-o-methyicariine, β-anhydroicaritine, des-o-methy-β-anhydroicaritine, icarisid I, isoquercetin, icariin-3-o-d-rhamnoside, hyperin, sagittatosides A, B, C; epimedins A, B, C; wushanicariin.[1]

PHARMACOLOGICAL EFFECTS

- **Sexual and reproductive:** Administration of *Yin Yang Huo* increases sperm production, stimulates the sensory nerves, and increases sexual desire and activity. The leaves and root have the strongest therapeutic effect, followed by the fruit and stem. Other studies have shown *Yin Yang Huo* to increase the secretion of endogenous hormones, such as corticosterone, cortisol, and testosterone.[2,3]
- **Respiratory:** Preparation of *Yin Yang Huo* has shown marked antitussive, expectorant and antiasthmatic effects. The antitussive effect of the herb is attributed to its effect on the central nervous system.[4]
- **Antibiotic:** It has an inhibitory effect against *Staphylococcus albus*, *Staphylococcus aureus*, *Diplococcus pneumoniae*, and *Mycobacterium tuberculosis*.[5]
- **Cardiovascular:** Water and alcohol extracts of *Yin Yang Huo* have an antihypertensive effect, as demonstrated in rabbit, cat, rat and other animal studies. In rats with renal hypertension, *Yin Yang Huo* has an immediate antihypertensive effect, though the blood pressure rebounded upon discontinuation of the herb. The antihypertensive effect of *Yin Yang Huo* in cats was not reversed by injection of atropine.[6]
- **Antihyperlipidemic:** Rabbits with high plasma cholesterol levels were treated with 5 ml of decoction of *Yin Yang Huo* twice daily for 30 days. The study reported a decrease in cholesterol levels but an increase in triglyceride levels.[7]
- **Antidiabetic:** Extract of *Yin Yang Huo* given orally significantly lowered plasma glucose levels in rats, for up to 60 minutes.[8]
- **Anti-inflammatory:** A preparation of *Yin Yang Huo* injected subcutaneously decreased vascular permeability and decreased the extent of swelling and inflammation in rats.[9]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disease (CAD):** In one study, 130 patients with CAD were treated with 4 to 6 tablets of *Yin Yang Huo* (each tablet is equivalent to 2.7 grams of the dried herb) twice daily for 1 month, with marked symptomatic improvement.[10]
- **Neutropenia:** Administration of 15 grams of *Yin Yang Huo* given as tea for 30 to 45 days (three times daily for the first week, two times daily thereafter) has proven beneficial in treating patients with neutropenia. No other immune-enhancing agents or vitamins were given throughout the study. Out of 22 patients who enrolled in the study, 14 completed the study with 100% compliance. Of these 14 patients, 3 showed significant improvement, 4 showed marked improvement, 4 had some improvement, and 3 had no response. [11]
- **Chronic bronchitis:** In one study, 1,066 patients with chronic bronchitis were treated with pills of *Yin Yang Huo* with an overall effective rate of 74.6%. The rate of effectiveness was 86.8% for its antitussive function, 87.9% for its expectorant function, and 73.8% for its antiasthmatic function.[12]
- **Poliomyelitis:** Injection of *Yin Yang Huo* and *Sang Ji Sheng* (Herba Taxilli) was found to be effective in treating patients with acute onset and sequelae of poliomyelitis.[13]
- **Neurasthenia:** One report describes 228 patients with neurasthenia who were treated with three different preparations of *Yin Yang Huo*, with approximately 90% effectiveness in all three groups.[14]
- **Viral myocarditis:** Administration of 7 to 10 tablets of *Yin Yang Huo* (each tablet equivalent to 2.7 grams of the dried herb) given three times daily for 2 months showed beneficial effects in 36 patients with viral myocarditis.[15]

TOXICOLOGY

The LD_{50} for *Yin Yang Huo* extract in mice was 36 g/kg via intraperitoneal injection, and 56.8 g/kg via intravenous injection. Oral ingestion of *Yin Yang Huo* at the dosage of 450 g/kg for 3 days showed no abnormal effects. Symptoms of overdose included dilation of pupils, increased physical movement, mild spasms and cramps, and in severe cases, respiratory depression.[16,17]

AUTHORS' COMMENTS

Sexual disorders often involve both Kidney yin and yang deficiencies. When tonifying Kidney yang, one must also include yin-tonic herbs to balance the formula, thereby

Yin Yang Huo (Herba Epimedii)

avoiding the unwanted buildup of heat from the yang-tonic herbs. In addition, *Yin Yang Huo* is not recommended for long-term use as it may damage yin.

For impotence, *Yin Yang Huo* is often made into medicinal tincture by soaking it in a grain-based liquor with other herbs such as *Shan Zhu Yu* (Fructus Corni), *Xiao Mai* (Fructus Tritici), *Shu Di Huang* (Radix Rehmanniae Preparata), *Rou Cong Rong* (Herba Cistanches), *Gou Qi Zi* (Fructus Lycii), *Ba Ji Tian* (Radix Morindae Officinalis) and *Yang Qi Shi* (Actinolitum). It can also be prepared in pill form.

Xian Mao (Rhizoma Curculiginis)

仙茅 仙茅

Pinyin Name: *Xian Mao*
Literal Name: "immortal grass"
Original Source: *Hai Yao Ben Cao* (Materia Medica of Herbs from [Across the] Seas) by Li Xun in 907-960 A.D.
English Name: curculigo, common curculigo rhizome
Botanical Name: *Curculigo orchioides* Gaertz. (*Xian Mao*)
Pharmaceutical Name: Rhizoma Curculiginis
Properties: acrid, hot
Channels Entered: Kidney
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Warms the Kidney and Fortifies Yang

Kidney yang deficiency: *Xian Mao* (Rhizoma Curculiginis) is one of the most potent Kidney yang-tonic herbs. It treats urinary incontinence, polyuria, impotence and spermatorrhea in men. In women, manifestations of Kidney yang deficiency are irregular menstruation and infertility.

- Impotence: combine *Xian Mao* with *Yin Yang Huo* (Herba Epimedii), and *Ba Ji Tian* (Radix Morindae Officinalis), in grain-based liquor.
- Polyuria, tinnitus or loss of hearing: combine this herb with *Jin Ying Zi* (Fructus Rosae Laevigatae).
- Spleen and Kidney yang deficiencies with epigastric fullness and pain, poor appetite, and vomiting of clear fluids: add *Xian Mao* to *Sha Ren* (Fructus Amomi), *Wu Zhu Yu* (Fructus Evodiae), *Mu Xiang* (Radix Aucklandiae), and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).

Xian Mao (Rhizoma Curculiginis)

- Urinary incontinence and frequent urination: use *Xian Mao* as a single herb.
- Irregular menstruation or hypertension during menopause: use it with *Yin Yang Huo* (Herba Epimedii), *Dang Gui* (Radicis Angelicae Sinensis) and *Zhi Mu* (Radix Anemarrhenae).
- Epigastric coldness with acid regurgitation and poor appetite: use this herb with *Sha Ren* (Fructus Amomi), *Wu Zhu Yu* (Fructus Evodiae), *Mu Xiang* (Radix Aucklandiae) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).

2. Dispels Cold and Damp, Treats *Bi Zheng* (Painful Obstruction Syndrome)

Bi zheng: Arthritis, pain, numbness and stiffness frequently occur as a result of constitutional deficiency of Kidney yang complicated by invasion of cold and damp obstructing the channels. *Xian Mao* strengthens the bones and dispels cold and damp from the channels to relieve pain.

- Feelings of weakness in the bones and sinews, and/or lower back and knee pain: combine *Xian Mao* with *Xu Duan* (Radix Dipsaci), *Du Zhong* (Cortex Eucommiae), *Yin Yang Huo* (Herba Epimedii), and *Wu Jia Pi* (Cortex Acanthopanacis). *Cao Wu* (Radix Aconiti Kusnezoffii) or *Chuan Wu* (Radix Aconiti Preparata) may be added to the formulation to dispel cold.

DOSAGE

3 to 10 grams in decoction. *Xian Mao* is also used as medicinal tincture, pills or powder.

CAUTIONS / CONTRAINDICATIONS

- *Xian Mao* is contraindicated in patients with yin-deficient fire or excess heat syndromes. *Xian Mao* is toxic and hot, and is not recommended for long-term use.
- Use of *Xian Mao* may be associated with side effects such as numbness or swelling of the tongue, which can be relieved by taking *Da Huang* (Radix et Rhizoma Rhei) or *Huang Qin* (Radix Scutellariae).

CHEMICAL COMPOSITION

Lycorine, yuccagenin, β-sitosterol, curculigoside, corchioside A, curculigoside B, curculigine A,B,C; orcinol glucoside.[1]

PHARMACOLOGICAL EFFECTS

- **Immunostimulant:** Administration of a 70% alcohol extract of *Xian Mao* once daily for 7 days increased the phagocytic activity of the macrophages in mice.[2]
- **CNS suppressant:** Intraperitoneal injection of alcohol extract of *Xian Mao* at 10 g/kg prolonged the sleeping time induced by phenobarbital at 40 mg/kg in mice.[3]
- **Reproductive:** *Xian Mao* stimulates the reproductive system to increase the weight of the ovaries and uterus in female mice,[4] and the weight of the testicles in male rats.[5]

TOXICOLOGY

Xian Mao has relatively low toxicity. No fatalities were observed with a loading dose of 150 g/kg via the oral route in mice.[6]

Yang Qi Shi (Actinolitum)

陽起石 阳起石

Pinyin Name: *Yang Qi Shi*
Literal Name: "yang rising stone"
Alternate Chinese Names: *Bai Shi, Shi Sheng, Tou Shan Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: actinolite
Pharmaceutical Name: Actinolitum
Properties: salty, slightly warm
Channels Entered: Kidney

CHINESE THERAPEUTIC ACTIONS

Warms the Kidney and Fortifies Yang

Impotence, female infertility due to Kidney yang deficiency: *Yang Qi Shi* (Actinolitum) most often treats impotence caused by Kidney yang deficiency. Other symptoms include spermatorrhea, loose stools, soreness of the lower back and knees, premature ejaculation and coldness of the extremities. In women, Kidney yang deficiency manifests as infertility or lack of sexual desire.

- Kidney yang deficiency in men: combine *Yang Qi Shi* with *Lu Rong* (Cornu Cervi Pantotrichum) and *Tu Si Zi* (Semen Cuscutae).
- Infertility in women: add this substance to *Wu Zhu Yu* (Fructus Evodiae), *Gan Jiang* (Rhizoma Zingiberis), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Huai Niu Xi* (Radix Achyranthis Bidentatae).

DOSAGE

3 to 6 grams in pill form. *Yang Qi Shi* should be calcined to facilitate the crushing and extraction of active constituents.

CAUTIONS / CONTRAINDICATIONS

- *Yang Qi Shi* is not suitable for long-term use.
- *Yang Qi Shi* is contraindicated for patients with yin-deficient heat.

CHEMICAL COMPOSITION

Actinolite.[1]

1. *Zhong Yao Xue* (Chinese Herbology), 1998; 814-815

Hai Gou Shen (Testes et Penis Otariae)

海狗腎 海狗肾

Pinyin Name: *Hai Gou Shen*
Literal Name: "sea dog kidneys"
Alternate Chinese Names: *Hai Gou Bian*
English Name: male seal sexual organs, testes and penis of an ursine seal
Zoological Name: *Callorhinus ursinus* L.; *Phoca vitulina* (L.)
Pharmaceutical Name: Testes et Penis Otariae
Properties: salty, hot
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

Tonifies Kidney Yang and *Jing* (Essence)

Hai Gou Shen (Testes et Penis Otariae) treats Kidney yang and *jing* deficiencies that manifest as impotence, low sexual drive, intolerance to cold and cold extremities.

- Impotence: combine *Hai Gou Shen* with *Lu Rong* (Cornu Cervi Pantotrichum) and *Yin Yang Huo* (Herba Epimedii).
- Decreased sexual drive: use it with *Dong Chong Xia Cao* (Cordyceps).

DOSAGE

3 to 15 grams. Due to the unpleasant taste, *Hai Gou Shen* is usually taken as a powder.

CAUTIONS / CONTRAINDICATIONS

- Use of *Hai Gou Shen* is contraindicated for patients with yin-deficient fire.

AUTHORS' COMMENTS

The sex organs of deer and other animals are useful as replacements for the tonic functions served by seal testicles and penis.

Hai Shen (Strichopus Japonicus)

海參 海参

Pinyin Name: *Hai Shen*
Literal Name: "sea root"
English Name: sea cucumber, sea slug, trepang
Zoological Name: *Strichopus japonicus* Selenka
Pharmaceutical Name: Strichopus Japonicus
Properties: sweet, salty, warm
Channels Entered: Heart, Kidney

Hai Shen (Strichopus Japonicus)

CHINESE THERAPEUTIC ACTIONS

Tonifies Kidney Yang and *Jing* (Essence)

Hai Shen (Strichopus Japonicus) treats Kidney yang and *jing* deficiencies that manifest as impotence, nocturnal emissions and frequent urination.

DOSAGE

30 to 60 grams. *Hai Shen* is most commonly used as food.

CHEMICAL COMPOSITION

Acid mucopoly saccharide (SJAMO), holotoxin, holothurin, holothrin A, echinoside, stichoposides.[1]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 1274

Hai Long (Syngnathus)

海龍 海龙

Pinyin Name: *Hai Long*
Literal Name: "sea dragon"
English Name: pipe fish
Zoological Name: *Syngnathus acus* L.; *Solenognathus hardwickii* (Gray); *Syngnathoides biaculeatus* (Bloch)
Pharmaceutical Name: Syngnathus
Properties: sweet, salty, slightly warm
Channels Entered: Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney and Fortifies Yang

Hai Long (Syngnathus) treats Kidney yang deficiency that manifests as impotence and debility, especially in the elderly.

2. Reduces Swelling and Dissipates Nodules

Hai Long treats scrofula by reducing the size and swelling of the nodules.

DOSAGE

3 to 9 grams in decoctions; 1.5 to 2.4 grams in pills or powder.

CHEMICAL COMPOSITION

Protein, cholesterol, palmitic acid, stearic acid, calcium, magnesium, sodium, phosphorus.[1]

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 1281

Hai Ma (Hippocampus)

海馬 海马

Pinyin Name: *Hai Ma*
Literal Name: "sea horse"
Alternate Chinese Names: *Shui Ma*
English Name: sea horse
Zoological Name: *Hippocampus kelloggi* Jordan et Snyder H. histrix Kaup; *Hippocampus trimacullatus* Leach
Pharmaceutical Name: Hippocampus
Properties: sweet, salty, warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney and Fortifies Yang

Hai Ma (Hippocampus) treats Kidney yang deficiency patterns of impotence, urinary incontinence, chronic wheezing, and debility in the elderly.

2. Invigorates the Blood

Hai Ma treats abdominal masses by invigorating blood circulation.

DOSAGE

3 to 9 grams. *Hai Ma* is often steeped in grain-based liquor.

CAUTIONS / CONTRAINDICATIONS

- *Hai Ma* should be used with caution during pregnancy, and for patients with yin-deficient fire.

CHEMICAL COMPOSITION

Glutamic acid, glycine, arginine, sodium, potassium, magnesium calcium, iron.[1]

PHARMACOLOGICAL EFFECTS

- **Reproductive:** In female mice, administration of *Hai Ma* is associated with a prolonged estrus period and an increase in weight of the uterus and ovaries. In male mice, administration of *Hai Ma* is associated with an androgenic effect on the prostate gland and the testes. Compared to other herbs, *Hai Ma* is stronger than *Ge Jie* (Gecko), but weaker than *She Chuang Zi* (Fructus Cnidii) and *Yin Yang Huo* (Herba Epimedii) for exerting stimulating effects on the reproductive organs.[2]
- **Adaptogenic:** According to animal studies, administration of *Hai Ma* improves both mental and physical performance. It has been shown to increase swimming time in mice and to improve memory in other animals.[3]

CLINICAL STUDIES AND RESEARCH

- **Impotence:** In a clinical trial, 107 patients with impotence were treated with herbal tincture daily for 2 months, with an overall rate of effectiveness of 83.2%. The herbal tincture was prepared by soaking *Hai Ma*, *Ge Jie* (Gecko), *Lu Rong* (Cornu Cervi Pantotrichum), *Hai Shen* (Strichopus Japonicus), *Gou Qi Zi* (Fructus Lycii), *Yin Yang Huo* (Herba Epimedii) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) in grain-based liquor for 7 days prior to consumption. The treatment protocol was to administer 35 grams of tincture daily, before bedtime.[4]

Du Zhong (Cortex Eucommiae)

杜仲

Pinyin Name: *Du Zhong*
Alternate Chinese Names: *Bei Zhong, Si Mian Pi, Yu Zi Pi, Mu Mian*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: eucommia bark
Botanical Name: *Eucommia ulmoides* Oliv. (*Du Zhong*)
Pharmaceutical Name: Cortex Eucommiae
Properties: sweet, warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney, Strengthens Bones and Sinews

Back pain due to Kidney deficiency: Deficient blood and *jing* (essence) of the Kidney and Liver often result in weakness and soreness of the lower back and knees. *Du Zhong* (Cortex Eucommiae) nourishes the Liver to benefit the tendons and sinews, and tonifies the Kidney to strengthen the bones. This herb can also be used for back pain and soreness during menstruation.

- Low back pain: fry *Du Zhong* with salt to guide it to the Kidney channel. Use it alone or soak it in grain-based liquor with *Gou Qi Zi* (Fructus Lycii).
- Cold legs and intolerance to cold: combine this herb with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi) and *Yin Yang Huo* (Herba Epimedii).
- Low back pain during or after menstruation: add this herb to *Sang Ji Sheng* (Herba Taxilli), *Dang Gui* (Radicis Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Ligusticum Chuanxiong).
- Low back pain in the first three months of pregnancy, with a feeling of abdominal prolapse: use *Du Zhong* with *Sang Ji Sheng* (Herba Taxilli), *Xu Duan* (Radix Dipsaci), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Shao* (Radix Paeoniae Alba), *Su Geng* (Caulis Perillae), and *Dang Gui* (Radicis Angelicae Sinensis).
- Fractured or broken bones: pair this herb and *Xu Duan* (Radix Dipsaci) to promote healing of the bones.

2. Calms the Fetus

Restless fetus, bleeding or miscarriage: Liver and Kidney deficiencies cause restless fetus, bleeding or miscarriage. *Du Zhong* tonifies these two organs to stabilize the fetus and prevent miscarriage.

- Unstable pregnancy with restless fetus and bleeding, previous history of miscarriage in the first trimester: combine *Du Zhong* with *Da Zao* (Fructus Jujubae), *Xu Duan* (Radix Dipsaci), and *Shan Yao* (Rhizoma Dioscoreae).
- Continuous bleeding after miscarriage: combine charred *Du Zhong* with charred *Xu Duan* (Radix Dipsaci), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *E Jiao* (Colla Corii Asini) and *Ai Ye* (Folium Artemisiae Argyi).

3. Tonifies Kidney Yang

Du Zhong tonifies Kidney yang to treat reproductive and urinary disorders, such as impotence and incontinence.

- Impotence: incorporate *Du Zhong* with *Shan Zhu Yu* (Fructus Corni), *Xiao Hui Xiang* (Fructus Foeniculi) and *Che Qian Zi* (Semen Plantaginis).
- Urinary incontinence and dribbling of urine: use it with *Shan Zhu Yu* (Fructus Corni), *Xiao Hui Xiang* (Fructus Foeniculi), and *Che Qian Zi* (Semen Plantaginis).

4. Lowers Blood Pressure

Hypertension: *Du Zhong* has been used recently to treat hypertension with good success. It may be used alone, or in combination with *Huang Qin* (Radix Scutellariae) and *Xia Ku Cao* (Spica Prunellae) in decoction.

DOSAGE

10 to 15 grams in decoction or in pills. Dry-fried *Du Zhong* is more potent than the unprocessed form. Frying it with salt enhances its effect to tonify the Liver and Kidney by increasing the extraction of active components (by as much as 100%). Salt-fried *Du Zhong* is the preferred form to treat low back pain, spontaneous emission, and unstable pregnancy.

Du Zhong (Cortex Eucommiae)

CAUTIONS / CONTRAINDICATIONS

- Use *Du Zhong* with caution in cases of yin-deficient fire.

CHEMICAL COMPOSITION

Pinoresinol, gutta-percha, eucommioside I, eucommiol, ulmoprenol, eucommioside, alkaloids, proteins, amino acid, organic acid, vitamins, microelements.[1]

PHARMACOLOGICAL EFFECTS

- **Sedative:** *Du Zhong* has a sedative effect on the central nervous system. Administration of *Du Zhong* significantly reduced spontaneous physical activity in mice, compared to administration of normal saline.[2]
- **Immunostimulant:** Decoction of *Du Zhong* at the dosage of 12 g/kg increased the phagocytic activity of the macrophages in mice. Similar impact was observed using the bark, leaves, or twigs.[3]
- **Anti-inflammatory:** *Du Zhong* has demonstrated marked anti-inflammatory effects in rats. The mechanism of this effect is attributed to its stimulating effect on the endocrine system and consequent secretion of steroids from the adrenal cortex. The bark and leaves are stronger than the twigs for this action.[4]
- **Antihypertensive:** Administration of *Du Zhong* in various preparations significantly reduces blood pressure in anesthetized rabbits and dogs. Water extract was found to be stronger than alcohol extract. Dry-fried *Du Zhong* was determined to be more effective than the unprocessed herb. Tolerance was noted when *Du Zhong* was repeatedly injected intravenously within a short period of time. The mechanism of the action to reduce blood pressure was attributed to dilation of blood vessels.[5]
- **Uterine relaxant:** Administration of *Du Zhong* blocks stimulation and contraction of the uterus in a dose-dependant fashion. The water and alcohol extracts are comparable in potency. However, salt-fried *Du Zhong* is more effective than the unprocessed herb.[6]
- **Adaptogenic:** Administration of *Du Zhong* significantly prolonged swimming time in mice. The leaves, however, did not exhibit a statistically significant influence.[7]
- **Antibiotic:** Decoction of *Du Zhong* shows inhibitory influence on *Staphylococcus aureus*, *Bacillus dysenteriae*, *Pseudomonas aeruginosa*, *Bacillus anthracis*, *Diplococcus pneumoniae*, and β-hemolytic streptococcus.[8]

CLINICAL STUDIES AND RESEARCH

- **Hypertension:** In one study, 251 hypertensive patients were divided into two groups, with group one receiving *Du Zhong* and group two receiving *Du Zhong Ye* (Folium Eucommiae). The dosage of *Du Zhong Ye* was three times greater than *Du Zhong*. All other ingredients in the formula were the same. All patients received herbs three times daily for 30 days. Out of 104 patients who received *Du Zhong*, 44 showed significant improvement, 36 showed moderate improvement, and 24 showed no response (an overall rate of 76.9% effectiveness). Out of 147 patients that received *Du Zhong Ye*, 81 showed significant improvement, 44 showed moderate improvement, and 22 showed no response (an overall rate of 85% effectiveness).[9]
- **Sciatica:** Six patients with sciatica were successfully treated with an herbal formula one time each day for 7 to 10 doses. The treatment protocol was to cook 30 grams of *Du Zhong* with a pair of pig kidneys for half an hour, filter out the herbs and serve the soup and kidneys.[10]

TOXICOLOGY

No fatalities were reported in mice that received 500 g/kg of *Du Zhong* via intraperitoneal injection once daily for 6 days. Intraperitoneal injection of *Du Zhong* at 600 mg/kg led to decreased physical activity for 2 hours, with no long-term effect. The LD_{50} for intravenous injection of *Du Zhong* in mice is 574.1 g/kg.[11]

SUPPLEMENT

- 杜仲葉 / 杜仲叶 *Du Zhong Ye* (Folium Eucommiae) is derived from the leaves of the same plant as *Du Zhong*. Laboratory analysis has confirmed that *Du Zhong* and *Du Zhong Ye* have essentially the same constituents. Therefore, *Du Zhong Ye* is now used as an acceptable substitute for *Du Zhong*.

AUTHORS' COMMENTS

Du Zhong and *Xu Duan* (Radix Dipsaci) both tonify the Liver and Kidney, strengthen sinews and bones, calm restless fetus, stop uterine bleeding and treat weakness, soreness and pain in the lower back and knees. *Du Zhong* more strongly tonifies the Liver and Kidney, and thus is used more for low back pain, impotence, polyuria and dizziness. *Xu Duan* is less strengthening, but more effectively invigorates the flow of blood in the channels and collaterals. It is used for the pain of trauma, fractured or broken bones, *bi zheng* (painful obstruction syndrome), and sores.

Du Zhong and *Gou Ji* (Rhizoma Cibotii) both warm and tonify the Kidney and Liver to treat lower back and knee soreness and pain, impotence and polyuria. *Du Zhong* is warmer, and calms the fetus, while *Gou Ji* more effectively treats *bi zheng* (painful obstruction syndrome).

Warm and drying in nature, *Du Zhong* is sometimes combined with *Shu Di Huang* (Radix Rehmanniae Preparata) to reduce the stagnant, cloying side effects of *Shu Di Huang*.

Du Zhong has recently been successfully used to treat hypertension. The mechanism of its antihypertensive effect is attributed to dilation of the blood vessels. Dry-

fried *Du Zhong* is the most potent for this function. Salt-fried *Du Zhong* should be avoided since salt may cause retention of water. If heat signs are prominent, *Huang Qin* (Radix Scutellariae) and *Xia Ku Cao* (Spica Prunellae) can be added.

There are four herbs that are commonly used to stabilize pregnancy:

- *Du Zhong* (Cortex Eucommiae) is most suitable to treat restless fetus caused by deficiency of the Kidney and Liver.
- *Sha Ren* (Fructus Amomi) regulates qi and calms restless fetus in the presence of qi stagnation and middle *jiao* deficiency.
- *Huang Qin* (Radix Scutellariae) calms restless fetus caused by heat.
- *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) treats restless fetus from Spleen qi deficiency.

Xu Duan (Radix Dipsaci)

續斷　续断

Pinyin Name: *Xu Duan*
Literal Name: "restore what is broken," "restore the broken," "reconnect broken parts"
Alternate Chinese Names: *Chuan Duan, Jie Gu Cao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: dipsacus, Himalayan teasel root
Botanical Name: *Dipsacus asper* Wall. (*Chuan Xu Duan*)
Pharmaceutical Name: Radix Dipsaci
Properties: bitter, sweet, acrid, slightly warm
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney

Liver and Kidney deficiencies: Liver and Kidney deficiencies are characterized by inability to nourish muscles and tendons, resulting in aches and pains in the lower extremities. Furthermore, deficiency of Kidney yang leads to compromised ability of the organ to contain body fluids, leading to symptoms such as polyuria and spermatorrhea. Clinically, *Xu Duan* (Radix Dipsaci) tonifies the Liver and Kidney to treat musculoskeletal and genitourinary disorders.

- Lower back and knee soreness and pain: combine *Xu Duan* with *Du Zhong* (Cortex Eucommiae), *Niu Xi* (Radix Cyathulae seu Achyranthis), *Gou Ji* (Rhizoma Cibotii), *Sheng Di Huang* (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Tu Si Zi* (Semen Cuscutae).
- Polyuria, spermatorrhea: use *Xu Duan* as a single-herb remedy.

Xu Duan (Radix Dipsaci)

2. Calms the Fetus and Stops Uterine Bleeding

Restless fetus, habitual miscarriage, or uterine bleeding during pregnancy: These conditions often occur because of Liver and Kidney deficiencies and instability of the *ren* (conception) and *chong* (thoroughfare) channels.

- Uterine bleeding from Kidney deficiency: combine *Xu Duan* with *Tu Si Zi* (Semen Cuscutae), *E Jiao* (Colla Corii Asini), and *Sang Ji Sheng* (Herba Taxilli).
- Unstable pregnancy due to Kidney deficiency: use it with *Du Zhong* (Cortex Eucommiae).
- Restless fetus or habitual miscarriage in the first trimester, with uterine bleeding and severe low back pain: combine *Xu Duan* with *Du Zhong* (Cortex Eucommiae), *Da Zao* (Fructus Jujubae) and rice.

3. Invigorates Blood Circulation and Strengthens Tendons and Bones

Trauma, fractures, sprains and strains: Trauma causes fractured bones, damage to the tendons, and blood stagnation in the channels and collaterals, resulting in redness, swelling and pain. When blood stagnation is not resolved, swelling, pain and inflammation will not decrease. *Xu Duan* invigorates blood, strengthens tendons and bones, and alleviates pain. It promotes the growth of bones and flesh to aid in recovery. It is one of the most commonly used herbs in the trauma departments of hospitals in China.

- Traumatic injuries with severe pain, swelling, or broken bones: mix *Xu Duan*, *Gu Sui Bu* (Rhizoma Drynariae), *Dang Gui* (Radicis Angelicae Sinensis) and *Da Huang* (Radix et Rhizoma Rhei) powder with grain-based liquor and apply topically to the injury.
- Traumatic injuries: combine *Xu Duan* with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *San Qi* (Radix Notoginseng), *Du Zhong* (Cortex Eucommiae), *Niu Xi* (Radix Cyathulae seu Achyranthis), and *Gu Sui Bu* (Rhizoma Drynariae) to make a decoction.

4. Reduces Swelling, Abscess and Sores

Abscess and sores: *Xu Duan* dredges the channels and collaterals and reduces swelling and pain. It is often used with heat-clearing, toxins-eliminating herbs such as *Pu Gong Ying* (Herba Taraxaci) to treat toxic abscesses and sores.

- Breast abscesses: use this herb with *Pu Gong Ying* (Herba Taraxaci) and apply topically.

DOSAGE

10 to 20 grams in decoction. Use up to 30 grams of *Xu Duan* in severe cases. The dry-fried herb has a stronger function to stop uterine bleeding. *Xu Duan* is also used in powder or pill form.

CHEMICAL COMPOSITION

β-sitosterol, hederagenin, ursol aldehyde, ursolic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Effect on nutritional deficiency:** *Xu Duan* has had beneficial effects on mice with vitamin E deficiency.[2]

TOXICOLOGY

Use of *Xu Duan* has been associated with 3 cases of severe skin allergy, characterized by redness, itching, and burning sensations.[3,4]

AUTHORS' COMMENTS

Xu Duan and *Du Zhong* (Cortex Eucommiae) both tonify the Liver and Kidney, strengthen sinews and bones, calm restless fetus, stop uterine bleeding and are used for weakness, soreness and pain in the lower back and knees. *Xu Duan* is milder in tonification but stronger in invigorating the flow of blood in the channels and collaterals. It alleviates pain of trauma, fractured or broken bones, *bi zheng* (painful obstruction syndrome), and sores. *Du Zhong* has a stronger Liver and Kidney tonifying function and thus is used more for low back pain, impotence, polyuria and dizziness.

Gu Sui Bu (Rhizoma Drynariae)

骨碎補 骨碎补

Pinyin Name: *Gu Sui Bu*
Literal Name: "mender of shattered bones," "bone fracture remedy"
Alternate Chinese Names: *Hou Jiang, Hu Sun Jiang, Kun Jiang, Shen Jiang, Mao Jiang*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: drynaria
Botanical Name: *Drynaria fortunei* (Kunze) J. Sm. (*Hu Jue*)
Pharmaceutical Name: Rhizoma Drynariae
Properties: bitter, warm
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney and Strengthens the Bones

Kidney deficiency: *Gui Sui Bu* (Rhizoma Drynariae) treats Kidney deficiency symptoms such as loose teeth, soreness and weakness of the bones (especially of the back and knees), tinnitus or loss of hearing, frequent urination and diarrhea.

- Low back and knee pain: combine this herb with *Niu Xi* (Radix Cyathulae seu Achyranthis), *Bu Gu Zhi* (Fructus Psoraleae), and *Gui Xin* (Cortex Rasus Cinnamomi).
- Toothache, bleeding gums or loose teeth: use fresh *Gu Sui Bu* individually. It may be used in decoction, or the powder may be used to brush the teeth.
- Tinnitus, deafness, gradual loosening of teeth: use this herb with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis).

2. Tonifies the Kidney and Benefits the Ears

The Kidney opens to the ears; thus, tonifying the Kidney directly benefits auditory functioning.

- Tinnitus or loss of hearing: combine *Gui Sui Bu* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis).

3. Promotes Mending of Bones and Relieves Pain

Trauma, fractures, sprains and strains: *Gu Sui Bu* dispels blood stasis, relieves swelling, and stops pain and bleeding. It is an essential herb when treating fractured or broken bones or other injuries such as traumatic contusions, sprains and ligament damage. It also promotes healing after surgery.

- Traumatic injuries with fractured bones, post-surgical recovery: add this herb to *Xu Duan*, *Zi Ran Tong* (Pyritum), *Gui Ban* (Plastrum Testudinis) and *Mo Yao* (Myrrha). Serve the decoction with warm liquor.

DOSAGE

10 to 20 grams in decoction. *Gui Sui Bu* must be cleaned thoroughly and dry-fried to facilitate extraction of active components. To relieve pain, fresh *Gu Sui Bu* is mixed with alcohol and applied topically.

CAUTIONS / CONTRAINDICATIONS

- Use of *Gui Sui Bu* is contraindicated in yin-deficient patients with heat, or in those who have no blood stagnation.

OVERDOSAGE

Acute adverse reaction has been reported following an overdose of *Gu Sui Bu* (250 grams in 2 days). Reactions included dry mouth, excessive speech, palpitations, fear, and chest oppression.[1]

CHEMICAL COMPOSITION

Naringin, naringenin, sugars.[2]

PHARMACOLOGICAL EFFECTS

- **Effect on calcium:** *Gu Sui Bu* increases bone absorption of calcium. It is commonly used to treat patients with bone fractures.[3]
- **Osteoarthritis:** Administration of *Gu Sui Bu* has demonstrated beneficial effects in 160 mice with osteoarthritis.[4]
- **Antihyperlipidemic:** It has preventative and therapeutic effects for high plasma cholesterol levels.[5]

Gu Sui Bu (Rhizoma Drynariae)

CLINICAL STUDIES AND RESEARCH

- **Warts:** Topical application of an herbal tincture was effective in treatment of warts. The tincture was prepared by soaking 9 grams of *Gu Sui Bu* powder in 100 ml of 95% alcohol for 3 days.[6]

HERB-DRUG INTERACTION

- **Kanamycin:** Concurrent administration of *Gu Sui Bu* and kanamycin has a preventative effect on drug-induced ototoxicity in mice. However, it did not reverse deafness once the damage had occurred.[7]
- **Streptomycin:** In one study, decoction of 30 grams of *Gu Sui Bu* was effective in treating 32 patients with tinnitus and numbness caused by streptomycin. In another study, 200 patients with adverse reactions to streptomycin were treated with *Gu Sui Bu* with an 89.6% rate of effectiveness.[8,9]

AUTHORS' COMMENTS

Gu Sui Bu and *Xu Duan* (Radix Dipsaci) both tonify the Liver and Kidney to strengthen tendons and bones, and invigorate blood circulation to treat traumatic injuries. They are an excellent pair to treat patients with bone fractures. They also prevent and treat osteoporosis by increasing bone mass density. *Gu Sui Bu* more strongly tonifies the Kidney to treat tinnitus, toothache, chronic diarrhea and loss of hearing. *Xu Duan* also treats restless fetus and stops bleeding.

Gou Ji (Rhizoma Cibotii)

狗脊

Pinyin Name: *Gou Ji*
Literal Name: "dog's spine"
Alternate Chinese Names: *Jin Mao Gou Ji, Fu Jin, Gou Qing, Chi Jie*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cibotium, east Asian tree fern rhizome, scythian lamb rhizome
Botanical Name: *Cibotium barometz* (L.) J. Sm. (*Jin Mao Gou Ji*)
Pharmaceutical Name: Rhizoma Cibotii
Properties: sweet, bitter, warm
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney, Strengthens Bones and Sinews

Back pain and stiffness from Kidney deficiency: *Gou Ji* (Rhizoma Cibotii) treats chronic Liver and Kidney deficiencies complicated by invasion of cold, dampness and wind. Clinically, the chief complaint is back and knee pain and weakness, with stiffness and an inability to lie down flat without experiencing pain.

- Back pain: combine *Gou Ji* with *Du Zhong* (Cortex

Gou Ji (Rhizoma Cibotii)

Eucommiae), *Xu Duan* (Radix Dipsaci), and *Shu Di Huang* (Radix Rehmanniae Preparata).

2. Dispels Wind-Dampness and Relieves *Bi Zheng* (Painful Obstruction Syndrome)

Bi zheng: *Gou Ji* relieves pain and stiffness caused by the invasion of pathogenic wind, damp and cold in individuals with deficient constitutions.

- Chronic low back pain with wind-cold-damp: combine *Gou Ji* with *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), *Hai Feng Teng* (Caulis Piperis Kadsurae), *Qin Jiao* (Radix Gentianae Macrophyllae), and *Du Huo* (Radix Angelicae Pubescentis).

3. Consolidates the *Jing* (Essence) and Prevents Leakage

Urinary incontinence, spermatorrhea, and profuse, clear vaginal discharge or hypermenorrhea: These leakage symptoms are associated with Kidney yang being unable to contain *jing*. *Gou Ji* has an astringent function to prevent leakage. It is a mild Kidney yang tonic and should always be used with other yang tonics.

- Urinary incontinence or continual dripping: combine *Gou Ji* with *Du Zhong* (Cortex Eucommiae), *Wu Jia Pi* (Cortex Acanthopanacis) and *Mu Gua* (Fructus Chaenomelis).
- Frequent urination: incorporate this herb with *Tu Si Zi* (Semen Cuscutae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Sang Piao Xiao* (Ootheca Mantidis).
- Profuse, clear vaginal discharge: add *Gou Ji* to *Bai Lian* (Radix Ampelopsis), *Ai Ye* (Folium Artemisiae Argyi), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Lu Rong* (Cornu Cervi Pantotrichum) and *Ji Guan Hua* (Flos Celosiae Cristatae). Serve with warm liquor.

DOSAGE

10 to 15 grams. Dry-frying *Gou Ji* will facilitate removal of its hair-like projections, and aid extraction of active components. The golden hair-like substance on *Gou Ji* can be used externally to stop bleeding.

CAUTIONS / CONTRAINDICATIONS

- *Gou Ji* is contraindicated in Kidney yin-deficient patients who show heat signs such as dysuria, scanty or dark yellow urine, or bitter and dry mouth.

CHEMICAL COMPOSITION

Onitin, starch, magnesium, calcium, potassium, aluminum.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** The hair-like parts of *Gou Ji* have an effect to stop bleeding.[2]

CLINICAL STUDIES AND RESEARCH

- **Tooth extraction:** In one study, 213 patients with post tooth-extraction bleeding were treated topically with good results using an herbal preparation containing *Gou Ji*.[3]

AUTHORS' COMMENTS

Gou Ji has a weak function to tonify Kidney yang to remedy sexual dysfunction. But, the strength of this herb is in treating pain associated with Kidney deficiency or invasion of wind-damp.

Hu Lu Ba (Semen Trigonellae)

胡蘆巴 胡芦巴

Pinyin Name: *Hu Lu Ba*
Alternate Chinese Names: *Lu Ba Zi*
Original Source: *Jia You Ben Cao* (Materia Medica of the Jia You Era) by Zhang Yu-Xi and Su Song in 1057-1060
English Name: fenugreek seed, common fenugreek seed
Botanical Name: *Trigonella foenum-graecum* L. (*Hu Lu Ba*)
Pharmaceutical Name: Semen Trigonellae
Properties: bitter, warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Warms Kidney Yang

Abdominal coldness and pain, hernial pain: Deficient Kidney yang decreases in its ability to warm the middle *jiao*, and leads to subsequent Spleen yang deficiency allowing accumulation of cold, with pain and qi stagnation. *Hu Lu Ba* (Semen Trigonellae) treats Kidney and Spleen yang deficiencies with symptoms such as abdominal coldness, fullness and bloating or hypochondriac pain. Hernial pain and cold sensations of the scrotum are the result of lack of warmth in the Liver channel.

- Kidney yang deficiency with coldness, characterized by abdominal and hypochondriac fullness and pain: combine *Hu Lu Ba* with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Wu Zhu Yu* (Fructus Evodiae).
- Severe hernial pain: add this herb to *Wu Zhu Yu* (Fructus Evodiae) and *Xiao Hui Xiang* (Fructus Foeniculi). Serve on an empty stomach with warm liquor.
- Gas in the intestines, colicky pain, feelings of genital prolapse: use it with *Wu Zhu Yu* (Fructus Evodiae), *Chuan Wu* (Radix Aconiti Preparata) and *Xiao Hui Xiang* (Fructus Foeniculi). Serve with grain-based liquor.

2. Dispels Damp-Cold and Relieves Pain

Leg *qi* due to damp-cold: Pain and cold sensations in the knees and feet are indications of cold-damp accumulation in the lower extremities, caused by Kidney yang deficiency and the inability to circulate qi and blood to the local area.

- Pain in the lower extremities: combine *Hu Lu Ba* with *Bu Gu Zhi* (Fructus Psoraleae) and *Mu Gua* (Fructus Chaenomelis).

DOSAGE

3 to 10 grams in decoction. *Hu Lu Ba* is also used in pill or powder form. Dry-frying the herb facilitates crushing and extraction of active constituents. Frying it with salt directs the function of the herb to the Kidney.

CAUTIONS / CONTRAINDICATIONS

- *Hu Lu Ba* is contraindicated in cases of yin-deficient fire or damp-heat.
- *Hu Lu Ba* should be used with caution during pregnancy, due to its emmenagogic effect.[1]

CHEMICAL COMPOSITION

Teigonelline, choline, diosgenin, yamogenin, tigogenin, neotigogenin, sitogenin, vitexin, saponaretin, vitexin-7-glucoside, orientin, isoorientin, vicenin 1, vicenin, cholesterol, 4-hydroxyisoleucin, galactomannan, laueic acid, carpaine.[2]

PHARMACOLOGICAL EFFECTS

- **Antidiabetic:** Galactomannan lowers blood glucose levels.[3]

CLINICAL STUDIES AND RESEARCH

- **Diabetes mellitus:** Daily ingestion of 25 grams of *Hu Lu Ba* for 21 days has been found to decrease the quantity of glucose in blood and urine.[4]

TOXICOLOGY

Carpaine has a sedative effect on the central nervous system. Overdose in mice is associated with respiratory depression and cardiac arrest.[5]

AUTHORS' COMMENTS

Hu Lu Ba, *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xian Mao* (Rhizoma Curculiginis) all warm Kidney yang and relieve pain. *Hu Lu Ba* is the mildest of the three.

Hu Lu Ba (Semen Trigonellae)

Bu Gu Zhi (Fructus Psoraleae)

補骨脂　补骨脂

Pinyin Name: *Bu Gu Zhi*
Literal Name: "tonify the bone fat," "tonify bone resin"
Alternate Chinese Names: *Po Gu Zi*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: psoralea fruit
Botanical Name: *Psoralea corylifolia* L. (*Bu Gu Zhi*)
Pharmaceutical Name: Fructus Psoraleae
Properties: bitter, acrid, very warm
Channels Entered: Kidney, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney and Fortifies Yang, Consolidates *Jing* (Essence) and Retains Urine

Impotence, spermatorrhea, urinary incontinence, frequent urination: Deficiency of yang and *jing* allows wind and cold to invade the Kidney. Signs and symptoms of these deficiencies include spermatorrhea, impotence, premature ejaculation, cold and painful lower back, feelings of cold in the genital region (scrotum), feelings of prolapse, and decreased mobility in the back. *Bu Gu Zhi* (Fructus Psoraleae) is acrid, thus it disperses wind; and is warm, so it fortifies yang.

- Impotence due to over-indulgence in sexual activity, feelings of heaviness of the extremities, night sweats: combine *Bu Gu Zhi* with *Tu Si Zi* (Semen Cuscutae), *Hu Tao Ren* (Semen Juglandis), and *Chen Xiang* (Lignum Aquilariae Resinatum). This formula should be taken regularly with a small amount of salt water or warm liquor for 3 to 6 months.
- Nocturnal polyuria in the elderly: use this herb alone, served with rice porridge.
- Urinary incontinence and polyuria: combine it with *Sang Piao Xiao* (Ootheca Mantidis), *Tu Si Zi* (Semen Cuscutae), *Wu Yao* (Radix Linderae) and *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae).
- Chronic urinary incontinence in adolescents or adults: combine *Bu Gu Zhi* with *Sang Piao Xiao* (Ootheca Mantidis), *Fu Pen Zi* (Fructus Rubi), *Wu Yao* (Radix Linderae Strychnifolia), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Fu Ling* (Poria), calcined *Long Gu* (Os Draconis), calcined *Mu Li* (Concha Ostreae), and *Sang Ji Sheng* (Herba Taxilli).
- Low back pain: use *Bu Gu Zhi* alone as powder, and take it with warm liquor.
- Feeling of heaviness, coldness and extreme pain in the low back: combine this herb with *Du Zhong* (Cortex Eucommiae) and *Hu Tao Ren* (Semen Juglandis). Serve the decoction regularly with warm liquor.

Bu Gu Zhi (Fructus Psoraleae)

2. Warms the Spleen and Stops Diarrhea

Diarrhea from Spleen deficiency: In Spleen yang deficiency, normal transformation and transportation functions are compromised, leading to diarrhea, borborygmus, bloating, and poor appetite. *Bu Gu Zhi* is commonly used to treat chronic diarrhea caused by Spleen and Kidney yang deficiencies.

- Diarrhea from Spleen and Kidney yang deficiencies: use *Bu Gu Zhi* with *Rou Dou Kou* (Semen Myristicae).
- Diarrhea from Spleen and Kidney yang deficiencies with cold: combine it with *Rou Dou Kou* (Semen Myristicae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Wu Zhu Yu* (Fructus Evodiae). **Exemplar Formula:** *Si Shen Wan* (Four-Miracle Pill).
- Chronic malaria, enteritis and other chronic gastrointestinal disorders with diarrhea: add this herb to *Shan Yao* (Rhizoma Dioscoreae), *He Zi* (Fructus Chebulae), *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Zi* (Radix Aconiti Lateralis Praeparata), and *Pao Jiang* (Rhizoma Zingiberis Preparatum).

Bu Gu Zhi, when combined with *Hu Tao Ren* (Semen Juglandis), treats asthma caused by Kidney deficiency.

DOSAGE

5 to 10 grams in decoction, pill or powder. Frying *Bu Gu Zhi* with salt reduces its drying effect, and directs the action of the herb to the Kidney.

CAUTIONS / CONTRAINDICATIONS

- *Bu Gu Zhi* is acrid, warm and drying; thus long-term use may lead to depletion of yin, characterized by side effects such as dry mouth, dry tongue, and sore throat.
- *Bu Gu Zhi* is contraindicated in cases involving yin-deficient heat, constipation, nocturnal emissions, hematuria, cystitis or urinary tract infection, red eyes, and a bitter taste in the mouth with a dry tongue.
- Use *Bu Gu Zhi* with caution during pregnancy.

CHEMICAL COMPOSITION

Psoralen, isopsoralen, coryfolin, corylifolinin, psoralidin, isopsoralidin, corylidin, 8-methoxyporalen, isobavahin, bavachinin, bavachalcone, bavachromenn, bavachromanol, corylin, neobavaisofavane, corylinal, bakuchiol, psoraldehyde, isoneobavachalion, dihydrofuranochalcone bakuchalcone, chalcone bavachromanol, neobavachalcone, limonene, terpineol, stigmasterol, trilaurin, daidzin, coumstrol, angelicin.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Bu Gu Zhi* dilates the coronary artery and increases blood perfusion to the cardiac muscle in mice.[2]
- **Respiratory:** In a laboratory study, a preparation of *Bu Gu Zhi* was found to have marked antiasthmatic properties compared to a placebo.[3]
- **Antibiotic:** It has an inhibitory effect against *Staphylococcus aureus*, *Staphylococcus albus*, and others.[4]
- **Immunostimulant:** Administration of *Bu Gu Zhi* is associated with an increase in white blood cell counts in rats.[5]
- **Effects on smooth muscle:** According to animal studies, an extract of *Bu Gu Zhi* stimulated the smooth muscle of the intestines, but relaxed the smooth muscle of the uterus.[6]
- **Antineoplastic:** Preliminary studies have demonstrated that psoralen at the dosage of 250 μg/ml inhibits DNA synthesis of cancer cells in patients with sarcoma.[7]

CLINICAL STUDIES AND RESEARCH

- **Psoriasis:** In one study, 800 patients with psoriasis were treated with a 93% rate of effectiveness using intramuscular injection of alcohol extract of *Bu Gu Zhi* one time each day for 10 days. The same treatment was repeated if necessary, with 3 days of rest between 10-day courses.[8]
- **Neutropenia:** Three grams of *Bu Gu Zhi* powder given three times daily for 4 weeks per treatment period showed marked effectiveness in treating neutropenia. Out of 19 patients, 14 made complete recovery, 4 showed moderate improvement, and 1 experienced no response.[9]
- **Alopecia:** According to one report, 45 patients with alopecia were treated with 84.4% effectiveness using intramuscular injection of *Bu Gu Zhi* and UV ray therapy.[10]
- **White vulvar lesions:** Topical application of *Bu Gu Zhi* to the affected area every other day was effective in 50 out of 53 patients with white vulvar lesions. The herbal paste was prepared by mixing equal portions of *Bu Gu Zhi* and 95% alcohol for 1 week, followed by a gradual simmering until the liquid became a paste. 500 ml of solution generally yields 50 ml of paste.[11]
- **Uterine bleeding:** In one study, 326 patients with uterine bleeding from various causes were treated with over 90% effectiveness. The treatment protocol was to administer 1.5 grams each of *Bu Gu Zhi* and *Chi Shi Zhi* (Halloysitum Rubrum) three times daily for 3 days, or longer if necessary.[12]
- **Enuresis:** According to one report, bed-wetting in 6 children between 3 and 12 years of age was treated with complete success using dry-fried *Bu Gu Zhi* in powder daily, in one dose at bedtime. The dosage was 1.5 grams for children between 3 and 9 years of age, and 2.5 grams for children between 10 and 12 years of age.[13]

TOXICOLOGY

Injection of *Bu Gu Zhi* is occasionally associated with severe allergic reactions.[14]

Bu Gu Zhi (Fructus Psoraleae)

AUTHORS' COMMENTS

Bu Gu Zhi and *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) tonify the Kidney and consolidate the *jing* (essence), treating impotence, spermatorrhea, urinary incontinence and diarrhea from Kidney yang deficiency. *Bu Gu Zhi* more strongly tonifies the Kidney in treating back pain and spermatorrhea. *Yi Zhi Ren* more effectively warms the middle *jiao* and treats reduced appetite and increased desire to sleep.

Asthma characterized by Lung and Kidney deficiencies can be treated effectively with *Bu Gu Zhi*, *Ge Jie* (Gecko) and *Dong Chong Xia Cao* (Cordyceps).

Yi Zhi Ren (Fructus Alpiniae Oxyphyllae)

益智仁

Pinyin Name: *Yi Zhi Ren*
Literal Name: "benefit the intelligence seed," "benefit intelligence nut"
Alternate Chinese Names: *Yi Zhi Zi*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: alpinia fruit, sharp-leaf galangal fruit
Botanical Name: *Alpinia oxyphylla* Miq. (*Yi Zhi*)
Pharmaceutical Name: Fructus Alpiniae Oxyphyllae
Properties: acrid, warm
Channels Entered: Kidney, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Warms the Spleen, Increases Appetite, Stops Excessive Salivation and Diarrhea

Diarrhea, epigastric and abdominal coldness and pain, excessive salivation: Deficiency and cold of the middle *jiao* manifest in symptoms of epigastric and abdominal coldness, fullness and pain, diarrhea, and profuse, clear salivation. Excessive salivation accompanies impairment of the Spleen's transportation function. *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) stops salivation and diarrhea by warming the Spleen, restoring its transportation function and helping it distribute water evenly in the body. Abdominal pain and fullness are the result of Stomach qi not being able to descend properly because of stagnation. This herb increases appetite by warming the Spleen and Stomach and moving qi stagnation in the middle *jiao*.

- Diarrhea with abdominal distention: combine *Yi Zhi Ren* with *Sha Ren* (Fructus Amomi).
- Spleen qi and yang deficiencies: combine it with *Shan Yao*

Yi Zhi Ren (Fructus Alpiniae Oxyphyllae)

(Rhizoma Dioscoreae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Ren Shen* (Radix Ginseng).

- Profuse salivation, especially during the night: use this herb with *Cang Zhu* (Rhizoma Atractylodis), *Fu Ling* (Poria), *He Zi* (Fructus Chebulae), *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae).
- Vomiting of clear fluids: add this herb to *Ding Xiang* (Flos Caryophylli) and *Wu Zhu Yu* (Fructus Evodiae).
- Diarrhea with qi deficiency: use it with *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Shan Yao* (Rhizoma Dioscoreae).

2. Warms the Kidney, Consolidates Fluids

Spermatorrhea, enuresis and uterine bleeding due to Kidney deficiency: *Yi Zhi Ren* treats Kidney yang deficiency with compromised ability to retain body fluids. Clinical manifestations include leakage of fluids from the body, such as frequent nocturnal urination, nocturnal emissions, frequent urinary urges, spermatorrhea or chronic uterine bleeding.

- Spermatorrhea or frequent nocturnal urinary urges: combine *Yi Zhi Ren* with *Wu Yao* (Radix Linderae), *Shan Yao* (Rhizoma Dioscoreae), *Sang Piao Xiao* (Ootheca Mantidis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Shan Zhu Yu* (Fructus Corni), and *Bu Gu Zhi* (Fructus Psoraleae). This formula should be taken with salt and grain-based liquor.
- Uterine bleeding: use it alone as a powder or with *Sha Ren* (Fructus Amomi). This formula should be taken with salt and grain-based liquor.

DOSAGE

3 to 10 grams in decoction. *Yi Zhi Ren* is also used in pill or powder form. The unprocessed form has a strong drying effect, and is commonly used to treat excessive salivation, involuntary salivation, vomiting and diarrhea. Frying *Yi Zhi Ren* with salt directs its functions to the Kidney, thereby enhancing its effect to treat frequent urination, nocturnal urination, nocturnal emissions, premature ejaculation, and leukorrhea.

CAUTIONS / CONTRAINDICATIONS

- Use of *Yi Zhi Ren* is contraindicated in cases of yin-deficient fire, vomiting caused by qi stagnation or heat, urinary incontinence due to heat, and diarrhea from qi deficiency or heat.

CHEMICAL COMPOSITION

Yakuchinone A, nootkatol, cineole, zingberene, zingiberol.[1]

PHARMACOLOGICAL EFFECTS

Yi Zhi Ren has cardiotonic and antineoplastic effects.[2,3]

References

Tu Si Zi (Semen Cuscutae)

菟絲子 菟丝子

Pinyin Name: *Tu Si Zi*
Literal Name: "rabbit string seed," "hare silk seed"
Alternate Chinese Names: *Tu Si Bing, Jin Qian Cao Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cuscuta, dodder seed
Botanical Name: *Cuscuta chinensis* Lam. (*Tu Si Zi*); *Cuscuta japonica* Choisy (*Da Tu Si Zi*)
Pharmaceutical Name: Semen Cuscutae
Properties: acrid, sweet, neutral
Channels Entered: Liver, Kidney

Tu Si Zi (Semen Cuscutae)

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Kidney Yin and Yang

Impotence, chronic uterine bleeding, leukorrhea: *Tu Si Zi* (Semen Cuscutae) treats prominent signs of Kidney yin and yang deficiencies such as impotence, back pain, urinary incontinence, spermatorrhea, uterine bleeding, and profuse, clear vaginal discharge. This herb is neutral and can be used alone at high dosages to treat the above-mentioned symptoms.

- Spermatorrhea, frequent dreams: use *Tu Si Zi* alone at high dosage, or combine it with *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Lian Zi* (Semen Nelumbinis), *Yuan Zhi* (Radix Polygalae) and *Qian Shi* (Semen Euryales).
- Uterine bleeding, restless fetus, back pain with a feeling of prolapse: combine it with *Du Zhong* (Cortex Eucommiae), *Sang Ji Sheng* (Herba Taxilli), and *E Jiao* (Colla Corii Asini).
- Impotence: add this herb to *Bai Ji Li* (Fructus Tribuli), *Yin Yang Huo* (Herba Epimedii), *Gou Qi Zi* (Fructus Lycii) and *Ba Ji Tian* (Radix Morindae Officinalis).
- Heart qi deficiency from excessive worrying, with dribbling urination, white turbid urine and enuresis: use *Tu Si Zi* with *Fu Ling* (Poria) and *Lian Zi* (Semen Nelumbinis).

2. Consolidates Kidney *Jing* (Essence) and Reserves the Urine

Enuresis: Kidney qi deficiency results in the inability of the urinary bladder to hold urine. *Tu Si Zi* treats urinary disorders such as incontinence, terminal dripping, frequent urinary urges, polyuria, or turbid urine caused by qi and yang deficiencies.

- Urinary incontinence, frequent urinary urges, terminal dripping of turbid urine: combine *Tu Si Zi* with *Fu Ling* (Poria) and *Lian Zi* (Semen Nelumbinis).

3. Brightens the Eyes

Diminished vision: The Liver opens to the eyes. Lack of nourishment results in blurred vision, spots in front of the eyes, dryness of the eyes, and dizziness.

- Blurred vision: combine *Tu Si Zi* with *Shan Zhu Yu* (Fructus Corni), *Ju Hua* (Flos Chrysanthemi), and *Shu Di Huang* (Radix Rehmanniae Preparata).

4. Stops Diarrhea

Diarrhea and poor appetite are the results of Kidney yang deficiency and failure to warm Spleen yang. Unable to be transformed or transported, food, water and dampness accumulate in the intestines, and diarrhea occurs. *Tu Si Zi* warms the Spleen and Kidney to restore proper digestion and stop diarrhea.

- Diarrhea: combine *Tu Si Zi* with *Bu Gu Zhi* (Fructus Psoraleae), *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

5. Treats *Xiao Ke* (Wasting and Thirsting) Syndrome

Tu Si Zi is commonly used to treat *xiao ke* syndrome. The fresh juice of these seeds may be used as a single-herb remedy. Dried *Tu Si Zi* is commonly combined with other herbs in a formula.

DOSAGE

10 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- Though *Tu Si Zi* is neutral in thermal property, it tonifies Kidney yang more than it does Kidney yin. Therefore, it should be used with caution in cases of yin-deficient heat (especially those patients who are easily aroused sexually), or for patients with dryness, constipation or scanty, dark urine.

CHEMICAL COMPOSITION

Cholesterol, campesterol, β-sitosterol, stigmasterol, β-amyrin.[1]

PHARMACOLOGICAL EFFECTS

- **Hepatoprotective:** Administration of a 20% decoction of *Tu Si Zi* has a marked hepatoprotective effect in mice, especially against carbon tetrachloride.[2]
- **General strengthening:** Decoction of *Tu Si Zi* has been shown to increase resistance to hypoxia and increase swimming time in mice.[3]

CLINICAL STUDIES AND RESEARCH

- **Vitiligo:** Topical application of an herbal tincture two to three times daily provided good results in 8 out of 10 patients with vitiligo. The herbal tincture was prepared by soaking 25 grams of cuscuta seeds and twigs in 100 ml of 95% alcohol for 48 hours.[4]

Sha Yuan Zi (Semen Astragali Complanati)

沙苑子 沙苑子

Pinyin Name: *Sha Yuan Zi*
Alternate Chinese Names: *Sha Yuan Ji Li, Tong Ji Li, Wai Sha Yuan, Tong Xi Li*
Original Source: *Tu Jing Ben Cao* (Illustrated Classic of the Materia Medica) by Su Song in 1061
English Name: astragalus seed, flat-stem milkvetch seed
Botanical Name: *Astragalus complanatus* R. Br. (*Sha Yuan Zi*)
Pharmaceutical Name: Semen Astragali Complanati
Properties: sweet, warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney and Consolidates *Jing* (Essence)

Leakage of body fluids: Liver and Kidney deficiencies lead to leakage of *jing*. Symptoms of this problem include spermatorrhea, urinary incontinence, premature ejaculation, profuse clear vaginal discharge, and polyuria. *Sha Yuan Zi* (Semen Astragali Complanati) strengthens the Kidney and helps secure and prevent the loss of *jing*.

- General Kidney deficiency with leakage of *jing*: combine *Sha Yuan Zi* with *Lu Jiao Shuang* (Cornu Cervi Degelatinatium), *Qian Shi* (Semen Euryales) and *Shan Zhu Yu* (Fructus Corni).
- Impotence, spermatorrhea: combine this herb with *Shan Zhu Yu* (Fructus Corni), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Lian Xu* (Stamen Nelumbinis), *Long Gu* (Os Draconis), *Ba Ji Tian* (Radix Morindae Officinalis), and *Xian Mao* (Rhizoma Curculiginis).
- Polyuria or urinary incontinence: use *Sha Yuan Zi* with *Sang Piao Xiao* (Ootheca Mantidis), *Tu Si Zi* (Semen Cuscutae), *Fu Pen Zi* (Fructus Rubi), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) and *Bu Gu Zhi* (Fructus Psoraleae).

2. Nourishes the Liver and Brightens the Eyes

Visual disorders due to Liver and Kidney deficiencies: The Liver opens to the eyes: lack of nourishment to the Liver causes blurred vision, reduced visual acuity, and dizziness. *Sha Yuan Zi* is warm, yet not drying. It consolidates *jing* and nourishes Liver blood to benefit the eyes.

- Visual disturbances: combine this herb with *Gou Qi Zi* (Fructus Lycii), *Tu Si Zi* (Semen Cuscutae), *Bai Ji Li* (Fructus Tribuli), *Jue Ming Zi* (Semen Cassiae), and *Ju Hua* (Flos Chrysanthemi).

DOSAGE

10 to 20 grams in decoction. *Sha Yuan Zi* is also used in pill or powder form. The salt-fried herb has a dual effect to tonify yin and yang, and is commonly used to treat spermatorrhea, nocturnal emissions, and incontinence.

CAUTIONS / CONTRAINDICATIONS

- Use of *Sha Yuan Zi* is contraindicated in yin-deficient patients with heat signs, or those with hyperactive sex drive.

CHEMICAL COMPOSITION

Complanatuside, neocomplanoside, myricomplanoside, astragalin, kaempferide, myricetin, threonine, valine, methionine, leucine, isoleucine, phenylalanine.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** According to animal studies, injection of *Sha Yuan Zi* has been shown to decrease blood pressure, decrease heart rate, decrease peripheral vascular resistance and increase blood perfusion to the brain.[2]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of *Sha Yuan Zi* is 37.75 g/kg in mice.[3]

AUTHORS' COMMENTS

Sha Yuan Ji Li, the alternate pinyin name for *Sha Yuan Zi*, is often confused with *Bai Ji Li* (Fructus Tribuli). Though they both treat disorders of the eyes, they have very different functions. *Sha Yuan Zi* tonifies the Liver and Kidney, secures *jing* and improves vision. It is used most often for blurred vision or diminished visual acuity. *Bai Ji Li* calms the Liver and dispels wind-heat to brighten the eyes. It treats red eyes with tears or pain.

Sha Yuan Zi (Semen Astragali Complanati)

Sha Yuan Zi and *Tu Si Zi* (Semen Cuscutae) both tonify the Kidney and benefit *jing*. *Sha Yuan Zi* warms Kidney yang, secures *jing* and is best used to treat impotence and spermatorrhea. *Tu Si Zi* is warm but not drying. It is best for infertility.

Jiu Cai Zi (Semen Allii Tuberosi)

韭菜子 韭菜子

Pinyin Name: *Jiu Cai Zi*
Alternate Chinese Names: *Jiu Zi, Cao Zhong Ru, Qi Yang Cao*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: allium seed, tuber onion seed
Botanical Name: *Allium tuberosum* Rottler (*Jiu Cai*)
Pharmaceutical Name: Semen Allii Tuberosi
Properties: acrid, sweet, warm
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney, Fortifies Yang and Consolidates *Jing* (Essence)

Liver and Kidney deficiencies with yang deficiency: *Jiu Cai Zi* (Semen Allii Tuberosi) treats pain and coldness of the back and knees, impotence with spermatorrhea, clear leukorrhea, polyuria, infertility, and other conditions related to Liver and Kidney deficiencies.

- Kidney yang deficiency: use *Jiu Cai Zi* alone as powder and serve it with warm liquor or combine with *Tu Si Zi* (Semen Cuscutae) and *Lu Rong* (Cornu Cervi Pantotrichum).
- Profuse, clear vaginal discharge: combine this herb with *Long Gu* (Os Draconis) and *Hai Piao Xiao* (Endoconcha Sepiae).
- Polyuria: add it to *Bu Gu Zhi* (Fructus Psoraleae), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) and *Sang Piao Xiao* (Ootheca Mantidis).

2. Warms the Stomach and Treats Chronic Stomach Qi Reversal

Jiu Cai Zi treats vomiting and chronic stubborn hiccups caused by Stomach cold.

- Vomiting, hiccups: combine *Jiu Cai Zi* with *Wu Zhu Yu* (Fructus Evodiae) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).

DOSAGE

5 to 15 grams in decoction. *Jiu Cai Zi* is also used in pill or powder form.

CAUTIONS / CONTRAINDICATIONS

- *Jiu Cai Zi* is contraindicated in cases of yin-deficient fire.

CHEMICAL COMPOSITION

Alkaloids, saponin.[1]

CLINICAL STUDIES AND RESEARCH

- **Nausea:** In one study, 5 patients were treated with good results using 9 grams of *Jiu Cai Zi* powder twice daily. In another study, 33 out of 38 patients with nausea related to carcinoma showed good response after being treated with 1.5 to 3.0 grams of dry-fried *Jiu Cai Zi* powder one to three times daily.[2,3]

Jiu Cai Zi (Semen Allii Tuberosi)

Zi He Che (Placenta Hominis)

紫河車 紫河车

Pinyin Name: *Zi He Che*
Literal Name: "purple river vehicle"
Alternate Chinese Names: *Tai Pan, Ren Bao, Bai Yi, Hun Yuan Mu, Hun Tun Yi*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: placenta, dried human placenta
Zoological Name: *Homo sapiens* (*Ren Bao*)
Pharmaceutical Name: Placenta Hominis
Properties: sweet, salty, warm
Channels Entered: Kidney, Lung, Liver

CHINESE THERAPEUTIC ACTIONS

1. Replenishes *Jing* (Essence)

Prenatal deficiency with insufficient *jing*: Kidney *jing* is derived from one's parents. When this is deficient, patients present with symptoms associated with Kidney yang, *jing* and blood deficiencies. Typical symptoms include immature development of the sexual organs, infertility in men and women, low sex drive, impotence, spermatorrhea, irregular menstruation, back and knees soreness and weakness, tinnitus, and dizziness. *Zi He Che* (Placenta Hominis) is the best choice to tonify *jing*, as it is the part of the body most directly involved with the development of a human being. It is the product of *jing* and blood from the father and the mother. It is therefore used to greatly tonify the blood at the *ying* (nutritive) level. Use of *Zi He Che* in women enhances the development of the reproductive organs such as the breast, vagina, uterus and ovaries. It can also be used to alleviate atrophy of the reproductive organs. Use of *Zi He Che* in men helps with the development of the genital organs, in addition to treating impotence, spermatorrhea, premature ejaculation, and infertility.

- *Jing* deficiency: combine *Zi He Che* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Dong Chong Xia Cao* (Cordyceps), *Lu Jiao Jiao* (Gelatinum Cornu Cervi) and *Yin Yang Huo* (Herba Epimedii).

2. Nourishes Blood

Insufficient lactation: *Zi He Che* treats extremely weak postpartum women who have scanty or insufficient milk production caused by blood and *jing* (essence) deficiencies.

- Insufficient lactation due to blood deficiency: combine *Zi He Che* with *Dang Gui* (Radicis Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Insufficient lactation because of qi and blood deficiencies: combine this substance with *Huang Qi* (Radix Astragali), *Ren Shen* (Radix Ginseng), *Dang Gui* (Radicis Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Preparata).

Qi and blood deficiencies: This substance is excellent for patients who are recovering from chronic illnesses. Other possible symptoms include fatigue, weight loss, shortness of breath, lack of desire to speak, sallow or dark and dull complexion.

Zi He Che (Placenta Hominis)

- Anemia: combine *Zi He Che* with *Dang Gui* (Radicis Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Qi and blood deficiencies: combine it with *Huang Qi* (Radix Astragali), *Ren Shen* (Radix Ginseng), *Dang Gui* (Radicis Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Preparata).

3. Benefits Lung Qi

Chronic dyspnea and cough: The Lung dominates qi and the Kidney grasps it downward. When both organs are weakened by chronic coughing, the following symptoms will also be present: shortness of breath, interrupted respiration, and wheezing. *Zi He Che* is usually administered on a long-term basis to promote wellness and prevent recurrence of cough.

- Chronic respiratory disorders: combine *Zi He Che* with *Ge Jie* (Gecko).
- Chronic cough with yin-deficient heat, manifesting in scanty yellow sputum: use this substance with *Tian Men Dong* (Radix Asparagi), *Gui Ban* (Plastrum Testudinis) and *Huang Bai* (Cortex Phellodendri).

DOSAGE

1.5 to 3 grams as powder two to three times daily. The dosage of *Zi He Che* may be doubled in severe cases.

CAUTIONS / CONTRAINDICATIONS

- *Zi He Che* should not be used alone for yin-deficient patients with heat signs.

CHEMICAL COMPOSITION

The composition of *Zi He Che* is extremely complex. The main components include protein, amino acids, enzymes and hormones (human chorionic gonadotropin, prolactin, oxytocin, thyroid-stimulating hormone, and sex hormones).[1,2]

PHARMACOLOGICAL EFFECTS

- **Immunostimulant:** Oral administration of *Zi He Che* at 6.6 g/kg in mice once daily for 7 days is associated with increased immunity and elevated IgM count.[3]

CLINICAL STUDIES AND RESEARCH

- **Chronic tracheitis:** In one study, 609 patients with chronic tracheitis were treated with intramuscular injections of *Zi He Che* every day or every other day, with an overall rate of effectiveness of 82.37 to 87.6%.[4]
- **Bronchial asthma:** Two patients with bronchial asthma were treated with marked success using 2 to 4 grams of *Zi He Che* three times daily after meals.[5]
- **Lung cancer:** According to one report, 31 out of 33 patients showed improvement after daily treatment with an herbal decoction containing *Zi He Che, Gua Lou Shi* (Fructus Trichosanthis), *Chen Pi* (Pericarpium Citri Reticulatae), *Yi Yi Ren* (Semen Coicis), *E Zhu* (Rhizoma Curcumae), *Xia Ku Cao* (Spica Prunellae), *Shan Dou Gen* (Radix Sophorae Tonkinensis) and *Bai Guo* (Semen Ginkgo).[6]

TOXICOLOGY

Subcutaneous injection in mice of *Zi He Che* at normal therapeutic doses for 3 to 6 months showed no abnormality in functions or development. At high doses, however, it causes tremor, constriction of pores, and swelling at the site of injection. At 300 times the therapeutic dose, there is an abnormal effect on the liver, kidneys, and spleen.[7]

SUPPLEMENT

- 臍帶 / 脐带 *Qi Dai* (Corda Umbilicalis Hominis), first cited in *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D., is the umbilical cord. It treats wheezing and night sweats caused by Kidney yang and *jing* (essence) deficiencies. *Qi Dai* is often decocted with *Jin Yin Hua* (Flos Lonicerae), and *Gan Cao* (Radix Glycyrrhizae) in grain-based liquor.

AUTHORS' COMMENTS

Human placenta is generally not used, for many reasons. Instead, placentae from pigs and cattle are used as substitutes.

Section 3

— Blood-Tonifying Herbs

Dang Gui (Radicis Angelicae Sinensis)

當歸 当归

Pinyin Name: *Dang Gui*
Literal Name: "state of return," "ought to return"
Alternate Chinese Names: *Xi Gui, Gan Gui, Quan Dang Gui, Qin Dang Gui, Yun Dang Gui, Chuan Dang Gui*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: tangkuei, angelica root, dong quai, Chinese angelica
Botanical Name: *Angelica sinensis* (Oliv.) Diels (*Dang Gui*)
Pharmaceutical Name: Radicis Angelicae Sinensis
Properties: sweet, acrid, warm
Channels Entered: Heart, Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Blood

Heart and Liver blood deficiencies: Symptoms of Heart and Liver blood deficiencies include anemia, pale complexion, brittle nails, dry hair, dizziness, blurred vision, and palpitations. *Dang Gui* (Radicis Angelicae Sinensis), warm in nature, is most suitable for cold-type blood-deficient patients. It also treats abdominal pain related to blood deficiency and coldness.

- Blood deficiency: combine *Dang Gui* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) to enhance the blood-tonifying effect. **Exemplar Formula:** *Si Wu Tang* (Four-Substance Decoction). This formula tonifies blood, regulates the menstrual cycle and is used for various patterns of blood deficiency.
- Blood and qi deficiencies: pair it with *Huang Qi* (Radix Astragali). **Exemplar Formula:** *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood). This formula is commonly used as a tonic for postpartum fatigue and weakness.
- Spleen and Heart deficiencies characterized by insomnia with excessive dreaming and worry, fatigue, palpitations, forgetfulness and difficulty falling asleep: combine *Dang Gui* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Long Yan Rou* (Arillus Longan), *Suan Zao Ren* (Semen Zizyphi Spinosae), and similar tonics. **Exemplar Formula:** *Gui Pi Tang* (Restore the Spleen Decoction).
- Blood deficiency with deficiency-heat symptoms, hot flashes, irritability, flushed cheeks: use it with *Mu Dan Pi* (Cortex Moutan), *Sheng Di Huang* (Radix Rehmanniae), *Chi Shao* (Radix Paeoniae Rubrae), and *Huang Qin* (Radix Scutellariae).
- Epigastric and abdominal pain and coldness due to blood deficiency and Spleen and Stomach deficiencies: use *Dang Gui* with *Sheng Jiang* (Rhizoma Zingiberis Recens), *Gui Zhi* (Ramulus Cinnamomi), *Bai Shao* (Radix Paeoniae Alba) and *Yi Tang* (Saccharum Granorum). *Dang Gui* is commonly cooked with lamb to make soup.

Dang Gui (Radicis Angelicae Sinensis)

2. Invigorates Blood Circulation and Relieves Pain

Menstrual disorders: Blood deficiency, blood stagnation or qi stagnation all result in menstrual disorders such as irregular menstrual cycle, dysmenorrhea, amenorrhea and other gynecological disorders. Because of the warm property of *Dang Gui* and its action to nourish the blood and invigorate circulation, it is most suitable for treatment of cold types of menstrual disorders with blood and qi stagnation.

- Amenorrhea due to blood deficiency and stagnation: combine *Dang Gui* with *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Chi Shao* (Radix Paeoniae Rubrae). **Exemplar Formulas:** *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit) and *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction).
- Amenorrhea or irregular menstruation because of cold and deficiency: combine it with *Wu Zhu Yu* (Fructus Evodiae), *Gui Zhi* (Ramulus Cinnamomi), *Ren Shen* (Radix Ginseng), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). **Exemplar Formula:** *Wen Jing Tang* (Warm the Menses Decoction).
- Dysmenorrhea due to cold and deficiency: use this herb with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), *Pu Huang* (Pollen Typhae) and *Yan Hu Suo* (Rhizoma Corydalis). **Exemplar Formula:** *Shi Xiao San* (Sudden Smile Powder).
- Pre-menstrual syndrome, irregular menstruation caused by Liver qi stagnation: add it to *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Fu Ling* (Poria). **Exemplar Formula:** *Xiao Yao San* (Rambling Powder).
- Early menstruation, bloating during menstruation, irritability from heat and qi stagnation: add *Dang Gui* to *Mu Dan Pi* (Cortex Moutan), *Zhi Zi* (Fructus Gardeniae), *Chai Hu* (Radix Bupleuri) and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Jia Wei Xiao Yao San* (Augmented Rambling Powder).
- General menstrual disorders with fatigue and weakness due to qi and blood deficiencies: combine this herb with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Ba Zhen Tang* (Eight-Treasure Decoction).
- Menopausal symptoms due to yin deficiency with heat: use *Dang Gui* with *Xian Mao* (Rhizoma Curculiginis), *Yin Yang Huo* (Herba Epimedii), *Zhi Mu* (Radix Anemarrhenae), *Huang Bai* (Cortex Phellodendri), and *Ba Ji Tian* (Radix Morindae Officinalis). **Exemplar Formula:** *Er Xian Tang* (Two-Immortal Decoction).

Gestational and postpartum disorders: *Dang Gui* enters the *xue* (blood) level. It functions to tonify yet does not have the stagnant side effects seen in other tonic herbs. It is also frequently used to treat disorders caused by cold, blood deficiency and blood stagnation before or after deliveries.

- Abdominal pain during pregnancy: combine *Dang Gui* with *Chuan Xiong* (Rhizoma Ligusticum Chuanxiong).
- Pain and diarrhea during pregnancy: use it with *Bai Shao* (Radix Paeoniae Alba), *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Ze Xie* (Rhizoma Alismatis).
- Restless fetus, lower back soreness, abdominal pain and breech presentation of the fetus: incorporate it with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Jing Jie* (Herba Schizonepetae), *Tu Si Zi* (Semen Cuscutae), *Ai Ye* (Folium Artemisiae Argyi), and *Hou Po* (Cortex Magnoliae Officinalis). **Exemplar Formula:** *Bao Chan Wu You Fang* (Preserve Pregnancy and Care Free Decoction).
- Postpartum spontaneous sweating, fever, shortness of breath, and back and leg pain accompanied by an inability to turn from side to side: combine this herb with *Huang Qi* (Radix Astragali), *Bai Shao* (Radix Paeoniae Alba), and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- Postpartum bleeding, lower abdominal coldness and pain caused by blood deficiency with cold: use it with *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Tao Ren* (Semen Persicae), *Pao Jiang* (Rhizoma Zingiberis Preparatum), and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Sheng Hua Tang* (Generation and Transformation Decoction).
- Insufficient milk due to blood and qi deficiencies: add this herb to *Ren Shen* (Radix Ginseng), *Huang Qi* (Radix Astragali), *Mai Men Dong* (Radix Ophiopogonis), *Chuan Mu Tong* (Caulis Clematidis Armandii), peanuts and pig's feet.
- Postpartum *bi zheng* (painful obstruction syndrome): combine *Dang Gui* with *Qiang Huo* (Rhizoma et Radix Notopterygii), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Qin Jiao* (Radix Gentianae Macrophyllae).

Traumatic Injuries: *Dang Gui*, acrid in taste, activates blood circulation and disperses blood stagnation. If blood stagnation is dispersed, swelling will automatically subside. *Dang Gui* is commonly used in trauma departments in hospitals in China, along with blood-activating herbs, to treat the following symptoms: bruises, fractured or broken bones, swelling, and injuries of the tendons.

- Traumatic injuries of the thoracic cavity: combine *Dang Gui* with *Chai Hu* (Radix Bupleuri), *Chuan Shan Jia* (Squama Manis), *Da Huang* (Radix et Rhizoma Rhei), and *Hong Hua* (Flos Carthami). **Exemplar Formulas:**

Dang Gui (Radicis Angelicae Sinensis)

Xue Fu Zhu Yu Tang (Drive Out Stasis in the Mansion of Blood Decoction) or *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction).

- Bruises, swelling and redness from traumatic injuries: add this herb to *Su Mu* (Lignum Sappan), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), and *Di Bie Chong* (Eupolyphaga).
- Broken or fractured bones: use it with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Zi Ran Tong* (Pyritum), and *Gu Sui Bu* (Rhizoma Drynariae).

***Bi zheng* (painful obstruction syndrome) with numbness and pain:** Besides tonifying blood and invigorating circulation, *Dang Gui* stops pain and disperses coldness. By dispersing stagnation and promoting nourishment in the channels and tendons, *Dang Gui* treats numbness and pain in the limbs and extremities. It is used for pain caused by blood deficiency, blood deficiency complicated by coldness and wind, or qi and blood deficiencies.

- Numbness due to blood deficiency: combine *Dang Gui* with *Huang Qi* (Radix Astragali), *Chi Shao* (Radix Paeoniae Rubrae), *Shu Di Huang* (Radix Rehmanniae Preparata), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Coldness of the extremities, back, and/or buttocks due to blood and yang deficiencies: add this herb to *Gui Zhi* (Ramulus Cinnamomi), *Bai Shao* (Radix Paeoniae Alba), *Xi Xin* (Herba Asari), and *Chuan Mu Tong* (Caulis Clematidis Armandii). **Exemplar Formula:** *Dang Gui Si Ni Tang* (Tangkuei Decoction for Frigid Extremities).
- *Bi zheng* (painful obstruction syndrome), painful joints, and/or numbness due to *ying* (nutritive) and *wei* (defensive) deficiencies: combine this herb with *Huang Qi* (Radix Astragali), *Jiang Huang* (Rhizoma Curcumae Longae), *Chi Shao* (Radix Paeoniae Rubrae), and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Juan Bi Tang* (Remove Painful Obstruction Decoction).
- Soreness and weakness of lower back and knees due to qi, blood, Liver and Kidney deficiencies: use it with *Du Huo* (Radix Angelicae Pubescentis), *Sang Ji Sheng* (Herba Taxilli), *Qin Jiao* (Radix Gentianae Macrophyllae), and *Sheng Di Huang* (Radix Rehmanniae). **Exemplar Formula:** *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction).

Sores and abscesses: Applied topically, *Dang Gui* reduces swelling, expels pus, generates flesh and relieves pain. Because it is warm and nourishing in nature, it is most suitable when taken internally for slow healing sores from qi and blood deficiencies.

- Slow-healing sores due to qi and blood deficiencies: *Dang Gui* is used alone topically, or combined with *Huang Qi* (Radix Astragali), *Jin Yin Hua* (Flos Lonicerae), *Gan Cao* (Radix Glycyrrhizae), *Bai Zhi* (Radix Angelicae Dahuricae), and red *Da Zao* (Fructus Jujubae) for internal use.
- Toxic ulcers with pus: add this herb to *Huang Qi* (Radix Astragali), *Chuan Shan Jia* (Squama Manis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Zao Jiao Ci* (Spina Gleditsiae), to drain pus.
- Redness, swelling and burning toxic sores: combine *Dang Gui* with *Jin Yin Hua* (Flos Lonicerae), *Chi Shao* (Radix Paeoniae Rubrae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Tian Hua Fen* (Radix Trichosanthis), and *Chuan Shan Jia* (Squama Manis). **Exemplar Formula:** *Zhen Ren Huo Ming Yin* (True Man Decoction to Revitalize Life).
- Ulcerated sores with redness, swelling and pain: use *Dang Gui* with a large dose of *Jin Yin Hua* (Flos Lonicerae), *Gan Cao* (Radix Glycyrrhizae), and *Xuan Shen* (Radix Scrophulariae). **Exemplar Formula:** *Si Miao Yong An Tang* (Four-Valiant Decoction for Well-Being).
- Chronic non-healing ulcerated sores caused by qi and blood deficiencies: use *Dang Gui* with *Huang Qi* (Radix Astragali), *Rou Gui* (Cortex Cinnamomi), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Ren Shen* (Radix Ginseng). **Exemplar Formula:** *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction).

3. Moistens Intestines and Unblocks the Bowels

Constipation due to blood deficiency: When the bowels are not properly nourished by blood, constipation or dry stools result. Usually the elderly, or those who have chronic constipation, or are postpartum women, or are in late or recovery stages of chronic disorders suffer this type of constipation. *Dang Gui* nourishes the blood and moistens the intestines to promote bowel movement.

- Constipation due to blood deficiency: combine *Dang Gui* with *He Shou Wu* (Radix Polygoni Multiflori), *Huo Ma Ren* (Fructus Cannabis), *Tao Ren* (Semen Persicae), *Rou Cong Rong* (Herba Cistanches), *Sheng Di Huang* (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Preparata), and *Da Huang* (Radix et Rhizoma Rhei). **Exemplar Formula:** *Ji Chuan Jian* (Benefit the River [Flow] Decoction).

4. Stops Cough and Treats Dyspnea

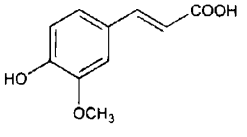
Cough and dyspnea: *Dang Gui* is often used with herbs that transform phlegm and stop cough.

- Cough, dyspnea, shortness of breath, and profuse sputum: combine this herb with *Su Zi* (Fructus Perillae), *Ban Xia* (Rhizoma Pinelliae), *Hou Po* (Cortex Magnoliae Officinalis), and *Qian Hu* (Radix Peucedani). **Exemplar Formula:** *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward).

Dang Gui (Radicis Angelicae Sinensis)

- Coughing during the night, dyspnea, profuse, salty-tasting sputum caused by Kidney and Lung yin deficiencies: combine *Dang Gui* with a large dose of *Chen Pi* (Pericarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae), *Fu Ling* (Poria), and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE



5 to 15 grams. *Dang Gui* is used in decoctions, herbal tincture, plasters, pills, or powder. Unprocessed *Dang Gui* is commonly used to tonify the blood, regulate menstruation, and lubricate the bowels. *Dang Gui* dry-fried with grain-based liquor more strongly moves the blood, and is commonly used to treat menstrual pain, traumatic bruises and pain, *bi zheng* (painful obstruction syndrome), and cases of blood stagnation. Dry-frying increases its warmth, which makes it an ideal agent to tonify the blood without causing diarrhea. The charred herb stops bleeding.

CAUTIONS / CONTRAINDICATIONS

- Use *Dang Gui* with caution for patients with abdominal distention, Spleen deficiency, or those with loose stools or diarrhea.
- *Dang Gui* is contraindicated in excess conditions, or for patients with yin-deficient heat signs.

CHEMICAL COMPOSITION

Essential oils 0.2 to 0.4% (ligustilide, n-butylidene phthalide, n-butylphthalide, n-valero-phenone-O-carboxylic acid); ferulic acid, scopletin.[1,2]

Ferulic Acid

PHARMACOLOGICAL EFFECTS

- **Effects on the uterus:** Administration of *Dang Gui* is associated with both stimulating and inhibiting effects on the smooth muscle of the uterus. Laboratory studies have shown that water and alcohol extracts tend to stimulate the uterus, while the essential oil inhibits it.[3] Furthermore, clinical studies have shown that when the uterus is in a state of relaxation, *Dang Gui* can induce contraction. Conversely, if the uterus is in a contracted state, then *Dang Gui* promotes relaxation. This dual action is credited for the therapeutic effect of relieving spasms and stopping pain.[4]
- **Cardiovascular:** In one laboratory study using frog specimens, intravenous injection of *Dang Gui* was associated initially with an inhibitory influence on the heart, followed by a negative chronotropic effect and positive inotropic effect. It improves overall blood circulation by decreasing the whole blood specific viscosity, or improving the hemorrheological changes in "blood stagnation." It also has an antiarrhythmic effect, especially against arrhythmia induced by epinephrine, cardiac glycosides, aconitine, and barium chloride. Administration of *Dang Gui* is associated with reduction of plasma cholesterol and triglyceride levels, and a decreased risk of atherosclerosis, as demonstrated in laboratory studies.[5,6,7,8]
- **Antiplatelet:** Administration of *Dang Gui* in rats is associated with a marked antiplatelet effect, similar to that of aspirin.[9] Other studies have demonstrated that *Dang Gui* also inhibits thrombus formation.[10]
- **Immunostimulant:** Administration of *Dang Gui* is associated with an increase in phagocytic activity by the macrophages.[11]
- **Respiratory:** *Dang Gui* has demonstrated a beneficial effect in treating wheezing and dyspnea caused by bronchospasm.[12]
- **Hepatoprotective:** *Dang Gui* promotes the generation of hepatocytes and has demonstrated a marked hepatoprotective effect.[13]
- **Antibiotic:** It shows inhibitory activity against *Salmonella typhi*, *E. coli*, *Corynebacterium diphtheriae*, *Vibrio cholerae*, α-hemolytic streptococcus and β-hemolytic streptococcus.[14]
- **Analgesic and anti-inflammatory:** Extract of *Dang Gui* has analgesic and anti-inflammatory effects similar to those of acetylsalicylic acid. It decreases vascular permeability to reduce inflammation.[15] Its anti-inflammatory effect is approximately 1.1 times stronger than acetylsalicylic acid, and its analgesic effect is approximately 1.7 times stronger than acetylsalicylic acid.[16,17]

CLINICAL STUDIES AND RESEARCH

- **Cough and wheezing:** In one clinical study, essential oil of *Dang Gui* given three times daily for 7 days was found to be 90.2% effective in treating 51 patients with coughing and wheezing. Most patients began to respond to the herbal treatment within 2 to 3 hours, with maximum effect shown at 8 to 24 hours.[18]
- **Low back and leg pain:** An herbal injection containing *Dang Gui* and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong) was found to be 97% effective in relieving pain when administered to the affected area once daily or every other day for 10 days.[19]
- **Arrhythmia:** According to one report, 100 patients with arrhythmia were treated with two *Dang Gui* preparations, with 83.3% rate of effectiveness. The first preparation was intravenous infusion of 60 to 120 ml of 25 to 50% *Dang Gui* preparation once daily for 15 days. The

Dang Gui (Radicis Angelicae Sinensis)

second preparation was 20 ml of 150% *Dang Gui* syrup given three times daily for 15 days.[20]

- **Stroke:** Patients with ischemic stroke were treated with intravenous infusion of *Dang Gui* one time daily for 15 to 30 doses per course of treatment. Of 40 patients, the study reported complete recovery in 12 patients, marked improvement in 13 patients, slight improvement in 11 patients, and no response in 4 patients.[21]
- **Migraine:** A preparation of *Dang Gui* demonstrated an 82.9% rate of effectiveness in 35 patients with migraine headache.[22]
- **Nephritis:** In one study, 33 patients with acute nephritis were treated with one injection of a 20% *Dang Gui* solution to acupuncture points daily, with good results. No restrictions were made in regards to intake of water and salt. Acupuncture points selected include *Shenshu* (BL 23), *Zhongji* (CV 3), *Shuiquan* (KI 5), and *ah shi* points. Out of 33 patients, 11 also received drug treatment.[23]
- **Pain:** Local injection of a 5% *Dang Gui* solution was found to have satisfactory effects to relieve post-surgical pain in patients who had chest operation. Out of 105 patients, 84 had excellent response, 16 had good response, and 5 had poor response.[24]
- **Upper gastrointestinal bleeding:** In a clinical study, patients with upper gastrointestinal bleeding were treated with 4.5 grams of powdered *Dang Gui* three times daily with marked effectiveness. Out of 40 patients, the study reported remarkable improvement in 30 patients, moderate improvement in 4 patients, and no response in 6 patients.[25]
- **Liver disease:** One intramuscular injection of *Dang Gui* (equivalent to 4 grams of the dried herb) daily for 2 months stimulated symptomatic improvement in 17 patients with chronic hepatitis and 10 patients with liver cirrhosis.[26]
- **Enuresis:** According to one report, 87 patients who had enuresis for more than 2 years were treated with daily injection of 5% *Dang Gui* solution to acupuncture points for 1 week with a 90% rate of effectiveness. The treatment protocol was to inject 0.5 to 1.0 ml of *Dang Gui* solution into each point one time daily. Three to four acupuncture points were selected for each treatment. Points selected included *Shenshu* (BL 23), *Dachangshu* (BL 25), *Pangguangshu* (BL 28), *Guanyuan* (CV 4), *Zhongji* (CV 3), *Sanyinjiao* (SP 6), and *Yiniao* (Extra).[27]
- **Menstrual pain:** Essential oil of *Dang Gui* given three times daily for 15 to 20 days was 76.79% effective in relieving menstrual pain in 112 patients.[28]
- **Uterine prolapse:** In a clinical study, 67 patients with uterine prolapse were treated with injections of *Dang Gui*, with complete recovery in 27 patients, moderate improvement in 34 patients, and no response in 6 patient. The overall rate of effectiveness was 90%. The treatment protocol was to inject 2 ml of a 50% *Dang Gui* solution daily into the acupuncture points *Sanyinjiao* (SP 6) and *Zusanli* (ST 36), alternating sides with each treatment.[29]
- **Insomnia:** Injection of 2 ml of a 5% *Dang Gui* solution bilaterally into *Anmian* points one time daily or every other day for 10 treatments was found to be 88% effective in treating insomnia in 50 patients.[30]
- **Thromboangiitis obliterans:** In one study, 52 patients were treated with an injection of a 5% *Dang Gui* solution daily, 6 days per week for a total of 4 weeks, with an 88.5% rate of effectiveness. Effectiveness was defined as relief of pain, improvement of blood circulation, increase of peripheral body temperature, and enhancement of recovery.[31]
- **Herpes zoster:** One report describes 54 patients with herpes zoster who all recovered within 6 to 7 days after being treated with 0.5 to 1.0 gram of *Dang Gui* powder every 4 to 6 hours.[32]
- **Alopecia areata:** Oral administration of 9 grams of an herbal formula three times daily after meals showed satisfactory results in 40 patients with alopecia areata. The herbal formula was prepared by mixing 500 grams each of *Dang Gui* and *Bai Zi Ren* (Semen Platycladi) with honey to make pills.[33]
- **Psoriasis:** In a clinical study, 100 patients with psoriasis were treated with a combination injection, with complete recovery in 80 patients, moderate improvement in 15 patients, and slight improvement in 5 patients. The treatment protocol consisted of daily injection of 2% *Dang Gui* solution and 2% novocaine.[34]
- **Dermatological disorders:** In one study, 353 patients with various dermatological disorders were treated with a 90.7% effective rate, using 0.1 to 0.2 ml injectable of 0.5% *Dang Gui* on ear points every other day for 10 to 20 days per course of treatment. Ear points selected included Adrenal Cortex, Endocrine, *Shenmen*, Pituitary Gland, and Lung.[35]
- **Deafness:** Patients with acute-onset deafness were treated with intravenous infusion of 20 ml of 200% *Dang Gui* solution in 20 ml of D5W. The treatment protocol was to administer daily injections for 5 days per course of treatment, for a total of 4 to 5 courses. Out of 105 patients, the study reported complete recovery in 21 patients, marked improvement in 29 patients, moderate improvement in 29 patients, and no effect in 26 patients. The overall rate of effective was 75%.[36]
- **Anal fissure:** According to one study, the combination injection of *Dang Gui* and 1% lidocaine to the affected area in 114 patients had an rate of effectiveness of 96.5%.[37]
- **Chronic hypertrophic rhinitis:** According to one report, 43 patients were treated with a 90.7% rate of effectiveness using injection of herbs. The treatment protocol was to

Dang Gui (Radicis Angelicae Sinensis)

inject to the affected area 0.5 ml of a 5% *Dang Gui* solution and 0.3 ml of a 0.1% *Hong Hua* (Flos Carthami) solution.[38]

- **Chronic pharyngitis:** In one clinical study of 130 patients, injection of a *Dang Gui* preparation one time daily for 10 days provided satisfactory results. The treatment protocol was to inject the herb into *ah shi* points around T3 and T4.[39]
- **Fibrous cavernositis of the penis:** Two patients recovered completely after treatment by one injection of 2 ml of a 10% *Dang Gui* and 1 ml of 2% novocaine into the affected area each week for 5 to 10 weeks.[40]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** It has been suggested that concurrent use of *Dang Gui* and warfarin may potentiate the effect of warfarin. In one *in vitro* study, it was discovered that while *Dang Gui* treatment did not affect prothrombin time on its own, it significantly lowered prothrombin time values when given concurrently with warfarin.[41,42,43] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]
- **Scopolamine and cycloheximide:** Administration of *Dang Gui* extract at 1 g/kg was found to be effective in treating scopolamine- and cycloheximide-induced amnesia in rats.[44]
- **Acetaminophen:** It has been shown that *Dang Gui* treats acetaminophen-induced liver damage, presumably because *Dang Gui* promotes the generation of hepatocytes.[45,46]

TOXICOLOGY

Dang Gui has very low toxicity. The LD_{50} of *Dang Gui* in mice is 100 g/kg via injection. Overdose is characterized by fatigue, drowsiness, itching, stomach discomfort, and abdominal pain. Long-term ingestion at the dosage of 6 g/kg showed no abnormality in physical activities, food intake, body weight, urine examination, or hematological examination. There was a slight increase in cytochrome P-450.[47,48]

SUPPLEMENT

In traditional texts, different segments of *Dang Gui* are said to have slightly different actions:

- 當歸頭 / 当归头 *Dang Gui Tou* (Caput Radicis Angelicae Sinensis), the head of the root, is said to be the most tonifying part. It has hemostatic effects as well as an ascending nature that directs the flow of blood upwards.
- 當歸身 / 当归身 *Dang Gui Shen* (Corpus Radicis Angelicae Sinensis), the body, has stronger blood nourishing than blood-invigorating properties.
- 當歸尾 / 当归尾 *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), the tail, is most effective in invigorating blood and directing the flow outwards, to the channels and collaterals of the extremities.

AUTHORS' COMMENTS

Traditional Chinese medicine considers *Dang Gui* to be a blood tonic, and it is thus commonly used to treat pregnant women who have blood deficiency. In fact, several classic formulas specifically use *Dang Gui* to tonify blood and stabilize pregnancy, such as *Bao Chan Wu You Fang* (Preserve Pregnancy and Care Free Decoction) from *Zeng Bu Nei Jing Shi Yi* (Supplement to the Formulas Omitted from the Inner Classic). However, when caring for pregnant women, one should always exercise caution and use medicinal substances only when the benefits outweigh the risks.

Dang Gui and *Bai Shao* (Radix Paeoniae Alba) are both blood tonics. *Dang Gui* is warm and dispersing, and more suitable for blood-deficient patients with yang deficiency and coldness. *Bai Shao* is cool and stable, and is used for blood and yin-deficient patients with heat.

According to Dr. Richard Tan, the use of *Dang Gui* (Radicis Angelicae Sinensis) and *Huang Qi* (Radix Astragali), such as in *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood), can be used to raise WBC and RBC counts in patients receiving chemotherapy or radiation treatments.

Shu Dí Huang (Radix Rehmanniae Preparata)

熟地黄

Pinyin Name: *Shu Di Huang*
Literal Name: "cooked earth's yellowness," "cooked earth yellow"
Alternate Chinese Names: *Shu Di, Da Di Huang*
Original Source: *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies)
English Name: cooked rehmannia, prepared rhizome of adhesive rehmannia
Botanical Name: *Rehmannia glutinosa* Libosch (*Di Huang*)
Pharmaceutical Name: Radix Rehmanniae Preparata
Properties: sweet, slightly warm
Channels Entered: Liver, Kidney

Shu Di Huang (Radix Rehmanniae Preparata)

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Blood

Blood deficiency: *Shu Di Huang* (Radix Rehmanniae Preparata) treats blood deficiency and the consequent lack of nourishment to the Liver and Heart. Proper circulation of blood is dependent on the volume of blood being circulated. In anemic or blood-deficient patients, there is insufficient blood to nourish the organs. Typical signs include sallow or pale complexion, dizziness, palpitations, and insomnia. *Shu Di Huang* strongly nourishes and tonifies the blood.

- Anemia: combine *Shu Di Huang* with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). **Exemplar Formula:** *Si Wu Tang* (Four-Substance Decoction).
- Anemia with fatigue and weakness: use this herb with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Dang Gui* (Radicis Angelicae Sinensis), and *Bai Shao* (Radix Paeoniae Alba). **Exemplar Formula:** *Ba Zhen Tang* (Eight-Treasure Decoction).

Menstrual disorders: Blood belongs to the yin element and is the foundation of women's health. Irregular menstruation is often caused by blood stagnation or blood deficiency. Because the rich nature of *Shu Di Huang* may cause stagnation, it should only be used for patients with irregular menstruation arising from blood deficiency, and not for those with blood stagnation.

- Irregular menstruation: combine this herb with *Dang Gui* (Radicis Angelicae Sinensis), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Yi Mu Cao* (Herba Leonuri), and *Bai Shao* (Radix Paeoniae Alba).
- Hypermenorrhea because of blood deficiency: use charred *Shu Di Huang* with *Bai Shao* (Radix Paeoniae Alba), *Dang Gui* (Radicis Angelicae Sinensis), *Shan Zhu Yu* (Fructus Corni) and charred *Jing Jie* (Herba Schizonepetae).
- Chronic uterine bleeding resulting in yin and blood deficiencies: use it with charred *Jing Jie* (Herba Schizonepetae), *Hai Piao Xiao* (Endoconcha Sepiae), *E Jiao* (Colla Corii Asini), and charred *Ai Ye* (Folium Artemisiae Argyi).
- Infertility due to *ren* (conception) and *chong* (thoroughfare) channel deficiencies with blood deficiency and heat: use this herb with *Huang Lian* (Rhizoma Coptidis) and *Dang Gui* (Radicis Angelicae Sinensis).

Gestational and postpartum disorders: *Shu Di Huang* treats restless fetus, habitual miscarriage, and postpartum complications. *Shu Di Huang* is used as the main herb in formulas that treat lower abdominal pain, edema, nausea, and vomiting caused by deficiency from sudden loss of blood in postpartum women.

- Restless fetus or habitual miscarriage: combine it with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Gui* (Radicis Angelicae Sinensis), *Xu Duan* (Radix Dipsaci), and *Sha Ren* (Fructus Amomi). **Exemplar Formula:** *Tai Shan Pan Shi San* (Powder that Gives the Stability of Mount Tai).

2. Tonifies Liver and Kidney Yin

Liver and Kidney yin deficiencies: Clinical presentations include soreness and weakness of the lower back and knees, dizziness, vertigo, tinnitus, diminished hearing, tidal fever, night sweats, nocturnal emissions, a thready, rapid pulse, and a dry, cracked tongue with scanty or no coating. *Shu Di Huang* nourishes the yin and blood of the Liver and Kidney. It is often combined with yang-tonic herbs to fortify Kidney yang as well.

- Liver and Kidney yin deficiencies: combine *Shu Di Huang* with *Shan Yao* (Rhizoma Dioscoreae), *Shan Zhu Yu* (Fructus Corni), *Mu Dan Pi* (Cortex Moutan), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis). **Exemplar Formula:** *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).
- Kidney yin-deficient fire: use it with *Zhi Mu* (Radix Anemarrhenae), *Huang Bai* (Cortex Phellodendri), *Gui Ban* (Plastrum Testudinis) and the bone marrow of pigs. **Exemplar Formula:** *Da Bu Yin Wan* (Great Tonify the Yin Pill).
- Weakness and soreness of the knees because of Kidney yin-deficient fire: add *Shu Di Huang* to *Gui Ban* (Plastrum Testudinis), *Suo Yang* (Herba Cynomorii), and *Zhi Mu* (Radix Anemarrhenae). **Exemplar Formula:** *Hu Qian Wan* (Hidden Tiger Pill from the Analytic Collection).
- Kidney yin and yang deficiencies: combine this herb with *Gou Qi Zi* (Fructus Lycii), *Shan Yao* (Rhizoma Dioscoreae), *Shan Zhu Yu* (Fructus Corni), *Fu Zi* (Radix Aconiti Lateralis Praeparata), and *Rou Gui* (Cortex Cinnamomi). **Exemplar Formula:** *You Gui Wan* (Restore the Right [Kidney] Pill).

***Xiao ke* (wasting and thirsting) syndrome:** *Shu Di Huang* strongly tonifies yin for treatment of *xiao ke*, and is especially effective for polyuria.

- *Xiao ke* syndrome with predominant polyuria: combine this herb with *Shan Yao* (Rhizoma Dioscoreae), *Shan Zhu Yu* (Fructus Corni), and *Ze Xie* (Rhizoma Alismatis).
- *Xiao ke* syndrome with qi deficiency: add it to with *Ren Shen* (Radix Ginseng), *Huang Qi* (Radix Astragali), and *Xi Yang Shen* (Radix Panacis Quinquefolii).
- *Xiao ke* syndrome with yin-deficient fire: use *Shu Di Huang* with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), *Di Gu Pi* (Cortex Lycii) and *Tian Hua Fen* (Radix Trichosanthis).

Shu Di Huang (Radix Rehmanniae Preparata)

3. Replenishes *Jing* (Essence) and Fills the Marrow

Developmental delay and premature aging: *Jing* and blood are derived from the same source. *Shu Di Huang* tonifies blood and nourishes *jing*. Deficiencies of *jing* and blood cause both physical and mental developmental delays in children. The manifestations of these deficiencies in adults include prematurely gray hair, forgetfulness, dizziness, blurry vision, impotence, tinnitus, and other signs of early aging.

- Developmental delay in children and premature aging: combine *Shu Di Huang* with *He Shou Wu* (Radix Polygoni Multiflori), *Gou Qi Zi* (Fructus Lycii), *Lu Jiao Jiao* (Gelatinum Cornu Cervi), *Gui Ban Jiao* (Gelatinum Plastrum Testudinis), and *Tu Si Zi* (Semen Cuscutae).

4. Arrests Cough and Wheezing

Respiratory disorders: This type of deficient cough, wheezing, and asthma is associated with Kidney deficiency with inability to grasp the qi downwards. The prolonged, labored inhalation process results in accelerated respiration and shortness of breath.

- Cough, wheezing, and sputum due to Kidney deficiency: combine *Shu Di Huang* with *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae), *Fu Ling* (Poria), *Gan Cao* (Radix Glycyrrhizae) and *Dang Gui* (Radicis Angelicae Sinensis).
- Cough, shortness of breath, accelerated respiration: incorporate this herb with *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Shan Yao* (Rhizoma Dioscoreae), *Fu Ling* (Poria), and *Shan Zhu Yu* (Fructus Corni).

DOSAGE

10 to 30 grams in decoction. *Shu Di Huang* is also used in pill, powder and paste forms. *Shu Di Huang* is prepared by steaming the herb with water or grain-based liquor, followed by slicing and drying. Traditionally, charred *Shu Di Huang* is used to stop bleeding.

CAUTIONS / CONTRAINDICATIONS

- Use *Shu Di Huang* with caution in patients with Spleen and Stomach deficiencies. Because the stagnating and cloying nature of *Shu Di Huang* may impair digestion, it is contraindicated in excess conditions with dampness, phlegm or qi stagnation.

CHEMICAL COMPOSITION

Catalpol, 6-o-acetylcatalpol, aucubin, melittoside, rehmanniosides A,B,C,D; rehmaglutins A,B,C,D; glutinoside, rehmannans A,B,C; stachyose, D-mannitol.[1]

PHARMACOLOGICAL EFFECTS

See *Sheng Di Huang* (Radix Rehmanniae).

CLINICAL STUDIES AND RESEARCH

- **Hypertension:** According to one report, 62 patients with cardiovascular disorders were treated with 30 to 50 grams of *Shu Di Huang* daily for 2 weeks. There was a reduction of blood pressure, total cholesterol levels, and triglycerides. There was also an improvement in cerebral blood flow and in ECG results.[2]
- **Myelitis:** In one clinical study on retrogressive myelitis in 1,000 patients, administration of an herbal formula two to three times daily for 1 to 2 months provided significant improvement in 803 patients, moderate improvement in 141 patients, and no response in 56 patients. The herbal formula contained *Shu Di Huang*, *Rou Cong Rong* (Herba Cistanches), *Lu Han Cao* (Herba Pyrolae), *Gu Sui Bu* (Rhizoma Drynariae), *Yin Yang Huo* (Herba Epimedii), *Ji Xue Teng* (Caulis Spatholobi), and *Lai Fu Zi* (Semen Raphani).[3]
- **Electric ophthalmitis:** One study reported that placing a 2 mm slice of *Shu Di Huang* on the eye showed good therapeutic effect in treating patients with electric ophthalmitis.[4]

AUTHORS' COMMENTS

Shu Di Huang is frequently used with *Dang Gui* (Radicis Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong). The combination of these three herbs has a maximum tonifying effect, with minimal side effects, as the stagnating tendencies of the tonics are offset by the blood-invigorating activities.

Sha Ren (Fructus Amomi) or *Chen Pi* (Pericarpium Citri Reticulatae) is commonly used with *Shu Di Huang* to offset its stagnating nature. In addition, the concurrent use of *Sha Ren* or *Chen Pi* will protect the Spleen and Stomach and promote digestion.

See *Sang Shen Zi* (Fructus Mori) for comparison of these two herbs.

There are three types of *Di Huang* (Rehmanniae): *Xian Di Huang* (Radix Rehmanniae Recens), *Sheng Di Huang* (Radix Rehmanniae), and *Shu Di Huang* (Radix Rehmanniae Preparata). All three nourish yin and generate body fluids to treat yin and blood deficiencies. Despite similarities between the three, there are also differences.

- *Xian Di Huang* is the fresh root. It is bitter, sweet and very cold. In comparison with the others, *Xian Di Huang* has a weaker function to nourish yin, but a stronger function to clear heat, cool blood, relieve thirst and dispel irritability. Also, it is less stagnating in nature, and thus is used mostly for patients with heat in the blood and yin deficiency.
- *Sheng Di Huang* is the dried, unprocessed root. It is

Shu Di Huang (Radix Rehmanniae Preparata)

weaker than *Xian Di Huang* for clearing heat and cooling the blood. It is mostly used to address heat in the blood that is injuring body fluids, *jing* (essence) or blood.

- *Shu Di Huang* is the processed root (processed by steaming with water or grain-based liquor). It has the strongest tonifying action of the three, and is most suitable for use to alleviate *jing* (essence), blood, and yin deficiencies.

He Shou Wu (Radix Polygoni Multiflori)

何首烏 何首乌

Pinyin Name: *He Shou Wu*
Literal Name: "black haired Mr. He," "Mr. He's black hair"
Alternate Chinese Names: *Shou Wu, Sheng Shou Wu, Zhi Shou Wu*
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: polygonum, fo-ti root, fleece flower root, multiflower knotweed tuber
Botanical Name: *Polygonum multiflorum* Thunb. (*He Shou Wu*)
Pharmaceutical Name: Radix Polygoni Multiflori
Properties: sweet, bitter, astringent, slightly warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Replenishes *Jing* (Essence) and Nourishes the Blood of the Liver and Kidney

Blood and *jing* deficiencies: *He Shou Wu* (Radix Polygoni Multiflori) treats blood and *jing* deficiencies that manifest as dizziness, blurred vision, gray hair, soreness and weakness of the lower back and knees, and spermatorrhea. It tonifies the *jing* and blood of the Liver and Kidney. This herb is one of the best tonics, as it is warm yet not drying, tonifying yet not stagnating like other tonics. Processed *He Shou Wu* is most effective for this function.

- Prematurely gray hair: combine *He Shou Wu* with *Da Zao* (Fructus Jujubae), *Gou Qi Zi* (Fructus Lycii), *Tu Si Zi* (Semen Cuscutae), *Dang Gui* (Radicis Angelicae Sinensis), *Huai Niu Xi* (Radix Achyranthis Bidentatae), *Nu Zhen Zi* (Fructus Ligustri Lucidi), *Han Lian Cao* (Herba Ecliptae) and *Hei Zhi Ma* (Semen Sesami Nigrum). **Exemplar Formula:** *Qi Bao Mei Ran Wan* (Seven-Treasure Special Pill for Beautiful Whiskers).
- Early signs of aging as described above: combine this herb with *Sang Shen Zi* (Fructus Mori), *Hei Zhi Ma* (Semen Sesami Nigrum), *Shu Di Huang* (Radix Rehmanniae Preparata), and *Du Zhong* (Cortex Eucommiae).
- Nocturnal emissions, spermatorrhea, vaginal discharge: add it to *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae), *Qian Shi* (Semen Euryales), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae) and *Yuan Zhi* (Radix Polygalae).
- Anemia: use it with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Dizziness, blurred vision, tinnitus, numbness of limbs, soreness and weakness of the lower back and knees: use *He Shou Wu* with *Xi Xian Cao* (Herba Siegesbeckiae), *Sang Shen Zi* (Fructus Mori), *Hei Zhi Ma* (Semen Sesami Nigrum), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Du Zhong* (Cortex Eucommiae).

He Shou Wu (Radix Polygoni Multiflori)

Menstrual disorders: The Liver stores blood and is essential in regulating periods. Deficient Liver blood usually results in symptoms of irregular menstruation and abnormal uterine bleeding. Dry-fried *He Shou Wu* is preferred for this particular application.

- Menstrual disorders: combine dry-fried *He Shou Wu* with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), and *Shu Di Huang* (Radix Rehmanniae Preparata).

2. Eliminates Toxins

Toxic sores: Unprocessed *He Shou Wu* is cold, and effectively clears heat and eliminates toxins. It treats abscesses, scrofula, goiter and neck lumps, chronic, non-healing sores with pus and ulceration, that damage yin and blood.

- Scrofula, goiter and neck lumps: use unprocessed *He Shou Wu* with *Ku Shen Gen* (Radix Sophorae Flavescentis), *Fang Feng* (Radix Saposhnikoviae), *Bo He* (Herba Menthae), and alcohol.
- Abscesses and swellings of various parts of the body: combine this herb with *Fang Feng* (Radix Saposhnikoviae), *Jing Jie* (Herba Schizonepetae), *Jin Yin Hua* (Flos Lonicerae) and *Ku Shen Gen* (Radix Sophorae Flavescentis).
- Swellings and nodules caused by fire toxins and yin and blood deficiencies: combine it with *Xia Ku Cao* (Spica Prunellae), *Chuan Xiong* (Rhizoma Ligustici Chuanxiong), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Zhi* (Radix Angelicae Dahuricae) and *Chuan Mu Tong* (Caulis Clematidis Armandii). It can also be used alone topically to eliminate toxins and relieve swelling.

3. Treats Malarial Disorders

Unprocessed *He Shou Wu* acts to tonify and eliminates toxins at the same time. It can be used to treat malaria characterized by yin and blood deficiencies that involves more heat than cold.

- Malarial disorders: combine 25 to 30 grams of *He Shou Wu* with 3 grams of *Gan Cao* (Radix Glycyrrhizae).
- Malarial disorders with more fever than chills (due to yin and blood deficiencies): combine this herb with *Bie Jia* (Carapax Trionycis) and *Zhu Sha* (Cinnabaris).
- Malarial disorders with more qi deficiency: add it to *Qing Hao* (Herba Artemisiae Annuae) and *Chang Shan* (Radix Dichroae).

4. Moistens the Intestines and Unblocks the Bowels

Constipation because of intestinal dryness: Regular bowel movements are dependent on proper nourishment of the intestines. When body fluids and blood are deficient, constipation or dry stools may occur. This condition is usually present in anemic patients, postpartum women, the elderly, or in patients who have just recovered from a chronic illness. Unprocessed *He Shou Wu* is preferred for this application.

- Constipation or dry stools: *He Shou Wu* is used alone, or combined with *Dang Gui* (Radicis Angelicae Sinensis), *Huo Ma Ren* (Fructus Cannabis), and *Hei Zhi Ma* (Semen Sesami Nigrum) to lubricate the bowels.

5. Lowers Cholesterol, Treats Cardiovascular Disorders

He Shou Wu has been used recently to lower cholesterol, treat atherosclerosis and prevent cholesterol from remaining in the liver. For this application, use equal portions of unprocessed and dry-fried *He Shou Wu*.

- Angina, coronary heart disorder, hypertension, or epigastric pain: combine both processed and unprocessed forms of *He Shou Wu* with *Dan Shen* (Radix Salviae Miltiorrhizae).

DOSAGE

10 to 30 grams in herbal decoction. *He Shou Wu* is used in the form of pills, decoction, grain-based liquor, powder or paste. External use can be either in the form of powder or herbal soaks. The unprocessed herb is bitter, and has a strong action to eliminate heat, disperse nodules, and induce bowel movement. Diarrhea or loose stools is one of the main side effects when the unprocessed herb is consumed. To minimize this effect, *He Shou Wu* is processed by steaming it with the juice of black beans and then drying it under the sun. Processing the herb with black beans eliminates the side effect of diarrhea, and potentiates the therapeutic effect to strengthen the Liver and Kidney, benefit blood and *jing* (essence), and enhance its action to benefit hair.

CAUTIONS / CONTRAINDICATIONS

- *He Shou Wu* should neither be decocted nor stored in metal containers. It should not be combined with *Ci Shi* (Magnetitum), *Dai Zhe Shi* (Haematitum), *Yu Yu Liang* (Limonitum) or *Sheng Tie Luo* (Frusta Ferri).
- *He Shou Wu* should be used with caution in patients with Spleen deficiency, loose stools, or diarrhea. It is not suitable for patients with dampness or phlegm.

CHEMICAL COMPOSITION

Chrysophanol, emodin, sennoside, physcion, questin, citrosein, questinol, 2-acetylemodin, chein, chrysophanol anthrone, rhapontin, tricin, calcium, iron, zinc, copper.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Injection of a 20% *He Shou Wu* preparation has a marked effect to reduce the heart

He Shou Wu (Radix Polygoni Multiflori)

rate in frog specimens. This effect is milder than meperidine hydrochloride.[2]

- **Antihyperlipidemic:** Administration of *He Shou Wu* is associated with an increase in HDL and a decrease in triglycerides and cholesterol, as demonstrated in various laboratory studies.[3]
- **Antiaging:** Administration of *He Shou Wu* retards the aging process and increases the life expectancy of subjects in many laboratory studies.[4]
- **Immunostimulant:** Administration of *He Shou Wu* is associated with an increase in T-lymphocytes and white blood cells, and increased activity of the macrophages in mice.[5]
- **Gastrointestinal:** *He Shou Wu* increases intestinal peristalsis, moistens the bowel, and promotes bowel movement.[6]
- **Endocrine:** Administration of *He Shou Wu* is associated with an increase in hormonal secretion by the adrenal and thyroid glands.[7]

CLINICAL STUDIES AND RESEARCH

- **Hypercholesterolemia:** In one study, 178 patients with hypercholesterolemia were treated with *He Shou Wu* extract (dosage equivalent to 4 to 5 grams of dried herb) three times daily for 2 to 12 weeks (up to 14 months in rare cases) and showed marked improvement in 38.2% and moderate improvement in 23.6% of the patients. The average reduction of cholesterol was 39 mg/dL.[8]
- **Whooping cough:** An herbal decoction containing 6 to 12 grams of *He Shou Wu*, and 1.5 to 3 grams of *Gan Cao* (Radix Glycyrrhizae) was taken in 4 to 6 equally-divided doses daily to treat whooping cough. Small portions of *He Zi* (Fructus Chebulae) or *Ying Su Ke* (Pericarpium Papaveris) were added if necessary to stop diarrhea. Out of 35 patients, 19 recovered completely, 8 had significant improvement, 4 showed moderate improvement, and 4 had no response.[9]
- **Insomnia:** According to one report, 141 patients with insomnia were treated with both intramuscular injection and oral ingestion of *He Shou Wu* for 20 to 30 days with marked improvement in 53.9% and moderate improvement in 44.7% of the patients. The overall rate of effectiveness was 98.6%.[10]
- **Schizophrenia:** In one study, the combination of herbal decoction and prescription drugs was used to treat 95 patients with schizophrenia. The herbal decoction was given twice daily, and contained 94 grams of fresh *He Shou Wu*, 94 grams of fresh *Ye Jiao Teng* (Caulis Polygoni Multiflori), and 2 to 6 pieces of *Da Zao* (Fructus Jujubae). Promethazine and chlorpromazine were also given to the patients as needed. Out of 95 patients, 8 recovered completely, 47 improved significantly, 11 showed moderate improvement, and 29 showed no improvement. The overall rate of effectiveness was 58%.[11]
- **Prematurely gray hair:** In one clinical study, an herbal formula was 88.98% effective in treating 36 patients with prematurely gray hair. The herbal formula was prepared by soaking 30 grams of processed *He Shou Wu*, 30 grams of *Shu Di Huang* (Radix Rehmanniae Preparata) and 15 grams of *Dang Gui* (Radicis Angelicae Sinensis) in 1,000 ml of rice wine for 10 to 15 days prior to ingestion. Patients were advised to take 15 to 30 ml of the tincture daily.[12]
- **Malaria:** Seventeen children with malaria were treated with satisfactory results using an herbal decoction containing 18 to 25 grams of *He Shou Wu* and 1.5 to 3 grams of *Gan Cao* (Radix Glycyrrhizae). The herbs were cooked for 2 hours, and the decoction was taken in three equally-divided doses three times daily, before meals.[13]

TOXICOLOGY

No fatalities were reported when *He Shou Wu* was given in mice at dosages up to 1,000 g/kg. The LD_{50} for *He Shou Wu* in mice via intraperitoneal injection is 169.4 g/kg.[14]

AUTHORS' COMMENTS

According to Dr. Tsai Wen-Qi, use of *He Shou Wu*, such as in *Qi Bao Mei Ran Wan* (Seven-Treasure Special Pill for Beautiful Whiskers), promotes hair growth and increases sperm count and mobility.

