

# Metropolitan Study Group

## “The Higher Mysteries in the Golden Dawn”

September, 2009 to February, 2010

*The Societas Rosicruciana In Anglia began as a study group and today, upon entry, its members promise to study the Higher Mysteries with zeal. In the 1880s the Society produced a generation of outstanding scholars, translators and authors who went on to “rebirth” the wisdom and understandings of the Ancient Western priesthods and Mystery Schools in a series of rituals and curricula.*

*Harking back to this Golden Age of SRIA study, the Metropolitan College Study Group is staging an open series of six lectures totalling ten hours to be given by five of its members. The talks are based upon the knowledge lectures of the Golden Dawn outer order degrees as published by Israel Regardie in the 1930s. Together they provide a comprehensive survey of the Higher Mysteries of Spiritual Alchemy, Kabbalah, Astrology, Hermeticism, the Tarot, Enochian, the Hebrew Letters and Gematria, much of which was utilised by the “wise and learned” authors of the Rosicrucian Famas, the inspiration for the founding of the society.*

*These are erudite subjects affording a lifetime of intellectual and spiritual development as well as self-improving practices. These lectures and workshops are designed to enable time-pressed members of the SRIA to experience the essential teachings of the Golden Dawn as well as complement the study of those embarking on the “Great Work”.*

### Workshop and Lecture Programme

Sat., 19th Sep., 2009