Bai Shao (Radix Paeoniae Alba)

白芍 白芍

Pinyin Name: *Bai Shao*
Literal Name: "white peony"
Alternate Chinese Names: *Bai Shao Yao, Shao Yao, Hao Bai Shao, Jin Shao Yao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: white peony root
Botanical Name: *Paeonia lactiflora* Pall. (*Shao Yao*)
Pharmaceutical Name: Radix Paeoniae Alba
Properties: bitter, sour, cool
Channels Entered: Liver, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Blood and Preserves Yin

Liver blood deficiency: The chief manifestations of Liver blood deficiency include: dull and pale complexion, dizziness, tinnitus, and brittle, pale nails. *Bai Shao* (Radix Paeoniae Alba), cool in thermal property, nourishes the blood and yin and is best for blood-deficient patients with heat signs.

- Blood deficiency or anemia: combine *Bai Shao* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Dang Gui* (Radicis Angelicae Sinensis), *He Shou Wu* (Radix Polygoni Multiflori), *E Jiao* (Colla Corii Asini), and *Lu Jiao Jiao* (Gelatinum Cornu Cervi).

Obstetric/gynecological disorders, irregular menstruation, gestational and postpartum disorders: Chronic deficiency of Liver blood results in deficiencies of the *ren* (conception) and *chong* (thoroughfare) channels. The symptoms may include: irregular menstruation, dysmenorrhea, uterine bleeding, and gestational and postpartum disorders. *Bai Shao* nourishes blood, softens the Liver and is an important herb to regulate menstruation and alleviate pain. It is best for patients with blood-deficient heat or Liver yang rising with underlying yin or blood deficiencies.

- Menstrual disorders with blood stagnation signs such as dysmenorrhea and clots, delayed onset or amenorrhea: combine *Bai Shao* with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi), *Pu Huang* (Pollen Typhae), *Gan Cao* (Radix Glycyrrhizae), *Yan Hu Suo* (Rhizoma Corydalis), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami).
- Menstrual disorders with cold signs such as cold extremities, dark purple clots, pain aggravated by cold, delayed menstruation: use baked *Bai Shao* with *Pao Jiang* (Rhizoma Zingiberis Preparatum), *Rou Gui* (Cortex Cinnamomi), and *Ai Ye* (Folium Artemisiae Argyi).
- Menstrual disorders with heat signs such as profuse flow of fresh, red blood, heat sensations, or early menstruation: combine *Bai Shao* with *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Mu Dan Pi* (Cortex Moutan).
- Menstrual disorders with Liver qi stagnation, pre-menstrual syndrome, bloating, irritability, distended breasts: add this herb to *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi), *Su Geng* (Caulis Perillae), and *Qing Pi* (Pericarpium Citri Reticulatae Viride).
- Menstrual disorders with qi deficiency signs such as fatigue, weakness, pale and scanty menstruation: combine *Bai Shao* with *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), *Ren Shen* (Radix Ginseng), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Lower back pain or restless fetus due to Kidney deficiency: add it to *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), *Sang Ji Sheng* (Herba Taxilli), and *Tu Si Zi* (Semen Cuscutae).
- Abnormal uterine bleeding: combine this herb with *E Jiao* (Colla Corii Asini), *Han Lian Cao* (Herba Ecliptae), *Xian He Cao* (Herba Agrimoniae), and *Hai Piao Xiao* (Endoconcha Sepiae) to stop bleeding.

Weak constitution, with spontaneous or night sweating: Night sweating is indicative of yin deficiency and spontaneous sweating is suggestive of qi deficiency. Night sweating by definition is perspiration that takes place during sleep but stops upon awakening. Night sweating does not necessarily have to happen during the night but any perspiration during sleep would qualify as night sweating, which occurs as yang retreats to the interior

Bai Shao (Radix Paeoniae Alba)

during sleep and pushes out body fluids. Spontaneous sweating occurs while one is awake, regardless of day or night, with or without exertion, as it is the result of weakness of the *wei* (defense) *qi* with inability to control the opening and closing of the pores. *Bai Shao* may be used to stop both night and spontaneous sweating by nourishing the *ying* (nutritive) level and preserving yin.

- Night sweating: combine *Bai Shao* with *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Fu Xiao Mai* (Semen Tritici Aestivi Levis), *Bai Zi Ren* (Semen Platycladi), and *Mu Li* (Concha Ostreae).
- Spontaneous sweating: use it with *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens), *Da Zao* (Fructus Jujubae), *Long Gu* (Os Draconis), and *Mu Li* (Concha Ostreae) to help consolidate the *ying* (nutritive) and *wei* (defensive) levels to prevent leakage of sweat. **Exemplar Formula:** *Gui Zhi Jia Long Mu Tang* (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell).
- Wind-cold with deficiency and perspiration: combine it with *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae). **Exemplar Formula:** *Gui Zhi Tang* (Cinnamon Twig Decoction).
- Excessive perspiration caused by misuse of diaphoretic herbs to treat wind-cold syndrome: incorporate *Bai Shao* with *Gui Zhi* (Ramulus Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae).

Liver wind rising with yin and blood deficiencies: Liver yin and blood deficiencies often occur when there has been long-standing retention of pathogenic heat from a warm-febrile disease, or are caused by the misuse of heat-clearing, purgative or diaphoretic herbs. Symptoms include muscle spasms, twitches, tremors, alternating flexion and extension of the extremities, tonic-clonic spasms or convulsions in severe cases.

- Muscle spasms: combine *Bai Shao* with *Sheng Di Huang* (Radix Rehmanniae), *E Jiao* (Colla Corii Asini), *Mu Li* (Concha Ostreae), *Bie Jia* (Carapax Trionycis), *Gui Ban* (Plastrum Testudinis), *Mai Men Dong* (Radix Ophiopogonis) and egg yolks. **Exemplar Formula:** *Da Ding Feng Zhu* (Major Arrest Wind Pearl).

***Bi zheng* (painful obstruction syndrome):** *Bi zheng* due to blood deficiency often causes symptoms such as numbness (especially in the extremities), tightness of the tendons, and impaired agility.

- *Bi zheng*: incorporate *Bai Shao* with *Huang Qi* (Radix Astragali), *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae).
- Bone spurs: combine it with *Mu Gua* (Fructus Chaenomelis), *Ji Xue Teng* (Caulis Spatholobi), *Wei Ling Xian* (Radix Clematidis), *Gan Cao* (Radix Glycyrrhizae) and *Po Bu Zi Ye* (Folium Cordia Dichotoma).

2. Nourishes the Liver to Calm Liver Yang and Liver Wind

Liver yang rising: Symptoms of Liver yang rising because of deficient Liver yin and blood include: dizziness, tinnitus, flushed face, red eyes, irritability, bad temper, headache, vertigo, and poor balance (feeling of heaviness on top and lightness at the feet). In severe cases, convulsions, delirium, and loss of consciousness may occur. *Bai Shao* nourishes blood, preserves yin and softens the Liver. It is cool in nature, which helps to disperse heat. The Liver governs the sinews: excess accumulation of heat in the body injures the fluids and deprives the tendons and sinews of nourishment.

- Liver yang rising: combine *Bai Shao* with *Sheng Di Huang* (Radix Rehmanniae), *Huai Niu Xi* (Radix Achyranthis Bidentatae), *Dai Zhe Shi* (Haematitum), and *Mu Li* (Concha Ostreae) to nourish the yin and calm the yang. **Exemplar Formula:** *Jian Ling Tang* (Construct Roof Tiles Decoction).
- Liver yang rising with Liver wind: Treat these symptoms by combining *Bai Shao* with *Ju Hua* (Flos Chrysanthemi), *Sang Ye* (Folium Mori), *Sheng Di Huang* (Radix Rehmanniae), *Mu Li* (Concha Ostreae), *Shi Jue Ming* (Concha Haliotidis), and *Tian Ma* (Rhizoma Gastrodiae).

3. Softens the Liver and Relieves Pain

Pain and spasms: *Bai Shao* is often used for pain in the muscles, tendons and sinews caused by lack of nourishment. *Bai Shao* softens the liver and also relieves epigastric, intercostal, hypochondriac and abdominal pain, and spasms and cramps of the smooth muscles and tendons.

- Epigastric, hypochondriac or flank pain and spasms: combine *Bai Shao* with *Gan Cao* (Radix Glycyrrhizae) to relieve smooth muscle spasms. **Exemplar Formula:** *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction).
- Severe epigastric or abdominal pain or cramps caused by the Liver overacting on the deficient, cold, middle *jiao:* add this herb to *Gui Zhi* (Ramulus Cinnamomi), *Yi Tang* (Saccharum Granorum), *Da Zao* (Fructus Jujubae), *Gan Cao* (Radix Glycyrrhizae), and *Sheng Jiang* (Rhizoma Zingiberis Recens) to warm the middle *jiao* and disperse cold. **Exemplar Formula:** *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction).
- Numbness, spasms, and pain in the limbs from blood deficiency: combine this herb with *Gan Cao* (Radix Glycyrrhizae).

Bai Shao (Radix Paeoniae Alba)

- *Bi zheng* (painful obstruction syndrome) due to coldness and blood deficiency: incorporate it with *Mu Gua* (Fructus Chaenomelis), *Gui Zhi* (Ramulus Cinnamomi), *Ji Xue Teng* (Caulis Spatholobi), *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), and *Shen Jin Cao* (Herba Lycopodii).
- Chronic *bi zheng* (painful obstruction syndrome) due to wind, cold and dampness with blood deficiency: combine *Bai Shao* with *Du Huo* (Radix Angelicae Pubescentis), *Qin Jiao* (Radix Gentianae Macrophyllae), *Ren Shen* (Radix Ginseng), *Dang Gui* (Radicis Angelicae Sinensis), and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *San Bi Tang* (Three-Painful Obstruction Decoction).

Breast distention, pre-menstrual syndrome: Breast distention and symptoms of pre-menstrual syndrome such as mood swings, irritability, restlessness, and bad temper are associated with Liver qi stagnation with underlying Liver blood and yin deficiencies.

- Pre-menstrual syndrome: combine *Bai Shao* with *Chai Hu* (Radix Bupleuri), *Dang Gui* (Radicis Angelicae Sinensis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Gan Cao* (Radix Glycyrrhizae) to relieve Liver qi stagnation, nourish the blood and stop pain. **Exemplar Formula:** *Xiao Yao San* (Rambling Powder).

Diarrhea, borborygmus with abdominal pain: The Liver overacting on the Spleen creates stagnant qi with symptoms of borborygmus, and abdominal pain that is relieved by diarrhea.

- Diarrhea, borborygmus and abdominal pain: combine dry-fried *Bai Shao* with dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Chen Pi* (Pericarpium Citri Reticulatae) and *Fang Feng* (Radix Saposhnikoviae). **Exemplar Formula:** *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea).

Dysenteric disorders with rectal tenesmus: Dysenteric disorders due to damp-heat accumulation in the lower *jiao* can result in burning diarrhea with rectal tenesmus and burning sensations in the anus.

- Dysenteric disorders with rectal tenesmus: incorporate *Bai Shao* with *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Da Huang* (Radix et Rhizoma Rhei), *Ge Gen* (Radix Puerariae), *Bai Tou Weng* (Radix Pulsatillae), *Mu Xiang* (Radix Aucklandiae), and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Shao Yao Tang* (Peony Decoction).

DOSAGE

5 to 10 grams in decoction. In severe cases, up to 30 grams of *Bai Shao* can be used. This herb is also used in pill or powder forms. The fresh or unprocessed herb has a stronger function to preserve yin and calm the Liver, and is commonly used to treat headaches, dizziness, tinnitus, and other conditions in which Liver yang is rising. The dry-fried form is warmer, and more effective to tonify blood and preserve yin. Dried-fried *Bai Shao* is best for abdominal pain, diarrhea, and borborygmus. Frying *Bai Shao* with grain-based liquor converts its cool property to neutral and improves its blood-invigorating effect, and is best for spasms, cramps, hypochondriac and abdominal pain from qi and blood stagnation.

CAUTIONS / CONTRAINDICATIONS

- *Bai Shao* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).
- *Bai Shao* is contraindicated in cases of middle *jiao* yang deficiency with cold.
- Because of its astringent nature, *Bai Shao* is contraindicated in patients with eczema or rashes from exterior wind attack with incomplete expression.
- Use of *Bai Shao* is contraindicated in postpartum patients with blood stagnation, or for those who are still bleeding.
- Use of *Bai Shao* may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Paeoniflorin, albiflorin, oxypaeoniflorin, benzoylpaeoniflorin, paeonin, hydroxypaeoniflorin.[1]

PHARMACOLOGICAL EFFECTS

- **CNS suppressant:** Subcutaneous injection of *Bai Shao* has demonstrated marked sedative and suppressant effects on the central nervous system (CNS) in mice. It prolonged the sleeping time induced by barbiturates, and has a protective effect against seizures induced by cardiazol.[2]
- **Gastrointestinal:** *Bai Shao* has an inhibitory influence on the smooth muscles of the intestines and the uterus. In addition, it inhibits the secretion of gastric acid to treat peptic ulcers in mice.[3]
- **Antibiotic:** Decoction of *Bai Shao* has been shown to have inhibitory action against *Bacillus dysenteriae, E. coli, Salmonella typhi, Pseudomonas aeruginosa, Staphylococcus aureus*, β-hemolytic streptococcus, *Diplococcus pneumoniae,* and some dermatophytes.[4]
- **Antipyretic and anti-inflammatory:** Paeoniflorin has demonstrated marked antipyretic and anti-inflammatory effects.[5]
- **Antiplatelet:** Paeoniflorin has a mild influence to inhibit emboli formation through delayed aggregation of platelets.[6]
- **Cardiovascular:** *Bai Shao* has demonstrated a marked

Bai Shao (Radix Paeoniae Alba)

action to relax blood vessels, dilate peripheral blood vessels, and cause a slight decrease in blood pressure.[7]

CLINICAL STUDIES AND RESEARCH

- **Intestinal spasm:** In one study, 85 patients with intestinal cramps and spasms were treated with one dose of an herbal decoction daily. Most patients reported complete remission of spasms and cramps without recurrence. The formula contained *Bai Shao* 30g, *Gui Zhi* (Ramulus Cinnamomi) 15g, *Gan Cao* (Radix Glycyrrhizae) 15g, and *Mu Gua* (Fructus Chaenomelis) 10g.[8]
- **Pain:** Intramuscular injection of 4 ml of an herbal preparation (equivalent to 4 grams of *Bai Shao* and 1 gram of *Gan Cao* (Radix Glycyrrhizae)) showed marked analgesic effect within 30 minutes without significant side effects. The analgesic action was 84.67% effective (105 out of 124 subjects) in patients with deficiency-type pain, and 50.98% effective (26 out of 51 subjects) in patients with excess-type pain.[9]
- **Trigeminal neuralgia:** The combination of *Bai Shao* and *Gan Cao* (Radix Glycyrrhizae) was effective in relieving pain in 30 out of 42 patients.[10]
- **Muscle spasms and twitching in the facial region:** The combination of *Bai Shao* and *Gan Cao* (Radix Glycyrrhizae) was effective in reducing the frequency and severity of muscle spasms and twitching in 11 out of 11 patients.[11]
- **Pain in the lower back and legs:** The combination of *Bai Shao* and *Gan Cao* (Radix Glycyrrhizae) was effective in relieving pain. Out of 33 elderly patients, 12 reported significant improvement, 16 reported moderate improvement, 4 reported slight improvement and 1 reported no improvement.[12]
- **Myotonia:** An herbal decoction was given orally one time daily for 50 days for treatment of myotonia. Out of 10 patients with congenital myotonia, 1 showed marked improvement, 4 showed moderate improvement, and 5 showed slight improvement. Out of 10 patients with atrophic myotonia, 2 showed marked improvement, 4 showed moderate improvement, and 4 showed slight improvement. The formula contained *Bai Shao* 40g, *Gan Cao* (Radix Glycyrrhizae) 25g, *Mu Gua* (Fructus Chaenomelis) 25g, *Niu Xi* (Radix Cyathulae seu Achyranthis) 25g, *Chan Tui* (Periostracum Cicadae) 12g, *Jiang Can* (Bombyx Batryticatus) 12g, and *Yi Yi Ren* (Semen Coicis) 30g.[13]
- **Habitual constipation:** According to one report, over 60 patients with chronic habitual constipation were treated with Chinese herbs, with great success. The basic herbal treatment consisted of 24 to 40 grams of fresh *Bai Shao* and 10 to 15 grams of fresh *Gan Cao* (Radix Glycyrrhizae) taken as herbal decoction twice daily. The herbal formula was modified specifically according to the following conditions: 24 to 32 grams of fresh *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added for qi deficiency; 10 to 15 grams of *Fu Zi* (Radix Aconiti Lateralis Praeparata) were added for excess cold and stagnation; 9 to 15 grams of *E Jiao* (Colla Corii Asini) were added for yin deficiency and blood dryness; 9 to 15 grams of *Dang Gui* (Radicis Angelicae Sinensis) were added for blood deficiency with coldness; 10 grams of *Mai Ya* (Fructus Hordei Germinatus) were added for qi stagnation; 20 to 30 grams of *Dai Zhe Shi* (Haematitum) were added and *Gan Cao* (Radix Glycyrrhizae) removed for hypertension with Liver yang excess; *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae) were added and *Gan Cao* (Radix Glycyrrhizae) removed for hypertension with excessive dampness accumulation. Most patients reported normal bowel movements within 2 to 4 doses without rebound constipation. Severe constipation required up to one week of continuous herbal therapy.[14]
- **Peptic ulcer:** In one study, patients with peptic ulcers were treated with Chinese herbs with marked success. Out of 120 patients, 83 reported marked improvement, 33 reported moderate improvement, and 4 reported no response. Patients with peptic ulcers caused by qi and blood stagnation were most responsive to the treatment. The treatment included *Bai Shao* 15 to 20g and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) 12 to 15g as the core combination. The herbal formula was modified specifically according to the following conditions: *Dang Shen* (Radix Codonopsis) 12g, *Huang Qi* (Radix Astragali) 12g, *Fu Ling* (Poria) 20g, and *Gan Jiang* (Rhizoma Zingiberis) 10g for deficiency and cold of the Spleen and Stomach; *Sha Shen* (Radix Glehniae seu Adenophorae) 10g, *Mai Men Dong* (Radix Ophiopogonis) 12g, *Dang Gui* (Radicis Angelicae Sinensis) 12g, and *Sheng Di Huang* (Radix Rehmanniae) 15g for Stomach yin deficiency; *Ru Xiang* (Gummi Olibanum) 10g, *Mo Yao* (Myrrha) 10g, *Dan Shen* (Radix Salviae Miltiorrhizae) 15g, and *Chuan Xiong* (Rhizoma Ligusticum Chuanxiong) 15g for qi and blood stagnation; and *Chai Hu* (Radix Bupleuri) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, and *Fu Ling* (Poria) 20g for Liver and Stomach disharmony.[15]
- **Hyperosteogeny:** In one study, patients with hyperosteogeny were treated with an herbal decoction once daily with good success. Out of 160 patients, 109 showed marked improvement, 42 showed moderate improvement, and 9 showed slight improvement. The herbal formula contained *Bai Shao* 30 to 60g, *Mu Gua* (Fructus Chaenomelis) 12g, *Ji Xue Teng* (Caulis Spatholobi) 15g, *Wei Ling Xian* (Radix Clematidis) 15g, *Gan Cao* (Radix Glycyrrhizae) 12g, and others if necessary.[16]

Bai Shao (Radix Paeoniae Alba)

- **Whooping cough:** According to one report, 33 patients with whooping cough were treated with an herbal decoction with marked success. The core combination consisted of 15 grams of *Bai Shao* and 5 grams of *Gan Cao* (Radix Glycyrrhizae). *Bai Bu* (Radix Stemonae) and *Bai He* (Bulbus Lilii) were added to suppress cough; *Di Long* (Pheretima), *Ting Li Zi* (Semen Descurainiae seu Lepidii) and *Wu Gong* (Scolopendra) were added to relieve wheezing and resolve phlegm production. No antibiotic drugs were given throughout the treatment.[17]
- **Asthma:** Patients with acute wheezing and dyspnea were treated with an herbal decoction of 20 grams of *Bai Shao* and 10 grams of *Gan Cao* (Radix Glycyrrhizae) powder, mixed with 100 to 150 ml of water, and cooked for only 3 to 5 minutes. Out of 35 patients, 8 showed significant response to the herbs, 23 showed marked response, and 4 showed no change. With regard to initial onset of action, 26 patients noticed marked improvement within 30 to 60 minutes, and 4 noticed marked improvement within 1 to 2 hours.[18]
- **Restless leg syndrome:** Oral administration of an herbal decoction (15 grams of *Bai Shao* and 15 grams of *Gan Cao* (Radix Glycyrrhizae)) was given twice daily to treat restless leg syndrome. The therapy showed a 100% rate of effectiveness in 54 patients. However, 6 patients experienced recurrence after the cessation of herbal treatment.[19]
- **Diabetes mellitus:** According to one journal, 180 patients with diabetes mellitus were given an herbal formula three times daily. The formula contained 40 grams of *Bai Shao* and 8 grams of *Gan Cao* (Radix Glycyrrhizae). The herbal therapy lowered blood glucose levels in 73.9% of patients (54 with marked effects, 67 with moderate effects, 12 with slight response, and 47 with no response).[20]

HERB-DRUG INTERACTION

- **Anticoagulant or antiplatelet drugs:** *Bai Shao* has been shown to have a mild inhibitory effect on platelet aggregation and prevention of emboli formation. Therefore, it should be taken with caution by patients who are taking anticoagulant or antiplatelet drugs.[21] [Note: Examples of anticoagulants include heparin, warfarin (Coumadin) and enoxaparin (Lovenox); and examples of antiplatelets include aspirin, dipyridamole (Persantine), and clopidogrel (Plavix).]
- **Antidiabetics:** It is prudent to use *Bai Shao* with caution with insulin, sulfonylureas, and other antidiabetic medications as the combination may have synergistic effects, leading to hypoglycemia.[22] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]
- **Sedatives:** *Bai Shao* has sedative and analgesic effects on the central nervous system. It prolonged the sleeping time induced by barbiturates, and has a protective effect against seizures induced by cardiazol.[23] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

TOXICOLOGY

The LD_{50} for paeoniflorin in mice is 3,530 mg/kg via intravenous injection and 9,530 mg/kg via intraperitoneal injection.

AUTHORS' COMMENTS

Bai Shao is often combined with *Gui Zhi* (Ramulus Cinnamomi) to relieve exterior conditions in deficient patients. *Bai Shao* and *Gui Zhi* together harmonize the *ying* (nutritive) and the *wei* (defensive) levels to promote diaphoresis and at the same time prevent leakage of sweat and nourish fluids.

According to Dr. Zhang Liang-Lin, *Bai Shao* and *Wu Yao* (Radix Linderae) are an excellent pair to treat the lower abdominal bloating and pain associated with dysmenorrhea.

Please refer to *Chi Shao* (Radix Paeoniae Rubrae) for comparison of *Bai Shao* and *Chi Shao*.

E Jiao (Colla Corii Asini)

阿膠 阿胶

Pinyin Name: *E Jiao*
Literal Name: "gelatin"
Alternate Chinese Names: *Lu Pi Jiao, Pen Fu Jiao, Bo Zhi Jiao, Yang Jiao, E Jiao Zhu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ass-hide glue, donkey-hide gelatin, gelatin
Zoological Name: *Equus asinus* L. (*Lu*)
Pharmaceutical Name: Colla Corii Asini
Properties: sweet, neutral
Channels Entered: Lung, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Blood and Stops Bleeding

Blood deficiency of the Liver and Heart: Clinical manifestations include pale or sallow complexion, dizziness, and palpitations. *E Jiao* (Colla Corii Asini) tonifies blood and treats various menstrual disorders such as irregularity, dysmenorrhea, and gestational and postpartum disorders.

- Anemia: combine *E Jiao* with *Dang Gui* (Radicis Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Anemia with qi deficiency: combine this substance with *Huang Qi* (Radix Astragali), *Dang Gui* (Radicis Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Dang Shen* (Radix Codonopsis).

Bleeding: *E Jiao* is neutral, sweet and sticky in nature. It stops bleeding caused by yin deficiency in various parts of the body (hematemesis, epistaxis, bleeding gums, hematochezia, hematuria and uterine bleeding). The charred form is preferred, for it has a stronger hemostatic function. *E Jiao* can be used alone or with other hemostatic herbs.

- Bleeding during pregnancy: use dry-fried *E Jiao* as powder.
- Profuse hematemesis or bleeding from the ears: combine this substance with *Pu Huang* (Pollen Typhae) and *Sheng Di Huang* (Radix Rehmanniae) juice.
- Bleeding associated with Spleen qi and yang deficiencies, such as hematemesis, epistaxis, hematochezia and uterine bleeding: combine *E Jiao* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- Hypermenorrhea, uterine bleeding, bleeding during pregnancy, or bleeding from miscarriage: add this substance to *Ai Ye* (Folium Artemisiae Argyi), *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai Shao* (Radix Paeoniae Alba), and *Gan Cao* (Radix Glycyrrhizae).
- Hematochezia or bleeding hemorrhoids: use it with *Huang Qin* (Radix Scutellariae), *Ku Shen Gen* (Radix Sophorae Flavescentis), charred *Huai Hua* (Flos Sophorae), charred *Di Yu* (Radix Sanguisorbae), and *Fang Feng* (Radix Saposhnikoviae).
- Hemoptysis: combine it with *Mai Men Dong* (Radix Ophiopogonis), *Bai He* (Bulbus Lilii), *Bai Ji* (Rhizoma Bletillae), *Sha Shen* (Radix Glehniae seu Adenophorae), charred *Zhi Zi* (Fructus Gardeniae), and *Ou Jie* (Nodus Nelumbinis Rhizomatis).

2. Nourishes Yin and Moistens the Lung

Lung yin deficiency: The Lung is among the most tender organs in the body, and is very susceptible to damage, especially from dryness. Dryness usually results from chronic respiratory disorders, and manifests in symptoms such as cough, dyspnea, and shortness of breath upon exertion. *E Jiao* is sweet, neutral and moistening in nature, and is effective in nourishing Lung yin. However, in order to avoid producing phlegm, *E Jiao* should be used with phlegm-eliminating herbs so that both the root of yin deficiency and the symptoms are treated.

- Loud, labored and accelerated respiration caused by Lung yin deficiency with fire: combine *E Jiao* with *Niu Bang Zi* (Fructus Arctii), *Xing Ren* (Semen Armeniacae Amarum), and *Gan Cao* (Radix Glycyrrhizae).
- Chronic cough, asthma and spontaneous sweating caused by Lung qi and yin deficiencies: combine this substance with *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Ren Shen* (Radix Ginseng), *Kuan Dong Hua* (Flos Farfarae), and *Bei Mu* (Bulbus Fritillaria).

E Jiao (Colla Corii Asini)

- Chronic coughing of blood caused by Lung and Kidney yin deficiencies: add this herb to *Tian Men Dong* (Radix Asparagi), *Sheng Di Huang* (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Bai He* (Bulbus Lilii), *Bei Mu* (Bulbus Fritillaria), and *Bai Bu* (Radix Stemonae). **Exemplar Formula:** *Yue Hua Wan* (Moonlight Pill).

Dryness injuring Lung yin: The Lung, the first line of defense against environmental factors, is the organ most affected by the pathogenic factor dryness. Common manifestations include: dryness of the nose and throat, dry cough with no sputum, or scanty, difficult-to-expectorate sputum. *E Jiao* is the substance of choice when the Lung is attacked by dryness, as it is the most nourishing to the Lung.

- Symptoms of dryness injuring Lung yin: combine *E Jiao* with *Sang Ye* (Folium Mori), *Shi Gao* (Gypsum Fibrosum), *Mai Men Dong* (Radix Ophiopogonis), *Pi Pa Ye* (Folium Eriobotryae), and *Xing Ren* (Semen Armeniacae Amarum). **Exemplar Formula:** *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lungs Decoction).

Late-stage chronic illnesses with deficiency heat signs: Chronic illness often consumes yin and body fluids, leading to yin-deficient heat with low grade fever and steaming bones sensations.

- Low-grade fever, steaming bones sensations: combine *E Jiao* with *Sheng Di Huang* (Radix Rehmanniae), *Bie Jia* (Carapax Trionycis), *Gui Ban* (Plastrum Testudinis), *Qin Jiao* (Radix Gentianae Macrophyllae), *Yin Chai Hu* (Radix Stellariae), and *Qing Hao* (Herba Artemisiae Annuae).

3. Moistens the Intestines and Unblocks the Bowels:

Regular bowel movement is dependent on proper nourishment of the intestines. When body fluids and blood are deficient, constipation or dry stools may occur. This condition usually is present in anemic, postpartum, or elderly patients, or in those recovering from a chronic illness.

- Constipation or dry stools: combine this herb with honey, *Cong Bai* (Bulbus Allii Fistulosi) and *Zhi Ke* (Fructus Aurantii).

4. Others

- Water retention manifesting in dysuria with edema: use *E Jiao* with *Zhu Ling* (Polyporus), *Hua Shi* (Talcum), *Ze Xie* (Rhizoma Alismatis) and *Fu Ling* (Poria) to tonify yin and clear heat. **Exemplar Formula:** *Zhu Ling Tang* (Polyporus Decoction).
- For diarrhea during pregnancy with abdominal pain: use it with *Huang Lian* (Rhizoma Coptidis), *Shi Liu Pi* (Pericarpium Granati) and *Dang Gui* (Radicis Angelicae Sinensis).

DOSAGE

5 to 10 grams. Dissolve *E Jiao* in warm decoction, hot water or heated grain-based liquor, and take orally. It is also used in powder or pill form. *E Jiao* is sometimes dry-fried with other herbs to reduce its odor and minimize stickiness.

CAUTIONS / CONTRAINDICATIONS

- Because *E Jiao* is sticky, it is contraindicated in patients with Spleen and Stomach deficiencies that manifest as loose stools, diarrhea, or poor appetite.
- *E Jiao* should not be used for patients with phlegm or damp accumulation.

CHEMICAL COMPOSITION

Collagen, amino acids (lysine, arginine, histadine, glycine, cysteine), sodium, potassium, calcium, magnesium, aluminum, and zinc.[1]

PHARMACOLOGICAL EFFECTS

- **Hematological:** A group of dogs with post-hemorrhage anemia were divided into three groups: those that received a placebo, those that received iron, and those that received *E Jiao*. Increase in red blood cell count and hemoglobin was most prominent in the *E Jiao* group, followed by the iron group, and lastly, the placebo group.[2]
- **Cardiovascular:** Intravenous infusion of 5 to 6% *E Jiao* was beneficial in treating cats with post-hemorrhage shock.[3]
- **Effect on calcium metabolism:** Daily ingestion of 30 grams of *E Jiao* in dogs increased the absorption and utilization of calcium carbonate. Plasma levels of calcium also increased.[4]

CLINICAL STUDIES AND RESEARCH

- **Pulmonary tuberculosis:** In one clinical trial, patients with hemoptysis caused by pulmonary tuberculosis were treated with 20 to 30 grams of *E Jiao* powder two to three times daily, with warm water. Those with profuse hemoptysis were also treated with pharmaceutical drugs to stop bleeding. In addition to herbal treatment, all patients received antibiotics to treat the tuberculosis. Out of 56 patients, the study reported marked improvement in 37 patients, moderate improvement in 15 patients, and no improvement in 4 patients. The overall rate of effectiveness in relieving hemoptysis was 92.7%.[5]
- **Chronic ulceration of the legs:** It was reported in one study that 24 patients with chronic ulceration of the legs recovered completely after topical treatment with *E Jiao* cream for 20 days. The cream was prepared by mixing 30 grams of *E Jiao* in 70 ml of water and cooked until the

E Jiao (Colla Corii Asini)

preparation turned into paste. The daily treatment protocol was to first cleanse the affected area, apply the cream, then cover the area with gauze. The procedure was repeated daily until complete recovery was achieved.[6]

- **Leukopenia and anemia:** An herbal formula containing *E Jiao*, *Ren Shen* (Radix Ginseng), *Shu Di Huang* (Radix Rehmanniae Preparata), *Dang Shen* (Radix Codonopsis), *Shan Zha* (Fructus Crataegi) and others was 79.33% effective in raising white blood cell counts, and 67.8% effective in treating anemia caused by lack of iron.[7]
- **Unstable pregnancy:** A formula containing 12 grams of *E Jiao*, 2 eggs, and 30 grams of sugar showed 83.3% effectiveness in 36 patients with restless fetus or unstable pregnancies.[8]

AUTHORS' COMMENTS

The use of *E Jiao* started approximately in the Tang dynasty. At that time, gelatin from many animals was used, including cattle, pigs, horses, donkeys and camels. Gelatin derived from cattle has weaker tonic functions but stronger blood-invigorating and toxin-eliminating effects. Gelatin derived from pigs has similar blood-tonic and hemostatic functions. From a clinical perspective, these gelatin substances treat anemia, primary thrombocytopenia, dysfunctional uterine bleeding and aplastic anemia.

To enhance the hemostatic properties, *E Jiao* should be processed with *Pu Huang* (Pollen Typhae). To enhance the nourishing function to the Lung, process *E Jiao* with *Hai Ge Fen* (Concha Meretricis seu Cyclinae).

Long Yan Rou (Arillus Longan)

龍眼肉　龙眼肉

Pinyin Name: *Long Yan Rou*
Literal Name: "dragon eye flesh"
Alternate Chinese Names: *Gui Yuan Rou*, *Gui Yuan*, *Yi Zhi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: longan fruit, dried longan pulp
Botanical Name: *Euphoria longan [Dimocarpus longan]* (Lour.) Steud. (*Long Yan*)
Pharmaceutical Name: Arillus Longan
Properties: sweet, warm
Channels Entered: Heart, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Heart and Spleen

Spleen and Heart deficiencies: The Heart governs the blood vessels and the *shen* (spirit). The Spleen transforms food into *gu* (food) *qi*. Excessive worrying or pensiveness damages the Heart and Spleen and causes palpitations,

Long Yan Rou (Arillus Longan)

insomnia, difficulty falling and staying asleep, forgetfulness, withered *shen* (spirit), and fatigue. *Long Yan Rou* (Arillus Longan) is sweet, warm and not stagnating in nature. It enters and nourishes the Heart and Spleen, and can be used alone or with other tonic herbs.

- Spleen and Heart deficiencies with the symptoms listed above: use *Long Yan Rou* alone, or with *Ren Shen* (Radix Ginseng), *Huang Qi* (Radix Astragali), *Dang Gui* (Radicis Angelicae Sinensis), and *Suan Zao Ren* (Semen Zizyphi Spinosae). **Exemplar Formula:** *Gui Pi Tang* (Restore the Spleen Decoction).
- Diarrhea from Spleen deficiency: combine this herb with *Sheng Jiang* (Rhizoma Zingiberis Recens), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shan Yao* (Rhizoma Dioscoreae), and *Yi Yi Ren* (Semen Coicis).

2. Benefits Qi and Blood

Qi and blood deficiencies: This condition is commonly seen in the chronically ill and the elderly. Typical symptoms associated with qi and blood deficiencies include fatigue, weakness, shortness of breath, spontaneous sweating, and a pale or sallow complexion.

- Qi and blood deficiencies: combine *Long Yan Rou* with *Huang Qi* (Radix Astragali), and *Ren Shen* (Radix Ginseng), or *Xi Yang Shen* (Radix Panacis Quinquefolii).
- Edema in postpartum women: use it with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae).
- Qi and blood deficiencies with cold due to yang deficiency: soak this herb in grain-based liquor and drink daily.

DOSAGE

10 to 15 grams in decoction. The maximum dose for *Long Yan Rou* is 30 grams. This herb is also used in paste, grain-based liquor or pill forms.

CAUTIONS / CONTRAINDICATIONS

- *Long Yan Rou* is contraindicated for patients with phlegm-fire and middle *jiao* dampness or stagnation.
- *Long Yan Rou* is warm and thus contraindicated in cases of excess or deficiency heat, or exterior conditions.

CHEMICAL COMPOSITION

Vitamin A, B_1, B_2, C; adenine, choline, glucose, sucrose.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** The water extract of *Long Yan Rou* (1:2) exerts inhibitory influences against some pathogenic fungi.[2]

SUPPLEMENT

- 龍眼花 / 龙眼花 *Long Yan Hua* (Flos Longan) is derived from the flower of the same plant as *Long Yan Rou*. *Long Yan Hua* is bland, sour, astringent, cold, and enters the Liver and Kidney channels. Clinically, it consolidates Kidney *jing* (essence) and restrains vaginal discharge. For Kidney dysfunction with proteinuria, *Long Yan Hua* is used with *Xian Feng Cao* (Herba Bidentis) and *Ding Shu Xiu* (Herba Elephantopus Scaber). For white vaginal discharge, it is combined with *Ji Guan Hua* (Flos Celosiae Cristatae), *Fu Ling* (Poria), *Chen Pi* (Pericarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae) and *Gan Cao* (Radix Glycyrrhizae). For foul-smelling yellow vaginal discharge, *Long Yan Hua* is added to *Long Dan Cao* (Radix Gentianae), *Qu Mai* (Herba Dianthi), *Bian Xu* (Herba Polygoni Avicularis), *Huang Bai* (Cortex Phellodendri) and *Ku Shen Gen* (Radix Sophorae Flavescentis). For diabetes mellitus, it is used with *Bi Zi Cao* (Herba Pogonantheri Criniti). The dosage for *Long Yan Hua* is 6 to 15 grams in decoction.

AUTHORS' COMMENTS

Long Yan Rou soaked in grain-based liquor is used to treat patients suffering from deficiency and cold who have insomnia or difficulty sleeping. A small portion is taken before sleep.

Long Yan Rou, *Sang Shen Zi* (Fructus Mori) and *Gou Qi Zi* (Fructus Lycii) are tonics that can be safely taken over a long period of time without creating an imbalance in the body.

Section 4

— Yin-Tonifying Herbs

Bei Sha Shen (Radix Glehniae)

北沙參 北沙参

Pinyin Name: *Bei Sha Shen*
Literal Name: "sand root from the north"
Alternate Chinese Names: *Yin Tiao Shen, Lai Yang Sha Shen, Liao Sha Shen*
Original Source: *Ben Cao Hui Yan* (Treasury of Words on the Materia Medica) by Ni Zhu-Mo in 1624
English Name: glehnia, coastal glehnia root
Botanical Name: *Glehnia littoralis* F. Schmidt ex Miq. (*Shan Hu Cai*)
Pharmaceutical Name: Radix Glehniae
Properties: sweet, cool
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Yin, Clears the Lung

Lung dryness: *Bei Sha Shen* (Radix Glehniae) treats Lung yin deficiency with fire, that manifests as dry mouth, dry throat, dryness of the nasal cavity, voice loss, sore throat, dry cough with no sputum, or scanty, difficult-to-expectorate sputum. In some cases, blood-streaked sputum may be present. *Bei Sha Shen* moistens the Lung and treats dry cough with heat signs. It is often used for chronic respiratory disorders such as tuberculosis or chronic bronchitis.

- Dry cough: combine *Bei Sha Shen* with *Mai Men Dong* (Radix Ophiopogonis), *Tian Hua Fen* (Radix Trichosanthis), *Yu Zhu* (Rhizoma Polygonati Odorati) and *Sang Ye* (Folium Mori).
- Dry cough with fire: use it with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Sang Bai Pi* (Cortex Mori), *Di Gu Pi* (Cortex Lycii), *Qian Hu* (Radix Peucedani), *Gua Lou Shi* (Fructus Trichosanthis) and *Tian Men Dong* (Radix Asparagi).
- Dry cough with scanty, yellow, difficult-to-expectorate sputum: combine this herb with *Mai Men Dong* (Radix Ophiopogonis), *Zhi Mu* (Radix Anemarrhenae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Bie Jia* (Carapax Trionycis) and *Di Gu Pi* (Cortex Lycii).
- Dry cough with blood or blood-streaked sputum: add it to *E Jiao* (Colla Corii Asini), *Bai Ji* (Rhizoma Bletillae) and *Bai Mao Gen* (Rhizoma Imperatae).
- Wind-heat with aversion to cold: use this herb with *Sang Ye* (Folium Mori), *Dan Dou Chi* (Semen Sojae Praeparatum), *Xing Ren* (Semen Armeniacae Amarum) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).

Cough due to Lung heat: *Bei Sha Shen* clears Lung heat and alleviates cough. It nourishes yin and treats cough with sticky, scanty, yellow sputum.

- Lung heat with cough and yellow sputum: use this herb with *Sang Bai Pi* (Cortex Mori), *Di Gu Pi* (Cortex Lycii), *Qian Hu* (Radix Peucedani) and *Gua Lou Shi* (Fructus Trichosanthis).

Lung yin deficiency with dryness: Chief manifestations of this imbalance include dry cough with or without scanty, difficult-to-expectorate sputum. In some cases,

Bei Sha Shen (Radix Glehniae)

hemoptysis or blood-streaked sputum may also be present. *Bei Sha Shen* strongly nourishes Lung yin and is best to treat yin deficiency with rising fire.

- Lung yin deficiency with dryness and rising deficient fire causing dry cough, scanty or absence of sputum: use *Bei Sha Shen* with *Mai Men Dong* (Radix Ophiopogonis), *Zhi Mu* (Radix Anemarrhenae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Bie Jia* (Carapax Trionycis) and *Di Gu Pi* (Cortex Lycii).
- Cough with blood or blood-streaked sputum: combine it with *E Jiao* (Colla Corii Asini), *Bai Ji* (Rhizoma Bletillae) and *Bai Mao Gen* (Rhizoma Imperatae).

2. Nourishes the Stomach and Generates Body Fluids

Chronic Stomach yin deficiency: Manifestations of this chronic deficiency may include dry throat, thirst, constipation and a dry, red tongue.

- Chronic Stomach yin deficiency: use *Bei Sha Shen* with *Mai Men Dong* (Radix Ophiopogonis), *Yu Zhu* (Rhizoma Polygonati Odorati) and *Shi Hu* (Herba Dendrobii).
- Chronic Stomach yin deficiency accompanied by poor appetite or food stagnation: combine this herb with *Gu Ya* (Fructus Setariae Germinatus), *Mai Ya* (Fructus Hordei Germinatus) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).
- Chronic Stomach yin deficiency with Spleen qi deficiency: add it to *Shan Yao* (Rhizoma Dioscoreae), *Bian Dou* (Semen Lablab Album), *Tai Zi Shen* (Radix Pseudostellariae) and *Xi Yang Shen* (Radix Panacis Quinquefolii).

3. Tonifies Liver and Kidney Yin

Bei Sha Shen treats Liver and Kidney yin deficiencies, characterized by dryness or blood and qi stagnation causing hypochondriac pain, acid reflux, dry mouth and throat, and red tongue.

- Liver and Kidney yin deficiencies with symptoms listed above: use it with *Mai Men Dong* (Radix Ophiopogonis), *Sheng Di Huang* (Radix Rehmanniae), *Gou Qi Zi* (Fructus Lycii), and *Chuan Lian Zi* (Fructus Toosendan).

Exemplar Formula: *Yi Guan Jian* (Linking Decoction).

DOSAGE

10 to 15 grams for the dried herb, 20 to 30 grams for the fresh herb, in decoction. *Bei Sha Shen* is also used in pill, powder or paste forms.

CAUTIONS / CONTRAINDICATIONS

- Use of *Bei Sha Shen* is contraindicated for cough caused by wind-cold, cold-damp, or cases of deficiency and cold of the Spleen and Stomach.
- *Bei Sha Shen* antagonizes *Fen Fang Ji* (Radix Stephaniae Tetandrae).
- *Bei Sha Shen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).

CHEMICAL COMPOSITION

Phellopterin, bergapten, psoralen, xanthotoxin, marmesin, bergaptin, imperatorin, isoimperatorin, cnidilin.[1,2]

PHARMACOLOGICAL EFFECTS

- **Effect on temperature regulation:** Alcohol extract of *Bei Sha Shen* has been shown to lower body temperature in rabbits with a normal temperature, or with a fever induced by typhoid vaccination.[3]
- **Cardiovascular:** Water extract of *Bei Sha Shen* has a cardiotonic effect on frog heart specimens. At high doses, however, it may inhibit cardiac contraction. In anesthetized rabbits, intravenous injection raises blood pressure and increases respiration.[4]

SUPPLEMENT

- 沙參 / 沙参 *Sha Shen* (Radix Glehniae seu Adenophorae) is the generic name that refers to both *Bei Sha Shen* (Radix Glehniae) and *Nan Sha Shen* (Radix Adenophorae). Many classic texts did not distinguish between these two herbs, as they have similar functions, and have historically been used interchangeably.

AUTHORS' COMMENTS

Bei Sha Shen (Radix Glehniae) and *Nan Sha Shen* (Radix Adenophorae) are sweet and cool, moisten Lung yin, nourish the Stomach and generate body fluids. *Bei Sha Shen*, stronger in nourishing the yin and clearing heat, is often used for post febrile disorders when the injury to yin manifests as thirst, dry throat and a dry, scarlet tongue. *Nan Sha Shen* nourishes yin, dispels phlegm, and is more suitable for dryness and heat that have damaged Lung yin, manifesting in symptoms of dry cough, scanty sputum that may be blood-streaked or hemoptysis, with thirst and dryness.

When treating cough, *Bei Sha Shen* is heavier in texture and suitable only for dry cough due to Lung yin deficiency; *Nan Sha Shen* is lighter in texture and is more suitable for dry cough caused by Lung yin deficiency or wind-heat.

Nan Sha Shen (Radix Adenophorae)

南沙參 南沙参

Pinyin Name: *Nan Sha Shen*
Literal Name: "sand root from the south"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: adenophora, four-leaf lady-bell root, upright lady-bell root
Botanical Name: *Adenophora tetraphylla* (Thunb.) Fisch. (*Lun Ye Sha Shen*); *Adenophora stricta* Miq. (*Sha Shen*); *Adenophora hunanensis* Nannf. (*Xing Ye Sha Shen*)
Pharmaceutical Name: Radix Adenophorae
Properties: sweet, slightly bitter, cool
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Yin, Clears the Lung and Dispels Phlegm

Lung dryness: *Nan Sha Shen* (Radix Adenophorae) treats pathogenic dryness attacking the Lung that results in injury of Lung yin, with symptoms of dry mouth, dry throat, dryness of the nasal cavity, voice loss, sore throat, dry cough with no sputum, or scanty, difficult-to-expectorate sputum. In some cases, blood-streaked sputum may be present. *Nan Sha Shen* moistens the Lung and treats dry cough accompanied by heat signs. It can be used for both chronic Lung yin-deficient coughs or cough caused by attack of external pathogenic dryness.

- Initial exterior stage of warm febrile disorders with dryness, characterized by acute dry cough with yellow sputum, fever and aversion to cold: combine *Nan Sha Shen* with *Sang Ye* (Folium Mori), *Dan Dou Chi* (Semen Sojae Praeparatum), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Xing Ren* (Semen Armeniacae Amarum). **Exemplar Formula:** *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction).
- Dry heat damaging Lung and Stomach yin, characterized by dry cough with dry throat, thirst or scanty sputum: use this herb with *Mai Men Dong* (Radix Ophiopogonis), *Yu Zhu* (Rhizoma Polygonati Odorati), *Tian Hua Fen* (Radix Trichosanthis) and *Sang Ye* (Folium Mori). **Exemplar Formula:** *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction).
- Dry cough with blood-streaked sputum caused by dryness and heat turning into fire: add *Nan Sha Shen* to *Tian Men Dong* (Radix Asparagi), *Zhi Mu* (Radix Anemarrhenae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Di Gu Pi* (Cortex Lycii) and *Zi Zhu* (Folium Callicarpae).
- Dry cough with difficult-to-expectorate sputum: combine this herb with *Sang Bai Pi* (Cortex Mori), *Di Gu Pi* (Cortex Lycii), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Gua Lou Shi* (Fructus Trichosanthis), *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae).
- Chronic dry cough with no sputum: use *Nan Sha Shen*, *Tian Men Dong* (Radix Asparagi), *Sheng Di Huang* (Radix Rehmanniae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Bai Bu* (Radix Stemonae) and *E Jiao* (Colla Corii Asini). **Exemplar Formula:** *Yue Hua Wan* (Moonlight Pill).
- Tuberculosis or other chronic respiratory disorders with dry cough, scanty or blood-streaked sputum, tidal fever, flushed cheeks, night sweats, *wu xin re* (five-center heat), and weight loss: combine this herb with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Bie Jia* (Carapax Trionycis), *Qin Jiao* (Radix Gentianae Macrophyllae), *Di Gu Pi* (Cortex Lycii), *Yin Chai Hu* (Radix Stellariae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Bai Bu* (Radix Stemonae) and *Bai Ji* (Rhizoma Bletillae).

Cough due to Lung heat: Heat invading the Lung produces symptoms of cough or dyspnea with sticky yellow sputum. *Nan Sha Shen* clears and moistens the Lung without causing dampness. It also dispels phlegm, which makes it the ideal herb to treat Lung heat with yellow and difficult-to-expectorate sputum.

- Lung heat with cough and yellow phlegm: use *Nan Sha Shen* with *Sang Bai Pi* (Cortex Mori), *Di Gu Pi* (Cortex Lycii), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Gua Lou Shi* (Fructus Trichosanthis), *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae).

Yin-deficient cough: In chronic respiratory disorders involving Lung yin deficiency, the chief manifestation is

Nan Sha Shen (Radix Adenophorae)

dry cough with scanty, difficult-to-expectorate sputum. In some cases, streaks of blood may also be seen in the sputum. *Nan Sha Shen* nourishes yin and moistens the Lung. It treats Lung yin deficiency whether or not scanty sputum is present.

- Lung yin deficiency with dry cough with or without scanty sputum: use *Nan Sha Shen* with *Tian Men Dong* (Radix Asparagi), *Sheng Di Huang* (Radix Rehmanniae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Bai Bu* (Radix Stemonae) and *E Jiao* (Colla Corii Asini).

2. Nourishes the Stomach and Generates Body Fluids

Chronic Stomach yin deficiency: Clinical presentation of this imbalance includes dry throat, thirst, constipation and a dry, red tongue. *Nan Sha Shen* treats patients with Stomach yin deficiency and a peeled tongue coating from late-stage febrile disorders or chronic illnesses.

- Stomach yin deficiency with the symptoms described above: combine *Nan Sha Shen* with *Yu Zhu* (Rhizoma Polygonati Odorati), *Mai Men Dong* (Radix Ophiopogonis), *Sheng Di Huang* (Radix Rehmanniae), *Shi Hu* (Herba Dendrobii), *Tian Hua Fen* (Radix Trichosanthis) and *Bai Shao* (Radix Paeoniae Alba).
- Stomach yin deficiency with poor appetite: add this herb to *Mai Ya* (Fructus Hordei Germinatus), *Mu Gua* (Fructus Chaenomelis) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

DOSAGE

10 to 15 grams of the dried herb, 15 to 60 grams of the fresh herb, in decoction. *Nan Sha Shen* is also used in pill or powder forms. The fresh herb more effectively clears Lung heat and generates fluids, thus is usually used in treatment of Lung heat with injured yin.

CAUTIONS / CONTRAINDICATIONS

- *Nan Sha Shen* is contraindicated in cough caused by wind-cold.
- *Nan Sha Shen* antagonizes *Fen Fang Ji* (Radix Stephaniae Tetandrae).
- *Nan Sha Shen* is incompatible with *Li Lu* (Radix et Rhizoma Veratri).

CHEMICAL COMPOSITION

Taraxerone, β-sitosterol, shashenoside I, II, III; syringinoside, linoleic acid, ikshusterol, sessili folic 3-o-isovalerate, camphene, eucalyptol, camphor, azulene, bornyl acetate, daucosterol.[1,2]

PHARMACOLOGICAL EFFECTS

- **Antitussive:** Decoction of *Nan Sha Shen* has an antitussive effect in rabbits that lasts approximately 4 hours.[3]
- **Cardiovascular:** Administration of a 1% solution of *Nan Sha Shen* demonstrated a cardiotonic effect that lasted approximately 5 minutes on the heart of frog specimens.[4]
- **Antibiotic:** *Nan Sha Shen* has an antifungal effect against various pathogenic fungus and dermatophytes.[5]

AUTHORS' COMMENTS

Nan Sha Shen is a light, moistening tonic that does not create stagnation in the body or induce production of phlegm. For that reason, it is often used for chronic respiratory disorders involving Lung yin deficiency. Fresh *Nan Sha Shen* more strongly clears heat and generates body fluids. It is more often used for excess heat damaging the body fluids, and less frequently for deficient patients with injured yin.

An herbal pharmacy will generally supply *Bei Sha Shen* (Radix Glehniae) when "*Sha Shen*" is written on the prescription. Doctors must specify "*Nan*" if *Nan Sha Shen* (Radix Adenophorae) is to be prescribed. Please refer to *Bei Sha Shen* for comparison of these two herbs.

In folk medicine, large doses of *Nan Sha Shen* and *Xing Ren Ye* (Folium Pruni Armeniacae) cooked with eggs, treat toothache caused by yin-deficient fire. Some other records have shown that this pair, combined with pork, can treat postpartum milk insufficiency.

Mai Men Dong (Radix Ophiopogonis)

麥門冬 麦门冬

Pinyin Name: *Mai Men Dong*
Literal Name: "lush winter wheat"
Alternate Chinese Names: *Mai Dong, Cun Dong, Da Mai Dong*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ophiopogon
Botanical Name: *Ophiopogon japonicus* Ker-Gawl (*Men Dong*)
Pharmaceutical Name: Radix Ophiopogonis
Properties: sweet, slightly bitter, cool
Channels Entered: Spleen, Stomach, Heart

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Yin and Moistens the Lung

Pathogenic dryness attacking the Lung: Injured Lung yin as a result of dryness attacking the Lung may result in symptoms of dry mouth, dry throat, dry cough with no sputum, or scanty, difficult-to-expectorate sputum. In some cases, hemoptysis or blood-streaked sputum may be present. *Mai Men Dong* (Radix Ophiopogonis) moistens the Lung and at the same time sedates Lung heat, and is best used for febrile disorders involving dryness or fire such as bronchitis, tuberculosis and pertussis.

- Heat and dryness in the Lung characterized by dyspnea, dry cough, chest fullness and pain: combine *Mai Men Dong* with *Sang Ye* (Folium Mori), *Shi Gao* (Gypsum Fibrosum), *Pi Pa Ye* (Folium Eriobotryae) and *E Jiao* (Colla Corii Asini). **Exemplar Formula:** *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lungs Decoction).
- Fire and dryness in the Lung characterized by coughing with blood, and/or thick, yellow, difficult-to-expectorate sputum, and chest pain: incorporate this herb with *Tian Men Dong* (Radix Asparagi), *Zhi Mu* (Radix Anemarrhenae), *Bei Mu* (Bulbus Fritillaria), *Gua Lou Shi* (Fructus Trichosanthis), *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), *Bai Ji* (Rhizoma Bletillae), *Han Lian Cao* (Herba Ecliptae) and *Bai Mao Gen* (Rhizoma Imperatae).

Chronic dry cough from Lung yin deficiency: Chronic febrile disorders consume a tremendous amount of yin and lead to chronic coughing with blood-streaked sputum. Deficiency heat signs of low-grade fever, flushed cheeks and irritability may also be present. *Mai Men Dong*, too mild to be used alone in this case, is usually combined with other yin tonics to achieve maximum effectiveness.

- Sore throat with epistaxis, hematemesis or blood-streaked sputum: combine this herb with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Bei Mu* (Bulbus Fritillaria) and *Mu Dan Pi* (Cortex Moutan). **Exemplar Formula:** *Yang Yin Qing Fei Tang* (Nourish the Yin and Clear the Lungs Decoction).
- Loss of voice, dry throat, thirst: combine *Mai Men Dong* with *Xuan Shen* (Radix Scrophulariae), *Sheng Di Huang* (Radix Rehmanniae), *Jie Geng* (Radix Platycodonis), *Gan Cao* (Radix Glycyrrhizae), *Shan Dou Gen* (Radix Sophorae Tonkinensis), and *Zhi Mu* (Radix Anemarrhenae).
- Lung and Kidney yin deficiencies with excessive hemoptysis: use this herb with *Bai Ji* (Rhizoma Bletillae), *Bai Mao Gen* (Rhizoma Imperatae) and *Han Lian Cao* (Herba Ecliptae).

Yin-deficient heat: In patients with chronic yin deficiency, the condition may be complicated by the presence of excess heat in the body. Clinical manifestations include soreness and swelling of the throat, hematemesis or epistaxis. *Mai Men Dong* and herbs that clear excess heat must be used simultaneously.

- Soreness and swelling of the throat due to yin deficiency and excess heat: combine this herb with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Bei Mu* (Bulbus Fritillaria) and *Mu Dan Pi (Cortex Moutan)* . **Exemplar Formula:** *Yang Yin Qing Fei Tang* (Nourish the Yin and Clear the Lungs Decoction).
- Diphtheria with sore throat: combine it with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Bei Mu* (Bulbus Fritillaria), and *Mu Dan Pi* (Cortex Moutan).
- Hematemesis or epistaxis due to yin deficiency and excess heat: use it with *Sheng Di Huang* (Radix Rehmanniae).

Mai Men Dong (Radix Ophiopogonis)

2. Nourishes the Stomach and Generates Fluids

Stomach yin deficiency: Thirst and dry mouth are essential signs of Stomach yin deficiency. Sweet in nature, *Mai Men Dong* enters the Stomach to nourish yin and promote the generation of fluids. It is often considered the herb of choice to tonify Stomach yin, because its tonic effect is much less stagnating than that of other tonic herbs.

- Stomach yin deficiency with thirst and dry mouth: combine *Mai Men Dong* with *Sha Shen* (Radix Glehniae seu Adenophorae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Yu Zhu* (Rhizoma Polygonati Odorati) and rock sugar.
- Stomach yin deficiency with hiccups and vomiting: add it to *Ban Xia* (Rhizoma Pinelliae), *Geng Mi* (Semen Oryzae) and *Gan Cao* (Radix Glycyrrhizae). **Exemplar Formula:** *Mai Men Dong Tang* (Ophiopogonis Decoction).
- Qi and yin deficiencies with fatigue, shortness of breath, thirst and dry mouth: combine this herb with *Ren Shen* (Radix Ginseng) and *Wu Wei Zi* (Fructus Schisandrae Chinensis). **Exemplar Formula:** *Sheng Mai San* (Generate the Pulse Powder).

***Xiao ke* (wasting and thirsting) syndrome:** This condition frequently occurs as a result of chronic febrile disorders damaging yin in the body. *Mai Men Dong* enters the Spleen and Stomach and is commonly used to treat *xiao ke* syndrome of the upper and middle *jiaos*, characterized by dry mouth, thirst, polydipsia and polyphagia.

- *Xiao ke* syndrome with extreme thirst: combine *Mai Men Dong* with *Xi Yang Shen* (Radix Panacis Quinquefolii), *Shan Yao* (Rhizoma Dioscoreae), *Tian Hua Fen* (Radix Trichosanthis), *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), and *Wu Mei* (Fructus Mume).
- *Xiao ke* syndrome with heat and thirst: use this herb with *Huang Lian* (Rhizoma Coptidis), the juices of *Xian Di Huang* (Radix Rehmanniae Recens) and fresh *Tian Hua Fen* (Radix Trichosanthis), and milk.

3. Clears the Heart and Eliminates Irritability

Irritability and insomnia: With deficiencies of yin and blood, heat rises upwards and disturbs the *shen* (spirit) of the Heart. Clinical manifestations of this condition include insomnia, restlessness and irritability. Sweet and cold in nature, *Mai Men Dong* enters the Heart to clear heat and nourish yin and blood to relieve irritability.

- Yin and blood deficiencies of the Heart with heat, characterized by insomnia, palpitations, irritability, night fever, or restless sleep: combine *Mai Men Dong* with *Huang Lian* (Rhizoma Coptidis), *E Jiao* (Colla Corii Asini), *Bei Mu* (Bulbus Fritillaria), *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Dan Shen* (Radix Salviae Miltiorrhizae), *Zhen Zhu Mu* (Concha Margaritaferae) and *Yuan Zhi* (Radix Polygalae).
- Heat in the *ying* (nutritive) stage characterized by nocturnal fever, irritability and insomnia: use this herb with *Sheng Di Huang* (Radix Rehmanniae), *Dan Shen* (Radix Salviae Miltiorrhizae) and *Jin Yin Hua* (Flos Lonicerae). **Exemplar Formula:** *Qing Ying Tang* (Clear the Nutrition Level Decoction).
- Qi and blood deficiencies caused by chronic febrile disorder, with irritability and insomnia: combine this herb with *Zhu Ye* (Herba Phyllostachys), *Shi Gao* (Gypsum Fibrosum), *Ren Shen* (Radix Ginseng) and *Ban Xia* (Rhizoma Pinelliae). **Exemplar Formula:** *Zhu Ye Shi Gao Tang* (Lophatherum and Gypsum Decoction).
- Yin and blood deficiencies characterized by restlessness, irritability, insomnia, palpitations, fatigue, red tongue and little tongue coat: use *Mai Men Dong* with *Sheng Di Huang* (Radix Rehmanniae), *Dan Shen* (Radix Salviae Miltiorrhizae), *Yuan Zhi* (Radix Polygalae) and *Suan Zao Ren* (Semen Zizyphi Spinosae). **Exemplar Formula:** *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart).
- Disharmony of the Kidney and Heart characterized by insomnia, forgetfulness, night sweats, and palpitations: combine this herb with *Bai Zi Ren* (Semen Platycladi), *Gou Qi Zi* (Fructus Lycii), *Fu Shen* (Poria Paradicis) and *Shi Chang Pu* (Rhizoma Acori).

4. Moistens the Intestines

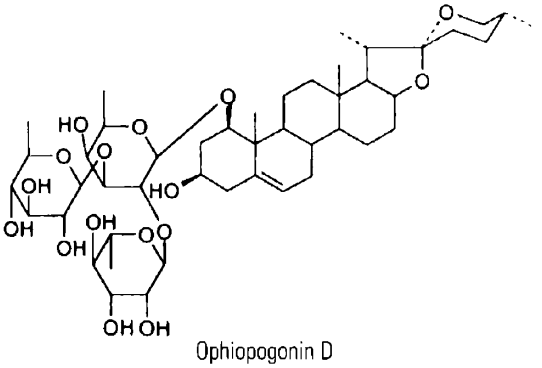
Intestinal dryness, constipation: Deficiencies of yin and fluids leading to dryness is a major cause of constipation. *Mai Men Dong* nourishes yin, lubricates the intestines and promotes bowel movement.

- Constipation: combine it with *Xuan Shen* (Radix Scrophulariae), and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Post-febrile disease with constipation: use this herb with *Huo Ma Ren* (Fructus Cannabis), *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Gua Lou Ren* (Semen Trichosanthis) and *Zhi Shi* (Fructus Aurantii Immaturus).

DOSAGE

10 to 15 grams in decoction. *Mai Men Dong* should be crushed to increase surface area and facilitate the extraction of active constituents. It is also used in paste, pill or powder form.

CAUTIONS / CONTRAINDICATIONS



- Use of *Mai Men Dong* is contraindicated in patients with coughing caused by wind-cold or damp-phlegm accumulation.

Mai Men Dong (Radix Ophiopogonis)

- It is also contraindicated for patients experiencing diarrhea from cold and deficiency of the middle *jiao*.
- Use of this herb may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

CHEMICAL COMPOSITION

Ophiopogonin A,B,C,D; ruscogenin, β-sitosterol, stigmasterol, β-sitosterol-β-glucoside, ophioside, kaempferol-3-galactoglucoside.[1]

Ophiopogonin D

PHARMACOLOGICAL EFFECTS

- **Antiarrhythmic:** Intravenous injection of *Mai Men Dong* is effective in treating drug-induced arrhythmia in rats. However, the duration of its antiarrhythmic effect is relatively short, as arrhythmia tends to recur.[2]
- **Cardiovascular:** Ophiopogonin has a positive inotropic effect and increases cardiac output in frog heart specimens. At a large dosage, however, it decreases cardiac contractility and cardiac output.[3]
- **Antibiotic:** *Mai Men Dong* has an inhibiting influence on *Staphylococcus albus*, *Bacillus subtilis*, *E. coli* and *Salmonella typhi*.[4]

CLINICAL STUDIES AND RESEARCH

- **Coronary artery disorder:** In one clinical study, 101 patients with coronary artery disorders were divided into three groups and treated with oral, intramuscular injection, or intravenous injection of *Mai Men Dong*. Oral treatment consisted of 10 ml of decoction given three times daily (equivalent to 45 grams of dried herb per day) for 3 to 18 months; intramuscular injection consisted of 4 ml of injection per day given via one or two equally-divided injections (equivalent to 8 grams of dried herb per day) for 2 to 4 months; and intravenous injection consisted of 40 ml of injection per day (equivalent to 40 grams of dried herb per day) for one week. The rate of effectiveness was 74% for 50 patients who received oral treatment, 83.7% for 31 patients who received intramuscular treatment, and 80% in the 20 patients who received intravenous treatment.[5]
- **Use in elderly patients:** According to one report, 100 geriatric patients treated with *Mai Men Dong* daily for four months noticed a significant improvement in their overall health. There was a marked reduction of dizziness, blurred vision, tinnitus, back pain, fatigue, abdominal distention and palpitations. Furthermore, those with hypertension showed a reduction of both systolic and diastolic blood pressures. Those with pre-existing chronic gastritis experienced diarrhea, which stopped following discontinuation of the herb. No significant abnormalities were noted through heart, liver, kidney and blood examinations.[6]

TOXICOLOGY

Mice and rats that were fed large dosages of *Mai Men Dong* over a period of 90 days showed no abnormalities in liver, kidney and blood examinations.[7]

AUTHORS' COMMENTS

Some classic texts have stated that the center part of *Mai Men Dong* must be removed before cooking. However, it has been shown that the center is only approximately 3% of the herb and contains essentially the same basic chemical components as the rest of the herb. Furthermore, some herbalists have tried taking *Mai Men Dong* (15 to 30 grams) themselves with the center part intact, for five to ten days, and did not experience any adverse side effects. Therefore, it is now generally accepted that removal of the center part is not necessary.

Mai Men Dong, *Chuan Mu Tong* (Caulis Clematidis Armandii), *Huang Lian* (Rhizoma Coptidis), and *Tian Zhu Huang* (Concretio Silicea Bambusae) all clear the Heart and eliminate irritability.

- *Mai Men Dong* is a tonic used for deficient Heart yin with heat that manifests as irritability and insomnia.
- *Chuan Mu Tong* is a diuretic that clears damp-heat to relieve irritability with oral ulcers and yellow urine.
- *Huang Lian* is used for febrile disease with excess fire in the Heart disturbing *shen* (spirit), thus manifesting in irritability and insomnia.
- *Tian Zhu Huang* dissolves hot phlegm and is best for irritability with spasms and convulsions.

Tian Men Dong (Radix Asparagi)

天門冬 天门冬

Pinyin Name: *Tian Men Dong*
Literal Name: "lush winter aerial plant"
Alternate Chinese Names: *Tian Dong, Ming Tian Dong, Wan Sui Teng*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: asparagus tuber
Botanical Name: *Asparagus cochinchinensis* (Lour.) Merr. (*Tian Men Dong*)
Pharmaceutical Name: Radix Asparagi
Properties: sweet, bitter, very cold
Channels Entered: Lung, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Clears Lung Heat, Sedates Fire

In addition to moistening dryness, *Tian Men Dong* (Radix Asparagi) is very cold and is best used to clear Lung heat and sedate fire characterized by fever, aversion to wind and cold, chest pain and blood-streaked sputum or hemoptysis. *Tian Men Dong* treats cases in which pathogenic dryness has attacked the Lung and is causing symptoms of non-productive dry cough or dry cough with scanty, sticky sputum that may or may not be blood-streaked and difficult to expectorate.

- Wind-heat attack with dryness: combine *Tian Men Dong* with *Sang Ye* (Folium Mori), *Dan Dou Chi* (Semen Sojae Praeparatum), *Nan Sha Shen* (Radix Adenophorae) and *Xing Ren* (Semen Armeniacae Amarum).
- Mild dry cough: use this herb individually.
- Moderate dry cough: pair it with *Mai Men Dong* (Radix Ophiopogonis).
- Chronic dry cough with blood: combine it with *Zhi Mu* (Radix Anemarrhenae), *Bei Mu* (Bulbus Fritillaria), *E Jiao* (Colla Corii Asini), *Ce Bai Ye* (Cacumen Platycladi) and *Gua Lou Shi* (Fructus Trichosanthis).
- Chronic cough due to Lung heat, with scanty, yellow, difficult-to-expectorate sputum: combine this herb with *Di Gu Pi* (Cortex Lycii), *Sang Bai Pi* (Cortex Mori), *Shi Gao* (Gypsum Fibrosum), *Gua Lou Shi* (Fructus Trichosanthis), and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).

2. Nourishes the Yin and Moistens Dryness

Chronic febrile disorders injuring the yin: Chronic febrile diseases consume a tremendous amount of the body's yin. With gradual recovery, the heat slowly dissipates, but yin deficiency may become more prominent. Clinically, patients may experience muscle wasting, thirst, consumptive cough with blood-streaked sputum, low-grade or afternoon fevers, constipation or dry stools. These are signs of yin exhaustion, especially of the Kidney. Western medical diagnoses for such illnesses include tuberculosis, diabetes mellitus, and cancer.

- Aftermath of febrile disorders with heat and dryness symptoms: pair *Tian Men Dong* with *Mai Men Dong* (Radix Ophiopogonis).
- Yin and qi deficiencies: combine this herb with *Xi Yang Shen* (Radix Panacis Quinquefolii) and *Shu Di Huang* (Radix Rehmanniae Preparata).
- Steaming bones sensations, flushed cheeks, night sweats: add it to *Qin Jiao* (Radix Gentianae Macrophyllae), *Bai Wei* (Radix Cynanchi Atrati), *Bie Jia* (Carapax Trionycis), *Di Gu Pi* (Cortex Lycii), *Yin Chai Hu* (Radix Stellariae), *Sheng Di Huang* (Radix Rehmanniae), *Gui Ban* (Plastrum Testudinis), *Huang Bai* (Cortex Phellodendri) and *Zhi Mu* (Radix Anemarrhenae).
- *Xiao ke* (wasting and thirsting) syndrome in the upper *jiao* with polydipsia: combine this herb with *Mai Men Dong* (Radix Ophiopogonis), *Tian Hua Fen* (Radix Trichosanthis), *Zhi Mu* (Radix Anemarrhenae), and *Huang Qin* (Radix Scutellariae).
- *Xiao ke* (wasting and thirsting) syndrome in the middle *jiao* with polyphagia: incorporate *Tian Men Dong* with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae) and *Sheng Di Huang* (Radix Rehmanniae).
- *Xiao ke* (wasting and thirsting) syndrome in the lower *jiao* with polyuria: combine it with *Zhi Mu* (Radix Anemarrhenae), *Huang Bai* (Cortex Phellodendri), *Shu Di Huang* (Radix Rehmanniae Preparata), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Shan Zhu Yu* (Fructus Corni) and *Lian Xu* (Stamen Nelumbinis).

Tian Men Dong (Radix Asparagi)

- Chronic respiratory disorders such as tuberculosis or cancer: combine this herb with *Mai Men Dong* (Radix Ophiopogonis), *Bai Bu* (Radix Stemonae), *Sheng Di Huang* (Radix Rehmanniae), *Shi Hu* (Herba Dendrobii) and *E Jiao* (Colla Corii Asini).

Moistens the intestines: *Tian Men Dong* is very cold and moistening and is best used to treat constipation caused by dryness and heat accumulation.

- Constipation due to yin deficiency and heat: combine this herb with *Xuan Shen* (Radix Scrophulariae), *Mai Men Dong* (Radix Ophiopogonis), *Sheng Di Huang* (Radix Rehmanniae) and *Zhi Mu* (Radix Anemarrhenae).
- Constipation from blood deficiency with heat: add it to *Dang Gui* (Radicis Angelicae Sinensis), a large dose of *Bai Shao* (Radix Paeoniae Alba), *He Shou Wu* (Radix Polygoni Multiflori) and honey.

Sore throat: The Kidney channel travels through the throat to reach the tongue. Kidney yin deficiency with rising fire will cause throat swelling and pain.

- Sore throat due to deficient fire: combine *Tian Men Dong* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Xuan Shen* (Radix Scrophulariae), *Mai Men Dong* (Radix Ophiopogonis) and *Shi Hu* (Herba Dendrobii).
- Sore throat due to Lung heat: add this herb to *Ban Lan Gen* (Radix Isatidis), *Shan Dou Gen* (Radix Sophorae Tonkinensis), *Jie Geng* (Radix Platycodonis) and *Gan Cao* (Radix Glycyrrhizae).

DOSAGE

6 to 15 grams in decoction. *Tian Men Dong* is also used in paste, powder and pill forms.

CAUTIONS / CONTRAINDICATIONS

- Use of *Tian Men Dong* is contraindicated when there is diarrhea due to deficiency and cold of the middle *jiao*, or cough due to wind-cold.

CHEMICAL COMPOSITION

Asparagine, β-sitosterol, 5-methoxy-methylfurfural, smilagenin, neo-ketose.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *Tian Men Dong* has an inhibitory effect against *Bacillus anthracis*, α-hemolytic streptococcus, β-hemolytic streptococcus, *Diplococcus pneumoniae*, *Staphylococcus aureus*, *Corynebacterium diphtheriae*, and *Bacillus subtilis*.[2]
- **Antineoplastic:** Alcohol extract of *Tian Men Dong* has demonstrated an inhibitory effect against sarcoma in mice.[3]

CLINICAL STUDIES AND RESEARCH

- **Breast tumor:** In one clinical study, 42 patients with lobular hypertrophy of the mammary glands were treated with an overall 83% rate of effectiveness using oral, intramuscular, or intravenous injection of *Tian Men Dong*. In another study, 72 patients with mammary cancer showed marked improvement using the same treatment protocols. For oral administration, the protocol was to weigh out 63 grams of the herb, remove the outer layer of the root, add a small quantity of grain-based liquor, steam the preparation for 30-60 minutes, and ingest the herbs in three equally-divided doses daily. Detailed guidelines for intramuscular or intravenous injection were not available at the time of publication.[4]
- **Malignant lymphoma:** According to one report, 41 patients were treated with an overall 87.9% rate of effectiveness using an integrative approach of both Chinese and western medicine. Out of 41 patients, 23 received herbal treatment only and 18 received the combination of herbal and chemotherapy treatment. The study reported an 82.5% rate of effectiveness for the herbal treatment. The herbal treatment consisted of intravenous injection of *Tian Men Dong* and intramuscular injection of *Bai Hua She She Cao* (Herba Oldenlandia) twice daily for 3 to 6 months. The injectables contained dosage equivalent in decoction to 10 to 40 grams (with a maximum of 120 grams) for *Tian Men Dong*, and 8 grams for *Bai Hua She She Cao*. Those who could not tolerate injection were converted to oral ingestion of herbs three times daily.[5]

AUTHORS' COMMENTS

Some texts state that ingestion of *Tian Men Dong* with meat increases the production of milk for nursing mothers.

Recently, *Tian Men Dong* and *Bai Hua She She Cao* (Herba Oldenlandia) have been used together to treat fibrocystic breast disorders, and cancers of the breast and the lymphatic system.

Tian Men Dong and *Mai Men Dong* (Radix Ophiopogonis) clear heat, nourish yin and moisten dryness. They can be used for patients with Lung yin deficiency with dry cough, scanty sputum, coughing of blood, and constipation. However, *Tian Men Dong* is very cold and is usually used with other herbs that clear deficient heat to treat Kidney yin-deficient fire with low-grade fever, night sweating and nocturnal emissions. *Mai Men Dong* treats Heart yin deficiency with fire caused by heat in the *ying* (nutritive) level manifesting in irritability, insomnia and palpitations.

Channels Entered: Kidney, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Nourishes the Stomach and Generates Body Fluids

Febrile disorders with injured yin: Thirst, dry mouth and throat, irritability, and perspiration are symptoms of febrile disease injuring body fluids. *Shi Hu* (Herba Dendrobii), especially the fresh form, is most suitable to clear heat and generate body fluids. Because this herb is relatively mild in function, it is commonly combined with other herbs that nourish yin, clear heat, and promote generation of body fluids.

- For severe heat with extreme thirst and irritability, dry tongue with a black coating: combine *Shi Hu* with *Tian Hua Fen* (Radix Trichosanthis), *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis) and *Lian Qiao* (Fructus Forsythiae).
- Post-febrile disorder with qi and yin deficiencies characterized by fatigue, no desire to speak, dry lips, and in severe cases, incoherence: use this herb with *Ren Shen* (Radix Ginseng) or *Xi Yang Shen* (Radix Panacis Quinquefolii), *Mai Men Dong* (Radix Ophiopogonis), *Mu Gua* (Fructus Chaenomelis), and *Lian Zi* (Semen Nelumbinis).
- *Xiao ke* (wasting and thirsting) syndrome: combine it with *Shi Gao* (Gypsum Fibrosum), *Tian Hua Fen* (Radix Trichosanthis) and *Shan Yao* (Rhizoma Dioscoreae).

Stomach yin deficiency: Dry mouth and throat, dry red tongue, thirst, dry heaves, dull epigastric pain and constipation are indications of Stomach yin deficiency. Sweet and cool, *Shi Hu* enters the Stomach to nourish yin and clear heat.

- Mild cases of Stomach yin deficiency: drink *Shi Hu* as tea daily.
- Moderate cases of Stomach yin deficiency: combine this

Shí Hu (Herba Dendrobii)

herb with *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Men Dong* (Radix Ophiopogonis), *Yu Zhu* (Rhizoma Polygonati Odorati), *Mu Gua* (Fructus Chaenomelis), *Gu Ya* (Fructus Setariae Germinatus) and *Shan Zha* (Fructus Crataegi).

2. Nourishes Yin and Clears Heat

Yin deficiency with heat: Yin deficiency with interior heat is characterized by unremitting low-grade fever. This condition is treated by herbs that nourish yin and eliminate deficiency heat.

- Unremitting low-grade fever: combine *Shi Hu* with *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), *Bai Wei* (Radix Cynanchi Atrati) and *Qing Hao* (Herba Artemisiae Annuae).
- Chronic dry cough with low-grade fever, night sweats, and dry mouth: add this herb to *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), *Bai He* (Bulbus Lilii), *Qin Jiao* (Radix Gentianae Macrophyllae), *Yin Chai Hu* (Radix Stellariae) and *Di Gu Pi* (Cortex Lycii).

3. Brightens the Eyes and Strengthens the Back, Tendons and Bones

Blurred vision and dizziness due to yin deficiency: The Liver opens to the eyes, and the presence of Liver yin is directly dependent on the availability of Kidney yin. Kidney yin deficiency leads to Liver yin deficiency, which eventually results in malnourishment of the eyes and compromised visual function. This might show up as diminished visual acuity, blurred vision, dizziness, platycoria or spots in front of the eyes. Sweet and cold in nature, *Shi Hu* is most suitable to treat conditions characterized by yin deficiency with rising deficiency heat.

- Blurred vision, dilated pupils, and dizziness caused by yin deficiency with heat: combine *Shi Hu* with *Gou Qi Zi* (Fructus Lycii), *Shu Di Huang* (Radix Rehmanniae Preparata), *Tian Men Dong* (Radix Asparagi), *Ju Hua* (Flos Chrysanthemi), *Sha Yuan Zi* (Semen Astragali Complanati), and *Jue Ming Zi* (Semen Cassiae). **Exemplar Formula:** *Shi Hu Ye Guang Wan* (Dendrobium Pill for Night Vision).
- Spots in front of the eyes: add this herb to *Cang Zhu* (Rhizoma Atractylodis) and *Yin Yang Huo* (Herba Epimedii).

Pain, soreness and weakness of the back and knees: The Kidney resides in the lower back, stores *jing* (essence) and dominates the bones; lack of nourishment to the Kidney creates a dull, sore, aching pain. *Shi Hu* nourishes Kidney yin and strengthens the back.

- Soreness, weakness and pain in the back and knees: combine *Shi Hu* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Huai Niu Xi* (Radix Achyranthis Bidentatae), *Sang Ji Sheng* (Herba Taxilli) and *Fu Pen Zi* (Fructus Rubi).
- Numbness of extremities or *wei* (atrophy) syndrome: incorporate this herb with *Huai Niu Xi* (Radix Achyranthis Bidentatae), *Huang Bai* (Cortex Phellodendri), *Xu Duan* (Radix Dipsaci), *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae), *Qin Jiao* (Radix Gentianae Macrophyllae) and *Mu Gua* (Fructus Chaenomelis).

DOSAGE

6 to 15 grams of the dried herb, 15 to 30 grams of the fresh herb, in decoction. *Shi Hu* is also used in pill, paste or powder forms. Pre-cook this herb when making a decoction. Fresh *Shi Hu* strongly clears heat and promotes generation of body fluids to treat febrile diseases involving damaged body fluids, thirst, and red tongue. Dried *Shi Hu* moderately clears heat and promotes generation of body fluids in cases of mild-to-moderate severity. Use both forms to treat febrile disorders with injured yin.

CAUTIONS / CONTRAINDICATIONS

- Use of *Shi Hu* is contraindicated in excess febrile disorders, damp and phlegm accumulation, and the exterior stage of a disease.
- *Shi Hu* is not suitable for use during the early stages of warm-febrile disorders.

CHEMICAL COMPOSITION

Dendrobine, nobilonine, dendramine, dendroxine, dendrine, and 6-hydroxydendroxine.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Administration of a diluted solution of *Shi Hu* is associated with an increase in gastric acid secretion and intestinal peristalsis. A concentrated solution, however, inhibits intestinal peristalsis.[2]
- **Antipyretic and analgesic:** Dendrobine has antipyretic and analgesic effects, similar to but slightly weaker than phenacetin.[3]

CLINICAL STUDIES AND RESEARCH

- **Atrophic gastritis:** In one clinical study, 156 patients with atrophic gastritis were treated with herbal formulas with complete recovery in 87 patients, improvement in 66 patients, and no response in 3 patients. The standard herbal formula contained *Shi Hu*, *Mai Men Dong* (Radix Ophiopogonis), *Sheng Di Huang* (Radix Rehmanniae), *Yu Zhu* (Rhizoma Polygonati Odorati), *Tian Hua Fen* (Radix Trichosanthis), *Wu Mei* (Fructus Mume), *Shan Zha*

Shi Hu (Herba Dendrobii)

(Fructus Crataegi), *Bai Shao* (Radix Paeoniae Alba), *Gan Cao* (Radix Glycyrrhizae) and *San Qi* (Radix Notoginseng). *Shi Gao* (Gypsum Fibrosum) and *Pu Gong Ying* (Herba Taraxaci) were added if excess Stomach heat was present. *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis) were added if there was epigastric distention due to qi stagnation. *Pu Huang* (Pollen Typhae) and *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) were added if there was stabbing pain in the epigastrium. *Huo Ma Ren* (Fructus Cannabis) and *Yu Li Ren* (Semen Pruni) were added if there were dry stools or constipation. The herbal formula was administered as a decoction twice daily for three months.[4]

TOXICOLOGY

Shi Hu is very safe. However, seizures have been associated with gross overdose.[5]

AUTHORS' COMMENTS

Shi Hu and *Yu Zhu* (Rhizoma Polygonati Odorati) both tonify yin, generate body fluids and nourish Stomach yin. Common manifestations of these deficiencies include dry cough, irritability and constipation. *Shi Hu* more strongly generates body fluids and relieves thirst. It also nourishes Kidney yin to dispel deficiency fire. Milder and lighter, *Yu Zhu* does not create stagnation like other tonics. It is also used for yin-deficient patients who have wind-heat manifesting in dry cough, sore throat and thirst.

Shi Hu and *Tian Hua Fen* (Radix Trichosanthis) both generate body fluids and alleviate thirst. *Shi Hu* more strongly nourishes Kidney yin and brightens the eyes. *Tian Hua Fen* more effectively sedates fire and nourishes Stomach yin.

Yu Zhu (Rhizoma Polygonati Odorati)

玉竹

Pinyin Name: *Yu Zhu*
Literal Name: "jade bamboo"
Alternate Chinese Names: *Wei Rui, Ming Yu Zhu, Shan Wei Shen, Di Jie*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: polygonatum rhizome, fragrant Solomon's seal rhizome
Botanical Name: *Polygonatum odoratum* (Mill.) Druce (*Yu Zhu*)
Pharmaceutical Name: Rhizoma Polygonati Odorati
Properties: sweet, neutral
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Yin and Moistens the Lung

Dryness attacking the Lung: Pathogenic dryness often attacks the Lung during autumn. With dryness injuring Lung yin, patients may have a non-productive dry cough, or dry cough with scanty and sticky sputum, and dry mouth and throat. *Yu Zhu* (Rhizoma Polygonati Odorati) has abundant juice that helps to moisten both

Yu Zhu (Rhizoma Polygonati Odorati)

the Lung and Stomach. This herb tonifies without stagnating, which makes it ideal for treating yin deficiency accompanied by heat.

- Dry cough: combine *Yu Zhu* with *Nan Sha Shen* (Radix Adenophorae), *Bei Sha Shen* (Radix Glehniae), *Shi Hu* (Herba Dendrobii), *Mai Men Dong* (Radix Ophiopogonis), *Sang Ye* (Folium Mori), and *Tian Hua Fen* (Radix Trichosanthis). **Exemplar Formula:** *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction).
- Lung dryness and cold: use it with *Sang Ye* (Folium Mori), *Xing Ren* (Semen Armeniacae Amarum), *Qian Hu* (Radix Peucedani) and *Jie Geng* (Radix Platycodonis).

Consumptive cough: Chronic respiratory disorders often lead to consumption of Lung yin, a condition characterized by feeble, dry cough, with scanty, difficult-to-expectorate sputum. Sweet in nature, *Yu Zhu* enters the Lung to nourish yin. It does not, however, sedate deficiency fire or dispel phlegm. Therefore, it must be combined with herbs that accomplish those functions.

- Chronic cough with relatively more deficiency heat: combine *Yu Zhu* with *Sheng Di Huang* (Radix Rehmanniae), *Zhi Mu* (Radix Anemarrhenae), and *Di Gu Pi* (Cortex Lycii).
- Chronic cough with relatively more yin deficiency: use this herb with *Bei Mu* (Bulbus Fritillaria), and *Bai Bu* (Radix Stemonae).

2. Generates Body Fluids and Nourishes the Stomach

Stomach yin deficiency: This condition may result from a febrile disorder or heat in the interior. Clinical manifestations include hunger but no desire to eat, dull epigastric pain, stomach discomfort, and dry mouth and tongue. Sweet in nature, *Yu Zhu* enters the Stomach to nourish yin and promote generation of fluids. It is most suitable for treating late-stage febrile disorders with yin deficiency or disharmony between organs because of heat injuring the body fluids.

- Stomach yin deficiency: combine *Yu Zhu* with *Sha Shen* (Radix Glehniae seu Adenophorae), *Shi Hu* (Herba Dendrobii), *Mai Men Dong* (Radix Ophiopogonis), *Mai Ya* (Fructus Hordei Germinatus) and rock sugar.

Yin deficiency with exterior wind-heat invasion: This chronic yin deficiency is complicated by recent exposure to exterior pathogens. Clinical manifestations include aversion to wind, fever, dry cough, scanty sputum, dizziness, irritability, and dry mouth. Such conditions must be treated with herbs that concurrently tonify yin and eliminate exterior wind-heat. Moderate in action and non-stagnating in nature, *Yu Zhu* nourishes yin and is less likely than other yin tonics to retain exterior pathogenic factors in the body.

- Yin deficiency with exterior wind-heat: combine *Yu Zhu* with *Bo He* (Herba Menthae), *Bai Wei* (Radix Cynanchi Atrati), *Dan Dou Chi* (Semen Sojae Praeparatum) and *Jie Geng* (Radix Platycodonis).

***Xiao ke* (wasting and thirsting) syndrome:** Lastly, *Yu Zhu* treats *xiao ke* syndrome characterized by yin deficiency of the Lung, Stomach and Kidney. *Yu Zhu* nourishes yin and promotes generation of body fluids.

- *Xiao ke* syndrome: combine *Yu Zhu* with *Tian Hua Fen* (Radix Trichosanthis), fresh *Ge Gen* (Radix Puerariae), fresh *Shan Yao* (Rhizoma Dioscoreae) and fresh *Shu Di Huang* (Radix Rehmanniae Preparata).
- *Xiao ke* in the upper *jiao* with polydipsia: use this herb with *Mai Men Dong* (Radix Ophiopogonis), *Zhi Mu* (Radix Anemarrhenae), *Huang Qin* (Radix Scutellariae) and *Tian Hua Fen* (Radix Trichosanthis).
- *Xiao ke* in the middle *jiao* with polyphagia: add it to *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae) and *Sheng Di Huang* (Radix Rehmanniae).
- *Xiao ke* in the lower *jiao* with polyuria: combine it with *Zhi Mu* (Radix Anemarrhenae), *Huang Bai* (Cortex Phellodendri), *Shu Di Huang* (Radix Rehmanniae Preparata), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Shan Zhu Yu* (Fructus Corni).

DOSAGE

10 to 15 grams in decoction. *Yu Zhu* is also used in paste, pill or powder forms. Fresh *Yu Zhu* more effectively treats yin-deficient heat. The dried herb is better to remedy mild yin-deficient heat.

CAUTIONS / CONTRAINDICATIONS

- *Yu Zhu* is not recommended in cases of Spleen deficiency, accumulation of dampness, phlegm stagnation or qi stagnation.

CHEMICAL COMPOSITION

Convallamarin, convallarin, polygonatiin, polygonotin, quercitol, vitamin A, starch.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** Administration of *Yu Zhu* is associated with dilation of blood vessels and reduction of blood pressure in laboratory animals. In frog heart specimens, a small dose of *Yu Zhu* has a positive inotropic effect while a large dose has a negative inotropic effect. No significant change in heart rate was observed.[2]
- **Effects on smooth muscle:** A 20% decoction of *Yu Zhu* has a mild stimulating effect on the uterus in mice. It also

Yu Zhu (Rhizoma Polygonati Odorati)

has an initial stimulating, followed by inhibiting, effect on the smooth muscle of the intestines in mice.[3]

- **Antidiabetic:** Oral administration of *Yu Zhu* inhibits hyperglycemia associated with epinephrine and glucose intake.[4]

CLINICAL STUDIES AND RESEARCH

- **Congestive heart failure:** According to one report, congestive heart failure in 5 patients was stabilized in 5 to 10 days by daily treatment with 15 grams of *Yu Zhu* decoction.[5]

TOXICOLOGY

No fatalities in mice were reported following oral ingestion of *Yu Zhu* decoction at the dosage of 10 g/kg for one week. The LD_{50} for 100% *Yu Zhu* solution was 112.5 g/kg.[6]

AUTHORS' COMMENTS

Yu Zhu and *Huang Jing* (Rhizoma Polygonati) both nourish the Lung and Stomach. *Yu Zhu* more strongly tonifies Stomach yin with symptoms of dry mouth and thirst, while *Huang Jing* more effectively tonifies Kidney yin with symptoms of dizziness, and soreness and weakness of the lower back and knees.

See *Shi Hu* (Herba Dendrobii) for comparison of these two herbs.

Huang Jing (Rhizoma Polygonati)

黄精

Pinyin Name: *Huang Jing*
Literal Name: "yellow essence," "yellow pure substance"
Alternate Chinese Names: *Mi Pu*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: polygonatum root, king Solomon's seal rhizome, Siberian Solomon's seal rhizome, many-flower Solomon's seal rhizome
Botanical Name: *Polygonatum kingianum* Coll et hemsl. (*Dian Huang Jing*); *Polygonatum sibiricum* Red. (*Huang Jing*); *Polygonatum cyrtonema* Hua. (*Nang Si Huang Jing*)
Pharmaceutical Name: Rhizoma Polygonati
Properties: sweet, neutral
Channels Entered: Spleen, Lung, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Yin, Moistens the Lung

Chronic yin-deficient cough: Sweet and neutral, *Huang Jing* (Rhizoma Polygonati) nourishes yin, moistens the Lung, and tonifies qi. It is commonly used to treat coughing caused by yin deficiency or yin-deficient heat, characterized by a dry, non-productive cough. If heat dries fluids and damages the Lung, streaks of blood may be present with coughing, or in the sputum. Patients with deficiency heat may have flushed cheeks and irritability.

Huang Jing (Rhizoma Polygonati)

Chronic coughing consumes Lung qi causing shortness of breath and fatigue. *Huang Jing* is the ideal herb to treat yin-deficient cough, nourish the Lung and also benefit qi. *Huang Jing* may be used alone or in combination with other herbs.

- Chronic cough associated with yin deficiency: use *Huang Jing* with *Sha Shen* (Radix Glehniae seu Adenophorae), *Zhi Mu* (Radix Anemarrhenae), *Bei Mu* (Bulbus Fritillaria) and *Bai Bu* (Radix Stemonae).
- Coughing with streaks of blood: use this herb with *E Jiao* (Colla Corii Asini), *Bai Ji* (Rhizoma Bletillae), and *Han Lian Cao* (Herba Ecliptae).

Cough due to dryness: *Huang Jing* is commonly used to treat cough by nourishing yin and moistening dryness. Dryness in the Lung consumes body fluids and leads to dry nose, itchy throat, dry non-productive coughing, or coughing with sticky, difficult-to-expectorate sputum that may be streaked with blood. Dryness may be accompanied by heat or cold factors, and must be addressed accordingly. *Huang Jing* is neutral and thus suitable for use for coughing caused by either cold or heat.

- Cough due to cold and dryness: use *Huang Jing* with *Zi Su Ye* (Folium Perillae), *Xing Ren* (Semen Armeniacae Amarum), *Zi Wan* (Radix Asteris), and *Kuan Dong Hua* (Flos Farfarae).
- Cough from heat and dryness: combine this herb with *Sang Ye* (Folium Mori), *Xing Ren* (Semen Armeniacae Amarum), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Nan Sha Shen* (Radix Adenophorae).

2. Tonifies Kidney *Jing* (Essence)

Huang Jing enters the Kidney to tonify *jing*, promote generation of marrow and improve cognitive functions. It is commonly used to treat Kidney deficiency characterized by symptoms such as soreness of the back, weakness of the knees, dizziness, vertigo, prematurely gray hair, and blurred vision. It may be used individually with pork, beef or chicken as soup or in combination with other herbs in powder, pills or decoction.

- Kidney *jing* deficiency: use *Huang Jing* with small portions of *Gan Jiang* (Rhizoma Zingiberis) and *Rou Gui* (Cortex Cinnamomi) to potentiate the tonic function.
- Kidney *jing* and Liver yin deficiencies: combine it with *Gou Qi Zi* (Fructus Lycii).
- Kidney *jing* and blood deficiencies: add *Dang Gui* (Radicis Angelicae Sinensis).

3. Relieves *Xiao Ke* (Wasting and Thirsting) Syndrome

***Xiao ke* syndrome:** This syndrome is characterized by yin-deficient heat with symptoms such as polyuria, polyphagia, and polydipsia. Other symptoms include emaciation, irritability and fatigue. *Huang Jing* enters and nourishes the Lung, Spleen and Kidney, the organs commonly affected by this syndrome. Therefore, it may be used to treat upper, middle, and lower *xiao ke* syndromes. *Huang Jing* may be used with other herbs, or individually in large doses. Due to the neutral thermal property of *Huang Jing* and the fact that this herb tonifies both qi and yin, it is ideal for treatment of chronic *xiao ke* syndrome with yin and qi deficiencies.

- *Xiao ke* with relatively more heat: use *Huang Jing* with *Tian Hua Fen* (Radix Trichosanthis), *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae) and *Huang Lian* (Rhizoma Coptidis).
- *Xiao ke* with severe yin deficiency: combine it with *Sheng Di Huang* (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Preparata), *Tian Men Dong* (Radix Asparagi) and *Shi Hu* (Herba Dendrobii).
- *Xiao ke* with deficiencies of yin and yang: use this herb with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae), *Shan Zhu Yu* (Fructus Corni), *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- *Xiao ke* with deficiencies of qi and yin: combine it with *Huang Qi* (Radix Astragali), *Shan Yao* (Rhizoma Dioscoreae), *Xi Yang Shen* (Radix Panacis Quinquefolii), and *Tai Zi Shen* (Radix Pseudostellariae).

4. Tonifies the Spleen and Benefits Qi

Spleen and Stomach deficiencies: *Huang Jing* tonifies Spleen qi and yin to relieve symptoms such as fatigue, poor appetite, weak pulse, dry mouth, poor appetite, and a red tongue with no coating. In these cases, *Huang Jing* is commonly used with other herbs, as its Spleen-tonic function is rather mild.

- Spleen and Stomach qi deficiencies: use *Huang Jing* with *Dang Shen* (Radix Codonopsis), *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Yi Yi Ren* (Semen Coicis).
- Spleen and Stomach yin deficiencies: combine it with *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Men Dong* (Radix Ophiopogonis), *Yu Zhu* (Rhizoma Polygonati Odorati) and *Gu Ya* (Fructus Setariae Germinatus).
- Spleen and Stomach qi and yin deficiencies: use it with *Dang Shen* (Radix Codonopsis), *Mai Men Dong* (Radix Ophiopogonis), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Shan Yao* (Rhizoma Dioscoreae).

DOSAGE

10 to 15 grams for dried *Huang Jing*, 30 to 60 grams for the fresh herb, in decoction. *Huang Jing* is commonly used in decoction, pills, or powder forms. For topical

Huang Jing (Rhizoma Polygonati)

application, this herb is generally processed first by cooking with water or soaking in alcohol or vinegar. For oral use, *Huang Jing* is often processed by steaming with water or grain-based liquor, as the unprocessed herb may be slightly irritating to the throat.

CAUTIONS / CONTRAINDICATIONS

- Sticky and greasy in nature, *Huang Jing* may create dampness and stagnation.
- Because of the potential for stagnation, this herb is not recommended for use in cases of dampness with Spleen deficiency, cough with profuse sputum, diarrhea due to cold, or fullness and distention caused by qi stagnation.

CHEMICAL COMPOSITION

Azetidine-2-carboxylic acid, aspartic acid, homoserine, diaminobutyric acid, digitalis glycoside, vitexin xyloside.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Extract of *Huang Jing* has demonstrated inhibitory action against *Staphylococcus aureus*, acid-fast bacilli, and some dermatophytes.[2]
- **Antidiabetic:** Administration of *Huang Jing* extract is associated with an initial elevation followed by a reduction of plasma glucose levels in rabbits. Extract of *Huang Jing* is especially effective in reducing plasma glucose levels raised by adrenaline.[3]
- **Adaptogenic:** Intraperitoneal injection of *Huang Jing* prolonged the swimming time of mice.[4]
- **Cardiovascular:** *Huang Jing* is associated with an increase in heart rate, reduction in blood pressure, and dilation of the coronary arteries.[5,6,7]
- **Antihyperlipidemic:** Administration of *Huang Jing* extract for 30 days showed a marked reduction in triglycerides and cholesterol levels in rats.[8]

CLINICAL STUDIES AND RESEARCH

- **Hypotension:** Ten hypotensive patients were treated with an herbal decoction with good immediate results, but less than satisfactory long-term effects. The herbal formula contained 30 grams of *Huang Jing*, 30 grams of *Dang Shen* (Radix Codonopsis), and 10 grams of *Zhi Gan Cao* (Radix Glycyrrhizae Preparata).[9]
- **Hypercholesterolemia:** High plasma cholesterol levels in 86 patients showed an average reduction of 38.2 mg/dL after two months of taking an herbal formula containing *Huang Jing*, *He Shou Wu* (Radix Polygoni Multiflori) and *Sang Ji Sheng* (Herba Taxilli).[10]
- **Near-sightedness:** An herbal formula containing *Huang Jing* and *Hei Dou* (Semen Glycine Max) was 59.75% effective in improving the vision of 41 patients with near-sightedness.[11]
- **Pulmonary tuberculosis:** In one study, 19 patients with pulmonary tuberculosis were treated with *Huang Jing* four times daily for 2 months, with satisfactory results. The study reported negative findings in the sputum, normal range of ESR, improvement in symptoms, and weight gain.[12]
- **Fungal infection:** Topical application of a *Huang Jing* tincture was effective in treating 55 out of 67 patients with fungal infections. The tincture was prepared by soaking 100 grams of the herb in 250 ml of 75% alcohol for 15 days. The tincture is then mixed with 150 ml of rice vinegar before application.[13]
- **Deafness:** Patients with deafness caused by poisoning were treated with intramuscular injection of *Huang Jing*, vitamin B1, and vitamin A three times daily. Out of 100 patients, 9 had complete recovery, 22 showed some improvement, 3 showed slight improvement, and the rest showed no response.[14]

AUTHORS' COMMENTS

Huang Jing and *Yu Zhu* (Rhizoma Polygonati Odorati) both nourish the Lung and Stomach. *Huang Jing* is stronger in tonifying Kidney yin with symptoms of dizziness, and soreness and weakness of the lower back and knees. *Yu Zhu* is stronger in tonifying Stomach yin with symptoms of dry mouth and thirst.

Bai He (Bulbus Lilii)

百合

Pinyin Name: *Bai He*
Literal Name: "hundred meetings"
Alternate Chinese Names: *Bai Hua Bai He*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: lily, lily bulb
Botanical Name: *Lilium brownii* F. E. Brown. (*Bai He*); *Lilium alancifolium* Thunb. (*Juan He*); *Lilium pumilum* DC. (*Xi Ye Bai He*)
Pharmaceutical Name: Bulbus Lilii
Properties: sweet, cool
Channels Entered: Lung, Heart

CHINESE THERAPEUTIC ACTIONS

1. Moistens the Lung and Arrests Cough

Consumptive cough due to Lung deficiency: Chronic coughing causes qi deficiency and loss of moisture in the Lung. The chief manifestations of Lung yin deficiency include: chronic, consumptive, dry cough, shortness of breath, and difficult-to-expectorate white or yellow scanty, sticky sputum that may contain streaks of blood. Besides moistening the Lung, *Bai He* (Bulbus Lilii) treats Lung yin deficiency with heat signs such as tidal fever, night sweats, the absence of sputum, and hemoptysis. Clinical applications include: chronic respiratory disorders such as tuberculosis, bronchiectasis, asthma, and lung abscesses.

- Dry cough: combine *Bai He* with *Kuan Dong Hua* (Flos Farfarae), *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), *Sha Shen* (Radix Glehniae seu Adenophorae) and pear skins.
- Dry cough with blood-streaked sputum: add this herb to *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), and *Mai Men Dong* (Radix Ophiopogonis). **Exemplar Formula:** *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal).
- Bronchiectasis, hemoptysis: use this herb with *Bai Ji* (Rhizoma Bletillae), *Bai Bu* (Radix Stemonae) and the powder of *Hai Ge Fen* (Concha Meretricis seu Cyclinae), with honey, to make pills.
- Lung abscess: use *Bai He* alone. Drink the decoction and eat the herb.
- Non-ulcerating sores: crush fresh *Bai He* and apply it topically as a paste.

2. Clears the Heart and Calms the *Shen* (Spirit)

Restless *shen*: The Heart governs the blood vessels and houses the *shen*. Lung yin deficiency directly affects its neighbor, the Heart. Possible symptoms may include inability to concentrate, disorientation in speech and action, sensory impairment, a bitter taste in the mouth, dark yellow urine, and a thready, rapid pulse. *Bai He*, sweet and cool, nourishes Lung yin and clears Heart fire. It tonifies deficiency and at the same time calms the *shen*.

- Palpitations, insomnia, restlessness, dark urine, and inability to concentrate, due to the aftermath of febrile disease: combine *Bai He* with *Zhi Mu* (Radix Anemarrhenae), and *Sheng Di Huang* (Radix Rehmanniae).
- Difficulty falling and staying asleep: use it with *Suan Zao Ren* (Semen Zizyphi Spinosae).
- Irritability and thirst due to perspiration, resulting from misuse of diaphoretic herbs: add this herb to *Zhi Mu* (Radix Anemarrhenae).
- Dark urine or dysuria: use *Bai He* with *Hua Shi* (Talcum).
- Vomiting or hiccups: use it with *Dai Zhe Shi* (Haematitum).

3. Nourishes Stomach Yin and Harmonizes the Middle *Jiao*

Bai He has recently been found to be effective in harmonizing the middle *jiao* and easing the dull pain associated with Stomach yin deficiency. It is often used in late-stage stomach disorders such as atrophic gastritis, ulcers and stomach cancer.

- Atrophic gastritis due to Stomach yin deficiency: use *Bai He* with *Bai Shao* (Radix Paeoniae Alba), *Shan Yao* (Rhizoma Dioscoreae) and *Huang Qi* (Radix Astragali).
- Chronic stomach pain from unknown causes: use *Bai He* (Bulbus Lilii) 30g, *Wu Yao* (Radix Linderae) 9g, *Dan*

Bai He (Bulbus Lilii)

Shen (Radix Salviae Miltiorrhizae) 30g, *Tan Xiang* (Lignum Santali Albi) 6g, *Cao Dou Kou* (Semen Alpiniae Katsumadai) 9g, *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) 9g, *Xiang Fu* (Rhizoma Cyperi) 9g, and *Chuan Lian Zi* (Fructus Toosendan) 6g as the basic formula, and modify the formula as necessary.

DOSAGE

10 to 30 grams in decoction. *Bai He* is often used as food in congees or soups. The fresh herb may be used topically.

CAUTIONS / CONTRAINDICATIONS

- Because of its cold and moistening properties, *Bai He* is contraindicated for patients with middle *jiao* deficiency, diarrhea or loose stools.
- *Bai He* is also contraindicated in cases of cough due to wind-cold or phlegm.
- Use of *Bai He* may be associated with drowsiness and sedation. Therefore, individuals who take this herb should exercise caution if driving or operating heavy machinery.

OVERDOSAGE

Gross overdose of *Bai He* is associated with adverse reactions such as nausea, vomiting, decreased appetite, diarrhea and constipation. Rare instances of hair loss and changes in ECG have also been reported. Injection of this herb has been associated with necrosis of local tissues.[1]

CHEMICAL COMPOSITION

Colchicine, starch, protein, lipids, sugars, organ acids, calcium, magnesium, iron, aluminum, iron, potassium, zinc.[2]

PHARMACOLOGICAL EFFECTS

- **Respiratory:** Administration of *Bai He* is associated with marked antitussive and expectorant effects in mice.[3]
- **Adaptogenic:** Administration of *Bai He* in mice is associated with an increase resistance to hypoxia and increased swimming time.[4]

CLINICAL STUDIES AND RESEARCH

- **Atrophic gastritis:** In one study, 56 patients with atrophic gastritis were treated with herbal medicine for three months with marked effectiveness in 22 cases, moderate results in 28 cases and no response in 6 cases. The overall rate of effectiveness was 89.3%. The herbal decoction contained *Bai He* 30g, *Wu Yao* (Radix Linderae Strychnifolia) 9g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Hong Hua* (Flos Carthami) 15g, *Shan Yao* (Rhizoma Dioscoreae) 20g, *Huang Qi* (Radix Astragali) 20g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Gan Cao* (Radix Glycyrrhizae) 5g, *Huang Lian* (Rhizoma Coptidis) 3g, and others, depending on the condition of each patient.[5]
- **Sores:** Topical application of *Bai He* powder provides effective treatment for sores. According to one report, good results were observed following topical application of the herb powder, with the affected area covered with gauze, and the dressing changed once every 2 to 3 days in summer and every 5 to 8 days in winter.[6]
- **Bleeding:** According to one report, 100 patients with post-surgical nasal bleeding were treated topically with *Bai He* cream, with good results. The cream was prepared by mixing 15 grams of *Bai He* powder with distilled water, then stirring the solution while gradually heating it to 60° C, to obtain a paste-like cream. The cream was then cooled and sterilized prior to topical application. The treatment protocol was to apply a small amount of the cream into the nasal cavity to stop bleeding. The cream generally begin to dissolve after 3 hours, and completely disappeared after 14 hours. No allergic or adverse reactions were reported.[7]

HERB-DRUG INTERACTION

- **Sedatives:** Oral ingestion of *Bai He* prolonged sleeping time induced by barbiturates.[8] [Note: Many categories of drugs induce sedation, such as antihistamines, narcotic analgesics, barbiturates, benzodiazepines and many others.]

AUTHORS' COMMENTS

Because of its pleasant taste and neutral property, *Bai He* is often used as food and cooked with porridge to nourish Lung yin.

Gou Qi Zi (Fructus Lycii)

枸杞子

Pinyin Name: *Gou Qi Zi*
Literal Name: "thorny stalk seed," "aspen-willow fruit"
Alternate Chinese Names: *Di Gu Zi, Gan Qi, Qi Zi, Xue Qi, Ku Qi, Gou Ji, Tian Jing Zi, Tu Gou Qi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: lycium fruit, matrimony vine fruit, barbary wolfberry
Botanical Name: *Lycium barbarum* L. (*Ning Xia Gou Qi*); *Lycium chinense* Mill. (*Gou Qi*)
Pharmaceutical Name: Fructus Lycii
Properties: sweet, neutral
Channels Entered: Liver, Kidney, Lung

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Liver and Kidney Yin, Brightens the Eyes

Liver and Kidney yin deficiencies: The Liver opens to the eyes: insufficient yin of the Liver and Kidney may lead to dizziness, blurry vision, nocturnal emissions, infertility, soreness and weakness of the lower back and knees, prematurely gray hair, *xiao ke* (wasting and thirsting) syndrome, night sweats, thirst, and diminished visual acuity. *Gou Qi Zi* (Fructus Lycii) is neutral and has a light, moistening yet non-stagnating, nature that effectively nourishes different parts of the body without the side effect of creating stagnation. It is excellent for deficient patients who need mild tonics for a prolonged period of time. *Gou Qi Zi* is the herb of choice for treating visual disorders caused by Liver and Kidney yin deficiencies.

- Blurry vision: use *Gou Qi Zi* alone, soaked in grain-based liquor.
- Dizziness, diminished visual acuity, dryness or tearing with exposure to wind: combine this herb with *Ju Hua* (Flos Chrysanthemi) and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia). **Exemplar Formula:** *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill).
- Soreness and weakness of the lower back and knees: add *Gou Qi Zi* to *Gu Sui Bu* (Rhizoma Drynariae), *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), and *Sang Ji Sheng* (Herba Taxilli).
- Nocturnal emissions, night sweating, blurry vision, tinnitus: combine this herb with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae), *Shan Zhu Yu* (Fructus Corni), and *Gui Ban Jiao* (Gelatinum Plastrum Testudinis). **Exemplar Formula:** *Zuo Gui Wan* (Restore the Left [Kidney] Pill).
- Impotence and nocturnal emissions from Kidney yin and yang deficiencies: incorporate this herb with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Rou Gui* (Cortex Cinnamomi), and *Fu Zi* (Radix Aconiti Lateralis Praeparata). **Exemplar Formula:** *You Gui Wan* (Restore the Right [Kidney] Pill).
- *Xiao ke* (wasting and thirsting) syndrome: combine *Gou Qi Zi* with *Tian Men Dong* (Radix Asparagi), *Mai Men Dong* (Radix Ophiopogonis), *Shan Yao* (Rhizoma Dioscoreae), *Yu Zhu* (Rhizoma Polygonati Odorati), *Sheng Di Huang* (Radix Rehmanniae), *Zhi Mu* (Radix Anemarrhenae), and *Shi Gao* (Gypsum Fibrosum).
- Sallow appearance, prematurely gray hair, insomnia, and frequent dreams: use *Gou Qi Zi* with *Long Yan Rou* (Arillus Longan) and *He Shou Wu* (Radix Polygoni Multiflori).
- Prematurely gray hair, loose teeth: combine this herb with *He Shou Wu* (Radix Polygoni Multiflori), *Dang Gui* (Radicis Angelicae Sinensis), *Huai Niu Xi* (Radix Achyranthis Bidentatae), and *Tu Si Zi* (Semen Cuscutae).
- Steaming bones sensations: combine it with *Di Gu Pi* (Cortex Lycii).
- Emaciation, spermatorrhea, impotence, dizziness, and blurred vision: add it to *Ren Shen* (Radix Ginseng), *Lu Jiao* (Cornu Cervi), and *Gui Ban* (Plastrum Testudinis). **Exemplar Formula:** *Gui Lu Er Xian Jiao* (Tortoise Shell and Deer Antler Syrup).

2. Moistens Lung Yin

Chronic respiratory disorders with Lung yin deficiency: Symptoms include dry cough, without sputum or with scanty sputum that is difficult to expectorate, possibly coughing with blood or blood streaks, steaming

Gou Qi Zi (Fructus Lycii)

bones sensations, and afternoon fevers. *Gou Qi Zi* not only nourishes Liver and Kidney yin, it also moistens the Lung to treat Lung yin deficiency.

- Dry cough: combine *Gou Qi Zi* with *Zhi Mu* (Radix Anemarrhenae), *Mai Men Dong* (Radix Ophiopogonis), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Bai Bu* (Radix Stemonae).
- Hemoptysis: combine it with *Han Lian Cao* (Herba Ecliptae), *E Jiao* (Colla Corii Asini), *Bai Ji* (Rhizoma Bletillae), and *Zi Zhu* (Folium Callicarpae).

DOSAGE

5 to 15 grams in decoction. *Gou Qi Zi* is also used in paste, medicinal tincture, pill or powder forms.

CAUTIONS / CONTRAINDICATIONS

- Though *Gou Qi Zi* is not stagnating in nature, it should still be used with caution for patients who have diarrhea from Spleen and Stomach deficiencies.
- Use of *Gou Qi Zi* is contraindicated for patients with excess or exterior conditions.
- *Gou Qi Zi* should be used with caution during pregnancy, as it stimulates contraction of the uterus.

CHEMICAL COMPOSITION

Betaine, solavetivone, zeaxanthin, physalien, β-sitosterol, linoleic acid, sodium, calcium, potassium, magnesium, copper, zinc, iron.[1]

PHARMACOLOGICAL EFFECTS

- **Immunostimulant:** Administration of *Gou Qi Zi* is associated with an increase in non-specific immunity. It increases phagocytic activity of the macrophages and the total number of T cells.[2]
- **Hematological:** Decoction of *Gou Qi Zi* has been shown to increase the production of red blood cells and white blood cells in mice.[3]
- **Cardiovascular:** Intravenous injection of water extract of *Gou Qi Zi* at 20 mg/kg lowers blood pressure in rabbits. This cardiovascular effect may be reversed by injection of atropine.[4]
- **Uterine stimulant:** Decoction of *Gou Qi Zi* has a stimulating effect on the uterus in rabbits.[5]
- **Antineoplastic:** *Gou Qi Zi* enhances the immune system and suppresses the growth of cancer cells in mice.[6]

CLINICAL STUDIES AND RESEARCH

- **Male infertility:** In one clinical study, men with a low sperm count and poor sperm motility were treated with 15 grams of fresh *Gou Qi Zi* taken as food each night for 1 month per course of treatment. The patients were advised to avoid sexual activity during the treatment. Out of 42 patients, 23 patients showed normal sperm count and motility after 1 month, 10 patients had similar results after 2 months, and 9 showed no change. In follow-up visits two years after the initial treatment, the 33 who had normal sperm counts and motility had successfully conceived children.[7]
- **Chronic atrophic gastritis:** Patients with chronic atrophic gastritis were treated with 10 grams of *Gou Qi Zi* twice daily [20 grams per day] on an empty stomach for 2 months per course of treatment. All other herbal or drug treatments were discontinued during the treatment with *Gou Qi Zi*. Out of 20 patients, the study reported marked improvement in 15 patients and moderate improvement in 5 patients, after 2 to 4 months of treatment.[8]

TOXICOLOGY

The LD_{50} for intraperitoneal injection of water extract of *Gou Qi Zi* is 83.2 g/kg in mice.[9]

SUPPLEMENT

- 枸杞葉 / 枸杞叶 *Gou Qi Ye* (Folium Lycii), the leaf, is sometimes used as a substitute for *Gou Qi Zi*.

AUTHORS' COMMENTS

Gou Qi Zi is used with a large dose of *Bai Mao Gen* (Rhizoma Imperatae) to treat chronic hepatic disorders with bleeding gums.

When applied topically, a large dose of *Gou Qi Zi* powder mixed with vaseline or olive oil treats burns, redness and swelling.

Gou Qi Zi and *Ju Hua* (Flos Chrysanthemi) both brighten the eyes. *Gou Qi Zi* focuses on nourishing the Liver and Kidney to brighten the eyes. It is used for deficiency types of eye disorders with dryness and soreness. *Ju Hua* disperses wind, clears heat and brightens the eyes by calming rising Liver yang. It is used for excess types of eye disorders with redness, swelling and pain. The two herbs are often used together for patients with Liver yin deficiency and rising Liver yang.

Sang Shen Zi (Fructus Mori)

桑椹子

Pinyin Name: *Sang Shen Zi*
Literal Name: "mori seed"
Alternate Chinese Names: *Sang Shen*
Original Source: *Xin Xiu Ben Cao* (Newly Revised Materia Medica) by Su Jing in 657-659 A.D.
English Name: mulberry fruit
Botanical Name: *Morus alba* L. (*Sang*)
Pharmaceutical Name: Fructus Mori
Properties: sweet, cold
Channels Entered: Heart, Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies Yin and Nourishes Blood

Yin and blood deficiencies of the Liver and Kidney: This condition is characterized by symptoms such as dizziness, vertigo, blurry vision, prematurely gray hair, soreness and weakness of the lower back and knees, tinnitus, and insomnia. *Sang Shen Zi* (Fructus Mori) is a sweet fruit with light tonic properties that make it suitable for long-term use. The decoction, powdered or fresh form of this fruit is often mixed with honey.

- Yin and blood deficiencies of the Liver and Kidney: combine *Sang Shen Zi* with honey.
- Prematurely gray hair: use this herb with *He Shou Wu* (Radix Polygoni Multiflori), *Han Lian Cao* (Herba Ecliptae), *Nu Zhen Zi* (Fructus Ligustri Lucidi), and *Sheng Di Huang* (Radix Rehmanniae).
- Amenorrhea caused by anemia: add it to *Ji Xue Teng* (Caulis Spatholobi) and *Hong Hua* (Flos Carthami), and cook with grain-based liquor and water.

2. Generates Body Fluids

Thirst and body fluid deficiency: *Sang Shen Zi* generates body fluids, replenishes yin, and tonifies blood.

- Thirst, with heat sensations: combine *Sang Shen Zi* with *Sheng Di Huang* (Radix Rehmanniae), *Shi Hu* (Herba Dendrobii), *Mai Men Dong* (Radix Ophiopogonis), *Yu Zhu* (Rhizoma Polygonati Odorati), and *Sha Shen* (Radix Glehniae seu Adenophorae).
- Thirst and hot flashes: add this herb to *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), *Tian Men Dong* (Radix Asparagi), and *Tian Hua Fen* (Radix Trichosanthis).
- Thirst and fatigue from qi deficiency: use it with *Xi Yang Shen* (Radix Panacis Quinquefolii), *Tai Zi Shen* (Radix Pseudostellariae), and *Huang Qi* (Radix Astragali).

3. Lubricates the Intestines

Constipation caused by dryness: Lack of nourishment to the bowels leads to dry stools or constipation. *Sang Shen Zi* nourishes yin and blood to lubricate the Large Intestine and promote bowel movement. It can be used alone for mild cases of constipation.

- Constipation or dry stools: use *Sang Shen Zi* alone, cooked in a large quantity of water and served with honey.
- Chronic constipation: combine it with *He Shou Wu* (Radix Polygoni Multiflori), *Rou Cong Rong* (Herba Cistanches), *Hei Zhi Ma* (Semen Sesami Nigrum) and *Huo Ma Ren* (Fructus Cannabis).
- Constipation and dry stools with abdominal bloating: use it with *Zhi Ke* (Fructus Aurantii).

DOSAGE

10 to 15 grams in decoction. *Sang Shen Zi* is also used in paste, grain-based liquor, pill or powder forms.

CAUTIONS / CONTRAINDICATIONS

- Use *Sang Shen Zi* with caution in Spleen- and Stomach-deficient patients who have diarrhea or loose stools.

CHEMICAL COMPOSITION

Rutin, carotene, vitamin A, B_1, B_2, C; protein, sugars, anthocyanidinglucoside, lipids, cyanidin.

AUTHORS' COMMENTS

Sang Shen Zi and *Gou Qi Zi* (Fructus Lycii) are mild tonics that can be taken over a long period of time to enhance general health and promote longevity.

Sang Shen Zi and *Shu Di Huang* (Radix Rehmanniae Preparata) are both excellent yin and blood tonics. *Sang*

Sang Shen Zi (Fructus Mori)

Shen Zi is cool and tonifies the Liver and Kidney. It has a gentle and subtle effect, and works well as a long-term tonic. *Shu Di Huang*, on the other hand, is warm and strongly nourishes yin and tonifies blood. It is potent and exerts immediate effects.

Han Lian Cao (Herba Ecliptae)

旱蓮草　旱莲草

Pinyin Name: *Han Lian Cao*
Alternate Chinese Names: *Mo Han Lian, Li Chang*
English Name: eclipta
Botanical Name: *Eclipta prostrata* L.
Pharmaceutical Name: Herba Ecliptae
Properties: sweet, sour, cold
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Yin and Tonifies the Kidney

Liver and Kidney yin deficiencies: The Liver stores blood and opens to the eyes. The Kidney dominates the bones and generates *jing* (essence) and marrow. Signs of Liver and Kidney yin deficiencies include dizziness, vertigo, blurred vision, prematurely gray hair, and soreness and weakness of the lower back and knees. Because *Han Lian Cao* (Herba Ecliptae) is sour and cold, it is excellent to treat yin-deficient heat.

- Yin deficiency of the Liver and Kidney: pair *Han Lian Cao* with *Nu Zhen Zi* (Fructus Ligustri Lucidi). **Exemplar Formula:** *Er Zhi Wan* (Two-Ultimate Pill).
- Prematurely gray hair: combine this herb with *He Shou Wu* (Radix Polygoni Multiflori), *Sang Shen Zi* (Fructus Mori) and *Nu Zhen Zi* (Fructus Ligustri Lucidi).

2. Cools the Blood and Stops Bleeding

Bleeding caused by heat in the vessels: Excess heat in the vessels pushes blood out, creating symptoms of vomiting, hemoptysis, epistaxis, uterine bleeding, hematuria, hematochezia, subcutaneous bleeding or purpura. *Han Lian Cao* is an essential herb that enters the Liver channel to cool the blood and stop bleeding. The fresh herb is usually used for this function as it is stronger in cooling the blood than the dried form.

- General bleeding: combine *Han Lian Cao* with *Sheng Di Huang* (Radix Rehmanniae), *Bai Mao Gen* (Rhizoma Imperatae), *E Jiao* (Colla Corii Asini), *Ce Bai Ye* (Cacumen Platycladi) and *Pu Huang* (Pollen Typhae).
- Hematuria: incorporate this herb with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Bai Mao Gen* (Rhizoma Imperatae), charred *Huang Bai* (Cortex Phellodendri), *Da Ji* (Herba seu Radix Cirsii Japonici), *Xiao Ji* (Herba Cirisii), *Qu Mai* (Herba Dianthi) and *Ze Xie* (Rhizoma Alismatis).
- Hematemesis: use it with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae), *Huang Qin* (Radix Scutellariae), *Bai Ji* (Rhizoma Bletillae) and charred *Ou Jie* (Nodus Nelumbinis Rhizomatis).
- Hematochezia: combine this herb with *Di Yu* (Radix Sanguisorbae), charred *Huai Hua* (Flos Sophorae),

Han Lian Cao (Herba Ecliptae)

Huang Bai (Cortex Phellodendri) and *Fang Feng* (Radix Saposhnikoviae).

- External bleeding due to trauma: mash fresh *Han Lian Cao* into a paste or use the powdered form and apply topically to stop bleeding.

DOSAGE

10 to 30 grams in decoction. *Han Lian Cao* is also used in paste, juice, pill or powder forms. The fresh herb has a stronger function to clear heat and cool the blood than the dried herb.

CAUTIONS / CONTRAINDICATIONS

- Use *Han Lian Cao* with caution for Spleen and Kidney deficiencies, and patients experiencing cold and diarrhea.
- Use it with caution for Spleen qi-deficient patients who have food stagnation.

CHEMICAL COMPOSITION

Wedololactone, demethyl wedelolactone, α-terthienyl, α-terthienylmethanol, α-formyl-α-terthienyl, ediptine.[1]

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** In dogs with external bleeding, good hemostatic results were achieved following topical application of *Han Lian Cao* powder or powdered extract, with slight pressure, on the wound.[2]
- **Antibiotic:** This herb has inhibitory action on *Staphylococcus aureus* and *Bacillus dysenteriae*.[3]

CLINICAL STUDIES AND RESEARCH

- **Dysentery:** An herbal decoction containing *Han Lian Cao* and sugar has shown remarkable effectiveness for treatment of dysentery. Response was observed following the first dose, with complete recovery within 3 to 4 doses in most cases. The herbal formula contained 125 grams of *Han Lian Cao* and 31 grams of sugar. White (refined) sugar was used for patients with bloody dysentery, and brown sugar was used for patients with white mucus dysentery.[4]
- **Coronary artery disease (CAD):** In one study, 30 patients with CAD were treated with 96.7% effectiveness using a water extract of *Han Lian Cao*. The treatment protocol was to administer 15 grams of the extract (equivalent to 30 grams of dried herb) twice daily for one month per course of treatment. Marked improvement was noted in most patients after 2 to 4 months of herbal therapy. The effectiveness was attributed to the function of the herb to dilate the coronary artery, increase blood perfusion to the cardiac muscle, and increase resistance to hypoxia.[5]
- **Bleeding:** Two patients with profuse bleeding experienced complete recovery following treatment with *Han Lian Cao*. The diagnosis according to traditional Chinese medicine was excessive heat in the interior with yin deficiency, leading to reckless movement of the blood. The treatment protocol was to administer 2,000 ml of juice from fresh *Han Lian Cao*. A decoction of other herbs was also used as supportive treatment.[6]

SUPPLEMENT

- 紅旱連 / 红旱连 *Hong Han Lian* (Herba Hypericum Ascyron) is sometimes used as a substitute for *Han Lian Cao*. *Hong Han Lian* is stronger in cooling the blood, invigorating blood circulation, and healing sores and ulcers. *Han Lian Cao* is more effective in tonifying the Kidney yin and stops bleeding.

AUTHORS' COMMENTS

The juice of *Han Lian Cao* treats diphtheria and dysentery when ingested orally, and treats headaches when applied topically to the nasal cavity.

Han Lian Cao and *Nu Zhen Zi* (Fructus Ligustri Lucidi) both tonify Liver and Kidney yin and treat symptoms of dizziness, tinnitus, vertigo, premature graying of hair, and soreness and weakness of the lower back and knees. *Han Lian Cao* is stronger in cooling the blood to stop various kinds of bleeding. *Nu Zhen Zi* treats hot flashes and steaming bones sensations arising from deficiency heat.

According to Dr. Zhang You-Fen, the following tincture promotes hair growth. Steam 20 grams of *Han Lian Cao* for 20 minutes. Allow it to cool, then soak the steamed herb in 75% alcohol for three days. Apply the tincture generously to bald areas. After it dries, use a plum blossom needle to tap the area for 5 minutes. Repeat daily.

Nu Zhen Zi (Fructus Ligustri Lucidi)

女貞子 女贞子

Pinyin Name: *Nu Zhen Zi*
Literal Name: "female chastity seed"
Alternate Chinese Names: *Nu Zhen, Dong Qing Zi, Nu Zhen Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: ligustrum, glossy privet fruit
Botanical Name: *Ligustrum lucidum* Ait. (*Nu Zhen*)
Pharmaceutical Name: Fructus Ligustri Lucidi
Properties: sweet, bitter, cool
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney

Liver and Kidney yin and *jing* (essence) deficiencies: Manifestations include dizziness, tinnitus, vertigo, prematurely gray hair, and soreness and weakness of the lower back and knees. *Nu Zhen Zi* (Fructus Ligustri Lucidi) is a light tonic that is not stagnating in nature, and is suitable for use over a long period of time. It is best for yin deficiency with heat.

- Prematurely gray hair: combine *Nu Zhen Zi* with *Han Lian Cao* (Herba Ecliptae), *He Shou Wu* (Radix Polygoni Multiflori), *Sang Shen Zi* (Fructus Mori), and *Hei Zhi Ma* (Semen Sesami Nigrum).
- Dizziness, tinnitus, loose teeth, and soreness and weakness of the lower back and knees: add this herb to *Sang Shen Zi* (Fructus Mori), *Shu Di Huang* (Radix Rehmanniae Preparata), *Du Zhong* (Cortex Eucommiae), *Shan Yao* (Rhizoma Dioscoreae), and *Han Lian Cao* (Herba Ecliptae).
- Constipation: combine this herb with *Huo Ma Ren* (Fructus Cannabis) and *Yu Li Ren* (Semen Pruni).

Yin-deficient heat, menopause: *Nu Zhen Zi* nourishes yin and dispels deficiency heat to treat symptoms of irritability, tidal fever, hot flashes, thirst, night sweats, mood swings, steaming bones sensations and other symptoms and signs of Liver and Kidney yin and *jing* deficiencies.

- Irritability and mood swings: combine *Nu Zhen Zi* with *Han Lian Cao* (Herba Ecliptae), *Yin Chai Hu* (Radix Stellariae), *He Huan Hua* (Flos Albiziae), *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).
- Hot flashes and steaming bones sensations: add it to *Di Gu Pi* (Cortex Lycii), *Mu Dan Pi* (Cortex Moutan), *Qing Hao* (Herba Artemisiae Annuae), *Bai Wei* (Radix Cynanchi Atrati) and *Hu Huang Lian* (Rhizoma Picrorhizae).
- Thirst: combine this herb with *Mai Men Dong* (Radix Ophiopogonis), *Sheng Di Huang* (Radix Rehmanniae), and *Zhi Mu* (Radix Anemarrhenae).
- Night sweats: incorporate *Nu Zhen Zi* with *Fu Xiao Mai* (Semen Tritici Aestivi Levis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

2. Clears Heat and Brightens the Eyes

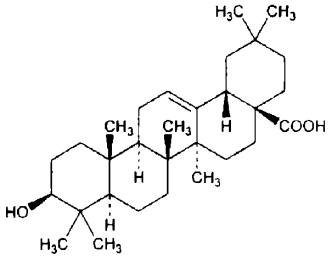
Eye disorders: The Liver opens to the eyes and lack of nourishment from the Liver results in diminished vision, blurred vision, and dry eyes. Rising Liver yang also causes redness and pain in the eyes. *Nu Zhen Zi* can be used in both excess and deficient types of eye disorders.

- Red and painful eyes due to Liver yang rising: combine *Nu Zhen Zi* with *Jue Ming Zi* (Semen Cassiae), *Xia Ku Cao* (Spica Prunellae) and *Qing Xiang Zi* (Semen Celosiae).
- Blurred vision from deficiency: use it with *Gou Qi Zi* (Fructus Lycii), *Shu Di Huang* (Radix Rehmanniae Preparata), *Tu Si Zi* (Semen Cuscutae), *Fu Pen Zi* (Fructus Rubi) and *Chu Shi Zi* (Fructus Broussonetiae).

DOSAGE

10 to 15 grams in decoction. *Nu Zhen Zi* is also used as paste or pills. The unprocessed herb has a stronger effect to nourish yin and moisten dryness, and is commonly used to treat dizziness, vertigo and constipation. The steamed herb (with grain-based liquor) has a stronger effect to tonify the Liver and Kidney, and is commonly used to treat dizziness, vertigo, tinnitus, blurred vision, and prematurely gray hair.

CAUTIONS / CONTRAINDICATIONS



- Use of *Nu Zhen Zi* is contraindicated for patients who

Nu Zhen Zi (Fructus Ligustri Lucidi)

have yang deficiency, or deficiency and cold of the Spleen and Stomach, characterized by diarrhea.

CHEMICAL COMPOSITION

Oleanolic acid, nuzhenide, ligustroside, olenropein, betulin, lupeol, salidroside, ursolic acid, palmitic acid, ursolic acid, rutin, quercetin.[1,2]

Oleanolic Acid

PHARMACOLOGICAL EFFECTS

- **Immunostimulant:** Administration of *Nu Zhen Zi* is associated with an increase in white blood cells. It is also effective in reversing neutropenia induced by chemotherapy treatment.[3]
- **Antidiabetic:** Decoction of *Nu Zhen Zi* is associated with a marked reduction of plasma glucose levels. It also counters the sharp rise of plasma glucose levels associated with epinephrine and ingestion of glucose. It is commonly used for prevention and treatment of diabetes mellitus.[4]
- **Antihyperlipidemic:** Administration of *Nu Zhen Zi* powder in rabbits at the dosage of 20 grams per day for 46 days showed a significant reduction of plasma cholesterol and triglyceride levels.[5]
- **Hematological:** Administration of *Nu Zhen Zi* stimulates the production of blood in mice.[6]
- **Anti-inflammatory:** Administration of *Nu Zhen Zi* at dosages of 12.5 to 25.0 g/kg in mice is associated with a reduction in swelling, inflammation and permeability of the blood vessels.[7]
- **Hepatoprotective:** Oleanolic acid has been shown to lower elevated liver enzyme levels and prevent liver damage caused by carbon tetrachloride.[8]
- **Antibiotic:** *Nu Zhen Zi* has an inhibitory effect against *Staphylococcus aureus, Bacillus dysenteriae, Salmonella typhi, Pseudomonas aeruginosa,* and *E. coli.*[9]

CLINICAL STUDIES AND RESEARCH

- **Chronic hepatitis:** In one study, 222 patients with chronic hepatitis were treated with an herbal preparation with an overall rate of effectiveness of 69.8%. The herbal treatment contained oleanolic acid isolated from *Nu Zhen Zi* and *Qing Ye Dan* (Herba Swertiae Mileensis).[10]
- **Neutropenia:** Intramuscular injection of 100% *Nu Zhen Zi* is commonly used as the supportive treatment in patients with neutropenia due to chemotherapy and radiation treatments. [11]
- **Hypercholesterolemia:** According to one report, 30 patients with high cholesterol were treated with a preparation of *Nu Zhen Zi* (equivalent to 5.3 grams of dried herb per day) for one month. Reduction of total cholesterol and β-lipoprotein levels was reported in 70.6% of patients.[12]

HERB-DRUG INTERACTION

- **Antidiabetics:** Herbs that lower plasma glucose levels, such as *Nu Zhen Zi,* should be used with caution with insulin, sulfonylureas, and other antidiabetic medications, as the combination may have a synergistic effect, leading to hypoglycemia.[13] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]

TOXICOLOGY

Nu Zhen Zi is very safe. No side effects or adverse reactions were observed following one-time ingestion of 75 grams of the herb by rabbits.[14]

AUTHORS' COMMENTS

Nu Zhen Zi also treats tuberculosis of the lung or lymph nodes in patients with signs of yin deficiency and tidal fever.

Nu Zhen Zi and *Gou Qi Zi* (Fructus Lycii) are both mild tonics for the Liver and Kidney. *Nu Zhen Zi* nourishes only yin. *Gou Qi Zi* tonifies both yin and qi.

Nu Zhen Zi and *Han Lian Cao* (Herba Ecliptae) both tonify Liver and Kidney yin and treat common symptoms of dizziness, tinnitus, vertigo, premature graying of hair, and soreness and weakness of the lower back and knees. *Nu Zhen Zi* also treats hot flashes and steaming bones sensations from deficiency heat. *Han Lian Cao* more strongly cools the blood to stop various kinds of bleeding.

Chu Shi Zi (Fructus Broussonetiae)

楮實子 楮实子

Pinyin Name: *Chu Shi Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: broussonetia, paper mulberry fruit
Botanical Name: *Broussonetia papyrifera* (L.) Vent.
Pharmaceutical Name: Fructus Broussonetiae
Properties: sweet, cold
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

Tonifies the Kidney and Liver

Chu Shi Zi (Fructus Broussonetiae) tonifies the Kidney and Liver to treat disorders such as weakness and deficiency, dizziness, blurred vision, and edema. It may be used internally or topically.

DOSAGE

6 to 15 grams.

Gui Ban (Plastrum Testudinis)

龜板 龟板

Pinyin Name: *Gui Ban*
Literal Name: "tortoise shell"
Alternate Chinese Names: *Gui Jia, Bai Gui Ban, Zhi Kan Ban, Yuan Wu Ban*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: testudinis shell (ventral side), tortoise plastron
Zoological Name: *Chinemys reevesii* (Gray) (*Wu Gui*)
Pharmaceutical Name: Plastrum Testudinis
Properties: salty, sweet, cold
Channels Entered: Liver, Kidney, Heart

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Yin and Anchors Yang

Liver yin deficiency with rising fire: Dizziness, vertigo, headache, flushed face, red eyes, irritability, and short temper are manifestations of Liver and Kidney yin deficiencies with an inability to control the rising yang. *Gui Ban* (Plastrum Testudinis), cold and heavy in nature, has a sinking tendency that helps anchor yang and nourish yin.

- Liver yang rising: combine *Gui Ban* with *Bai Shao* (Radix Paeoniae Alba), *Huai Niu Xi* (Radix Achyranthis Bidentatae), *Dai Zhe Shi* (Haematitum), *Long Gu* (Os Draconis) and *Shi Jue Ming* (Concha Haliotidis). **Exemplar Formula:** *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction).
- Red and painful eyes: use it with *Jue Ming Zi* (Semen Cassiae), *Ju Hua* (Flos Chrysanthemi), *Shi Jue Ming* (Concha Haliotidis) and *Xia Ku Cao* (Spica Prunellae).
- Steaming bones sensations, tidal fevers, night sweats, nocturnal emissions: combine this substance with *Shu Di Huang* (Radix Rehmanniae Preparata), *Zhi Mu* (Radix Anemarrhenae), *Mu Dan Pi* (Cortex Moutan) and *Di Gu Pi* (Cortex Lycii).

Liver yin deficiency with Liver wind: The Liver governs the tendons; lack of blood and yin nourishment of the Liver causes stiffness. Prolonged yin deficiency due to febrile disease results in internal movement of Liver wind. Manifestations of these combined pathologies include tremors, dizziness, tinnitus, headache, flushed face, red eyes, short temper, afternoon fever, irritability during the night, convulsions, and in severe cases, stroke and paralysis.

- Liver wind: combine *Gui Ban* with a high dose of *Bai Shao* (Radix Paeoniae Alba), *Gou Teng* (Ramulus Uncariae cum Uncis), *E Jiao* (Colla Corii Asini), *Bie Jia* (Carapax Trionycis) and *Mu Li* (Concha Ostreae).

Yin-deficient heat: *Gui Ban* strongly nourishes yin and dispels deficiency heat. It treats rising deficiency fire that manifests as steaming bones sensations, tidal fevers, night sweats, nocturnal emissions and irritability.

- Yin-deficient heat: use *Gui Ban* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Zhi Mu* (Radix Anemarrhenae) and *Huang Bai* (Cortex Phellodendri).

2. Tonifies the Kidney and Strengthens Bones

Kidney yin and *jing* (essence) deficiencies with weak bones: Kidney *jing*, stored in the marrow, is essential to the health and development of bones. *Jing* deficiency manifests as weakness and soreness of the back and knees, weakness in the legs, retarded skeletal development in children or failure of the fontanelle to close. *Gui Ban* fortifies the bones and strengthens tendons.

- Weakness and soreness of the back and knees: combine this substance with *Shu Di Huang* (Radix Rehmanniae Preparata), *Huai Niu Xi* (Radix Achyranthis Bidentatae), *Shan Yao* (Rhizoma Dioscoreae), *Shan Zhu Yu* (Fructus Corni), *Xu Duan* (Radix Dipsaci), *Du Zhong* (Cortex Eucommiae), *Zhi Mu* (Radix Anemarrhenae) and *Bai Shao* (Radix Paeoniae Alba).
- Kidney yin and yang deficiencies with weak bones, spermatorrhea or nocturnal emissions, weight loss, and blurred vision: add *Gui Ban* to *Lu Rong* (Cornu Cervi Pantotrichum), *Gou Qi Zi* (Fructus Lycii) and *Ren Shen* (Radix Ginseng). **Exemplar Formula:** *Gui Lu Er Xian Jiao* (Tortoise Shell and Deer Antler Syrup).

Gui Ban (Plastrum Testudinis)

3. Nourishes Blood and Tonifies the Heart

Heart blood deficiency: Lack of blood nourishment to the *shen* (spirit) of the Heart manifests as insomnia, palpitation, forgetfulness, and anxiety. *Gui Ban* is sweet and nourishes Heart blood.

- Insomnia and anxiety due to Heart blood deficiency: combine *Gui Ban* with *Long Gu* (Os Draconis), *Yuan Zhi* (Radix Polygalae), *Shi Chang Pu* (Rhizoma Acori) and *Ye Jiao Teng* (Caulis Polygoni Multiflori).

4. Stops Bleeding

Menstrual disorders: Irregular uterine bleeding may be caused by yin deficiency, with deficiency heat pushing blood out of the vessels. *Gui Ban* treats such conditions by nourishing yin and blood and stopping bleeding.

- Uterine bleeding or hypermenorrhea: combine *Gui Ban* with *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *E Jiao* (Colla Corii Asini), *Huang Qin* (Radix Scutellariae), *Bai Shao* (Radix Paeoniae Alba), *Huang Bai* (Cortex Phellodendri), *Bai Mao Gen* (Rhizoma Imperatae), charred *Ce Bai Ye* (Cacumen Platycladi) and *Qian Cao* (Radix Rubiae).

5. Promotes Healing of Sores

Non-healing sores and ulcerations: Calcined *Gui Ban* powder is used topically to treat non-healing sores and ulcerations.

DOSAGE

10 to 30 grams in decoction. *Gui Ban* is also used in paste, pill or powder form. It should be crushed to increase surface area and pre-decocted to facilitate extraction. The unprocessed form is used for nourishing yin and dispelling deficiency heat. The vinegar-processed form dissipates nodules and softens masses.

CAUTIONS / CONTRAINDICATIONS

- Use of *Gui Ban* is contraindicated during pregnancy and for patients with diarrhea, deficiency-related cold, or damp-cold.

CHEMICAL COMPOSITION

Collagen, protein, lipids, amino acids, calcium, phosphorus.[1]

PHARMACOLOGICAL EFFECTS

- **Hepatic:** Preliminary reports have indicated that *Gui Ban* is beneficial for treatment of sarcoma and liver cirrhosis with ascites.[2]

CLINICAL STUDIES AND RESEARCH

- **Scrofula:** An ointment containing *Gui Ban* powder and petroleum jelly has been shown to be beneficial in treatment of scrofula. With daily application, recovery is generally reported within 6 to 7 treatments.[3]
- **Burns:** In one study, 53 patients with burns were treated by topical application of an herbal preparation, with marked success. The herbal formula was prepared by mixing equal portions of fine powder of charred *Gui Ban* and charred *Di Yu* (Radix Sanguisorbae) with sesame oil, to make a paste. The treatment protocol was to clean the wound first, then apply the herbal paste to the affected area, twice daily until recovery.[4]

SUPPLEMENT

- 龜板膠 / 龟板胶 *Gui Ban Jiao* (Gelatinum Plastrum Testudinis), first cited in *Ben Cao Zheng* (Rectification of the Materia Medica), is the gelatin made from turtle shells. Compared to *Gui Ban*, it has similar properties but a richer function to tonify yin and stop bleeding. The usual dosage for *Gui Ban Jiao* is 3 to 10 grams. It is usually dissolved with the decoction prior to ingestion, rather than cooked in the decoction.

AUTHORS' COMMENTS

Gui Ban and *Bie Jia* (Carapax Trionycis) both nourish Liver yin and anchor yang. Please refer to *Bie Jia* for comparative functions.

Originally, only the ventral part (yin side) of the shell was used as a yin tonic. Currently, both the ventral and dorsal sides are used. Research has shown the active components to be the same for both the dorsal and ventral sides. Also, it was found that the dorsal shell has twice as much gelatin as the ventral part.

Bie Jia (Carapax Trionycis)

鱉甲 鱉甲

Pinyin Name: *Bie Jia*
Literal Name: "turtle shell"
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: tortoise shell (dorsal side), turtle shell
Zoological Name: *Trionyx sinensis* Wiegmann (*Bie*)
Pharmaceutical Name: Carapax Trionycis
Properties: salty, cold
Channels Entered: Liver

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Yin and Anchors Yang

Yin-deficiency with Liver wind: The Liver governs the tendons and stores blood. Liver yin deficiency can cause tendons to be stiff. Prolonged Liver yin deficiency not only causes yang to rise, but also creates internal movement of Liver wind, which then manifests in tremors, dizziness, tinnitus, headaches, flushed face, red eyes, short temper, muscle spasms, convulsions, and in severe cases, stroke and paralysis. *Bie Jia* (Carapax Trionycis) nourishes yin, anchors yang and is best to address late-stage febrile disease in which both yin and blood are injured.

- Liver wind: combine *Bie Jia* with a high dose of *Bai Shao* (Radix Paeoniae Alba), *Sheng Di Huang* (Radix Rehmanniae), *E Jiao* (Colla Corii Asini), and *Mai Men Dong* (Radix Ophiopogonis). **Exemplar Formula:** *Da Ding Feng Zhu* (Major Arrest Wind Pearl).

Yin-deficient heat: *Bie Jia* treats post-febrile deficiency heat symptoms such as unremitting low-grade fever, afternoon fevers, steaming bones sensations, thirst and night sweats. This substance simultaneously nourishes yin and dispels deficiency heat.

- Yin-deficient heat with feelings of heat during the night and cold during the day, low-grade fever in the absence of perspiration, red tongue, scanty coating and a thready, rapid pulse: combine *Bie Jia* with *Qing Hao* (Herba Artemisiae Annuae), *Mu Dan Pi* (Cortex Moutan), *Sheng Di Huang* (Radix Rehmanniae), and *Zhi Mu* (Radix Anemarrhenae). **Exemplar Formula:** *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-shelled Turtle Shell Decoction).
- Steaming bones sensations, nighttime fever and night sweats, weight loss, cough and fatigue: combine this substance with *Qin Jiao* (Radix Gentianae Macrophyllae), *Di Gu Pi* (Cortex Lycii), *Chai Hu* (Radix Bupleuri) and *Zhi Mu* (Radix Anemarrhenae). **Exemplar Formula:** *Qin Jiao Bie Jia San* (Gentiana Macrophylla and Soft-shelled Turtle Shell Powder).
- Severe steaming bones sensations: add it to *Di Gu Pi* (Cortex Lycii), *Yin Chai Hu* (Radix Stellariae), *Qing Hao* (Herba Artemisiae Annuae) and *Hu Huang Lian* (Rhizoma Picrorhizae). **Exemplar Formula:** *Qing Gu San* (Cool the Bones Powder).
- Tuberculosis with chronic consumptive dry cough, blood-streaked sputum: combine *Bie Jia* with *Yin Chai Hu* (Radix Stellariae), *Qin Jiao* (Radix Gentianae Macrophyllae), *Qing Hao* (Herba Artemisiae Annuae), *Di Gu Pi* (Cortex Lycii), *Zhi Mu* (Radix Anemarrhenae), *Dang Gui* (Radicis Angelicae Sinensis), *Wu Mei* (Fructus Mume), *Bai Shao* (Radix Paeoniae Alba), *Sheng Di Huang* (Radix Rehmanniae) and *Xuan Shen* (Radix Scrophulariae).

2. Softens Hardness and Dissipates Nodules

Amenorrhea: *Bie Jia* softens hardness and dissipates nodules to treat amenorrhea and masses in the lower *jiao* characterized by blood stagnation. It may also treat amenorrhea caused by yin and blood deficiencies failing to nourish the *ren* (conception) and *chong* (thoroughfare) channels. *Bie Jia* should be combined with other blood-invigorating herbs to enhance overall effectiveness. The vinegar-processed form is often used for this function.

- Amenorrhea or masses from blood stagnation: combine this substance with *Da Huang* (Radix et Rhizoma Rhei), *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *Dang Gui Wei* (Extremitas Radicis Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubrae), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Gui Zhi* (Ramulus Cinnamomi) and *Chuan Shan Jia* (Squama Manis).

Bie Jia (Carapax Trionycis)

Chronic malarial disorders: *Bie Jia* is commonly used to treat patients with chronic malarial disorders with formation of masses or nodules. *Bie Jia* functions to soften hardness and dissipate nodules. When used alone, *Bie Jia* is relatively weak, thus, it is usually combined with other herbs to amplify its effects.

- Abdominal masses from malaria: use *Bie Jia* with *She Gan* (Rhizoma Belamcandae), *Meng Chong* (Tabanus), *Tao Ren* (Semen Persicae) and *Da Huang* (Radix et Rhizoma Rhei).
- Chronic malarial disorders: combine this substance with *Chang Shan* (Radix Dichroae), *Sheng Ma* (Rhizoma Cimicifugae), *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Hai Piao Xiao* (Endoconcha Sepiae).
- Warm malarial disorders: use it with *Chang Shan* (Radix Dichroae), *Zhi Mu* (Radix Anemarrhenae), *Di Gu Pi* (Cortex Lycii), *Zhu Ye* (Herba Phyllostachys) and *Shi Gao* (Gypsum Fibrosum).

Organomegaly: *Bie Jia* treats enlargement of internal organs, such as the liver, spleen and thyroid.

- Hepatomegaly or splenomegaly: combine this substance with *Dan Shen* (Radix Salviae Miltiorrhizae), *Hu Zhang* (Rhizoma Polygoni Cuspidati), *Yu Jin* (Radix Curcumae), *Xuan Shen* (Radix Scrophulariae) and *Bai Shao* (Radix Paeoniae Alba).
- Goiter: use *Bie Jia* with *Xuan Shen* (Radix Scrophulariae), *Zhi Mu* (Radix Anemarrhenae), *Zhi Zi* (Fructus Gardeniae), *Xia Ku Cao* (Spica Prunellae), *Chuan Niu Xi* (Radix Cyathulae) and *Mu Li* (Concha Ostreae).
- Intestinal abscesses and abdominal pain: use the calcined form of *Bie Jia* powder.

DOSAGE

10 to 30 grams in decoction. *Bie Jia* is also used in paste, pill or powder forms. It should be crushed to increase surface area, and pre-decocted to facilitate extraction. The calcined powder form of this substance is used externally. The unprocessed form is used for nourishing yin and dispelling deficiency heat. The vinegar-processed form dissipates nodules and softens masses.

CAUTIONS / CONTRAINDICATIONS

- *Bie Jia* is contraindicated during pregnancy, as it has dissipating and dispersing functions.
- It is also contraindicated for Spleen-deficient patients with loose stools or diarrhea, and for patients who have not completely recovered from an exterior disorder.
- Use of *Bie Jia* is associated with occasional cases of allergic response.[1]

CHEMICAL COMPOSITION

Gelatin, collagen, colloid, keratin, iodine, vitamin D.[2]

PHARMACOLOGICAL EFFECTS

- **Effect on the connective tissue:** *Bie Jia* has been shown to inhibit proliferation of connective tissue, and dissolve masses and nodules.[3]
- **Hematological:** It increases plasma protein and treats anemia caused by liver disorders.[4]

CLINICAL STUDIES AND RESEARCH

- **Costal chondritis:** In one study, 48 patients with costal chondritis were divided into two groups: 30 patients treated with Chinese herbs and 18 treated with drugs. The majority of the patients were young adults, slightly more were female than male, and the affected area was generally from the second to the fourth rib. The study reported a 96.67% rate of effectiveness for the herbal group and 55.56% rate of effectiveness for the drug group. The herbal formula contained *Bie Jia*, *Gui Ban* (Plastrum Testudinis), *Chuan Shan Jia* (Squama Manis), *San Leng* (Rhizoma Sparganii), *Zhi Ke* (Fructus Aurantii), *Ding Xiang* (Flos Caryophylli), and *Gan Cao* (Radix Glycyrrhizae). The details of the drug treatment were not available at the time of publication.[5]

SUPPLEMENT

- 鳖甲膠 / 鱉甲胶 *Bie Jia Jiao* (Gelatinum Carapax Trionycis) is the gelatin made from processing *Bie Jia*. It is similar to *Bie Jia*, but *Bie Jia Jiao* is stronger in nourishing yin and is usually used to treat deficiency heat symptoms, including bleeding. Dissolve *Bie Jia Jiao* in decoction prior to ingesting, or take it separately with hot water or warm liquor. It is contraindicated during pregnancy, in cases of Spleen deficiency with loose stools or diarrhea, and for patients who have not completely recovered from an exterior disorder. The usual dosage of *Bie Jia Jiao* is 3 to 10 grams.

AUTHORS' COMMENTS

Bie Jia and *Gui Ban* (Plastrum Testudinis) both nourish Liver yin and anchor yang. Common applicable symptoms include steaming bones sensations, night sweats, nocturnal emissions, tremors, or convulsions. *Bie Jia* softens nodules and breaks stagnation. It is best used for organomegaly or palpable masses in the abdomen. *Gui Ban* strengthens bones to treat weakness of sinews and bones, soreness and pain in the back and knees, and failure of the fontanelle to close. It also calms the *shen* (spirit) and treats palpitations and insomnia.

Bie Jia (Carapax Trionycis)

Hei Zhi Ma (Semen Sesami Nigrum)

黑芝麻

Pinyin Name: *Hei Zhi Ma*
Literal Name: "black sesame seed"
Alternate Chinese Names: *Hu Ma Ren, Zi Ma, Ju Sheng Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: sesame seed
Botanical Name: *Sesamum indicum* L. (*Zhi Ma*)
Pharmaceutical Name: Semen Sesami Nigrum
Properties: sweet, neutral
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Tonifies *Jing* (Essence) and Blood

***Jing* and blood deficiencies:** Liver blood and Kidney *jing* deficiencies cause premature graying, dizziness and blurred vision. *Hei Zhi Ma* (Semen Sesami Nigrum) is mild, and thus not likely to cause stagnation or damage to the Spleen and Stomach. It is suitable for long-term use either by itself or with other herbs. This herb is often served as food with honey or dates, made into congee or used on pancakes.

- Premature gray hair: combine *Hei Zhi Ma* with *He Shou Wu* (Radix Polygoni Multiflori), *Sang Shen Zi* (Fructus Mori), *Han Lian Cao* (Herba Ecliptae) and *Nu Zhen Zi* (Fructus Ligustri Lucidi).
- Blurred vision: add this herb to *Gou Qi Zi* (Fructus Lycii), *Bai Ji Li* (Fructus Tribuli), *Ju Hua* (Flos Chrysanthemi), *Shu Di Huang* (Radix Rehmanniae Preparata) and *Sang Ye* (Folium Mori), with honey.
- Dizziness and tinnitus: incorporate it with *Dang Gui* (Radicis Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Preparata), *Huang Jing* (Rhizoma Polygonati), *E Jiao* (Colla Corii Asini) and *Nu Zhen Zi* (Fructus Ligustri Lucidi).
- Insufficient milk in nursing women because of blood deficiency: combine these seeds with *Huang Qi* (Radix Astragali), *Dang Gui* (Radicis Angelicae Sinensis), *Dang Shen* (Radix Codonopsis), *Chuan Shan Jia* (Squama Manis) and *Wang Bu Liu Xing* (Semen Vaccariae).

2. Moistens Dryness and Lubricates the Intestines

Constipation or dry stools: *Hei Zhi Ma* is rich in oil and lubricates the intestines to treat constipation from lack of blood and body fluids.

- Constipation: combine *Hei Zhi Ma* with *Dang Gui* (Radicis Angelicae Sinensis), *Huo Ma Ren* (Fructus Cannabis), *Bai Zi Ren* (Semen Platycladi) and *Rou Cong Rong* (Herba Cistanches).

DOSAGE

10 to 30 grams in decoction. *Hei Zhi Ma* is also used in the form of pills or powders. It is applied topically as a

Hei Zhi Ma (Semen Sesami Nigrum)

wash, paste or powder. The dry-fried herb is most suitable for internal use.

CAUTIONS / CONTRAINDICATIONS

- Use *Hei Zhi Ma* with caution for patients who have diarrhea.
- Use it with caution for toothache from rising fire.

OVERDOSAGE

Overdose of *Hei Zhi Ma* may cause loose stools and diarrhea.[1]

CHEMICAL COMPOSITION

Lignans, sesamin, sesamdin, sesamol, vitamin E, pedalin, protein, planteose, sesamose, cytochrome C.[2]

PHARMACOLOGICAL EFFECTS

- **Metabolic:** Administration of *Hei Zhi Ma* in mice is associated with reduction of plasma glucose levels and increased glycogen storage in the liver and muscle tissues. At very large doses, it reduces glycogen storage.[3]
- **Gastrointestinal:** The lipid content of *Hei Zhi Ma* helps to moisten the bowel and relieve constipation.[4]

CLINICAL STUDIES AND RESEARCH

- **Proteinuria:** Proteinuria due to chronic nephritis and general compromise of renal function may be treated effectively within one course of treatment using an herbal formula containing 500 grams each of *Hei Zhi Ma*, *Hu Tao Ren* (Semen Juglandis) and *Da Zao* (Fructus Jujubae). The treatment protocol is to ingest 20 grams of herbal powder with 7 pieces of *Da Zao* three times daily.[5]

AUTHORS' COMMENTS

Hei Zhi Ma treats sores and insect bites when crushed and applied topically. Sesame oil applied topically also treats acute burns.

Hei Zhi Ma is also known as *Hu Ma Ren*, an alternate name. *Hu Ma Ren* (Semen Sesami Nigrum) and *Huo Ma Ren* (Fructus Cannabis) have similar pinyin names, but different functions. *Hu Ma Ren* tonifies the Liver and Kidney, nourishing blood and *jing* (essence) to moisten dryness. *Huo Ma Ren* generates body fluids and treats constipation.

Another seed that should not be confused with or used interchangeably with *Hei Zhi Ma* is the triangularly-shaped *Chong Wei Zi* (Semen Leonuri), which is sweet and cold, and invigorates blood circulation, dispels stagnation, cools the Liver and brightens vision.

Bai Mu Er (Fructificatio Tremellae Fuciformis)

白木耳

Pinyin Name: *Bai Mu Er*
Literal Name: "white wood ear"
Alternate Chinese Names: *Mu Er*, *Yin Er*
English Name: wood ear, fruiting body of tremella
Botanical Name: *Tremella fuciformis* Berk.
Pharmaceutical Name: Fructificatio Tremellae Fuciformis
Properties: sweet, bland, neutral
Channels Entered: Lung, Stomach

Bai Mu Er (Fructificatio Tremellae Fuciformis)

CHINESE THERAPEUTIC ACTIONS

1. Nourishes Stomach Yin and Generates Body Fluids

Yin deficiency with heat: *Bai Mu Er* (Fructificatio Tremellae Fuciformis) treats yin-deficient heat with emaciation and *wu xin re* (five-center heat).

- *Wu xin re* (five-center heat): combine *Bai Mu Er* with *Di Gu Pi* (Cortex Lycii), *Mu Dan Pi* (Cortex Moutan) and *Yin Chai Hu* (Radix Stellariae).

2. Nourishes Lung Yin and Moistens Dryness

Lung yin deficiency: *Bai Mu Er* treats consumptive dry cough that is non-productive, or is accompanied by scanty, blood-streaked and difficult-to-expectorate sputum.

DOSAGE

3 to 9 grams.

CHEMICAL COMPOSITION

Tremella polysaccharide.[1]

AUTHORS' COMMENTS

Because of its pleasant taste, *Bai Mu Er* is often eaten as a dessert, cooked with *Lian Zi* (Semen Nelumbinis) and rock sugar in water.

Zhi Ju Zi (Fructus Hoveniae)

枳椇子

Pinyin Name: *Zhi Ju Zi*
Alternate Chinese Names: *Ji Ju Zi, Zhi Ju Zi, Mu Shan Hu, Guai Zao Zi, Ji Zua Zi*
English Name: hovenia, trifoliate orange root bark
Botanical Name: *Hovenia dulcis* Thunb.
Pharmaceutical Name: Fructus Hoveniae
Properties: sweet, neutral
Channels Entered: Stomach

CHINESE THERAPEUTIC ACTIONS

1. Generates Body Fluids

Zhi Ju Zi (Fructus Hoveniae) generates body fluids, and alleviates thirst in cases of febrile disorders or diabetes mellitus.

- Febrile disorders with thirst: use *Zhi Ju Zi* with *Shi Hu* (Herba Dendrobii), *Mai Men Dong* (Radix Ophiopogonis), *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).
- Diabetes with thirst: combine this herb with *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Radix Anemarrhenae) and *Geng Mi* (Semen Oryzae).

2. Resolves Alcohol Toxicity

- Hangover or alcohol poisoning: use *Zhi Ju Zi* with *Ge Hua* (Flos Puerariae).

DOSAGE

3 to 9 grams.

CHEMICAL COMPOSITION

Sugar, K_2O, potassium, magnesium.

Chapter 17 summary

— Tonic Herbs

SECTION 1: QI-TONIFYING HERBS

Name	Similarities	Differences
Ren Shen (Radix Ginseng)	Tonify Spleen and Lung qi	Greatly tonifies *yuan* (source) *qi*, rescues collapse, generates fluids
Xi Yang Shen (Radix Panacis Quinquefolii)		Same as *Ren Shen* but cold in property and stronger in nourishing body fluids
Dang Shen (Radix Codonopsis)		Same as *Ren Shen* but weaker
Tai Zi Shen (Radix Pseudostellariae)		Same as *Ren Shen* but weaker, more suitable for weak patients who cannot take high doses of tonics
Dong Yang Shen (Radix Ginseng Japonica)		Harmonizes middle *jiao*, improves appetite
Huang Qi (Radix Astragali)		Ascends yang qi, consolidates *wei* (defensive) *qi*, dispels water, promotes healing of sores and carbuncles
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)	Tonify Lung and Heart	Clears heat, eliminates toxins
Bai Zhu (Rhizoma Atractylodis Macrocephalae)	Tonify Spleen	Dries dampness, dispels water, stops perspiration, stabilizes fetus
Shan Yao (Rhizoma Dioscoreae)		Nourishes yin, benefits Lung and Kidney
Bian Dou (Semen Lablab Album)		Dispels dampness
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)		Tonifies Spleen and Kidney, calms *shen* (spirit)
Gan Cao (Radix Glycyrrhizae)	Tonify Spleen and harmonize herbal formulas	Tonifies Heart qi, moistens the Lung, sedates fire, detoxifies
Da Zao (Fructus Jujubae)		Tonifies blood
Geng Mi (Semen Oryzae)		Strengthens the Spleen and Stomach
Feng Mi (Mel)		Moistens the Lung and intestines, clears heat and eliminates toxins
Yi Tang (Saccharum Granorum)		Reduces pain, relieves cough

General Characteristics of Qi-Tonifying Herbs:

Taste: sweet
Thermal property: warm
Channels entered: Spleen, Lung
Therapeutic actions: tonify Spleen and Lung qi

These herbs tonify Spleen and Lung qi to treat fatigue, lethargy, weak voice, cough or dyspnea, minimal body movement, poor appetite, vomiting, diarrhea or spontaneous sweating.

Ren Shen (Radix Ginseng), ***Xi Yang Shen*** (Radix Panacis Quinquefolii), ***Dang Shen*** (Radix Codonopsis), ***Tai Zi Shen*** (Radix Pseudostellariae), and ***Dong Yang Shen*** (Radix Ginseng Japonica) all tonify Spleen and Lung qi.

Ren Shen is the essential herb to tonify qi and treat qi collapse. It greatly tonifies *yuan* (source) *qi*, and the Spleen and Lung, generates body fluids, relieves thirst and improves cognition. It is most suitable for qi deficiency, qi collapse, deficiency of the Lung and Spleen, thirst, and lack of nourishment to the *shen* (spirit).

Chapter 17 summary

Xi Yang Shen is cold, tonifies qi, nourishes yin, clears fire and generates body fluids. Although *Xi Yang Shen* and *Ren Shen* are both referred to as "ginseng," they differ greatly in therapeutic properties and functions.

Dang Shen, sweet and neutral, is less potent than *Ren Shen*. *Dang Shen* tonifies the middle *jiao*, benefits qi, generates body fluids, and nourishes blood. It is most suitable for patients with qi deficiency of the Lung and Spleen, body fluid loss or blood deficiency. *Dang Shen* is frequently used as an effective and affordable substitute for *Ren Shen*.

Tai Zi Shen, sweet and neutral, and shares similar functions to *Xi Yang Shen* to tonify qi and generate body fluids. *Tai Zi Shen* is mild, and best for qi and body fluid deficiencies with few or no signs of heat.

Dong Yang Shen (cultivated in Japan) is the same plant as *Ren Shen* (grows in northern China and Korea). They have essentially the same functions. *Dong Yang Shen* is described as slightly less potent to tonify qi, but more effective to regulate the middle *jiao*.

Huang Qi (Radix Astragali), sweet and warm, causes yang qi to ascend and is one of the most important herbs when treating chronic deficiency. It tonifies the middle *jiao*, raises yang qi to treat prolapse, tonifies the Lung to strengthen the *wei* (defensive) *qi* and stop spontaneous sweating, promotes healing of sores and carbuncles by generating flesh, and dispels water to relieve edema. *Huang Qi* generates blood and tonifies qi simultaneously, therefore making it ideal for treating *xiao ke* (wasting and thirsting) syndrome, numbness from blood deficiency or post-stroke symptoms.

Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis), though technically not in the "ginseng family," contains ginsenoside and has qi-tonic action. It strengthens the Lung and promotes generation of fluids. It also clears heat, eliminates toxins, and reduces inflammation to treat infection.

Bai Zhu (Rhizoma Atractylodis Macrocephalae), ***Shan Yao*** (Rhizoma Dioscoreae) and ***Bian Dou*** (Semen Lablab Album) all strengthen the Spleen and stop diarrhea.

Bai Zhu most strongly tonifies qi of the middle *jiao*, dries dampness, dispels water, relieves perspiration, and stabilizes the fetus. *Bai Zhu* is best for Spleen qi deficiency with accumulated dampness manifesting as edema and phlegm accumulation, and for spontaneous sweating and restless fetus due to qi deficiency.

Shan Yao tonifies qi, nourishes yin, and benefits the Lung and Kidney. Though mild in potency, it exerts an astringent effect to treat chronic or feeble cough, spermatorrhea, and *xiao ke* (wasting and thirsting) syndrome.

Bian Dou is a less potent qi tonic than the other two. However, it is not stagnating in nature and is an excellent mild tonic for convalescing patients who cannot take heavy tonics. It dissolves summer-damp and clears summer-heat with irritability and thirst.

Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi), sometimes used as a low-cost substitute for *Ren Shen* (Radix Ginseng), does not have the same effects but adequately tonifies the Spleen and Kidney and calms the *shen* (spirit).

Gan Cao (Radix Glycyrrhizae) and ***Da Zao*** (Fructus Jujubae) tonify the Spleen and are frequently used to harmonize herbal formulas.

Gan Cao tonifies the Spleen, benefits qi, moistens the Lung, relieves cough, clears heat, eliminates toxins, and relieves pain. It has a wide range of functions to treat a variety of disorders. It is also used in many formulas to harmonize other herbs and alleviate unwanted side effects.

Da Zao tonifies the middle *jiao*, benefits qi, and nourishes blood to tranquilize the *shen* (spirit).

Geng Mi (Semen Oryzae) tonifies the Spleen and Stomach and treats digestive disorders. It prevents cold or harsh herbs from damaging the middle *jiao*.

Chapter 17 summary

Feng Mi (Mel) moistens dryness of the Lung, relieves cough, tonifies the middle *jiao*, lubricates the intestines and relieves pain. It treats abdominal pain resulting from deficiency, Lung deficiency with feeble dry cough, and constipation or dry stools. It clears toxins to treat sores, carbuncles, abscesses, burns and eye disorders.

Yi Tang (Saccharum Granorum) tonifies the Spleen, benefits qi and moistens the Lung to relieve cough.

SECTION 2: YANG-TONIFYING HERBS

Name	Similarities	Differences
Lu Rong (Cornu Cervi Pantotrichum)	Tonify Kidney yang	Most strongly tonifies Kidney yang, replenishes *jing* (essence) and blood, strengthens bones and tendons
Lu Jiao (Cornu Cervi)		Strongly tonifies Kidney yang, invigorates blood circulation and disperses blood stasis
Lu Jiao Jiao (Gelatinum Cornu Cervi)		Moderately tonifies Kidney yang and *jing* (essence)
Lu Jiao Shuang (Cornu Cervi Degelatinatium)		Mildly tonifies Spleen and Kidney yang
Dong Chong Xia Cao (Cordyceps)	Tonify Lung and Kidney to stop cough and wheezing	Tonifies Kidney yang and nourishes Lung yin
Ge Jie (Gecko)		Stops wheezing
Hu Tao Ren (Semen Juglandis)		Strengthens the back, moistens bowels, relieves constipation
Rou Cong Rong (Herba Cistanches)	Tonify Kidney yang to treat reproductive disorders	Moistens the bowel, relieves constipation, replenishes *jing* (essence) and blood
Suo Yang (Herba Cynomorii)		Moistens the bowel, relieves constipation
Ba Ji Tian (Radix Morindae Officinalis)		Dispels wind-cold-damp
Yin Yang Huo (Herba Epimedii)		Dispels wind-cold-damp, increases libido, not for long-term use
Xian Mao (Rhizoma Curculiginis)		Dispels wind-cold-damp, not for long-term use
Yang Qi Shi (Actinolitum)		Treats impotence and infertility, not for long-term use
Hai Gou Shen (Testes et Penis Otariae)	Tonify Kidney yang	Tonifies Kidney yang and *jing* (essence)
Hai Shen (Strichopus Japonicus)		Tonifies Kidney yang and *jing* (essence)
Hai Long (Syngnathus)		Tonifies Kidney yang
Hai Ma (Hippocampus)		Tonifies Kidney yang, invigorates blood circulation
Du Zhong (Cortex Eucommiae)	Tonify Liver and Kidney to strengthen bones and tendons	Stabilizes pregnancy, relieves Liver yang rising
Xu Duan (Radix Dipsaci)		Stabilizes pregnancy, connects bones and tendons
Gu Sui Bu (Rhizoma Drynariae)		Connects bones and tendons
Gou Ji (Rhizoma Cibotii)		Dispels wind and dampness, restrains leakage of body fluids
Hu Lu Ba (Semen Trigonellae)		Warms Kidney yang, treats hernia due to cold, dispels wind, cold, or damp
Bu Gu Zhi (Fructus Psoraleae)	Warm Spleen and Kidney yang to treat diarrhea	Warms Kidney yang
Yi Zhi Ren (Fructus Alpiniae Oxyphyllae)		Warms Spleen, retains body fluids
Tu Si Zi (Semen Cuscutae)	Tonify Kidney and Liver, consolidate *jing* (essence)	Retains *jing* (essence), benefits the eyes, stops diarrhea
Sha Yuan Zi (Semen Astragali Complanati)		Retains *jing*, benefits the eyes
Jiu Cai Zi (Semen Allii Tuberosi)		Strengthens yang and consolidates yin
Zi He Che (Placenta Hominis)		Replenishes *jing* and blood, treats degenerative disorders, benefits Lung qi

Chapter 17 summary

General Characteristics of Yang-Tonifying Herbs:

Taste: sweet
Thermal property: warm
Channels entered: Kidney, Spleen, Heart
Therapeutic actions: tonify Kidney, Spleen and Heart yang

Yang-tonic herbs fortify yang and are most suitable for intolerance to cold, cold extremities, soreness and weakness of the lower back and knees, diarrhea, polyuria, enuresis, frequent urinary urges (especially during the night), impotence, infertility and lack of libido in both men and women.

Lu Rong (Cornu Cervi Pantotrichum), ***Lu Jiao*** (Cornu Cervi), ***Lu Jiao Jiao*** (Gelatinum Cornu Cervi), and ***Lu Jiao Shuang*** (Cornu Cervi Degelatinatium) are Kidney yang tonics derived from deer.

Lu Rong tonifies Kidney yang, benefits *jing* (essence) and blood, strengthens tendons and bones, and is extremely effective to replenish the bodily constitution.

Lu Jiao is a similar but weaker substitute for *Lu Rong*. It invigorates blood circulation and reduces swelling to treat sores, swellings, and pain in the low back, or pain affecting bones and tendons.

Lu Jiao Jiao moderately tonifies the Liver and Kidney and benefits *jing* and blood. It treats Kidney yang, *jing* and blood deficiencies in patients who are thin or have bleeding due to deficiency and cold.

Lu Jiao Shuang mildly tonifies Kidney yang. One advantage is that it will not cause indigestion, abdominal fullness, or distention in Kidney yang deficient patients with weak digestive functions. It also has an astringent effect to stop bleeding.

Dong Chong Xia Cao (Cordyceps), ***Ge Jie*** (Gecko) and ***Hu Tao Ren*** (Semen Juglandis) tonify the Lung and Kidney to treat respiratory disorders.

Dong Chong Xia Cao effectively tonifies the Lung and Kidney to treat chronic cough, wheezing and dyspnea with bloody sputum. It is also effective for patients with impotence or spontaneous sweating due to extreme deficiency.

Ge Jie tonifies Lung qi, fortifies Kidney yang, benefits *jing* (essence) and blood, and treats chronic cough, dyspnea and wheezing. This substance also treats impotence due to Kidney yang deficiency.

Hu Tao Ren tonifies the Kidney, benefits *jing* (essence), and warms the Lung to relieve coughing due to Lung qi and Kidney yang deficiencies. It also moistens the intestines and treats constipation due to dryness in the intestines.

Rou Cong Rong (Herba Cistanches) and ***Suo Yang*** (Herba Cynomorii) tonify Kidney yang to enhance sexual and reproductive functions.

Rou Cong Rong more effectively tonifies *jing* (essence) and blood.

Suo Yang more strongly tonifies Kidney yang to treat impotence and infertility. Because *Suo Yang* is a warmer herb, it is also more likely to cause side effects such as dryness or thirst.

Ba Ji Tian (Radix Morindae Officinalis), ***Yin Yang Huo*** (Herba Epimedii) and ***Xian Mao*** (Rhizoma Curculiginis) all tonify the Kidney and fortify yang to treat infertility and impotence. In addition, they dispel wind-dampness to relieve *bi zheng* (painful obstruction syndromes).

Acrid and slightly warm, *Ba Ji Tian* tonifies *jing* (essence) and blood, and treats irregular menstruation caused by deficiency and cold.

Acrid, sweet and warm, *Yin Yang Huo* more strongly tonifies the Kidney. It may be used alone or in combination with other herbs.

Acrid, hot and toxic, *Xian Mao* most strongly tonifies the Kidney and disperses coldness and dampness. In comparison with the herbs above, *Xian Mao* is drier and hotter and must be used with caution, as overdose can injure the yin.

Chapter 17 summary

Yang Qi Shi (Actinolitum) warms and strengthens Kidney yang to treat impotence.

Hai Gou Shen (Testes et Penis Otariae), ***Hai Shen*** (Strichopus Japonicus), ***Hai Long*** (Syngnathus) and ***Hai Ma*** (Hippocampus) are four substances from the ocean that tonify yang.

Hai Gou Shen and *Hai Shen* tonify Kidney yang and *jing* (essence).

Hai Long tonifies Kidney yang, reduces swelling, and dissipates nodules.

Hai Ma tonifies Kidney yang and invigorates blood circulation.

Du Zhong (Cortex Eucommiae), ***Xu Duan*** (Radix Dipsaci), ***Gu Sui Bu*** (Rhizoma Drynariae) and ***Gou Ji*** (Rhizoma Cibotii) all tonify the Liver and Kidney and strengthen tendons and bones, treating weakness and soreness of the back, legs and tendons. They are often used together for synergistic effect.

Du Zhong is the strongest yang tonic of the four. It also calms the fetus and lowers blood pressure.

Xu Duan moderately tonifies yang and stabilizes the fetus. Its strength is to invigorate blood circulation and reconnect tendons and bones. Because of its effect to invigorate blood circulation, it has an excellent ability to tonify without causing stagnation.

Gu Sui Bu tonifies the Kidney, strengthens the bones, relieves pain, and facilitates reconnection of the bones and tendons.

Gou Ji dispels wind-dampness and strongly relieves pain in and around the spine, such as found in *bi zheng* (painful obstruction syndrome) with pain and difficulty bending. *Gou Ji* consolidates Kidney qi to treat urinary incontinence and profuse vaginal discharge.

Hu Lu Ba (Semen Trigonellae), bitter and warm, warms Kidney yang, dispels cold and dampness, and dispels cold attacking the Liver channel.

Bu Gu Zhi (Fructus Psoraleae) and ***Yi Zhi Ren*** (Fructus Alpiniae Oxyphyllae) warm and tonify Spleen and Kidney yang, consolidate *jing* (essence) and retain urine.

Bu Gu Zhi is hot and has a very strong yang-tonic function to strengthen the Kidney, fortify yang, and warm the Spleen to stop diarrhea. Clinical manifestations include impotence, spermatorrhea, enuresis, cough, dyspnea and chronic diarrhea. Soaking this herb in alcohol and applying it topically can treat vitiligo.

Yi Zhi Ren is warm and has a weaker function than *Bu Gu Zhi* to fortify the yang. It tonifies the Spleen to disperse cold and relieve excess saliva or drooling, and warms the Kidney to consolidate *jing* (essence) and retain urine. Clinical applications include abdominal coldness and pain, vomiting, diarrhea, poor appetite, excess salivation and spermatorrhea.

Tu Si Zi (Semen Cuscutae) and ***Sha Yuan Zi*** (Semen Astragali Complanati) tonify the Kidney and Liver, fortify yang, brighten the eyes, consolidate *jing* (essence) and retain urine. Clinical applications include back pain, spermatorrhea, enuresis, diminished vision, dizziness and profuse vaginal discharge from Kidney yang deficiency.

Tu Si Zi, acrid and neutral, tonifies Kidney yin and yang. It is not drying or stagnating, which makes it easy to digest and absorb. It tonifies the Spleen to relieve diarrhea, stabilize the fetus and aid in *xiao ke* (wasting and thirsting) syndrome.

Sha Yuan Zi, sweet, warm and not drying, strongly consolidates fluids.

Jiu Cai Zi (Semen Allii Tuberosi) is warm, tonifies the Liver and Kidney, warms the back and knees, consolidates *jing* (essence) and fortifies yang.

Zi He Che (Placenta Hominis) is considered by some to be the most essential, irreplaceable herb to tonify Kidney *jing* (essence). It is said to have great effectiveness for treating reproductive disorders, promoting normal development of organs, nourishing blood and benefiting Lung qi.

Chapter 17 summary

SECTION 3: BLOOD-TONIFYING HERBS

Name	Similarities	Differences
Dang Gui (Radicis Angelicae Sinensis)	Tonify blood	Invigorates blood circulation, regulates menstruation, relieves pain, lubricates the intestines
Shu Di Huang (Radix Rehmanniae Preparata)		Tonifies Kidney and Liver yin
He Shou Wu (Radix Polygoni Multiflori)		Tonifies Kidney and Liver yin, nourishes *jing* (essence), grows hair, lubricates the intestines, eliminates toxins
Bai Shao (Radix Paeoniae Alba)		Softens the Liver, relieves smooth and skeletal muscle pain and spasms
E Jiao (Colla Corii Asini)		Stops bleeding, nourishes yin, moistens dryness
Long Yan Rou (Arillus Longan)		Tranquilizes the *shen* (spirit)

General Characteristics of Blood-Tonifying Herbs:

Taste: sweet
Thermal property: warm
Channels entered: Spleen, Liver, Heart
Therapeutic actions: tonify blood, nourish yin

Blood-tonic herbs tonify blood and nourish yin to treat pale lips, face and nails, dizziness, tinnitus, palpitations, insomnia, irregular menstruation and anemia.

Dang Gui (Radicis Angelicae Sinensis) is warm, and an excellent herb to tonify blood, invigorate blood circulation, and relieve pain, for any patient with blood deficiency or blood stagnation. Symptoms include irregular menstruation, amenorrhea, dysmenorrhea, gestational and postpartum disorders, sores, abscesses, trauma-related pain, *bi zheng* (painful obstruction syndrome) and various problems of blood deficiency and blood stagnation. *Dang Gui* also lubricates the intestines, for constipation or dry stools caused by blood deficiency.

Shu Di Huang (Radix Rehmanniae Preparata), sweet and slightly warm, nourishes both blood and yin. It is the essential herb in replenishing *jing* (essence) and marrow, and treats Liver blood deficiency and Kidney yin and *jing* deficiencies. Heavy and stagnating in nature, *Shu Di Huang* should be combined with *Sha Ren* (Fructus Amomi) or other digestive herbs.

He Shou Wu (Radix Polygoni Multiflori) is similar to *Shu Di Huang* (Radix Rehmanniae Preparata) in its tonic effect, but slightly milder, with the advantage of not creating stagnations while gently stabilizing and binding.

Prepared *He Shou Wu* tonifies blood, yin, and *jing* (essence).

Unprepared *He Shou Wu* eliminates heat, disperses nodules, and induces bowel movement.

Bai Shao (Radix Paeoniae Alba), cool in thermal property, nourishes blood, astringes yin, sedates rising Liver yang, softens the Liver and relieves pain. Clinical applications include Liver blood deficiency, irregular menstruation, obstetric/gynecologic disorders, deficiency with perspiration, yin deficiency with Liver wind, Liver yang rising and pain associated with lack of nourishment to the Liver.

Dang Gui is more suitable for blood-deficient patients with coldness or blood stagnation.

Bai Shao is more useful for blood deficiency with heat or Liver yang rising, or Liver qi stagnation.

E Jiao (Colla Corii Asini), neutral and sweet, effectively tonifies blood, stops bleeding, nourishes yin and moistens the Lung. It treats blood deficiency and Lung yin deficiency with dry, feeble cough (possibly with blood). *E Jiao* is sticky and not suitable for patients with weak stomachs.

Chapter 17 summary

Long Yan Rou (Arillus Longan) tonifies the blood and calms the *shen* (spirit). It has an excellent effect to tonify qi and blood without creating stagnation such as indigestion, fullness or bloating.

SECTION 4: YIN-TONIFYING HERBS

Name	Similarities	Differences
Bei Sha Shen (Radix Glehniae)	Tonify Lung yin, and promote generation of body fluids	Nourishes Stomach yin
Nan Sha Shen (Radix Adenophorae)		Nourishes Stomach yin, dissolves phlegm
Mai Men Dong (Radix Ophiopogonis)		Nourishes Heart and Spleen yin, relieves constipation
Tian Men Dong (Radix Asparagi)		Nourishes Kidney yin, clears Lung heat and fire
Shi Hu (Herba Dendrobii)		Nourishes Stomach yin, benefits eyes
Yu Zhu (Rhizoma Polygonati Odorati)		Nourishes Lung and Stomach yin
Huang Jing (Rhizoma Polygonati)		Tonifies the Spleen
Bai He (Bulbus Lilii)		Nourishes Stomach yin, clears the Heart and calms *shen* (spirit)
Gou Qi Zi (Fructus Lycii)	Tonify Liver and Kidney yin	Nourishes the Liver, benefits the eyes
Sang Shen Zi (Fructus Mori)		Tonifies Lung yin, promotes generation of body fluids, tonifies blood
Han Lian Cao (Herba Ecliptae)		Tonifies yin, cools blood and stops bleeding
Nu Zhen Zi (Fructus Ligustri Lucidi)		Clears heat, brightens eyes, and increases white blood cell counts
Chu Shi Zi (Fructus Broussonetiae)		Treats dizziness and blurred vision
Gui Ban (Plastrum Testudinis)	Nourish yin and anchor yang	Nourishes Kidney yin to strengthen bones, stops bleeding
Bie Jia (Carapax Trionycis)		Clears deficiency heat, softens hardness and nodules
Hei Zhi Ma (Semen Sesami Nigrum)	Tonify *jing* (essence) and blood	Relieves constipation
Bai Mu Er (Fructificatio Tremellae Fuciformis)	Nourish Stomach yin	Nourishes Lung and Stomach yin
Zhi Ju Zi (Fructus Hoveniae)		Relieves alcohol poisoning

General Characteristics of Yin-Tonifying Herbs:

Taste: sweet
Thermal property: neutral, cool
Channels entered: Kidney, Liver, Stomach, Lung
Therapeutic actions: tonify yin, promote generation of body fluid, anchor yang

Yin-tonic herbs nourish yin, generate body fluids and moisten dryness, treating yin deficiency involving emaciation, dry mouth, dry throat, tidal fever, night sweats, chronic cough with sticky, scanty, difficult-to-expectorate sputum, nocturnal emissions, dry stools or constipation.

Bei Sha Shen (Radix Glehniae) and ***Nan Sha Shen*** (Radix Adenophorae), cool in thermal property, nourish yin, clear and benefit the Lung and generate body fluids, in all types of Lung and Stomach yin deficiency involving heat or injury of body fluids.

Bei Sha Shen, from northern China, more strongly nourishes yin.

Nan Sha Shen, from southern China, more effectively eliminates phlegm.

Mai Men Dong (Radix Ophiopogonis) and ***Tian Men Dong*** (Radix Asparagi) nourish yin, clear the Lung, moisten dryness and generate body fluids for injured yin involving thirst, chronic dry cough, dry stools or constipation.

Chapter 17 summary

Mai Men Dong, cool in thermal property, clears the Heart, reduces irritability and nourishes Stomach yin. It is milder in potency, but less stagnating than *Tian Men Dong*.

Tian Men Dong, stronger in nourishing yin, moistens dryness to clear heat and generate body fluids, treats Kidney yin deficiency and eliminates breast nodules.

Shi Hu (Herba Dendrobii), cool in thermal property, nourishes Stomach yin, generates body fluids, and dispels heat. It also brightens the eyes, strengthens the back and knees, and treats deteriorating vision caused by Liver and Kidney deficiencies.

Yu Zhu (Rhizoma Polygonati Odorati), neutral, mild and moistening, nourishes Lung yin, generates body fluids and nourishes the Stomach, treating Lung and Stomach yin deficiencies, cough due to dryness and heat, and thirst with a dry tongue coat. Mild in potency and gradual in its delivery of therapeutic effects, *Yu Zhu* is less stagnating than other yin tonics and less likely to cause side effects.

Huang Jing (Rhizoma Polygonati), neutral, sweet and rich in fluids, markedly nourishes Lung yin and benefits Spleen qi, for yin deficiency with chronic dry cough, *xiao ke* (wasting and thirsting) syndrome, and Spleen and Stomach deficiency. It replenishes *jing* (essence), generates marrow and is used for various signs and symptoms of Kidney *jing* deficiency.

Bai He (Bulbus Lilii) moistens the Lung to relieve coughing from Lung heat, or chronic coughing with blood. It clears the Heart and calm the *shen* (spirit) to treat irritability, palpitations, insomnia and excessive dreaming.

Gou Qi Zi (Fructus Lycii), sweet and neutral, nourishes the Liver and Kidney, brightens the eyes, and treats dizziness and blurred vision due to Kidney and Liver yin deficiencies. It also nourishes the Lung to treat yin-deficient cough. Mild and non-stagnating in its tonic effect, *Gou Qi Zi* used on a long-term basis will not cause stagnation and dampness in the middle *jiao*.

Sang Shen Zi (Fructus Mori), sweet, cold and moistening, nourishes yin, tonifies blood, generates body fluids, and lubricates the intestines, treating all yin-deficient conditions of damaged body fluids and intestinal dryness. Pleasant tasting and mild, it is suitable for long-term use, but is contraindicated in yang deficiency cold, or dampness arising from Spleen and Stomach deficiency, or food stagnation.

Han Lian Cao (Herba Ecliptae) and ***Nu Zhen Zi*** (Fructus Ligustri Lucidi) nourish Liver and Kidney yin to treat dizziness, vertigo, soreness and weakness of the lower back and knees, and prematurely gray hair.

Han Lian Cao is cold, clears heat, stops bleeding, and treats various bleeding disorders caused by yin deficiency with heat in the blood.

Nu Zhen Zi is cool, tonifies without creating stagnation, brightens the eyes to treat diminished or blurry vision from Liver and Kidney yin deficiencies, and clears yin-deficient heat.

Chu Shi Zi (Fructus Broussonetiae) mildly tonifies the Liver and Kidney.

Gui Ban (Plastrum Testudinis) and ***Bie Jia*** (Carapax Trionycis) nourish yin, anchor yang, and clear deficiency heat, treating steaming bones sensations of yin deficiency, Liver wind rising from yin deficiency, and Liver yang rising.

Gui Ban more strongly nourishes the yin. It also tonifies the Kidney, strengthens the bones, nourishes blood, tonifies the Heart, softens hardness, dispels blood stagnation and stops bleeding.

Bie Jia more effectively clears heat, softens hardness and disperses stagnation.

Chapter 17 summary

Hei Zhi Ma (Semen Sesami Nigrum), sweet, neutral and rich in oil, tonifies *jing* (essence) and blood, lubricates the intestines and treats blood deficiency with dryness in the intestines.

Bai Mu Er (Fructificatio Tremellae Fuciformis) and ***Zhi Ju Zi*** (Fructus Hoveniae) nourish Stomach yin.

Bai Mu Er nourishes both Lung and Stomach, promotes generation of fluids, and moistens dryness.

Zhi Ju Zi nourishes Stomach yin and treats alcohol poisoning and hangover.

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH TONIC FUNCTIONS

Name	Functional Category
Bai Zi Ren (Semen Platycladi)	*Shen*-Calming Herbs (Chapter 14)

Chapter 18

— Astringent Herbs

Definition: Astringent herbs bind, retain, restrain, and prevent the loss of precious body fluids and substances.

Qi, blood, *jing* (essence) and *jin ye* (body fluids) are bodily substances essential to health maintenance. In the normal course of life, these four substances are continually produced, and consumed. Maintenance of health requires the level of production to be equal to, or greater than, that of consumption. When consumption exceeds production, organ function is compromised, leading to deterioration of overall health. This imbalance must be treated as early as possible to restore normal balance. If not, the condition will continue to deteriorate, leading to deep deficiency. While tonic herbs are often beneficial in the initial stages of deficiency, they are not as useful in chronic situations, as the patient is often too weak to metabolize tonics and will be unable to benefit fully from the tonic substances. In such cases, astringent herbs are prescribed to prevent further loss of these four vital substances.

Sour in taste, astringent herbs enter the ***Heart***, ***Lung***, ***Liver***, ***Kidney***, and ***Large Intestine*** to bind, retain and prevent the loss of valuable body fluids and other substances. They are often prescribed for patients who have chronic illnesses with profound deficiency and inability to hold fluids within the body, leading to leakage. Clinical indications for use of astringent herbs include profuse menstruation, perspiration, diarrhea, coughing, spermatorrhea, nocturnal emissions, frequent urination, and bleeding.

Wu Bei Zi (Galla Chinensis)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

It is important to keep in mind that while astringent herbs prevent the loss of bodily substances, they do not intrinsically restore normal balance. Therefore, while astringents can be used in patients with chronic illnesses, they should not be used on a long-term basis. Clinically, they should first be used for a short period of time to stop further losses in chronic illnesses. When the condition stabilizes, differential diagnosis must be made again and appropriate herbs be prescribed. That is, once stable, patients with spontaneous perspiration due to qi deficiency should be treated with qi tonics; patients with loose stools and diarrhea due to Spleen and Stomach deficiencies must be treated with Spleen and Stomach tonics; and patients with frequent urination and incontinence associated with Kidney deficiency must be treated with Kidney tonics. In short, for adequate treatment, use astringent herbs to ease the urgency of the condition, then use tonics to treat the underlying causes of the disease.

CAUTIONS/CONTRAINDICATIONS

As astringent herbs function to bind and restrain, the use of such herbs will keep any pathogenic factors within the body. Therefore, astringent herbs should not be used in conditions characterized by the presence of pathogenic factors inside the body, such as perspiration due to febrile disorders, food stagnation with diarrhea, profuse menstrual bleeding due to heat in the blood, or frequent urination due to heat in the lower *jiao*.

Chapter 18 — Astringent Herbs

Astringent herbs should not be used when pathogenic factors are in the body, as these herbs may keep the pathogens inside the body.

PHARMACOLOGICAL EFFECTS

- **Hemostatic:** Many astringent herbs stop bleeding, such as *Wu Bei Zi* (Galla Chinensis), *Shi Liu Pi* (Pericarpium Granati), *He Zi* (Fructus Chebulae), and *Chi Shi Zhi* (Halloysitum Rubrum).
- **Antidiarrheal:** Many herbs stop diarrhea, through various mechanisms of action. *Chi Shi Zhi* (Halloysitum Rubrum) has an absorbent effect, binding to various endototoxins and irritants to relieve diarrhea. *Rou Dou Kou* (Semen Myristicae) has a regulating influence on intestinal peristalsis, and at large doses, inhibits intestinal motility and relieves diarrhea. *Ying Su Ke* (Pericarpium Papaveris) slows intestinal motility and reduces the fluid in the intestines to relieve diarrhea.
- **Antibiotic:** Many astringent herbs have antibacterial and antiviral effects. Herbs with antibacterial actions include *Wu Bei Zi* (Galla Chinensis), *Wu Mei* (Fructus Mume), *Jin Ying Zi* (Fructus Rosae Laevigatae), *Shi Liu Pi* (Pericarpium Granati), *Fu Pen Zi* (Fructus Rubi) and *He Zi* (Fructus Chebulae). Herbs with antiviral properties include *Wu Bei Zi* (Galla Chinensis), *Jin Ying Zi* (Fructus Rosae Laevigatae), and *Shi Liu Pi* (Pericarpium Granati).
- **Immunostimulant:** Some herbs stimulate the immune system, such as *Shan Zhu Yu* (Fructus Corni) and *Jin Ying Zi* (Fructus Rosae Laevigatae).

POTENTIAL HERB-DRUG INTERACTIONS

- **Absorption:** *Yu Yu Liang* (Limonitum) and *Chi Shi Zhi* (Halloysitum Rubrum) have strong binding effects, and are commonly used to treat diarrhea and accidental ingestion of toxins and/or poisons. However, because of their strong binding effect, they should not be ingested at the same time as pharmaceuticals, as their binding will inherently decrease absorption of the drugs. Administer these herbs separately from drugs, with a gap of at least two to three hours between them.

Wu Wei Zi (Fructus Schisandrae Chinensis)

五味子

Pinyin Name: *Wu Wei Zi*
Literal Name: "five-flavored seed"
Alternate Chinese Names: *Bei Wu Wei, Wu Mei Zi, Bei Wu Wei Zi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: schisandra, Chinese magnolia vine fruit, orange magnolia vine fruit
Botanical Name: *Schisandra chinensis* Baill. (*Bei Wu Wei Zi*); *Schisandra sphenanthera Rehd.* et Wils. (*Nan Wu Wei Zi*)
Pharmaceutical Name: Fructus Schisandrae Chinensis
Properties: sour, warm
Channels Entered: Kidney, Lung, Heart

CHINESE THERAPEUTIC ACTIONS

1. Contains the Leakage of Lung Qi, Arrests Cough, Nourishes the Kidney

Chronic cough, dyspnea or asthma: Chronic dry cough may cause yin and qi deficiencies of the Lung and Kidney. Manifestations include dry cough, loss of voice, shortness of breath, labored respiration, fatigue, weakness, and a lusterless complexion. *Wu Wei Zi* (Fructus Schisandrae Chinensis) enters the Lung to stop leakage of Lung qi and enters the Kidney to nourish the Kidney and help it grasp qi.

- Chronic consumptive cough: combine *Wu Wei Zi* with *Bai He* (Bulbus Lilii), *Sheng Di Huang* (Radix Rehmanniae), *Shan Zhu Yu* (Fructus Corni), *Zi Wan* (Radix Asteris), and *Pi Pa Ye* (Folium Eriobotryae).
- Asthma: combine it with *Ren Shen* (Radix Ginseng) and *Ge Jie* (Gecko).
- Cough due to wind-cold: a small quantity of *Wu Wei Zi* is used with *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Herba Asari). **Exemplar Formula:** *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction).

2. Generates Body Fluids, Inhibits Sweating

Spontaneous sweating: When Lung qi and *wei* (defensive) *qi* are unable to control the pores, body fluids leak out and spontaneous sweating occurs at any time of the day.

- Spontaneous sweating: combine *Wu Wei Zi* with *Huang Qi* (Radix Astragali), *Fu Xiao Mai* (Semen Tritici Aestivi Levis), *Ma Huang Gen* (Radix Ephedrae) and *Suan Zao Ren* (Semen Zizyphi Spinosae).
- Spontaneous and night sweating with qi deficiency: add this herb to *Ren Shen* (Radix Ginseng) and *Mai Men Dong* (Radix Ophiopogonis) **Exemplar Formula:** *Sheng Mai San* (Generate the Pulse Powder).

Night sweating: Yang qi rises to circulate in the *wei* (defensive) and *qi* (energy) levels during the day, and returns to the *ying* (nutritive) and *xue* (blood) levels at night. If deficient yin or *jing* cannot keep the yang in check, yang will push yin or *jing* outwards (in the form of sweating) when yang returns to the *ying* and *xue* levels at night. In other words, night sweats represent loss of body fluids paradoxically caused by yin or *jing* deficiency.

- Night sweats: combine *Wu Wei Zi* with *Mai Men Dong* (Radix Ophiopogonis), *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Shan Zhu Yu* (Fructus Corni), *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), *Huang Bai* (Cortex Phellodendri) and *Wu Mei* (Fructus Mume).

Thirst: Excessive loss of body fluids causes thirst, as do Liver and Kidney yin deficiencies. *Wu Wei Zi* can be used effectively with yin tonics to retain body fluids. *Wu Wei Zi* is commonly used in *xiao ke* (wasting and thirsting) syndrome when the patient has extreme thirst.

- Thirst: combine *Wu Wei Zi* with *Mai Men Dong* (Radix Ophiopogonis), *Shi Hu* (Herba Dendrobii), *Sheng Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae) and *Wu Mei* (Fructus Mume).
- Thirst in *xiao ke* disorders: add this herb to *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae), *Tian Hua Fen* (Radix Trichosanthis), *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Radix Anemarrhenae).

Wu Wei Zi (Fructus Schisandrae Chinensis)

3. Binds Kidney *Jing* (Essence), Stops Diarrhea and Spermatorrhea

Chronic diarrhea: Chronic diarrhea or dysentery causes Spleen yang deficiency, *jing* deficiency and Large Intestine qi deficiency. This type of diarrhea is usually watery, may contain undigested food, and usually occurs in the early morning.

- Chronic diarrhea (especially in the early morning): combine *Wu Wei Zi* with *Bu Gu Zhi* (Fructus Psoraleae), *Wu Zhu Yu* (Fructus Evodiae), *Rou Dou Kou* (Semen Myristicae), *Shan Yao* (Rhizoma Dioscoreae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Ren Shen* (Radix Ginseng). **Exemplar Formula:** *Si Shen Wan* (Four-Miracle Pill).

Spermatorrhea, nocturnal emissions: Inability of the Kidney to retain *jing* (essence) because of deficiency.

- Spermatorrhea: combine *Wu Wei Zi* with *Sang Piao Xiao* (Ootheca Mantidis), *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Shan Zhu Yu* (Fructus Corni).
- Nocturnal emissions: add this herb to *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), *Sheng Di Huang* (Radix Rehmanniae), *Shan Zhu Yu* (Fructus Corni), *Jin Ying Zi* (Fructus Rosae Laevigatae), and *Mu Dan Pi* (Cortex Moutan).

Polyuria or urinary incontinence: This type of excessive urination is caused by inability of Kidney qi to retain urine. It is usually light in color and is not accompanied by burning pain.

- Polyuria: combine *Wu Wei Zi* with *Wu Yao* (Radix Linderae Strychnifolia), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae) and *Dang Shen* (Radix Codonopsis).
- Enuresis or urinary incontinence: add this herb to *Sang Piao Xiao* (Ootheca Mantidis), *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Zhu Yu* (Fructus Corni), *Shan Yao* (Rhizoma Dioscoreae), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), *Fu Pen Zi* (Fructus Rubi), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Xu Duan* (Radix Dipsaci).

4. Tranquilizes the Heart, Calms the *Shen* (Spirit)

Yin and blood deficiencies: Common symptoms of inability of blood to nourish *shen* include: palpitations, anxiety, insomnia and dream-disturbed sleep. *Wu Wei Zi* is often combined with tonic herbs to nourish the Heart and calm the *shen*.

- Insomnia caused by Heart and Kidney yin and blood deficiencies: combine *Wu Wei Zi* with *Bai Zi Ren* (Semen Platycladi), *Yuan Zhi* (Radix Polygalae), *Fu Shen* (Poria Paradicis), *Long Chi* (Dens Draconis), *Zhen Zhu Mu* (Concha Margaritaferae), *Long Yan Rou* (Arillus Longan) and *Dang Shen* (Radix Codonopsis). **Exemplar Formula:** *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart).

DOSAGE

2 to 6 grams in decoction, 1 to 3 grams in powder.

- Unprocessed *Wu Wei Zi* more strongly promotes generation of body fluids and stops perspiration. It is commonly used to treat spontaneous perspiration, night perspiration, and thirst due to loss of body fluids.
- Steaming with vinegar increases the sour taste and enhances the astringent function of this herb. It treats cough, wheezing, spermatorrhea, and chronic diarrhea.
- Steaming *Wu Wei Zi* with grain-based liquor increases the effect of tonifying the Kidney and consolidating *jing* (essence). This preparation treats spermatorrhea and nocturnal emissions.

CAUTIONS / CONTRAINDICATIONS

- Use of *Wu Wei Zi* is contraindicated in excess conditions such as heat, damp-phlegm, Liver fire, wind-heat or rashes that have not cleared.
- It is also contraindicated in the initial stages of common colds, cough, rashes or any exterior condition, as *Wu Wei Zi* may trap pathogenic factors inside the body.
- Two rare incidences of adverse reactions associated with *Wu Wei Zi* have been reported. In case one, following the ingestion of an herbal decoction including *Wu Wei Zi*, the patient reported palpitations, shortness of breath, chest congestion, increased heart rate and pre-ventricular contraction.[1] In case two, the patient reported respiratory suppression following the ingestion of an herbal decoction including *Wu Wei Zi*.[2]

CHEMICAL COMPOSITION

Deoxyschisandrin, kadsuranin, schisanhenol, schisanhenol acetate, gomisin, schisandrin, isoschisandrin, schisandrol, angeloylgomisin, tiggoylgomisin, benzoylgomisin, rubschisandrin, epigomisin, schisantherin, andeloylgomisin, tigloylgomisin, binankadsurin, angeloylbinankadsurin, isobutyroylibinankadsurin, benzoylbinankadsurin, rubschisantherin.[3]

PHARMACOLOGICAL EFFECTS

- **CNS stimulant:** *Wu Wei Zi* stimulates the central nervous system. It increases mental alertness, improves work efficiency, and quickens reflexes.[4]
- **Hepatoprotective:** Administration of *Wu Wei Zi* is associated with marked hepatoprotective effect against various types of drugs and/or chemical-induced toxicity.[5] In

Wu Wei Zi (Fructus Schisandrae Chinensis)

one study, a preparation of *Wu Wei Zi* significantly lowered liver enzymes in mice with elevated SGPT levels caused by intraperitoneal injection of 0.1% carbon tetrachloride. In a follow-up study with rats, mice and rabbits, administration of schisandrol (dosages equivalent to 2.5 and 10.0 g/kg of dried herb) demonstrated marked preventative and treatment effects for carbon tetrachloride-induced liver damage. The mechanisms of hepatoprotective function of *Wu Wei Zi* are attributed to alteration of liver cell-membrane permeability to prevent the entry of toxic substances, and increased blood flow to the liver and increased regeneration of liver cells.[6,7]

- **Gastrointestinal:** Deoxyschizandrin inhibits secretion of gastric acid in rats, and has shown beneficial effects in treatment of gastric ulcers. The effective dose of deoxyschizandrin is 50 to 100 mg/kg.[8]
- **Cardiovascular:** *Wu Wei Zi* appears to have a regulating effect on the cardiovascular system. While it may decrease blood pressure in normal subjects, it may increase blood pressure in those with weakened constitutions. Laboratory studies indicate *Wu Wei Zi* has vasodilating and cardiotonic effects.[9]
- **Respiratory:** Both water and alcohol extracts of *Wu Wei Zi* stimulate the lungs to increase the rate and depth of respiration. They have also been shown to reverse respiratory depression associated with morphine.[10]
- **Reproductive:** Administration of *Wu Wei Zi* powder at a dosage of 1 g/kg for 30 days in mice is associated with a stimulating effect on reproductive organs. The study reported an increase in weight of the testicles in males and an increase in ovulation in females.[11]
- **Immunostimulant:** Administration of *Wu Wei Zi* is associated with stimulation of non-specific immunity.[12]
- **Antibiotic:** Alcohol extract of *Wu Wei Zi* has an inhibitory effect *in vitro* against *Staphylococcus aureus, Bacillus anthracis, Salmonella typhi, Bacillus dysenteriae, Diplococcus pneumoniae, Vibrio cholerae,* and *Pseudomonas aeruginosa.*[13]

CLINICAL STUDIES AND RESEARCH

- **Dysentery:** Children with dysentery were successfully treated with various *Wu Wei Zi* preparations, including 0.25 to 0.5 gram of dried herb, 30 to 40 drops of tincture, or 0.5 gram of extract.[14]
- **Meniere's Syndrome:** In one study, 20 patients were given 4 to 5 doses of an herbal formula with marked effectiveness. The herbal formula contained *Wu Wei Zi, Suan Zao Ren* (Semen Zizyphi Spinosae), *Dang Gui* (Radicis Angelicae Sinensis), *Long Yan Rou* (Arillus Longan) and other herbs.[15]
- **Hepatitis:** An herbal formula was used with a 97% rate of effectiveness (33 out of 34 patients) in treatment of chronic hepatitis. The herbal formula contained *Wu Wei Zi, Ling Zhi* (Ganoderma), *Dan Shen* (Radix Salviae Miltiorrhizae) and *Chai Hu* (Radix Bupleuri). Patients were advised to take the herbs 30 minutes after meals for 30 days per course of treatment, for a total of three courses.[16]
- **Asthma:** Patients with severe asthma were treated with an herbal formula for 7 months to 2 years, with good results. Out of 50 patients, the study reported complete recovery in 1 case, stability in 47 cases, and no response in 2 cases. The herbal formula contained 30 to 50 grams of *Wu Wei Zi*, 9 to 12 grams of *Di Long* (Pheretima), and 30 to 80 grams of *Yu Xing Cao* (Herba Houttuyniae). Patients were advised to first soak the herbs in water for 2 to 4 hours, then cook the herbs for 15 to 20 minutes, and take the decoction twice daily, at 4 and 8 pm.[17]
- **Prolonged labor:** According to one report, 72 out of 80 women experiencing prolonged labor were treated with good results using 20 to 25 drops of 70% *Wu Wei Zi* tincture every hour for 3 hours. The mechanism of action is attributed to the uterine stimulant effect of the herb.[18]

TOXICOLOGY

In one study, 70 mice were given a 15 g/kg bolus dose of *Wu Wei Zi*. Observation over the next 72 hours showed no change in appetite, no abnormal behavior, and no fatalities. However, the LD_{50} for oral ingestion of essential oil of *Wu Wei Zi* is 8.75 +/- 2.41 g/kg in mice.[19]

HERB-DRUG INTERACTION

- **Cycloheximide**: *Wu Wei Zi* has been found to significantly counteract cycloheximide-induced amnesia in rats. The beneficial effect of the herb is amplified by treatment with serotonergic receptor antagonists, but reduced by serotonergic receptor agonists as well as GABA(A)and cholinergic receptor antagonists.[20]

AUTHORS' COMMENTS

Wu Wei Zi and *Wu Bei Zi* (Galla Chinensis) both stop sweating, diarrhea and spermatorrhea. *Wu Wei Zi* tonifies the Kidney and generates body fluids, nourishes the Heart and calms the *shen* (spirit), while *Wu Bei Zi* cools deficiency heat and stops bleeding.

Wu Mei (Fructus Mume)

烏梅　乌梅

Pinyin Name: *Wu Mei*
Literal Name: "dark plum"
Alternate Chinese Names: *Suan Mei, Mei Shi, Xun Mei, Chun Mei, Mei Zi, Mei*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: mume, smoked plum, dark plum
Botanical Name: *Prunus mume* (Sieb.) Sieb. et Zucc. (*Mei Shu*)
Pharmaceutical Name: Fructus Mume
Properties: sour, neutral
Channels Entered: Liver, Spleen, Lung , Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Inhibits Leakage of Lung Qi and Stops Leakage of Sweat

Lung qi deficiency: *Wu Mei* (Fructus Mume) treats chronic respiratory diseases typified by a dry, feeble cough and a voice low in volume.

- Chronic cough: use *Wu Mei* with *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Bai He* (Bulbus Lilii), *Zi Wan* (Radix Asteris), *Xing Ren* (Semen Armeniacae Amarum), *E Jiao* (Colla Corii Asini) and *Ban Xia* (Rhizoma Pinelliae).

2. Binds the Intestines

Diarrhea or dysentery: *Wu Mei* treats chronic diarrhea or unremitting dysentery from qi deficiency.

- Chronic diarrhea or dysentery: use charred *Wu Mei* alone, or in combination with *He Zi* (Fructus Chebulae), *Ying Su Ke* (Pericarpium Papaveris) and *Rou Dou Kou* (Semen Myristicae).

Rectal prolapse: This generally occurs as result of chronic diarrhea causing Spleen qi depletion.

- Rectal prolapse: combine *Wu Mei* with *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), *Sheng Ma* (Rhizoma Cimicifugae), *Chai Hu* (Radix Bupleuri) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

Dysentery: *Wu Mei* is combined with heat-clearing and dampness-drying herbs to treat both the symptoms and the causes of dysentery.

- Dysentery with burning sensations caused by damp-heat: use with *Huang Lian* (Rhizoma Coptidis).

Wu Mei (Fructus Mume)

3. Generates Body Fluids

Thirst: *Wu Mei* relieves thirst and generates body fluids. It treats patients with chronic yin-deficient heat manifesting in thirst, weight loss, and irritability.

- Thirst in diabetes, diabetes insipidus and hyperthyroidism: combine this herb with *Xi Yang Shen* (Radix Panacis Quinquefolii), *Mai Men Dong* (Radix Ophiopogonis), *Tian Hua Fen* (Radix Trichosanthis), *Sheng Di Huang* (Radix Rehmanniae), *Shi Gao* (Gypsum Fibrosum), *Shan Yao* (Rhizoma Dioscoreae) or *Ge Gen* (Radix Puerariae).
- Thirst and summer-heat: *Wu Mei* is often taken with sugar as a beverage during the summer, to generate fluids.

4. Expels Parasites

Abdominal pain and vomiting due to parasites: *Wu Mei* not only relieves pain associated with parasites, but also the sour taste calms and weakens the parasites and facilitates their expulsion, when combined with other purgative and antiparasitic herbs. This herb has recently been used to effectively treat ascariasis of the biliary tract.

- Roundworms and hookworms: use *Wu Mei* with *Xi Xin* (Herba Asari), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Huang Lian* (Rhizoma Coptidis), *Shi Jun Zi* (Fructus Quisqualis), and *Hua Jiao* (Pericarpium Zanthoxyli). **Exemplar Formula:** *Wu Mei Wan* (Mume Pill).

5. Stops Uterine Bleeding

Charred *Wu Mei* treats chronic uterine bleeding resulting from deficiency.

6. Treats Corns and Warts

- **Corns and warts:** Soak 30 grams of *Wu Mei* in salt water for 24 hours. Pit the fruit and add vinegar, to make a paste. Apply the paste to affected areas and remove it in 2 or 3 days. This topical application is also used to treat ulcers and sores.

DOSAGE

10 to 30 grams in decoction, with a maximum of 30 grams. Unprocessed *Wu Mei* is often used to inhibit the leakage of Lung qi, bind the intestines to stop diarrhea, promote the generation of fluids, and kill parasites. The charred herb stops bleeding and diarrhea.

CAUTIONS / CONTRAINDICATIONS

- Because *Wu Mei* has a restraining effect, it is not suitable for sole use to treat acute diarrhea, or diarrhea caused by food poisoning or infections. It should be combined with other herbs to address the root of the condition.
- *Wu Mei* is contraindicated for patients having excess heat or stagnation.

CHEMICAL COMPOSITION

Organic acids, oleanolic acid, sitosterol.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Wu Mei* has demonstrated an inhibitory effect against *Staphylococcus aureus, Salmonella typhi, Bacillus subtilis, Bacillus dysenteriae, E. coli, Mycobacterium tuberculosis* and some dermatophytes.[2]
- **Skeletal muscle relaxant:** Administration of a 100% decoction of *Wu Mei* is associated with an inhibitory effect on the intestines of rabbits.[3]
- **Antiparasitic:** According to laboratory studies, there is a moderate reduction of movement in roundworms when placed in a 5% *Wu Mei* solution, and significant reduction of movement when placed in a 30% solution.[4]
- **Antiaging:** *Wu Mei* has an antiaging effect. [5]

CLINICAL STUDIES AND RESEARCH

- **Internal hemorrhoids:** Injection of a *Wu Mei* solution to the affected area showed effectiveness in treating 110 patients with internal hemorrhoids. Most patients received 5 to 20 ml (a maximum of 30 ml) of solution per injection, with each ml of injection containing 0.4 gram of dried herb.[6]
- **Viral hepatitis:** According to one report, 66 of 74 patients showed significant improvement following an herbal treatment, with decreased liver enzyme levels, relief of jaundice, and symptomatic improvement. The treatment protocol was to cook 40 to 50 grams of *Wu Mei* in 500 ml of water to yield 250 ml of decoction, taken in two equally-divided doses daily. Patients were also advised to take vitamins B and C.[7]
- **Bacterial dysentery:** Patients with bacterial dysentery were effectively treated using 5 grams of *Wu Mei* powder (0.1 g/kg in children) every 6 hours.[8]
- **Chronic cholecystitis:** Patients with cholecystitis were treated with good results using an herbal decoction containing *Wu Mei* 5g, *Jiang Huang* (Rhizoma Curcumae Longae) 9g, *Yin Chen Hao* (Herba Artemisiae Scopariae) 15g, *Zhi Zi* (Fructus Gardeniae) 10g, *Da Huang* (Radix et Rhizoma Rhei) 9g, *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) 9g, *Fo Shou* (Fructus Citri Sarcodactylis) 9g, *Zhi Shi* (Fructus Aurantii Immaturus) 9g, *Hua Shi* (Talcum) 30g, and *Gan Cao* (Radix Glycyrrhizae) 3g.[9]
- **Infantile diarrhea:** In one study, 65 out of 67 infants (98.5%) with diarrhea showed complete recovery following an herbal treatment. Infants under one year of age were given 1 gram of *Wu Mei* and 0.25 gram of soda, and those over one year of age were given 1.5 gram of *Wu Mei* and 0.25 grams of soda. The herbs were given three times daily, for 3 days per treatment course.[10]

Wu Mei (Fructus Mume)

- **Biliary ascariasis:** Patients with biliary ascariasis were treated with a *Wu Mei* vinegar solution with remarkable results. Out of 50 participants, the study reported pain relief within half an hour in 30 patients, and complete recovery in 48 patients within 2 days. The herbal solution was prepared by mixing 500 grams of *Wu Mei* in 1,000 ml of vinegar for 24 hours. Patients were given 10 to 20 ml of the vinegar solution three times daily.[11]
- **Treatment of hookworm:** Following an herbal treatment that lasted between 5 and 23 days, 14 of 20 patients recovered from hookworm infestation. The treatment protocol was to cook 15 to 30 grams of *Wu Mei* in 500 ml of water, to yield 120 ml of decoction. The decoction was taken twice daily on an empty stomach, before breakfast and lunch.[12]

AUTHORS' COMMENTS

Records have shown that when treating parasites, herbs that are usually used are sour, bitter, acrid and warm. The sour taste softens the worms, the bitter purges them, the acrid weakens the worms and the heat calms them. *Wu Mei Wan* (Mume Pill) is the representative formula of this principle, as it contains all four tastes and properties.

Channels Entered: Lung, Large Intestine, Kidney

Wu Bei Zi (Galla Chinensis)

CHINESE THERAPEUTIC ACTIONS

1. Contains Leakage of Lung Qi to Arrest Cough, Cools Deficiency Fire

Chronic cough due to Lung deficiency: Sour, astringent and cold, *Wu Bei Zi* (Galla Chinensis) enters the Lung to contain leakage of Lung qi and clear deficiency fire. It is commonly used to treat chronic cough with blood or blood-streaked sputum due to yin deficiency and deficiency heat of the Lung. It cools deficiency fire to prevent further loss of Lung yin, and arrests cough to prevent leakage of Lung qi.

- Chronic cough: use *Wu Bei Zi* with *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Tian Men Dong* (Radix Asparagi) and *Xuan Shen* (Radix Scrophulariae).

2. Binds the Intestines

Chronic diarrhea, dysentery or rectal prolapse: *Wu Bei Zi* binds the intestines to treat chronic diarrhea, chronic dysentery and rectal prolapse. It may be used individually or in combination with other herbs.

- Chronic diarrhea, dysentery during the summer: fry *Wu Bei Zi* with vinegar and grind it into powder. Serve with rice soup.
- Rectal prolapse: use it with *Ming Fan* (Alumen) as an external wash or soak.
- Postpartum uterine prolapse: use this herb alone as powder.

3. Consolidates Kidney *Jing* (Essence)

Leakage of *jing*: *Wu Bei Zi* treats Kidney deficiency with leakage of *jing*. Symptoms of this deficiency include spermatorrhea, enuresis, white or turbid urine, nocturnal emissions, night fevers, irritability and a dull, dark complexion.

- Leakage of *jing*: use this herb with *Long Gu* (Os Draconis) and *Fu Ling* (Poria). Add a small portion of salt to the decoction and take it on an empty stomach.

4. Stops Sweating

Spontaneous or night sweating: *Wu Bei Zi* effectively treats both spontaneous and night sweating. Mix this herb with water to make a paste and apply it topically to the umbilicus.

5. Stops Bleeding

Various bleeding disorders: *Wu Bei Zi* has an astringent function to treat various bleeding disorders, such as uterine bleeding, hematochezia, bleeding gums, hematuria, and epistaxis. It may be used individually or in combination with other herbs, via oral or topical administration.

- Uterine bleeding, bleeding due to miscarriage: use *Wu Bei Zi* with *Ming Fan* (Alumen), *He Zi* (Fructus Chebulae) and *Hai Piao Xiao* (Endoconcha Sepiae).
- Hematochezia, hematuria: use it alone as powder.
- Epistaxis, gum bleeding: use this herb as powder and apply it topically.

6. Eliminates Toxins and Reduces Swelling

Wu Bei Zi helps to heal sores as it eliminates toxins and reduces swelling. It is used topically on various carbuncles, sores, swellings, and oozing or ulcerated lesions.

- Non-healing sores, ulcerations and carbuncles with oozing fluids: apply *Wu Bei Zi* topically as powder or as a wash.

DOSAGE

1.5 to 6 grams.

CAUTIONS / CONTRAINDICATIONS

- *Wu Bei Zi* should be used with caution in cases of excess, heat, accumulation, or stagnation.

CHEMICAL COMPOSITION

Gallotannin, gallotannic acid, gallic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Wu Bei Zi* has an *in vitro* inhibitory effect against *Staphylococcus aureus*, *Diplococcus pneumoniae*, *Salmonella typhi*, and *Pseudomonas aeruginosa*.[2]

CLINICAL STUDIES AND RESEARCH

- **Gastrointestinal bleeding:** In one clinical study, 33 patients with upper gastrointestinal bleeding were treated with an herbal formula with marked effectiveness. The treatment protocol was to cook 6 grams of *Wu Bei Zi* in water to yield 100 ml of decoction, which was taken in three equally-divided doses daily. Those with severe blood loss received blood infusions. Those with hematemesis were instructed not to ingest food orally. Following one week of treatment, 29 out of 33 (91%) patients tested negative for blood in the stool. Three more patients were negative after 9 to 11 days. One patient with stomach cancer did not respond to the herbal treatment.[3]
- **Spermatorrhea:** According to one report, 35 patients with spermatorrhea were treated by topical application of herbs, with marked improvement in 9 patients, moderate improvement in 19, and no improvement in 7. The herbal paste was prepared by mixing powdered *Wu Bei Zi* with normal saline solution. The herbal paste was applied bilaterally to *Siman* (Extra) points, covered with gauze, and re-applied every three days. *Siman* (Extra) is located 2 *cun* below and 0.5 *cun* lateral to the umbilicus.[4]
- **Scars from burns:** A topical herbal preparation showed good therapeutic benefit in treatment of patients with scars from burns. The herbal preparation contained 100 grams of *Wu Bei Zi* in powder, 1 *Wu Gong* (Scolopendra),

Wu Bei Zi (Galla Chinensis)

and 18 grams of honey, mixed with 250 ml of black vinegar to make a paste. The compound was applied topically to the wound, and changed every 3 to 5 days.[5]

- **Thrush:** In one study, 20 patients with thrush or myocotic stomatitis due to monilia candida recovered completely after being treated twice daily by topical application of an herbal powder containing 20 grams of *Wu Bei Zi* and 3 grams of *Bing Pian* (Borneolum Syntheticum).[6]

HERB-DRUG INTERACTION

- **Absorption:** *Wu Bei Zi* has a strong binding affinity, and when it physically binds to another substance, the result is a large, insoluble complex that cannot be absorbed. Therefore, it is recommended that the ingestion of drugs and this herb be separated by at least 2 hours to avoid interference with proper absorption.[7]

TOXICOLOGY

Decoction of *Wu Bei Zi* at the dosage of 20 g/kg showed no abnormalities in mice. However, subcutaneous injection at 20 g/kg produced necrosis of local tissue and some fatalities in mice within 24 hours.[8]

AUTHORS' COMMENTS

Please refer to *Wu Wei Zi* (Fructus Schisandrae Chinensis) for a comparison of *Wu Bei Zi* and *Wu Wei Zi*.

Historically, *Wu Bei Zi* has been used as a generic antidote to treat the accidental ingestion of poisonous substances. It has a strong binding affinity, and when it physically binds to another substance, the result is a large, insoluble complex that cannot be absorbed. The poisonous substance is then eliminated from the body via the stool with minimal systemic absorption.

He Zi (Fructus Chebulae)

訶子　诃子

Pinyin Name: *He Zi*
Alternate Chinese Names: *He Li Le, He Li*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: chebule, medicine terminalia fruit
Botanical Name: *Terminalia chebula* Retz. (*He Zi*); *Terminalia chebula* Retz. var. *tomentella* Kurt. (*Rong Mao He Zi*)
Pharmaceutical Name: Fructus Chebulae
Properties: bitter, astringent, neutral
Channels Entered: Lung, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Restrains the Lung, Directs Lung Qi Downwards, Benefits the Throat

Cough and dyspnea from Lung deficiency, loss of voice: *He Zi* (Fructus Chebulae) most effectively treats Lung deficiency in which rebellious, deficient qi manifests as chronic coughing, dyspnea and loss of voice. Clinical applications of this herb include chronic dyspnea, coughing,

He Zi (Fructus Chebulae)

loss of voice, shortness of breath due to chronic respiratory disorders, chronic pharyngitis and laryngitis.
- Lung qi deficiency with chronic cough, dyspnea and asthma: use *He Zi* with *Ge Jie* (Gecko), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Ren Shen* (Radix Ginseng).
- Chronic cough: use this herb with *Bai He* (Bulbus Lilii), *Wu Mei* (Fructus Mume), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Mai Men Dong* (Radix Ophiopogonis) and *Ma Dou Ling* (Fructus Aristolochiae).
- Chronic laryngitis and pharyngitis with loss of voice: combine it with *Wu Mei* (Fructus Mume), *She Gan* (Rhizoma Belamcandae), *Chan Tui* (Periostracum Cicadae), and *Xuan Fu Hua* (Flos Inulae).
- Chronic cough leading to loss of voice: drink a decoction of *He Zi* daily.

2. Binds the Intestines and Stops Diarrhea

He Zi treats chronic diarrhea from deficiency and cold, or from heat, depending on what other herbs are combined in the formula. After processing, *He Zi* has a warm property. Used alone, it is best for chronic diarrhea or dysentery resulting from deficiency and cold.
- Chronic diarrhea caused by deficiency and cold: combine it with *Rou Dou Kou* (Semen Myristicae), *Qian Shi* (Semen Euryales), *Mu Xiang* (Radix Aucklandiae), *Wu Zhu Yu* (Fructus Evodiae), *Bu Gu Zhi* (Fructus Psoraleae) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- Chronic dysentery: use *He Zi* with *Chi Shi Zhi* (Halloysitum Rubrum), *Wu Mei* (Fructus Mume) and *Si Shen Wan* (Four-Miracle Pill).
- Chronic diarrhea caused by damp-heat: add it to *Huang Lian* (Rhizoma Coptidis), *Mu Xiang* (Radix Aucklandiae) and *Gan Cao* (Radix Glycyrrhizae).
- Bloody diarrhea: combine it with *Fang Feng* (Radix Saposhnikoviae), charred *Huai Hua* (Flos Sophorae), charred *Di Yu* (Radix Sanguisorbae), charred *Huang Bai* (Cortex Phellodendri) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

DOSAGE

3 to 10 grams. The unprocessed form clears the Lung and benefits the voice. Roasted *He Zi* stops diarrhea.

CAUTIONS / CONTRAINDICATIONS

- *He Zi* should not be used alone when treating exterior conditions or internal accumulations of damp-heat. Before using this herb, one must be certain there are no lingering pathogenic factors in the Lung or the intestines.

CHEMICAL COMPOSITION

Chebulinic acid, chebulagic acid, corilagin, terchebin, glucogallin, ellagic acid, gallic acid, chebulin, sennoside A, terchebulin, punicalagin, terflavin A, shikimic acid, dehydroshikimic acid, quinic acid, arabinose, fructose, glucose, sucrose, rhamnose, amino acids, tannase, polyphenol oxidase, peroxydase, ascorbic acid oxidase, β-sitosterol, daucosterol, triacontanoic acid, palmitic acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *He Zi* has an inhibiting influence on *Pseudomonas aeruginosa*, *Corynebacterium diphtheriae*, *Staphylococcus aureus*, *E. coli*, *Diplococcus pneumoniae*, β-hemolytic streptococcus and *Bacillus proteus*.[2]
- **Antispasmodic:** Chebulin may relieve spasms and cramps of the smooth muscles with an effect similar to papaverine.[3]
- **Gastrointestinal:** *He Zi* has a complicated effect on the gastrointestinal tract that includes initial purgative and subsequent astringent effects. The initial purgative effect is attributed to sennoside A, which is a mild to moderate purgative. The subsequent astringent effect is attributed to the high content of tannin, that stops diarrhea.[4]

CLINICAL STUDIES AND RESEARCH

- **Infantile diarrhea:** In one study, 227 of 230 infants were successfully treated with an herbal formulation containing *He Zi* 5-10 g, *Fang Feng* (Radix Saposhnikoviae) 5-10g, *Chen Pi* (Pericarpium Citri Reticulatae) 5-10g, *Mai Ya* (Fructus Hordei Germinatus) 5-10g, *Ge Gen* (Radix Puerariae) 5-20g, and *Shan Zha* (Fructus Crataegi) 5-20g. For excessive damp-heat, *Huang Qin* (Radix Scutellariae) 5-10g and *Qin Pi* (Cortex Fraxini) 5-10g were added. For Spleen deficiency, *Wu Yao* (Radix Linderae Strychnifolia) 5-10g and *Ying Su Ke* (Pericarpium Papaveris) 3-5g were added.[5]
- **Bacterial dysentery:** According to one report, 23 out of 25 patients reported complete recovery from bacterial dysentery within 3 days following treatment with *He Zi* preparations. The treatment protocol included both oral and rectal administration of *He Zi*. For oral treatment, enteric-coated *He Zi* tablets were given 2 hours before meals, three to four times daily. For rectal treatment, 10 to 40 ml of 20% *He Zi* solution was given as enema twice daily.[6]
- **Lobar pneumonia:** An herbal decoction containing 15 grams of *He Zi*, 15 grams of *Gua Lou Shi* (Fructus Trichosanthis) and 9 grams of *Bai Bu* (Radix Stemonae) was used to treat 20 patients with lobar pneumonia, with good results. Most patients reported reduction in fever within 1 to 3 days, gradual decline of white blood cell count to normal within 3 to 6 days, and complete recovery within 6 to 11 days. No adverse reactions were reported.[7]

TOXICOLOGY

The LD_{50} for chebulin in mice is 550 mg/kg.[8]

He Zi (Fructus Chebulae)

AUTHORS' COMMENTS

He Zi and *Rou Dou Kou* (Semen Myristicae) both treat chronic diarrhea. *He Zi* focuses on the upper *jiao*, and treats wheezing and chronic cough with loss of voice from Lung qi deficiency. *Rou Dou Kou* focuses on the middle *jiao*, and treats abdominal fullness and pain, poor appetite and nausea caused by cold, Spleen deficiency and qi stagnation.

According to Dr. Lu Zhi-Zheng, *He Zi* and *Wu Mei* (Fructus Mume), used for colitis patients with diarrhea, bind the intestines and prevent prolapse.

Ying Su Ke (Pericarpium Papaveris)

罂粟殼 罂粟壳

Pinyin Name: *Ying Su Ke*
Alternate Chinese Names: *Mi Ke, Yu Mi Ke*
Original Source: *Yi Xue Qi Yuan* (Origins of the Medicine) by Zhang Yuan-Su in Yuan Dynasty
English Name: opium shells, opium husks
Botanical Name: *Papaver somniferum* L. (*Ying Su*)
Pharmaceutical Name: Pericarpium Papaveris
Properties: sour, astringent, neutral
Channels Entered: Kidney, Large Intestine, Lung
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Contains the Lung

Chronic cough because of Lung qi deficiency: *Ying Su Ke* (Pericarpium Papaveris) restrains the leakage of Lung qi to treat chronic cough.

- Cough: use *Ying Su Ke* individually for symptomatic treatment of coughing.
- Chronic cough: use this herb with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Shan Yao* (Rhizoma Dioscoreae), and *Gan Cao* (Radix Glycyrrhizae).

2. Binds the Large Intestine

Chronic diarrhea with pain: *Ying Su Ke* restrains leakage of fluids from the Large Intestine to stop diarrhea.

- Diarrhea: use it with *He Zi* (Fructus Chebulae) and *Rou Dou Kou* (Semen Myristicae).
- Diarrhea with Spleen deficiency: combine this herb with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).

3. Relieves Pain

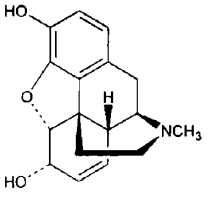
Pain in the chest, abdomen, tendons and bones: *Ying Su Ke* has a strong pain-relieving function. It is commonly used for acute pain, including stomach and abdominal pain, cancer-related pain, and pain from external injuries, among others. It may be used individually or in combination with other herbs.

DOSAGE

10 to 30 grams in decoction. Honey-processed *Ying Su Ke* is stronger in antitussive function. The vinegar-processed herb is more effective in antidiarrheal and pain-relieving actions.

Ying Su Ke (Pericarpium Papaveris)

CAUTIONS / CONTRAINDICATIONS



- Early stages of cough, diarrhea or dysentery should not be treated with *Ying Su Ke* alone.
- Use of *Ying Su Ke*, or its constituents, is habit-forming. Avoid long-term use.

OVERDOSAGE

Symptoms of overdose associated with *Ying Su Ke* include headache, dizziness, nausea, vomiting, constipation, difficulty urinating, perspiration, and biliary colic. Respiratory depression is the single most dangerous side effect and is the limiting factor restricting high doses of all opioids. In overdose, respiration may be suppressed to 2 to 4 breaths per minute. Acute overdose is generally detected by drowsiness, miosis, and respiratory depression. Use of opioids is strongly discouraged in newborns, young children, and patients with hypothyroid or pre-existing respiratory conditions. Furthermore, long-term use of opioids should be avoided whenever possible due to risks of developing tolerance and addiction. Because of the high abuse potential of a substance like this, use of the herb and its components is highly regulated in most countries.[1]

CHEMICAL COMPOSITION

Morphine, codeine, thebaine, narcotine, papaverine, narcotoline, sedoheptulose, D-mannoheptulose, myoinositol, erythritol.[2,3]

Morphine

PHARMACOLOGICAL EFFECTS

- **Analgesic:** Morphine, one of the components of *Ying Su Ke*, is one of the strongest analgesic substances to relieve all types of pain – visceral, somatic and cutaneous. In fact, it is the standard by which all other analgesic medications are measured for dosing and conversion. Morphine relieves pain by raising the threshold of pain perception and reducing discomfort. In other words, a patient on morphine may still be aware of the presence of pain but will not be distressed by it.[4]
- **Antitussive:** Both morphine and codeine have marked antitussive functions. However, morphine is not an ideal antitussive agent because of its side effects and adverse reactions, such as the developing of tolerance, constipation, and respiratory depression.[5]
- **Respiratory:** Respiratory depression and respiratory failure are the major complications of use of morphine and opioid medications. In fact, patients may begin to experience respiratory difficulties prior to achieving analgesia. Respiratory depression occurs because the medications cause a decreased sensitivity of the respiratory center to carbon dioxide.[6]
- **CNS suppressant:** Administration of *Ying Su Ke* is associated with sedation and drowsiness. It is not an effective hypnotic agent, as the sleep is shallow and the subject may be easily awakened.[7]
- **Gastrointestinal:** Morphine and codeine may both cause constipation by delaying gastric emptying time, decreasing the propulsive peristaltic movement of the intestines and reducing the secretion of digestive fluids. Furthermore, they may cause nausea and vomiting by stimulating the chemoreceptor zone.[8]
- **Others:** In addition to the pharmacological effects listed above, opioids may also cause paradoxical excitation, changes in the endocrine system, alteration of body temperature, release of histamine, and allergic reactions.

CLINICAL STUDIES AND RESEARCH

- **Chronic gastroenteritis:** Patients with chronic gastroenteritis were treated with an herbal formula containing 10 grams of *Ying Su Ke*, 30 grams of *Jin Yin Hua* (Flos Lonicerae), and 30 grams of *Shan Yao* (Rhizoma Dioscoreae). The formula was given as decoction, twice daily.[9]

HERB-DRUG INTERACTION

- **Depressant effect:** Phenothiazines, monoamine oxidase inhibitors, and tricyclic antidepressants may exaggerate and prolong the depressant effect of *Ying Su Ke*.[10]

TOXICOLOGY

For *Ying Su Ke*, the LD_{50} via oral ingestion is approximately 1.8 to 2.2 g/kg in mice, rabbits, cats, and dogs. For its components, the LD_{50} for morphine in mice is 531 mg/kg via subcutaneous injection and 500 mg/kg via intraperitoneal injection; the LD_{50} for codeine in mice is 300 mg/kg via subcutaneous injection; and the LD_{50} for papaverine in mice via oral ingestion is 2500 mg/kg.[11]

AUTHORS' COMMENTS

The first documentation of opium use is found in the writings of the Greek Theophratus in the third century, B.C. Since then, it has been used medicinally, but also abused, by many cultures all around the world. In 1806, Serturner successfully isolated morphine from opium. This is considered to be a major breakthrough in the history of allopathic medicine, as most analgesics prescribed today are originally from components of opium or their derivatives.

Ying Su Ke (Pericarpium Papaveris)

For patients in severe pain, *Yan Hu Suo* (Rhizoma Corydalis) may be used as a substitute, as *Ying Su Ke* may not be available in many countries.

Ye Ying Pi (Pericarpium Prunus Pseudocerasus)

野樱皮 野樱皮

Pinyin Name: *Ye Ying Pi*
Literal Name: "wild cherry bark"
English Name: wild black cherry bark
Botanical Name: *Prunus serotina*
Pharmaceutical Name: Pericarpium Prunus
Properties: sour, bitter, cool
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

Relieves Cough

Ye Ying Pi (Pericarpium Prunus Pseudocerasus) redirects inappropriately rising Lung qi and relieves cough. As an antitussive agent, this herb may be used individually or in combination with other herbs.

- Cough: combine *Ye Ying Pi* with *Xing Ren* (Semen Armeniacae Amarum) and *Ma Huang* (Herba Ephedrae).

DOSAGE

3 to 5 grams.

CHEMICAL COMPOSITION

Cyanogenic glycosides, coumarins, volatile oil, tannins, resins.

PHARMACOLOGICAL EFFECTS

- **Antitussive:** *Ye Ying Pi* treats coughing. After ingestion, the cyanogenic glycoside of the herb is converted in the body to prussic acid. Prussic acid initially increases respiratory functioning of the lung, followed by sedation of the sensory nerve that provokes cough.

TOXICOLOGY

Prussic acid is slightly toxic. However, use of the herb is safe, as the content of cyanogenic glycoside and the degree to which it is converted to prussic acid are relatively low (0.07 to 0.16%).

Chi Shi Zhi (Halloysitum Rubrum)

赤石脂

Pinyin Name: *Chi Shi Zhi*
Literal Name: "crimson stone resin"
Alternate Chinese Names: *Hong Gao Ling, Chi Shi Tu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: halloysite, red halloysite
Pharmaceutical Name: Halloysitum Rubrum
Properties: sweet, sour, astringent, warm
Channels Entered: Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Binds the Intestines and Stops Diarrhea

Chronic unremitting diarrhea or dysentery, rectal prolapse: Large Intestine qi deficiency occurs when diarrhea persists for a long time. When Spleen qi also becomes deficient, organ prolapse, especially of the rectum, occurs. In addition to diarrhea, the patient will feel fatigue, weak limbs, dull abdominal pain, and a preference for pressure and warmth. *Chi Shi Zhi* (Halloysitum Rubrum) stops chronic diarrhea in ulcerative colitis, chronic enteritis, dysentery and intestinal tuberculosis.

- Chronic diarrhea and/or rectal prolapse: combine *Chi Shi Zhi* with *Yu Yu Liang* (Limonitum).
- Dysentery with pus and bleeding from deficiency and cold: use it with *Gan Jiang* (Rhizoma Zingiberis) and *Geng Mi* (Semen Oryzae).

2. Stops Bleeding

Uterine bleeding and leukorrhea: Profuse uterine bleeding or spotting between periods is the result of Liver and Kidney deficiencies with an inability to nourish the *ren* (conception) and *chong* (thoroughfare) channels.

- Uterine bleeding: use *Chi Shi Zhi* with *Hai Piao Xiao* (Endoconcha Sepiae), charred *Ai Ye* (Folium Artemisiae Argyi), *E Jiao* (Colla Corii Asini), *Bai Shao* (Radix Paeoniae Alba) and *Huang Qi* (Radix Astragali).
- Blood in vaginal discharge: use this mineral with *Qian Shi* (Semen Euryales), *Lu Jiao Shuang* (Cornu Cervi Degelatinatium) and *She Chuang Zi* (Fructus Cnidii).

3. Promotes Healing of Sores and Ulcers

- **Chronic non-healing ulcers, weeping damp sores or bleeding:** use *Chi Shi Zhi* as powder with *Ru Xiang* (Gummi Olibanum), and *Xue Jie* (Sanguis Draconis). Apply topically.

DOSAGE

10 to 20 grams. The maximum dose for *Chi Shi Zhi* is 30 grams. Use it as powder externally.

CAUTIONS / CONTRAINDICATIONS

- *Chi Shi Zhi* is contraindicated for patients with damp-heat and stagnation.
- It is also contraindicated in hot diarrhea or early stages of dysenteric disorders.
- *Chi Shi Zhi* should be prescribed with caution for pregnant patients.

CHEMICAL COMPOSITION

Aluminum silicate, $Al_4(Si_4O_{10})(OH)_8 \cdot 4H_2O$.[1]

PHARMACOLOGICAL EFFECTS

- **Binding:** *Chi Shi Zhi* contains a large amount of aluminum silicate. Following oral ingestion of *Chi Shi Zhi*, the aluminum silicate binds to, and subsequently eliminates, various substances present in the gastrointestinal tract, including, but not limited to, phosphorus, mercury, and bacterial endotoxins.[2]
- **Hemostatic:** Administration of *Chi Shi Zhi* may decrease bleeding time in rabbits.[3]

CLINICAL STUDIES AND RESEARCH

- **Prolapsed rectum:** One report describes 14 patients with rectal prolapse who were effectively treated using an herbal decoction containing *Chi Shi Zhi* 15g, *Yu Yu Liang* (Limonitum) 15g, *Tu Si Zi* (Semen Cuscutae) 9g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 9g, *Bu Gu Zhi* (Fructus Psoraleae) 6g, *Zhi Gan Cao* (Radix Glycyrrhizae Preparata) 4.5g, *Sheng Ma* (Rhizoma Cimicifugae) 4.5g, *Pao Jiang* (Rhizoma Zingiberis Preparatum) 4.5g, and others, depending on the condition of the individual patient.[4]

Chi Shi Zhi (Halloysitum Rubrum)

HERB-DRUG INTERACTION

- **Absorption:** *Chi Shi Zhi* has a strong binding affinity, and when it physically binds to another substance, they form a large, insoluble complex that cannot be absorbed in the intestines. Therefore, it is recommended that ingestion of drugs and this substance be separated by at least 2 hours to avoid interference with proper absorption.[5]

AUTHORS' COMMENTS

Chi Shi Zhi is historically used as a generic antidote to treat accidental ingestion of poisonous substances. It has a strong binding affinity, and when it physically binds to another substance, the result is a large, insoluble complex that cannot be absorbed through the gastrointestinal tract. The poisonous substance is then eliminated from the body via the stool with minimal systemic absorption.

Yu Yu Liang (Limonitum)

禹餘糧 禹馀粮

Pinyin Name: *Yu Yu Liang*
Literal Name: "surplus grain"
Alternate Chinese Names: *Yu Liang Shi, Yu Lang Shi, Tai Yi Yu Liang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: limonite
Pharmaceutical Name: Limonitum
Properties: sweet, astringent, neutral
Channels Entered: Large Intestine, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Binds the Intestines, Stops Diarrhea

Chronic diarrhea and dysentery: Sweet and astringent, *Yu Yu Liang* (Limonitum) binds the intestines to stop chronic diarrhea arising from qi deficiency of the Large Intestine and its inability to retain fluids. Its astringent effect in treatment of diarrhea is similar to that of *Chi Shi Zhi* (Halloysitum Rubrum).

- Diarrhea caused by deficiency of the middle *jiao*: use *Yu Yu Liang* with *Gui Zhi* (Ramulus Cinnamomi), *Gan Jiang* (Rhizoma Zingiberis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

2. Restrains Leakage of Body Fluids, Stops Bleeding

Uterine bleeding, leukorrhea: *Yu Yu Liang* restrains the leakage of body fluids to stop bleeding and profuse leukorrhea.

- Profuse menstrual bleeding: use *Yu Yu Liang* with *Chi Shi Zhi* (Halloysitum Rubrum), charred *Guan Zhong* (Rhizoma Dryopteridis), and charred *Lian Fang* (Receptaculum Nelumbinis).
- Profuse leukorrhea and feeling of dampness and cold in the genital region caused by yang deficiency: combine it with *Hua Jiao* (Pericarpium Zanthoxyli) and *She Chuang Zi* (Fructus Cnidii).

Yu Yu Liang (Limonitum)

DOSAGE

10 to 20 grams.

CAUTIONS / CONTRAINDICATIONS

- *Yu Yu Liang* is contraindicated in cases of excess, to avoid retention of any pathogenic factors.

CHEMICAL COMPOSITION

Aluminum, magnesium, potassium, sodium, FeO_3.[1]

HERB-DRUG INTERACTION

- **Absorption:** *Yu Yu Liang* has a strong binding affinity, and when it physically binds to another substance, the result is a large, insoluble complex that cannot be absorbed through the intestines. Therefore, it is recommended that the ingestion of drugs and this herb be separated by at least 2 hours to avoid interference with proper absorption.[2]

AUTHORS' COMMENTS

Yu Yu Liang has historically been used as a generic antidote to treat accidental ingestion of poisonous substances. It has a strong binding affinity, and when it physically binds to another substance, the result is a large, insoluble complex that cannot be absorbed in the gastrointestinal system. The poisonous substance is then eliminated from the body via the stool with minimal systemic absorption.

Rou Dou Kou (Semen Myristicae)

肉豆蔻 肉豆蔻

Pinyin Name: *Rou Dou Kou*
Literal Name: "fleshy cardamon"
Alternate Chinese Names: *Rou Guo*, *Yu Guo*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: myristica, nutmeg
Botanical Name: *Myristica fragrans* Houtt. (*Rou Dou Kou Shu*)
Pharmaceutical Name: Semen Myristicae
Properties: acrid, warm
Channels Entered: Large Intestine, Spleen, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Binds the Intestines and Stops Diarrhea

Spleen yang deficiency: *Rou Dou Kou* (Semen Myristicae) treats chronic diarrhea caused by Spleen yang deficiency, with rectal prolapse, abdominal fullness and distention, vomiting and poor appetite. In severe cases where Kidney yang is also deficient, early morning diarrhea, also known as "5 a.m. diarrhea," will occur.

- Spleen yang deficiency: combine *Rou Dou Kou* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Shen* (Radix Codonopsis), *Fu Ling* (Poria), *Mu Xiang* (Radix Aucklandiae), *Qian Shi* (Semen Euryales) and *Sha Ren* (Fructus Amomi).
- Early morning diarrhea (5 a.m. diarrhea) with cold abdomen: add it to *Wu Zhu Yu* (Fructus Evodiae), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Bu Gu Zhi* (Fructus Psoraleae). **Exemplar Formula:** *Si Shen Wan* (Four-Miracle Pill).

Rou Dou Kou (Semen Myristicae)

- Chronic enteritis or dysentery with diarrhea: incorporate this herb with *Wu Zhu Yu* (Fructus Evodiae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Bu Gu Zhi* (Fructus Psoraleae), *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *He Zi* (Fructus Chebulae), *Shan Yao* (Rhizoma Dioscoreae), *Shan Zhu Yu* (Fructus Corni), *Rou Gui* (Cortex Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gan Jiang* (Rhizoma Zingiberis) and *Wu Yao* (Radix Linderae). Modify as needed.

2. Warms the Middle *Jiao*, Regulates Qi and Stops Pain

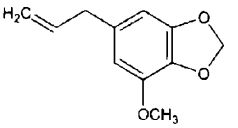
Epigastric and abdominal coldness, pain, distention and fullness: Spleen yang deficiency with qi stagnation causes epigastric and abdominal bloating, fullness and distention, poor appetite, indigestion, and a feeling of cold in the abdomen.

- Chronic diarrhea with bloating and fullness: add *Rou Dou Kou* to *Mu Xiang* (Radix Aucklandiae) and *Xiang Fu* (Rhizoma Cyperi).
- Chronic diarrhea with feelings of abdominal cold: use this herb with *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- Chronic diarrhea with abdominal pain: combine it with *Ying Su Ke* (Pericarpium Papaveris) and *Bai Shao* (Radix Paeoniae Alba).
- Chronic diarrhea with poor appetite and weakness: use *Rou Dou Kou* with *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).

DOSAGE

3 to 10 grams in decoctions; 1.5 to 3 grams as powder. *Rou Dou Kou* is almost always used in its roasted form for the functions described above, and is best for warming the middle *jiao* and stopping diarrhea. The fresh or unprocessed form is contraindicated in patients with deficiency and cold of the middle *jiao*, as it contains essential oil that stimulates the intestines and causes diarrhea.

CAUTIONS / CONTRAINDICATIONS



- Use of *Rou Dou Kou* is contraindicated for patients who have excess or heat conditions (e.g., diarrhea or dysentery caused by heat).

OVERDOSAGE

Dizziness, incoherent speech or stupor, and hypersomnia have been reported following ingestion of 7.5 grams or more of *Rou Dou Kou* powder. Use of myristicin has been associated with hallucination in humans.[1]

CHEMICAL COMPOSITION

Pinene, sabinene, camphene, myristicin, eugenol, safrol, elemicin, α-thujene, carene, dipentene, geraniol, dehydrodisoeugenol, terpinene, myristin, olein, diarylpropanoids.[2,3]

Myristicin

PHARMACOLOGICAL EFFECTS

- **Sedative and hypnotic:** The essential oil of *Rou Dou Kou* has demonstrated an inhibitory effect on the central nervous system. Following intravenous injection at the dosage of 50 mg/kg in rabbits, there is a significant inhibition of perception of pain and olfactory stimulation. It also prolonged sleeping time induced by pentobarbital.[4]
- **Antibiotic:** *Rou Dou Kou* has an inhibitory effect on *Staphylococcus aureus*, *Diplococcus pneumoniae*, and *Bacillus subtilis*.[5]
- **Anesthetic:** The essential oil of *Rou Dou Kou* has shown anesthetic functions in mice, rabbit, cat and dog studies.[6]

CLINICAL STUDIES AND RESEARCH

- **Ulcerative colitis:** Ulcerative colitis in 62 patients was treated with an herbal decoction with complete recovery in 44 patients, moderate improvement in 16, and no response in 2. The herbal decoction contained *Rou Dou Kou*, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *He Zi* (Fructus Chebulae), *Ren Shen* (Radix Ginseng), *Mu Xiang* (Radix Aucklandiae), *Dang Gui* (Radicis Angelicae Sinensis), *Rou Gui* (Cortex Cinnamomi), *Zhi Gan Cao* (Radix Glycyrrhizae Preparata), *Bai Shao* (Radix Paeoniae Alba), and *Ying Su Ke* (Pericarpium Papaveris). *Fu Ling* (Poria) and *Yi Yi Ren* (Semen Coicis) were added for dampness; *Huang Qi* (Radix Astragali) and *Sheng Ma* (Rhizoma Cimicifugae) were added for qi deficiency; *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Pao Jiang* (Rhizoma Zingiberis Preparatum) were added for excess cold; *Huang Lian* (Rhizoma Coptidis) and *Da Huang* (Radix et Rhizoma Rhei) were added for excess heat; *Shan Zha* (Fructus Crataegi) and *Bing Lang* (Semen Arecae) were added for food stagnation; *Yan Hu Suo* (Rhizoma Corydalis) and a large dosage of *Bai Shao* (Radix Paeoniae Alba) were added for excess pain; and charred *Di Yu* (Radix Sanguisorbae) and *San Qi* (Radix Notoginseng) were added for rectal bleeding.[7]
- **Infantile diarrhea:** According to one report, 285 infants were treated effectively using an herbal formula containing *Shan Yao* (Rhizoma Dioscoreae), *Ma Chi Xian*

Rou Dou Kou (Semen Myristicae)

(Herba Portulacae), *Cang Zhu* (Rhizoma Atractylodis), *Che Qian Zi* (Semen Plantaginis), *Rou Dou Kou* (Semen Myristicae), *Gan Cao* (Radix Glycyrrhizae), *Da Huang* (Radix et Rhizoma Rhei), and *Ding Xiang* (Flos Caryophylli). The herbs were given in powder form four times daily.[8]

TOXICOLOGY

The LD_{50} for myristicin in cats is 0.5 to 1.0 ml/kg. Subcutaneous injection of myristicin at the dosage of 0.12 ml may lead to hepatic disorders. Ingestion of *Rou Dou Kou* powder in cats at the dosage of 1.8 g/kg may induce drowsiness, and possibly fatality within 24 hours.[9]

SUPPLEMENT

- 肉豆根 *Rou Dou Gen* (Radix Myristicae) is derived from the root of the same plant as *Rou Dou Kou*. It is acrid, bitter and cold. Its functions and indications include regulating the menses to treat irregular menstruation, promoting urination to treat dysuria, and clearing heat to reduce pain and inflammation of the eyes and ears. The dosage for *Rou Dou Gen* is 10 to 15 grams.

AUTHORS' COMMENTS

Rou Dou Kou and *He Zi* (Fructus Chebulae) both treat chronic diarrhea. *Rou Dou Kou* focuses on the middle *jiao* and treats abdominal fullness and pain, poor appetite and nausea due to cold, Spleen deficiency and qi stagnation. *He Zi* focuses on the upper *jiao* and treats wheezing and chronic cough with loss of voice from Lung qi deficiency.

Rou Dou Kou and *Bai Dou Kou* (Fructus Amomi Rotundus) both warm the middle *jiao* and regulate qi. They are both suitable for deficiency and cold of the Spleen and Stomach with qi stagnation causing symptoms such as epigastric and abdominal fullness and pain, diarrhea, and vomiting. *Rou Dou Kou* is also an astringent and stops chronic diarrhea (especially early morning diarrhea caused by Spleen and Kidney yang deficiencies). *Bai Dou Kou* regulates qi and relieves nausea and vomiting. It more commonly is used to dry dampness of the middle *jiao* and relieve abdominal fullness and poor appetite.

Rou Dou Kou (Semen Myristicae), *Bai Dou Kou* (Fructus Amomi Rotundus), and *Cao Dou Kou* (Semen Alpiniae Katsumadai) have similar pinyin names, but different functions. They should not be abbreviated as "*Dou Kou*," to avoid error and confusion.

- *Rou Dou Kou* binds the intestines and stops diarrhea.
- *Bai Dou Kou* regulates qi, dissolves dampness, and strengthens the Stomach.
- *Cao Dou Kou* warms the middle *jiao* and dries dampness.

Shi Liu Pi (Pericarpium Granati)

石榴皮

Pinyin Name: *Shi Liu Pi*
Alternate Chinese Names: *Shi Liu Ke, Suan Liu Pi, Suan Shi Liu Pi*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: granatum rind
Botanical Name: *Punica granatum* L. (*Shi Liu*)
Pharmaceutical Name: Pericarpium Granati
Properties: sour, astringent, warm
Channels Entered: Stomach, Large Intestine

CHINESE THERAPEUTIC ACTIONS

1. Binds the Intestines and Stops Diarrhea

Chronic diarrhea, dysentery, and rectal prolapse: Sour and astringent, *Shi Liu Pi* (Pericarpium Granati) enters the Large Intestine to bind and stop chronic watery diarrhea. It is commonly used to treat chronic diarrhea, dysentery, and rectal prolapse caused by either Spleen yang deficiency or damp-heat accumulation. *Shi Liu Pi* may be used individually or in combination with other herbs.

- Chronic diarrhea due to Spleen yang deficiency: combine *Shi Liu Pi* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Shen* (Radix Codonopsis) and *Fu Ling* (Poria).
- Chronic damp-heat dysentery: use this herb with *Huang Lian* (Rhizoma Coptidis) and *Huang Bai* (Cortex Phellodendri).
- Rectal prolapse: use it with *Ming Fan* (Alumen), and *Jin Ying Zi* (Fructus Rosae Laevigatae) as an external soak. In addition, apply *Wu Bei Zi* (Galla Chinensis) powder topically to the affected area.

2. Kills Parasites

Shi Liu Pi kills intestinal parasites and relieves pain.

- Tapeworms and roundworms with abdominal pain: use this herb with *Bing Lang* (Semen Arecae).
- Amoebic dysentery: use alone as decoction three times daily, for six days.

3. Stops Bleeding

Shi Liu Pi is used in powder form externally to stop bleeding caused by trauma. Internally, it is used in decoction to treat uterine bleeding and leukorrhea.

- Bleeding due to traumatic injuries: apply it topically as a powder.
- Uterine bleeding: combine this herb with charred *Di Yu* (Radix Sanguisorbae), charred *Jing Jie* (Herba Schizonepetae), *Da Ji* (Herba seu Radix Cirsii Japonici) and *Xiao Ji* (Herba Cirisii).

Shi Liu Pi is also used topically to treat psoriasis.

DOSAGE

3 to 10 grams in decoction. Use *Shi Liu Pi* externally as powder or as a wash.

CAUTIONS / CONTRAINDICATIONS

- *Shi Liu Pi* is contraindicated in the acute or beginning stages of diarrhea or dysentery. When using this herb to kill parasites, dietary fats and oils should be avoided, as they may interfere with absorption of the herb.

CHEMICAL COMPOSITION

Pelletierine, methyl-pelletierine, pseudo-pelletierine, dl-isopelletierine, methyl-dl-isopelletierine, isoquercitrin, inulin, mannitol, tannin, mallic acid, punicine, calcium oxalate.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *Shi Liu Pi* has an inhibitory effect against *Corynebacterium diphtheriae, Staphylococcus aureus, Bacillus dysenteriae*, and various pathogenic fungi and dermatophytes.[2]
- **Antiparasitic:** Decoction of *Shi Liu Pi* has demonstrated a marked antiparasitic effect against tapeworms.[3]

CLINICAL STUDIES AND RESEARCH

- **Burns:** In one study, 45 patients with first- and second-degree burns showed remarkable improvement and

Shí Liu Pí (Pericarpium Granati)

complete recovery after topical treatment with *Shi Liu Pi* solution. The treatment protocol was to cook 500 grams of the herb in water to yield 250 ml of solution. The herb residue was filtered out and the solution applied to the burned area topically.[4]

TOXICOLOGY

The alkaloids of *Shi Liu Pi*, approximately 25 times more toxic than the fresh herb, are responsible for most adverse reactions, such as dizziness, weakness, visual disturbances, tinnitus, tremor, nausea, vomiting, abdominal pain, and diarrhea. The side effects are relieved by discontinuation of the herb. In animal toxicology studies, respiratory suppression has been reported following gross overdose.[5]

AUTHORS' COMMENTS

According to Dr. Gan Zhu-Wang, *Shi Liu Pi*, *He Zi* (Fructus Chebulae) and *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) added to a base formula, treat incessant nasal discharge.

Chun Gen Pí (Cortex Ailanthi)

椿根皮　桩根皮

Pinyin Name: *Chun Gen Pi*
Alternate Chinese Names: *Chou Chun Pi*, *Chu Pi*, *Chu Bai Pi*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: ailanthus bark
Botanical Name: *Ailanthus altissima* (Mill.) Swingle (*Chou Chun*)
Pharmaceutical Name: Cortex Ailanthi
Properties: bitter, astringent, cold
Channels Entered: Large Intestine, Stomach, Liver

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Dries Dampness and Binds the Intestines

Dysentery or diarrhea: Bitter and cold, *Chun Gen Pi* (Cortex Ailanthi) enters the Large Intestine to clear heat and dry dampness. Because it is astringent, this herb also binds the intestines. It commonly treats chronic diarrhea or dysentery accompanying damp-heat accumulation in the Large Intestine. Use of *Chun Gen Pi* is most effective when diarrhea or dysentery is accompanied by blood or pus. It may be used individually or in combination, as decoction or enema.

- Chronic dysentery or diarrhea with pus and blood: use *Chun Gen Pi* alone as an enema, or use it with *Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri) and *Huang Qin* (Radix Scutellariae).
- Chronic diarrhea with deficiency and cold signs: combine this herb with *Bu Gu Zhi* (Fructus Psoraleae), *Wu Zhu Yu* (Fructus Evodiae), and *Rou Dou Kou* (Semen Myristicae).
- Toxic heat dysentery: add it to *Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri) and *Huang Qin* (Radix Scutellariae).

Chun Gen Pi (Cortex Ailanthi)

2. Stops Bleeding

Uterine bleeding, red or white leukorrhea: Astringent in nature, *Chun Gen Pi* treats various causes of bleeding, including uterine bleeding from yin deficiency, and vaginal discharge or bleeding caused by damp-heat accumulation.

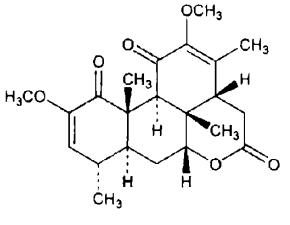
- Uterine bleeding: combine it with *Gui Ban* (Plastrum Testudinis), *Bai Shao* (Radix Paeoniae Alba), *Xiang Fu* (Rhizoma Cyperi) and *Huang Qin* (Radix Scutellariae).
- Vaginal bleeding due to damp-heat with red and white vaginal discharge: add it to *Huang Bai* (Cortex Phellodendri), *Zhi Zi* (Fructus Gardeniae), *Qian Shi* (Semen Euryales) and *Lian Zi* (Semen Nelumbinis).
- Postpartum rectal prolapse: use this herb with *Hua Jiao* (Pericarpium Zanthoxyli) as a wash.

3. Kills Parasites

Roundworms, fungus: *Chun Gen Pi* effectively treats intestinal parasites and fungus. It may be used individually or in combination with other herbs. However, individual use of *Chun Gen Pi* often requires a large dosage that may cause side effects such as nausea and vomiting. In order to keep the dosage at a useful level without side effects, other antiparasitic herbs should be added.

- Roundworms: use *Chun Gen Pi* alone, or combine it with *Shi Jun Zi* (Fructus Quisqualis) and *Guan Zhong* (Rhizoma Dryopteridis).
- Fungal infection with itching: use this herb externally with *Hua Jiao* (Pericarpium Zanthoxyli), *Ming Fan* (Alumen) and *Li Lu* (Radix et Rhizoma Veratri) as an external wash.

DOSAGE



3 to 5 grams for internal use. Externally, *Chun Gen Pi* is used in the form of a wash or ointment. The charred form more strongly functions to bind the intestines and relieve diarrhea.

CAUTIONS / CONTRAINDICATIONS

Chun Gen Pi is often used in smaller dosages and in combination with other antiparasitic herbs when treating roundworms, because large doses may cause nausea and vomiting.

CHEMICAL COMPOSITION

Quassin, ailanthone.[1,2]

Quassin

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** Quassin and ailanthone have demonstrated preliminary antineoplastic effects against nose and throat cancers.[3]

CLINICAL STUDIES AND RESEARCH

- **Hematochezia:** In one study, an herbal decoction effectively helped all of 46 patients with blood in the stool due to various causes. The herbal formula used 120 grams of *Chun Gen Pi* as the main ingredient, and the decoction was administered three times daily.[4]

SUPPLEMENT

- 椿根 / 桩根 *Chun Gen* (Radix Ailanthi) is the entire root used as the medicinal part of the plant, while *Chun Gen Pi* is the bark. *Chun Gen* is bitter and astringent, and enters the Stomach channel. It functions to dry dampness from the middle *jiao*, bind the intestines to relieve diarrhea, clear heat to reduce swelling and inflammation, and release the exterior to promote eruption of measles. Clinically, it treats chronic diarrhea, chronic dysentery, hematochezia, profuse menstrual discharge, and cancers of the rectum and cervix. It is contraindicated in cases of deficiency and cold of the Spleen and Stomach. The dosage for *Chun Gen* is 3 to 5 grams.

AUTHORS' COMMENTS

Chun Gen Pi and *Shi Liu Pi* (Pericarpium Granati) bind the intestines, stop diarrhea and kill parasites. Both herbs are used internally and externally.

- *Chun Gen Pi* is cold, and treats chronic damp-heat diarrhea, possibly including blood or mucus in the stools. Externally, *Chun Gen Pi* is used as a wash or paste to treat dermatological disorders.
- *Shi Liu Pi* is warm, and treats chronic diarrhea with rectal prolapse caused by Spleen qi or yang deficiency. It is also used externally as a soak or powder.

Shan Zhu Yu (Fructus Corni)

山茱萸 山茱萸

Pinyin Name: *Shan Zhu Yu*
Literal Name: "sour mountain herb," "wild date"
Alternate Chinese Names: *Zao Rou, Shan Yu Rou, Zao Pi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cornus, medicinal cornel fruit, asiatic cornelian cherry fruit, Japanese cornel dogwood fruit
Botanical Name: *Cornus officinalis* Sieb. et Zucc. (*Shan Zhu Yu*)
Pharmaceutical Name: Fructus Corni
Properties: sour, slightly warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Liver and Kidney

Liver and Kidney deficiencies: Lack of nourishment of Liver blood and Kidney *jing* (essence) leads to symptoms such as dizziness, vertigo, light-headedness, soreness and weakness of the lower back and knees, impotence and spermatorrhea. *Shan Zhu Yu* (Fructus Corni) tonifies Liver blood, Kidney *jing* and yang.

- Liver and Kidney yin deficiencies: combine *Shan Zhu Yu* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae), *Mu Dan Pi* (Cortex Moutan), *Ze Xie* (Rhizoma Alismatis) and *Fu Ling* (Poria). **Exemplar Formula:** *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).
- Tinnitus, blurred vision from Kidney yin deficiency: add it to *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae), *Gui Ban Jiao* (Gelatinum Plastrum Testudinis), *Lu Jiao Jiao* (Gelatinum Cornu Cervi) and *Gou Qi Zi* (Fructus Lycii).
- Impotence and spermatorrhea because of Kidney yang deficiency: combine this herb with *Bu Gu Zhi* (Fructus Psoraleae), *Suo Yang* (Herba Cynomorii), *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Yin Yang Huo* (Herba Epimedii).
- Back pain: use it with *Xu Duan* (Radix Dipsaci) and *Du Zhong* (Cortex Eucommiae).

2. Retains *Jing* (Essence) and Body Fluids

Excessive perspiration arising from deficiency: When there is a deficiency in *zheng* (upright) *qi*, perspiration occurs, as there is insufficient qi to close the pores. Also as seen in shock, devastated yang or collapse, qi becomes unable to control the pores, and excessive sweating and coldness occur.

- Excessive sweating: combine *Shan Zhu Yu* with *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Mai Men Dong* (Radix Ophiopogonis), *Huang Qi* (Radix Astragali), *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).
- Shock, drastic drop in blood pressure, and excessive perspiration: incorporate this herb with *Ren Shen* (Radix Ginseng) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).

Uterine bleeding

- Excessive uterine bleeding: combine *Shan Zhu Yu* with charred *Huang Bai* (Cortex Phellodendri), *E Jiao* (Colla Corii Asini) and charred *Ai Ye* (Folium Artemisiae Argyi).

Urinary incontinence or polyuria: Kidney yang deficiency is often a cause of an inability to retain urine.

- Frequent urination, polyuria (light in color with no dysuria): combine *Shan Zhu Yu* with *Sang Piao Xiao* (Ootheca Mantidis), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), *Fu Pen Zi* (Fructus Rubi), *Wu Yao* (Radix Linderae Strychnifolia), *Shu Di Huang* (Radix Rehmanniae Preparata), *Shan Yao* (Rhizoma Dioscoreae) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- Terminal dripping following urination: use this herb with *Fu Pen Zi* (Fructus Rubi), *Tu Si Zi* (Semen Cuscutae), *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Sha Yuan Zi* (Semen Astragali Complanati).

DOSAGE

6 to 12 grams. In severe cases, use up to 30 grams of *Shan Zhu Yu*. The unprocessed herb has a stronger binding function to treat spontaneous or night perspiration. The steamed form (with grain-based liquor) has a warmer and stronger tonic effect for the Liver and Kidney, and is commonly used to treat low back pain,

Shan Zhu Yu (Fructus Corni)

dizziness, vertigo, tinnitus, impotence, premature ejaculation, and incontinence.

CAUTIONS / CONTRAINDICATIONS

- Use of *Shan Zhu Yu* is contraindicated in cases of deficient Kidney fire, or in dysuria caused by heat in the lower *jiao*.

CHEMICAL COMPOSITION

Cornin, verbenalin, ursolic acid, morroniside, sweroside, loganin, tellmagrandin I, II; isoterchebin, gemin D, cornusin A, B; iron, aluminum, and magnesium.[1]

PHARMACOLOGICAL EFFECTS

- **Metabolic:** Administration of *Shan Zhu Yu* in mice prevents the sharp rise in plasma glucose levels associated with epinephrine or ingestion of a large dose of glucose. With long-term ingestion, there is an increase in glycogen storage in the liver but no significant change to the triglyceride or total cholesterol levels.[2]
- **Anti-inflammatory:** In one laboratory study with mice, 5 g/kg of *Shan Zhu Yu* demonstrated an anti-inflammatory effect similar to 50 mg/kg of aspirin, and both treatments significantly reduced swelling.[3]
- **Antibiotic:** *Shan Zhu Yu* has an inhibitory effect against *Staphylococcus aureus, Salmonella typhi, Bacillus dysenteriae* and some pathogenic fungi.[4]
- **Diuretic:** In anesthetized dogs, extract of *Shan Zhu Yu* induces diuresis and lowers blood pressure.[5]

HERB-DRUG INTERACTION

- **Diuretics:** *Shan Zhu Yu* has a diuretic effect. Though no instances of this potential interaction have been documented, concurrent use with diuretic drugs may lead to increased elimination of water and/or electrolytes.[6] [Note: Examples of diuretics include chlorothiazide, hydrochlorothiazide, furosemide (Lasix), bumetanide (Bumex), and torsemide (Demadex).]

TOXICOLOGY

Shan Zhu Yu has very low toxicity.[7]

Jin Ying Zi (Fructus Rosae Laevigatae)

金櫻子　金樱子

Pinyin Name: *Jin Ying Zi*
Literal Name: "golden cherry fruit," "golden-tassel seed," "golden-cherry seed"
Original Source: *Shu Ben Cao* (Materia Medica of Sichuan) by Han Bao-Sheng in 935-960 A.D.
English Name: rosa laevigata, golden tassel seed, cherokee rose fruit
Botanical Name: *Rosa laevigata* Michx.
Pharmaceutical Name: Fructus Rosae Laevigatae
Properties: sour, astringent, neutral
Channels Entered: Kidney, Urinary Bladder, Large Intestine

Jin Ying Zi (Fructus Rosae Laevigatae)

CHINESE THERAPEUTIC ACTIONS

1. Consolidates *Jing* (Essence) and Restrains Urine

Spermatorrhea, polyuria, profuse vaginal discharge: *Jin Ying Zi* (Fructus Rosae Laevigatae) treats various disorders characterized by leakage of body fluids from the lower *jiao*, such as frequent urination, urinary incontinence, spermatorrhea, profuse vaginal discharge, and other urinary disorders caused by Kidney deficiency. *Jin Ying Zi* may be used individually or in combination with other herbs.

- Urinary disorders: combine this herb with *Qian Shi* (Semen Euryales).
- Spermatorrhea or nocturnal emissions: use *Jin Ying Zi* alone.

2. Binds the Intestines and Stops Diarrhea

Chronic diarrhea: *Jin Ying Zi* treats chronic diarrhea or dysentery resulting from Spleen qi deficiency. It effectively helps prolapse of the rectum or uterus, or profuse uterine bleeding. It may be used individually or in combination with other herbs.

- Chronic diarrhea: combine *Jin Ying Zi* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Shen* (Radix Codonopsis), *Shan Yao* (Rhizoma Dioscoreae) and *Fu Ling* (Poria).

DOSAGE

6 to 18 grams in decoction.

CAUTIONS / CONTRAINDICATIONS

- *Jin Ying Zi* is contraindicated in cases of excess fire or exterior disorders.
- Potential side effects of *Jin Ying Zi* include constipation, abdominal pain, abdominal fullness and cough.[1]

CHEMICAL COMPOSITION

Saponins, limonene, citric acid, mallic acid, fructose, sucrose, tannin, resin, vitamin C.[2]

PHARMACOLOGICAL EFFECTS

- **Antihyperlipidemic:** In rabbits with artificially-induced atherosclerosis, daily administration of *Jin Ying Zi* for 2 to 3 weeks significantly reduced total cholesterol and β-lipoprotein, compared to the placebo group. A decrease in fat content in the heart and the liver was also observed.[3]
- **Antibiotic:** Decoction of *Jin Ying Zi* has an inhibitory effect against various influenza viruses. A 25% solution has a limiting influence on *Staphylococcus aureus*, *E. coli*, and *Pseudomonas aeruginosa*.[4]

CLINICAL STUDIES AND RESEARCH

- **Prolapsed uterus:** In one clinical study, 203 patients experiencing uterine prolapse were treated with a 76% rate of effectiveness using an herbal decoction. The decoction was prepared by soaking 3,000 grams of *Jin Ying Zi* in water for 24 hours, then cooking it slowly in water to yield 3,000 ml in the final decoction. Patients were instructed to take 60 ml of the decoction with warm water twice daily for 3 days, followed by 3 days of rest, and conclude with 3 more days of treatment. Out of 203 patients, the study reported complete recovery in 16 patients and improvement in 138 patients.[5]
- **Infantile diarrhea:** According to one report, 20 infants with diarrhea were treated with a decoction of *Jin Ying Zi* with complete recovery in 13 cases, improvement in 6 cases, and no response in 1 case. The herbal decoction was prepared by cooking 3,000 grams of the herb in 3,000 ml of water, to yield 1,500 ml of the final decoction. Patients were given the decoction three times daily on an empty stomach. The dosage was 10 ml for infants under 1 year of age, 15 ml for infants between 1 and 2 years of age, and 20 ml for those over 2 years of age.[6]

TOXICOLOGY

Subcutaneous injection of *Jin Ying Zi* in developing mice at the dosage of 500 to 1,100 mg/kg showed a decreased rate of weight gain, an increase in white blood cell counts, and a decrease in red blood cell counts. No abnormalities were observed in liver enzymes and blood examination, nor were abnormalities noted in biopsy of heart, liver, kidney, spleen, intestines, and adrenal cortex tissues.[7]

AUTHORS' COMMENTS

Jin Ying Zi and *He Zi* (Fructus Chebulae) are both astringents. *Jin Ying Zi* more strongly consolidates the *jing* (essence) whereas *He Zi* more effectively binds the intestines to stop diarrhea.

Jin Ying Zi and *Fu Pen Zi* (Fructus Rubi) both treat spermatorrhea and premature ejaculation. However, *Jin Ying Zi* also treats diarrhea and dysentery. *Fu Pen Zi* treats urinary incontinence and enuresis.

Sang Piao Xiao (Ootheca Mantidis)

桑螵蛸

Pinyin Name: *Sang Piao Xiao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: mantis, mantis egg case
Zoological Name: *Mantis religiosa* L. (*Bao Chi Tang Lang*); *Paratenodera sinensis* Saussure (*Da Dao Lang*); *Statilia maculata* Thunb. (*Xiao Dao Lang*); *Hierodula patellifera* Serville (*Ju Fu Tang Lang*)
Pharmaceutical Name: Ootheca Mantidis
Properties: sweet, salty, neutral
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

Tonifies Kidney Yang, Consolidates *Jing* (Essence) and Restrains Urine

Spermatorrhea, frequent urination, profuse vaginal discharge: *Sang Piao Xiao* (Ootheca Mantidis) treats Kidney yang deficiency manifesting as an inability to hold the *jing* in place. Symptoms of this deficiency include spermatorrhea, polyuria, frequent urination, profuse white vaginal discharge, dribbling urine, nocturnal emissions, frequent urination in pregnant women and enuresis in children. *Sang Piao Xiao* in powder form also treats insufficient urination or urinary blockage. *Sang Piao Xiao* exerts a dual effect to regulate the urinary bladder to retain urine, and to promote urination.

- Spermatorrhea and nocturnal emissions due to Heart and Kidney deficiencies: combine it with *Long Gu* (Os Draconis), *Gui Ban* (Plastrum Testudinis), *Fu Shen* (Poria Paradicis) and *Yuan Zhi* (Radix Polygalae). **Exemplar Formula:** *Sang Piao Xiao San* (Mantis Egg-Case Powder).
- Enuresis from Kidney yang deficiency: decoct *Sang Piao Xiao* 12g, *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) 9g, *Wu Yao* (Radix Linderae) 12g, *Fu Pen Zi* (Fructus Rubi) 12g, *Xu Duan* (Radix Dipsaci) 15g, *Yin Yang Huo* (Herba Epimedii) 12g, *Rou Gui* (Cortex Cinnamomi) 4g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 6g, *Suo Yang* (Herba Cynomorii) 12g, *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) 12g, *Shu Di Huang* (Radix Rehmanniae Preparata) 24g, and *Sang Ji Sheng* (Herba Taxilli) 30g.
- Frequent urination during pregnancy: use this herb alone as powder.
- Dysuria: use this herb alone as powder and serve with rice soup.
- Frequent urination and spermatorrhea caused by Kidney deficiency: use it with *Ren Shen* (Radix Ginseng), *Suan Zao Ren* (Semen Zizyphi Spinosae), *Lian Zi* (Semen Nelumbinis), *Shi Chang Pu* (Rhizoma Acori) and *Yuan Zhi* (Radix Polygalae).

Profuse vaginal discharge, impotence: *Sang Piao Xiao* tonifies Kidney yang and retains essence. Because it is neutral, it is often used with Kidney yang tonics.

- Profuse vaginal discharge or impotence caused by Kidney yang deficiency: add this herb to *Bu Gu Zhi* (Fructus Psoraleae), *Tu Si Zi* (Semen Cuscutae), *Sha Yuan Zi* (Semen Astragali Complanati), *She Chuang Zi* (Fructus Cnidii) and *Lu Jiao Shuang* (Cornu Cervi Degelatinatium).

DOSAGE

3 to 10 grams. Use of unprocessed *Sang Piao Xiao* is sometimes associated with diarrhea. The steamed form is warmer than the unprocessed one, and less likely to cause diarrhea.

CAUTIONS / CONTRAINDICATIONS

- Use of *Sang Piao Xiao* is contraindicated in patients with yin-deficient fire or cystitis with heat accumulation in the urinary bladder.

CHEMICAL COMPOSITION

Protein, amino acids, iron, calcium.[1]

CLINICAL STUDIES AND RESEARCH

- **Enuresis**: According to one report, 11 patients with bedwetting were treated one time per day with an herbal decoction containing *Sang Piao Xiao* and *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae), with marked improvement. The dosage was 47 grams of each herb for adults, and 31 grams of each herb for children between 5 and 12

Sang Piao Xiao (Ootheca Mantidis)

years of age.[2] In another study, 45 out of 50 patients experiencing bed-wetting showed complete recovery after treatment with an herbal decoction of *Sang Piao Xiao*, calcined *Mu Li* (Concha Ostreae), *Jiu Cai Zi* (Semen Allii Tuberosi) and other herbs.[3]

AUTHORS' COMMENTS

Sang Piao Xiao, Yi Zhi Ren (Fructus Alpiniae Oxyphyllae), *Fu Pen Zi* (Fructus Rubi), and *Wu Yao* (Radix Linderae) all cause appropriate retention of urine.

- *Sang Piao Xiao* consolidates *jing* (essence).
- *Yi Zhi Ren* more strongly tonifies the Spleen and Kidney.
- *Fu Pen Zi* more effectively tonifies the Liver and Kidney.
- *Wu Yao* warms the Kidney and Urinary Bladder to regulate the qi, and treat frequent urination.

Fu Pen Zi (Fructus Rubi)

覆盆子

Pinyin Name: *Fu Pen Zi*
Literal Name: "overturned bowl fruit"
Alternate Chinese Names: *Fu Pen*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: rubus, palm-leaf raspberry fruit
Botanical Name: *Rubus chingii* Hu. (*Fu Peng Zi*)
Pharmaceutical Name: Fructus Rubi
Properties: sweet, sour, slightly warm
Channels Entered: Kidney, Liver

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Kidney, Consolidates *Jing* (Essence) and Retains Urine

Spermatorrhea and polyuria due to Kidney deficiency: *Fu Pen Zi* (Fructus Rubi) treats Kidney deficiency with signs and symptoms such as spermatorrhea, premature ejaculation, nocturnal emissions and urinary frequency or enuresis. It may be used individually or in combination with other herbs.

- Spermatorrhea, nocturnal emissions, premature ejaculation, impotence: use *Fu Pen Zi* alone as powder, or with *Sha Yuan Zi* (Semen Astragali Complanati), *Shan Zhu Yu* (Fructus Corni) and *Qian Shi* (Semen Euryales).
- Urinary frequency or enuresis: combine this herb with *Sang Piao Xiao* (Ootheca Mantidis), *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) and *Jin Ying Zi* (Fructus Rosae Laevigatae).
- Diabetes insipidus with polyuria: add it to *Sang Piao Xiao* (Ootheca Mantidis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Shan Zhu Yu* (Fructus Corni), *Wu Yao* (Radix Linderae) and *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae).

2. Tonifies the Liver and Improves Vision

Impaired vision: *Fu Pen Zi* tonifies the Liver and Kidney, nourishes blood and *jing* (essence) to treat deterioration of visual acuity characterized by blurry vision, dizziness and diminished vision.

Fu Pen Zi (Fructus Rubi)

- Impaired vision: use this herb with *Gou Qi Zi* (Fructus Lycii), *Che Qian Zi* (Semen Plantaginis), *Tu Si Zi* (Semen Cuscutae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Sha Yuan Zi* (Semen Astragali Complanati), and *Ye Ming Sha* (Excrementum Vespertilionis Murini).

DOSAGE

3 to 10 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Fu Pen Zi* is not suitable for patients who have burning dysuria caused by damp-heat accumulation in the lower *jiao*.
- *Fu Pen Zi* should also be used with caution for Kidney yin deficient patients with heat.

CHEMICAL COMPOSITION

Rubusoside, fupenzic acid, ellagic acid, β-sitosterol.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Decoction of *Fu Pen Zi* has an inhibitory effect on *Staphylococcus aureus* and *Vibrio cholerae*.[2]
- **Hormonal:** *Fu Pen Zi* exerts estrogen-like activity on the vaginal mucosa of rats and rabbits.[3]

Hai Piao Xiao (Endoconcha Sepiae)

海螵蛸

Pinyin Name: *Hai Piao Xiao*
Alternate Chinese Names: *Wu Zei Gu*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cuttlebone, cuttlefish bone
Zoological Name: *Sepiella maindroni* de Rochebrune. (*Wu Zhen Wu Ce*); *Sepia esculenta* Hoyle. (*Jin Wu Ce*)
Pharmaceutical Name: Endoconcha Sepiae
Properties: salty, astringent, slightly warm
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Stops Bleeding

Hai Piao Xiao (Endoconcha Sepiae) most effectively treats bleeding from the lungs, stomach and uterus caused by qi deficiency with inability of Spleen to keep the blood circulating within the vessels. It is also used for trauma-related bleeding when applied topically. It may be used individually or in combination, internally or topically.

- Hematemesis: use *Hai Piao Xiao* with *Bai Ji* (Rhizoma Bletillae) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).
- Bleeding from the lungs or stomach: combine this substance with *Bai Ji* (Rhizoma Bletillae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Da Huang* (Radix et Rhizoma Rhei) and *Gan Cao* (Radix Glycyrrhizae).
- Uterine bleeding: add it to calcined *Long Gu* (Os Draconis), calcined *Mu Li* (Concha Ostreae), *Shan Zhu Yu* (Fructus Corni), *Huang Qi* (Radix Astragali), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Tu Si Zi* (Semen Cuscutae), *Qian Cao* (Radix Rubiae) and *Wu Bei Zi* (Galla Chinensis).

Hai Piao Xiao (Endoconcha Sepiae)

- External bleeding due to trauma: apply this substance topically with *San Qi* (Radix Notoginseng).
- Bleeding due to tooth extraction or nasal surgery: use *Hai Piao Xiao* powder topically to stop bleeding.

2. Consolidates *Jing* (Essence) and Stops Leukorrhea

Spermatorrhea and leukorrhea: *Hai Piao Xiao* treats leakage of Kidney *jing* caused by Kidney qi deficiency and inability to hold the *jing*.

- Spermatorrhea: use *Hai Piao Xiao* with *Shan Zhu Yu* (Fructus Corni), *Sha Yuan Zi* (Semen Astragali Complanati) and *Tu Si Zi* (Semen Cuscutae).
- Profuse red, white or clear vaginal discharge: use it with *Shan Yao* (Rhizoma Dioscoreae), *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).

3. Neutralizes Stomach Acid and Relieves Pain

Stomach pain with acid regurgitation: Burning stomach or epigastric pain, acid regurgitation, and distasteful belching are typical signs of patients suffering from gastritis, or gastric or duodenal ulcers. *Hai Piao Xiao* may be used individually or in combination with other herbs to neutralize acid to relieve pain.

- Stomach pain with acid regurgitation: use *Hai Piao Xiao* with *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).
- Stomach pain with bleeding: combine it with *Bai Ji* (Rhizoma Bletillae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).
- Bitter taste in the mouth: add it to *Huang Lian* (Rhizoma Coptidis) and *Wu Zhu Yu* (Fructus Evodiae). **Exemplar Formula:** *Zuo Jin Wan* (Left Metal Pill).
- Stomach pain due to stress: combine *Hai Piao Xiao* with *Xiao Yao San* (Rambling Powder).

4. Resolves Dampness and Promotes Healing

Chronic non-healing sores, ulcers or damp rashes: When applied topically, *Hai Piao Xiao* reduces secretions, generates growth of new skin and promotes healing.

- Eczema and dermatitis: use this substance with *Huang Bai* (Cortex Phellodendri), *Qing Dai* (Indigo Naturalis) and *Bing Pian* (Borneolum Syntheticum). Use as powder and apply topically.

DOSAGE

6 to 12 grams in decoction, 1.5 to 3 grams as powder.

CAUTIONS / CONTRAINDICATIONS

- *Hai Piao Xiao* should be used with caution in yin-deficient patients with heat or exterior conditions.

CHEMICAL COMPOSITION

Calcium carbonate, sodium chloride, calcium phosphate, magnesium chloride, chitin.[1]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** With a high content of calcium carbonate, *Hai Piao Xiao* is an effective antacid to neutralize gastric acid.[2]
- **Effect on healing of bone fractures:** Administration of *Hai Piao Xiao* was associated with shortened recovery time in rabbits with bone fractures.[3]

CLINICAL STUDIES AND RESEARCH

- **Ulceration of the skin:** Patients with skin ulcers were treated by topical application of *Hai Piao Xiao* powder, with excellent results. Out of 100 patients, the study reported complete recovery in 83 patients and moderate improvement in 11 patients, within 3 to 5 treatments. The treatment protocol was to sprinkle powdered *Hai Piao Xiao* onto the affected area, cover it with gauze, and change the dressing every 2 to 3 days.[4]
- **Upper gastrointestinal bleeding:** Equal portions of *Hai Piao Xiao* and *Da Huang* (Radix et Rhizoma Rhei) were ground into powder and placed into capsules with a net weight of 500 mg per capsule. The treatment protocol was to administer 4 to 6 capsules every 4 to 6 hours, with warm water. The treatment was effective in treating upper gastrointestinal bleeding in 49 out of 50 patients. The time required for hemostasis was 12 to 72 hours.[5]
- **Peptic ulcer:** In one study, 58 out of 62 patients with gastric or duodenal ulcers showed significant improvement when treated with 2 to 5 grams of an herbal formula, three times daily. The herbal formula contained 85% *Hai Piao Xiao* and 15% *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii). In another study, an herbal formula containing 10 parts *Hai Piao Xiao* and 1 part *Ban Xia* (Rhizoma Pinelliae), given in doses of 2 to 5 grams per dose, three times daily before meals, showed marked effectiveness in treating peptic ulcers.[6,7]

AUTHORS' COMMENTS

Hai Piao Xiao has been found to be an excellent source of calcium and collagen. High in calcium carbonate, it works well as an antacid, and exerts immediate effect.

Use of *Hai Piao Xiao* is sometimes associated with constipation. Adding a small amount of *Da Huang* (Radix et Rhizoma Rhei) alleviates this side effect.

Qian Shi (Semen Euryales)

芡實 芡实

Pinyin Name: *Qian Shi*
Literal Name: "gorgon fruit"
Alternate Chinese Names: *Ji Tou Shi, Ji Tou, Yan Tou, Ji Tou Mi*
English Name: euryale, euryale seed
Botanical Name: *Euryale ferox* Salisb.
Pharmaceutical Name: Semen Euryales
Properties: sweet, astringent, neutral
Channels Entered: Kidney, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Spleen and Dispels Dampness

Chronic diarrhea: *Qian Shi* (Semen Euryales) commonly treats chronic diarrhea caused by Spleen deficiency. Deficiency compromises the Spleen function of absorbing water into the body, and subsequently leads to flooding of water into the intestines, and thus to diarrhea. *Qian Shi* relieves diarrhea by tonifying the Spleen and drying intestinal dampness.

- Chronic diarrhea caused by Spleen deficiency: use *Qian Shi* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Shen* (Radix Codonopsis) and *Fu Ling* (Poria).

2. Tonifies the Kidney and Consolidates *Jing* (Essence)

Spermatorrhea, enuresis, profuse vaginal discharge: Loss of Kidney *jing* is due in part to deficient Kidney qi that has become unable to hold in the *jing*. Clinically, *Qian Shi* treats symptoms such as spermatorrhea, profuse vaginal discharge, and urinary incontinence.

- Spermatorrhea: combine *Qian Shi* with *Jin Ying Zi* (Fructus Rosae Laevigatae).
- Urinary incontinence: add this herb to *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Sang Piao Xiao* (Ootheca Mantidis).
- Profuse clear vaginal discharge: use it with *Jin Ying Zi* (Fructus Rosae Laevigatae) and *Shan Yao* (Rhizoma Dioscoreae).
- Profuse yellow foul-smelling vaginal discharge due to damp-heat accumulation: incorporate *Qian Shi* with *Huang Bai* (Cortex Phellodendri), *Ku Shen Gen* (Radix Sophorae Flavescentis) and *Che Qian Zi* (Semen Plantaginis).

DOSAGE

10 to 15 grams. The maximum dose of *Qian Shi* is 30 grams. Dry-fried, the herb functions better to tonify the Spleen to stop diarrhea, and warm the Kidney to prevent the loss of *jing* (essence).

CHEMICAL COMPOSITION

Starch, protein, lipid, carbohydrates, fiber, thiamine, riboflavine, nicotinic acid, carotene, tryptophan, cysteine, cystine, amylose, amylopectin.[1]

Qian Shi (Semen Euryales)

CLINICAL STUDIES AND RESEARCH

- **Proteinuria:** In one study, 73 patients with proteinuria due to glomerulonephritis were treated with an 89.1% rate of effectiveness. The treatment protocol was daily administration of an herbal formula as porridge for 10 days per course of treatment, for 2 to 4 courses total, with 2 days of intermission between each course. The herbal formula contained 30 grams of *Qian Shi*, 10 pieces of *Bai Guo* (Semen Ginkgo), and 30 grams of sticky rice.[2]

AUTHORS' COMMENTS

According to Dr. Zhu Lang-Chun, *Qian Shi*, *Jin Ying Zi* (Fructus Rosae Laevigatae), and *Yi Zhi Ren* (Fructus Alpiniae Oxyphyllae) have synergistic action to treat proteinuria.

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 988

Lian Zi (Semen Nelumbinis)

蓮子 莲子

Pinyin Name: *Lian Zi*
Literal Name: "lotus seed"
Alternate Chinese Names: *Lian Zi Rou, Ou Shi, Lian Rou, Lian Shi, Lian Ren*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: lotus seed
Botanical Name: *Nelumbo nucifera* Gaertn. (*Lian*)
Pharmaceutical Name: Semen Nelumbinis
Properties: sweet, astringent, neutral
Channels Entered: Heart, Kidney, Spleen

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Spleen and Stops Diarrhea

Chronic diarrhea: *Lian Zi* (Semen Nelumbinis) commonly treats chronic diarrhea caused by Spleen deficiency and inability to transport and transform water. In this instance, water accumulates in the Large Intestine, resulting in diarrhea. Other symptoms associated with Spleen deficiency include poor appetite, weight loss, sallow complexion, poor digestion and generalized weakness. *Lian Zi* treats the root cause and the symptom of diarrhea from Spleen deficiency by tonifying the organ and stopping leakage of body fluids.

- Chronic diarrhea: use *Lian Zi* with *Ren Shen* (Radix Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Shan Yao* (Rhizoma Dioscoreae). **Exemplar Formula:** *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder).

2. Tonifies the Kidney and Consolidates *Jing* (Essence)

Spermatorrhea, leukorrhea due to Kidney deficiency: *Lian Zi* treats Kidney deficiency characterized by premature ejaculation, spermatorrhea, or profuse, clear or white vaginal discharge. Not only does it tonify the Spleen and Kidney, it also has astringent action to stop leakage of body fluids.

- Premature ejaculation, spermatorrhea: use *Lian Zi* with *Sha Yuan Zi* (Semen Astragali Complanati), *Tu Si Zi* (Semen Cuscutae), *Lian Xu* (Stamen Nelumbinis) and *Lu Rong* (Cornu Cervi Pantotrichum).

Lian Zi (Semen Nelumbinis)

- Vaginal discharge: combine it with *Bai Guo* (Semen Ginkgo), *Qian Shi* (Semen Euryales), *Ji Guan Hua* (Flos Celosiae Cristatae) and *Jin Ying Zi* (Fructus Rosae Laevigatae).

3. Nourishes the Heart and Calms the *Shen* (Spirit)

Irritability, palpitations, insomnia: When there is a lack of nourishment of yin or blood to the *shen* of the Heart, symptoms of irritability, anxiety, dream-disturbed sleep or insomnia may occur.

- Irritability, anxiety, dream-disturbed sleep or insomnia: combine *Lian Zi* with *Mai Men Dong* (Radix Ophiopogonis), *Bai Zi Ren* (Semen Platycladi), *Fu Shen* (Poria Paradicis), *Yuan Zhi* (Radix Polygalae), *Zhen Zhu Mu* (Concha Margaritaferae) and *Suan Zao Ren* (Semen Zizyphi Spinosae).

DOSAGE

6 to 15 grams.

CAUTIONS / CONTRAINDICATIONS

- Use of *Lian Zi* is not suitable for patients with dry stools or constipation.

CHEMICAL COMPOSITION

Liensinine, raffinose, oxoushisunine, N-norarmepavine, calcium, phosphorus, iron, sodium, zinc, magnesium.[1,2]

PHARMACOLOGICAL EFFECTS

- **Antihypertensive:** In anesthetized cats, injection of a *Lian Zi* preparation at 1 to 2 mg/kg lowered blood pressure by up to 50% for 2 to 3 hours. The duration of action for the same product only lasted 30 minutes in dogs, and had no effect in rabbits.[3,4]

SUPPLEMENT

The lotus and its various parts are among the most versatile herbs in Chinese herbal medicine. Every part of the plant has separate and distinct properties. Overall, eight different parts of the lotus plant are used medicinally. A brief summary of all the parts is listed below for comparative purposes. [Note: Additional information on these herbs can be found in the individual monographs. *He Di* (Calyx Nelumbinis) and *He Geng* (Caulis Nelumbinis) are not frequently used, and do not have further description elsewhere.]

- 蓮子 / 莲子 *Lian Zi* (Semen Nelumbinis), sweet, astringent and neutral, tonifies the Spleen and Kidney to stop diarrhea, spermatorrhea, uterine bleeding and vaginal discharge. It also nourishes the Heart and calms the *shen* (spirit).
- 蓮子蕊 / 莲子蕊 *Lian Zi Xin* (Plumula Nelumbinis), bitter and cold, clears heat. It treats irritability, delirium and other heat signs associated with febrile disorders.
- 蓮鬚 / 莲须 *Lian Xu* (Stamen Nelumbinis), astringent and neutral, clears heat, consolidates *jing* (essence) and stops bleeding. It is often used to treat nocturnal emissions, spermatorrhea, frequent urination, enuresis, uterine bleeding, and hematemesis.
- 荷葉 / 荷叶 *He Ye* (Folium Nelumbinis), astringent, bitter and neutral, clears summer-heat, ascends clear yang, stops bleeding, and is used for disorders associated with heat stroke. It also treats diarrhea or bleeding from Spleen deficiency.
- 荷蒂 / 荷蒂 *He Di* (Calyx Nelumbinis), bitter and sweet, clears summer-heat, harmonizes the middle *jiao*, calms restless fetus and treats diarrhea or dysentery accompanied by blood and mucus.
- 荷梗 / 荷梗 *He Geng* (Caulis Nelumbinis), bitter and neutral, regulates chest qi and most effectively addresses feelings of chest congestion caused by dampness in the summer.
- 蓮房 / 莲房 *Lian Fang* (Receptaculum Nelumbinis), bitter, astringent and warm, enters the *xue* (blood) level and disperses blood stagnation, stops bleeding and treats uterine bleeding, or blood in the stool or urine. It also treats hemorrhoids, rectal prolapse and eczema.
- 藕節 / 藕节 *Ou Jie* (Nodus Nelumbinis Rhizomatis), sweet, astringent and neutral, disperses blood stagnation.

Lian Zi Xin (Plumula Nelumbinis)

蓮子蕊 莲子蕊

Pinyin Name: *Lian Zi Xin*
Literal Name: "lotus seed heart"
Alternate Chinese Names: *Lian Yi*
English Name: lotus embryo, lotus plumule
Botanical Name: *Nelumbo nucifera* Gaertn. (*Lian*)
Pharmaceutical Name: Plumula Nelumbinis
Properties: bitter, cold
Channels Entered: Heart, Pericardium

CHINESE THERAPEUTIC ACTIONS

1. Clears the Heart and Relieves Irritability

Bitter and cold, *Lian Zi Xin* (Plumula Nelumbinis) clears heat from the Heart and Pericardium. Mild cases of heat affecting the Heart are characterized by irritability. Severe cases of heat attacking the Heart and covering the Pericardium are characterized by irritability, fever and delirium.

- Irritability due to heat affecting the Heart: use *Lian Zi Xin* with *Dan Zhu Ye* (Herba Lophatheri), *Deng Xin Cao* (Medulla Junci) and *Zhi Zi* (Fructus Gardeniae).
- Irritability, fever, and delirium due to heat attacking the Heart and Pericardium: combine this herb with *Xuan Shen* (Radix Scrophulariae), *Mai Men Dong* (Radix Ophiopogonis) and *Zhu Ye* (Herba Phyllostachys).

2. Clears Heat from the Blood and Stops Bleeding

Lian Zi Xin clears heat, cools blood, and stops bleeding. It treats various bleeding disorders, such as hematemesis, epistaxis, and excessive menstrual bleeding, that are caused by heat in the blood.

- Bleeding due to heat in the blood: use with *Sheng Di Huang* (Radix Rehmanniae) and *Bai Mao Gen* (Rhizoma Imperatae) to cool blood and stop bleeding.

3. Treats Spermatorrhea due to Kidney Deficiency

Lian Zi Xin has an astringent action and treats spermatorrhea caused by Kidney deficiency.

- Spermatorrhea: use this herb with *Sang Piao Xiao* (Ootheca Mantidis), *Sha Yuan Zi* (Semen Astragali Complanati) and *Jin Ying Zi* (Fructus Rosae Laevigatae).

DOSAGE

1.5 to 3 grams. The maximum dosage for *Lian Zi Xin* is 10 grams.

CAUTIONS / CONTRAINDICATIONS

- *Lian Zi Xin* is contraindicated in patients with abdominal masses and constipation.

CHEMICAL COMPOSITION

Liensinine, isoliensinine, alkaloids.[1]

PHARMACOLOGICAL EFFECTS

- **Antihypertensive:** Liensinine lowers blood pressure by dilating peripheral blood vessels. It has a short duration of action.[2]

AUTHORS' COMMENTS

Eight parts of the lotus plant are used as medicines. Please refer to *Lian Zi* (Semen Nelumbinis) for complete description of the substances and their uses.

References

1. *Xian Dai Zhong Yao Yao Li Xue* (Contemporary Pharmacology of Chinese Herbs), 1997; 298
2. *Zhong Yao Xue* (Chinese Herbology), 1998; 897

Lian Xu (Stamen Nelumbinis)

蓮鬚 莲鬚

Pinyin Name: *Lian Xu*
Alternate Chinese Names: *Jin Ying Cao*
Original Source: *Ben Cao Pin Hui Jing Yao* (Essentials of Materia Medica) by Liu Wen-Tai in 1505
English Name: lotus stamen
Botanical Name: *Nelumbo nucifera* Gaertn. (*Lian*)
Pharmaceutical Name: Stamen Nelumbinis
Properties: sweet, astringent, neutral
Channels Entered: Heart, Kidney

CHINESE THERAPEUTIC ACTIONS

1. Consolidates the Kidney

Lian Xu (Stamen Nelumbinis) restrains the leakage of body fluids allowed by Kidney deficiency. Clinically, it treats spermatorrhea, nocturnal emissions, and frequent urination.

- Spermatorrhea or nocturnal emissions: use with *Sha Yuan Zi* (Semen Astragali Complanati), *Qian Shi* (Semen Euryales), *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae). **Exemplar Formula:** *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence).

2. Clears the Heart

Lian Xu clears the Heart and stops excessive dreaming at night.

3. Stops Bleeding

Lian Xu also treats bleeding disorders such as epistaxis, hematemesis, and profuse uterine bleeding.

DOSAGE

1.5 to 5.0 grams.

AUTHORS' COMMENTS

Eight parts of the lotus plant are used as medicines. Please refer to *Lian Zi* (Semen Nelumbinis) for complete description of the substances and their uses.

Fu Xiao Mai (Semen Tritici Aestivi Levis)

浮小麦 浮小麦

Pinyin Name: *Fu Xiao Mai*
Literal Name: "floating little wheat"
Alternate Chinese Names: *Fu Sui Mai, Fu Mai*
Original Source: *Ben Cao Meng Quan* (Hidden Aspects of the Materia Medica) by Chen Jia-Mo in 1565
English Name: wheat levis, light wheat, shriveled wheat
Botanical Name: *Triticum aestivum* L. (*Xiao Mai*)
Pharmaceutical Name: Semen Tritici Aestivi Levis
Properties: sweet, cool
Channels Entered: Heart

CHINESE THERAPEUTIC ACTIONS

Benefits Qi, Clears Heat and Stops Sweating

Spontaneous sweating: Sweet in taste, *Fu Xiao Mai* (Semen Tritici Aestivi Levis) tonifies Spleen and Lung qi, increases the ability of *wei* (defensive) *qi* to control the opening and closing of the skin pores, and stops spontaneous sweating. It is cool in thermal property to benefit Heart yin and dispel the heat that is causing the perspiration.

- Spontaneous sweating due to qi deficiency: combine *Fu Xiao Mai* with *Huang Qi* (Radix Astragali), *Ma Huang Gen* (Radix Ephedrae), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Mu Li* (Concha Ostreae). **Exemplar Formula:** *Mu Li San* (Oyster Shell Powder).

Night sweating: *Fu Xiao Mai* clears yin-deficient heat and stops night sweating. Other symptoms of yin-deficient heat include low-grade fever, steaming bones sensations and feelings of warmth in the palms and soles.

- Night sweating due to yin-deficient heat: use this herb with *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), *Di Gu Pi* (Cortex Lycii), and *Xuan Shen* (Radix Scrophulariae).

Steaming bones sensations: This type of sensation occurs when there is depletion of yin and qi. This herb tonifies qi, nurtures the body and treats steaming bones sensations and heat sensations caused by yin deficiency.

- Steaming bones sensations: combine *Fu Xiao Mai* with *Sheng Di Huang* (Radix Rehmanniae), *Mai Men Dong* (Radix Ophiopogonis), *Di Gu Pi* (Cortex Lycii) and *Xuan Shen* (Radix Scrophulariae).

DOSAGE

15 to 30 grams. *Fu Xiao Mai* is used in decoction or as powder.

CHEMICAL COMPOSITION

Starch, proteins, carbohydrates, lipids, fiber, enzymes, vitamins.[1]

AUTHORS' COMMENTS

Fu Xiao Mai (Semen Tritici Aestivi Levis) and *Xiao Mai* (Fructus Tritici) are derived from the same plant, but have different characteristics and functions. When *Fu Xiao Mai* and *Xiao Mai* are both placed in water, *Fu Xiao Mai* floats and *Xiao Mai* sinks. *Fu Xiao Mai* has astringent functions to stop sweating, while *Xiao Mai* can nourish the Heart and calm *shen* (spirit).

References

1. *Xian Dai Ben Cao Gang Mu* (Contemporary Materia Medica), 2000; 200

Ma Huang Gen (Radix Ephedrae)

麻黄根

Pinyin Name: *Ma Huang Gen*
Literal Name: "hemp yellow root," "ephedra root"
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: ephedra root
Botanical Name: *Ephedra sinica* Stapf. (*Cao Ma Huang*); *Ephedra equisetina* Bge. (*Mu Zei Ma Huang*); *Ephedra intermedia* Schrenk et Mey. (*Zhong Ma Huang*)
Pharmaceutical Name: Radix Ephedrae
Properties: sweet, neutral
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

Stops Perspiration

Ma Huang Gen (Radix Ephedrae) is an excellent herb to treat both spontaneous and night sweating caused by qi or yin deficiencies. However, *Ma Huang Gen* only treats the symptom of sweating, and does not address the cause.

- Spontaneous sweating: combine *Ma Huang Gen* with *Huang Qi* (Radix Astragali) and *Fu Xiao Mai* (Semen Tritici Aestivi Levis).
- Night sweating or postpartum sweating: use this herb with *Mu Li* (Concha Ostreae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Sheng Di Huang* (Radix Rehmanniae), *Shan Zhu Yu* (Fructus Corni), and *Long Gu* (Os Draconis).

DOSAGE

3 to 10 grams. *Ma Huang Gen* is also used as powder.

CAUTIONS / CONTRAINDICATIONS

- Use of *Ma Huang Gen* is contraindicated in exterior conditions, as the astringent function of *Ma Huang Gen* may keep the pathogenic factor trapped inside the body.

CHEMICAL COMPOSITION

Maokonine, tyrosine betaine, ephedradines A, B, C, D; mahuannins A, B, C, D; ephedrannin.[1]

PHARMACOLOGICAL EFFECTS

- **Cardiovascular:** In animal studies, maokonine increases blood pressure, ephedradine A decreases blood pressure, and extract of *Ma Huang Gen* decreases contractility of the heart.[2]
- **Smooth muscle stimulant:** *Ma Huang Gen* has a stimulating effect on the smooth muscles of the intestines and the uterus.[3]

AUTHORS' COMMENTS

Derived from different parts of the same plant, *Ma Huang* (Herba Ephedrae) and *Ma Huang Gen* (Radix Ephedrae) have completely different and opposite functions. *Ma Huang* is a diaphoretic and strongly induces perspiration. Use of *Ma Huang* is contraindicated in individuals with perspiration due to qi or yin deficiency. On the other hand, *Ma Huang Gen* stops spontaneous or night sweating. Use of *Ma Huang Gen* is contraindicated in patients who have exterior wind-heat or wind-cold conditions.

Chapter 18 summary

— Astringent Herbs

Name	Similarities	Differences
Wu Wei Zi (Fructus Schisandrae Chinensis)	Constrict the Lung to arrest coughing, bind the intestines to stop diarrhea	Stops loss of body fluids (sweating, diarrhea, sperm, urine), promotes generation of body fluids
Wu Mei (Fructus Mume)		Promotes generation of body fluids, kills parasites
Wu Bei Zi (Galla Chinensis)		Stops sweating and loss of sperm and urine
He Zi (Fructus Chebulae)		Benefits voice
Ying Su Ke (Pericarpium Papaveris)		Relieves pain
Ye Ying Pi (Pericarpium Prunus Pseudocerasus)		Relieves cough
Chi Shi Zhi (Halloysitum Rubrum)	Bind the intestines, stop diarrhea	Strongly binds the intestines, stops vaginal and uterine bleeding
Yu Yu Liang (Limonitum)		Stops uterine bleeding and leukorrhea
Rou Dou Kou (Semen Myristicae)		Warms the middle *jiao*, regulates qi circulation
Shi Liu Pi (Pericarpium Granati)		Stops bleeding, kills parasites, more effective for Spleen yang deficiency
Chun Gen Pi (Cortex Ailanthi)		Stops bleeding, kills parasites
Shan Zhu Yu (Fructus Corni)	Restrain leakage of fluids from the lower *jiao*	Tonifies Liver and Kidney yin
Jin Ying Zi (Fructus Rosae Laevigatae)		Binds the intestines, treats rectal and uterine prolapse
Sang Piao Xiao (Ootheca Mantidis)		Tonifies Kidney yang
Fu Pen Zi (Fructus Rubi)		Tonifies Kidney, improves vision
Hai Piao Xiao (Endoconcha Sepiae)		Stops bleeding, treats gastrointestinal disorders
Qian Shi (Semen Euryales)		Tonifies Spleen to stop diarrhea
Lian Zi (Semen Nelumbinis)		Tonifies Spleen to stop diarrhea, nourishes the Heart
Lian Zi Xin (Plumula Nelumbinis)		Clears the Heart, relieves irritability, clears heat from the blood, stops bleeding
Lian Xu (Stamen Nelumbinis)		Clears the Heart, stops bleeding
Fu Xiao Mai (Semen Tritici Aestivi Levis)	Stop sweating	Stops spontaneous and night perspiration
Ma Huang Gen (Radix Ephedrae)		Stops spontaneous and night perspiration

General Characteristics of Astringent Herbs:

Taste: sour, astringent
Thermal property: varies
Channels entered: Heart, Lung, Liver, Kidney, Large Intestine
Therapeutic actions: restrain the loss of qi and body fluids

Astringent herbs consolidate and minimize the loss of substances from the body. They are used mainly for deficiency patients with leakage of fluids seen as spontaneous sweating, night sweating, chronic diarrhea, chronic dysentery, rectal prolapse, spermatorrhea, premature ejaculation, enuresis, frequent urination, leukorrhea, uterine bleeding and chronic cough due to deficiency. Leakage of fluids occurs when deficiency causes the body to become unable to retain fluids within itself. Though astringent herbs restrain and prevent leakage, most of them do not have tonic functions to treat the root of the problem. Thus they are mainly used to treat the symptoms, not causes, of the disease. Therefore, most of the herbs in this category are combined with tonic herbs to achieve maximum results. In cases involving dampness, excess heat, or exterior pathogens, the strong restraining action of astringent herbs would be contraindicated.

Chapter 18 summary

Wu Wei Zi (Fructus Schisandrae Chinensis), ***Wu Mei*** (Fructus Mume), ***Wu Bei Zi*** (Galla Chinensis), ***He Zi*** (Fructus Chebulae), ***Ying Su Ke*** (Pericarpium Papaveris) and ***Ye Ying Pi*** (Pericarpium Prunus Pseudocerasus) all restrain the Lung to stop coughing, and bind the intestines to stop diarrhea. Clinical applications include chronic Lung deficiency cough, chronic diarrhea or dysentery.

Wu Wei Zi functions to stabilize and bind, nourish and moisten the Lung and Kidney. Clinically, it treats disorders of the Lung and Kidney, such as chronic cough, thirst with dry mouth, spontaneous sweating, night sweating, spermatorrhea, diarrhea, enuresis, polyuria, chronic diarrhea, and conditions characterized by deficiency of these two organs.

Wu Mei generates body fluids to relieve thirst, improve appetite and promote digestion. It is mostly used in patients with body fluid deficiency manifesting in thirst, poor appetite and decreased dietary intake. With its sour taste, *Wu Mei* also calms and expels parasites and relieves pain associated with an infestation. Finally, when this herb is used topically, it treats corns, warts, ulcers and sores.

Wu Bei Zi is sour, and has the strongest effect of this group to stabilize and bind. Cold in thermal property, it clears heat and purges fire. *Wu Bei Zi* is commonly used to treat deficiency of the Lung with heat, chronic cough with phlegm and streaks of blood, chronic diarrhea, rectal prolapse, or continuous dysentery. It is also used for profuse sweating, hematochezia, spermatorrhea, nocturnal emissions, profuse uterine bleeding, and nocturnal urination. When used topically, it treats various sores, carbuncles, furuncles, and skin lesions.

He Zi is sour, astringent, bitter and descending in nature. It clears the Lung and benefits the throat and vocal cords. It is most suitable for chronic cough with voice loss due to Lung deficiency. More specifically, the roasted form binds the intestines to stop diarrhea, while the unprocessed form restrains the Lung, redirects rebellious Lung qi downward and relieves coughing.

Ying Su Ke has a marked ability to stabilize and bind, and treats chronic chough from Lung deficiency, chronic diarrhea or dysentery. It has excellent analgesic functions and treats pain in the chest, abdomen, tendons and bones.

Ye Ying Pi is primarily used to relieve cough.

Chi Shi Zhi (Halloysitum Rubrum), ***Yu Yu Liang*** (Limonitum), ***Rou Dou Kou*** (Semen Myristicae), ***Shi Liu Pi*** (Pericarpium Granati), and ***Chun Gen Pi*** (Cortex Ailanthi) bind the intestines to stop chronic diarrhea and dysentery.

Chi Shi Zhi is sour, sweet and warm, with an effect to stabilize, bind and tonify. It is commonly used to tonify and regulate the middle *jiao* to treat chronic diarrhea, rectal prolapse, hematochezia, uterine bleeding or profuse leukorrhea caused by qi deficiency. *Chi Shi Zhi* also promotes generation of flesh, and therefore can also be used externally to treat non-healing ulcers.

Yu Yu Liang functions similarly to *Chi Shi Zhi* to bind the intestines, stop diarrhea and stop uterine bleeding and leukorrhea. They are often used together clinically for stronger synergistic effect. The main difference between the two herbs is that *Chi Shi Zhi* is warm, tonifies qi and regulates the middle *jiao*, while *Yu Yu Liang* is neutral and more effectively stops bleeding and leukorrhea.

Rou Dou Kou, acrid, aromatic and warm, acts as an astringent in the intestines to stop diarrhea, and regulates the middle *jiao* to awaken the Spleen and improve appetite. Clinical applications include bloating, abdominal pain, rectal prolapse, chronic diarrhea, and conditions characterized by deficiency and cold of the Spleen and Stomach.

Shi Liu Pi is astringent and warm to bind the intestines and stop diarrhea. It also stops bleeding in cases of uterine bleeding and bleeding from trauma. In addition, *Shi Liu Pi* kills parasites, particularly roundworms and pinworms.

Chun Gen Pi binds the intestines and clears damp-heat. It is effective for treating both diarrhea and dysentery. In addition, it stops uterine and vaginal bleeding.

Shan Zhu Yu (Fructus Corni), ***Jin Ying Zi*** (Fructus Rosae Laevigatae), ***Sang Piao Xiao*** (Ootheca Mantidis), ***Fu Pen Zi*** (Fructus Rubi), ***Hai Piao Xiao*** (Endoconcha Sepiae), and ***Qian Shi*** (Semen

Chapter 18 summary

Euryales) consolidate the Kidney, and retain *jing* (essence) and urine. They treat spermatorrhea, premature ejaculation and enuresis, dripping or polyuria from Kidney deficiency.

Shan Zhu Yu is sour and slightly warm. It tonifies the Liver and Kidney, and replenishes blood, *jing* and yang. Clinical applications include sweating, profuse menstrual discharge, spermatorrhea, polyuria, and uterine bleeding.

Jin Ying Zi is sour, with marked stabilizing and binding effects. It is most often used to retain urine and stop diarrhea.

Sang Piao Xiao is sweet, salty and neutral, with an effect to stabilize, bind and tonify. It treats spermatorrhea, leukorrhea, impotence, enuresis, polyuria, and other disorders of Kidney yang deficiency.

Fu Pen Zi is sweet, sour and slightly warm but not drying. It is best used to tonify the Kidney, consolidate *jing* and retain urine. Clinical applications include impotence, premature ejaculation, enuresis and frequent urination associated with Kidney yang deficiency. It can also be used to treat diminished or weakened vision due to *jing* and blood deficiencies.

Hai Piao Xiao stops bleeding and leukorrhea, neutralizes acid and helps the healing of weeping wounds or sores. It treats uterine bleeding, hematemesis, bleeding ulcers, and acid regurgitation with stomach pain.

Qian Shi is sweet, astringent and neutral. It tonifies the Spleen to relieve diarrhea, and consolidates the Kidney to stop spermatorrhea and leukorrhea.

Lian Zi (Semen Nelumbinis), ***Lian Zi Xin*** (Plumula Nelumbinis) and ***Lian Xu*** (Stamen Nelumbinis) are three astringent herbs from the same plant.

Lian Zi is sweet, astringent and neutral. It tonifies the Kidney to consolidates *jing* (essence), tonifies the Spleen to stop diarrhea, and nourishes the Heart to calm the *shen* (spirit). Clinical applications include insomnia, fear and fright, spermatorrhea, leukorrhea and chronic diarrhea from Spleen deficiency.

Lian Zi Xin clears heat from the Heart to relieve irritability, and cools blood to stop bleeding.

Lian Xu has similar, but weaker, effects to those of *Lian Zi Xin*.

Ma Huang Gen (Radix Ephedrae) and ***Fu Xiao Mai*** (Semen Tritici Aestivi Levis) both stop night or spontaneous perspiration.

Ma Huang Gen is mostly used to stop excessive perspiration due to weakness of *wei* (defensive) *qi*.

Fu Xiao Mai is sweet and cool, and stops spontaneous or night sweating. In addition, it clears deficiency heat in chronic cases and treats steaming bones sensations caused by yin deficiency. It also tonifies qi and benefits the Heart.

HERBS FROM OTHER FUNCTIONAL CATEGORIES WITH ASTRINGENT FUNCTIONS

Name	Functional Category
Bai Ji (Rhizoma Bletillae)	Stop-Bleeding Herbs (Chapter 11)
Da Huang (Radix et Rhizoma Rhei), charred	Downward Draining Herbs (Chapter 3)
Er Cha (Catechu)	Substances for Topical Application (Chapter 20)
Long Gu (Os Draconis)	*Shen*-Calming Herbs (Chapter 14)
Ming Fan (Alumen)	Substances for Topical Application (Chapter 20)
Mu Li (Concha Ostreae)	Liver-Calming and Wind-Extinguishing Herbs (Chapter 15)
Xian He Cao (Herba Agrimoniae)	Stop-Bleeding Herbs (Chapter 11)
Xue Jie (Sanguis Draconis)	Substances for Topical Application (Chapter 20)
Zi Zhu (Folium Callicarpae)	Stop-Bleeding Herbs (Chapter 11)

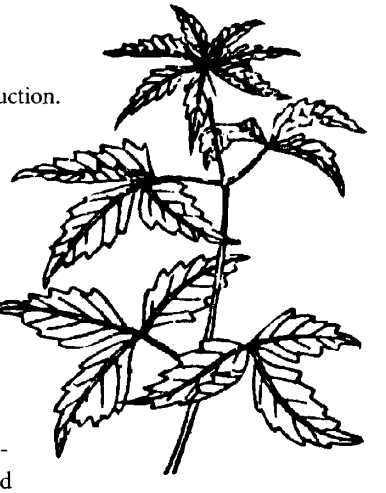
Li Lu (Radix et Rhizoma Veratri) 1030

Chapter 19

— Emetic Herbs



Definition: Emetic herbs provoke vomiting, causing the stomach to eject its contents, such as stagnant food, excess mucus, or toxins.

Vomiting is a treatment strategy reserved for cases of accidental poisoning, food stagnation, and phlegm obstruction. The function of emetic herbs is to remove, or assist the body in rejecting, pathogenic and/or obstructing elements, which allows the body to return to self-regulation when freed from the pathogens.

DIFFERENTIAL DIAGNOSIS AND TREATMENT

Emetic herbs are used for accidental poisoning, food stagnation, and phlegm obstruction.

- **Accidental poisonings** show different symptoms and signs depending on the substance ingested. Use of emetic herbs is justified within a short period of time following ingestion of a poisonous substance, while the injurious matter is still in the stomach and can be ejected by vomiting.
- **Food stagnation** is characterized by obstruction of the epigastrium by undigested food, that leads to fullness, distention and pain.
- **Phlegm obstruction** is identified by the presence of altered consciousness, mania, and/or seizures.

Chang Shan (Radix Dichroae)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

CAUTIONS/CONTRAINDICATIONS

Extremely toxic, irritating, and potent, emetic herbs must be used with extreme caution, according to appropriate guidelines, and only when necessary.

- Some emetic herbs are extremely toxic, irritating, and potent. Therefore, they must be used with extreme caution, according to appropriate guidelines, and only when necessary. The results of treatment are normally immediate, or observable within a short time. Initial doses should be small, and increased gradually if necessary. Once the desired effect is achieved, use of the herbs must be discontinued. To facilitate emesis, the patient should take the herbs with warm water, and physically induce vomiting by inserting a finger in his or her throat. If the patient does not respond to emetic herbs, or relief is not evident, he or she must immediately seek emergency medical treatment.
- Emetic herbs injure the ***Spleen*** and ***Stomach***, consuming ***qi*** and ***yin***. Therefore, even when indicated, they must be used with extreme caution, especially in patients who are very young or very old, those who are pregnant, postpartum, anemic, hypertensive, or suffer from heart disease or peptic ulcers.
- Following emesis, patients must be instructed not to resume eating solid foods immediately: the Spleen and Stomach energy may still be disordered, weak or vulnerable. Easily-digestible juices or liquid foods should be given until the patient is recovered sufficiently to re-introduce small amounts of readily-assimilable foods.
- Emetic substances should not be used to provoke vomiting if corrosive substances were ingested; this would only cause additional damage to the upper gastrointestinal tract when the corrosive elements are ejected as vomitus. Select other methods to neutralize or remove the toxic substances.

Chapter 19 — Emetic Herbs

PHARMACOLOGICAL EFFECTS

- **Emetic:** These herbs induce vomiting via direct stimulation of the gastrointestinal tract or the central nervous system.

POTENTIAL HERB-DRUG INTERACTIONS

- **Absorption**: Emetic herbs induce vomiting, and should not be given concurrently with other herbs or drugs. If taken together, the emetic effect of the herbs would cause ejection of other substances before they could be absorbed or implemented by the body.

Gua Di (Pedicellus Cucumeris)

瓜蒂 瓜蒂

Pinyin Name: *Gua Di*
Literal Name: "melon stalk"
Alternate Chinese Names: *Gua Ding, Ku Ding Xiang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: melon pedicle
Botanical Name: *Cucumis melo* L. (*Tian Gua*)
Pharmaceutical Name: Pedicellus Cucumeris
Properties: bitter, cold
Channels Entered: Stomach
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Induces Vomiting

Hot phlegm accumulation: *Gua Di* (Pedicellus Cucumeris) induces vomiting to eliminate accumulation of hot phlegm, a condition characterized by seizures, epilepsy, sore throat, wheezing, dyspnea, irritability, restlessness, and insomnia.

- Hot phlegm: use *Gua Di* with *Chi Xiao Dou* (Semen Phaseoli), and *Xiang Fu* (Rhizoma Cyperi).

Food retention: *Gua Di* induces vomiting to eliminate retention of food, a condition characterized by fullness and pain in the chest and epigastrium, nausea, and vomiting.

- Retention of food: use this herb individually.

2. Dispels Damp-Heat

Headache and jaundice: The powder of *Gua Di* can be blown into the nostrils to treat headache and jaundice caused by damp-heat. After intranasal administration, there will be yellow nasal discharge dripping from the nose, an indication of damp-heat being successfully eliminated from the body. Herbs should be discontinued once yellow fluids have dripped from the nose.

DOSAGE

2.5 to 5.0 grams in decoction, and 0.3 to 1.0 gram in powder form. The antiemetic effect of *Gua Di* may be enhanced with ingestion of rock sugar immediately following the herb.

CAUTIONS / CONTRAINDICATIONS

- Use of *Gua Di* is contraindicated in cases of deficiency, bleeding, or patients who do not have an excess condition.

OVERDOSAGE

Symptoms associated with overdose of *Gua Di* usually occur within 30 minutes after ingestion. Clinical presentation includes dizziness, lightheadedness, upper abdominal discomfort, burning sensations and pain in the stomach, nausea, vomiting, vomitus of food and bile, severe diarrhea, restlessness, thirst, cold extremities, and hypotension. Laboratory analysis may show elevated white blood cell counts, decreased platelet counts, and the presence of protein in the urine.

TREATMENT OF OVERDOSAGE

Adverse reactions characterized by nausea and vomiting can be treated with 5 ml juice of *Sheng Jiang* (Rhizoma Zingiberis Recens). An herbal decoction of 10 grams of *Ban Xia* (Rhizoma Pinelliae) and 6 grams of *Gan Cao* (Radix Glycyrrhizae) is also effective. Ingestion of 0.1 to 0.15 gram of *She Xiang* (Moschus) has also been used with good success to relieve continuous nausea and vomiting.

CHEMICAL COMPOSITION

Cucurbitacin B, cucurbitacin E, cucurbitacin D, isocucurbitacin B, cucurbitacin, β-2-O-β-D-pyranoglucoside.[1,2]

PHARMACOLOGICAL EFFECTS

- **Emetic:** Administration of *Gua Di* is associated with an emetic effect due to its stimulation of the central nervous system and the gastrointestinal tract.[3]
- **Hepatoprotective:** Preparations of *Gua Di* have been shown to have a hepatoprotective effective by minimizing damage to and enhancing the recovery of the liver.[4]

CLINICAL STUDIES AND RESEARCH

- **Hepatitis:** Administration of *Gua Di* via intranasal or oral routes have proven effective in treatment of acute and chronic hepatitis. In 103 cases of acute hepatitis, the treatment protocol was to soak 5 grams of *Gua Di* in 100 ml of water for 10 days, taking the solution in two equally-divided doses after meals. In 18 cases of chronic hepatitis without jaundice, *Gua Di* powder was administered into the nostrils.[5]

Gua Di (Pedicellus Cucumeris)

- **Liver cancer:** According to one report, 169 patients with liver cancer were treated with a preparation of *Gua Di* three times daily after meals, for three months per course of treatment. The study reported that there was marked improvement, such as relief of pain, decreased tumor size, and increased strength in the patients. No significant side effects were noted.[6]

TOXICOLOGY

The LD_{50} of a *Gua Di* preparation is 1.1 g/kg in laboratory studies. Autopsy showed various degrees of bleeding in internal organs.[7]

Chang Shan (Radix Dichroae)

常山

Pinyin Name: *Chang Shan*
Literal Name: "eternal mountain," "constant mountain"
Alternate Chinese Names: *Heng Shan, Ji Gu Chang Shan*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: dichroa root, anti-febrile dichroa root
Botanical Name: *Dichroa febrifuga* Lour. (*Huang Chang Shan*)
Pharmaceutical Name: Radix Dichroae
Properties: acrid, bitter, cold
Channels Entered: Lung, Heart, Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Expels Phlegm by Inducing Vomiting

Phlegm obstructing the chest and diaphragm prevents the proper flow of qi, manifesting as chest and epigastric fullness, distention and pain. *Chang Shan* (Radix Dichroae) strongly disperses stagnation, and enters the Heart and Lung channels to expand the chest by inducing vomiting. It may be used individually or in combination with other herbs.

- Phlegm obstruction in the chest: use *Chang Shan* with *Gan Cao* (Radix Glycyrrhizae) and honey.

2. Treats Malaria

Chang Shan is commonly used to treat various malarial disorders characterized by alternation of fever and chills.

- Malaria: soak *Chang Shan* in grain-based liquor and serve daily until symptoms subside. *Bing Lang* (Semen Arecae) is usually given concurrently to relieve vomiting.

DOSAGE

5 to 10 grams. The fresh herb is commonly used to induce vomiting. *Chang Shan* processed with grain-based liquor is commonly used to treat malaria.

CAUTIONS / CONTRAINDICATIONS

- *Chang Shan* has a strong emetic function and may injure qi. It should be prescribed with caution for those who are weak or experiencing deficiencies.

Chang Shan (Radix Dichroae)

CHEMICAL COMPOSITION

α-dichroine, β-dichroine, γ-dichroine, isofrifugine, febrifugine, dichroidine, 4-quinazolone, umbelliferone.[1]

PHARMACOLOGICAL EFFECTS

- **Antimalarial:** *Chang Shan* has demonstrated potent antimalarial action in various studies. In comparison with quinine, γ-dichroine is 150 times more potent, β-dichroine is 100 times more potent, and α-dichroine is equally as potent. The leaves are approximately five times more potent than the roots for treating malaria. Both water and alcohol extracts of *Chang Shan* are effective against *P. gallinaceum, P. lophurae, P. relictum,* and *P. cynomolgi.*[2]
- **Antiamebic:** β-dichroine has an inhibitory action *in vitro* against amoebae, with an effect 100% stronger than emetine hydrochloride. The minimum inhibitory concentration (MIC) for β-dichroine via oral ingestion is 1.0 mg/kg.[3]
- **Antipyretic:** Oral ingestion of *Chang Shan* decoction at 2 g/kg was effective in reducing body temperature in rabbits with artificially-induced fevers.[4] Comparatively, the antipyretic effect of *Chang Shan* is stronger than *Chai Hu* (Radix Bupleuri) and is similar to that of aspirin.[5]
- **Cardiovascular:** It has been proposed that α-, β-, and γ-dichroine all lower the blood pressure through inhibition of the cardiovascular system and dilation of the blood vessels. There is a positive correlation between dosage, therapeutic effect, and duration of action.[6]
- **Emetic:** α-, β-, and γ-dichroine have all demonstrated emetic effects in dogs, cats and pigeons. The effective dose in dogs and cats is 0.04 and 0.15 mg/kg, respectively.[7]

CLINICAL STUDIES AND RESEARCH

- **Malaria:** According to one report, 5,984 carriers of malaria were treated with two injections of *Chang Shan* with good results. All carriers were 10 years of age or under. The two injections were given 25 days apart.[8]
- **Arrhythmia:** In one clinical study, 35 patients with preventricular contractions were treated with an herbal decoction twice daily for 30 days with significant improvement in 12 patients and moderate improvement in 16 patients. The herbal formula contained 10 grams each of *Chang Shan, Bai Zi Ren* (Semen Platycladi), and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata), and 30 grams each of *Ku Shen Gen* (Radix Sophorae Flavescentis), *Dan Shen* (Radix Salviae Miltiorrhizae) and *Dang Shen* (Radix Codonopsis). All other herbal or pharmaceutical medicines were discontinued during the study.[9]

TOXICOLOGY

The LD_{50} for mice via oral ingestion is 570 mg/kg for α-dichroine, 6.57 mg/kg for β-dichroine, 6.45 mg/kg for γ-dichroine, and 7.79 mg/kg for total alkaloids.[10] Following oral administration, the most common adverse reactions in mice were vomiting, diarrhea, and blood in the stool.[11]

SUPPLEMENT

- 蜀漆 *Shu Qi* (Folium Dichroae), first cited in *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century, is the soft branches and leaves of the same plant as *Chang Shan. Chang Shan* and *Shu Qi* have similar tastes, channels, functions, indications and cautions. The only difference is that *Shu Qi* is more effective for treatment of malaria. The dosage for *Shu Qi* is 3 to 6 grams.

AUTHORS' COMMENTS

According to Dr. Zhang Xiao-Ping, pre-ventricular contraction (PVC) can be treated successfully with *Chang Shan, Ku Shen Gen* (Radix Sophorae Flavescentis), *Ban Xia* (Rhizoma Pinelliae) and *Zhi Gan Cao* (Radix Glycyrrhizae Preparata).

Li Lu (Radix et Rhizoma Veratri)

黎蘆　黎芦

Pinyin Name: *Li Lu*
Literal Name: "lack false hellebore," "vanity grass"
Alternate Chinese Names: *Shan Cong, Lu Cong*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: veratrum root and rhizome, false-hellebore rhizome and root
Botanical Name: *Veratrum nigrum* L. (*Hei Li Lu*)
Pharmaceutical Name: Radix et Rhizoma Veratri
Properties: acrid, bitter, cold
Channels Entered: Lung, Liver, Stomach
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Induces Vomiting

Profuse accumulation of phlegm, ingestion of a toxic substance: *Li Lu* (Radix et Rhizoma Veratri) induces vomiting to eliminate phlegm, poisons, and toxic substances in the stomach.

- Ingestion of a toxic substance: use *Li Lu* alone in powder form.

Li Lu also treats wind-stroke, epilepsy, seizures, and painful obstruction of the throat.

- Phlegm obstruction: use this herb with *Yu Jin* (Radix Curcumae) or *Tian Nan Xing* (Rhizoma Arisaematis).

2. Kills Parasites and Relieves Itching

Li Lu is effective against scabies, ringworm, lice, and fungus. Mix it with oil and apply topically. *Li Lu* is also used to kill mosquitoes, flies, maggots and larvae.

DOSAGE

0.3 to 0.9 gram in powder or pill form. *Li Lu* may be used internally with extreme caution. It is applied topically when mixed with oil.

CAUTIONS / CONTRAINDICATIONS

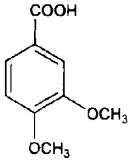
- Oral ingestion of *Li Lu* should be used with extreme caution, because of the potential side effects.
- *Li Lu* is contraindicated in cases of deficiency, blood loss, and pregnancy.
- *Li Lu* is incompatible with *Xi Xin* (Herba Asari), *Bai Shao* (Radix Paeoniae Alba), *Ren Shen* (Radix Ginseng), *Dang Shen* (Radix Codonopsis), *Sha Shen* (Radix Glehniae seu Adenophorae), and *Ku Shen Gen* (Radix Sophorae Flavescentis).

OVERDOSAGE

In a toxicology study in healthy volunteers, it was noted that 70 mg of *Li Lu* induced reactions such as numbness of the mouth, difficulty swallowing, diarrhea, and chest oppression. Other adverse reactions associated with *Li Lu* include nausea, vomiting, irregular heartbeat, hypotension, and respiratory depression.[1]

TREATMENT OF OVERDOSAGE

Continuous vomiting following overdose of *Li Lu* can be alleviated with a decoction of 3 grams of *Rou Gui* (Cortex Cinnamomi) or 5 ml of juice from *Sheng Jiang* (Rhizoma Zingiberis Recens).



In cases of systemic toxicity characterized by visual disturbance (yellow tint seen visually), an antidote formula should be used with such herbs as *Long Yan Rou* (Arillus Longan) 30g, *Gou Qi Zi* (Fructus Lycii) 15g, *Huang Qi* (Radix Astragali) 45g, *Yin Chen Hao* (Herba Artemisiae Scopariae) 20g, *Che Qian Zi* (Semen Plantaginis) 15g, and *Fu Pen Zi* (Fructus Rubi) 15g.

Another formula that has been used successfully for general detoxification includes *Jin Yin Hua* (Flos Lonicerae), *Gan Cao* (Radix Glycyrrhizae), *Hei Dou* (Semen Glycine Max), *Lu Dou* (Semen Phaseoli Radiati), *Chi Xiao Dou* (Semen Phaseoli) and honey.[2]

CHEMICAL COMPOSITION

Veratric acid, verazine, veramarine, protoveratrine A, germidine, veratroyl-zygadenine, rubijervine, isorubijervine, pseudojervine, jervine, veramine, verussurinine.[3,4,5]

Lí Lu (Radix et Rhizoma Veratri)

Veratric Acid

AUTHORS' COMMENTS

It is important to note that vomiting is both a desired effect and a side effect, depending on the context. When *Li Lu* is used to treat ingestion of a poisonous substance, vomiting is the desired effect. However, excessive or prolonged vomiting can cause dehydration and depletion of body fluids. Therefore, it is extremely important that this herb not be used unless the benefits outweigh the risks.

Chapter 19 summary

— Emetic Herbs

Name	Similarities	Differences
Gua Di (Pedicellus Cucumeris)	Induce vomiting	Treats jaundice and migraine headaches
Chang Shan (Radix Dichroae)		Treats malaria and arrhythmia
Li Lu (Radix et Rhizoma Veratri)		Kills parasites and relieves itching when used topically

General Characteristics of Emetic Herbs:

Taste: acrid, bitter
Thermal property: cold
Channels entered: Stomach
Therapeutic actions: induce vomiting
Safety index: toxic

Emetic herbs are quite potent and are used only in cases of excess, in particular to induce vomiting to treat ingestion of toxic substances, food stagnation, and phlegm accumulation in the chest or throat. Because these are toxic substances of varying degrees, inappropriate or careless treatment will injure the middle *jiao*, body fluids and qi. Thus, low dosages are employed, and gradually increased to achieve the desired effect. Emetic treatment should be discontinued immediately when the symptoms of excess are relieved.

Gua Di (Pedicellus Cucumeris), ***Chang Shan*** (Radix Dichroae) and ***Li Lu*** (Radix et Rhizoma Veratri) induce vomiting to treat food and phlegm accumulation, and ingestion of toxic substances. All three herbs are toxic, and must be used with extreme caution.

Chapter 20

— Substances for Topical Application

Definition: Herbs for topical application function to eliminate toxins, kill parasites, reduce swelling, relieve pain, treat ulcerations, drain pus and abscesses, promote generation of flesh, relieve itching, and stop bleeding.

Substances for topical application are generally reserved for external uses, to treat disorders affecting the external parts of the body. When necessary, these substances may be used to treat internal disorders, either by topical application or internal ingestion.

Topical herbs have a broad range of properties that allow for versatile application to a wide variety of imbalances. They help to resolve conditions affecting the skin and superficial layers, restoring the health and integrity of the skin, and/or penetrating beyond the surface to remove pathogens and restore internal balance.

- For ***external*** disorders, herbs are absorbed by skin, membranes, and local tissue in the affected area. External application is most effective for rashes, itching, eczema, carbuncles, furuncles, scabies, arthritis, burns, insect and animal bites, traumatic injuries, and other skin and soft tissue disorders. Herbs are also used topically to treat various ear, nose and throat disorders.
- For ***internal*** disorders, topically-applied herbs are absorbed through the skin into the blood and distributed throughout the body. Diseases that may be treated with topical application of herbs include asthma, malaria, jaundice, edema, and numerous pediatric and gynecological disorders.

Some substances in this chapter are no longer in use but are important to include here for academic and informational purposes. Their historical uses serve to provide reminders and possible templates for future refinements and research.

Dosage forms and routes of administration vary depending on both the medicinal substances and the diseases treated. Common dosage forms include creams, ointments, herbal pastes and plasters, powder, pills, pellets, capsules, tablets, solutions, and decoctions.

These substances are delivered to the affected area via various routes of administration, such as topical application (creams, ointments, pastes, plasters and powder), oral ingestion (pills, pellets, capsules, and tablets), local instillation (ear drops, eye drops), and others (solution as mouth gargle, decoction as herbal wash, steam for inhalation, etc). In short, there is a wide selection of dosage forms and routes of administration available to treat various external and internal disorders.

Mi Tuo Seng (Lithargyum)
Ben Cao Gang Mu (Materia Medica), by Li Shi-Zhen, 1578 A.D.

SUBCATEGORIES OF ACTION

Substances for topical application are derived from a wide variety of plant, animal and mineral sources. Though they are not divided into subcategories, they do have distinct characteristics. Some are cold, others are hot. Some potent herbs take immediate action, while milder ones exert sustained action. Some are toxic and should be reserved for topical use only. There are herbs that eliminate heat and toxins to treat sores and ulceration, and others that eliminate wind to relieve itching. Some drain pus and abscesses, while others directly promote healing of wounds.

Chapter 20 — Substances for Topical Application

DIFFERENTIAL DIAGNOSIS AND TREATMENT

As is true in internal medicine, differential diagnosis is essential for successful treatment with topical substances. One must clearly determine whether a disease is deficient or excess, cold or hot, primarily affecting the interior or exterior, and whether or not toxins are present. Optimal treatment requires precise identification of disease patterns and proper application of the appropriate herbal remedy. When necessary, to achieve maximum effectiveness, herbs from other functional categories are added.

Examples of dosage forms and applications to address two major distinguishing factors:

- ***Wet*** disorders, such as ulcerations with pus and abscesses, are treated with ***powdered*** herbs, to dry the affected area.
- ***Dry*** disorders, such as rashes and itching, are treated with herbal ***pastes*** to moisten the skin and facilitate recovery.

Arthritis and ***soft tissue injuries*** are treated with herbal ***plasters*** for continuous, sustained therapeutic effects.

Toxic herbs for external application should not be used internally, nor for prolonged periods of time, or at large dosages.

CAUTIONS/CONTRAINDICATIONS

- Many herbs for external application are toxic, and thus should not be used internally, nor for prolonged periods of time, or at large dosages.
- Toxic substances should not be applied over a large surface area or near sensory orifices, as there is an increased chance of local irritation or excessive systemic absorption. If adverse reactions are observed, immediate and appropriate treatment should be applied.
- Herbs should be used with caution if applied over a large surface area with damaged or broken skin, such as in cases of severe burns, because of the risk of overdose via topical absorption.

PROCESSING

Many substances in this chapter must be processed appropriately to insure safety for either external or internal uses, particularly to alleviate toxicity.

PHARMACOLOGICAL EFFECTS

A general rule of thumb to follow when using herbs topically is that herbs that are used orally can be use topically, but herbs that are used topically may or may not be used orally. Many herbs that are used orally (discussed in chapters 1 to 19) can also be used topically, and are listed below as examples. The pharmacological effects of substances for topical application are as follows:

- **Antibiotic:** Many substances for topical application kill bacteria, viruses, fungi, parasites, and dermatophytes.
- **Stimulant:** The action of stimulant topicals serves to reduce inflammation and swelling, and to relieve pain, such as *Bo He* (Herba Menthae) and *Zhang Nao* (Camphora). However, the stimulation may also cause irritation with redness, flushing and formation of blisters. Stimulant herbs that may be more irritating to the skin include *Ba Dou* (Fructus Crotonis), *Ya Dan Zi* (Fructus Bruceae) and *Ban Mao* (Mylabris).
- **Hemostatic:** Specific topical substances stop bleeding, including *Er Cha* (Catechu), *Wu Bei Zi* (Galla Chinensis), *Hu Zhang* (Rhizoma Polygoni Cuspidati), and *Di Yu* (Radix Sanguisorbae).
- **Astringent:** Binding and restraining topicals facilitate healing, minimize discharge and promote regeneration of tissues. Examples include *Er Cha* (Catechu), *Wu Bei Zi* (Galla Chinensis) and *Ming Fan* (Alumen).
- **Analgesic and anesthetic:** Pain-relieving topical herbs include *Wu Tou* (Radix Aconiti), *Ban Xia* (Rhizoma Pinelliae), *Tian Nan Xing* (Rhizoma Arisaematis), *Xi Xin* (Herba Asari) and *Bai Fu Zi* (Rhizoma Typhonii).
- **Moistening:** Some herbs, like *Hei Zhi Ma* (Semen Sesami Nigrum), are oil soluble. When applied topically, they form a protective barrier, moisten the skin and prevent dryness. Others, such as *Hua Shi* (Talcum), reduce swelling and inflammation when applied topically, by drawing water out of the affected area to the outside of the body.

Chapter 20 — Substances for Topical Application

POTENTIAL HERB-DRUG INTERACTIONS

There are no known or documented interactions between topical herbs and pharmaceutical medicines at the time of publication.

Note: Although many of the substances listed in this chapter can influence internal conditions, many are too toxic for internal use, thus are used via external application or not at all. Some are no longer in use but are important to include here for academic and informational purposes. The historical uses of these substances in traditional Chinese medicine serve to provide reminders and possible templates for future refinements and research.

Liu Huang (Sulfur)

硫黄

Pinyin Name: *Liu Huang*
Literal Name: "Sulfur yellow"
Alternate Chinese Names: *Shi Liu Huang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: sulfur
Pharmaceutical Name: Sulfur
Properties: sour, warm
Channels Entered: Kidney, Large Intestine
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Relieves Toxicity, Kills Parasites and Stops Itching

Dermatological disorders: Topical application of *Liu Huang* (Sulfur) acts to kill parasites and relieve itching. Clinical applications include eczema, scabies, ringworm, yin sores, damp sores, ulcers and carbuncles. *Liu Huang* may be used alone topically with sesame oil, or in combination with other herbs.

- Scabies, herpetic lesions, sores and fungal infections: use *Liu Huang* individually, topically.
- Scabies: combine this substance with *Xiong Huang* (Realgar) and lard.
- Rash on the scrotum: use it with *Qing Dai* (Indigo Naturalis).
- Diaper rash: combine it with *Xiong Huang* (Realgar), *Han Shui Shi* (Mirabilite), and *Zhang Nao* (Camphora).

2. Tonifies the Yang of the *Ming Men* (Life Gate)

Kidney yang deficiency or collapse: *Liu Huang* is taken internally to treat soreness, weakness and coldness of the lower limbs, enuresis, impotence, decreased libido, asthma and constipation.

- Impotence, weak and cold lower limbs: use *Liu Huang* with *Shu Di Huang* (Radix Rehmanniae Preparata), *Ba Ji Tian* (Radix Morindae Officinalis), *Yin Yang Huo* (Herba Epimedii), *Rou Gui* (Cortex Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Ren Shen* (Radix Ginseng).
- Asthma caused by Kidney yang deficiency and cold: use this substance with *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Chen Xiang* (Lignum Aquilariae Resinatum) and *Rou Gui* (Cortex Cinnamomi).

Constipation from deficiency and cold: *Liu Huang* revitalizes the intestines and promotes bowel movement.

- Constipation from cold and deficiency: use it with *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

DOSAGE

1 to 3 grams for internal use in pills or powder. *Liu Huang* is most often used topically as a powder, paste or ointment.

CAUTIONS / CONTRAINDICATIONS

- *Liu Huang* is toxic, and contraindicated in pregnancy and in cases of yin deficiency with heat signs.
- Large dosages and long-term use of *Liu Huang* should be avoided.

OVERDOSAGE

Adverse reaction to *Liu Huang* may occur as quickly as within a few minutes following exposure to the substance. The toxic dose for humans is 10 to 20 grams per dose, with warning signs such as poor appetite, decrease in spontaneous activities, abdominal distention, and difficulty breathing.

Mild overdose of *Liu Huang* is characterized by increased sensitivity to light, tearing, runny nose, burning sensations of the nose and throat, and visual disturbances.

Moderate overdose is characterized by headache, dizziness, lethargy, nausea, vomiting, dyspnea, cyanotic face, hepatomegaly, jaundice, impaired liver function and visual disturbances.

Severe overdose is characterized by headache, palpitations, delirium, anxiety, restlessness, convulsions, unconsciousness, and if untreated, respiratory depression and death.[1]

Liu Huang (Sulfur)

TREATMENT OF OVERDOSAGE

Treatment of overdose includes the following methods:

- An herbal decoction of 30 grams of *Hei Dou* (Semen Glycine Max) and 15 grams of *Gan Cao* (Radix Glycyrrhizae).
- Administration of 15 grams of *Lu Dou* (Semen Phaseoli Radiati), taken as powder with warm water.
- Administration of 30 grams of *Wu Mei* (Fructus Mume) and 15 grams of sugar with water.
- An herbal solution with 250 grams of *Lu Dou* (Semen Phaseoli Radiati) and 60 grams of *Gan Cao* (Radix Glycyrrhizae) taken as solution.[2]

CHEMICAL COMPOSITION

Sulfur. Other impurities may be present.[3]

PHARMACOLOGICAL EFFECTS

- **Gastrointestinal:** Oral administration of *Liu Huang* may stimulate the gastrointestinal tract, increase intestinal peristalsis, and promote bowel movement.[4]
- **Respiratory:** Oral administration of *Liu Huang* is associated with a marked antitussive effect in mice.[5]

TOXICOLOGY

The LD_{50} for oral administration of *Liu Huang* is 20 g/kg in mice.[6]

AUTHORS' COMMENTS

Arsenic is sometimes present in *Liu Huang* as an impurity. Processing *Liu Huang* with heat is considered to be a standard process to minimize toxicity and prevent arsenic poisoning.[7]

Xiong Huang (Realgar)

雄黄

Pinyin Name: *Xiong Huang*
Literal Name: "male yellow"
Alternate Chinese Names: *Ming Xiong Huang, Xiong Jing, Yao Huang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: realgar
Pharmaceutical Name: Realgar
Properties: acrid, bitter, warm
Channels Entered: Heart, Liver, Kidney
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Eliminates Toxins, Dries Dampness

Sores and ulcers: *Xiong Huang* (Realgar) is used to treat lesions characterized by swelling, abscess, and ulceration. It may be used internally or topically, individually or in combination with other herbs.

- Sores with redness, swelling, itching and pain: mix *Xiong Huang* with *Ming Fan* (Alumen) and apply the powder topically.
- Abscess and hard suppurative lesions: use this mineral with *She Xiang* (Moschus), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Toxic sores and swellings: drain the pus, then apply the powder topically.

Fungal infection: Topical application of *Xiong Huang* effectively treats fungal infections.

- Fungal infection: mix it with *Huang Lian* (Rhizoma Coptidis) and apply topically.

Xiong Huang (Realgar)

Insect or animal bites: *Xiong Huang* is used to treat insect and animal bites. Mild cases are treated by topical application only, while severe cases are treated both internally and topically.

- Insect and snake bites: use it with *Wu Ling Zhi* (Excrementum Trogopteri seu Pteromi) and grain-based liquor. The powder may be applied topically or taken internally.
- Rabies: combine this mineral with *Xi Xin* (Herba Asari), *Bi Ba* (Fructus Piperis Longi), and *She Xiang* (Moschus), in grain-based liquor.

Syphilitic chancres:

- Syphilitic chancres: mix *Xiong Huang* with *Xing Ren* (Semen Armeniacae Amarum), *Qing Fen* (Calomelas), and *Zhu Dan* (Fel Porcus) and apply topically.

2. Kills Parasites

Oral ingestion of *Xiong Huang* is effective in killing various parasites. It also treats abdominal pain caused by parasitic accumulation.

- Intestinal parasites with abdominal pain: use this substance with processed *Ba Dou* (Fructus Crotonis), *Ku Lian Pi* (Cortex Meliae), *Bing Lang* (Semen Arecae), and *Gan Qi* (Resina Toxicodendri).
- Cerebral cysticercosis: combine *Xiong Huang* with *Gan Qi* (Resina Toxicodendri), *Chuan Shan Jia* (Squama Manis), and *Lei Wan* (Omphalia).

3. Eliminates Phlegm, Treats Malaria and Settles Wind

Xiong Huang eliminates phlegm to treat disorders such as asthma, malaria, seizures and tetanus. It is commonly used internally within an herbal formula for synergistic action.

- Asthma: use it individually, three times daily, with warm water.
- Malaria: combine it with *Shan Ci Gu* (Pseudobulbus Cremastrae), *Zhu Sha* (Cinnabaris), and *Qian Jin Zi* (Semen Euphorbiae).
- Seizures, epilepsy and convulsions: use it with *Zhu Sha* (Cinnabaris).
- Tetanus: use *Xiong Huang* with *Fang Feng* (Radix Saposhnikoviae) and *Cao Wu* (Radix Aconiti Kusnezoffii), with warm grain-based liquor.

Xiong Huang has recently been used to treat cancer. It is usually combined with other herbs internally or applied externally, and used primarily for skin and cervical cancers.

DOSAGE

0.15 to 0.30 gram for internal use as pills.

CAUTIONS / CONTRAINDICATIONS

- *Xiong Huang* is contraindicated in cases of yin deficiency, blood deficiency, or pregnancy.
- *Xiong Huang* is toxic. Therefore, it is not suitable for long-term use or application over a large surface area.
- *Xiong Huang* should not be used in decoction or mixed with hot water. Exposure to heat produces As_2S_2, which is extremely toxic.

OVERDOSAGE

Acute overdose is characterized by severe vomiting and diarrhea. Chronic overdose is characterized by lack of appetite, fatigue, slow reactions, hair loss, blurred vision, dizziness, restlessness, irritability, numbness of the extremities, and leg pain.[1]

TREATMENT OF OVERDOSAGE

Mild cases of overdose may be treated with an herbal decoction containing *Gan Cao* (Radix Glycyrrhizae) and *Lu Dou* (Semen Phaseoli Radiati). Patients with severe overdose must be admitted to the hospital immediately.[2]

CHEMICAL COMPOSITION

Arsenic sulfide (AsS or As_2S_2).[3]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Xiong Huang* has an inhibitory effect against various pathogenic bacteria and dermatophytes.[4]

CLINICAL STUDIES AND RESEARCH

- **Malaria:** Chronic malaria in 29 patients was treated successfully using an herbal formula containing 0.3 gram of *Xiong Huang* and 2 grams of *Liu Yi San* (Six-to-One Powder). The powder was divided into two doses, with one taken 2 hours before the outbreak, and the other 4 to 6 hours later.[5]
- **Pinworm:** In one clinical study, 240 patients with pinworm infestations were treated with an herbal formula, with complete recovery in 203 patients. The herbal formula contained *Xiong Huang* 6g, *Shi Jun Zi* (Fructus Quisqualis) 6g, *Gan Cao* (Radix Glycyrrhizae) 3g, *Xing Ren* (Semen Armeniacae Amarum) 3g, *Yu Jin* (Radix Curcumae) 3g, and *Ba Dou* (Fructus Crotonis) 2g. All herbs were ground into fine powder, mixed with honey, and made into 48 pills. The treatment protocol was to administer 2 pills to infants between 6 months and 1 year of age; 4 pills to infants between 1 and 2 years of age; and 6 pills to children between 2 and 3 years of age. The patients were instructed to take one dose of herbs daily in the morning, on an empty stomach.[6]
- **Dysentery:** Ten patients with dysentery and discharge of mucus were treated with an herbal formula with good

Xiong Huang (Realgar)

results. The herbal formula contained *Xiong Huang*, *Da Huang* (Radix et Rhizoma Rhei), and *Huang Bai* (Cortex Phellodendri), in equal proportions. The patients were given 1.5 grams of the herbal formula in powder form, three times daily for 10 days.[7]

- **Pulmonary tuberculosis:** In one study, 6 of 9 patients with pulmonary tuberculosis responded well to treatment with a formula containing equal amounts of *Xiong Huang* and *Liu Huang* (Sulfur). The substances were ground into powder, mixed with bovine bile, and made into pills. The patients were instructed to take 0.3 gram of the pills, three times daily.[8]

Qing Fen (Calomelas)

輕粉　轻粉

Pinyin Name: *Qing Fen*
Literal Name: "light powder"
Alternate Chinese Names: *Xiao Fen, Ni Fen*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: calomel
Pharmaceutical Name: Calomelas
Properties: acrid, cold
Channels Entered: Liver, Kidney
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Eliminates Toxins

Ulceration, syphilis, dermatological disorders, rosacea, pimples: *Qing Fen* (Calomelas) is used to treat dermatological disorders characterized by toxins, such as ulcerations of the skin and flesh, discharge of pus, and infection. It dispels heat, eliminates toxins, and relieves itching. *Qing Fen* is dry, strong and extremely toxic. It is mostly used in powder form externally, for dermatological disorders caused by heat and toxicity.

- Ulcerations of the skin and flesh: combine *Qing Fen* with *Huang Bai* (Cortex Phellodendri), and calcined *Shi Gao* (Gypsum Fibrosum). All herbs are ground into fine powder, mixed with water or sesame oil, and applied topically.
- Skin sores: use it with *Huang Lian* (Rhizoma Coptidis) and *Zhu Dan* (Fel Porcus), topically.
- Rosacea and pimples: mix this mineral with *Da Huang* (Radix et Rhizoma Rhei), *Liu Huang* (Sulfur) powder, sesame oil, petroleum jelly, honey and cold water. Apply topically.
- Chancre: ingest *Qing Fen* with *Hu Tao Ren* (Semen Juglandis), *Huai Hua* (Flos Sophorae), *Da Zao* (Fructus Jujubae). This method is no longer recommended because of the toxicity of *Qing Fen*.

2. Kills Parasites

Topical application of *Qing Fen* effectively treats skin parasites and inhibits the growth of dermatophytes. Clinically, it treats scabies, fungal infection of the skin, and relieves itching.

- Scabies: use *Qing Fen* with *Xiong Huang* (Realgar) and *Da Feng Zi* (Semen Hydnocarpi) as powder, topically.
- General fungal infections: combine it with *Liu Huang* (Sulfur) and *Qian Dan* (Minium) topically.
- Fungal infection with severe itching: use this substance with *Lang Du* (Radix Euphorbiae Fischerianae), *Xi Xin*

Qing Fen (Calomelas)

(Herba Asari), and *Shui Yin* (Hydrargyum). The herbs are ground into fine powder, mixed with beeswax, and applied topically.

3. Promotes Normal Urination and Bowel Movement

Oral ingestion of *Qing Fen* unblocks the bladder and the bowels. It treats edema, urinary retention and constipation. It can be used with cathartic herbs to dispel internal stagnation.

- Mild edema with difficulties in urination and bowel movement: use *Qing Fen* individually.
- Moderate edema with difficulties in urination and bowel movement: add it to *Da Ji* (Radix Euphorbiae seu Knoxiae), *Yuan Hua* (Flos Genkwa) and *Qian Niu Zi* (Semen Pharbitidis).
- Severe edema with difficulties with urination and bowel movement: combine it with *Da Ji* (Radix Euphorbiae seu Knoxiae), *Yuan Hua* (Flos Genkwa), *Qian Niu Zi* (Semen Pharbitidis), *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Bing Lang* (Semen Arecae).
- Constipation: use it with *Da Zao* (Fructus Jujubae).

DOSAGE

Qing Fen is ground into fine powder for topical use. For oral use, the dosage is 0.06 to 0.15 gram [60 to 150 mg] and it should not be taken more than twice daily. Use of *Qing Fen* in decoction is contraindicated, as cooking increases its toxicity.

CAUTIONS / CONTRAINDICATIONS

- *Qing Fen* is extremely toxic, and if used internally must be prescribed with extreme caution. It is contraindicated during pregnancy and for those with deficient constitutions.
- *Qing Fen* may be used for edema associated with cardiovascular disorders. However, it is contraindicated in cases of edema or ascites caused by kidney or liver disease.
- *Qing Fen* should be used with caution for patients with hypersensitive skin, as instances of contact dermatitis have been reported.
- Because heat increases the toxicity of *Qing Fen*, this mineral must be handled with caution. When making a topical preparation, *Qing Fen* should be added at the very end, after the water or beeswax has cooled to room temperature. Mixing *Qing Fen* in a hot medium increases the risk of contact dermatitis.

OVERDOSAGE

Overdose of *Qing Fen* is characterized by erosive gastritis, a metallic taste in the mouth, redness and swelling of the oral cavity, thirst, nausea, vomiting, hematemesis, hematuria, decreased urinary volume, difficulty breathing, and in severe cases, necrosis of kidney tissue.

TREATMENT OF OVERDOSAGE

Overdose may be treated by ingestion of milk or egg whites to decrease absorption of the substance. It may also be treated by use of an herbal decoction of *Jin Yin Hua* (Flos Lonicerae), *Lu Dou* (Semen Phaseoli Radiati), *Gan Cao* (Radix Glycyrrhizae) and *Tu Fu Ling* (Rhizoma Smilacis Glabrae).

CHEMICAL COMPOSITION

Mercurous chloride (Hg_2Cl_2) 99.6%.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Qing Fen* has an inhibitory effect *in vitro* against various pathogenic bacteria and fungi.[2]
- **Gastrointestinal:** After oral ingestion, *Qing Fen* binds with bile in the intestines to become bivalent mercury ions. These ions interfere with the normal breakdown and digestion of food in the intestines, leading to increased elimination of electrolytes, water, and bile. Therefore, patients ingesting this substance commonly report diarrhea and green discoloration of the stool.[3]
- **Urinary:** Systemic absorption of bivalent mercury ions interferes with re-absorption of water in the kidney, leading to increased urination and diuresis.[4]

CLINICAL STUDIES AND RESEARCH

- **Body odor:** In one report, 100 patients with body odor were treated with topical application of *Qing Fen* and *Hua Shi* (Talcum) to the underarm, with satisfactory results.[5]

TOXICOLOGY

The LD_{50} for *Qing Fen* is 410 mg/kg in mice and 1,740 mg/kg in rats.[6]

Qian Dan (Minium)

鉛丹 铅丹

Pinyin Name: *Qian Dan*
Literal Name: "lead elixir," "lead pills"
Alternate Chinese Names: *Guang Dan, Huang Dan, Dong Dan*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: minium
Pharmaceutical Name: Minium
Properties: bitter, cool
Channels Entered: Heart, Liver
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. External Use

External application of *Qian Dan* (Minium) functions to eliminate toxins, dispel dampness, promote the generation of flesh and facilitate recovery of sores and ulcerations. Its clinical applications include treatment of sores, ulcerations, abscesses, eczema, body odor, and similar damp surface problems. *Qian Dan* is to be used topically for all the indications listed below:

- Sores with or without pus: mix 30 grams each of *Qian Dan* and *E Jiao* (Colla Corii Asini) and cook in water until these substances become liquid.
- Chronic ulceration with necrosis of local tissue: use this mineral with calcined *Shi Gao* (Gypsum Fibrosum), *Qing Fen* (Calomelas) and *Bing Pian* (Borneolum Syntheticum).
- Chronic non-healing ulcerations with pus and abscess: combine it with calcined *Shi Gao* (Gypsum Fibrosum), *Qing Fen* (Calomelas), *Long Gu* (Os Draconis), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- Body odor: use it with *Qing Fen* (Calomelas), *Huang Bai* (Cortex Phellodendri), *Huang Lian* (Rhizoma Coptidis) and *She Xiang* (Moschus).
- General itching and pain: add it to *Qing Fen* (Calomelas) and *Chuan Shan Jia* (Squama Manis).

2. Internal Use

Internal ingestion of *Qian Dan* effectively dispels phlegm to treat seizures and convulsions. Traditional formulas sometimes use *Qian Dan* to treat seizures, convulsions, epilepsy and delirium. However, internal ingestion should be avoided if possible, because of the toxicity of this substance.

- Seizure or epilepsy: *Qian Dan* has been used historically with *Chai Hu Jia Long Mu Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction).

Internal ingestion of *Qian Dan* has been used historically to eliminate toxins and kill parasites. It may be used individually or in combination with other herbs.

- Malaria: this substance was used with *Chang Shan* (Radix Dichroae), *Qing Hao* (Herba Artemisiae Annuae) and *Da Suan* (Bulbus Alli Sativi).

DOSAGE

0.3 to 0.6 gram for internal use. *Qian Dan* may be used as pills or powder.

CAUTIONS / CONTRAINDICATIONS

- Cold and toxic, *Qian Dan* is contraindicated in pregnant women, or in cases of nausea and vomiting characterized by cold in the body.
- *Qian Dan* is toxic when absorbed systemically. Therefore, long-term use or application over a large surface area of the body can be dangerous.
- Internal use of *Qian Dan* is frequently associated with toxicity. Therefore, it must be used only with extreme caution.
- Due to the toxicity of this substance, oral ingestion of *Qian Dan* is rarely recommended.

OVERDOSAGE

Oral ingestion of *Qian Dan* is toxic to the gastrointestinal tract, central nervous system, hematological, and cardiovascular systems of the body. Acute overdose of *Qian Dan* is characterized by dryness of the mouth and throat, thirst, burning sensations and pain in the upper esophagus, a metallic taste in the mouth, salivation, nausea, vomiting, severe abdominal pain, constipation or diarrhea, black tarry stools, and in severe cases, shock. Chronic overdose of *Qian Dan* is characterized by a lack of diagnostic symptoms in early stages, followed by neuritis, abdominal pain, anemia, disturbances of the central nervous system, joint pain, muscle spasms and cramps, muscle paralysis, dark-purplish discoloration of the gums, poor appetite, abdominal distention and pain, slight relief of pain by pressure, palpitations, shortness of breath, fatigue, enlargement of the liver, proteinuria and

Qian Dan (Minium)

irregular menstruation. Acute poisoning may occur following a bolus dose of 15 grams of *Qian Dan*, and chronic poisoning has been reported following daily ingestion of 2 mg of this mineral.[1]

TREATMENT OF OVERDOSAGE

Overdose of *Qian Dan* may be treated by one or more of the following methods:

- An herbal decoction with *Hai Zao* (Sargassum) and *Kun Bu* (Thallus Laminariae seu Eckloniae).
- An herbal decoction of *Jin Qian Cao* (Herba Lysimachiae), *Ju Hua* (Flos Chrysanthemi) and *Gan Cao* (Radix Glycyrrhizae).
- Ingestion of egg whites, milk, soy milk, or *Lu Dou* (Semen Phaseoli Radiati).[2]

CHEMICAL COMPOSITION

Lead oxide red (Pb_3O_4).[3]

Mi Tuo Seng (Lithargyum)

密陀僧

Pinyin Name: *Mi Tuo Seng*
Literal Name: "elusive reclusive monk"
Alternate Chinese Names: *Mo Duo Seng, Yin Chi, Jin Lu Di*
Original Source: *Lei Gong Pao Zhi Lun* (Grandfather Lei's Discussions of Herb Preparation) by Lei Xiao in 470 A.D.
English Name: litharge
Pharmaceutical Name: Lithargyum
Properties: salty, acrid, neutral
Channels Entered: Liver, Spleen
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Eliminates Toxins

Mi Tuo Seng (Lithargyrum) eliminates toxins and treats various dermatological conditions when used topically. It is often made into an ointment or paste for chronic ulcers and sores with suppuration. Clinical applications include scabies, ringworm, damp rashes, abscesses, suppurative inflammations, ulcerations, sores and other dermatological conditions. *Mi Tuo Seng* is to be used topically for all indications listed below:

- Chronic non-healing bedsores and ulceration: use *Mi Tuo Seng* with *Xiong Huang* (Realgar) and *Liu Huang* (Sulfur).
- Fungal infection: use this mineral individually.
- General dermatological disorders: grind 30 grams of *Mi Tuo Seng* and 3 grams of *Qing Fen* (Calomelas) into fine powder, mix with petroleum jelly, and apply to the affected area.
- Body odor or excessive perspiration: use it with *Qing Fen* (Calomelas), *Ming Fan* (Alumen) and *Bing Pian* (Borneolum Syntheticum) and apply to the affected area.

2. Kills Parasites

Mi Tuo Seng has only moderate strength in treating parasitic infections, and must be combined with other herbs for maximum effectiveness. Clinical applications include tinea versicolor, vitiligo, scabies and rosacea.

Mi Tuo Seng (Lithargyum)

DOSAGE

Mi Tuo Seng is primarily used topically. The maximum dose for oral ingestion is 0.3 to 1.0 gram daily.

CAUTIONS / CONTRAINDICATIONS

- Oral ingestion of *Mi Tuo Seng* is commonly associated with toxicity and overdose. Therefore, long-term use or large doses are strongly discouraged.

CHEMICAL COMPOSITION

Lead oxide (PbO).[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Mi Tuo Seng* has a mild inhibiting influence on some pathogenic fungi at 2% and 4% concentrations.[2]

CLINICAL STUDIES AND RESEARCH

- **Eczema:** In one study, 48 out of 50 patients showed complete recovery after treatment with an herbal formula containing 10 grams of *Mi Tuo Seng*, 5 grams of *Huang Bai* (Cortex Phellodendri), and 2.5 grams of *Bing Pian* (Borneolum Syntheticum). The herbs were ground into fine powder, mixed with an oil-based carrier, and applied topically.[3]
- **Tinea versicolor:** Treatment of 40 patients with tinea versicolor resulted in complete recovery within 1 or 2 treatments using topical application of *Mi Tuo Seng* and *Liu Huang* (Sulfur). The ingredients were ground into fine powder, mixed with 76% rubbing alcohol to make a paste, and applied topically to the affected area.[4]

Ming Fan (Alumen)

明礬　明矾

Pinyin Name: *Ming Fan*
Alternate Chinese Names: *Bai Fan*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: alum
Pharmaceutical Name: Alumen
Properties: sour, cold
Channels Entered: Lung, Liver, Spleen, Stomach, Large Intestine
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Eliminates Toxins, Kills Parasites, Dries Dampness and Stops Itching

Dermatological disorders: *Ming Fan* (Alumen) treats scabies, ringworm, rashes, oral sores, eczema, vaginal discharge, genital itching and itching lesions. *Ming Fan* also eliminates toxins to treat lung and breast abscesses, hemorrhoids, and other disorders due to toxic swellings.

- Vaginal discharge, genital itching, eczema: combine *Ming Fan* with *She Chuang Zi* (Fructus Cnidii) as an external soak or wash.
- Swelling without pus or suppuration: crush this mineral with *Cong Bai* (Bulbus Allii Fistulosi), and ingest with grain-based alcohol.

Ming Fan (Alumen)

2. Stops Bleeding, Relieves Diarrhea

Bleeding and diarrhea: *Ming Fan* has an astringent effect that stops the loss of body fluids, and stops bleeding and diarrhea. Clinical applications include hemoptysis, epistaxis, gastrointestinal bleeding, bleeding from traumatic injuries, diarrhea and dysentery.

- Epistaxis, hemoptysis, upper gastrointestinal bleeding: use *Ming Fan* with *Er Cha* (Catechu) internally or apply topically.
- Chronic diarrhea or dysentery: combine this substance with *He Zi* (Fructus Chebulae), *Liu Huang* (Sulfur), *Bai Tou Weng* (Radix Pulsatillae) and *Huang Lian* (Rhizoma Coptidis).

3. Clears Heat and Expels Phlegm

Wind-phlegm disorder: Irritability, mania, epilepsy, and vomiting of phlegm are common presentations of this condition.

- Wind-phlegm disorders: use *Ming Fan* with *Yu Jin* (Radix Curcumae), *Bo He* (Herba Menthae) and *Zao Jiao* (Fructus Gleditsiae).

4. Clears Damp-Heat

Jaundice: *Ming Fan* treats jaundice caused by damp-heat.

- Jaundice: use it with *Yin Chen Hao* (Herba Artemisiae Scopariae).

DOSAGE

Ming Fan is generally only used topically. The dosage for oral use is 1 to 3 grams, though oral ingestion is rarely used.

CAUTIONS / CONTRAINDICATIONS

- *Ming Fan* is usually used externally, and should be used only with extreme caution if administered internally.
- Use of *Ming Fan* is contraindicated for patients with Spleen and Stomach deficiencies, or those who do not have symptoms of damp-heat.

OVERDOSAGE

Oral use of *Ming Fan* is irritating, and may cause side effects such as nausea, vomiting, diarrhea, dehydration, and ulceration of the mouth, tongue and throat. Overdose may cause vomiting, diarrhea and shock. Therefore, *Ming Fan* is almost always used topically.[1]

CHEMICAL COMPOSITION

$KAl_2(SO_4)_2(OH)_6$.[2]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Ming Fan* has an inhibitory effect *in vitro* against *Bacillus proteus*, *Pseudomonas aeruginosa*, *Staphylococcus aureus*, and *Candida albicans*. It has an inhibitory effect on various gram-positive and gram-negative bacteria, including but not limited to *Staphylococcus aureus*, *Bacillus proteus*, *E. coli*, *Pseudomonas aeruginosa*, *Bacillus anthracis*, *Bacillus dysenteriae*, *Salmonella typhi*, β-hemolytic streptococcus, *Diplococcus* and *Streptococcus pneumoniae*.[3,4]

CLINICAL STUDIES AND RESEARCH

- **Infectious parotitis:** According to one report, 16 patients with parotitis were treated topically with a formulation, and reported complete recovery within three days. The paste was prepared by mixing *Ming Fan*, *Xiong Huang* (Realgar) and *Bing Pian* (Borneolum Syntheticum) with rubbing alcohol.[5]

TOXICOLOGY

Intramuscular injection of an 8% *Ming Fan* solution in rabbits and dogs caused severe irritation and necrosis of the local tissues. Oral administration of *Ming Fan* solution is associated with severe burning sensations, nausea, vomiting, diarrhea, and dehydration.[6]

Da Suan (Bulbus Alli Sativi)

大蒜 大蒜

Pinyin Name: *Da Suan*
Original Source: *Ming Yi Za Zhu* (Miscellaneous Records of Famous Physicians) by Tao Hong-Jing in 500 A.D.
English Name: garlic bulb, garlic
Botanical Name: *Allium sativum* L. (*Da Suan*)
Pharmaceutical Name: Bulbus Alli Sativi
Properties: acrid, warm
Channels Entered: Spleen, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Reduces Swelling, Relieves Toxicity

Dermatological disorders: *Da Suan* (Bulbus Alli Sativi) effectively addresses various disorders characterized by swelling and toxins. It is commonly used both internally and topically, individually or in combination with other herbs. Clinical applications include sores, swellings, carbuncles, tuberculosis, whooping cough, dysentery, diarrhea, and influenza.

- Rashes, itching and swelling of the skin: grind *Da Suan* with sesame oil and mix with salt into a paste, apply topically.
- Whooping cough: crush 30 grams of *Da Suan* into paste and soak it (in twice as much water as garlic) for 12 hours. Filter out the solution and mix it with a small portion of sugar. The final preparation is given three times daily for 10 to 15 days per course of treatment.
- Diarrhea or dysentery: use the fresh herb or its decoction one time each day for 6 days. It can also be used as an enema.
- Prevention of viral infection: take 5 to 10 grams of *Da Suan* with meals daily, or use a 10% *Da Suan* solution as nasal drops.
- Tuberculosis: use 30 grams each of *Da Suan*, *Geng Mi* (Semen Oryzae) with 3 grams of *Bai Ji* (Rhizoma Bletillae). The formula is prepared by removing and discarding the skin of *Da Suan* and cooking the herb in boiling water for 1 to 1.5 minutes. *Da Suan* is then removed, and *Geng Mi* added and cooked until the decoction becomes porridge. Add the already-cooked *Da Suan* back to the porridge with 3 grams of *Bai Ji* before ingestion. Take twice daily (morning and night) for 3 months.

2. Kills Parasites

It effectively prevents and treats intestinal parasitic infestations such as hookworm and pinworm.

- Intestinal parasitic infestation: use *Da Suan* with *Bing Lang* (Semen Arecae), *Ku Lian Pi* (Cortex Meliae), and *He Shi* (Fructus Carpesii).
- Prevention of hookworm: apply it topically to the extremities prior to entering agricultural fields.
- Pinworms: mix this herb with vegetable oil and apply topically around the anus.
- Vaginitis due to amoebae or trichomonas: apply *Da Suan* paste topically.
- Influenza, encephalitis, and other infectious diseases: Apply 10% *Da Suan* juice into the nostrils and take 5 to 10 grams of *Da Suan* with every meal.

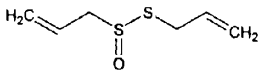
3. Relieves Food Poisoning

Decoction of *Da Suan* is beneficial in treating fish and crab poisoning. It is generally combined with *Zi Su Ye* (Folium Perillae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) to treat various types of food poisoning. *Da Suan* also helps to neutralize toxins and relieve pain caused by centipede bites.

DOSAGE

3 to 5 pieces. *Da Suan* is commonly used both internally and topically. It may be used as fresh herb, decoction, food supplement, or syrup. The juice may be used as a rectal enema. To enhance the effect of moxa, *Da Suan* is cut into thin slices and placed on the skin at the desired points before moxa is applied.

CAUTIONS / CONTRAINDICATIONS



- Acrid and warm, *Da Suan* is contraindicated in cases of yin-deficient heat.
- *Da Suan* is contraindicated in cases of excess heat affecting the eyes, throat, mouth, tongue and gums.

Da Suan (Bulbus Alli Sativi)

- Topical application of *Da Suan* is sometimes associated with redness, burning sensations, and blistering of the skin.
- Use of *Da Suan* as rectal enema is not recommended for pregnant women.

CHEMICAL COMPOSITION

Allicin, alliin, alliinase, diallyl disulfide, allistatin, glucominol, diallyl thiosulfonate.[1,2]

Allicin

PHARMACOLOGICAL EFFECTS

- **Antineoplastic:** Administration of *Da Suan* is associated with antineoplastic action against nose and throat cancer, leukemia, stomach cancer, liver cancer with ascites, and lymphatic cancer. Allicin and allitridin are two of the active components responsible for the antineoplastic effect.[3,4,5,6,7]
- **Cardiovascular:** Administration of *Da Suan* is associated with reduction of blood pressure, blood cholesterol levels, and atherosclerosis. In dogs, daily administration of *Da Suan* for 7 to 10 days lowered blood pressure by as much as 50 mmHg.[8] *Da Suan* also demonstrated marked effectiveness to lower plasma cholesterol and triglyceride levels in rabbits and decreased the risk of atherosclerosis.[9]
- **Antibiotic:** *Da Suan* has an antiviral effect against cytomegalovirus, and an antibiotic effect against *Candida albicans*, *Mycobacterium tuberculosis*, *Bacillus dysenteriae*, *Salmonella typhi*, *Vibrio cholerae*, and *Bacillus paratyphosus*.[10]
- **Hepatoprotective:** *Da Suan* has a protective effect against carbon tetrachloride-induced liver damage in rats.[11]
- **Antidiabetic:** Oral administration of *Da Suan* in mice is associated with a 17.9 to 26.2% drop in plasma glucose levels, two hours after the initial dose.[12]

CLINICAL STUDIES AND RESEARCH

- **Pneumonomoniliasis:** Two patients with pneumonomoniliasis resistant to antibiotics were treated with 20 ml of 10% *Da Suan* solution administered via oral inhalation, with good results.[13]
- **Hypercholesterolemia:** Oral administration of a *Da Suan* preparation (equivalent to 50 grams per day of the herb) was given to 274 patients for 30 days. The study reported an increase in HDL and a decrease in LDL.[14]
- **Nephritis:** Acute nephritis in 21 patients was treated with *Da Suan* and *Xi Gua* (Fructus Citrulli), with complete recovery in 14 patients, moderate improvement in 5 patients, and no response in 2 patients. The treatment protocol was to insert 250 grams of *Da Suan* through a small hole into watermelon and shave off the outer skin. The *Da Suan*-injected *Xi Gua* is to be steamed and ingested within one day; and the outer skin is to be cooked and ingested as tea.[15]
- **Alopecia areata:** Topical application of *Da Suan* and oral ingestion of *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) were effective for 856 patients with alopecia areata. The duration of treatment was between 17 and 46 days.[16]

HERB-DRUG INTERACTION

- **Antidiabetics:** Herbs that lower the plasma glucose levels, such as *Da Suan*, should be used cautiously with insulin, sulfonylureas, and other antidiabetic medications as the combination may have a synergistic effect, leading to hypoglycemia.[17] [Note: Examples of antidiabetic drugs include insulin, tolbutamide (Orinase), glipizide (Glucotrol), and glyburide (DiaBeta/Micronase).]
- **Antibiotic:** Fresh *Da Suan* and its constituent allicin reduced the minimum inhibitory concentration (MIC) of vancomycin for vancomycin-resistant enterococci.[18]

TOXICOLOGY

The LD_{50} for oral ingestion of allicin in rats is 265 mg/kg, and the LD_{50} for intravenous injection of essential oil of *Da Suan* in mice is 134 mg/kg.[19]

AUTHORS' COMMENTS

Da Suan is commonly taken as food. According to various contemporary studies, this herb is good for the cardiovascular system and also has certain cancer-fighting attributes. It can be taken daily to promote health, but excessive use is sometimes associated with eye deterioration.

Breath odor from ingesting *Da Suan* may be neutralized by chewing a small portion of tea leaves or a small slice of *Dang Gui* (Radicis Angelicae Sinensis).

Ban Mao (Mylabris)

斑蝥

Pinyin Name: *Ban Mao*
Alternate Chinese Names: *Hua Ban Mao*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: mylabris, blister beetle, large blister beetle, lesser blister beetle, telini fly
Zoological Name: *Mylabris phalerata* Pall. (*Da Ban Mao*); *Mylabris cichorii* L. (*Huang Hei Xiao Ban Mao*)
Pharmaceutical Name: Mylabris
Properties: acrid, cold
Channels Entered: Large Intestine, Small Intestine, Liver, Kidney
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Attacks Toxins and Dispels Sores

According to the doctrine of similarity, the toxic effect of *Ban Mao* (Mylabris) attacks toxins. Clinical applications include sores, carbuncles, furuncles, scrofula, psoriasis, toxic nodules and other conditions characterized by heat and toxins.

- Sores, carbuncles and furuncles: mix *Ban Mao* with garlic and apply topically. Other substances that can be used for the same purpose include *Xiong Huang* (Realgar), *Pi Shi* (Arsenolite) and *Peng Sha* (Borax).
- Psoriasis or fungal infection: mix it with *Gan Sui* (Radix Euphorbiae Kansui) and vinegar and apply several times daily.
- Scrofula: combine it with *Bo He* (Herba Menthae) and egg whites and take it internally.

2. Breaks Blood Stagnation to Disperse Nodules and Open Blood Circulation

Ban Mao treats palpable masses or nodules. It may also treat amenorrhea from blood stagnation.

- Liver or gastrointestinal cancer and tumors: use *Ban Mao* orally.
- Amenorrhea from blood stagnation: combine it with *Tao Ren* (Semen Persicae) and *Da Huang* (Radix et Rhizoma Rhei).

Ban Mao also helps to treat facial paralysis, *bi zheng* (painful obstruction syndrome), alopecia areata, and verruca wart.

DOSAGE

0.03 to 0.06 gram [30 to 60 mg] for oral use. The unprocessed form of *Ban Mao* is toxic and has a distinct

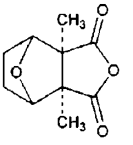
Ban Mao (Mylabris)

odor. Therefore, it must be dry-fried to reduce the toxicity and odor.

CAUTIONS / CONTRAINDICATIONS

- *Ban Mao* has a very strong stimulating and irritating effect on the skin and mucous membranes. Topical use may cause redness, burning sensations, irritation and death of the local tissues. Do not apply over a large surface area or over a long period of time.
- Use of *Ban Mao* is contraindicated in cases of general deficiency or in pregnancy.

OVERDOSAGE



Ban Mao is very toxic, even at small doses. Initial adverse reactions usually occur 10 minutes to 2 hours after ingestion, and are characterized by nausea, vomiting, salivation, and hematemesis. Severe adverse reactions usually occur 2 to 10 hours after ingestion, and are characterized by severe ulceration of the mouth, tongue and throat, anuria, oliguria, frequent urination, and proteinuria. Toxicity occurs following ingestion of 0.6 gram, and fatality has been reported following ingestion of 1.3 to 3.0 grams of *Ban Mao*. Cantharidin is nephrotoxic, and may be fatal at 30mg.[1]

TREATMENT OF OVERDOSAGE

Overdose of the agent should not be treated with emetic methods as *Ban Mao* is very irritating to the mucosa of the gastrointestinal system. Instead, herbs that coat the stomach and decrease the absorption of the offending agent should be used, such as 30g of *Chi Shi Zhi* (Halloysitum Rubrum) or 5 to 10 egg whites. Mild cases of overdose may be treated by an herbal decoction containing 30 grams of *Lu Dou* (Semen Phaseoli Radiati), 10 grams of *Gan Cao* (Radix Glycyrrhizae), and 3 grams of *Huang Lian* (Rhizoma Coptidis). An herbal decoction with 60 grams of *Lu Cha* (Folium Camellia Sinensis) can also be used to clear heat, promote urination and facilitate elimination of the toxin. Another effective formula includes 30 grams of *Gan Cao* (Radix Glycyrrhizae) and 15 grams of *Da Qing Ye* (Folium Isatidis). Adverse reaction associated with topical application of *Ban Mao* can be alleviated with topical application of *Huang Lian* (Rhizoma Coptidis) or *Bing Pian* (Borneolum Syntheticum). Lastly, patients with overdose of *Ban Mao* should avoid eating lipophilic foods, such as fat, meat and milk, as they will increase the absorption of the agent and increase toxicity.[2]

CHEMICAL COMPOSITION

Cantharidin, 1 to 1.2%.[3,4]

Cantharidin

PHARMACOLOGICAL EFFECTS

- **Immunologic:** It has been noted that a small dosage of cantharidin may increase white blood cell count and enhance immunity in some patients, while a large dosage may suppress the immune system.[5]
- **Antineoplastic:** Cantharidin has demonstrated an inhibitory effect on cancer cells in cases of hepatic carcinoma and sarcoma in mice.[6]

CLINICAL STUDIES AND RESEARCH

- **Liver cancer:** According to one report, 300 patients with liver cancer were treated with cantharidin and chemotherapy or radiation. The protocol for cantharidin was 0.25 to 0.5 mg three times daily. In addition to cantharidin, patients were encouraged to drink green tea on a daily basis. The study reported an overall rate of effectiveness of 65%, based on symptomatic evaluation and the size of the liver tumor.[7] In another study, 2 to 6 pills of a preparation (each pill contained 0.25 mg of cantharidin, *Bai Ji* (Rhizoma Bletillae), aluminum hydroxide, and others) were given to 800 patients with liver cancer three times daily, with 45 to 60% showing positive results. There were reduction of symptoms, decrease in tumor size, and 12.7% of the patients remained alive after 1 year.[8]
- **Facial paralysis:** Topical application of *Ban Mao* and *Ba Dou* (Fructus Crotonis) on acupuncture points was effective in treating patients with facial paralysis. Points selected were *Xiaguan* (ST 7), *Taiyang* (Extra), *Sibai* (ST 2), *Yingxiang* (LI 20), and others. Out of 38 cases, 30 reported complete recovery, 4 showed marked improvement, 2 showed mild improvement, and 2 showed no response.[9]

Chan Su (Venenum Bufonis)

蟾酥

Pinyin Name: *Chan Su*
Original Source: *Yao Xing Ben Cao* (Materia Medica of Medicinal Properties) by Zhen Quan in 600 A.D.
English Name: toad venum, cake of toad skin secretion, dried venom of toads, toad-cake
Zoological Name: *Bufo bufo gargarizans* Cantor (*Zhong Hua Da Chan Su*); *Bufo bufo melanostictus* Schneider (*Hei Kuang Chan Su*)
Pharmaceutical Name: Venenum Bufonis
Properties: acrid, sweet, warm
Channels Entered: Heart
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

1. Relieves Toxicity, Reduces Swelling

Chan Su (Venenum Bufonis), used topically or internally, treats various disorders characterized by heat, toxins and swelling. Clinical application of *Chan Su* includes sores, carbuncles, ulcers, sore throat, cancer, nodules and scrofula.

- Dermatological disorders characterized by heat and toxins: use *Chan Su* with *Xiong Huang* (Realgar), *She Xiang* (Moschus) and *Zhu Sha* (Cinnabaris).
- Extreme soreness and pain in the throat, scarlet fever, tonsillitis: combine it with *Niu Huang* (Calculus Bovis), *Xiong Huang* (Realgar), *She Xiang* (Moschus), and *Bing Pian* (Borneolum Syntheticum).
- Intestinal cancer: use this substance with *Bai Hua She She Cao* (Herba Oldenlandia), and *Ban Zhi Lian* (Herba Scutellariae Barbatae).
- Scrofula: add it to *Han Shui Shi* (Mirabilite) and *Ba Dou* (Fructus Crotonis).
- Liver cancer: combine it with *Long Kui* (Herba Solanum Nigrum), *Xia Ku Cao* (Spica Prunellae) and *Hu Zhang* (Rhizoma Polygoni Cuspidati).

2. Relieves Pain

Chan Su has a very strong analgesic effect. It is especially effective for toothache, regardless of the cause. It may be used as a topical anesthetic for minor surgery.

- Toothache: mix together *Chan Su* 30%, *Xiong Huang* (Realgar) 30%, *Gan Cao* (Radix Glycyrrhizae) 20% and *Peng Sha* (Borax) 20%. Grind the herbs into a fine powder and apply a small amount topically on the affected tooth.
- Local anesthetic for minor surgeries of the five sensory organs: mix *Chan Su* together with unprocessed *Chuan Wu* (Radix Aconiti Preparata), unprocessed *Cao Wu* (Radix Aconiti Kusnezoffii), unprocessed *Tian Nan Xing* (Rhizoma Arisaematis), unprocessed *Ban Xia* (Rhizoma Pinelliae) and warm grain-based liquor. Apply the herbs topically and begin surgery when anesthesia has been achieved. [Note: The combination of the unprocessed herbs listed above must be used topically only. Do not use these unprocessed herbs internally, as there is a high risk of toxicity.]

3. Opens the Orifices and Awakens the *Shen* (Spirit)

Chan Su treats patients with nausea, vomiting, and diarrhea in extreme cases of turbid summerheat. *Chan Su* may be used like smelling salts to awaken the patient in cases of loss of consciousness.

- Nausea, vomiting, and diarrhea in extreme cases of turbid summerheat: use *Chan Su* with *Cang Zhu* (Rhizoma Atractylodis), *She Xiang* (Moschus), *Ding Xiang* (Flos Caryophylli) and *Xiong Huang* (Realgar), and blow the powder into the patient's nostrils.

DOSAGE

0.015 to 0.030 gram [15 to 30 mg] for oral use. Because of the drastic and toxic effects of *Chan Su*, it must be used only at a small dose for a short period of time. It is also used externally as a powder or a paste. Frying it with grain-based liquor will facilitate the crushing and extraction of the active components.

CAUTIONS / CONTRAINDICATIONS

- *Chan Su* is toxic. It must be used with extreme caution, following precise instructions, when given via oral ingestion.
- It is contraindicated during pregnancy, as it induces contraction of the uterus.

OVERDOSAGE

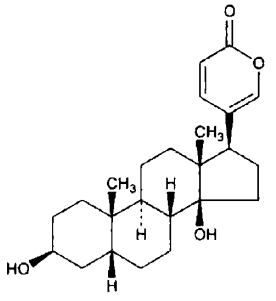
Adverse reaction to *Chan Su* is directly associated with overdose, and may occur within 0.5 to 2 hours after ingestion. Overdose is characterized by interference with the gastrointestinal system (severe and recurrent nausea, vomiting, abdominal pain, diarrhea, and possibly dehydration), cardiovascular system (chest congestion, palpitations, bradycardia, arrhythmia, a thin, thready pulse,

Chan Su (Venenum Bufonis)

cold extremities, hypotension and shock), and nervous system (dizziness, headache, numbness of the mouth and lips, numbness of the extremities, lethargy, perspiration, delayed response to stimulus, absence of patellar reflex, and possibly seizures and convulsions).[1]

TREATMENT OF OVERDOSAGE

Early stage overdose can be treated via emetic methods followed by ingestion of egg whites. Ingestion of a large amount of water or concentrated tea is also beneficial. If available, 120 grams of fresh *Lu Gen* (Rhizoma Phragmitis) can be ground into juice and given to the patient. A purgative method using 15 grams of *Da Huang* (Radix et Rhizoma Rhei) can also be employed to eliminate the offending agent from the digestive tract.



Mild systemic reaction can be treated by ingestion of *Sheng Jiang* (Rhizoma Zingiberis Recens) or *Gan Cao* (Radix Glycyrrhizae). Adverse reactions characterized by repeated nausea and vomiting, abdominal pain and diarrhea and slow pulse can be treated with *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi).

Direct physical contact of *Chan Su* with the eyes can cause extreme redness, swelling and pain. Such reactions can be alleviated by use of a saline wash or by rinsing with the juice of *Zi Cao Gen* (Radix Lithospermi).

Atropine has been used successfully to treat overdose of *Chan Su*, while epinephrine is ineffective.[1,2]

CHEMICAL COMPOSITION

Bufotoxins, bufogenins, cinobufalin, cinobufotalin, cinobufagin, cinobufatalin, telocinobufagin, gamabufotalin, gamabufogenin, resibufogenin, bufotalin, bufotanine, bufalin, bufotalinin, bufotalidin, bufotenine, bufotenidine.[3,4]

Bufalin

PHARMACOLOGICAL EFFECTS

- **Cardiotonic:** According to laboratory studies in anesthetized cats, dogs, rabbits and frogs, a small amount of *Chan Su* has been associated with marked inotropic effect while a larger dose is associated with an anesthetic effect. The cardiotonic effect is similar to that of digitalis, but is weaker, and has only a short active duration.[5]
- **Respiratory:** Cinobufalin, cinobufotalin, and numerous constituents of *Chan Su* have all demonstrated a stimulatory effect on the respiratory tract by increasing the respiration rate in anesthetized animals.[6] It was also noted that the stimulatory effect may counter the respiratory depression induced by morphine.[7]
- **Antineoplastic:** Administration of *Chan Su* is associated with an inhibitory effect on cancer cells in mice with liver cancer. The life expectancy of these mice is increased when they are treated with *Chan Su*.[8]

TOXICOLOGY

The LD_{50} for *Chan Su* in mice is 41.0 mg/kg via intravenous injection, 96.6 mg/kg via subcutaneous injection, and 26.81 mg/kg via intraperitoneal injection.[9]

AUTHORS' COMMENTS

Many research studies demonstrate successful use of *Chan Su* in treatment of various types of cancer, such as leukemia, lung, liver, and breast cancers.

Ma Qian Zi (Semen Strychni)

馬錢子 马钱子

Pinyin Name: *Ma Qian Zi*
Literal Name: "horse money seed"
Alternate Chinese Names: *Ma Qian*
Original Source: *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1578
English Name: nux vomica
Botanical Name: *Strychnos pierriana* A.W. Hill (*Yun Nan Ma Qian*); *Strychnos nux-vomica* L. (*Ma Qian*)
Pharmaceutical Name: Semen Strychni
Properties: bitter, cold
Channels Entered: Liver, Spleen
Safety Index: extremely toxic

CHINESE THERAPEUTIC ACTIONS

1. Reduces Swelling, Disperses Nodules

Abscesses, sores, carbuncles: Bitter and draining, *Ma Qian Zi* (Semen Strychni) eliminates toxins to reduce swelling and pain. It is commonly used externally to treat various dermatological disorders, such as abscesses, sores, and ulcerations. It is generally used via topical application, individually or in combination with other herbs.

- Soreness and inflammation of the throat: deep fry *Ma Qian Zi* in sesame oil, grind it into powder, and apply topically to the throat.
- Female genital lesions or ulcerations: soak *Ma Qian Zi* in water for several days, remove the skin, sun dry it, deep-fry in sesame oil, grind it into powder, and apply it topically.
- Sores with or without pus and abscesses: use this herb with *Chuan Shan Jia* (Squama Manis) and *Ru Xiang* (Gummi Olibanum).

2. Unblocks Channels and Collaterals and Relieves Pain

Various musculoskeletal disorders characterized by stagnation and pain: Clinical applications include muscle spasms and cramps, numbness, paralysis, and arthritic pain.

- Muscle aches and pains: use equal quantities of *Ma Qian Zi*, *Ma Huang* (Herba Ephedrae), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) and take with grain-based liquor every 3 hours as needed to relieve pain. The same combination can be used topically to reduce swelling and relieve pain.
- Chronic and severe *bi zheng* (painful obstruction syndrome) due to wind and dampness: use it with *Ma Huang* (Herba Ephedrae), *Ru Xiang* (Gummi Olibanum), *Quan Xie* (Scorpio), *Cang Zhu* (Rhizoma Atractylodis) and *Niu Xi* (Radix Cyathulae seu Achyranthis).
- Numbness and paralysis of the extremities: combine this herb with *Gan Cao* (Radix Glycyrrhizae).
- Facial paralysis, myasthenia gravis, atrophy and numbness of the extremities: add *Ma Qian Zi* to *Ren Shen* (Radix Ginseng), *Dang Gui* (Radicis Angelicae Sinensis), *Ru Xiang* (Gummi Olibanum) and *Chuan Shan Jia* (Squama Manis).

DOSAGE

0.3 to 0.6 gram for internal use. The unprocessed form is extremely toxic, and is contraindicated for internal use. *Ma Qian Zi* must be dry-fried to reduce toxicity and facilitate extraction of active components. The dry-fried herb is administered internally either in pills or powder. For external use, the powdered herb can either be sprayed onto the throat or applied topically with vinegar.

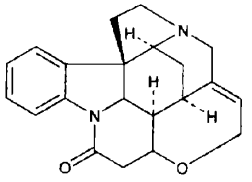
CAUTIONS / CONTRAINDICATIONS

- Use of unprocessed *Ma Qian Zi* orally is contraindicated.
- *Ma Qian Zi* is contraindicated in pregnancy, and in cases involving general deficiency.
- Long-term use of *Ma Qian Zi* or large dosages should be avoided because of toxicity.
- For internal use, *Ma Qian Zi* must be processed first by dry-frying or deep-frying in sesame oil to reduce toxicity.
- Topical application of *Ma Qian Zi* will lead to systemic absorption. Therefore, it should be used with extreme caution when applied over a large surface area or over mucous membranes.

OVERDOSAGE

Overdose of *Ma Qian Zi* is characterized by dry mouth, dizziness, numbness of the extremities, headache, palpitations, tonic-clonic convulsions, difficulty swallowing,

Ma Qian Zi (Semen Strychni)



and respiratory depression. Light and sound stimulation often intensify the toxic effects on the nervous system.[1]

TREATMENT OF OVERDOSAGE

In cases of overdose and overdose reactions, the patient should first be placed in a dark and quiet room to avoid light and sound stimulation. Mild cases of overdose can be relieved by decoction of 6 grams of *Rou Gui* (Cortex Cinnamomi), 60 grams of *Gan Cao* (Radix Glycyrrhizae), and 12 grams of *Wu Bei Zi* (Galla Chinensis). Severe cases of overdose characterized by muscle convulsions can be treated with an herbal decoction that contains 12 grams of *Tian Nan Xing* (Rhizoma Arisaematis), 12 grams of *Fang Feng* (Radix Saposhnikoviae), 12 grams of *Tian Ma* (Rhizoma Gastrodiae), 3 pieces of *Wu Gong* (Scolopendra), 15 grams of *Jiang Can* (Bombyx Batryticatus), 6 grams of *Quan Xie* (Scorpio), and 10 grams of *Gan Cao* (Radix Glycyrrhizae).[2]

CHEMICAL COMPOSITION

Strychnine, brucine, isobrucine, α-colubrine, β-colubrine, pseudostrychnine, strychnine N-oxide, brucine N-oxide, novacine, icajine, vomicine, protostrychnine, 15-hydroxystrychnine, loganin, chlorogenic acid.[3,4]

Strychnine

PHARMACOLOGICAL EFFECTS

- **CNS stimulant:** Strychnine has a strong stimulating effect on the central nervous system. The effect is characterized by an increase in spinal reflexes and sensory centers of the cerebral cortex.[5]
- **Respiratory:** Oral administration of isobrucine at 50 mg/kg has demonstrated marked antitussive and expectorant, and mild antiasthmatic effects. The expectorant effect was similar to that of ammonium chloride.[6]
- **Gastrointestinal:** *Ma Qian Zi* has a stimulating effect on the gastrointestinal system to increase secretion of gastric acid and improve appetite. It has no effect on the smooth muscle of the intestines.[7]

CLINICAL STUDIES AND RESEARCH

- **Myasthenia gravis:** In one study, 8 patients with myasthenia gravis were treated with *Ma Qian Zi*, with complete recovery in 4 patients, improvement in 1 patient, and no response from 3 patients. The treatment protocol was to initiate treatment with 0.2 gram of the herb in a capsule three times daily after meals, with warm water. The dosage was increased gradually by adding one more capsule every 2 to 4 days, until a maximum of 7 capsules per day was reached. Patients who experienced muscle spasms and twitching during the dosage titration period required reduction of dosage or discontinuation of herbs. Other herbs were given for supportive treatment if deemed necessary.[8]
- **Facial paralysis:** According to one report, 52 patients within 6 to 21 days of onset of facial paralysis were treated with 100% effectiveness within 1 or 2 treatments. The treatment protocol was to soak the herb in water for 24 hours, cut the herb into 0.1 cm slices, and apply it topically to the affected area. The old herb slice was removed and a new one applied every 7 days.[9]
- **Wind-cold-damp *bi zheng* (painful obstruction syndrome):** Chronic *bi zheng* refractory to other therapies in 16 patients was treated with an herbal formula with great success within 1 or 2 doses. The treatment protocol was to grind 30 grams of processed *Ma Qian Zi*, and 60 grams of *Xue Jie* (Sanguis Draconis) into powder and administer 1.5 grams twice daily. *Ma Qian Zi* is deep fried until it is golden yellow in color.[10]

TOXICOLOGY

The LD_{50} for oral administration of strychnine and isobrucine in mice is 3.27 and 233 mg/kg, respectively. The LD_{50} for intravenous administration of isobrucine in dogs is 8 mg/kg. In humans, oral ingestion of strychnine may cause poisoning at 5 to 10 mg, and fatality at 30 mg.[11]

She Chuang Zi (Fructus Cnidii)

蛇床子

Pinyin Name: *She Chuang Zi*
Literal Name: "snake's bed seeds"
Alternate Chinese Names: *She Chuang Shi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: cnidium fruit, common cnidium fruit
Botanical Name: *Cnidium monnieri* (L.) Cusson (*She Chuan*)
Pharmaceutical Name: Fructus Cnidii
Properties: acrid, bitter, warm
Channels Entered: Kidney

CHINESE THERAPEUTIC ACTIONS

1. Dries Dampness, Kills Parasites and Stops Itching

Clinical manifestations include damp accumulation in the lower body manifesting in weeping, itching skin lesions, especially around the genital area and the toes. Other skin disorders include eczema (of the scrotum, genital area, feet and anus), trichomoniasis, genital itching or vaginal discharge in females due to vaginitis, hemorrhoids, scabies and ringworm. *She Chuang Zi* (Fructus Cnidii) is warm, and most effective against dermatological disorders caused by wind and cold. When treating lesions due to heat or dampness, heat-clearing and dampness-drying herbs should be added. This herb can be used both internally and externally. *She Chuang Zi* dries dampness and effectively dispels wind to relieve itching.

- Genital itching: use *She Chuang Zi* with *Hua Jiao* (Pericarpium Zanthoxyli), *Bai Bu* (Radix Stemonae), *Ming Fan* (Alumen) and *Ku Shen Gen* (Radix Sophorae Flavescentis) as an external wash. Soak the affected area for 10 to 15 minutes one time each day. Take it with *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) internally.
- Swollen, painful scrotum: use powdered *She Chuang Zi* mixed with egg yolk, applied topically.
- Hemorrhoid pain: use it alone as an external wash or soak.
- Scabies: use it alone as powder topically.
- Weeping skin lesions: use this herb with *Ming Fan* (Alumen), *Liu Huang* (Sulfur) and *Xiong Huang* (Realgar).
- Itching lesions in patches: mix powdered *She Chuang Zi* with sesame oil and apply topically.

2. Disperses Cold and Dispels Wind

Turbid white vaginal discharge: This condition is usually caused by deficiencies of the Spleen, Kidney, *ren* (conception) and *chong* (thoroughfare) channels.

- Vaginal discharge: use powdered *She Chuang Zi* as vaginal suppository. It may be combined with *Ming Fan* (Alumen). Take it with *Sha Yuan Zi* (Semen Astragali Complanati), *Shan Zhu Yu* (Fructus Corni) and *Hai Piao Xiao* (Endoconcha Sepiae) and *Lu Rong* (Cornu Cervi Pantotrichum) for internal use.

Lower back: *She Chuang Zi* is effective to treat low back pain caused by wind-damp-cold and Kidney yang deficiency.

- Low back pain: use *She Chuang Zi* with *Sang Ji Sheng* (Herba Taxilli), *Du Zhong* (Cortex Eucommiae), *Gou Ji* (Rhizoma Cibotii) and *Du Huo* (Radix Angelicae Pubescentis).

3. Warms the Kidney and Strengthens Yang

Impotence and infertility: *She Chuang Zi* effectively treats impotence and infertility in men and women due to Kidney yang deficiency.

- Impotence or infertility: combine it with *Yin Yang Huo* (Herba Epimedii), *Tu Si Zi* (Semen Cuscutae), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Du Zhong* (Cortex Eucommiae). Serve it with alcohol and honey.

DOSAGE

15 to 30 grams when *She Chuang Zi* is used as an external wash or soak, mixed with water or oil. For oral use, incorporate 3 to 9 grams in decoctions, pill or powder.

CAUTIONS / CONTRAINDICATIONS

- Use of *She Chuang Zi* is contraindicated in Kidney yin deficiency with heat signs, in excess heat or in damp-heat in the lower *jiao*.

She Chuang Zi (Fructus Cnidii)

CHEMICAL COMPOSITION

L-pinene, L-camphene, bornyl acetate, borylosovalerate, osthol, bergapten, β-eudesmol, columbianetin, columbianadin, archangelicin, edultin, isopimpinelline, o-isovalerylcolumbianetin, anthotoxol.[1]

PHARMACOLOGICAL EFFECTS

- **Endocrinologic:** Subcutaneous injection of alcohol extract of *She Chuang Zi* daily for 32 days in mice lengthened the latent period and shortened the estrus period in mice. Furthermore, it increased the weight of the uterus, ovaries, and testicles in mice.[2]
- **Antibiotic:** It has an inhibitory effect against *Trichomonas vaginalis* and dermatophytes.[3]

CLINICAL STUDIES AND RESEARCH

- **Trichomonal vaginitis:** Patients with trichomonal vaginitis were treated with vaginal wash and vaginal suppository of *She Chuang Zi* with great success. The treatment protocol was to use 500 ml of a 10% solution as a vaginal wash first, followed by insertion of two vaginal suppositories (0.5 gram each). Each course of treatment lasted 5 to 7 days, with a total treatment period of 2 months.[4]
- **Acute eczema or dermatitis:** In one study, 280 patients with acute eczema and 100 patients with acute dermatitis were successfully treated with topical application of an herbal solution. The herbal solution was prepared by cooking 60 grams of *She Chuang Zi* alone, or the combination containing 15 grams each of *She Chuang Zi*, *Fang Feng* (Radix Saposhnikoviae), *Jing Jie* (Herba Schizonepetae) and *Dang Shen* (Radix Codonopsis).[5]
- **Itching:** Intramuscular injection of *She Chuang Zi* and *Cang Er Cao* (Herba Xanthii) twice daily for 10 to 15 days per course of treatment was 83.6% effective in treating 607 patients with severe itching of the skin.[6]
- **Fungal infection:** Topical application of an herbal preparation was used effectively to treat 28 patients with fungal skin infections. The herbal preparation was made by mixing 500 grams of *She Chuang Zi*, 250 grams of *Qing Dai* (Indigo Naturalis), 50 grams of fish liver oil, and petroleum jelly. The herbal preparation was applied topically two to four times daily for 2 months.[7]

Lu Feng Fang (Nidus Vespae)

露蜂房

Pinyin Name: *Lu Feng Fang*
Alternate Chinese Names: *Feng Fang*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: hornet nest
Zoological Name: *Polistes olivaceous* (De Geer) (*Guo Ma Feng*); *Polistes japonicus* Saussure (*Ri Ben Chang Jiao Hu Feng*); *Parapolybia varia* Fabricius (*Yi Fu Hu Feng*)
Pharmaceutical Name: Nidus Vespae
Properties: sweet, neutral
Channels Entered: Stomach, Lung
Safety Index: toxic

Lu Feng Fang (Nidus Vespae)

CHINESE THERAPEUTIC ACTIONS

1. Relieves Toxicity, Dispels Wind, Stops Pain

Toxicity, sores and carbuncles, mastitis: *Lu Feng Fang* (Nidus Vespae) is toxic and treats toxic disorders, such as sores, mastitis, and carbuncles that have either recently developed or have existed for a long time.

- Sores and carbuncles: mix *Lu Feng Fang* with *Tian Nan Xing* (Rhizoma Arisaematis), *Ming Fan* (Alumen), unprocessed *Cao Wu* (Radix Aconiti Kusnezoffii), *Chi Xiao Dou* (Semen Phaseoli) and vinegar, and apply it topically.
- Mastitis: use 6 grams of dry-fried *Lu Feng Fang* in decoction.
- Soft or ulcerated sores: deep fry 21 pieces of *Ba Dou* (Fructus Crotonis) in sesame oil and use the oil to mix with powdered *Lu Feng Fang*. Apply topically.
- Ulceration with pus: combine it with *Wu Gong* (Scolopendra) and *Xiong Huang* (Realgar).

Urticaria, recent or chronic rash with or without itching, rubella, scabies:

- Wind rash with extreme itching: use the dry-fried *Lu Feng Fang* with *Chan Tui* (Periostracum Cicadae) as powder and serve it with grain-based liquor.

Sore throat, toothache, swollen and painful tongue: *Lu Feng Fang* enters the Stomach channel and treats pain in the digestive tract.

- Swollen, painful throat in children: grind dry-fried *Lu Feng Fang* with *Jiang Can* (Bombyx Batryticatus) into fine powder. Serve 1.5 grams with decoction of *Ru Xiang* (Gummi Olibanum).
- Tooth pain radiating to the side of the face, swollen gums (possibly manifesting as feeling like worms moving, or tingling in the teeth): use *Lu Feng Fang* with *Xi Xin* (Herba Asari) and *Ru Xiang* (Gummi Olibanum) as a gargle. Also, 3 grams of *Lu Feng Fang* and 3 grams of *Ming Fan* (Alumen) can be mixed and used as gargle.
- Swollen and painful tongue in children: mix powder of *Lu Feng Fang* with grain-based liquor and apply topically.

Cancer, tumors, palpable masses, scrofulae:

- Scrofula or recalcitrant purulent scrofula: apply *Lu Feng Fang* topically with *Huang Qi* (Radix Astragali), *She Tui* (Periostracum Serpentis) and *Xuan Shen* (Radix Scrophulariae) as a paste.
- Breast tumors, mastitis, fibrocystic breast disorders, abscesses or necrosing nodules in the breast with pain: use it with *Ku Lian Pi* (Cortex Meliae), and *Qing Pi* (Pericarpium Citri Reticulatae Viride). Take 10 grams and serve one dose with grain-based liquor every two days.
- Nasopharyngeal carcinoma, laryngocarcinoma, lymphatic metastasis: combine this substance with *Quan Xie* (Scorpio) and *Jiang Can* (Bombyx Batryticatus).

***Bi zheng* (painful obstruction syndrome):** Clinical applications of *Lu Feng Fang* include rheumatoid arthritis, reduced mobility of joints, and swollen or deformed joints.

- Rheumatoid arthritis: apply *Lu Feng Fang* topically with *Da Suan* (Bulbus Alli Sativi).
- Arthritis, osteomyelitis: mix it with *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra) and *Di Bie Chong* (Eupolyphaga) to make powder. Serve three grams twice daily.

2. Kills Parasites

Ringworms and pinworms: *Lu Feng Fang* is effective against ringworms and pinworms. Despite traditional use of this substance in expelling parasites, it is rarely used clinically because it is toxic. Antiparasitic herbs are usually used instead.

DOSAGE

2.5 to 4.5 grams in decoctions. *Lu Feng Fang* is also used at 1 to 2 grams per serving in powder or pill form, taken twice daily. This substance can be used as powder or as a wash, externally.

CAUTIONS / CONTRAINDICATIONS

- Use of *Lu Feng Fang* is contraindicated in qi- and blood-deficient patients, or individuals with suppurated sores.

CHEMICAL COMPOSITION

Beeswax, resin, calcium, iron, protein.[1]

PHARMACOLOGICAL EFFECTS

- **Hematological:** Alcohol, ether and acetone extracts of *Lu Feng Fang* all shorten coagulation time, with acetone extract being the strongest.[2]
- **Antiparasitic:** Essential oil of *Lu Feng Fang* has a strong effect to kill tapeworms and earthworms.[3]
- **Antineoplastic:** It has an inhibitory effect *in vitro* on liver and stomach cancer cells.[4]

CLINICAL STUDIES AND RESEARCH

- **Acute mastitis:** Four patients with acute mastitis were treated with *Lu Feng Fang* with surprisingly good results. *Lu Feng Fang* was prepared by dry-frying it until it was a light yellow color. The patients were given 1 to 2 grams of the powder every 6 hours with 30 ml of grain-based liquor. In a follow-up study to confirm effectiveness, the same treatment protocol was applied to 26 women with acute mastitis. The study reported complete recovery in 23 patients, significant improvement in 1 patient, and no response in 2 patients. The overall rate of effectiveness was 92.3%.[5]
- **Suppurative infection:** According to one report, 30 grams of *Lu Feng Fang* were cooked at boiling temperature

Lu Feng Fang (Nidus Vespae)

in 1,000 ml of water for 15 minutes to yield an herbal solution for topical application. The herbal solution was used as a wash or soak one to two times daily to treat various suppurated dermatological infections, with good results.[7]

- **Toothache:** In one clinical study, a small amount of *Lu Feng Fang* was placed in alcohol and burned until it turned into ashes. The ashes were applied topically to the affected area and pain relief was achieved in most patients within 4 to 5 minutes. Out of 58 patients, the study reported significant results in 21 patients, moderate effects in 33 patients, and no response in 4 patients.[8]
- **Chronic sinusitis:** Extract of *Lu Feng Fang* was used to treat 158 patients with chronic sinusitis with an 85% effective rate.[9]

Xue Jie (Sanguis Draconis)

血竭

Pinyin Name: *Xue Jie*
Literal Name: "exhausted blood"
Alternate Chinese Names: *Qi Lin Xue*
Original Source: *Lei Gong Pao Zhi Lun* (Grandfather Lei's Discussions of Herb Preparation) by Lei Xiao in 470 A.D.
English Name: dragon's blood, resinous discharge
Botanical Name: *Daemonorops draco* Bl. (*Qi Lin Jie*)
Pharmaceutical Name: Sanguis Draconis
Properties: sweet, salty, neutral
Channels Entered: Heart, Liver

CHINESE THERAPEUTIC ACTIONS

1. External Use: Stops Bleeding, Promotes Generation of Flesh, Contains Ulceration

Bleeding from traumatic injuries, non-healing ulcers, hemorrhoids with swelling and pain: Topical use of *Xue Jie* (Sanguis Draconis) treats both acute and chronic skin conditions. It stops bleeding in acute conditions, and promotes the healing of wounds in chronic conditions by facilitating the generation of flesh and prevents the spread of ulcerations. It can be used alone topically or combined with other herbs for maximum effectiveness.

- Bleeding due to external injury: use *Xue Jie* with *Er Cha* (Catechu), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) topically. **Exemplar Formula:** *Qi Li San* (Seven-Thousandths of a Tael Powder).
- Open sores with discharge of pus: combine it with *Da Huang* (Radix et Rhizoma Rhei) and *Da Zao* (Fructus Jujubae) topically.

2. Internal Use: Activates Blood Circulation, Removes Blood Stasis, Relieves Pain

Blood stagnation with swelling and pain, amenorrhea, dysmenorrhea: Internal use of *Xue Jie* treats both acute and chronic disorders characterized by blood stasis, swelling and pain. *Xue Jie* activates blood and treats various pain or blood stagnation disorders in acute or

Xue Jie (Sanguis Draconis)

chronic cases. Clinical applications include amenorrhea, menstrual pain, and external or traumatic injuries.

- Amenorrhea and menstrual pain with abdominal masses caused by blood stasis: use *Xue Jie* with *Mo Yao* (Myrrha), *Hua Shi* (Talcum), and *Mu Dan Pi* (Cortex Moutan).
- External or traumatic injuries with excruciating pain: combine this substance with *Dang Gui* (Radicis Angelicae Sinensis), *Mo Yao* (Myrrha), *Chi Shao* (Radix Paeoniae Rubrae), *Bai Zhi* (Radix Angelicae Dahuricae) and *Gui Xin* (Cortex Rasus Cinnamomi) as powder. Serve this combination with grain-based liquor.
- Postpartum chest congestion and dyspnea: add *Xue Jie* to *Mo Yao* (Myrrha), *Hua Shi* (Talcum) and *Mu Dan Pi* (Cortex Moutan), combine with vinegar and serve with grain-based liquor and urine from a child.

DOSAGE

1.0 to 1.5 grams as herbal powder or pills internally. *Xue Jie* is used topically as powder, paste or plaster.

CAUTIONS / CONTRAINDICATIONS

- Use of *Xue Jie* is contraindicated during pregnancy or in the absence of blood stasis.

CHEMICAL COMPOSITION

Dracorubin, dracorhodin, nordracorhodin, nordracorubin, dracoresene, pimaric acid, sandaracopimaric acid.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Xue Jie* has inhibitory action against various species of pathogenic fungi and dermatophytes.[2]

CLINICAL STUDIES AND RESEARCH

- **Arthritis:** Patients with chronic arthritis characterized by wind-damp were treated with an herbal formula twice daily for 45 days. The herbal formula was prepared by mixing 120 grams of *Xue Jie* powder and 30 grams of *Ma Qian Zi* (Semen Strychni) powder. The herbal powder was divided into 80 portions with each portion considered to be one dose. Out of 150 patients, the study reported marked effectiveness in 126 patients, moderate effects in 15 patients, and no effect in 9 patients.[3]
- **Upper gastrointestinal bleeding:** In one study, 270 patients with upper gastrointestinal bleeding were treated with one gram of *Xue Jie* four times daily with warm water. After the bleeding stopped, the dosage was decreased to one gram twice daily for 2 days. The study reported a 95.8% overall rate of effectiveness.[4]

Zhang Nao (Camphora)

樟腦 樟脑

Pinyin Name: *Zhang Nao*
Alternate Chinese Names: *Chao Nao, Nao Zi*
Original Source: *Ben Cao Pin Hui Jing Yao* (Essentials of Materia Medica) by Liu Wen-Tai in 1505
English Name: camphor
Botanical Name: *Cinnamomum camphora* (L.) Presl (*Mu Zhang*)
Pharmaceutical Name: Camphora
Properties: acrid, hot
Channels Entered: Heart, Spleen
Safety Index: toxic

Zhang Nao (Camphora)

CHINESE THERAPEUTIC ACTIONS

1. Dispels Dampness, Kills Parasites

Zhang Nao (Camphora), commonly used topically, treats various dermatological disorders such as scabies, ringworms, sores, and fungal infections. It is mostly used in herbal formulas, as the antiparasitic effect is rather weak when used alone. *Zhang Nao* can also be used to treat burns.

- Itching: use it with *Liu Huang* (Sulfur) and *Qing Fen* (Calomelas) topically.
- Scabies, or sores and furuncles with pus: combine *Zhang Nao* with *Liu Huang* (Sulfur) and *Ming Fan* (Alumen) topically.
- Fungal infection: use this substance with *Tian Nan Xing* (Rhizoma Arisaematis), *Mu Bie Zi* (Semen Momordicae), *Ban Mao* (Mylabris), and *Chan Su* (Venenum Bufonis). Mix with rubbing alcohol.
- Itching eruptions, swelling and ulceration due to wind and heat in the blood: add it to *Huang Lian* (Rhizoma Coptidis), *Bai Zhi* (Radix Angelicae Dahuricae), *Hua Jiao* (Pericarpium Zanthoxyli) and *Qing Fen* (Calomelas). Mix with vegetable oil.
- Dry sores on the feet: mix it with sesame oil, *Ming Fan* (Alumen) and *Qing Fen* (Calomelas) and apply topically.
- Wet sores on the feet: mix *Zhang Nao* with *Ming Fan* (Alumen) and *Qing Fen* (Calomelas) and apply as powder.
- Burns: apply *Zhang Nao* with sesame oil. If there are blisters, apply the powder only, omitting the sesame oil.
- Fungal infection of the feet: mix 3 grams of *Zhang Nao* and 2 pieces of tofu and apply topically.

2. Disperses Cold and Relieves Pain

Toothache, pain of traumatic injuries: Acrid and warm, *Zhang Nao* has a strong dispersing effect to dispel cold and relieve pain.

- Frostbite: cook 10 grams of *Zhang Nao* and 30 grams of lard for 10 minutes to make a gel. Apply topically.
- Various swellings and pain: mix 9 grams of *Zhang Nao* with 500 ml of 60% alcohol and apply topically.
- Toothache: mix it with *Zhu Sha* (Cinnabaris) and apply topically.

3. Opens the Sensory Orifices

Aromatic and penetrating in nature, *Zhang Nao* eliminates the stagnation of dampness and turbidity caused by summer-damp or wind-cold. Patients usually contract this type of dampness during late summer or early autumn. Clinical manifestations may include fever, stuffiness of the chest, and abdominal distention or vomiting and diarrhea. It is used via oral ingestion to treat delirium and sudden loss of consciousness.

DOSAGE

0.1 to 0.2 gram for oral use, either in powder or tincture form. *Zhang Nao* is also used topically. Do not process *Zhang Nao* with heat, as heat will make this substance less effective.

CAUTIONS / CONTRAINDICATIONS

- Topical application of *Zhang Nao* over a large surface area may cause irritation and pain.
- Acrid, warm and drying, *Zhang Nao* is contraindicated in cases of excess heat, or when there is deficiency of qi or yin.
- *Zhang Nao* is contraindicated during pregnancy.

OVERDOSAGE

Zhang Nao is toxic when used internally. Overdose may occur after ingestion of 0.5 to 1.0 gram of the herb, and is characterized by dizziness, headache, feelings of warmth throughout the body, excitation and delirium. Dosage over 2 grams may cause severe muscle spasms and convulsions. Dosages over 7 to 15 grams may cause fatality.[1]

TREATMENT OF OVERDOSAGE

Overdose can be diagnosed by smelling the patient's breath, which will have a strong and characteristic odor of camphor. Acute overdose (within 2 to 3 hours) should be treated with emetic methods, followed by ingestion of 5 to 7 egg whites. An herbal decoction used with good success includes such herbs as *Shan Zhu Yu* (Fructus Corni) 15g, *Hu Zhang* (Rhizoma Polygoni Cuspidati) 10g, *Nu Zhen Zi* (Fructus Ligustri Lucidi) 15g, *Han Lian Cao* (Herba Ecliptae) 15g, *Dan Shen* (Radix Salviae Miltiorrhizae) 20g, *Long Yan Rou* (Arillus Longan) 30g, and *He Ye* (Folium Nelumbinis) 10g.[2]

When treating overdosage of *Zhang Nao*, antidotes containing opium or its derivatives are contraindicated as they have an inhibiting effect on respiration. Oil, milk, and alcohol are also contraindicated, as they promote the breakdown of the remaining *Zhang Nao* in the digestive tract.

CHEMICAL COMPOSITION

d-camphora.[3]

PHARMACOLOGICAL EFFECTS

- **CNS stimulant:** Subcutaneous injection of *Zhang Nao* has a marked stimulating effect on the central nervous system and the respiratory system.[4]
- **Cardiovascular:** *Zhang Nao* has a mixed effect on cardiac muscle. In a healthy person, a normal dosage of *Zhang Nao* exerts little or no effect while a large dosage has an inhibitory effect on the heart. In persons with heart failure, *Zhang Nao* has a stimulating effect.[5]
- **Gastrointestinal:** A small dosage of *Zhang Nao* has a

Zhang Nao (Camphora)

mild stimulatory effect on the stomach while a large dosage may cause nausea and vomiting.[6]

CLINICAL STUDIES AND RESEARCH

- **Rash and itching of the anus:** The following treatment protocol was recommended in one report: mix 2 grams of *Zhang Nao*, 2 grams of *Ming Fan* (Alumen), and 20 grams of *Mang Xiao* (Natrii Sulfas) in 600 ml of hot water. Sit in the solution twice daily.[7]

Da Feng Zi (Semen Hydnocarpi)

大風子 大风子

Pinyin Name: *Da Feng Zi*
Literal Name: "big wind seed," "big maple seeds"
Original Source: *Ben Cao Pin Hui Jing Yao* (Essentials of Materia Medica) by Liu Wen-Tai in 1505
English Name: hydnocarpus, chaulmoogra seed
Botanical Name: *Hydnocarpus anthelmintica* Pier. (*Tai Guo Da Feng Zi*); *Hydnocarpus hainanensis* (Merr.) Sleum (*Hai Nan Da Feng Zi*)
Pharmaceutical Name: Semen Hydnocarpi
Properties: acrid, hot
Channels Entered: Liver, Spleen, Kidney
Safety Index: extremely toxic

CHINESE THERAPEUTIC ACTIONS

Dispels Wind, Dries Dampness, Eliminates Toxins and Kills Parasites

Leprosy, syphilis, sarcoptidosis, scabies, tinea, rashes and itching: *Da Feng Zi* (Semen Hydnocarpi) is acrid, hot, drying, strong and toxic. It kills parasites and is commonly used for leprosy. This herb also treats rosacea, pimples and skin cracks. It is seldom used alone and is usually used with other herbs either internally or externally. When *Da Feng Zi* is properly processed, it can be used internally. Today however, due to its toxicity, it is rarely used internally.

- Leprosy: use *Da Feng Zi* with *Ku Shen Gen* (Radix Sophorae Flavescentis), *Fang Feng* (Radix Saposhnikoviae), *Chan Tui* (Periostracum Cicadae) and *Quan Xie* (Scorpio). Serve with tea.
- Ulcers associated with leprosy: use the powder of this herb with *Qing Fen* (Calomelas) and mix with sesame oil to apply topically.
- For oozing ulcers: use the powder of this herb with *Qing Fen* (Calomelas) and apply topically.
- Syphilitic sores: use 6 grams of *Da Feng Zi* with 3 grams of *Qing Fen* (Calomelas) and apply topically.
- Sarcoptidosis, rashes, itching, pus and sores: mix it with *Ming Fan* (Alumen), and *Qing Fen* (Calomelas) in sesame oil and apply topically.
- Itching of various dermatological disorders: mix *Da Feng Zi* with *Liu Huang* (Sulfur), *Xiong Huang* (Realgar), *Ming Fan* (Alumen) and apply topically.

DOSAGE

The calcined form or powder of *Da Feng Zi* is used externally as a paste or powder. For internal use, administer

Da Feng Zi (Semen Hydnocarpi)

0.3 to 1 gram of the appropriately-processed substance in pill form.

CAUTIONS / CONTRAINDICATIONS

- *Da Feng Zi* is highly toxic and should only be used topically.
- Use with extreme caution if taken internally. *Da Feng Zi* is contraindicated for long-term use or in high dosages.

OVERDOSAGE

Overdose of *Da Feng Zi* may cause hemolytic anemia, proteinuria, nephritis, headache, chest pain, fever, insomnia, and fatty liver.[1]

TREATMENT OF OVERDOSAGE

Treat early-stage overdose with emetic or purgative methods. Ingestion of activated charcoal is also beneficial to reduce absorption of the offending agent. One herbal formula has been used with success in treatment of *Da Feng Zi* overdose. The ingredients are *Lu Dou* (Semen Phaseoli Radiati) 60g, *Hei Dou* (Semen Glycine Max) 30g, *Chi Xiao Dou* (Semen Phaseoli) 30g, *Bai Mao Gen* (Rhizoma Imperatae) 30g, *Che Qian Zi* (Semen Plantaginis) 30g and *Gan Cao* (Radix Glycyrrhizae) 9g.[2]

CHEMICAL COMPOSITION

Chaulmoogric acid, hydnocarpic acid.[3]

References

Si Gua Luo (Retinervus Luffae Fructus)

絲瓜絡 丝瓜络

Pinyin Name: *Si Gua Luo*
Literal Name: "net of string melon"
Original Source: *Ben Cao Meng Quan* (Hidden Aspects of the Materia Medica) by Chen Jia-Mo in 1565
English Name: luffa fiber, luffa vegetable sponge, towel-gourd vegetable sponge
Botanical Name: *Luffa cylindrica* (L.) Roem. (*Si Gua*)
Pharmaceutical Name: Retinervus Luffae Fructus
Properties: sweet, neutral
Channels Entered: Lung, Stomach, Liver

CHINESE THERAPEUTIC ACTIONS

1. Eliminates Toxins, Dissolves Phlegm

Toxic swellings, sores, abscesses and lesions: *Si Gua Luo* (Retinervus Luffae Fructus) treats accumulation of toxins and phlegm by clearing heat and reducing swelling. *Si Gua Luo* is generally used in calcined form, alone or with grain-based liquor.

- Breast abscess: use calcined *Si Gua Luo* with *Jin Yin Hua* (Flos Lonicerae), *Lian Qiao* (Fructus Forsythiae), *Pu Gong Ying* (Herba Taraxaci), and *Zi Hua Di Ding* (Herba Violae). *Si Gua Luo* is also mixed with sesame oil and applied topically.

2. Opens Peripheral Channels and Collaterals, and Dispels Wind

***Bi zheng* (painful obstruction syndrome), stiffness, tightness of the tendons:** *Si Gua Luo* dispels wind and dampness from peripheral channels and collaterals to relieve pain, cramps and spasms. It also relieves chest and hypochondriac pain by eliminating stagnation of

Si Gua Luo (Retinervus Luffae Fructus)

phlegm, qi, or blood. Because this herb is neutral to cool in property, it is more suitable for *bi zheng* caused by heat.

- *Bi zheng*: use *Si Gua Luo* with *Sang Zhi* (Ramulus Mori), *Luo Shi Teng* (Caulis Trachelospermi), *Qin Jiao* (Radix Gentianae Macrophyllae) and *Hai Feng Teng* (Caulis Piperis Kadsurae).
- Pain of qi and blood stagnation: use it with *Gua Lou Pi* (Pericarpium Trichosanthis), *Zhi Ke* (Fructus Aurantii), *Yu Jin* (Radix Curcumae), *Chai Hu* (Radix Bupleuri) and *Chuan Xiong* (Rhizoma Ligustici Chuanxiong).
- Pain arising from phlegm stagnation: add this herb to *Gua Lou Shi* (Fructus Trichosanthis), *Xie Bai* (Bulbus Allii Macrostemonis), *Ban Xia* (Rhizoma Pinelliae), *Bei Mu* (Bulbus Fritillaria) and *Qing Pi* (Pericarpium Citri Reticulatae Viride).

3. Opens Peripheral Channels and Collaterals in the Breast

Breast distention, breast tenderness, insufficient milk or obstruction: *Si Gua Luo* promotes lactation, treats lactation problems, and relieves breast distention and pain. Depending on the imbalance, appropriate herbs from other categories should be added, as *Si Gua Luo* is too mild to be used by itself.

- To promote lactation: use it with *Chuan Shan Jia* (Squama Manis), *Wang Bu Liu Xing* (Semen Vaccariae), and *Lu Lu Tong* (Fructus Liquidambaris).
- Lack of breast milk secretion because of qi deficiency: combine this herb with *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali).
- Lack of breast milk secretion caused by blood deficiency: add it to *Shu Di Huang* (Radix Rehmanniae Preparata) and *Dang Gui* (Radicis Angelicae Sinensis).
- Breast distention and pain due to Liver qi stagnation: use it with *Chai Hu* (Radix Bupleuri) and *Xiang Fu* (Rhizoma Cyperi).
- Swelling and burning sensations of the breast: incorporate it with *Pu Gong Ying* (Herba Taraxaci), *Jin Yin Hua* (Flos Lonicerae), and *Tian Men Dong* (Radix Asparagi).

4. Dissolves Phlegm

Cough with profuse phlegm and chest pain: *Si Gua Luo* treats cough and chest congestion and pain caused by phlegm obstruction in the chest. This function is rather mild, thus the herb must be used with other herbs to clear heat and eliminate phlegm.

- Cough with sputum arising from Lung heat: combine *Si Gua Luo* with *Gua Lou Shi* (Fructus Trichosanthis), *Sang Bai Pi* (Cortex Mori), *Bei Mu* (Bulbus Fritillaria) and *Qian Hu* (Radix Peucedani).
- Cough with sputum accompanying an exterior condition: add it to *Niu Bang Zi* (Fructus Arctii), *Sang Ye* (Folium Mori), *Qian Hu* (Radix Peucedani) and *Xing Ren* (Semen Armeniacae Amarum).
- Cough due to cold: use it with *Xing Ren* (Semen Armeniacae Amarum), *Kuan Dong Hua* (Flos Farfarae), *Zi Wan* (Radix Asteris) and *Bai Bu* (Radix Stemonae).

5. Stops Bleeding

Charred *Si Gua Luo* stops bleeding, such as hematochezia or profuse menstrual bleeding.

DOSAGE

For internal use, 10 to 15 grams in decoction or as powder. *Si Gua Luo* is commonly used internally and topically in calcined form.

CHEMICAL COMPOSITION

Xylan, mannan, galactan.[1]

PHARMACOLOGICAL EFFECTS

- **Hepatoprotective:** Administration of *Si Gua Luo* in rats had a protective effect against liver damage induced by carbon tetrachloride.[2]
- **Others:** *Si Gua Luo* has been shown to have mild cardiotonic and diuretic effects.[3]

TOXICOLOGY

Oral administration of *Si Gua Luo* in animals at 100 times the therapeutic dose for humans, for 10 days, showed no significant changes to the brain, heart, liver, kidney and other internal organs. The herb is considered very safe, with little or no toxicity.[4]

Er Cha (Catechu)

兒茶 儿茶

Pinyin Name: *Er Cha*
Literal Name: "child's tea"
Alternate Chinese Names: *Wu Die Ni, Hai Er Cha*
Original Source: *Yin Shan Zheng Yao* (Correct Guide to Eating and Drinking)
English Name: catechu, black catechu
Botanical Name: *Acacia catechu* (L.) Willd. (*Er Cha*); *Uncaria gambier* Roxb. (*Er Cha Gou Teng*)
Pharmaceutical Name: Catechu
Properties: bitter, astringent, cool
Channels Entered: Lung

CHINESE THERAPEUTIC ACTIONS

1. Drains Dampness and Absorbs Seepage

Oozing sores, non-healing ulcerations, canker sores caused by dampness: Clinical manifestations include sores that are filled with purulent fluid, chronic non-healing sores, and ulcers or sores of the oral cavity. *Er Cha* (Catechu) is used alone or with other herbs for maximum effectiveness.

- Non-healing sores, weeping lesions: mix *Er Cha* with *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Bing Pian* (Borneolum Syntheticum), *Xue Jie* (Sanguis Draconis) and *Long Gu* (Os Draconis). Apply topically as powder.
- Ulcers with necrosis of tissue: apply this herb topically as powder with *Qing Fen* (Calomelas) and *Xue Jie* (Sanguis Draconis).
- Oral ulcers and sores: apply it topically as powder with *Peng Sha* (Borax).
- Genital sores: apply *Er Cha* powder topically with *Hu Huang Lian* (Rhizoma Picrorhizae).
- Hemorrhoids: apply this herb topically with *She Xiang* (Moschus).

2. Generates Flesh and Stops Bleeding

Bleeding: *Er Cha*, applied topically as powder or served internally as decoction, stops bleeding, especially if bleeding is caused by heat. Clinical applications include gastrointestinal bleeding, bleeding gums, epistaxis, hematochezia, hemorrhage caused by trauma, or abnormal uterine bleeding.

- Traumatic hemorrhage: apply *Er Cha* powder topically with calcined *Long Gu* (Os Draconis), *Xue Jie* (Sanguis Draconis) and *Bai Ji* (Rhizoma Bletillae).
- Other kinds of bleeding: use it with *San Qi* (Radix Notoginseng) and *Hai Piao Xiao* (Endoconcha Sepiae) internally or externally.
- Burns: apply this herb topically with *Bing Pian* (Borneolum Syntheticum) and *Ge Jie* (Gecko).

3. Clears Heat and Dispels Phlegm

Lung heat with phlegm: *Er Cha* treats cough with yellow phlegm.

- Cough with yellow phlegm: use it with *Ma Huang* (Herba Ephedrae), *Xing Ren* (Semen Armeniacae Amarum), *Shi Gao* (Gypsum Fibrosum), and *Gan Cao* (Radix Glycyrrhizae).

4. Generates Fluids and Stops Diarrhea

Summer-heat: *Er Cha* treats thirst, diarrhea, and dysenteric disorders caused by summer-heat.

- Thirst: combine *Er Cha* with *He Ye* (Folium Nelumbinis), *Gan Cao* (Radix Glycyrrhizae), *Hua Shi* (Talcum), and *Qing Hao* (Herba Artemisiae Annuae).
- Diarrhea and dysenteric disorders with rectal tenesmus or burning sensations: use this herb with *Ge Gen* (Radix Puerariae), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae) and *Huang Bai* (Cortex Phellodendri).

5. Relieves Food Stagnation in Children and Promotes Digestion

- Indigestion or food stagnation in children: use *Er Cha* with *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli). Serve the powder with water.

DOSAGE

1 to 3 grams in decoction, 0.1 to 0.9 gram in pills or powders. When used topically, *Er Cha* is generally ground into powder and mixed with other herbs to make a paste.

Er Cha (Catechu)

CHEMICAL COMPOSITION

Catechim, catechu-tannic acid, dl-catechin, dl-epicatechin, phlobatannin, fesetin, quercetin, quercetagenin, kaempferol, dihydrokaempferol, taxifolin, isorhamnetin, protocatechu tannins, pyrogallic tannins.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** Water extract of *Er Cha* has an inhibitory effect *in vitro* on *Staphylococcus aureus, Pseudomonas aeruginosa, Corynebacterium diphtheriae, Bacillus proteus, Bacillus dysenteriae,* and *Salmonella typhi.*[2]
- **Hepatoprotective:** According to one report, catechim has marked hepatoprotective effects. Catechim effectively reduced the elevated level of SGPT artificially induced by carbon tetrachloride in 27 rats.[3]

CLINICAL STUDIES AND RESEARCH

- **Burns:** Topical application of a formula with *Er Cha* and *Bing Pian* (Borneolum Syntheticum) as main ingredients effectively relieved pain and promoted healing in burn patients.[4]
- **Ulceration:** Ten patients with ulcerations of the skin and tissue of the lower extremities were treated with *Er Cha, Huang Lian* (Rhizoma Coptidis), *Huang Bai* (Cortex Phellodendri) and others, with complete recovery occurring within 5 to 15 days.[5]
- **Peptic ulcer disease:** In a clinical study, patients with gastric and duodenal ulcers were divided into three groups, with group one receiving *Er Cha* and *Da Huang* (Radix et Rhizoma Rhei) in powder, group two receiving *Er Cha* and *San Qi* (Radix Notoginseng), and group three receiving drug treatment (aminocaproic acid, Adrenosem salicylate, and vitamin K). Out of 34 patients in each group, the rate of effectiveness was 88.24% in group one (16 patients with significant and 14 patients with moderate improvement), 85.29% for group two (9 patients with significant and 20 patients with moderate improvement), and 58.82% for group three (7 patients with significant and 13 patients with moderate improvement).[6]
- **Diarrhea:** In one study, 110 patients with diarrhea were treated by oral ingestion of *Er Cha,* with satisfactory results. The dosage was 6 to 9 g/day for adults, and 150 to 250 mg/kg/day for children, given in three to four equally-divided doses with warm water.[7]
- **Galacturia:** According to one report, 60 grams each of *Er Cha, Ming Fan* (Alumen) and *Shen Qu* (Massa Fermentata) were ground into fine powder and encapsulated for treatment of galacturia. Patients were instructed to take 15 capsules (0.3 gram per capsule, 4.5 grams of herbs per dose) twice daily for 10 days per course of treatment. The authors reported that doctors who have used this treatment in clinical practice for over 10 years reported satisfactory results.[8]

TOXICOLOGY

The LD_{50} for catechim in mice is 1.37 g/kg.[9]

Wa Leng Zi (Concha Arcae)

瓦楞子

Pinyin Name: *Wa Leng Zi*
Original Source: *Ben Cao Shi Yi* (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.
English Name: ark shell
Zoological Name: *Arca subcrenata* Lischke (*Mao Han*); *Arca granosa* Linnaeus (*Ni Han*); *Arca inflata* Reeve (*Gui Han*)
Pharmaceutical Name: Concha Arcae
Properties: salty, neutral
Channels Entered: Liver, Stomach, Lung

CHINESE THERAPEUTIC ACTIONS

1. Dissolves Phlegm, Resolves Stagnation, Softens Hardness, Disperses Nodules

Mobile or immobile masses characterized by accumulation of qi, blood or phlegm: Clinical applications of *Wa Leng Zi* (Concha Arcae) include scrofula, goiter, abdominal masses, hepatomegaly and splenomegaly. It also treats chronic stubborn phlegm found in chronic coughing. The action of *Wa Leng Zi* is mild when it is used alone. Therefore, it is usually combined with other herbs for maximum effectiveness. *Wa Leng Zi* is also effective in treatment of goiter caused by Liver qi stagnation and improper food intake.

- Scrofula from phlegm and fire: use *Wa Leng Zi* with *Bei Mu* (Bulbus Fritillaria), *Xia Ku Cao* (Spica Prunellae), and *Lian Qiao* (Fructus Forsythiae).
- Goiter caused by accumulation of blood and phlegm: combine it with *Hai Zao* (Sargassum), *Kun Bu* (Thallus Laminariae seu Eckloniae), and *Hai Dai* (Thallus Laminariae).
- Immobile or mobile masses characterized by accumulations of qi, blood or phlegm: use this herb with *E Zhu* (Rhizoma Curcumae), *San Leng* (Rhizoma Sparganii), *Bie Jia* (Carapax Trionycis) and *Dan Shen* (Radix Salviae Miltiorrhizae). These herbs are also used for hepatomegaly, splenomegaly and tumors of the gastrointestinal tract.
- Chronic cough and phlegm: add this herb to *Bei Mu* (Bulbus Fritillaria), *Zi Wan* (Radix Asteris), *Kuan Dong Hua* (Flos Farfarae) and *Fu Hai Shi* (Pumice).

2. Controls Stomach Acid, Relieves Pain

Stomach pain with acid regurgitation: Vinegar-processed *Wa Leng Zi* has marked effectiveness to stop secretion of gastric acid and relieve pain. It treats acid reflux, and gastric and duodenal ulcers.

- Acid reflux: use this substance with *Hai Piao Xiao* (Endoconcha Sepiae) and *Chen Pi* (Pericarpium Citri Reticulatae).
- Gastric and duodenal ulcers: combine it with other herbs based on differential diagnosis.

3. Regulates Qi and Blood Circulation, Relieves Pain

Wa Leng Zi treats menstrual pain caused by stagnation of qi and blood.

- Menstrual pain: use it with *Xiang Fu* (Rhizoma Cyperi), *Tao Ren* (Semen Persicae), *Mu Dan Pi* (Cortex Moutan) and *Dang Gui* (Radicis Angelicae Sinensis).

DOSAGE

10 to 30 grams in herbal decoction, 1 to 3 grams in powder or pills. *Wa Leng Zi* should be cooked for an extended period of time to ensure maximum extraction of active components. Fresh *Wa Leng Zi* more strongly disperses nodules and softens hardness. Vinegar-treated *Wa Leng Zi* more effectively stops the secretion of gastric acid and relieves pain.

CHEMICAL COMPOSITION

Calcium carbonate, magnesium, iron, sodium phosphate.[1]

CLINICAL STUDIES AND RESEARCH

- **Peptic ulcer:** Stomach or duodenal ulcer patients were treated with an herbal formula with significant improvement. The herbal formula contained (in powder form) 5 parts calcined *Wa Leng Zi* and 1 part *Gan Cao* (Radix Glycyrrhizae). Patients received 10 grams of the powder three times daily, before meals. Patients with rhythmic

cycles of pain were given 20 grams of the powder 20 minutes before the next onset of pain. The duration of treatment ranged between 20 and 56 days. Of 124 patients, 59 experienced complete recovery, 48 reported improvement, and 17 had no response. The overall rate of effectiveness was 89.12%.[2]

Peng Sha (Borax)

硼砂

Pinyin Name: *Peng Sha*
Alternate Chinese Names: *Yue Shi, Pen Sha*
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: borax
Pharmaceutical Name: Borax
Properties: sweet, salty, cool
Channels Entered: Lung, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Clears Heat, Eliminates Toxins, and Reduces Swelling

Sore and swollen throat, oral ulcers, redness and swelling of the eyes, conjunctivitis: Sweet, salty and cool, *Peng Sha* (Borax) treats disorders characterized by the presence of heat and toxins. Clinical presentations include thrush, stomatitis, throat disorders with difficulty speaking and swallowing, locked jaw, aphasia, cyanosis, throat infection, tonsillitis, and sensations of having a heavy tongue.

- Ulceration of the mouth or sore throat: combine *Peng Sha* with *Mang Xiao* (Natrii Sulfas), *Bing Pian* (Borneolum Syntheticum), *Zhen Zhu* (Margarita) and *Zhu Sha* (Cinnabaris). Grind all ingredients into fine powder and apply topically.
- General disorders of the oral cavity: combine this substance with *Er Cha* (Catechu) and *Zhen Zhu* (Margarita).
- General disorders of the oral cavity characterized by heat and toxins: use it with *Qing Dai* (Indigo Naturalis) and *Huang Lian* (Rhizoma Coptidis).
- Skin sores and ulcerations: use unprocessed *Peng Sha* to clear heat and eliminate toxins, use calcined *Peng Sha* to drain pus and enhance recovery.
- Eye redness, swelling and pain: boil *Peng Sha* in water, let it cool and use the liquid as eyewash. Or apply powdered *Peng Sha* with *Bing Pian* (Borneolum Syntheticum) and powder of *Yuan Ming Fen* (Natrii Sulfas Praeparata) to the corner of the eyes three times daily.
- Bleeding lesions: use *Peng Sha* with charred *Pu Huang* (Pollen Typhae).

2. Clears Heat in the Lung, Dissolves Phlegm

Cough caused by hot phlegm: Oral ingestion of *Peng Sha* clears heat, dissolves phlegm, and eliminates toxins. It treats cough, sore throat or hoarse voice caused by phlegm and heat attacking the Lung.

- Chronic cough with sore throat, yellow, sticky, difficult-to-expectorate sputum: use *Peng Sha* with *Nan Sha Shen* (Radix Adenophorae), *Bei Mu* (Bulbus Fritillaria), *Gua*

Peng Sha (Borax)

Lou Shi (Fructus Trichosanthis), *Sang Bai Pi* (Cortex Mori) and *Huang Qin* (Radix Scutellariae).

DOSAGE

1.5 to 3.0 grams in pill or powder form for oral ingestion. *Peng Sha* is also used topically as fine powder or as topical wash. The unprocessed form more strongly clears heat and eliminates toxins, while the calcined form more effectively reduces swelling and eliminates dampness to treat oral ulcers.

CAUTIONS / CONTRAINDICATIONS

- *Peng Sha* should be administered with caution for oral use.
- *Peng Sha* should be used with caution in cases of yin deficiency with dryness, and yin deficiency with heat.

CHEMICAL COMPOSITION

Sodium tetraborate.[1]

PHARMACOLOGICAL EFFECTS

- **Antibiotic:** *Peng Sha* has an inhibitory effect against *E. coli*, *Pseudomonas aeruginosa*, *Bacillus anthracis*, *Bacillus dysenteriae*, *Salmonella typhi*, *Bacillus proteus*, *Staphylococcus aureus*, *Corynebacterium diphtheriae*, *Diplococcus meningitidis*, β-hemolytic streptococcus, and some pathogenic fungi.[2]

Lu Gan Shi (Galamina)

爐甘石　炉甘石

Pinyin Name: *Lu Gan Shi*
Literal Name: "stove sweet stone"
Alternate Chinese Names: *Gan Shi*, *Bai Gan Shi*
Original Source: *Wai Dan Ben Cao* (Materia Medica For External Elixirs)
English Name: galamina
Pharmaceutical Name: Galamina
Properties: sweet, neutral
Channels Entered: Liver, Stomach

CHINESE THERAPEUTIC ACTIONS

1. Eliminates Toxins and Brightens the Eyes

Lu Gan Shi (Galamina), commonly used topically, treats various eye disorders, such as redness, swelling and pain, excessive tearing, increased sensitivity to light, and pterygium.

- Eye redness and swelling: combine *Lu Gan Shi* with *Yuan Ming Fen* (Matrii Sulfas Exsiccatus).
- Excessive tearing: use it with *Hai Piao Xiao* (Endoconcha Sepiae).
- General eye problems: add *Zhu Sha* (Cinnabaris), *Peng Sha* (Borax) and *She Xiang* (Moschus) to *Lu Gan Shi*.

2. Dries Dampness, Generates Flesh, and Relieves Itching

Lu Gan Shi eliminates dampness and toxins from the skin to treat a variety of dermatological disorders. It is usually used topically, in combination with other herbs, for dermatological disorders with or without open sores.

- Diaper rash: mix 30 grams of calcined *Lu Gan Shi* and 3

Lu Gan Shi (Galamina)

grams of *Qing Fen* (Calomelas) and apply the combination topically to the affected area.
- Chronic ulceration: use this substance with calcined *Long Gu* (Os Draconis) and calcined *Shi Gao* (Gypsum Fibrosum) topically.
- Dermatitis: mix it with glycerin and apply topically.
- Eczema in the genital area: apply the powder topically.
- Genital ulcers: mix it with *Er Cha* (Catechu) and sesame oil, and apply topically.

DOSAGE

For ophthalmic application, *Lu Gan Shi* must be processed using the method called *shui fei* (refining with water). Do not use it internally.

CAUTIONS / CONTRAINDICATIONS

- Do not use *Lu Gan Shi* internally.

CHEMICAL COMPOSITION

Zinc carbonate, calcium oxide, magnesium oxide, ferric oxide, manganese oxide, copper, and lead.[1]

CLINICAL STUDIES AND RESEARCH

- **Chapped nipples:** Topical application of a formula to chapped nipples, two to three times daily, has shown satisfactory results in numerous patients. The formulation was prepared by mixing 10 grams each of *Lu Gan Shi*, *Hua Rui Shi* (Ophicalcitum), *Han Shui Shi* (Mirabilite), and a small amount of *Bing Pian* (Borneolum Syntheticum), in an oil base.[2]

Mu Bie Zi (Semen Momordicae)

木鱉子 木鱉子

Pinyin Name: *Mu Bie Zi*
Literal Name: "wooden turtle seeds"
Original Source: *Ri Hua Zi Ben Cao* (Materia Medica of Ri Hua-Zi) by Ri Hua-Zi in 713 A.D.
English Name: momordica seeds, cochinchina momordica seed
Botanical Name: *Momordica cochinchinensis* (Lour.) Spreng. (*Mu Bie Zi*)
Pharmaceutical Name: Semen Momordicae
Properties: bitter, slightly sweet, warm
Channels Entered: Large Intestine, Liver, Stomach
Safety Index: toxic

CHINESE THERAPEUTIC ACTIONS

Reduces Swelling, Disperses Nodules, and Eliminates Toxins

Mu Bie Zi (Semen Momordicae) treats sores, ulcerations, abscesses, nodules, cysts, hemorrhoid, scrofulae and disorders characterized by the presence of heat and toxins. It may be used internally or topically.
- Throat soreness, swelling and pain: combine *Mu Bie Zi* with *Shan Dou Gen* (Radix Sophorae Tonkinensis).
- Abscess: use it with *Huang Qin* (Radix Scutellariae) and *Huang Bai* (Cortex Phellodendri).

DOSAGE

0.5 to 1.0 gram in pills.

CAUTIONS / CONTRAINDICATIONS

- *Mu Bie Zi* is contraindicated in pregnancy, or in individuals with weak constitutions.

Mu Bie Zi (Semen Momordicae)

CHEMICAL COMPOSITION

Momordin, gypsogenin, momordic acid, d-eleostearic acid.[1]

TOXICOLOGY

The LD_{50} for *Mu Bie Zi* in mice is 32.35 mg/kg via intravenous injection, and 37.34 mg/kg via intraperitoneal injection.[2]

References

1. *Chang Yong Zhong Yao Cheng Fen Yu Yao Li Shou Ce* (A Handbook of the Composition and Pharmacology of Common Chinese Drugs), 1994; 514

Wu Ming Yi (Pyrolusitum)

無名異 无名异

Pinyin Name: *Wu Ming Yi*
Original Source: *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica) in the second century
English Name: pyrolusite
Pharmaceutical Name: Pyrolusitum
Properties: sweet, neutral
Channels Entered: Liver, Kidney

CHINESE THERAPEUTIC ACTIONS

Reduces Swelling and Pain, Stops Bleeding, Promotes Generation of Flesh

Wu Ming Yi (Pyrolusitum) is commonly used to address various traumatic and external injuries. Clinical applications include trauma, broken bones, wounds, bruises, bleeding, swelling, inflammation, and infection.

- Trauma with pain and inflammation: apply *Wu Ming Yi* topically.
- Bone fracture: use it with *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

DOSAGE

6 to 15 grams.

CHEMICAL COMPOSITION

MnO_2

Chapter 20 summary

SUBSTANCES FOR TOPICAL APPLICATION

Although many of the substances listed in this chapter can influence internal conditions, many are too toxic for internal use, thus are used via external application or not at all. Some are no longer in use but are important to include here for academic and informational purposes. The historical uses of these substances in traditional Chinese medicine serve to provide reminders and possible templates for future refinements and research.

The columns below are marked to indicate qualities or uses appropriate to each herb:

Tox (toxicity) – presence of toxicity

Drm (dermatology) – dermatological application to treat itching, eczema, parasites or fungus

Trm (trauma) – trauma or external injuries, such as sores, ulcers, abscesses, damage to flesh, bruises, or similar wounds

Name	Tox	Drm	Trm	Unique Functions
Liu Huang (Sulfur)	X	X		Ext: treats itching, kills parasites and fungi Int: tonifies Kidney yang, promotes bowel movement
Xiong Huang (Realgar)	X	X		Ext: kills fungi, treats insect and snake bites Int: dispels phlegm, treats seizures and malaria
Qing Fen (Calomelas)	X	X		Ext: treats ulcers, sores and syphilis Int: dispels water, promotes bowel movement
Qian Dan (Minium)	X		X	Ext: promotes generation of flesh, treats ulcers Int: dispels phlegm, treats seizure
Mi Tuo Seng (Lithargyrum)	X	X	X	Ext: treats oozing, non-healing sores Int: too toxic for internal use
Ming Fan (Alumen)		X	X	Ext: treats various itching skin disorders Int: stops bleeding, dispels phlegm
Da Suan (Bulbus Alli Sativi)		X		Ext: reduces swelling, eliminates toxins, kills parasites. Int: treats respiratory disorders, prevents infectious disease
Ban Mao (Mylabris)	X	X		Ext: eliminates heat toxins Int: breaks blood stagnation, disperses stagnation
Chan Su (Venenum Bufonis)	X	X	X	Ext: eliminates toxins, reduces swelling, relieves pain Int: opens orifices, eliminates toxins, relieves pain
Ma Qian Zi (Semen Strychni)	X	X	X	Ext: reduces swelling, disperses stagnation, opens channels and relieves pain Int: relieves muscle numbness and paralysis
She Chuang Zi (Fructus Cnidii)		X	X	Ext: relieves itching, kills parasites, dispels wind-cold Int: tonifies Kidney yang
Lu Feng Fang (Nidus Vespae)	X	X	X	Ext: eliminates toxins, dispels wind, kills parasites, relieves pain Int: disperses nodules to treat cancer, tumors, palpable masses, and scrofula
Xue Jie (Sanguis Draconis)			X	Ext: generates production of blood and flesh, heals sores and wounds Int: invigorates blood circulation, eliminates blood stasis
Zhang Nao (Camphora)	X	X	X	Ext: dries dampness, kills parasites, relieves pain Int: opens sensory orifices, relieves pain
Da Feng Zi (Semen Hydnocarpi)	X	X		Ext: dispels wind, dries dampness, eliminates toxins, kills parasites Int: avoid internal use
Si Gua Luo (Retinervus Luffae Fructus)		X	X	Ext: eliminates toxins, dispels phlegm, dispels wind, opens channels and collaterals Int: alleviates pain, relieves cough and chest pain
Er Cha (Catechu)			X	Ext: dries dampness, treats ulcers, generates flesh, stops bleeding Int: clears heat, relieves cough, generates body fluids, stops diarrhea.
Wa Leng Zi (Concha Arcae)				Ext: dispels phlegm, dissolves bruises, softens hardness, disperses nodules Int: neutralizes gastric acid, relieves stomach pain
Peng Sha (Borax)	X		X	Ext: breaks blood stagnation, disperses nodules, softens hardness Int: treats sores, ulcers, swollen throat
Lu Gan Shi (Galamina)		X	X	Ext: eliminates toxins, dries dampness, generates flesh, relieves itching Int: not used internally
Mu Bie Zi (Semen Momordicae)	X	X	X	Ext: reduces swelling, disperses nodules, eliminates toxins Int: treats sores and ulcers
Wu Ming Yi (Pyrolusitum)		X	X	Ext: reduces swelling and pain, stops bleeding, promotes generation of flesh Int: trauma

Chapter 20 summary

In TCM hospitals in China, substances for topical application are used in surgery, trauma, dermatology, and in eye, ear, nose and throat departments. They are also used for internal medicine, obstetric/gynecologic and pediatric disorders. Most of the herbs in this category are toxic and should be used carefully, within appropriate guidelines.

Liu Huang (Sulfur) is most effective against furuncles and scabies. When taken internally, it strengthens Kidney yang to treat impotence.

Xiong Huang (Realgar) contains arsenic, and is used externally to treat sores and carbuncles, and insect and snake bites. When taken internally, it can dispel phlegm, treat malaria and settle wind to treat fright.

Qing Fen (Calomelas) contains mercury, and is used externally to eliminate toxins and kill parasites.

Qian Dan (Minium) contains lead, and is used externally to treat ulcers and promote the generation of flesh. When taken internally, it dispels phlegm and treats seizures.

Mi Tuo Seng (Lithargyum) contains lead, and is used externally to generate flesh, treat sores, ulcers and wounds with oozing fluids. It also treats eczema. It is rarely used internally because of toxicity.

Ming Fan (Alumen) clears toxins, kills parasites, dries dampness, relieves itching, and stops bleeding. Used externally, it treats sores, carbuncles, eczema, scabies, fungal infections and itching. Used internally, it stops diarrhea and bleeding, clears heat, and dispels phlegm. Clinical applications of *Ming Fan* include hematemesis, epistaxis, epilepsy, mania and jaundice.

Da Suan (Bulbus Alli Sativi) reduces swelling, eliminates toxins and kills parasites. It can be used externally to treat swellings and sores, and relieve itching due to fungal infection. When used internally, it can treat chronic Lung disorders such as tuberculosis, and whooping cough. It can also be used to treat dysentery and prevent infectious disorders.

Ban Mao (Mylabris) eliminates heat and toxins when used externally, and invigorates blood circulation when used internally.

Chan Su (Venenum Bufonis) eliminates toxins, reduces swelling, relieves pain, and opens the sensory orifices to disperse stagnation. External and internal uses treat swelling, sores, scrofula, pain of masses, and abdominal pain with vomiting and diarrhea.

Ma Qian Zi (Semen Strychni) reduces swelling, disperses stagnation, opens channels and collaterals, relieves pain to treat swellings and sores, and treats pain, stiffness and paralysis caused by traumatic injuries.

She Chuang Zi (Fructus Cnidii) dries dampness, kills parasites, disperses cold and wind, and tonifies Kidney yang. Used externally, it treats various itching skin disorders. Used internally, it treats leukorrhea, back pain, or impotence due to cold and dampness.

Lu Feng Fang (Nidus Vespae) dispels wind, kills parasites, relieves pain and eliminates toxins. It treats toxic sores, carbuncles, masses and swellings, sore throat, toothache and itching skin disorders.

Chapter 20 summary

Xue Jie (Sanguis Draconis), when used externally, generates flesh, heals sores and wounds, and treats non-healing sores and wounds or bleeding due to traumatic injuries. *Xue Jie*, when taken internally, invigorates blood, disperses stagnation and relieves pain. Clinical applications of *Xue Jie* include blood stagnation, swelling, pain, amenorrhea and dysmenorrhea.

Zhang Nao (Camphora) is aromatic, dry and toxic. Used externally, it dispels dampness, kills parasites and relieves pain. It treats scabies, ringworms, fungal infections and toothache. Taken internally, it opens the orifices, and warms the body to relieve pain.

Da Feng Zi (Semen Hydnocarpi), extremely toxic, dispels wind, dries dampness, eliminates toxins, kills parasites and treats leprosy and syphilis. Taken internally, it treats leukorrhea, dysentery, hematochezia and bleeding.

Si Gua Luo (Retinervus Luffae Fructus) eliminates toxins, dissolves phlegm, dispels wind, opens channels and collaterals, and treats sores and swellings. Taken internally, it treats *bi zheng* (painful obstruction syndrome), cough with chest pain, or obstruction of breast milk. *Si Gua Luo* is relatively mild, and should be used at a high dosage for maximum results.

Er Cha (Catechu) dries dampness and treats wet sores and lesions. It is excellent to generate flesh and stop bleeding in treatment of non-healing ulcers, wet lesions, oral ulcers and various bleeding disorders. Taken internally, *Er Cha* clears heat, dispels phlegm, stops diarrhea, generates body fluids, arrests cough from Lung heat, and relieves diarrhea and thirst during summertime.

Unprocessed ***Wa Leng Zi*** (Concha Arcae) dispels phlegm, disperses stagnation and softens hardness for treatment of scrofula, goiter, and chronic cough with scanty, sticky, difficult-to-expectorate sputum. Processed *Wa Leng Zi* is often taken internally to treat stomach pain with acid reflux.

Peng Sha (Borax) is not toxic and is used externally to clear heat, eliminates toxins, reduce swelling and prevent decay. It can be used to treat swollen and painful throats, oral ulcers, and swelling and pain in the eyes. When taken internally, it clears the Lung, dissolves phlegm and treats cough with phlegm due to heat in the Lung.

Lu Gan Shi (Galamina) eliminates toxins, dries dampness, generates flesh, and relieves itching, primarily for skin and eye disorders.

Mu Bie Zi (Semen Momordicae) reduces swelling, disperses nodules, eliminates toxins, and treats sores and abscesses.

Wu Ming Yi (Pyrolusitum) reduces swelling and pain, stops bleeding, and promotes generation of flesh in traumatic and external injuries.

SUBSTANCES FOR TOPICAL USE FROM OTHER FUNCTIONAL CATEGORIES

Many substances used primarily for internal treatment also have topical uses. Please consult individual herb monographs for details.

Appendix 1 — Cross-reference Based on Traditional Chinese Medicine Diagnosis

The listing of any herb under a diagnosis does not insure that that substance can be unquestioningly prescribed for the named symptom or syndrome. Selection and combination of herbs must be based on careful differential diagnosis, guided by informed understanding and training in Chinese Herbal Medicine.

1. Abdominal pain
2. Anxiety
3. *Ben tun* (running piglet)
4. *Bi zheng* (closed disorder)
5. *Bi zheng* (painful obstruction syndrome)
6. Bleeding
7. Breast abscess
8. Burns
9. Cancer
10. Carbuncles and furuncles
11. *Chang feng* (intestinal wind)
12. Chest pain
13. Constipation
14. Convulsions
15. Cough
16. Diarrhea
17. Dizziness
18. Dysentery
19. Edema
20. Eye disorders
21. Fever
22. Fungal infection
23. *Gan ji* (infantile malnutrition)
24. Headache
25. Hepatitis
26. Hernial pain
27. Hiccup
28. Hypochondriac pain
29. Indigestion
30. Insomnia
31. Intestinal abscess
32. Jaundice
33. Lactation difficulties
34. Leg *qi*
35. Leukorrhea
36. Lightheadedness
37. *Lin zheng* (dysuria syndrome)
38. Loss of voice
39. Low back pain
40. Lung abscess
41. Maculae and papules
42. Malaria
43. Menstrual pain
44. Nausea and vomiting
45. Nodules
46. Pain
47. Parasitic infestation
48. Perspiration
49. Plum pit syndrome
50. Poisoning
51. Rectal prolapse
52. Restless fetus
53. Seizures
54. Snake and insect bites
55. Sore throat
56. Spermatorrhea
57. Stomach pain
58. Syphilis and leprosy
59. Thirst
60. Toothache
61. Traumatic injuries
62. Unstable pregnancy
63. Wheezing and dyspnea
64. *Wu xin re* (five-center heat)
65. *Xiao ke* (wasting and thirsting) syndrome
66. *Zang zao* (dry organ) disorder

1. Abdominal pain

Qi stagnation

Chen Xiang (Lignum Aquilariae Resinatum)
Chuan Lian Zi (Fructus Toosendan)

Long Yan Rou (Arillus Longan)
Sang Shen Zi (Fructus Mori)
Suan Zao Ren (Semen Zizyphi Spinosae)
Ye Jiao Teng (Caulis Polygoni Multiflori)

Qi and blood deficiency
Ren Shen (Radix Ginseng)
Sha Shen (Radix Glehniae seu Adenophorae)
Xi Yang Shen (Radix Panacis Quinquefolii)

Qi and yin deficiency
Wu Wei Zi (Fructus Schisandrae Chinensis)

3. *Ben tun* (running piglet)
Li Zhi He (Semen Litchi)

4. *Bi zheng* (closed disorder)
She Xiang (Moschus)
Su He Xiang (Styrax)
Zao Jiao (Fructus Gleditsiae)
Zhu Li (Succus Bambusae)

5. *Bi zheng* (painful obstruction syndrome)
***Xing bi* (mobile painful obstruction)**
Bai Hua She (Bungarus Parvus)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Fang Feng (Radix Saposhnikoviae)
Gao Ben (Rhizoma Ligustici)
Hai Feng Teng (Caulis Piperis Kadsurae)
Lu Feng Fang (Nidus Vespae)
Luo Shi Teng (Caulis Trachelospermi)
Ma Qian Zi (Semen Strychni)
Man Jing Zi (Fructus Viticis)
Qian Nian Jian (Rhizoma Homalomenae)
Qiang Huo (Rhizoma et Radix Notopterygii)
Qin Jiao (Radix Gentianae Macrophyllae)
Quan Xie (Scorpio)
She Tui (Periostracum Serpentis)
Si Gua Luo (Retinervus Luffae Fructus)
Tian Ma (Rhizoma Gastrodiae)
Wu Gong (Scolopendra)
Wu Shao She (Zaocys)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xun Gu Feng (Herba Aristolochiae Mollissimae)

***Tong bi* (extremely painful obstruction)**
Cao Wu (Radix Aconiti Kusnezoffii)
Chuan Wu (Radix Aconiti Preparata)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gao Ben (Rhizoma Ligustici)
Gui Zhi (Ramulus Cinnamomi)
Hu Lu Ba (Semen Trigonellae)
Ma Huang (Herba Ephedrae)
Rou Gui (Cortex Cinnamomi)
Xi Xin (Herba Asari)
Xian Mao (Rhizoma Curculiginis)
Yin Yang Huo (Herba Epimedii)

***Zhuo bi* (fixed painful obstruction)**
Bi Xie (Rhizoma Dioscoreae Hypoglaucae)
Can Sha (Excrementum Bombycis Mori)
Cang Er Zi (Fructus Xanthii)
Cang Zhu (Rhizoma Atractylodis)
Du Huo (Radix Angelicae Pubescentis)
Mu Gua (Fructus Chaenomelis)
Qiang Huo (Rhizoma et Radix Notopterygii)
Shi Chang Pu (Rhizoma Acori)
Song Jie (Lignum Pini Nodi)
Yi Yi Ren (Semen Coicis)

***Shi re bi* (damp-heat painful obstruction)**
Chou Wu Tong (Folium Clerodendri Trichotomi)
Chuan Mu Tong (Caulis Clematidis Armandii)
Di Long (Pheretima)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Hai Tong Pi (Cortex Erythrinae)
Huang Bai (Cortex Phellodendri)
Luo Shi Teng (Caulis Trachelospermi)
Qin Jiao (Radix Gentianae Macrophyllae)
Xi Xian Cao (Herba Siegesbeckiae)

***Re bi* (heat painful obstruction)**
Bai Xian Pi (Cortex Dictamni)
Hong Teng (Caulis Sargentodoxae)
Ren Dong Teng (Caulis Lonicerae)
Sang Zhi (Ramulus Mori)

6. Bleeding
Cold in the blood
Ai Ye (Folium Artemisiae Argyi)
Fu Long Gan (Terra Flava Usta)

Heat in the blood
Bai Mao Gen (Rhizoma Imperatae)
Ce Bai Ye (Cacumen Platycladi)
Da Huang (Radix et Rhizoma Rhei)
Da Ji (Herba seu Radix Cirsii Japonici)
Dai Zhe Shi (Haematitum)
Di Gu Pi (Cortex Lycii)
Di Yu (Radix Sanguisorbae)
Guan Zhong (Rhizoma Dryopteridis)
Huai Hua (Flos Sophorae)
Huai Jiao (Fructus Sophorae)
Huang Qin (Radix Scutellariae)
Ma Bo (Lasiosphaera seu Calvatia)
Mu Zei (Herba Equiseti Hiemalis)
Niu Xi (Radix Cyathulae seu Achyranthis)
Qian Cao (Radix Rubiae)
Sang Ye (Folium Mori)
Shi Wei (Folium Pyrrosiae)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xiao Ji (Herba Cirsii)
Yu Jin (Radix Curcumae)
Zhi Zi (Fructus Gardeniae)

Blood stagnation
Hua Rui Shi (Ophicalcitum)
San Qi (Radix Notoginseng)

Others
Bai Ji (Rhizoma Bletillae)
Hai Piao Xiao (Endoconcha Sepiae)
Ou Jie (Nodus Nelumbinis Rhizomatis)
Pu Huang (Pollen Typhae)
Xian He Cao (Herba Agrimoniae)
Zi Zhu (Folium Callicarpae)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

7. Breast abscess
Bai Zhi (Radix Angelicae Dahuricae)

Ban Xia (Rhizoma Pinelliae)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Gua Lou Ren (Semen Trichosanthis)
Lou Lu (Radix Rhapontici)
Mang Xiao (Natrii Sulfas)
Ming Fan (Alumen)
Pu Gong Ying (Herba Taraxaci)
Si Gua Luo (Retinervus Luffae Fructus)
Tian Hua Fen (Radix Trichosanthis)
Wang Bu Liu Xing (Semen Vaccariae)

8. Burns

Bai Wei (Radix Cynanchi Atrati)
Ce Bai Ye (Cacumen Platycladi)
Da Huang (Radix et Rhizoma Rhei)
Di Yu (Radix Sanguisorbae)
Han Shui Shi (Mirabilite)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Bai (Cortex Phellodendri)
Shi Gao (Gypsum Fibrosum)
Zi Zhu (Folium Callicarpae)

9. Cancer

Stomach

Bai Hua She She Cao (Herba Oldenlandia)
Long Kui (Herba Solanum Nigrum)
Peng Sha (Borax)

Lung

Bai Hua She She Cao (Herba Oldenlandia)
Ban Zhi Lian (Herba Scutellariae Barbatae)

Liver

Ban Mao (Mylabris)
Ban Zhi Lian (Herba Scutellariae Barbatae)
Ma Qian Zi (Semen Strychni)

Throat

Shan Dou Gen (Radix Sophorae Tonkinensis)
Tian Kui Zi (Radix Semiaquilegiae)

Urinary bladder

Tian Kui Zi (Radix Semiaquilegiae)

Rectal

Er Cha (Catechu)
Huang Jing (Rhizoma Polygonati)
Peng Sha (Borax)

Lymphatic

Tian Kui Zi (Radix Semiaquilegiae)

Breast

Lu Feng Fang (Nidus Vespae)
Shan Ci Gu (Pseudobulbus Cremastrae)
Tian Kui Zi (Radix Semiaquilegiae)

Cervical

E Zhu (Rhizoma Curcumae)
Long Kui (Herba Solanum Nigrum)

10. Carbuncles and furuncles

Yang type

Bai Hua She She Cao (Herba Oldenlandia)
Bai Ji (Rhizoma Bletillae)
Bai Jiang Cao (Herba cum Radice Patriniae)
Bai Wei (Radix Cynanchi Atrati)
Bai Xian Pi (Cortex Dictamni)
Bai Zhi (Radix Angelicae Dahuricae)
Ban Mao (Mylabris)
Ban Xia (Rhizoma Pinelliae)
Bei Mu (Bulbus Fritillaria)
Chi Shao (Radix Paeoniae Rubrae)
Chi Xiao Dou (Semen Phaseoli)
Chuan Shan Jia (Squama Manis)
Chuan Xin Lian (Herba Andrographis)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Cong Bai (Bulbus Allii Fistulosi)
Da Huang (Radix et Rhizoma Rhei)
Da Ji (Radix Euphorbiae seu Knoxiae)
Dan Shen (Radix Salviae Miltiorrhizae)
Gan Cao (Radix Glycyrrhizae)
Gan Sui (Radix Euphorbiae Kansui)
He Huan Pi (Cortex Albiziae)
He Shou Wu (Radix Polygoni Multiflori)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Huang Yao Zi (Herba Dioscoreae Bulbiferae)
Jiang Can (Bombyx Batryticatus)
Jin Qian Cao (Herba Lysimachiae)
Jin Yin Hua (Flos Lonicerae)
Jing Jie (Herba Schizonepetae)
Lian Qiao (Fructus Forsythiae)
Lou Lu (Radix Rhapontici)
Lu Dou (Semen Phaseoli Radiati)
Ma Chi Xian (Herba Portulacae)
Mang Xiao (Natrii Sulfas)
Ming Fan (Alumen)
Mu Dan Pi (Cortex Moutan)
Niu Bang Zi (Fructus Arctii)
Niu Huang (Calculus Bovis)
Pu Gong Ying (Herba Taraxaci)
Qian Niu Zi (Semen Pharbitidis)
Qing Dai (Indigo Naturalis)
Quan Xie (Scorpio)
Ru Xiang (Gummi Olibanum)
Shan Ci Gu (Pseudobulbus Cremastrae)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Sheng Ma (Rhizoma Cimicifugae)
Si Gua Luo (Retinervus Luffae Fructus)
Tian Hua Fen (Radix Trichosanthis)
Tu Fu Ling (Rhizoma Smilacis Glabrae)
Wu Gong (Scolopendra)
Xi Xian Cao (Herba Siegesbeckiae)
Xia Ku Cao (Spica Prunellae)
Xiao Ji (Herba Cirisii)
Xiong Huang (Realgar)
Xu Duan (Radix Dipsaci)
Xuan Shen (Radix Scrophulariae)
Yi Mu Cao (Herba Leonuri)
Yu Xing Cao (Herba Houttuyniae)
Yuan Zhi (Radix Polygalae)
Zao Jiao (Fructus Gleditsiae)
Zao Jiao Ci (Spina Gleditsiae)
Ze Lan (Herba Lycopi)
Zhu Dan (Fel Porcus)
Zhu Sha (Cinnabaris)
Zi Hua Di Ding (Herba Violae)
Zi Zhu (Folium Callicarpae)

Yin type

Bai Ji (Rhizoma Bletillae)
Bai Jie Zi (Semen Sinapis)
Ban Mao (Mylabris)
Ban Xia (Rhizoma Pinelliae)
Chuan Shan Jia (Squama Manis)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
E Jiao (Colla Corii Asini)
Er Cha (Catechu)
Hai Piao Xiao (Endoconcha Sepiae)
Huang Qi (Radix Astragali)
Long Gu (Os Draconis)
Lu Lu Tong (Fructus Liquidambaris)
Ma Huang (Herba Ephedrae)
Ma Qian Zi (Semen Strychni)
Ming Fan (Alumen)
Mo Yao (Myrrha)
Qian Dan (Minium)
Qing Fen (Calomelas)
Ren Shen (Radix Ginseng)
Rou Gui (Cortex Cinnamomi)
Ru Xiang (Gummi Olibanum)

Shi Gao (Gypsum Fibrosum)
Shu Di Huang (Radix Rehmanniae Preparata)
Xue Jie (Sanguis Draconis)
Zao Jiao Ci (Spina Gleditsiae)
Zhen Zhu (Margarita)

11. *Chang feng* (intestinal wind)

Ding Shu Xiu (Herba Elephantopus Scaber)
Fang Feng (Radix Saposhnikoviae)
Guan Ye Lian Qiao (Herba Hypericum)
Pao Zai Cao (Herba Physalis Angulatae)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

12. Chest pain

Qi deficiency
Dang Shen (Radix Codonopsis)
Huang Qi (Radix Astragali)
Ren Shen (Radix Ginseng)
Tai Zi Shen (Radix Pseudostellariae)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xi Yang Shen (Radix Panacis Quinquefolii)

Qi stagnation
Chen Xiang (Lignum Aquilariae Resinatum)
Qing Mu Xiang (Radix Aristolochiae)
Tan Xiang (Lignum Santali Albi)
Wu Yao (Radix Linderae)
Zhi Ke (Fructus Aurantii)
Zhi Shi (Fructus Aurantii Immaturus)

Blood stagnation
Bai Jiang Cao (Herba cum Radice Patriniae)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Dan Shen (Radix Salviae Miltiorrhizae)
Hong Hua (Flos Carthami)
Jiang Huang (Rhizoma Curcumae Longae)
Jiang Xiang (Lignum Dalbergiae Odoriferae)
Mao Dong Qing (Radix Ilicis Pubescentis)
Shan Zha (Fructus Crataegi)
Wu Ling Zhi (Excrementum Trogopteri seu Pteromi)
Yan Hu Suo (Rhizoma Corydalis)
Yu Jin (Radix Curcumae)

Phlegm stagnation
Bai Jie Zi (Semen Sinapis)
Ban Xia (Rhizoma Pinelliae)
Chen Pi (Pericarpium Citri Reticulatae)
Gua Lou Shi (Fructus Trichosanthis)
Gui Zhi (Ramulus Cinnamomi)
Hou Po (Cortex Magnoliae Officinalis)
Xie Bai (Bulbus Allii Macrostemonis)
Zhi Shi (Fructus Aurantii Immaturus)

Yang deficiency
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gui Zhi (Ramulus Cinnamomi)
Xie Bai (Bulbus Allii Macrostemonis)
Yin Yang Huo (Herba Epimedii)

13. Constipation

Excess heat
Da Huang (Radix et Rhizoma Rhei)
Fan Xie Ye (Folium Sennae)
Hou Po (Cortex Magnoliae Officinalis)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Jue Ming Zi (Semen Cassiae)
Lu Hui (Aloe)
Mang Xiao (Natrii Sulfas)
Zhi Shi (Fructus Aurantii Immaturus)
Zhu Dan (Fel Porcus)

Heat and dryness
Dang Gui (Radicis Angelicae Sinensis)
Dong Kui Zi (Semen Malvae)
Feng Mi (Mel)
Gua Lou Ren (Semen Trichosanthis)
He Shou Wu (Radix Polygoni Multiflori)
Hei Zhi Ma (Semen Sesami Nigrum)
Hu Tao Ren (Semen Juglandis)
Huo Ma Ren (Fructus Cannabis)
Jue Ming Zi (Semen Cassiae)
Rou Cong Rong (Herba Cistanches)
Sang Shen Zi (Fructus Mori)
Sheng Di Huang (Radix Rehmanniae)
Su Zi (Fructus Perillae)
Suo Yang (Herba Cynomorii)
Tao Ren (Semen Persicae)
Tian Men Dong (Radix Asparagi)
Xing Ren (Semen Armeniacae Amarum)
Yu Li Ren (Semen Pruni)

Qi stagnation
Bing Lang (Semen Arecae)
Chen Xiang (Lignum Aquilariae Resinatum)
Zhi Ke (Fructus Aurantii)

Deficiency
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Bai Zi Ren (Semen Platycladi)
Feng Mi (Mel)
Hei Zhi Ma (Semen Sesami Nigrum)

Cold
Ba Dou (Fructus Crotonis)
Hei Zhi Ma (Semen Sesami Nigrum)
Liu Huang (Sulfur)
Rou Cong Rong (Herba Cistanches)

Collapse of *zhong* (central) *qi*
Chai Hu (Radix Bupleuri)
Ge Gen (Radix Puerariae)
Gui Zhi (Ramulus Cinnamomi)
Huang Qi (Radix Astragali)
Ren Shen (Radix Ginseng)
Sheng Ma (Rhizoma Cimicifugae)
Zhi Ke (Fructus Aurantii)
Zhi Shi (Fructus Aurantii Immaturus)

14. Convulsions

Excess heat
Long Dan Cao (Radix Gentianae)
Niu Huang (Calculus Bovis)
Qing Dai (Indigo Naturalis)

Febrile disorders
Ling Yang Jiao (Cornu Saigae Tataricae)
Niu Huang (Calculus Bovis)
She Xiang (Moschus)

Heat and phlegm
Jiang Can (Bombyx Batryticatus)
Niu Huang (Calculus Bovis)

Liver yang rising
Gui Ban (Plastrum Testudinis)
Hu Po (Succinum)
Long Gu (Os Draconis)
Zhen Zhu (Margarita)

Wind and phlegm
Bai Fu Zi (Rhizoma Typhonii)
Bai Hua She (Bungarus Parvus)
Gan Sui (Radix Euphorbiae Kansui)
Hu Po (Succinum)
Li Lu (Radix et Rhizoma Veratri)
Meng Shi (Lapis Micae seu Chloriti)
Ming Fan (Alumen)
Quan Xie (Scorpio)
Tian Nan Xing (Rhizoma Arisaematis)
Tian Zhu Huang (Concretio Silicea Bambusae)

Wu Gong (Scolopendra)
Wu Shao She (Zaocys)
Xiong Huang (Realgar)
Zao Jiao (Fructus Gleditsiae)
Zhu Li (Succus Bambusae)

15. Cough

Wind-cold

Bai Qian (Rhizoma Cynanchi Stauntonii)
Ma Huang (Herba Ephedrae)
Sheng Jiang (Rhizoma Zingiberis Recens)
Xing Ren (Semen Armeniacae Amarum)
Zi Su Ye (Folium Perillae)

Wind-heat

Jie Geng (Radix Platycodonis)
Ju Hua (Flos Chrysanthemi)
Lu Gen (Rhizoma Phragmitis)
Niu Bang Zi (Fructus Arctii)
Qian Hu (Radix Peucedani)
Sang Ye (Folium Mori)

Dry-heat

Bai Bu (Radix Stemonae)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Fei Zi (Semen Torreyae)
Gan Cao (Radix Glycyrrhizae)
Kuan Dong Hua (Flos Farfarae)
Sang Ye (Folium Mori)
Zhi Mu (Radix Anemarrhenae)
Zi Wan (Radix Asteris)

Cold phlegm

Bai Jie Zi (Semen Sinapis)
Bai Qian (Rhizoma Cynanchi Stauntonii)
Gan Jiang (Rhizoma Zingiberis)
Lai Fu Zi (Semen Raphani)
Tian Nan Xing (Rhizoma Arisaematis)
Xuan Fu Hua (Flos Inulae)
Yuan Hua (Flos Genkwa)

Damp phlegm

Ban Xia (Rhizoma Pinelliae)
Chen Pi (Pericarpium Citri Reticulatae)
Lai Fu Zi (Semen Raphani)
Su Zi (Fructus Perillae)
Tian Nan Xing (Rhizoma Arisaematis)
Xiang Yuan (Fructus Citri)
Yuan Hua (Flos Genkwa)

Hot phlegm

Ce Bai Ye (Cacumen Platycladi)
Che Qian Zi (Semen Plantaginis)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Chuan Xin Lian (Herba Andrographis)
Dan Nan Xing (Arisaema cum Bile)
Di Gu Pi (Cortex Lycii)
Gua Lou Shi (Fructus Trichosanthis)
Hai Ge Fen (Concha Meretricis seu Cyclinae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Ma Dou Ling (Fructus Aristolochiae)
Meng Shi (Lapis Micae seu Chloriti)
Pang Da Hai (Semen Sterculiae Lychnophorae)
Peng Sha (Borax)
Qian Hu (Radix Peucedani)
Qing Dai (Indigo Naturalis)
Sang Bai Pi (Cortex Mori)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Gan (Rhizoma Belamcandae)
Shi Wei (Folium Pyrrosiae)
Tian Zhu Huang (Concretio Silicea Bambusae)
Zhe Bei Mu (Bulbus Fritillariae Thunbergii)
Zhi Mu (Radix Anemarrhenae)
Zhu Dan (Fel Porcus)
Zhu Li (Succus Bambusae)
Zhu Ru (Caulis Bambusae in Taenia)

Qi deficiency

Dang Shen (Radix Codonopsis)
Feng Mi (Mel)
Ge Jie (Gecko)
He Zi (Fructus Chebulae)
Hu Tao Ren (Semen Juglandis)
Huang Qi (Radix Astragali)
Ren Shen (Radix Ginseng)
Shan Yao (Rhizoma Dioscoreae)
Tai Zi Shen (Radix Pseudostellariae)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xi Yang Shen (Radix Panacis Quinquefolii)
Yi Tang (Saccharum Granorum)
Ying Su Ke (Pericarpium Papaveris Somniferi)

Yin deficiency

Bai Bu (Radix Stemonae)
Bai He (Bulbus Lilii)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
E Jiao (Colla Corii Asini)
Gou Qi Zi (Fructus Lycii)
Huang Jing (Rhizoma Polygonati)
Mai Men Dong (Radix Ophiopogonis)
Sha Shen (Radix Glehniae seu Adenophorae)
Tian Men Dong (Radix Asparagi)
Yu Zhu (Rhizoma Polygonati Odorati)
Zhi Mu (Radix Anemarrhenae)

Lung heat

Bai Mao Gen (Rhizoma Imperatae)
Che Qian Zi (Semen Plantaginis)
Chuan Xin Lian (Herba Andrographis)
Di Gu Pi (Cortex Lycii)
Er Cha (Catechu)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Qin (Radix Scutellariae)
Lu Gen (Rhizoma Phragmitis)
Ma Bo (Lasiosphaera seu Calvatia)
Ma Dou Ling (Fructus Aristolochiae)
Shi Gao (Gypsum Fibrosum)
Shi Wei (Folium Pyrrosiae)
Tian Hua Fen (Radix Trichosanthis)
Xia Ku Cao (Spica Prunellae)
Yu Xing Cao (Herba Houttuyniae)
Zhi Mu (Radix Anemarrhenae)
Zhu Dan (Fel Porcus)
Zhu Ru (Caulis Bambusae in Taenia)

16. Diarrhea

Qi stagnation

Bing Lang (Semen Arecae)
Xiang Fu (Rhizoma Cyperi)

Damp-cold

Cao Dou Kou (Semen Alpiniae Katsumadai)
Cao Guo (Fructus Tsaoko)
Sha Ren (Fructus Amomi)

Accumulation of water and dampness

Fu Ling (Poria)
Ze Xie (Rhizoma Alismatis)

Accumulation of summer-heat and dampness

Che Qian Zi (Semen Plantaginis)
Hua Shi (Talcum)

Spleen deficiency
Ai Ye (Folium Artemisiae Argyi)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Bian Dou (Semen Lablab Album)
Fu Ling (Poria)
Gan Cao (Radix Glycyrrhizae)
Ge Gen (Radix Puerariae)
Lian Zi (Semen Nelumbinis)
Qian Shi (Semen Euryales)
Shan Yao (Rhizoma Dioscoreae)
Sheng Ma (Rhizoma Cimicifugae)
Tu Si Zi (Semen Cuscutae)
Xian He Cao (Herba Agrimoniae)
Yi Yi Ren (Semen Coicis)

Kidney deficiency
Bu Gu Zhi (Fructus Psoraleae)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Wu Zhu Yu (Fructus Evodiae)
Yi Zhi Ren (Fructus Alpiniae Oxyphyllae)

Spleen and Kidney deficiencies
Chi Shi Zhi (Halloysitum Rubrum)
Chun Gen Pi (Cortex Ailanthi)
He Zi (Fructus Chebulae)
Jin Ying Zi (Fructus Rosae Laevigatae)
Rou Dou Kou (Semen Myristicae)
Shi Liu Pi (Pericarpium Granati)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Ying Su Ke (Pericarpium Papaveris Somniferi)
Yu Yu Liang (Limonitum)

17. Dizziness

Liver yang rising
Bai Ji Li (Fructus Tribuli)
Bai Shao (Radix Paeoniae Alba)
Ci Shi (Magnetitum)
Dai Zhe Shi (Haematitum)
Du Zhong (Cortex Eucommiae)
Gou Teng (Ramulus Uncariae cum Uncis)
Gui Ban (Plastrum Testudinis)
Ju Hua (Flos Chrysanthemi)
Jue Ming Zi (Semen Cassiae)
Ling Yang Jiao (Cornu Saigae Tataricae)
Long Gu (Os Draconis)
Lu Dou Yi (Pericarpium Phaseoli Radiati)
Mu Li (Concha Ostreae)
Qing Xiang Zi (Semen Celosiae)
Shi Jue Ming (Concha Haliotidis)
Tian Ma (Rhizoma Gastrodiae)
Xia Ku Cao (Spica Prunellae)
Zhen Zhu Mu (Concha Margaritaferae)

Liver fire rising
Gou Teng (Ramulus Uncariae cum Uncis)
Hua Jiao (Pericarpium Zanthoxyli)
Huai Hua (Flos Sophorae)
Ju Hua (Flos Chrysanthemi)
Ling Yang Jiao (Cornu Saigae Tataricae)
Long Dan Cao (Radix Gentianae)
Lu Hui (Aloe)
Qing Xiang Zi (Semen Celosiae)
Xia Ku Cao (Spica Prunellae)

Liver wind rising
Gou Teng (Ramulus Uncariae cum Uncis)
Ju Hua (Flos Chrysanthemi)
Ling Yang Jiao (Cornu Saigae Tataricae)
Tian Ma (Rhizoma Gastrodiae)

Blood deficiency
Bai Shao (Radix Paeoniae Alba)
Dang Gui (Radicis Angelicae Sinensis)
E Jiao (Colla Corii Asini)
He Shou Wu (Radix Polygoni Multiflori)
Long Yan Rou (Arillus Longan)
Lu Dou Yi (Pericarpium Phaseoli Radiati)
Sang Shen Zi (Fructus Mori)
Shu Di Huang (Radix Rehmanniae Preparata)
Zi He Che (Placenta Hominis)

Qi deficiency
Dang Shen (Radix Codonopsis)
Huang Qi (Radix Astragali)
Ren Shen (Radix Ginseng)
Tai Zi Shen (Radix Pseudostellariae)
Xi Yang Shen (Radix Panacis Quinquefolii)

Yin deficiency
Gou Qi Zi (Fructus Lycii)
He Shou Wu (Radix Polygoni Multiflori)
Hei Zhi Ma (Semen Sesami Nigrum)
Huang Jing (Rhizoma Polygonati)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Sang Shen Zi (Fructus Mori)
Shan Yao (Rhizoma Dioscoreae)
Shan Zhu Yu (Fructus Corni)
Shu Di Huang (Radix Rehmanniae Preparata)
Zi He Che (Placenta Hominis)

Yang deficiency
Lu Lu Tong (Fructus Liquidambaris)
Sha Yuan Zi (Semen Astragali Complanati)
Shan Zhu Yu (Fructus Corni)
Tu Si Zi (Semen Cuscutae)
Zi He Che (Placenta Hominis)

Phlegm stagnation
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Ban Xia (Rhizoma Pinelliae)
Fu Ling (Poria)
Tian Nan Xing (Rhizoma Arisaematis)
Ze Xie (Rhizoma Alismatis)
Zhu Ru (Caulis Bambusae in Taenia)

18. Dysentery

Damp-heat
Bai Tou Weng (Radix Pulsatillae)
Chuan Xin Lian (Herba Andrographis)
Da Huang (Radix et Rhizoma Rhei)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Jin Yin Hua (Flos Lonicerae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Ma Chi Xian (Herba Portulacae)
Qin Pi (Cortex Fraxini)
Xian He Cao (Herba Agrimoniae)
Ya Dan Zi (Fructus Bruceae)

Damp-cold
Cang Zhu (Rhizoma Atractylodis)
Hou Po (Cortex Magnoliae Officinalis)
Mu Xiang (Radix Aucklandiae)
Pao Jiang (Rhizoma Zingiberis Preparatum)
Rou Gui (Cortex Cinnamomi)

Fulminant dysentery
Bai Tou Weng (Radix Pulsatillae)
Chi Shao (Radix Paeoniae Rubrae)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Jin Yin Hua (Flos Lonicerae)
Qin Pi (Cortex Fraxini)
Ya Dan Zi (Fructus Bruceae)
Zhu Dan (Fel Porcus)

Recurrent dysentery
Bai Tou Weng (Radix Pulsatillae)
Huang Lian (Rhizoma Coptidis)

Ku Shen Gen (Radix Sophorae Flavescentis)
Ya Dan Zi (Fructus Bruceae)

Fasting dysentery
Shi Chang Pu (Rhizoma Acori)
Shi Lian Zi (Herba Sinocrassulae Indicae)

19. Edema

Edema with exterior syndrome
Fu Ping (Herba Spirodelae)
Gui Zhi (Ramulus Cinnamomi)
Ma Huang (Herba Ephedrae)
Xiang Ru (Herba Elsholtziae seu Moslae)

Edema (General)
Da Fu Pi (Pericarpium Arecae)
Sang Bai Pi (Cortex Mori)
Sheng Jiang Pi (Pericarpium Zingiberis Recens)
Wu Jia Pi (Cortex Acanthopanacis)

Yang deficiency
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gui Zhi (Ramulus Cinnamomi)
Rou Gui (Cortex Cinnamomi)

Spleen deficiency
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Fu Ling (Poria)
Yi Yi Ren (Semen Coicis)

Damp-cold
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gui Zhi (Ramulus Cinnamomi)
Wu Jia Pi (Cortex Acanthopanacis)

Accumulation of water
Chi Xiao Dou (Semen Phaseoli)
Sang Bai Pi (Cortex Mori)
Shi Wei (Folium Pyrrosiae)
Ting Li Zi (Semen Descurainiae seu Lepidii)
Wu Jia Pi (Cortex Acanthopanacis)
Yi Mu Cao (Herba Leonuri)
Ze Lan (Herba Lycopi)
Ze Xie (Rhizoma Alismatis)

Damp-heat
Ba Dou (Fructus Crotonis)
Bai Mao Gen (Rhizoma Imperatae)
Ban Bian Lian (Herba Lobeliae Chinensis)
Che Qian Zi (Semen Plantaginis)
Da Ji (Radix Euphorbiae seu Knoxiae)
Dong Gua Pi (Exocarpium Benincasae)
Dong Kui Zi (Semen Malvae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Gan Sui (Radix Euphorbiae Kansui)
Hai Zao (Sargassum)
Kun Bu (Thallus Laminariae seu Eckloniae)
Qian Niu Zi (Semen Pharbitidis)
Shi Wei (Folium Pyrrosiae)
Ting Li Zi (Semen Descurainiae seu Lepidii)
Yuan Hua (Flos Genkwa)

20. Eye disorders

Wind-heat
Bai Ji Li (Fructus Tribuli)
Bo He (Herba Menthae)
Chan Tui (Periostracum Cicadae)
Chi Shao (Radix Paeoniae Rubrae)
Gu Jing Cao (Flos Eriocauli)
Jiang Can (Bombyx Batryticatus)
Ju Hua (Flos Chrysanthemi)
Jue Ming Zi (Semen Cassiae)
Man Jing Zi (Fructus Viticis)
Mu Zei (Herba Equiseti Hiemalis)
Sang Ye (Folium Mori)

Liver heat
Che Qian Cao (Herba Plantaginis)
Chi Shao (Radix Paeoniae Rubrae)
Chong Wei Zi (Semen Leonuri)
Da Huang (Radix et Rhizoma Rhei)
Jiang Can (Bombyx Batryticatus)
Ju Hua (Flos Chrysanthemi)
Jue Ming Zi (Semen Cassiae)
Ling Yang Jiao (Cornu Saigae Tataricae)
Mang Xiao (Natrii Sulfas)
Mi Meng Hua (Flos Buddlejae)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Qing Xiang Zi (Semen Celosiae)
Sang Ye (Folium Mori)
Shi Jue Ming (Concha Haliotidis)
Xia Ku Cao (Spica Prunellae)
Zhen Zhu Mu (Concha Margaritaferae)
Zi Hua Di Ding (Herba Violae)

Dizziness due to Liver deficiency
Gou Qi Zi (Fructus Lycii)
Hei Zhi Ma (Semen Sesami Nigrum)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Sang Shen Zi (Fructus Mori)
Sha Yuan Zi (Semen Astragali Complanati)
Shi Hu (Herba Dendrobii)
Tu Si Zi (Semen Cuscutae)

21. Fever

Yin deficiency heat
Bai Wei (Radix Cynanchi Atrati)
Bie Jia (Carapax Trionycis)
Di Gu Pi (Cortex Lycii)
Hu Huang Lian (Rhizoma Picrorhizae)
Huang Lian (Rhizoma Coptidis)
Mu Dan Pi (Cortex Moutan)
Qin Jiao (Radix Gentianae Macrophyllae)
Qing Hao (Herba Artemisiae Annuae)
Yin Chai Hu (Radix Stellariae)
Zhi Mu (Radix Anemarrhenae)

Qi deficiency with heat
Gan Cao (Radix Glycyrrhizae)
Huang Qi (Radix Astragali)
Ren Shen (Radix Ginseng)

Liver qi stagnation and Liver heat
Bo He (Herba Menthae)
Chai Hu (Radix Bupleuri)
Long Dan Cao (Radix Gentianae)
Mu Dan Pi (Cortex Moutan)
Zhi Zi (Fructus Gardeniae)

Blood stagnation with heat
Chi Shao (Radix Paeoniae Rubrae)
Dan Shen (Radix Salviae Miltiorrhizae)
Mu Dan Pi (Cortex Moutan)
Niu Xi (Radix Cyathulae seu Achyranthis)
Pu Huang (Pollen Typhae)
Wu Ling Zhi (Excrementum Trogopteri seu Pteromi)
Yi Mu Cao (Herba Leonuri)

22. Fungal infection

Ba Dou (Fructus Crotonis)
Ban Mao (Mylabris)
Chuan Lian Zi (Fructus Toosendan)
Ci Shi (Magnetitum)
Da Feng Zi (Semen Hydnocarpi)
Da Suan (Bulbus Alli Sativi)
Hai Tong Pi (Cortex Erythrinae)
Ku Lian Zi (Fructus Meliae)
Lu Hui (Aloe)
Qing Fen (Calomelas)
She Chuang Zi (Fructus Cnidii)
Wu Yi (Fructus Ulmi Praeparatus)

Xiong Huang (Realgar)
Xu Chang Qing (Radix Cynanchi Paniculati)
Yuan Hua (Flos Genkwa)
Zhang Nao (Camphora)

23. *Gan ji* (infantile malnutrition)

Di Gu Pi (Cortex Lycii)
Hu Huang Lian (Rhizoma Picrorhizae)
Ji Nei Jin (Endothelium Corneum Gigeriae Galli)
Shi Jun Zi (Fructus Quisqualis)
Yi Tang (Saccharum Granorum)
Yin Chai Hu (Radix Stellariae)

24. Headache

Wind-cold

Bai Zhi (Radix Angelicae Dahuricae)
Cang Er Zi (Fructus Xanthii)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Du Huo (Radix Angelicae Pubescentis)
Fang Feng (Radix Saposhnikoviae)
Gao Ben (Rhizoma Ligustici)
Gui Zhi (Ramulus Cinnamomi)
Jing Jie (Herba Schizonepetae)
Ma Huang (Herba Ephedrae)
Qiang Huo (Rhizoma et Radix Notopterygii)
Xi Xin (Herba Asari)
Xiang Ru (Herba Elsholtziae seu Moslae)
Xin Yi Hua (Flos Magnoliae)
Zi Su Ye (Folium Perillae)

Wind-heat

Bo He (Herba Menthae)
Chan Tui (Periostracum Cicadae)
Dan Dou Chi (Semen Sojae Praeparatum)
Jiang Can (Bombyx Batryticatus)
Jin Yin Hua (Flos Lonicerae)
Jing Jie (Herba Schizonepetae)
Ju Hua (Flos Chrysanthemi)
Lian Qiao (Fructus Forsythiae)
Mu Zei (Herba Equiseti Hiemalis)
Niu Bang Zi (Fructus Arctii)
Sang Ye (Folium Mori)

Wind-dampness

Bai Zhi (Radix Angelicae Dahuricae)
Cang Er Zi (Fructus Xanthii)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Du Huo (Radix Angelicae Pubescentis)
Fang Feng (Radix Saposhnikoviae)
Gao Ben (Rhizoma Ligustici)
Qiang Huo (Rhizoma et Radix Notopterygii)

Liver yang rising

Bai Ji Li (Fructus Tribuli)
Ci Shi (Magnetitum)
Dai Zhe Shi (Haematitum)
Gou Teng (Ramulus Uncariae cum Uncis)
Huai Hua (Flos Sophorae)
Huai Jiao (Fructus Sophorae)
Ju Hua (Flos Chrysanthemi)
Ling Yang Jiao (Cornu Saigae Tataricae)
Long Gu (Os Draconis)
Mu Li (Concha Ostreae)
Shi Jue Ming (Concha Haliotidis)
Tian Ma (Rhizoma Gastrodiae)
Zhen Zhu Mu (Concha Margaritaferae)

Qi deficiency

Chai Hu (Radix Bupleuri)
Dang Shen (Radix Codonopsis)
Ge Gen (Radix Puerariae)
Huang Qi (Radix Astragali)
Ren Shen (Radix Ginseng)
Sheng Ma (Rhizoma Cimicifugae)
Tai Zi Shen (Radix Pseudostellariae)
Xi Yang Shen (Radix Panacis Quinquefolii)

Kidney deficiency

Gou Qi Zi (Fructus Lycii)
He Shou Wu (Radix Polygoni Multiflori)
Shan Zhu Yu (Fructus Corni)
Shu Di Huang (Radix Rehmanniae Preparata)

Blood deficiency

Bai Shao (Radix Paeoniae Alba)
Dang Gui (Radicis Angelicae Sinensis)
Gou Qi Zi (Fructus Lycii)
He Shou Wu (Radix Polygoni Multiflori)
Lu Dou Yi (Pericarpium Phaseoli Radiati)
Sang Shen Zi (Fructus Mori)
Shu Di Huang (Radix Rehmanniae Preparata)

Blood stagnation

Chuan Niu Xi (Radix Cyathulae)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)

Phlegm stagnation

Bai Fu Zi (Rhizoma Typhonii)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Ban Xia (Rhizoma Pinelliae)

Stubborn headache

Bai Fu Zi (Rhizoma Typhonii)
Quan Xie (Scorpio)
Wu Gong (Scolopendra)
Xi Xin (Herba Asari)

Channel guiding herbs

Taiyang channels: *Qiang Huo* (Rhizoma et Radix Notopterygii)
Shaoyang channels: *Chai Hu* (Radix Bupleuri)
Yangming channels: *Bai Zhi* (Radix Angelicae Dahuricae)
Taiyin channels: *Cang Zhu* (Rhizoma Atractylodis)
Shaoyin channels: *Xi Xin* (Herba Asari)
Jueyin channels: *Wu Zhu Yu* (Fructus Evodiae)

25. Hepatitis

Ai Ye (Folium Artemisiae Argyi)
Bai Shao (Radix Paeoniae Alba)
Bai Tou Weng (Radix Pulsatillae)
Ban Lan Gen (Radix Isatidis)
Ban Mao (Mylabris)
Chai Hu (Radix Bupleuri)
Che Qian Cao (Herba Plantaginis)
Chi Shao (Radix Paeoniae Rubrae)
Chui Pen Cao (Herba Sedi)
Da Ji (Radix Euphorbiae seu Knoxiae)
Da Qing Ye (Folium Isatidis)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
Dong Chong Xia Cao (Cordyceps)
Fo Shou (Fructus Citri Sarcodactylis)
Gou Qi Zi (Fructus Lycii)
Guan Zhong (Rhizoma Dryopteridis)
Hai Jin Sha (Herba Lygodii)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Jing (Rhizoma Polygonati)
Huang Qi (Radix Astragali)
Huang Qin (Radix Scutellariae)
Huo Xiang (Herba Agastache)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Ling Zhi (Ganoderma)
Lu Cha (Folium Camellia Sinensis)
Lu Hui (Aloe)
Ma Bian Cao (Herba Verbenae)
Ma Dou Ling (Fructus Aristolochiae)
Ming Fan (Alumen)

Mu Gua (Fructus Chaenomelis)
Mu Zei (Herba Equiseti Hiemalis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Qin Jiao (Radix Gentianae Macrophyllae)
Ren Dong Teng (Caulis Lonicerae)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Shan Yao (Rhizoma Dioscoreae)
Shan Zha (Fructus Crataegi)
Shang Lu (Radix Phytolaccae)
She Xiang (Moschus)
Shui Niu Jiao (Cornu Bubali)
Wu Gong (Scolopendra)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xia Ku Cao (Spica Prunellae)
Xiao Ji (Herba Cirisii)
Yi Yi Ren (Semen Coicis)
Yin Chen Hao (Herba Artemisiae Scopariae)
Zhu Dan (Fel Porcus)

26. Hernial pain

Chuan Lian Zi (Fructus Toosendan)
Li Zhi He (Semen Litchi)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Wu Yao (Radix Linderae)
Wu Zhu Yu (Fructus Evodiae)
Xiao Hui Xiang (Fructus Foeniculi)

27. Hiccups

Bi Cheng Qie (Fructus Litseae)
Chen Xiang (Lignum Aquilariae Resinatum)
Dai Zhe Shi (Haematitum)
Dao Dou (Semen Canavaliae)
Ding Xiang (Flos Caryophylli)
Shi Di (Calyx Kaki)
Xuan Fu Hua (Flos Inulae)

28. Hypochondriac pain

Qi stagnation
Ba Yue Zha (Fructus Akebiae)
Bo He (Herba Menthae)
Chai Hu (Radix Bupleuri)
Chuan Lian Zi (Fructus Toosendan)
Fo Shou (Fructus Citri Sarcodactylis)
Li Zhi He (Semen Litchi)
Qing Mu Xiang (Radix Aristolochiae)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Wu Yao (Radix Linderae)
Xiang Fu (Rhizoma Cyperi)
Zhi Ke (Fructus Aurantii)

Blood stagnation
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Jiang Xiang (Lignum Dalbergiae Odoriferae)
Pu Huang (Pollen Typhae)
Yan Hu Suo (Rhizoma Corydalis)
Yu Jin (Radix Curcumae)

Alternation of cold and heat
Chai Hu (Radix Bupleuri)
Huang Qin (Radix Scutellariae)
Yu Jin (Radix Curcumae)

Hypochondriac fullness and pain
Chai Hu (Radix Bupleuri)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Xiang Fu (Rhizoma Cyperi)
Zhi Ke (Fructus Aurantii)

Stabbing pain in the hypochondrium
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Dan Shen (Radix Salviae Miltiorrhizae)
Hong Hua (Flos Carthami)
Yan Hu Suo (Rhizoma Corydalis)

Hardness and pain of the hypochondrium
Bie Jia (Carapax Trionycis)
Chuan Shan Jia (Squama Manis)
Gui Ban (Plastrum Testudinis)
Mu Li (Concha Ostreae)

With prolonged edema
Ting Li Zi (Semen Descurainiae seu Lepidii)

With liver abscess
Bai Shao (Radix Paeoniae Alba)
Chuan Lian Zi (Fructus Toosendan)
He Huan Pi (Cortex Albiziae)
Mu Dan Pi (Cortex Moutan)

29. Indigestion

Ban Xia (Rhizoma Pinelliae)
Cang Zhu (Rhizoma Atractylodis)
Da Huang (Radix et Rhizoma Rhei)
Ji Nei Jin (Endothelium Corneum Gigeriae Galli)
Lu Cha (Folium Camellia Sinensis)
Mai Ya (Fructus Hordei Germinatus)
Rou Dou Kou (Semen Myristicae)
Shan Zha (Fructus Crataegi)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Zhu Yu (Fructus Evodiae)
Zhu Dan (Fel Porcus)

30. Insomnia

Bai He (Bulbus Lilii)
Bai Jiang Cao (Herba cum Radice Patriniae)
Bai Shao (Radix Paeoniae Alba)
Chan Tui (Periostracum Cicadae)
Hou Po (Cortex Magnoliae Officinalis)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Long Dan Cao (Radix Gentianae)
Mai Men Dong (Radix Ophiopogonis)
Qin Jiao (Radix Gentianae Macrophyllae)
Suan Zao Ren (Semen Zizyphi Spinosae)
Tian Ma (Rhizoma Gastrodiae)
Tian Nan Xing (Rhizoma Arisaematis)
Wu Jia Pi (Cortex Acanthopanacis)
Xie Cao (Radix et Rhizoma Valerianae)
Zhi Zi (Fructus Gardeniae)

31. Intestinal abscess

Bai Hua She She Cao (Herba Oldenlandia)
Bai Jiang Cao (Herba cum Radice Patriniae)
Dong Gua Zi (Semen Benincasae)
Gua Lou Ren (Semen Trichosanthis)
Gua Lou Shi (Fructus Trichosanthis)
Hong Hua (Flos Carthami)
Hong Teng (Caulis Sargentodoxae)
Jin Yin Hua (Flos Lonicerae)
Ma Chi Xian (Herba Portulacae)
Mo Yao (Myrrha)
Mu Dan Pi (Cortex Moutan)
Ru Xiang (Gummi Olibanum)
Tao Ren (Semen Persicae)
Yi Yi Ren (Semen Coicis)
Zi Hua Di Ding (Herba Violae)

32. Jaundice

Damp-heat
Bai Mao Gen (Rhizoma Imperatae)
Bai Xian Pi (Cortex Dictamni)
Chi Xiao Dou (Semen Phaseoli)
Da Huang (Radix et Rhizoma Rhei)
Hu Zhang (Rhizoma Polygoni Cuspidati)

Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Jin Qian Cao (Herba Lysimachiae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Long Dan Cao (Radix Gentianae)
Pu Gong Ying (Herba Taraxaci)
Qin Jiao (Radix Gentianae Macrophyllae)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Yin Chen Hao (Herba Artemisiae Scopariae)
Yu Jin (Radix Curcumae)
Zhi Zi (Fructus Gardeniae)
Zhu Dan (Fel Porcus)

Damp-cold
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Fu Ling (Poria)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Jiang (Rhizoma Zingiberis)
Rou Gui (Cortex Cinnamomi)
Yin Chen Hao (Herba Artemisiae Scopariae)

33. Lactation difficulties
Bai Ji Li (Fructus Tribuli)
Chuan Mu Tong (Caulis Clematidis Armandii)
Chuan Shan Jia (Squama Manis)
Dong Kui Zi (Semen Malvae)
Lou Lu (Radix Rhapontici)
Lu Lu Tong (Fructus Liquidambaris)
Si Gua Luo (Retinervus Luffae Fructus)
Tong Cao (Medulla Tetrapanacis)
Wang Bu Liu Xing (Semen Vaccariae)

34. Leg *qi*
Bing Lang (Semen Arecae)
Ding Shu Xiu (Herba Elephantopus Scaber)
Gan Song (Radix seu Rhizoma Nardostachys)
Hu Lu Ba (Semen Trigonellae)
Ma Bian Cao (Herba Verbenae)
Qing Feng Teng (Caulis Sinomenii)

35. Leukorrhea
Damp-heat
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Ku Shen Gen (Radix Sophorae Flavescentis)
Ze Xie (Rhizoma Alismatis)

Deficiency and cold
Ai Ye (Folium Artemisiae Argyi)
Gou Ji (Rhizoma Cibotii)
Lu Lu Tong (Fructus Liquidambaris)
Yin Guo Ye (Folium Ginkgo)

Damp-cold
Ai Ye (Folium Artemisiae Argyi)
Bai Zhi (Radix Angelicae Dahuricae)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Cang Zhu (Rhizoma Atractylodis)
Hai Piao Xiao (Endoconcha Sepiae)

Kidney deficiency
Hai Piao Xiao (Endoconcha Sepiae)
Jin Ying Zi (Fructus Rosae Laevigatae)
Lian Zi (Semen Nelumbinis)
Long Gu (Os Draconis)
Mu Li (Concha Ostreae)
Qian Shi (Semen Euryales)
Sang Piao Xiao (Ootheca Mantidis)
Sha Yuan Zi (Semen Astragali Complanati)
Tu Si Zi (Semen Cuscutae)

Genital swelling and itching
Bai Bu (Radix Stemonae)
Bai Xian Pi (Cortex Dictamni)
Bian Xu (Herba Polygoni Avicularis)
Cang Zhu (Rhizoma Atractylodis)
Di Fu Zi (Fructus Kochiae)
Hua Jiao (Pericarpium Zanthoxyli)
Huang Bai (Cortex Phellodendri)
Ku Shen Gen (Radix Sophorae Flavescentis)
Long Dan Cao (Radix Gentianae)
She Chuang Zi (Fructus Cnidii)
Xian He Cao (Herba Agrimoniae)

36. Lightheadedness
Febrile disorders
Bing Pian (Borneolum Syntheticum)
She Xiang (Moschus)
Su He Xiang (Styrax)

Accumulation of dampness
Shi Chang Pu (Rhizoma Acori)
Yuan Zhi (Radix Polygalae)

37. *Lin zheng* (dysuria syndrome)
***Re lin* (heat dysuria)**
Bai Hua She (Bungarus Parvus)
Bai Mao Gen (Rhizoma Imperatae)
Bai Wei (Radix Cynanchi Atrati)
Bian Xu (Herba Polygoni Avicularis)
Che Qian Zi (Semen Plantaginis)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Mu Tong (Caulis Clematidis Armandii)
Chuan Xin Lian (Herba Andrographis)
Da Huang (Radix et Rhizoma Rhei)
Deng Xin Cao (Medulla Junci)
Di Fu Zi (Fructus Kochiae)
Di Long (Pheretima)
Dong Kui Zi (Semen Malvae)
Hai Jin Sha (Herba Lygodii)
Hu Po (Succinum)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Hua Shi (Talcum)
Huang Bai (Cortex Phellodendri)
Huang Qin (Radix Scutellariae)
Jin Qian Cao (Herba Lysimachiae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Lu Gen (Rhizoma Phragmitis)
Pu Gong Ying (Herba Taraxaci)
Qu Mai (Herba Dianthi)
Shi Wei (Folium Pyrrosiae)
Tong Cao (Medulla Tetrapanacis)
Tu Fu Ling (Rhizoma Smilacis Glabrae)
Yu Xing Cao (Herba Houttuyniae)
Ze Xie (Rhizoma Alismatis)
Zhi Zi (Fructus Gardeniae)
Zhu Ye (Herba Phyllostachys)

***Xue lin* (bloody dysuria)**
Bai Mao Gen (Rhizoma Imperatae)
Bai Wei (Radix Cynanchi Atrati)
Chi Shao (Radix Paeoniae Rubrae)
Da Ji (Herba seu Radix Cirsii Japonici)
Hai Jin Sha (Herba Lygodii)
Hu Po (Succinum)
Niu Xi (Radix Cyathulae seu Achyranthis)
Pu Huang (Pollen Typhae)
Sheng Di Huang (Radix Rehmanniae)
Shi Wei (Folium Pyrrosiae)
Xiao Ji (Herba Cirsii)

***Shi lin* (stone dysuria)**
Hai Jin Sha (Herba Lygodii)
Hu Po (Succinum)
Ji Nei Jin (Endothelium Corneum Gigeriae Galli)
Jin Qian Cao (Herba Lysimachiae)
Shi Wei (Folium Pyrrosiae)

***Gao lin* (cloudy dysuria)**
Bi Xie (Rhizoma Dioscoreae Hypoglaucae)
Hai Jin Sha (Herba Lygodii)
Shi Chang Pu (Rhizoma Acori)

***Lin zheng* (dysuria syndrome) due to yin deficiency**
Huang Bai (Cortex Phellodendri)
Sheng Di Huang (Radix Rehmanniae)
Zhi Mu (Radix Anemarrhenae)

38. Loss of voice

Wind-cold
Gan Cao (Radix Glycyrrhizae)
Ma Huang (Herba Ephedrae)
Xing Ren (Semen Armeniacae Amarum)

Wind-heat
Chan Tui (Periostracum Cicadae)
Pang Da Hai (Semen Sterculiae Lychnophorae)

Lung yin deficiency
He Zi (Fructus Chebulae)
Mai Men Dong (Radix Ophiopogonis)
Sha Shen (Radix Glehniae seu Adenophorae)

39. Low back pain

Kidney deficiency
Bu Gu Zhi (Fructus Psoraleae)
Dong Chong Xia Cao (Cordyceps)
Du Zhong (Cortex Eucommiae)
Gou Ji (Rhizoma Cibotii)
Gu Sui Bu (Rhizoma Drynariae)
Hu Tao Ren (Semen Juglandis)
Sang Ji Sheng (Herba Taxilli)
Sha Yuan Zi (Semen Astragali Complanati)
Tu Si Zi (Semen Cuscutae)
Xu Duan (Radix Dipsaci)

40. Lung abscess

Bai Jiang Cao (Herba cum Radice Patriniae)
Chuan Xin Lian (Herba Andrographis)
Dong Gua Zi (Semen Benincasae)
Jie Geng (Radix Platycodonis)
Jin Yin Hua (Flos Lonicerae)
Lu Gen (Rhizoma Phragmitis)
Pu Gong Ying (Herba Taraxaci)
Xia Ku Cao (Spica Prunellae)
Yi Yi Ren (Semen Coicis)
Yu Xing Cao (Herba Houttuyniae)

41. Maculae and papules

Heat in the blood
Chi Shao (Radix Paeoniae Rubrae)
Da Qing Ye (Folium Isatidis)
Mu Dan Pi (Cortex Moutan)
Qing Dai (Indigo Naturalis)
Sheng Di Huang (Radix Rehmanniae)
Xuan Shen (Radix Scrophulariae)
Zhang Hong Hua (Flos Crocus Sativus)
Zi Cao Gen (Radix Lithospermi)

Measles
Bo He (Herba Menthae)
Chan Tui (Periostracum Cicadae)
Fu Ping (Herba Spirodelae)
Ge Gen (Radix Puerariae)
Jing Jie (Herba Schizonepetae)
Niu Bang Zi (Fructus Arctii)
Sheng Ma (Rhizoma Cimicifugae)
Xiang Ru (Herba Elsholtziae seu Moslae)
Zi Cao Gen (Radix Lithospermi)

Urticaria
Bai Ji Li (Fructus Tribuli)
Bai Zhi (Radix Angelicae Dahuricae)
Chan Tui (Periostracum Cicadae)
Di Fu Zi (Fructus Kochiae)
Fang Feng (Radix Saposhnikoviae)
Jing Jie (Herba Schizonepetae)
Ku Shen Gen (Radix Sophorae Flavescentis)
She Chuang Zi (Fructus Cnidii)

Eczema
Bai Xian Pi (Cortex Dictamni)
Can Sha (Excrementum Bombycis Mori)
Chuan Xin Lian (Herba Andrographis)
Di Yu (Radix Sanguisorbae)
Hai Piao Xiao (Endoconcha Sepiae)
Hai Tong Pi (Cortex Erythrinae)
Huang Qin (Radix Scutellariae)
Huo Xiang (Herba Agastache)
Liu Huang (Sulfur)
Long Gu (Os Draconis)
Ming Fan (Alumen)
She Chuang Zi (Fructus Cnidii)
Tong Cao (Medulla Tetrapanacis)
Xu Chang Qing (Radix Cynanchi Paniculati)
Zhen Zhu Mu (Concha Margaritaferae)

42. Malaria

Bing Lang (Semen Arecae)
Cao Guo (Fructus Tsaoko)
Chai Hu (Radix Bupleuri)
Chang Shan (Radix Dichroae)
He Shou Wu (Radix Polygoni Multiflori)
Huang Qin (Radix Scutellariae)
Ma Bian Cao (Herba Verbenae)
Qian Dan (Minium)
Qing Hao (Herba Artemisiae Annuae)
Xian He Cao (Herba Agrimoniae)
Xiong Huang (Realgar)
Ya Dan Zi (Fructus Bruceae)
Zhu Sha (Cinnabaris)

43. Menstrual pain

Qi stagnation
Bo He (Herba Menthae)
Chai Hu (Radix Bupleuri)
Chuan Lian Zi (Fructus Toosendan)
Li Zhi He (Semen Litchi)
Wu Yao (Radix Linderae)
Xiang Fu (Rhizoma Cyperi)
Yu Jin (Radix Curcumae)

Blood stagnation
Bai Hua She (Bungarus Parvus)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Shan Jia (Squama Manis)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
E Zhu (Rhizoma Curcumae)
Gui Zhi (Ramulus Cinnamomi)
Hong Hua (Flos Carthami)
Hong Teng (Caulis Sargentodoxae)
Hu Po (Succinum)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Ji Xue Teng (Caulis Spatholobi)
Jiang Huang (Rhizoma Curcumae Longae)
Liu Ji Nu (Herba Artemisiae Anomalae)
Mo Yao (Myrrha)
Mu Dan Pi (Cortex Moutan)
Niu Xi (Radix Cyathulae seu Achyranthis)
Pu Huang (Pollen Typhae)
Qian Cao (Radix Rubiae)
Qu Mai (Herba Dianthi)
Ru Xiang (Gummi Olibanum)
San Leng (Rhizoma Sparganii)
Shan Zha (Fructus Crataegi)
She Xiang (Moschus)
Shui Zhi (Hirudo)
Su Mu (Lignum Sappan)
Tao Ren (Semen Persicae)
Wang Bu Liu Xing (Semen Vaccariae)

Wu Ling Zhi (Excrementum Trogopteri seu Pteromi)
Xue Jie (Sanguis Draconis)
Yan Hu Suo (Rhizoma Corydalis)
Yi Mu Cao (Herba Leonuri)
Yu Jin (Radix Curcumae)
Ze Lan (Herba Lycopi)

Damp-cold
Ai Ye (Folium Artemisiae Argyi)
Gui Zhi (Ramulus Cinnamomi)
Pao Jiang (Rhizoma Zingiberis Preparatum)
Rou Gui (Cortex Cinnamomi)
Wu Yao (Radix Linderae)
Wu Zhu Yu (Fructus Evodiae)

Qi deficiency
Dang Shen (Radix Codonopsis)
Huang Qi (Radix Astragali)
Ren Shen (Radix Ginseng)

Blood deficiency
Bai Shao (Radix Paeoniae Alba)
Dang Gui (Radicis Angelicae Sinensis)
Ji Xue Teng (Caulis Spatholobi)
Shu Di Huang (Radix Rehmanniae Preparata)

44. Nausea and vomiting

Wind-cold
Huo Xiang (Herba Agastache)
Pei Lan (Herba Eupatorii)
Sheng Jiang (Rhizoma Zingiberis Recens)
Xiang Ru (Herba Elsholtziae seu Moslae)
Zi Su Ye (Folium Perillae)

Stomach cold
Bai Dou Kou (Fructus Amomi Rotundus)
Ban Xia (Rhizoma Pinelliae)
Bi Cheng Qie (Fructus Litseae)
Cao Guo (Fructus Tsaoko)
Chen Xiang (Lignum Aquilariae Resinatum)
Dao Dou (Semen Canavaliae)
Ding Xiang (Flos Caryophylli)
Gan Jiang (Rhizoma Zingiberis)
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)
Hu Jiao (Fructus Piper)
Hua Jiao (Pericarpium Zanthoxyli)
Sha Ren (Fructus Amomi)
Sheng Jiang (Rhizoma Zingiberis Recens)
Tan Xiang (Lignum Santali Albi)
Wu Zhu Yu (Fructus Evodiae)
Xiao Hui Xiang (Fructus Foeniculi)

Stomach heat
Bai Mao Gen (Rhizoma Imperatae)
Huang Lian (Rhizoma Coptidis)
Lu Gen (Rhizoma Phragmitis)
Pi Pa Ye (Folium Eriobotryae)
Zhu Ru (Caulis Bambusae in Taenia)

Qi stagnation
Bai Dou Kou (Fructus Amomi Rotundus)
Cao Dou Kou (Semen Alpiniae Katsumadai)
Chen Pi (Pericarpium Citri Reticulatae)
Chen Xiang (Lignum Aquilariae Resinatum)
Dao Dou (Semen Canavaliae)
Fo Shou (Fructus Citri Sarcodactylis)
Mu Xiang (Radix Aucklandiae)
Sha Ren (Fructus Amomi)
Shi Di (Calyx Kaki)
Tan Xiang (Lignum Santali Albi)
Wu Zhu Yu (Fructus Evodiae)
Xiang Yuan (Fructus Citri)
Xuan Fu Hua (Flos Inulae)
Zi Su Ye (Folium Perillae)

Overindulgence in food
Ji Nei Jin (Endothelium Corneum Gigeriae Galli)
Lai Fu Zi (Semen Raphani)
Mai Ya (Fructus Hordei Germinatus)
Shan Zha (Fructus Crataegi)
Shen Qu (Massa Fermentata)

Phlegm stagnation
Ban Xia (Rhizoma Pinelliae)
Chen Pi (Pericarpium Citri Reticulatae)
Fu Ling (Poria)
Sheng Jiang (Rhizoma Zingiberis Recens)
Xuan Fu Hua (Flos Inulae)

Damp-heat
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Long Dan Cao (Radix Gentianae)

Nausea
Ban Xia (Rhizoma Pinelliae)
Chen Xiang (Lignum Aquilariae Resinatum)
Ding Xiang (Flos Caryophylli)

45. Nodules

Bai Fu Zi (Rhizoma Typhonii)
Ban Mao (Mylabris)
Bei Mu (Bulbus Fritillaria)
Chuan Shan Jia (Squama Manis)
Da Ji (Radix Euphorbiae seu Knoxiae)
Hai Ge Fen (Concha Meretricis seu Cyclinae)
Hai Zao (Sargassum)
Huang Yao Zi (Herba Dioscoreae Bulbiferae)
Jiang Can (Bombyx Batryticatus)
Kun Bu (Thallus Laminariae seu Eckloniae)
Lian Qiao (Fructus Forsythiae)
Lu Feng Fang (Nidus Vespae)
Mu Li (Concha Ostreae)
Quan Xie (Scorpio)
She Xiang (Moschus)
Wa Leng Zi (Concha Arcae)
Wu Gong (Scolopendra)
Xia Ku Cao (Spica Prunellae)
Xiong Huang (Realgar)
Xuan Shen (Radix Scrophulariae)

46. Pain

Bai Jie Zi (Semen Sinapis)
Bai Zhi (Radix Angelicae Dahuricae)
Ban Xia (Rhizoma Pinelliae)
Bi Ba (Fructus Piperis Longi)
Bi Cheng Qie (Fructus Litseae)
Bian Xu (Herba Polygoni Avicularis)
Bing Lang (Semen Arecae)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Dang Gui (Radicis Angelicae Sinensis)
Di Fu Zi (Fructus Kochiae)
Di Yu (Radix Sanguisorbae)
Ding Xiang (Flos Caryophylli)
Fang Feng (Radix Saposhnikoviae)
Gan Jiang (Rhizoma Zingiberis)
Gao Ben (Rhizoma Ligustici)
Ge Gen (Radix Puerariae)
Hai Shen (Strichopus Japonicus)
Han Lian Cao (Herba Ecliptae)
Hong Hua (Flos Carthami)
Huang Jing (Rhizoma Polygonati)
Ku Lian Pi (Cortex Meliae)
Lian Zi Xin (Plumula Nelumbinis)
Ma Ti Jin (Herba Dichondrae Repentis)
Qin Jiao (Radix Gentianae Macrophyllae)
Qing Mu Xiang (Radix Aristolochiae)
San Qi (Radix Notoginseng)
Shan Zha (Fructus Crataegi)
Sheng Jiang (Rhizoma Zingiberis Recens)

Sheng Ma (Rhizoma Cimicifugae)
Su He Xiang (Styrax)
Su Mu (Lignum Sappan)
Suan Zao Ren (Semen Zizyphi Spinosae)
Tian Nan Xing (Rhizoma Arisaematis)
Tian Zhu Huang (Concretio Silicea Bambusae)
Wei Ling Xian (Radix Clematidis)
Wu Mei (Fructus Mume)
Xi Xin (Herba Asari)
Xiang Fu (Rhizoma Cyperi)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Yan Hu Suo (Rhizoma Corydalis)
Yi Yi Ren (Semen Coicis)
Ze Lan (Herba Lycopi)
Zhu Sha (Cinnabaris)

47. Parasitic infestation

Roundworms
Bing Lang (Semen Arecae)
Chuan Lian Zi (Fructus Toosendan)
Fei Zi (Semen Torreyae)
He Shi (Fructus Carpesii)
Hua Jiao (Pericarpium Zanthoxyli)
Lei Wan (Omphalia)
Lu Hui (Aloe)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Qian Niu Zi (Semen Pharbitidis)
Shi Jun Zi (Fructus Quisqualis)
Wu Mei (Fructus Mume)
Wu Yi (Fructus Ulmi Praeparatus)
Xiong Huang (Realgar)

Hookworms
Bing Lang (Semen Arecae)
Fei Zi (Semen Torreyae)
Guan Zhong (Rhizoma Dryopteridis)
Ku Lian Pi (Cortex Meliae)
Lei Wan (Omphalia)

Pinworms
Bai Bu (Radix Stemonae)
Bing Lang (Semen Arecae)
Fei Zi (Semen Torreyae)
Guan Zhong (Rhizoma Dryopteridis)
Ku Lian Pi (Cortex Meliae)

Tapeworms
Bing Lang (Semen Arecae)
Fei Zi (Semen Torreyae)
Guan Zhong (Rhizoma Dryopteridis)
Lei Wan (Omphalia)
Nan Gua Zi (Semen Cucurbitae Moschatae)

48. Perspiration

Spontaneous perspiration due to disharmony of *wei* (defensive) and *ying* (nutritive) levels
Bai Shao (Radix Paeoniae Alba)
Gui Zhi (Ramulus Cinnamomi)

Spontaneous perspiration due to Lung qi deficiency
Huang Qi (Radix Astragali)
Wu Wei Zi (Fructus Schisandrae Chinensis)

Night sweating due to deficiency of Heart blood
Fu Xiao Mai (Semen Tritici Aestivi Levis)
Suan Zao Ren (Semen Zizyphi Spinosae)
Wu Wei Zi (Fructus Schisandrae Chinensis)

Night sweating due to deficiency heat
Di Gu Pi (Cortex Lycii)
Ma Huang Gen (Radix Ephedrae)
Shan Zhu Yu (Fructus Corni)
Wu Mei (Fructus Mume)
Zhi Mu (Radix Anemarrhenae)

Perspiration due to shock
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Huang Qi (Radix Astragali)
Long Gu (Os Draconis)
Mu Li (Concha Ostreae)
Ren Shen (Radix Ginseng)
Wu Wei Zi (Fructus Schisandrae Chinensis)

Perspiration with yellow discoloration
Yin Chen Hao (Herba Artemisiae Scopariae)
Zhi Zi (Fructus Gardeniae)

49. Plum pit syndrome

Ban Xia (Rhizoma Pinelliae)
Fu Ling (Poria)
Hou Po (Cortex Magnoliae Officinalis)
Sheng Jiang (Rhizoma Zingiberis Recens)
Zi Su Ye (Folium Perillae)

50. Poisoning

Mercury
Tu Fu Ling (Rhizoma Smilacis Glabrae)

Arsenic
Fang Feng (Radix Saposhnikoviae)
Gan Cao (Radix Glycyrrhizae)
Lu Dou (Semen Phaseoli Radiati)

Fish and crab
Lu Gen (Rhizoma Phragmitis)
Sheng Jiang (Rhizoma Zingiberis Recens)
Zi Su Ye (Folium Perillae)

Aconite
Lu Dou (Semen Phaseoli Radiati)
Sheng Jiang (Rhizoma Zingiberis Recens)

***Chan Su* (Venenum Bufonis)**
Zi Cao Gen (Radix Lithospermi)

***Bai Guo* (Semen Ginkgo)**
Gan Cao (Radix Glycyrrhizae)

***Xing Ren* (Semen Armeniacae Amarum)**
Gan Cao (Radix Glycyrrhizae)
Lu Dou (Semen Phaseoli Radiati)

***Ban Xia* (Rhizoma Pinelliae) and *Tian Nan Xing* (Rhizoma Arisaematis)**
Gan Cao (Radix Glycyrrhizae)
Lu Dou (Semen Phaseoli Radiati)
Sheng Jiang (Rhizoma Zingiberis Recens)

General poisoning
Gan Cao (Radix Glycyrrhizae)
Lu Dou (Semen Phaseoli Radiati)

Streptomycin
Gu Sui Bu (Rhizoma Drynariae)

51. Rectal prolapse

Chai Hu (Radix Bupleuri)
Ge Gen (Radix Puerariae)
Huang Qi (Radix Astragali)
Jie Geng (Radix Platycodonis)
Sheng Ma (Rhizoma Cimicifugae)

Wu Bei Zi (Galla Chinensis)
Zhi Ke (Fructus Aurantii)
Zhi Shi (Fructus Aurantii Immaturus)

52. Restless fetus
Bai Shao (Radix Paeoniae Alba)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Dang Gui (Radicis Angelicae Sinensis)
Du Zhong (Cortex Eucommiae)
E Jiao (Colla Corii Asini)
Gu Sui Bu (Rhizoma Drynariae)
Huang Qin (Radix Scutellariae)
Sang Ji Sheng (Herba Taxilli)
Sha Ren (Fructus Amomi)
Shu Di Huang (Radix Rehmanniae Preparata)
Tu Si Zi (Semen Cuscutae)
Xu Duan (Radix Dipsaci)
Yi Tang (Saccharum Granorum)
Zi Su Ye (Folium Perillae)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

53. Seizures
Chai Hu (Radix Bupleuri)
Gan Song (Radix seu Rhizoma Nardostachys)
Gui Zhi (Ramulus Cinnamomi)
Hai Shen (Strichopus Japonicus)
Hu Jiao (Fructus Piper)
Jiang Can (Bombyx Batryticatus)
Peng Sha (Borax)
Quan Xie (Scorpio)
Shi Chang Pu (Rhizoma Acori)
Tian Ma (Rhizoma Gastrodiae)
Tian Nan Xing (Rhizoma Arisaematis)
Wu Mei (Fructus Mume)

54. Snake and insect bites
Bai Fu Zi (Rhizoma Typhonii)
Bai Hua She She Cao (Herba Oldenlandia)
Ban Bian Lian (Herba Lobeliae Chinensis)
Ban Zhi Lian (Herba Scutellariae Barbatae)
Chuan Xin Lian (Herba Andrographis)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Yao Zi (Herba Dioscoreae Bulbiferae)
Jin Qian Cao (Herba Lysimachiae)
Ma Chi Xian (Herba Portulacae)
Qing Mu Xiang (Radix Aristolochiae)
Wu Ling Zhi (Excrementum Trogopteri seu Pteromi)
Xiong Huang (Realgar)
Xu Chang Qing (Radix Cynanchi Paniculati)
Zi Hua Di Ding (Herba Violae)

55. Sore throat
Wind-heat
Bo He (Herba Menthae)
Jiang Can (Bombyx Batryticatus)
Niu Bang Zi (Fructus Arctii)
Sang Ye (Folium Mori)
Sheng Ma (Rhizoma Cimicifugae)

Deficiency heat
Huang Bai (Cortex Phellodendri)
Sheng Di Huang (Radix Rehmanniae)
Xuan Shen (Radix Scrophulariae)
Zhi Mu (Radix Anemarrhenae)

Excess heat
Gan Cao (Radix Glycyrrhizae)
Jie Geng (Radix Platycodonis)
Jing Jie (Herba Schizonepetae)
Lian Qiao (Fructus Forsythiae)
Ma Bo (Lasiosphaera seu Calvatia)
Niu Bang Zi (Fructus Arctii)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Gan (Rhizoma Belamcandae)

Heat-toxins
Bai Hua She She Cao (Herba Oldenlandia)
Ban Lan Gen (Radix Isatidis)
Chuan Xin Lian (Herba Andrographis)
Da Huang (Radix et Rhizoma Rhei)
Da Qing Ye (Folium Isatidis)
Deng Xin Cao (Medulla Junci)
Han Shui Shi (Mirabilite)
Jin Yin Hua (Flos Lonicerae)
Lian Qiao (Fructus Forsythiae)
Mang Xiao (Natrii Sulfas)
Niu Huang (Calculus Bovis)
Xia Ku Cao (Spica Prunellae)
Zhu Dan (Fel Porcus)
Zhu Sha (Cinnabaris)

With ulceration
Bing Pian (Borneolum Syntheticum)
Chan Su (Venenum Bufonis)
Ma Bo (Lasiosphaera seu Calvatia)

56. Spermatorrhea
Ba Ji Tian (Radix Morindae Officinalis)
Bai Guo (Semen Ginkgo)
Bu Gu Zhi (Fructus Psoraleae)
Dong Chong Xia Cao (Cordyceps)
Fu Pen Zi (Fructus Rubi)
Gou Ji (Rhizoma Cibotii)
Hai Piao Xiao (Endoconcha Sepiae)
He Shou Wu (Radix Polygoni Multiflori)
Jiu Cai Zi (Semen Allii Tuberosi)
Lian Xu (Stamen Nelumbinis)
Lian Zi Xin (Plumula Nelumbinis)
Long Gu (Os Draconis)
Lu Rong (Cornu Cervi Pantotrichum)
Mu Li (Concha Ostreae)
Qian Shi (Semen Euryales)
Rou Cong Rong (Herba Cistanches)
Sha Yuan Zi (Semen Astragali Complanati)
Shan Yao (Rhizoma Dioscoreae)
Shan Zhu Yu (Fructus Corni)
Tu Si Zi (Semen Cuscutae)
Wu Bei Zi (Galla Chinensis)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xian Mao (Rhizoma Curculiginis)
Xu Duan (Radix Dipsaci)
Yi Zhi Ren (Fructus Alpiniae Oxyphyllae)
Yin Yang Huo (Herba Epimedii)
Yuan Zhi (Radix Polygalae)

57. Stomach pain
Deficiency
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Dang Shen (Radix Codonopsis)
Gan Cao (Radix Glycyrrhizae)
Huang Qi (Radix Astragali)
Shan Yao (Rhizoma Dioscoreae)
Yi Tang (Saccharum Granorum)

Qi stagnation
Ba Yue Zha (Fructus Akebiae)
Chen Pi (Pericarpium Citri Reticulatae)
Chuan Lian Zi (Fructus Toosendan)
Fo Shou (Fructus Citri Sarcodactylis)
Gan Song (Radix seu Rhizoma Nardostachys)
Li Zhi He (Semen Litchi)
Mu Xiang (Radix Aucklandiae)
Qing Mu Xiang (Radix Aristolochiae)
Sha Ren (Fructus Amomi)
Tan Xiang (Lignum Santali Albi)
Wu Yao (Radix Linderae)
Xiang Fu (Rhizoma Cyperi)
Xiang Yuan (Fructus Citri)
Zhi Ke (Fructus Aurantii)

Cold
Bai Dou Kou (Fructus Amomi Rotundus)
Bi Cheng Qie (Fructus Litseae)
Cao Guo (Fructus Tsaoko)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Jiang (Rhizoma Zingiberis)
Gan Song (Radix seu Rhizoma Nardostachys)
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)
Hua Jiao (Pericarpium Zanthoxyli)
Rou Gui (Cortex Cinnamomi)
Sha Ren (Fructus Amomi)
Sheng Jiang (Rhizoma Zingiberis Recens)
Tan Xiang (Lignum Santali Albi)
Wu Zhu Yu (Fructus Evodiae)

Heat
Chuan Lian Zi (Fructus Toosendan)
Da Huang (Radix et Rhizoma Rhei)
Huang Lian (Rhizoma Coptidis)
Shi Gao (Gypsum Fibrosum)
Zhi Zi (Fructus Gardeniae)
Zhu Ru (Caulis Bambusae in Taenia)

Stagnation
Chuan Lian Zi (Fructus Toosendan)
E Zhu (Rhizoma Curcumae)
Mo Yao (Myrrha)
Pu Huang (Pollen Typhae)
Ru Xiang (Gummi Olibanum)
San Leng (Rhizoma Sparganii)
Wu Ling Zhi (Excrementum Trogopteri seu Pteromi)
Yan Hu Suo (Rhizoma Corydalis)

Pain with food intake
Gu Ya (Fructus Setariae Germinatus)
Ji Nei Jin (Endothelium Corneum Gigeriae Galli)
Liu Ji Nu (Herba Artemisiae Anomalae)
Mai Ya (Fructus Hordei Germinatus)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Shan Zha (Fructus Crataegi)
Shen Qu (Massa Fermentata)

Parasitic infestation
Bing Lang (Semen Arecae)
Ku Lian Pi (Cortex Meliae)
Qian Niu Zi (Semen Pharbitidis)
Shi Jun Zi (Fructus Quisqualis)
Wu Mei (Fructus Mume)

58. Syphilis and leprosy

Syphilis
Da Feng Zi (Semen Hydnocarpi)
Ku Shen Gen (Radix Sophorae Flavescentis)
Tu Fu Ling (Rhizoma Smilacis Glabrae)

Leprosy
Da Feng Zi (Semen Hydnocarpi)
Ku Shen Gen (Radix Sophorae Flavescentis)
She Tui (Periostracum Serpentis)
Zao Jiao (Fructus Gleditsiae)
Zao Jiao Ci (Spina Gleditsiae)

59. Thirst

Wind-heat
Ge Gen (Radix Puerariae)
Lu Gen (Rhizoma Phragmitis)

Stomach heat
Shi Gao (Gypsum Fibrosum)
Zhi Mu (Radix Anemarrhenae)

Intestinal heat
Da Huang (Radix et Rhizoma Rhei)
Mang Xiao (Natrii Sulfas)

Heat-toxins
Sheng Di Huang (Radix Rehmanniae)
Xuan Shen (Radix Scrophulariae)

Damaged yin
Shi Hu (Herba Dendrobii)
Tian Hua Fen (Radix Trichosanthis)
Yu Zhu (Rhizoma Polygonati Odorati)

Water accumulation
Ban Xia (Rhizoma Pinelliae)
Fu Ling (Poria)

With bitter taste in the mouth
Long Dan Cao (Radix Gentianae)
Yin Chen Hao (Herba Artemisiae Scopariae)

With sweet taste in the mouth
Fu Ling (Poria)
Pei Lan (Herba Eupatorii)

60. Toothache

Stomach fire
Bai Zhi (Radix Angelicae Dahuricae)
Da Huang (Radix et Rhizoma Rhei)
Huang Lian (Rhizoma Coptidis)
Sheng Ma (Rhizoma Cimicifugae)
Shi Gao (Gypsum Fibrosum)
Zhu Ye (Herba Phyllostachys)

Kidney deficiency
Gu Sui Bu (Rhizoma Drynariae)
Niu Xi (Radix Cyathulae seu Achyranthis)
Xi Xin (Herba Asari)

Wind-cold
Bai Zhi (Radix Angelicae Dahuricae)
Gao Ben (Rhizoma Ligustici)
Xi Xin (Herba Asari)

Cold stagnation
Bi Ba (Fructus Piperis Longi)

Wind
Xu Chang Qing (Radix Cynanchi Paniculati)
Xun Gu Feng (Herba Aristolochiae Mollissimae)

61. Traumatic injuries

Chi Shao (Radix Paeoniae Rubrae)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Da Huang (Radix et Rhizoma Rhei)
Dang Gui (Radicis Angelicae Sinensis)
Hai Feng Teng (Caulis Piperis Kadsurae)
He Huan Pi (Cortex Albiziae)
Hong Hua (Flos Carthami)
Hong Teng (Caulis Sargentodoxae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Jiang Xiang (Lignum Dalbergiae Odoriferae)
Liu Ji Nu (Herba Artemisiae Anomalae)
Ma Qian Zi (Semen Strychni)
Meng Chong (Tabanus)
Mo Yao (Myrrha)
Mu Dan Pi (Cortex Moutan)
Niu Xi (Radix Cyathulae seu Achyranthis)
Ru Xiang (Gummi Olibanum)
San Qi (Radix Notoginseng)
She Xiang (Moschus)
Shui Zhi (Hirudo)
Song Jie (Lignum Pini Nodi)
Su Mu (Lignum Sappan)
Tao Ren (Semen Persicae)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xu Duan (Radix Dipsaci)
Xue Jie (Sanguis Draconis)

Xun Gu Feng (Herba Aristolochiae Mollissimae)
Ze Lan (Herba Lycopi)
Zhang Nao (Camphora)
Zi Ran Tong (Pyritum)

62. Unstable pregnancy

Qi deficiency
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Huang Qi (Radix Astragali)
Ren Shen (Radix Ginseng)

Blood deficiency
Bai Shao (Radix Paeoniae Alba)
Dang Gui (Radicis Angelicae Sinensis)
E Jiao (Colla Corii Asini)
Shu Di Huang (Radix Rehmanniae Preparata)

Kidney deficiency
Du Zhong (Cortex Eucommiae)
Sang Ji Sheng (Herba Taxilli)
Tu Si Zi (Semen Cuscutae)
Xu Duan (Radix Dipsaci)

Heat in the blood
Huang Qin (Radix Scutellariae)

Qi stagnation
Sha Ren (Fructus Amomi)
Su Geng (Caulis Perillae)

63. Wheezing and dyspnea

Cold
Bai Jie Zi (Semen Sinapis)
Ci Shi (Magnetitum)
Gan Jiang (Rhizoma Zingiberis)
Lai Fu Zi (Semen Raphani)
Ma Huang (Herba Ephedrae)
Su Zi (Fructus Perillae)
Xi Xin (Herba Asari)
Xing Ren (Semen Armeniacae Amarum)

Heat
Bai Guo (Semen Ginkgo)
Hai Ge Fen (Concha Meretricis seu Cyclinae)
Huang Qin (Radix Scutellariae)
Ma Dou Ling (Fructus Aristolochiae)
Pi Pa Ye (Folium Eriobotryae)
Qian Hu (Radix Peucedani)
Sang Bai Pi (Cortex Mori)
Shi Wei (Folium Pyrrosiae)
Ting Li Zi (Semen Descurainiae seu Lepidii)

Phlegm
Hou Po (Cortex Magnoliae Officinalis)
Xiong Huang (Realgar)
Yin Guo Ye (Folium Ginkgo)

Lung deficiency
Dang Shen (Radix Codonopsis)
Mai Men Dong (Radix Ophiopogonis)
Ren Shen (Radix Ginseng)
Shan Yao (Rhizoma Dioscoreae)
Wu Wei Zi (Fructus Schisandrae Chinensis)

Kidney yang deficiency
Bu Gu Zhi (Fructus Psoraleae)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Ge Jie (Gecko)

Lung and Kidney deficiencies
Ci Shi (Magnetitum)
Dong Chong Xia Cao (Cordyceps)
Ge Jie (Gecko)
Hu Tao Ren (Semen Juglandis)
Zi He Che (Placenta Hominis)

64. *Wu xin re* (five-center heat)

Bai Bu (Radix Stemonae)
Bai Mu Er (Fructificatio Tremellae Fuciformis)
Bai Wei (Radix Cynanchi Atrati)
Huang Lian (Rhizoma Coptidis)
Nan Sha Shen (Radix Adenophorae)
Qing Hao (Herba Artemisiae Annuae)
Sheng Di Huang (Radix Rehmanniae)
Yin Chai Hu (Radix Stellariae)
Zhi Mu (Radix Anemarrhenae)

65. *Xiao ke* (wasting and thirsting) syndrome

Upper *jiao*
Mai Men Dong (Radix Ophiopogonis)
Ren Shen (Radix Ginseng)
Tian Hua Fen (Radix Trichosanthis)
Wu Wei Zi (Fructus Schisandrae Chinensis)

Middle *jiao*
Ge Gen (Radix Puerariae)
Huang Jing (Rhizoma Polygonati)
Shi Hu (Herba Dendrobii)
Tian Hua Fen (Radix Trichosanthis)

Lower *jiao*
Shan Zhu Yu (Fructus Corni)
Shu Di Huang (Radix Rehmanniae Preparata)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Zhi Mu (Radix Anemarrhenae)

66. *Zang zao* (dry organ) disorder

Da Zao (Fructus Jujubae)
Gan Cao (Radix Glycyrrhizae)
Xiao Mai (Fructus Tritici)

Appendix 2 — Cross-reference Based on Western Medical Diagnosis

The listing of any herb under a diagnosis does not insure that that substance can be unquestioningly prescribed for the named symptom or syndrome. Selection and combination of herbs must be based on careful differential diagnosis, guided by informed understanding and training in Chinese Herbal Medicine.

1. Acid reflux
2. Allergies
3. Amoebae
4. Anemia
5. Angina
6. Appendicitis
7. Arrhythmia
8. Arthritis
9. Ascites
10. Asthma
11. Atherosclerosis
12. Bleeding disorders
13. Blood flukes
14. Bone fracture
15. Bronchiectasis
16. Bronchitis
17. Burns
18. Cancer
19. Carbuncles
20. Cardiac ischemia
21. Cholecystitis
22. Chronic obstructive pulmonary disease (COPD)
23. Clotting disorders
24. Common colds and influenza
25. Conjunctivitis
26. Constipation
27. Coronary artery disease
28. Coughing and wheezing
29. Dementia
30. Dermatological disorders
31. Diabetes mellitus
32. Diarrhea
33. Diphtheria
34. Dysentery
35. Edema
36. Encephalitis
37. Enteritis
38. Facial paralysis
39. Fever
40. Frostbite
41. Gastritis
42. Gout
43. Headache
44. Heart failure
45. Hemorrhoids
46. Hepatitis
47. Hepatomegaly
48. Hyperlipidemia
49. Hyperosteogeny
50. Hypertension
51. Hyperthyroidism
52. Hypothyroidism
53. Hypoxia
54. Impotence
55. Indigestion
56. Infantile paralysis
57. Infantile stomatitis
58. Infection
59. Infection (upper respiratory tract)
60. Infection (urinary tract)
61. Infertility
62. Inflammation of the female reproductive system
63. Inflammation of the male reproductive system
64. Intestinal obstruction
65. Jaundice
66. Leprosy
67. Leptospirosis
68. Leukopenia
69. Liver cirrhosis
70. Liver diseases
71. Malaria
72. Mastitis
73. Myelitis
74. Myocardial infarction
75. Myocarditis
76. Nausea and vomiting
77. Nephritis
78. Nephrotic syndrome
79. Neuralgia
80. Neurodermatitis
81. Neurosis
82. Obesity
83. Osteoporosis
84. Otitis media
85. Pain
86. Pancreatitis
87. Paralysis
88. Parasitic infestation (intestinal)
89. Parotitis
90. Parotitis and tonsillitis
91. Peptic ulcer
92. Phlebitis
93. Pneumonia
94. Poisoning
95. Psoriasis
96. Purpura due to lack of platelets
97. Rhinitis
98. Roundworm infestation
99. Schizophrenia
100. Seizures
101. Sexual dysfunction
102. Shingles
103. Shock
104. Snake and insect bites
105. Stomatitis and esophagitis
106. Stone formation
107. Stroke
108. Tapeworm infestation
109. Tetanus
110. Trauma
111. Trichomoniasis
112. Tuberculosis
113. Ulcer
114. Vertigo
115. Whooping cough

1. Acid reflux

Bei Sha Shen (Radix Glehniae)
Ding Xiang (Flos Caryophylli)
Hai Ge Fen (Concha Cyclinae)
Hai Piao Xiao (Endoconcha Sepiae)
Huang Lian (Rhizoma Coptidis)
Mu Li (Concha Ostreae)
Wa Leng Zi (Concha Arcae)
Wu Zhu Yu (Fructus Evodiae)
Zhe Bei Mu (Bulbus Fritillariae Thunbergii)

2. Allergies

Chan Tui (Periostracum Cicadae)
Fang Feng (Radix Saposhnikoviae)
Zi Su Ye (Folium Perillae)

3. Amoebae

Bai Tou Weng (Radix Pulsatillae)
Bi Cheng Qie (Fructus Litseae)
Lu Cha (Folium Camellia Sinensis)

Wu Long Cha (Folium Camellia Sinensis Fermentata)
Ya Dan Zi (Fructus Bruceae)

4. Anemia
Dang Shen (Radix Codonopsis)
E Jiao (Colla Corii Asini)
Hai Shen (Strichopus Japonicus)
Lu Lu Tong (Fructus Liquidambaris)
Ma Qian Zi (Semen Strychni)
Ren Shen (Radix Ginseng)
Sang Shen Zi (Fructus Mori)

5. Angina
Chen Xiang (Lignum Aquilariae Resinatum)
Chuan Xiong (Rhizoma Ligusticum Chuanxiong)
Dan Shen (Radix Salviae Miltiorrhizae)
Ge Gen (Radix Puerariae)
Gua Lou Shi (Fructus Trichosanthis)
Gui Zhi (Ramulus Cinnamomi)
Hong Hua (Flos Carthami)
San Qi (Radix Notoginseng)
Shan Zha (Fructus Crataegi)
She Xiang (Moschus)
Su He Xiang (Styrax)
Tan Xiang (Lignum Santali Albi)
Xie Bai (Bulbus Allii Macrostemonis)
Yan Hu Suo (Rhizoma Corydalis)
Zhi Shi (Fructus Aurantii Immaturus)

6. Appendicitis
Ba Dou (Fructus Crotonis)
Gua Lou Shi (Fructus Trichosanthis)
Shi Liu Pi (Pericarpium Granati)
Yi Yi Ren (Semen Coicis)

7. Arrhythmia
Bai Jie Zi (Semen Sinapis)
Chang Shan (Radix Dichroae)
Dang Gui (Radicis Angelicae Sinensis)
Dong Chong Xia Cao (Cordyceps)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Song (Radix seu Rhizoma Nardostachys)
Ge Gen (Radix Puerariae)
Gua Lou Shi (Fructus Trichosanthis)
Huang Lian (Rhizoma Coptidis)
Ku Shen Gen (Radix Sophorae Flavescentis)
Ling Zhi (Ganoderma)
Qiang Huo (Rhizoma et Radix Notopterygii)
Sang Ji Sheng (Herba Taxilli)
Shan Dou Gen (Radix Sophorae Tonkinensis)

8. Arthritis
Ba Ji Tian (Radix Morindae Officinalis)
Cao Wu (Radix Aconiti Kusnezoffii)
Chai Hu (Radix Bupleuri)
Chou Wu Tong (Folium Clerodendri Trichotomi)
Chuan Wu (Radix Aconiti Preparata)
Du Huo (Radix Angelicae Pubescentis)
Du Zhong (Cortex Eucommiae)
Fang Feng (Radix Saposhnikoviae)
Gan Jiang (Rhizoma Zingiberis)
Gou Ji (Rhizoma Cibotii)
Gui Zhi (Ramulus Cinnamomi)
Hai Ma (Hippocampus)
Lao Guan Cao (Herba Erodii seu Geranii)
Lei Gong Teng (Radix Tripterygii Wilfordii)
Ma Huang (Herba Ephedrae)
Mu Gua (Fructus Chaenomelis)
Qin Jiao (Radix Gentianae Macrophyllae)
Qing Feng Teng (Caulis Sinomenii)
Sang Zhi (Ramulus Mori)
Sheng Jiang (Rhizoma Zingiberis Recens)
Shui Niu Jiao (Cornu Bubali)
Wei Ling Xian (Radix Clematidis)
Wu Jia Pi (Cortex Acanthopanacis)
Wu Yao (Radix Linderae)
Xi Xian Cao (Herba Siegesbeckiae)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Zao Xiu (Rhizoma Paridis)

9. Ascites
Ba Dou (Fructus Crotonis)
Ban Bian Lian (Herba Lobeliae Chinensis)
Ban Zhi Lian (Herba Scutellariae Barbatae)
Bing Lang (Semen Arecae)
Chi Xiao Dou (Semen Phaseoli)
Da Ji (Radix Euphorbiae seu Knoxiae)
Da Suan (Bulbus Alli Sativi)
Gan Sui (Radix Euphorbiae Kansui)
Ma Bian Cao (Herba Verbenae)
Qian Niu Zi (Semen Pharbitidis)
Qing Fen (Calomelas)
Shang Lu (Radix Phytolaccae)
She Xiang (Moschus)
Yuan Hua (Flos Genkwa)
Ze Qi (Herba Euphorbiae Helioscopiae)

10. Asthma
Bai Jie Zi (Semen Sinapis)
Chen Xiang (Lignum Aquilariae Resinatum)
E Jiao (Colla Corii Asini)
Fo Shou (Fructus Citri Sarcodactylis)
Ge Jie (Gecko)
Gui Zhi (Ramulus Cinnamomi)
Hai Piao Xiao (Endoconcha Sepiae)
Jie Geng (Radix Platycodonis)
Jing Jie (Herba Schizonepetae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Ma Huang (Herba Ephedrae)
Mu Xiang (Radix Aucklandiae)
Qian Niu Zi (Semen Pharbitidis)
Rou Gui (Cortex Cinnamomi)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Chuang Zi (Fructus Cnidii)
She Gan (Rhizoma Belamcandae)
Shi Chang Pu (Rhizoma Acori)
Shi Wei (Folium Pyrrosiae)
Wei Ling Xian (Radix Clematidis)
Xie Bai (Bulbus Allii Macrostemonis)
Xiong Huang (Realgar)
Zao Xiu (Rhizoma Paridis)

11. Atherosclerosis
Chen Pi (Pericarpium Citri Reticulatae)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Shan Long (Rhizoma Dioscoreae Nipponicae)
Da Suan (Bulbus Alli Sativi)
Dang Gui (Radicis Angelicae Sinensis)
Gu Sui Bu (Rhizoma Drynariae)
Gui Ban (Plastrum Testudinis)
He Shou Wu (Radix Polygoni Multiflori)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Jin Ying Zi (Fructus Rosae Laevigatae)
Jue Ming Zi (Semen Cassiae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Mu Dan Pi (Cortex Moutan)
Pu Huang (Pollen Typhae)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Shan Zha (Fructus Crataegi)
Xie Bai (Bulbus Allii Macrostemonis)
Xu Chang Qing (Radix Cynanchi Paniculati)

12. Bleeding disorders

Ai Ye (Folium Artemisiae Argyi)
Bai Guo (Semen Ginkgo)
Bai He (Bulbus Lilii)
Bai Ji (Rhizoma Bletillae)
Bai Mao Gen (Rhizoma Imperatae)
Can Sha (Excrementum Bombycis Mori)
Che Qian Zi (Semen Plantaginis)
Chen Pi (Pericarpium Citri Reticulatae)
Da Huang (Radix et Rhizoma Rhei)
Da Ji (Herba seu Radix Cirsii Japonici)
Dang Gui (Radicis Angelicae Sinensis)
Di Gu Pi (Cortex Lycii)
Di Jin Cao (Herba Euphorbiae Humifusae)
Di Yu (Radix Sanguisorbae)
Fan Xie Ye (Folium Sennae)
Fu Long Gan (Terra Flava Usta)
Gu Sui Bu (Rhizoma Drynariae)
Guan Zhong (Rhizoma Dryopteridis)
Hai Piao Xiao (Endoconcha Sepiae)
Han Lian Cao (Herba Ecliptae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Hua Rui Shi (Ophicalcitum)
Huai Hua (Flos Sophorae)
Ji Guan Hua (Flos Celosiae Cristatae)
Lian Fang (Receptaculum Nelumbinis)
Long Gu (Os Draconis)
Lu Hui (Aloe)
Ma Huang (Herba Ephedrae)
Ou Jie (Nodus Nelumbinis Rhizomatis)
San Qi (Radix Notoginseng)
Su Zi (Fructus Perillae)
Wu Bei Zi (Galla Chinensis)
Wu Zhu Yu (Fructus Evodiae)
Xian He Cao (Herba Agrimoniae)
Xiao Ji (Herba Cirsii)
Xue Jie (Sanguis Draconis)
Xue Yu Tan (Crinis Carbonisatus)
Yi Mu Cao (Herba Leonuri)
Yu Xing Cao (Herba Houttuyniae)
Zhi Zi (Fructus Gardeniae)
Zi Zhu (Folium Callicarpae)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

13. Blood flukes

Ba Dou (Fructus Crotonis)
Bing Lang (Semen Arecae)
Gan Jiang (Rhizoma Zingiberis)
Hai Zao (Sargassum)
He Cao Ya (Gemma Agrimoniae)
Jin Qian Cao (Herba Lysimachiae)
Ku Lian Pi (Cortex Meliae)
Ma Bian Cao (Herba Verbenae)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Qing Hao (Herba Artemisiae Annuae)
Qu Mai (Herba Dianthi)
Wa Leng Zi (Concha Arcae)
Wu Mei (Fructus Mume)
Xian He Cao (Herba Agrimoniae)
Xiong Huang (Realgar)
Ya Dan Zi (Fructus Bruceae)

14. Bone fracture

Gu Sui Bu (Rhizoma Drynariae)
Ju Ye San Qi (Herba seu Radix Gynura Segetum)
Ma Ti Jin (Herba Dichondrae Repentis)

15. Bronchiectasis

Bai He (Bulbus Lilii)
Bai Ji (Rhizoma Bletillae)
San Qi (Radix Notoginseng)

16. Bronchitis

Ai Ye (Folium Artemisiae Argyi)
Bai Bu (Radix Stemonae)
Bai He (Bulbus Lilii)
Bai Jie Zi (Semen Sinapis)
Bai Mao Gen (Rhizoma Imperatae)
Bi Cheng Qie (Fructus Litseae)
Bu Gu Zhi (Fructus Psoraleae)
Cang Zhu (Rhizoma Atractylodis)
Che Qian Cao (Herba Plantaginis)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Di Long (Pheretima)
E Jiao (Colla Corii Asini)
Fang Feng (Radix Saposhnikoviae)
Fo Shou (Fructus Citri Sarcodactylis)
Gua Di (Pedicellus Cucumeris)
He Shi (Fructus Carpesii)
Huang Jing (Rhizoma Polygonati)
Jie Geng (Radix Platycodonis)
Kuan Dong Hua (Flos Farfarae)
Ling Zhi (Ganoderma)
Liu Huang (Sulfur)
Ma Dou Ling (Fructus Aristolochiae)
Ma Huang (Herba Ephedrae)
Man Jing Zi (Fructus Viticis)
Nan Sha Shen (Radix Adenophorae)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Pi Pa Ye (Folium Eriobotryae)
Qin Pi (Cortex Fraxini)
Qing Hao (Herba Artemisiae Annuae)
Ren Dong Teng (Caulis Lonicerae)
Sang Bai Pi (Cortex Mori)
She Chuang Zi (Fructus Cnidii)
She Gan (Rhizoma Belamcandae)
Tu Si Zi (Semen Cuscutae)
Wu Mei (Fructus Mume)
Xiong Huang (Realgar)
Xuan Fu Hua (Flos Inulae)
Yin Guo Ye (Folium Ginkgo)
Yin Yang Huo (Herba Epimedii)
Yuan Zhi (Radix Polygalae)
Ze Qi (Herba Euphorbiae Helioscopiae)
Zhu Dan (Fel Porcus)
Zi He Che (Placenta Hominis)
Zi Wan (Radix Asteris)

17. Burns

Bai Ji (Rhizoma Bletillae)
Bai Zhi (Radix Angelicae Dahuricae)
Di Yu (Radix Sanguisorbae)
Er Cha (Catechu)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Xue Yu Tan (Crinis Carbonisatus)
Zi Cao Gen (Radix Lithospermi)
Zi Zhu (Folium Callicarpae)

18. Cancer

Ba Dou (Fructus Crotonis)
Bai Tou Weng (Radix Pulsatillae)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Ban Mao (Mylabris)
Bie Jia (Carapax Trionycis)
Chan Su (Venenum Bufonis)
Chuan Wu (Radix Aconiti Preparata)
Chuan Xin Lian (Herba Andrographis)
E Zhu (Rhizoma Curcumae)
Guan Zhong (Rhizoma Dryopteridis)
Gui Zhi (Ramulus Cinnamomi)
Huang Yao Zi (Herba Dioscoreae Bulbiferae)
Jiang Huang (Rhizoma Curcumae Longae)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Qing Mu Xiang (Radix Aristolochiae)
San Qi (Radix Notoginseng)
Sang Bai Pi (Cortex Mori)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Xiang (Moschus)
Shen Qu (Massa Fermentata)
Su Mu (Lignum Sappan)
Tian Hua Fen (Radix Trichosanthis)
Tian Men Dong (Radix Asparagi)
Tian Nan Xing (Rhizoma Arisaematis)

Wei Ling Xian (Radix Clematidis)
Wu Mei (Fructus Mume)
Xian He Cao (Herba Agrimoniae)
Xuan Shen (Radix Scrophulariae)
Ya Dan Zi (Fructus Bruceae)
Yi Yi Ren (Semen Coicis)
Zhu Ling (Polyporus)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

19. Carbuncles, furuncles and sores

Ba Dou (Fructus Crotonis)
Bai He (Bulbus Lilii)
Bai Tou Weng (Radix Pulsatillae)
Di Jin Cao (Herba Euphorbiae Humifusae)
Hai Piao Xiao (Endoconcha Sepiae)
Hai Zao (Sargassum)
Kun Bu (Thallus Laminariae seu Eckloniae)
Ma Bian Cao (Herba Verbenae)
Pi Pa Ye (Folium Eriobotryae)
Shui Zhi (Hirudo)
Wu Bei Zi (Galla Chinensis)

20. Cardiac ischemia

Bi Ba (Fructus Piperis Longi)
Bi Cheng Qie (Fructus Litseae)
Bing Pian (Borneolum Syntheticum)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Gan Song (Radix seu Rhizoma Nardostachys)
Ge Gen (Radix Puerariae)
Gou Ji (Rhizoma Cibotii)
Gua Lou Shi (Fructus Trichosanthis)
He Shou Wu (Radix Polygoni Multiflori)
Hong Hua (Flos Carthami)
Huang Jing (Rhizoma Polygonati)
Jiang Huang (Rhizoma Curcumae Longae)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Ku Shen Gen (Radix Sophorae Flavescentis)
Mai Men Dong (Radix Ophiopogonis)
Mao Dong Qing (Radix Ilicis Pubescentis)
Mu Dan Pi (Cortex Moutan)
Qiang Huo (Rhizoma et Radix Notopterygii)
Ren Shen (Radix Ginseng)
Rou Gui (Cortex Cinnamomi)
San Qi (Radix Notoginseng)
Yan Hu Suo (Rhizoma Corydalis)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yi Mu Cao (Herba Leonuri)
Yin Yang Huo (Herba Epimedii)

21. Cholecystitis

Ba Dou (Fructus Crotonis)
Bai Tou Weng (Radix Pulsatillae)
Chai Hu (Radix Bupleuri)
Jin Qian Cao (Herba Lysimachiae)
Mang Xiao (Natrii Sulfas)
Wei Ling Xian (Radix Clematidis)
Wu Mei (Fructus Mume)
Yin Chen Hao (Herba Artemisiae Scopariae)
Zao Xiu (Rhizoma Paridis)

22. Chronic obstructive pulmonary disease (COPD)

E Zhu (Rhizoma Curcumae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Ma Bian Cao (Herba Verbenae)

23. Clotting disorders

Bi Cheng Qie (Fructus Litseae)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Dang Gui (Radicis Angelicae Sinensis)
Di Long (Pheretima)
Ge Gen (Radix Puerariae)
Hai Feng Teng (Caulis Piperis Kadsurae)
Hai Shen (Strichopus Japonicus)
Hong Hua (Flos Carthami)
Mao Dong Qing (Radix Ilicis Pubescentis)
Shui Zhi (Hirudo)
Xuan Shen (Radix Scrophulariae)

24. Common colds and influenza

Bi Ba (Fructus Piperis Longi)
Bo He (Herba Menthae)
Cang Zhu (Rhizoma Atractylodis)
Cong Bai (Bulbus Allii Fistulosi)
Fang Feng (Radix Saposhnikoviae)
Guan Zhong (Rhizoma Dryopteridis)
Gui Zhi (Ramulus Cinnamomi)
Huo Xiang (Herba Agastache)
Jin Yin Hua (Flos Lonicerae)
Jing Jie (Herba Schizonepetae)
Ma Bian Cao (Herba Verbenae)
Ma Huang (Herba Ephedrae)
Niu Bang Zi (Fructus Arctii)
Sang Ye (Folium Mori)
Sheng Jiang (Rhizoma Zingiberis Recens)
Xiang Ru (Herba Elsholtziae seu Moslae)
Xin Yi Hua (Flos Magnoliae)
Yin Chen Hao (Herba Artemisiae Scopariae)

25. Conjunctivitis

Bai Tou Weng (Radix Pulsatillae)
Bo He (Herba Menthae)
Chai Hu (Radix Bupleuri)
Chan Tui (Periostracum Cicadae)
Da Qing Ye (Folium Isatidis)
Fang Feng (Radix Saposhnikoviae)
Lao Guan Cao (Herba Erodii seu Geranii)
Qiang Huo (Rhizoma et Radix Notopterygii)
Wu Mei (Fructus Mume)
Zi Cao Gen (Radix Lithospermi)

26. Constipation

Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Da Huang (Radix et Rhizoma Rhei)
Fan Xie Ye (Folium Sennae)
Fei Zi (Semen Torreyae)
Gua Lou Shi (Fructus Trichosanthis)
Hei Zhi Ma (Semen Sesami Nigrum)
Lai Fu Zi (Semen Raphani)
Luo Han Guo (Fructus Momordicae)
Mang Xiao (Natrii Sulfas)
Sang Shen Zi (Fructus Mori)
Zhi Shi (Fructus Aurantii Immaturus)

27. Coronary artery disease

Bai Ji Li (Fructus Tribuli)
Bai Jie Zi (Semen Sinapis)
Ban Xia (Rhizoma Pinelliae)
Bi Cheng Qie (Fructus Litseae)
Bing Pian (Borneolum Syntheticum)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Shan Long (Rhizoma Dioscoreae Nipponicae)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Shen (Radix Codonopsis)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)

Ge Gen (Radix Puerariae)
Gua Lou Shi (Fructus Trichosanthis)
Gui Zhi (Ramulus Cinnamomi)
Hai Feng Teng (Caulis Piperis Kadsurae)
Han Lian Cao (Herba Ecliptae)
Hong Hua (Flos Carthami)
Huang Jing (Rhizoma Polygonati)
Jiang Huang (Rhizoma Curcumae Longae)
Ju Hua (Flos Chrysanthemi)
Ling Zhi (Ganoderma)
Lu Cha (Folium Camellia Sinensis)
Mai Men Dong (Radix Ophiopogonis)
Nan Sha Shen (Radix Adenophorae)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Sang Ji Sheng (Herba Taxilli)
Shan Zha (Fructus Crataegi)
She Xiang (Moschus)
Shui Zhi (Hirudo)
Su He Xiang (Styrax)
Tian Nan Xing (Rhizoma Arisaematis)
Tian Zhu Huang (Concretio Silicea Bambusae)
Wu Bei Zi (Galla Chinensis)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Xi Xian Cao (Herba Siegesbeckiae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yi Mu Cao (Herba Leonuri)
Yin Guo Ye (Folium Ginkgo)
Yin Yang Huo (Herba Epimedii)
Yuan Zhi (Radix Polygalae)

28. Coughing and wheezing

Bai He (Bulbus Lilii)
Ge Jie (Gecko)
Gu Zhi Hua (Semen Oroxyli)
Liu Huang (Sulfur)
Luo Han Guo (Fructus Momordicae)
Tian Nan Xing (Rhizoma Arisaematis)
Ting Li Zi (Semen Descurainiae seu Lepidii)
Wang Bu Liu Xing (Semen Vaccariae)
Xian He Cao (Herba Agrimoniae)
Zhe Bei Mu (Bulbus Fritillariae Thunbergii)
Zhu Li (Succus Bambusae)

29. Dementia

Shi Chang Pu (Rhizoma Acori)
Yin Guo Ye (Folium Ginkgo)

30. Dermatological disorders

Bai Ji (Rhizoma Bletillae)
Bai Zhi (Radix Angelicae Dahuricae)
Ban Mao (Mylabris)
Ban Xia (Rhizoma Pinelliae)
Bing Lang (Semen Arecae)
Bu Gu Zhi (Fructus Psoraleae)
Cang Zhu (Rhizoma Atractylodis)
Chi Xiao Dou (Semen Phaseoli)
Da Suan (Bulbus Alli Sativi)
Da Zao (Fructus Jujubae)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Di Fu Zi (Fructus Kochiae)
Di Yu (Radix Sanguisorbae)
Ding Xiang (Flos Caryophylli)
Fang Feng (Radix Saposhnikoviae)
Ge Gen (Radix Puerariae)
Gou Qi Zi (Fructus Lycii)
Hai Shen (Strichopus Japonicus)
Huai Hua (Flos Sophorae)
Huang Bai (Cortex Phellodendri)
Huo Xiang (Herba Agastache)
Jin Yin Hua (Flos Lonicerae)
Ku Lian Pi (Cortex Meliae)
Lei Gong Teng (Radix Tripterygii Wilfordii)
Liu Huang (Sulfur)
Long Dan Cao (Radix Gentianae)
Mu Zei (Herba Equiseti Hiemalis)
Qian Dan (Minium)
San Qi (Radix Notoginseng)
She Chuang Zi (Fructus Cnidii)
Sheng Ma (Rhizoma Cimicifugae)
Shi Liu Pi (Pericarpium Granati)
Wei Ling Xian (Radix Clematidis)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Xu Chang Qing (Radix Cynanchi Paniculati)
Ya Dan Zi (Fructus Bruceae)
Yin Chen Hao (Herba Artemisiae Scopariae)
Zhu Ling (Polyporus)
Zi Su Ye (Folium Perillae)

31. Diabetes mellitus

Di Gu Pi (Cortex Lycii)
Hei Zhi Ma (Semen Sesami Nigrum)
Huang Jing (Rhizoma Polygonati)
Huang Lian (Rhizoma Coptidis)
Jiang Can (Bombyx Batryticatus)
Kun Bu (Thallus Laminariae seu Eckloniae)
Li Zhi He (Semen Litchi)
Mai Ya (Fructus Hordei Germinatus)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Ren Shen (Radix Ginseng)
Shan Yao (Rhizoma Dioscoreae)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Yu Mi Xu (Stigma Maydis)
Ze Xie (Rhizoma Alismatis)

32. Diarrhea

Che Qian Zi (Semen Plantaginis)
Da Suan (Bulbus Alli Sativi)
Fu Ling (Poria)
Fu Long Gan (Terra Flava Usta)
Ge Gen (Radix Puerariae)
Huo Xiang (Herba Agastache)
Lian Fang (Receptaculum Nelumbinis)
Ma Huang (Herba Ephedrae)
Shan Yao (Rhizoma Dioscoreae)
Sheng Jiang (Rhizoma Zingiberis Recens)
Shi Liu Pi (Pericarpium Granati)
Shu Di Huang (Radix Rehmanniae Preparata)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Wu Zhu Yu (Fructus Evodiae)
Xiang Ru (Herba Elsholtziae seu Moslae)
Ze Xie (Rhizoma Alismatis)
Zhu Ling (Polyporus)

33. Diphtheria

Ba Dou (Fructus Crotonis)
Ma Bian Cao (Herba Verbenae)
Zhu Dan (Fel Porcus)

34. Dysentery

Ba Dou (Fructus Crotonis)
Bai Tou Weng (Radix Pulsatillae)
Bi Cheng Qie (Fructus Litseae)
Bing Lang (Semen Arecae)
Che Qian Cao (Herba Plantaginis)
Chuan Xin Lian (Herba Andrographis)
Di Yu (Radix Sanguisorbae)
Gan Jiang (Rhizoma Zingiberis)
Hai Piao Xiao (Endoconcha Sepiae)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Ji Guan Hua (Flos Celosiae Cristatae)
Jin Yin Hua (Flos Lonicerae)
Lu Cha (Folium Camellia Sinensis)
Ma Bian Cao (Herba Verbenae)
Mu Gua (Fructus Chaenomelis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Qin Pi (Cortex Fraxini)
Ren Dong Teng (Caulis Lonicerae)
Rou Gui (Cortex Cinnamomi)
Shan Dou Gen (Radix Sophorae Tonkinensis)

Shan Zha (Fructus Crataegi)
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Shi Liu Pi (Pericarpium Granati)
Shi Wei (Folium Pyrrosiae)
Wu Bei Zi (Galla Chinensis)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xia Ku Cao (Spica Prunellae)
Xian He Cao (Herba Agrimoniae)
Xiang Ru (Herba Elsholtziae seu Moslae)
Xiao Ji (Herba Cirisii)
Ya Dan Zi (Fructus Bruceae)
Ze Qi (Herba Euphorbiae Helioscopiae)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

35. Edema

Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Ban Bian Lian (Herba Lobeliae Chinensis)
Che Qian Zi (Semen Plantaginis)
Chi Xiao Dou (Semen Phaseoli)
Da Fu Pi (Pericarpium Arecae)
Dong Gua Pi (Exocarpium Benincasae)
Dong Kui Zi (Semen Malvae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Fu Ling (Poria)
Fu Ping (Herba Spirodelae)
Gan Sui (Radix Euphorbiae Kansui)
Gui Zhi (Ramulus Cinnamomi)
Ma Huang (Herba Ephedrae)
Sang Bai Pi (Cortex Mori)
Sheng Jiang Pi (Pericarpium Zingiberis Recens)
Shi Wei (Folium Pyrrosiae)
Ting Li Zi (Semen Descurainiae seu Lepidii)
Wu Jia Pi (Cortex Acanthopanacis)
Xiang Ru (Herba Elsholtziae seu Moslae)
Yi Mu Cao (Herba Leonuri)
Yi Yi Ren (Semen Coicis)
Yuan Hua (Flos Genkwa)
Ze Lan (Herba Lycopi)
Ze Xie (Rhizoma Alismatis)

36. Encephalitis

Da Qing Ye (Folium Isatidis)
Da Suan (Bulbus Alli Sativi)
Di Long (Pheretima)
Qin Jiao (Radix Gentianae Macrophyllae)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Shi Chang Pu (Rhizoma Acori)

37. Enteritis

Ba Dou (Fructus Crotonis)
Bai Zhi (Radix Angelicae Dahuricae)
Bing Lang (Semen Arecae)
Chuan Xin Lian (Herba Andrographis)
Da Huang (Radix et Rhizoma Rhei)
Er Cha (Catechu)
Hai Piao Xiao (Endoconcha Sepiae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Lao Guan Cao (Herba Erodii seu Geranii)
Lu Han Cao (Herba Pyrolae)
Ma Bian Cao (Herba Verbenae)
Qin Jiao (Radix Gentianae Macrophyllae)
Ren Dong Teng (Caulis Lonicerae)
Shan Zha (Fructus Crataegi)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Xian He Cao (Herba Agrimoniae)
Ya Dan Zi (Fructus Bruceae)
Zao Xiu (Rhizoma Paridis)
Zhu Dan (Fel Porcus)

38. Facial paralysis

Ba Dou (Fructus Crotonis)
Bai Jie Zi (Semen Sinapis)
Ban Mao (Mylabris)
Cao Wu (Radix Aconiti Kusnezoffii)
E Bu Shi Cao (Herba Centipedae)
Fang Feng (Radix Saposhnikoviae)
Ma Qian Zi (Semen Strychni)
Niu Bang Zi (Fructus Arctii)
Quan Xie (Scorpio)
Zhang Nao (Camphora)

39. Fever

Bie Jia (Carapax Trionycis)
Chai Hu (Radix Bupleuri)
Fu Long Gan (Terra Flava Usta)
Ge Gen (Radix Puerariae)
Han Lian Cao (Herba Ecliptae)
Ling Yang Jiao (Cornu Saigae Tataricae)
Niu Huang (Calculus Bovis)
Qing Hao (Herba Artemisiae Annuae)
Shi Gao (Gypsum Fibrosum)

40. Frostbite

Bai Ji (Rhizoma Bletillae)
Gui Zhi (Ramulus Cinnamomi)
Sang Ji Sheng (Herba Taxilli)
Zhang Nao (Camphora)

41. Gastritis

Bai He (Bulbus Lilii)
Bing Lang (Semen Arecae)
Da Huang (Radix et Rhizoma Rhei)
Da Suan (Bulbus Alli Sativi)
Er Cha (Catechu)
Fo Shou (Fructus Citri Sarcodactylis)
Huang Lian (Rhizoma Coptidis)
Lu Cha (Folium Camellia Sinensis)
Ma Bian Cao (Herba Verbenae)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)

42. Gout

Ding Shu Xiu (Herba Elephantopus Scaber)
Pu Yin (Radix Wikstroemia Indica)
Wan Dian Jin (Radix Ilicis Asprellae)

43. Headache

Bai Zhi (Radix Angelicae Dahuricae)
Bo He (Herba Menthae)
Chai Hu (Radix Bupleuri)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Dang Gui (Radicis Angelicae Sinensis)
Du Huo (Radix Angelicae Pubescentis)
Fang Feng (Radix Saposhnikoviae)
Gao Ben (Rhizoma Ligustici)
Ge Gen (Radix Puerariae)
Gou Teng (Ramulus Uncariae cum Uncis)
Gui Zhi (Ramulus Cinnamomi)
He Shou Wu (Radix Polygoni Multiflori)
Jing Jie (Herba Schizonepetae)
Ju Hua (Flos Chrysanthemi)
Qiang Huo (Rhizoma et Radix Notopterygii)
Tian Ma (Rhizoma Gastrodiae)
Wu Zhu Yu (Fructus Evodiae)
Xi Xin (Herba Asari)

44. Heart failure

Chan Su (Venenum Bufonis)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Ting Li Zi (Semen Descurainiae seu Lepidii)
Yu Zhu (Rhizoma Polygonati Odorati)
Zhi Shi (Fructus Aurantii Immaturus)

45. Hemorrhoids

Bai Guo (Semen Ginkgo)
Bai Ji (Rhizoma Bletillae)
Chi Xiao Dou (Semen Phaseoli)
Huai Hua (Flos Sophorae)
Lian Fang (Receptaculum Nelumbinis)
Ming Fan (Alumen)
Wang Bu Liu Xing (Semen Vaccariae)
Wu Bei Zi (Galla Chinensis)
Xian He Cao (Herba Agrimoniae)
Ya Dan Zi (Fructus Bruceae)
Zi Zhu (Folium Callicarpae)

46. Hepatitis

Ai Ye (Folium Artemisiae Argyi)
Bai Shao (Radix Paeoniae Alba)
Bai Tou Weng (Radix Pulsatillae)
Ban Lan Gen (Radix Isatidis)
Ban Mao (Mylabris)
Chai Hu (Radix Bupleuri)
Che Qian Cao (Herba Plantaginis)
Chi Shao (Radix Paeoniae Rubrae)
Chui Pen Cao (Herba Sedi)
Da Ji (Radix Euphorbiae seu Knoxiae)
Da Qing Ye (Folium Isatidis)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
Dong Chong Xia Cao (Cordyceps)
Fo Shou (Fructus Citri Sarcodactylis)
Gou Qi Zi (Fructus Lycii)
Guan Zhong (Rhizoma Dryopteridis)
Hai Jin Sha (Herba Lygodii)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Jing (Rhizoma Polygonati)
Huang Qi (Radix Astragali)
Huang Qin (Radix Scutellariae)
Huo Xiang (Herba Agastache)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Ling Zhi (Ganoderma)
Lu Cha (Folium Camellia Sinensis)
Lu Hui (Aloe)
Ma Bian Cao (Herba Verbenae)
Ma Dou Ling (Fructus Aristolochiae)
Ming Fan (Alumen)
Mu Gua (Fructus Chaenomelis)
Mu Zei (Herba Equiseti Hiemalis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Qin Jiao (Radix Gentianae Macrophyllae)
Ren Dong Teng (Caulis Lonicerae)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Shan Yao (Rhizoma Dioscoreae)
Shan Zha (Fructus Crataegi)
Shang Lu (Radix Phytolaccae)
She Xiang (Moschus)
Shui Niu Jiao (Cornu Bubali)
Wu Gong (Scolopendra)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xia Ku Cao (Spica Prunellae)
Xiao Ji (Herba Cirsii)
Yi Yi Ren (Semen Coicis)
Yin Chen Hao (Herba Artemisiae Scopariae)
Zhu Dan (Fel Porcus)

47. Hepatomegaly

Bie Jia (Carapax Trionycis)
Dan Shen (Radix Salviae Miltiorrhizae)
Hong Hua (Flos Carthami)
Ku Lian Pi (Cortex Meliae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Liu Ji Nu (Herba Artemisiae Anomalae)
Mu Li (Concha Ostreae)
San Leng (Rhizoma Sparganii Stoloniferi)
She Gan (Rhizoma Belamcandae)
Xia Ku Cao (Spica Prunellae)
Xing Ren (Semen Armeniacae Amarum)

48. Hyperlipidemia

Chai Hu (Radix Bupleuri)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Cong Bai (Bulbus Allii Fistulosi)
Da Huang (Radix et Rhizoma Rhei)
Da Suan (Bulbus Alli Sativi)
Dang Gui (Radicis Angelicae Sinensis)
E Zhu (Rhizoma Curcumae)
Ge Gen (Radix Puerariae)
He Shou Wu (Radix Polygoni Multiflori)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Jing (Rhizoma Polygonati)
Jiang Huang (Rhizoma Curcumae Longae)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Jue Ming Zi (Semen Cassiae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Lu Cha (Folium Camellia Sinensis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Shan Zha (Fructus Crataegi)
Shui Zhi (Hirudo)
Tian Ma (Rhizoma Gastrodiae)
Tian Nan Xing (Rhizoma Arisaematis)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Xiang Ru (Herba Elsholtziae seu Moslae)
Xie Bai (Bulbus Allii Macrostemonis)
Xu Chang Qing (Radix Cynanchi Paniculati)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yin Guo Ye (Folium Ginkgo)
Yu Zhu (Rhizoma Polygonati Odorati)
Ze Xie (Rhizoma Alismatis)

49. Hyperosteogeny

Bai Shao (Radix Paeoniae Alba)
Cao Wu (Radix Aconiti Kusnezoffii)
Chuan Wu (Radix Aconiti Preparata)
Du Huo (Radix Angelicae Pubescentis)
Gui Zhi (Ramulus Cinnamomi)
Lei Gong Teng (Radix Tripterygii Wilfordii)
Ma Qian Zi (Semen Strychni)
She Xiang (Moschus)
Wei Ling Xian (Radix Clematidis)
Xu Duan (Radix Dipsaci)

50. Hypertension

Bo He (Herba Menthae)
Che Qian Zi (Semen Plantaginis)
Chou Wu Tong (Folium Clerodendri Trichotomi)
Da Ji (Herba seu Radix Cirsii Japonici)
Di Gu Pi (Cortex Lycii)
Di Long (Pheretima)
Du Zhong (Cortex Eucommiae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Gou Teng (Ramulus Uncariae cum Uncis)
Huai Hua (Flos Sophorae)
Huang Lian (Rhizoma Coptidis)
Ju Hua (Flos Chrysanthemi)
Jue Ming Zi (Semen Cassiae)
Lai Fu Zi (Semen Raphani)
Ling Zhi (Ganoderma)
Liu Huang (Sulfur)
Lu Cha (Folium Camellia Sinensis)
Mu Zei (Herba Equiseti Hiemalis)
Qing Mu Xiang (Radix Aristolochiae)
Sang Shen Zi (Fructus Mori)
Shan Zha (Fructus Crataegi)
Shui Zhi (Hirudo)

Wang Bu Liu Xing (Semen Vaccariae)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)
Wu Zhu Yu (Fructus Evodiae)
Xi Xian Cao (Herba Siegesbeckiae)
Xia Ku Cao (Spica Prunellae)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)
Xuan Shen (Radix Scrophulariae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yin Yang Huo (Herba Epimedii)
Ze Xie (Rhizoma Alismatis)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

51. Hyperthyroidism
Hai Zao (Sargassum)
Huang Yao Zi (Herba Dioscoreae Bulbiferae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Mu Li (Concha Ostreae)
Shi Gao (Gypsum Fibrosum)
Tian Hua Fen (Radix Trichosanthis)
Zhi Mu (Radix Anemarrhenae)

52. Hypothyroidism
Fu Zi (Radix Aconiti Lateralis Praeparata)
Hai Zao (Sargassum)
Kun Bu (Thallus Laminariae seu Eckloniae)
Rou Gui (Cortex Cinnamomi)

53. Hypoxia
Bai He (Bulbus Lilii)
Bai Shao (Radix Paeoniae Alba)
Bi Ba (Fructus Piperis Longi)
Bie Jia (Carapax Trionycis)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
Ding Xiang (Flos Caryophylli)
E Jiao (Colla Corii Asini)
Gan Jiang (Rhizoma Zingiberis)
Gan Song (Radix seu Rhizoma Nardostachys)
Ge Gen (Radix Puerariae)
Gua Lou Shi (Fructus Trichosanthis)
Gui Ban (Plastrum Testudinis)
Hai Feng Teng (Caulis Piperis Kadsurae)
Hai Long (Syngnathus)
Han Lian Cao (Herba Ecliptae)
Ling Zhi (Ganoderma)
Mai Men Dong (Radix Ophiopogonis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Ren Shen (Radix Ginseng)
Suan Zao Ren (Semen Zizyphi Spinosae)
Tian Ma (Rhizoma Gastrodiae)
Xi Yang Shen (Radix Panacis Quinquefolii)

54. Impotence
Ba Ji Tian (Radix Morindae Officinalis)
Bu Gu Zhi (Fructus Psoraleae)
Dong Chong Xia Cao (Cordyceps)
Du Zhong (Cortex Eucommiae)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Ge Jie (Gecko)
Gou Qi Zi (Fructus Lycii)
Hai Ma (Hippocampus)
Jiu Cai Zi (Semen Allii Tuberosi)
Lu Rong (Cornu Cervi Pantotrichum)
Ren Shen (Radix Ginseng)
Rou Cong Rong (Herba Cistanches)
Rou Gui (Cortex Cinnamomi)
Sha Yuan Zi (Semen Astragali Complanati)
She Chuang Zi (Fructus Cnidii)
Shu Di Huang (Radix Rehmanniae Preparata)
Suo Yang (Herba Cynomorii)
Tu Si Zi (Semen Cuscutae)
Xian Mao (Rhizoma Curculiginis)
Xu Duan (Radix Dipsaci)
Yin Yang Huo (Herba Epimedii)
Zi He Che (Placenta Hominis)

55. Indigestion
Ban Xia (Rhizoma Pinelliae)
Cang Zhu (Rhizoma Atractylodis)
Da Huang (Radix et Rhizoma Rhei)
Ji Nei Jin (Endothelium Corneum Gigeriae Galli)
Lu Cha (Folium Camellia Sinensis)
Mai Ya (Fructus Hordei Germinatus)
Rou Dou Kou (Semen Myristicae)
Shan Zha (Fructus Crataegi)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Zhu Yu (Fructus Evodiae)
Zhu Dan (Fel Porcus)

56. Infantile paralysis
Dang Gui (Radicis Angelicae Sinensis)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)
Yin Yang Huo (Herba Epimedii)

57. Infantile stomatitis
Ba Dou (Fructus Crotonis)
Ban Lan Gen (Radix Isatidis)
Wu Zhu Yu (Fructus Evodiae)
Ye Ju Hua (Flos Chrysanthemi Indici)

58. Infection
Bing Pian (Borneolum Syntheticum)
Chi Shao (Radix Paeoniae Rubrae)
Chi Xiao Dou (Semen Phaseoli)
E Bu Shi Cao (Herba Centipedae)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Lian Qiao (Fructus Forsythiae)
Ma Qian Zi (Semen Strychni)
Mao Dong Qing (Radix Ilicis Pubescentis)
Pu Gong Ying (Herba Taraxaci)
Qing Mu Xiang (Radix Aristolochiae)
She Tui (Periostracum Serpentis)
Xiao Ji (Herba Cirisii)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Ze Qi (Herba Euphorbiae Helioscopiae)

59. Infection (upper respiratory tract)
Ban Lan Gen (Radix Isatidis)
Chang Shan (Radix Dichroae)
Chuan Xin Lian (Herba Andrographis)
Da Qing Ye (Folium Isatidis)
Huang Qin (Radix Scutellariae)
Jin Yin Hua (Flos Lonicerae)
Jing Jie (Herba Schizonepetae)
Lian Qiao (Fructus Forsythiae)
Ma Huang (Herba Ephedrae)
Man Jing Zi (Fructus Viticis)
Niu Huang (Calculus Bovis)
Pu Gong Ying (Herba Taraxaci)
Sang Ye (Folium Mori)
Sang Zhi (Ramulus Mori)
Shi Gao (Gypsum Fibrosum)
Xi Xin (Herba Asari)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yu Xing Cao (Herba Houttuyniae)
Zi Su Ye (Folium Perillae)

60. Infection (urinary tract)
Bai Tou Weng (Radix Pulsatillae)
Che Qian Cao (Herba Plantaginis)
Che Qian Zi (Semen Plantaginis)
Chuan Mu Tong (Caulis Clematidis Armandii)
Di Yu (Radix Sanguisorbae)
Guang Jin Qian Cao (Herba Desmodii Styracifolii)

Hai Jin Sha (Herba Lygodii)
Ma Bian Cao (Herba Verbenae)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Qu Mai (Herba Dianthi)
Yu Mi Xu (Stigma Maydis)
Ze Xie (Rhizoma Alismatis)
Zhi Mu (Radix Anemarrhenae)
Zhu Ling (Polyporus)

61. Infertility
Bie Jia (Carapax Trionycis)
E Jiao (Colla Corii Asini)
Gui Ban (Plastrum Testudinis)
Huang Jing (Rhizoma Polygonati)
She Chuang Zi (Fructus Cnidii)
Tu Si Zi (Semen Cuscutae)
Xu Duan (Radix Dipsaci)
Zi He Che (Placenta Hominis)

62. Inflammation of the female reproductive system
Bai Jie Zi (Semen Sinapis)
Bai Tou Weng (Radix Pulsatillae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Hua Jiao (Pericarpium Zanthoxyli)
Huang Bai (Cortex Phellodendri)
Huang Qi (Radix Astragali)
Jue Ming Zi (Semen Cassiae)
Long Dan Cao (Radix Gentianae)
Ma Bian Cao (Herba Verbenae)
Peng Sha (Borax)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Chuang Zi (Fructus Cnidii)
Shi Liu Pi (Pericarpium Granati)
Wu Bei Zi (Galla Chinensis)
Ya Dan Zi (Fructus Bruceae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yu Xing Cao (Herba Houttuyniae)
Yuan Zhi (Radix Polygalae)
Zhu Dan (Fel Porcus)
Zi Cao Gen (Radix Lithospermi)

63. Inflammation of the male reproductive system
Che Qian Cao (Herba Plantaginis)
Che Qian Zi (Semen Plantaginis)
Chi Xiao Dou (Semen Phaseoli)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Chuan Mu Tong (Caulis Clematidis Armandii)
Dang Gui (Radicis Angelicae Sinensis)
Guan Mu Tong (Caulis Aristolochiae Manshuriensis)
Guan Zhong (Rhizoma Dryopteridis)
Huang Bai (Cortex Phellodendri)
Long Dan Cao (Radix Gentianae)
Pu Gong Ying (Herba Taraxaci)
Qu Mai (Herba Dianthi)
Tu Si Zi (Semen Cuscutae)
Wei Ling Xian (Radix Clematidis)
Wu Mei (Fructus Mume)
Xuan Shen (Radix Scrophulariae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yu Xing Cao (Herba Houttuyniae)
Ze Xie (Rhizoma Alismatis)
Zhi Mu (Radix Anemarrhenae)

64. Intestinal obstruction
Ba Dou (Fructus Crotonis)
Ding Xiang (Flos Caryophylli)
Fan Xie Ye (Folium Sennae)
Gan Jiang (Rhizoma Zingiberis)
Hua Jiao (Pericarpium Zanthoxyli)
Wu Mei (Fructus Mume)
Zhu Dan (Fel Porcus)

65. Jaundice
Bai Mao Gen (Rhizoma Imperatae)
Bai Xian Pi (Cortex Dictamni)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Chi Xiao Dou (Semen Phaseoli)
Da Huang (Radix et Rhizoma Rhei)
Fu Ling (Poria)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Jiang (Rhizoma Zingiberis)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Jin Qian Cao (Herba Lysimachiae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Long Dan Cao (Radix Gentianae)
Pu Gong Ying (Herba Taraxaci)
Qin Jiao (Radix Gentianae Macrophyllae)
Rou Gui (Cortex Cinnamomi)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Yin Chen Hao (Herba Artemisiae Scopariae)
Yu Jin (Radix Curcumae)
Zhi Zi (Fructus Gardeniae)
Zhu Dan (Fel Porcus)

66. Leprosy
Cang Er Zi (Fructus Xanthii)
Da Feng Zi (Semen Hydnocarpi)
Mao Dong Qing (Radix Ilicis Pubescentis)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)

67. Leptospirosis
Jin Yin Hua (Flos Lonicerae)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Xian He Cao (Herba Agrimoniae)

68. Leukopenia
Bu Gu Zhi (Fructus Psoraleae)
Can Sha (Excrementum Bombycis Mori)
Chan Su (Venenum Bufonis)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Huang Jing (Rhizoma Polygonati)
Ling Zhi (Ganoderma)
Lu Lu Tong (Fructus Liquidambaris)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Rou Gui (Cortex Cinnamomi)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Yin Yang Huo (Herba Epimedii)

69. Liver cirrhosis
Ban Bian Lian (Herba Lobeliae Chinensis)
Ban Zhi Lian (Herba Scutellariae Barbatae)
Chai Hu (Radix Bupleuri)
Dan Shen (Radix Salviae Miltiorrhizae)
Gui Ban (Plastrum Testudinis)
Ling Zhi (Ganoderma)
She Xiang (Moschus)
Tai Zi Shen (Radix Pseudostellariae)
Tao Ren (Semen Persicae)

70. Liver diseases
Bai Zhi (Radix Angelicae Dahuricae)
Bie Jia (Carapax Trionycis)
Gan Sui (Radix Euphorbiae Kansui)
Gou Qi Zi (Fructus Lycii)
Hua Shi (Talcum)
Jin Qian Cao (Herba Lysimachiae)
Ma Dou Ling (Fructus Aristolochiae)
San Qi (Radix Notoginseng)
Shan Yao (Rhizoma Dioscoreae)
Shen Qu (Massa Fermentata)
Shui Zhi (Hirudo)
Wu Mei (Fructus Mume)

Zhi Zi (Fructus Gardeniae)

71. Malaria

Ai Ye (Folium Artemisiae Argyi)
Ba Dou (Fructus Crotonis)
Chang Shan (Radix Dichroae)
Chou Wu Tong (Folium Clerodendri Trichotomi)
Di Gu Pi (Cortex Lycii)
E Bu Shi Cao (Herba Centipedae)
Hai Piao Xiao (Endoconcha Sepiae)
Ma Bian Cao (Herba Verbenae)
Qing Hao (Herba Artemisiae Annuae)
Xian He Cao (Herba Agrimoniae)
Xiong Huang (Realgar)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Ya Dan Zi (Fructus Bruceae)
Ze Qi (Herba Euphorbiae Helioscopiae)

72. Mastitis

Bai Jie Zi (Semen Sinapis)
Bi Ba (Fructus Piperis Longi)
Bo He (Herba Menthae)
Chuan Lian Zi (Fructus Toosendan)
Cong Bai (Bulbus Allii Fistulosi)
Da Suan (Bulbus Alli Sativi)
Di Fu Zi (Fructus Kochiae)
Ding Xiang (Flos Caryophylli)
Gua Lou Shi (Fructus Trichosanthis)
Hai Zao (Sargassum)
Huai Hua (Flos Sophorae)
Jin Qian Cao (Herba Lysimachiae)
Ju He (Semen Citri Rubrum)
Lao Guan Cao (Herba Erodii seu Geranii)
Ma Huang (Herba Ephedrae)
Pu Gong Ying (Herba Taraxaci)
Shang Lu (Radix Phytolaccae)
Shen Qu (Massa Fermentata)
Si Gua Luo (Retinervus Luffae Fructus)
Tian Nan Xing (Rhizoma Arisaematis)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)

73. Myelitis

Ba Dou (Fructus Crotonis)
Huang Lian (Rhizoma Coptidis)
Kuan Dong Hua (Flos Farfarae)

74. Myocardial infarction

Dan Shen (Radix Salviae Miltiorrhizae)
Gui Zhi (Ramulus Cinnamomi)
Sang Ji Sheng (Herba Taxilli)
Tian Ma (Rhizoma Gastrodiae)
Yan Hu Suo (Rhizoma Corydalis)

75. Myocarditis

Nan Sha Shen (Radix Adenophorae)
Yin Yang Huo (Herba Epimedii)
Yuan Zhi (Radix Polygalae)

76. Nausea and vomiting

Ban Xia (Rhizoma Pinelliae)
Fu Ling (Poria)
Fu Long Gan (Terra Flava Usta)
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)
Pi Pa Ye (Folium Eriobotryae)
Sheng Jiang (Rhizoma Zingiberis Recens)
Su Zi (Fructus Perillae)
Wu Zhu Yu (Fructus Evodiae)
Xuan Fu Hua (Flos Inulae)
Zhu Ru (Caulis Bambusae in Taenia)

77. Nephritis

Bai Mao Gen (Rhizoma Imperatae)
Bei Sha Shen (Radix Glehniae)
Che Qian Cao (Herba Plantaginis)
Che Qian Zi (Semen Plantaginis)
Chi Xiao Dou (Semen Phaseoli)
Chuan Mu Tong (Caulis Clematidis Armandii)
Da Suan (Bulbus Alli Sativi)
Dang Shen (Radix Codonopsis)
Di Fu Zi (Fructus Kochiae)
Fu Ling (Poria)
Fu Ping (Herba Spirodelae)
Gui Ban (Plastrum Testudinis)
Huang Bai (Cortex Phellodendri)
Huang Qi (Radix Astragali)
Huang Lian (Rhizoma Coptidis)
Huo Xiang (Herba Agastache)
Lei Gong Teng (Radix Tripterygii Wilfordii)
Lu Han Cao (Herba Pyrolae)
Ma Huang (Herba Ephedrae)
Pi Pa Ye (Folium Eriobotryae)
San Qi (Radix Notoginseng)
Shan Zha (Fructus Crataegi)
Shan Zhu Yu (Fructus Corni)
Shang Lu (Radix Phytolaccae)
Shi Wei (Folium Pyrrosiae)
Shui Zhi (Hirudo)
Xiao Ji (Herba Cirisii)
Yi Mu Cao (Herba Leonuri)
Yi Yi Ren (Semen Coicis)
Yu Mi Xu (Stigma Maydis)
Ze Qi (Herba Euphorbiae Helioscopiae)
Zhu Ling (Polyporus)

78. Nephrotic syndrome

Dong Chong Xia Cao (Cordyceps)
Mang Xiao (Natrii Sulfas)
Shui Zhi (Hirudo)

79. Neuralgia

Bai Shao (Radix Paeoniae Alba)
Bai Zhi (Radix Angelicae Dahuricae)
Cao Wu (Radix Aconiti Kusnezoffii)
Chuan Wu (Radix Aconiti Preparata)
Du Huo (Radix Angelicae Pubescentis)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Gui Zhi (Ramulus Cinnamomi)
Long Dan Cao (Radix Gentianae)
Ma Qian Zi (Semen Strychni)
Quan Xie (Scorpio)
Tian Ma (Rhizoma Gastrodiae)
Wu Mei (Fructus Mume)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Yi Yi Ren (Semen Coicis)
Zao Xiu (Rhizoma Paridis)

80. Neurodermatitis

Bai Bu (Radix Stemonae)
Bai Tou Weng (Radix Pulsatillae)
Chi Shao (Radix Paeoniae Rubrae)
Gao Ben (Rhizoma Ligustici)
Qing Hao (Herba Artemisiae Annuae)
Sheng Di Huang (Radix Rehmanniae)
Shu Di Huang (Radix Rehmanniae Preparata)
Tian Nan Xing (Rhizoma Arisaematis)
Zi Cao Gen (Radix Lithospermi)

81. Neurosis

Ba Dou (Fructus Crotonis)
Bai He (Bulbus Lilii)
Chai Hu (Radix Bupleuri)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Dang Shen (Radix Codonopsis)
Gou Teng (Ramulus Uncariae cum Uncis)
Gui Ban (Plastrum Testudinis)
He Huan Hua (Flos Albiziae)
He Huan Pi (Cortex Albiziae)
He Shou Wu (Radix Polygoni Multiflori)
Hou Po (Cortex Magnoliae Officinalis)
Huang Jing (Rhizoma Polygonati)
Ling Zhi (Ganoderma)

Lu Cha (Folium Camellia Sinensis)
Lu Lu Tong (Fructus Liquidambaris)
Ren Shen (Radix Ginseng)
Shan Yao (Rhizoma Dioscoreae)
Suan Zao Ren (Semen Zizyphi Spinosae)
Tian Ma (Rhizoma Gastrodiae)
Wang Bu Liu Xing (Semen Vaccariae)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xie Cao (Radix et Rhizoma Valerianae)
Xu Chang Qing (Radix Cynanchi Paniculati)
Yan Hu Suo (Rhizoma Corydalis)
Ye Jiao Teng (Caulis Polygoni Multiflori)
Yin Yang Huo (Herba Epimedii)
Yuan Zhi (Radix Polygalae)

82. Obesity

He Ye (Folium Nelumbinis)
Lu Cha (Folium Camellia Sinensis)
Zao Jiao (Fructus Gleditsiae)

83. Osteoporosis

Gou Ji (Rhizoma Cibotii)
Gu Sui Bu (Rhizoma Drynariae)
Gui Ban (Plastrum Testudinis)
Lu Rong (Cornu Cervi Pantotrichum)
Xu Duan (Radix Dipsaci)

84. Otitis media

Bing Pian (Borneolum Syntheticum)
Gan Cao (Radix Glycyrrhizae)
Huang Bai (Cortex Phellodendri)
Long Dan Cao (Radix Gentianae)
Ming Fan (Alumen)
She Tui (Periostracum Serpentis)
Xu Chang Qing (Radix Cynanchi Paniculati)
Yu Xing Cao (Herba Houttuyniae)
Ze Xie (Rhizoma Alismatis)
Zhu Dan (Fel Porcus)

85. Pain

Bai Jie Zi (Semen Sinapis)
Bai Zhi (Radix Angelicae Dahuricae)
Ban Xia (Rhizoma Pinelliae)
Bi Ba (Fructus Piperis Longi)
Bi Cheng Qie (Fructus Litseae)
Bian Xu (Herba Polygoni Avicularis)
Bing Lang (Semen Arecae)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Dang Gui (Radicis Angelicae Sinensis)
Di Fu Zi (Fructus Kochiae)
Di Yu (Radix Sanguisorbae)
Ding Xiang (Flos Caryophylli)
Fang Feng (Radix Saposhnikoviae)
Gan Jiang (Rhizoma Zingiberis)
Gao Ben (Rhizoma Ligustici)
Ge Gen (Radix Puerariae)
Hai Shen (Strichopus Japonicus)
Han Lian Cao (Herba Ecliptae)
Hong Hua (Flos Carthami)
Huang Jing (Rhizoma Polygonati)
Ku Lian Pi (Cortex Meliae)
Lian Zi Xin (Plumula Nelumbinis)
Ma Ti Jin (Herba Dichondrae Repentis)
Qin Jiao (Radix Gentianae Macrophyllae)
Qing Mu Xiang (Radix Aristolochiae)
San Qi (Radix Notoginseng)
Shan Zha (Fructus Crataegi)
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Su He Xiang (Styrax)
Su Mu (Lignum Sappan)
Suan Zao Ren (Semen Zizyphi Spinosae)
Tian Nan Xing (Rhizoma Arisaematis)
Tian Zhu Huang (Concretio Silicea Bambusae)
Wei Ling Xian (Radix Clematidis)
Wu Mei (Fructus Mume)
Xi Xin (Herba Asari)
Xiang Fu (Rhizoma Cyperi)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Yan Hu Suo (Rhizoma Corydalis)
Yi Yi Ren (Semen Coicis)
Ze Lan (Herba Lycopi)
Zhu Sha (Cinnabaris)

86. Pancreatitis

Bai Shao (Radix Paeoniae Alba)
Chai Hu (Radix Bupleuri)

87. Paralysis

Da Suan (Bulbus Alli Sativi)
Fang Feng (Radix Saposhnikoviae)
He Shou Wu (Radix Polygoni Multiflori)

88. Parasitic infestation (intestinal)

Ai Ye (Folium Artemisiae Argyi)
Bai Bu (Radix Stemonae)
Bing Lang (Semen Arecae)
Chang Shan (Radix Dichroae)
Chuan Lian Zi (Fructus Toosendan)
Cong Bai (Bulbus Allii Fistulosi)
Fei Zi (Semen Torreyae)
Guan Zhong (Rhizoma Dryopteridis)
He Shi (Fructus Carpesii)
Ku Lian Pi (Cortex Meliae)
Lei Wan (Omphalia)
Ma Bian Cao (Herba Verbenae)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Pi Pa Ye (Folium Eriobotryae)
Shi Jun Zi (Fructus Quisqualis)
Wei Ling Xian (Radix Clematidis)
Wu Mei (Fructus Mume)
Xun Gu Feng (Herba Aristolochiae Mollissimae)

89. Parotitis

Bai Jie Zi (Semen Sinapis)
Bian Xu (Herba Polygoni Avicularis)
Cang Zhu (Rhizoma Atractylodis)
Chi Xiao Dou (Semen Phaseoli)
Di Long (Pheretima)
Jiang Can (Bombyx Batryticatus)
Pu Gong Ying (Herba Taraxaci)
She Tui (Periostracum Serpentis)
Tian Nan Xing (Rhizoma Arisaematis)
Wei Ling Xian (Radix Clematidis)
Xiong Huang (Realgar)
Ze Qi (Herba Euphorbiae Helioscopiae)

90. Parotitis and tonsillitis

Ban Lan Gen (Radix Isatidis)
Ban Mao (Mylabris)
Bo He (Herba Menthae)
Che Qian Cao (Herba Plantaginis)
Dang Gui (Radicis Angelicae Sinensis)
Hai Zao (Sargassum)
Jie Geng (Radix Platycodonis)
Ju Hua (Flos Chrysanthemi)
Niu Bang Zi (Fructus Arctii)
Niu Huang (Calculus Bovis)
Pang Da Hai (Semen Sterculiae Lychnophorae)
Pu Gong Ying (Herba Taraxaci)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Wei Ling Xian (Radix Clematidis)
Xuan Shen (Radix Scrophulariae)
Xue Yu Tan (Crinis Carbonisatus)
Yu Xing Cao (Herba Houttuyniae)
Ze Qi (Herba Euphorbiae Helioscopiae)
Zhu Sha (Cinnabaris)

91. Peptic ulcer
Bai Ji (Rhizoma Bletillae)
Gan Jiang (Rhizoma Zingiberis)
Huang Qi (Radix Astragali)
Ming Fan (Alumen)
Tian Nan Xing (Rhizoma Arisaematis)
Wa Leng Zi (Concha Arcae)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Yan Hu Suo (Rhizoma Corydalis)

92. Phlebitis
Dang Gui (Radicis Angelicae Sinensis)
Ma Qian Zi (Semen Strychni)
Mao Dong Qing (Radix Ilicis Pubescentis)
Shui Zhi (Hirudo)

93. Pneumonia
Bing Lang (Semen Arecae)
Da Suan (Bulbus Alli Sativi)
He Shi (Fructus Carpesii)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Jin Yin Hua (Flos Lonicerae)
Lu Han Cao (Herba Pyrolae)
Ma Dou Ling (Fructus Aristolochiae)
Ma Huang (Herba Ephedrae)
She Gan (Rhizoma Belamcandae)
Sheng Ma (Rhizoma Cimicifugae)

94. Poisoning
Can Sha (Excrementum Bombycis Mori)
Ge Gen (Radix Puerariae)
Huang Qin (Radix Scutellariae)
Xian He Cao (Herba Agrimoniae)

95. Psoriasis
Bai Hua She (Bungarus Parvus)
Bai Zhi (Radix Angelicae Dahuricae)
Du Huo (Radix Angelicae Pubescentis)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Qing Dai (Indigo Naturalis)
Shang Lu (Radix Phytolaccae)
Tu Fu Ling (Rhizoma Smilacis Glabrae)
Wu Shao She (Zaocys)
Zhu Ling (Polyporus)

96. Purpura due to lack of platelets
Bie Jia (Carapax Trionycis)
Bu Gu Zhi (Fructus Psoraleae)
Di Yu (Radix Sanguisorbae)
Dong Chong Xia Cao (Cordyceps)
Hei Zhi Ma (Semen Sesami Nigrum)
Ling Zhi (Ganoderma)
Mu Dan Pi (Cortex Moutan)
Qiang Huo (Rhizoma et Radix Notopterygii)
Shang Lu (Radix Phytolaccae)
Shui Niu Jiao (Cornu Bubali)
Suo Yang (Herba Cynomorii)
Zhi Zi (Fructus Gardeniae)

97. Rhinitis
Bai Zhi (Radix Angelicae Dahuricae)
Ban Mao (Mylabris)
Cang Er Zi (Fructus Xanthii)
E Bu Shi Cao (Herba Centipedae)
Fang Feng (Radix Saposhnikoviae)
Gan Cao (Radix Glycyrrhizae)
Hei Zhi Ma (Semen Sesami Nigrum)
Jie Geng (Radix Platycodonis)
Jin Yin Hua (Flos Lonicerae)
Mao Dong Qing (Radix Ilicis Pubescentis)
Xin Yi Hua (Flos Magnoliae)
Yu Xing Cao (Herba Houttuyniae)
Zi Zhu (Folium Callicarpae)

98. Roundworm infestation
Ba Dou (Fructus Crotonis)
Bing Lang (Semen Arecae)
Da Huang (Radix et Rhizoma Rhei)
Fei Zi (Semen Torreyae)
Guan Zhong (Rhizoma Dryopteridis)
He Shi (Fructus Carpesii)
Hua Jiao (Pericarpium Zanthoxyli)
Jin Qian Cao (Herba Lysimachiae)
Ku Lian Pi (Cortex Meliae)
Lei Wan (Omphalia)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Shi Jun Zi (Fructus Quisqualis)
Shi Liu Pi (Pericarpium Granati)
Su He Xiang (Styrax)
Su Zi (Fructus Perillae)
Wu Mei (Fructus Mume)
Yin Chen Hao (Herba Artemisiae Scopariae)

99. Schizophrenia
Fu Ling (Poria)
Shui Niu Jiao (Cornu Bubali)
Wu Mei (Fructus Mume)

100. Seizures
Chai Hu (Radix Bupleuri)
Gan Song (Radix seu Rhizoma Nardostachys)
Gui Zhi (Ramulus Cinnamomi)
Hai Shen (Strichopus Japonicus)
Hu Jiao (Fructus Piper)
Jiang Can (Bombyx Batryticatus)
Peng Sha (Borax)
Quan Xie (Scorpio)
Shi Chang Pu (Rhizoma Acori)
Tian Ma (Rhizoma Gastrodiae)
Tian Nan Xing (Rhizoma Arisaematis)
Wu Mei (Fructus Mume)

101. Sexual dysfunction
Che Qian Zi (Semen Plantaginis)
Dang Gui (Radicis Angelicae Sinensis)
Dong Chong Xia Cao (Cordyceps)
Ge Jie (Gecko)
Guan Mu Tong (Caulis Aristolochiae Manshuriensis)
Hai Ma (Hippocampus)
Hai Shen (Strichopus Japonicus)
Long Gu (Os Draconis)
Ren Shen (Radix Ginseng)
Xian Mao (Rhizoma Curculiginis)
Yin Yang Huo (Herba Epimedii)
Ze Xie (Rhizoma Alismatis)

102. Shingles
Dang Gui (Radicis Angelicae Sinensis)
Jiang Huang (Rhizoma Curcumae Longae)
Si Gua Luo (Retinervus Luffae Fructus)
Wang Bu Liu Xing (Semen Vaccariae)
Xiong Huang (Realgar)
Zao Xiu (Rhizoma Paridis)

103. Shock
Chen Pi (Pericarpium Citri Reticulatae)
Mu Gua (Fructus Chaenomelis)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Zhi Shi (Fructus Aurantii Immaturus)

104. Snake and insect bites
Bai Ji (Rhizoma Bletillae)
Hai Ma (Hippocampus)
Jing Tian San Qi (Herba seu Radix Sedum Aizoom)
Wei Ling Xian (Radix Clematidis)
Xu Chang Qing (Radix Cynanchi Paniculati)

105. Stomatitis and esophagitis
Ai Ye (Folium Artemisiae Argyi)
Chan Su (Venenum Bufonis)
Chuan Wu (Radix Aconiti Preparata)

Er Cha (Catechu)
Hou Po (Cortex Magnoliae Officinalis)
Jiang Huang (Rhizoma Curcumae Longae)
Jie Geng (Radix Platycodonis)
Jin Yin Hua (Flos Lonicerae)
Ma Bian Cao (Herba Verbenae)
Pang Da Hai (Semen Sterculiae Lychnophorae)
Qin Jiao (Radix Gentianae Macrophyllae)
Sheng Ma (Rhizoma Cimicifugae)
Shi Gao (Gypsum Fibrosum)
Yi Yi Ren (Semen Coicis)
Ze Qi (Herba Euphorbiae Helioscopiae)

106. Stone formation
Chen Pi (Pericarpium Citri Reticulatae)
Chi Xiao Dou (Semen Phaseoli)
Chuan Mu Tong (Caulis Clematidis Armandii)
Di Fu Zi (Fructus Kochiae)
Gua Lou Shi (Fructus Trichosanthis)
Guan Mu Tong (Caulis Aristolochiae Manshuriensis)
Guang Jin Qian Cao (Herba Desmodii Styracifolii)
Hai Jin Sha (Herba Lygodii)
Hua Shi (Talcum)
Jin Qian Cao (Herba Lysimachiae)
Shi Wei (Folium Pyrrosiae)
Su He Xiang (Styrax)
Wei Ling Xian (Radix Clematidis)
Yin Chen Hao (Herba Artemisiae Scopariae)
Yu Mi Xu (Stigma Maydis)

107. Stroke
Cao Wu (Radix Aconiti Kusnezoffii)
Chuan Wu (Radix Aconiti Preparata)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
Fu Ling (Poria)
Hong Hua (Flos Carthami)
Huang Jing (Rhizoma Polygonati)
Kun Bu (Thallus Laminariae seu Eckloniae)
Mao Dong Qing (Radix Ilicis Pubescentis)
She Xiang (Moschus)
Shi Chang Pu (Rhizoma Acori)
Shui Zhi (Hirudo)
Tian Nan Xing (Rhizoma Arisaematis)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)
Zhu Li (Succus Bambusae)

108. Tapeworm infestation
Bai Jie Zi (Semen Sinapis)
Ban Xia (Rhizoma Pinelliae)
Bing Lang (Semen Arecae)
Chuan Lian Zi (Fructus Toosendan)
Fei Zi (Semen Torreyae)
Hua Jiao (Pericarpium Zanthoxyli)
Lei Wan (Omphalia)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Shi Liu Pi (Pericarpium Granati)
Xian He Cao (Herba Agrimoniae)

109. Tetanus
Chan Tui (Periostracum Cicadae)
Tian Nan Xing (Rhizoma Arisaematis)
Wu Mei (Fructus Mume)

110. Trauma
Ju Ye San Qi (Herba seu Radix Gynura Segetum)
San Qi (Radix Notoginseng)
She Xiang (Moschus)
Su Mu (Lignum Sappan)
Xu Chang Qing (Radix Cynanchi Paniculati)
Ze Lan (Herba Lycopi)
Zhi Zi (Fructus Gardeniae)

111. Trichomoniasis
Bai Bu (Radix Stemonae)
Bu Gu Zhi (Fructus Psoraleae)
Ku Lian Pi (Cortex Meliae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Lei Wan (Omphalia)
She Chuang Zi (Fructus Cnidii)
Shi Jun Zi (Fructus Quisqualis)
Xian He Cao (Herba Agrimoniae)
Yuan Zhi (Radix Polygalae)

112. Tuberculosis
Ai Ye (Folium Artemisiae Argyi)
Bai Bu (Radix Stemonae)
Bai Guo (Semen Ginkgo)
Bai Ji (Rhizoma Bletillae)
Bai Jie Zi (Semen Sinapis)
Bai Tou Weng (Radix Pulsatillae)
Bie Jia (Carapax Trionycis)
Chan Su (Venenum Bufonis)
Da Ji (Radix Euphorbiae seu Knoxiae)
Da Suan (Bulbus Alli Sativi)
Di Yu (Radix Sanguisorbae)
Gan Cao (Radix Glycyrrhizae)
Gui Ban (Plastrum Testudinis)
Hai Zao (Sargassum)
Hua Rui Shi (Ophicalcitum)
Hua Shi (Talcum)
Huang Jing (Rhizoma Polygonati)
Ma Dou Ling (Fructus Aristolochiae)
Shan Yao (Rhizoma Dioscoreae)
She Tui (Periostracum Serpentis)
Wu Gong (Scolopendra)
Ze Qi (Herba Euphorbiae Helioscopiae)

113. Ulcer
Bai He (Bulbus Lilii)
Bai Zhi (Radix Angelicae Dahuricae)
Chui Pen Cao (Herba Sedi)
Dang Shen (Radix Codonopsis)
Gan Cao (Radix Glycyrrhizae)
Hai Ma (Hippocampus)
Hai Piao Xiao (Endoconcha Sepiae)
Hai Zao (Sargassum)
Huang Lian (Rhizoma Coptidis)
Mao Dong Qing (Radix Ilicis Pubescentis)
Mu Xiang (Radix Aucklandiae)
Pu Gong Ying (Herba Taraxaci)
Shan Yao (Rhizoma Dioscoreae)
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Wu Bei Zi (Galla Chinensis)
Wu Gong (Scolopendra)
Xuan Shen (Radix Scrophulariae)
Xue Yu Tan (Crinis Carbonisatus)
Ze Qi (Herba Euphorbiae Helioscopiae)
Zhu Dan (Fel Porcus)
Zi Cao Gen (Radix Lithospermi)

114. Vertigo
Bai Ji Li (Fructus Tribuli)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Ban Xia (Rhizoma Pinelliae)
Gou Teng (Ramulus Uncariae cum Uncis)
Ju Hua (Flos Chrysanthemi)
Jue Ming Zi (Semen Cassiae)
Ling Yang Jiao (Cornu Saigae Tataricae)
Long Gu (Os Draconis)
Man Jing Zi (Fructus Viticis)
Shi Jue Ming (Concha Haliotidis)
Suan Zao Ren (Semen Zizyphi Spinosae)

Tian Ma (Rhizoma Gastrodiae)
Tian Nan Xing (Rhizoma Arisaematis)
Ze Xie (Rhizoma Alismatis)

115.Whooping cough

Bai Bu (Radix Stemonae)
Bai Ji (Rhizoma Bletillae)
Bo He (Herba Menthae)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Da Suan (Bulbus Alli Sativi)
E Bu Shi Cao (Herba Centipedae)
Ma Huang (Herba Ephedrae)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Pi Pa Ye (Folium Eriobotryae)
Sang Ye (Folium Mori)
Zhu Dan (Fel Porcus)
Zi Wan (Radix Asteris)

Appendix 3 — Cross-reference Based on Pharmacological Effects

The listing of any herb under a diagnosis does not insure that that substance can be unquestioningly prescribed for the named symptom or syndrome. Selection and combination of herbs must be based on careful differential diagnosis, guided by informed understanding and training in Chinese Herbal Medicine.

1. Adaptogenic
2. Analgesic
3. Anesthetic
4. Anesthetic (local)
5. Antacid
6. Antiaging
7. Antiallergic
8. Antiamebic
9. Antiarrhythmic
10. Antiasthmatic
11. Antibacterial
12. Anticoagulant
13. Anticonvulsant
14. Antidermatophyte
15. Antidiabetic
16. Antidiarrheal
17. Antiemetic
18. Antifatigue
19. Antifertility
20. Antifungal
21. Antihistamine
22. Antihyperlipidemic
23. Antihypertensive
24. Anti-inflammatory
25. Antimalarial
26. Antimutagenic
27. Antineoplastic
28. Antioxidant
29. Antiparasitic
30. Antiparasitic (intestinal)
31. Antiplatelet
32. Antipyretic
33. Antiseizure, antiepileptic
34. Antitrichomonal
35. Antitussive
36. Antiulcer
37. Antiviral
38. Anxiolytic
39. Bronchodilator
40. Cardiotonic
41. Cholagogic
42. CNS stimulant
43. CNS suppressant
44. Cognitive
45. Detox (eliminate toxins)
46. Dissolve/expel stones
47. Diuretic
48. Emetic
49. Endocrine (adrenal)
50. Expectorant
51. External wounds (facilitates healing)
52. Hematopoietic (red blood cells)
53. Hematopoietic (white blood cells)
54. Hemostatic
55. Hepatoprotective
56. Hormone-like (estrogen and testosterone)
57. Hyperglycemic
58. Hypertensive
59. Hypotensive
60. Immunostimulant
61. Immunosuppressive
62. Laxative
63. Metabolic
64. Radiation (protective effect)
65. Sedative and hypnotic
66. Smooth muscle relaxant
67. Smooth muscle stimulant
68. Thrombolytic
69. Uterine stimulant
70. Vasoconstrictor (peripheral)
71. Vasodilator (coronary artery)
72. Vasodilator (peripheral)

1. Adaptogenic

Dang Shen (Radix Codonopsis)
Ren Shen (Radix Ginseng)
Wu Jia Pi (Cortex Acanthopanacis)
Xian Mao (Rhizoma Curculiginis)

2. Analgesic

Bai Bu (Radix Stemonae)
Bai Shao (Radix Paeoniae Alba)
Bai Tou Weng (Radix Pulsatillae)
Bai Zhi (Radix Angelicae Dahuricae)
Bei Dou Gen (Rhizoma Menispermi)
Bei Sha Shen (Radix Glehniae)
Bi Cheng Qie (Fructus Litseae)
Bing Pian (Borneolum Syntheticum)
Cao Wu (Radix Aconiti Kusnezoffii)
Chai Hu (Radix Bupleuri)
Chan Su (Venenum Bufonis)
Chan Tui (Periostracum Cicadae)
Chi Shao (Radix Paeoniae Rubrae)
Chou Wu Tong (Folium Clerodendri Trichotomi)
Chuan Wu (Radix Aconiti Preparata)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Ding Xiang (Flos Caryophylli)
Du Huo (Radix Angelicae Pubescentis)
Du Zhong (Cortex Eucommiae)
Fang Feng (Radix Saposhnikoviae)
Fang Feng (Radix Saposhnikoviae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Jiang (Rhizoma Zingiberis)
Gao Ben (Rhizoma Ligustici)
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)
Gui Zhi (Ramulus Cinnamomi)
Hai Shen (Strichopus Japonicus)
Hong Hua (Flos Carthami)
Hua Jiao (Pericarpium Zanthoxyli)
Hua Jiao (Pericarpium Zanthoxyli)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Jin Qian Cao (Herba Lysimachiae)
Jing Jie (Herba Schizonepetae)
Ju Ye San Qi (Herba seu Radix Gynura Segetum)
Ling Zhi (Ganoderma)
Man Jing Zi (Fructus Viticis)
Mu Dan Pi (Cortex Moutan)
Mu Zei (Herba Equiseti Hiemalis)
Niu Xi (Radix Cyathulae seu Achyranthis)
Qiang Huo (Rhizoma et Radix Notopterygii)
Qin Pi (Cortex Fraxini)
Qing Feng Teng (Caulis Sinomenii)
Quan Xie (Scorpio)
Rou Gui (Cortex Cinnamomi)
San Qi (Radix Notoginseng)
Sang Bai Pi (Cortex Mori)
She Xiang (Moschus).
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)

Suan Zao Ren (Semen Zizyphi Spinosae)
Tian Ma (Rhizoma Gastrodiae)
Tian Zhu Huang (Concretio Silicea Bambusae)
Wei Ling Xian (Radix Clematidis)
Wu Zhu Yu (Fructus Evodiae)
Xi Xin (Herba Asari)
Xiang Fu (Rhizoma Cyperi)
Xiao Hui Xiang (Fructus Foeniculi)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Yan Hu Suo (Rhizoma Corydalis)
Ying Su Ke (Pericarpium Papaveris)
Zao Xiu (Rhizoma Paridis)

3. Anesthetic
Chan Su (Venenum Bufonis)
Chuan Wu (Radix Aconiti Preparata)
Da Suan (Bulbus Alli Sativi)

4. Anesthetic (local)
Cao Wu (Radix Aconiti Kusnezoffii)
Chan Su (Venenum Bufonis)
Chuan Wu (Radix Aconiti Preparata)
Fo Shou (Fructus Citri Sarcodactylis)
Hua Jiao (Pericarpium Zanthoxyli)
She Chuang Zi (Fructus Cnidii)
Xi Xin (Herba Asari)
Xiang Fu (Rhizoma Cyperi)
Xin Yi Hua (Flos Magnoliae)

5. Antacid
Hai Ge Fen (Concha Cyclinae)
Hai Piao Xiao (Endoconcha Sepiae)
Mu Li (Concha Ostreae)

6. Antiaging
Bai Ji Li (Fructus Tribuli)
Dong Chong Xia Cao (Cordyceps)
Ge Jie (Gecko)
Hai Ma (Hippocampus)
He Shou Wu (Radix Polygoni Multiflori)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Ju Hua (Flos Chrysanthemi)
Lu Cha (Folium Camellia Sinensis)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Shan Yao (Rhizoma Dioscoreae)
Sheng Di Huang (Radix Rehmanniae)
Shu Di Huang (Radix Rehmanniae Preparata)
Tu Si Zi (Semen Cuscutae)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)
Yin Yang Huo (Herba Epimedii)

7. Antiallergic
Bai He (Bulbus Lilii)
Bi Cheng Qie (Fructus Litseae)
Chan Tui (Periostracum Cicadae)
Chen Xiang (Lignum Aquilariae Resinatum)
Da Zao (Fructus Jujubae)
Di Long (Pheretima)
E Bu Shi Cao (Herba Centipedae)
Fang Feng (Radix Saposhnikoviae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Jing Jie (Herba Schizonepetae)
Lian Qiao (Fructus Forsythiae)
Ling Zhi (Ganoderma)
Ma Huang (Herba Ephedrae)
Qiang Huo (Rhizoma et Radix Notopterygii)
Qin Jiao (Radix Gentianae Macrophyllae)
Qin Pi (Cortex Fraxini)
She Xiang (Moschus)
Tao Ren (Semen Persicae)
Wu Mei (Fructus Mume)
Wu Yao (Radix Linderae)
Xi Xin (Herba Asari)
Xin Yi Hua (Flos Magnoliae)
Xu Chang Qing (Radix Cynanchi Paniculati)
Yu Xing Cao (Herba Houttuyniae)
Zhi Shi (Fructus Aurantii Immaturus)
Zhu Dan (Fel Porcus)

8. Antiamebic
Ba Dou (Fructus Crotonis)
Bai Tou Weng (Radix Pulsatillae)
Chang Shan (Radix Dichroae)
Da Suan (Bulbus Alli Sativi)
Ya Dan Zi (Fructus Bruceae)

9. Antiarrhythmic
Bi Ba (Fructus Piperis Longi)
Bi Cheng Qie (Fructus Litseae)
Di Long (Pheretima)
Du Huo (Radix Angelicae Pubescentis)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Cao (Radix Glycyrrhizae)
Gan Song (Radix seu Rhizoma Nardostachys)
Ge Gen (Radix Puerariae)
Gou Teng (Ramulus Uncariae cum Uncis)
Gua Lou Shi (Fructus Trichosanthis)
He Shou Wu (Radix Polygoni Multiflori)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Ku Shen Gen (Radix Sophorae Flavescentis)
Ling Zhi (Ganoderma)
Mai Men Dong (Radix Ophiopogonis)
Mu Dan Pi (Cortex Moutan)
Qiang Huo (Rhizoma et Radix Notopterygii)
San Qi (Radix Notoginseng)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Chuang Zi (Fructus Cnidii)
Shi Di (Calyx Kaki)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xie Cao (Radix et Rhizoma Valerianae)
Yin Yang Huo (Herba Epimedii)

10. Antiasthmatic
Ai Ye (Folium Artemisiae Argyi)
Bai Bu (Radix Stemonae)
Bai He (Bulbus Lilii)
Bi Cheng Qie (Fructus Litseae)
Chan Su (Venenum Bufonis)
Che Qian Zi (Semen Plantaginis)
Chen Pi (Pericarpium Citri Reticulatae)
Dang Gui (Radicis Angelicae Sinensis)
Di Long (Pheretima)
E Bu Shi Cao (Herba Centipedae)
Fo Shou (Fructus Citri Sarcodactylis)
Gao Ben (Rhizoma Ligustici)
Ge Jie (Gecko)
Gou Teng (Ramulus Uncariae cum Uncis)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Jing Jie (Herba Schizonepetae)
Kuan Dong Hua (Flos Farfarae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Lao Guan Cao (Herba Erodii seu Geranii)
Ling Zhi (Ganoderma)
Ma Dou Ling (Fructus Aristolochiae)
Ma Huang (Herba Ephedrae)
Ma Qian Zi (Semen Strychni)
Pi Pa Ye (Folium Eriobotryae)
Qin Pi (Cortex Fraxini)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Ren Dong Teng (Caulis Lonicerae)

Shan Dou Gen (Radix Sophorae Tonkinensis)
Shang Lu (Radix Phytolaccae)
She Chuang Zi (Fructus Cnidii)
Shi Chang Pu (Rhizoma Acori)
Si Gua Luo (Retinervus Luffae Fructus)
Xiao Hui Xiang (Fructus Foeniculi)
Xing Ren (Semen Armeniacae Amarum)
Xuan Fu Hua (Flos Inulae)
Ye Jiao Teng (Caulis Polygoni Multiflori)
Zhu Dan (Fel Porcus)
Zi Su Ye (Folium Perillae)

11. Antibacterial

Ai Ye (Folium Artemisiae Argyi)
Bai Bu (Radix Stemonae)
Bai Guo (Semen Ginkgo)
Bai Ji (Rhizoma Bletillae)
Bai Jie Zi (Semen Sinapis)
Bai Mao Gen (Rhizoma Imperatae)
Bai Shao (Radix Paeoniae Alba)
Bai Tou Weng (Radix Pulsatillae)
Bai Xian Pi (Cortex Dictamni)
Bai Zhi (Radix Angelicae Dahuricae)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Ban Lan Gen (Radix Isatidis)
Bi Ba (Fructus Piperis Longi)
Bi Cheng Qie (Fructus Litseae)
Bian Dou (Semen Lablab Album)
Bian Xu (Herba Polygoni Avicularis)
Bing Pian (Borneolum Syntheticum)
Bo He (Herba Menthae)
Bu Gu Zhi (Fructus Psoraleae)
Can Sha (Excrementum Bombycis Mori)
Cang Er Zi (Fructus Xanthii)
Chai Hu (Radix Bupleuri)
Chi Shao (Radix Paeoniae Rubrae)
Chi Xiao Dou (Semen Phaseoli)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Chuan Lian Zi (Fructus Toosendan)
Chuan Xin Lian (Herba Andrographis)
Cong Bai (Bulbus Allii Fistulosi)
Da Feng Zi (Semen Hydnocarpi)
Da Huang (Radix et Rhizoma Rhei)
Da Ji (Radix Euphorbiae seu Knoxiae)
Da Qing Ye (Folium Isatidis)
Da Suan (Bulbus Alli Sativi)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Di Fu Zi (Fructus Kochiae)
Di Gu Pi (Cortex Lycii)
Di Jin Cao (Herba Euphorbiae Humifusae)
Di Yu (Radix Sanguisorbae)
Ding Xiang (Flos Caryophylli)
E Zhu (Rhizoma Curcumae)
Er Cha (Catechu)
Fan Xie Ye (Folium Sennae)
Fang Feng (Radix Saposhnikoviae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Fu Ling (Poria)
Gan Jiang (Rhizoma Zingiberis)
Gan Song (Radix seu Rhizoma Nardostachys)
Gao Ben (Rhizoma Ligustici)
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)
Gu Sui Bu (Rhizoma Drynariae)
Guan Mu Tong (Caulis Aristolochiae Manshuriensis)
Guan Zhong (Rhizoma Dryopteridis)
Gui Zhi (Ramulus Cinnamomi)
Hai Jin Sha (Herba Lygodii)
Hai Zao (Sargassum)
Han Lian Cao (Herba Ecliptae)
He Huan Pi (Cortex Albiziae)
He Shi (Fructus Carpesii)
Hong Dou Kou (Fructus Alphiniae Galangae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Hua Jiao (Pericarpium Zanthoxyli)
Hua Shi (Talcum)
Huai Hua (Flos Sophorae)
Huang Bai (Cortex Phellodendri)
Huang Qin (Radix Scutellariae)
Huang Yao Zi (Herba Dioscoreae Bulbiferae)
Ji Guan Hua (Flos Celosiae Cristatae)
Jiang Huang (Rhizoma Curcumae Longae)
Jin Qian Cao (Herba Lysimachiae)
Jin Yin Hua (Flos Lonicerae)
Jing Jie (Herba Schizonepetae)
Jing Tian San Qi (Herba seu Radix Sedum Aizoom)
Ju Hua (Flos Chrysanthemi)
Jue Ming Zi (Semen Cassiae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Lao Guan Cao (Herba Erodii seu Geranii)
Lian Fang (Receptaculum Nelumbinis)
Lian Qian Cao (Herba Glechomae)
Lian Qiao (Fructus Forsythiae)
Ling Zhi (Ganoderma)
Liu Huang (Sulfur)
Long Dan Cao (Radix Gentianae)
Long Yan Rou (Arillus Longan)
Lu Cha (Folium Camellia Sinensis)
Lu Han Cao (Herba Pyrolae)
Lu Hui (Aloe)
Ma Bian Cao (Herba Verbenae)
Ma Dou Ling (Fructus Aristolochiae)
Ma Huang (Herba Ephedrae)
Ma Qian Zi (Semen Strychni)
Ma Ti Jin (Herba Dichondrae Repentis)
Man Jing Zi (Fructus Viticis)
Mao Dong Qing (Radix Ilicis Pubescentis)
Ming Fan (Alumen)
Mu Dan Pi (Cortex Moutan)
Mu Gua (Fructus Chaenomelis)
Mu Xiang (Radix Aucklandiae)
Mu Zei (Herba Equiseti Hiemalis)
Niu Bang Zi (Fructus Arctii)
Peng Sha (Borax)
Pi Pa Ye (Folium Eriobotryae)
Pu Gong Ying (Herba Taraxaci)
Qian Dan (Minium)
Qin Jiao (Radix Gentianae Macrophyllae)
Qin Pi (Cortex Fraxini)
Qing Hao (Herba Artemisiae Annuae)
Qing Mu Xiang (Radix Aristolochiae)
Qu Mai (Herba Dianthi)
Ren Dong Teng (Caulis Lonicerae)
Rou Dou Kou (Semen Myristicae)
Rou Gui (Cortex Cinnamomi)
Sang Ji Sheng (Herba Taxilli)
Sang Ye (Folium Mori)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Shan Zha (Fructus Crataegi)
She Gan (Rhizoma Belamcandae)
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Shi Liu Pi (Pericarpium Granati)
Shi Wei (Folium Pyrrosiae)
Si Gua Luo (Retinervus Luffae Fructus)
Su He Xiang (Styrax)
Su Mu (Lignum Sappan)
Su Zi (Fructus Perillae)
Tian Hua Fen (Radix Trichosanthis)
Tian Men Dong (Radix Asparagi)
Tu Si Zi (Semen Cuscutae)
Wei Ling Xian (Radix Clematidis)
Wu Bei Zi (Galla Chinensis)
Wu Gong (Scolopendra)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)

Wu Wei Zi (Fructus Schisandrae Chinensis)
Wu Yao (Radix Linderae)
Wu Yi (Fructus Ulmi Praeparatus)
Wu Zhu Yu (Fructus Evodiae)
Xi Xin (Herba Asari)
Xia Ku Cao (Spica Prunellae)
Xiang Fu (Rhizoma Cyperi)
Xiang Ru (Herba Elsholtziae seu Moslae)
Xiao Hui Xiang (Fructus Foeniculi)
Xiao Ji (Herba Cirisii)
Xie Bai (Bulbus Allii Macrostemonis)
Xin Yi Hua (Flos Magnoliae)
Xing Ren (Semen Armeniacae Amarum)
Xiong Huang (Realgar)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xu Duan (Radix Dipsaci)
Xuan Fu Hua (Flos Inulae)
Xuan Shen (Radix Scrophulariae)
Xue Jie (Sanguis Draconis)
Xue Yu Tan (Crinis Carbonisatus)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Ye Jiao Teng (Caulis Polygoni Multiflori)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yin Chen Hao (Herba Artemisiae Scopariae)
Yin Yang Huo (Herba Epimedii)
Yu Xing Cao (Herba Houttuyniae)
Yuan Zhi (Radix Polygalae)
Ze Qi (Herba Euphorbiae Helioscopiae)
Zhi Mu (Radix Anemarrhenae)
Zhu Dan (Fel Porcus)
Zhu Ling (Polyporus)
Zhu Ru (Caulis Bambusae in Taenia)
Zi Cao Gen (Radix Lithospermi)
Zi Su Ye (Folium Perillae)
Zi Wan (Radix Asteris)
Zi Zhu (Folium Callicarpae)

12. Anticoagulant

Bi Cheng Qie (Fructus Litseae)
Bian Dou (Semen Lablab Album)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Da Fu Pi (Pericarpium Arecae)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Di Long (Pheretima)
Ding Xiang (Flos Caryophylli)
Du Huo (Radix Angelicae Pubescentis)
E Zhu (Rhizoma Curcumae)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Jiang (Rhizoma Zingiberis)
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)
Gou Teng (Ramulus Uncariae cum Uncis)
Gui Zhi (Ramulus Cinnamomi)
Hai Zao (Sargassum)
Hong Hua (Flos Carthami)
Hua Jiao (Pericarpium Zanthoxyli)
Kun Bu (Thallus Laminariae seu Eckloniae)
Ling Zhi (Ganoderma)
Lu Cha (Folium Camellia Sinensis)
Ma Huang (Herba Ephedrae)
Man Jing Zi (Fructus Viticis)
Mao Dong Qing (Radix Ilicis Pubescentis)
Mu Dan Pi (Cortex Moutan)
Mu Xiang (Radix Aucklandiae)
Mu Zei (Herba Equiseti Hiemalis)
Nan Sha Shen (Radix Adenophorae)
Sheng Ma (Rhizoma Cimicifugae)
Shui Zhi (Hirudo)
Su He Xiang (Styrax)
Tao Ren (Semen Persicae)
Tian Zhu Huang (Concretio Silicea Bambusae)
Wu Gong (Scolopendra)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Yao (Radix Linderae)
Xi Xian Cao (Herba Siegesbeckiae)
Xiao Hui Xiang (Fructus Foeniculi)
Xue Jie (Sanguis Draconis)
Yi Mu Cao (Herba Leonuri)

13. Anticonvulsant

Gou Teng (Ramulus Uncariae cum Uncis)
Niu Huang (Calculus Bovis)
Tian Ma (Rhizoma Gastrodiae)
Tian Nan Xing (Rhizoma Arisaematis)

14. Antidermatophyte

Bai Xian Pi (Cortex Dictamni)
Bai Zhi (Radix Angelicae Dahuricae)
Ban Mao (Mylabris)
Bing Lang (Semen Arecae)
Cong Bai (Bulbus Allii Fistulosi)
Da Huang (Radix et Rhizoma Rhei)
Da Suan (Bulbus Alli Sativi)
Hai Shen (Strichopus Japonicus)
Hu Huang Lian (Rhizoma Picrorhizae)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Huo Xiang (Herba Agastache)
Ju Hua (Flos Chrysanthemi)
Ku Lian Pi (Cortex Meliae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Nan Sha Shen (Radix Adenophorae)
Qing Hao (Herba Artemisiae Annuae)
San Qi (Radix Notoginseng)
Sheng Ma (Rhizoma Cimicifugae)
Shi Jun Zi (Fructus Quisqualis)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Xie Cao (Radix et Rhizoma Valerianae)
Xuan Shen (Radix Scrophulariae)
Zhang Nao (Camphora)
Zhi Zi (Fructus Gardeniae)
Zi Su Ye (Folium Perillae)

15. Antidiabetic

Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Cang Er Zi (Fructus Xanthii)
Cang Zhu (Rhizoma Atractylodis)
Chuan Wu (Radix Aconiti Preparata)
Da Suan (Bulbus Alli Sativi)
Di Gu Pi (Cortex Lycii)
Gan Cao (Radix Glycyrrhizae)
Ge Gen (Radix Puerariae)
Ge Jie (Gecko)
Gou Qi Zi (Fructus Lycii)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Jing (Rhizoma Polygonati)
Huang Lian (Rhizoma Coptidis)
Li Zhi He (Semen Litchi)
Ling Zhi (Ganoderma)
Mai Ya (Fructus Hordei Germinatus)
Niu Bang Zi (Fructus Arctii)
Ren Shen (Radix Ginseng)
Sang Ye (Folium Mori)
Shan Yao (Rhizoma Dioscoreae)
Xia Ku Cao (Spica Prunellae)
Xing Ren (Semen Armeniacae Amarum)
Yi Yi Ren (Semen Coicis)
Yin Yang Huo (Herba Epimedii)
Yu Zhu (Rhizoma Polygonati Odorati)
Ze Xie (Rhizoma Alismatis)
Zhi Mu (Radix Anemarrhenae)
Zi Cao Gen (Radix Lithospermi)

16. Antidiarrheal

Ai Ye (Folium Artemisiae Argyi)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)

Bian Dou (Semen Lablab Album)
Bing Lang (Semen Arecae)
Bu Gu Zhi (Fructus Psoraleae)
Cao Dou Kou (Semen Alpiniae Katsumadai)
Cao Guo (Fructus Tsaoko)
Che Qian Zi (Semen Plantaginis)
Chi Shi Zhi (Halloysitum Rubrum)
Chun Gen Pi (Cortex Ailanthi)
Fu Ling (Poria)
Gan Cao (Radix Glycyrrhizae)
Ge Gen (Radix Puerariae)
He Zi (Fructus Chebulae)
Hua Shi (Talcum)
Jin Ying Zi (Fructus Rosae Laevigatae)
Lian Zi (Semen Nelumbinis)
Qian Shi (Semen Euryales)
Rou Dou Kou (Semen Myristicae)
Sha Ren (Fructus Amomi)
Shan Yao (Rhizoma Dioscoreae)
Sheng Ma (Rhizoma Cimicifugae)
Shi Liu Pi (Pericarpium Granati)
Tu Si Zi (Semen Cuscutae)
Wu Bei Zi (Galla Chinensis)
Wu Mei (Fructus Mume)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Wu Zhu Yu (Fructus Evodiae)
Xian He Cao (Herba Agrimoniae)
Xiang Fu (Rhizoma Cyperi)
Yi Yi Ren (Semen Coicis)
Yi Zhi Ren (Fructus Alpiniae Oxyphyllae)
Ying Su Ke (Pericarpium Papaveris)
Yu Yu Liang (Limonitum)
Ze Xie (Rhizoma Alismatis)

17. Antiemetic

Ban Xia (Rhizoma Pinelliae)
Fu Long Gan (Terra Flava Usta)
Gan Jiang (Rhizoma Zingiberis)
Huo Xiang (Herba Agastache)
Lian Qiao (Fructus Forsythiae)
Sheng Jiang (Rhizoma Zingiberis Recens)

18. Antifatigue

Bie Jia (Carapax Trionycis)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
E Jiao (Colla Corii Asini)
Ma Huang (Herba Ephedrae)
Ren Shen (Radix Ginseng)
Wu Mei (Fructus Mume)
Xi Yang Shen (Radix Panacis Quinquefolii)

19. Antifertility

Ban Xia (Rhizoma Pinelliae)
Bing Pian (Borneolum Syntheticum)
Chuan Xin Lian (Herba Andrographis)
Di Long (Pheretima)
E Zhu (Rhizoma Curcumae)
Gan Sui (Radix Euphorbiae Kansui)
Guan Zhong (Rhizoma Dryopteridis)
He Huan Pi (Cortex Albiziae)
Jin Yin Hua (Flos Lonicerae)
Lei Gong Teng (Radix Tripterygii Wilfordii)
Lu Cha (Folium Camellia Sinensis)
Lu Han Cao (Herba Pyrolae)
Ma Dou Ling (Fructus Aristolochiae)
Mu Dan Pi (Cortex Moutan)
Niu Xi (Radix Cyathulae seu Achyranthis)
She Xiang (Moschus).
Shui Zhi (Hirudo)
Wang Bu Liu Xing (Semen Vaccariae)
Wei Ling Xian (Radix Clematidis)
Wu Bei Zi (Galla Chinensis)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Xi Xian Cao (Herba Siegesbeckiae)
Xiong Huang (Realgar)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Zong Lu Zi (Fructus Trachycarpi)

20. Antifungal

Ba Dou (Fructus Crotonis)
Ban Mao (Mylabris)
Chuan Lian Zi (Fructus Toosendan)
Ci Shi (Magnetitum)
Da Feng Zi (Semen Hydnocarpi)
Da Suan (Bulbus Alli Sativi)
Hai Tong Pi (Cortex Erythrinae)
Ku Lian Zi (Fructus Meliae)
Lu Hui (Aloe)
Qing Fen (Calomelas)
She Chuang Zi (Fructus Cnidii)
Wu Yi (Fructus Ulmi Praeparatus)
Xiong Huang (Realgar)
Xu Chang Qing (Radix Cynanchi Paniculati)
Yuan Hua (Flos Genkwa)
Zhang Nao (Camphora)

21. Antihistamine

Chan Tui (Periostracum Cicadae)
Chen Pi (Pericarpium Citri Reticulatae)
Fang Feng (Radix Saposhnikoviae)

22. Antihyperlipidemic

Bi Ba (Fructus Piperis Longi)
Da Suan (Bulbus Alli Sativi)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
Di Gu Pi (Cortex Lycii)
Du Zhong (Cortex Eucommiae)
Ge Gen (Radix Puerariae)
Gou Qi Zi (Fructus Lycii)
Gui Ban (Plastrum Testudinis)
Hai Zao (Sargassum)
He Shou Wu (Radix Polygoni Multiflori)
Hong Hua (Flos Carthami)
Hei Zhi Ma (Semen Sesami Nigrum)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huai Hua (Flos Sophorae)
Huang Jing (Rhizoma Polygonati)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Huo Ma Ren (Fructus Cannabis)
Jiang Huang (Rhizoma Curcumae Longae)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Jin Yin Hua (Flos Lonicerae)
Jue Ming Zi (Semen Cassiae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Lu Cha (Folium Camellia Sinensis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Ren Dong Teng (Caulis Lonicerae)
Sha Yuan Zi (Semen Astragali Complanati)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Shan Zha (Fructus Crataegi)
Sheng Ma (Rhizoma Cimicifugae)
Shui Niu Jiao (Cornu Bubali)
Shui Zhi (Hirudo)
Suan Zao Ren (Semen Zizyphi Spinosae)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xu Chang Qing (Radix Cynanchi Paniculati)
Ye Jiao Teng (Caulis Polygoni Multiflori)
Yin Guo Ye (Folium Ginkgo)
Yin Yang Huo (Herba Epimedii)
Yu Zhu (Rhizoma Polygonati Odorati)
Ze Xie (Rhizoma Alismatis)
Zi Su Ye (Folium Perillae)

23. Antihypertensive

Bo He (Herba Menthae)
Che Qian Zi (Semen Plantaginis)
Chou Wu Tong (Folium Clerodendri Trichotomi)
Da Ji (Herba seu Radix Cirsii Japonici)
Di Gu Pi (Cortex Lycii)
Di Long (Pheretima)
Du Zhong (Cortex Eucommiae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Gou Teng (Ramulus Uncariae cum Uncis)
Huai Hua (Flos Sophorae)
Huang Lian (Rhizoma Coptidis)
Ju Hua (Flos Chrysanthemi)
Jue Ming Zi (Semen Cassiae)
Lai Fu Zi (Semen Raphani)
Ling Zhi (Ganoderma)
Liu Huang (Sulfur)
Lu Cha (Folium Camellia Sinensis)
Mu Zei (Herba Equiseti Hiemalis)
Qing Mu Xiang (Radix Aristolochiae)
Sang Shen Zi (Fructus Mori)
Shan Zha (Fructus Crataegi)
Shui Zhi (Hirudo)
Wang Bu Liu Xing (Semen Vaccariae)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)
Wu Zhu Yu (Fructus Evodiae)
Xi Xian Cao (Herba Siegesbeckiae)
Xia Ku Cao (Spica Prunellae)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)
Xuan Shen (Radix Scrophulariae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yin Yang Huo (Herba Epimedii)
Ze Xie (Rhizoma Alismatis)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

24. Anti-inflammatory

Ba Ji Tian (Radix Morindae Officinalis)
Bai Shao (Radix Paeoniae Alba)
Bai Zhi (Radix Angelicae Dahuricae)
Bing Pian (Borneolum Syntheticum)
Cang Er Zi (Fructus Xanthii)
Cao Wu (Radix Aconiti Kusnezoffii)
Chai Hu (Radix Bupleuri)
Chan Su (Venenum Bufonis)
Chi Shao (Radix Paeoniae Rubrae)
Chou Wu Tong (Folium Clerodendri Trichotomi)
Chuan Wu (Radix Aconiti Preparata)
Chuan Xin Lian (Herba Andrographis)
Da Huang (Radix et Rhizoma Rhei)
Da Qing Ye (Folium Isatidis)
Dan Shen (Radix Salviae Miltiorrhizae)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Di Yu (Radix Sanguisorbae)
Du Huo (Radix Angelicae Pubescentis)
Du Zhong (Cortex Eucommiae)
Fang Feng (Radix Saposhnikoviae)
Fang Feng (Radix Saposhnikoviae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Jiang (Rhizoma Zingiberis)
Gao Ben (Rhizoma Ligustici)
Ge Jie (Gecko)
Gu Sui Bu (Rhizoma Drynariae)
Guang Jin Qian Cao (Herba Desmodii Styracifolii)
Hai Ge Fen (Concha Meretricis seu Cyclinae)
Hong Hua (Flos Carthami)
Hei Zhi Ma (Semen Sesami Nigrum)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huai Hua (Flos Sophorae)
Huang Lian (Rhizoma Coptidis)
Huang Qi (Radix Astragali)
Huang Qin (Radix Scutellariae)
Jiang Huang (Rhizoma Curcumae Longae)
Jie Geng (Radix Platycodonis)
Jin Qian Cao (Herba Lysimachiae)
Jin Yin Hua (Flos Lonicerae)
Jing Jie (Herba Schizonepetae)
Ju Ye San Qi (Herba seu Radix Gynura Segetum)
Ku Shen Gen (Radix Sophorae Flavescentis)
Kuan Dong Hua (Flos Farfarae)
Lai Fu Zi (Semen Raphani)
Lei Gong Teng (Radix Tripterygii Wilfordii)
Lei Wan (Omphalia)
Lian Qiao (Fructus Forsythiae)
Liu Huang (Sulfur)
Lu Hui (Aloes)
Lu Lu Tong (Fructus Liquidambaris)
Ma Bian Cao (Herba Verbenae)
Ma Dou Ling (Fructus Aristolochiae)
Ma Huang (Herba Ephedrae)
Man Jing Zi (Fructus Viticis)
Mao Dong Qing (Radix Ilicis Pubescentis)
Mu Dan Pi (Cortex Moutan)
Niu Huang (Calculus Bovis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Pi Pa Ye (Folium Eriobotryae)
Qiang Huo (Rhizoma et Radix Notopterygii)
Qin Jiao (Radix Gentianae Macrophyllae)
Qin Pi (Cortex Fraxini)
Qing Feng Teng (Caulis Sinomenii)
Ren Dong Teng (Caulis Lonicerae)
San Qi (Radix Notoginseng)
Sha Yuan Zi (Semen Astragali Complanati)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Shang Lu (Radix Phytolaccae)
She Gan (Rhizoma Belamcandae)
She Tui (Periostracum Serpentis)
She Xiang (Moschus).
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Su Mu (Lignum Sappan)
Tao Ren (Semen Persicae)
Tian Ma (Rhizoma Gastrodiae)
Wu Jia Pi (Cortex Acanthopanacis)
Xi Xian Cao (Herba Siegesbeckiae)
Xi Xin (Herba Asari)
Xia Ku Cao (Spica Prunellae)
Xian Mao (Rhizoma Curculiginis)
Xiang Fu (Rhizoma Cyperi)
Xiao Ji (Herba Cirsii)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xue Jie (Sanguis Draconis)
Xue Yu Tan (Crinis Carbonisatus)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yin Yang Huo (Herba Epimedii)
Yu Xing Cao (Herba Houttuyniae)
Ze Xie (Rhizoma Alismatis)
Zhi Zi (Fructus Gardeniae)
Zi Cao Gen (Radix Lithospermi)

25. Antimalarial

Chang Shan (Radix Dichroae)
He Cao Ya (Gemma Agrimoniae)
Ma Bian Cao (Herba Verbenae)
Qing Hao (Herba Artemisiae Annuae)
Wei Ling Xian (Radix Clematidis)
Ya Dan Zi (Fructus Bruceae)

26. Antimutagenic

Chai Hu (Radix Bupleuri)
Da Zao (Fructus Jujubae)
E Bu Shi Cao (Herba Centipedae)

Jiang Huang (Rhizoma Curcumae Longae)
Lao Guan Cao (Herba Erodii seu Geranii)
Lu Cha (Folium Camellia Sinensis)
Niu Bang Zi (Fructus Arctii)
She Chuang Zi (Fructus Cnidii)
Sheng Jiang (Rhizoma Zingiberis Recens)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xing Ren (Semen Armeniacae Amarum)
Zhu Ling (Polyporus)

27. Antineoplastic

Bai Xian Pi (Cortex Dictamni)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Ban Mao (Mylabris)
Bi Ba (Fructus Piperis Longi)
Bie Jia (Carapax Trionycis)
Bu Gu Zhi (Fructus Psoraleae)
Can Sha (Excrementum Bombycis Mori)
Cao Wu (Radix Aconiti Kusnezoffii)
Chai Hu (Radix Bupleuri)
Chan Su (Venenum Bufonis)
Chan Tui (Periostracum Cicadae)
Chang Shan (Radix Dichroae)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Wu (Radix Aconiti Preparata)
Chuan Xin Lian (Herba Andrographis)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Cong Bai (Bulbus Allii Fistulosi)
Da Huang (Radix et Rhizoma Rhei)
Da Suan (Bulbus Alli Sativi)
Da Zao (Fructus Jujubae)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Dao Dou (Semen Canavaliae)
Deng Xin Cao (Medulla Junci)
Di Long (Pheretima)
Di Yu (Radix Sanguisorbae)
Dong Chong Xia Cao (Cordyceps)
Du Huo (Radix Angelicae Pubescentis)
E Zhu (Rhizoma Curcumae)
Er Cha (Catechu)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Fu Ling (Poria)
Gan Cao (Radix Glycyrrhizae)
Gan Sui (Radix Euphorbiae Kansui)
Gua Lou Shi (Fructus Trichosanthis)
Guan Zhong (Rhizoma Dryopteridis)
Gui Ban (Plastrum Testudinis)
Hai Ge Fen (Concha Meretricis seu Cyclinae)
Hai Long (Syngnathus)
Hai Shen (Strichopus Japonicus)
Hong Dou Kou (Fructus Alphiniae Galangae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Jiang Can (Bombyx Batryticatus)
Jiang Huang (Rhizoma Curcumae Longae)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Ju Ye San Qi (Herba seu Radix Gynura Segetum)
Ku Shen Gen (Radix Sophorae Flavescentis)
Kun Bu (Thallus Laminariae seu Eckloniae)
Lao Guan Cao (Herba Erodii seu Geranii)
Lei Gong Teng (Radix Tripterygii Wilfordii)
Ling Zhi (Ganoderma)
Long Yan Rou (Arillus Longan)
Lu Cha (Folium Camellia Sinensis)
Lu Hui (Aloe)
Lu Lu Tong (Fructus Liquidambaris)
Ma Qian Zi (Semen Strychni)
Mu Gua (Fructus Chaenomelis)
Niu Bang Zi (Fructus Arctii)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Pi Pa Ye (Folium Eriobotryae)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Su Mu (Lignum Sappan)
Tao Ren (Semen Persicae)
Tian Hua Fen (Radix Trichosanthis)
Tian Men Dong (Radix Asparagi)
Tian Nan Xing (Rhizoma Arisaematis)
Tu Si Zi (Semen Cuscutae)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Xian He Cao (Herba Agrimoniae)
Xiao Hui Xiang (Fructus Foeniculi)
Xie Cao (Radix et Rhizoma Valerianae)
Xing Ren (Semen Armeniacae Amarum)
Xun Gu Feng (Herba Aristolochiae Mollissimae)
Ya Dan Zi (Fructus Bruceae)
Ye Jiao Teng (Caulis Polygoni Multiflori)
Yi Yi Ren (Semen Coicis)
Yi Zhi Ren (Fructus Alpiniae Oxyphyllae)
Yu Xing Cao (Herba Houttuyniae)
Yuan Zhi (Radix Polygalae)
Zhu Ling (Polyporus)
Zi Cao Gen (Radix Lithospermi)
Zi Wan (Radix Asteris)
Zong Lu Pi (Fibra Stipulae Trachycarpi)

28. Antioxidant

Chai Hu (Radix Bupleuri)
Chen Pi (Pericarpium Citri Reticulatae)
Da Suan (Bulbus Alli Sativi)
Da Zao (Fructus Jujubae)
Dang Gui (Radicis Angelicae Sinensis)
Gan Cao (Radix Glycyrrhizae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huai Hua (Flos Sophorae)
Huang Jing (Rhizoma Polygonati)
Lao Guan Cao (Herba Erodii seu Geranii)
Lu Cha (Folium Camellia Sinensis)
Lu Lu Tong (Fructus Liquidambaris)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Ren Shen (Radix Ginseng)
Shan Zha (Fructus Crataegi)
Su Zi (Fructus Perillae)
Wu Bei Zi (Galla Chinensis)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xu Chang Qing (Radix Cynanchi Paniculati)

29. Antiparasitic

Bu Gu Zhi (Fructus Psoraleae)
Hu Jiao (Fructus Piper)
Liu Huang (Sulfur)
Wu Yi (Fructus Ulmi Praeparatus)

30. Antiparasitic (intestinal)

Bing Lang (Semen Arecae)
Chuan Lian Zi (Fructus Toosendan)
Ding Xiang (Flos Caryophylli)
Fei Zi (Semen Torreyae)
Guan Zhong (Rhizoma Dryopteridis)
He Huan Pi (Cortex Albiziae)
He Shi (Fructus Carpesii)
Hu Lu Ba (Semen Trigonellae)
Hua Jiao (Pericarpium Zanthoxyli)

Ku Lian Pi (Cortex Meliae)
Lei Wan (Omphalia)
Nan Gua Zi (Semen Cucurbitae Moschatae)
Qian Dan (Minium)
Sheng Jiang (Rhizoma Zingiberis Recens)
Shi Jun Zi (Fructus Quisqualis)
Shi Liu Pi (Pericarpium Granati)
Wu Mei (Fructus Mume)
Xian He Cao (Herba Agrimoniae)
Ya Dan Zi (Fructus Bruceae)
Yin Chen Hao (Herba Artemisiae Scopariae)

31. Antiplatelet

Ai Ye (Folium Artemisiae Argyi)
Ban Lan Gen (Radix Isatidis)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Xin Lian (Herba Andrographis)
Da Suan (Bulbus Alli Sativi)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Ding Xiang (Flos Caryophylli)
Du Huo (Radix Angelicae Pubescentis)
Fang Feng (Radix Saposhnikoviae)
Fen Fang Ji (Radix Stephaniae Tetandrae)
Gan Jiang (Rhizoma Zingiberis)
Gao Liang Jiang (Rhizoma Alpiniae Officinarum)
Ge Gen (Radix Puerariae)
Gou Teng (Ramulus Uncariae cum Uncis)
Gua Lou Shi (Fructus Trichosanthis)
Gui Zhi (Ramulus Cinnamomi)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huang Lian (Rhizoma Coptidis)
Jiang Huang (Rhizoma Curcumae Longae)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Ling Zhi (Ganoderma)
Lu Cha (Folium Camellia Sinensis)
Niu Huang (Calculus Bovis)
Ren Shen (Radix Ginseng)
Rou Gui (Cortex Cinnamomi)
Sang Ji Sheng (Herba Taxilli)
Sheng Jiang (Rhizoma Zingiberis Recens)
Su He Xiang (Styrax)
Suan Zao Ren (Semen Zizyphi Spinosae)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)
Xie Bai (Bulbus Allii Macrostemonis)
Xin Yi Hua (Flos Magnoliae)
Xue Jie (Sanguis Draconis)
Ye Ju Hua (Flos Chrysanthemi Indici)
Zhi Mu (Radix Anemarrhenae)

32. Antipyretic

Bai Zhi (Radix Angelicae Dahuricae)
Bei Sha Shen (Radix Glehniae)
Chai Hu (Radix Bupleuri)
Chan Tui (Periostracum Cicadae)
Chang Shan (Radix Dichroae)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Xin Lian (Herba Andrographis)
Da Qing Ye (Folium Isatidis)
Di Gu Pi (Cortex Lycii)
Di Long (Pheretima)
Fang Feng (Radix Saposhnikoviae)
Fu Ping (Herba Spirodelae)
Gan Jiang (Rhizoma Zingiberis)
Gao Ben (Rhizoma Ligustici).
Ge Gen (Radix Puerariae)
Gui Zhi (Ramulus Cinnamomi)
Gui Zhi (Ramulus Cinnamomi)
Jin Yin Hua (Flos Lonicerae)
Jing Jie (Herba Schizonepetae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Lian Qiao (Fructus Forsythiae)
Ling Yang Jiao (Cornu Saigae Tataricae)
Ma Huang (Herba Ephedrae)
Mu Dan Pi (Cortex Moutan)
Niu Huang (Calculus Bovis)
Qiang Huo (Rhizoma et Radix Notopterygii)
Qing Hao (Herba Artemisiae Annuae)
Sang Bai Pi (Cortex Mori)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Gan (Rhizoma Belamcandae)
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Shi Gao (Gypsum Fibrosum)
Suan Zao Ren (Semen Zizyphi Spinosae)
Xi Xin (Herba Asari)
Xiang Fu (Rhizoma Cyperi)
Xu Chang Qing (Radix Cynanchi Paniculati)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yin Chen Hao (Herba Artemisiae Scopariae)
Ze Qi (Herba Euphorbiae Helioscopiae)
Zhi Mu (Radix Anemarrhenae)
Zi Cao Gen (Radix Lithospermi)
Zi Su Ye (Folium Perillae)

33. Antiseizure, antiepileptic

Chan Tui (Periostracum Cicadae)
Chi Shao (Radix Paeoniae Rubrae)
Dang Shen (Radix Codonopsis)
Di Long (Pheretima)
Ding Xiang (Flos Caryophylli)
Gou Teng (Ramulus Uncariae cum Uncis)
Gui Zhi (Ramulus Cinnamomi)
Hu Jiao (Fructus Piper)
Jiang Can (Bombyx Batryticatus)
Ju Ye San Qi (Herba seu Radix Gynura Segetum)
Ling Yang Jiao (Cornu Saigae Tataricae)
Ling Zhi (Ganoderma)
Long Chi (Dens Draconis)
Long Gu (Os Draconis)
Mu Dan Pi (Cortex Moutan)
Niu Huang (Calculus Bovis)
Peng Sha (Borax)
Qin Pi (Cortex Fraxini)
Quan Xie (Scorpio)
Sang Bai Pi (Cortex Mori)
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Shi Chang Pu (Rhizoma Acori)
Suan Zao Ren (Semen Zizyphi Spinosae)
Tian Ma (Rhizoma Gastrodiae)
Tian Nan Xing (Rhizoma Arisaematis)
Wu Gong (Scolopendra)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xian Mao (Rhizoma Curculiginis)
Xie Cao (Radix et Rhizoma Valerianae)
Zao Xiu (Rhizoma Paridis)
Zhu Sha (Cinnabaris)

34. Antitrichomonal

Bai Tou Weng (Radix Pulsatillae)
Bai Xian Pi (Cortex Dictamni)
Bi Cheng Qie (Fructus Litseae)
Da Suan (Bulbus Alli Sativi)
He Cao Ya (Gemma Agrimoniae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Lei Wan (Omphalia)
Ming Fan (Alumen)

35. Antitussive

Ai Ye (Folium Artemisiae Argyi)

Bai Bu (Radix Stemonae)
Bai He (Bulbus Lilii)
Ban Xia (Rhizoma Pinelliae)
Bi Cheng Qie (Fructus Litseae)
Chai Hu (Radix Bupleuri)
Chan Su (Venenum Bufonis)
Che Qian Cao (Herba Plantaginis)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Da Zao (Fructus Jujubae)
E Bu Shi Cao (Herba Centipedae)
Gan Cao (Radix Glycyrrhizae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Jie Geng (Radix Platycodonis)
Kuan Dong Hua (Flos Farfarae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Lao Guan Cao (Herba Erodii seu Geranii)
Ma Bian Cao (Herba Verbenae)
Ma Dou Ling (Fructus Aristolochiae)
Ma Qian Zi (Semen Strychni)
Pi Pa Ye (Folium Eriobotryae)
Qin Pi (Cortex Fraxini)
Qing Feng Teng (Caulis Sinomenii)
Ren Dong Teng (Caulis Lonicerae)
Sang Bai Pi (Cortex Mori)
Shi Chang Pu (Rhizoma Acori)
Shi Wei (Folium Pyrrosiae)
Si Gua Luo (Retinervus Luffae Fructus)
Tao Ren (Semen Persicae)
Xing Ren (Semen Armeniacae Amarum)
Xuan Fu Hua (Flos Inulae)
Zhe Bei Mu (Bulbus Fritillariae Thunbergii)
Zhu Dan (Fel Porcus)
Zhu Li (Succus Bambusae)
Zi Su Ye (Folium Perillae)
Zi Wan (Radix Asteris)

36. Antiulcer

Bai Ji (Rhizoma Bletillae)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Bi Ba (Fructus Piperis Longi)
Bi Cheng Qie (Fructus Litseae)
Cang Zhu (Rhizoma Atractylodis)
Chai Hu (Radix Bupleuri)
Da Huang (Radix et Rhizoma Rhei)
Ding Xiang (Flos Caryophylli)
Gan Cao (Radix Glycyrrhizae)
Gan Jiang (Rhizoma Zingiberis)
Gua Lou Shi (Fructus Trichosanthis)
Hai Piao Xiao (Endoconcha Sepiae)
Hou Po (Cortex Magnoliae Officinalis)
Hua Jiao (Pericarpium Zanthoxyli)
Huai Hua (Flos Sophorae)
Huang Bai (Cortex Phellodendri)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Ku Shen Gen (Radix Sophorae Flavescentis)
Lian Qian Cao (Herba Glechomae)
Lu Lu Tong (Fructus Liquidambaris)
Mu Xiang (Radix Aucklandiae)
Pu Gong Ying (Herba Taraxaci)
Ren Shen (Radix Ginseng)
Rou Gui (Cortex Cinnamomi)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Xiang (Moschus)
Sheng Jiang (Rhizoma Zingiberis Recens)
Wu Jia Pi (Cortex Acanthopanacis)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Wu Zhu Yu (Fructus Evodiae)
Xiao Hui Xiang (Fructus Foeniculi)
Ya Dan Zi (Fructus Bruceae)
Yan Hu Suo (Rhizoma Corydalis)

37. Antiviral

Bai Bu (Radix Stemonae)
Ban Lan Gen (Radix Isatidis)
Ban Mao (Mylabris)
Bi Ba (Fructus Piperis Longi)
Bi Cheng Qie (Fructus Litseae)
Bing Lang (Semen Arecae)
Bo He (Herba Menthae)
Can Sha (Excrementum Bombycis Mori)
Chai Hu (Radix Bupleuri)
Chang Shan (Radix Dichroae)
Chen Pi (Pericarpium Citri Reticulatae)
Da Huang (Radix et Rhizoma Rhei)
Da Qing Ye (Folium Isatidis)
Da Suan (Bulbus Alli Sativi)
Gan Cao (Radix Glycyrrhizae)
Guan Zhong (Rhizoma Dryopteridis)
Gui Zhi (Ramulus Cinnamomi)
Hai Shen (Strichopus Japonicus)
Hua Ju Hong (Exocarpium Citri Grandis)
Huang Lian (Rhizoma Coptidis)
Huang Yao Zi (Herba Dioscoreae Bulbiferae)
Jiang Huang (Rhizoma Curcumae Longae)
Jin Yin Hua (Flos Lonicerae)
Lao Guan Cao (Herba Erodii seu Geranii)
Lian Qiao (Fructus Forsythiae)
Ma Huang (Herba Ephedrae)
Man Jing Zi (Fructus Viticis)
Qing Hao (Herba Artemisiae Annuae)
San Qi (Radix Notoginseng)
Sang Ji Sheng (Herba Taxilli)
Shi Liu Pi (Pericarpium Granati)
Wu Bei Zi (Galla Chinensis)
Wu Zhu Yu (Fructus Evodiae)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xiang Ru (Herba Elsholtziae seu Moslae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yin Chen Hao (Herba Artemisiae Scopariae)
Yin Yang Huo (Herba Epimedii)
Zi Cao Gen (Radix Lithospermi)

38. Anxiolytic

Ba Ji Tian (Radix Morindae Officinalis)
Dong Chong Xia Cao (Cordyceps)
Gou Qi Zi (Fructus Lycii)
Hua Jiao (Pericarpium Zanthoxyli)
Huang Qi (Radix Astragali)
Long Yan Rou (Arillus Longan)
Lu Lu Tong (Fructus Liquidambaris)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xi Yang Shen (Radix Panacis Quinquefolii)

39. Bronchodilator

Bai Guo (Semen Ginkgo)
Di Long (Pheretima)
Jing Jie (Herba Schizonepetae)
Ma Huang (Herba Ephedrae)
Xi Xin (Herba Asari)
Zi Su Ye (Folium Perillae)

40. Cardiotonic

Chan Su (Venenum Bufonis)
Chuan Shan Long (Rhizoma Dioscoreae Nipponicae)
Chuan Wu (Radix Aconiti Preparata)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Du Zhong (Cortex Eucommiae)
Fang Feng (Radix Saposhnikoviae)
Fo Shou (Fructus Citri Sarcodactylis)
Fu Zi (Radix Aconiti Lateralis Praeparata)
He Shou Wu (Radix Polygoni Multiflori)
Huang Jing (Rhizoma Polygonati)

Huang Qi (Radix Astragali)
Ling Yang Jiao (Cornu Saigae Tataricae)
Ling Zhi (Ganoderma)
Ma Huang (Herba Ephedrae)
Mai Men Dong (Radix Ophiopogonis)
Nan Sha Shen (Radix Adenophorae)
Niu Huang (Calculus Bovis)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Ren Shen (Radix Ginseng)
Shan Zha (Fructus Crataegi)
She Xiang (Moschus)
Sheng Jiang (Rhizoma Zingiberis Recens)
Suan Zao Ren (Semen Zizyphi Spinosae)
Ting Li Zi (Semen Descurainiae seu Lepidii)
Wu Gong (Scolopendra)
Xi Xin (Herba Asari)
Xiang Fu (Rhizoma Cyperi)
Yin Yang Huo (Herba Epimedii)
Yu Zhu (Rhizoma Polygonati Odorati)
Zhang Nao (Camphora)
Zhi Ke (Fructus Aurantii)
Zhi Shi (Fructus Aurantii Immaturus)

41. Cholagogic

Ai Ye (Folium Artemisiae Argyi)
Bi Cheng Qie (Fructus Litseae)
Bian Xu (Herba Polygoni Avicularis)
Bo He (Herba Menthae)
Da Huang (Radix et Rhizoma Rhei)
Ding Xiang (Flos Caryophylli)
E Zhu (Rhizoma Curcumae)
Gan Jiang (Rhizoma Zingiberis)
Hai Jin Sha (Herba Lygodii)
Hu Huang Lian (Rhizoma Picrorhizae)
Jiang Huang (Rhizoma Curcumae Longae)
Jin Qian Cao (Herba Lysimachiae)
Jin Yin Hua (Flos Lonicerae)
Long Dan Cao (Radix Gentianae)
Niu Huang (Calculus Bovis)
Pu Gong Ying (Herba Taraxaci)
Sheng Jiang (Rhizoma Zingiberis Recens)
Wei Ling Xian (Radix Clematidis)
Xiao Hui Xiang (Fructus Foeniculi)
Yin Chen Hao (Herba Artemisiae Scopariae)
Zhi Zi (Fructus Gardeniae)

42. CNS stimulant

Ma Huang (Herba Ephedrae)
Ma Qian Zi (Semen Strychni)
She Xiang (Moschus).
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xia Tian Wu (Rhizoma Corydalis Decumbentis)
Xin Yi Hua (Flos Magnoliae)
Zhang Nao (Camphora)

43. CNS suppressant

Cang Zhu (Rhizoma Atractylodis)
Chuan Lian Zi (Fructus Toosendan)
Dan Shen (Radix Salviae Miltiorrhizae)
Fo Shou (Fructus Citri Sarcodactylis)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Hou Po (Cortex Magnoliae Officinalis)
Hu Lu Ba (Semen Trigonellae)
Huang Lian (Rhizoma Coptidis)
Qin Jiao (Radix Gentianae Macrophyllae)
Rou Dou Kou (Semen Myristicae)
San Qi (Radix Notoginseng)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Su Mu (Lignum Sappan)
Xiao Hui Xiang (Fructus Foeniculi)
Zi Su Ye (Folium Perillae)

44. Cognitive

Dang Shen (Radix Codonopsis)
Ling Zhi (Ganoderma)
Lu Lu Tong (Fructus Liquidambaris)
Ren Shen (Radix Ginseng)
Shi Chang Pu (Rhizoma Acori)

45. Detox (eliminate toxins)

Ban Xia (Rhizoma Pinelliae)
Bian Dou (Semen Lablab Album)
E Zhu (Rhizoma Curcumae)
Gan Cao (Radix Glycyrrhizae)
Ge Gen (Radix Puerariae)
Huang Qi (Radix Astragali)
Jin Yin Hua (Flos Lonicerae)
Lai Fu Zi (Semen Raphani)
Wu Bei Zi (Galla Chinensis)
Wu Wei Zi (Fructus Schisandrae Chinensis)

46. Dissolve/expel stones

Chen Pi (Pericarpium Citri Reticulatae)
Hai Jin Sha (Herba Lygodii)
Jin Qian Cao (Herba Lysimachiae)
Shi Wei (Folium Pyrrosiae)

47. Diuretic

Bai Mao Gen (Rhizoma Imperatae)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Bian Xu (Herba Polygoni Avicularis)
Che Qian Cao (Herba Plantaginis)
Che Qian Zi (Semen Plantaginis)
Chuan Mu Tong (Caulis Clematidis Armandii)
Di Fu Zi (Fructus Kochiae)
Du Zhong (Cortex Eucommiae)
Fang Feng (Radix Saposhnikoviae)
Fu Ling (Poria)
Fu Ping (Herba Spirodelae)
Guan Mu Tong (Caulis Aristolochiae Manshuriensis)
Hai Jin Sha (Herba Lygodii)
Huang Qi (Radix Astragali)
Jin Qian Cao (Herba Lysimachiae)
Lian Qian Cao (Herba Glechomae)
Ma Huang (Herba Ephedrae)
Ma Ti Jin (Herba Dichondrae Repentis)
Mu Dan Pi (Cortex Moutan)
Qu Mai (Herba Dianthi)
Sang Bai Pi (Cortex Mori)
Sang Ji Sheng (Herba Taxilli)
Shi Hu (Herba Dendrobii)
Ting Li Zi (Semen Descurainiae seu Lepidii)
Wu Zhu Yu (Fructus Evodiae)
Ze Xie (Rhizoma Alismatis)
Zhu Ling (Polyporus)

48. Emetic

Chang Shan (Radix Dichroae)
Li Lu (Radix et Rhizoma Veratri)
Qing Mu Xiang (Radix Aristolochiae)

49. Endocrine (adrenal)

Chai Hu (Radix Bupleuri)
Chuan Xin Lian (Herba Andrographis)
Gan Cao (Radix Glycyrrhizae)
He Shou Wu (Radix Polygoni Multiflori)
Ren Shen (Radix Ginseng)
Sheng Di Huang (Radix Rehmanniae)
Shu Di Huang (Radix Rehmanniae Preparata)

50. Expectorant

Ai Ye (Folium Artemisiae Argyi)
Bai Bu (Radix Stemonae)
Bai Jie Zi (Semen Sinapis)
Ban Xia (Rhizoma Pinelliae)
Bi Cheng Qie (Fructus Litseae)
Bo He (Herba Menthae)
Chan Su (Venenum Bufonis)
Che Qian Cao (Herba Plantaginis)
Chen Pi (Pericarpium Citri Reticulatae)

Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Da Zao (Fructus Jujubae)
Fo Shou (Fructus Citri Sarcodactylis)
Gan Cao (Radix Glycyrrhizae)
Gua Lou Shi (Fructus Trichosanthis)
Hua Rui Shi (Ophicalcitum)
Jie Geng (Radix Platycodonis),
Jing Jie (Herba Schizonepetae)
Kuan Dong Hua (Flos Farfarae)
Lao Guan Cao (Herba Erodii seu Geranii)
Ling Zhi (Ganoderma)
Liu Huang (Sulfur)
Ma Dou Ling (Fructus Aristolochiae)
Ma Qian Zi (Semen Strychni)
Pi Pa Ye (Folium Eriobotryae)
Qin Pi (Cortex Fraxini)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Ren Dong Teng (Caulis Lonicerae)
Shang Lu (Radix Phytolaccae)
Shi Wei (Folium Pyrrosiae)
Si Gua Luo (Retinervus Luffae Fructus)
Tian Nan Xing (Rhizoma Arisaematis)
Xiao Hui Xiang (Fructus Foeniculi)
Yuan Zhi (Radix Polygalae)
Ze Qi (Herba Euphorbiae Helioscopiae)
Zhu Dan (Fel Porcus)
Zhu Li (Succus Bambusae)
Zi Su Ye (Folium Perillae)
Zi Wan (Radix Asteris)

51. External wounds (facilitates healing)

Di Yu (Radix Sanguisorbae)
Gu Sui Bu (Rhizoma Drynariae)
Lu Hui (Aloe)
Lu Lu Tong (Fructus Liquidambaris)
Shan Yao (Rhizoma Dioscoreae)

52. Hematopoietic (red blood cells)

Can Sha (Excrementum Bombycis Mori)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
E Jiao (Colla Corii Asini)
He Shou Wu (Radix Polygoni Multiflori)
Ma Huang (Herba Ephedrae)
Niu Huang (Calculus Bovis)
Sang Shen Zi (Fructus Mori)

53. Hematopoietic (white blood cells)

Bai He (Bulbus Lilii)
Ban Mao (Mylabris)
Bu Gu Zhi (Fructus Psoraleae)
Chan Su (Venenum Bufonis).
Di Yu (Radix Sanguisorbae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Rou Gui (Cortex Cinnamomi)
Sang Shen Zi (Fructus Mori)

54. Hemostatic

Ai Ye (Folium Artemisiae Argyi)
Bai Ji (Rhizoma Bletillae)
Bai Mao Gen (Rhizoma Imperatae)
Da Huang (Radix et Rhizoma Rhei)
Da Ji (Herba seu Radix Cirsii Japonici)
Di Jin Cao (Herba Euphorbiae Humifusae)
Fang Feng (Radix Saposhnikoviae)
Fu Long Gan (Terra Flava Usta)
Guan Zhong (Rhizoma Dryopteridis)
Han Lian Cao (Herba Ecliptae)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Hua Rui Shi (Ophicalcitum)
Huai Hua (Flos Sophorae)
Jin Yin Hua (Flos Lonicerae)
Jing Tian San Qi (Herba seu Radix Sedum Aizoom)
Ju Ye San Qi (Herba seu Radix Gynura Segetum)
Lian Fang (Receptaculum Nelumbinis)
Long Chi (Dens Draconis)
Long Gu (Os Draconis)
Ma Bian Cao (Herba Verbenae)
Ou Jie (Nodus Nelumbinis Rhizomatis)
San Qi (Radix Notoginseng)
Shi Liu Pi (Pericarpium Granati)
Su Mu (Lignum Sappan)
Xi Yang Shen (Radix Panacis Quinquefolii)
Xian He Cao (Herba Agrimoniae)
Xiao Ji (Herba Cirisii)
Xue Yu Tan (Crinis Carbonisatus)
Yin Yang Huo (Herba Epimedii)
Zi Cao Gen (Radix Lithospermi)
Zi Zhu (Folium Callicarpae)
Zong Lu Zi (Fructus Trachycarpi)

55. Hepatoprotective

Bai Shao (Radix Paeoniae Alba)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Bie Jia (Carapax Trionycis)
Chai Hu (Radix Bupleuri)
Chuan Xin Lian (Herba Andrographis)
Chui Pen Cao (Herba Sedi)
Da Huang (Radix et Rhizoma Rhei)
Da Suan (Bulbus Alli Sativi)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Er Cha (Catechu)
Fu Ling (Poria)
Gan Cao (Radix Glycyrrhizae)
Gou Qi Zi (Fructus Lycii)
Han Lian Cao (Herba Ecliptae)
He Shou Wu (Radix Polygoni Multiflori)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Hua Jiao (Pericarpium Zanthoxyli)
Jiang Huang (Rhizoma Curcumae Longae)
Jin Yin Hua (Flos Lonicerae)
Lao Guan Cao (Herba Erodii seu Geranii)
Lian Qiao (Fructus Forsythiae)
Ling Zhi (Ganoderma)
Long Dan Cao (Radix Gentianae)
Lu Hui (Aloe)
Mu Gua (Fructus Chaenomelis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Pu Gong Ying (Herba Taraxaci)
Qing Hao (Herba Artemisiae Annuae)
San Qi (Radix Notoginseng)
Sha Yuan Zi (Semen Astragali Complanati)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Wu Zhu Yu (Fructus Evodiae)
Xiao Ji (Herba Cirisii)
Xie Cao (Radix et Rhizoma Valerianae)
Yin Chen Hao (Herba Artemisiae Scopariae)
Ze Xie (Rhizoma Alismatis)
Zhi Zi (Fructus Gardeniae)
Zhu Ling (Polyporus)

56. Hormone-like (estrogen and testosterone)

Ba Ji Tian (Radix Morindae Officinalis)
Bai Ji Li (Fructus Tribuli)
Ban Mao (Mylabris)
Bu Gu Zhi (Fructus Psoraleae)
Ge Jie (Gecko)
Guan Zhong (Rhizoma Dryopteridis)
Gui Ban (Plastrum Testudinis)
Hai Ma (Hippocampus)
Lu Lu Tong (Fructus Liquidambaris)
She Chuang Zi (Fructus Cnidii)

She Xiang (Moschus)
Suo Yang (Herba Cynomorii)
Tu Si Zi (Semen Cuscutae)
Wu Jia Pi (Cortex Acanthopanacis)
Xian Mao (Rhizoma Curculiginis)
Xiang Fu (Rhizoma Cyperi)
Xiao Hui Xiang (Fructus Foeniculi)
Yin Yang Huo (Herba Epimedii)

57. Hyperglycemic

Chai Hu (Radix Bupleuri)
Dang Shen (Radix Codonopsis)
Qin Jiao (Radix Gentianae Macrophyllae)
Xuan Shen (Radix Scrophulariae)
Zi Su Ye (Folium Perillae)

58. Hypertensive

Chan Su (Venenum Bufonis)
Chen Pi (Pericarpium Citri Reticulatae)
Kuan Dong Hua (Flos Farfarae)
Ma Huang (Herba Ephedrae)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Ze Xie (Rhizoma Alismatis)
Zhi Ke (Fructus Aurantii)
Zhi Shi (Fructus Aurantii Immaturus)

59. Hypotensive

Bai Guo (Semen Ginkgo)
Bai Ji Li (Fructus Tribuli)
Bi Ba (Fructus Piperis Longi)
Bi Cheng Qie (Fructus Litseae)
Chang Shan (Radix Dichroae)
Che Qian Zi (Semen Plantaginis)
Chen Xiang (Lignum Aquilariae Resinatum)
Chi Shao (Radix Paeoniae Rubrae)
Chou Wu Tong (Folium Clerodendri Trichotomi)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Chuan Wu (Radix Aconiti Preparata)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Da Ji (Herba seu Radix Cirsii Japonici)
Di Gu Pi (Cortex Lycii)
Di Long (Pheretima)
Di Yu (Radix Sanguisorbae)
Er Cha (Catechu)
Fo Shou (Fructus Citri Sarcodactylis)
Gan Song (Radix seu Rhizoma Nardostachys)
Gao Ben (Rhizoma Ligustici)
Ge Gen (Radix Puerariae)
Gou Teng (Ramulus Uncariae cum Uncis)
Hu Jiao (Fructus Piper)
Hu Zhang (Rhizoma Polygoni Cuspidati)
Huai Hua (Flos Sophorae)
Huang Bai (Cortex Phellodendri)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Huo Ma Ren (Fructus Cannabis)
Jing Tian San Qi (Herba seu Radix Sedum Aizoom)
Jue Ming Zi (Semen Cassiae)
Ku Lian Pi (Cortex Meliae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Lai Fu Zi (Semen Raphani)
Lian Zi Xin (Plumula Nelumbinis)
Ling Yang Jiao (Cornu Saigae Tataricae)
Ling Zhi (Ganoderma)
Lu Lu Tong (Fructus Liquidambaris)
Man Jing Zi (Fructus Viticis)
Mu Dan Pi (Cortex Moutan)
Mu Zei (Herba Equiseti Hiemalis)
Niu Bang Zi (Fructus Arctii)
Niu Huang (Calculus Bovis)
Pang Da Hai (Semen Sterculiae Lychnophorae)
Qing Feng Teng (Caulis Sinomenii)
Qing Hao (Herba Artemisiae Annuae)
Qing Mu Xiang (Radix Aristolochiae)
Ren Dong Teng (Caulis Lonicerae)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Sang Bai Pi (Cortex Mori)
Sang Ji Sheng (Herba Taxilli)
Sha Yuan Zi (Semen Astragali Complanati)
Shan Dou Gen (Radix Sophorae Tonkinensis)
Shan Zha (Fructus Crataegi)
Sheng Jiang (Rhizoma Zingiberis Recens)
Shui Niu Jiao (Cornu Bubali)
Suan Zao Ren (Semen Zizyphi Spinosae)
Tian Ma (Rhizoma Gastrodiae)
Tu Si Zi (Semen Cuscutae)
Wu Zhu Yu (Fructus Evodiae)
Xi Xian Cao (Herba Siegesbeckiae)
Xia Ku Cao (Spica Prunellae)
Xiang Fu (Rhizoma Cyperi)
Xie Cao (Radix et Rhizoma Valerianae)
Xin Yi Hua (Flos Magnoliae)
Xu Chang Qing (Radix Cynanchi Paniculati)
Xuan Shen (Radix Scrophulariae)
Ye Ju Hua (Flos Chrysanthemi Indici)
Yin Yang Huo (Herba Epimedii)
Yu Zhu (Rhizoma Polygonati Odorati)
Yuan Zhi (Radix Polygalae)

60. Immunostimulant

Ba Ji Tian (Radix Morindae Officinalis)
Bai Shao (Radix Paeoniae Alba)
Ban Lan Gen (Radix Isatidis)
Bian Dou (Semen Lablab Album)
Bie Jia (Carapax Trionycis)
Chan Su (Venenum Bufonis)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Da Suan (Bulbus Alli Sativi)
Dang Gui (Radicis Angelicae Sinensis)
Dang Shen (Radix Codonopsis)
Dong Chong Xia Cao (Cordyceps)
Du Zhong (Cortex Eucommiae)
E Jiao (Colla Corii Asini)
Fang Feng (Radix Saposhnikoviae)
Fu Ling (Poria)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Gan Cao (Radix Glycyrrhizae)
Ge Jie (Gecko)
Gou Qi Zi (Fructus Lycii)
Gui Ban (Plastrum Testudinis)
Hai Ge Fen (Concha Meretricis seu Cyclinae)
Hai Shen (Strichopus Japonicus)
He Shou Wu (Radix Polygoni Multiflori)
Huang Jing (Rhizoma Polygonati)
Huang Lian (Rhizoma Coptidis)
Huang Qi (Radix Astragali)
Jiao Gu Lan (Rhizoma seu Herba Gynostemmatis)
Jin Yin Hua (Flos Lonicerae)
Ling Zhi (Ganoderma)
Long Dan Cao (Radix Gentianae)
Long Yan Rou (Arillus Longan)
Lu Han Cao (Herba Pyrolae)
Mai Men Dong (Radix Ophiopogonis)
Nu Zhen Zi (Fructus Ligustri Lucidi)
Pu Gong Ying (Herba Taraxaci)
Qing Mu Xiang (Radix Aristolochiae)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Sang Shen Zi (Fructus Mori)
Sha Yuan Zi (Semen Astragali Complanati)
Shan Yao (Rhizoma Dioscoreae)
Shan Zha (Fructus Crataegi)
She Xiang (Moschus)
Shi Gao (Gypsum Fibrosum)
Suan Zao Ren (Semen Zizyphi Spinosae)

Suo Yang (Herba Cynomorii)
Tian Ma (Rhizoma Gastrodiae)
Tu Si Zi (Semen Cuscutae)
Wu Mei (Fructus Mume)
Xian Mao (Rhizoma Curculiginis)
Xiang Ru (Herba Elsholtziae seu Moslae)
Yin Yang Huo (Herba Epimedii)
Yu Xing Cao (Herba Houttuyniae)
Zhu Ling (Polyporus)
Zi He Che (Placenta Hominis)

61. Immunosuppressive

Bei Sha Shen (Radix Glehniae)
Chai Hu (Radix Bupleuri)
Chan Tui (Periostracum Cicadae)
Chuan Shan Long (Rhizoma Dioscoreae Nipponicae)
Chuan Wu (Radix Aconiti Preparata)
Chuan Xin Lian (Herba Andrographis)
Gan Sui (Radix Euphorbiae Kansui)
Hong Hua (Flos Carthami)
Huang Qin (Radix Scutellariae)
Ku Shen Gen (Radix Sophorae Flavescentis)
Lei Gong Teng (Radix Tripterygii Wilfordii)
Shan Dou Gen (Radix Sophorae Tonkinensis)
She Chuang Zi (Fructus Cnidii)
Shu Di Huang (Radix Rehmanniae Preparata)
Tian Hua Fen (Radix Trichosanthis)
Tian Men Dong (Radix Asparagi)
Wu Jia Pi (Cortex Acanthopanacis)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xia Ku Cao (Spica Prunellae)
Ze Xie (Rhizoma Alismatis)

62. Laxative

Da Huang (Radix et Rhizoma Rhei)
Fan Xie Ye (Folium Sennae)
Gan Sui (Radix Euphorbiae Kansui)
Gua Lou Ren (Semen Trichosanthis)
He Shou Wu (Radix Polygoni Multiflori)
Huo Ma Ren (Fructus Cannabis)
Liu Huang (Sulfur)
Lu Hui (Aloe)
Mang Xiao (Natrii Sulfas)
Pang Da Hai (Semen Sterculiae Lychnophorae)
Qian Niu Zi (Semen Pharbitidis)
Tao Ren (Semen Persicae)

63. Metabolic

Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Gou Qi Zi (Fructus Lycii)
Gui Ban (Plastrum Testudinis)
Huang Qi (Radix Astragali)
Long Yan Rou (Arillus Longan)
Lu Lu Tong (Fructus Liquidambaris)
Niu Xi (Radix Cyathulae seu Achyranthis)
Ren Shen (Radix Ginseng)
San Qi (Radix Notoginseng)
Wu Jia Pi (Cortex Acanthopanacis)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xi Yang Shen (Radix Panacis Quinquefolii)

64. Radiation (protective effect)

Can Sha (Excrementum Bombycis Mori)
Chai Hu (Radix Bupleuri)
Chan Su (Venenum Bufonis)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Dang Gui (Radicis Angelicae Sinensis)
E Jiao (Colla Corii Asini)
Hai Piao Xiao (Endoconcha Sepiae)
Hai Shen (Strichopus Japonicus)
Huai Hua (Flos Sophorae)
Kun Bu (Thallus Laminariae seu Eckloniae)
Ling Zhi (Ganoderma)
Lu Cha (Folium Camellia Sinensis)
Ren Shen (Radix Ginseng)
Rou Gui (Cortex Cinnamomi)
San Qi (Radix Notoginseng)
Wu Long Cha (Folium Camellia Sinensis Fermentata)
Wu Mei (Fructus Mume)
Zhu Ling (Polyporus)

65. Sedative and hypnotic

Ai Ye (Folium Artemisiae Argyi)
Bai He (Bulbus Lilii)
Bai Shao (Radix Paeoniae Alba)
Bai Tou Weng (Radix Pulsatillae)
Chi Shao (Radix Paeoniae Rubrae)
Di Long (Pheretima)
Dong Chong Xia Cao (Cordyceps)
Du Zhong (Cortex Eucommiae)
Fang Feng (Radix Saposhnikoviae)
Gan Song (Radix seu Rhizoma Nardostachys)
Gui Ban (Plastrum Testudinis)
He Huan Hua (Flos Albiziae)
Hong Hua (Flos Carthami)
Long Chi (Dens Draconis)
Long Gu (Os Draconis)
Mu Dan Pi (Cortex Moutan)
Mu Zei (Herba Equiseti Hiemalis)
Niu Huang (Calculus Bovis)
Sheng Jiang (Rhizoma Zingiberis Recens)
Sheng Ma (Rhizoma Cimicifugae)
Shi Chang Pu (Rhizoma Acori)
Tian Ma (Rhizoma Gastrodiae)
Tian Nan Xing (Rhizoma Arisaematis)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xian Mao (Rhizoma Curculiginis)
Xiao Ji (Herba Cirisii)
Yan Hu Suo (Rhizoma Corydalis)
Yu Mi Xu (Stigma Maydis)
Yuan Zhi (Radix Polygalae)
Zao Xiu (Rhizoma Paridis)
Zhu Sha (Cinnabaris)

66. Smooth muscle relaxant

Bai Zhi (Radix Angelicae Dahuricae)
Bi Ba (Fructus Piperis Longi)
Bo He (Herba Menthae)
Chan Su (Venenum Bufonis).
Chen Pi (Pericarpium Citri Reticulatae)
Chen Xiang (Lignum Aquilariae Resinatum)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Bei Mu (Bulbus Fritillariae Cirrhosae)
Ding Xiang (Flos Caryophylli)
Fo Shou (Fructus Citri Sarcodactylis)
Gan Jiang (Rhizoma Zingiberis)
Gan Song (Radix seu Rhizoma Nardostachys)
Gao Ben (Rhizoma Ligustici)
Ge Gen (Radix Puerariae)
Hai Shen (Strichopus Japonicus)
Huai Hua (Flos Sophorae)
Huang Yao Zi (Herba Dioscoreae Bulbiferae)
Huo Xiang (Herba Agastache)
Kuan Dong Hua (Flos Farfarae)
Ling Zhi (Ganoderma)
Ma Huang (Herba Ephedrae)
Mu Xiang (Radix Aucklandiae)
Niu Huang (Calculus Bovis)
Qing Pi (Pericarpium Citri Reticulatae Viride)
Ren Dong Teng (Caulis Lonicerae)

Shan Dou Gen (Radix Sophorae Tonkinensis)
Shan Yao (Rhizoma Dioscoreae)
She Chuang Zi (Fructus Cnidii)
Sheng Ma (Rhizoma Cimicifugae)
Wei Ling Xian (Radix Clematidis)
Wu Mei (Fructus Mume)
Xi Xin (Herba Asari)
Xiang Ru (Herba Elsholtziae seu Moslae)
Yin Guo Ye (Folium Ginkgo)
Zao Xiu (Rhizoma Paridis)
Zhi Ke (Fructus Aurantii)

67. Smooth muscle stimulant
Ba Dou (Fructus Crotonis)
Chuan Lian Zi (Fructus Toosendan)
Ji Nei Jin (Endothelium Corneum Gigeriae Galli)
Ku Lian Pi (Cortex Meliae)
Lai Fu Zi (Semen Raphani)
Luo Han Guo (Fructus Momordicae)
Qian Niu Zi (Semen Pharbitidis)
Qu Mai (Herba Dianthi)
Sang Bai Pi (Cortex Mori)
Shan Yao (Rhizoma Dioscoreae)
Suo Yang (Herba Cynomorii)
Xiao Hui Xiang (Fructus Foeniculi)
Xiao Ji (Herba Cirisii)
Ya Dan Zi (Fructus Bruceae)
Zhi Zi (Fructus Gardeniae)
Zi Su Ye (Folium Perillae)

68. Thrombolytic
Qu Mai (Herba Dianthi)
Yuan Zhi (Radix Polygalae)

69. Uterine stimulant
Bo He (Herba Menthae)
Chang Shan (Radix Dichroae)
Di Long (Pheretima)
Du Zhong (Cortex Eucommiae)
Fei Zi (Semen Torreyae)
Gui Ban (Plastrum Testudinis)
Hai Long (Syngnathus)
Hong Hua (Flos Carthami)
Niu Xi (Radix Cyathulae seu Achyranthis)
Qu Mai (Herba Dianthi)
Tao Ren (Semen Persicae)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xu Duan (Radix Dipsaci)
Yi Mu Cao (Herba Leonuri)
Yuan Zhi (Radix Polygalae)

70. Vasoconstrictor (peripheral)
Ma Huang (Herba Ephedrae)
Yi Zhi Ren (Fructus Alpiniae Oxyphyllae)

71. Vasodilator (coronary artery)
Bai Ji Li (Fructus Tribuli)
Bu Gu Zhi (Fructus Psoraleae)
Chi Shao (Radix Paeoniae Rubrae)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Dan Shen (Radix Salviae Miltiorrhizae)
Fu Zi (Radix Aconiti Lateralis Praeparata)
Hai Feng Teng (Caulis Piperis Kadsurae)
He Shou Wu (Radix Polygoni Multiflori)
Hong Hua (Flos Carthami)
Huang Jing (Rhizoma Polygonati)
Jing Tian San Qi (Herba seu Radix Sedum Aizoom)
Ju Hua (Flos Chrysanthemi)
Ling Zhi (Ganoderma)
Lu Han Cao (Herba Pyrolae)
San Qi (Radix Notoginseng)
Sang Ji Sheng (Herba Taxilli)
Shan Zha (Fructus Crataegi)
She Xiang (Moschus).
Shi Chang Pu (Rhizoma Acori)
Shui Zhi (Hirudo)
Su He Xiang (Styrax)
Wu Wei Zi (Fructus Schisandrae Chinensis)
Xie Cao (Radix et Rhizoma Valerianae)
Xuan Shen (Radix Scrophulariae)
Yan Hu Suo (Rhizoma Corydalis)
Yi Mu Cao (Herba Leonuri)
Yin Yang Huo (Herba Epimedii)
Zhi Shi (Fructus Aurantii Immaturus)

72. Vasodilator (peripheral)
Bai Shao (Radix Paeoniae Alba)
Chuan Wu (Radix Aconiti Preparata)
Chuan Xiong (Rhizoma Ligustici Chuanxiong)
Ci Wu Jia (Radix et Caulis Acanthopanacis Senticosi)
Dang Gui (Radicis Angelicae Sinensis)
Du Zhong (Cortex Eucommiae)
Ge Gen (Radix Puerariae)
Gua Lou Shi (Fructus Trichosanthis)
Gui Zhi (Ramulus Cinnamomi)
Hai Feng Teng (Caulis Piperis Kadsurae)
Mu Zei (Herba Equiseti Hiemalis)
Ren Shen (Radix Ginseng)
Sang Ji Sheng (Herba Taxilli)
Tao Ren (Semen Persicae)
Xie Cao (Radix et Rhizoma Valerianae).
Xin Yi Hua (Flos Magnoliae)
Yin Guo Ye (Folium Ginkgo)

Appendix 4 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
Ai Ye	Folium Artemisiae Argyi	艾叶
Ba Dou	Fructus Crotonis	巴豆
Ba Ji Tian	Radix Morindae Officinalis	巴戟天
Ba Yue Zha	Fructus Akebiae	八月札
Bai Bu	Radix Stemonae	百部
Bai Dou Kou	Fructus Amomi Rotundus	白豆蔻
Bai Dou Kou Ke	Pericarpium Amomi Rotundus	白豆蔻壳
Bai Fu Ling	Poria Alba	白茯苓
Bai Fu Zi	Rhizoma Typhonii	白附子
Bai Guo	Semen Ginkgo	白果
Bai He	Bulbus Lilii	百合
Bai Hua She	Bungarus Parvus	白花蛇
Bai Hua She She Cao	Herba Oldenlandia	白花蛇舌草
Bai Ji	Rhizoma Bletillae	白及
Bai Ji Li	Fructus Tribuli	白蒺藜
Bai Jiang Cao	Herba cum Radice Patriniae	败酱草
Bai Jie Zi	Semen Sinapis	白芥子
Bai Lian	Radix Ampelopsis	白蔹
Bai Long Chuan Hua Tou	Radix Clerodendron Paniculatum	白龙船花头
Bai Mao Gen	Rhizoma Imperatae	白茅根
Bai Mao Hua	Flos Imperatae	白茅花
Bai Mu Er	Fructificatio Tremellae Fuciformis	白木耳
Bai Mu Tong	Caulis Akebia Trifoliata Australis	白木通
Bai Qian	Rhizoma Cynanchi Stauntonii	白前
Bai Shao	Radix Paeoniae Alba	白芍
Bai Tou Weng	Radix Pulsatillae	白头翁
Bai Tou Weng Jing	Caulis Pulsatillae	白头翁茎
Bai Tou Weng Ye	Folium Pulsatillae	白头翁叶
Bai Wei	Radix Cynanchi Atrati	白薇
Bai Xian Pi	Cortex Dictamni	白鲜皮
Bai Zhi	Radix Angelicae Dahuricae	白芷
Bai Zhu	Rhizoma Atractylodis Macrocephalae	白术
Bai Zi Ren	Semen Platycladi	柏子仁
Ban Bian Lian	Herba Lobeliae Chinensis	半边莲
Ban Lan Gen	Radix Isatidis	板蓝根
Ban Mao	Mylabris	斑蝥
Ban Xia	Rhizoma Pinelliae	半夏
Ban Zhi Lian	Herba Scutellariae Barbatae	半枝莲
Bei Chai Hu	Radix Bupleurum Chinensis	北柴胡
Bei Dou Gen	Rhizoma Menispermi	北豆根
Bei Mu	Bulbus Fritillaria	贝母
Bei Sha Shen	Radix Glehniae	北沙参
Bei Ting Li Zi	Semen Lepidii	北葶苈子
Bei Wu Jia Pi	Cortex Periploca Sepium Radicis	北五加皮
Bi Ba	Fructus Piperis Longi	荜茇
Bi Cheng Qie	Fructus Litseae	荜澄茄
Bi Xie	Rhizoma Dioscoreae Hypoglaucae	萆薢
Bi Zi Cao	Herba Pogonantheri Criniti	笔仔草
Bian Dou	Semen Lablab Album	扁豆
Bian Dou Hua	Flos Lablab Album	扁豆花
Bian Dou Yi	Pericarpium Lablab Album	扁豆衣
Bian Xu	Herba Polygoni Avicularis	萹蓄

Pinyin Names	Pharmaceutical Names	Chinese Names
Bie Jia	Carapax Trionycis	鳖甲
Bie Jia Jiao	Gelatinum Carapax Trionycis	鳖甲胶
Bing Lang	Semen Arecae	槟榔
Bing Pian	Borneolum Syntheticum	冰片
Bo He	Herba Menthae	薄荷
Bu Gu Zhi	Fructus Psoraleae	补骨脂
Can Sha	Excrementum Bombycis Mori	蚕砂
Cang Er Cao	Herba Xanthii	苍耳草
Cang Er Gen	Radix Xanthii	苍耳根
Cang Er Zi	Fructus Xanthii	苍耳子
Cang Zhu	Rhizoma Atractylodis	苍术
Cao Dou Kou	Semen Alpiniae Katsumadai	草豆蔻
Cao Guo	Fructus Tsaoko	草果
Cao Wu	Radix Aconiti Kusnezoffii	草乌
Ce Bai Ye	Cacumen Platycladi	侧柏叶
Cha Chi Huang	Herba Stellariae Aquaticae	茶匙癀
Chai Hu	Radix Bupleuri	柴胡
Chan Su	Venenum Bufonis	蟾酥
Chan Tui	Periostracum Cicadae	蝉蜕
Chang Shan	Radix Dichroae	常山
Che Qian Cao	Herba Plantaginis	车前草
Che Qian Zi	Semen Plantaginis	车前子
Chen Pi	Pericarpium Citri Reticulatae	陈皮
Chen Xiang	Lignum Aquilariae Resinatum	沉香
Chi Fu Ling	Poria Rubrae	赤茯苓
Chi Shao	Radix Paeoniae Rubrae	赤芍
Chi Shi Zhi	Halloysitum Rubrum	赤石脂
Chi Xiao Dou	Semen Phaseoli	赤小豆
Chong Wei Zi	Semen Leonuri	茺蔚子
Chou Wu Tong	Folium Clerodendri Trichotomi	臭梧桐
Chu Shi Zi	Fructus Broussonetiae	楮实子
Chuan Bei Mu	Bulbus Fritillariae Cirrhosae	川贝母
Chuan Lian Zi	Fructus Toosendan	川楝子
Chuan Mu Tong	Caulis Clematidis Armandii	川木通
Chuan Niu Xi	Radix Cyathulae	川牛膝
Chuan Shan Jia	Squama Manis	穿山甲
Chuan Shan Long	Rhizoma Dioscoreae Nipponicae	穿山龙
Chuan Wu	Radix Aconiti Preparata	川乌
Chuan Xin Lian	Herba Andrographis	穿心莲
Chuan Xiong	Rhizoma Ligusticum Chuanxiong	川芎
Chui Pen Cao	Herba Sedi	垂盆草
Chun Gen	Radix Ailanthi	椿根
Chun Gen Pi	Cortex Ailanthi	椿根皮
Ci Shi	Magnetitum	磁石
Ci Wu Jia	Radix et Caulis Acanthopanacis Senticosi	刺五加
Cong Bai	Bulbus Allii Fistulosi	葱白
Da Ding Huang	Caulis Euonymi	大疔癀
Da Dou Huang Juan	Semen Glycines Germinatum	大豆黄卷
Da Feng Zi	Semen Hydnocarpi	大风子
Da Fu Pi	Pericarpium Arecae	大腹皮
Da Huang	Radix et Rhizoma Rhei	大黄
Da Hui Xiang	Fructus Anisi Stellati	大茴香
Da Ji	Herba seu Radix Cirsii Japonici	大蓟
Da Ji	Radix Euphorbiae seu Knoxiae	大戟

Pinyin Names	Pharmaceutical Names	Chinese Names
Da Ji Gen	Radix Cirsii Japonici	大蓟根
Da Ji Ye	Folium Cirsii Japonici	大蓟叶
Da Qing Ye	Folium Isatidis	大青叶
Da Suan	Bulbus Alli Sativi	大蒜
Da Xiao Ji		大小蓟
Da Ye Ma Dou Ling	Caulis Aristolochiae Kaempferi	大叶马兜铃
Da Zao	Fructus Jujubae	大枣
Dai Zhe Shi	Haematitum	代赭石
Dan Dou Chi	Semen Sojae Praeparatum	淡豆鼓
Dan Nan Xing	Arisaema cum Bile	胆南星
Dan Shen	Radix Salviae Miltiorrhizae	丹参
Dan Zhu Ye	Herba Lophatheri	淡竹叶
Dang Gui	Radicis Angelicae Sinensis	当归
Dang Gui Shen	Corpus Radicis Angelicae Sinensis	当归身
Dang Gui Tou	Caput Radicis Angelicae Sinensis	当归头
Dang Gui Wei	Extremitas Radicis Angelicae Sinensis	当归尾
Dang Shen	Radix Codonopsis	党参
Dao Di Wu Gong	Rhizoma Heliminthostachytis	倒地蜈蚣
Dao Diao Jin Zhong	Melothria Maderospatana	倒吊金钟
Dao Dou	Semen Canavaliae	刀豆
Deng Xin Cao	Medulla Junci	灯心草
Di Bie Chong	Eupolyphaga	地鳖虫
Di Fu Zi	Fructus Kochiae	地肤子
Di Gu Pi	Cortex Lycii	地骨皮
Di Long	Pheretima	地龙
Di Yu	Radix Sanguisorbae	地榆
Ding Jing Cao	Herba Linderniae	定经草
Ding Shu Xiu	Herba Elephantopus Scaber	丁竖朽
Ding Xiang	Flos Caryophylli	丁香
Ding Xiang Pi	Cortex Caryophylli	丁香皮
Dong Chong Xia Cao	Cordyceps	冬虫夏草
Dong Gua Pi	Exocarpium Benincasae	冬瓜皮
Dong Gua Zi	Semen Benincasae	冬瓜子
Dong Kui Zi	Semen Malvae	冬葵子
Dong Ling Cao	Herba Rabdosiae	冬凌草
Dong Qing Ye	Folium Ilexis	冬青叶
Dong Yang Shen	Radix Ginseng Japonica	东洋参
Du Huo	Radix Angelicae Pubescentis	独活
Du Zhong	Cortex Eucommiae	杜仲
Du Zhong Ye	Folium Eucommiae	杜仲叶
Duan Shi Gao	Gypsum Fibrosum Preparata	煅石膏
E Bu Shi Cao	Herba Centipedae	鹅不食草
E Jiao	Colla Corii Asini	阿胶
E Zhu	Rhizoma Curcumae	莪术
Er Cha	Catechu	儿茶
Fan Xie Ye	Folium Sennae	番泻叶
Fang Feng	Radix Saposhnikoviae	防风
Fang Jie Shi	Calcitum	方解石
Fei Zi	Semen Torreyae	榧子
Fen Fang Ji	Radix Stephaniae Tetandrae	粉防己
Feng Mi	Mel	蜂蜜
Feng Wei Cao	Herba Pteris	凤尾草
Fo Shou	Fructus Citri Sarcodactylis	佛手
Fo Shou Hua	Flos Citri Sarcodactylis	佛手花

Pinyin Names	Pharmaceutical Names	Chinese Names
Fu Hai Shi	Pumice	浮海石
Fu Ling	Poria	茯苓
Fu Ling Pi	Cortex Poria	茯苓皮
Fu Long Gan	Terra Flava Usta	伏龙肝
Fu Pen Zi	Fructus Rubi	覆盆子
Fu Ping	Herba Spirodelae	浮萍
Fu Rong	Radix Hibisci	芙蓉
Fu Rong Ye	Folium Hibisci	芙蓉草
Fu Shen	Poria Pararadicis	茯神
Fu Xiao Mai	Semen Tritici Aestivi Levis	浮小麦
Fu Zi	Radix Aconiti Lateralis Praeparata	附子
Gan Cao	Radix Glycyrrhizae	甘草
Gan Jiang	Rhizoma Zingiberis	乾姜
Gan Qi	Resina Toxicodendri	干漆
Gan Song	Radix seu Rhizoma Nardostachys	甘松
Gan Sui	Radix Euphorbiae Kansui	甘遂
Gao Ben	Rhizoma Ligustici	藁本
Gao Liang Jiang	Rhizoma Alpiniae Officinarum	高良姜
Ge Gen	Radix Puerariae	葛根
Ge Hua	Flos Puerariae	葛花
Ge Jie	Gecko	蛤蚧
Geng Mi	Semen Oryzae	粳米
Geng Tong Cao	Ramulus Aeschynomene Indica	梗通草
Gou Gu	Os Canitis	狗骨
Gou Ji	Rhizoma Cibotii	狗脊
Gou Qi Gen	Radix Lycii	枸杞根
Gou Qi Ye	Folium Lycii	枸杞叶
Gou Qi Zi	Fructus Lycii	枸杞子
Gou Teng	Ramulus Uncariae cum Uncis	钩藤
Gu Jing Cao	Flos Eriocauli	谷精草
Gu Sui Bu	Rhizoma Drynariae	骨碎补
Gu Ya	Fructus Setariae Germinatus	谷芽
Gu Zhi Hua	Semen Oroxyli	故纸花
Gua Di	Pedicellus Cucumeris	瓜蒂
Gua Lou Pi	Pericarpium Trichosanthis	瓜蒌皮
Gua Lou Ren	Semen Trichosanthis	瓜蒌仁
Gua Lou Shi	Fructus Trichosanthis	瓜蒌实
Guan Bai Fu	Rhizoma Aconitum Coreanum	关白附
Guan Mu Tong	Caulis Aristolochiae Manshuriensis	关木通
Guan Ye Lian Qiao	Herba Hypericum	贯叶连翘
Guan Zhong	Rhizoma Dryopteridis	贯众
Guang Fang Ji	Radix Aristolochiae Fangchi	广防己
Guang Huo Xiang	Herba Pogostemonis	广藿香
Guang Jin Qian Cao	Herba Desmodii Styracifolii	广金钱草
Gui Ban	Plastrum Testudinis	龟板
Gui Ban Jiao	Gelatinum Plastrum Testudinis	龟板胶
Gui Xin	Cortex Rasus Cinnamomi	桂心
Gui Zhi	Ramulus Cinnamomi	桂枝
Hai Dai	Thallus Laminariae	海带
Hai Feng Teng	Caulis Piperis Kadsurae	海风藤
Hai Fu Rong	Herba Limonium Wrightii	海芙蓉
Hai Ge Fen	Concha Meretricis seu Cyclinae	海蛤粉
Hai Gou Shen	Testes et Penis Otariae	海狗肾
Hai Jin Sha	Herba Lygodii	海金砂

Pinyin Names	Pharmaceutical Names	Chinese Names
Hai Long	Syngnathus	海龙
Hai Ma	Hippocampus	海马
Hai Piao Xiao	Endoconcha Sepiae	海螵蛸
Hai Shen	Strichopus Japonicus	海参
Hai Tong Pi	Cortex Erythrinae	海桐皮
Hai Zao	Sargassum	海藻
Han Lian Cao	Herba Ecliptae	旱莲草
Han Shui Shi	Mirabilite	寒水石
He Cao Ya	Gemma Agrimoniae	鹤草芽
He Di	Calyx Nelumbinis	荷蒂
He Geng	Caulis Nelumbinis	荷梗
He Huan Hua	Flos Albiziae	合欢花
He Huan Pi	Cortex Albiziae	合欢皮
He Shi	Fructus Carpesii	鹤虱
He Shou Wu	Radix Polygoni Multiflori	何首乌
He Tao Qiu Pi	Cortex Juglandis	核桃楸皮
He Ye	Folium Nelumbinis	荷叶
He Zi	Fructus Chebulae	诃子
Hei Dou	Semen Glycine Max	黑豆
Hei Zhi Ma	Semen Sesami Nigrum	黑芝麻
Hong Da Ji	Radix Knoxiae	红大戟
Hong Dou Kou	Fructus Alphiniae Galangae	红豆蔻
Hong Gu She	Radix Kadsura Japonicae	红骨蛇
Hong Han Lian	Herba Hypericum Ascyron	红旱连
Hong Hua	Flos Carthami	红花
Hong Qu	Monascus	红曲
Hong Shi Gao	Gypsum Rubrae	红石膏
Hong Teng	Caulis Sargentodoxae	红藤
Hou Po	Cortex Magnoliae Officinalis	厚朴
Hou Po Hua	Flos Magnoliae Officinalis	厚朴花
Hu Gu	Os Tigris	虎骨
Hu Huang Lian	Rhizoma Picrorhizae	胡黄连
Hu Jiao	Fructus Piper	胡椒
Hu Lu Ba	Semen Trigonellae	胡芦巴
Hu Po	Succinum	琥珀
Hu Tao Ren	Semen Juglandis	胡桃仁
Hu Yao Huang	Herba Leucas Mollissimae	虎咬癀
Hu Zhang	Rhizoma Polygoni Cuspidati	虎杖
Hua Jiao	Pericarpium Zanthoxyli	花椒
Hua Ju Hong	Exocarpium Citri Grandis	化橘红
Hua Rui Shi	Ophicalcitum	花蕊石
Hua Shi	Talcum	滑石
Hua Shi Cao	Herba Orthosiphon Aristatus	化石草
Huai Hua	Flos Sophorae	槐花
Huai Jiao	Fructus Sophorae	槐角
Huai Niu Xi	Radix Achyranthis Bidentatae	淮牛膝
Huai Tong Ma Dou Ling	Caulis Aristolochiae Moupinensis	淮通马兜铃
Huang Bai	Cortex Phellodendri	黄柏
Huang Jin Gui	Caulis Vanieriae	黄金桂
Huang Jing	Rhizoma Polygonati	黄精
Huang Lian	Rhizoma Coptidis	黄连
Huang Niu Jiao	Cornus Bovis	黄牛角
Huang Qi	Radix Astragali	黄芪
Huang Qin	Radix Scutellariae	黄芩

Pinyin Names	Pharmaceutical Names	Chinese Names
Huang Shui Qie	Herba Solani	黄水茄
Huang Teng	Caulis Fibraurea	黄藤
Huang Yang Jiao	Cornu Procapra Gutturosa	黄羊角
Huang Yao Zi	Herba Dioscoreae Bulbiferae	黄药子
Huo Ma Ren	Fructus Cannabis	火麻仁
Huo Xiang	Herba Agastache	藿香
Ji Gu Cao	Herba Abri	鸡骨草
Ji Guan Hua	Flos Celosiae Cristatae	鸡冠花
Ji Nei Jin	Endothelium Corneum Gigeriae Galli	鸡内金
Ji Xiang Teng	Caulis Paederiae	鸡香藤
Ji Xue Cao	Herba Centellae	积雪草
Ji Xue Teng	Caulis Spatholobi	鸡血藤
Jian Shen Qu	Massa Fermentata Praeparata	建神曲
Jiang Can	Bombyx Batryticatus	僵蚕
Jiang Huang	Rhizoma Curcumae Longae	姜黄
Jiang Xiang	Lignum Dalbergiae Odoriferae	降香
Jiao Gu Lan	Rhizoma seu Herba Gynostemmatis	绞股蓝
Jiao Mu	Semen Zanthoxyli Bungeani	椒目
Jie Geng	Radix Platycodonis	桔梗
Jin Bu Huan	Herba Lycopodii Serrati	金不换
Jin Fei Cao	Herba Inulae	金沸草
Jin Guo Lan	Radix Tinosporae	金果榄
Jin Qian Cao	Herba Lysimachiae	金钱草
Jin Yin Hua	Flos Lonicerae	金银花
Jin Ying Zi	Fructus Rosae Laevigatae	金樱子
Jing Da Ji	Radix Euphorbiae Pekinensis	京大戟
Jing Jie	Herba Schizonepetae	荆芥
Jing Sui	Flos Schizonepetae	荆穗
Jing Tian San Qi	Herba seu Radix Sedum Aizoom	景天三七
Jiu Cai Zi	Semen Allii Tuberosi	韭菜子
Jiu Ceng Ta	Herba Ocimi Basilici	九层塔
Jiu Jie Chang Pu	Rhizoma Anemones Altaicae	九节菖蒲
Ju He	Semen Citri Rubrum	橘核
Ju Hong	Exocarpium Citri Rubrum	橘红
Ju Hua	Flos Chrysanthemi	菊花
Ju Luo	Fibra Citri Rubrum	橘络
Ju Ye	Folium Citri Rubrum	橘叶
Ju Ye San Qi	Herba seu Radix Gynura Segetum	菊叶三七
Jue Ming Zi	Semen Cassiae	决明子
Ku Lian Pi	Cortex Meliae	苦楝皮
Ku Lian Zi	Fructus Meliae	苦楝子
Ku Shen Gen	Radix Sophorae Flavescentis	苦参根
Kuan Dong Hua	Flos Farfarae	款冬花
Kun Bu	Thallus Laminariae seu Eckloniae	昆布
Lai Fu Zi	Semen Raphani	莱菔子
Lang Du	Radix Euphorbiae Fischerianae	狼毒
Lao Guan Cao	Herba Erodii seu Geranii	老鹳草
Lei Gong Teng	Radix Tripterygii Wilfordii	雷公藤
Lei Wan	Omphalia	雷丸
Li Lu	Radix et Rhizoma Veratri	黎芦
Li Zhi He	Semen Litchi	荔枝核
Lian Fang	Receptaculum Nelumbinis	莲房
Lian Qian Cao	Herba Glechomae	连钱草
Lian Qiao	Fructus Forsythiae	连翘

Pinyin Names	Pharmaceutical Names	Chinese Names
Lian Xu	Stamen Nelumbinis	莲须
Lian Zi	Semen Nelumbinis	莲子
Lian Zi Xin	Plumula Nelumbinis	莲子心
Ling Yang Jiao	Cornu Saigae Tataricae	羚羊角
Ling Yin Chen	Herba Siphonostegia Chinensis	铃茵陈
Ling Zhi	Ganoderma	灵芝
Liu Huang	Sulfur	硫黄
Liu Ji Nu	Herba Artemisiae Anomalae	刘寄奴
Liu Ye	Folium Salicis Babylonicae	柳叶
Liu Zhi Huang	Herba Solidaginis	柳枝癀
Long Chi	Dens Draconis	龙齿
Long Dan Cao	Radix Gentianae	龙胆草
Long Gu	Os Draconis	龙骨
Long Kui	Herba Solanum Nigrum	龙葵
Long Yan Hua	Flos Longan	龙眼花
Long Yan Rou	Arillus Longan	龙眼肉
Lou Lu	Radix Rhapontici	漏芦
Lu Cha	Folium Camellia Sinensis	绿茶
Lu Dou	Semen Phaseoli Radiati	绿豆
Lu Dou Yi	Pericarpium Phaseoli Radiati	绿豆衣
Lu Feng Fang	Nidus Vespae	露蜂房
Lu Gan Shi	Galamina	炉甘石
Lu Gen	Rhizoma Phragmitis	芦根
Lu Han Cao	Herba Pyrolae	鹿含草
Lu Hui	Aloe	芦荟
Lu Jiao	Cornu Cervi	鹿角
Lu Jiao Jiao	Gelatinum Cornu Cervi	鹿角胶
Lu Jiao Shuang	Cornu Cervi Degelatinatium	鹿角霜
Lu Lu Tong	Fructus Liquidambaris	路路通
Lu Rong	Cornu Cervi Pantotrichum	鹿茸
Luo Han Guo	Fructus Momordicae	罗汉果
Luo Han Guo Ye	Folium Momordicae	罗汉果叶
Luo Shi Teng	Caulis Trachelospermi	络石藤
Ma An Teng	Herba Ipomoea Pes-caprae	马鞍藤
Ma Bian Cao	Herba Verbenae	马鞭草
Ma Bo	Lasiosphaera seu Calvatia	马勃
Ma Chi Xian	Herba Portulacae	马齿苋
Ma Dou Ling	Fructus Aristolochiae	马兜铃
Ma Huang	Herba Ephedrae	麻黄
Ma Huang Gen	Radix Ephedrae	麻黄根
Ma Qian Zi	Semen Strychni	马钱子
Ma Ti Jin	Herba Dichondrae Repentis	马蹄金
Mai Men Dong	Radix Ophiopogonis	麦门冬
Mai Ya	Fructus Hordei Germinatus	麦芽
Man Jing Zi	Fructus Viticis	蔓荆子
Mang Cao	Fructus Illicium Lanceolatum	莽草
Mang Xiao	Natrii Sulfas	芒硝
Mao Dong Qing	Radix Ilicis Pubescentis	毛冬青
Mao Zi Dun Tou	Herba Abutilon Indicum	帽仔盾头
Meng Chong	Tabanus	虻虫
Meng Shi	Lapis Micae seu Chloriti	礞石
Mi Jiao	Cornu Elapnurus	麋角
Mi Meng Hua	Flos Buddlejae	密蒙花
Mi Rong	Cornu Elapnurus Parvum	麋茸

Pinyin Names	Pharmaceutical Names	Chinese Names
Mi Tuo Seng	Lithargyum	密陀僧
Ming Fan	Alumen	明矾
Mo Gu Xiao	Caulis Hyptis Capitatae	冇骨消
Mo Yao	Myrrha	没药
Mu Bie Zi	Semen Momordicae	木鳖子
Mu Dan Pi	Cortex Moutan	牡丹皮
Mu Dan Ye	Folium Moutan	牡丹叶
Mu Ding Xiang	Fructus Caryophylli	母丁香
Mu Fang Ji	Radix Couulus Trilobus	木防己
Mu Gua	Fructus Chaenomelis	木瓜
Mu Li	Concha Ostreae	牡蛎
Mu Xiang	Radix Aucklandiae	木香
Mu Zei	Herba Equiseti Hiemalis	木贼
Nan Chai Hu	Radix Bupleurum Scorzonerifolfium	南柴胡
Nan Gua Zi	Semen Cucurbitae Moschatae	南瓜子
Nan Sha Shen	Radix Adenophorae	南沙参
Nan Ting Li Zi	Semen Descurainiae	南葶苈子
Niao Bu Su	Ramus Kalopanax Pictus	鸟不宿
Niu Bang Gen	Radix Arctii	牛蒡根
Niu Bang Zi	Fructus Arctii	牛蒡子
Niu Dan	Fel Bovis	牛胆
Niu Huang	Calculus Bovis	牛黄
Niu Xi	Radix Cyathulae seu Achyranthis	牛膝
Nu Zhen Zi	Fructus Ligustri Lucidi	女贞子
Ou Jie	Nodus Nelumbinis Rhizomatis	藕节
Pang Da Hai	Semen Sterculiae Lychnophorae	胖大海
Pao Jiang	Rhizoma Zingiberis Preparatum	炮姜
Pao Zai Cao	Herba Physalis Angulatae	炮仔草
Pei Lan	Herba Eupatorii	佩兰
Peng Sha	Borax	硼砂
Pi Pa Ye	Folium Eriobotryae	枇杷叶
Po Bu Zi Ye	Folium Cordia Dichotoma	破布子叶
Po Xiao	Sal Glauberis	朴硝
Pu Gong Ying	Herba Taraxaci	蒲公英
Pu Huang	Pollen Typhae	蒲黄
Pu Yin	Radix Wikstroemia Indica	埔银
Qi Dai	Corda Umbilicalis Hominis	脐带
Qi She	Agkistrodon	蕲蛇
Qi Ye Lian	Radix Schefflerae	七叶莲
Qian Cao	Radix Rubiae	茜草
Qian Dan	Minium	铅丹
Qian Hu	Radix Peucedani	前胡
Qian Li Guang	Herba Senecionis Scandens	千里光
Qian Nian Jian	Rhizoma Homalomenae	千年健
Qian Niu Zi	Semen Pharbitidis	牵牛子
Qian Shi	Semen Euryales	芡实
Qiang Huo	Rhizoma et Radix Notopterygii	羌活
Qin Jiao	Radix Gentianae Macrophyllae	秦艽
Qin Pi	Cortex Fraxini	秦皮
Qing Dai	Indigo Naturalis	青黛
Qing Fen	Calomelas	轻粉
Qing Feng Teng	Caulis Sinomenii	青风藤
Qing Guo Gen	Radix Canarium Album	青果根
Qing Hao	Herba Artemisiae Annuae	青蒿

Pinyin Names	Pharmaceutical Names	Chinese Names
Qing Ma Zi	Semen Abutili	苘麻子
Qing Mu Xiang	Radix Aristolochiae	青木香
Qing Niu Jiao Fen	Cornus Bovis	青牛角粉
Qing Pi	Pericarpium Citri Reticulatae Viride	青皮
Qing Xiang Zi	Semen Celosiae	青葙子
Qu Mai	Herba Dianthi	瞿麦
Quan Xie	Scorpio	全蝎
Ren Dong Teng	Caulis Lonicerae	忍冬藤
Ren Gong Niu Huang	Calculus Bovis Syntheticum	人工牛黄
Ren Shen	Radix Ginseng	人参
Ren Shen Ye	Folium Ginseng	人参叶
Ren Zhong Bai	Urinae Hominis Sedimen	人中白
Rou Cong Rong	Herba Cistanches	肉苁蓉
Rou Dou Gen	Radix Myristicae	肉豆根
Rou Dou Kou	Semen Myristicae	肉豆蔻
Rou Gui	Cortex Cinnamomi	肉桂
Ru Xiang	Gummi Olibanum	乳香
Rui Ren	Semen Prinsepiae	蕤仁
San Leng	Rhizoma Sparganii	三棱
San Qi	Radix Notoginseng	三七
San Qi Ye	Folium Notoginseng	三七叶
San Ye Mu Tong	Caulis Trifoliata	三叶木通
Sang Bai Pi	Cortex Mori	桑白皮
Sang Ji Sheng	Herba Taxilli	桑寄生
Sang Piao Xiao	Ootheca Mantidis	桑螵蛸
Sang Shen Zi	Fructus Mori	桑椹子
Sang Ye	Folium Mori	桑叶
Sang Zhi	Ramulus Mori	桑枝
Sha Ren	Fructus Amomi	砂仁
Sha Ren Ke	Pericarpium Amomi	砂仁壳
Sha Shen	Radix Glehniae seu Adenophorae	沙参
Sha Yuan Zi	Semen Astragali Complanati	沙苑子
Shan Ci Gu	Pseudobulbus Cremastrae	山慈姑
Shan Dou Gen	Radix Sophorae Tonkinensis	山豆根
Shan Ma Ti	Radix Rauvolfiae Hainanensis	山马蹄
Shan Pu Tao	Radix Vitis Amurensis	山葡萄
Shan Yang Jiao	Cornu Naemorhedis	山羊角
Shan Yao	Rhizoma Dioscoreae	山药
Shan Zha	Fructus Crataegi	山楂
Shan Zhu Yu	Fructus Corni	山茱萸
Shang Lu	Radix Phytolaccae	商陆
She Chuang Zi	Fructus Cnidii	蛇床子
She Gan	Rhizoma Belamcandae	射干
She Tui	Periostracum Serpentis	蛇蜕
She Xiang	Moschus	麝香
Shen Jin Cao	Herba Lycopodii	伸筋草
Shen Qu	Massa Fermentata	神曲
Sheng Di Huang	Radix Rehmanniae	生地黄
Sheng Jiang	Rhizoma Zingiberis Recens	生姜
Sheng Jiang Pi	Pericarpium Zingiberis Recens	生姜皮
Sheng Ma	Rhizoma Cimicifugae	升麻
Sheng Tie Luo	Frusta Ferri	生铁落
Shi Chang Pu	Rhizoma Acori	石菖蒲
Shi Di	Calyx Kaki	柿蒂

Pinyin Names	Pharmaceutical Names	Chinese Names
Shi Gao	Gypsum Fibrosum	石膏
Shi Hu	Herba Dendrobii	石斛
Shi Jue Ming	Concha Haliotidis	石决明
Shi Jun Zi	Fructus Quisqualis	使君子
Shi Lian Zi	Herba Sinocrassulae Indicae	石莲子
Shi Liu Pi	Pericarpium Granati	石榴皮
Shi Luo	Fructus Anethum Graveolens	莳萝
Shi Nan Teng	Ramulus Piper	石南藤
Shi Wei	Folium Pyrrosiae	石韦
Shu Di Huang	Radix Rehmanniae Preparata	熟地黄
Shu Hua Sha Shen	Radix Adenophorae Remotiflora	疏花沙参
Shu Qi	Folium Dichroae	蜀漆
Shu Wei Huang	Herba Rostellulariae	鼠尾癀
Shuang Liu Huang	Herba Vernoniae Patulae	双柳黄
Shui Chang Pu	Rhizoma Acori Calami	水菖蒲
Shui Ding Xiang	Herba Ludwigiae Prostratae	水丁香
Shui Niu Jiao	Cornu Bubali	水牛角
Shui Zhi	Hirudo	水蛭
Si Chuan Da Jin Qian Cao	Herba Lysimachia Christinae	四川大金钱
Si Gua Luo	Retinervus Luffae Fructus	丝瓜络
Song Guo	Fructus Pini	松果
Song Jie	Lignum Pini Nodi	松节
Song Ye	Folium Pini	松叶
Su Geng	Caulis Perillae	苏梗
Su He Xiang	Styrax	苏合香
Su Mu	Lignum Sappan	苏木
Su Zi	Fructus Perillae	苏子
Suan Zao Ren	Semen Zizyphi Spinosae	酸枣仁
Suo Luo Zi	Semen Aesculi	娑罗子
Suo Yang	Herba Cynomorii	锁阳
Tai Zi Shen	Radix Pseudostellariae	太子参
Tan Xiang	Lignum Santali Albi	檀香
Tao Ren	Semen Persicae	桃仁
Tian Hua Fen	Radix Trichosanthis	天花粉
Tian Kui Zi	Radix Semiaquilegiae	天葵子
Tian Ma	Rhizoma Gastrodiae	天麻
Tian Men Dong	Radix Asparagi	天门冬
Tian Nan Xing	Rhizoma Arisaematis	天南星
Tian Xian Teng	Herba Aristolochiae	天仙藤
Tian Zhu Huang	Concretio Silicea Bambusae	天竺黄
Ting Li Zi	Semen Descurainiae seu Lepidii	葶苈子
Tong Cao	Medulla Tetrapanacis	通草
Tou Gu Cao	Caulis Impatientis	透骨草
Tu Bei Mu	Bulbus Bolbostemma Paniculatum	土贝母
Tu Fu Ling	Rhizoma Smilacis Glabrae	土茯苓
Tu Niu Xi	Radix Achyranthes Longifolia	土牛膝
Tu Rou Gui	Cortex Cinnamomum Burmannium	土肉桂
Tu Si Zi	Semen Cuscutae	菟丝子
Tu Xi Xin	Herba Asari Forbgesii	土细辛
Wa Leng Zi	Concha Arcae	瓦楞子
Wan Dian Jin	Radix Ilicis Asprellae	万点金
Wan Nian Song	Herba Selaginellae	万年松
Wang Bu Liu Xing	Semen Vaccariae	王不留行
Wei Ling Xian	Radix Clematidis	威灵仙

Pinyin Names	Pharmaceutical Names	Chinese Names
Wu Bei Zi	Galla Chinensis	五倍子
Wu Gong	Scolopendra	蜈蚣
Wu Jia Pi	Cortex Acanthopanacis	五加皮
Wu Ling Zhi	Excrementum Trogopteri seu Pteromi	五灵脂
Wu Long Cha	Folium Camellia Sinensis Fermentata	乌龙茶
Wu Mei	Fructus Mume	乌梅
Wu Ming Yi	Pyrolusitum	无名异
Wu Shao She	Zaocys	乌蛸蛇
Wu Teng	Ramulus Linderae	乌藤
Wu Tian	Radix et Folium Viticis Quinatae	乌甜
Wu Tou	Radix Aconiti	乌头
Wu Wei Zi	Fructus Schisandrae Chinensis	五味子
Wu Yao	Radix Linderae	乌药
Wu Ye Mu Tong	Caulis Quinata	五叶木通
Wu Yi	Fructus Ulmi Praeparatus	芫荑
Wu Zhu Yu	Fructus Evodiae	吴茱萸
Xi Gua	Frucutus Citrulli	西瓜
Xi Gua Cui Pi	Exocarpium Citrulli	西瓜翠皮
Xi Gua Pi	Pericarpium Citrulli	西瓜皮
Xi Jiao	Cornu Rhinoceri	犀角
Xi Xian Cao	Herba Siegesbeckiae	豨莶草
Xi Xin	Herba Asari	细辛
Xi Yang Shen	Radix Panacis Quinquefolii	西洋参
Xia Ku Cao	Spica Prunellae	夏枯草
Xia Ku Hua	Flos Prunellae	夏枯花
Xia Tian Wu	Rhizoma Corydalis Decumbentis	夏天无
Xian Di Huang	Radix Rehmanniae Recens	鲜地黄
Xian Feng Cao	Herba Bidentis	咸丰草
Xian He Cao	Herba Agrimoniae	仙鹤草
Xian Mao	Rhizoma Curculiginis	仙茅
Xiang Fu	Rhizoma Cyperi	香附
Xiang Ru	Herba Elsholtziae seu Moslae	香薷
Xiang Si Cao	Herba Eupatorii Formosani	相思草
Xiang Si Zi	Semen Abrus Precatoris	相思子
Xiang Yuan	Fructus Citri	香橼
Xiao Hui Xiang	Fructus Foeniculi	小茴香
Xiao Ji	Herba Cirisii	小蓟
Xiao Jin Ying	Fructus Rosae Cymosae	小金樱
Xiao Mai	Fructus Tritici	小麦
Xie Bai	Bulbus Allii Macrostemonis	薤白
Xie Cao	Radix et Rhizoma Valerianae	缬草
Xin Yi Hua	Flos Magnoliae	辛夷花
Xing Ren	Semen Armeniacae Amarum	杏仁
Xing Ren Shu Pi	Cortex Pruni Armeniacae	杏仁树皮
Xiong Dan	Fel Ursi	熊胆
Xiong Huang	Realgar	雄黄
Xu Chang Qing	Radix Cynanchi Paniculati	徐长卿
Xu Duan	Radix Dipsaci	续断
Xuan Fu Hua	Flos Inulae	旋覆花
Xuan Shen	Radix Scrophulariae	玄参
Xue Jie	Sanguis Draconis	血竭
Xue Yu Tan	Crinis Carbonisatus	血余炭
Xun Gu Feng	Herba Aristolochiae Mollissimae	寻骨风
Ya Dan Zi	Fructus Bruceae	鸦胆子

Pinyin Names	Pharmaceutical Names	Chinese Names
Ya She Huang	Herba Lippiae	鸭舌癀
Yan Hu Suo	Rhizoma Corydalis	延胡索
Yang Qi Shi	Actinolitum	阳起石
Ye Jiao Teng	Caulis Polygoni Multiflori	夜交藤
Ye Ju Hua	Flos Chrysanthemi Indici	野菊花
Ye Ming Sha	Excrementum Vespertilionis Murini	夜明砂
Ye Ying Pi	Pericarpium Prunus Pseudocerasus	野樱皮
Yi Mu Cao	Herba Leonuri	益母草
Yi Tang	Saccharum Granorum	饴糖
Yi Tiao Gen	Radix Moghaniae	一条根
Yi Wu Gen	Radix Elaeagni	宜梧根
Yi Yi Gen	Radix Coicis	薏苡根
Yi Yi Ren	Semen Coicis	薏苡仁
Yi Zhi Ren	Fructus Alpiniae Oxyphyllae	益智仁
Yi Zhi Xiang	Herba Vernoniae Cinereae	一枝香
Yin Chai Hu	Radix Stellariae	银柴胡
Yin Chen Hao	Herba Artemisiae Scopariae	茵陈蒿
Yin Guo Ye	Folium Ginkgo	银果叶
Yin Yang Huo	Herba Epimedii	淫羊藿
Ying Su Ke	Pericarpium Papaveris	罂粟壳
Yu Bai Fu	Rhizoma Typhonium Giganteum	禹白附
Yu Jin	Radix Curcumae	郁金
Yu Li Ren	Semen Pruni	郁李仁
Yu Mi Xu	Stigma Maydis	玉米须
Yu Xing Cao	Herba Houttuyniae	鱼腥草
Yu Yu Liang	Limonitum	禹余粮
Yu Zhu	Rhizoma Polygonati Odorati	玉竹
Yuan Hua	Flos Genkwa	芫花
Yuan Ming Fen	Matrii Sulfas Exsiccatus	元明粉
Yuan Zhi	Radix Polygalae	远志
Zao Jiao	Fructus Gleditsiae	皂角
Zao Jiao Ci	Spina Gleditsiae	皂角刺
Zao Xiu	Rhizoma Paridis	蚤休
Ze Lan	Herba Lycopi	泽兰
Ze Qi	Herba Euphorbiae Helioscopiae	泽漆
Ze Xie	Rhizoma Alismatis	泽泻
Zhang Hong Hua	Flos Crocus Sativus	藏红花
Zhang Nao	Camphora	樟脑
Zhe Bei Mu	Bulbus Fritillariae Thunbergii	浙贝母
Zhen Zhu	Margarita	珍珠
Zhen Zhu Mu	Concha Margaritaferae	珍珠母
Zhi Gan Cao	Radix Glycyrrhizae Preparata	炙甘草
Zhi Ju Zi	Fructus Hoveniae	枳椇子
Zhi Ke	Fructus Aurantii	枳壳
Zhi Mu	Radix Anemarrhenae	知母
Zhi Shi	Fructus Aurantii Immaturus	枳实
Zhi Zi	Fructus Gardeniae	栀子
Zhi Zi Pi	Pericarpium Gardeniae	栀子皮
Zhi Zi Ren	Semen Gardeniae	栀子仁
Zhong Ru Shi	Stalactitum	钟乳石
Zhu Dan	Fel Porcus	猪胆
Zhu Fan Hua Tou	Rhizoma Mirabilidis	煮饭花头
Zhu Gu	Os Porcus	猪骨
Zhu Li	Succus Bambusae	竹沥

Pinyin Names	Pharmaceutical Names	Chinese Names
Zhu Ling	Polyporus	猪苓
Zhu Ru	Caulis Bambusae in Taenia	竹茹
Zhu Sha	Cinnabaris	朱砂
Zhu Ye	Herba Phyllostachys	竹叶
Zhu Zi Cao	Herba Euphorbiae Thymifoliae	珠仔草
Zi Bei Tian Kui	Herba Semiaquilegiae	紫背天葵
Zi Cao Gen	Radix Lithospermi	紫草根
Zi He Che	Placenta Hominis	紫河车
Zi Hua Di Ding	Herba Violae	紫花地丁
Zi Ran Tong	Pyritum	自然铜
Zi Shi Ying	Fluoritum	紫石英
Zi Su Ye	Folium Perillae	紫苏叶
Zi Wan	Radix Asteris	紫菀
Zi Zhu	Folium Callicarpae	紫珠
Zong Lu Pi	Fibra Stipulae Trachycarpi	棕栌皮
Zong Lu Zi	Fructus Trachycarpi	棕栌子
Zou Ma Tai	Rhizoma Ardisiae	走马胎

Appendix 5 — Cross-reference of Herbal Formula Names

Pinyin Names	Translational Names	Chinese Names
Ai Fu Nuan Gong Wan	Mugwort and Prepared Aconite Pill for Warming the Womb	艾附暖宫丸
An Gong Niu Huang Wan	Calm the Palace Pill with Cattle Gallstone	安宫牛黄丸
An Zhong San	Calm the Middle Powder	安中散
Ba Wei Dai Xia Fang	Eight-Ingredient Formula for Leukorrhea	八味带下方
Ba Wei Di Huang Wan	Eight-Ingredient Pill with Rehmannia	八味地黄丸
Ba Zhen Tang	Eight-Treasure Decoction	八珍汤
Ba Zheng San	Eight-Herb Powder for Rectification	八正散
Bai He Gu Jin Tang	Lily Bulb Decoction to Preserve the Metal	百合固金汤
Bai Hu Jia Cang Zhu Tang	White Tiger plus Atractylodes Decoction	白虎加苍术汤
Bai Hu Jia Gui Zhi Tang	White Tiger plus Cinnamon Twig Decoction	白虎加桂枝汤
Bai Hu Jia Ren Shen Tang	White Tiger plus Ginseng Decoction	白虎加人参汤
Bai Hu Tang	White Tiger Decoction	白虎汤
Bai Tong Tang	White Penetrating Decoction	白通汤
Bai Tou Weng Jia Gan Cao E Jiao Tang	Pulsatilla Decoction plus Licorice and Ass-Hide Gelatin	白头翁加甘草阿胶汤
Bai Tou Weng Tang	Pulsatilla Decoction	白头翁汤
Ban Xia Bai Zhu Tian Ma Tang	Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction	半夏白术天麻汤
Ban Xia Hou Po Tang	Pinellia and Magnolia Bark Decoction	半夏厚朴汤
Ban Xia Xie Xin Tang	Pinellia Decoction to Drain the Epigastrium	半夏泻心汤
Bao Chan Wu You Fang	Preserve Pregnancy and Care-Free Decoction	保产无忧方
Bao He Wan	Preserve Harmony Pill from the Precious Mirror	保和丸
Bao Yuan Tang	Preserve the Basal Decoction	保元汤
Bei Mu Gua Lou San	Fritillaria and Trichosanthes Fruit Powder	贝母瓜蒌散
Bei Xie Fen Qing Yin	Dioscorea Hypoglauca Decoction to Separate the Clear	萆薢分清饮
Bi Yu San	Jasper Powder	碧玉散
Bu Dai Wan	Cloth Sack Pill	布袋丸
Bu Fei E Jiao San	Tonify the Lung Decoction with Ass-Hide Gelatin	补肺阿胶散
Bu Fei Tang	Tonify the Lung Decoction	补肺汤
Bu Huan Jin Zheng Qi San	Rectify the Qi Powder Worth More than Gold	不换金正气散
Bu Yang Huan Wu Tang	Tonify the Yang to Restore Five Decoction	补阳还五汤
Bu Zhong Yi Qi Tang	Tonify the Middle and Augment the Qi Decoction	补中益气汤
Can Shi Tang	Silkworm Droppings Decoction	蚕矢汤
Cang Er San	Xanthium Powder	苍耳散
Cang Lin San	Old Rice Granary Powder	仓廪散
Chai Ge Jie Ji Tang	Bupleurum and Kudzu Decoction to Release the Muscle Layer	柴葛解肌汤
Chai Hu Gui Zhi Gan Jiang Tang	Bupleurum, Cinnamon Twig, and Ginger Decoction	柴胡桂枝乾姜汤
Chai Hu Gui Zhi Tang	Bupleurum and Cinnamon Twig Decoction	柴胡桂枝汤
Chai Hu Jia Long Mu Tang	Bupleurum plus Dragon Bone and Oyster Shell Decoction	柴胡加龙牡汤
Chai Hu Qing Gan Tang	Bupleurum Decoction to Clear the Liver	柴胡清肝汤
Chai Hu Shu Gan Tang	Bupleurum Powder to Spread the Liver	柴胡疏肝汤
Chai Hu Xian Xiong Tang	Bupleurum Decoction for Sinking into the Chest	柴胡陷胸汤
Chai Hu Zhi Jie Tang	Bupleurum, Bitter Orange, and Platycodon Decoction	柴胡枳桔汤
Chai Ling Tang	Bupleurum and Poria Decoction	柴苓汤
Chai Ping Tang	Bupleurum and Calm the Stomach Decoction	柴平汤
Chai Xian Tang	Bupleurum Decoction to Raise the Sunken	柴陷汤
Cheng Qi Yang Ying Tang	Order the Qi and Nourish the Nutritive Qi Decoction	承气养营汤
Cheng Shi Chai Ge Jie Ji Tang	Cheng's Bupleurum and Kudzu Decoction to Release the Muscle Layer	程氏柴葛解肌汤
Chi Shi Zhi Yu Liang Shi Tang	Halloysitum and Limonite Decoction	赤石脂禹余粮汤
Chuan Xiong Cha Tiao San	Ligusticum Chuanxiong Powder to be Taken with Green Tea	川芎茶调散
Ci Zhu Wan	Magnetite and Cinnabar Pills	磁朱丸
Cong Bai Qi Wei Yin	Scallion Decoction with Seven Ingredients	葱白七味饮

Pinyin Names	Translational Names	Chinese Names
Cong Chi Jie Geng Tang	Scallion, Prepared Soybean, and Platycodon Decoction	葱豉桔梗汤
Cong Chi Tang	Scallion and Prepared Soybean Decoction	葱豉汤
Da An Wan	Great Tranquility Pill	大安丸
Da Bu Yin Wan	Great Tonify the Yin Pill	大补阴丸
Da Chai Hu Tang	Major Bupleurum Decoction	大柴胡汤
Da Cheng Qi Tang	Major Order the Qi Decoction	大承气汤
Da Ding Feng Zhu	Major Arrest Wind Pearl	大定风珠
Da Fang Feng Tang	Major Saposhnikovia Decoction	大防风汤
Da Huang Fu Zi Tang	Rhubarb and Prepared Aconite Decoction	大黄附子汤
Da Huang Mu Dan Tang	Rhubarb and Moutan Decoction	大黄牡丹汤
Da Jian Zhong Tang	Major Construct the Middle Decoction	大建中汤
Da Qiang Huo Tang	Major Notopterygium Decoction	大羌活汤
Da Qin Jiao Tang	Major Gentiana Macrophylla Decoction	大秦艽汤
Da Qing Long Tang	Major Bluegreen Dragon Decoction	大青龙汤
Da Xian Xiong Tang	Major Sinking into the Chest Decoction	大陷胸汤
Da Xian Xiong Wan	Major Sinking into the Chest Pill	大陷胸丸
Dang Gui Bu Xue Tang	Tangkuei Decoction to Tonify the Blood	当归补血汤
Dang Gui Jian Zhong Tang	Tangkuei Decoction to Construct the Middle	当归建中汤
Dang Gui Liu Huang Tang	Tangkuei and Six-Yellow Decoction	当归六黄汤
Dang Gui Long Hui Wan	Tangkuei, Gentiana and Aloe Pills	当归龙荟丸
Dang Gui Nian Tong Tang	Tangkuei Decoction to Lift the Pain	当归拈痛汤
Dang Gui San	Tangkuei Powder	当归散
Dang Gui Shao Yao San	Tangkuei and Peony Powder	当归芍药散
Dang Gui Si Ni Jia Wu Zhu Yu Sheng Jiang Tang	Tangkuei Decoction for Frigid Extremities plus Evodia and Fresh Ginger	当归四逆加吴茱萸生姜汤
Dang Gui Si Ni Tang	Tangkuei Decoction for Frigid Extremities	当归四逆汤
Dang Gui Yin Zi	Tangkuei Decoction	当归饮子
Dao Chi San	Guide Out the Red Powder	导赤散
Dao Qi Tang	Conduct the Qi Decoction	导气汤
Dao Shui Fu Ling Tang	Poria Decoction to Drain Water	导水茯苓汤
Dao Tan Tang	Guide Out Phlegm Decoction	导痰汤
Di Huang Yin Zi	Rehmannia Decoction	地黄饮子
Di Tan Tang	Scour Phlegm Decoction	涤痰汤
Ding Chuan Tang	Arrest Wheezing Decoction	定喘汤
Ding Xian Wan	Arrest Seizures Pill	定痫丸
Ding Xiang Shi Di Tang	Clove and Persimmon Calyx Decoction	丁香柿蒂汤
Du Huo Ji Sheng Tang	Angelica Pubescens and Taxillus Decoction	独活寄生汤
Du Qi Wan	Capital Qi Pill	都气丸
Dun Sou San	Long-Bout Cough Powder	顿嗽散
E Jiao Ji Zi Huang Tang	Ass-Hide Gelatin and Egg Yolk Decoction	阿胶鸡子黄汤
Er Chen Tang	Two-Cured Decoction	二陈汤
Er Long Zuo Ci Wan	Pill for Deafness that Is Kind to the Left [Kidney]	耳聋左慈丸
Er Miao San	Two-Marvel Powder	二妙散
Er Xian Tang	Two-Immortal Decoction	二仙汤
Er Zhi Wan	Two-Ultimate Pill	二至丸
Er Zhu Tang	Two-Atractylodes Decoction	二术汤
Fang Feng Tong Sheng San	Saposhnikovia Powder that Sagely Unblocks	防风通圣散
Fang Ji Fu Ling Tang	Stephania and Poria Decoction	防己茯苓汤
Fang Ji Huang Qi Tang	Stephania and Astragalus Decoction	防己黄芪汤
Fen Xiao Tang	Separate and Reduce Decoction	分消汤
Fu Fang Da Cheng Qi Tang	Revised Major Order the Qi Decoction	复方大承气汤
Fu Ling Wan	Poria Pill	茯苓丸
Fu Ling Yin	Poria Decoction	茯苓饮
Fu Tu Dan	Poria and Cuscuta Special Pill	茯菟丹

Pinyin Names	Translational Names	Chinese Names
Fu Yuan Huo Xue Tang	Revive Health by Invigorating the Blood Decoction	复元活血汤
Fu Zi Li Zhong Wan	Prepared Aconite Pill to Regulate the Middle	附子理中丸
Fu Zi Tang	Prepared Aconite Decoction	附子汤
Gan Cao Gan Jiang Fu Ling Bai Zhu Tang	Licorice, Ginger, Poria and Atractylodes Macrocephala Decoction	甘草干姜茯苓白术汤
Gan Cao Xie Xin Tang	Licorice Decoction to Drain the Epigastrium	甘草泻心汤
Gan Jiang Ren Shen Ban Xia Wan	Ginger, Ginseng, and Pinellia Pills	干姜人参半夏丸
Gan Lu Xiao Du Dan	Sweet Dew Special Pill to Eliminate Toxin	甘露消毒丹
Gan Lu Yin	Sweet Dew Decoction	甘露饮
Gan Mai Da Zao Tang	Licorice, Wheat, and Jujube Decoction	甘麦大枣汤
Ge Gen Huang Qin Huang Lian Tang	Kudzu, Coptis, and Scutellaria Decoction	葛根黄芩黄连汤
Ge Gen Tang	Kudzu Decoction	葛根汤
Ge Hua Jie Cheng San	Pueraria Flower Powder for Detoxification and Awakening	葛花解酲散
Ge Xia Zhu Yu Tang	Drive Out Blood Stasis Below the Diaphragm Decoction	膈下逐瘀汤
Gou Teng San	Uncaria Powder	钩藤散
Gou Teng Yin	Uncaria Decoction	钩藤饮
Gu Chong Tang	Stabilize Gushing Decoction	固冲汤
Gu Jing Wan	Stabilize the Menses Pill	固经丸
Gua Di San	Melon Pedicle Powder	瓜蒂散
Gua Lou Xie Bai Bai Jiu Tang	Trichosanthes Fruit, Chinese Chive, and Wine Decoction	瓜蒌薤白白酒汤
Gua Lou Xie Bai Ban Xia Tang	Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction	瓜蒌薤白半夏汤
Gua Lou Zhi Shi Tang	Trichosanthes Fruit and Immature Bitter Orange Decoction	瓜蒌枳实汤
Guan Xin Su He Wan	Coronary Styrax Pills	冠心苏合丸
Gui Ling Gan Lu Yin	Cinnamon and Poria Sweet Dew Decoction	桂苓甘露饮
Gui Lu Er Xian Jiao	Tortoise Shell and Deer Antler Syrup	龟鹿二仙胶
Gui Pi Tang	Restore the Spleen Decoction	归脾汤
Gui Qi Jian Zhong Tang	Tangkuei and Astragalus Decoction to Construct the Middle	归芪建中汤
Gui Zhi Fu Ling Wan	Cinnamon Twig and Poria Pills	桂枝茯苓丸
Gui Zhi Jia Ge Gen Tang	Cinnamon Twig Decoction plus Kudzu	桂枝加葛根汤
Gui Zhi Jia Hou Po Xing Zi Tang	Cinnamon Twig Decoction plus Magnolia Bark and Apricot Kernel	桂枝加厚朴杏子汤
Gui Zhi Jia Long Mu Tang	Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell	桂枝加龙牡汤
Gui Zhi Jia Shao Yao Tang	Cinnamon Twig Decoction plus Peony	桂枝加芍药汤
Gui Zhi Ma Huang Ge Ban Tang	Combined Cinnamon Twig and Ephedra Decoction	桂枝麻黄各半汤
Gui Zhi Ren Shen Tang	Cinnamon Twig and Ginseng Decoction	桂枝人参汤
Gui Zhi Shao Yao Zhi Mu Tang	Cinnamon Twig, Peony, and Anemarrhena Decoction	桂枝芍药知母汤
Gui Zhi Tang	Cinnamon Twig Decoction	桂枝汤
Gun Tan Wan	Vaporize Phlegm Pill	滚痰丸
Guo Qi Yin	Delayed Menstruation Decoction	过期饮
Hai Zao Yu Hu Tang	Sargassum Decoction for the Jade Flask	海藻玉壶汤
Hao Qin Qing Dan Tang	Artemisia Annua and Scutellaria Decoction to Clear the Gallbladder	蒿芩清胆汤
Hei Xiao Yao San	Black Rambling Powder	黑逍遥散
Hou Po Qi Wu Tang	Seven-Substance Decoction with Magnolia Bark	厚朴七物汤
Hou Po Wen Zhong Tang	Magnolia Bark Decoction for Warming the Middle	厚朴温中汤
Hu Qian Wan	Hidden Tiger Pill from the Analytic Collection	虎潜丸
Hua Chong Wan	Dissolve Parasites Pills	化虫丸
Hua Gai San	Canopy Powder	华盖散
Huai Hua San	Sophora Japonica Flower Powder	槐花散
Huai Jiao Wan	Sophora Japonica Fruit Pills	槐角丸
Huan Shao Dan	Return to Youth Pills	还少丹
Huang Lian Jie Du Tang	Coptis Decoction to Relieve Toxicity	黄连解毒汤
Huang Lian Shang Qing Wan	Coptis Pills to Clear the Upper	黄连上清丸
Huang Lian Tang	Coptis Decoction	黄连汤

Pinyin Names	Translational Names	Chinese Names
Huang Long Tang	Yellow Dragon Decoction	黄龙汤
Huang Qi Jian Zhong Tang	Astragalus Decoction to Construct the Middle	黄芪建中汤

Tu Si Zi (Semen Cuscutae)				x	
Xu Duan (Radix Dipsaci)	x			x	In cases of deficiencies
Yi Tang (Saccharum Granorum)	x				
Ze Xie (Rhizoma Alismatis)					Edema
Zhu Ru (Caulis Bambusae in Taenia)		x			
Zi Su Ye (Folium Perillae)	x	x			
Zong Lu Pi (Fibra Stipulae Trachycarpi)	x			x	

Appendix 7 — Cautions / Contraindications for Use of Herbs During Pregnancy

Certain herbs have a recognized potential to endanger or cause harm to a fetus during pregnancy, thus possibly causing birth defects or miscarriage. As a general rule, herbs with potent effects to regulate qi, move blood, or drain downwards should be avoided during pregnancy. These herbs are classified as **contraindicated** or for **use with caution** in treatment of pregnant women. Please note that these are not comprehensive lists—additional information is listed in each herb monograph.

Herbs	Caution	Contraindication
Ba Dou (Fructus Crotonis)		×
Bai Fu Zi (Rhizoma Typhonii)		×
Bai Guo (Semen Ginkgo)	×	
Bai Ji Li (Fructus Tribuli)		×
Ban Mao (Mylabris)		×
Ban Xia (Rhizoma Pinelliae)	×	
Bie Jia (Carapax Trionycis)		×
Bing Lang (Semen Arecae)	×	
Bing Pian (Borneolum Syntheticum)		×

Appendix 8

— Dosing Guidelines

The dosages listed in this text refer to the daily dose for an adult of average height and weight, when using dehydrated herbs. However, the actual prescribed dosage will vary significantly, based not only on the characteristics of the illness and overall condition of the patient, but also on his or her size and age. Generally speaking, single herbs used individually require higher dosages, while herbs used as part of an herbal formula are chosen in smaller amounts. Treatment of an acute condition necessitates higher dosages, and treatment of a mild condition, smaller dosages. One must also consider the constitution of the patient. Those who are basically healthy and strong may tolerate larger doses, while weak and/or deficiency patients will need a smaller dose.

Recommended ingestion levels must be adjusted to reflect variations in age and body weight. The principle behind the *Age-to-Dose Guideline* is based on assessment of the maturity of the internal organs and their capacity to metabolize, utilize and eliminate herbs. This highly-detailed chart is especially useful for infants and younger children. The recommendations are taken from *Zhong Cao Yao* (Chinese Herbal Medicine), published by the Nanjing College of Traditional Chinese Medicine.

The principle behind the *Weight-to-Dose Guideline* is based on the effective concentration of the herbal medicine once it is distributed throughout different areas of the body. This dosing strategy is especially useful for patients whose body weight falls outside of the normal range. All calculations are based on Clark's Rule in '*Pharmaceutical Calculations*,' written by Mitchell Stoklosa and Howard Ansel.

These charts provide herbal practitioners a handy reference for dosing those patients who fall outside the definition of an "average adult." It is important to remember, however, that the charts serve only as guidelines—not as absolute rules. One must always remember to treat each patient as a unique individual, not as a statistic on a chart!

Age-to-Dose Dosing Guideline

Age	Recommended Daily Dosage
0 – 1 month	1/18 – 1/14 of adult dose
1 – 6 month	1/14 – 1/7 of adult dose
6 – 12 month	1/7 – 1/5 of adult dose
1 – 2 years	1/5 – 1/4 of adult dose
2 – 4 years	1/4 – 1/3 of adult dose
4 – 6 years	1/3 – 2/5 of adult dose
6 – 9 years	2/5 – 1/2 of adult dose
9 – 14 years	1/2 – 2/3 of adult dose
14 – 18 years	2/3 – full adult dose
18 – 60 years	**adult dose**
60 years and over	3/4 or less of adult dose

Weight-to-Dose Dosing Guideline

Weight	Recommended Daily Dosage
30 – 40 lbs	20% – 27% of adult dose
40 – 50 lbs	27% – 33% of adult dose
50 – 60 lbs	33% – 40% of adult dose
60 – 70 lbs	40% – 47% of adult dose
70 – 80 lbs	47% – 53% of adult dose
80 – 100 lbs	53% – 67% of adult dose
100 – 120 lbs	67% – 80% of adult dose
120 – 150 lbs	80% – 100% of adult dose
150 lbs	**adult dose**
150 – 200 lbs	100% – 133% of adult dose
200 – 250 lbs	133% – 167% of adult dose
250 – 300 lbs	167% – 200% of adult dose

Appendix 9 — Weights and Measures: Chinese, British and Metric Systems

CHINESE SYSTEM

1. Measure of Weight

1 *jin* (斤) = 16 *liang*
1 *liang* (两) = 10 *qian*
1 *qian* (钱) = 10 *fen*
1 *fen* (分) = 10 *li* (厘)

2. Measure of Volume

The standard unit is *sheng* (升) for measurement of volume. Historically, each *sheng* is approximately 1000 ml. Other units of measure, such as bowls and spoonfuls, are not discussed as they are quite vague and there are great differences in these standards in different regions.

BRITISH SYSTEM

1. Measure of Weight (Apothecary)

20 grains = 1 scruple
3 scruples (60 grains) = 1 drachm or dram
8 drachms (480 grains) = 1 ounce
12 ounces (5760 grains) = 1 pound

2. Measure of Weight (Avoirdupois)

437½ or 437.5 grains = 1 ounce
16 ounces (7000 grains) = 1 pound

3. Measure of Volume (Apothecary)

60 minims = 1 fluidrachm or fluidram
8 fluidrachms (480 minims) = 1 fluidounce
16 fluidounces = 1 pint
2 pints (32 fluidounces) = 1 quart
4 quarts (8 pints) = 1 gallon

METRIC SYSTEM

Multiples and Submultiples		Prefix	Symbol
1,000,000,000,000	(10^{12})	*tera-*	T
1,000,000,000	(10^{9})	*giga-*	G
1,000,000	(10^{6})	*mega-*	M
1,000	(10^{3})	*kilo-*	k
100	(10^{2})	*hecto-*	h
10	(10)	*deka-*	da
0.1	(10^{-1})	*deci-*	d
0.01	(10^{-2})	*centi-*	c
0.001	(10^{-3})	*milli-*	m
0.000,001	(10^{-6})	*micro-*	μ or mc
0.000,000,001	(10^{-9})	*nano-*	n
0.000,000,000,001	(10^{-12})	*pico-*	p
0.000,000,000,000,001	(10^{-15})	*femto-*	f
0.000,000,000,000,000,001	(10^{-18})	*atto-*	a

1. Measure of Weight

1 kilogram (kg) = 1000.000 grams
1 hektogram (hg) = 100.000 grams
1 dekagram (dag) = 10.000 grams
1 gram (g or gm) = 1.000 gram
1 decigram (dg) = 0.100 gram
1 centigram (cg) = 0.010 gram
1 milligram (mg) = 0.001 gram
1 microgram (μg or mcg) = 0.000,001 gram

1 gram (g or gm) = 0.001 kilogram
= 0.010 hektogram
= 0.100 dekagram
= 10 decigrams
= 100 centigrams
= 1000 milligrams
= 1,000,000 micrograms

2. Measure of Volume

1 kiloliter (kL) = 1000.000 liters
1 hektoliter (hL) = 100.000 liters
1 dekaliter (daL) = 10.000 liters
1 liter (L) = 1.000 liter
1 deciliter (dL) = 0.100 liter
1 centiliter (cL) = 0.010 liter
1 milliliter (mL) = 0.001 liter
1 microliter (μL) = 0.000,001 liter

1 liter = 0.001 kiloliter
= 0.010 hektoliter
= 0.100 dekaliter
= 10 deciliters
= 100 centiliters
= 1000 milliliters
= 1,000,000 microliters

CONVERSIONS

Weight Conversion (Chinese Units : Metric : Avoirdupois)

Chinese Units	Grams	Ounces
1 *jin*	500	17.87
1 *liang*	31.25	1.116875
1 *qian*	3.125	0.111688
1 *fen*	0.3125	0.011169
1 *li*	0.03125	0.001117

Volume Conversion (Chinese Units : Metric : Apothecary)

Chinese Units	Liter	Fluid Ounces
1 *sheng*	1	33.815

Appendix 10 — Convention on International Trade in Endangered Species (CITES)

Trade in herbs and animals listed in Appendix I of Convention on International Trade in Endangered Species (CITES) is strictly prohibited. The discussion of these substances in this text is included only to offer 1) the accurate history of its critically important usage in traditional herbal medicine, and 2) models for appropriate usage of effective substitute substances and alternatives. The information should not be interpreted as condoning illegal use of these endangered species.

Endangered Species	Status	Alternatives
Hu Gu (Os Tigris)	Appendix I	***Zhu Gu*** (Os Porcus)
Xi Jiao (Cornu Rhinoceri)	Appendix I	***Shui Niu Jiao*** (Cornu Bubali)
Xiong Dan (Fel Ursi)	Appendix I	***Niu Dan*** (Fel Bovis)

Bibliography of Historical Texts

Pinyin Names (Translated Names)	Chinese Names
Bai Rai Shin Shu (A New Study of Dermatomycosis and Dermatitis) by Tsursure Katakura	
Bai Yi Xuan Fang (Selected Formulas)	百一选方
Bao Ying Cuo Yao (Synopsis of Caring for Infants) by Xue Kai in 1555	保婴撮要
Bei Ji Qian Jin Yao Fang (Thousands of Golden Prescriptions for Emergencies)	备急千金要方
Ben Cao Bei Yao (Essentials of the Materia Medica) by Wang Ang in 1751	本草备要
Ben Cao Cong Xin (Thoroughly Revised Materia Medica) by Wu Yi-Luo in 1751	本草从新
Ben Cao Fa Hui (Elaboration of the Materia Medica) by Xu Yan-Chun in Ming Dynasty	本草发挥
Ben Cao Gang Mu (Materia Medica) by Li Shi-Zhen in 1578	本草纲目
Ben Cao Gang Mu Shi Yi (Omissions from the Grand Materia Medica) by Zhao Xue-Min in 1765	本草纲目拾遗
Ben Cao Hui Yan (Treasury of Words on the Materia Medica) by Ni Zhu-Mo in 1624	本草汇言
Ben Cao Jing Ji Zhu (Collection of Commentaries on the Classic of the Materia Medica) by Tao Hong-Jing in 480-498 B.C.	本草经集注
Ben Cao Meng Quan (Hidden Aspects of the Materia Medica) by Chen Jia-Mo in 1565	本草蒙荃
Ben Cao Pin Hui Jing Yao (Essentials of Materia Medica) by Liu Wen-Tai in 1505	本草品汇精要
Ben Cao Qiu Zheng (Verification of Materia Medica) by Huang Gong-Xiu in 1769	本草求正
Ben Cao Shi Yi (Omissions from the [Classic of the] Materia Medica) by Chen Cang-Qi in 741 A.D.	本草拾遗
Ben Cao Yan Yi (Extension of the Materia Medica) by Kou Zong-Shi in 1116	本草衍义
Ben Cao Yan Yi Bu Yi (Supplement to the Extension of the Materia Medica) by Zhu Zhen-Heng in 1347	本草衍义补遗
Ben Cao Yuan Shi (Origins of the Materia Medica) by Li Zhong-Li in Ming Dynasty	本草原始
Ben Cao Zai Xin (Renewed Materia Medica)	本草再新
Ben Cao Zheng (Rectification of the Materia Medica)	本草正
Ben Cao Zheng Yi (Truth and False Information of Materia Medica) by Zhang Shan-Lei in 1920	本草正义
Ben Jing (Divine Husbandman's Classic of the Materia Medica) in the second century	本经
Ben Jing Feng Yuan (Journey to the Origin of the Classic of Materia Medica) by Zhang Lu in 1670	本经逢原

Glossary

The first column consists of the terms used in the body of the text. Subsequent columns provide correlation to the Chinese characters, pinyin transliteration, previous translation by Wiseman and Feng, and finally, a definition of the term.

When a Chinese term is important to the understanding of a theoretical or clinical concept, or when it is a term familiar to many students and practitioners of Chinese Herbal Medicine, that term is given in pinyin in the text, with an accompanying translation, if needed. However, for lesser-known terms, English translations have been used in the body of the text, with the glossary provided to assist interested individuals in making connections with the Chinese.

The authors have carefully considered the translation of each term and have offered the clearest and most practical translation they could discover, based on consideration both of the Chinese terminology and nuances of standard American English usage. In some cases, this differs slightly from translations offered by Wiseman and Feng, which we have included here for purposes of assisting researchers already familiar with their work. These small differences in no way diminish our respect for and appreciation of the diligence with which our esteemed colleagues have worked to provide thorough, extensive and effective bridges in understanding via their work.

Terminology	**Chinese**	**Pinyin**	**Wiseman & Feng**	**Definition**
5 a.m. diarrhea	五更泄	*Wu Geng Xie*	fifth-watch diarrhea	Characterized by early morning (approximately 5 a.m.) diarrhea, this is often caused by Kidney deficiency.
accumulation	积聚	*Ji Ju*	accumulation and gathering	An inclusive term describing the accumulation of *ji* (yin substances) and *ju* (yang substances), that may occur in any organ. Clinical presentation differs, depending on the area(s) and organ(s) affected.
ah shi point	阿是穴	*Ah Shi Xue*	a-shi point	A type of acupuncture point having no fixed location or name, but corresponding to an underlying disorder. Stimulating an *ah shi* point elicits tenderness and pain.
Ba Gang Bian Zheng (Eight Principle Differentiation)	八纲辨证	*Ba Gang Bian Zheng*	eight-principle pattern identification	A system of differential diagnosis based on patterns of imbalance or disharmony of the eight factors of exterior and interior location, cold and hot attributes, deficiency and excess states, and yin and yang qualities.
ben tun (running piglet)	奔豚	*Ben Tun*	running piglet	A sensation of qi rushing upwards from the lower abdomen to the chest, epigastrium and throat. There will generally be concurrent pain, discomfort, alternation of heat and cold, and palpitations.
beng lou (flooding and spotting)	崩漏	*Beng Lou*	flooding and spotting	A condition that includes massive uterine bleeding at irregular intervals and incessant dripping of blood from the uterus.
bi zheng (closed disorder)	闭证	*Bi Zheng*	block pattern	Characterized by clenched jaws, tight fists, unconsciousness, warm body and cold extremities, this generally occurs in wind stroke or febrile disorders, with heat attacking *ying* (nutritive) and *xue* (blood) levels.
bi zheng (painful obstruction syndrome)	痹证	*Bi Zheng*	impediment pattern	A pain condition characterized by stagnation and obstruction that may affect any tissue and/or organ.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
blood	血	*Xue*	blood	The red viscous fluid in the body that comprises nutrients, body fluids and Kidney *jing* (essence).
blood deficiency	血虚	*Xue Xu*	blood vacuity	Pale, lusterless face, pale lips, dizziness, vertigo, palpitations, insomnia, coldness and numbness of the extremities, and a thready, weak pulse illustrate this condition, caused by loss of blood, excessive thinking and worrying, the presence of parasites, or injury to the internal organs.
blood dessication	血枯	*Xue Ku*	blood desiccation	Following profuse loss of blood, a condition characterized by dizziness, feeling of weightlessness of the extremities, and amenorrhea.
blood stagnation/stasis	血瘀	*Xue Yu*	blood stasis	A condition characterized by obstructed blood flow, leading to dark purplish skin color, dried or scaly skin, pain at a fixed location, pain that intensifies with pressure, fullness and distention of the lower abdomen, amenorrhea, black tarry stools, and a dark purple tongue with black spots. Blood stagnation/stasis may be caused by external injuries, menstrual irregularities, qi stagnation and cold stagnation. Blood stagnation refers to mild to moderate obstruction of blood circulation. Blood stasis refers to moderate to severe obstruction of blood circulation, possibly with clotting.
body fluids	津液	*Jin Ye*	fluids	An all-inclusive term that describes all the fluids in the body, including tears, saliva, sweat, blood and fluids that lubricate the joints.
breast abscess	乳痈	*Ru Yong*	mammary welling-abscess	A hard breast abscess accompanied by distention and pain, chills and fever, and obstructed flow of breast milk, this is generally caused by Liver qi stagnation, Stomach fire, and stasis of breast milk.
chang feng (intestinal wind)	肠风	*Chang Feng*	intestinal wind	A condition caused by wind attacking the intestines, leading to the presence of bright red blood in the stools.
chi position	尺	*Chi*	cubit	The third (most proximal) position on the wrist for pulse diagnosis, it represents Kidney yang (right hand) and Kidney yin (left hand).
chong (thoroughfare) channel	冲脉	*Chong Mai*	thoroughfare vessel	One of the eight extraordinary vessels, it controls the twelve channels. Also known as the "Sea of Blood," as it has functions related to blood and gynecology.
clumping	结	*Jie*	bind	This describes the formation of a solid mass or masses from one or more substances, such as phlegm, heat or cold.
cold	寒	*Han*	cold	Cold is a yin pathogenic factor that attacks both the outside and inside of the body and is characterized by contraction and stagnation. Clinical presentation of cold includes chills, shivering, aversion to cold, cold extremities, pale face and lips, the presence of undigested food in the stools, and clear urine.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
collapse	厥	*Jue*	reversal	A condition of sudden collapse and loss of consciousness, that generally can be reversed. The causes of collapse include cold, heat, phlegm and dietary injury, among others.
controlling sequence	相克	*Xiang Ke*	restraining	A concept of *wu xing* (five element) theory that describes the orderly sequence in which one element controls the growth of another.
cun position	寸	*Cun*	cun	The first (most distal) position on the wrist for pulse diagnosis, it represents the Lung (right hand) and the Heart (left hand).
dai (girdle) channel	带脉	*Dai Mai*	girdling vessel	Another of the eight extraordinary vessels, this one serves to bind all of the channels together, and influences lower extremity function.
damp	湿	*Shi*	damp	Damp is a pathogenic factor that occurs mainly in the late summer or in places with high humidity. Dampness is characterized by heaviness and turbidity, which may lead to such symptoms as feeling heaviness in the head and extremities, general fatigue, and fullness in the chest and epigastrium. Dampness is also characterized by increased viscosity of substances and stagnation, such as in cases of abscesses, oozing ulcers, leukorrhea with foul discharge, and arthritis.
de qi (arrival of qi)	的气	*De Qi*	obtaining qi	Qi sensation (numbness, pressure, swelling, warmth or other) that follows insertion and manipulation of acupuncture needles.
debilitation	劳	*Lao*	taxation	Generalized weakness resulting from persistent mental and physical wear and tear on the body.
deficiency	虚	*Xu*	vacuity	Deficiency refers to a state of insufficiency (such as deficiency of qi, blood, yin or yang), or decreased ability of the organ to carry out its normal physiological functions (Spleen deficiency, Kidney deficiency, and so on). Deficiency occurs due to congenital deficiency, lack of nourishment, or long-term illness.
dian kuang (mania and withdrawal)	癫狂	*Dian Kuang*	mania and withdrawal	An inclusive term for various types of mental illness. *Dian* (withdrawal) represents yin disorders: the individual is quiet and socially inactive. *Kuang* (mania) represents yang disorders: the individual is irritable, restless, and physically active.
drooling phlegm	痰涎	*Tan Xian*	phlegm-drool	Characterized by profuse dripping of saliva in children, this is generally caused by wind-heat attacking the Spleen, resulting in its inability to properly process water.
drum-like abdominal distention	鼓胀	*Gu Zhang*	drum distention	Characterized by severe fullness and distention, resulting in the abdomen resembling a drum, this may be caused by emotional constraint, inappropriate diet, excessive use of alcohol, or intestinal parasites.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
dryness	乾	*Gan*	dry	Dryness is a pathogenic factor that invades the body in late autumn when there is a lack of moisture in the environment. Dryness consumes yin and body fluids, and may lead to clinical presentations such as dry and chapped skin, dryness of the mouth and throat, thirst, dry cough with little sputum, and so on.
du (governing) channel	督脉	*Du Mai*	governing vessel	Confluence of all yang vessels, one of the eight extraordinary vessels, also known as the "Sea of Yang Qi." It influences brain and spinal column functioning.
dysentery	痢疾	*Li Ji*	dysentery	A disorder characterized by abdominal pain, increased frequency but decreased volume of bowel movements, tenesmus, and the presence of undigested food, mucus, and blood in the stool.
earth	土	*Tu*	earth	Another of the five elements, earth corresponds to ripeness and late summer, to sweet flavors, transformation, and centeredness. The corresponding organ is the Spleen.
epidemic toxin	疫毒	*Yi Du*	epidemic toxin	An epidemic pathogenic factor that attacks and affects the entire community, regardless of individual health and constitution.
epilepsy	痫证	*Xian Zheng*	epilepsy pattern	Characterized by altered consciousness and muscle convulsions, this disorder occurs frequently in children because they have not yet gained fully-developed defenses against external pathogens. Factors commonly causing seizure include wind, heat, phlegm and inappropriate diet.
excess	实	*Shi*	repletion	Excess refers to the state of surplus or overload that creates a pathologic condition in the body, such as when there is excess heat, formation or accumulation of phlegm, or blood stagnation, among others. Excess conditions occur in the case of invasion of exogenous pathogenic factors or in disharmony of the internal organs.
exterior	表	*Biao*	exterior	The outside of the body, such as the skin, mouth, nose and nostrils. Pathogenic factors are often said to attack the exterior prior to invading the interior. The clinical presentation of an exterior syndrome includes headache, muscle aches and pain, nasal congestion, coughing and so on.
exterior and interior	表里	*Biao Li*	exterior and interior	A term used to indicate differentiation between the exterior and interior parts of the body.
febrile diseases	热病	*Re Bing*	heat disease	A term that describes all externally-contracted diseases characterized by heat.
fire	火	*Huo*	fire	Fire is one of the five elements, associated with upward movement of energy, the sparkling flaring of fire, and summer. The corresponding organ is the Heart. In disease terminology, fire is a yang pathogenic factor representing a severe form of heat.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
five elements	五行	*Wu Xing*	five phases	A theory which evaluates all things according to elements of water, wood, fire, earth and metal. The theory is also used to explain anatomy, physiology, and pathology of the human body, as well as treatment strategies.
floating edema	浮肿	*Fu Zhong*	puffy swelling	A symptom characterized by fluid accumulation in superficial parts of the body, this is generally caused by Lung, Spleen or Kidney deficiency, and the consequent inability to properly regulate water metabolism pathways.
focal distention	痞满	*Pi Man*	glomus fullness	Fullness, distention and oppression in the chest and abdomen, caused by food retention, phlegm stagnation, and/or damp-heat accumulation.
fright and palpitations	惊悸	*Jing Ji*	fright palpitations	A condition of emotional instability and increased sensitivity to stimulus caused by Heart qi deficiency.
frightened wind	惊风	*Jing Feng*	fright wind	Literally "frightened wind," this describes seizures and convulsions in children. It is most common in children under the age of five, with incidence gradually decreasing with increased age. Clinical presentation includes high fever, red eyes, convulsion, opisthotonos, clenched jaws, tight fists, eyes rolled up, and urinary and bowel incontinence.
fu (hollow organ)	腑	*Fu*	bowel	The hollow organs of the body are the Small Intestine, Large Intestine, Gallbladder, Stomach and Urinary Bladder.
Gallbladder	胆	*Dan*	gallbladder	Paired with the Liver, the Gallbladder stores bile and excretes it to the intestines to facilitate digestion.
gan ji (infantile malnutrition)	疳疾	*Gan Ji*	gan disease	A disorder characterized by the inability of the Spleen and Stomach to properly transform and transport food. Generally occurring in children under five years of age, *gan ji* is characterized by sallow facial appearance, weight loss, thin hair, poor appetite, abdominal distention, and irregular bowel movements.
gao lin (cloudy dysuria)	膏淋	*Gao Lin*	unctuous strangury	A urinary tract disorder in which the urine has a milky or cloudy appearance, and may be slightly pink (an indication of bleeding). This is caused by damp-heat attacking the Urinary Bladder, leading to the bladder's inability to clear turbid substances.
generating sequence	相生	*Xiang Sheng*	engendering	A concept of *wu xing* (five element) theory that describes the orderly sequence in which one element promotes the generation of another.
gu (food) *qi*	谷气	*Gu Qi*		Qi that is derived from the ingestion and absorption of food.
guan position	关	*Guan*	bar	The second (middle) position on the wrist for pulse diagnosis represents the Spleen (right hand) and the Liver (left hand).

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
half-body perspiration	半身汗	*Ban Shen Han*		Half-body perspiration refers to sweating only on half of the body, such as the left or right side, or upper or lower half. This condition occurs because of obstruction of the channels and collaterals caused by wind-phlegm or wind-damp. It may also be caused by disharmony of qi and blood, or of *ying* (nutritive) and *wei* (defense) levels.
he (uniting) point	合穴	*He Xue*	uniting point	Known as "uniting" or "sea" points, these represent the flow of qi where it is vast and deep, near the elbows or knees.
he xi feng (crane's knee wind)	鹤膝风	*He Xi Feng*	crane's-knee wind	A condition in which the knees are swollen and enlarged, but the muscles above and below the knees are atrophied.
Heart	心	*Xin*	heart	The Heart functions to control the blood channels and house the *shen* (spirit). It connects to the Small Intestine and opens to the tongue, and is associated with the fire element.
heat	热	*Re*	heat	Heat is a yang pathogenic factor that attacks both external and internal aspects of the body; it is characterized by the tendency to disperse outwards and to consume yin and fluids. Clinical presentations of heat include a wide variety of signs and symptoms, such as fever, inflammation, infection, bleeding, and others.
heat in the blood	血热	*Xue Re*	blood heat	A condition characterized by nosebleeds, coughing of blood, and late-afternoon fever, because of heat affecting the *xue* (blood) level.
hernial disorder	疝气	*Shan Qi*	mounting qi	Historically, this TCM term covers a wide variety of disorders related to both internal and external genitalia, in men and women. More recently, it refers specifically to disorders of the male external genitalia (testicles and scrotum).
hui (influential) point	会穴	*Hui Xue*	meeting point	Referred to as "meeting" or "influential" points, these eight points individually represent either *zang*, *fu*, qi, blood, tendons, channels, bones or marrow.
hun (ethereal soul)	魂	*Hun*	ethereal soul	Similar to the Western interpretation of "soul" or "spirit," the *hun* functions to maintain mental and psychological health and well-being. It has been said that the Liver stores blood, and blood contains *hun*. Therefore, disorders of the *hun* are often secondary to the inability of the Liver to store blood; or, secondary to deficiency of Liver blood.
insulting sequence	相侮	*Xiang Wu*	rebellion	A concept of *wu xing* (five element) theory that describes the situation in which an element normally controlled by another reverses the sequence and suppresses or reduces what is normally the controlling element.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
interior	里	*Li*	interior	Internal aspects of the body, such as organs, bone marrow, and the *qi* (energy) and *xue* (blood) levels. Pathogenic factors may affect the interior of the body directly or indirectly (via the exterior). Clinical presentation of interior conditions varies significantly, depending on the area and/or organs affected.
intestinal abscess	肠痈	*Chang Yong*	intestinal welling-abscess	Intestinal abscesses generally arise from inappropriate diet or emotional disturbances (excessive anger or worry), and are characterized by abdominal pain.
irritability	烦	*Fan*	vexation	A state of impatience, anger, annoyance, and increased sensitivity to stimulus.
jin (thin body fluid)	津	*Jin*	liquid	An inclusive term that describes body fluids of lesser density, such as tears, saliva and sweat.
jing (essence)	精	*Jing*	essence	The basic substance that makes up the human body and sustains the vital functions of the internal organs. Derived prenatally from one's parents, and postnatally from food, essence is stored in the Kidney.
jing (river) point	经穴	*Jing Xue*	river point	Commonly referred to as either "traversing" or "river" points, these suggest that the flow of qi at the forearms or lower legs has attained a large volume.
jing (well) point	井穴	*Jing Xue*	well point	"Well" points represent the beginning of qi circulation within channels, at the most distal parts of the body, where qi flow is still small and shallow.
jueyin	厥阴	*Jue Yin*	reverting yin	The last of six stages in the paradigm of yin and yang. This describes the degree of pathology of disease according to the *Shang Han Lun* (Cold-Induced Disorders) text. It also identifies the level attributed to the Liver and Pericardium channels that travel throughout the body.
Kidney	肾	*Shen*	kidney	The Kidney controls growth, maturation, reproduction and aging. It produces marrow that forms the brain and spinal cord, and it promotes production of bones and blood. Furthermore, it dominates body fluids and receives qi from air via the Lung. Associated with the water element, the Kidney connects with the Urinary Bladder, opens to the ears, and houses the faculty of *zhi* (will power).
lao lin (fatigue dysuria)	劳淋	*Lao Lin*	taxation strangury	A urinary tract disorder involving increased frequency of urination, especially with physical stress and exertion. Accompanying symptoms include fatigue, lower back and knee soreness and pain, with dribbling urine, but no pain during urination. This is caused when prolonged exertion leads to Spleen and Kidney exhaustion and inability to control the normal flow of water and urination.
Large Intestine	大肠	*Da Chang*	large intestine	Connected to the Small Intestine, the Large Intestine absorbs nutrients and water from food.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
leg *qi*	脚气	*Jiao Qi*	leg qi	A disorder of the leg(s) characterized by numbness, soreness, pain, weakness, possible swelling and cramps, and possible atrophy of leg muscles. Accompanying symptoms may include nausea, vomiting, dyspnea, incoherent speech, and palpitations. Generally caused by wind, damp, and toxins attacking the legs, it overlaps in symptomology with beriberi.
lin zheng (dysuria syndrome)	淋证	*Lin Zheng*	strangury pattern	Dysuria syndrome refers to a condition of frequent and painful urination, abdominal pain, and/or pain radiating to the lower back.
Liu Jing Bian Zheng (Six Stages Differentiation)	六经辨证	*Liu Jing Bian Zheng*	six-channel pattern identification	A system of differential diagnosis based on identifying patterns of disharmony by relationship to the energetic stages *taiyang, yangming, shaoyang, taiyin, shaoyin,* and *jueyin.*
Liver	肝	*Gan*	liver	The Liver stores blood, maintains proper flow of qi, and controls tendons. It connects to the Gallbladder, opens to the eyes, and is associated with the wood element.
loss of qi with hemorrhage	气随血脱	*Qi Sui Xue Tuo*	qi deserting with the blood	A dangerous dynamic in which qi is lost because it flows out with the blood in severe bleeding.
lower *jiao*	下焦	*Xia Jiao*	lower burner	The lower *jiao* represents the hypogastrium, and includes the functions of the Kidney and the Urinary Bladder.
Lung	肺	*Fei*	lung	The Lung controls breathing and the flow of air, regulates water passages, and dominates the skin and hair. It connects with the Large Intestine, opens to the nose, and is associated with the metal element.
lung abscess	肺痈	*Fei Yong*	pulmonary welling-abscess	A disorder characterized by cough, chest fullness, fever and chills, rapid pulse, dry throat without thirst, foul-smelling sputum, and profuse discharge of sputum. It is generally caused by wind-heat attacking the Lung.
luo (connecting) point	络穴	*Luo Xue*	network point	Known as "connecting" or "vessel" points, these assist communication between the yang external and yin internal channels. Fifteen points in all represent each of the twelve channels and one on each of the front, back and side of the trunk.
malaria	疟疾	*Nue Ji*	malaria	An infectious disorder characterized by alternation of chills, fever and perspiration. This disorder occurs most frequently in summer and fall, and is diagnosed as wind, cold, summer-damp, and damp attacking the *ying* (nutritive) and *wei* (defense) levels.
mammary aggregation	乳癖	*Ru Pi*	mammary aggregation	A breast nodule of variable size, slightly mobile, not painful, not of cold or hot origin, does not cause a change in local skin color, nor erupt or cause ulceration. These form primarily because of Liver qi stagnation.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
mammary 'rock'	乳岩	*Ru Yan*	mammary rock	Single or multiple breast nodules similar in size to jujubes, that do not cause pain, itching, redness or heat sensations, and may continue to grow in size. Most common in women past middle age, this is caused by emotional constraint and obstructed flow of Liver and Spleen qi.
metal	金	*Jin*	metal	One of the five elements, metal has inward or contracting movement, represents autumn and harvest, and is associated with the Lung.
middle *jiao*	中焦	*Zhong Jiao*	middle burner	The middle *jiao* represents the epigastrium, and includes the functions of the Spleen and Stomach.
ming men (life gate)	命门	*Ming Men*	life gate	This is key to the overall vitality of the individual. A strong *ming men* (life gate) often indicates that an individual is in great health and will age slowly. A weak *ming men* is often evident in persons who look older than their actual age, and suffer from numerous age-related illnesses.
mu (collecting) point	募穴	*Mu Xue*	alarm point	Commonly referred to as "alarm" or "collection" points, these twelve points individually represent where the qi of a specific internal organ passes on the chest and abdomen.
mumps	痄腮	*Zha Sai*	mumps	An acute infectious disorder commonly seen in children. Clinical presentation includes swelling and pain of the parotid glands, chills and fever, difficulty chewing, and discomfort of the entire body. Most common in winter and spring, it may occur in any season, and is caused by wind-heat (entering the body through the mouth and nose) that becomes blocked in the *shaoyang* channels.
night perspiration	盗汗	*Dao Han*	night sweating	Night perspiration refers to sweating that occurs during sleep, and stops when one awakes. It is an indication of yin deficiency.
over-acting sequence	相乘	*Xiang Cheng*	overwhelming	A concept of *wu xing* (five element) theory that describes a situation in which a controlling element suppresses or reduces the controlled element instead of controlling its growth or activity.
Pericardium	心包	*Xin Bao*	pericardium	The Pericardium is the external covering of the Heart. It functions as the protective barrier of the Heart against pathological factors, and connects with the *San Jiao*.
persistent, indeterminate hunger	嘈杂	*Cao Za*	clamoring stomach	An uncomfortable sensation that mimics pain yet is not painful, that mimics hunger yet the person is not hungry. This condition is usually caused by fire, phlegm accumulation, qi stagnation, or food retention.
perspiration of the palms and soles	手足心汗	*Shou Zhu Xin Han*	sweating in the (heart of the) palms and soles	Profuse perspiration of the hands and feet is an indication of yin deficiency with heat. It is often caused by excessive thinking and worrying that leads to injuries of the Heart and Spleen.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
phlegm	痰	*Tan*	phlegm	Phlegm is a by-product formed from water and damp stagnation. The presence of phlegm may obstruct healthy flow and cause illness throughout the body, damaging the Lung, Heart, Stomach, peripheral channels and collaterals, throat and skin.
plum pit syndrome	梅核气	*Mei He Qi*	plum-pit qi	Globus hystericus – the feeling of having a foreign substance obstructing the throat which cannot be expectorated nor swallowed.
po (corporeal soul)	魄	*Po*	corporeal soul	A term that refers to basic human instinct and reaction, such as the ability to smell, taste, see, distinguish between cold and hot, and the ability of the newborn to nurse and feed. The main function of *po*, which resides in the Lung, is to maintain physical awareness in order to react and adapt to the external environment.
post-decoct	后下	*Hou Xia*	add at end	A specific instruction when preparing a decoction, to add specific herbs near the end of the cooking process and then continue cooking the herbs for approximately 5 to 10 additional minutes.
pre-decoct	先煎	*Xian Jian*	predecoct	Instruction to cook a certain herb or herbs first (usually for 30 minutes, but this varies) before adding the rest of the herbs to cook a decoction.
profuse sweating	大汗	*Da Han*	great sweating	Profuse perspiration often leads to depletion of body fluids. It may occur because of excessive heat or yang collapse.
qi	气	*Qi*	qi	Qi represents the vital energy needed for proper functioning and existence of the organs and the body.
qi (energy) level	气分	*Qi Fen*	qi aspect	*Qi* (energy) level refers to the second of four levels of febrile infections. Heat attacking the qi level may affect such organs as the Stomach, Lung, Intestines, Gallbladder and Spleen. Clinical presentations will vary depending on the organ(s) affected.
qi and blood deficiency	气血两虚	*Qi Xue Liang Xu*	dual vacuity of qi and blood	Insufficiency of both qi and blood, which influences basic organ functions more strongly than insufficiency of either one alone.
qi and blood stagnation	气滞血瘀	*Qi Zhi Xue Yu*	qi stagnation and blood stasis	Obstructed flow of both qi and blood.
qi collapse	气陷	*Qi Xian*	qi fall	Severe insufficiency of qi results in collapse of vital functions.
qi deficiency	气虚	*Qi Xu*	qi vacuity	A condition in which insufficient quantity of qi affects body or organ functions.
qi deficiency bleeding	气虚失血	*Qi Xu Shi Xue*	qi vacuity bleeding	Bleeding caused by insufficiency of qi, and its consequent inability to properly guide the flow of blood.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
qi lin (qi dysuria)	气淋	*Qi Lin*	qi strangury	A urinary tract disorder characterized by obstructed urinary flow, lower abdominal distention and pain, and green-blue tongue color. It is caused by Liver stagnation leading to obstructed flow of qi and urine.
qi stagnation	气滞	*Qi Zhi*	qi stagnation	Obstructed qi flow in internal organs or peripheral channels and collaterals, caused by a variety of factors, including inappropriate diet, emotional disturbance, environmental factors, or external injuries.
Qi Xue Jin Ye Bian Zheng (Qi, Blood, and Body Fluid Differentiation)	气血津液辨证	*Qi Xue Jin Ye Bian Zheng*	qi, blood and fluids pattern identification	A system of differential diagnosis based on patterns of disharmony of qi, blood, and body fluids.
re bi (heat painful obstruction)	热痹	*Re Bi*	heat impediment	One type of *bi zheng* (painful obstruction syndrome) characterized by local redness, swelling, burning sensations and pain. The development of heat is often caused by prolonged obstruction of the channels and collaterals by wind, cold or damp.
re lin (heat dysuria)	热淋	*Re Lin*	heat strangury	A urinary tract disorder characterized by frequent urination, painful and burning sensations upon urination, yellow urine, muscle cramps and pain in the lower abdomen, and a bitter taste in the mouth. This condition is caused by damp-heat attacking the lower *jiao*.
rebellious qi	气逆	*Qi Ni*	qi counterflow	Rebellious qi is the flow of qi opposite of its normal or appropriate direction, such as the flow of Lung qi upwards, that leads to coughing.
ren (conception) channel	任脉	*Ren Mai*	conception vessel	The confluence of all yin vessels, one of the eight extraordinary vessels. Also known as the "Sea of Yin Qi," it relates to urogenital, gynecological and obstetrical functions.
restless fetus	胎动不安	*Tai Dong Bu An*	stirring fetus	Constant downward movement of the fetus, abdominal pain, sore back, and perhaps bleeding, are generally caused by qi deficiency, blood deficiency, Kidney deficiency, heat in the blood, or external injuries.
rock-like breast abscess	乳石痈	*Ru Shi Yong*	rock-like mammary welling-abscess	A rock-hard breast abscess.
San Jiao	三焦	*San Jiao*	triple burner	The *San Jiao* is not an anatomical organ, but a generalization of different sections of the body compartment. The *San Jiao* is divided into upper, middle and lower sectors.
San Jiao Bian Zheng (Triple Burner Differentiation)	三焦辨证	*San Jiao Bian Zheng*	triple burner pattern identification	A system of differential diagnosis based on locating patterns of disharmony in the upper *jiao*, middle *jiao*, or lower *jiao*.
seven emotions	七情	*Qi Qing*	seven affects	Joy, anger, melancholy, meditation, grief, fear and fright. An excess of any of the seven emotions may create illness.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
shang han (cold damage)	伤寒	*Shang Han*	cold damage	A collective term for disorders caused by cold externally-contracted pathogens, diagnosed and treated via *Liu Jing Bian Zheng* (Six Stages Differentiation).
Shang Han Lun (Discussion of Cold-Induced Disorders)	伤寒论	*Shang Han Lun*	On Cold Damage	A text written by Zhang Zhong-Jing in Eastern Han (see bibliography) that focused on diagnosis and treatment of cold-induced disorders. The basic principles of diagnosis and treatment are based on *Liu Jing Bian Zheng* (Six Stages Differentiation).
shaoyang	少阳	*Shao Yang*	lesser yang	Third of six stages in the paradigm of yin and yang. This term identifies the degree of pathology of disease according to the *Shang Han Lun* (Cold-Induced Disorders) text. It also describes the level attributed to the Gallbladder and *San Jiao* channels that travel throughout the body.
shaoyin	少阴	*Shao Yin*	lesser yin	The fifth of six stages in the paradigm of yin and yang. This term describes the degree of pathology of disease according to the *Shang Han Lun* (Cold-Induced Disorders) text. It also identifies the level attributed to the Heart and Kidney channels that travel throughout the body.
shen (spirit)	神	*Shen*	spirit	A term that refers to the entire presentation of the human being, including energy levels, the state of consciousness, and ability to think and reason. Because it is housed in the Heart, disorders affecting the Heart may also lead to disturbance of the *shen*.
shi lin (stone dysuria)	石淋	*Shi Lin*	stone strangury	A urinary tract disorder characterized by lower abdominal tightness and pain, the presence of sandy particles (and possibly blood) in the urine, difficult and painful urination, or sudden termination of the stream of urine. This is caused by damp-heat attacking the lower *jiao*, drying fluids, and leading to the formation of stones.
shi-re lin (damp-heat dysuria)	湿热淋	*Shi Re Lin*	damp-heat strangury	A urinary tract disorder characterized by frequent urination, painful and burning sensations upon urination, yellow urine, muscle cramps and pain in the lower abdomen, and a bitter taste in the mouth, all caused by damp-heat attacking the lower *jiao*. Other symptoms of damp-heat may include nausea, vomiting, constipation, a yellow, greasy tongue coat, and slippery, rapid pulse.
shivering perspiration	战津液汗	*Zhan Han*	shivering	Shivering perspiration is a phenomenon that occurs when the body fights against pathogenic factors. The prognosis is good if the patient has a normal temperature after perspiring. The prognosis is poor if the patient becomes fidgety and irritable after perspiring.
shu (stream) point	输穴	*Shu Xue*	stream point	Commonly referred to as "stream" or "transporting" points, these are usually located near the wrists or ankles and suggest that the flow of qi is now of sufficient quantity to carry out these functions.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
shu (transport) point	俞穴	*Shu Xue*	transport point	Known as "associated points of the back," or "transporting" points, these are twelve points on the upper and lower back where the qi of the internal organs passes. Each represents an organ.
Small Intestine	小肠	*Xiao Chang*	small intestine	Connecting to the Stomach and Large Intestine, the Small Intestine absorbs nutrients from food.
sores	疮疡	*Chuang Yang*	sore	An inclusive term for skin lesions, boils, ulcers, carbuncles and furuncles.
Spleen	脾	*Pi*	spleen	The Spleen governs the transportation and transformation of food, controls blood, and dominates muscle. It connects with the Stomach, opens to the mouth, and represents the earth element.
spontaneous sweating	自汗	*Zi Han*	spontaneous sweating	Spontaneous perspiration, especially after only mild physical activities, is an indication of *wei* (defensive) *qi* deficiency.
summer heat	暑	*Shu*	summerheat	Summer heat is a yang pathogenic factor that occurs only in the summer, and is comprised of both heat and damp characteristics, including upward direction and dispersion. Clinical presentations of summer heat include excessive perspiration, thirst, shortness of breath, fatigue, elevated body temperature, heavy sensations in the extremities, poor appetite, and a feeling of congestion in the chest.
sweaty head	头汗	*Tou Han*	sweating head	Head perspiration generally arises from heat affecting the upper and middle *jiaos*, possibly accompanied by irritability, thirst, a yellow tongue coating, and a rapid pulse.
taiyang	太阳	*Tai Yang*	greater yang	First of six stages in the paradigm of yin and yang, identifying the degree of pathology of disease according to the *Shang Han Lun* (Cold-Induced Disorders) text. It also names the level attributed to the Small Intestine and Urinary Bladder channels that travel throughout the body.
taiyin	太阴	*Tai Yin*	greater yin	The fourth of six stages in the paradigm of yin and yang. This term describes the degree of pathology of disease according to the *Shang Han Lun* (Cold-Induced Disorders) text. It also identifies the level attributed to the Spleen and Lung channels that travel throughout the body.
tan yin (phlegm retention)	痰饮	*Tan Yin*	phlegm-rheum	Phlegm retention caused by accumulation of water and dampness, this may occur at various organs and tissues in the body, leading to different illnesses and clinical presentations.
tong bi (extremely painful obstruction)	痛痹	*Tong Bi*	painful impediment	One type of *bi zheng* (painful obstruction syndrome) characterized by cold. Similar to cold that is stationary and constricting, *tong bi* is distinguished by severe pain at a fixed location. This type of pain intensifies with exposure to cold, and is relieved by exposure to warmth.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
toxin	毒	*Du*	toxin	A toxin is any substance that is potentially harmful to the body. 'Toxin' also describes a pathogenic factor that may cause illness either on the exterior or in the interior of the body. Clinical manifestations of toxicity include pus, abscesses, sores, ulcerations, swelling and inflammation.
tuo zheng (abandoned syndrome)	脱证	*Tuo Zheng*	desertion pattern	Characterized by profuse sweating, cold extremities, open mouth and closed eyes, and urinary incontinence, this condition occurs when there is severe exhaustion of yin, yang, qi and blood.
upper *jiao*	上焦	*Shang Jiao*	upper burner	The upper *jiao* represents the chest, and includes functions of the Heart and the Lung.
Urinary Bladder	膀胱	*Pang Guang*	bladder	The Urinary Bladder stores and excretes urine.
uroschesis	癃闭	*Long Bi*	dribbling urinary block	A disorder in which there is little or no urination, brought about by any of the following: heat in the Urinary Bladder, Kidney yang deficiency, qi deficiency, qi stagnation, or body fluid deficiencies.
wan bi (stubborn painful obstruction)	顽痹	*Wan Bi*	insensitive impediment	One type of *bi zheng* (painful obstruction syndrome) that generally occurs after chronic or repetitive injuries to the same areas, causing stiffness, numbness, and lack of mobility.
water	水	*Shui*	water	Water is one of the five elements, associated with winter, with the Kidney, downward movement, and the ability to store or accumulate.
water and fluid stagnation	水液停滞	*Shui Ye Ting Zhi*		Obstructed flow of water and thick fluids in the body.
wei (atrophy) syndrome	痿证	*Wei Zheng*	wilting pattern	A condition involving decreasing muscle mass and physical strength of the extremities, especially the legs; generally caused by the concurrent presence of excess and deficiency factors.
wei (defense) level	卫分	*Wei Fen*	defense aspect	The first of four levels affected by febrile infections. Heat attacking the *wei* (defense) level is characterized by disorders of the Lung, with such symptoms as fever, headache, dry mouth, thirst, cough, and sore throat, and a red tongue, and superficial, rapid pulse.
wei (defensive) *qi*	卫气	*Wei Qi*	defense qi	A type of yang qi responsible for warming the exterior, nourishing the skin and muscles, circulating under the skin to prevent invasion by external pathogenic factors, and controlling the skin pores and perspiration. It is generated by the Spleen and Stomach from the essence of food, controlled by the Lung, and resides in the upper *jiao*.
wei bi (atrophic painful obstruction)	痿痹	*Wei Bi*	wilting impediment	One type of *bi zheng* (painful obstruction syndrome) caused by deficiency of the Liver and Kidney, with such presentations as atrophy, weakness and pain of the muscles and bones.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Wei Qi Ying Xue Bian Zheng (Defensive, Qi, Nutritive, Blood Differentiation)	卫气营血辨证	*Wei Qi Ying Xue Bian Zheng*	four aspect pattern identification	A system of differential diagnosis based on patterns of disharmony found in the *wei* (defense) level, *qi* (energy) level, *ying* (nutritive) level or *xue* (blood) level.
wen bing (warm diseases)	温病	*Wen Bing*	warm disease	Acute illnesses caused by externally contracted heat factors: diagnosed and treated based on *Wei Qi Ying Xue Bian Zheng* (Defensive, Qi, Nutritive, Blood Differentiation) and *San Jiao Bian Zheng* (Triple Burner Differentiation).
wheezing and dyspnea	哮喘	*Xiao Chuan*	wheezing and panting	A disorder characterized by wheezing, dyspnea and hurried respiration.
wind	风	*Feng*	wind	Wind is a pathogenic factor that attacks the body through the pores. Wind is a yang pathogenic factor characterized by upward, outward dispersion. Clinical presentation of exterior wind includes headache, nasal obstruction, sore throat, aversion to wind and sweating.
wind rash	风疹	*Feng Zhen*	wind papules	An infectious skin disorder commonly seen during winter and spring in children under five years of age. Generally caused by wind-heat attack, it is characterized by itching, rashes and wheals of various sizes.
wood	木	*Mu*	wood	One of the five elements, wood represents the expansive energy of Spring, moving outward in all directions, and is associated with the Liver.
wu shu (five transport) points	五输穴	*Wu Shu Xue*	five transport points	Located below the knees and elbows, these points represent the growth of qi from small to large volume. Their name suggests images of the flow of water. It starts with only a small quantity in a *jing* (well), gushes out into a *ying* (spring), flows from shallow to deep as a *shu* (stream), traverses like a *jing* (river) through the continent, and finally unites with the *he* (sea).
wu xin re (five-center heat)	五心热	*Wu Xin Re*	vexing heat in the five hearts	A condition characterized by yin-deficiency heat in which there is a warm sensation at the center of the palms, the soles and the chest.
xi (cleft) point	郄穴	*Xi Xue*	cleft point	"Accumulating" or "cleft" points represent the holes or crevices where circulating qi accumulates. There are a total of sixteen such points, one for each of the twelve regular channels, as well as the *yangqiao, yinqiao, yangwei* and *yinwei* channels.
xiao ke (wasting and thirsting) syndrome	消渴	*Xiao Ke*	dispersion-thirst	A pathological condition characterized by increased intake of water and food, increased frequency of urination, and decreased body weight.
xing bi (mobile painful obstruction)	行痹	*Xing Bi*	moving impediment	One type of *bi zheng* (painful obstruction syndrome) caused by wind attacking the body. Similar to wind that is light and mobile, xing bi is characterized by pain in the upper body, specifically pain that travels from one area to another.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
xiong bi (painful obstruction of the chest)	胸痹	*Xiong Bi*	chest impediment	Characterized by feelings of chest congestion, pain and discomfort, this condition is usually caused by factors such as cold excess, yang deficiency, or phlegm stagnation.
xue (blood) level	血分	*Xue Fen*	blood aspect	*Xue* (blood) level refers to the fourth level of febrile infections. Heat attacking the *xue* level is characterized by disorders of the Heart and Liver, with such symptoms as high fever, anger, mania, various types of bleeding, delirium, convulsions and clenched jaws.
xue bi (blood painful obstruction)	血痹	*Xue Bi*	blood impediment	One type of *bi zheng* (painful obstruction syndrome) that is related to blood. Dull pain may be caused by blood deficiency and the inability to nourish the tendons and bones. Sharp pain is often related to blood stagnation blocking the channels and collaterals.
xue lin (bloody dysuria)	血淋	*Xue Lin*	blood strangury	A urinary tract disorder characterized by the presence of blood or blood clots in the urine, and burning sensations and pain during urination. Accompanying symptoms may include fatigue, back pain, a pale red tongue, and a thready, rapid pulse. This condition is caused by damp-heat attacking the lower *jiao*, leading to bleeding and obstructed flow of qi and urine.
yang	阳	*Yang*	yang	Yang is the complement to and opposite of yin. Anatomically, it represents the upper, posterior and exterior parts of the body. Physiologically, it represents body functioning, such as the energy level, rate of metabolism, and state of awareness. Pathologically, it represents disharmony or imbalance of body organs.
yangming	阳明	*Yang Ming*	yang brightness	Second of the six stages in the paradigm of yin and yang, this term describes the degree of pathology of disease according to the *Shang Han Lun* (Cold-Induced Disorders) text. It also identifies the level given the Stomach and Large Intestine channels that travel throughout the body.
yangqiao (movement) channel	阳跷脉	*Yang Qiao Mai*	yang springing vessel	Another of the eight extraordinary vessels, this one pairs with *yinqiao* to maintain proper sleep cycles and control movement and balance.
yangwei (linking) channel	阳维脉	*Yang Wei Mai*	yang linking vessel	Of the eight extraordinary vessels, this one dominates the exterior in cooperation with *yinwei*, to balance yin and yang in the four extremities.
ye (thick body fluid)	液	*Ye*	humor	An inclusive term that describes body fluids of higher density, such as the fluid that lubricates the joints and moistens the bone marrow.
yi (intellect)	意	*Yi*	intellect	The ability to think, study, memorize, focus, understand, and all other cognitive activities. It resides in the Spleen. Therefore, excessive use of *yi* may consume the Spleen, and deficiency of the Spleen may interfere with the optimal performance of *yi*.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
yin	阴	*Yin*	yin	Yin is the complement to and opposite of yang. Anatomically, it represents the lower, anterior and interior parts of the body. Physiologically, it represents the substances of the body, such as blood, sweat, saliva and body fluids. Pathologically, it represents the disharmony or imbalance of body organs.
yin (invisible phlegm)	饮	*Yin*	rheum	*Yin* (invisible phlegm) is the by-product formed from stagnation of water and dampness. *Yin* is the less viscous form of *tan* (phlegm).
ying (nutritive) level	营分	*Ying Fen*	construction aspect	The *ying* (nutritive) level refers to the third of four levels of febrile infections. Heat attacking the *ying* level is characterized by disorders of the Heart, with such symptoms as fever, thirst, irritability, delirium, red tongue and thready, rapid pulse.
ying (spring) point	荥穴	*Ying Xue*	spring point	"Gushing" or "spring" points are located in distal parts of the body; their name suggests that qi has begun to flow in larger quantity.
yinqiao (movement) channel	阴跷脉	*Yin Qiao Mai*	yin springing vessel	Another of the eight extraordinary vessels; see *yangqiao.*
yinwei (linking) channel	阴维脉	*Yin Wei Mai*	yin linking vessel	Another of the eight extraordinary vessels: in cooperation with *yangwei*, this one dominates the interior; to balance yin and yang in the four extremities.
yuan (source) point	原穴	*Yuan Xue*	source point	Known as "source" points, these are locations to which the qi of the organs flows and is retained. There are twelve such points, each representing a channel and an organ.
yuan (source) *qi*	原气	*Yuan Qi*	source qi	The most basic and most important qi in the body, *yuan* (source) *qi* is derived pre-natally from the *jing* (essence) of one's parents, and post-natally from the essence of food. It is distributed throughout the body to maintain health and well-being.
zang (solid organ)	脏	*Zang*	viscus	Solid organs of the body, including the Heart, Lung, Spleen, Liver and Kidney.
zang fu	脏腑	*Zang Fu*	bowels and viscera	The general term for the five *zang* (solid) and six *fu* (hollow) organs.
Zang Fu Bian Zheng (Organ Pattern Differentiation)	脏腑辨证	*Zang Fu Bian Zheng*	organ pattern identification	A system of differential diagnosis based on patterns of disharmony of *zang* (solid) organs and *fu* (hollow) organs.
zang zao (dry organ) disorder	脏燥	*Zang Zao*	visceral agitation	In middle-aged to geriatric women, this disorder is characterized by symptomology such as emotional instability, mental confusion, crying, episodes of extreme sadness or happiness, and increased sensitivity to stimulus.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
zheng (upright) *qi*	正气	*Zheng Qi*	right qi	A term that summarizes the positive strength generated by healthy functioning of the organs. In comparison to the pathogenic factors, *zheng* (upright) *qi* also represents one's immunity.
zhi (will-power)	志	*Zhi*	mind	A term that encompasses will-power and memory. Stored by the Kidney, *zhi* controls drive, determination, motivation, memory and will-power.
zhong (central) *qi*	中气	*Zhong Qi*	center qi	The qi of the middle *jiao* represents the healthy functioning of the Spleen and Stomach to transport and transform food and nutrients.
zhong feng (wind stroke)	中风	*Zhong Feng*	wind stroke	An acute disorder of semi- or un-consciousness, deviation of the eyes or mouth, hemiparalysis, and difficulty with speech. The cause of the illness is predominantly wind, but this may be accompanied by blood deficiency, phlegm, fire, or other pathogens.
zhou bi (generalized painful obstruction)	周痹	*Zhou Bi*	generalized impediment	One type of *bi zheng* (painful obstruction syndrome) characterized by generalized pain that also affects the bones and joints.
zhuo bi (fixed painful obstruction)	着痹	*Zhuo Bi*	fixed impediment	One type of *bi zheng* (painful obstruction syndrome) that often occurs when damp affects specific, fixed areas. Similar to dampness that is heavy and sinking, *zhuo bi* is characterized by pain and swelling in the lower extremities.
zong (essential) *qi*	宗气	*Zong Qi*	ancestral qi	Zong (essential) *qi* is derived from air taken in by the Lung, and nutrients absorbed by the Spleen and Stomach. It functions to maintain proper ventilation of the Lung and circulation of the Heart.

About the Authors and Contributors

Authors:

John K. Chen, PhD, PharmD, OMD, LAc

Dr. John Chen actively participates in education, research and the frontiers of contemporary application of herbal medicine. In addition to developing professional continuing education seminars and serving as a senior lecturer through the widely-respected Lotus Institute of Integrative Medicine, Dr. Chen speaks at seminars and conferences for universities and local, state, national and international educational and professional organizations. A professor at Yo San University of Traditional Chinese Medicine, Emperor's College of Traditional Oriental Medicine, and the University of Southern California School of Pharmacy, Dr. Chen is also a member of the Herbal Medicine Committee for the American Association of Oriental Medicine (AAOM) and an herbal consultant for the California State Oriental Medicine Association (CSOMA). A recognized authority on Chinese herbal medicine and western (allopathic) pharmacology, Dr. Chen has written extensively on Oriental medicine and alternative complementary/integrative medicine for professional publications, journals and texts, drawing on his wealth of specialty post-graduate training and experience in mainland China in herbology as applied in internal medicine, and on his doctoral degrees from the University of Southern California (USC) School of Pharmacy and South Baylo University of Oriental Medicine. An editorial board member for the peer-reviewed journal of the American Academy of Medical Acupuncture (AAMA), *Medical Acupuncture*, John Chen was also a board member of the 1999 *Los Angeles Times* Festival Honorary Committee and speaker on Herbal Medicine for the City of Los Angeles First Annual Festival of Health. Appearing in the Discovery Channel 1999 six-hour documentary on alternative and complementary medicine, Dr. Chen served as the expert resource on Traditional Chinese Medicine. He also was guest speaker on herb-drug interactions in 1998 for the annual USC Bergen Brunswig convention, during which he addressed over 400 pharmacists and medical doctors. Dr. Chen maintains his consulting practice in Southern California.

Tina T. Chen, MS, LAc

Tina Chen is an active and respected educator in Oriental medicine and Chinese herbal medicine. In addition to lecturing on TCM Gynecology and Cosmetology across North America through the widely-respected Lotus Institute of Integrative Medicine, Ms. Chen is active on the faculty of South Baylo University of Oriental Medicine and has been an active contributor to professional journals and publications. She has served as Southern California Chair of the Education Committee for the California State Oriental Medical Association (CSOMA), and as an examiner for the California State License Exam for acupuncturists, and from 1996-2001 maintained private practice of acupuncture and herbal medicine through Chen's Clinic in La Puente, California. Her teaching and consulting is grounded in extensive post-graduate training in herbal medicine, TCM gynecology and cosmetology in numerous hospitals in mainland China. This included concentrated training sponsored by the World Health Organization (WHO) in Guang-An-Men Hospital of Traditional Chinese Medicine, Beijing, in the People's Republic of China, specializing in internal medicine, acupuncture and gynecology; also intensive clinical training in internal medicine and gynecology at First Tien-Jin Hospital, People's Republic of China; and at An-Hui Hospital, People's Republic of China, advanced training in internal medicine. Tina Chen's expertise in translation includes serving as translation specialist for the International Association of Integrating East-West Medicine from 1996-2000, the 1996 Third Annual International Acupuncture and Massage Conference sponsored by the Acupuncture and Massage Institute of America, and the California State Association of Oriental Medicine (CSOMA) in 1990. Licensed by the Acupuncture Board in California, Tina Chen also holds certification from the World Health Organization in internal medicine and gynecology. A graduate of South Baylo University of Oriental Medicine, she also earned a B.A. from the University of California at Irvine School of Humanities, in East Asian Language and Literature. She maintains a consulting practice in Southern California.

About the Authors and Contributors

Laraine Crampton, MPW, MLA, MATCM, LAc
Active on the faculty of Yo San University of Traditional Chinese Medicine since 1995, Laraine Crampton practices Traditional Chinese Medicine (TCM) through her private practice in Santa Monica, California. From July 1999 through late 2000, she was the charter Traditional Chinese Medicine Specialist in practice and patient education lecturer for B'shert Integrative Oncology Services (BIOS), the integrative medicine center of California Hematology Oncology Medical Group in Los Angeles. For the Torrance Memorial Medical Center in Torrance, California, Ms. Crampton served as a speaker and consultant on Traditional Chinese Medicine in integrative medicine settings through the Advantage public education program in 2000 and 2001. She received her graduate degree in TCM from Yo San University, and holds board licenses in Acupuncture and Herbology through the State of California Acupuncture Board and the National Certification Commission for Acupuncture and Oriental Medicine. Ms. Crampton has long been active as a writer and editor. Her previous publication experience includes having served as consultant, researcher, writer and editor for Affinity Communications in Los Angeles, contributing editor for Pacific Rim Business Journal, editor for the University of Southern California's Student Health Center publications, and ghostwriter for medical doctors publishing in journals such as the *Annals of Plastic Surgery*. Former Adjunct Professor in writing and Business Communications at the University of Southern California, Ms. Crampton also reported for the Los Angeles *Weekly* and National Public Radio's *Living on Earth*, as well as co-producing, co-writing and editing KCRW's award-winning *Arts/L.A.*, and serving as a founding producer for the respected daily public affairs broadcast *Which Way, L.A.?*

Editors

Vanessa G. Au, LAc, DC
Dr. Au received her Doctorate of Chiropractic from Los Angeles College of Chiropractic in 1998, and Master of Science in Acupuncture and Oriental Medicine from South Baylo University in 1999. She maintains a private practice in Acupuncture and Chiropractic in San Jose, California.

Colleen Burke, DOM, LAc, Dipl Ac & CH
Dr. Burke has written and/or contributed to articles on Chinese herbal medicine in a variety of publications. Specializing in environmental illness, immune dysfunction, arthritis, women's health, and the mind-body connection, Dr. Burke maintains a private practice in Santa Fe, New Mexico.

Christian DellaCorte, PhD
Dr. Christian DellaCorte is neurochemist with an interest in the pharmacological basis of Chinese herbs. She graduated from the University of Southern California (USC) and received training in herbology from Emperor's College in California. She currently teaches cellular and biomedical physiology and participates in research in the BioEngineering Department at the California Institute of Technology, Pasadena, California.

Joerg Fritschi, MD
Dr. Fritschi graduated from the University of Basel School of Medicine in 1981. He also received extensive training in traditional Chinese medicine, studying acupuncture at the Donghzhimen World Health Organization Collaborating College in Beijing, the People's Republic of China, Chinese herbology at Five Branches Institute in Santa Cruz, CA, USA, and Scalp Acupuncture (with Prof. Ming Qing Zhu) in La Jolla, CA, and Shanghai, PRC. He has served as a board member of the Swiss Society of TCM (Herbology), vice-president of the Swiss Society of Internal Medicine, expert member at the Swissmedic Study Group for the Regulation of Asian Herbs, and board member of the Swiss Society of Internal Medicine. Dr. Fritschi has an integrative medical practice in Pfeffingen, Switzerland.

About the Authors and Contributors

Steve Given, LAc, Dipl Ac
Steve Given holds a master's degree in traditional Oriental medicine from Emperor's College of Traditional Oriental Medicine. He is administrator and a faculty member of the Bastyr Center for Natural Health and a faculty member at Bastyr University. He is a site visitor for the Accreditation Commission for Acupuncture and Oriental Medicine, and Secretary of the Council of Colleges of Acupuncture and Oriental Medicine. Prior to his appointment at Bastyr, Given was Director of Clinical Education and a faculty member in western sciences at Yo San University of Traditional Chinese Medicine and specialized in addiction education and treatment. Steve Given resides in Seattle, Washington.

Glenn Grossman, MS, LAc, Dipl Ac & CH
Mr. Grossman has a bachelor's degree with honors and a master's degree from Samra University of Oriental Medicine. After graduation, Mr. Grossman did extensive training in TCM at Anhui College of Traditional Chinese Medicine and the China Beijing Acupuncture Institute. He is currently affiliated with the American Association of Oriental Medicine (AAOM) and Michigan Association of Acupuncture and Oriental Medicine (MAAOM). Mr. Grossman has a private practice in Okemos, Michigan, where he also teaches Herbology for Healthcare Professionals through the nursing program at Lansing Community College.

Lily Huang, BS
Ms. Huang graduated from the University of California, Los Angeles with magna cum laude honors. She graduates from South Baylo University of Oriental Medicine in 2003, and is a licensed acupuncturist candidate living in Los Angeles.

Steven M. Jarsky LAc, Dipl Ac & CH
Steven Jarsky, Los Angeles-based acupuncturist and herbalist, specializes in internal medicine. Licensed in acupuncture and Chinese herbology by the state of California, board certified through the National Certification Commission of Acupuncture and Oriental Medicine (NCCAOM), he has been working as a Chinese herbalist since 1995, and graduated from Yo San University of Traditional Chinese Medicine with highest honors in a Master's degree in TCM.

Jing-Lih Lily Ko, LAc
Ms. Ko is a PhD candidate in the Acupuncture and Oriental Medicine Program of Yuing University in Compton, California. She is currently in private practice in Temple City, California.

Anita Chen Marshall, Pharm.D., MS, Dipl Ac, LAc
Dr. Anita Chen Marshall practices acupuncture and herbal medicine at the Sequoia Healing Center in Alameda, California. She holds a BS in Pharmacy from the University of Washington and a Pharm. D. from the University of the Pacific, and a Masters degree in Oriental Medicine from the Academy of Chinese Culture and Health Science. Dr. Marshall has more than 20 years of experience in all areas of pharmacy, including serving as Director of Pharmacy at a hospital. Nationally certified in both acupuncture and herbology, she is devoted to using her training and experience in helping to build the bridge between Eastern and Western medicine.

Cathy McNease, LAc
Cathy McNease holds a Diplomat in Chinese Herbology from the National Certification Commission of Acupuncture and Oriental Medicine (NCCAOM), a B.S. in Biology and Psychology from Western Michigan University and two Master Herbalist certificates from Emerson College of Herbology in Canada and East-West Course in Herbology. She has co-authored two books, *Tao of Nutrition* and *101 Vegetarian Delights*. Currently on the faculty at Santa Barbara College of Oriental Medicine, Ms. McNease is chairperson of the herbal department and Director of the Herbal Clinic. She is also on the faculties of Emperor's College of

About the Authors and Contributors

Traditional Oriental Medicine and Yo San University of Traditional Chinese Medicine. In addition to her teaching and professional activities, Cathy McNease maintains a Chinese herbal pharmacy business, *Best Blends Herbs.*

Lawrence Miller, LAc, Dipl Ac & CH
Lawrence Miller specializes in cancer recovery and detoxification, as well as orthopedic pain management in his practice in Santa Monica, California. A graduate of Yo San University of TCM, Miller is also a Qualified Medical Evaluator and acupuncture detoxification specialist.

William R. Morris, DOM, LAc
Dr. Morris is Dean of Clinical Education at Emperor's College of Traditional Oriental Medicine and serves as a board member for the American Association of Oriental Medicine (AAOM). He has developed expertise in a subspecialty in pulse diagnosis since 1980, beginning with Nan Jing methods and subsequent work in the Ting family lineage of John H.F. Shen. A published author and teacher, Dr. Morris is also an editorial consultant for Elsevier Science on texts related to Chinese Medicine. His private practice is in Santa Monica, California.

Minh Thanh Nguyen, BA, MA
Ms. Nguyen graduated summa cum laude from the University of California, Riverside in 1994, and received her Master of Arts in English Literature from Cornell University in 1998. She studied naturopathic medicine at Bastyr University in 2001-2002, and is currently studying acupuncture and Oriental medicine at South Baylo University of Oriental Medicine in Los Angeles.

Daoshing Ni, DOM, PhD, LAc, Dipl CH
Co-founder and president of Yo San University of Traditional Chinese Medicine, Dr. Ni is well known and respected for his specialty in reproductive and gynecological medicine, and is a member of the American Society for Reproductive Medicine, the Pacific Coast Fertility Society, and the National Academy of Acupuncture and Oriental Medicine. He has served as an examiner for the California Acupuncture Committee and in development of the Chinese Herbology Exam for the National Certification Commission of Acupuncture and Oriental Medicine (NCCAOM). He pursued post-doctoral training in Beijing and Nanjing, and taught at Emperor's College and Samra University before becoming president of Yo San University. Author of numerous articles, books and videos on TCM, qigong, endometriosis and infertility, Dr. Ni maintains a full-time practice in Santa Monica, California.

Ray Rubio, LAc
Ray Rubio co-founded the Traditional Healing Arts Center in Los Angeles, and is on the staff of the Toluca Lake Health Center, a busy out-patient medical clinic. He serves on the academic and clinical faculties of Emperor's College of Traditional Oriental Medicine in Santa Monica.

Antihypertensive drugs, herb-drug interaction, 107, 613, 780

Index

Antihypertensive effect, 66, 79, 82, 106, 122, 125, 128, 139, 146, 157, 159, 161, 181, 187, 192, 245, 249, 283, 305, 322, 327, 340, 341, 366, 387, 402, 419, 424, 524, 532, 546, 573, 575, 594, 702, 720, 724, 734, 741, 772, 780, 783, 804, 851, 894, 902, 1014, 1015, **1112**
Anti-inflammatory drugs, herb-drug interaction, 303
Anti-inflammatory effect, 35, 56, 61, 69, 71, 79, 85, 88, 105, 125, 139, 143, 156, 161, 165, 172, 175, 180, 185, 187, 209, 215, 217, 227, 272, 302, 305, 308, 310, 318, 322, 334, 335, 340, 348, 349, 440, 444, 456, 480, 568, 573, 594, 612, 619, 624, 625, 630, 634, 644, 651, 655, 660, 697, 823, 869, 888, 894, 902, 921, 932, 963, 1006, **1112**
Antimalarial effect, 230, 245, 1029, **1112**
Antimutagenic effect, 133, **1112**
Antineoplastic drugs, herb-drug interaction, 189
Antineoplastic effect, 105, 112, 116, 132, 152, 166, 198, 201, 203, 205, 207, 209, 212, 220, 230, 279, 281, 325, 327, 348, 384, 386, 390, 486, 540, 555, 562, 579, 612, 630, 638, 660, 665, 667, 681, 684, 687, 724, 728, 771, 789, 791, 819, 854, 858, 873, 884, 910, 912, 947, 958, 1004, 1048, 1050, 1052, 1057, **1113**
Antioxidant effect, 71, 183, **1113**
Antiparasitic effect, 152, 292, 382, 419, 504, 540, 542, 544, 546, 548, 549, 551, 552, 555, 579, 644, 989, 1002, 1057, **1113**
Antiparasitic herbs, 539
Antiplatelet drugs, herb-drug interaction, 28, 83, 164, 182, 211, 303, 305, 333, 336, 346, 362, 366, 372, 486, 500, 563, 589, 594, 613, 617, 622, 624, 639, 642, 644, 646, 662, 665, 667, 669, 672, 700, 740, 823, 858, 888, 923, 934
Antiplatelet effect, 79, 82, 106, 163, 181, 210, 232, 305, 332, 336, 372, 486, 499, 589, 594, 612, 616, 624, 638, 641, 646, 671, 700, 823, 854, 858, 921, 932, **1114**
Antipsychotic drugs, herb-drug interaction, 491, 546
Antipyretic effect, 34, 38, 42, 44, 48, 50, 52, 54, 56, 59, 61, 69, 71, 78, 82, 85, 88, 92, 105, 109, 112, 120, 139, 143, 154, 159, 161, 163, 172, 175, 180, 184, 209, 215, 220, 245, 249, 272, 303, 308, 339, 390, 419, 426, 496, 630, 697, 741, 763, 780, 782, 795, 932, 949, 1029, **1114**
Antirheumatic effect, 228
Antiseizure effect, 154, 161, 163, 227, 334, 687, 754, 780, 782, 784, 786, 788, 791, 793, 795, **1114**
Antispasmodic effect, 35, 61, 82, 126, 163, 174, 201, 308, 573, 592, 633, 740, 772, 869, 993
Antitoxin effect, 315, 462, 504, 869, **1116**
Antitrichomonal effect, **1114**
Antitussive effect, 38, 42, 63, 146, 177, 187, 217, 227, 246, 289, 293, 322, 348, 375, 392, 417, 426, 483, 575, 592, 601, 630, 644, 662, 680, 684, 697, 699, 702, 704, 711, 721, 724, 730, 735, 741, 771, 870, 894, 942, 956, 995, 996, 1039, 1054, **1114**
Antiulcer drugs, herb-drug interaction, 362, 437, 477, 522
Antiulcer effect, 143, 220, 453, 459, 573, 582, 619, **1115**
Antivenin effect, 35, 198, 215
Antiviral drugs, herb-drug interaction, 177
Antiviral effect, 35, 41, 52, 105, 146, 177, 181, 209, 218, 316, 346, 370, 417, 984, 1048, **1115**
Antler, deer, 878
Anus, rash and itching, 1061
Anxiety, 621, 758, 765, 773, 966, 986, **1077**. *See also* Stress; Restlessness; Anxiolytic effect; Sedative effect; Tranquilizing effect
